 - conduct effective formal and informal meetings and communicate effectively with personnel at all levels of the organisation, and with external parties and individuals
 - use language appropriate to the work team and the task
- consultation and negotiation skills to:
 - develop plans
 - implement and monitor designated actions
- information technology skills to:
 - access and download internal and external information and data on WHS
 - use a range of communication media
- literacy skills to write policies, procedures and plans
- numeracy skills to:
 - analyse workplace information and data
 - carry out calculations
 - identify trends
- organisational skills to manage own tasks within a timeframe
- project-management skills to:
 - achieve continuous improvement
 - action processes about WHS matters

- research skills to:
 - access relevant WHS information and data
 - identify areas for improvement
 - interpret information and data.

Required knowledge

- difference between hazard and risk
- formal and informal communication and consultation processes, and key personnel related to communication
- how the characteristics and composition of the workforce impact on WHS risk and the management of WHS, including:
 - communication skills
 - cultural background and diversity
 - gender
 - labour market changes
 - language, literacy and numeracy levels of the workforce
 - structure and organisation of the workforce, including part time, casual and contract workers; shift rosters; and geographical location
 - workers with specific needs and limitations
 - workplace culture towards alcohol and other drug use
- internal and external sources of WHS information and data, and how to access them
- limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- organisational behaviour and culture as they impact on WHS and on change
- organisational culture as it impacts on the work team
- organisational WHS policies, procedures, processes and systems
- other functional areas that impact on the management of WHS
- pertinent sections of relevant Australian standards and publications, including:
 - AS/NZS ISO 31000–2009 Risk Management – Principles and Guidelines
 - Standards Australia publication HB 327:2010 Communicating and consulting about risk (Companion to AS/NZS ISO 31000:2009)
 - Standards Australia publication HB 158-2010 Delivering assurance based on ISO 31000:2009 – Risk management – Principles and guidelines
- principles and practices of a systematic approach to managing WHS
- principles of duty of care, including concepts of causation, foreseeability and preventability
- principles of incident causation and injury processes

- range of risk analysis and assessment techniques and tools, and their application and limitations
- relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks
- risk as the effect of uncertainty on objectives
- risk management as a duty of persons conducting businesses or undertakings (PCBUs) or their officers under WHS legislation
- roles and responsibilities of individuals and parties under WHS legislation
- sources of occupational disease and their prevention
- standard industry controls for a range of hazards
- techniques, tools and processes for identifying and controlling health and safety hazards and risks, including:
 - hazard and risk checklists
 - hazard hunts
 - job safety analyses
 - manifests and registers, including for dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk throughs
- toxicology of hazardous chemicals and potential health effects in the workplace.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • contributing to the development, implementation and evaluation of a systematic approach to WHS risk management • knowledge of pertinent sections of relevant Australian standards and WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks • preparing an action plan to implement a systematic approach to WHS risk management • preparing positive performance indicators for

	evaluation of a systematic approach to WHS risk management.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • actual workplaces and stakeholder groups • office equipment and resources • relevant legislation, standards and guidelines • workplace documentation • reports from other parties consulted during the approach to WHS risk management.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • demonstration of techniques used to identify, analyse, evaluate, control and monitor risks • direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • review of information and data communicated to stakeholders about the WHS risk process • assessment of comparison of outcomes of WHS risk analysis with criteria • review of documentation of process and outcomes of analysis and evaluation of WHS risk of a task or process.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBWHS502A Manage effective WHS consultation and participation processes • BSBWHS504A Manage WHS hazards and risks • BSBWHS506A Contribute to developing, implementing and maintaining WHS management systems • BSBWHS507A Contribute to managing WHS information systems

	<ul style="list-style-type: none"> • BSBWHS508A Manage WHS hazards associated with plant.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	<p>1.1. Select appropriate <i>technology</i> and <i>software applications</i> to achieve the requirements of the task</p> <p>1.2. Adjust workspace, furniture and equipment to suit user ergonomic requirements</p> <p>1.3. Use technology according to <i>organisational requirements</i> and in a way which promotes a safe work environment</p>
2. Process and organise data	<p>2.1. Identify, open, generate or amend files and records according to task and organisational requirements</p> <p>2.2. Operate <i>input devices</i> according to organisational requirements</p> <p>2.3. <i>Store data</i> appropriately and exit applications without damage to or loss of, data</p> <p>2.4. Use manuals, training booklets and/or online help or help-desks to overcome basic difficulties with applications</p>
3. Maintain technology	<p>3.1. Identify and replace used <i>technology consumables</i> in accordance with manufacturer's instructions and organisational requirements</p> <p>3.2. Carry out and/or arrange <i>routine maintenance</i> to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. <i>Identify equipment faults</i> accurately and take action in accordance with manufacturer's instructions or report fault to designated person

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify work requirements; to understand and process basic, relevant workplace information; and to follow written instructions
- communication skills to request advice, to receive feedback and to work with a team
- problem-solving skills to solve routine technology problems.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
- ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies, plans and procedures, especially in regard to file-naming and storage conventions
- organisational IT procedures including back-up and virus protection procedures
- basic technical terminology in relation to reading help-files and manuals.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • selection and application of appropriate equipment and software applications in relation to assigned task/s • access, retrieval and storage of required data • performance of basic maintenance on a range of office equipment
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of files and data for storage • manuals and training booklets for equipment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of office equipment • evaluation of maintaining technology.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • IT use units • other industry capability units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Technology may include:	<ul style="list-style-type: none"> • computer technology, such as laptops and personal computers • digital cameras • modems • printers • scanners • zip drives • photocopiers • shredders • binders • laminators • cutters
Software applications may include:	<ul style="list-style-type: none"> • email, internet • word processing, spreadsheet, database, accounting or presentation packages
Organisational requirements may include:	<ul style="list-style-type: none"> • correctly identifying and opening files • legal and organisation policies, guidelines and requirements • locating data • log-on procedures • manufacturer's guidelines • OHS policies, procedures and programs • saving and closing files • storing data
Input devices may include:	<ul style="list-style-type: none"> • keyboard • mouse • numerical key pad • scanner
Storage of data may include:	<ul style="list-style-type: none"> • appropriate storage/filing of hard copies of computer generated documents • storage in directories and sub-directories • storage on CD-ROMs, hard and floppy disk drives or back-up systems
Technology consumables may include:	<ul style="list-style-type: none"> • back-up tapes • CD-ROM • floppy disks

RANGE STATEMENT	
	<ul style="list-style-type: none"> • print heads • printer ribbons and cartridges • toner cartridges • zip disks
<i>Routine maintenance</i> may include:	<ul style="list-style-type: none"> • in-house cleaning and servicing of equipment according to manufacturer's guidelines • periodic servicing by qualified or manufacturer approved, technician • regular checking of equipment • replacing consumables
<i>Identifying equipment faults</i> may include:	<ul style="list-style-type: none"> • checking repairs have been carried out • encouraging feedback from work colleagues • keeping a log book of detected faults • preparing a maintenance program • regular back-ups of data • regular OHS inspections • routine checking of equipment

BSBWOR301B Organise personal work priorities and development

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Performance criteria and required skills updated to focus on learning and development practices, KPIs and compliance with policy and procedures.</p> <p>Replaces BSBWOR301A Organise personal work priorities and development</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance, and to maintain required levels of competence. Operators may exercise discretion and judgement using appropriate theoretical knowledge of work scheduling and performance improvement to provide technical advice and support to a team.

Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Organise and complete own work schedule	<p>1.1 Ensure that <i>work goals, objectives</i> or <i>KPIs</i> are understood, negotiated and agreed in accordance with <i>organisational requirements</i></p> <p>1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes</p> <p>1.3 Identify <i>factors affecting the achievement of work objectives</i> and incorporate contingencies into work plans</p> <p>1.4 Use <i>business technology</i> efficiently and effectively to manage and monitor scheduling and completion of tasks</p>
2. Monitor own work performance	<p>2.1 Accurately monitor and adjust personal work performance through self-assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs</p> <p>2.2 Ensure that <i>feedback on performance</i> is actively sought and evaluated from colleagues and clients in the context of individual and group requirements</p> <p>2.3 Routinely identify and report on variations in the quality of and <i>products and services</i> according to organisational requirements</p> <p>2.4 Identify <i>signs of stress</i> and effects on <i>personal wellbeing</i></p> <p>2.5 Identify <i>sources of stress</i> and access appropriate <i>supports and resolution strategies</i></p>
3. Coordinate personal skill development and learning	<p>3.1 Identify personal learning and professional development needs and skill gaps using self-assessment and advice from colleagues and clients in relation to role and organisational requirements</p> <p>3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel</p> <p>3.3 Access, complete and record <i>professional development</i></p>

	<p><i>opportunities</i> to facilitate continuous learning and career development</p> <p>3.4 Incorporate formal and informal feedback into review of further learning needs</p>
--	--

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to give and receive constructive feedback relating to development needs
- literacy skills to read and understand the organisation's procedures
- planning skills to organise work priorities according to work goals and objectives
- problem-solving skills to solve routine problems
- self-management skills to:
 - comply with policies and procedures
 - consistently evaluate and monitor own performance
 - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies, plans and procedures
- methods to elicit, analyse and interpret feedback
- principles and techniques of goal setting, measuring performance, time management and personal assessment
- competency standards and how to interpret them in relation to self
- methods to identify and prioritise personal learning needs.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • preparing work plans • scheduling and prioritising work objectives and tasks • knowledge of the principles and techniques of goal setting, measuring performance, time management and personal assessment.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of work schedules and performance improvement plans.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of self-assessment documentation outlining learning and development needs • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of methods to identify and prioritise personal learning needs • evaluation of planning for personal skill development activities and professional development opportunities.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Work goals and objectives</i> may include:</p>	<ul style="list-style-type: none"> • budgetary targets • production targets • reporting deadlines • sales targets • team and individual learning goals • team participation.
<p><i>KPIs</i> may include:</p>	<ul style="list-style-type: none"> • key performance indicators on customer satisfaction • key performance indicators on customer effort • monitoring time taken to answer calls • operating within reporting protocols • score tools such as net promoter • understanding metrics.
<p><i>Organisational requirements</i> may include:</p>	<ul style="list-style-type: none"> • access and equity principles and practice • business and performance plans • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals.
<p><i>Factors affecting the achievement of work objectives</i> may include:</p>	<ul style="list-style-type: none"> • budget constraints • competing work demands • environmental factors such as time, weather • resource and materials availability • technology/equipment breakdowns • unforeseen incidents • workplace hazards, risks and controls.
<p><i>Business technology</i> may include:</p>	<ul style="list-style-type: none"> • computer applications • computers • email

	<ul style="list-style-type: none"> • facsimile machines • internet/extranet/intranet • modems • personal schedulers • photocopiers • printers • scanners.
Feedback on performance may include:	<ul style="list-style-type: none"> • formal/informal performance appraisals • obtaining feedback from clients • obtaining feedback from supervisors and colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery.
Products and services may include:	<ul style="list-style-type: none"> • either products or services • goods • ideas • infrastructure • private or public sets of benefits.
Signs of stress may include:	<ul style="list-style-type: none"> • absence from work • alcohol or other substance abuse • conflict • poor work performance.
Personal wellbeing may include:	<ul style="list-style-type: none"> • cultural • emotional • social • spiritual.
Sources of stress may include:	<ul style="list-style-type: none"> • complex tasks • cultural issues • work and family conflict • workloads.
Supports and resolution strategies may include:	<ul style="list-style-type: none"> • awareness raising • counselling • employee assistance programs (EAP) • family support • group activities • job design • mediation • sharing load • time off • training.
Professional development	<ul style="list-style-type: none"> • career planning/development

opportunities may include:	<ul style="list-style-type: none">• coaching, mentoring and/or supervision• formal/informal learning programs• internal/external training provision• performance appraisals• personal study• quality assurance assessments and recommendations• recognition of current competence/skills recognition• work experience/exchange/opportunities• workplace skills assessment.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect, analyse and communicate information and ideas	<p>1.1. Collect relevant <i>information</i> from appropriate sources and analyse and share with the work team to improve work performance</p> <p>1.2. Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the audience and any specific needs</p> <p>1.3. Implement <i>consultation processes</i> to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes</p> <p>1.4. Seek and value contributions from internal and external sources in developing and refining new ideas and approaches</p> <p>1.5. Implement <i>processes</i> to ensure that issues raised are resolved promptly or referred to <i>relevant personnel</i></p>

ELEMENT	PERFORMANCE CRITERIA
	as required
2. Develop trust and confidence	2.1. Treat all internal and external contacts with integrity, respect and empathy 2.2. Use the <i>organisation's social, ethical and business standards</i> to develop and maintain effective relationships 2.3. Gain and maintain the trust and confidence of <i>colleagues, customers and suppliers</i> through competent performance 2.4. Adjust interpersonal styles and methods to meet organisation's social and cultural environment 2.5. Encourage other members of the work team to follow examples set, according to <i>organisation's policies and procedures</i>
3. Develop and maintain networks and relationships	3.1. Use <i>networks</i> to identify and build relationships 3.2. Use networks and other work relationships to provide identifiable benefits for the team and organisation
4. Manage difficulties into positive outcomes	4.1. Identify and analyse difficulties, and take action to rectify the situation within the requirements of the organisation and relevant legislation 4.2. Guide and support colleagues to resolve work difficulties 4.3. Regularly review and improve <i>workplace outcomes</i> in consultation with relevant personnel 4.4. Manage <i>poor work performance</i> within the organisation's processes 4.5. Manage conflict constructively within the organisation's processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to research, analyse, interpret and report information

REQUIRED SKILLS AND KNOWLEDGE

- relationship management and communication skills to:
 - deal with people openly and fairly
 - forge effective relationships with internal and/or external people, and to develop and maintain these networks
 - gain the trust and confidence of colleagues
 - respond to unexpected demands from a range of people
 - use supportive and consultative processes effectively.

Required knowledge

- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS), and environmental issues, equal opportunity, industrial relations and anti-discrimination
- theory associated with managing work relationships to achieve planned outcomes:
 - developing trust and confidence
 - maintaining consistent behaviour in work relationships
 - understanding the cultural and social environment
 - identifying and assessing interpersonal styles
 - establishing, building and maintaining networks
 - identifying and resolving problems
 - resolving conflict
 - managing poor work performance
 - monitoring, analysing and introducing ways to improve work relationships.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- range of methods and techniques for communicating information and ideas to a range of stakeholders
- range of methods and techniques for developing positive work relationships that build trust and confidence in the team
- accessing and analysing information to achieve

EVIDENCE GUIDE	
	<p>planned outcomes</p> <ul style="list-style-type: none"> techniques for resolving problems and conflicts and dealing with poor performance knowledge of the theory associated with managing work relationships to achieve planned outcomes.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> demonstration of techniques in managing poor performance and communicating effectively direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate observation of performance in role plays observation of presentations oral or written questioning to assess knowledge of relevant legislation review of consultation processes implemented to encourage employees to contribute to issues related to their work review of documentation outlining reviewing of workplace outcomes.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

RANGE STATEMENT	
situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	<ul style="list-style-type: none"> • data appropriate to work roles and organisational policies that is shared and retrieved in writing or verbally, electronically or manually such as: <ul style="list-style-type: none"> • archived, filed and historical background data • individual and team performance data • marketing and customer related data • planning and organisational documents including the outcomes of continuous improvement and quality assurance • policies and procedures
Consultation processes may include:	<ul style="list-style-type: none"> • feedback to the work team and relevant personnel in relation to outcomes of the consultation process • opportunities for all employees to contribute to ideas and information about organisational issues
Processes to ensure that issues raised are resolved promptly or referred may include:	<ul style="list-style-type: none"> • conducting informal meetings • coordinating surveys or questionnaires • distributing newsletters or reports • exchanging informal dialogue with relevant personnel • participating in planned organisational activities
Relevant personnel may include:	<ul style="list-style-type: none"> • managers • OHS committee and other people with specialist responsibilities • other employees • supervisors • union representatives/groups
Organisation's social, ethical and business standards may refer to:	<ul style="list-style-type: none"> • implied standards such as honesty and respect relative to the organisational culture and generally accepted within the wider community • rewards and recognition for high performing staff • standards expressed in legislation and regulations such as anti-discrimination

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to promote teamwork. It involves developing team plans to meet expected outcomes, leading the work team, and proactively working with the management of the organisation.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>Frontline managers have an important leadership role in the development of efficient and effective work teams. They play a prominent part in team planning, supervising the performance of the team and developing team cohesion. They provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to achieve team outcomes	<p>1.1. Identify, establish and document <i>team purpose, roles, responsibilities, goals, plans and objectives</i> in <i>consultation</i> with team members</p> <p>1.2. Support team members in meeting expected outcomes</p>
2. Develop team cohesion	<p>2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team</p> <p>2.2. Encourage and support team members to take <i>responsibility for own work</i> and to assist each other in undertaking required roles and responsibilities</p> <p>2.3. Provide <i>feedback</i> to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4. Recognise and address issues, concerns and problems identified by team members or refer to <i>relevant persons</i> as required</p>

ELEMENT	PERFORMANCE CRITERIA
3. Participate in and facilitate work team	3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2. Give the team support to identify and resolve problems which impede its performance 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1. Maintain open <i>communication</i> with <i>line manager/management</i> at all times 4.2. Communicate information from line manager/management to the team 4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - boost team morale
 - deal with team conflict
 - deliver messages from management
 - facilitate discussion
 - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

- organisational goals, objectives and plans
- organisational policy and procedures framework
- organisational structure, including organisational chart
- principles and techniques associated with:
 - delegation and work allocation
 - goal setting
 - group dynamics and processes
 - individual behaviour and difference
 - leadership
 - motivation
 - negotiation
 - planning.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- teamwork plan with details of how it was generated and how it will be monitored so that team goals can be met
- techniques in communicating information, dealing with team conflict and resolving issues
- knowledge of organisational goals, objectives and plans.

Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques in working with team dynamics • observation of performance in role plays • oral or written questioning to assess knowledge of principles and techniques associated with group dynamics and processes • evaluation of opportunities provided for input of team members into planning, decision making and operational aspects of work team • review of feedback provided to team members • review of teamwork plan.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Team purpose, roles, responsibilities, goals, plans and objectives</i> may include:</p>	<ul style="list-style-type: none"> • action plans, business plans and operational plans linked to strategic plans • expected outcomes and outputs • goals for individuals and the work team • individual and team performance plans and key performance indicators • occupational health and safety (OHS) responsibilities
<p><i>Consultation</i> may include:</p>	<ul style="list-style-type: none"> • attending meetings, interviews, brainstorming sessions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • using email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual effectiveness • using mechanisms to provide feedback to the work team in relation to consultation outcomes
<i>Responsibility for own work</i> may involve:	<ul style="list-style-type: none"> • individual and joint actions • individuals and teams
<i>Feedback</i> may refer to:	<ul style="list-style-type: none"> • formal/informal gatherings between team members where there is communication on work related matters • informal communication of ideas and thoughts on specific tasks, outcomes, decisions, issues or behaviours
<i>Relevant persons</i> may include:	<ul style="list-style-type: none"> • colleagues • direct superior or other management representatives • OHS committees and other people with specialist responsibilities
<i>Communication</i> may include:	<ul style="list-style-type: none"> • face-to-face • formal/informal interaction • verbal, written or electronic communication
<i>Line manager/management</i> may refer to:	<ul style="list-style-type: none"> • direct superior or other management representatives

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish personal work goals	<p>1.1. Serve as a positive role model in the workplace through personal work planning and organisation</p> <p>1.2. Ensure personal work goals, plans and activities reflect the organisation's plans, and <i>own responsibilities and accountabilities</i></p> <p>1.3. Measure and maintain personal performance in varying work conditions, work contexts and contingencies</p>
2. Set and meet own work priorities	<p>2.1. Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives</p> <p>2.2. Use <i>technology</i> efficiently and effectively to manage work priorities and commitments</p> <p>2.3. Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to</p>
3. Develop and maintain professional competence	<p>3.1. Assess personal knowledge and skills against <i>competency standards</i> to determine development needs, priorities and plans</p> <p>3.2. Seek feedback from employees, <i>clients and colleagues</i> and use this feedback to identify and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>develop ways to improve competence</p> <p>3.3. Identify, evaluate, select and use <i>development opportunities</i> suitable to personal learning style/s to develop competence</p> <p>3.4. Undertake participation in networks to enhance personal knowledge, skills and work relationships</p> <p>3.5. Identify and develop new skills to achieve and maintain a competitive edge</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to receive, analyse and report on feedback
- literacy skills to interpret written and verbal information about workplace requirements
- organisational skills to set and achieve priorities.

Required knowledge

- principles and techniques involved in the management and organisation of:
 - performance measurement
 - personal behaviour, self-awareness and personality traits identification
 - personal development plan
 - personal goal setting
 - time management
- management development opportunities and options for self
- organisation's policies, plans and procedures
- types of learning style/s and how they relate to the individual
- types of work methods and practices that can improve personal performance.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and implement a project plan to undertake research activities	1.1. Define and agree <i>research project</i> objectives and timeframes 1.2. Plan research process and implement in accordance with union policies and procedures 1.3. Ensure agreed project phases, approval and review points are implemented to accommodate all project management function requirements 1.4. Evaluate research process and report in relation to established project baselines to provide appropriate measures of performance
2. Coordinate and undertake the research process	2.1. Define information needs based on work objectives and organisational requirements 2.2. Identify and allocate appropriate resources 2.3. Allocate tasks to identified staff and gain support for the project 2.4. Develop <i>strategies</i> to acquire required information 2.5. Communicate the methods and aims of the research clearly 2.6. Research information in a timely and thorough way and within resource allocation 2.7. Monitor progress of research project and adjust to

ELEMENT	PERFORMANCE CRITERIA
	respond to internal and external factors
3. Analyse information and apply the results of analysis	<p>3.1.Ensure <i>specialist data and information</i> is collected, consolidated and analysed to recommend outcomes and to advise trends to senior staff</p> <p>3.2.Develop appropriate analytical techniques and processes, and apply to information in order to achieve defined objectives and meet requirements</p> <p>3.3.Analyse information to identify facts, issues, patterns, interrelationships and trends</p> <p>3.4.Undertake all work in a timely manner and meet defined standards of the union</p>
4. Manage information systems	<p>4.1.Maintain <i>information systems</i> so that data and system integrity is guaranteed</p> <p>4.2.Maintain a range of standard and complex information systems and applications in accordance with organisational standards</p> <p>4.3.Integrate information in a timely and coherent manner</p>
5. Compile reports from information analysis	<p>5.1.Use the findings from the analysis to provide advice and to develop policies and solutions which meet organisational requirements</p> <p>5.2.Ensure reporting of results from analysis of information includes predictions, assumptions and constraints</p> <p>5.3.Ensure reporting of results and analysis of information is logically sequenced, concise and clear</p>
6. Evaluate the research process	<p>6.1.Identify and communicate criteria for evaluating the effectiveness of research project and phases</p> <p>6.2.Implement and monitor key measurements to evaluate the effectiveness of research processes</p> <p>6.3.Debrief all staff involved in research project on progress and outcomes</p> <p>6.4.Use appropriate strategies to ensure project outcomes are used effectively</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- high level research and analytical skills
- project management skills
- technology skills to store data and to manage information
- well developed writing skills.

Required knowledge

- regional, national and international legislation and regulations relating to industrial relations, occupational health and safety (OHS), vocational education and training, equal opportunity and discrimination, trade practices
- industry knowledge
- union policies and procedures.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- documented research project plan, with research objectives, and the outcomes of the research project which meet the stated objectives
- examples of how information and data in the union is effectively gathered and managed
- knowledge of the industry/s involved in the research.

Context of and specific resources for assessment

Assessment must ensure:

- access to a range of research documentation
- access to systems for gathering and storing data and information.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of agreed research project objectives and timeframes • oral or written questioning to assess knowledge of union policies and procedures • assessment of written reports • review of strategies developed to acquire required information • evaluation of how the methods and aims of the research were communicated.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other workplace relations units.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Research projects</i> could involve:	<ul style="list-style-type: none"> • analysis of industry specific trends, statistics and issues • comparative national and international developments • information and analysis needed to develop a campaign, strategic plan, industry or sector plan and strategy, or to bargain effectively with employers • information and analysis to conduct a strategic comprehensive corporate or community campaign
<i>Strategies</i> could include:	<ul style="list-style-type: none"> • commissioned research • computer- or web-based research

RANGE STATEMENT	
	<ul style="list-style-type: none"> • establishing expert or pre-eminent opinions • joint/collaborative work with academics, economists, social researchers, political parties, international agencies and industry groups • use of focus groups, polls and surveys
<i>Specialist data and information</i> could include:	<ul style="list-style-type: none"> • information for a specific cultural or gender perspective • information, research and data in relation to corporations and inter-related bodies and connections within an industry and the economy • labour market, industry and employment statistics and related research • OHS statistics and related research • political and community polling around specific policy issues • vocational education and training statistics and related research
<i>Information systems</i> may involve:	<ul style="list-style-type: none"> • databases and the use of spreadsheets, graphs, trend and time series, and mathematical equations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan documents	1.1. Determine the <i>purposes</i> of documents 1.2. Choose <i>appropriate formats</i> for documents 1.3. Establish <i>means of communication</i> 1.4. Determine <i>requirements of documents</i> 1.5. Determine <i>categories and logical sequences of data, information and knowledge</i> to achieve document objectives 1.6. Develop overview of structure and content of documents
2. Draft text	2.1. Review and organise available data, information and knowledge according to proposed structure and content 2.2. Ensure data, information and knowledge is aggregated, interpreted and summarised to prepare text that satisfies document purposes and objectives 2.3. Include graphics as appropriate 2.4. Identify gaps in required data and information, and collect additional material from <i>relevant enterprise personnel</i> 2.5. Draft text according to document requirements and genre 2.6. Use language appropriate to the audience

ELEMENT	PERFORMANCE CRITERIA
3. Prepare final text	3.1. Review draft text to ensure document objectives are achieved and requirements are met 3.2. Check grammar, spelling and style for accuracy and punctuation 3.3. Ensure draft text is approved by <i>relevant</i> enterprise personnel 3.4. Process text amendments as required
4. Produce document	4.1. Choose basic <i>design elements</i> for documents appropriate to audience and purpose 4.2. Use word processing software to apply basic design elements to text 4.3. Check documents to ensure all requirements are met

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to clarify requirements of documents
- literacy skills to edit and proofread documents; to create documents with a complex, organised structure of linked paragraphs which use simple and complex syntactic structure
- numeracy skills to collate and present data, graphs and annotated references
- problem-solving skills to use processes flexibly and interchangeably.

Required knowledge

- enterprise style guide/house style
- formatting styles and their impact on formatting, readability and appearance of documents
- organisational requirements for ergonomics, work periods and breaks, and resource conservation techniques
- rules and conventions for written English, as defined by general and specialist dictionaries and books about grammar.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • production of documents • editing draft text to ensure accuracy and clarity of information • knowledge of enterprise style guide/house style.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of documents and style guides.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of structure and content of documents • review of draft documents • review of final documents • demonstration of techniques • oral or written questioning to assess knowledge of word processing software functions.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBITU401A Design and develop complex text documents.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purposes of documents</i> may include:</p>	<ul style="list-style-type: none"> • conveying research findings • documenting policies, procedures and processes • influencing attitudes, opinions, beliefs • meeting legal requirements • meeting other data, information or knowledge needs of an audience • proposing recommendations, options and actions
<p><i>Appropriate formats</i> for documents may include:</p>	<ul style="list-style-type: none"> • detailed business letters • emails • instructions and procedures • manuals • publications, leaflets, brochures • reports • speeches and presentations • submissions tender documentation and public notices • website text
<p><i>Means of communication</i> may include:</p>	<ul style="list-style-type: none"> • software packages such as MS Word, MS Excel, MS PageMaker, MS PowerPoint and templates
<p><i>Requirements of documents</i> may include:</p>	<ul style="list-style-type: none"> • compliance with genre • compliance with proformas, standardised reporting requirements or undertakings made by the organisation about reporting • file types and sizes for online documents • languages other than English requirements • legal or traditional requirements for the particular document format • organisational policy, procedures and guidelines applying to writing documents, including house style • point numbering systems • requirements for illustrations, photographs, graphs, charts, maps and other illustrative material

RANGE STATEMENT	
	<p>to explain texts</p> <ul style="list-style-type: none"> • standards for references, footnotes, citations, acknowledgements • time lines, including deadlines • word length • writing styles, including simplicity of English and use of technical language
<p><i>Categories and logical sequences of data, information and knowledge</i> may include:</p>	<ul style="list-style-type: none"> • arguments and rebuttals • categories and sequences traditionally used for the particular type of document being prepared • chronological, alphabetical or operating sequences • facts, observations, conclusions and recommendations • illustrative case studies and other examples • linking and summary statements • recommendations and supporting arguments
<p><i>Relevant enterprise personnel</i> may include:</p>	<ul style="list-style-type: none"> • colleagues/staff in own work area section/team members • consultative committees • internal providers of specialist expertise • managers/leaders/coordinators/supervisors • owners • staff in relevant work sections
<p><i>Design elements</i> may include:</p>	<ul style="list-style-type: none"> • capitals and underlining • fonts • headings • illustrations, photographs and other illustrative material for design purposes • justification and alignment • lists and tables • logos, branding, organisational identity requirements • margins and paragraph indentation • page shape • page size • templates • use and amount of colour • use and amount of white space

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare a research plan

- 1.1 Ensure views and interests of *stakeholders* are reflected in the research methodology and it and is compatible with ethical considerations
- 1.2 Select research methodology suitable to needs, purposes and resources and to maximise credibility of outcomes
- 1.3 Select and use research strategies appropriate to client group, subject matter being researched, the outcomes sought and the resources available
- 1.4 Ensure research plan incorporates strategies for validating research outcomes

2. Implement appropriate research strategies

- 2.1 Select and use research strategies appropriate to subject matter being researched, the outcomes sought and the resources available
- 2.2 Determine and allocate resources needed to conduct research
- 2.3 Ensure collection, recording and storage of all relevant information is timely and will ensure validity, confidentiality and security
- 2.4 Identify a representative range of people and groups with an interest in the issues and consult them in appropriate ways to ensure validity of outcomes
- 2.5 Undertake consultation according to agreed practices and protocol of own and other agencies
- 2.6 Consider cultural sensitivities and ethical issues in

ELEMENT	PERFORMANCE CRITERIA
	all consultation
3. Organise and analyse information	<p>3.1 Organise information in a form that allows analysis and suits the research purposes</p> <p>3.2 Develop patterns in the data and derive explanations, maintaining validity and reliability</p>
4. Report the findings of the research	<p>4.1 Report complete and accurate details of the research methodology, information and analysis in an accessible and useable style and format</p> <p>4.2 Provide opportunities for validation of research findings</p> <p>4.3 Report research results and make them available to all relevant stakeholders</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Current and suitable research methodologies, including community based research and participatory research
- Research interview techniques, including consultation methods, protocols and practice
- Information systems, manual and electronic
- Report presentation
- Cultural implications of research methods
- Cultural analysis of information
- Cultural knowledge and ownership issues

- Research ethics

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Carry out research activities that are directly relevant to the organisation and/or the community

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
 - consultation methods
 - complex communication
 - negotiation with a wide range of known and unknown stakeholders
 - interpretation and analysis of data
 - networking
 - written/oral presentation
- Utilise relevant information technology effectively in line with work health and safety (WHS) guidelines

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- This unit is most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions
This may include the use of languages other than English and alternative communication systems
- It is recommended that assessment take place on one or more occasions but must include all aspects of research activities - preparing, implementing, analysing, and reporting on research

- Access and equity considerations:*
- All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work
 - All workers should develop their ability to work in a culturally diverse environment
 - In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people
 - Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

- Context of and specific resources for assessment:*
- This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged
 - Resource requirements for assessment of this unit include access to:
 - an appropriate workplace where assessment can take place, or simulation of realistic workplace setting for assessment

- Method of assessment:*
- Assessment may include observations, questioning and evidence gathered from the workplace

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

- The contexts for undertaking research may include:*
- Preparation of a range of organisation information for policy development, strategic planning, marketing and promotion services, planning new services, reviewing existing services, providing advice to

management

- Responsibility for research specific to a service, its stakeholders, interests and relationship with the wider community
- Specific community or client interests and issues

Stakeholders may be:

- Within the organisation
- Within the community
- In other areas of delivery and other services, agencies
- In the education/training field
- Other specialists
- Management
- Community leaders
- Recipients of the service delivery

Unit Sector(s)

Not Applicable

CPCBC4001A Apply building codes and standards to the construction process for low rise building projects

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to access, interpret and apply relevant building codes and standards applicable to the construction processes of residential and low rise commercial buildings (low rise' licensing classification with reference to Class 1 and 10 construction and Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

To successfully construct low rise buildings requires a thorough knowledge of the purpose and content of the Building Code of Australia (BCA), coupled with the ability to interpret other codes and standards related to a specific building.

Application of the Unit

Application of the unit

This unit of competency supports builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards in the residential and commercial construction industry.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 1. Access and interpret relevant code and standard requirements. | <p>1.1.Relevant performance requirements from the BCA that apply to individual projects (described as <i>low rise</i>) are identified.</p> <p>1.2.Requirements of relevant BCA deemed-to-satisfy (DTS) provisions are determined.</p> <p>1.3.Requirements of relevant Australian standards referenced in the BCA are accessed and interpreted accordingly.</p> |
| 2. Classify buildings. | <p>2.1.Nature of a building is determined according to its use and arrangement.</p> <p>2.2.BCA criteria to determine the defined classification are applied.</p> <p>2.3.BCA requirements for multiple classification are identified and interpreted.</p> |
| 3. Analyse and apply a range of solutions to a construction problem for compliance with the | <p>3.1.Range of criteria that will ensure that construction methods comply with BCA performance requirements is determined.</p> <p>3.2.Alternative solutions to a design or construction problem that will comply with BCA requirements are</p> |

ELEMENT	PERFORMANCE CRITERIA
BCA.	discussed and proposed in accordance with company policies and procedures. 3.3. Performance-based solutions are identified and documented in accordance with BCA requirements. 3.4. <i>Assessment methods</i> referenced in the BCA to determine whether a building solution complies with <i>performance requirements</i> or DTS provision of the BCA are analysed and applied. 3.5. Relevant documentation is identified and completed in accordance with BCA requirements.
4. Apply fire protection requirements.	4.1. Passive and active fire control elements for low rise building required by the BCA and other legislation are identified and applied. 4.2. Level of fire resistance required for the construction of various low rise buildings is determined. 4.3. Check of existing buildings for compliance with passive and active fire protection requirements is carried out in accordance with BCA requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- analysis and interpretation skills relating to documentation from a wide range of sources, including BCA and referenced documents
- application of design concepts and principles in accordance with BCA, namely:
 - Class 1 and 10
 - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction
- attention to detail in applying building codes and standards
- communication skills to:
 - discuss and propose alternative solutions
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

REQUIRED SKILLS AND KNOWLEDGE

- read and interpret:
 - documentation from a variety of sources, including BCA and referenced documents
 - drawings and specifications
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- written skills to complete documentation in accordance with BCA requirements
- numeracy skills to interpret and apply mathematical information included in building codes and standards.

Required knowledge

Required knowledge for this unit is:

- basic design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- BCA performance hierarchy
- definitions and common technical terms or usage specified under general provisions of BCA
- general nature of materials and the effects of performance
- relevant Australian standards
- relevant legislative and OHS requirements, codes and practices
- types of working drawings and specifications
- understanding of the BCA relating to:
 - Class 1 and 10
 - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by the application of design principles and solutions specified in BCA performance requirements or DTS provisions applicable to a building project.

This unit of competency can be assessed in the

EVIDENCE GUIDE

	<p>workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none">• comply with organisational quality procedures and processes• apply and interpret relevant documentation and codes• accurately apply BCA performance requirements relating to the design and construction of a building• understand assessment methods available to determine compliance with the BCA• identify faults and problems and proposed action to rectify.
Context of and specific resources for assessment	<p>This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.</p> <p>Assessment of essential underpinning knowledge will usually be conducted in an off-site context.</p> <p>Assessment is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none">• access to BCA and relevant documents referenced in the BCA• access to relevant legislation• project documentation, including design brief, design drawings, specifications, construction schedules and other supporting documents• research resources, including product information and data• relevant computer software package and suitable hardware. <p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to</p>

EVIDENCE GUIDE

modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing

EVIDENCE GUIDE

supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Low rise is described as falling within the BCA classes:

- Class 1 and 10
- Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

Assessment methods include:

- comparison with BCA DTS provisions
- evidence of suitability as described in the BCA
- expert judgement as defined in the BCA
- verification method as defined in the BCA.

Performance requirements include:

- performance requirements contained within other legislation applicable to a specific project
- performance requirements of the BCA determined to be relevant to a specific project
- performance-based contractual requirements that must be fulfilled by any party.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Read and interpret plans and specifications.	<p>1.1. Appropriate plans and drawings are correctly identified.</p> <p>1.2. Project <i>plans and specifications</i> are read and understood.</p> <p>1.3. Levels, heights, gradients and other measurements are interpreted.</p> <p>1.4. Measurements are made and quantities identified from plans and specifications that conform to standard industry practice.</p>
2. Identify and calculate labour costs.	<p>2.1. Types and numbers of appropriate on-site personnel are identified and the time required on site is estimated.</p> <p>2.2. Labour hours for non-contract elements of on-site work are calculated.</p> <p>2.3. Costs or rates for required on-site work are calculated.</p>
3. Identify and establish physical resource requirements.	<p>3.1. Physical resource requirements are identified.</p> <p>3.2. Lists of materials are produced and quantities calculated.</p> <p>3.3. Quantities are established against project or standard construction contracts.</p> <p>3.4. Supplier prices for materials and consumables are</p>

ELEMENT

PERFORMANCE CRITERIA

	obtained.
	3.5.Plant or equipment requirements are identified and costed.
4. Develop estimated project costs.	4.1.Appropriate labour rates and material costs are selected and applied.
	4.2.Estimates of <i>unit costs</i> are determined and applied as appropriate.
	4.3.Costs to the project of WorkCover, Environmental Protection Agency (EPA) requirements, seeking approvals, waste management site fees and other statutory or additional costs are identified and applied.
	4.4.Company overhead recovery and margins are applied.
	4.5.Completed estimated <i>project costs</i> are calculated for inclusion in a tender or bill.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret drawings and specifications
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- contractual arrangement problem solving
- estimate labour and materials costs from written information
- numeracy skills to calculate labour hours and costs, material quantities and costs
- use appropriate costing software programs.

Required knowledge

Required knowledge for this unit is:

REQUIRED SKILLS AND KNOWLEDGE

- how to access and interpret:
 - national codes, including Building Code of Australia (BCA) and the Plumbing Code of Australia
 - Australian standards relevant to the industry sector
- includes state or territory and local government building and construction codes, standards and government regulations relevant to the form of building or construction being undertaken (e.g. WorkCover and EPA)
- types of building and construction drawings and specifications
- types, scope and usage of labour through the employee and subcontractor systems
- operation and structure of the organisation's costing and contracting system.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by the preparation of a detailed estimate of labour, materials and other project costs as part of the preparation of a tender or bill for a residential or commercial construction project relevant to the specific trade or sector.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- identify materials required for a project
- gather information about material supply
- interpret measurements and calculate quantities and costs

EVIDENCE GUIDE

- plan and allocate human resources
- identify and cost other related costs, such as those required to meet statutory and planning approval processes
- produce documentation that meets the timeframes and quality standards established by the organisation
- communicate effectively, both verbally and in writing.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in either a building or construction office
- relevant codes, standards and government regulations
- office equipment, including calculators, photocopiers and telephone systems
- computers with appropriate software to view 2-D CAD drawings, run costing programs and print copies
- a technical reference library with current publications on measurement, design, building construction and manufacturers' product literature
- a suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of

EVIDENCE GUIDE

the Construction, Plumbing and Services Training Package

- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Plans and specifications include:

- building codes
- materials lists and quantity schedules
- materials specifications
- sketches or drawings
- statements of requirements.

Plant or equipment requirements include:

- communications equipment
- conveyors
- heavy equipment, such as wheeled and tracked earthmoving equipment, trucks and articulated vehicles
- hoists
- mobile and tower cranes
- on-site equipment, such as:
 - compressors
 - pumps
 - generators
 - portable lighting
 - lifting equipment
 - portable compaction equipment.

Unit costs may include the cost of:

- construction cost per square metre
- installation of pipes per metre
- installation of sanitary ware per unit
- laying of foundation per metre
- laying of slabs per square metre
- laying of steel tray roofing per square metre
- masonry walls per square metre
- painting per square metre
- tiling per square metre.

Project costs include:

- building or construction materials
- communications costs
- cost of meeting statutory requirements, e.g. EPA

RANGE STATEMENT

- fuels, lubricants and consumables
- organisational and subcontract labour hours
- overheads
- project administration costs
- site facilities, such as:
 - offices
 - toilets
 - lunch rooms
- waste removal fees.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to produce schedules of resource requirements so that orders can be placed for materials and labour for residential and commercial projects and to record and track costs as they are incurred. Knowledge of codes, regulations and approval processes, contractor systems, physical resource and supplier identification and the ability to assess the availability of and requirements for skilled labour are essential.

Application of the Unit

Application of the unit This unit of competency supports the needs of site managers and forepersons, estimators, project managers and builders in the construction industry with a responsibility for producing schedules for ordering materials and labour.

Licensing/Regulatory Information

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Identify and apply all contract conditions to the schedules.	1.1.All contractual requirements are included in the schedules. 1.2. <i>Local government and regulatory bodies</i> ' conditions of approval are included in the schedules. 1.3.Schedules include colour selections. 1.4.Variations to contracts, raised by the client or the builder, are included in the schedules.
2. Produce material and labour schedules, overlays and orders.	2.1.Nominated suppliers and contractors are detailed in work schedules. 2.2.Relevant overlay drawings are produced. 2.3.Orders include contract details and instructions. 2.4.Contract rates are applied to material and labour schedules.
3. Prepare site files.	3.1.All necessary site documents are included, including approved <i>plans and specifications</i> . 3.2.Call forward sheets are prepared detailing all orders.
4. Monitor and report on project costs.	4.1. <i>Project costs</i> are analysed against estimates during construction. 4.2.Approved variation costs are analysed. 4.3.Final project cost analysis is provided.
5. Maintain data files of	5.1.Approved variation cost increases are incorporated

ELEMENT	PERFORMANCE CRITERIA
standard costs.	into site files. 5.2.Changes to standard plans, specifications and cost files are included in site files.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - communicate information effectively within the organisation and to external agencies and the client
 - read and interpret:
 - contracts
 - drawings and specifications
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to:
 - prepare and maintain site files
 - produce schedules and orders
- identify and analyse relevant information
- numeracy skills to apply calculations.

Required knowledge

Required knowledge for this unit is:

- operation and structure of the organisation's costing and contracting system
- state or territory building and construction codes, standards and regulations relevant to the form of building or construction being undertaken
- types of building or construction drawings and specifications commonly used in the industry
- types, scope and usage of labour through the employee and contractor systems.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by the preparation of schedules for materials and labour for a building project.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- identify materials required for the project and gather supply information effectively
- plan and allocate human and physical resources
- produce documentation that meets the timeframes and quality standards established by the organisation
- communicate information effectively within the organisation and to external agencies and the client, as required.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in a building or construction office

EVIDENCE GUIDE

- relevant codes, standards and regulations
- office equipment, including calculators, photocopiers and telephone systems
- computers with appropriate software to view 2-D CAD drawings, run costing programs and print copies
- a technical reference library with current publications on measurement, design, building construction and manufacturers' product literature
- a suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with

EVIDENCE GUIDE

a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Local government and regulatory bodies include:

- electricity regulatory authorities
- environmental authorities
- health departments
- shire or municipal councils
- water corporations.

Plans and specifications include:

- building codes
- colour selections
- contract requirements
- material and labour schedules
- materials specifications
- plans, sketches and drawings

RANGE STATEMENT

Project costs include:

- statements of requirements.
- building or construction materials
- communications costs
- fuels, lubricants and other consumables
- organisational and subcontract labour costs
- overheads
- professional indemnity and other insurance costs
- project administration costs
- site facilities, such as toilets and storage sheds.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare to make sketches and drawings.	1.1. <i>Types of drawings required</i> and <i>key features</i> to be recorded are identified in compliance with the scope and standard of the job being undertaken. 1.2. <i>OHS requirements</i> on site are identified and followed. 1.3. <i>Tools and equipment</i> required for inspection and measurement and for producing drawings are gathered and checked for serviceability.
2. Create simple sketches and drawings.	2.1. Inspection of relevant area is carried out as required and measurements are taken and recorded. 2.2. Simple two and three-dimensional sketches and drawings are created using <i>standard drawing conventions</i> and incorporating relevant codes and standards. 2.3. Sectional drawings of simple structural elements are created using standard drawing conventions.
3. Notate and process drawings.	3.1. Essential information is recorded on the drawing with symbols and abbreviations according to standard drawing conventions. 3.2. Drawings are labelled, dated and processed according to organisational administration and quality procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- drawing techniques
- interpret and apply relevant standards and codes
- numeracy skills to apply measurements and calculations.

Required knowledge

Required knowledge for this unit is:

- drawing conventions and features, including direction, scale, key, contours, symbols and abbreviations
- requirements of the relevant codes, standards, statutory and authority requirements
- safe work methods.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by creating a set of sketches and drawings for a small work project in the relevant field of expertise.

Measurements of components, sub-assemblies, products, models, equipment, layouts or facilities needed for the preparation of the required

EVIDENCE GUIDE

drawings and calculations of required dimensions and other drafting details based on the measurements and other relevant information should be made and recorded.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- produce clear and effective drawings and sketches with appropriate notations and labelling
- apply appropriate techniques for making inspections and taking measurements
- make good incursions into the fabric of a building
- comply with OHS regulations applicable to workplace operations
- apply organisational quality procedures and processes
- select and use appropriate processes, tools and equipment.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include access to:

- an appropriate work site
- appropriate documentation and data related to tasks
- scaffolding and fall protection equipment
- tools and equipment relevant to activity

EVIDENCE GUIDE

process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in

EVIDENCE GUIDE

relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Types of drawings required include:

- floor plan
- land boundaries and footprint of building
- orthographic drawings
- schematic drawings of wiring and pipe work
- sectional views.

Key features to be recorded may include:

- ceiling heights and variations
- doors
- light fittings and power supplies
- services
- wall penetrations
- walls.

OHS requirements include:

- detailing appropriate installation of scaffolding
- detailing power supplies
- details of all services
- understanding hazards located in the area
- use of personal protective equipment.

Tools and equipment include:

- recording devices, including:
 - computer
 - digital camera
 - pen and paper.

Standard drawing conventions

- standard design symbols common to the

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and implement dispute resolution procedures.	<p>1.1. Established business <i>dispute resolution procedures</i> are reviewed and implemented as appropriate.</p> <p>1.2. Business dispute resolution procedures are developed where required and documented, and agreement to procedures is secured from all parties.</p> <p>1.3. Recording procedures are established and provision for record keeping is made.</p> <p>1.4. External arbitrators or conciliators are identified for consultation when disputes cannot be resolved internally.</p>
2. Conduct an initial investigation into business disputes and possible resolution strategies.	<p>2.1. Nature and <i>cause of business disputes</i> are identified and documented.</p> <p>2.2. Parties to dispute are identified and approached individually, and the issues are clarified and documented.</p> <p>2.3. Solutions based on an examination of the information collected and with reference to contractual arrangements are suggested.</p>
3. Identify opportunities for dispute resolution.	<p>3.1. Efforts are made to bring the disputing parties together.</p> <p>3.2. Where necessary, external arbiters or conciliators are consulted.</p> <p>3.3. Relevant statutory laws are identified, applied and followed.</p> <p>3.4. Disputes are resolved in accordance with common law.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - communicate by telephone
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - research and evaluate information and circumstances surrounding a business dispute
 - read and interpret relevant legislation
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
 - written skills to:
 - complete checklists
 - send emails and faxes
 - write memos and reports
- negotiation relevant to dispute resolution situations
- problem solving in the context of dispute resolution
- research and evaluate information and circumstances surrounding a business dispute.

Required knowledge

Required knowledge for this unit is:

- contractual and business frameworks underpinning the building and construction industry
- mores, values and attitudes of various groups in the community that should be accounted for in discussions
- possible reactions from persons under pressure, such as anger and withdrawal.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by developing a set of dispute resolution procedures and demonstrating how these would apply to a selection of disputes.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- identify the nature of the dispute and the identity of the parties to the dispute
- document the details of the dispute in sufficient terms for an unambiguous evaluation of the issues to occur
- identify and follow established dispute resolution procedures
- develop and implement dispute resolution procedures, where there are none established.
- understand need to remain completely impartial in any involvement in a dispute.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in either a building, construction or civil contracting office

EVIDENCE GUIDE

- relevant codes, standards and government regulations
- suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

EVIDENCE GUIDE

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Dispute resolution procedures
include:

- arbitrated decisions
- common law outcomes
- litigated decisions
- mutual resolution
- on-site negotiations
- reference to contractual obligations.

Cause of business disputes
includes:

- contract payment issues
- different opinions about design, structural layout or dimensions
- dissatisfaction with project progress
- structural finish, quality, materials or construction methodology.

CPCCCA3006B Erect roof trusses

Modification History

Change to performance criterion

Equivalent to CPCCCA3006A

Added range item: solar panels

Unit Descriptor

This unit of competency specifies the outcomes required to select, set out, erect and brace roof trusses to accommodate roof coverings for waterproofing purposes. It includes gable, hip and valley, and hip roofing types.

Application of the Unit

This unit of competency supports achievement of skills to safely and efficiently erect pre-built roof trusses for gable, hip and valley, hip and flat roof construction projects, which includes working with others and as a member of a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---------------------|-----|--|
| 1 | Plan and prepare. | 1.1 | Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant information for planning and preparation purposes. |
| | | 1.2 | Safety (OHS) requirements are followed in accordance with safety plans and policies. |
| | | 1.3 | Signage and barricade requirements are identified and implemented. |
| | | 1.4 | Plant, tools and equipment selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. |
| | | 1.5 | Material quantity requirements are calculated in accordance with plans, specifications and quality requirements . |
| | | 1.6 | Materials appropriate to the work application are identified, obtained, checked to ensure fitness for purpose, prepared, safely handled and located ready for use according to Australian standards. |
| | | 1.7 | Environmental requirements are identified for the project in accordance with environmental plans and statutory and regulatory authority obligations, and are applied. |
| 2 | Erect roof trusses. | 2.1 | Location of roof trusses for hip and valley roofs are set out on wall top plates to plan layout and specifications. |
| | | 2.2 | Steel frames are temporarily earthed during erection and are connected to permanent earthing system upon completion. |
| | | 2.3 | Roof trusses are erected and fixed, including temporary bracing, to set out positions in correct sequence to line at apex and plumb. |

- 2.4 Top chord is installed above wall plate to be constant height above wall plate.
 - 2.5 Ceiling trimming and creeper rafter members are fixed to specifications.
 - 2.6 Bottom chord of truss is used to provide lateral support for internal walls.
 - 2.7 **Roof bracing** is provided through hip construction, valley construction, diagonal metal tension or timber bracing or a combination of these, and fixed to specification.
 - 2.8 Lateral restraints to truss chords are fixed in position to manufacturer specifications.
- 3 Clean up.
 - 3.1 Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
 - 3.2 Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - plans, specifications and drawings
 - report faults

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- plant, tools and equipment types, characteristics, uses and limitation
- processes for the calculation of material requirements
- quality requirements for roof trusses
- roof bevels
- roof calculations for lengths, quantities and pitch
- roof load transfer
- roof shape and geometry
- roof truss erection and construction techniques
- roof truss materials and installation, including fire control and separation materials required by the National Construction Code (NCC) and other legislation
- roof types and truss components
- roofing regulations
- techniques for lifting and positioning of trusses
- temporary and permanent bracing
- timber types, structural properties and uses, including engineered timber products
- truss set out
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- set out and erect a roof comprising a minimum of one hip end, a valley and enough standard trusses to incorporate bracing for a full size roof in timber and metal.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity

- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the

competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to erecting roof trusses
- relevant Australian standards
- safe work procedures related to erecting roof trusses
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Planning and preparation include:

- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.

Safety (OHS) is to be in accordance with state or territory legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - photovoltaic (solar) panels
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working at heights
 - working in confined spaces
 - working in proximity to others
 - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Tools and equipment include:

- air compressors and hoses
- clamps
- hammers
- marking equipment
- measuring tapes and rules
- nail bags
- nail guns
- power drills
- power leads
- power saws

- saw stools
- scaffolding
- screwdrivers
- spanners
- spirit levels
- squares (combination/tri)
- string lines
- welding equipment.

Quality requirements include relevant regulations, including:

- Australian standards
- internal company quality policy and standards
- manufacturer specifications, where specified
- workplace operations and procedures.

Materials include:

- bolts
- bracing material
- nails
- patented fasteners
- screws
- slotted brackets for truss movement
- timber and metal trusses.

Environmental requirements include:

- clean-up protection
- noise and dust
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Roof trusses can be:

- timber or metal
- fixed to timber or steel wall plates.

Hip and valley roofs:

- include scotch valleys and hip ends
- may include Dutch gables.

Roof bracing includes:

- elementary bracing principles for various shaped roofs.

Unit descriptor This unit of competency specifies the outcomes required to carry out measurements and perform simple calculations to determine task and material requirements for a job in a construction work environment.

Application of the Unit

Application of the unit This unit of competency supports achievement of skills to take measurements and use these to calculate material qualities and calculations for related tasks commonly used and applied in construction work.

Licensing/Regulatory Information

Prerequisite units Nil

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions are confirmed and applied using relevant <i>information</i>.</p> <p>1.2. <i>Safety (OHS)</i> requirements are obtained from site safety plan, other regulatory specifications or legal obligations, and are applied.</p> <p>1.3. Measuring and calculating <i>equipment</i> selected to carry out tasks is consistent with job requirements, is checked for serviceability, and any faults are rectified or reported.</p>
2. Obtain measurements.	<p>2.1. Method of obtaining the measurement is selected and applied.</p> <p>2.2. <i>Measurements</i> are obtained using a rule or tape accurate to 1mm.</p> <p>2.3. Measurements, including <i>areas and volumes</i>, are confirmed and recorded.</p>
3. Perform calculations.	<p>3.1. Appropriate <i>calculation factors</i> are determined and correct method is selected for achieving required result.</p> <p>3.2. <i>Material quantities</i> for the project are correctly calculated using appropriate factors.</p> <p>3.3. Results are confirmed and recorded.</p>
4. Estimate approximate quantities.	<p>4.1. Calculations for determining material requirements are taken.</p> <p>4.2. Appropriate formulas for calculating quantities are selected.</p> <p>4.3. Quantities are estimated from the calculations taken.</p> <p>4.4. Material quantities for the project are calculated,</p>

ELEMENT**PERFORMANCE CRITERIA**

confirmed and recorded within enterprise tolerances.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - report faults
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
 - written skills to record measurements, calculations and quantities
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements, calculations and geometry
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- basic calculators
- communication devices

REQUIRED SKILLS AND KNOWLEDGE

- company procedures
- construction terminology
- job safety analysis (JSA) and safe work method statements
- measuring, calculating, geometry and determination of quantities
- processes for care of measuring equipment
- project quality requirements
- site and equipment safety (OHS) requirements
- tolerances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others
- complete measurements, calculations and determination of quantities for different projects of varying complexity in a range of contexts or occasions over time

EVIDENCE GUIDE

- calculate each of the following using a realistic construction task or example:
 - length
 - perimeter
 - circumference
 - area
 - volume
 - number
 - ratio
 - percentage
 - conversion of metres to millimetres and millimetres to metres
 - measure using a rule or tape measure five separate tasks within 1mm accuracy.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

EVIDENCE GUIDE

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions
- maps
- material safety data sheets (MSDS)
- memos
- organisation's work specifications and requirements
- plans and specifications
- regulatory and legislative requirements
- relevant Australian standards
- safe work procedures or equivalent
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Safety (OHS) is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan and may include:

- clothing and equipment
- handling of materials
- hazard control
- hazardous materials and substances
- organisational first aid
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Equipment includes:

- calculators and laser equipment
- rulers
- tape measures
- trundle wheels.

Measurements are to:

- be in metric scale
- cover all necessary calculations.

Areas and volumes include:

- calculating regular and irregular shapes, such as rectangles, squares, circles, triangles,

RANGE STATEMENT

trapeziums, cubes, cones, pyramids and cylinders that represent calculations taken in a construction environment.

Calculation factors:

- include length, area, weight, height, width, depth, volume, mass, scales, ratios, perimeters, quantities, numbers, grade, percentages, addition, subtraction, multiplication and division
- are to be performed manually and with the aid of a calculator.

Material quantities are to be:

- calculated in either packed, bulk, loose or compacted states
- converted to volumes in the other states.

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

Application of the Unit

Application of the unit This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Licensing/Regulatory Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	<p>1.1. <i>Site information</i> is obtained and related to the task.</p> <p>1.2. <i>Hazard</i> s and potential hazards associated with the slinging and directing of loads are identified.</p> <p>1.3. <i>Hazard control measures</i> consistent with <i>appropriate standards</i> are identified to ensure the safety of personnel and equipment.</p> <p>1.4. The weight, dimensions and centre of gravity of the load are identified and assessed.</p> <p>1.5. Suitable lifting/slinging points on the load are identified.</p> <p>1.6. Appropriate <i>lifting equipment</i> needs are assessed.</p> <p>1.7. Appropriate <i>communication methods</i> are assessed with <i>crane/</i> operators and other <i>appropriate personnel</i>.</p> <p>1.8. Manufacturer's specifications/information is obtained for special loads where necessary.</p>
2. Select and inspect equipment.	<p>2.1. Lifting equipment appropriate to the task is selected.</p> <p>2.2. Lifting equipment is inspected for serviceability.</p> <p>2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected.
	2.5. Appropriate <i>communication equipment</i> is selected and its serviceability is checked.
	2.6. Appropriate <i>personal protective equipment</i> (PPE) is selected and checked.
3. Prepare site and equipment.	3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment.
	3.2. Appropriate slinging method is selected.
	3.3. Lifting equipment is prepared and assembled where appropriate.
	3.4. Load destination is prepared.
4. Perform task.	4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques.
	4.2. Lifting hook is positioned over the load centre of gravity.
	4.3. Lifting equipment is attached and secured to the load in an appropriate manner.
	4.4. Tag line is attached and secured where appropriate.
	4.5. Test lift is conducted to ensure security of load.
	4.6. Load is moved maintaining stability and control at all times.
	4.7. Appropriate communication methods and <i>communication signals</i> are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator.
	4.8. The load is landed to ensure that it is stable and secure from movement.
	4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.	5.1. Unserviceable lifting equipment inspected and rejected.
	5.2. <i>Defective equipment</i> is isolated and tagged.
	5.3. Lifting equipment is stored in accordance with procedures and appropriate standards.
	5.4. Hazard prevention/control measures are removed where appropriate.
	5.5. Excess materials from the work area are removed (where applicable).

ELEMENT**PERFORMANCE CRITERIA**

5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations.
- communicate and work safely with others in the work area.
- apply Hazard prevention and control measures consistent with appropriate standards.
- apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/operator, moving four loads of varying shapes, sizes and weights.
- use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend.
- conduct pre and post operational checks of the lifting equipment.
- Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument
- Assessment of performance must be

Context of and specific resources for assessment

EVIDENCE GUIDE

undertaken either in the workplace or in a realistically simulated workplace setting

- Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace
- Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities
- Applicants must have access to:
 - personal protective equipment (PPE) for the purpose of the performance assessment.
 - four different loads as prescribed in the endorsed assessment instrument
 - lifting and associated equipment
 - suitable slewing crane
 - communication equipment (eg. fixed channel, two-way radios) as applicable.

Method of assessment

Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment.

Assessment may be in conjunction with the assessment of other units of competency.

The use of '**simulators**' in the assessment of this unit of competency is **not acceptable**.

Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.

Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.

Guidance information for assessment

Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site information may include but not be limited to

- local conditions such as access and egress
- work method statements.

Hazards may include but not limited to:

- ground stability (eg. ground condition, recently filled trenches, slopes)
- overhead hazards (e.g. power lines, service pipes, trees, buildings, etc)
- insufficient lighting
- traffic (e.g. pedestrians, vehicles, plant)
- weather (e.g. wind, lightning, storms)
- other specific hazards (e.g. trip hazards, heights, radio interference, etc).

Hazard prevention/control measures

The systematic process of eliminating or reducing the risk to personnel and property through the application of controls.

It includes the application of the hierarchy of controls, including:

1. elimination.
2. substitution.
3. isolation.
4. engineered control measures.
5. safe work practices.
6. personal protective equipment.

Appropriate standard s may include:

- codes of practice
- legislation
- Australian Standards
- manufacturer's specifications
- industry standards.

RANGE STATEMENT

Lifting Equipment may include but not limited to:

- fibre ropes
- wire ropes
- chain
- wire and synthetic slings
- shackles
- eyebolts
- beam clamps
- plate clamps
- spreader beams
- lifting beams
- pallet forks and cages
- concrete kibbles
- personnel boxes.

Communication Methods may include but are not limited to:

- written instructions
- signage,
- hand signals
- listening
- questioning to confirm understanding
- appropriate worksite protocol.

Cranes may include but not limited to:

- tower cranes (including self erecting)
- portal boom cranes
- vehicle loading cranes
- slewing mobile cranes
- non-slewing cranes
- derrick cranes.

Appropriate personnel may include but are not limited to:

- supervisors
- colleagues
- managers who are authorised to take responsibility for the workplace or operations.

Communication Equipment may include but not limited to:

- fixed channel two-way radios
- whistles
- bells.

Personal protective equipment (PPE) may include but not limited to:

- hard hat
- safety boots
- gloves
- high visibility clothing
- reflective vest
- relevant breathing, hearing, sight, skin and sun protection.

Load destination may include but

- ground

RANGE STATEMENT

not limited to:

- loading platforms
- suspended floors
- vehicles.

Communication signals may include but not limited to:

- stop - hand
- stop - whistle
- hoist up - hand
- hoist up - whistle
- hoist down - hand
- hoist down - whistle
- luff boom down - hand
- luff boom down - whistle
- luff boom up - hand
- luff boom up - whistle
- telescope out - hand
- telescope out - whistle
- telescope in - hand
- telescope in - whistle
- slew left - hand
- slew left - whistle
- slew right - hand
- slew right - whistle.

Defective Equipment may include but not limited to:

- excessive wear
- damage
- stretched
- broken wires
- cut/damaged fibres.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1. Identify and assess risks. | 1.1. <i>Hazards</i> in the work area are identified, assessed and reported to <i>designated personnel</i> .
1.2. Safety risks in the work area are identified, assessed and reported to designated personnel.
1.3. <i>Safe work practices, duty of care</i> requirements and safe work instructions are followed for controlling risks.
1.4. OHS, hazard, accident or <i>incident</i> reports are contributed to according to workplace procedures and <i>Australian government and state or territory OHS legislation</i> and relevant <i>information</i> . |
| 2. Identify hazardous materials and other | 2.1. <i>Hazardous materials</i> on a work site are correctly identified and, if appropriate, handled and used |

ELEMENT

PERFORMANCE CRITERIA

hazards on work sites.	according to company and legislated procedures. 2.2. Measures for controlling risks and construction hazards are applied effectively and immediately. 2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate signs and symbols . 2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.
3. Plan and prepare for safe work practices.	3.1. Correct personal protective equipment and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures. 3.2. Selection of tools, equipment and materials , and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures. 3.3. Required barricades and signage are determined and erected at the appropriate site location. 3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.
4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. Prohibited tools and equipment in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet environmental requirements .
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

ELEMENT

PERFORMANCE CRITERIA

various *types of fire* and other emergencies are followed, including identification or use, if appropriate, of *fire equipment* within scope of responsibilities.

5.3. *Emergency response and evacuation procedures* are known, practised and carried out effectively when required.

5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
 - determine and report hazards and risks
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - MSDS, JSA and safe work method statements
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
 - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

EVIDENCE GUIDE

indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

RANGE STATEMENT

Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:

- working at heights.
- designated safety officers, determined by the enterprise, who have undertaken specific safety response training
- managers or other senior personnel
- personnel competent and/or licensed in the safe handling of asbestos
- supervisors.

Safe work practices:

- include:
 - day to day observation of OHS policies and procedures
 - emergency procedures
 - risk assessment
 - use of basic firefighting equipment
- relate to:
 - access to site amenities, such as drinking water and toilets
 - general requirements for safe use of plant and equipment
 - general requirements for use of personal protective equipment and clothing
 - housekeeping to ensure a clean, tidy and safer work area
 - no drugs and alcohol at work
 - preventing bullying and harassment
 - smoking in designated areas
 - storage and removal of debris.

Duty of care requirements:

- relate to:
 - legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
 - relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
- may relate to:
 - own responsibilities to comply with safe work practices, including activities that

RANGE STATEMENT

require licences, tickets or certificates of competency.

Incidents include:

- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
 - breathing apparatus malfunctioning to the extent that the user's health is in danger
 - collapse of the floor, wall or ceiling of a building being used as a workplace
 - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
 - collapse or partial collapse of a building or structure
 - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
 - damage to or malfunction of any other major plant
 - electric shock
 - electrical short circuit, malfunction or explosion
 - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
 - any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- JSA and safe work method statements
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards

RANGE STATEMENT

Information includes:

- OHS and welfare Acts and regulations
- safety codes of practice.
- diagrams or sketches
- emergency situation contacts
- evacuation plans
- instructions issued by authorised organisational or external personnel
- labels
- manufacturer specifications and instructions
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements, such as Acts, regulations and codes of practice
- relevant Australian standards
- reports of near misses or accidents
- safe work procedures or equivalent documentation
- safety meeting minutes
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Hazardous materials include:

- ACM
- cleaning chemicals, including those in pressurised containers
- glues
- insulation materials
- solvents
- treated timber products.

Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

Signs and symbols include:

- emergency information signs (exits, equipment, first aid)
- fire signs (location of fire alarms and

RANGE STATEMENT

<i>Prohibited tools and equipment</i> that cannot be used near identified	<ul style="list-style-type: none">high-speed abrasive power and pneumatic tools, high pressure water cleaners, compressed

RANGE STATEMENT

ACM include:

air or abrasive blasting

- any vacuum cleaning equipment not specifically designed for safe work with asbestos.

Environmental requirements are to cover workplace quality management and include:

- clean-up protection
- stormwater protection
- waste management.

Types of fire includes:

- electrical, chemical, gas, mechanical, paper, wood or natural fire.

Fire equipment includes:

- breathing apparatus
- fire extinguishers
- fire hydrant and hoses
- fire reel
- fire truck
- manual firefighting instruments, such as fire blankets.

Emergency response and evacuation procedures include:

- emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel
- extinguishing fires, organisational first aid requirements and evacuation.

CPCCSV5010A Interact with clients in a regulated environment

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to initiate and undertake consultation with individuals and groups in regard to building surveying practices.

It includes the identification and implementation of appropriate interaction models according to community demographics, cultural considerations and social stratification; the analysis and evaluation of data to enable informed decision-making; and the presentation of findings to clients and other appropriate stakeholders.

Application of the Unit

Application of the unit This unit of competency supports the attainment of the understanding and skills to interact with clients in a regulated environment within the context of relevant legislation, the Building Code of Australia (BCA) and Australian standards.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Devise interaction strategies.	1.1. Interested and affected individuals and parties are identified. 1.2. Range of <i>interaction strategies</i> is identified, assessed for suitability and selected. 1.3. Resources required to conduct interaction are determined. 1.4. Regulations are reviewed to ensure strategies meet all criteria.
2. Assess demographic, cultural, social and psychological considerations.	2.1. Needs of disadvantaged individuals and groups are identified and incorporated from <i>relevant information and social theory</i> . 2.2. Cultural, social and psychological factors are considered and incorporated. 2.3. Urban, <i>demographic</i> , technological, political and economic effects are considered and incorporated. 2.4. Collective community behaviour is assessed.
3. Communicate legislative requirements to	3.1. Information is prepared that is clear, accurate and <i>appropriate to the needs of the parties involved</i> . 3.2. All parties involved are informed of the applicable

ELEMENT	PERFORMANCE CRITERIA
individuals and groups.	<p>legislation through <i>presentation of information</i>.</p> <p>3.3.Information is provided to affected parties at an appropriate time and place and in <i>an appropriate way</i>.</p> <p>3.4.Interaction is undertaken in an orderly manner to ensure all viewpoints are canvassed.</p>
4. Record, analyse and report results.	<p>4.1.Responses are assessed and checked against the project brief.</p> <p>4.2.Appropriate suggestions for improvement are incorporated into the project brief.</p> <p>4.3.Accurate report is prepared, including recommendations for approval.</p> <p>4.4.Overall effectiveness of the interaction is reviewed and evaluated, with action taken where required.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to prepare information in alternative formats and to provide access to consultations for diverse groups through interpreters, etc.
- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - consult with the community, including provision of information about legislation
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - regulations
 - legislation
 - other relevant documentation
 - use and interpret non-verbal communication

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- written skills to:
 - record and report results of interaction with the community
 - prepare information
- innovation skills to identify and implement appropriate and diverse strategies for interacting with diverse communities
- organisational and time management skills to prepare information for meetings and to arrange and conduct meetings to timelines
- problem solving skills to review feedback and select appropriate suggestions for improvement for inclusion in report
- technological skills to:
 - complete documentation, including information materials and reports
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- effects and psychological theories relevant to working with clients in a regulated environment, such as:
 - social stratification
 - social change
 - technological change
- local factors affecting communities and individuals
- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- strategies for consultation
- urbanisation.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where applicable
- perform a management role in the identification and implementation of at least one client negotiation and consultation process or equivalent
- provide reports to appropriate body/individual as determined by the project brief.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes

EVIDENCE GUIDE

where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated

EVIDENCE GUIDE

documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Interested and affected individuals and parties include:

- existing community groups
- government agencies
- individuals and special interest groups
- private sector businesses
- social groups and emergency services.

Interaction strategies include:

- client meetings
- home and site visits
- meetings of relevant stakeholders
- surveys.

Relevant information and social theory include:

- awareness of diverse cultures
- collective behaviour
- deviance
- economic order
- inequality
- political order social change and interaction
- stratification
- technology and the environment
- the family
- urbanisation.

Demographics include:

- age
- ethnicity
- gender
- individual and group profiles
- social stratification.

RANGE STATEMENT

- Appropriate to the needs of the parties involved* involves:
- providing material in alternative formats, such as:
 - large print
 - other languages.
- Presentation of information* includes:
- computer simulations
 - display plans
 - graphics
 - handouts
 - models
 - software presentations
 - videos.
- An appropriate way* includes:
- taking into account access issues, such as parking or building access and cultural requirements or protocols
 - using assistive technology, for example telecommunication device for the deaf (such as TTY) or video captioning
 - using interpreters, including sign language interpreters.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the purpose and basic intent of the BCA.	<p>1.1.Objectives of the BCA and the purpose of its respective components in relation to <i>construction in residential buildings</i> and <i>building categories</i> are evaluated and documented.</p> <p>1.2.Deemed-to-satisfy (DTS) concept for construction to meet BCA requirements is evaluated and documented.</p>
2. Locate and interpret code and standard requirements applicable to particular projects.	<p>2.1.Clauses from the BCA that apply to particular <i>residential building projects requiring review of compliance issues</i> are identified and documented.</p> <p>2.2.Prescriptive requirements of relevant BCA clauses and <i>standard specifications</i> are determined.</p> <p>2.3.Requirements of Australian standards referenced in the BCA are identified and documented.</p> <p>2.4.Special requirements that may be applicable to specific areas of <i>building surveying procedures</i> are identified and documented.</p>
3. Classify buildings.	<p>3.1.Nature of a building is determined in regard to its proposed use and site arrangement.</p> <p>3.2.BCA criteria are applied to determine the defined classification.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Apply solutions to construction problems for compliance with the BCA.	<p>3.3. BCA requirements are interpreted for multiple classifications.</p> <p>4.1. Criteria to ensure construction methods comply with the intent of the BCA are determined.</p> <p>4.2. Alternative approaches to construction problems that comply with the requirements of the BCA are reported.</p> <p>4.3. Assessment methods used to determine whether a building solution complies with performance requirements or DTS provisions of BCA are analysed and applied.</p> <p>4.4. Assessment methods are confirmed and identified as appropriate to meet the DTS provisions of BCA.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - Australian standards
 - BCA
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to:
 - document building requirements
 - report alternative approaches to construction problem
- innovation skills to develop compliant alternative solutions to construction

REQUIRED SKILLS AND KNOWLEDGE

problems

- planning and organisational skills to collect, organise and analyse information
- technological skills to:
 - complete documentation and calculations
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- BCA and primary referenced Australian standards
- criteria for Class 1 and 10 buildings
- design, construction and structural principles of buildings
- DTS provisions
- processes for the administration and preparation of documentation
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

EVIDENCE GUIDE

unit

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where appropriate
- classify construction in residential buildings through the evaluation and interpretation of compliance with the BCA and associated reporting of data, findings, recommendations and strategies for at least one residential building project or equivalent in compliance with relevant legislation
- provide reports to appropriate body/individual as determined by the project brief.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

EVIDENCE GUIDE

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Construction in residential buildings includes:

- compliance with relevant legislation
- design specifications
- evaluation, interpretation and adherence to legislative requirements for BCA Class 1 and 10 buildings
- maintenance specifications
- relevant Australian standards.

Building categories include:

- low-rise residential buildings
- single storey buildings.

Residential building projects requiring review of compliance issues include:

- calculation and processing of application or inspection fees
- project milestones
- provision of site access/facilities
- work schedules.

Standard specifications include:

- developed or detailed specifications addressing specific components, such as structural or other requirements
- industry standard specifications
- preliminary and outline specifications.

Building surveying procedures include:

- mechanical, structural, electrical and other services.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess plans and specifications for size, span and spacing of structural members required in ceiling and roof framing.	<p>1.1. Access is obtained to relevant plans, specifications and documentation related to <i>structural members required in ceiling and roof framing</i> for required <i>building categories</i>.</p> <p>1.2. Specified timber species and stress grading are identified.</p> <p>1.3. True length of common rafter and overhand and economical size of common rafter are determined to support specified roof structure and covering.</p> <p>1.4. Maximum span of common rafter is determined.</p> <p>1.5. Position, location and direction of struts and strutting beams to support roof and ceiling loads are determined and documented.</p> <p>1.6. Method of support at hip and valley rafters is determined and documented.</p> <p>1.7. Location, direction and span of ceiling joists and hanging beams to support specified roof design are determined and documented.</p> <p>1.8. Nominated member sizes, spans, spacings and locations are listed, documented and checked for accuracy against plans and specifications.</p>

ELEMENT	PERFORMANCE CRITERIA
2. Assess plans and specifications for permanent wind bracing requirements for nominated design gust wind speeds.	2.1. Access is obtained to relevant plans, specifications and documentation for <i>assessment of timber-framed designs</i> . 2.2. Location and category of building site is identified against design gust wind speed calculations. 2.3. Wind directions are selected and noted on plans. 2.4. Type and number of bracing units for each wind direction are selected. 2.5. Bracing details and description are documented, based upon calculations.
3. Assess plans and specifications for size, span and spacings of structural members for timber wall frames.	3.1. Access is obtained to relevant plans, specifications and documentation. 3.2. Specified timber species and stress grading are identified. 3.3. Roof load width for walls supporting ceiling and roof structures for a specified roof covering is determined. 3.4. Economical size for common wall studs is determined. 3.5. Size of top and bottom wall plates is determined according to load bearing conditions. 3.6. Size of studs at side window and door opening is determined. 3.7. Size of lintels to nominated openings is determined. 3.8. Size of timber posts and beams supporting overhands is determined. 3.9. Nominated member sizes, spans, spacings and locations are identified, listed, documented and checked against plans and specifications for accuracy.
4. Assess plans and specifications for size, span and spacing of structural members for timber stumps, floor bearers and joists.	4.1. Access is obtained to relevant plans, specifications and documentation. 4.2. Specified timber species and stress grading are identified. 4.3. Economical size for floor bearer and joist to suit maximum spans and spacings is determined. 4.4. Size of timber stumps and footing type and size required to support structural members are determined. 4.5. Size for timber trimmers, working and trimming joists for stair opening to suit maximum spans and

ELEMENT**PERFORMANCE CRITERIA**

spacings is determined.

4.6. Location, direction and span of bearers and joists to support specified structure are determined.

4.7. Nominated member sizes, spans, spacings, direction and bracings are identified, listed, documented and checked for accuracy against plans and specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - plans and specifications
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to record mathematical information
- numeracy skills to apply measurements and calculations
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
 - complete documentation and calculations
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or

REQUIRED SKILLS AND KNOWLEDGE

combined actions

- grading processes and grade markings used to categorise timber and timber products
- manufactured timber framing systems
- nature of timber and effect of physiology and timber pests on its performance
- processes for the administration and preparation of documentation
- processes for the application of wind force, raking forces, and bracing and tie down systems
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- structural, design and construction principles of buildings, including the application of timber in buildings.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where appropriate
- assess timber-framed designs, evaluate plans and specifications, and identify faults; select structural members for roofs, ceilings, walls,

EVIDENCE GUIDE

Context of and specific resources for assessment

floors and stumps relating to performance and the associated reporting of data, findings, recommendations and rectification strategies for at least one building project of up to two storeys or equivalent in compliance with relevant legislation

- provide reports to appropriate body/individual as determined by the project brief.

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to

EVIDENCE GUIDE

confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Guidance information for assessment

This unit could be assessed on its own or in combination with other units relevant to the job function, for example:

- CPCCSV5001A Assess the construction of domestic scale buildings
- CPCCSV5006A Assess construction faults in residential buildings.

EVIDENCE GUIDE

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Structural members required in ceiling and roof framing:

- includes evaluation and identification of structural members used in:
 - ceiling and roof framing
 - floor bearer and joist installing
 - timber stumping
 - timber wall framing
- suitable for the building design in compliance with:
 - BCA
 - design specifications
 - legislative requirements
 - maintenance specifications
 - relevant legislation.

Building categories include:

- all timber-framed domestic scale buildings up to and including two storeys.

Assessment of timber-framed designs:

- includes the identification and recording and reporting of faults, in accordance with workplace providers, in verbal or written

RANGE STATEMENT

format

- timber-framed designs include:
 - floor framing, such as loose set single storey timber structures and two storey suspended upper floor level construction
 - overhang framing with soffits and eaves, attached carport, attached veranda and attached patio
 - roof framing, such as skillion, gable, hip and valley and cathedral
 - wall framing of various sizes, bracing locations and tie downs.

CPCCSV5015A Assess structural requirements for domestic scale buildings

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to assess the structural requirements of domestic scale buildings and those of a similar loading, construction and size, such as small industrial, commercial or public buildings.

It includes the application of design concepts to the selection, positioning and sizing of all structural members and materials that form a building structure.

Application of the Unit

Application of the unit This unit of competency supports the attainment of the understanding and skills to assess structural requirements for domestic scale buildings within the context of relevant legislation, the Building Code of Australia (BCA) and Australian standards.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify structural requirements and loads commonly used in structural design.</p>	<p>1.1. <i>Structural requirements</i> relating to equilibrium, stability, strength, functionality, economy and aesthetics are determined in <i>adherence to legislative requirements</i>.</p> <p>1.2. Different types of loading and loading methods and the effect on structures are identified and documented in accordance with BCA, relevant Australian standards, suppliers' technical data and empirical methods.</p>
<p>2. Analyse the effects of force and moments on structural elements.</p>	<p>2.1. Force, moments and equilibrium of force and the effects on structures are identified and <i>analysis</i> is conducted and recorded.</p> <p>2.2. Equilibrium of forces for co-planar systems in consideration of stability is identified and compared for performance.</p>
<p>3. Analyse properties and behaviour of structural materials.</p>	<p>3.1. Effect of force on materials in tension, compression, stress, strain and elasticity is identified and recorded.</p> <p>3.2. Structural properties and performances are differentiated for common materials and recorded.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Identify section properties of structural elements and their effect on structural performance.	<p>4.1. Cross-sectional geometry and common structural shapes are identified.</p> <p>4.2. Section properties and the relationship between first and second area moments, section modulus and gyration and deflection of beams are identified and compared for performance.</p> <p>4.3. Section properties' values for I (moment of inertia), Z (section modulus) and R (radius) for common sections are determined using tables or standard formulas and compared for performance.</p>
5. Compare the performance and properties of spanning elements.	<p>5.1. Structural considerations of loaded spanning elements for bending moments, shear forces, deflection and torsion are determined and compared for performance.</p> <p>5.2. Bending behaviour and performance of loaded support beams of various types, shapes, spans and loads are determined and compared for performance.</p> <p>5.3. Effect that connections have upon the structural performance of beams is identified and compared for performance.</p> <p>5.4. Principles of slab behaviour in relation to spans and stress distribution are identified and compared for performance.</p>
6. Determine performance criteria for columns.	<p>6.1. Effect of slenderness ratio that changes in length, cross-sections, connections and materials will have on the strength of a column are determined and compared for performance.</p> <p>6.2. Eccentric and axial load effect on the strength of column section and materials are determined and compared for performance.</p>
7. Identify factors affecting design of connections between structural elements.	<p>7.1. Transmission of forces between structural elements are determined and compared for performance.</p> <p>7.2. Methods of distributing stresses in connections between structural elements are determined and compared for performance.</p>
8. Outline how loads of various types occur and impinge on a building structure.	<p>8.1. Differences between types of loading, including dead load, live load, wind load, earthquake load and other load, causing actions are determined and compared for performance.</p> <p>8.2. Dead and live loads using BCA and relevant Australian standards are determined.</p> <p>8.3. Indication of direction of wind pressures on the</p>

ELEMENT**PERFORMANCE CRITERIA**

various surfaces of buildings specified in BCA and relevant Australian standards are determined.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - BCA
 - relevant Australian standards
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to report findings and provide reports
- numeracy skills to analyse and apply complex mathematical information
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
 - complete documentation and calculations
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- nature of materials and effect on performance
- processes for the interpretation of working drawings and specifications
- processes for the preparation of documentation

REQUIRED SKILLS AND KNOWLEDGE

- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- structural and design principles for buildings.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where applicable
- assess, identify and report on findings for the design, positioning and sizing of structural members of at least one domestic scale building project or equivalent
- provide reports to appropriate body/individual as determined by the project brief.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

EVIDENCE GUIDE

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

EVIDENCE GUIDE

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Assessment of ***structural requirements***:

- includes:
 - analysis of engineering drawings
 - evaluation of site physicality
 - identification of safe structural practices
- may require actual site visits.
- domestic scale buildings (similar in characteristics to those of residential dwellings)

Adherence to legislative

RANGE STATEMENT

requirements is limited to:

in terms of loading, construction and size and may include small industrial, commercial and public buildings).

Analysis includes:

- 'I' (moment of inertia) values
- base unit mass, density, velocity, acceleration, force and stress
- column changes in length, cross-sectional, restraints, material and eccentricity
- cross-sectional geometry and common structural shapes
- deflections for symmetrically loaded, simply supported timber beams of various shapes, spans and loads
- directions of wind pressure loads
- force on materials in tension, compression, stress, strain and elasticity
- forces associated with levers identified by direction and value
- forces for co-planar non-current force systems
- load differences, including:
 - dead load
 - live load
 - wind load
 - earthquake load
- minimum bracing requirements
- removal of trusses
- restraints for use with beams
- second area moments and deflection of beams
- simple roof truss transmission force
- structural properties differentiated for common materials
- symmetrically loaded simply supported situations for:
 - bending moments
 - deflection
 - shear forces
 - torsion
- tension and compression stresses of roof members
- wind forces and wind velocity for bracing.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to effectively analyse, implement and monitor environmentally sustainable work practices and their effectiveness on a work site, including contributing to consumer environmental efficiency.

Application of the Unit

Application of the unit This unit of competency supports the needs of those with responsibility for a specific area or site of work, or those who lead a work group or team by using processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

The context of this competency applies to all sectors of the construction industry. It may be applied to all sections of an organisation, including a work site, designated work area, in transit and/or an office.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage.	<p>1.1.Environmental regulations applying to the organisation are identified.</p> <p>1.2.Procedures for ensuring <i>compliance</i> with environmental regulations are assessed.</p> <p>1.3.Information on <i>environmental and resource efficiency</i> systems and procedures are collected, and where appropriate, provided to <i>stakeholders, key personnel and specialists</i>.</p> <p>1.4.Current resource usage is measured and documented by members of the work group.</p> <p>1.5.Current <i>purchasing strategies</i> are analysed and documented.</p> <p>1.6.Current work processes and products are analysed to access information and data and to assist in identifying areas for improvement.</p>
2. Set targets for improvement.	<p>2.1.Input is sought from stakeholders, key personnel and specialists and shared with them as appropriate.</p> <p>2.2.External sources of information and data are accessed as required.</p> <p>2.3.Alternative solutions to work site environmental issues are evaluated.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Implement performance improvement strategies.	<p>2.4. Efficiency targets are set.</p> <p>3.1. Techniques and tools are sourced to assist in achieving targets.</p> <p>3.2. Continuous improvement strategies are applied to work site, including ideas and possible solutions to communicate to stakeholders, key personnel and specialists.</p> <p>3.3. Environmental and resource efficiency improvement plans for work site and clients are integrated with other operational activities and implemented.</p> <p>3.4. Suggestions and ideas about environmental and resource efficiency management are sought from stakeholders, key personnel and specialists and shared with them to act on as appropriate.</p> <p>3.5. Costing strategies are implemented to fully value environmental assets and are shared with stakeholders, key personnel and specialists as necessary.</p>
4. Monitor performance.	<p>4.1. Outcomes are documented and reports on targets are communicated to key personnel and stakeholders.</p> <p>4.2. Strategies are evaluated.</p> <p>4.3. New targets are set and new tools and strategies investigated and applied.</p> <p>4.4. Successful strategies are promoted and, where possible, participants rewarded.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to source/identify the latest industry environmental sustainability concepts and technologies
- applying learning to future opportunities
- change management skills
- communication skills to:

REQUIRED SKILLS AND KNOWLEDGE

- answer questions
- clarify and acknowledge suggestions relating to work requirements and environmental efficiency with stakeholders
- enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
- read and interpret:
 - documentation
 - environmental and resource efficiency requirements
- support information flow between various internal and external stakeholders to resolve and report on environmental and resource efficiency issues
- use and interpret non-verbal communication
- use language and concepts appropriate to cultural differences
- creating tools to measure and monitor improvements and report on outcomes to stakeholders
- innovation skills to identify improvements, apply knowledge about resource use to organisational activities and customer service, and develop resource efficiency tools
- numeracy skills to analyse data on company and stakeholder resource consumption and waste product volumes
- problem solving skills to recognise and analyse problems, including:
 - devising approaches
 - implementing and reflecting on environmental and water, energy or resource efficiency management policies and procedures relevant to work site to improve environmental sustainability
 - share alternative approaches as required
- skills to relate to different genders and people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- technology skills, including the ability to:
 - operate and shut down equipment
 - where relevant, use software systems for recording and filing documentation for measurement and improvement of resource usage and consumption.

Required knowledge

Required knowledge for this unit is:

- how tradespersons can contribute to environmental sustainability
- knowledge of compliance requirements for all relevant environmental and sustainability legislation, regulations and codes of practice including resource hazards and risks associated with work site:
 - supervision
 - job specifications
 - strategies and procedures to maximise opportunities and minimise impacts

REQUIRED SKILLS AND KNOWLEDGE

- relevant to stakeholders and personal area of responsibility
- relevant knowledge of environmental, resource and energy/water efficiency issues, systems and procedures specific to industry practice
- knowledge of best practice approaches and quality assurance systems relevant to area of responsibility and industry
- ability to identify and advise on water/energy efficiency opportunities for stakeholders and key personnel
- supply chain procedures
- OHS issues and requirements
- organisational structure and reporting channels and procedures
- terms and conditions of employment, including policies and procedures, such as:
 - daily tasks
 - equal opportunity
 - work area responsibilities
 - worker, supervisor and employer rights.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by analysing and monitoring effective sustainable work practices on a construction project work site.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- implement and monitor integrated environmental and resource efficiency management policies and procedures within a work site, including:

EVIDENCE GUIDE

- access, collect, analyse and organise information from a number of sources to provide information, advice and tools or resources for improvement opportunities to stakeholders and key personnel
- identify possible areas for improved practices and resource efficiency for stakeholders
- communicate benefits of changing practices to work team and customers
- implement new approaches and improvement plans, including planning and organising activities for staff and stakeholders in relation to:
 - measurement of current use
 - devising strategies to improve environmental and resource efficiency issues
 - reporting as required ensuring appropriate action is taken within work site in relation to environmental and sustainability compliance and potential hazards
- monitor and evaluate improvement plans and efficiency targets, using evaluation and monitoring tools and technology to potentially revise and adjust approaches and strategies to ensure continuous improvement.

Evidence that could be used, reflecting the requirements of the unit of competency and work being performed as evidence, include:

- reports of activities of work group in relation to:
 - measurement of resources and efficiency
 - development of improvement strategies
- work plans outlining approaches to improved practices, with documented benchmarks
- invoices from stakeholders specifying materials recommended for improved efficiency and those actually used
- quotes and tenders
- lists of environmental hazards, risks and inefficiencies, and opportunities for

EVIDENCE GUIDE

improvements identified in the work site

- work samples, tools, techniques or simulated activities and the outcomes.

Processes may include:

- relevant authenticated correspondence
- way in which advice is sought and suggestions made about improvements from stakeholders and key personnel
- evidence of implementation of programs, such as:
 - green building program
 - supply chain program for purchasing sustainable products
 - environmental site management framework or product recommendations
- notes on understanding external benchmarks and support for particular benchmarks to be used, with expected outcomes and including approaches to recommend products and practices to stakeholders for improving their resource use.

Resource implications for assessment must include:

- observation by the assessor over a period of time and in a range of situations and/or evidence provided to the assessor in written or verbal form, including:
 - implementing tools and techniques
 - review of work site and stakeholders/key personnel to assess and measure resource use, hazards and compliance
 - application of learning to future activities
 - recommended products and practices to stakeholders
- access to a range of information and resources for assessment as listed in the range statement, such as:
 - environmental and sustainability legislation
 - compliance documentation
 - organisational and procedural requirements or organisation plans
 - work supervision and work site documentation, including personnel and

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Compliance includes:

- meeting relevant Acts, laws, by-laws and regulations, codes of practice or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection,

RANGE STATEMENT

	<p>Biodiversity Conservation Act and Building Code of Australia)</p> <ul style="list-style-type: none"> • levels include: <ul style="list-style-type: none"> • federal • industry • international • local government • organisation • reporting breaches • state and territory.
<p><i>Environmental and resource efficiency</i> includes:</p>	<ul style="list-style-type: none"> • approaches of industry associations, such as: <ul style="list-style-type: none"> • Australian Building Greenhouse Rating • green plumbers • green purchasing • Housing Industry Association (HIA) GreenSmart • ISO 14001 Environmental Management Systems • lifecycle thinking • Master Builders Association of Victoria Green Living, Leadership in Energy and Environmental Design (LEED), or Green Building Council of Australia (GBCA) Green Star environmental rating system • National Australian Building Environmental Rating Scheme (NABERS) • product stewardship • supply chain management • Victoria Stormwater Management Guidelines of the Environment Protection Authority (EPA) • implementing and using alternative practices, procedures or materials to reduce or eliminate resource consumption on work site • recommendations to stakeholders, including: <ul style="list-style-type: none"> • addressing environmental and resource sustainability initiatives, such as an environmental framework, action plan, recommendations, surveys and audits with stakeholders and key personnel • efficient water use (e.g. rainwater tanks,

RANGE STATEMENT

grey water sprinkler systems or timers)

- energy use (e.g. equipment/appliances installed; equipment, appliance and tool maintenance; transporting materials; heating and cooling; and building efficiency)
- environmental site management
- evaluating and implementing most appropriate waste treatment, including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment through site management
- improving resource, energy and water efficiency
- including environmental performance in tender and quote specifications
- initiating and maintaining appropriate work site procedures for operational energy consumption, including stationary and non-stationary (transport) energy
- preventing and minimising risks and maximising opportunities on work site and for stakeholders
- reducing emissions of greenhouse gases
- reducing material usage
- reducing stormwater pollution
- reducing use of non-renewable resources
- types of products and materials used
- reference to standards, guidelines, industry association standards, codes of practice and best practice approaches such as:
 - federal government standards, including five-star rating for all new homes.

Stakeholders, key personnel and specialists (individuals and groups) both within and external to the organisation who have direct or indirect interest in the organisation's conduct, actions, products and services, include:

- clients
- employees at all levels of the organisation
- government
- investors
- key personnel within the organisation
- local community
- specialists outside the organisation who may have particular technical expertise
- suppliers

RANGE STATEMENT

- Purchasing strategies*** include:
- other organisations.
 - influencing stakeholders to take up environmental sustainability approaches and products
 - researching and participating in programs, such as a supply chain program to purchase sustainable products (such as radial timber, sustainable timber, and low flow fittings and appliances).
- Techniques and tools*** include:
- accessing the skills of others as appropriate to the specific industry context
 - environmental site management plans
 - examination of invoices from suppliers
 - examination of relevant information and data
 - integration of environmental and sustainability specifications in quotes and tenders
 - measurements made under different conditions
 - recommendation of sustainable products and practices to stakeholders.
- Suggestions*** include:
- eliminating the use of hazardous and toxic materials
 - expressing green purchasing power through using and recommending a selection of suppliers with improved environmental performance (e.g. green power, lifecycle thinking, product stewardship, energy or water efficiency)
 - ideas that help to improve energy and water efficiency
 - making more efficient use of resources, materials, energy and water
 - maximising opportunities to use renewable, recyclable, reusable and recoverable resources (energy, water, materials, products and waste)
 - preventing and minimising risks and maximising opportunities, such as use of renewable energy such as solar or grey water, and other alternative forms of water, energy and resources
 - recommending and using alternative sustainable products, materials, procedures, practices and installation techniques
 - reducing emissions of greenhouse gases by

RANGE STATEMENT

- reducing waste and transport
- reducing the consumption of non-renewable resources, such as water, fuel, and materials
 - seeking alternative sources of water and energy or encouraging conservation.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to maintain the safety and security of premises. It requires the ability to communicate effectively, maintain operational safety and respond appropriately to security risk situations.

This unit may form part of the licensing requirements for persons engaged in security operations in those states and territories where these are regulated activities.

Application of the Unit

Application of the unit This unit of competency has wide application in the security industry in those roles involving operational activities. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain effective relations.	<p>1.1 Applicable provisions of <i>legislative</i> and <i>organisational requirements</i> relevant to <i>assignment instructions</i> are identified and complied with.</p> <p>1.2 Effective <i>interpersonal techniques</i> are used to develop, support and promote confidence with <i>relevant persons</i>.</p> <p>1.3 Communication is courteous, professional and sensitive to individual <i>social and cultural differences</i>.</p> <p>1.4 Personal presentation is maintained in accordance with organisational requirements.</p>
2 Maintain operational safety.	<p>2.1 <i>Environmental factors</i> are continually monitored, assessed and reviewed to identify distinctive features and any change in characteristics that might indicate unusual or suspicious behaviour.</p> <p>2.2 Personal safety checks are made on a systematic and routine basis in accordance with organisational procedures.</p> <p>2.3 Communication is maintained continually throughout security operations using appropriate <i>communication channels and processes</i>.</p> <p>2.4 <i>Resources and equipment</i> are maintained and used appropriate to the security operation.</p> <p>2.5 <i>Security risk situations</i> are accurately identified and assessed for degree of risk to self, others, property and premises.</p>
3 Respond to security risks.	<p>3.1 <i>Response</i> is formulated and carried out within scope of own role, competence and authority.</p> <p>3.2 Changing circumstances are monitored and responses are</p>

ELEMENT	PERFORMANCE CRITERIA
	adjusted as required to maintain security.
	3.3 Response initiative maximises the safety and security of self, others, property and premises.
	3.4 Requirements for specialist assistance or advice is identified and promptly sought in accordance with organisational procedures.
	3.5 Relevant <i>documentation</i> is completed and securely maintained with due regard to confidentiality in accordance with organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- communicate effectively with people from different social, cultural and ethnic backgrounds and of varying physical and mental abilities
- communicate using appropriate channels and communication codes and signals
- determine response appropriate to security risk situation
- facilitate commonsense solutions within operating parameters
- identify and comply with applicable legal and procedural requirements including licensing requirements
- identify and comply with security incident response procedures
- identify security risk factors and conduct risk assessment
- minimise hazards and risks to the health and safety of self and others
- operate security and communications equipment
- present a professional image to members of the public and colleagues
- read, analyse and interpret information
- recognise support and assistance requirements
- record and report information
- select and use equipment appropriate to the security operation.

Required knowledge

- applicable legislative provisions relevant to 'use of force' guidelines and licensing requirements
- bomb threat and counter-terrorism procedures
- communication channels, codes and signals
- documentation procedures and processes

REQUIRED SKILLS AND KNOWLEDGE

- emergency and evacuation procedures and instructions
- first aid principles and procedures
- limits of own responsibility and authority
- methods of restraint and associated effects (eg, restraint related injury or death)
- observation and monitoring techniques
- operational principles of security, communication and protective equipment
- premises layout and access points
- principles of effective communication including interpersonal techniques
- reporting structure and processes
- structure and responsibilities of the emergency services agencies
- types of security situations which may be encountered during guarding operations and appropriate responses.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- identifying and assessing all factors which might impact on the safety and security of persons and property
- formulating and implementing appropriate responses or contingency measures to maintain security
- systematically monitoring security activities and varying operational plans as required to meet changing circumstances
- maximising the safety and protection of people involved in incidents while carrying out response activities
- communicating effectively on a one-to-one and group basis with people from a range of diverse backgrounds and of varying abilities
- providing accurate and constructive operational observations and completing documentation in an appropriate style and format.

Context of and specific resources for assessment

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements,

performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

Guidance information for assessment Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

regional contexts) may also be included.

Legislative requirements may relate to:

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- force continuum, use of force guidelines
- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
 - anti-discrimination
 - cultural and ethnic diversity
 - environmental issues
 - equal employment opportunity
 - industrial relations
 - Occupational Health and Safety (OHS)
- relevant industry codes of practice
- telecommunications
- trespass and the removal of persons
- use of restraints and weapons:
 - batons
 - firearms
 - handcuffs
 - spray.

Organisational requirements may relate to:

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes

Assignment instructions may include:

- and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- storage and disposal of information.
- assignment purpose and objective
- assignment tasks and procedures
- assignment timeframe
- client identification information
- incident and security risk response procedures
- monitoring objectives
- personal presentation requirements
- personal protection equipment
- premises location and layout
- reporting and documentation requirements
- resource and equipment requirements.

Interpersonal techniques may involve:

- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

Relevant persons may include:

- clients
- colleagues
- emergency services personnel
- members of the public
- supervisor.

Social and cultural differences may relate to:

- dress and personal presentation
- food
- language
- religion
- social conventions
- traditional practices
- values and beliefs.

- Environmental factors*** may relate to:
- access to assistance and resources
 - availability of exits and opportunities for escape
 - crowds
 - different degrees of light including low light and darkness
 - presence of several sources of threat
 - time of day
 - weather.
- Communication channels and processes may relate to:***
- direct line supervision paths
 - established communication protocols
 - formal communication pathways
 - lateral supervision paths
 - organisational communication networks
 - verbal and non-verbal communication procedures eg pro-words, phonetic alphabet, call signs, coded messages, use of abbreviations, hand signals.
- Resources and equipment may include:***
- access to emergency services and specialist personnel
 - back-up personnel
 - business equipment eg computers and computer applications
 - communication equipment eg two-way radio, pager, mobile telephone
 - defensive equipment eg batons, firearm, and the relevant licenses, permits and storage facilities
 - fire fighting equipment
 - first aid kit
 - personal protection equipment
 - security equipment eg electronic screening equipment, video cameras and monitors, alarms and signals.
- Security risks*** may relate to:
- breaches of law eg criminal damage, offences against people, public order, misuse of drugs and alcohol
 - emergencies eg fire, scenes of crime, accidents
 - hazards eg physical, chemical, electrical, psychological, biological
 - threats eg bombs, sabotage, assassination.
- Response may involve:***
- checking identification
 - defusing the situation
 - evacuating the premises
 - isolating area of potential risk
 - isolating risk
 - issuing verbal warnings
 - notifying relevant emergency services agencies
 - offering assistance

- provision of first aid
- request for support and assistance
- restraint of person
- tactical withdrawal
- use of basic defensive techniques
- use of negotiation techniques.
- activity logs
- incident reports
- records of conversation
- request for assistance forms
- running sheets
- vehicle and personnel movements
- written and electronic reports.

Documentation may include:

CUVDES405A Research and apply techniques in spatial design

Modification History

Version	Comments
CUVDES405A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to research and apply techniques for application to spatial design. It involves interpreting work briefs, organising resources, testing ideas, and refining approaches to a range of design challenges. The unit covers the design process to the point of producing models or maquettes for spatial designs.

Application of the Unit

Individuals who generate ideas and solutions for the layout of spaces apply the skills and knowledge in this unit. Spatial design solutions are required for exhibitions, fit-outs for exterior spaces or environments, fit-outs for building foyers and offices, special events and theatre sets.

Skills associated with producing final designs can be found in units related to specific disciplines, such as set and exhibition design which are contained in Training Packages, such as CUE03 Entertainment and CUL04 Museum and Library/Information Services.

At this level, research, experimentation and ongoing refinement are used to produce a range of design work where individuals are beginning the process of finding their individual style. Work is undertaken independently with supervision and guidance as required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Interpret spatial design briefs	1.1 Interpret the <i>specifications</i> of design <i>briefs</i> 1.2 Take user or client requirements into account when making decisions about <i>spatial design work</i> 1.3 Clarify issues about specifications, <i>parameters and constraints</i> with relevant people as required 1.4 Source and evaluate information pertinent to briefs
2. Organise resources for spatial design	2.1 Identify resources required to develop spatial design models, including <i>work space, tools and equipment</i> 2.2 Prepare and care for resources according to requirements 2.3 Follow storage and inventory procedures
3. Test spatial design approaches	3.1 Produce <i>preliminary visual representations</i> 3.2 <i>Identify possible approaches</i> and establish <i>criteria</i> for selecting final approach 3.3 Select appropriate <i>materials</i> , tools and equipment and <i>test approaches and techniques</i> 3.4 Evaluate testing processes against criteria and select the approach that best meets the requirements of briefs 3.5 Critique own work and seek feedback as required 3.6 <i>Refine</i> and <i>document the approach</i> to spatial design work

	based on testing and evaluation
4. Fabricate spatial design models or maquettes	<p>4.1 Evaluate the need for fabrication and the scope of work required</p> <p>4.2 Select and organise materials, tools and equipment for fabrication according to design approach</p> <p>4.3 Safely make models or maquettes ensuring consistency with design concepts and briefs</p> <p>4.4 Respond positively to feedback and refine work as required</p> <p>4.5 Present models or maquettes within agreed timeframes</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to engage with others about approaches to spatial design
- initiative and enterprise skills to experiment with techniques to produce effects that enhance the design of spaces
- learning skills to refine and improve a range of spatial design techniques
- literacy skills to interpret design briefs and research information about spatial design
- numeracy skills to calculate proportions, measurements and costs
- self-management and planning skills to plan work tasks
- technical skills to evaluate, adapt and integrate a range of techniques into the design and fabrication of models and maquettes.

Required knowledge

- role of experimentation in designing spaces
- formal elements and principles of design and their application to spatial design
- techniques, materials, tools and equipment and their application to different areas of spatial design
- common formats and features of spatial design briefs
- work and ideas of other designers specialising in spatial design
- history and theory of design in relation to spatial design
- intellectual property issues and legislation and their relevance to spatial design
- sustainability considerations for spatial design
- OHS requirements relevant to the design of spaces.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> test and use a range of approaches and techniques for the design of spaces in response to a brief produce a model or maquette for at least one spatial design apply knowledge of the processes and techniques used for spatial design in different contexts.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> briefs on which to base the design of spaces equipment and tools used to produce models or maquettes of spatial designs.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct observation of design or model making work in progress, including exploration of, and experimentation with, techniques evaluation of visual documentation of spatial designs evaluation of plans and models produced by the candidate questioning and discussion about the candidate's intentions and the work outcome review of portfolios of evidence review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> BSBDES401A Generate design solutions BSBDES402A Interpret and respond to a design brief.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Specifications may refer to:</p>	<ul style="list-style-type: none"> • client needs • dimensions • purpose • style.
<p>Briefs are usually prepared by a commissioning body or organisation and may be:</p>	<ul style="list-style-type: none"> • diagrammatic • verbal • visual • written.
<p>Spatial design work may include:</p>	<ul style="list-style-type: none"> • exhibition design • fit-outs for exterior spaces or environments • foyer design • installation for specific event • office fit-outs • set design.
<p>Parameters and constraints may refer to:</p>	<ul style="list-style-type: none"> • considerations, such as: <ul style="list-style-type: none"> • client’s organisational background • contractual • copyright • ethical • health and safety • legal • subject matter • cost • material characteristics • technology • timeframe.
<p>Relevant people may include:</p>	<ul style="list-style-type: none"> • clients • colleagues • industry practitioners • managers • mentors • supervisors.

<p>Work space needs may include:</p>	<ul style="list-style-type: none"> • drafting table • electronic equipment • lighting and power requirements • process-specific space needs.
<p>Tools and equipment may include:</p>	<ul style="list-style-type: none"> • brushes • camera • computer • hand tools • ladders • lighting equipment • power tools • printer • relevant software • scanner.
<p>Preliminary visual representations may include:</p>	<ul style="list-style-type: none"> • computer-aided design and drafting (CADD) • colour boards • photography and digital imaging • plan drawing • sample boards • sketching.
<p>Identifying possible approaches includes:</p>	<ul style="list-style-type: none"> • identifying possible design solutions • identifying possible realisation options, such as by: <ul style="list-style-type: none"> • fabricating an aspect of the design • means of a model or maquette.
<p>Approaches may encompass:</p>	<ul style="list-style-type: none"> • aesthetic considerations • choice of fabrication options • design solutions • parameters of the brief.
<p>Criteria may include:</p>	<ul style="list-style-type: none"> • access to materials, tools and equipment required to realise designs • consistency with spatial design briefs • ease of manufacture • personal affinity with medium and materials.
<p>Materials may include:</p>	<ul style="list-style-type: none"> • cardboards • clays • fibres • glass • manufactured materials: <ul style="list-style-type: none"> • tiles • panels • carpeting

	<ul style="list-style-type: none"> • textiles • metals • modelling pastes • natural elements: <ul style="list-style-type: none"> • water • light • wind • plants • glazes • paints • paper • plastics • stains • wood and/or wood products.
Strategies to <i>test</i> techniques may involve:	<ul style="list-style-type: none"> • exploring techniques by making practice pieces, test pieces, mock-ups or samples • testing materials by applying stress and colour tests.
<i>Techniques</i> would depend on design solutions and realisation options and may include:	<ul style="list-style-type: none"> • carpentry • digital work • glasswork • lighting • modelling • painting and decoration • photography • projection • surface decoration • textile work.
Process followed to <i>refine</i> the design approach may involve:	<ul style="list-style-type: none"> • adjustment to design solution • adjustment to take account of elements and principles of design • adjustment to use the extended capabilities of techniques.
Process used to <i>document the approach</i> may involve:	<ul style="list-style-type: none"> • elevations • final drawings • illustrations • models • photographs • plans • specifications for fabrication.

Unit Sector(s)

Design – design process

HLTFA301C Apply first aid

Modification History

Unit Descriptor

Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Assess the situation

1.1 Identify assess and minimise *hazards* in the situation that may pose a risk of injury or illness to self and others

1.2 Minimise immediate *risk* to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements

1.3 Assess casualty and identify injuries, illnesses and conditions

2. Apply first aid procedures

2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness

2.2 Use available *resources and equipment* to make the casualty as comfortable as possible

ELEMENT**PERFORMANCE CRITERIA**

- 2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner
- 2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort
- 2.5 Seek consent from casualty prior to applying first aid management
- 2.6 Provide *first aid management* in accordance with *established first aid principles* and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements
- 2.7 Seek first aid assistance from others in a timely manner and as appropriate
- 2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures
- 2.9 Use safe manual handling techniques as required
- 2.10 Monitor *casualty's condition* and respond in accordance with effective first aid principles and procedures
- 2.11 Finalise casualty management according to casualty's needs and first aid principles
3. Communicate details of the incident
- 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant *communication media and equipment*
- 3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
- 3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
- 3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
- 3.5 Maintain confidentiality of records and

ELEMENT**PERFORMANCE CRITERIA**

information in line with privacy principles and statutory and/or organisation policies

4. Evaluate own performance

4.1 Seek feedback from *appropriate clinical expert*

4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents

4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- ARC Guidelines relating to provision of first aid as outlined
- Awareness of stress management techniques and available support
- First aid management of:
 - abdominal injuries
 - allergic reactions
 - altered and loss of consciousness
 - bleeding
 - burns - thermal, chemical, friction, electrical
 - cardiac arrest
 - casualty with no signs of life
 - chest pain
 - choking/airway obstruction
 - injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries;

REQUIRED SKILLS AND KNOWLEDGE

- minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- envenomation - snake, spider, insect and marine bites
- environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
- fractures
- medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- near drowning
- poisoning and toxic substances (including chemical contamination)
- respiratory distress
- seizures
- shock
- stroke
- substance misuse - common drugs and alcohol, including illicit drugs
- Social/legal issues:
 - duty of care
 - need to be culturally aware, sensitive and respectful
 - importance of debriefing
 - confidentiality
 - own skills and limitations
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

continued ...

Essential knowledge (contd):

- Working knowledge of:
 - basic occupational health and safety requirements in the provision of first aid
 - basic principles and concepts underlying the practice of first aid
 - chain of survival
 - first aiders' skills and limitations
 - infection control principles and procedures, including use of standard precautions
 - priorities of management in first aid when dealing with life threatening conditions
 - procedures for dealing with major and minor injury and illness

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

REQUIRED SKILLS AND KNOWLEDGE

This includes the ability to:

- Administer medication in line with state/territory regulations, legislation and policies
- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively in an incident
- Conduct an initial casualty assessment
- Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit *HLTCPR201A Perform CPR*)
- Demonstrate:
 - ability to call an ambulance
 - consideration of the welfare of the casualty
 - safe manual handling
 - site management to prevent further injury
- Evaluate own response and identify appropriate improvements where required
- Follow OH&S guidelines
- Infection control, including use of standard precautions
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this

EVIDENCE GUIDE

evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:

- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Related units:

This unit incorporates the content of units:

- HLTCPR201B Perform CPR
- HLTFA201B Provide basic emergency life support

EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

- Focus on first aid management of specific types of injury
- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Established first aid principles include:

- Preserve life
- Prevent illness, injury and condition(s) becoming worse
- Promote recovery
- Protect the unconscious casualty

Vital signs include:

- Consciousness
- Breathing
- Circulation

A hazard is:

- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

RANGE STATEMENT

Hazards may include:

- Physical hazards
- Biological hazards
- Chemical hazards
- Hazards associated with manual handling

Risks may include:

- Risks from equipment, machinery and substances
- Risks from first aid equipment
- Environmental risks
- Exposure to blood and other body substances
- Risk of further injury to the casualty
- Risks associated with the proximity of other workers and bystanders
- Risks from vehicles

Casualty's condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions
- Altered and loss of consciousness
- Bleeding
- Burns - thermal, chemical, friction, electrical
- Chest pain/cardiac arrest
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- Near drowning
- Envenomation - snake, spider, insect and marine bites
- Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
- Fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- No signs of life
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress/arrest
- Seizures
- Shock
- Stroke

RANGE STATEMENT

- Substance misuse - common drugs and alcohol, including illicit drugs.
- First aid management must take into account applicable aspects of:*
- The setting in which first aid is provided, including:
 - workplace policies and procedures
 - industry/site specific regulations, codes etc.
 - OHS requirements
 - state and territory workplace health and safety legislative requirements
 - location and nature of the incident
 - situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
 - location of emergency services personnel.
 - The use and availability of first aid equipment and resources
 - Infection control
 - Legal and social responsibilities of first aider
- Resources and equipment are used appropriate to the risk to be met and may include:*
- AED
 - First aid kit
 - Auto-injector
 - Puffer/inhaler
 - Resuscitation mask or barrier
 - Spacer device
- Communication media and equipment may include but are not limited to:*
- Telephones, including landline, mobile and satellite phones
 - HF/VHF radio
 - Flags
 - Flares
 - Two way radio
 - Email
 - Electronic equipment
 - Hand signals
- Appropriate clinical expert may*
- Supervisor/manager
 - Ambulance officer/paramedic

RANGE STATEMENT

include:

- Other medical/health worker

Documentation may include:

- Injury report forms
- Workplace documents as per organisation requirements

Documentation may include recording:

- Time
- Location
- Description of injury
- First aid management
- Fluid intake/output, including fluid loss via:
 - blood
 - vomit
 - faeces
 - urine
- Administration of medication including:
 - time
 - date
 - person administering
 - dose
- Vital signs

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare to respond to emergency in a remote situation

1.1 *Prepare for isolated travel* or work, accounting for expected contingencies

1.2 Assess casualty's condition and determine appropriate response in order to minimise hazards and determine need for medical assistance

1.3 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, transport availability and casualty's condition

2. Provide first aid in a remote situation

2.1 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort

2.2 Seek consent from casualty prior to applying first aid management

2.3 Provide first aid response to address casualty's condition and in accordance with effective first aid principles

2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner

2.5 Monitor casualty's condition and undertake ongoing first aid procedures as required

ELEMENT**PERFORMANCE CRITERIA**

- 2.6 Calmly provide information to reassure casualty during the wait for medical assistance, adopting a communication style to match the casualty's level of consciousness
- 2.7 Provide shelter from elements in accordance with environmental conditions
- 2.8 Document condition of casualty over time to assist in on-going management
3. Work in conjunction with medical and emergency services support
- 3.1 Establish communication links to medical services, using relevant communication equipment to ensure prompt control action is undertaken
- 3.2 Request ambulance support or appropriate medical assistance according to relevant circumstances
- 3.3 Administer medication under direct instruction from an *authorised health worker* as required
- 3.4 Assist in the evacuation of the casualty by following directions given by emergency services as required
4. Evaluate the incident
- 4.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties
- 4.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs
- 4.3 Formulate and review contingency planning to identify and select improved or alternative management principles and procedures as required

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- Awareness of stress management techniques and available support
- Infection control principles and procedures, including use of standard precautions
- Principles for evaluating management options relating to transporting casualty and/or waiting for assistance
- Principles of identifying and preparing area for safe evacuation (including aero-medical evacuation)
- Principles of preparing for providing first aid in an area remote from ready assistance, including identifying and preparing supplies to address contingencies specific to different types of situation
- Understanding of WHS principles
- Working knowledge of communication systems, equipment and methods as available in the remote situation

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Accurately listen to, clarify and apply medical instructions
- Administer medication under direct instruction from an authorised health worker and in accordance with State/Territory regulations, legislation and policies
- Communicate effectively and assertively and show leadership in an incident
- Conduct an initial casualty assessment in a remote situation
- Demonstrate:
 - adequate infection control procedures, including standard precautions
 - identification and preparation of area for safe evacuation (including aero-medical evacuation)
 - safe manual handling
- Evaluate available options for transporting or maintaining condition of casualty
- Improvise treatment and associated resources
- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in a remote

REQUIRED SKILLS AND KNOWLEDGE

situation

- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own level of skills and knowledge
- Prepare a written incident report or provide information to enable preparation of an incident report
- Transport casualty safely using available methods
- Undertake contingency planning in relation to providing a first aid response in a remote situation
- Use available communication methods and equipment to access medical assistance
- Use available resources effectively to manage pain
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, Australian Resuscitation Council and industry guidelines
- Assessment should utilise aspects of actual or simulated remote situation relevant to work or community context

Method of assessment may

- Skills in performing first aid procedures are to be

EVIDENCE GUIDE

include:

assessed through demonstration, with questioning to confirm essential knowledge

- Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Related unit:

This unit should be assessed either after or in conjunction with achievement of the following related competency unit:

- HLTFA311A Apply first aid

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address

- Focus on first aid management of specific types of

RANGE STATEMENT

specific requirements may include:

injury

- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Preparation for isolated/remote travel may include:

- Selection of relevant communication equipment
- Accessing relevant first aid supplies and resources to cater for environmental conditions
- Considering access/egress opportunities
- Notifying relevant authorities of travel plans

In remote/isolated situations consideration to travel or wait would depend upon:

- Severity of injury
- Time required for medical assistance to arrive
- Whether movement might hinder rescue
- Advice given by authorised health worker
- Whether contact with medical and/or emergency services has been achieved

Documentation, especially in remote/isolated situations may include recording:

- Time
- Location
- Description of injury
- First aid management
- Fluid/oral intake/output, including fluid loss via:
 - blood
 - vomit
 - faeces
 - urine
- Administration of medication including time, date, person administering, dose
- Vital signs

Authorised health worker may include:

- Paramedic/ambulance officer
- General practitioner
- Nurse practitioner

Unit Descriptor

Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements

specified in the unit of competency

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

1. Assess the situation

PERFORMANCE CRITERIA

1.1 Identify assess and minimise *hazards* in the situation that may pose a risk of injury or illness to self and others

1.2 Minimise immediate *risk* to self and casualty's health and safety by controlling any hazard in accordance with work health and safety requirements

1.3 Assess casualty and identify injuries, illnesses and conditions

ELEMENT**PERFORMANCE CRITERIA**

2. Apply first aid procedures

- 2.1 Adopt a communication style to match the casualty's level of consciousness
- 2.2 Use available *resources and equipment* to make the casualty as comfortable as possible
- 2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner
- 2.4 Determine and explain relevant first aid procedures to provide comfort
- 2.5 Seek consent from casualty prior to applying first aid management
- 2.6 Provide *first aid management* in accordance with *established first aid principles and procedures*
- 2.7 Seek first aid assistance from others in a timely manner and as appropriate
- 2.8 Correctly operate first aid equipment for first aid management according to manufacturer/supplier's instructions and procedures
- 2.9 Use safe manual handling techniques
- 2.10 Monitor *casualty's condition* and respond in accordance with established first aid principles and procedures
- 2.11 Finalise casualty management according to casualty's needs and first aid principles

3. Communicate details of the incident

- 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstance
- 3.2 Accurately convey observation of casualty's condition and management activities to ambulance services / relieving personnel
- 3.3 Accurately assess and *report details* of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
- 3.4 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies

4. Evaluate own performance

- 4.1 Seek feedback from *appropriate clinical expert*
- 4.2 Recognise the possible psychological impacts on

ELEMENT**PERFORMANCE CRITERIA**

rescuers involved in critical incidents

4.3 Participate in debriefing/evaluation to improve future response and address individual needs

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes a demonstrated understanding of:

- Awareness of stress management techniques and available support
- First aid management, based on a risk assessment relevant to the workplace or community setting of:
 - abdominal injuries
 - allergic reactions
 - altered and loss of consciousness
 - asthma
 - anaphylaxis
 - bleeding
 - burns – thermal, chemical, friction, electrical
 - cardiac arrest
 - chest pain
 - choking/airway obstruction
 - drowning
 - envenomation – snake, spider, insect and marine bites and stings
 - environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
 - injuries- cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
 - medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
 - poisoning and toxic substances (including chemical contamination)
 - respiratory distress

- seizures
- shock
- stroke
- substance misuse – common drugs and alcohol, including illicit drugs
- unconsciousness, not breathing or not breathing normally
- Guidelines for provision of first aid as outlined in Australian Resuscitation Council (ARC) Guidelines and guidelines of Australian national peak clinical bodies and State / Territory legislation and regulations
- Social / legal issues including:
 - duty of care
 - confidentiality
 - importance of debriefing
 - need to be culturally aware, sensitive and respectful
 - own skills and limitations
- Understanding of:
 - basic work health and safety requirements in the provision of first aid
 - basic principles and concepts underlying the practice of first aid
 - chain of survival
 - infection control principles and procedures, including use of standard precautions
 - priorities of management in first aid when dealing with life threatening conditions
 - procedures for dealing with major and minor injury and illness
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to
- Understanding the causes of asphyxia due to body position

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty(s) condition
- Communicate effectively and assertively in an incident
- Conduct an initial casualty assessment
- Management of:
 - Anaphylaxis using adrenalin auto-injector
 - Avoiding asphyxia due to body position
 - Bronchospasm using bronchodilator and spacer device
 - Cardiac arrest using single rescuer procedure, including the demonstration of a seamless changeover between operators

- External haemorrhage
- Fractures, sprains and strains using arm slings, roller bandages and other appropriate immobilisation techniques
- Unconscious casualty including using a recovery position
- Demonstrate:
 - ability to call an ambulance
 - consideration of the welfare of the casualty
 - safe manual handling
 - site management to prevent further injury
 - understanding of causes contributing to asphyxia due to body position
- Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit *HLTCPR211A Perform CPR*)
- Demonstrate infection control, including use of standard precautions
- Evaluate own response and identify appropriate improvements where required
- Follow State and Territory work health and safety legislative requirements
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Plan an appropriate first aid response in line with established first aid principles, ARC Guidelines and guidelines of Australian national peak clinical bodies, industry standards and State / Territory legislation and regulations and respond to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and/or administer medication in line with State/Territory legislation and regulations, organisation policies and any available medical/pharmaceutical instructions
- Unpack, activate and follow prompts of an AED

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

- Critical aspects of assessment:*
- The individual being assessed must provide evidence of essential knowledge and essential skills
 - Competence should be demonstrated working individually and as part of a first aid team
 - Consistency of performance should be demonstrated over the required range of situations relevant to the

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

workplace or community setting

- Currency of first aid knowledge and skills is to be demonstrated in line with ARC Guidelines and guidelines of Australian national peak clinical bodies and State / Territory legislation and regulations
- Context and resources required for assessment:*
- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
 - Demonstration of first aid procedures over the required range of situations relevant to the workplace setting must be demonstrated using standard precautions and first aid equipment including roller bandages, triangular bandages, other trauma dressings, bronchodilator and spacer device, adrenalin auto-injectors and AED
 - For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Related units:

This unit incorporates the content of units:

- HLTCPR211A Perform CPR
- HLTFA211A Provide basic emergency life support

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
- Focus on first aid management of specific types of injury

Established first aid principles and procedures include:

- Australian Resuscitation Council Guidelines
- Guidelines of Australian national peak clinical bodies
- Primary First Aid Principles to:
 - Preserve life
 - Prevent illness, injury and condition(s) becoming worse
 - Promote recovery
 - Protect the unconscious casualty
- State/Territory legislation and regulations

Hazards may include:

- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
- Relevant hazards may be classified under the headings:
 - Biological hazards
 - Chemical hazards
 - Hazards associated with manual handling
 - Physical hazards

Risks may include:

- Environmental risks
- Exposure to blood and other body substances
- Risks associated with the proximity of other workers and bystanders
- Risks from body position
- Risks from equipment, machinery and substances
- Risks from vehicles
- Risks from first aid equipment
- Risk of further injury to the casualty

Casualty's condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions

- Altered and loss of consciousness
- Bleeding
- Body position
- Burns – thermal, chemical, friction, electrical
- Cardiac arrest
- Chest pain
- Choking/airway obstruction
- Drowning
- Envenomation – snake, spider, insect and marine bites and stings
- Environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress
- Seizures
- Shock
- Stroke
- Substance misuse – common drugs and alcohol, including illicit drugs
- Unconsciousness, not breathing or not breathing normally
- Infection control
- Legal and social responsibilities of first aider
- The setting in which first aid is provided, including:
 - industry/site specific regulations, codes etc.
 - location and nature of the incident
 - location of emergency services personnel
 - situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
 - State and Territory work health and safety legislative requirements
 - workplace policies and procedures
 - WHS requirements
- The use and availability of first aid equipment and

First aid management must take into account:

- resources
- Resources and equipment are used appropriate to the risk to be met and may include:*
- AED
 - Auto-injector
 - Bronchodilator and spacer device
 - First aid kit
 - Puffer/inhaler
 - Resuscitation mask or barrier
- Appropriate clinical expert may include:*
- Ambulance officer/paramedic
 - Appropriately qualified health care professional
- Report details should include:*
- Time
 - Description of injury/illness
 - First aid management
 - Incident details
 - Location
 - Vital signs
- Report details may include:*
- Administration of medication including:
 - date
 - dose
 - person administering
 - time
 - Fluid intake/output, including fluid loss via:
 - blood
 - faeces
 - urine
 - vomit
 - Injury report forms
 - Workplace documents as per organisation requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency. The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1. Establish a workplace first aid facility | <p>1.1 Plan a <i>first aid facility</i> in the workplace to address <i>workplace and legislative requirements</i></p> <p>1.2 Identify potential <i>workplace hazards</i> and assess <i>associated risks</i> as a basis for determining <i>first aid resource</i> requirements</p> <p>1.3 Identify and prepare first aid equipment and resources required to address identified workplace requirements</p> <p>1.4 Identify personnel requirements in line with legislative and workplace requirements</p> <p>1.5 Establish and maintain links with relevant <i>first aid bodies and professional organisations</i> to maintain currency in the field and for referral purposes</p> <p>1.6 Access and provide information in the workplace to encourage risk minimisation and facilitate access to first aid facilities as appropriate</p> |
| 2. <i>Manage</i> a workplace first aid facility | <p>2.1 Monitor and maintain availability of adequate resources to support workplace first aid response</p> |

ELEMENT**PERFORMANCE CRITERIA**

- 2.2 Conduct regular inspections of stock and equipment to ensure currency and operational readiness in line with workplace requirements
- 2.3 Ensure equipment is recovered and reprocessed and that waste is disposed of safely according to legislative and workplace procedures
- 2.4 Ensure equipment and resources are stored and maintained in line with relevant legislation and manufacturer's/supplier's instructions
- 2.5 Contribute to the review of risks in the workplace and validation of organisation policies and procedures relating to the provision of first aid
- 2.6 Contribute to planning for response to major workplace incidents
- 2.7 Deploy appropriate equipment, resources and personnel to ensure timely and effective first aid response in line with workplace requirements
- 2.8 Use safe manual handling techniques
3. Manage workplace first aid records
- 3.1 Ensure *documentation* is completed as required according to legislation and workplace procedures
- 3.2 Maintain first aid records in line with legislative requirements and workplace security practices
- 3.3 Send relevant documents to appropriate bodies in line with workplace and legislative requirements
- 3.4 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
4. Evaluate the provision of first aid in the workplace
- 4.1 Evaluate management of workplace incidents and develop an action plan in consultation with relevant parties to improve first aid response in the workplace if required
- 4.2 Participate in debriefing/evaluation in order to improve future operations and address individual needs
- 4.3 Ensure first aid response is provided in a culturally aware, sensitive and respectful manner
- 4.4 Implement and evaluate workplace management

ELEMENT**PERFORMANCE CRITERIA**

procedures in accordance with risk assessment

4.5 Formulate and review contingency planning to identify and select alternative management principles and procedures as required

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- Working knowledge of:
 - Australian Resuscitation Council (ARC) Guidelines relating to provision of first aid
 - company/organisation standard operating procedures (SOPS)
 - first aid risk assessment practices and procedures
 - first aiders' skills and limitations in relation to first aid response in the workplace
 - how to gain access to and interpret Safety Data Sheets (SDS)
 - legal responsibilities and duty of care
 - occupational health and safety requirements in the provision of first aid
 - priorities of management in first aid
 - procedures for dealing with major and minor accidents in the workplace
 - safe storage and handling of medication in the workplace
- First aid equipment and resources to manage injuries and illnesses addressed in HLTFA311A: Apply first aid and HLTFA412A: Apply advanced first aid
- First aid management procedures for conditions identified in the Range Statement
- Infection control principles and procedures, including using standard precautions
- State/territory regulations, legislation and policies relating to:
 - currency of first aid skills and knowledge
 - first aid training
 - occupational health and safety requirements in the provision of first aid

REQUIRED SKILLS AND KNOWLEDGE

- workplace first aid provision
- Stress management techniques and available support
- Social issues, with particular reference to workplace culture, issues and resources and associated organisation requirements:
 - importance of first aid response to be culturally aware, sensitive and respectful
 - debriefing counselling procedures
 - consent and confidentiality
 - own skills and limitations

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Apply first aid principles in the workplace
- Assess workplace first aid requirements
- Communicate effectively and assertively and show leadership in an incident
- Conduct an initial casualty assessment and prioritisation
- Conduct/review first aid risk assessment
- Demonstrate:
 - adequate infection control procedures - use of standard precautions
 - consideration of the welfare of casualties and first aiders
 - incident management skills
 - safe manual handling
 - safe storage and handling of medication in the workplace
 - safe storage and handling procedures for pressurised gases
- Implement WHS guidelines
- Interpret, use and maintain records of the range of documentation required by the workplace and regulatory authorities
- Maintain first aid equipment and resources in operational condition
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Manage a first aid response in an identified workplace context
- Plan an appropriate first aid response in line with established first aid principles, ARC Guidelines and/or State/Territory regulations, legislation and policies and respond appropriately to contingencies in line with own level of skills and knowledge
- Take into account opportunities to address waste minimisation, environmental responsibility and sustainable practice issues
- Use high level literacy and numeracy skills as required to read, interpret, address and

REQUIRED SKILLS AND KNOWLEDGE

communicate guidelines, protocols and reporting requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

- Critical aspects of assessment:*
- The individual being assessed must provide evidence of specified essential knowledge as well as skills
 - Consistency of performance should be demonstrated over the required range of situations relevant to the workplace
 - Currency of first aid knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

- Interdependence of units:*
- Competence in this unit may be assessed individually or with other related competency units, such as:
- Occupational health and safety
 - Risk assessment
 - Emergency procedures

- Access and equity considerations:*
- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
 - All workers should develop their ability to work in a culturally diverse environment
 - In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
 - Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

EVIDENCE GUIDE

Related units:

This unit should be assessed either after or in conjunction with achievement of the following related competency unit:

- HLTFA412A Apply advanced first aid

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Workplace first aid facility may involve:

- First aid room/clinic
- First aid kits suited to specific workplace needs
- First aid equipment and resources
- Availability of personnel trained to provide first aid

Workplace first aid management must take into account:

- Workplace policies and procedures
- Industry/site specific regulations, codes
- Workplace WHS requirements
- State and territory workplace health and safety legislative requirements

Workplace and legislative requirements for a first aid facility include:

- State/territory regulations, legislation and policies
- Specific industry requirements, regulations and/or WHS issues
- Specific hazards present in the workplace
- Number of employees in the workplace
- Number of different workplace sites/locations
- Proximity to local services, including doctors, hospital, ambulance and other emergency services

RANGE STATEMENT

First aid resources may include but are not limited to:

Non-consumables:

- Equipment, such as:
 - oxygen resuscitation/cylinders
 - AED
 - thermometers
 - auto-injectors
 - back boards
 - stretchers
 - soft bag resuscitator
 - first aid kit
 - casualty's medication
 - analgesic inhalers
 - analgesic gas equipment
 - resuscitation mask or barrier
 - spacer device
 - cervical collars
 - Personal Protective Equipment
- Relevant texts and documentation, such as:
 - Australian Resuscitation Council Guidelines
 - first aid principles, policies and procedures
 - reference materials including SDSs, relevant Occupational Health and Safety Act and Regulations
 - first aid code of practice/compliance codes
 - workplace records and blanks
- Communication systems and equipment

First aid resources may include but are not limited to:

Consumables:

- First aid kits, including bandages, tape, scissors, splinter removers, antiseptic, eye management, disinfectants, resuscitation masks, emergency numbers and contacts, etc
- Dressings
- Ointments
- Cold packs
- Analgesics

RANGE STATEMENT

- Splints
- Sharps disposal
- Bio-hazardous waste bags/bins
- Medical grade oxygen
- Bandages
- Medication
- Personal protective equipment
- Eye wash
- Disinfectants
- Bronchodilators

- Workplace hazards and risks may include:*
- Hazards associated with workplace equipment, machinery, substances and processes
 - Environmental risks
 - Risks associated with first aid response involving:
 - first aid equipment (oxygen cylinders, AED)
 - exposure to blood and other body substances
 - risk of further injury to the casualty
 - risks associated with the proximity of other workers and bystanders

- First aid bodies and professional organisations may include:*
- Australian Resuscitation Council (ARC)
 - Support Groups
 - Registered Providers/Authorities
 - Emergency services

- First aid management skills must include:*
- Administration of analgesic gases in accordance with ARC Guidelines, state/territory regulations, legislation and policies and industry requirements
 - CPR
 - Infection control
 - AED (where available)

- First aid management must account for:*
- Location and nature of the workplace
 - Environmental conditions e.g. electricity, biological risks, weather, motor vehicle accidents
 - Location of emergency services personnel
 - Number of casualties and potential casualties

RANGE STATEMENT

- Use and availability of first aid equipment, resources and pharmaceuticals
- Types of dangers/risks to the casualty and any others in the vicinity of the situation
- Confined spaces, subject to industry need

Documentation may include:

- Incident/injury reports
- Casualty history forms
- Disease notification
- Workcover forms
- Medication registers
- Workers' compensation
- Day book
- Pre-participation records (sport)
- Medical histories
- Management records
- Stock records
- Infection control records
- Training records
- First aid risk assessment

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

1. Assess the situation

PERFORMANCE CRITERIA

1.1 Identify, assess and minimise *hazards* that may pose a risk of injury or illness to self and others

1.2 Assess *risks* to first aider and others and determine appropriate response to ensure prompt control

ELEMENT**PERFORMANCE CRITERIA**

of situation

- 1.3 Ascertain and prioritise need(s) for emergency services/medical assistance and undertake triage where required
 - 1.4 Deploy *resources* to appropriate locations as required in line with workplace procedures
2. Manage the casualty(s)
- 2.1 Determine and explain the nature of *casualty's injury/condition* and relevant first aid procedures to provide comfort
 - 2.2 Respond to the casualty in a culturally aware, sensitive and respectful manner
 - 2.3 Seek consent for *management* of the casualty's injury/illness from person(s) where relevant
 - 2.4 Determine and implement welfare procedure according to casualty(s) needs
 - 2.5 Control effects of injury and determine and apply appropriate *first aid management* to meet the needs of the casualty and situation
 - 2.6 Assist with *self-medication* in accordance with State/Territory regulations, legislation and policies and manufacturer's/supplier's instructions subject to casualty's regime
 - 2.7 Monitor casualty's condition and respond in a timely manner in accordance with established first aid principles and procedures
 - 2.8 Correctly operate basic life support *equipment* according to relevant legislation and manufacturer's/supplier's instructions
 - 2.9 Apply safety procedures for operation of pressurised gases
 - 2.10 Use safe manual handling techniques
 - 2.11 Finalise casualty *management* according to casualty's needs and first aid principles
3. Coordinate first aid activities until arrival of medical assistance
- 3.1 Identify available *resources* required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate

ELEMENT**PERFORMANCE CRITERIA**

- 3.2 Deploy correct amount of *resources* to appropriate locations in an effective manner to ensure timely arrival of required resources
- 3.3 Document the provision of resources and recommend modifications as required
- 3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures
- 3.5 Coordinate evacuation of casualties according to relevant evacuation procedures
- 3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures
4. Communicate essential incident details
- 4.1 Maintain communication with relevant personnel using appropriate media and equipment
- 4.2 Communicate first aid information with other providers/carers to meet their needs and in accordance with workplace procedures
- 4.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness
- 4.4 Prepare an incident report in line with organisation requirements
- 4.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
5. Evaluate the incident
- 5.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties
- 5.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs
- 5.3 Formulate and review contingency planning to identify and select alternative management principles and procedures as required

Required Skills and Knowledge

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes a demonstrated understanding of:

- Awareness of stress management techniques and available support
- Complications and associated methods of management for conditions, based on a risk assessment relevant to the workplace or community setting of:
 - abdominal injuries
 - allergic reactions
 - altered and loss of consciousness
 - asthma
 - anaphylaxis
 - bleeding
 - burns – thermal, chemical, friction, electrical
 - cardiac arrest
 - chest pain
 - choking/airway obstruction
 - drowning
 - envenomation – snake, spider, insect and marine bites and stings
 - environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
 - injuries- cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
 - medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
 - pain relief
 - poisoning and toxic substances (including chemical contamination)
 - respiratory distress
 - seizures
 - shock
 - stroke
 - substance misuse – common drugs and alcohol, including illicit drugs
 - unconsciousness, not breathing or not breathing normally
- First aid management procedures in accordance with ARC Guidelines, guidelines of Australian national peak clinical bodies, State/Territory regulations, legislation and policies and organisation requirements including:
 - management of anaphylactic shock reaction
 - management of acute exacerbations of asthma

- spinal care
- use of AED, oxygen, bronchodilator
- use of analgesic gases
- First aid management procedures may also relate to emergency childbirth
- Incident management procedures including:
 - awareness of confined spaces and dangerous places
 - basic triage for a multiple casualty incident
 - coordinate activities of other first aiders
 - manual handling, hazardous substances, dangerous goods or chemicals
 - removal of casualty to safe area, if appropriate
 - safe access to the casualty
- Safety procedures for the operation of pressurised gases
- Social issues, especially in particular workplace or community context(s) in which first aid is to be applied, including:
 - confidentiality
 - importance of debriefing
 - need to be culturally aware, sensitive and respectful
 - own skills and limitations
- State and regulatory requirements relating to currency of skill and knowledge
- Working knowledge of:
 - advanced resuscitation techniques as per *HLTFA404C Apply advanced resuscitation techniques*
 - ARC Guidelines, guidelines of Australian national peak clinical bodies and/or State/Territory regulations, legislation and policies relating to provision of first aid
 - basic anatomy (skeleton, muscles, joints, bones), physiology and toxicology
 - capabilities of emergency management services
 - company/organisation standard operating procedures (SOPs)
 - first aiders' skills and limitations
 - how to gain access to and interpret Safety Data Sheets (SDS)
 - infection control principles and procedures, including using standard precautions
 - legal responsibilities and duty of care, including confidentiality
 - priorities of management in first aid
 - procedures for dealing with major and minor accidents in the workplace
 - safe storage and handling procedures for pressurised gases
 - work health and safety requirements in the provision of first aid.

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Administer medication in line with State/Territory regulations, legislation and policies and any available medical/pharmaceutical instructions
- Apply advanced resuscitation techniques as per *HLTFA404C Apply advanced resuscitation techniques*
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively and show leadership in an incident
- Comply with WHS legislation
- Conduct an initial casualty assessment
- Demonstrate:
 - adequate infection control procedures
 - consideration of the welfare of the casualty
 - safe manual handling
 - safe storage and handling procedures for pressurised gases
- Demonstrate procedure for control of external bleeding
- Demonstrate procedure for management of airway in the unconscious casualty including the safe and effective use of any airway adjuncts
- Demonstrate proficiency in the safe and effective use of any fracture immobilisation equipment taught
- Demonstrate the application of first aid principles
- Demonstrate the correct posturing of a casualty
- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Manage specific injuries/illnesses and conditions as identified in the Essential Knowledge for this competency unit
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines, guidelines of Australian national peak clinical bodies, State/Territory legislation and regulations and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use a range of first aid equipment as outlined in the Range Statement
- Use literacy and numeracy skills as required to read, interpret and apply guidelines
-

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the

EVIDENCE GUIDE

Assessment Guidelines for this Training Package.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

Method of assessment may include:

- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

ICAICT308A Use advanced features of computer applications

Modification History

Version	Comments
ICAICT308A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use computer applications employing advanced features. It involves manipulating data and accessing support resources to solve routine problems.

Application of the Unit

This unit applies to individuals who are expert users or advanced users and capable of tutoring colleagues in the use of commercial applications.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold</i>

	<i>italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	--

Elements and Performance Criteria

1. Manipulate data	<p>1.1 Employ <i>advanced features</i> of <i>applications</i> in the preparation and presentation of data</p> <p>1.2 Transfer data between applications, linking and embedding related data files as required</p> <p>1.3 Create and employ <i>objects</i>, macros and templates for routine activities</p> <p>1.4 Use shortcuts and features to increase personal productivity</p>
2. Access and use support resources	<p>2.1 Solve routine problems using support resources</p> <p>2.2 Use online help to overcome difficulties with applications</p> <p>2.3 Solve problems with manuals and training booklets</p> <p>2.4 Access and apply technical support for <i>system</i> problems, using troubleshooting results and alert messages</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - communicate with supervisors and peers
 - seek assistance and expert advice
 - use online help
- literacy skills to interpret technical documentation, equipment manuals and specifications
- planning and organisational skills to prioritise and monitor own work
- problem-solving skills to solve operational problems as they arise
- research skills to source support resources to solve routine problems

- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
 - apply technical support for system problems
 - operate software applications
 - use applications features
 - use online help.

Required knowledge

- basic knowledge of operating systems software and system tools
- vendor product directions in computer applications
- vendor applications and their features.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • use at least three computer applications employing advanced features and import and export capacities for efficiency and productivity purposes • solve routine problems using support resources.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • site where advanced features of computer applications may be used • computer applications currently used in industry • documents or information containing data suitable to demonstrate advanced features of computer applications • support resources, including online, manuals and training booklets • appropriate learning and assessment support when required • modified equipment for people with special needs.
Method of assessment	A range of assessment methods should be used to assess

	<p>practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> • support resources, including online, manuals and training booklets • advanced features of a number of computer applications • direct observation of candidate: <ul style="list-style-type: none"> • manipulating data between applications • creating and employing objects, macros and templates.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Advanced features may include:	<ul style="list-style-type: none"> • conditional formatting • cross-referencing • form controls • forms • formulas • graphics
---------------------------------------	---

	<ul style="list-style-type: none"> • hyperlinks • macros • mail merge • master documents • names • object linking and embedding (OLE) • ranges • sections • styles • tables • templates • validation.
<i>Applications</i> may include:	<ul style="list-style-type: none"> • commercial software applications and organisation-specific software: <ul style="list-style-type: none"> • communication packages • database • graphic • presentation functionalities • spreadsheet • word-processing • presentation applications contained in: <ul style="list-style-type: none"> • Claris Works • Lotus Suite • Microsoft Office • Star Office • other similar applications.
<i>Objects</i> may include:	<ul style="list-style-type: none"> • buttons • checkboxes • drop-down lists • option buttons • text boxes.
<i>System</i> may include:	<ul style="list-style-type: none"> • application • business • computers • financial system • information system • management system • network • software.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Design and manage a sustainability audit	<p>1.1. Use an audit tool reflects criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirement</p> <p>1.2. Define the scope, objectives and benchmarks for the audit in consultation with relevant stakeholders</p> <p>1.3. Use an <i>audit tool</i> to reflect criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirement</p> <p>1.4. Document requirements for audit resources, timing, schedule and responsibilities consistent with industry</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>best practice and relevant standards</p> <p>1.5.Ensure collection strategies are objective, systematic and that information and data is valid and reliable</p> <p>1.6.Report outcomes clearly and concisely, including benefits to be achieved by adoption of audit report recommendations</p>
<p>2. Monitor energy consumption and emissions</p>	<p>2.1.Analyse requirements of the National Greenhouse and Energy Reporting System (NGERS) and other relevant legislation and industry standards in relation to a range of industries and the needs of specific organisations</p> <p>2.2.Identify links with functional areas and environmental management systems to ensure comprehensive information and data collection</p> <p>2.3.Determine hardware and software required for collecting, collating, analysing and reporting emissions related information and data</p> <p>2.4.Factor requirement for an external audit into the monitoring proposal</p> <p>2.5.Critically evaluate energy consumption and emissions data</p> <p>2.6.Develop improvement strategies based on the review of data</p> <p>2.7.Use industry best practice as a quality benchmark</p>
<p>3. Develop ICT solutions to improve sustainability outcomes</p>	<p>3.1.Research and analyse mitigation and adaptation strategies appropriate for a range of industries</p> <p>3.2.Benchmark and document performance expectations in consultation with relevant stakeholders</p> <p>3.3.Develop and document technical specifications including hardware, software, networking, interface and security requirements</p> <p>3.4.Determine timelines, resources and costs for implementation and ongoing monitoring and maintenance</p> <p>3.5.Analyse the impact of ICT solution in relation to performance benchmarks</p> <p>3.6.Analyse opportunities and develop recommendations to improve sustainability of enterprise products, services and processes</p> <p>3.7.Present report for client sign off</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to read and evaluate complex and formal documents such as legislation and technical reports
- communication skills to consult with stakeholders and liaise with clients
- literacy skills to prepare written reports and other documentation requiring precision of expression and language and structures suited to the intended audience
- research skills to analyse and present information
- technical skills to:
 - conduct an ICT sustainability audit
 - quantify sustainability objectives, targets, achievements and measures
 - use relevant systems and procedures to aid in the achievement of emissions reduction

Required knowledge

- auditing sustainability processes and practices
- corporate social responsibility
- development processes and practices
- hazard identification and control
- industry standards
- legislation framework underpinning sustainability
- principles, practices and available tools and techniques of sustainability management relevant to a range of industries
- relevant ISO standards
- sustainability from a local, national and international perspective
- sustainability including ecological, economic and social issues
- technical performance measurement

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • audit and analyse patterns of energy use • develop monitoring and reporting systems that comply with regulatory requirements • develop a workable implementation strategy • formulate solutions using ICT to reduce emissions • develop benchmarks for reviewing and improving performance.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • relevant reports: <ul style="list-style-type: none"> • government • Intergovernmental Panel on Climate Change (IPCC) • scientific • conference papers • vendor white papers • resources, tools and networking equipment • suitable hardware and software • suitable bandwidth for internet connections • relevant legislation and regulations • manufacturers' technical specifications • relevant ISO standards.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of the candidate managing organisation sustainability • review of analyses, plans and reports completed by the candidate • oral or written questioning to assess required knowledge.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICTSUS7236A Manage improvements in ICT

EVIDENCE GUIDE

	<p>sustainability.</p> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	--

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stakeholders may include:

- clients and customers
- Federal Government
- local government
- management
- non-government organisations (NGOs)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • shareholders • staff • state government • suppliers.
<i>Audit tool</i> may include:	<ul style="list-style-type: none"> • National Carbon Accounting System Data Viewer • National Carbon Accounting Toolbox.
<i>Collection strategies</i> may include:	<ul style="list-style-type: none"> • electricity billing information • hardware sensor devices.
<i>Legislation</i> may include:	<ul style="list-style-type: none"> • Australian Government White paper • Australian Government Green paper • Carbon Pollution Reduction Scheme (CPRS) • Emissions Trading Scheme (ETS).
<i>Industries</i> may include:	<ul style="list-style-type: none"> • building • electricity • logistics • motor.
<i>Hardware</i> may include:	<ul style="list-style-type: none"> • sensors • wireless sensor networks.
<i>Software</i> may include:	<ul style="list-style-type: none"> • avoiding mass extinctions engine (AMEE) • carbon footprint calculators • logical carbon reporting software • online system for comprehensive activity reporting (OSCAR) • statistical analytic software (SAS) carbon reporting software • sustainability SCO2 (Software CO2).
<i>Best practice</i> information may be found in:	<ul style="list-style-type: none"> • 2020 Report • company case studies • vendor white papers.
<i>Mitigation and adaptation strategies</i> may include:	<ul style="list-style-type: none"> • broadband or telepresence • carbon capture and storage (CCS) • geosequestration • household monitoring • monitoring sources of energy that produce CO2 • remote workstation solutions • The Intelligent Office.

LGACOM401A Administer contracts

Modification History

LGACOM401A Release 2: Layout adjusted.

LGACOM401A Release 1: Primary release.

Unit Descriptor

This unit covers the administration, monitoring and transition of contracts.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish administration procedures	1.1 Administrative processes for contracts are implemented according to council quality improvement 1.2 Contract requirements are confirmed with relevant contract personnel. 1.3 Complaint system is established according to council policy and procedures. 1.4 Consistent and accurate records of contract progress are maintained.
2 Monitor contract time frame and specifications	2.1 Regular inspections of contract services are undertaken to ensure compliance with specifications and program for completion. 2.2 Regular planned progress meetings are held and documented between all contract personnel to ensure problems are identified and resolved early. 2.3 Variations between the specified scope of services and the contract are identified and documented, and relevant personnel are notified without delay. 2.4 Testing of services in progress is carried out as required by the contract and in accordance with legislation, regulations and council policy.
3 Monitor costs	3.1 Contract costs are monitored on a regular basis to ensure that the service is carried out in accordance with financial and contractual requirements. 3.2 Payments for contract services are authorised in accordance with the conditions of contract and delegation of officer. 3.3 Transaction costs are monitored through an established system.
4 Resolve contractual disputes	4.1 Disagreements are investigated to identify cause and validity. 4.2 Terms of resolution are negotiated and agreed. 4.3 Contract provisions for dispute resolution are followed. 4.4 Legal and management advice is sought at an early stage of any dispute to ensure that the contractor has a clear understanding of the council's legal position and that the council is not exposed to undue legal risk. 4.5 Appropriate legal advice is sought at any stage in order to clarify any technical aspects of a dispute.
5 Implement contract transition	5.1 Contract conditions and responsibilities are reviewed with relevant personnel to ensure satisfactory completion of contract.

ELEMENT**PERFORMANCE CRITERIA**

- 5.2 Contract completion is authorised in writing to confirm completed services have been undertaken according to contract objectives and specifications.
- 5.3 Final statement is reconciled.
- 5.4 Contractor performance and level of service are evaluated against agreed benchmark.
- 5.5 End-of-service or renewed contracts are coordinated to meet council requirements.
- 5.6 Quality of contract documentation is assessed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- negotiation and liaison across a range of internal and external customers
- contingency management
- contract interpretation
- project management
- conflict resolution
- client interaction
- financial and time management

Required Knowledge

- relevant legislation, regulations, codes of practice and policies applicable to the industry and the council, including those relating to environmental/sustainable practice and OHS
- relevant systems and procedures to aid in the achievement of sustainable practice
- contract procedures
- contract law
- knowledge of the contract service
- performance standards and analysis
- complaint procedures
- costing processes

Evidence Guide

Overview of assessment A person who demonstrates competency in this unit will be

requirements	able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	<ul style="list-style-type: none"> • Maintenance of files relating to records of meetings, payments, progress reports, file notes and discussions. • Effective communication with the contractor. • Monitoring of industry changes. • Making recommendations covering a range of contracts. • Maintenance of WorkCover, OHS and audit processes and up-to-date insurance files. • Monitoring relevant laws, by laws and regulations or best practice on environmental performance and sustainability
Context of assessment	On the job or in a simulated work environment.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	<p>Access to a workplace or simulated case study that provides such resources as:</p> <ul style="list-style-type: none"> • a range of council contract documentation and records • relevant commercial law texts on contracts • relevant council policies and procedures documents.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different

work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Administrative processes for contracts*** may include:
- supervision
 - management
 - monitoring
 - overseeing
- Records of contract progress*** may include:
- photographs
 - data
 - progress reports
 - customer surveys
 - minutes of meetings
- Services*** may include:
- product
 - maintenance
 - supply
 - cleaning
 - waste
 - research
 - environmental initiatives
 - civil
 - child care
 - other council services
- Testing*** may include:
- samples
 - routine checks
 - audits
 - observations
 - meetings
 - laboratory
- Payments*** may include:
- progressive
 - lump sum
- Conditions of contract*** may include:
- tender documentation
 - maintenance plan
 - compliance with sustainable practice guidelines
 - defects liability
- Contractor performance*** is evaluated in terms of:
- adherence to timelines and estimated costs
 - progress towards objectives
 - adherence to quality standards, environmental and sustainability standards and OHS and EEO practices

Unit Sector(s)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the extent and nature of services to be contracted	1.1. Scope of the <i>services</i> is confirmed and reviewed to ensure <i>parameters</i> meet current requirements.
	1.2. Statutory and council requirements are identified to determine available options.
	1.3. Detailed parameters are specified to enable a complete brief to be prepared.
	1.4. The extent of the contract package is determined.
2. Select appropriate method for tender	2.1. Area to be contracted is examined.
	2.2. Contract options are identified and analysed.
	2.3. Benefits, costs and opportunities of each option are identified.
	2.4. Appropriate contract option is selected.
3. Prepare tender specifications according to council and Australian standards	3.1. Complete and detailed service specifications are prepared consistent with council policy and Australian standards and based on service profile and review.
	3.2. <i>Legislative</i> , environmental, sustainability practices, occupational health and safety and risk management requirements are applied.
	3.3. Quality assurance methods are applied to the preparation of service specifications.
	3.4. Service specifications are prepared in consultation with relevant staff that complement required outcomes.
	3.5. Details on methods, standards, materials, products, contractors and performance period are provided by quality service specifications, as applicable.
4. Prepare evaluation criteria	4.1. A tender review panel or team is selected from appropriate personnel.
	4.2. Criteria are established based on the specifications, product and service required.
	4.3. Criteria are written clearly to enable bids to be compared.
	4.4. Criteria are ranked against council procedures.
5. Prepare tender document	5.1. <i>Tender documents</i> are <i>prepared</i> clearly and concisely.
	5.2. Tender documents are prepared that enable competitive pricing of products.
	5.3. Tender documents are designed to enable valid <i>comparisons</i> between tenders received.
6. Invite tenders	6.1. Invitations are prepared based on the type of tendering method used.

ELEMENT**PERFORMANCE CRITERIA**

- 6.2. Source list is prepared according to council procedures.
- 6.3. *Advertisement* is prepared and placed according to the tender method.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- report and specification writing
- qualitative and quantitative research
- analytical
- consultation with relevant personnel
- specification interpretation
- negotiation with relevant internal and external people
- observation of protocol and probity policies

Required Knowledge

- relevant council policies, procedures and codes of conduct
- sustainability practices
- quality assurance systems
- relevant Australian and industry standards
- statutory and council tender requirements
- contractual processes
- industrial agreements
- statutory council requirements
- tendering codes of practice
- national competition policy

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also

	required to be demonstrated.
Critical aspects of evidence to be considered	<ul style="list-style-type: none"> • Contract authorisation process is undertaken • Appropriate advertisement is placed • Required specifications are produced • Conditions of contract are produced • Industry standard conditions of contract are applied • Confidentiality and probity are observed for both in-house bids and/or external tenders
Context of assessment	On the job or in a simulated work environment.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	<p>Access to a workplace or simulated case study that provides the following resources:</p> <ul style="list-style-type: none"> • relevant council policies and procedures • national competition policy information

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Services</i> may include:	<ul style="list-style-type: none"> • works • function • provision • community expectations
<i>Parameters</i> may include:	<ul style="list-style-type: none"> • budget range

- council resources

LGACOM502B Devise and conduct community consultations

Modification History

LGACOM502B Release 2: Layout adjusted. Range statement edited.

LGACOM502B Release 1: Primary release.

Unit Descriptor

This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise consultation strategies	1.1. A range of consultation strategies is identified and assessed for suitability. 1.2. <i>Interested and affected parties</i> are identified. 1.3. <i>Resources</i> required to conduct consultation are assessed. 1.4. <i>Consultation strategies</i> are chosen that <i>enable and encourage relevant groups</i> or individuals to be involved. 1.5. <i>Legislative</i> and council requirements are reviewed to ensure strategies meet all criteria.
2. Conduct consultations	2.1. <i>Information</i> is prepared that is clear, accurate and appropriate to the needs of all parties. 2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved. 2.3. <i>Information is presented</i> to affected parties at an appropriate time and place. 2.4. <i>Access and equity</i> requirements are implemented in the consultations. 2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame. 2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.
3. Record, analyse and report on results	3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed. 3.2. Appropriate suggestions for improvement are incorporated into design parameters. 3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised. 3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern. 3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.

ELEMENT**PERFORMANCE CRITERIA**

- 3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to devise and conduct community consultations where:

- consultation ensures council's image or reputation is maintained or enhanced
- community consultation produces valid and useful information

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including: <ul style="list-style-type: none"> • public and community meetings and forums • surveys and door knocks • appropriate communications equipment and aids such as overhead projectors and computer-based presentations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop environmental health education, promotion and awareness strategies	<p>1.1 Goals and objectives for health education, promotion and awareness are established in accordance with <i>council requirements</i>.</p> <p>1.2 Information to assist in needs analysis is identified, researched and collated.</p> <p>1.3 Health surveys that identify <i>community health needs</i> are developed.</p> <p>1.4 Existing services and strategies are reviewed and evaluated to ensure relevance.</p> <p>1.5 Community networks are established and maintained to ensure broad exposure to local development needs.</p>
2. Implement environmental health education, promotion and awareness strategies	<p>2.1 Appropriate <i>health education, promotion and awareness programs</i> are developed and implemented based on community development needs and in accordance with council policy.</p> <p>2.2 Programs are implemented using appropriate educational, promotional and awareness activities and responding to state <i>legislative requirements</i>.</p> <p>2.3 Health education, promotional and awareness programs are monitored and evaluated in conjunction with the community to assess performance in relation to program goals and objectives.</p>
3. Undertake marketing programs	<p>3.1 Opportunity for a <i>marketing</i> program is identified from the market place.</p> <p>3.2 <i>Viability</i> of a program is assessed by <i>internal and external consultation</i>.</p> <p>3.3 Reports are prepared for management and council with recommendations and supporting information.</p> <p>3.4 Marketing program is implemented and monitored to ensure objectives are met within budget, resource and time limitations.</p> <p>3.5 Program is reviewed and assessed using consumer response and internal audits.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- information gathering and research
- survey design
- cooperative and professional communication and interaction with a wide range of stakeholders
- problem solving and conflict management
- well developed and effective written communication
- implementation of promotional strategies
- program planning
- networking
- implementation of public consultation strategies
- implementation of program evaluation strategies
- participation in public presentations
- budget management
- monitoring own work and adjusting to meet agreed standards and expectations
- engaging in activities that promote own ongoing learning requirements, which may include maintaining current knowledge of legislation and common law
- using technology relevant to the job/role, which may include the use of computers and other relevant office technology

Required Knowledge

- council structure and services
- relevant council procedures
- relevant legislation and standards
- principles of positive interaction with diverse groups within the community
- community consultation and information strategies
- local health services and relevant professionals
- council's health education policy
- current and potential health issues affecting the community

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the

Critical aspects of evidence to be considered

performance of the unit are also required to be demonstrated.

The demonstrated ability to:

- establish and maintain community networks
- establish appropriate goals for health education, promotion and awareness in accordance with council requirements
- develop, implement and evaluate appropriate health education, promotion and awareness programs
- market, implement and monitor programs to ensure objectives are met
- report, review and assess programs

Context of assessment

On the job or in a simulated work environment.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials, including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance

Competency must be demonstrated in all elements across a range of variables relevant to council's size, location and strategic plan.

Resource implications

Access to a workplace or simulated case studies that provide relevant equipment and materials, such as:

- videotapes
- pamphlets
- health legislation
- council policies and procedures

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Council requirements may include:

- council policies, procedures and guidelines

- strategic, business and management plans
 - local ordinances, laws and by-laws
 - state legislation
 - ethnic or minority groups
 - demographic groups
 - immunisation
 - nutrition
 - smoking
 - sun smart
 - health effects of climate change, such as heat stress
 - mosquito control
 - sexually transmitted diseases
 - council
 - public health plan
 - public health policy
 - media releases
 - personal skill development
 - community action strengthening
 - supportive environments
 - reorienting services
 - behavioural and environmental adaptation
 - community development
 - federal
 - state or territory
 - local government
 - preparation and use of materials, such as:
 - audiovisual materials
 - pamphlets and books
 - software
 - badges
 - ties
 - stickers
 - professional consultancy
 - online support
 - profit or loss
 - break-even
 - community value
 - staff
 - councillors
 - schools
- Community health needs** may include special requirements of:
- Health education, promotion and awareness programs** may include:
- Legislative requirements** may include:
- Marketing** may include:
- Viability** may include:
- Internal and external consultation** may include:

- police
- experts
- community
- parents
- funding organisations
- regional groups
- relevant agencies, including welfare agencies
- hospitals
- medical institutes
- church groups
- industry and professional expertise
- government departments
- marketing departments and consultants
- media developers

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare inventory of heritage and cultural assets	<p>1.1 <i>Heritage</i> and cultural assets within the community, and council expectations and requirements relating to them, are identified.</p> <p>1.2 The <i>significance</i> of each heritage and cultural asset is assessed according to established criteria and community expectations.</p> <p>1.3 An adequate <i>information</i> base of significant places is obtained through comprehensive field investigation and research.</p> <p>1.4 <i>Data</i> is collected accurately and objectively on heritage and cultural assets.</p> <p>1.5 A comprehensive inventory of heritage and cultural assets is prepared with full and detailed descriptions of history and significance.</p>
2 Assess threats and opportunities for the protection of heritage and cultural assets	<p>2.1 <i>Threats</i> and opportunities are identified to ensure all factors are fully assessed.</p> <p>2.2 Based on input from council and the community, criteria are established to enable threats and opportunities to be prioritised.</p>
3 Identify and develop strategies for the protection of heritage and cultural assets	<p>3.1 <i>Criteria</i> are established to identify priorities.</p> <p>3.2 Consultation with the community and property owners is undertaken to seek views on the conservation action required to protect the significant attributes of the area.</p> <p>3.3 A framework for the legal protection of heritage and cultural assets is established through existing legislation.</p> <p>3.4 Practical and appropriate strategies to conserve heritage and cultural assets are determined.</p> <p>3.5 The effectiveness of strategies is assessed through a comparison with methods used elsewhere.</p> <p>3.6 The policy elements of the proposed heritage program are determined.</p> <p>3.7 Innovative approaches are developed to protect heritage and cultural assets in response to the local community need.</p>
4 Implement strategies for the protection of heritage and cultural assets	<p>4.1 The study and program are adopted by the local authority.</p> <p>4.2 Consultation is undertaken with the community and property owners about the study and proposed heritage program.</p> <p>4.3 Financial resources are identified and procured within budget cycles to support the achievement of required</p>

ELEMENT**PERFORMANCE CRITERIA**

- outcomes.
- 4.4 Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met.
- 4.5 Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes.
- 4.6 Community education and *information* materials are prepared and distributed to ensure ongoing support for the strategy.
- 4.7 The strategy is incorporated into council policies and procedures and relevant legislation.
- 4.8 A timetable for implementation is established and priorities are set.
- 5 **Monitor and review the effectiveness of strategies to protect heritage and cultural assets**
- 5.1 Further research is undertaken on *places* listed as being of local significance in the study.
- 5.2 Additional plans of significance are identified and reviewed.
- 5.3 An annual heritage report is prepared if required.
- 5.4 Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- research
- collation of information from local, national and international sources
- evaluation methodologies
- consultation with a range of community and government agencies
- strategic planning
- budgeting and lifecycle costings
- community education strategies
- project management

Required Knowledge

- heritage assets
- cultural assets
- asset classification

- council structures and services
- town planning
- community needs and expectations
- regulations, standards and policies
- community information

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: <ul style="list-style-type: none">• identify and protect heritage and cultural assets• identify and implement strategies to protect heritage and cultural assets• put in place monitoring processes
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none">• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies• written and/or oral questioning to assess knowledge and understanding• completion of workplace documentation• third-party reports from experienced practitioners• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.

- Resource implications** Access to a workplace or simulated case study that provides the following resources:
- relevant data such as survey information
 - historical research
 - existing reports
 - studies and texts
 - financial and budget information
 - real or simulated consultation process
 - copies of relevant regulations, standards and policies

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the

Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish site facilities for road maintenance and construction	1.1 Work is planned and programmed to be undertaken in accordance with drawings, specifications and other documentation. 1.2 Work site is prepared and maintained in a safe condition in accordance with OHS requirements and regulations of other accredited authorities. 1.3 Traffic control is planned at job site and signed in accordance with relevant Australian Standards. 1.4 Underground and overhead obstructions and other utility services are identified. 1.5 Appropriate <i>signage</i> is selected, established and maintained at work site.
2 Construct appropriate pits and manholes	2.1 Plant, equipment, tools and materials to construct manholes and pits are selected. 2.2 Pits and manholes are constructed according to council requirements.
3 Construct roads and pavements	3.1 Site is set out, cleared and prepared 3.2 <i>Earthworks</i> are undertaken and the sub-grade prepared. 3.3 Construction materials are spread and compacted using appropriate <i>plant, equipment, materials</i> and construction. 3.4 Pavement surface for construction of wearing <i>surface</i> using either a bitumen seal or asphalt surface. 3.5 Pavement markings are applied and signs, safety rails and markers are erected as specified.
4 Maintain roads and pavements	4.1 Surface is set out and prepared for resealing/patching or other maintenance activities. 4.2 Levelling tasks are carried out where necessary using appropriate plant and equipment. 4.3 Materials used to maintain the pavement are prepared correctly using appropriate tools and equipment. 4.4 Repairs on road pavement, kerb and channel, potholes, sealing and asphalt overlays are made using appropriate tools, plant and equipment. 4.5 Subsurface and surface open drains are maintained,

ELEMENT	PERFORMANCE CRITERIA
	repaired and cleared where necessary.
	4.6 Trees and shrubs are trimmed or removed and weeds are controlled according to council requirements.
	4.7 Verges are mown by tractor signs in relation to their meaning, positioning and material.
5 Maintain records for road construction and maintenance	5.1 Information is recorded in accordance with council and legislative requirements.
	5.2 Details are recorded clearly, accurately and legibly.
	5.3 <i>Records</i> are secured, accessible and up-to-date.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- written and verbal communication skills
- reading and interpreting plans and specifications, plant and equipment capabilities and estimation of plant output
- civil works construction techniques and methods
- calculation of quantities
- trade specific skills related to work undertaken
- material testing

Required Knowledge

- OH&S requirements
- construction and maintenance practices
- materials technology associate with roads construction and maintenance
- work scheduling, inspection, testing and monitoring
- work site traffic management
- monitoring and testing methods and procedures

Evidence Guide

Overview of assessment requirements A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example,

the knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

Demonstrated ability to use appropriate materials, construction methods and processes for the construction and maintenance of roads.

Demonstrated ability to adhere to plans and specifications.

Demonstrated ability to adhere to relevant occupational health and safety practices on site.

Demonstrated ability to adhere to Australian standards, codes of practice and advisory standards.

Context of assessment

Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined in the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of the performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the Key Competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completing workplace documentation
- third party reports from experienced practitioner
- completion of self-paced learning materials including personal reflection and feedback from trainer/coach/supervisor

Evidence required for demonstration of

Evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and

consistent performance variety of situations.

Resource implications The learner and the trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Signage includes:

- statutory
- directional and information
- road lines/road markings
- reflectors
- centrelines
- directional lines
- shoulder lines

Earthworks may include:

- clearing
- grading
- levelling
- excavating
- trenching

Plant and equipment may include:

- bulldozers
- excavators
- trucks
- graders
- compactors
- loaders
- skid steers
- pumps

Types of construction materials may include:

- soils (clay, sand, gravel, silt)
- crushed rock
- soil aggregates
- concrete aggregates
- filter sands and aggregates
- bitumen
- cutback bitumen
- bitumen emulsion

Types of surfaces may include:

- bitumen and emulsion seal
- unsealed

Types of records may include:

- gravel
- concrete
- segmental pavers
- asphalt
- pre-mix
- primer seal
- test reports
- job diaries
- instructions
- correspondence
- time-sheets
- accident reports
- costing sheets

Unit Sector(s)

Operational Works

LMFGG2008C Glaze reglaze residential windows and doors

Modification History

Updated format, revised Evidence Guide. Outcome equivalent.

Unit Descriptor

This unit of competency covers the skills and knowledge required to fit glass to residential windows and doors.

Application of the Unit

This unit covers work performed in workplaces involving on-site and off-site fabrication, installation and/or replacement of glass to residential windows, doors and other openings, or to other frames. Work is generally performed individually or in a team environment and requires individuals to demonstrate discretion, judgement and problem solving in the handling and installation of glass products.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|---|---|
| 1 | Identify work requirements | 1.1 Work requirements for the <i>type of glass</i> to be used and the <i>method</i> of fixing are identified from work instructions |
| | | 1.2 Occupational health and safety (OHS) requirements for <i>glazing/re-glazing</i> of windows and doors, including <i>personal protective equipment</i> , are observed throughout the work |
| | | 1.3 The process for fitting glass to window and doorframes is identified |
| 2 | Prepare for work | 2.1 Work sequence is planned in a logical order to suit the job and in accordance with <i>workplace procedures</i> |
| | | 2.2 <i>Tools, equipment</i> and <i>materials</i> (other than glass and frames) are selected and checked prior to use to ensure they are appropriate for the work, serviceable and in a safe condition |
| | | 2.3 Type of glass to be fitted and frames are selected to <i>match job requirements</i> and glass checked for type, size and imperfections |
| | | 2.4 <i>Glass fixing method</i> is selected and frame condition is assessed to ensure suitability for glazing in accordance with customer order and Australian Standards |
| | | 2.5 Defective frames are reported for repair or replacement in accordance with workplace procedures |
| | | 2.6 Fixing and sealing materials are prepared by mixing or cutting to length, as appropriate |
| 3 | Identify site conditions and restraints | 3.1 On-site difficulties are recognised and corrective action taken in accordance with regulations and workplace requirements |
| | | 3.2 Covering material is applied, where necessary, to protect existing fixtures and fittings |
| | | 3.3 Special characteristics of the window or door which may affect the finished job are identified and corrective |

action taken

- | | | | |
|---|-----------------|-----|---|
| 4 | Perform glazing | 4.1 | Frame is prepared to receive glass by checking size against specifications, removing remains of glass and any sealants, cleaning and surface preparation, if required |
| | | 4.2 | Glass is fixed to the frame using the selected method and in accordance with recognised industry procedures and Australian Standards |
| | | 4.3 | Solvents and sealants are used in accordance with manufacturer recommendations and Australian Standards |
| | | 4.4 | Excess sealing material is removed and glass and frame cleaned after fixing |
| 5 | Complete work | 5.1 | Completed installation is checked to ensure compliance with customer requirements and specifications |
| | | 5.2 | Tools, equipment and materials are cleaned and stored following workplace procedures |
| | | 5.3 | Work area is cleaned and left in a safe condition and rubbish disposed of, as appropriate |
| | | 5.4 | Waste and scrap materials are removed for disposal or recycling, as required |
| | | 5.5 | Workplace documentation is completed in accordance with workplace requirements |

Required Skills and Knowledge

Required skills include:

- collecting, organising and understanding information related to work orders, basic plans and safety procedures
- using communication skills to the level required to confirm work requirements and specifications; communicate effectively regarding work requirements with supervisors, other workers and customers; report work outcomes and problems; and relate to people from a range of social, cultural and ethnic backgrounds, and of varying physical and mental abilities

- using literacy skills to the level required to understand information related to work orders, including common industry terminology, plans and safety procedures; prepare reports; and interpret technical information and specifications
- planning and organising activities, including the preparation and layout of the work area, and the obtaining of equipment and materials to avoid any backtracking, workflow interruptions or wastage
- working with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- using mathematical ideas and techniques to correctly complete measurements, calculate work requirements, and optimise glass sizes for economical cutting and assembling of required materials
- using pre-checking and inspection techniques to plan work, and avoid re-working and wastage
- using workplace technology related to the glazing of simple window and doorframes

Required knowledge includes:

- the qualities and characteristics of glass, including hazards and handling requirements
- techniques, methods, materials and process of glazing simple/complex window and doorframes
- workplace safety system requirements related to the glazing simple/complex window and doorframes
- relevant Australian Standards
- workflow requirements in relation to fitting glass
- characteristics, purpose and operation of tools and equipment used in glazing simple/complex window and doorframes
- correct identification of equipment, processes and procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently: <ul style="list-style-type: none"> • interpret work order/job instruction and locate and apply relevant information to glaze/re-glaze simple/complex windows and doors • apply safe handling requirements for equipment,

	<p>products and materials, including use of personal protective equipment</p> <ul style="list-style-type: none"> • follow work instructions, operating procedures and inspection practices to: <ul style="list-style-type: none"> • minimise the risk of injury to self and others • prevent damage to goods, equipment and products • maintain required production output and product quality • glaze or re-glaze the following: <ul style="list-style-type: none"> • timber putty faced window sashes or door panel • timber beaded sidelight, fixed panel, sliding, hinged, pivot and/or bi-fold doors • metal framed channel glazed door or window • metal framed beaded door or window • include the following for each: <ul style="list-style-type: none"> • calculate glazing clearance and cutting size • cut glass to AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass • select glazing tools, equipment, glazing sealants, vinyls and tapes • prepare working area • prepare glazing rebates and channels prior to installation • clean glass, tools, equipment and work area • calculate the cost of glass, glazing materials and labour • select re-glazing tools and equipment • hack out/remove beads and glass safely from timber windows and doors • remove and disassemble metal window sashes and doors and remove glass safely • install and/or adjust sash cords, unique, spiral or spring balances on double hung windows • work effectively with others.
Context of and specific resources for assessment	<p>The application of competency is to be assessed in the workplace or realistically simulated workplace.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in</p>

	<p>an off-site context.</p> <p>Assessment is to comply with relevant regulatory or Australian Standard requirements.</p> <p>The following resources should be made available:</p> <ul style="list-style-type: none"> • frames • glass • fixing material • sealants • workplace operating procedures and work orders • personal protective equipment • an appropriate work area/site.
Method of assessment	<p>Assessment must satisfy the endorsed Assessment Guidelines of the LMF02 Furnishing Industry Training Package.</p> <p>Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</p> <p>Assessment methods must be by direct observation of tasks and include questioning on underpinning knowledge to ensure correct interpretation and application.</p> <p>Assessment may be applied under project-related conditions (real or simulated) and require evidence of process.</p> <p>Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</p> <p>Assessment may be in conjunction with assessment of other units of competency.</p>
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Types of glass may include, but are not limited to:</i>	<ul style="list-style-type: none"> • annealed glass • toughened glass • laminated glass • wired glass • tinted and heat reflective glass • coated glass and insulated glass units • patterned glass
<i>Methods of glazing may include:</i>	<ul style="list-style-type: none"> • channel glazing • beaded glazing and double glazing
<i>Glazing/re-glazing may include:</i>	<ul style="list-style-type: none"> • the installation of glass to metal and/or timber doors, windows and other frames and re-glazing of existing windows and doors • residential glazing/re-glazing that is confined to simple doors and windows, and may include: <ul style="list-style-type: none"> • residential windows, such as fixed, sliding, casement, awning and double hung and louveres • residential doors, such as sliding, hinged, pivot and bi-fold
<i>Personal protective equipment includes:</i>	<ul style="list-style-type: none"> • that prescribed under legislation, regulation and Australian Standard policies and practices, and may include: <ul style="list-style-type: none"> • gloves • safety glasses • gauntlets • safety footwear • hard hats • aprons and overalls
<i>Workplace procedures include:</i>	<ul style="list-style-type: none"> • workplace procedures relating to the glazing of simple windows and doorframes • Australian Standards: <ul style="list-style-type: none"> • AS 1288:2006 Glass in buildings - Selection and installation • AS/NZS 2208:1996 Safety glazing materials in buildings • AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass • AS 2047:1999 Windows in buildings - Selection and installation • AS/NZS 4666:2000 Insulating glass units • equipment and material manufacturer specifications and operational procedures • on-site procedures and regulations relating to the

	<ul style="list-style-type: none"> handling and movement of glass • work instructions, including job sheets, plans, drawings and designs • safety standards, including personal protective equipment, OHS regulations and enterprise requirements
<i>Tools and equipment are to include:</i>	<ul style="list-style-type: none"> • tungsten wheel glass cutters • speed cutters • cutting lubricants • running pliers • straight edges and squares • tape measures • glass handling and lifting equipment • hack-out knives • chisels • putty knives • sprig/diamond guns • vinyl cutters and rollers • pry bars • sealant guns • blade and phillips head screwdrivers • pop rivet guns • electric and pneumatic drills • rubber mallets • claw hammers • nail punches • personal protective equipment
<i>Materials may include, but are not limited to:</i>	<ul style="list-style-type: none"> • flat glass and acrylic glazing products • plastic • aluminium • steel • solid timber • gaskets • sealants • adhesives • glazing tapes and setting blocks
<i>Matching job requirements may include:</i>	<ul style="list-style-type: none"> • customer order • existing glass type
<i>Glass fixing methods may include:</i>	<ul style="list-style-type: none"> • specification • type of glass and frame • security requirements

	<ul style="list-style-type: none">• sealing methods• Australian Standards

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected.
4. Perform routine welding using <i>oxy acetylene</i>	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials and equipment	<p>1.1. Job requirements are determined from specifications and/ or instructions.</p> <p>1.2. Materials are correctly prepared using appropriate tools and techniques.</p> <p>1.3. Materials are correctly assembled/aligned to meet specifications as required.</p> <p>1.4. Distortion prevention measures are identified and appropriate action is taken as required.</p> <p>1.5. Heating equipment is assembled and set up safely and correctly in accordance with standard operating procedures.</p> <p>1.6. Correct and appropriate consumables are selected and prepared.</p> <p>1.7. Test run is undertaken and verified as required.</p>
2. Braze and/or silver	2.1. The correct process is selected to meet specifications.

ELEMENT	PERFORMANCE CRITERIA
solder	2.2. Materials are preheated as required. 2.3. Consumables are applied using correct techniques. 2.4. Jointing material is applied correctly and in appropriate quantities to meet job/specifications. 2.5. Material temperature is annealed using correct and appropriate techniques.
3. Inspect joints	3.1. Excess jointing materials are removed using correct and appropriate techniques. 3.2. Inspection of joints is undertaken to standard operating procedures. 3.3. Inspection results are reported/recorded using standard operating procedures as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- performing brazing, braze welding, silver soldering
- undertaking visual inspection
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions

Required knowledge

Look for evidence that confirms knowledge of:

- the reasons for selecting specific methods of assembly/alignment
- the procedures for minimising distortion of the materials being brazed/braze welded/silver soldered
- the procedures for assembling and setting up the specific heating equipment
- the reasons for selecting specific heating equipment
- the reasons for selecting specific consumables
- conducting test runs

REQUIRED SKILLS AND KNOWLEDGE

- typical applications of brazing/braze welding and silver soldering processes
- the procedures and precautions for preheating the materials to be joined
- the effects of the use of inappropriate techniques on the performance of the jointed materials
- the effect of inappropriate quantities of jointing material on the performance of the jointed materials
- the procedures for normalising the temperature of jointed materials
- the consequences of using inappropriate techniques to normalise the temperature of the joint
- the procedures for removing excess jointing material
- the procedures for inspecting brazed/braze welded/silver soldered joints
- use and application of personal protective equipment for silver soldering and brazing/braze welding
- safe work practices and procedures

Application of the Unit

Application of the unit	<p>This unit applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels.</p> <p>Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, occupational health and safety regulations and/or licensing requirements, Unit MEM05017D (Weld using gas metal arc welding process) should be selected.</p> <p>Band: A</p> <p>Unit Weight: 2</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Locations of welds are identified in according to standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected to suit application.
4. Perform routine welding using GMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with GMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instruction
- using measurement skills relating to joint preparation and routine GMAW

Required knowledge

Look for evidence that confirms knowledge of:

- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations.
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- fuel gas properties and applications
- post-welding treatments
- weld characteristics
- safe welding practices
- use and application of personal protective equipment for routine GMAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must

EVIDENCE GUIDE	
	be able to perform routine gas metal arc welding (GMAW).
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with preparing the materials and carrying out routine gas metal arc welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Materials	Mild and low carbon steel
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, welding leads, gas shrouds, gas regulators, liners, contact tips
Consumables	Filler wire, shielding gas
Cleaned	Slag and spatter

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use hand tools	<p>1.1. Hand tools are selected appropriate to the task requirements.</p> <p>1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape.</p> <p>1.3. All safety requirements are adhered to before, during and after use.</p> <p>1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use.</p> <p>1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>operational procedures, principles and techniques.</p> <p>1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Shut down machine/equipment	<p>1.1. Machine/equipment operational function is determined and understood.</p> <p>1.2. Shut-down sequence is undertaken safely and to standard operating procedures.</p> <p>1.3. Machine/equipment is depressurised/emptied/de-energised/bled to standard operating procedures.</p> <p>1.4. Safe shut-down of machine/equipment is verified.</p> <p>1.5. Safety/security lock-off devices and signage are installed to standard operating procedures.</p> <p>1.6. Machine/equipment is left in clean and safe state.</p>
2. Isolate machine/equipment	<p>2.1. Machine/equipment operational function is determined and understood.</p> <p>2.2. Isolation methods and points are recognised and identified.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.3. Isolation is undertaken safely and to standard operating procedures. 2.4. Safe isolation of machine/equipment is verified. 2.5. Safety/security lock-off devices and signage are installed to standard operating procedure. 2.6. Machine/equipment is left in clean and safe state.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, specifications and other applicable reference documents
- checking and clarifying task-related information
- entering information onto proformas and standard workplace forms
- shutting down machine/equipment
- purging/de-energising equipment
- installing safety/security lock-off devices and signage\

Required knowledge

Look for evidence that confirms knowledge of:

- the operational function of the machine/equipment
- the shut-down sequence
- the procedures for shutting down and isolating the machine/equipment
- safety precautions for shutting down and isolating the machine/equipment
- procedures for purging/de-energising the machine/equipment and reasons for doing so
- procedures for verifying machine/equipment shut-down and isolation and reasons for verifying
- the safety/security lock-off devices and signage to be installed
- the reasons and procedures for installing lock-off devices and signage
- the reasons for ensuring the machine/equipment is left in a clean, safe state
- hazards and control measures
- use and application of personal protective equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to shut down and isolate machines/equipment.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with shutting down and isolating machines/equipment or other units requiring the exercise of the skills and knowledge covered by this unit.

Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate

EVIDENCE GUIDE	
	must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Shut down/isolate	Shut down/isolation means and includes isolation of mechanical, electrical drives, pipework (pressure) rotating equipment etc. utilising electrical lock-off isolators, mechanical and power driven valves etc. in accordance with standard operating instructions. Relevant regulations, Australian standards and legislative requirements governing isolation and shut-down must be complied with
Machine/equipment	Manual, semi automatic and automatic machines of a stand-alone, continuous production or process nature.

MSACMT630A Optimise cost of product

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to take a global view of the costs of a product and determines methods of reducing costs overall.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, a product is selected and analysed by its cost components to determine the best method of lowering the cost overall. This unit differs from <i>MSACMT631A Undertake value analysis of product costs in terms of customer requirements</i> in that it looks at all costs and takes a holistic approach to the cost of the product.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to calculate cost components and determine cost optimisation strategies. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into costing methods.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	<i>MSACMT631A</i>	<i>Undertake value analysis of product costs in terms of customer requirements</i>
---------------------------	-------------------	--

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse total cost components of product	1.1. Identify all cost components of product 1.2. Allocate cost components to major categories such as overhead, depreciation, energy, consumables and labour 1.3. Distinguish between costs which directly deliver customer features/benefits and <i>waste</i>
2. Optimise costs	2.1. Analyse causes of costs which lead to customer features/benefit 2.2. Determine methods of increasing the customer benefit/cost ratio 2.3. Analyse causes of waste costs 2.4. Determine methods of reducing/eliminating waste costs 2.5. Analyse interactions between cost components 2.6. Check that one method of reducing costs does

ELEMENT	PERFORMANCE CRITERIA
	<p>not cause an increase in another cost/reduction in consumer benefit</p> <p>2.7. Check that cost reduction plans do not reduce required levels of regulatory compliance or Occupational Health and Safety (OHS)</p>
3. Implement cost optimisation	<p>3.1. Develop cost optimisation plans</p> <p>3.2. Negotiate with relevant people to agree on implementation plans</p> <p>3.3. Take actions to implement the cost optimisation</p> <p>3.4. Monitor the implementation of the cost optimisation</p> <p>3.5. Make adjustments to the plan as required</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- calculation
- analysis
- problem solving
- planning

Required knowledge

- cost components of product
- major costs which are controllable (and how to control them)
- types of waste
- interrelationship of cost components and costs and benefits

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

EVIDENCE GUIDE	
Overview of assessment requirements	The person will select a product to analyse and determine cost components. Costs will be identified as waste or otherwise as an aid to determining their treatment. The cost reduction plans will optimise the cost of the product overall in terms of benefit delivered.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.
In what context should assessment occur?	Assessment will need to occur in a workplace.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence from a single optimisation may be adequate, although generally analyses of a few products with different cost structures or customer benefit structures would be required.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Waste

Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include:

- excess production and early production
- delays
- movement and transport
- poor process design
- inventory
- inefficient performance of a process
- making defective items.

Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.

MSACMT631A Undertake value analysis of product costs in terms of customer requirements

Modification History

Not applicable.

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit covers the knowledge and skills required by an employee who is required to analyse products and processes to determine the factors that most impact on meeting customer requirements. The analysis is in terms of cost factors and include options for improving cost efficiency. The unit also includes implementing identified changes that increase cost efficiency. The unit may be applied individually or in a team environment.</p> <p>In this unit an employee uses an analysis of the benefits/features which a customer perceives to be in a product/products as a basis for determining waste and so reducing waste.</p>
-------------------------------	--

Application of the Unit

<p>Application of the unit</p>	<p>In a typical scenario, an employee will choose a product, analyse the features/benefits obtained by customers from this product and the cost components relating to those benefits. From this waste will be determined and actions taken to reduce waste.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to determine cost efficiencies. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into costing methods.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse customer benefits and determine waste	1.1. Determine features/benefits perceived by customer in product 1.2. Analyse cost components and determine those which deliver customer features/benefits and those which don't 1.3. Analyse waste cost components 1.4. Determine alternative ways of reducing waste costs 1.5. Select actions which maximise customer benefits and minimise costs
2. Analyse production performance variance	2.1. Analyse required performance to meet customer <i>pull</i>

ELEMENT	PERFORMANCE CRITERIA
	2.2. Determine actual <i>cycle time</i> /s and variability of cycle time 2.3. Analyse cause of waste in throughput 2.4. Analyse costs and determine methods of reducing costs/waste 2.5. Take actions required to achieve cost/waste reduction/s

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- calculation
- communication
- problem solving
- analysis
- numeracy
- literacy
- planning and organising

Required knowledge

- customer benefits from products
- performance and cycle times for products made
- major costs which are controllable (and how to control them)
- types of waste (muda)
- methods of reducing waste (muda)
- methods of reducing cycle time
- desirability of improving performance and methods of reducing cycle time

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge,

EVIDENCE GUIDE

the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	The employee will select a product/range of products to analyse and determine waste in terms of any cost which does not contribute directly to an identified customer benefit/feature and then proceed to determine and implement methods of reducing this waste.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.
In what context should assessment occur?	Assessment will need to occur in a workplace.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence should be available from a number of minor changes or from a single large change which had multiple facets and which was implemented over a period of months.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
Performance	Performance may be thought of as the rate of output of the plant compared to the rate required to meet demand.
Cycle time	Cycle time is the normal time to complete an operation on a product.
Pull	Pull is the concept of producing to demand, rather than for stock or some forecast.

MSACMT671A Develop and manage sustainable environmental practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills needed to identify opportunities for and make improvements in sustainable environmental practices in production, maintenance and logistics. Areas covered include efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of enterprises.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This is the highest level sustainable environmental practices unit in the CM. In a typical scenario, there is a need to reduce <i>waste</i> in the <i>value chain</i>. Part of this is the cost of <i>environmental resources</i> to the process. Some of this is <i>necessary waste</i> but a large part of environmental resource use may be <i>unnecessary waste</i> and so should be totally eliminated. In order to make these savings, there is a need to analyse environmental resource use and cost in all its forms and then develop and implement plans for the more efficient use of energy.</p> <p>This unit primarily requires the application of communication and problem solving skills associated with collecting and analysing information. An ability to analyse resource use of technology or processes will be applied. Initiative and enterprise, and planning and organising are also required to develop plans for efficient resource use. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into the development of</p>

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse resource use	1.1. Identify all resource consuming processes 1.2. Determine quantity and nature of resource consumed 1.3. Analyse resource flow through different parts of the process
2. Develop resource conservation plans	2.1. Determine the efficiency of use/conversion of resources 2.2. Determine causes of low efficiency of use

ELEMENT	PERFORMANCE CRITERIA
	2.3. Develop plans for increasing the efficiency of resource use 2.4. Check resource use plans comply with regulations/licensing requirements 2.5. Determine benefit/cost of plans
3. Investigate alternative sources of resource	3.1. Determine the function of the resource used 3.2. Develop a specification for function 3.3. Identify a range of sources for meeting that function 3.4. Determine benefit/cost for alternative resource sources
4. Develop plans for more efficient resource use	4.1. Compare benefit/costs for different alternatives developed 4.2. Rank proposals based on benefit/cost compare to limited resources 4.3. Check proposals meet regulatory requirements 4.4. Recommend proposals for improving resource efficiency
5. Implement selected plans	5.1. Liaise with relevant people to implement resource efficiency plans 5.2. Follow through to ensure implementation occurs 5.3. Monitor implementation and make adjustments as required 5.4. Check new resource usage to ensure improvements have occurred

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- mathematics
- communication
- problem solving
- data gathering.

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none"> planning and organising
Required knowledge
<ul style="list-style-type: none"> the '3Rs' - reduce, re-use, recycle regulatory/licensing requirements types and sources of resources methods of analysing resource efficiency for different resources alternative resources/alternative ways of achieving the same function principles of resource efficiency relevant regulatory/legislative requirements process needs for resources

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will be able to analyse the resource use of any/all part/s of the process and determine if there are more efficient/cheaper ways of achieving the same result.
What are the specific resource requirements for this unit?	Access to an organisation seeking to improve its resource usage.
In what context should assessment occur?	Assessment needs to be conducted in an organisation where resource use is a significant cost component.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit is related to: <ul style="list-style-type: none"> <i>MSACMT271A Use sustainable environmental practices</i> - which covers the individual application level, and <i>MSACMT670A Develop and manage sustainable energy practices</i> - which covers energy specific aspects.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable,

EVIDENCE GUIDE	
	<p>authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	If evidence is from a major project to improve resource efficiency, then it may provide sufficient evidence. If evidence is from a number of minor improvements to resource use then a range of such improvements will be needed to provide sufficient evidence.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Resources	Resources includes all raw materials and components as well as cooling water, process water, cleaning water, fuels, lubricants and other materials used in/required by the process.
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays

RANGE STATEMENT	
	<ul style="list-style-type: none"> • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
Necessary waste	Necessary waste is any activity or cost which does not contribute directly to customer benefit/feature in the product, and which cannot be avoided (e.g. regulatory compliance and fixed costs). Necessary waste cannot be eliminated but should be managed.
Unnecessary waste	Unnecessary waste is any activity or cost which does not contribute directly to customer benefit/features in the product and can be avoided. Unnecessary waste should be eliminated as quickly as practical.

MSAPMOPS404A Co-ordinate maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit applies to employees who coordinate maintenance of a manufacturing facility. It applies to all sectors of the industry.

This competency is typically performed by experienced technicians, supervisors, maintenance coordinators or team leaders, working either independently or as part of a team.

Application of the Unit

Application of this unit

This competency applies to supervisors and technicians who are required to apply knowledge of equipment operating principles, service requirements and workplace production operations to the coordination of maintenance activities. The key factors are the coordination of maintenance activities to meet the objectives of restoring the plant/equipment condition, consistent with production requirements.

The technician will:

- identify and plan maintenance work consistent with production requirements
- interpret data and information on equipment
- develop and monitor workplans for the maintenance activities
- organise materials, consumables and personnel to meet the maintenance objectives
- check tools, equipment, materials and output for conformity to job requirements
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the evidence guide.
1. Plan maintenance.	1.1 Develop work plans for scheduled routine maintenance activities. 1.2 Develop maintenance plans for unscheduled maintenance activities. 1.3 Source maintenance providers (internal/external). 1.4 Develop costings for maintenance work. 1.5 Implement measures to control identified hazards in line with procedures and duty of care. 1.6 Document and record required production interruptions, processes and procedures. 1.7 Obtain clearances for the maintenance work.
2. Organise maintenance.	2.1 Schedule maintenance activities, with reference to production requirements and availability of resources. 2.2 Review available maintenance expertise and arrange appropriate training and assessment where necessary.

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the evidence guide.
	2.3 Obtain approvals for maintenance schedule as necessary to coordinate with production requirements.
3. Assemble maintenance requirements.	3.1 Determine resources required (equipment, personnel and consumables) to meet maintenance schedule. 3.2 Locate and coordinate supply of consumables, equipment and expertise to meet maintenance schedule. 3.3 Purchase equipment, consumables and expertise as required.
4. Complete maintenance.	4.1 Complete maintenance schedule. 4.2 Make appropriate readings, measurements and recordings and compare to equipment, product and other relevant specifications. 4.3 Identify areas requiring further testing and recommend appropriate procedures to supervisory staff. 4.4 Make appropriate adjustments to the maintenance schedule. 4.5 Complete records as required, noting areas where changes to equipment operation or routine maintenance are required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Application of knowledge and understanding of equipment operation, planning and maintenance practices sufficient to plan for maintenance requirements in standard and non-standard situations and then determine appropriate action which is consistent with operation guidelines is required.

Knowledge of the enterprise's procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures and the use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving processing and material problems, including:

- characteristics and capabilities of equipment, materials and processes used
- functions and troubleshooting of internal components and their problems
- routine and non-routine causes of equipment failures and the service conditions which may increase maintenance
- urgency and timeliness factors in planning maintenance activities in relation to production requirements
- proactive, predictive, preventative and reactive maintenance principles
- implications of maintenance for production and work activities
- source requirements for maintenance
- safety procedures and the use of PPE in relation to handling materials, equipment operation and cleanup
- the hierarchy of control including engineering controls.

Competence also includes the ability to:

- identify factors in production schedules, time and resource requirements (including external sources) in scheduling maintenance activities
- schedule maintenance functions in the most timely and cost effective manner
- apply relevant agreements, codes of practice or other legislative requirements
- ensure workplace is safe for maintenance activities.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical manufacturer specifications, equipment procedures, production schedules and material labels as provided to coordinators.

Writing is required to the level of completing workplace reports and proposals.

Numeracy is also required, eg analysing statistical information/historical data in the form of tables and graphs

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the ability to:

- recognise potential situations requiring action
- implement appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- planned work sequences are logical and conform with production schedules and work rosters
- maintenance schedules for reactive, planned and proactive maintenance are coordinated based upon the most appropriate and cost effective method to ensure equipment reliability and optimum performance
- plans are initiated and monitored, with activities modified for variations in workplace contexts and the environment, until final resolution has occurred.

Assessment method and context

It is preferred that assessment takes place in an industrial work environment.

Competence in this unit may be assessed:

- on a processing plant allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the manufacturing industry. It does not include maintenance which would require trade level skills. It is not intended that this competency would cover performing maintenance which is carried on in a workshop.

This may include:

- predictive and preventative operational maintenance
- proactive maintenance
- reactive maintenance.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools specific for the task
- testing equipment
- measuring and aligning equipment
- computer equipment
- relevant personal protective equipment.

Hazards

Typical hazards to be considered, include:

- isolations of energy sources, motive power and process materials
- manual handling of machinery components and the need for lifting devices
- hot, cold or components containing dangerous materials
- external hazards (eg traffic into a maintenance area)

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'.

Typical process and product problems which may require maintenance, include:

- equipment performance outside of specification or requirements
- equipment breakdown
- equipment wear and tear.

Variables

Key variables to be monitored include:

- relationship of maintenance plan to production requirements
- costs of maintenance
- availability of materials and services
- documentation and record keeping.

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- production schedules
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure
- condition monitoring information
- planned maintenance schedules
- standard operating procedures
- manufacturer instructions, specifications and service manuals
- machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits
- plant description manuals.
-

Unit Sector(s)

Not applicable.

MSAPMSUP390A Use structured problem solving tools

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor.

Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify the problem.	1.1 Identify variances from normal operating parameters and product quality. 1.2 Define the extent, cause and nature of the problem by observation and investigation. 1.3 State and specify the problem clearly.
2. Determine fundamental cause of problem.	2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques. 2.2 Develop possible cause statements. 2.3 Identify fundamental cause.
3. Determine corrective action.	3.1 Consider all possible options for resolution of the problem. 3.2 Consider strengths and weaknesses of possible options. 3.3 Determine corrective action to remove the problem and possible future causes. 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures. 3.5 Develop recommendations for ongoing monitoring

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	and testing.
4. Communicate recommendations.	4.1 Prepare report on recommendations. 4.2 Present recommendations to appropriate personnel. 4.3 Follow up recommendations if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
 - identifying variations
 - identifying cause and effect
 - separating single problems from multiple problems
 - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units.

In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.
-

Unit Sector(s)

Not applicable.

MSS015002A Develop strategies for more sustainable use of resources

Modification History

Not applicable.

Unit Descriptor

This unit of competency covers identifying strategies for more sustainable uses of resources. The unit includes the identification of waste as defined in lean manufacturing (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

Application of the Unit

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations.

The unit assumes that a decision to attempt to achieve more sustainable use of resources has already been made. The unit covers the skills needed for developing a strategic approach to resource use at the organisation or value chain level.

The unit does not cover the technical skills required to implement specific initiatives that may be identified as part of the strategic plan. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation's processes. Where required, appropriate mathematics and statistics units should be selected from the MEM05 Metal and Engineering Training Package or other appropriate Training Package.

Where the carbon footprint (or water footprint or similar) of an enterprise or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint.

It would typically be undertaken by a manager or technical specialist who had a major responsibility for sustainability as part of a broader work role, or sustainability may be their primary work responsibility.

For specific techniques covering the auditing of water, energy, emissions and transport, refer to relevant sustainability audit units.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

- | | |
|---|---|
| 1 Quantify resource consumption | 1.1 Identify all significant resources used by process |
| | 1.2 Identify consumption measurements available for each resource |
| | 1.3 Determine consumption for each resource |
| 2 Quantify resource loss | 2.1 Determine theoretical consumption of each resource |
| | 2.2 Compare theoretical consumption with actual consumption |
| | 2.3 Determine loss (emission) for each resource |
| 3 Recommend strategies for reducing waste | 3.1 Short-list high emission process steps |
| | 3.2 Analyse process to identify emission steps or locations |
| | 3.3 Determine root cause of emission |
| | 3.4 Investigate methods for reducing emission |
| | 3.5 Develop strategies and recommendations for improvement |
| 4 Prepare resources use audit report | 4.1 Identify purpose of report and key stakeholders |
| | 4.2 Compile data, implications and recommendations |
| | 4.3 Consult with stakeholders as appropriate |
| | 4.4 Draft and present report |

Required Skills and Knowledge

Required knowledge includes:

- the concept of muda. Muda is usually summarised under the headings of the ‘seven wastes’ which include:
 - overproduction
 - delay/waiting
 - transportation
 - over processing
 - excess inventory
 - unnecessary motion
 - defects and rework
- methods of material balancing
- methods of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping manufacturing processes and resources consumed
- methods of measuring actual resource usage
- concept of muda and muda categories
- muda reduction methods and strategies
- AS/NZS ISO 14000 Environmental Management Standards

Required skills include:

- calculating, manipulating and interpreting numerical data, including establishing series, means and averages, absolute and proportional material and energy usage per product or process, correlations and rates of change
- analysing and conducting root cause analysis
- calculating theoretical consumption of resources as the minimum amount of resources per product or process step as defined by the customer multiplied by the rate of production or process
- calculating actual consumption of resources per unit (e.g. per product, operation, site or value chain)
- writing technical reports
- consulting with technical experts and internal and external stakeholders

Evidence Guide

Overview of assessment	A person who demonstrates competency in this unit must be able to identify and quantify resources and waste in a process, recommend strategies to reduce waste and prepare a report with recommendations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include: <ul style="list-style-type: none"> • quantifying significant resource consumption and emission using materials balancing • identifying and consulting with stakeholders • developing strategies for reducing emissions • preparing and presenting a resources use report.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit of competency is to be assessed in the workplace or a simulated workplace environment. • Assessment should emphasise a workplace context and procedures found in the candidate's workplace. • This unit of competency may be assessed with other relevant units addressing sustainability at the enterprise level or other units requiring the exercise of the skills and knowledge covered by this unit. • The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.
Method of assessment	<ul style="list-style-type: none"> • In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. • Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. • The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work-like environment.
Guidance information for assessment	

Range Statement

Waste	Waste in this unit is used in the broader sense of ‘muda’ as used in lean manufacturing and the competitive manufacturing units of competency developed by Manufacturing Skills Australia (MSA)
Emissions	<p>Emissions means all materials which enter the process/site but which do not leave as part of the product and so includes:</p> <ul style="list-style-type: none"> • known or able to be physically measured emissions of: <ul style="list-style-type: none"> • gases, vapours and fumes • liquids • solids • assumed emissions through material balancing • assumed emissions through energy loss, including heat, friction and other energy conversion yield losses
Theoretical consumption	Theoretical consumption of resources is the minimum amount of resources per product as defined by the customer multiplied by the rate of production
Actual consumption	Actual consumption is the amount of a resource entering the value chain
Significant resources	<p>Significant resources includes resources which are deemed to be significant because they are:</p> <ul style="list-style-type: none"> • high volume • high value • high environmental significance • important to the product or process • covered by legislation or regulation • important to the enterprise <p>It need not include resources which are incidental to the activity and which are not otherwise significant</p>

Unit Sector(s)

Sustainability

Custom Content Section

MSS015003A Analyse product life cycle for sustainability

Modification History

Not applicable.

Unit Descriptor

This unit of competency covers analysing the life cycle of an existing or a proposed product to inform sustainability related decision making.

This unit does not specifically cover design for sustainability which is covered by MSS015004A Design sustainable product or process.

Application of the Unit

This unit applies to analysing all aspects of a product, including its design, production, storage and distribution, use, and end of life reuse, recycling or disposal. This analysis may be undertaken to assist in improving the sustainability of a product or process.

This unit applies inside organisations and their value chains. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations.

It would typically be undertaken by a manager or technical specialist who had a major responsibility for sustainability as part of a broader work role, or sustainability may be their primary work responsibility. The technologist may undertake this alone or as part of a team.

The technical measurement of operational performance or measurement of emissions or other environmental impact is not covered by this unit.

life cycle improvement

5.2 Prepare a recommendation for improving product life cycle

Required Skills and Knowledge

Required knowledge includes:

- value chain for analysed products
- sources and uses of materials
- alternative sources of materials
- production process and sustainability impacts of process
- sustainability impacts of supply chain and delivery chain
- alternative ways of delivering value to customer
- cost-benefit calculation

Required skills include:

- communicating with stakeholders
- analysing processes, logistics, material usages, costs and benefits
- consulting on existing and alternative processes and materials
- preparing recommendations

Evidence Guide

Overview of assessment	A person who demonstrates competency in this unit must be able to identify determine the life cycle of a product, including resources and materials used in production, and be able to recommend improvements in product life cycle.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include: <ul style="list-style-type: none"> • identifying materials and their source in the value chain • identifying current and alternative steps in the production process and their sustainability impact • assessing sustainability impact to end of life • suggesting sustainability improvements at each stage of life cycle • analysing re-use and recycling options.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit of competency is to be assessed in the workplace or a simulated workplace environment. • Assessment should emphasise a workplace context and procedures found in the candidate's workplace. • This unit of competency may be assessed with other relevant units addressing sustainability at the enterprise level or other units requiring the exercise of the skills and knowledge covered by this unit. • The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.
Method of assessment	<ul style="list-style-type: none"> • In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. • Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. • The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work-like environment.
Guidance information for assessment	

Range Statement

Materials	<p>Materials include:</p> <ul style="list-style-type: none"> • both materials directly used and also materials which comprise components which are used • materials/resources which may be consumed to make a physical product • materials which may be consumed in delivering a service (e.g. fuel, energy and other consumables)
Design brief	<p>Design brief includes the aims and objectives of the original product design, including:</p> <ul style="list-style-type: none"> • regulatory environment • material specifications • production process • estimated and actual material and energy consumption • budget • timelines • product use and disposal assumptions • market assumptions, including target groups, product image and cost
Sustainability impact	<p>The sustainability impact of a product and process may include:</p> <ul style="list-style-type: none"> • carbon footprint of product and process • current and future availability of raw materials • current and future availability of energy • waste generation and disposal • efficiency of process • the extent to which the production process and product affects the environment, including effects on: <ul style="list-style-type: none"> • climate • quality of local air and water • ecology • noise • relationship with the local and broader community, (e.g. effect of operations on aesthetic appearance, preservation of heritage, and proximity to schools and religious facilities) • extent of regulatory oversight and cost of compliance
Product life cycle	<p>Product life cycle includes:</p> <ul style="list-style-type: none"> • the entire life cycle of a product through design, manufacture, service and disposal

Final use or disposal at end of life	Final use or disposal at end of life covers decisions and actions on: <ul style="list-style-type: none">• reuse for modified or different purpose• recycling of components• disposal

MSS015011A Conduct a sustainability energy audit

Modification History

Not applicable.

Unit Descriptor

This unit of competency covers conducting an audit for the specific resource of energy in an organisation or part or all of its value chain and to prepare recommendations for a reduction of, and more efficient use of, energy.

Application of the Unit

This unit applies inside organisations and their value chains. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations (e.g. supplier of goods or services or a customer).

The energy audit may be conducted to assist in regulatory compliance or as part of a strategy to improve the sustainability of manufacturing operations. The emphasis in the unit is on informing decision making in regards to energy use in a value chain or site. Where complex electrical and other energy analysis skills are required appropriate units should be selected from the MEM05 Metal and Engineering Training Package.

It would typically be undertaken by a manager or technical specialist who had a major responsibility for sustainability as part of a broader work role, or sustainability may be their primary work responsibility. The manager or technical specialist may undertake this alone or as part of a team.

The technical measurement of operational performance or measurement of emissions or other environmental impact is not covered by this unit. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation's processes. Where required, appropriate mathematics and statistics units should be selected from the MEM05 Metal and Engineering Training Package or other appropriate Training Package.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

- | | |
|--|--|
| 1 Identify all sources and uses of energy in process | 1.1 Identify all sources of energy external to the site
1.2 Identify all sources of energy within the site
1.3 Identify all uses of energy by process unit
1.4 Identify energy type and intensity required by each process unit |
| 2 Calculate theoretical use of energy | 2.1 Calculate theoretical net use of energy by type and intensity for each process unit
2.2 Calculate overall energy balance for process/site
2.3 Evaluate the need for energy consumption by process and units within the process compared to alternative processes/units |
| 3 Measure actual use of energy | 3.1 Determine actual net energy use for overall process/site
3.2 Determine actual net energy use for each process unit
3.3 Calculate difference between theoretical and actual energy use by unit and overall
3.4 Identify actual energy type used by each process unit |
| 4 Develop strategies for reducing the use of energy | 4.1 Rank units by difference between theoretical and actual energy use
4.2 Rank units by actual energy use
4.3 Identify units using higher intensity energy than required
4.4 Develop strategies to reduce energy consumption |

and/or use lower intensity energy

- 5 Prepare a recommendation for an energy use reduction strategy
 - 5.1 Consult with key stakeholders
 - 5.2 Identify strategies required to meet regulatory or similar requirements
 - 5.3 Rank strategies by benefit/cost ratio
 - 5.4 Short-list preferred energy reduction strategies
 - 5.5 Prepare recommendation for improving energy usage

Required Skills and Knowledge

Required knowledge includes:

- nature of energy wastage:
 - efficiency
 - friction/fouling/scaling
 - temperature/pressure range of operation
- energy balancing techniques for process and process steps (sometimes known as heat balancing)
- methods of measuring actual process amount/flows
- waste reduction/energy efficiency strategies and methods along with costs, effectiveness and alternative strategies (e.g. efficient lighting, efficient window glass and efficient motors)
- cost-benefit analysis
- relevant legislation, regulation and protocols
- AS/NZS ISO 14000 Environmental Management Standards

Required skills include:

- mapping processes and energy flows
- interpreting schematics and drawings
- calculating, manipulating and interpreting numerical data, including establishing series, means, correlations and rates of change
- ranking energy consumption and waste based on energy balancing
- consulting with technical and operative staff on possible non-obvious energy wastes
- consulting and negotiating with stakeholders on implementation process for sustainability improvement
- preparing recommendations

Evidence Guide

Overview of assessment	A person who demonstrates competency in this unit must be able to conduct an energy audit, including calculation of theoretical and actual use of energy and preparation of recommendations for energy use reduction.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include:</p> <ul style="list-style-type: none"> • defining appropriate boundaries for the sustainability energy audit • conducting energy balance analyses for a site or value chain • identifying high energy use/waste units/areas • undertaking benefit/cost ratio analyses • ensuring improvement strategies proposed reflect stakeholder needs and regulatory environment.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit of competency is to be assessed in the workplace or a simulated workplace environment. • Assessment should emphasise a workplace context and procedures found in the candidate's workplace. • This unit of competency may be assessed with other relevant units addressing sustainability at the enterprise level or other units requiring the exercise of the skills and knowledge covered by this unit. • The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.

MSS402001A Apply competitive systems and practices

Modification History

New unit, superceding MSACMS200A Apply competitive manufacturing practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

Application of the Unit

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|---------------------------------------|---|
| 1 | Identify own place in the value chain | <ul style="list-style-type: none"> 1.1 Identify customers relevant to own work and their needs/requirements 1.2 Identify suppliers for own work 1.3 Identify value contributions along the chain 1.4 Identify and recommend methods of increasing own contribution to the value chain |
| 2 | Improve the product and process value | <ul style="list-style-type: none"> 2.1 Identify customer features/benefits in the product and process 2.2 Identify aspects of product and process which contribute to customer features/benefits 2.3 Identify aspects of product and process which do not contribute to customer benefits/features 2.4 Recommend methods of reducing waste and increasing features/benefits |
| 3 | Use competitive systems and practices | <ul style="list-style-type: none"> 3.1 Identify competitive systems and practices used in organisation and own work area 3.2 Apply practices appropriate for the job or process 3.3 Monitor the job/process and make adjustments to improve it in accordance with procedures 3.4 Identify own skill requirements and seek skill development, if required |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope of competitive systems and practices implementation and contributing suggestions for improvement
- visualising normal operational procedures in terms of flow and contribution to customer outcomes
- planning own tasks to support competitive systems and practices implementation
- implementing competitive systems and practices in own work area according to instructions
- identifying waste (muda)

Required knowledge

Required knowledge includes:

- internal and external customers and the value they derive from operations
- suppliers, their capabilities and contribution to value (this may be obtained from an existing value stream map or other enterprise documentation)
- waste (muda)
- relevant competitive systems and practices for own job and how to apply them
- factors impacting on product, operations and waste, particularly those wholly or partially under their control (and how to control them)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person being assessed against this unit will work effectively in a competitive systems and practices environment, making continual positive contributions to the improvement of the business within the scope of their job.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: <ul style="list-style-type: none"> • identify the scope of competitive systems and

	<p>practices implemented in their work area</p> <ul style="list-style-type: none"> • identify services and/or functions supplied by suppliers and to customers • identify own tasks and responsibilities and relate them to organisation and customer requirements • identify aspects of products and process which add to or detract from customer benefit • contribute suggestions for improvement.
Context of and specific resources for assessment	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads, and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>

Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.
-------------------------------------	--

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control And Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted</p>
--	--

	<p>so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Customers	<p>Customers may include:</p> <ul style="list-style-type: none"> • internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable • final customers used as the basis for the identification of value and waste <p>The individual does not need to interface directly with the external customer, but should be provided with sufficient information to enable them to identify customer benefits and customer features</p>
Suppliers	<p>Suppliers may be:</p> <ul style="list-style-type: none"> • internal or external suppliers and should be sufficiently close to the individual's work as to be easily identifiable <p>The operator does not need to interface directly with external suppliers, but should be provided with sufficient information to enable them to identify supplier contribution to their own work and to customer benefit</p>
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the organisation • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS402030A Apply cost factors to work practices

Modification History

New unit, superseding MSACMT230A Apply cost factors to work practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to identify cost components in their work and to be able to determine, in general terms, the cost impacts of alternative actions.

Application of the Unit

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

The unit covers the skills to be able to assess the relative costs of the alternatives and use this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

This unit requires the application of skills associated with problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

Licensing/Regulatory Information

Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify the major cost components of product or process in own work area	1.1	Identify cost components in the product or process in own work area
		1.2	Recognise the impact of current or alternative actions on costs
2	Identify constraints to cost-efficiency	2.1	Identify required production/process rate and major costs
		2.2	Identify costs factors under individual or team control
		2.3	Relate identified costs factors to impact on overall cost of production/process
		2.4	Identify cost factors that are a constraint to cost-efficiency in own work area
3	Apply cost-efficient work practices	3.1	Identify and explain to relevant people the implications of possible actions/changes to improve cost-efficiency in simple financial terms
		3.2	Identify non-financial implications of proposed changes in discussion with relevant people
		3.3	Select actions which minimise overall costs
		3.4	Monitor actions to ensure cost-efficiency in own work area is maintained

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify cost factors and contribute suggestions for improvement
- visualising normal operational procedures in terms of flow
- distinguishing between fixed and variable costs
- identifying fixed and variable cost components relevant to own work, including where applicable:
 - power/energy
 - materials, plant and equipment
 - production or process time, including impact on salary and wages
 - office expenses
 - government taxes and charges

Required knowledge

Required knowledge includes:

- cost components of products made
- costs concepts, such as expense and income
- major cost contributors to product (e.g. energy)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

MSS402050A Monitor process capability

Modification History

New unit, MSACMT250A Monitor process capability - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.

Application of the Unit

This unit applies to an individual in an organisation adopting specific competitive systems and practices, usually either six sigma or statistical process control/three sigma, as a means of determining and improving the capability of their process to customer requirements. The individual is involved in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a nominated computer program). The information is typically presented to team members in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.

This unit requires the application of skills associated with entering and monitoring operational data and information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

1	Collect and process data	1.1	Take specified measurements/readings, as required
		1.2	Enter data in log, computer or other record
		1.3	Manipulate and/or chart data as required by procedures
2	Identify variations that are not random and take action	2.1	Examine chart and/or reliability information
		2.2	Distinguish between random variations and those with an identifiable cause
		2.3	Take action specified in procedures when a variation with an identifiable cause occurs
3	Assist in process improvement	3.1	Collect data for process capability improvement trials
		3.2	Make recommendations for improvement
		3.3	Implement revised capability monitoring procedures

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting electronic and hard copy operating instructions and documents, including where used:
 - work instructions

- standard operating procedures
- formulas/recipes
- production and batch sheets
- temporary instructions
- other provided operating instructions
- monitoring performance data against specifications and control parameters
- examining equipment procedures, products and processes for possible causes of variations
- identifying when corrective action is required by reference to procedures

Required knowledge

Required knowledge includes:

- data collection methods for operations in work area
- data processing techniques required
- basic variability and normal distribution
- recognition of identifiable causes in accordance with procedures
- causes of different types of identifiable causes as defined by procedures
- actions to be taken for the different causes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

MSS402051A Apply quality standards

Modification History

New unit, superseding MSACMT251A Apply quality standards - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

Application of the Unit

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|--|
| 1 | Assess own work | 1.1 | Continuously check completed work against workplace standards relevant to the operation being undertaken |
| | | 1.2 | Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned |
| | | 1.3 | Identify and isolate faulty components, products or processes |
| | | 1.4 | Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures |
| 2 | Assess quality of received components, parts or materials | 2.1 | Continuously check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance |
| | | 2.2 | Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service |
| | | 2.3 | Identify and isolate faulty components, parts, materials or information that relate to the operator's work |
| | | 2.4 | Record and/or report faults and any identified causes in accordance with workplace procedures |
| | | 2.5 | Identify causes of any identified faults and take corrective action as specified in workplace procedures |
| 3 | Measure components, parts or materials | 3.1 | Measure materials, component parts, information, service or products, as required, using the appropriate measuring instruments in accordance with workplace procedures |

4	Record information on production indicator	4.1	Record basic information on quality and other indicators of process performance in accordance with workplace procedures
5	Investigate causes of quality deviations	5.1	Investigate and report causes of deviations from specified quality standards for components
		5.2	Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting work instructions, specifications, standards and patterns appropriate to own work
- carrying out relevant visual inspections of materials, component parts and final products
- carrying out relevant physical/chemical measurements or tests
- maintaining accurate work records in accordance with procedures
- carrying out work in accordance with occupational health and safety (OHS) policies and procedures
- meeting work specifications
- communicating effectively within defined workplace procedures
- interpreting and applying defined procedures

Required knowledge

Required knowledge includes:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- basic characteristics of materials used in the relevant production processes
- safety and environmental aspects of relevant production processes
- relevant measurement techniques and quality checking procedures
- workplace procedures
- reporting procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • interpret, relevant work instructions, standards and specifications appropriate to own work • check and measure relevant quality parameters • interpret results of quality checks in terms of specifications, patterns and work standards • take required action where standards of materials, component parts, final product or work processes are found to be unacceptable • maintain accurate records.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of

	<p>contingencies, improvement scenarios, and so on)</p> <ul style="list-style-type: none"> • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis
--	---

	<ul style="list-style-type: none"> • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Quality parameters	<p>Quality parameters may include:</p> <ul style="list-style-type: none"> • finish • size • durability • product or process variations • materials • alignment • colour • damage and imperfections • time
Quality checks	<p>Quality checks are against set parameters for the process or product. Examples include:</p> <ul style="list-style-type: none"> • visual inspection • physical measurements • chemical tests • checks against patterns, templates and guides • processing time
Materials	<p>Materials may include:</p> <ul style="list-style-type: none"> • physical raw materials • orders, forms and other documentation • services required for undertaking an operation (e.g. power, water, compressed air and fuel)

Measure	<p>Measure includes:</p> <ul style="list-style-type: none"> those measurements which may be taken by the employee in the workplace/at their work station
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> work instructions standard operating procedures formulas/recipes batch sheets temporary instructions and similar instructions provided for the operation of the plant good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> written, verbal, computer-based or in some other format
Indicators of production performance	<p>Indicators of production performance may include:</p> <ul style="list-style-type: none"> number of items/production rate delays and causes of delays (where known) other information as specified in the procedures
Data entry/recording	<p>Data entry/recording may include:</p> <ul style="list-style-type: none"> keyboard written (including ticks or signs) verbal
Sources of information/ documents	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> quality and Australian standards and procedures work instructions, patterns, designs and recipes organisation work procedures manufacturer instructions for materials and equipment organisational or external personnel customer requirements
Investigate and report	<p>Investigate and report includes:</p> <ul style="list-style-type: none"> following set procedures defined for such investigations <p>Set procedures may include:</p> <ul style="list-style-type: none"> verbal instructions

	<ul style="list-style-type: none"> • documented procedures • other quality procedures as implemented within an organisation or work environment
Workplace context	<p>Workplace context includes:</p> <ul style="list-style-type: none"> • work organisation procedures and practices relating to the manufacture and quality outcomes for products • conditions of service, legislation and industrial agreements, including: <ul style="list-style-type: none"> • workplace agreements and awards • federal or state/territory legislation • standard work practice
Reporting/communication	<p>Reporting/communication may include:</p> <ul style="list-style-type: none"> • verbal and written communication in accordance with organisational policies and procedures • oral, written or visual communication and may include simple data
Being responsible for the maintenance of own work quality	<p>Being responsible for the maintenance of own work quality may include:</p> <ul style="list-style-type: none"> • contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures • following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation
Applicable regulations and legislation	<p>Applicable regulations and legislation may include:</p> <ul style="list-style-type: none"> • OHS legislation relevant to workplace activities • workers compensation legislation

MSS402060A Use planning software systems in operations

Modification History

New unit, superseding MSACMT260A Use planning software systems in manufacturing -
Not equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to access planning software (often known as Enterprise resource Planning (ERP), Materials Resource Planning (MRP and MRPII), and often by a proprietary name, to make routine business decisions required of the person as a regular part of their job.

Application of the Unit

This unit applies to an individual in an organisation using a planning software system and who must interface with that system. The unit applies to both accessing information from the planning software system and using it as an aid to decision making. This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--|---|
| 1 | Use interface | 1.1 Identify terminals relevant to own work station and functions |
| | | 1.2 Use keyboards, track ball/mouse and monitor and/or other peripherals to access system |
| | | 1.3 Navigate through system and screens to find program menu and data relevant to own work |
| | | 1.4 Identify and input information on own work processes at required frequency and to required detail |
| | | 1.5 Access message section and acknowledge messages |
| | | 1.6 Identify problems and make suggestions for improvements to relevance of planning software to own work |
| | | |
| 2 | Access information | 2.1 Identify work processes that require information from planning software system |
| | | 2.2 Obtain relevant data and information on current operations from the planning software system |
| | | 2.3 Identify the status of items in the value stream |
| | | 2.4 Access historical data and information |
| | | 2.5 Interpret information and identify and prioritise any actions required in response to information |
| | | |
| 3 | Take appropriate actions in accordance with procedures | 3.1 Take actions in response to information obtained from planning software |
| | | 3.2 Follow up as appropriate to ensure anticipated results have occurred |
| | | 3.3 Record adjustments and variations according to procedures |

3.4 Identify any learning needs to use planning software and seek appropriate support

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting electronic and hard copy operating instructions and documents, including where used:
 - work instructions
 - standard operating procedures
 - formulas/recipes
 - production and batch sheets
 - temporary instructions
 - other provided operating instructions
- working within access control requirements of the planning software system
- identifying modules, screens, files, and so on, of software relevant to own work
- logging in and using terminals and planning software at a level of access appropriate to own work
- accurately inputting data
- searching and retrieving data
- accessing nominated assistance with planning software

Required knowledge

Required knowledge includes:

- technical knowledge needed to operate own work processes
- planning software system and operation, including:
 - terminal locations and types
 - security and access arrangements
 - range of information held in planning software relevant to own work
 - data collection methods for operations in work area
 - assistance arrangements for users of planning software
 - business activities exercised by/through the planning software system
- value created by operations for customers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the scope and relevance of planning software system to their own work • enter and retrieve data, including normal performance and variations • use planning software system to assist in own work • contribute suggestions for improvement to performance and relevance of planning software to own work area.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues

	<p>(third-party reports)</p> <ul style="list-style-type: none"> • portfolio of evidence <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz)

MSS403001A Implement competitive systems and practices

Modification History

New unit, superseding MSACMS400A Implement a competitive manufacturing system - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to implement and review competitive systems and practices in a person's own work within a team or work area, including the consideration of the impact on the work of others. The unit focuses on the holistic application of competitive systems and practices to achieve improved performance in own work and in activities with others in the team or work area that contribute to improving customer benefit.

Application of the Unit

This unit applies to individuals who are applying competitive systems and practices to their own work in a way that integrates with others in the team or work area who are also implementing competitive systems and practices. Depending on the operations or processes in the team or work area the unit may also include interaction with other teams and work areas.

The unit is suitable for individuals who have formal responsibility for the work of others, such as team leaders. It is also suitable for individuals, such as technicians and tradespeople, who must integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation.

The unit applies to the areas of cost, quality, delivery, safety/environment, and employee capability including continuous reviewing of performance against these five areas in liaison with other relevant people. Improvement initiatives in these five areas are usually developed and implemented with the support of technical support staff. Whereas other units may emphasise the competence to use one or more competitive practices, this unit emphasises the ability to advance on all five key areas over a moderate time period.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to identify opportunities to make improvements and maximise performance. Communication, the ability to work in a team and planning and organising skills are required to implement improvements and address any conflicts that arise. This unit also requires an ability to identify appropriate technology, and to consider and integrate feedback on how personal performance can be improved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Contribute to the improvement of the operations system in team or work area	1.1	Identify key performance indicators for area of operations
		1.2	Implement and review competitive systems and practices to improve health, safety and environment (HSE) performance of self and others
		1.3	Implement and review competitive systems and practices to maximise quality consistency
		1.4	Implement and review competitive systems and practices and identify any skill and training issues that need to be addressed to improve capability of self and others
		1.5	Implement and review competitive systems and practices to maximise customer benefit/cost ratio
		1.6	Implement and review competitive systems and practices to reduce lead time to delivery within the scope of authority and responsibility
		1.7	Work with relevant stakeholders to resolve conflicts

- which arise from implementation of competitive systems and practices
- 1.8 Select improvements which will deliver the greatest overall benefit for the resources required/available without reducing current performance on individual factors
- 2 Implement improvements
- 2.1 Implement the chosen improvement/s
- 2.2 Check the selected improvements improve the system as a whole and do not result in unintended consequences
- 2.3 Monitor implementation and make adjustments, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope of implementation of competitive systems and practices, including:
 - value stream mapping
 - 5S
 - Just in Time (JIT)
 - mistake proofing
 - process mapping
 - establishing customer pull
 - kaizen and kaizen blitz
 - setting of key performance indicators/metrics
 - identification and elimination of waste (muda)
- monitoring performance in key areas, including:
 - HSE performance
 - quality consistency
 - capability and performance by team members
 - customer benefit/cost ratio
 - reduce lead time to delivery

- contributing suggestions for improvement
- analysing operational procedures in terms of flow and contribution to customer outcomes
- planning tasks to support competitive systems and practices implementation
- identifying and implementing appropriate data gathering and analysis techniques within area of responsibility to identify change over time in indicators relating to:
 - cost
 - quality
 - delivery
 - safety/environment
 - employee capability and support for competitive systems and practices
- solving problems to root causes

Required knowledge

Required knowledge includes:

- customers and the value they derive from products and processes of the organisation or area
- cost components and their relationship to customer benefits/features
- suppliers and their capabilities
- waste (muda)
- factors causing variability in a product and how to control them
- factors that promote standardisation
- relevant competitive systems and practices tools for area and how to apply them
- factors impacting on the product, process and waste, particularly those wholly or partially under own and other immediate area employees control (and how to control them)
- good HSE practice and factors impacting on HSE performance
- own capability and how to improve it
- optimisation techniques appropriate to the organisation and the job
- application of quality standards and processes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • identify key performance indicators appropriate to their own work area

MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Modification History

New unit superseding MSACMC410A Lead change in a manufacturing environment - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by individuals responsible for facilitating change processes in an organisation implementing competitive operational practices.

Application of the Unit

This unit applies to people who facilitate the change process resulting from implementing one or more competitive systems or practices. This implementation may also be associated with other changes, such as the introduction of new products, processes or equipment. The unit will usually apply to people whose responsibility is at the team, area or section level rather than the whole organisation. The responsibility may be formally designated or be informal, as in mentoring and assisting fellow employees.

This unit assumes that consultation and agreement on the implementation of the competitive systems and practices and other associated changes has already occurred and the nature and extent of the change has been agreed.

This unit does not cover the negotiation of change in a formal industrial relations sense but does cover the skills needed to identify real or potential change implementation issues, including those that may need to be referred to formal consultation and/or dispute settlement procedures.

This unit has a strong emphasis on planning, encouraging and facilitating in a changing environment within the organisation, including using appropriate communication, teamwork, problem solving, initiative and self-management.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|--|-----|--|
| 1 | Define nature and impact of change for designated area and processes | 1.1 | Identify the organisation's aims and objectives for the competitive systems and practices techniques related to the change process |
| | | 1.2 | Identify opportunities for implementation of change within work area |
| | | 1.3 | Determine impacts of change for work area, including potential benefits and impacts on own work and work of fellow employees |
| 2 | Identify key performance indicators (KPIs) | 2.1 | Liaise, where required, with managers, engineers and other staff responsible for designing and/or implementing change |
| | | 2.2 | Identify KPIs for own work responsibility and that of the work area |
| | | 2.3 | Communicate KPIs to fellow employees |
| | | 2.4 | Check that data collection and processing are appropriate for KPIs |
| | | 2.5 | Raise and resolve issues related to KPIs with relevant personnel |

- | | | | |
|---|---|-----|---|
| 3 | Liaise with key stakeholders | 3.1 | Identify key stakeholders impacted by the change |
| | | 3.2 | Communicate with key stakeholders within scope of authority |
| | | 3.3 | Identify and address issues and concerns of each stakeholder if within scope of authority |
| | | 3.4 | Develop and/or locate information required to address key concerns |
| | | 3.5 | Refer issues and concerns outside of scope of authority to appropriate personnel |
| 4 | Develop a strategy to help implement change | 4.1 | Identify or develop a work plan for implementing change |
| | | 4.2 | Make information required to support change available to team members |
| | | 4.3 | Communicate/circulate draft work plan to other employees in work area, supervisors, technical experts and other appropriate personnel for comment |
| | | 4.4 | Assess suggested changes and incorporate into work plan, where appropriate |
| 5 | Implement change | 5.1 | Obtain authorisation to commence change implementation in accordance with organisation procedures |
| | | 5.2 | Implement change in accordance with work plan and organisational occupational health and safety (OHS) and consultation procedures |
| 6 | Monitor implementation of change | 6.1 | Maintain open communication channels with all stakeholders during implementation |
| | | 6.2 | Monitor KPIs during implementation |
| | | 6.3 | Encourage and facilitate improvement suggestions of team members |
| | | 6.4 | Identify areas requiring improvement in change |

implementation

- 6.5 Make improvements to implementation according to organisation procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying the competitive operational practices being implemented in the organisation, including:
 - Just in Time (JIT) and kanban systems
 - preventative maintenance
 - 5S housekeeping
 - continuous improvement processes (e.g. kaizen)
 - waste (muda) elimination
 - formal problem solving procedures (e.g. root cause analysis (RCA))
- identifying other products, processes or equipment changes being implemented within area of responsibility
- identifying the work and culture changes required for effective implementation of the competitive systems and practices being implemented and other products, processes or equipment changes
- identifying organisation KPIs and contextualise for area of responsibility to determine successful change implementation
- planning strategies for change implementation, including:
 - required communication with others
 - negotiations if any required with internal and external suppliers, customers and delegates
 - analysis of any skill gaps in self and others
 - required training
 - data collection
 - work organisation and procedure changes
 - risk identification and contingency measures
- monitoring performance against KPIs and taking appropriate corrective action in the event of a non-conformance
- identifying and communicating with sources of assistance if difficulty is experienced with changes

Required knowledge

Required knowledge includes:

- features of common competitive operational practices, including:
 - JIT and kanban systems
 - preventative maintenance
 - 5S housekeeping
 - continuous improvement processes (e.g. kaizen)
 - waste (muda) elimination
 - formal problem solving procedures (e.g. RCA)
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation contacts and procedures relevant to work area
- employee assistance mechanisms in the organisation
- processes to develop work plans, including consideration of timetable, KPIs, training needs, OHS implications, contingency plans and responsibilities (the work plan must be capable of being coherently communicated to others)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify the competitive systems and practices used in their own work • identify changes to their own work flowing from the implementation of the relevant competitive systems and practices • implement changes • know when and how to seek assistance with work changes • make suggestions for improvements.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned,

	<p>currently being implemented, or implemented changes to work processes and procedures relevant to the assessee</p> <ul style="list-style-type: none"> • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using some combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of

the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Team</p>	<p>Team may include:</p> <ul style="list-style-type: none"> • work teams from all sections of an organisation, including production or other operational areas, maintenance, technical, administration/finance, and sales/marketing
<p>Change</p>	<p>The philosophy of continual improvement is that every</p>

	<p>process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality, and other aspects relevant to the process.</p> <p>Superimposed on this is the concept of breakthrough change when a large change/improvement is made which can shift the direction or operation of the organisation. Once such breakthrough change is the introduction of competitive operational practices.</p>
Work plan for change	<p>The work plan for change covers the designated work area and may include, depending on the organisation and work area processes:</p> <ul style="list-style-type: none"> • timetable • KPIs • training needs • OHS implications • contingency plans • responsibilities with team members and senior managers, engineers and other staff responsible for designing and/or implementing change
Issues and concerns	<p>Issues and concerns may be communicated formally and informally and may include:</p> <ul style="list-style-type: none"> • individual and group concerns • those expressed by and through industrial processes
Gathering and monitoring performance data	<p>Performance data may be gathered and monitored:</p> <ul style="list-style-type: none"> • manually by individual employees through charts, tally sheets or keypad/board entry • automatically through software, such as SCADA software, ERP systems, MRP and proprietary systems

MSS403032A Analyse manual handling processes

Modification History

New unit, superseding MSACMT432A Analyse manual handling processes - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to analyse manual handling in terms of its efficiency and safety.

Application of the Unit

This unit applies to an individual who is required to examine the manual handling component of a job and improve it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others or it may be for the person's own job.

This unit primarily requires the application of skills associated with problem solving, initiative and enterprise to identify safe and efficient manual handling, and planning and organising to ensure processes are implemented. This unit also requires communication with, and involvement of, others to ensure they understand the approach and to facilitate training.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess manual handling risks	1.1	Identify manual handling hazards in work area
		1.2	Assess risks arising from manual handling hazards
2	Analyse physical effort requirements of job	2.1	Determine basic manual handling requirements of job
		2.2	Analyse requirements in terms of components, such as lift, move, place and hold
		2.3	Analyse items to be handled in terms such as weight, size, shape or other hazards
3	Determine time/effort components of physical effort	3.1	Break required movement pattern down into movement components
		3.2	Determine time and effort requirements for movements
		3.3	Develop alternative movement patterns
		3.4	Determine time and effort requirements for alternative movements
		3.5	Determine handling aids required to assist movement
		3.6	Determine preferred movement pattern
4	Analyse the ergonomics of physical effort	4.1	Analyse the ergonomics of the preferred movement pattern
		4.2	Develop substitute movements for any movement which is not ergonomically sound
		4.3	Determine handling aids required to improve ergonomics of required movements
5	Optimise	5.1	Select movement patterns which are ergonomically

application of physical effort		sound and time and effort efficient
	5.2	Ensure all relevant people are trained to use these methods
	5.3	Ensure procedures and practices reflect the optimum methods
	5.4	Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others about work processes and jobs
- identifying ergonomically sound and unsound movements both at a general level and related to individual capability
- analysing manual handling processes
- working cooperatively with others
- demonstrating or arranging to have demonstrated ergonomically correct movements
- applying basic mathematics
- solving problems

Required knowledge

Required knowledge includes:

- relevant occupational health and safety (OHS) Acts and regulations as applied to manual handling
- principles of job and work method design as applied to efficient and safe movement
- principles of work analysis
- principles of ergonomics/safe movement
- aids that can assist with or substitute for manual handling

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • analyse manual handling requirements and risks in jobs • distinguish between ergonomically sound and unsound movement • analyse manual handling movements and risks for an individual • relate manual handling requirements to job efficiency.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using some combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence.

	<p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE)
--	---

	<ul style="list-style-type: none"> • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and Responsible Care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format
Manual handling hazards	<p>Manual handling hazards may include:</p> <ul style="list-style-type: none"> • loads that pose a risk of injury • ergonomically unsound movements • hazard requirements as defined by relevant OHS Acts and regulations, industry standards and best practice
Ergonomically unsound movements	<p>Ergonomically unsound movements may include:</p> <ul style="list-style-type: none"> • awkward and repetitive movements • carrying, pushing, pulling or lifting of heavy loads • carrying or movement against hard, sharp, slippery or other difficult to grasp loads <p>Ergonomically unsound movements should be assessed against the capabilities of individual workers as what is a sound movement for one worker may be unsound for</p>

	others depending on physique and individual condition
Ergonomically sound movements	<p>Ergonomically sound movements are movements which decrease the risk of injury. Sound movements will vary according to the load and individual. Examples include:</p> <ul style="list-style-type: none">• keeping loads close to the body and near the person's centre of gravity• using diagonal foot positions for lifting• moving loads at waist height rather than directly from the floor

MSS403051A Mistake proof an operational process

Modification History

New unit, superseding MSACMT451A Mistake proof a production process - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to make changes to own and others work in a work area which prevents errors and/or backsliding to a pre-improvement level of practice.

Application of the Unit

This unit applies to a person who needs to analyse a process that a team is responsible for and determine methods of mistake proofing it (e.g. ensuring it only produces product within an acceptable range or error-free transport and storage of goods). The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to mistake proof the production process in their area. After improvement activities have been undertaken these improvements need to be sustained.

This unit requires the application of skills associated information gathering and analysis. Initiative, enterprise and problem solving are also required to identify mistakes and determine strategies for eliminating them. This unit also requires communication and teamwork skills to ensure mistake proofing strategies are implemented and self-management and learning skills to continually reflect on and integrate feedback about the effectiveness of strategies.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse process	1.1	Identify sources of variability/non-conformance in the process
		1.2	Identify critical control points in process
		1.3	Analyse causes of variability/non-conformance
2	Develop preventative techniques/systems	2.1	Liaise with team members and other people to develop mistake proof options for performing operation
		2.2	Test and validate mistake proofing options
3	Implement permanent fix	3.1	Liaise with relevant people to have systems/procedures changed to implement solution
		3.2	Liaise with relevant people to implement the solution
		3.3	Liaise with relevant people to ensure self and others in the team or work area have an appropriate skills set
		3.4	Follow through to ensure implementation occurs
4	Monitor implementation	4.1	Critically observe the implementation
		4.2	Compare the results of the implementation against the expected outcomes
		4.3	Modify solution to improve outcomes

- 4.4 Ensure procedures reflect change
 - 4.5 Ensure training/assessment reflects change
 - 4.6 Audit change at agreed period/cycle
 - 4.7 Take action on any observed deviation
- 5 Seek improvements
- 5.1 Observe changes
 - 5.2 Analyse process again, if required, to ensure improvements are sustained

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with team or work group members, technical support personnel and other relevant staff
- explaining mistake proofing and related concepts
- facilitating input of others and encouraging acceptance of changes
- analysing and visualising operations in terms of flow and contribution to customer outcomes
- solving problems to determine root cause of errors and possible solutions
- analysing and interpreting information about errors and mistake proofing options in terms of cost, feasibility, regulations and value to the customer
- suggesting design changes to operations and products that eliminate the potential for errors
- suggesting mechanisms or procedures that warn of errors where operations cannot be designed to eliminate errors,

Required knowledge

Required knowledge includes:

- mistake proofing concepts, including, in priority order:
 - eliminate the possibility of the error via changes to the process
 - prevent the error from occurring via physical or virtual barriers
 - reduce likelihood of the error by encouraging correct action

- mitigate the impact of the error if it does occur
- understanding of processes undertaken by team
- factors in the processes which may cause variability
- methods of controlling the variability in the process
- mistake proofing methods relevant to the process/product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • analyse variability and non-conformances • identify, analyse and evaluate information from a variety of sources to identify errors and options for mistake proofing • facilitate implementation of mistake proofing activities that reduce waste • facilitate sustaining the mistake proofing activities.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace

	<ul style="list-style-type: none"> • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related
--	---

	<p>operations control systems</p> <ul style="list-style-type: none"> • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Mistake proofing</p>	<p>Mistake proofing is based on the concept of zero defects. The first priority is to eliminate the possibility of an error occurring. However, where this is not feasible mistake proofing can be used to reduce the occurrence of errors and/or to minimise their impact.</p> <p>Mistake proofing should target an error in the following priority order:</p> <ul style="list-style-type: none"> • eliminate the possibility of the error via changes to the process • prevent the error from occurring via physical or virtual barriers, • reduce likelihood of the error by encouraging correct action (e.g. through warning systems) • mitigate the impact of the error if it does occur <p>Mistake proofing is also called error proofing or baka-yoke or poka-yoke</p>
<p>Options for mistake proofing</p>	<p>Factors to consider when prioritising options for mistake proofing will vary according to the process and may include:</p> <ul style="list-style-type: none"> • success rate in eliminating errors

	<ul style="list-style-type: none"> • feasibility • skills required by employees • cost • capacity to reduce waste
<p>Procedures</p>	<p>Procedures may include:</p> <ul style="list-style-type: none"> • all work instructions • standard operating procedures • formulas/recipes • batch sheet • temporary instructions and similar instructions provided for the operation of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS404050A Undertake process capability improvements

Modification History

New unit, superseding MSACMT450A Undertake process capability improvements* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to make process capability improvements, including analysing data from the process, developing improvements to eliminate variation due to assignable causes, and then implementing actions.

Application of the Unit

This unit applies to a person who reviews a range of process capability data and information, makes/arranges for changes to be made to procedures, equipment or process and then recalculates the process capability and monitors resulting improvement actions. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to suggest and justify process capability improvements.

Process capability may have been determined using either a six sigma or three sigma processes. This unit applies to the application of statistical methods and the determination of capability based on those methods. Other related units may be *MSS404052A Apply statistics to operational processes* and *MSS404053A Use six sigma techniques*

This unit primarily requires the application of skills associated with communication, information gathering and analysis. Initiative, enterprise and problem solving are also required to identify opportunities to improve process capacity. This unit also requires aspects of self-management and learning to validate own analysis.

For a qualitative approach to improvement (one not using statistics) see *MSS403051A Mistake proof an operational process*.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

MSS404052A Apply statistics to operational processes

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Obtain required data	1.1	Identify process for study
		1.2	Obtain/organise process to obtain required data/information
2	Analyse information	2.1	Analyse data and determine assignable causes
		2.2	Develop possible improvements to eliminate assignable causes
		2.3	Incorporate own experience and learning into proposed process improvement proposals
		2.4	Develop process improvement proposals
3	Improve process capability	3.1	Obtain required authorities to implement improvements
		3.2	Liaise with relevant people to implement improvements
		3.3	Obtain/organise required data for improved process

- 3.4 Recalculate process capability
- 3.5 Implement revised data collection/processing and new capability information
- 3.6 Monitor improvement actions and make adjustments, as necessary

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing relevant mathematical operations
- identifying and using relevant statistical methods
- communicating and explaining data-related changes and procedures to individuals and groups
- negotiating with other employees and managers on proposed improvement actions
- analysing procedures and data to establish variation
- solving problems to root cause where assignable cause of variation is not obvious
- working in a team
- using computer software relevant to required analyses and process

Required knowledge

Required knowledge includes:

- data collection methods
- data processing techniques required
- variability and normal distribution
- three sigma or six sigma processes, as relevant
- random and non-random results (recognition of assignable causes)
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • analyse process information • calculate process capability/trial limits • improve process capability (or organise for it to be improved) • analyse revised process information and recalculate process capability.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence <p>In all cases it is expected that practical assessment will</p>

	<p>be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time
--	--

	<ul style="list-style-type: none"> • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Process capability	<p>Process capability is:</p> <ul style="list-style-type: none"> • the measurable ability of a process to reliably produce within calculated limits (the limits depend on the variation of the process)
Variation	<p>All processes have variation. The approach in this unit is to separate random variation (no assignable cause) from non-random variation (which has an assignable cause). By finding and eliminating assignable causes, total variation is reduced and process capability will be improved</p>
Six sigma	<p>Six sigma refers to:</p> <ul style="list-style-type: none"> • a statistical tool for recording defects and determining capability. Six sigma limits equate to 3.4 defects per million opportunities for each product or service transaction. Six sigma is also used as a general term covering a competitive systems and practices approach. Six sigma training typically covers several units of competency in this Training Package
Three sigma	<p>Three sigma refers to:</p> <ul style="list-style-type: none"> • a traditional statistical process control. Three sigma limits equate to 3 defects per thousand opportunities for each product or service transaction
Required data	<p>The calculation of three sigma or six sigma limits requires process data. The data required depends on the nature of the limits being calculated</p>
Assignable cause	<p>Any non-random variation is said to have an 'assignable cause'. The methods of data analysis common to statistical capability analysis as well as other methods of</p>

	root cause analysis should be used to determine the cause of this non-random variation
Improved process capability	<p>Improvements to process capability result from eliminating the causes of non-random variation. The improvements made may be:</p> <ul style="list-style-type: none"> • as a result of continuous improvement with the process capability being recalculated periodically • as a result of an improvement project with the process capability recalculated as part of that project
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other format

MSS404052A Apply statistics to operational processes

Modification History

New unit, superseding MSACMT452A Apply statistics to processes in manufacturing - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply statistical theory and principles to the analysis and control of processes and operations.

Application of the Unit

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

The unit includes applying knowledge of frequency distribution and variation to the data/chart to distinguish between random and non-random variation and assumes understanding of the process and/or equipment to help interpret those results.

This unit primarily requires the application of skills associated with gathering and analysing data and communicating statistical information to others. This unit also has a strong emphasis on problem solving, initiative and enterprise, planning and organising, and self-management to solve problems and manage processes.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Collect process data	1.1	Interpret sampling scheme
		1.2	Obtain measurements in accordance with standard procedures
		1.3	Handle data, as required
2	Interpret data	2.1	Plot data on appropriate control chart
		2.2	Distinguish between random and non-random patterns of results
		2.3	Identify results outside the control limits
		2.4	Recognise situations requiring action
		2.5	Take appropriate action in accordance with standard procedures
		2.6	Determine cost of non-conformance
3	Calculate control limits	3.1	Consult relevant stakeholders to determine appropriate limits
		3.2	Use relevant methods to calculate/revise control limits
		3.3	Plot limits on control chart
		3.4	Explain impact of limit to relevant stakeholders

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- applying a range of sampling procedures
- analysing samples and data for variation, relevance, reliability and representativeness
- problem solving the causes of variation in a process
- communicating with other employees to obtain samples/data and to explain results and limits
- plotting or documenting results
- undertaking calculations, including:
 - basic arithmetic functions
 - mean, range, mean of means, standard deviation (using appropriate calculation aids)
- using statistics to support process and operations control

Required knowledge

Required knowledge includes:

- sampling techniques
- purpose of sampling and measurement
- random, systematic and stratified sampling
- purpose of replication of data for statistical control
- samples, populations, finite and infinite populations and the differences
- methods of calculating means, standard deviations and the like and their purpose in statistical control
- the meaning of broad/narrow frequency distributions/range/standard deviations and skewed distributions in process terms
- concept of limits, including:
 - 1 sigma warning limits
 - 2 sigma warning limits
 - 3 sigma control limits
 - 6 sigma limits
- types of control charts and their applications to different types of process/product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process (e.g. measurement) causes of variation
- recognition of stable and unstable processes
- causes of stability/instability in the process

- calculation of control limits/process capability and the applications of different control limits
- the standard distribution curve and confidence limits

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • follow sampling procedures • apply basic statistical processes • analyse data to identify variations and non-conformances • plot or document results.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning

	<ul style="list-style-type: none"> • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen)
--	--

	<ul style="list-style-type: none"> • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Sampling scheme	<p>Sampling scheme may include:</p> <ul style="list-style-type: none"> • sampling for attributes or sampling for variables • batch, continuous or custom made products • number of items/samples • size of sample • timing of sampling • location of sampling points • type of sample • number/type of measurements to be done on each sample • sampling equipment • measurement/testing equipment/methods
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> • work instructions • standard operating procedures • formulas/ recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations <p>Procedures may be:</p> <ul style="list-style-type: none"> • written, verbal, computer-based or in some other

	format
Handle data	<p>Handle data may include:</p> <ul style="list-style-type: none"> • calculating means, ranges, mean of means and standard deviations (using appropriate calculation aids) • entering data into a software package • recording data either in writing or electronically • other required manipulations of the data
Control chart	<p>Control charts may include:</p> <ul style="list-style-type: none"> • run • tally • mean/range • attributes • other relevant charts
Random	Random variation is the term used in statistical control to refer to those variations for which no cause can be found
Non-random	Non-random (also called identifiable cause, assignable cause or special cause) are those variations for which a cause can be found and so the cause of the variation eliminated. Non-random variation may also be used to predict possible breaches of the control limits
Control limits	Control limits (also referred to as process capability) are those limits within which the process will operate if it is 'under control'
Cost of non-conformance	<p>Cost of non-conformance includes:</p> <ul style="list-style-type: none"> • reprocessing/rework • expediting • unplanned service • excess inventory • complaint handline • downtime • returns • scrap • labour costs • material costs • infrastructure costs/overhead • utility costs
Appropriate limits	Appropriate limits may include:

	<ul style="list-style-type: none">• 1 sigma warning limits• 2 sigma warning limits• 3 sigma control limits• 6 sigma limits

MSS404060A Facilitate the use of planning software systems in a work area or team

Modification History

New unit, superseding MSACMT460A Facilitate the use of planning software systems in manufacturing* - Not equivalent

* Prerequisite *MSACMT260A Use planning software systems in manufacturing* - removed

Unit Descriptor

This unit of competency covers the skills and knowledge required to facilitate the use of planning software in an organisation in a person's work area or team. These systems are known by various generic names, such as Enterprise Resource Planning (ERP), Materials Resource Planning (MRPII, MRP III etc.) or by proprietary names.

Application of the Unit

This unit applies to a person who will access the planning software system for their own work, but will also need to provide support and organise skill development programs for their team or work group members. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to facilitate the use of the planning software system.

The planning software system will be used routinely in the work of the team or work group.

This unit primarily requires the application of skills associated with using communication technology and supporting team use of planning software. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that planning software is used efficiently. This requires aspects of learning and self-management to ensure own performance and that of the team.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify scope of planning software	1.1	Identify categories of information held by planning software
		1.2	Identify information categories relevant to team and area processes
		1.3	Identify range of information able to be provided to planning software by team or work group
		1.4	Identify range of information able to be provided to team or work group by planning software
2	Communicate using the planning software system	2.1	Send and receive information using planning software
		2.2	Send and receive messages using planning software
3	Make decisions using planning software	3.1	Interrogate the planning software system to find required current, historical or predicted information
		3.2	Take actions appropriate to the information in accordance with procedures
4	Monitor the use of	4.1	Routinely monitor planning software information

planning software	4.2	Review performance and use of planning software with team
5 Support others to use planning software	5.1	Regularly communicate with team or other work group members, both using planning software and face to face
	5.2	Identify improvements required
	5.3	Take appropriate actions to implement improvements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- entering and receiving information via planning software terminals
- communicating with team and organisation planning software support personnel
- engaging and motivating team in use of planning software
- identifying team or work group area information requirements
- identifying scope of information relevant to team and area available in planning software by categories
- planning and organising improvements in team's use of planning software

Required knowledge

Required knowledge includes:

- hierarchy of planning software system and operation
- information available from/through the planning software system
- query facilities and information analysis capabilities offered by planning software
- support/training/skill development mechanisms available for access by team members

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • identify team or work group area information requirements and relate to planning software categories • lead and motivate others in using planning software • ensure information sent to planning software is accurate and appropriate • obtain regular and one-off information from planning software • make decisions using planning software generated information.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence.

	<p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, ERP systems, MRP and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time
---	---

	<ul style="list-style-type: none"> • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Planning software	<p>Planning software is a general term applied to a number of software systems which integrate a range of business information, such as:</p> <ul style="list-style-type: none"> • sales/order taking • finance/accounting • logistics • maintenance • human resources • production <p>It is frequently referred to by names such as ERP or MRP/MRPII. In some cases it can be integrated with engineering applications, such as SCADA systems. In such cases the unit MSS402061A Use SCADA systems in operations may also be required</p>
Information and messages	<p>Information and messages able to be sent and received via the planning software will vary between programs and organisations. This unit assumes that a range of discretion is available to the team leader over the information and messages that can be sent or received. Examples of information and message categories include:</p> <ul style="list-style-type: none"> • orders • production/operations processes • scheduling (e.g. daily/weekly) • finance and accounting • human resources (e.g. rosters, reserves, training completed and scheduled) • quality requirements • customers • suppliers

<p>Value stream</p>	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS404082A Assist in implementing a proactive maintenance strategy

Modification History

New unit, superseding MSACMT482A Assist in implementing a proactive maintenance strategy - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by a maintenance person to assist in the implementation of a proactive maintenance strategy in an organisation. This unit includes the interaction between a maintenance worker and operators, as appropriate.

Application of the Unit

This unit applies to a maintenance person in an organisation that has adopted or is implementing total preventative/productive maintenance (TPM), reliability centred maintenance (RCM) or similar strategies. As part of this, the maintenance person is expected to assist in the implementation by determining appropriate maintenance related schedules and also by providing maintenance related assistance to non-maintenance personnel, such as assisting production personnel to fulfil their role in the TPM/RCM strategy.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to analyse maintenance requirements. Communication, teamwork and planning and organising skills will be required to implement reliability strategies. This requires aspects of self-management to ensure improvement of own performance and learning.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Develop components of reliability strategy for a work/plant area	1.1	Determine manufacturer's recommended inspection, servicing and related schedules for relevant plant
		1.2	Consult with relevant people with regard to appropriate inspections, services and schedules
		1.3	Discuss any conflicts with relevant people and seek resolution of conflicts
		1.4	Develop schedules in liaison with relevant people
		1.5	Identify inspections and servicing which may be done by operations personnel in liaison with relevant stakeholders
2	Assess current practice for maintenance implications	2.1	Identify the overall equipment effectiveness (OEE) or other organisation targets for equipment/plant
		2.2	Evaluate procedures for plant/equipment reliability implications
		2.3	Discuss current practices with relevant people to determine any plant/equipment reliability implications
		2.4	Recommend changes to improve plant/equipment reliability in accordance with procedures
3	Assist in implementing the reliability strategy	3.1	Arrange for schedules to be incorporated in relevant work plans
		3.2	Identify training needs in discussion with relevant

- personnel
- 3.3 Assist personnel to develop required skills for inspections/servicing within scope of authority
 - 3.4 Collect data/information as required by own work plan
 - 3.5 Compare data/information with performance indicators
 - 3.6 Recommend improvements to reliability strategy in accordance with procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- explaining concepts and processes of chosen proactive maintenance strategy used by the organisation and distinguishing from traditional (breakdown) maintenance strategies
- communicating with operators, other maintenance personnel, team leaders and technical experts in a variety of situations and using different media
- adapting personal communication strategy to different levels of operator and team leader literacy and numeracy
- working in formal and ad-hoc teams to implement proactive maintenance
- solving problems to root cause
- planning proactive maintenance tasks to fit in with maintenance and production schedules and the needs of other staff
- assessing the ability of operations personnel with regard to inspections and servicing of equipment
- reading and interpreting charts and diagrams, manufacturer manuals and specifications and operating procedures

Required knowledge

Required knowledge includes:

- requirements of the proactive maintenance strategy being implemented
- operating principles and procedures for equipment/plant subject to proactive maintenance strategy
- purpose and processes for data collection in proactive maintenance strategies
- procedures relevant to own job and organisation implementation of proactive maintenance

- methods of making/recommending improvements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • source information from manuals and other technical documentation or software • effectively communicate with users on equipment operational and maintenance history • develop schedules for maintenance activities including seeking technical assistance, where appropriate • differentiate between proactive and traditional maintenance strategies.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation

	<ul style="list-style-type: none"> • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and
--	--

	<p>analysis</p> <ul style="list-style-type: none"> • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • OEE • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise, the work organisation, culture • regulatory environment and the industry sector
TPM	TPM is an application of total quality management to maintenance with the intention of increasing reliability, getting it right first time and increasing OEE
RCM	RCM moves maintenance from reactive, or even planned/programmed, towards a focus on uptime and OEE
Similar strategies	<p>Similar strategies may include:</p> <ul style="list-style-type: none"> • mean time between failure (MTBF) which is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing • failure mode and effects analysis (FMEA) which is a systematic approach that identifies potential failure modes in a system, product, or equipment based operations caused by either design or operation/process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring • industry sectors have highly adapted forms of FMEA

	<p>and which may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification. HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability</p> <ul style="list-style-type: none"> condition monitoring which often involves quite sophisticated monitoring of equipment, including such things as vibration monitoring, instrumental analysis of lubricating oil, and so on, to determine the current state of the equipment, monitor the change in this condition and predict when it needs servicing/maintenance to maintain reliability.
OEE	<p>OEE is the combination of the main factors causing loss of productive capacity from equipment/plant and is:</p> $OEE = \text{availability} \times \text{performance} \times \text{quality rate}$ <p>where:</p> <ul style="list-style-type: none"> availability takes into account losses due to breakdown, set-up and adjustments performance takes into account losses due to minor stoppages, reduced speed and idling quality rate takes into account the losses due to rejects, reworks and start-up waste
Uptime	<p>Uptime refers to the overall availability of the plant (it is the inverse of downtime) or the unavailability of the plant. Ideal uptime is 100%</p>
Inspection	<p>Inspection may include:</p> <ul style="list-style-type: none"> reading dials, gauges and meters observations, including those using sight, hearing, smell and feel observations of product quality/faults/rejects
Servicing	<p>Servicing may include:</p> <ul style="list-style-type: none"> cleaning lubricating topping up adjusting
Procedures	<p>Procedures may include:</p> <ul style="list-style-type: none"> work instructions standard operating procedures

	<ul style="list-style-type: none">• formulas/recipes• batch sheets• temporary instructions and similar instructions provided for the smooth running of the plant• good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care)• government regulations <p>Procedures may be:</p> <ul style="list-style-type: none">• written, verbal, computer based or in some other format

MSS405001A Develop competitive systems and practices for an organisation

Modification History

New unit, superseding MSACMS600A Develop a competitive manufacturing system - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop new strategies for competitive systems and practices or make improvements to existing systems and practices.

Application of the Unit

This unit applies to a manager, technical specialist or similar in an organisation implementing competitive systems and practices, or in an organisation wishing to embark on the competitive systems and practices path. The person needs to be able to analyse the needs of the organisation and develop strategies and systems for effective implementation and continuous improvement of competitive systems and practices in the organisation.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to determine effective competitive systems and practices strategies for the organisation. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|--|-----|---|
| 1 | Determine appropriate analytical techniques | 1.1 | Liaise with key stakeholders to determine objectives of operations strategy |
| | | 1.2 | Examine current operations to determine major areas requiring improvement |
| | | 1.3 | Compare possible strategies, techniques and tools against organisation needs |
| | | 1.4 | Select possible strategies, techniques and tools |
| | | 1.5 | Consult with key stakeholders to confirm selected strategies, techniques and tools |
| 2 | Develop competitive systems and practices strategies | 2.1 | Estimate benefit/cost ratio for major stakeholders and the value stream overall |
| | | 2.2 | Determine preferred operations strategy |
| | | 2.3 | Examine and adapt strategy to organisation needs and priorities |
| | | 2.4 | Examine and adapt competitive systems and practices techniques and tools required to implement strategy |
| | | 2.5 | Negotiate with key stakeholders to develop an implementation plan |
| | | 2.6 | Determine key information and performance indicators required |

3	Implement strategy	3.1	Determine data collection required
		3.2	Identify and evaluate methods of collecting and processing required data
		3.3	Determine hardware and other resources required
		3.4	Evaluate skill needs required
		3.5	Ensure all resources/training are available and completed
		3.6	Implement strategy
4	Monitor implementation of strategy	4.1	Compare information/performance indicators with desired levels
		4.2	Liaise with key stakeholders regarding strategy issues
		4.3	Identify areas requiring adjustment
		4.4	Make required adjustments

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- analysing current state/situation of the organisation and value stream, including appropriateness of strategy, operations and internal and external relationships, including value stream members
- determining appropriate key performance indicators (KPIs) and overseeing data collection
- selecting appropriate competitive systems and practices tools and techniques, such as:
 - value stream mapping
 - 5S
 - Just in Time (JIT)
 - mistake proofing
 - process mapping

- establishing customer pull
- kaizen and kaizen blitz
- setting of KPIs/metrics
- identification and elimination of waste
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- prioritising situations and actions based on:
 - customer benefit
 - cost/benefit analysis
- reviewing and modifying strategies and KPIs, as required

Required knowledge

Required knowledge includes:

- competitive systems and practices principles and tools, including:
 - value stream mapping
 - 5S
 - JIT
 - mistake proofing
 - process mapping
 - establishing customer pull
 - kaizen and kaizen blitz
 - setting of key performance indicators/metrics
 - identification and elimination of waste
- methods of estimating costs/benefits
- acceptable benefit/cost ratios
- continuous improvement principles
- principles of motivation and leadership
- characteristics and strengths of different types of strategies, techniques and tools, such as 5S, JIT, six sigma, lean operations and agile operations
- business goals sufficient to match the strategy to the business needs
- strategic thinking
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • determine appropriate analytical techniques • develop strategies that deliver the greatest overall benefit • implement the strategies • monitor the implementation of the strategy.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to</p>

	accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures
--	--

	<ul style="list-style-type: none"> • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Competitive systems and practices techniques and tools</p>	<p>Competitive systems and practices techniques and tools may include:</p> <ul style="list-style-type: none"> • value stream mapping • 5S • JIT • mistake proofing • process mapping • establishing customer pull • kaizen and kaizen blitz • setting of KPIs/metrics • identification and elimination of waste (muda) • standardisation
<p>Value stream</p>	<p>The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement.</p> <p>Depending on the operations and the customer requirement stages where value stream actions may occur include:</p> <ul style="list-style-type: none"> • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Modification History

New unit, superseding MSACMS603A Develop manufacturing related business plans - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop business plans in an organisation implementing competitive systems and practices.

Application of the Unit

This unit applies to a person in an organisation implementing competitive systems and practices (e.g. a production/plant manager, purchasing/technical officer or similar) who is required to develop a section business plan to meet the requirements of the overall strategic plan of the organisation. The plan includes the impact on the value stream and other critical competitive systems and practices factors. Due to competitive pressures this may be a reasonably frequent activity and can occur at any time over the business cycle. The plan may be in response to a specific change, or it may be a plan for the next period.

This unit assumes that up-to-date information about the organisation's role in the value stream is available. For detailed mapping and analysis of the value stream refer to MSS405002A Analyse and map a value stream.

This unit primarily requires the application of skills associated with gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to develop an effective and measurable business plan. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Determine purpose of plan	1.1	Confirm reason for developing plan and expected outcomes from plan
		1.2	Confirm purpose of plan with all relevant stakeholders
		1.3	Check expected outcomes from plan with overall strategic plan for organisation
		1.4	Identify any potential areas for conflict between proposed plan and strategic directions
		1.5	Negotiate with relevant stakeholders to resolve issues
2	Develop objectives and strategies	2.1	Draft objectives for business plan
		2.2	Draft strategies to achieve these objectives
		2.3	Determine implications for value stream
		2.4	Determine capital or workplace layout/organisation implications for objectives and strategies
3	Develop plans to meet objectives	3.1	Negotiate with relevant stakeholders over implications for objectives and strategies

and strategies	3.2	In liaison with relevant stakeholders, develop plans to meet objectives
	3.3	Determine relevant key performance indicators (KPIs) for plan
	3.4	Check KPIs are appropriate for purpose of plan
	3.5	Check plan will deliver planned purpose
	3.6	Map plan to changed value stream
	3.7	Adjust plan to optimise value stream
	3.8	Validate plan with relevant stakeholders
4	4.1	Release plan for implementation
Monitor the implementation of the plan	4.2	Check the key progress points against the key stages of the plan
	4.3	Note any discrepancies
	4.4	Take appropriate action to ensure correct implementation of plan

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- analysing organisation overall strategic plan for implications relevant to competitive systems and practices implementation
- determining appropriate KPIs and methods of data collection
- determining best means of gathering data, including data from monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary

systems

- identifying value stream members and performance
- determining implications of business plan for value stream
- analysing data, including competitive systems and practices indicators and verifying results with stakeholders
- determining key parameters for business plan, including:
 - scope
 - period
 - objectives in terms of customer benefit
 - relationship to overall organisation objectives
 - targets
 - KPIs
 - implementation strategy
 - risk management
 - monitoring and adjustment strategy
 - approval process

Required knowledge

Required knowledge includes:

- organisation strategic directions
- business planning methods and types of plans
- contingency planning and other risk mitigating planning tools
- the organisation's value stream
- analysis of value stream
- competitive systems and practices
- application of quality principles
- human resources and industrial relations
- occupational health and safety (OHS)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • develop a business plan that conforms to organisation
---	--

	<p>overall strategic directions</p> <ul style="list-style-type: none"> • determine implications of business plan for competitive systems and practices practice in organisation • determine KPIs appropriate for business plan • monitor the implementation of a business plan and make adjustments as necessary.

MSS405062A Develop a documentation control strategy for an organisation

Modification History

New unit, superseding MSACMT662A Develop a documentation control strategy for a manufacturing enterprise - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop and implement a documentation control strategy for an organisation implementing a competitive systems and practices strategy or which is part of the value stream for such an organisation. The documentation control strategy might be needed to comply with ISO9000 or other reasons.

Application of the Unit

This unit applies to an individual (who may be a manager, technical specialist or other person) in an organisation implementing a competitive systems and practices strategy who is required to develop and/or improve a system to ensure operations and related supporting documents are controlled in a manner which is appropriate for their use in the organisation.

This unit primarily requires the application of problem solving, initiative and enterprise, and planning and organising skills associated with developing effective documentation strategies. This work is done in the context of using computer technology and also requires aspects of self-management and learning to ensure improvement of own performance.

Licensing/Regulatory Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|---|
| 1 | Identify and obtain agreement to document management procedures and standards | 1.1 | Establish an appropriate working group of stakeholders |
| | | 1.2 | Agree on purpose and scope of document management standards, including interaction with production, maintenance, logistics, sales and marketing systems |
| | | 1.3 | Identify any relevant external standards, requirements and conventions |
| | | 1.4 | Agree on document control, tracking, updating and storage processes |
| | | 1.5 | Prepare document management processes and standards and circulate to relevant stakeholders |
| | | 1.6 | Negotiate any variations |
| 2 | Determine document style and establish standards and conventions | 2.1 | Consider potential document styles |
| | | 2.2 | Agree on document conventions and layout |
| | | 2.3 | Agree on standard symbols, abbreviations and similar |
| | | 2.4 | Produce a style sheet, document model or template, as appropriate |
| | | 2.5 | Check document style conforms to document management standards |
| | | 2.6 | Circulate to relevant stakeholders and negotiate any variations |

- | | | | |
|---|-------------------------------------|-----|---|
| 3 | Implement document control strategy | 3.1 | Develop a document control strategy and procedures, including arrangements for ongoing review of strategy |
| | | 3.2 | Establish mechanisms to check documents conform to the control strategy |
| | | 3.3 | Arrange for appropriate staff development |
| | | 3.4 | Monitor implementation of document control strategy |
| | | 3.5 | Make improvements to the documentation control strategy, as appropriate |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- leading and motivating a working group
- analysing scope and purpose of an organisation and matching to document control needs
- preparing briefings and arranging training for employees in document control strategy
- determining file management strategy for files from relevant computer applications which may include:
 - word processing
 - spreadsheets
 - databases
 - drawing and drawing linked applications e.g. computer aided drafting (CAD)/computer aided manufacturing (CAM)
- researching style manuals and other style reference materials for possible application to organisation style templates and guidelines
- using oral and written communication to convey broad and specialised information in a variety of media and formats

Required knowledge

Required knowledge includes:

- needs of the organisation and its' individuals
- word processing, spreadsheet and other software capable of producing files and documentation

- types of documentation used in organisations
- version and distribution control systems
- archiving systems
- document destruction systems
- legislative and regulatory requirements associated with documentation relevant to the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • identify and establish organisation goals and requirements for document control • access and use relevant external standards, requirements and conventions to determine implications for document control strategy • produce document control guidelines and procedures and verify for accuracy and suitability for application across organisation.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a</p>

	<p>combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems

MSS405070A Develop and manage sustainable energy practices

Modification History

New unit, superseding MSACMT670A Develop and manage sustainable energy practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. Areas covered include efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of enterprises.

Application of the Unit

This unit applies to an individual who is required to establish systems for improved energy practices in an organisation. The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and waste with the waste being further categorised into necessary waste and unnecessary waste. Strategies for eliminating or minimising energy waste are covered with benefit/cost analyses being required for strategies.

This unit primarily requires the application of communication and problem solving skills associated with collecting and analysing information. An ability to analyse energy use of technology or processes will be applied. Initiative and enterprise, and planning and organising are also required to develop plans for efficient energy use. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of processes.

Where the quantum of energy used is not easily available or a formal calculation of energy use is required through an energy balancing calculation (e.g. for regulatory purposes) the unit *MSS015011A Conduct a sustainability energy audit* may also be required.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse energy use	1.1	Identify all energy consuming processes
		1.2	Determine quantity and nature of energy consumed
		1.3	Analyse energy consumed and generated in different parts of the process
		1.4	Determine source of energy consumed in process
2	Develop energy conservation plans	2.1	Determine the efficiency of use of energy by all energy consuming processes
		2.2	Determine causes of low efficiency of use
		2.3	Develop plans for increasing the efficiency of energy use
		2.4	Determine benefit/cost of plans
3	Develop energy trading plans	3.1	Compare energy generating activities with energy consuming activities
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities

		3.3	Develop plans for energy trading
		3.4	Determine benefit/cost of plans
4	Investigate alternative sources of energy	4.1	Develop a specification for energy required
		4.2	Identify a range of sources for that energy
		4.3	Determine benefit/cost for alternative energy sources
5	Develop plans for more efficient energy use	5.1	Compare benefit/costs for different alternatives developed
		5.2	Rank proposals based on benefit/cost compare to limited resources
		5.3	Check proposals meet regulatory requirements
		5.4	Recommend proposals for improving energy efficiency
6	Implement selected plans	6.1	Liaise with relevant people to implement energy efficiency plans
		6.2	Follow through to ensure implementation occurs
		6.3	Monitor implementation and make adjustments, as required
		6.4	Check new energy usage to ensure improvements have occurred

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using common units, symbols and formulae common in energy-related calculations
- applying mathematics

- communicating with a variety of groups and individuals using different media
- solving complex problems individually and as part of a team
- reviewing range of existing data for suitability and determining where new data gathering is required
- planning and organising complex whole of organisation activities relating to energy use, including objectives, timelines, implementation procedures and monitoring strategy
- determining where energy balancing techniques are required
- accessing manufacturers' data and other sources of energy consumption for individual equipment and processes
- mapping processes and energy flows
- calculating, manipulating and interpreting numerical data
- ranking energy consumption and waste for area, sites or processes
- calculating the efficiency of use of energy by equipment and processes
- consulting with technical and operative staff on possible non-obvious energy wastes
- consulting and negotiating with stakeholders on implementation process for sustainability improvement

Required knowledge

Required knowledge includes:

- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- relevant regulatory/legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • gather appropriate data to allow energy analyses • categorise energy use into necessary use and waste • develop options for energy reduction including
--	---

	<p>presenting of alternatives and benefit/cost analyses</p> <ul style="list-style-type: none"> • develop strategies and plans for energy use and monitor implementation.
Context of and specific resources for assessment	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise
---	---

	<ul style="list-style-type: none"> the work organisation, culture, regulatory environment and the industry sector
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within operations, categories of waste include:</p> <ul style="list-style-type: none"> excess production and early production delays movement and transport poor process design inventory inefficient performance of a process making defective items activities which do not yield any benefit to the organisation or any benefit to the organisations customers
Necessary waste	<p>Necessary waste is:</p> <ul style="list-style-type: none"> any activity or cost which does not contribute directly to customer benefit/feature in the product, and which cannot be avoided (e.g. regulatory compliance and fixed costs). Necessary waste cannot be eliminated but should be managed
Unnecessary waste	<p>Unnecessary waste is:</p> <ul style="list-style-type: none"> any activity or cost which does not contribute directly to customer benefit/features in the product and can be avoided. Unnecessary waste should be eliminated as quickly as practical
Energy	<p>Energy includes:</p> <ul style="list-style-type: none"> all sources of energy used by the process be it electricity, gas or mobile transport fuel <p>The uses of the energy will also be potentially wide and include:</p> <ul style="list-style-type: none"> heating and cooling moving materials (e.g. pumps and conveyors) modifying materials (e.g. cutting, forming, weaving, knitting, reacting, moulding, extruding and mixing) generating pressure/vacuum or providing motive power for equipment and transport
Energy trading	<p>Energy trading means both formal trading where the organisation investigates alternatives to:</p>

	<ul style="list-style-type: none">• the buying of energy through alternative suppliers and tender processes• selling of excess energy produced by the organisation to energy companies or other producers and <ul style="list-style-type: none">• internal trading of excess energy from one area to an energy consuming area elsewhere in the organisation

Release 1 - New unit, superseding MSACMT675A Facilitate the development of a new product* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to facilitate the development of a new or evolutionary product within an existing range of products and encompasses design for manufacture, determining the process capability and the facilitation of its initial production.

Application of the Unit

This competency applies to an individual responsible for the development of a new product. The unit assumes an initial product design has been prepared by a designer and also assumes a working knowledge of all main processes and materials so that an informed choice can be made between them. The person will normally be a manager or technical expert and be required to work closely with a range of other management and operations personnel.

The unit requires balancing the business and technical sides of the new product and would typically be done as part of a cross-functional team. This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

MSS404052A Apply statistics to operational processes

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm design brief of new product in consultation with relevant people	1.1	Review product design with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements
		1.2	Determine any regulatory, industry code/intellectual property requirements for product
		1.3	Identify any required tooling, process or equipment needs
		1.4	Confirm design brief, including relevant drawings, to meet needs
		1.5	Determine design brief conforms to organisation objectives and capability
		1.6	Obtain approval on total design brief from all relevant personnel
2	Determine material requirements for product	2.1	Select appropriate materials or combination of materials/components in liaison with key stakeholders
		2.2	Determine material/component testing and evaluation regime required to meet product end use requirements,

- including regulatory/industry code requirements
- 2.3 Arrange for testing and evaluation of trial materials/components
 - 2.4 Guide material trial process and interpret material trial results
 - 2.5 Determine final materials/components specifications and details of value chain
- 3 Determine process requirements for product
 - 3.1 Select appropriate process to make product in liaison with key stakeholders and based on relevant factors
 - 3.2 Determine any special process/equipment requirements for this product
 - 3.3 Communicate with production personnel to determine any concerns and/or training or other needs
 - 3.4 Adjust the design, as required, to satisfy customer and production needs
- 4 Ensure process needs for new product have been met
 - 4.1 Liaise with equipment design/procurement personnel
 - 4.2 Interpret hardware specifications and ensure they are appropriate for the job required
 - 4.3 Liaise with process personnel to ensure appropriate draft procedures for new product have been developed
 - 4.4 Validate product cost and design meets organisation requirements and capability
- 5 Trial new product through the process
 - 5.1 Design trialing procedure to deliver required information
 - 5.2 Liaise with relevant stakeholders
 - 5.3 Ensure health safety and environment (HSE) requirements are observed
 - 5.4 Coordinate the trialling of the new product
 - 5.5 Interpret product trial results and guide product trial

- process
- 5.6 Tune process to optimise production of new product
- 6 Determine process capability
- 6.1 Plot appropriate statistical process control charts
- 6.2 Determine confidence limits
- 6.3 Compare confidence limits with product specification
- 7 Coordinate product trials
- 7.1 Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements
- 7.2 Arrange for testing and evaluation of trial product/prototype
- 7.3 Interpret product trial results and guide product trial process
- 7.4 Determine final product specification in liaison with key stakeholders
- 7.5 Make required changes to materials, process and equipment
- 8 Implement standard procedures for new product
- 8.1 Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to customer, regulatory and organisation requirements
- 8.2 Ensure process specifications are updated and reflect the optimised operation developed
- 8.3 Ensure standard operating procedures are correct for the new product
- 8.4 Ensure equipment and other hardware records are updated to reflect additions/changes
- 8.5 Ensure project records are complete and all required reports have been completed and submitted

8.6 Archive records according to company procedure

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- selecting and justifying the selection of:
 - type of material/material specification
 - appropriate process for a range of product/market applications
 - material and product testing procedures
- applying theoretical principles to predict:
 - properties of product based on materials selected
- identifying effects of processes and processing on the final properties of the product mathematically determine:
 - product cost estimates
 - process time
 - cost/benefit to organisation of new product
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- interpreting and making recommendations based on:
 - field test results
 - market analysis data
 - trialling data
 - organisation objectives and business plan
 - equipment and operations capacity

Required knowledge

Required knowledge includes:

- materials, equipment and process sufficient to choose an appropriate combination of materials and process to achieve the end use function of the product
- enterprise procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of their ability to:</p> <ul style="list-style-type: none"> • ensure the development of a new product meets general organisation guidelines and objectives • liaise with the required people • optimise the process for the new product at the completion of the development phase • assess materials and components characteristics required in a design including material grades and properties and the effects of processing on materials and components • use trial outcomes to determine standard procedures for manufacture and/or operation of new product.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of

	<p>contingencies, improvement scenarios, and so on)</p> <ul style="list-style-type: none"> • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S

PSPGOV521A Collect statistical data

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the process of developing a data collection plan and then collecting new data. It includes preparing for data collection, defining data requirements, preparing data collection tools for direct collection, conducting data collection using direct collection, conducting data collection from existing source/s and collating and organising information/data.

In practice, collecting statistical data may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, working safely, managing a project, undertaking research and analysis, etc.

This is one of 5 units of competency in the *Working in Government Competency Field* that deal with statistics. Related units are:

- PSPGOV520A Scope statistical data collection
- PSPGOV522A Process statistical data
- PSPGOV523A Interrogate and analyse statistical data
- PSPGOV524A Interpret data and related statistics
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for data collection	<p>1.1 The project/survey question is studied and where necessary clarified.</p> <p>1.2 <i>Expected data outputs</i> are defined in accordance with the project scope.</p> <p>1.3 Proposed technology is familiarised and customised where necessary.</p> <p>1.4 The population for the source of data is confirmed.</p> <p>1.5 The survey design (if necessary) is assessed for suitability.</p>
2. Define data requirements	<p>2.1 The accuracy requirements (precision) of the data to be collected are determined.</p> <p>2.2 The requirements of proposed information management system with regard to storage and processing of data are defined.</p> <p>2.3 Information requirements are defined and communicated to all staff involved in data collection.</p> <p>2.4 <i>Data sources</i> are identified and assessed for accessibility and reliability</p> <p>2.5 The type and extent of data required is defined.</p> <p>2.6 <i>Classification standards</i> are applied to the proposed data.</p>
3. Prepare data	<p>3.1 Data collection methods and techniques are clearly defined</p>

ELEMENT	PERFORMANCE CRITERIA
collection tools for direct collection	<p>relative to data requirements.</p> <p>3.2 The optimum method for gathering the proposed data is identified after research of alternatives has occurred.</p> <p>3.3 The <i>survey vehicle</i>/questionnaire is designed in conjunction with a suitably qualified person.</p> <p>3.4 The survey vehicle is tested and evaluated.</p>
4. Conduct data collection using direct collection	<p>4.1 The proposed <i>sampling</i> frame is identified and/or constructed.</p> <p>4.2 A sample is selected and a pilot study implemented.</p> <p>4.3 Re-evaluation of the proposed survey design is undertaken based on the results of the pilot study.</p> <p>4.4 The main survey is conducted according to accepted professional and/or organisational standards.</p> <p>4.5 Opportunities are taken to establish and maintain contacts with those who may provide useful information, with due consideration of respondent burden.</p>
5. Conduct data collection from existing source/s	<p>5.1 Data for the project is sourced.</p> <p>5.2 A range of statistics necessary for the project is identified in conjunction with a suitably qualified person.</p> <p>5.3 Sources of information are regularly reviewed for usefulness, reliability and cost.</p> <p>5.4 Channels and sources of information are used effectively in accordance with organisational standards.</p>
6. Collate and organise information/data	<p>6.1 Statistics are identified to support the project question.</p> <p>6.2 Data is researched and/or collated from sources in accordance with <i>legislation, policy and guidelines</i>.</p> <p>6.3 Data is collated electronically.</p> <p>6.4 The accuracy and appropriateness of data are evaluated.</p> <p>6.5 Data is recorded in the desired format in accordance with professional, organisational and project requirements.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to statistical data collection

- deciding which survey method to use
- designing questionnaires
- using a range of communication methods including consultation, establishing and maintaining contacts
- reading information and data requirements
- writing survey questions that are unambiguous and reflect intended meaning
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of statistical data collection

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to statistical data collection
- legislation and policies governing privacy and confidentiality
- the advantages and disadvantages of different data sources
- the differences between census and survey data
- the importance of identifying a good frame
- the quality of the statistics and for what purpose the data can be used
- the limitations of the statistics used
- different data collection methodologies and how they affect results
- data collection and sampling methodologies
- the effects of non-response on survey estimates
- the impact of types of errors
- national and international classification standards
- information management systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of statistical data collection

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV520A Scope statistical data collection
- PSPGOV522A Process statistical data
- PSPGOV523A Interrogate and analyse statistical data
- PSPGOV524A Interpret data and related statistics
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPPM502B Manage complex projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- collection of statistical data in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the collection of statistical data
- case studies and workplace scenarios to capture the range of situations likely to be encountered when collecting statistical data

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when collecting statistical data, including coping with difficulties, irregularities and breakdowns in routine
- collection of statistical data in a range of (3 or more) contexts (or occasions, over time) where contexts may include data collection via both primary and secondary sources.

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

<i>Expected data outputs</i> may include:	<ul style="list-style-type: none"> • variable names • attributes
<i>Data sources</i> may include:	<ul style="list-style-type: none"> • Australian Bureau of Statistics data • government agency sources
<i>Classification standards</i> may include:	<ul style="list-style-type: none"> • national and international definitions for collating and coding information
<i>Survey vehicle</i> may include:	<ul style="list-style-type: none"> • opinion polls • mail-out questionnaires • computer-aided telephone interviewing (CATI) • face-to-face interviews
<i>Sampling methods</i> may include:	<ul style="list-style-type: none"> • simple random sampling • systematic sampling • multi stage sampling
<i>Legislation, policy and guidelines</i> may include:	<ul style="list-style-type: none"> • State/Territory and Commonwealth legislation and regulations such as:

	<ul style="list-style-type: none">• public sector management acts• financial management acts• privacy legislation• equal employment opportunity and anti-discrimination legislation• occupational health and safety legislation• ethics and accountability standards• public sector standards• risk management standards• fraud control standards• government security standards• knowledge management standards• organisational policy, procedures and protocols

1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the interpretation of policy and the management of the policy implementation process. It includes interpreting and communicating the requirements of policy, and policy implementation.

In practice, the management of policy implementation occurs in the context of other generalist and specialist work activities such as managing change, managing diversity, managing workplace safety, managing the delivery of client services, managing risk, directing the management of contracts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and communicate requirements of policy	1.1 The expected outcomes of policy implementation are identified and explained to staff in a manner suited to their levels of understanding, experience and <i>specific needs</i> .
	1.2 <i>Policy</i> is interpreted relative to workplace responsibilities and accountabilities.
	1.3 The impact on <i>work activities</i> of policy implementation is communicated to staff.
	1.4 Staff are assisted with the interpretation of policy and its application to their work.
	1.5 Policy and its implications are explained to other stakeholders using language and materials to suit their current level of knowledge, experience and specific needs.
2. Implement policy	2.1 Potential or impending policy changes are identified and strategies are prepared to accommodate and communicate those changes
	2.2 Work plans are prepared in consultation with staff and management to ensure that policy is implemented as intended.
	2.3 Staff performance is monitored to ensure that it complies with policy and corrective action is taken as necessary.
	2.4 Staff are assisted in adjusting to changes in accordance with their needs and experience.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- interpreting complex and formal documents such as policy and legislation, and assisting others to apply them in the workplace
- using communication to suit different audiences
- responding to diversity, including gender and disability
- accessing legislation and codes of ethics electronically or in hard copy
- preparing work plans requiring attention to detail and the interpretation and application of complex language and/or concepts
- providing leadership to the workgroup in the interpretation and implementation of policy
- identifying and addressing the environmental and occupational health and safety implications of the policy/s to be implemented

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- range and type of policies relating to the public sector
- public sector code/s of ethics and code/s of conduct
- organisation and government procedures
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being implemented

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre -requisite* units that must be achieved prior to this unit: *Nil*
- *Co -requisite* units that must be assessed with this unit: *Nil*
- *Co -assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPMNGT604B Manage change
 - PSPMNGT605B Manage diversity
 - PSPMNGT606B Manage quality client service
 - PSPMNGT608B Manage risk

- PSPOHS602A Manage workplace safety
- PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of policy implementation in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- relevant policy and legislation
- public sector standards, procedures and protocols
- policy guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing the implementation of policy, including coping with difficulties, irregularities and breakdowns in routine
- management of policy implementation in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects

- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Specific needs may include:

- educational level
- preferred language
- literacy or numeracy
- cultural background
- ethnicity
- gender
- preferred interpersonal approach
- physical ability
- thinking/learning styles
- work experience
- working styles

Policy may include:

- government policy
- organisation policy

Work activities may include:

- processes
- outcomes
- priorities
- client services
- core business
- service delivery mode/s
- organisational structure

PSPREG603A Manage and lead inspection and monitoring programs

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the requirements to manage and lead inspection and monitoring activities in accordance with relevant Acts and regulations.

Typically work is at an experienced, self-directed level with responsibility for outputs and quality improvement. It includes determining inspection and monitoring program requirements, managing and leading inspection and monitoring programs, and managing reporting systems, information and training.

In practice, managing and leading inspection and monitoring programs may overlap with other generalist or specialist public sector workplace activities such as managing compliance with legislation, managing diversity, managing risk, networking, implementing policy, managing client service, managing resources, etc.

This unit is one of five units in the *Regulatory Competency* field that deal with inspection and monitoring. Related units are:

PSPREG201A Carry out inspections and monitoring under guidance

PSPREG301A Undertake routine inspections and monitoring

PSPREG413A Undertake inspections and monitoring

PSPREG503A Supervise and carry out complex inspection

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine inspection and monitoring program requirements	<p>1.1 Outputs and performance indicators for programs, and <i>inspection and monitoring</i> responsibilities are determined in accordance with organisational requirements.</p> <p>1.2 Strategic, operational, technical, financial and administrative requirements are determined in accordance with organisational and task requirements.</p> <p>1.3 Operational and procedural assessments are undertaken in accordance with organisational policy and procedures and recommendations are made for quality improvement.</p> <p>1.4 <i>Legislation</i> and regulations are interpreted and recommendations are made on related policies and procedures.</p> <p>1.5 Risk management practices, occupational health and safety and environmental requirements are interpreted and explained to staff in accordance with their needs.</p>
2. Manage and lead inspection and	<p>2.1 Leadership is provided and <i>individuals</i> are assisted to deliver agreed outputs in accordance with the organisation's business</p>

ELEMENT	PERFORMANCE CRITERIA
monitoring programs	<p>requirements.</p> <p>2.2 <i>Inspection and monitoring</i> programs are managed and program performance, resources and expenditure are supervised in accordance with organisational requirements.</p> <p>2.3 Policy and procedures are developed for dealing with non-compliance through information, development/extension activities and prosecution in accordance with organisational requirements.</p> <p>2.4 <i>Compliance programs</i> are managed as required in accordance with set procedures and timelines.</p> <p>2.5 Implementation of the performance management system for inspection/monitoring staff is managed in accordance with organisational policies and procedures.</p> <p>2.6 Legislative requirements, risk management practices, occupational health and safety and environmental procedures are enforced in accordance with organisational requirements.</p>
3. Manage reporting systems, information and training	<p>3.1 <i>Records</i> management and reporting systems are managed in accordance with organisational policy and performance indicators.</p> <p>3.2 <i>High-level correspondence and advice</i>, submissions and reports are prepared in accordance with organisational requirements.</p> <p>3.3 Evidence is prepared in accordance with organisational policy and procedures for legal action under relevant legislation.</p> <p>3.4 Inspection/monitoring training is monitored and initiatives to improve staff performance are developed and implemented in accordance with organisational requirements.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- demonstrating leadership and performance management in the context of inspection and monitoring
- undertaking risk management and problem solving
- communicating with a diverse range of clients and staff
- responding to diversity, including gender and disability

- writing reports, submissions and Ministerial correspondence, requiring discretion and judgment to determine content and style audience approach
- dealing with referrals from other staff on matters that are more difficult, or of potential interest to external parties such as the media, public, political parties etc
- using computers for word processing and records management
- applying public sector legislation such as occupational health and safety and environment in the context of inspection and monitoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- interpretation, application, evaluation and review of enabling legislation and regulations
- performance and procedural assessment strategies
- performance indicators
- organisational policy and procedures
- inspection procedures
- monitoring procedures
- responses to complex/serious non-compliance
- elements of an offence
- rules of evidence
- equity and diversity principles
- workplace and industry environment
- public sector legislation including occupational health and safety, environment, privacy etc

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC601B Maintain and enhance confidence in public service
 - PSPLEGN601B Manage compliance with legislation in

the public sector

- PSPGOV602B Establish and maintain strategic networks
- PSPMNGT602B Manage resources
- PSPMNGT605B Manage diversity
- PSPMNGT606B Manage quality client service
- PSPMNGT608B Manage risk
- PSPPOL603A Manage policy implementation
- PSPREG601B Manage regulatory compliance
- PSPREG602B Evaluate regulatory compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- performance at an experienced, self-directed level in managing and leading inspection and monitoring programs undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to inspection and monitoring
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing and leading inspection and monitoring programs

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing and leading inspection and monitoring programs, including coping with difficulties, irregularities and breakdowns in routine
- performance at an experienced, self-directed level in managing and leading inspection and monitoring programs undertaken in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Inspection and monitoring

may include:

- inspections/examinations
- monitoring
- surveillance
- audits
- remote monitoring
- other compliance assurance activities

Legislation may include:

- Commonwealth legislation and regulations, for example:
 - Commonwealth Quarantine Act 1908, proclamations and regulations
 - Crimes Act 1914 and Criminal Code Act 1995
 - Customs Act 1901 and regulations
 - Wildlife Protection Act 1982
 - Export Control Act 1982

- Imported Foods Act 1996
- Occupational Health and Safety Act 1988
- State, Territory and Local Government legislation and regulations, such as those relating to:
 - agriculture
 - horticulture
 - conservation and land management
 - fisheries
 - environmental protection
 - building
 - water
 - emergencies
 - international legislation/codes of behaviour

Individuals may include:

- inspection/monitoring staff
- other supervised staff
- contract workers
- consultants
- service providers
- super-ordinates
- clients
- members of the industry
- members of the public
- personnel from other government departments

Inspection and monitoring activities may relate to:

- aircraft
- airfreight
- animal products
- animals
- cargo
- cereals
- collection of biological specimens
- disposal of organic waste
- fresh produce
- goods
- land condition, such as:
 - topography
 - salinity
 - erosion
 - weed infestation
 - vermin infestation

- fire hazard
- over grazing
- land improvements, such as:
 - fences
 - buildings
 - sporting or playground equipment
 - irrigation infrastructure
 - sewerage infrastructure
 - waterfront occupations
 - community structures
 - land usage
- leases and other tenures, to ensure compliance with conditions
- licence/permit compliance (e.g. vegetation clearing)
- live fish
- livestock
- mail
- mineral samples
- passenger baggage
- people
- pests
- plant products
- plants
- premises
- properties
- reserves and their use/s
- survey activities to maintain readiness for district emergency plans
- vector monitoring
- vessels
- audit
- monitoring
- treatment
- containment
- control
- eradication
- destruction
- notes
- case files

Compliance programs
may include:

Records may include:

***High-level
correspondence and
advice*** may include:

- statistics
- forms (application forms, disease notification forms)
- notices (seizure notice, infringement notice)
- invoices
- receipts
- input to policy reviews
- input to legislation/regulations
- support to senior management
- Ministerials

PUACOM012B Liaise with media at a local level

Modification History

Release	TP Version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V2	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the liaison with media at a low level incident and providing information about local events.

Application of the Unit

This unit applies to workers of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine media requirements	<p>1.1 <i>Organisational protocols</i> are followed when <i>liaising with the media</i>.</p> <p>1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate.</p> <p>1.3 <i>Operational responsibilities</i> are balanced against the provision of information to the <i>media</i>.</p>
2. Provide information to the media	<p>2.1 A positive image of the <i>organisation</i> is maintained when liaising with the media.</p> <p>2.2 Every opportunity is used to promote the organisation, its services and personnel.</p> <p>2.3 <i>Relevant and succinct information</i> is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media.</p>
3. Publicise an event	<p>3.1 Relationship is established with media contacts.</p> <p>3.2 <i>Event</i> details and support materials are gathered and presented in a logical, relevant and concise manner to the media.</p> <p>3.3 Information provided to media is recorded and maintained.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to

media

- public speaking
- retaining professionalism under duress

Required Knowledge

- organisational protocols relating to media liaison, for example legal and organisation requirements relating to:
 - confidentiality
 - libel
 - accuracy
 - discrimination
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
 - newspapers
 - magazines
 - radio
 - television (local, regional, national media)
- communication skills
- establishing media relationship

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Organisation*** may include
- Fire
 - Police
 - State Emergency Service
 - Emergency Management

- Organisational protocols*** may include
- organisational policies and procedures
 - personal presentation being as neat as possible considering the operational circumstances
 - ensuring media liaison person is fully briefed and prepared
 - acknowledge support of other organisations
 - seeking advice from headquarters where appropriate
 - limiting comments on role of own service
 - relevant Federal and State legislation and regulations

- Liaising with the media*** may include
- print (local, community, daily newspapers, magazines)
 - television (live or pre-recorded)
 - radio (live or pre-recorded)

- Operational responsibilities*** may include
- preservation of life and property, which is the principal concern to all public safety personnel
 - presenting information relevant to the public

- Event*** may include
- long service to organisation
 - medal presentation
 - awarding of certificates
 - donations/sponsorships/fundraising
 - recruiting
 - new equipment
 - VIP visit
 - open day
 - training
 - unusual rescues
 - self help information

- Media's potential interest*** may include:
- enormous media event
 - standard report
 - human interest
 - in the public's interest

- Media's requirements*** may include:
- deadlines
 - capabilities

- visual and verbal requirements
- types of medium
- variation
- journalists
- amenities
- briefing area
- access to media liaison person
- bilingual personnel and bilingual information

Media may include:

- representatives from mainstream, community and ethnic television
- print and broadcast media

Organisational positive image may include:

- promote the relevance and efficiency of the service
- report the facts
- heroism of personnel
- organisational personnel are co-operative and responsive
- organisational personnel well presented
- handling media in most positive manner in even the most adverse conditions/circumstances

Media opportunity may include:

- opportunity to promote the services
- provide educational information to the public
- airplay

Relevant and succinct information may include:

- information that according to protocol is available for public release
- report facts and avoid speculation
- do not supply classified information
- use language that can be readily understood by all to avoid misinterpretation

Where ***bold italicised*** text is used, further information is

of Competency.

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect response equipment	<p>1.1 Equipment is <i>inspected</i> in accordance with <i>organisation's procedures</i>.</p> <p>1.2 Missing parts are identified and reported according to organisation's procedures.</p> <p>1.3 Faulty or damaged equipment is reported and recorded in accordance with organisation's procedures.</p>
2. Test response equipment	<p>2.1 Equipment is tested according to approved procedures and is fit for purpose according to <i>organisation's standards</i>.</p> <p>2.2 Test results are <i>recorded</i> according to regulatory and organisation's requirements.</p> <p>2.3 Defective equipment and sub-standard performance is reported and recorded according to organisation's procedures.</p>
3. Clean, maintain and restow equipment	<p>3.1 Equipment is cleaned, maintained, assembled and stowed according to organisation's procedures.</p> <p>3.2 Equipment records are updated according to organisation's procedures.</p> <p>3.3 Equipment is recovered, restowed and made ready for future use.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- comply with material safety data sheets
- inspect equipment according to organisation's procedures
- safely use cleaning agents and chemicals
- service and clean equipment according to organisation's procedures
- test equipment according to organisation's procedures

Required Knowledge

- identification of equipment
- occupational health and safety policy relevant to the maintenance, servicing and testing of equipment
- organisation's policies and procedures concerning the use, testing, cleaning and servicing of response equipment
- relevant parts of environmental legislation relating to waste water run off/pollution
- safe working practices when maintaining, servicing and testing equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence can be demonstrated in organisational procedures for inspection testing, cleaning and servicing of response equipment.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency must be assessed in the context of applying organisation's procedures to equipment used in the workplace.

Specific resources for assessment

Access to relevant equipment is required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational procedures may include:

- regulatory requirements
- equipment manufacturer's specifications and procedures
- Australian Standards
- industry practices
- occupational health and safety requirements

Organisational procedures

may be specified in:

- maintenance schedules
- operational directives
- organisation's procedures
- manufacturer's manuals
- operations manuals
- quality system documentation
- induction documentation
- workplace notices
- operator's manual

Reporting/recording

procedures may include:

- Verbal
- record sheets or books
- computer data bases
- card systems
- microfiche systems
- maintenance schedules

Organisation's standards

may include:

- Australian Standards
- state/territory or federal standards
- industry standards
- manufacturer's procedures
- international standards

Response equipment may include:

- ropes
- hand tools
- hoses
- branches and nozzles
- ladders
- pumps
- rescue tools
- salvage tools
- protective clothing and equipment
- breathing apparatus
- forcible entry tools
- portable fire extinguishers
- drip torches
- maps
- powered equipment
- organisational specialist equipment
- chainsaws
- communications equipment
- knapsacks
- lighting equipment
- first aid equipment
- pumps

- equipment required to undertake specific function such as compressor, generator, hydraulic pump
- audible warning systems such as sirens, horns
- visual warning systems such as lights
- light crystal display signs
- Global Positioning Systems
- vehicle tracking systems
- navigational systems

Inspection may include:

- visual, auditory and tactile inspection to identify possible operational failure of motorised equipment or seizure or physical failure of equipment

Maintenance may include:

- lubrication checks
- pressure checks
- fuel and water checks
- flow rate checks
- sharpening
- cleaning
- flushing

Faulty/damaged equipment may include:

- inoperative
- not fit for purpose
- operates ineffectively
- defects
- anomalies
- not clean
- physical damage

PUAFIR203B Respond to urban fire

Modification History

Release	TP Version	Comments
2	PUA12 V2	Unit Descriptor expanded Application of the Unit added Some Performance Criteria made more explicit Range statements revised Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency for responding to an urban fire where offensive and defensive strategies are used, when working as a member of a team, under direct supervision.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR207B Operate breathing apparatus open circuit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

- | | |
|---|--|
| <p>1. Proceed to fire</p> | <p>1.1 Information received about the location and <i>type of fire</i> is recorded in accordance with organisational requirements.</p> <p>1.2 Appropriate <i>personal protective clothing and equipment</i> is donned in accordance with organisational procedures.</p> <p>1.3 Most effective route to the fire is identified.</p> |
| <p>2. Prepare extinguishing media and/or equipment for use</p> | <p>2.1 <i>Water supplies</i> at the incident to support firefighting are located.</p> <p>2.2 <i>Equipment</i> to access and supply water to the firefighting operations is identified and assembled in accordance with organisational procedures.</p> <p>2.3 Nominated <i>extinguishing media</i> and/or equipment is identified, obtained and/or accessed.</p> <p>2.4 Extinguishing media and equipment are used in accordance with manufacturers' specifications and organisational procedures.</p> |
| <p>3. Enter the structure</p> | <p>3.1 <i>Hazards</i> are identified, monitored and controlled in accordance with organisational procedures.</p> <p>3.2 Personal protective clothing selected is appropriate to the hazards.</p> <p>3.3 Organisational breathing apparatus (BA) procedures and safe work practices are followed.</p> <p>3.4 Structure is entered in accordance with organisational procedures and safety practices.</p> <p>3.5 Safe paths of access and egress are identified and maintained at all times.</p> <p>3.6 Life is protected and damage to property and the environment is minimised in accordance with organisational procedures.</p> |

4. **Conduct search and rescue**
 - 4.1 Systematic primary and secondary searches are conducted.
 - 4.2 Rooms are searched and marked in accordance with organisational procedures.
 - 4.3 Casualties are located, *assisted* and rescued in accordance with organisational procedures.
 - 4.4 Fatalities are located and protected in accordance with organisational procedures and relevant legislation.
 - 4.5 All persons are accounted for and information is communicated to Incident Controller.
5. **Combat fires**
 - 5.1 Personal safety is maintained at all times in accordance with organisational procedures and workplace health and safety guidelines.
 - 5.2 Organisational *firefighting objectives, strategies and tactics* are received, confirmed and implemented as directed.
 - 5.3 *Firefighting considerations* are taken into account when implementing tactics.
 - 5.4 Equipment and extinguishing media used to combat the fire are appropriate to the class of fire and support operational procedures.
 - 5.5 Firefighting equipment is positioned to achieve maximum effect in suppressing the fire, protecting exposures and preserving evidence of fire cause.
 - 5.6 Extinguishing media is applied using appropriate application techniques.
 - 5.7 Fire suppression techniques applied minimise hazards to occupants trapped or lost within the structure.
 - 5.8 Communications with other team members and supervisor are maintained throughout the incident.
6. **Observe and react to changes in conditions and fire behaviour**
 - 6.1 *Changing conditions at the fire* are observed and their effects on fire behaviour are noted and reported.
 - 6.2 *Evidence of changing conditions at the fire* are reported
 - 6.3 Firefighting tactics are adapted to meet changing conditions and fire behaviour.
7. **Participate in ancillary operations**
 - 7.1 *Ancillary activities* to complement firefighting operations and prevent further damage to the structure and its contents are undertaken.
 - 7.2 Water run off from fire is monitored and conditions

- reported to supervisor.
- 7.3 Risk and/or damage to the environment at the incident is minimised or avoided through appropriate firefighting and ancillary activities.
- 8. Conclude firefighting operations**
- 8.1 Firefighting equipment is collected and stowed at the incident.
- 8.2 Incident scene is made safe for the public.
- 8.3 Defective or missing equipment is identified and reported.
- 8.4 Assistance is given to complete and *record appropriate incident information.*

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply extinguishing media to the fire
- control fire environment by cooling fire gases
- implement search and rescue procedures
- move in smoke and darkness
- obtain water from reticulated/static water supplies
- operate a branch
- operate a fire extinguisher
- use BA and BA equipment
- use structural entry techniques

Required Knowledge

- BA procedures
- basic signs of fire cause and activities for protecting evidence
- behaviour of a building/structure in a fire
- extinguishing media
- fire behaviour
- fire ground signals (audible and visual)
- fire tetrahedron
- firefighting foams
- firefighting tactics, techniques, and procedures
- hazards
- identification of various building types including structural elements and materials, causes and signs of structural failure

- map reading
- methods of heat transfer
- natural ventilation procedures
- organisational procedures
- portable fire extinguishers
- principles and methods of extinguishment
- procedures for working with ladders, ropes, lines and tying knots
- safe work practices
- salvage and overhaul
-

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- identify different construction types and their behaviour in fire
- identify signs of structural collapse
- apply firefighting tactics
- select and use appropriate personal protective clothing
- select and use firefighting equipment
- implement actions in the workplace to avoid the risk of injury
- implement BA procedures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job and/or in a range of simulated environments.

Specific resources for assessment

Access is required to:

- range of controlled or simulated fires
- firefighting equipment
- extinguishing media
- Breathing apparatus and associated equipment

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

•

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Types of fire</i> must include:	<ul style="list-style-type: none"> • fires involving dangerous goods and/or hazardous substances • mobile property • non-structures • structures
<i>Personal protective clothing and equipment</i> must include:	<ul style="list-style-type: none"> • breathing apparatus • eye protection • hearing protection • turnout uniform and gloves
<i>Water supplies</i> must include:	<ul style="list-style-type: none"> • open • reticulated • static
<i>Equipment</i> must include:	<ul style="list-style-type: none"> • BA and control equipment • branches, nozzles and monitors • fire extinguishers • forcible entry tools • hoses and hose fittings • ladders and rope lines

	<ul style="list-style-type: none"> portable lights radios salvage gear standpipes, hydrants and booster connections small gear and ancillary equipment
and may also include:	<ul style="list-style-type: none"> other fire extinguishing substances
<i>Extinguishing media</i> must include:	<ul style="list-style-type: none"> extinguishing powder foam gaseous extinguishing agents water
<i>Hazards</i> may include:	<ul style="list-style-type: none"> electricity, including photovoltaic generation gas hazardous products and materials industrial (machinery, equipment, products) smoke, darkness and heat structural collapse structural hazards unauthorised personnel
<i>Assisted</i> may include:	<ul style="list-style-type: none"> first aid handing over to ambulance, medical care or other organisation protecting from the elements providing refreshments
<i>Firefighting objectives</i> must include:	<ul style="list-style-type: none"> confining the spread of fire extinguishment protecting exposures rescuing occupants salvage and overhaul ventilation
<i>Fire strategies</i> must include:	<ul style="list-style-type: none"> defensive mode direct attack indirect attack offensive mode
<i>Firefighting tactics</i> must include:	<ul style="list-style-type: none"> cooling the fuels excluding oxygen interrupting the chemical chain reaction removing fuels ventilation
<i>Firefighting considerations</i>	<ul style="list-style-type: none"> available firefighting resources

must include:	<ul style="list-style-type: none"> • extinguishing media • fire exposures • indications of extreme fire behaviour • signs of structural collapse • size of fire • stage of fire development • topography • type of fire • weather
<i>Firefighting activities</i> must include:	<ul style="list-style-type: none"> • anticipating fire behaviour • applying extinguishing media • applying techniques to maximise the effect and minimise the damage • ensuring safety • hose stream techniques • locating and accessing the fire • protecting and notifying supervisor of evidence of fire cause • search and rescue
<i>Changing conditions at the fire</i> may include:	<ul style="list-style-type: none"> • increase/decrease in fuel available to fire • increase/decrease in heat of fire • increase/decrease in oxygen available to fire • impending structural collapse • other materials becoming involved in fire • fire spread • flame colour and size • increase in heat • signs of structural collapse • smoke colour • weather conditions
<i>Evidence of changing conditions at the fire</i> may include:	<ul style="list-style-type: none"> • fire spread • flame colour and size • increase in heat • signs of structural collapse • smoke colour • weather conditions
<i>Ancillary activities</i> may include:	<ul style="list-style-type: none"> • damming water run off • guarding against hazards • making-up equipment • overhaul • salvage

	<ul style="list-style-type: none"> • securing the area • ventilation
<i>Recording appropriate incident information</i> must include:	<ul style="list-style-type: none"> • recording information in accordance with organisational requirements
and may also include:	<ul style="list-style-type: none"> • attendance records • completing personal notebooks logs and/or report forms • equipment used • objectives set • owner/occupant details • problems encountered • strategies and tactics • values

2	PUA12 V2	Content reviewed Application of the Unit added Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to respond to a wildfire, work as a safe and situationally-aware member of a crew to attack and extinguish a fire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

Licensing/Regulatory Information

Not applicable.

PUAFIR215 Prevent injury

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

- | | |
|--|---|
| <p>1. Prepare to respond to fire</p> | <p>1.1 Information about location of fire, <i>type of wildfire</i> and most effective route to the fire is obtained, taking into account local conditions.</p> <p>1.2 Personal protective clothing and equipment, and food and fluid requirements are identified and relevant preparations undertaken prior to departure as per organisational standards.</p> |
| <p>2. Proceed to fire</p> | <p>2.1 Location of the fire and <i>type of fuel</i> is confirmed on approach.</p> <p>2.2 Access to the area is gained safely without damage to vehicles and equipment, and minimum damage to the environment.</p> <p>2.3 <i>Evidence relevant to fire cause</i> is noted and brought to the attention of the supervisor.</p> <p>2.4 <i>Indicators of fire behaviour</i> are observed and communicated to supervisor.</p> |
| <p>3. Obtain and use firefighting equipment and extinguishing media</p> | <p>3.1 Nominated <i>extinguishing media</i> and <i>firefighting equipment</i> are located and obtained.</p> <p>3.2 Equipment is used in accordance with organisational and manufacturer's procedures.</p> |
| <p>4. Combat wildfire</p> | <p>4.1 Instructions are received, <i>firefighting strategies and tactics</i> are confirmed and implemented in accordance with organisational safe work practices and procedures.</p> <p>4.2 <i>Suppression techniques</i>, equipment and extinguishing media appropriate to wildfire conditions are used.</p> <p>4.3 Control lines are prepared in accordance with supervisor's instructions.</p> <p>4.4 Equipment is positioned, made ready for use and protected from damage in accordance with</p> |

- organisational procedures.
- 4.5 Fire is attacked taking into account *wildfire hazards* as directed and in accordance with organisational procedures.
- 4.6 Evidence of fire cause and area of fire origin are protected.
- 4.7 *Communication* is maintained at all times in accordance with organisational procedures.
- 5. Observe and react to wildfire and weather conditions**
- 5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor.
- 5.2 *Weather conditions* and changes to fire behaviour are observed and reported to supervisor.
- 5.3 *Variations in topography, fuel features* and fuel arrangements are observed and effect on fire behaviour is reported to supervisor as required.
- 5.4 *Escape routes* and *safety zones* are identified and maintained at all times.
- 5.5 Communication is maintained with other firefighting personnel and supervisor throughout operational activities.
- 6. Participate in mop-up and patrol activities and support operations**
- 6.1 Mopping-up activities are carried out in accordance with organisational procedures.
- 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures.
- 6.3 Activities to *support firefighting operations* are carried out in accordance with organisational procedures.
- 7. Recover and store equipment**
- 7.1 Equipment and *consumables* are recovered as directed.
- 7.2 Equipment is stored in accordance with organisational procedures.
- 7.3 Cleaning and maintenance are carried out in accordance with organisational procedures.
- 7.4 Damaged or lost equipment is reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- detect hot spots, hazardous trees, unsecured wildfire perimeter
- undertake dry and wet wildfire attack
- use wildfire control tools and equipment
- work as a member of a team

Required Knowledge

- communication on the fireground
- extinguishing media, water, foam, suppressants
- fire behaviour (fuel, weather and topography)
- health and fitness requirements
- hygiene and wellbeing
- organisational operating procedures
- safe work practices
- wildfire control tactics and techniques
- wildfire hazards, safety techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- react to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- use firefighting equipment
- participate in dry wildfire control
- use extinguishing media in wildfire control
- maintain health and safety of self, other workers and people in the immediate work area
- participate in mop-up and patrol
- undertake operational activities safely

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated field-based workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an agency approved simulated and/or field-based workplace environment.

Specific resources for assessment

Access is required to:

- controlled or contained fires and/or simulated workplace environment
- firefighting equipment and extinguishing media

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. <i>Bold italicised</i> wording in the Performance Criteria is detailed below.	
<i>Type of wildfire</i> must include:	<ul style="list-style-type: none"> • crown • ground • surface
<i>Type of fuel</i> may include:	<ul style="list-style-type: none"> • crop • forest • grass • heath • peat, coal and combustible soils • plantation • scrub
<i>Evidence relevant to fire cause</i> may include:	<ul style="list-style-type: none"> • fresh vehicles tracks • items or objects at scene • nature and behaviour of fire at the scene upon arrival

	<ul style="list-style-type: none"> • nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
Indicators of fire behaviour may include:	<ul style="list-style-type: none"> • flame height and length • noise • rate of spread • smoke colour and density • spotting
Extinguishing media must include:	<ul style="list-style-type: none"> • water
and may also include:	<ul style="list-style-type: none"> • Class A foam • retardants • soil • wetting agents
Firefighting equipment must include:	<ul style="list-style-type: none"> • drip torch • hand tools • hose and small gear • knap sack • pump • tanker
and may also include:	<ul style="list-style-type: none"> • chainsaw • ropes and lines
Firefighting strategies must include:	<ul style="list-style-type: none"> • defensive • direct attack • indirect attack • offensive: • parallel attack
Firefighting tactics may include:	<ul style="list-style-type: none"> • backburning • burning out • control line construction • mopping-up • patrol • use of extinguishing media
Suppression techniques may include:	<ul style="list-style-type: none"> • dry firefighting • wet firefighting
Wildfire hazards may include:	<ul style="list-style-type: none"> • burns • disorientation • electrical installations and powerlines • embers

	<ul style="list-style-type: none"> • falling branches/trees • fatigue • heat related illness • lack of visibility • machinery/vehicle • manual handling • noise • radiant heat • smoke inhalation • snake or insect bite • sprain or fracture • trips and falls • water bombing operations
Communication may include:	<ul style="list-style-type: none"> • paging • personal contact • phone • radio • written notes
Weather conditions may include:	<ul style="list-style-type: none"> • atmospheric stability • relative humidity • temperature • variations to wind speed and direction
Variations in topography may include:	<ul style="list-style-type: none"> • aspect • elevation • landscape features • slope
Fuel features must include:	<ul style="list-style-type: none"> • arrangement/distribution • moisture content • quantity • size • type
Escape routes may include:	<ul style="list-style-type: none"> • prepared tracks • roads • trails • waterways
Safety zones may include:	<ul style="list-style-type: none"> • bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

<i>Support firefighting operations</i> may include:	<ul style="list-style-type: none">• providing/transporting food, water and equipment for an incident• working with earth moving equipment such as bulldozer, grader, tractor with blade
<i>Consumables</i> may include:	<ul style="list-style-type: none">• flagging tape• fuel• rubbish• signs

PUAFIR205B Respond to aviation incident (specialist)

Modification History

Release	TP Version	Comments
2	PUA12 V2	Content reviewed Application of the Unit added Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to work under supervision as a member of a specialist team while responding to an aviation incident.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who are members of specialist aviation incident response teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR203B Respond to urban fire

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1. Respond to aircraft incident

- 1.1 Approach to incident is based on location, terrain, weather, wind speed, direction and response time requirements.
- 1.2 Hazards and personal injury risks associated with ***aircraft incidents*** and/or accidents are identified.
- 1.3 Access to the incident is based on airport and aircraft knowledge.
- 1.4 Changing conditions are monitored, anticipated and managed in accordance with aviation organisational procedures.
- 1.5 Operations are carried out in accordance with regulatory requirements.

2. Use appropriate equipment

- 2.1 ***Equipment*** is selected in accordance with objectives and ***strategies***.
- 2.2 Appropriate rescue and/or firefighting equipment is selected and used in accordance with aviation organisational procedures.
- 2.3 Appropriate equipment is selected and used to isolate aircraft fuselage from hazards and escape paths are maintained in accordance with aviation agency procedures.

3. Evacuate persons and attend to casualties

- 3.1 Hazards and personal injury risks associated with aircraft incidents are identified.
- 3.2 Equipment is selected and located to facilitate evacuation and rescue.
- 3.3 Evacuees are moved and/or directed to a safe area.

4. Conduct operations

- 4.1 ***Operational tactics*** are implemented based on incident conditions and aviation organisation procedures.
- 4.2 Changing conditions are evaluated and any changes to tactics communicated in accordance with

organisational procedures.

4.3 Operations are carried out in accordance with any regulatory requirements.

4.4 Fuselage protection and fire free escape paths are established and maintained in accordance with aviation organisational procedures.

4.5 Assistance is provided during aircraft evacuation.

4.6 Evacuees are moved or directed to a safe area in accordance with Aerodrome Emergency Plan.

4.7 Appropriate rescue techniques are used to release entrapped persons.

5. Conclude operations

5.1 Evidence at the aircraft is preserved and secured.

5.2 Any damage to the aircraft caused by forcible entry is recorded and reported in accordance with organisational and legislative requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- adhere to airport operating procedures
- apply aviation strategy, tactics and techniques
- apply extinguishing mediums
- identify hazards in aircraft
- identify toxic environments

Required Knowledge

- aircraft construction
- aircraft emergency procedures
- aircraft hazards and risks
- airport emergency procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence

Assessment must confirm the ability to:

required to demonstrate competency in this unit

- implement aviation firefighting tactics and strategies
- select and use firefighting equipment, extinguishing mediums, personal protective clothing and equipment in a manner compliant with the aviation organisational and legislative/regulatory requirements and objectives

Consistency in performance

Competency should be demonstrated over time to ensure consistency of performance in a range of applicable simulated scenarios, consistent with the range of response responsibility requirements.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

Access is required to:

- firefighting equipment
- protective clothing and equipment
- aircraft/simulator
- fire extinguishment media
- relevant legislation and regulations
- simulated aviation incidents

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<p><i>Aircraft incidents</i> may include:</p>	<ul style="list-style-type: none"> • aircrew escape units • brake failure • crashes in: • difficult terrain • mid air • military • multiple aircraft • on water • structures off airport • structures on airport • vehicles • electrical failure • explosion • faulty armaments • fires in: • auxiliary power units • brakes • cabin • cargo • engines • re-fuelling • tyres • foreign object damage • fuel spill • hydraulic failure • injured, fatigued, and/or incapacitated passengers/crew • sabotage • tyre failure • undercarriage failure • wildlife collisions
<p><i>Equipment</i> may include:</p>	<ul style="list-style-type: none"> • aircraft rescue and firefighting vehicle • ancillary firefighting equipment • apparatus to deliver extinguishing medium • breathing apparatus • escape safety devices • extrication devices

	<ul style="list-style-type: none"> • firefighting hose • fixative or sealant for composite fibres • ladders • lighting equipment • rescue boats • rescue equipment • specialised tools for cabin entry • ventilation equipment
<i>Strategies</i> must include:	<ul style="list-style-type: none"> • control and extinguish fire • isolate aircraft fuselage from hazard • maintain safe paths of egress
<i>Operational tactics</i> must include:	<ul style="list-style-type: none"> • defensive firefighting tactics • offensive firefighting tactics

PUAFIR209B Work safely around aircraft

Modification History

Release	TP Version	Comments
2	PUA12 V2	Application of the Unit added Unit revised to reflect current work requirements Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to apply safe work practices when operating in or around aircraft at an airbase and when engaged in a range of non-specialist, air operations activities.

Aviation operations occur in a heavily regulated environment. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

This unit applies to personnel performing primary aviation roles within the Australasian Inter-service Incident Management System (AIIMS) and all other aviation support roles when operating in or around aircraft. The primary AIIMS aviation roles that require this unit are Air Operations Manager, Aircraft Officer, Air Observer, Air Attack Supervisor and Air Base Manager.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

1. Work safely in the vicinity of aircraft

PERFORMANCE CRITERIA

- 1.1 ***Briefing*** is received prior to deployment or whenever circumstances relevant to their safety or current tasking have changed.
- 1.2 Briefing on work to be undertaken is undertaken in an ***appropriate location***.
- 1.3 ***Suitable visible clothing and protective equipment*** are used.
- 1.4 ***Appropriate precautions*** and clearances are followed when operating on or near aircraft movement areas.
- 1.5 Any approach to an operating ***aircraft*** is made according to ***organisational aircraft approach procedures***, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew.
- 1.6 Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes.
- 1.7 Typical manoeuvring patterns of aircraft are anticipated through ***activities***.
- 1.8 Any instructions or signals from pilots or ***staff controlling aircraft*** are complied with
- 1.9 ***Site hazards*** are identified.

ELEMENT	PERFORMANCE CRITERIA
2. Facilitate safe ground support	<p>2.1 Appropriate precautions are observed when positioning vehicles or equipment close to aircraft.</p> <p>2.2 Aircraft design features are respected while boarding, loading or handling aircraft.</p> <p>2.3 Instructions from pilots and organisational staff coordinating aircraft operations, and organisational procedures and placards are followed during ground support operations.</p> <p>2.4 Aircraft loading is conducted under pilot or flight crew member supervision and appropriate weight, balance and loading system are complied with.</p> <p>2.5 Areas are designated and separated according to site features and the specific operations being conducted.</p> <p>2.6 Fitting of equipment to an aircraft is conducted under pilot supervision in accordance with appropriate regulatory approvals.</p> <p>2.7 Aircraft fuels, oils, and supplies are stored and handled according to regulatory requirements and organisational procedures.</p> <p>2.8 Any suspected defects or hazards to aircraft or equipment are reported to pilot or other appropriate supervisor.</p> <p>2.9 Appropriate aerodrome regulations are complied with.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- using specialist aviation support equipment

Required Knowledge

- aerodrome familiarisation
- aerodrome working and lighting
- aircraft familiarisation
- aircraft movement characteristics
- aircraft performance, operation, loading and refuelling precautions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- comply with regulatory requirements and organisational procedures
- identify hazards and precautions effected on a consistent, conscious and continuing basis
- implement procedures for unusual events
- take action with an overriding concern for safety and quality rather than minimal observance of requirements.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated work environment.

Specific resources for assessment

Access is required to:

- actual or simulated aircraft and aerodrome facilities

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Briefing</i> must include:	<ul style="list-style-type: none"> • situation • mission • execution • administration • command and communications • safety • questions
<i>Appropriate location</i> must include:	<ul style="list-style-type: none"> • area that is: <ul style="list-style-type: none"> • free of distractions (movement, noise) • safe • convenient to subsequent deployment needs • necessary facilities and equipment
<i>Suitable visible clothing and protective equipment</i> may include:	<ul style="list-style-type: none"> • fire extinguisher • first aid kit • head, hand, eye, ear and foot protection • high visibility overalls/vests • protective overalls • respiratory protection • signalling devices, lighting or beacons
<i>Appropriate precautions</i> may include:	<ul style="list-style-type: none"> • advisory instructions • avoiding obstructions/hazards and navigation aids • clearances (radio) • fixed wing and helicopter marshalling • ground markings/lighting • light signals • observing aerodrome limits
<i>Aircraft</i> may include:	<ul style="list-style-type: none"> • aeroplanes • helicopters • unmanned aerial vehicles • other airborne vehicles
<i>Organisational aircraft approach procedures</i> include:	<ul style="list-style-type: none"> • complying with operational placards • complying with pilot or flight crew instructions • maintaining visibility with pilot or flight crew

<p><i>Activities</i> may include:</p>	<ul style="list-style-type: none"> • circuit procedures • ground manoeuvring capabilities • special procedures (such as at night or in poor weather) • take-off, approach and landing characteristics
<p><i>Staff controlling aircraft</i> may include:</p>	<ul style="list-style-type: none"> • aircraft coordinating personnel • flight crew • ground support supervisor • pilot
<p><i>Site hazards</i> may include:</p>	<ul style="list-style-type: none"> • dust • level of visibility • livestock • masts/aerials • native fauna • public • terrain • trees • weather conditions • wires/powerlines/fences

Unit Descriptor

This unit covers the competency required to identify and avoid workplace hazards and risks, to maintain personal safety and to report identified issues to supervisors and team members.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit is designed as an introduction to safe work practices and is specifically relevant to a workplace requiring people to be involved in incidents, prescribed burning and/or operational aspects of emergency management.

This unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Identify workplace hazards and risks, and advise others

- 1.1 Procedures and practices are followed to identify ***hazards*** and ***risks*** in the ***workplace***.
- 1.2 Identified hazards and risks in the work area are communicated to team members and supervisors.
- 1.3 Identified factors which may create or escalate the immediate risk to life, property or the environment are reported.

2. Implement hazard and risk control procedures

- 2.1 Appropriate ***personal protective clothing and equipment*** is selected and donned in accordance with organisational procedures.
- 2.2 Appropriate procedures for dealing with hazards and ***controlling risks*** in the workplace are followed in accordance with work health and safety guidelines and organisational procedures.
- 2.3 Equipment appropriate for dealing with a hazard is selected for use and checked in accordance with standard operating procedures.
- 2.4 Personal health and welfare is managed in accordance with organisational policy.

3. Monitor effectiveness of hazard and risk control procedures

- 3.1 Situation is monitored to ensure the continued effectiveness of the hazard and risk control procedures.
- 3.2 ***Changes in incident behaviour and conditions*** are reported immediately to supervisor.
- 3.3 Activities and ***debriefings*** regarding hazard and risk control procedures are participated in as appropriate.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply safe work practices in accordance with organisational work health and safety policies and procedures
- identify typical hazards and risks in the workplace, and apply control measures
- select equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- select personal protective clothing

Required Knowledge

- basic principles of risk assessment
- methods of hazard and risk control and reporting, and debriefings
- occupational hazards and risks encountered in the workplace
- organisational health and fitness guidelines
- personal protective clothing and equipment requirements
- risk control measure such as eliminate, isolate and substitute
- signs of fatigue, heat related illness, dehydration, fatigue and stress
- situational awareness
- welfare management, such as signs of occupational stress, limiting stress, dealing with stress and seeking assistance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- correctly identify hazards and risks in the workplace
- apply organisational procedures including the correct selection and use of personal protective equipment and clothing
- advise and report workplace hazards and risks, and apply and monitor control measures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific

Context of assessment

resources for assessment

Competency should be assessed on-the-job and/or in a range of simulated environments.

Specific resources for assessment

Access is required to:

- appropriate protective clothing and equipment
- organisational procedures.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. <i>Bold italicised</i> wording in the Performance Criteria is detailed below.	
<i>Hazards</i> may include:	<ul style="list-style-type: none"> • aerial retardant drops • aircraft • broken terrain • biological, bites, infections, stings • chemicals • confined space • electricity • entrapment • environmental • falling objects • explosions

	<ul style="list-style-type: none"> • structural collapse • subsidence • water load • fire • flood, storm and tempest rescues • hazardous chemicals • heavy machinery • manual handling • personal • dehydration • heat stress • psychological such as critical incident stress, shock • prescribed burning activities • travelling in vehicles • vehicle and industrial rescue/extrication
Risks may include:	<ul style="list-style-type: none"> • damage to property and environment • injury to self and/or team members • loss of life and property
Workplace may include:	<p>Locations where activities and operations may occur such as:</p> <ul style="list-style-type: none"> • confined spaces • mobile property • open spaces • public and private property (including crown land) • structures • water
Personal protective clothing and equipment must include:	<ul style="list-style-type: none"> • emergency response clothing
and may also include:	<ul style="list-style-type: none"> • chainsaw chaps • chemical protective clothing • eye, ear and head protection • face shield • personal accessories kit • personal distress units • personal lines • respiratory protection
Controlling risks must include:	<ul style="list-style-type: none"> • adequate food, fluid and other welfare needs during operations • appropriate training • eye, sight, hearing protection

2	PUA12 V2	Application of the Unit added Unit revised to reflect current work requirements Context of Assessment revised Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to work as a situation-aware member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR204B Respond to wildfire

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| <p>1. Receive and report details of wildfire</p> | <p>1.1 Details of the wildfire including its location, <i>type</i>, behaviour and development are received and recorded.</p> <p>1.2 Fire details are reported in accordance with organisational procedures.</p> |
| <p>2. Prepare to respond to fire</p> | <p>2.1 Location of the wildfire is confirmed and the safest effective <i>access</i> route is determined.</p> <p>2.2 <i>Personal protective clothing and equipment</i>, apparel, food and water are obtained before departure, in accordance with organisational requirements.</p> <p>2.3 Most appropriate method of transport to the wildfire is selected and used.</p> |
| <p>3. Proceed to fire</p> | <p>3.1 Location of the wildfire is confirmed by observation or from instructions while on approach.</p> <p>3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or <i>environmentally sensitive areas</i>.</p> <p>3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of the appropriate authority.</p> <p>3.4 <i>Navigational aids</i> are used for planning and operational purposes.</p> |
| <p>4. Protect people and assets</p> | <p>4.1 As far as conditions allow, number, location and safety of people and <i>assets</i> in the threatened area is determined and assessed.</p> |

- 4.2 Appropriate *protective procedures* are implemented under direction, to protect persons in the path of a wildfire.
- 4.3 Access by the public and personnel to hazardous locations is controlled as directed and in accordance with organisational procedures.
- 4.4 Defensibility of property is considered and, if appropriate, assistance is provided to help occupiers.
- 4.5 Safety of people and assets in the threatened area is monitored during the course of the fire.
- 4.6 Safety of people and security of assets in the area is checked and reported after the passing of the fire.

5. Combat wildfire

- 5.1 Access to the area of operations is gained in the safest and most effective manner.
- 5.2 Notification of arrival and appropriate report is provided.
- 5.3 Briefing is received including area of operations, strategies and tactics to be employed.
- 5.4 Most suitable location to commence wildfire control operations is selected.
- 5.5 *Firefighting media and equipment* are selected and used effectively and safely in accordance with organisational procedures.
- 5.6 *Fire hazards* are identified and action taken to minimise the risk of injury to the public, personnel and self.
- 5.7 *Firefighting strategies* are implemented to achieve objectives in accordance with organisational procedures.
- 5.8 Fire control activities are undertaken to minimise overall damage and impact on assets and the environment.
- 5.9 *Potential fire behaviour* is considered and acted upon to ensure safety and achievement of objective.
- 5.10 *Fuel, weather* and *topographical factors* are observed and potential fire behaviour anticipated.
- 5.11 Communication is maintained with supervisor and other firefighters in the work area.
- 5.12 *Fire reports* are provided to supervisor as required.
- 5.13 Area of origin and *evidence of fire cause* are protected and brought to attention of supervisor or relevant authority.
- 5.14 *Escape routes* and *safety zones* are established

- and communicated to personnel.
- 6. Conduct mop-up and patrol activities**
- 6.1 Mop-up activities are carried out in accordance with guidelines and conditions.
- 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures and guidelines.
- 7. Recover and maintain equipment**
- 7.1 Equipment is made up and made ready for operational use in accordance with organisational procedures.
- 7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in writing and orally
- detect hot spots and hazardous trees
- interpret fire weather, fuels and terrain and predict the likely impact on fire behaviour
- mop-up
- read maps
- receive briefings and confirm instructions
- undertake back burning and burning out
- use wildfire control tools and equipment
- work as part of a team

Required Knowledge

- defensive/offensive firefighting strategies and tactics:
 - asset protection
 - backburning and burning out
 - control lines and firebreaks
 - defensible space
 - direct, indirect, parallel attack
 - fire attack procedures
 - lighting patterns
 - standard operating procedures; reporting; patrol; mop-up
 - wet, dry firefighting
- fire behaviour:

- fire development
- flame height and intensity
- rate of spread,
- junction zones
- spotting
- firefighting protocols
- fireground hazards
- fire weather conditions and impact on fire behaviour:
 - atmospheric stability
 - relative humidity
 - temperature
 - wind speed and direction
- fuel and its impact on fire behaviour
 - moisture content, quantity, type, arrangement and distribution,
 - size, drought effect, curing
- organisational first aid requirements
- organisational procedures for dealing with injury
- protection of area of origin and evidence of fire cause
- safety near vehicles and machines
- terrain and physical feature and their impact on fire behaviour and suppression:
 - aspect
 - fuel variations
 - slope
 - weather variations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- anticipate and react to changing wildfire behaviour
- observe and react to weather behaviour
- accurately assess whether or not it is safe to defend assets
- undertake dry wildfire control activity
- monitor effectiveness of tactics
- use firefighting equipment and extinguishing media
- maintain safety and health of self, other workers and

- people in the wildfire area
- use communication equipment
- read maps
- protect area of origin and evidence of fire cause

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of performance at a wildfire or prescribed burn is required for attainment of Elements 5 and 6 of this unit.

The remaining elements should be assessed in an agency approved field-based environment or simulation.

Specific resources for assessment

Access is required to:

- access to wildfire or prescribed burns and/or approved field-based environment
- firefighting equipment and extinguishing media

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Types</i> must include:	<ul style="list-style-type: none"> • crown • ground • surface
<i>Access</i> may include:	<ul style="list-style-type: none"> • aircraft • boat • foot • vehicle
<i>Environmentally sensitive areas</i> may include:	<ul style="list-style-type: none"> • areas of: <ul style="list-style-type: none"> • fragile soils • native flora and fauna • rare and endangered species • threat to water quality
<i>Navigational aids</i> must include:	<ul style="list-style-type: none"> • maps
and may also include:	<ul style="list-style-type: none"> • aerial photographs • compass • global positioning systems
<i>Assets</i> may include:	<ul style="list-style-type: none"> • area of rare or sensitive flora and fauna • buildings • culturally significant sites • crops • plantations • property • public lands • stock • utilities and infrastructure (rail, power and telephone lines, water supply structures, communications towers, bridges)
<i>Protective procedures</i> may include:	<ul style="list-style-type: none"> • alerts and warnings • in-situ protection • relocation
<i>Firefighting media</i> must include:	<ul style="list-style-type: none"> • water
and may also include:	<ul style="list-style-type: none"> • Class A foam • earth • fire suppressants (short and long term) • retardants

	<ul style="list-style-type: none"> • wetting agent
Firefighting equipment must include:	<ul style="list-style-type: none"> • driptorch • hand tools • hose and small gear • pump • tanker
and may also include:	<ul style="list-style-type: none"> • aircraft • chainsaw • earth moving machinery • knap sack • ropes and lines
Fire hazards must include:	<ul style="list-style-type: none"> • burns • disorientation • environmental • falling branches and trees • falling objects • fatigue • heat-related illness (heat exhaustion and dehydration) • lack of visibility • manual handling • mine shafts • rolling objects • smoke inhalation • snake or insect bite • sprain or fracture • trips/falls • water bombing operation
Firefighting strategies must include:	<ul style="list-style-type: none"> • combination attack • combined strategy • defensive strategy • direct attack • indirect attack • mop-up • offensive strategy • parallel attack • patrol
Potential fire behaviour may include:	<ul style="list-style-type: none"> • fire development • flame height and intensity • fuel load and arrangement • rate of spread

	<ul style="list-style-type: none"> • spotting • change due to terrain, topography • change due to weather conditions - winds, fire whirls
Fuel may include:	<ul style="list-style-type: none"> • crop • forest • grass • heath • plantation: <ul style="list-style-type: none"> • stage 1 – post establishment • stage 2 – pre-canopy closure • stage 3a – canopy closure (unpruned) • stage 3b – canopy closure (pruned) • stage 4 – thinned • stage 5 – mature • stage 6 – harvesting/clear felling • scrub
Fuel factors which may impact on fire development must include:	<ul style="list-style-type: none"> • arrangement/distribution • effects of drought • moisture content • quantity • seasonal effects • size • topography • type
Weather factors which may impact on fire development must include:	<ul style="list-style-type: none"> • anabatic winds • atmospheric stability • cold fronts • diurnal variations • katabatic winds • land breezes • local effects • relative humidity • sea breezes • temperature • vegetation edge effects • wind changes • wind direction and speed
Topographical factors which may impact on fire development must include:	<ul style="list-style-type: none"> • aspect • elevation • local wind effects

	<ul style="list-style-type: none"> • slope • wind turbulence
<i>Fire reports</i> may include:	<ul style="list-style-type: none"> • effectiveness of strategies and tactics • fire behaviour • number and status of resources • safety and hazards • weather • welfare of personnel • work achieved and required
<i>Evidence of fire cause</i> may include:	<ul style="list-style-type: none"> • fresh vehicles tracks • nature and behaviour of fire at the scene upon arrival • nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
<i>Escape routes</i> may include:	<ul style="list-style-type: none"> • prepared tracks • roads • trails • waterways
<i>Safety zones</i> may include:	<ul style="list-style-type: none"> • bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

Unit Descriptor

This unit covers the competency required to operate a portable and/or appliance-mounted pump at an incident.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies personnel responsible for operating centrifugal, appliance-mounted and portable pumps and foams systems at an incident. Typically, this work requires the application of the basic principles of hydraulics i.e. the study and behaviour of water.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEQU001B Prepare, maintain and test response equipment

And one of the following four units:

OR

PUAFIR218 Respond to isolated structure fire

OR

PUAFIR204B Respond to wildfire

OR

PUAFIR205B Respond to aviation incident (specialist)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare pump to deliver water

- 1.1 ***Type of pump*** selected is appropriate to the operation/incident.
- 1.2 ***Suitability of water supply*** for operational purposes is determined.
- 1.3 Pump is sited and positioned to receive and deliver water supply in accordance with organisational requirements.
- 1.4 Pump and ***primer*** are engaged in accordance with manufacturer guidelines and ***organisational procedures***.
- 1.5 Appropriate ***foam agents*** and ***foam equipment*** are prepared for the production of foam at an incident, where required.

2. Operate pump

- 2.1 Pump components, ***ancillary equipment*** and principles of operation are utilised to draught water from a ***static supply*** to boost water from a ***reticulated supply*** and/or to deliver water from the

appliance tank in accordance with appliance capability.

2.2 Pump operation is in accordance with manufacturer specifications, organisational procedures and workplace health and safety (WHS) guidelines

2.3 *Principles of hydraulics* are considered when determining pump settings.

2.4 Pumps are operated and *observed* to ensure that pressure and flow meet operational requirements and that safety to personnel is maintained.

2.5 Pump performance is monitored and maintained to ensure maximum efficiency of operation, to detect and correct pumping and safety problems, and to take appropriate action in accordance with organisational procedures.

2.6 Pump operations are carried out avoiding injury to personnel and damage to equipment and facilities.

2.7 Mechanical malfunctions are reported to supervisor according to organisational procedures.

3. Conclude pump operations

3.1 Pump operations are concluded in accordance with organisational procedures.

3.2 Ancillary equipment is collected and stowed in accordance with organisational requirements.

3.3 Maintenance procedures and checks are undertaken to ensure pump and ancillary equipment are serviceable in accordance with organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- operate a pump using gauges and controls
- position a pump
- prime and operate a pump
- supply water to a location by use of a relay pump

Required Knowledge

- determination of water supply capacity
- discharge and flow rates
- hand signals to indicate water and pump requirements

- positioning pumps
- jet reaction
- power train for pump
- principles of hydraulics (flow and pressure)
- principles of priming and operating pumps
- pump components and their principles of operation
- pump gauges and controls
- relay pumping
- simple hydraulic calculations including friction loss
- types of foam concentrate
- types of pumps and primers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- maintain water supply to branch operators
- maintain appropriate levels of pressure
- respond appropriately to changing circumstances
- when using foam, supply/deliver the correct proportion of foam and water and maintain supply of foam concentrate
- when pumping from an appliance tank, monitor levels of water remaining in appliance tank to ensure minimum levels for crew protection
- pump without injury to personnel or damage to equipment

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job and/or in a range of simulated environments.

Specific resources for assessment

Access is required to:

- range of pumps

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Type of pump</i> may include:	<ul style="list-style-type: none"> • appliance-mounted pumps • centrifugal • ejector • free-standing, trailer or vehicle-mounted • multi-stage centrifugal • peripheral • petrol or diesel driven • portable pumps • positive displacement • series/parallel centrifugal • single-stage centrifugal • water turbine
<i>Suitability of water supply</i> may include:	<ul style="list-style-type: none"> • capacity • pressure • salinity • turbidity
<i>Primer</i> may include:	<ul style="list-style-type: none"> • diaphragm • exhaust ejector

	<ul style="list-style-type: none"> • force pump • rotary gear • rotary vane • water ring
Organisational procedures may include:	<ul style="list-style-type: none"> • fireground procedures • maintenance procedures and checks • manufacturer specifications • WHS guidelines • pumping practices • service procedures • standard operating procedures • training manuals
Foam agents may include:	<ul style="list-style-type: none"> • alcohol resistant type foam • aqueous film forming foam • Class A foam • protein foam
Foam equipment may include:	<ul style="list-style-type: none"> • Class A foam systems • Class B foam systems • compressed air foam system • electronic foam systems • foam-making branch pipes • high back-pressure (sub-surface injection) foam system • high expansion foam equipment • in-line inductors • in-line foam generators • medium expansion foam equipment • pick-up tubes • pressure-balanced foam systems • round-the-pump proportioners
Ancillary equipment may include:	<ul style="list-style-type: none"> • adaptors and matching pieces • breechings • couplings • delivery hose • hose clamps • hydrant tools and openers • ropes/lines • standpipes • suction hoses, spanners, strainers, baskets
Static supply may include:	<ul style="list-style-type: none"> • dams • lakes

	<ul style="list-style-type: none"> • portable dams • reservoirs • rivers • seawater • swimming pools • tanks
<i>Reticulated supply</i> may include:	<ul style="list-style-type: none"> • distributary mains • reticulation mains • trunk mains
<i>Principles of hydraulics</i> may include:	<ul style="list-style-type: none"> • discharge and flow rates • friction loss • head pressure calculations • jet reaction • required branch and nozzle pressures
<i>Observed may include</i>	<ul style="list-style-type: none"> • branch operator activities, where possible • checking water supply levels • monitoring of gauges and warning lights • pump operators working on other units when relay pumping • use of pressure relief valves and transfer valves • use of pump performance charts or tables illustrating information such as optimum nozzle pressure and friction loss

Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare to burn

- 1.1 Burn plan is identified in accordance with the organisational procedures and legislative requirements
- 1.2 A *contingency plan* is developed based on *local conditions at the time of burn* and communicated to all personnel
- 1.3 Permits are obtained in accordance with organisational procedures
- 1.4 Burn *notifications* are issued in accordance with organisational procedures
- 1.5 Resource requirements are identified
- 1.6 Control lines are specified and prepared in accordance with organisational procedures
- 1.7 *Assets* are *protected* in accordance with organisational procedures
- 1.8 *Weather conditions* are *monitored*

2. Conduct burn

- 2.1 *Resources* are gathered and deployed
- 2.2 Day of burn notifications are issued
- 2.3 Pre burn checks are conducted
- 2.4 *Lighting* is conducted in accordance with plan or organisational procedures
- 2.5 *Burning* is monitored and operational changes are made as required

ELEMENT	PERFORMANCE CRITERIA
3. Conduct post burn activities	2.6 Records are kept in accordance with organisational procedures 2.7 Burn operations are concluded 3.1 Outcomes of the burn are assessed and reported 3.2 Variations from the burn plan are reported in accordance with organisational procedures 3.3 Restoration and rehabilitation is carried out in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

developing a prescribed burn
 conducting high and low intensity prescribed burns
 establishing control lines for prescribed burns
 developing a contingency plan
 monitoring the burn
 undertaking patrol activities

Required Knowledge

legislative, organisational policy and procedures for conducting a prescribed burn
 types of prescribed burns
 seasonal restrictions on prescribed burns
 authorisations required for conducting a burn
 high and low intensity prescribed burns
 ignition patterns and techniques
 developing a prescription
 resource requirements
 procedures for monitoring prescribed burns and securing burn area

REQUIRED SKILLS AND KNOWLEDGE

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence is demonstrated in:

- the preparation of burn plans for a designated area
- the effective conduct of a burn, utilising the appropriate resources and record action taken
- follow up activities once the burn is completed

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Evidence of competence may be demonstrated on the job and/or in a simulated environment

Specific resources for assessment

Access to a range of controlled or simulated fires
lighting equipment

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Unit Descriptor

This unit covers the competency required to respond to an incident and to undertake a preliminary fire investigation prior to the arrival of a specialist fire investigator.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel required to conduct a fire investigation at a fire or related incident.

This unit is not intended to replace the role of the specialist fire investigator; the role of the specialist fire investigator is encompassed within the PUA60912 Advanced Diploma of Public Safety (Fire Investigation).

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUALAW001B Protect and preserve incident scene

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

1. Plan fire/incident investigation and analysis activities

2. Collect, collate and preserve evidence

PERFORMANCE CRITERIA

- 1.1 Roles and responsibilities of government and non-government organisations involved at a fire/incident investigation are identified.
- 1.2 Procedures and ***protocols for the cooperation and coordination of relevant organisations*** involved in the fire/incident investigation are identified, agreed and implemented.
- 1.3 Strategies required to conduct a fire/incident investigation and analysis are identified and implemented in accordance with organisational procedures.
- 1.4 Preliminary and background ***sources of information*** concerning the context of the fire/incident investigation is prepared.
- 1.5 Relevant legislative requirements that impact on the collection and recording of ***evidence*** are identified.
- 1.6 Evidence and information gathering process at the incident site is planned in accordance with organisational and legislative requirements, environmental conditions and resource availability.
- 1.7 Required fire investigation equipment and resources for the incident are identified and assembled.
- 2.1 ***Methods and techniques of evidence and information collection*** appropriate to the investigation are applied. accordance with legislative requirements
- 2.2 Various types of evidence and information pertinent

- to the investigation are recorded and/or collected in accordance with organisational and legislative procedures.
- 2.3 Procedures for continuity and *preservation of evidence* are followed in accordance with legislative requirements.
- 2.4 Appropriate *packaging* and identification techniques for the transportation of evidence for the purpose of laboratory testing are followed in accordance with organisational and legislative requirements.
- 3. Determine origin and cause of fire at incident**
- 3.1 Procedures required to determine the origin and *cause of fire* are followed.
- 3.2 *Specialist personnel* are liaised with to support determination of cause of fire.
- 3.3 Assistance is rendered to laboratory personnel and specialist organisations as required, in accordance with organisational procedures.
- 3.4 Physical evidence that can lead to the determination of the origin and cause of fire is identified and examined.
- 3.5 Preliminary findings are documented and validated in accordance with organisational procedures.
- 3.6 Origin and cause of fire are determined.
- 3.7 Findings, methodologies, support data and briefing notes are documented in accordance with organisational and legislative procedures.
- 4. Conduct analysis of incident**
- 4.1 Information relating to incident is gathered in accordance with organisational policies and procedures.
- 4.2 Information relating to incident is evaluated in accordance with organisational procedures.
- 5. Record and report information collected**
- 5.1 Information for a fire/incident investigation is recorded in accordance with the Rules of Evidence and legislative requirements.
- 5.2 Information collected for a fire/incident investigation is prepared and documented in a report in accordance with organisational requirements.
- 5.3 Report is submitted to supervisor in accordance with organisational requirements.
- 6. Prepare personnel for proceedings**
- 6.1 Briefings are participated in with counsel as required.
- 6.2 Other personnel involved in the proceedings are briefed as required.
- 6.3 Additional information and/or clarification of

fire/incident investigation procedures/findings are provided as required.

6.4 **Protocols for giving of evidence** at a coronial/civil/criminal proceeding are followed.

7. Review and evaluate fire/incident investigation

7.1 Outcomes of proceedings are reviewed to ensure knowledge of investigations, trends and precedents is current.

7.2 Changes to organisational policy and procedures arising from rulings and decisions are formulated and reported.

7.3 Fire/incident cause determination/documentation/recommendations are forwarded in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively verbally and in writing
- conduct briefings
- cooperate with other organisations and community groups
- display evidence gathering techniques
- display evidence packaging techniques
- handle dangerous goods and hazardous substances
- record incident and investigation details

Required Knowledge

- collection of physical evidence
- determining point of origin by deductive evidence
- differences between fire conditions
- differing fire behaviour such as flashover, backdraught
- distinguishing between fires that are accidentally, negligently and deliberately or naturally lit
- examination of the fire scene
- factors affecting fire behaviour
- fatality and criminal involvement procedures
- identification of fire scene hazards
- legal implications of evidence collection and legislative requirements
- motives of the fire setter
- security of the scene, scene contamination and preservation
- use of personal protective clothing and equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- secure the scene and preserve the evidence
- determine the point of origin and cause of fire
- distinguish between fires that are caused deliberately or accidentally, negligently and naturally lit
- collect evidence in accordance with legislative requirements
- record incident and investigation details in accordance with organisational procedures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or via simulations or exercises.

Specific resources for assessment

Access is required to:

- relevant fire investigation equipment and resources
- real or simulated test fire sites (forest/rural)
- training building with appropriate fire investigation training rooms
- fire crews and pumpers
- thermal detection equipment
- appropriate protective clothing and equipment
- classrooms equipped with computers and appropriate training aids, text and reference materials
- appropriate role play scripts for the appropriate personnel (police, witnesses, barristers, solicitors, forensic scientist, insurance adjustors and investigators).

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training

environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<p><i>Protocols for the cooperation and coordination of relevant organisations</i> may include:</p>	<ul style="list-style-type: none"> • advising and cooperating with other agencies • canvassing witnesses • collecting and securing physical evidence • collecting, collating and analysing information • conducting examinations • conducting interviews • making sketches and maps • preparing reports • producing information • taking notes
<p><i>Sources of information</i> may include:</p>	<ul style="list-style-type: none"> • correspondence • databases • incidence mapping • internet • inter-organisational activities • intra-organisational activities • journals

Evidence must include:	<ul style="list-style-type: none"> • debris • documents • drawings • electrical appliance/equipment • gas appliance/equipment • manifests • maps • personal notes • physical evidence • plans • sketches • soil
and may also include:	<ul style="list-style-type: none"> • audio tapes • video tapes
Methods and techniques of evidence and information collection must include:	<ul style="list-style-type: none"> • advising and cooperating with other agencies • canvassing witnesses • collecting and securing physical evidence • collecting, collating and analysing information • conducting examinations • conducting interviews • making sketches and maps • preparing reports • producing information • taking notes
Preservation of evidence must include:	<ul style="list-style-type: none"> • maintaining chain of evidence • maintaining log of events • tagging secure encasements
Packaging may include:	<ul style="list-style-type: none"> • glass receptacles • non-leaching bags • non-lined tins • rigid and non-rigid receptacles
Causes of fire must include:	<ul style="list-style-type: none"> • accidental • chemical • deliberate • electrical origin • environmental or natural occurrences • flammable liquids • gas • gas explosion • lightning • matches and lighters

	<ul style="list-style-type: none"> • mechanical defect • motor vehicles • smoking • spontaneous combustion
<i>Specialist personnel</i> may include:	<ul style="list-style-type: none"> • arson squad • crime scene police • forensic specialist • insurance investigators • laboratory technicians • lawyers • medical examiners • other relevant authorities
<i>Protocols for giving evidence</i> must include:	<ul style="list-style-type: none"> • court practices • court procedures • pre-court briefings • rules of evidence

PUAFIR509B Implement prevention strategies

Modification History

Release	TP Version	Comments
2	PUA12 V2	Application of the Unit added Performance Criteria amended to make intent clearer but the intent has not changed Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to implement public safety risk prevention strategies which can be used to reduce the risk to the community.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel required to work with individuals and community groups to implement public safety risk prevention strategies within their area of responsibility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Provide advice on prevention strategy

1.1 Public safety risk prevention strategies are identified taking into account available information on hazards and environmental conditions.

1.2 Assessment of public safety risk prevention strategies is conducted against ***organisational criteria***.

1.3 Advice is provided to ***local forums*** on public safety risk prevention strategies in accordance with ***organisational policy and procedures***.

1.4 Type of risk, locality, and protection of life, property and the environment are taken into account in advice provided.

2. Implement and monitor prevention strategies

2.1 Risk prevention activity is implemented in accordance with selected strategies.

2.2 Communication and coordination of prevention activities is implemented with ***relevant authorities and other responsible organisations***.

2.3 Progress reports are provided to ***stakeholders*** in line with organisational policies and procedures.

3. Review implementation of prevention strategies

3.1 Stakeholders are advised of the outcome of the implementation in line with organisational policies and procedures.

3.1 Recommendations are ***documented*** and provided to appropriate personnel as proposed amendments to prevention strategies.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse needs
- communicate effectively verbally and in writing
- negotiate
- resolve conflicts

Required Knowledge

- emergency management concepts and principles
- legislative requirements relevant to emergency management
- organisational policies and procedures
- organisational documentation (emergency/disaster management plans, standard operating procedures, policies, procedures and guidelines)
- problem solving and decision making techniques
- relevant legislation, regulations and codes of practice
- source of risk (commercial and legal relationships, economic, human behaviour, individual activities, management activities and controls, natural events, political circumstances, technology/technical issues)
- techniques for the prioritisation and evaluation of public safety risk management systems

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- Effectively implement the selected public safety risk prevention strategy.
- Review the effectiveness of these strategies and provide feedback
- Ensure risk prevention strategies implemented by personnel are consistent with the organisation's community safety policy and approved arrangements.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment**Context of assessment**

Competency should be assessed on-the-job or in a simulated workplace environment.

Specific resources for assessment

Access is required to:

- complex scenarios sufficient to allow evidence to be gathered from a variety of sources and stakeholders on more than one occasion and over an extended period.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Public safety risk prevention strategies may include:

- all aspects of comprehensive emergency management evolved from considering prevention/mitigation
- building codes
- community restoration
- critical incident stress management
- emergency management planning
- financial support

	<ul style="list-style-type: none"> • implementing plans • land use management • legislation and regulation • mobilising resources • mutual aid agreements • preparedness • prescribed burning • public education • response and recovery including safety standards • restoration and reconstruction • training and exercises • warning systems
<i>Assessment of public safety risk prevention strategies</i> may include:	<ul style="list-style-type: none"> • costs and benefits • deficiencies and limitations • determination of advantages • disadvantages
<i>Organisational criteria</i> may include:	<ul style="list-style-type: none"> • administrative efficiency • compatibility with other strategies • continuity of effects • effects on economy • effects on environment • effects on individual freedom • equity • jurisdictional authority • leverage for further vulnerability-reducing action, cost effectiveness • possibility of vulnerability creation • public and pressure group reaction • timing • vulnerability reduction potential
<i>Local forums</i> may include:	<ul style="list-style-type: none"> • community groups • local councils • local emergency management committees • schools
<i>Organisational policy and procedures</i> may include:	<ul style="list-style-type: none"> • legislation relevant to the organisation • legislation relevant to the public safety risk prevention strategies • operational, corporate and strategic plans • operational performance standards • organisational personnel practices and guidelines • organisational quality standards

	<ul style="list-style-type: none"> • standard operating procedures
<i>Communication</i> may include:	<ul style="list-style-type: none"> • electronic transmission of information • letters • meetings • small group or individual verbal communication
<i>Relevant authorities and other responsible organisations</i> may include:	<ul style="list-style-type: none"> • community service organisations • contractors • equipment suppliers • federal, state/territory and local government authorities • land management agencies • medical organisations • operative and support organisations • other emergency organisations • water, gas and power agencies • welfare and counselling organisations
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • career and volunteer personnel • client groups • community groups • industry groups • members of parliament • members of the public • non-government organisations • public and private sector organisations • staff
<i>Documentation</i> may include:	<ul style="list-style-type: none"> • emergency procedures • evacuation procedures • organisational and workplace operating procedures and policies • relevant Australian or international disaster/emergency management documentation • risk and hazard analysis • standard operating procedures • work health and safety procedures

PUALAW001B Protect and preserve incident scene

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application reviewed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required, on arrival at the scene of an accident or incident, to conduct initial assessment, take action to maintain public safety and preserve the scene, and note and record details and information.

The unit is particularly applicable in cases where organisation personnel are the first to arrive at the scene of an accident or incident.

Application of the Unit

This unit applies to all public safety workers at an incident who need to understand the importance of maintaining the legal integrity of the scene. It is not a specialist Crime Scene Investigation unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Secure and preserve scene	<p>1.1 Initial <i>assessment</i> is participated in to identify <i>factors which will impact</i> on public safety and scene preservation.</p> <p>1.2 <i>Incident/accident scene</i> is effectively secured to <i>preserve the scene</i> and maintain public safety in line with legislative requirements.</p>
2. Record and report details of incident scene	<p>2.1 <i>Details of the scene</i> are noted, <i>recorded and reported</i> according to organisation's policies and procedures.</p> <p>2.2 <i>Witness details</i> and information volunteered are recorded in accordance with <i>organisational and legislative requirements</i>.</p> <p>2.3 Information is communicated to <i>relevant personnel</i> in line with organisation's procedures.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- listening
- note taking
- observation
- questioning
- reporting

Required Knowledge

- legislative and organisation requirements relating to scene preservation

- methods of securing scene
- organisation requirements for taking witness details and information
- regulatory requirements for taking witness details and information
- techniques for estimating distance
- techniques for removing public from scene
- types of information which may assist in investigations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation's policies and procedures.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident scene may include:

- urban fire
- wild fire
- vehicle fire
- crime scene
- search for missing persons or evidence
- vehicle accident
- natural disaster
- industrial/mining accident
- incident involving death or injury to person or

- damage to property
 - urban scene
 - rural scene
 - indoor scene
 - outdoor scene
 - animal incident
 - marine
 - aircraft
 - train
 - explosions
 - hazardous materials
 - at scene
 - en route to and from scene
- Assessment of scene* may be conducted:
- Factors impacting* may include:
- public safety risk factors including factors that could impact on the safety of investigators
 - response team
 - the security/preservation of the actual site
 - the security and preservation of situational evidence
 - traffic
 - tactical factors affecting the quality of the investigation including environmental circumstances
 - chronology of events
 - access to scene
 - number of persons at scene
 - availability of support services
 - boundaries
 - incident scene specialists
 - forensic experts
 - potential witnesses
 - victims
 - other bystanders
 - personnel from other organisations
 - media
 - coroners
 - pathologists
 - medical practitioners
 - undertakers
 - forensic accountants
 - information technology consultants
 - legal officers
 - owners and/or occupiers
- Persons at scene* may include:

Security of scene may be affected by:

- topography
- climatic conditions
- human interference
- animal interference
- preservation of life/property
- structural integrity
- availability of personnel

Securing scene may include:

- removing non-emergency personnel from scene
- isolating scene
- erecting barriers

Details of scene may include:

- date
- time
- location
- damage
- persons present
- property involved
- possible causes
- items of evidence
- injuries
- status of utilities services such as broken water pipes
- animal species present
- flora
- fauna
- size and construction of building
- occupancy
- insurance details

Witness details may include:

- name
- contact details
- other details in accordance with organisation's policies and procedures

Relevant personnel may include:

- supervisor
- team leader
- police
- investigating officer
- other organisation's personnel

Communication may include:

- verbal
- completing standard forms
- written

Recording and reporting may include:

- taking notes
- completing standard forms
- making sketches

Preserving scene may include:

- taking photographs
- taping
- electronic videoing
- preserving evidence and the area of origin

Organisational and legislative requirements may vary between sectors and organisations and may include:

- legislation relevant to the operation/incident/response
- legislation relevant to the organisation
- operational
- corporate and strategic plans
- operational procedures
- operational performance standards
- organisation's personnel practices and guidelines
- organisation's quality standards

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to gather and collate information and obvious and accessible physical evidence from the scene of an incident and identifying potential witnesses.

Note: It does not cover the specialist skills required to interpret the evidence gathered, or the specialist skills required to gather specific evidence.

Application of the Unit

This unit applies to non-specialist workers who have been tasked with collection of information and evidence that is obvious at an incident. It does not apply to specialist relating to interpreting evidence gathered or gathering specific evidence.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Conduct initial assessment of scene

- 1.1 Scene is assessed with regard to occupational health and safety and all actions are undertaken in line with organisation's policies, procedures, guidelines and duty of care requirements.
- 1.2 Communication is established with the senior ***investigating officer*** and liaison is maintained throughout the investigation.
- 1.3 Circumstances surrounding the scene are ascertained from visual assessment and reports from other personnel.
- 1.4 Scene boundary is defined/redefined as required to preserve physical evidence for collection.
- 1.5 Obvious and accessible ***physical evidence*** is located and, where appropriate, protected from possible contamination.

2. Control integrity of scene

- 2.1 Appropriate ***arrangements for scene access and egress*** are established and maintained.
- 2.2 All non-essential persons are removed from the scene and relevant details are recorded accurately and legibly in accordance with organisation and regulatory procedures.
- 2.3 ***Additional resources*** are identified and accessed to secure incident scene.
- 2.4 The personal and health and safety needs of those involved in the incident are attended to.

3. Examine scene

- 3.1 An appropriate search pattern is instigated in accordance with instructions from senior investigating officer to ensure all evidence is located and preserved.
- 3.2 ***Details of the scene*** are recorded comprehensively

ELEMENT	PERFORMANCE CRITERIA
4. Identify potential witnesses and initial statements recorded	<p>and accurately in line with organisation's operating procedures.</p> <p>3.3 Evidence is located, collected, packaged, labelled and stored to ensure preservation for further post-scene examination.</p> <p>3.4 An accurate log of all evidence is maintained.</p> <p>3.5 Scenes are correctly assessed for future investigative requirements and appropriate persons notified.</p> <p>4.1 Bystanders are canvassed to identify potential witnesses.</p> <p>4.2 Details of potential witnesses are recorded.</p> <p>4.3 Appropriate recording practices are used that are in accordance with legislative and regulatory requirements and organisation's policies and procedures.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurate written recording and compilation of interviews and statements
- attention to detail
- implementing methodical and systematic approach
- listening to bystanders
- putting bystanders at ease
- questioning bystanders
- use of recording and specialised evidence collection equipment
- working with a variety of professionals

Required Knowledge

- anti discrimination public safety
- appropriate use of interpreting services
- collection and recording of various types of evidence ranging from large objects to minute traces
- details of scene
- equal employment opportunity
- features and use of a variety of specialised equipment to search
- functions and roles of other professionals and experts
- incident scene protection and preservation

- indicators of emotional distress
- indicators of need for specialised investigations
- legislative requirements relating to occupational health and safety
- policies and procedures relating to occupational health and safety
- policies and procedures relating to recording details of persons
- public safety and duty of care at accident/incident scene
- recognition
- record and collect evidence
- shock
- taking and compiling statements
- taking of statements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Correct application of legislative requirements and organisation policies and procedures in all situations.

Consistency in performance

Evidence will need to be gathered over time in a range of actual and/or simulated environment.

Context of and specific resources for assessment

Context of assessment

A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial investigation:

- those enquiries conducted by the first public safety official on scene

Incident scene may include:

- structural fire
- wild fire

- vehicle fire
 - crime scene
 - vehicle accident
 - natural disaster
 - industrial/mining accidents and incidents
 - accident/incident involving death or injury to person or damage to property
- Incident scene*** may be:
- indoor or outdoor
 - in a rural or urban environment
- Incident scene*** may be affected by:
- prevailing weather and require additional resources to preserve and protect incident scene
- Security of an incident scene*** may be affected by:
- topography
 - climatic conditions
 - human interference
 - animal interference
 - preservation of life/property
- Public safety risk factors*** include:
- those factors at the incident scene that could impact on: the safety of investigators; the security/preservation of the actual site
 - the security and preservation of situational evidence
- Investigating incident scenes*** may include:
- dangerous or distasteful conditions and may involve handling injured or deceased persons
- Circumstances surrounding scene*** may include:
- sequence of events
 - possible causes
 - people involved
 - property involved
 - victims
 - suspects
 - witnesses
 - damage
 - injury
 - organisation personnel involved
 - other agencies involved
 - current status of investigation
 - action taken to date
- Tactical factors*** may include:
- environmental circumstances
 - chronology of events
 - access to scene
 - number of persons at scene
 - availability of support services
 - boundaries

Persons at incident scene
may include:

- Incident scene specialists and forensic experts; witnesses
- victims
- other bystanders; police and emergency services; media; coroners
- pathologists
- medical practitioners
- undertakers; forensic accountants
- information technology consultants and legal officers

Activities at incident scenes
may be recorded by:

- running sheets
- exhibit logs
- receipts and personnel movement
- video photography

Physical evidence may
include:

- shoe impressions
- tyre prints
- skid marks
- fingerprints
- containers
- fibres
- flammable and combustible liquids
- tool marks
- bloodstains
- identifying numbers
- bodily fluids
- burn patterns

Methods of collection may
include:

- vacuuming
- tape lifts
- shovelling
- photographing
- casing

Methods of packaging may
include:

- metal containers
- plastic bags
- paper bags
- glass vials

Additional resources may
include:

- organisation personnel
- other organisation personnel
- expert personnel
- audio visual services
- emergency lighting
- forensic personnel

- Relevant details from persons*** may include:
- name
 - contact details
 - other details in accordance with standard operating procedures
- Liaison with investigating officer*** may include:
- professional and technical advice
 - identification of avenues of inquiry
 - significance of located evidence
- Arrangements for scene access and egress:***
- clear brief as to who has control of access
 - physical barriers may also be required
 - roster guards
 - limit entry to essential personnel
 - delegation of authority to control entry
 - record all persons who enter or depart the scene and reasons
- Arrangements to protect integrity of evidence:***
- roster scene guards
 - cover evidence
 - may require removal of evidence to ensure its protection
- Details of scene:***
- time
 - date
 - location
 - damage to property
 - injury to persons
 - personnel present
 - physical details of scene
 - evidence

needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine hazards at incident site	<p>1.1 Issues affecting safety of self and other personnel are established by identification of <i>hazards</i> and assessment of <i>risks</i>, and by liaison with others at the scene.</p> <p>1.2 Relevant operational safety procedures are implemented in accordance with organisation's policies.</p> <p>1.3 Duties are undertaken in line with organisational health and safety codes of practice and <i>relevant legislation</i>.</p>
2. Implement hazard controls at incident scene	<p>2.1 Hazards are identified and mitigation procedures are selected in line with work instructions and procedures.</p> <p>2.2 Hazardous situations rectified where possible and reported and/or recorded according to organisation's policies and procedures.</p> <p>2.3 Changes in situation and/or conditions are reported immediately to <i>designated person</i>.</p> <p>2.4 <i>Hazard controls</i> are monitored and communicated to relevant personnel to ensure continuing effectiveness.</p> <p>2.5 Hazard control and mitigation measures are implemented with minimum damage to the environment, while maintaining safety of self and others.</p> <p>2.6 Incident/accident scene is effectively secured to preserve the scene and maintain <i>public safety</i> in line with legislative requirements.</p>
3. Maintain personal safety	<p>3.1 <i>Personal protective clothing and equipment</i> is selected and checked according to organisational procedures to ensure it is operational prior to entry into incident situation.</p> <p>3.2 Personal protective clothing and equipment</p>

ELEMENT	PERFORMANCE CRITERIA
4. Contribute to maintaining safety of other work group members	<p>appropriate to dealing with the hazard is worn/fitted and used in accordance with organisation's policies and procedures and manufacturer's guidelines.</p> <p>3.3 Water and food intake, rest breaks and shelter requirements are maintained.</p> <p>3.4 <i>Survival technique strategies</i> are implemented in accordance with organisation's policies and guidelines.</p> <p>4.1 Impact of own actions on safety of others is recognised.</p> <p>4.2 Contact is maintained at all times with other work group members.</p> <p>4.3 Signals are correctly used, interpreted, confirmed and acted upon in a timely manner.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate non-verbally and verbally
- follow procedures and instructions
- record information
- use communication equipment
- work with others in a team situation

Required Knowledge

- accidents and incidents
- commonly encountered hazards and procedures and safety precautions to prevent injury on encountering various hazards
- employee responsibilities and obligations
- food intake
- hazards
- heat induced illness - factors leading to prevention
- injuries
- labelling and storage of hazardous substances
- manual handling hazards
- means of relaying warnings to other personnel
- methods of hazard control and reporting
- organisation's occupational health and safety policy

- problems associated with insufficient water intake
- procedures for investigating injuries
- procedures for participating in occupational health and safety arrangements
- procedures for reporting hazards
- protection
- relevant standard operating procedures
- respiratory system - functions
- rest breaks
- State and Territory occupational health and safety requirements
- survival techniques for various situations
- symptoms and treatment
- techniques and aids
- use and limitations of relevant protective clothing and equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in maintaining personal safety and safety of others.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

A range of protective clothing and equipment may be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Working environment** may be:
- hazardous
 - unpredictable
 - subject to time pressure
 - chaotic and expose responders to risk
- Public Safety workplaces** include:
- any location where a Public Safety incident occurs
- Response situation** include:
- single and multi agency response situations
- Hazards** include:
- all potential sources of injury or damage to property or the environment including identified and potential hazards to persons
 - equipment or the environment
- Risk** is:
- the likelihood of injury or damage occurring and the potential consequences of any injury or damage
- Incidents** may include:
- a variety of natural or man made events including but not limited to rescues and extrications
 - flood
 - storm
 - tempest
 - natural disaster
 - vehicle
 - aircraft
 - rail
 - industrial
 - civil defence
 - fires:
 - structural
 - wild
 - prescribed burning
 - search and rescue :
 - urban
 - rural
 - sea
 - hazardous materials and dangerous goods
- Hazards** may be identified by:
- scene assessment
 - visual inspections
 - plan reviews
 - recognising hazard warnings
 - accessing data bases
 - interviewing others at scene
 - seeking expert advice

- Others at scene*** may include:
- organisational personnel
 - personnel from other organisations
 - general public
- Hazardous materials*** may include:
- thermal
 - mechanical
 - explosives
 - toxic
 - corrosive
 - asphyxiant
 - radiation
 - etiological hazards
 - mutagenic materials
- Biological hazards*** may include:
- bacteria
 - viruses
 - fungi and yeasts
 - including exotic organisms
- Physical hazards*** may include:
- noise
 - slippery surfaces
 - poor visibility
 - smoky environments
 - fallen/falling objects
 - fatigue
- Electrical hazards*** may include:
- pole fires
 - electrical fires
 - electricity in damaged/burning structures
 - energised vehicles/structures due to downed wires
 - photovoltaic generation systems
- Manual handling hazards*** may include:
- heavy objects
 - content and shape of containers
- Environmental hazards*** may include:
- temperature
 - darkness
 - fire
 - snow
 - floods
 - winds
 - rain
 - hail
 - flora
 - fauna
 - postural restrictions and access
 - terrain

Hazard control measures

may include:

- traffic
- erection of barriers
- establishment of control zone
- use of spill clean up kits
- use of electrically insulated tools and equipment
- vehicle protection hoses and devices
- life support equipment (heat radiation shielded crew cabin
- vehicle cabins with/without sprays)
- entry control procedures to hazardous areas
- decontamination
- isolation of electricity supply

Relevant legislation may include:

- state or territory occupational health and safety acts and regulations

Personal protective clothing and equipment may include:

- breathing apparatus
- personal lines
- air lines
- personal distress units
- respiratory protection
- protective hoods
- goggles
- hearing protectors
- sunscreen
- chemical protective clothing
- personal flotation devices
- wet suits
- turnout uniform
- gloves
- hard hat
- safety boots
- overalls
- chainsaw chaps
- bullet proof vests
- firearms
- batons
- handcuffs

Hazard control equipment may include:

- atmospheric monitoring equipment
- meteorological equipment
- radiation monitoring equipment
- oxygen meters
- flammable gas detectors

- Reporting*** may include:
- verbal
 - written reports
 - completing standard forms
 - logs
 - sitreps
 - note taking
 - logging entry to hazardous areas
- Designated person*** may include:
- supervisor
 - team leader
 - workplace occupational health and safety representative
 - officer in charge
- Survival strategies*** which may be applied in:
- buildings
 - wildfire situations
 - water
 - extreme heat or cold
- Factors which may require monitoring*** may include:
- traffic
 - weather conditions
 - vegetation type
 - spectators
 - temperature
 - structural integrity
 - relative humidity
 - slope
 - terrain
 - water supply/pressure
 - fire development
 - stream flows
 - suspect atmospheres
- Contact with other personnel*** may include:
- visual
 - vocal
 - touch
 - radio
 - audible warnings
 - signalling

Unit Sector(s)

PUAOPE001B Supervise response

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competency to supervise a response by a small team to incidents and may include the use of aircraft, which are time critical and/or potentially threatening to life, property or the environment.

The unit includes the competency to proceed to the incident, assess the incident, and plan and implement an operational response and post-response activities.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite Unit/s	PUAFIR302B Suppress urban fire OR PUAFIR303B Suppress wildfire (Fire specific)

Employability Skills Information

Employability Skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive incident response request	<p>1.1 Requests for response are received and dealt with in accordance with <i>organisational policy</i> and guidelines</p> <p>1.2 Relevant incident information is obtained and assessed to enable personnel to make appropriate preparations</p> <p>1.3 An appropriate response is determined according to the type of incident and information available in accordance with organisational policies and procedures</p> <p>1.4 The location of the incident and the most appropriate route to the incident are ascertained</p>
2. Proceed to incident	<p>2.1 Personnel, equipment and <i>transport</i> resources are dispatched promptly, consistent with the nature of the incident and the information available</p> <p>2.2 Communication is established and maintained</p> <p>2.3 An appropriate route to the incident is followed</p>

ELEMENT**PERFORMANCE CRITERIA****3. Assess the incident**

- to minimise response time
- 2.4 *En-route hazards* are recognised and negotiated to minimise risk
- 2.5 Multi-vehicle response is conducted in accordance with the organisation's procedures
- 3.1 Observations are made en route to assist with *incident* assessments
- 3.2 Assigned personnel's arrival at the incident is confirmed according to organisational policies and procedures
- 3.3 *Communication* with on-site personnel is established
- 3.4 An initial assessment of the incident is carried out promptly
- 3.5 *Hazards* or potential hazards are assessed and minimised or controlled
- 3.6 Assigned *resources* to deal with the incident are established at the earliest opportunity
- 3.7 The need for additional resources is identified and resources requested in accordance with organisational policy and procedures
- 3.8 Hazards are monitored during the incidents and changes in the situation acted upon

4. Plan and implement an operational response to the incident

- 4.1 A safe and effective operational environment is established and maintained in accordance with occupational health and safety guidelines and organisation's policies and procedures
- 4.2 Incident information is communicated to assigned personnel clearly, accurately and in a timely manner
- 4.3 *Incident plan* is developed based on available information and organisational procedures
- 4.4 Strategies and tactics are determined and tasks allocated to appropriate personnel
- 4.5 An incident plan is implemented, continually monitored, reported and reviewed in the light of additional information and communicated in accordance with the organisation's policies and procedures
- 4.6 Leadership and supervision are provided to ensure that performance and practice are to operational standards

ELEMENT	PERFORMANCE CRITERIA
5. Conclude operation	<p>4.7 Appropriate equipment and materials are deployed to deal with the incident</p> <p>4.8 Changes in the incident plan are communicated to relevant personnel and organisations</p> <p>5.1 Incident is terminated in accordance with the organisation's procedures</p> <p>5.2 Incident records of incident actions and decisions are maintained in accordance with the organisation's requirements</p> <p>5.3 Incident assessment is conducted in accordance with the organisation's requirements</p>
6. Supervise post-response activities	<p>6.1 Equipment cleaning, repair, storage and replenishment is supervised</p> <p>6.2 Debriefing requirements are met</p> <p>6.3 Post operation reports are prepared to organisation's requirements</p> <p>6.4 <i>Welfare of team members</i> is monitored and appropriate action taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse an incident
- assess risks and apply safe work practices
- communicate effectively
- conduct an incident assessment
- conduct briefings and debriefings for aircraft based work
- deploy personnel and equipment to deal with the incident
- for aircraft based work the ability to work in an aircraft for an extended period
- make decisions
- respond promptly to an incident
- use communication equipment

Required Knowledge

REQUIRED SKILLS AND KNOWLEDGE

- hazards/potential hazards and their effects
- knowledge of current navigational practices to perform navigation
- knowledge of current practices to perform conduct briefings and debriefings
- organisational policies and procedures relating to operations

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in implementation of an appropriate strategy to deal effectively with the incident

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Evidence of competent performance should be obtained by observing an individual in responding to and dealing with an actual or simulated incident operation and supplemented by appropriate questions

Specific resources for assessment

Assessment of this competency will require access to relevant transport, communication and emergency equipment

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incidents may include	fires public disorder crime flood storms accident hazardous materials incidents rescues
Transport may include	on-road off-road aviation maritime
En route hazards may include	smoke crowds traffic unauthorised redirection prevailing weather road conditions terrain debris tidal flow spot fires restricted areas wires masts/aerials other aircraft interference to communications
Hazardous conditions may include	adverse weather and fire behaviour

RANGE STATEMENT

Incident assessment may include

after-dark operations
difficult terrain
dangerous goods and substances
time pressure
level of visibility
structural collapse
type and size of incident
risk to life
property and environment
hazards/no go areas
climatic and weather conditions
capability of assigned personnel
adequacy of allocated equipment
information gathered from existing plans/databases
forecasts and meteorological profiles
crowds gathering
installed fire protection
type of building
building construction
persons trapped
exposures
access

Resources may include

aircraft (rotary and fixed wing)
personnel trained for the task
specialised personnel
protective clothing
equipment
materials
navigation aids
maps
aide memoirs
pumps

RANGE STATEMENT

Communications equipment may include	appliances specialist appliances radio (eg VHF aeronautical) telephone computer facsimile pager mobile data terminal audible alarms/whistles
Communications may include	ground to air hand signals distress signal units whistles verbal and written instructions radio telephone mobile phone
Incidents may include	life threatening situations protection of property and the environment armed offenders explosive devices
Incident plan may include	incident objectives or goals roles and responsibilities of personnel resource requirements and limitations communication procedures strategies and tactics to be employed contingency arrangements planning checklists flight plans emergency landing areas for aircraft
Welfare of team members	physical stress

RANGE STATEMENT**may include**

physiological stress
 physical needs such as refreshments
 fatigue
 relief

Organisational policy, procedures, requirements and guidelines may vary between sectors and organisations and may include

legislation relevant to the operation/incident/response
 legislation relevant to the organisation
 operational
 corporate and strategic plans
 operational procedures
 operational performance standards
 organisational personnel practices and guidelines
 organisational quality standards
 interagency liaison
 Civil Aviation Orders and requirements
 search and rescue time/procedures/action
 incident management systems

When dealing with aircraft response, performance may be affected by

task
 range
 engine type-piston
 turbine
 wing configuration
 twin/single engine
 load capacity
 airstrip length requirements
 pilot ability
 weather
 fire behaviour
 terrain

When dealing with aircraft, suitability may be affected by

visibility
 range
 speed

RANGE STATEMENT

When dealing with aircraft, supervising of aircraft management procedures includes

take off capability
communications system availability
pilot local knowledge
temporary restricted airspace
aircraft separation-vertically and horizontally
height separation
direction
inbound/outbound calls
Fire Common Traffic Advisory Frequency (F-CTAF)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Use communication systems and equipment

1.1 Equipment is used and operated safely to support communications consistent with organisation's policies and procedures

1.2 **Communication equipment** and techniques are selected to best meet the task, context and needs of the situation

1.3 The **communication system** is correctly utilised to facilitate transmission and reception

1.4 Communication systems are operationally maintained according to organisation's policies and procedures

2. Transmit and receive communications

2.1 Information is transmitted concisely and clearly to facilitate accurate reception of the message in accordance with organisation's policy and procedures

2.2 Contact is acknowledged, communication is confirmed and action initiated

2.3 Communication faults and deficiencies are reported according to organisation's policy and procedures

2.4 Alternative communication strategies are employed according to organisational procedures to address identified faults and deficiencies in communication

ELEMENT**PERFORMANCE CRITERIA****3. Maintain communications equipment**

- 2.5 Communication is processed and recorded in accordance with organisation's policies and procedures
- 3.1 Fault finding techniques are applied and basic maintenance conducted according to organisational policies and procedures
- 3.2 Faulty equipment is identified and noted for repair

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- clean and service communication equipment according to organisational procedures
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communication system
- utilise the organisation's communication processes and systems

Required Knowledge

- organisational policy and procedures relevant to the operation of communication equipment
- range of communication equipment available to the organisation
- the organisation's communication system

Evidence Guide**EVIDENCE GUIDE****Critical aspects for assessment and evidence**

It is essential for this unit that competency be demonstrated in accurately transmitting and receiving

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Conduct an assessment of incident

- 1.1 A risk assessment of all factors impacting upon the response is conducted
- 1.2 An initial assessment of *resources* required is conducted
- 1.3 Resources required to deal with the incident are identified
- 1.4 *Constraints* which may impede the response are identified
- 1.5 *Initial response options* are identified and assessed

2. Establish control and command

- 2.1 Control is assumed in accordance with the organisation's policies and procedures
- 2.2 *Communication systems* are activated in accordance with organisation's policies and procedures
- 2.3 Reporting processes are activated in accordance with organisational policies and procedures to provide continuous monitoring and evaluation of incident
- 2.4 *Command and control facilities* are established

3. Develop operational plan

- 3.1 *Operational plan* is developed and adjusted if required in accordance with response requirements and operational guidelines

ELEMENT	PERFORMANCE CRITERIA
4. Implement operational plan	<p>3.2 Response strategies are identified</p> <p>3.3 Tactics to effectively manage the incident are identified in accordance with the operational plan</p> <p>3.4 Tasks are determined and prioritised</p> <p>4.1 Operational plan is communicated to teams in accordance with the organisation's guidelines</p> <p>4.2 Resources are deployed to ensure that the operational plan is implemented in accordance with organisation guidelines</p> <p>4.3 Operations are conducted and monitored in accordance with the operational plan</p> <p>4.4 Operational reports are issued in accordance with <i>policy and procedures</i></p> <p>4.5 Operations are modified as required by the situation</p> <p>4.6 Resources are requested, acquired and deployed</p>
5. Manage post incident operations	<p>5.1 Resources are accounted for and demobilised in accordance with organisational policies and procedures</p> <p>5.2 Post operational <i>documentation</i> is completed to organisational requirements</p> <p>5.3 Post incident recovery is initiated in accordance with the organisation's policies and procedures</p> <p>5.4 Effectiveness of operations is evaluated and documented</p> <p>5.5 Debriefing conducted in accordance with organisational guidelines</p> <p>5.6 Recommendations are made for changes in policies and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility

REQUIRED SKILLS AND KNOWLEDGE

- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
 - electronic data exchange systems etc.
 - equipment and consumables
 - identification and correct use of equipment
 - materials
 - other organisations
 - personnel
 - personnel and external authorities
 - processes and procedures
 - radio frequency devices
 - team and personnel management
 - team dynamics
- use of a range of information technology devices including computers
- using tools and techniques to solve problems

Required Knowledge

- codes of practice or other legislative requirements
- current principles and practices in response activities
- display of the following knowledge and skills in terms of job role or function:
 - emergency management plans
 - emergency site layout
 - focus of operation of work systems and equipment
 - legislation
 - organisational command structure
 - relevant agreements
 - roles and responsibilities of all organisations
 - security and confidentiality of material

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate

It is essential for this unit that competence be demonstrated in assessment of incident both functionally and strategically; development of a plan

EVIDENCE GUIDE

competency in this unit

and implementation of response in accordance with the organisation's policies and procedures.

Strategic reaction to changes within the emergency environment

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment

Specific resources for assessment

Resources should involve access to, or simulation of, emergency situations in a multi-team response environment.

This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial response options will be determined by

the availability of resources and estimated outcome
organisational guidelines
regulatory authorities
legislative requirements

Risks to life and property

fire

PUAOPE007B Command agency personnel within a multi-agency emergency response

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competence to command an organisation's personnel within a multi-agency emergency response environment.

Command is the internal direction of the members and resources of an organisation in the performance of the organisation's roles and tasks by agreement or in accordance with relevant legislation. Command operates vertically within an organisation.

Application of the Unit

This unit applies to Public Safety personnel who have a command role within their own organisation and are required to administer that command in a multi-agency response environment. It does not include the requirement to administer command of personnel from other agencies in a multi-agency response.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Take command

- 1.1 Command is exercised in accordance with organisation authority and guidelines.
- 1.2 The identity, location and contact details of the commander are communicated to internal personnel and to relevant external authorities/organisations/individuals pertinent to the emergency/incident.

2. Establish a command facility

- 2.1 An appropriate ***command facility*** is established and operated in accordance with organisational guidelines.
- 2.2 Details of the facility are communicated to internal personnel and to relevant external authorities/organisations/individuals as required.

3. Establish a command structure

- 3.1 A command structure is established appropriate to the nature and complexity of the task (s) undertaken by the organisation.
- 3.2 The command structure is expanded, contracted or modified in response to changes within the emergency environment.

4. Establish procedures to permit command to be exercised

- 4.1 Command structure is communicated to internal personnel and external authorities/individuals whom may have a regulatory interest applicable to the emergency/incident.
- 4.2 Command ***information management system*** is implemented.
- 4.3 Communication mechanisms and procedures are

ELEMENT	PERFORMANCE CRITERIA
	implemented between levels of command in accordance with organisational guidelines.
	4.4 Liaison is established and maintained to meet control and command requirements.
	4.5 A public information system is established in accordance with control plan requirements.
5. Determine operational command plan	5.1 Tasks are received and/or determined in accordance with the control requirements.
	5.2 Operational command plan to implement strategies is developed and modified as required in accordance with organisational guidelines.
	5.3 Appropriate tactics to effectively manage the emergency/incident are identified in accordance with the operational command plan.
6. Manage resources under organisation command	6.1 Resources are deployed to ensure that the operational command plan is implemented in accordance with organisational guidelines.
	6.2 Human and physical resources are effectively managed to achieve command plan outcomes.
7. Manage operation(s)	7.1 Operations are conducted in accordance with the operational command plan.
	7.2 Significant changes in status and actions taken are reported consistent with organisational policy and procedures.
	7.3 Operations are redirected as required to meet changes in the conditions which affect the emergency/incident situation.
8. Conclude operation(s)	8.1 Physical, human and capital resources are accounted for in accordance with organisational guidelines.
	8.2 Debriefing requirements are met in accordance with organisational guidelines.
	8.3 Operational documentation is completed to organisation standards.
	8.4 Reports are produced as required.
9. Review operations	9.1 Plans and guidelines are evaluated and reviewed.
	9.2 Effectiveness of command and interaction with control is evaluated and documented.
	9.3 Reports are produced and communicated in accordance with established protocols.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility, other organisations' personnel and external authorities
- analyse emergency situations both functionally and strategically
- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
 - operative and non-operative personnel
 - materials
 - equipment and consumables
- effective deployment, monitoring and communication of organisation allocated task(s)
- identification and correct use of equipment
- implement response in accordance with organisational procedures and within bounds of authority
- incorporate risk management and contingency processes
- liaise effectively with emergency controller
- operation of work systems and equipment
- processes and procedures
- secure emergency/operations site
- select, prioritise, implement and evaluate appropriate strategies
- strategically react to changes within the emergency environment
- using a range of information technology devices including:
 - computers
 - radio frequency devices
 - electronic data exchange systems etc
- using tools and techniques to solve problems

Required Knowledge

- applications of relevant agreements
- code of practice or other legislative requirements
- emergency site layout
- identification and correct use of equipment
- knowledge of current principles and practices to conduct an activity which exercises elements of public safety management
- organisational command structure
- processes and procedures
- security and confidentiality of material

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- Effective deployment, monitoring and communication of organisation allocated task(s)
- analysis of emergency situations both functionally and strategically
- selection, prioritisation, implementation and evaluation of appropriate strategies
- implementation of response in accordance with organisational procedures and within bounds of authority
- securing emergency/operations site
- strategic reaction to changes within the emergency environment,
- incorporation of risk management and contingency processes
- effective liaison with emergency controller and
- logging and recording all actions and decisions

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment.

Specific resources for assessment

Resources should involve access to or simulation of emergency situations in a multi-organisation response environment. This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of emergencies (imminent or actual) may include:

- natural events
- drought
- fire (forest
- range
- urban)
- avalanche snow/ice/hail
- tsunami
- windstorm/tropical storm
- hurricane/typhoon
- biological
- extreme heat/cold
- flood/wind driven water
- earthquakes/land shifts
- volcanic eruption
- tornado/cyclone
- landslide/mudslide
- dust/sand storms
- lightning storm
- search and rescue
- fauna rescues e.g. marine life rescue

Technological/industrial events may include:

- radiological accidents
- dam/levee failure
- fuel/resource shortages
- hazardous material releases
- explosions/fire
- transportation accidents
- building/structure collapse
- power/utility failure
- extreme air pollution
- strikes
- business interruption
- financial collapse

Civil/political events may include:

- economic
- general strike
- terrorism
- sabotage
- hostage situation(s)
- civil unrest
- eco-terrorism
- enemy attack

Considerations in the determination of the nature, extent and potential of an emergency may include:

- risk to life
- risk to property
- risk to environment
- scope and scale of incident including likely duration of incident
- resource availability
- potential for changes in situation
- topography
- weather
- speed of onset
- hazard agent location
- demography

Resources may include:

- human-operations personnel
- volunteers
- support personnel
- local
- state/territory and federal governments
- physical-equipment
- machinery
- vehicles
- technology devices
- communication devices
- aviation and marine vessels

Information management system may include:

- data receipt
- recording
- storage and dispatch modes
- procedures and protocols
- types of technology – electronic data exchange devices
- audio and visual recording mechanisms
- public/media information dissemination
- security and authorisation assignment
- recording and documenting of incident

Personnel support activities may include supply of:

- catering
- sanitation
- shelter
- rest/relief counselling services
- stress management services

Command facility establishment procedures and principles may include consideration of:

- proximity to emergency/incident
- size and type of structure
- special incident requirements
- communication modes

- logistical operations
 - site access and exit requirements
 - security requirements
 - equipment characteristics
 - support services
 - amenities
 - parking
 - topography
 - environment
 - climatic conditions
 - logistical operations
- Communication processes and systems* may include:
- designation of appropriate modes and channels of communication
 - communication responsibilities of personnel
 - radio communications
 - inter organisation liaison
 - data transfer
 - telecommunications
 - interpersonal communications
- Internal and external personnel and authorities* may include:
- operational personnel
 - emergency organisations
 - ancillary organisations
 - higher authorities
 - public
 - media
 - clients
 - government and semi government authorities and departments
 - witnesses
 - victims
 - occupational health and safety specialists
 - emergency management specialists
 - service providers
 - other analysts and stakeholders
- Support services* may include:
- emergency agencies
 - water
 - gas and power agencies
 - welfare and counselling organisations
 - medical organisations
 - equipment suppliers
 - contractors
 - community service organisations

- Debriefing*** may include:
- land management agencies
 - transport
 - critical incident stress debriefing
 - performance evaluations
 - operational analysis
- Agreed reporting mechanisms*** will involve:
- authorisation
 - distribution and development of reports in accordance with regulatory and organisational requirements and may include:
 - media reports
 - ministerial reports
 - coronial reports
 - situation reports-within emergency for external distribution-status reports
 - performance evaluations
 - legal reports
 - final reports
 - briefing papers
- Activities*** controlled include:
- operations
 - planning
 - logistics
 - communications
- Sources of information/documents*** may include:
- emergency procedures
 - standard operating procedures
 - maps
 - field reports
 - relevant Australian or international documentation in disaster/emergency management
 - organisational and workplace operating procedures and policies
 - client requirements
 - communications technology equipment
 - oral
 - aural or signed communications
 - personal and work area work procedures and practices
 - evacuation procedures
 - occupational health and safety procedures
 - applicable state, territory, commonwealth legislation and regulations which relate to:
 - public safety
 - state of emergency

- occupational health and safety regulations and legislation
- Workplace Relations Act(s)
- workers compensation
- privacy and confidentiality legislation
- freedom of information
- environment protection legislation
- equal opportunity
- equal employment opportunity and affirmative action legislation
- standards and certification requirements
- quality assurance procedures
- memorandum of understanding/agreement
- conventions
- protocols
- policies
- codes of practice

PUATEA001B Work in a team

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers competency in working with others and making a positive contribution to the effectiveness and efficiency of a team in a work environment when predominantly under direct supervision. Limited responsibility towards others is required.

Application of the Unit

This unit applies to all workers working in the Public Safety industry, but is particularly relevant to new workers in assisting integration with the organisational team culture of the agency.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.

Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to team activities	1.1 Roles and responsibilities of team members are recognised.
	1.2 Contribution is made to identifying team goals and objectives.
	1.3 <i>Activities</i> are completed to required standard within timeframe and in accordance with <i>organisation's policies and procedures</i> .
	1.4 <i>Assistance</i> in the completion of tasks is requested from other team members where appropriate.
	1.5 Team members are assisted to ensure efficient and safe completion of tasks in accordance with organisation's policies and procedures.
	1.6 Participation by team members is encouraged and acknowledged.
	1.7 Changes in allocated role and responsibilities are implemented.
	1.8 Team meetings are attended regularly and punctually.
2. Share knowledge and information	2.1 Information relevant to work is communicated effectively with team members to enable efficient completion of tasks in accordance with the organisation's policies and procedures.
	2.2 Knowledge and skills are shared between team members.
3. Give and receive support to/from team members	3.1 <i>Feedback</i> /assistance is given to other team members in an appropriate manner.
	3.2 Team members are supported in achieving workplace goals.
	3.3 Feedback from other team members is acted upon appropriately.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge

- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals.

Consistency in performance

Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated workplace environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Teams*** comprise
- two or more people working towards a shared purpose
- Appropriate situation to request assistance*** may include:
- difficulty meeting timelines
 - to comply with occupational health and safety requirements
 - unsure of best method to complete task
 - to maximise efficiency
- Assisting other team members*** may include:
- own tasks completed
 - to comply with occupational health and safety requirements
 - assistance requested
 - actions of others do not comply with requirements
 - other team member appears to be having difficulty completing task
- Contribute to workplace goals*** may include:
- completion of task
 - achievement of new competencies
 - development of new skills
 - attainment of new knowledge
 - personal development
- Activities*** may include:
- working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies
 - civil/political emergencies and non emergency operations including community events
 - public relations – activities
 - sporting events
 - parades
 - festivals
- Conditions*** under which this competency may be required include
- hazardous conditions eg adverse weather
 - after dark operations
 - difficult terrain
 - time pressure
 - varying time frames from immediate/short term to long term response operations
 - varying access to equipment/resources necessitating the use of improvised techniques
 - single or multi organisation responses
 - dealing with human behaviours that result from emergency situations
 - non-emergency operations and events eg training and community education
- Appropriate feedback on***
- acknowledging initiative

performance may include:

- aptitude
- ideas
- performance and assistance
- providing constructive criticism

Organisation's policy and procedures may vary between sectors and organisations and may include:

- legislation relevant to the operation/incident/response
- legislation relevant to the organisation
- operational
- corporate and strategic plans
- operational procedures
- operational performance standards
- organisation's personnel practices
- policy and procedures
- organisation's quality standards
- organisation's approach to environmental management and sustainability

Communication processes may include:

- established organisation's procedures for recording and reporting
- the use of logs
- notebooks
- pagers
- radios and telephones
- team members may be geographically dispersed and require communication systems and technology to remain in contact

Unit Sector(s)

1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers competency for working as a member of a team or as an individual for periods of time without direct supervision and for mentoring and coaching either in an operational or non-operational environment.

Application of the Unit

This unit applies to all workers working in the Public Safety Industry, but is particularly relevant for new workers to understand the organisation's expectations and limits in regards decision making.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUATEA001B Work in a team (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Undertake work activities

- 1.1 Work requirements are identified and undertaken.
- 1.2 Instructions and directions are understood and implemented.
- 1.3 Communication is maintained with team leader advising of progress of task/activity.
- 1.4 Personal safety and safety of others is maintained.
- 1.5 Any legal requirements and/or ramifications of ***activities*** are communicated to team leader.
- 1.6 ***Work area*** is determined or selected in accordance with operational or organisation's requirements.
- 1.7 Equipment is operated in accordance with the manufacturer's specifications.
- 1.8 OH&S and the organisation's policies and procedures.

2. Accept responsibilities

- 2.1 Responsibilities are accepted according to the organisation's policy and procedures.
- 2.2 Team leader is appraised of the outcome of task/activity.
- 2.3 Any activity that exceeds the scope of the defined task is referred to the supervisor.

3. Set performance requirements

- 3.1 ***Performance requirements*** are based on objectives and goals and agreed with supervisor.

4. Maintain team performance

- 4.1 Individual performance is monitored against defined performance requirements and appropriate action taken to maintain performance if required.
- 4.2 Performance of others is monitored and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met.
- 4.3 Supervisor is provided with feedback and

ELEMENT	PERFORMANCE CRITERIA
	<p>constructive advice.</p> <p>4.4 Issues which cannot be rectified or addressed are referred to the supervisor for appropriate action according to the organisation's policy.</p> <p>4.5 Supervisor is advised of any changes in priorities or tasks.</p> <p>4.6 All <i>required documentation</i> relevant to performance is completed.</p>
5. Act as a team leader as required	<p>5.1 Responsibility for the performance of the team is accepted.</p> <p>5.2 Goals are set, tasks identified and presented to team members.</p> <p>5.3 Instructions and directions are communicated to team members clearly and unambiguously.</p> <p>5.4 Team members' concerns and queries are recognised, discussed and dealt with.</p> <p>5.5 Any legal requirements and/or ramifications of team activities are communicated to team members.</p> <p>5.6 Duties, rosters and responsibilities are allocated to team members having regard to the skills and knowledge required to properly undertake the assignment or task and according to organisation's policy and procedures.</p> <p>5.7 Feedback on own performance is provided as required.</p> <p>5.8 Level of authority is recognised and adhered to.</p> <p>5.9 Operational debrief is conducted in accordance with the organisation's requirements.</p>

Required Skills and Knowledge

Required Skills

- communicating instructions and directions
- communicating performance expectations
- completing a range of documentation
- encouraging team members
- informal performance counselling
- providing feedback on performance
- representing issues to management

- team building

Required Knowledge

- defined OH&S policies and procedures
- knowledge of current principles and practices
- legal requirements and ramifications of team activities
- method of monitoring performance
- organisation's policy for referring performance issues
- organisation's policy relevant to hours of work and work allocation
- organisation's requirements for documenting team performance and activities
- procedures and methods of setting performance expectations
- required to work in a team
- team members' duties and responsibilities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in communication of performance expectations and providing feedback to team members.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment. Where workplace observation is insufficient simulations or case studies may be used.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Scope of allocated task may include:

- extent of activity
- content of activity
- degree of responsibility for task

- Performance requirements*** include
- goals
 - objectives
 - plans
 - standards
 - performance indicators
 - production rates
- Work area*** may be dependent upon
- activity conducted
 - road accessibility
 - logistical support
 - water availability
 - vicinity of built-up areas
 - areas of reduced visibility
 - distance to operation
 - hazards
 - vehicle parking
- Performance issues*** may include:
- occupational health and safety
 - hours of work details
 - concerns about ability to complete work
 - inadequate resources
- Appropriate personnel*** may include:
- manager
 - human resource personnel
 - team leader
 - supervisor
 - team members
- Required documentation*** may include:
- forms
 - proformas
 - incident reports
 - rosters
 - timesheets
 - written reports
 - logs
 - standard operating procedures
 - checklists
- Activities*** may include:
- non operational activities:
 - tasks
 - projects
 - preparing documentation
 - operational activities:
 - responding in a combat or support role to natural emergencies (fire/flood)
 - technological/industrial emergencies

- civil/political emergencies and non-emergency operations including community events
 - public relations activities
 - sporting events
 - parades
 - festivals
- Conditions under which operational activities*** may be may include:
- hazardous conditions including adverse weather
 - after dark operations
 - emergency operations
 - difficult terrain
 - time pressure
 - varying time frames from immediate/short term to long term response operations
 - varying access to equipment necessitating the use of improvised techniques
 - varying levels of resources
 - single or multi organisation responses

Unit Sector(s)

RIIHAN308A Load and unload plant

Modification History

Not applicable.

Unit Descriptor

This unit covers loading and unloading plant in the resources and infrastructure industries. It includes planning and preparing, loading plant, and unloading plant. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent</p>
--	--

	with the evidence guide.
--	--------------------------

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply <i>compliance documentation</i> and <i>safety requirements</i> relevant to the work activity</p> <p>1.2. Work instructions, plans, operational details are obtained, confirmed and applied to the work activity</p> <p>1.3. The loading/unloading site is made safe and isolated from general traffic flow by appropriate barriers</p>
2. Load the plant	<p>2.1. The dimensions and capacity of the <i>float or trailer</i> to safely carry the plant item is confirmed</p> <p>2.2. Tools and loading equipment selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement</p> <p>2.3. Preparation of the <i>plant</i> for transportation are confirmed as having been completed</p> <p>2.4. Loading aids, including ramps and bridging materials, are placed and secured in accordance with the trailer or float specifications</p> <p>2.5. Loading procedure is agreed to by operator and/or guide before loading commences</p> <p>2.6. The plant item is moved onto the trailer or float and halted at the designated position</p>
3. Unload the plant	<p>3.1. Unloading procedure is agreed to by operator and/or guide agreed before unloading commences</p> <p>3.2. Unloading aids, including ramps, are placed and secured in accordance with the trailer or float specifications</p> <p>3.3. Securing devices are slackened and removed in a sequence which optimises safety</p>

	<p>3.4. The plant item is moved off the trailer or float and halted at the designated position</p> <p>3.5. Stow loading aids including ramps and bridging materials and securing devices for further use</p>
--	--

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to load and unload plant:

- apply legislative, organisation and site requirements and procedures for loading and unloading plant
- apply operational safety requirements
- safely drive mobile plant
- access interpret and apply technical information
- calculate volume, weights
- maintain equipment records
- apply fault finding techniques
- comply with environmental requirements
- dispose of environmentally sensitive fluids and materials

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to load and unload plant:

- site and equipment safety requirements
- understanding of required hand signals
- techniques and processes for preparing plant for transportation
- basic motion and restraint theory related to heavy plant on floats or trailers
- basic centre of gravity and balance theory related to heavy plant on floats or trailers
- types, operation, uses and imitations of load securing equipment
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet
- levelling techniques
- JSA's/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for loading and unloading plant • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of loading and unloading plant • working with others to undertake and complete the loading and unloading plant that meets all of the required outcomes • consistent timely completion of loading and unloading plant that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those

	<p>required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment should sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirements, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistent achievement of required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the loading and unloading plant
Guidance information for assessment	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Compliance documentation may include:	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • graphical instructions, signage, work schedules/plans/specifications, load tables, tie-down instructions and charts and materials safety data sheet (MSDS) • safe work procedures related to the loading and unloading of plant items from floats or trailers • regulatory/legislative requirements pertaining to the loading and unloading of plant items from floats or trailers • quality requirements including those relating to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Safety requirements may include:	<ul style="list-style-type: none"> • State or Territory legislation and regulations, organisational safety policies and procedures, and project safety plan. This may include protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment prescribed under legislation, regulation and workplace policies and practices • safe operating procedures that include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, securing devices under strain, centre of gravity and balance requirements, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public

	<ul style="list-style-type: none"> • safe parking practices that include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • emergency procedures that include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
The float or trailer may include:	<ul style="list-style-type: none"> • of generic construction or purpose designed for a particular item or range of plant • normally have self loading aids although some may require an established drive on/off ramp
Plant may include:	<ul style="list-style-type: none"> • loaded and unloaded may be wheeled or tracked

RIIMPO315A Conduct tractor operations

Modification History

Not applicable.

Unit Descriptor

This unit covers conducting tractor operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the tractor; selecting, removing and fitting attachments; relocating the tractor; and carrying out machine operator maintenance and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Tractors must be registered to drive and operate on public roads.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for operations	1.1. Access, interpret and apply <i>compliance documentation</i> relevant to conducting <i>tractor operations</i> 1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task 1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job and check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply <i>environmental</i> protection requirements from the project environmental management plan to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check <i>tractor controls and functions</i> for serviceability and rectify or report any faults
3. Operate tractor	3.1. Identify site hazards associated with tractor operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for tractor to achieve optimum output while achieving specified tolerances 3.3. Operate tractor to work instructions
4. Select, remove and fit attachments	4.1. Select <i>attachment</i> for the task 4.2. Remove and fit attachment 4.3. Test attachment to ensure correct fitting and operation 4.4. Use attachment in accordance with recommendations and design limits 4.5. Clean and store removed attachments in designated location

5. Relocate tractor	5.1. Move tractor safely between worksites, observing relevant codes and traffic management requirements 5.2. Prepare tractor for relocation
6. Carry out machine operator maintenance	6.1. <i>Safely park</i> , shutdown and prepare tractor for maintenance 6.2. Conduct inspection and fault finding 6.3. Remove and replace defective parts safely and in accordance with instructions 6.4. Carry out regular <i>programmed maintenance</i> tasks
7. Clean up	7.1. Clear work area and dispose of or recycle <i>materials</i> 7.2. Clean, check, maintain and store plant, <i>tools and equipment</i>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct tractor operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply tractor and attachment operating techniques
- interpret drawings and sketches
- apply machine attachments changing procedures

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct tractor operations:

- tractor types, characteristics, technical capabilities and limitations
- site and equipment safety requirements
- tractor and attachment operating techniques related to essential tasks
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities

- materials characteristics
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- JSAs/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting tractor operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of tractor operations, which are to include: <ul style="list-style-type: none"> • the minimum of three of the operations listed in the Range Statement, and • the fitting and removal of at least one attachment • working with others to undertake and complete tractor operations that meet all of the required outcomes • consistent timely completion of tractor operations that safely, effectively and efficiently meet the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and

	<p>sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</p> <ul style="list-style-type: none"> • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistently achieving the required outcomes • the conducting of a minimum of three of the tasks listed in the Range Statement

	<ul style="list-style-type: none"> • fitting and removal of at least one attachment • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the tractor operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • codes of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>A tractor:</p>	<ul style="list-style-type: none"> • is a self propelled, wheeled or tracked, commercial or agricultural machine • it may be a rigid or articulated, two wheel or all wheel drive • they are normally used for towing and/or providing a power take off (PTO) for specified attachments • are to include wheeled and may include tracked types
<p>Tractor operations may include:</p>	<ul style="list-style-type: none"> • post hole digging, spraying of herbicides/fertilisers, mowing/slashing, lifting, sweeping and blade based functions
<p>Work instructions may include:</p>	<ul style="list-style-type: none"> • plans, specifications, quality requirements and operational details

	<ul style="list-style-type: none"> quality requirements may include: dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
<p>Safety requirements may be from the site safety plan and organisational policies and procedures and include:</p>	<ul style="list-style-type: none"> protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances safe operating procedures to recognise hazards and prevent risks associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public emergency procedures, including: emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation hazards and risks, which may include: uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials
<p>Environmental requirements are to include:</p>	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
<p>Tractor controls and functions include:</p>	<ul style="list-style-type: none"> implements or other attachments, brakes and manoeuvrability
<p>Attachments may include:</p>	<ul style="list-style-type: none"> a front blade, forklift, slasher, mower, auger, drag broom, power broom, loading platform, rotary hoe, concrete mixer, spraying equipment and disc plough
<p>Safe parking practices is to include:</p>	<ul style="list-style-type: none"> ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement
<p>Programmed maintenance is to include:</p>	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults

Programmed maintenance may include:	<ul style="list-style-type: none"> authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities
Materials may include:	<ul style="list-style-type: none"> clays, silts, stone, gravel, mud, rock, sand, topsoil, timber, blended materials, organic materials, light scrub, grasses and bituminous mixes
Tools and equipment are to include:	<ul style="list-style-type: none"> hand tools and maintenance equipment relevant to the particular tractor

RIIMPO317A Conduct roller operations

Modification History

Not applicable.

Unit Descriptor

This unit covers the conducting roller operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; selecting, removing and fitting attachments; operating and relocating the machine; and carrying out operator maintenance and clean up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply <i>compliance documentation</i> relevant to <i>roller operations</i> in the civil construction industry 1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task 1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, and check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply <i>environmental protection requirements</i> to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out Pre-start, start-up, park and shutdown procedures 2.2. Check, rectify or report <i>roller controls and functions</i> for serviceability and any faults
3. Operate roller	3.1. Identify site hazards and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques to achieve optimum output while achieving specified tolerances 3.3. Operate roller to work instructions in accordance with procedures
4. Select, remove and fit attachments	4.1. Select <i>attachment</i> for the task 4.2. Remove and fit attachment 4.3. Test attachment to ensure correct fitting and operation 4.4. Use attachment in accordance with recommendations and design limits 4.5. Clean and store removed attachments in designated location
5. Relocate the roller	5.1. Move the roller safely between worksites, observing relevant codes and traffic management requirements

	5.2.Prepare the roller for relocation
6. Carry out machine operator maintenance	6.1. Safely park , shutdown and prepare the roller for maintenance 6.2.Conduct inspection and fault finding 6.3.Remove and replace defective parts safely and effectively 6.4.Carry out regular programmed maintenance tasks
7. Clean up	7.1.Clear work area and dispose of or recycle materials 7.2.Clean, check, maintain and store plant, tools and equipment

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct roller operations:

- apply legislative, organisation and site requirements and procedures
- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply attachment and roller operating techniques
- interpret drawings and sketches

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct roller operations:

- roller types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- basic principles of soil compaction
- site and equipment safety requirements
- rolling/compacting techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities

- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions for conducting roller operations in the civil construction industry
- implementation of requirements, procedures and techniques for the safe, effective and efficient completion of roller operations in the civil construction industry, which are to include:
 - operations performed in a minimum of three different soil types and include the mandatory tasks of:
 - compacting materials to pattern and density
 - sealing and finishing
 - the removal and fitting of at least one attachment
- working with others to undertake and complete roller operations in the civil construction industry that meet all of the required outcomes

	<ul style="list-style-type: none"> • consistent timely completion of roller operations in the civil construction industry that safely, effectively and efficiently meet the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand

	<p>testimonial evidence of the candidate's:</p> <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, which are to include operations performed in a minimum of three different soil types and include the mandatory tasks of: <ul style="list-style-type: none"> • compacting materials to pattern and density • sealing and finishing • the removal and fitting of at least one attachment • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete roller operations in the civil construction industry

Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to skid steer loader tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Obtain, identify and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check loader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate skid steer loader	3.1. Identify site hazards associated with skid steer loader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for skid steer loader to achieve optimum output in accordance with manufacturer's design specifications while achieving specified tolerances 3.3. Operate loader to work instructions
4. Lift, carry and place materials	4.1. Conduct communication practices associated with transportation and lifting of materials in accordance with site specific practices and procedures, and confirm between parties 4.2. Select, attach and apply slings and lifting

	<p>gear in accordance with safe working load requirements as identified in legislation</p> <p>4.3.Establish weight of load</p> <p>4.4.Position machinery to ensure stability and locate to effectively shift materials according to job specifications</p> <p>4.5.Shift load safely and effectively</p> <p>4.6.Move load in accordance with conventional hand and available signals</p>
5. Select, remove and fit attachments	<p>5.1.Select <i>attachment</i> for the task</p> <p>5.2.Remove and fit attachment</p> <p>5.3.Test attachment to ensure correct fitting and operation as specified</p> <p>5.4.Use attachment in accordance with recommendations and design limits</p> <p>5.5.Clean and store removed attachments in designated location</p>
6. Relocate the skid steer loader	<p>6.1.Move skid steer loader safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2.Prepare for relocation of skid steer loader</p>
7. Carry out machine operator maintenance	<p>7.1.Safely park, shutdown and prepare machine for <i>maintenance</i></p> <p>7.2.Conduct inspection and fault finding</p> <p>7.3.Remove and replace defective parts safely and effectively</p> <p>7.4.Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1.Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2.Clean, check, maintain and store plant tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.
Required skills
Specific skills are required to achieve the performance criteria in this unit, particularly

for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct civil construction skid steer loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- perform safe working load calculations
- apply skid steer loader operating techniques
- apply processes for interpreting drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- apply basic earthworks calculations
- apply levelling techniques

Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following as required to conduct civil construction skid steer loader operations:

- skid steer loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- skid steer loader techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- Project Quality Requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSAs/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting civil construction skid steer loader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of civil construction skid steer loader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types, and • to include the mandatory tasks of stripping/spreading topsoil and materials, lifting, loading vehicles, excavations, mixing materials and site clean-up • working with others to undertake and complete civil construction skid steer loader operations that meet all of the required outcomes • consistent timely completion of civil construction skid steer loader operations that safely, effectively and efficiently meet the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example,

	<p>language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Relevant compliance documentation may include:	<ul style="list-style-type: none"> legislative, organisation and site requirements and procedures manufacturer's guidelines and specifications Australian standards codes of practice Employment and Workplace Relations legislation Equal Employment Opportunity and Disability Discrimination legislation
A skid steer loader is:	<ul style="list-style-type: none"> a self-propelled wheeled machine in which steering is accomplished by skidding or reversing the wheels or tracks on one side of the machine. It has an integral front-mounted bucket-supporting structure and linkage, which loads or excavates through forward motion of the machine, and lifts, transports and discharges material
Skid steer loader may include:	<ul style="list-style-type: none"> compacting, truck excavation, lifting and carrying materials, cutting batters and benches, rock breaking and any activities associated with attachments listed
Skid steer loader tasks are to include:	<ul style="list-style-type: none"> stripping/spreading topsoil and materials, backfilling, lifting, loading vehicles, excavations, mixing materials and site clean-up
Work instructions may include:	<ul style="list-style-type: none"> plans, specifications, quality requirements and operational details quality requirements may include but not be limited to dimensions, tolerances, standards of

	work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
Safety requirements are to be:	<ul style="list-style-type: none"> in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, a safe distance from excavations, and secured from unauthorised access or movement hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> hand tools and maintenance equipment relevant to the particular loader
Environmental requirements are to include:	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management

Communications practices are to include:	<ul style="list-style-type: none"> • verbal instructions and fault reporting and may include two-way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task • on-site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> • clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes • rock types may include metamorphic, igneous and sedimentary • construction materials may include pegs, wire, cordage, safety equipment and other support equipments
Attachments may include:	<ul style="list-style-type: none"> • a front end loader (FEL), multipurpose 4:1 bucket, forklift, dozer blade, backhoe, auger, chain digger, power broom, profiler, tiller/mixer, rotary hoe, hammer, asphalt cutter/saw, concrete cutter/saw
Operator maintenance is to include:	<ul style="list-style-type: none"> • cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Unit Sector(s)

Mobile Plant Operations

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIMPO319A Conduct backhoe/loader operations

Modification History

Not applicable.

Unit Descriptor

This unit covers the conducting backhoe/loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating backhoe/ loaders; lifting, carrying and placing materials; selecting, removing and fitting attachments; relocating the backhoe/ loaders; carrying out machine operator maintenance; and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to conduct backhoe/loader tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check machine controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate backhoe/ loader	3.1. Identify site hazards associated with backhoe/loader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for backhoe/loader to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate machine to work instructions
4. Lift, carry and place materials	4.1. Conduct communication practices associated with transportation and lifting of materials 4.2. Select and attach slings and lifting gear in accordance with safe working load requirements 4.3. Establish weight of load

	<p>4.4.Position and locate machinery to ensure stability to effectively shift materials according to job specifications</p> <p>4.5.Shift load safely and effectively</p> <p>4.6.Move load in accordance with conventional hand and audible signals</p>
5. Select, remove and fit attachments	<p>5.1.Select <i>attachment</i> for the task</p> <p>5.2.Remove and fit attachment</p> <p>5.3.Test attachment to ensure correct fitting and operation</p> <p>5.4.Use attachment in accordance with recommendations and design limits</p> <p>5.5.Clean and store removed attachments in designated location</p>
6. Relocate the backhoe/ loader	<p>6.1.Move backhoe/loader safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2.Prepare backhoe/loader for relocation</p>
7. Carry out machine operator maintenance	<p>7.1.Park safely, shutdown and prepare machine for <i>maintenance</i></p> <p>7.2.Conduct inspection and fault finding</p> <p>7.3.Remove, replace safely and effectively defective parts</p> <p>7.4.Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1.Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2.Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct backhoe/loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply backhoe/loader techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheet and materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- interpret JSA's/Safe work method statement

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct backhoe/loader operations:

- backhoe/loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- backhoe/loader techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting backhoe/loader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of backhoe/ loader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types and • to include the mandatory tasks: mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes, and cutting/boxing • working with others to undertake and complete backhoe/ loader operations that meet all of the required outcomes • consistent timely completion of backhoe/loader operations that safely, effectively and efficiently meet the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not

	<p>disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types and • the mandatory tasks: mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes, and cutting/boxing • consistently achieving the required outcomes

	<ul style="list-style-type: none"> • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the backhoe/loader operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • codes of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>A backhoe/loader is:</p>	<ul style="list-style-type: none"> • a self-propelled wheeled machine with a main structural support designed to carry both a front-mounted bucket loading mechanism and a rear-mounted backhoe
<p>Backhoe/loader tasks are to include:</p>	<ul style="list-style-type: none"> • mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes and cutting/boxing
<p>Backhoe/loader tasks may include:</p>	<ul style="list-style-type: none"> • scrub clearing, ripping, compacting, cutting, batters and benches, rock breaking, demolition and any activities associated with the attachments listed
<p>A skid steer loader is:</p>	<ul style="list-style-type: none"> • a self-propelled wheeled machine in which steering is accomplished by skidding or reversing the wheels or tracks on one side of the machine. It has an integral front-mounted

	<p>bucket-supporting structure and linkage, which loads or excavates through forward motion of the machine, and lifts, transports and discharges material</p>
Skid steer loader may include:	<ul style="list-style-type: none"> • compacting, truck excavation, lifting and carrying materials, cutting batters and benches, rock breaking and any activities associated with attachments listed
Skid steer loader tasks are to include:	<ul style="list-style-type: none"> • stripping/ spreading topsoil and materials, backfilling, lifting, loading vehicles, excavations, mixing materials and site clean up
Work instructions may include:	<ul style="list-style-type: none"> • plans, specifications, quality requirements and operational details • quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
Safety requirements are to be:	<ul style="list-style-type: none"> • in accordance with State or Territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices • safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement

	<ul style="list-style-type: none"> hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> hand tools and maintenance equipment relevant to the particular loader and may include lifting equipment
Environmental requirements are to include:	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Communications practices are to include:	<ul style="list-style-type: none"> verbal instructions and fault reporting and may include two way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes rock types may include metamorphic, igneous and sedimentary
Attachments may include:	<ul style="list-style-type: none"> extending devices, tilt bucket, buckets, compaction wheel, ripper, plate compactor, rock breaker, auger, broom, mower/slasher, forklift, 4 in 1 bucket and free/rock grab
Operator maintenance is to include:	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Unit Sector(s)

Mobile Plant Operations

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIMPO320B Conduct civil construction excavator operations

Modification History

Not applicable.

Unit Descriptor

This unit covers the conduct excavator operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the machine; lifting, carrying and placing materials; selecting, removing and fitting attachments; relocating the machine; carrying out machine operator maintenance; and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Operator license issued by OHS authority may be required in some states or territories and some excavators must be registered to drive and operate on public roads.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to excavator operations tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Obtain, identify and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine preoperational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check excavator controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and report or rectify any faults
3. Operate excavator	3.1. Identify site hazards associated with excavator operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for excavator to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate excavator to work instructions
4. Lift, carry and place materials	4.1. Conduct communication practices associated with transportation and lifting of materials 4.2. Establish weight of load

	<p>4.3. Select, attach and use slings and lifting gear in accordance with safe working load requirements</p> <p>4.4. Position machinery ensuring stability and locate to effectively shift materials according to job specifications</p> <p>4.5. Shift load safely and effectively</p> <p>4.6. Move load in accordance with conventional hand and audible signals</p>
5. Select, remove and fit attachments	<p>5.1. Select <i>attachment</i> for the task</p> <p>5.2. Remove and fit attachment according to manufacturers manual and site requirements</p> <p>5.3. Test attachment to ensure correct fitting and operation</p> <p>5.4. Use attachment in accordance with recommendations and design limits</p> <p>5.5. Remove, clean and store attachments in designated location</p>
6. Relocate the excavator	<p>6.1. Move excavator safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2. Prepare excavator for relocation</p>
7. Carry out machine operator maintenance	<p>7.1. Safely park-up, shutdown and prepare the machine for <i>maintenance</i></p> <p>7.2. Conduct inspection and fault finding</p> <p>7.3. Remove and replace defective parts safely and effectively</p> <p>7.4. Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2. Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct excavator operations:

- apply legislative, organisation and site requirements and procedures
- apply basic principles of soil technology for civil works
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply excavator and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSA's/Safe work method statement

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct excavator operations:

- excavator types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- excavator and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting excavator operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of excavator operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • to include the mandatory tasks of loading, bulk excavation, backfilling, trench excavation, stockpiling, battering and benching • working with others to undertake and complete excavator operations that meet all of the required outcomes • consistent timely completion of excavator operations that safely, effectively and efficiently meet the required outcomes • laser guidance or ATS are not to be used to assist in control of the machine during assessment
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and

	<p>sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</p> <ul style="list-style-type: none"> • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • to include the mandatory tasks of loading, bulk excavation, backfilling,

	<p>trench excavation, stockpiling, battering and benching</p> <ul style="list-style-type: none"> consistently achieving the required outcomes first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> working with others to undertake and complete excavator operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> legislative, organisation and site requirements and procedures manufacturer's guidelines and specifications Australian standards codes of practice Employment and workplace relations legislation Equal Employment Opportunity and Disability Discrimination legislation
<p>An excavator is:</p>	<ul style="list-style-type: none"> a self-propelled crawler or wheeled machine with an upper structure capable of a minimum of 360 degree rotation which excavates, elevates, swings and discharges material by the action of a bucket fitted to the boom and arm or telescoping boom, without moving the chassis or undercarriage during any part of the working cycle of the machine are to include tracked and may include wheeled excavators
<p>Excavator operations tasks are to include:</p>	<ul style="list-style-type: none"> loading, bulk excavation, backfilling, trench excavation, stockpiling, battering and benching

<p>Excavator operations tasks may include:</p>	<ul style="list-style-type: none"> • compacting materials, demolition, rock breaking, removal of trees and ripping, lifting materials, cutting/boxing, laying pipes, cut and fill, mixing materials, stripping/spreading topsoil and materials
<p>Work instructions may include:</p>	<ul style="list-style-type: none"> • plans, specifications, quality requirements and operational details • quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
<p>Safety requirements are to be:</p>	<ul style="list-style-type: none"> • in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
<p>Safety requirements may include:</p>	<ul style="list-style-type: none"> • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices • safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping,

	extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> hand tools and maintenance equipment relevant to the particular loader
Environmental requirements are to include:	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Communications practices are to include:	<ul style="list-style-type: none"> verbal instructions and fault reporting and may include 2-way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes rock types may include metamorphic, igneous and sedimentary
Attachments may include:	<ul style="list-style-type: none"> ripper/tyne, auger, tilt bucket, rock breaker, buckets, lifting device, vibrating compaction plate and compaction wheel
Operator maintenance is to include:	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range
---	--

	statement. Assessment of performance is to be consistent with the evidence guide.
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply <i>compliance documentation</i> relevant to <i>wheeled front end loader tasks</i></p> <p>1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task</p> <p>1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task</p> <p>1.4. Obtain, identify and implement signage requirements from the project traffic management plan</p> <p>1.5. Select plant, <i>tools and equipment</i> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply <i>environmental</i> protection requirements from the project environmental management plan to the allotted task</p>
2. Conduct machine pre-operational checks	<p>2.1. Carry out pre-start, start-up, park and shutdown procedures</p> <p>2.2. Check front end loader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability, and rectify or report any faults</p>
3. Operate front end loader	<p>3.1. Identify site hazards associated with front end loader operations and use safe operating techniques to minimise risk</p> <p>3.2. Identify and apply operating techniques for front end loader to achieve optimum output in accordance with design specifications while achieving specified tolerances</p> <p>3.3. Operate front end loader to work instructions</p>

4. Attach, secure, lift, carry and place materials	<p>4.1. Conduct communication practices associated with transportation and lifting of materials</p> <p>4.2. Establish weight of load</p> <p>4.3. Select, attach and use slings and lifting gear in accordance with safe working load requirements</p> <p>4.4. Position machinery to ensure stability and locate to effectively shift materials according to job specifications</p> <p>4.5. Shift load safely and effectively</p> <p>4.6. Move load in accordance with conventional hand and audible signals</p>
5. Select, remove and fit attachments	<p>5.1. Select attachment for the task</p> <p>5.2. Remove and fit attachment</p> <p>5.3. Test attachment to ensure correct fitting and operation</p> <p>5.4. Use attachment in accordance with recommendations and design limits</p> <p>5.5. Clean and store removed attachments in designated location</p>
6. Relocate the front end loader	<p>6.1. Move front end loader safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2. Prepare front end loader for relocation</p>
7. Carry out machine operator maintenance	<p>7.1. Safely park, shutdown and prepare machine for maintenance</p> <p>7.2. Conduct inspection and fault finding</p> <p>7.3. Remove and replace defective parts safely and effectively</p> <p>7.4. Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2. Clean, check, maintain and store plant tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct civil construction wheeled front end loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply front end loader and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSAs/Safe work method statement

Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following as required to conduct civil construction wheeled front end loader operations:

- front end loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- front end loader and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology

- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSAs/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting civil construction wheeled front end loader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of civil construction wheeled front end loader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • to include the mandatory tasks of mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials • working with others to undertake and complete civil construction wheeled front end loader operations that meet all of the required outcomes • consistent timely completion of civil construction wheeled front end loader operations that safely, effectively and efficiently meet the required outcomes
Context of and specific	<ul style="list-style-type: none"> • This unit must be assessed in the context of the

<p>resources for assessment</p>	<p>work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</p> <ul style="list-style-type: none"> • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil

	<p>types; and</p> <ul style="list-style-type: none"> to include the mandatory tasks of mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials consistently achieving the required outcomes first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> working with others to undertake and complete civil construction wheeled front end loader operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Relevant compliance documentation may include:	<ul style="list-style-type: none"> legislative, organisation and site requirements and procedures manufacturer's guidelines and specifications Australian standards codes of practice Employment and Workplace Relations legislation Equal Employment Opportunity and Disability Discrimination legislation
A wheeled front end loader is:	<ul style="list-style-type: none"> a self-propelled wheeled machine with an integral front-mounted bucket-supporting structure and linkage with integral quick coupler it loads or excavates through forward motion of the machine, and lifts, transports and discharges material

<p>Front end loader tasks are to include:</p>	<ul style="list-style-type: none"> • mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials
<p>Work instructions may include:</p>	<ul style="list-style-type: none"> • plans, specifications, quality requirements and operational details • quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
<p>Safety requirements are to be:</p>	<ul style="list-style-type: none"> • in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
<p>Safety requirements may include:</p>	<ul style="list-style-type: none"> • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices • safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation

Tools and equipment are to include:	<ul style="list-style-type: none"> hand tools and maintenance equipment relevant to the particular loader
Environmental requirements are to include:	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Communications practices are to include:	<ul style="list-style-type: none"> verbal instructions and fault reporting and may include two way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes rock types may include metamorphic, igneous and sedimentary
Attachments are to include:	<ul style="list-style-type: none"> a bucket (general purpose or multipurpose)
Attachments may include:	<ul style="list-style-type: none"> rippers/scarifiers and/or other attachments approved by the manufacturer
Operator maintenance is to include:	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults <p>It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities</p>

Unit Sector(s)

Mobile Plant Operations

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIMPO322A Conduct civil construction tracked front end loader operations

Modification History

Not applicable.

Unit Descriptor

This unit covers conducting tracked front end loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the machine; lifting, carrying and placing materials; relocating the machine; carrying out machine operator maintenance; and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Operator license issued by OHS authority may be required in some states or territories and tracked loaders must be registered to drive and operate on public roads.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent</p>
--	--

	with the evidence guide.
--	--------------------------

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply <i>compliance documentation</i> relevant to <i>tracked front end loader tasks</i></p> <p>1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task</p> <p>1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task</p> <p>1.4. Identify, obtain and implement signage requirements from the project traffic management plan</p> <p>1.5. Select plant, <i>tools and equipment</i> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply <i>environmental</i> protection requirements from the project environmental management plan, to the allotted task</p>
2. Conduct machine pre-operational checks	<p>2.1. Carry out <i>pre-start, start-up, park and shutdown procedures</i></p> <p>2.2. Check front end loader controls and functions, including implements or other <i>attachments</i>, brakes and manoeuvrability for serviceability and rectify or report any faults</p>
3. Operate front end loader	<p>3.1. Identify site hazards associated with front end loader operations and safe operating techniques are used to minimise risk</p> <p>3.2. Identify and apply operating techniques for front end loader to achieve optimum output in accordance with design specifications while achieving specified tolerances</p> <p>3.3. Operate front end loader to work instructions</p>
4. Attach, secure, lift, carry and	4.1. Conduct <i>communication</i> practices

place	<p>associated with transportation and lifting of materials</p> <p>4.2.Establish weight of load</p> <p>4.3.Select , attach and use slings and lifting gear in accordance with safe working load requirements</p> <p>4.4.Position machinery to ensure stability and locate to effectively shift materials according to job specifications</p> <p>4.5.Shift load safely and effectively</p> <p>4.6.Move load in accordance with conventional hand and audible signals</p>
5. Relocate the front end loader	<p>5.1.Move front end loader safely between work sites, observing relevant codes and traffic management requirements</p> <p>5.2.Prepare front end loader for relocation</p>
6. Carry out machine operator maintenance	<p>6.1.Safely park front, shutdown and prepared machine for <i>maintenance</i></p> <p>6.2.Conduct inspection and fault finding</p> <p>6.3.Remove and replace defective parts safely and effectively</p> <p>6.4.Carry out regular programmed maintenance tasks</p>
7. Clean up	<p>7.1.Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>7.2.Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct tracked front end loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements

- apply techniques for calculating safe working loads
- apply front end loader and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSA's/Safe work method statement requirements

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct tracked front end loader operations:

- tracked front end loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- front end loader and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction

with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to dozer operations tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check dozer controls for serviceability and functions, including implements or other attachments, brakes and manoeuvrability and rectify or report any faults
3. Operate dozer	3.1. Identify site hazards associated with dozer operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for dozer to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate dozer to work instructions
4. Select, remove and fit attachments	4.1. Select attachment for the task 4.2. Remove and fit attachment 4.3. Test attachment to ensure correct fitting and operation 4.4. Use attachment in accordance with recommendations and design limits 4.5. Remove, clean and store attachments in

	designated location
5. Relocate the dozer	5.1. Move dozer safely between worksites, observing relevant codes and traffic management requirements 5.2. Prepare dozer for relocation
6. Carry out machine operator maintenance	6.1. Safely park, shutdown and prepare machine for <i>maintenance</i> 6.2. Conduct inspection and fault finding 6.3. Remove and replace defective parts safely and effectively 6.4. Carry out regular programmed maintenance tasks
7. Clean up	7.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan 7.2. Clean, check, maintain and store plant, tools and equipment

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct dozer operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply dozer and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques

- apply JSA's/Safe work method statement requirements

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct dozer operations:

- dozer types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- dozer and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods

- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions for conduct dozer operations
- implementation of requirements, procedures and techniques for the safe, effective and

	<p>efficient completion of conduct dozer operations, including:</p> <ul style="list-style-type: none"> • in a minimum of two different soil types, and • to include the mandatory tasks of stripping/spreading topsoil and materials, cut and fill, battering, stockpiling, bulk excavation, cutting drains, benching and backfilling • working with others to undertake and complete the conduct dozer operations that meet all of the required outcomes • consistent timely completion of conduct dozer operations that safely, effectively and efficiently meet the required outcomes • laser guidance or ATS are not to be used to assist in control of the machine during assessment
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with

	<p>disabilities.</p> <ul style="list-style-type: none"> • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types, and • to include the mandatory tasks of stripping/spreading topsoil and materials, cut and fill, battering, stockpiling, bulk excavation, cutting drains, benching and backfilling • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete dozer operations
Guidance information for assessment	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

regional contexts) may also be included.	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> legislative, organisation and site requirements and procedures manufacturer's guidelines and specifications Australian standards codes of practice Employment and workplace relations legislation Equal Employment Opportunity and Disability Discrimination legislation
<p>A dozer:</p>	<ul style="list-style-type: none"> is a self-propelled tracked or wheeled purpose designed machine with a blade mounted at the front end are to include tracked and may include wheeled
<p>Dozer tasks are to include:</p>	<ul style="list-style-type: none"> stripping/spreading topsoil and materials, cut and fill, battering, stockpiling, bulk excavation, cutting drains, benching and backfilling
<p>Dozer tasks may include:</p>	<ul style="list-style-type: none"> land clearing, track rolling, ripping, push loading, scrapers, towing equipment, working in tandem, winching, boxing, mixing materials and constructing fire breaks
<p>Work instructions may include:</p>	<ul style="list-style-type: none"> plans, specifications, quality requirements and operational details quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
<p>Safety requirements are to be:</p>	<ul style="list-style-type: none"> in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
<p>Safety requirements may include:</p>	<ul style="list-style-type: none"> protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with

	<p>underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public</p> <ul style="list-style-type: none"> • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> • hand tools and maintenance equipment relevant to the particular dozer
Environmental requirements are to include:	<ul style="list-style-type: none"> • organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Materials may include:	<ul style="list-style-type: none"> • clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes • rock types may include metamorphic, igneous and sedimentary
Attachments may include:	<ul style="list-style-type: none"> • but not be limited to stick rakes, root rakes, push blade, angle blade, bull blade, power angle tilt blade, rippers, winch, tree pusher, cable plough, stump plough, power control unit and cable drum
Operator maintenance is to include:	<ul style="list-style-type: none"> • cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Unit Sector(s)

Mobile Plant Operations

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIMPO324A Conduct civil construction grader operations

Modification History

Not applicable.

Unit Descriptor

This unit covers conducting grader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the machine; selecting, removing and fitting attachments; relocating the machine; carrying out machine operator maintenance; and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Operator license issued by OHS authority may be required in some states or territories and graders must be registered to drive and operate on public roads.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to grader operations tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Resolve coordination requirements with others at the site prior to commencing and during work activities 1.5. Identify, obtain and implement signage requirements from the project traffic management plan 1.6. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.7. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Recognise and respond to hazardous and emergency situations as required 2.3. Check grader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate grader	3.1. Identify site hazards associated with grader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for grader to achieve optimum output in accordance with design specifications while achieving specified tolerances

	3.3. Operate grader to work instructions
4. Select, remove and fit attachments	<p>4.1. Select <i>attachment</i> for the task</p> <p>4.2. Remove and fit attachment</p> <p>4.3. Test attachment to ensure correct fitting and operation</p> <p>4.4. Use attachment in accordance with recommendations and design limits</p> <p>4.5. Clean and store removed attachments in designated location</p>
5. Relocate the grader	<p>5.1. Move grader safely between worksites, observing relevant codes and traffic management requirements</p> <p>5.2. Prepare grader for relocation</p>
6. Carry out machine operator maintenance	<p>6.1. Safely park, shutdown and prepare machine for <i>maintenance</i></p> <p>6.2. Conduct inspection and fault finding</p> <p>6.3. Remove and replace defective parts safely and effectively</p> <p>6.4. Carry out regular programmed maintenance and housekeeping tasks</p> <p>6.5. Maintain and process records</p>
7. Clean up	<p>7.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>7.2. Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct grader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply grader operating techniques related to essential tasks, including:
 - apply cut and fill techniques

- apply levelling techniques
- construct drains
- form and carry a windrow
- tow equipment/plant
- apply processes for interpreting drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply JSA's/Safe work method statement procedures
- apply diagnostic techniques
- apply operations directing techniques
- apply driving techniques
- apply hazardous goods handling techniques
- interpret plans, reports, maps, specifications
- apply lifting techniques
- organise work tasks
- apply defect reporting requirements
- apply safe work practices
- use communications equipment
- use computer systems
- use hand and power tools

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct grader operations:

- site risk control procedures
- site and equipment health and safety procedures, including:
 - site isolation and traffic control responsibilities and authorities
 - materials safety data sheets (MSDS) and materials handling methods
 - JSA's/Safe work method statement
 - hazard identification and response procedures
 - site and project personal protective equipment requirements
- site and project environmental requirements and constraints
- site and project quality requirements
- site and project communication procedures

- site operational procedures
- civil construction activity sequences of road construction, earthworks and drainage
- civil construction terminology
- processes for interpreting drawings and sketches
- site soil and survey data
- basic principles of soil technology for civil works
- grader types, characteristics, technical capability and limitations
- grader pre-start, start-up, operating and shut-down procedures and techniques
- grader and attachment operating techniques related to essential tasks, including:
 - safe operating techniques in all terrain
 - levelling techniques
- operational, maintenance and basic diagnostic procedures
- methods of changing machine attachments
- site record keeping requirements
- basic earthworks calculations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting grader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of grader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types and • to include the mandatory tasks of cutting and maintaining drains, forming/upgrading/maintaining roads, mixing/ spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements

	<ul style="list-style-type: none"> • working with others to undertake and complete grader operations that meet all of the required outcomes • consistent timely completion of grader operations that safely, effectively and efficiently meet the required outcomes • laser guidance or ATS are not to be used to assist in control of the machine during assessment
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment</p>

	<p>methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types, and • to include the mandatory tasks of cutting and maintaining drains, forming/upgrading/ maintaining roads, mixing/ spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete grader operations
<p>Guidance information for assessment</p>	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant compliance documentation

may include:

- legislative, organisation and site requirements and procedures
- manufacturer's guidelines and specifications
- Australian standards
- codes of practice

	<ul style="list-style-type: none"> • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
A grader:	<ul style="list-style-type: none"> • is a self-propelled articulating or rigid framed wheeled machine, designed to cut, move and place construction materials using a centrally mounted blade and may include forward and/or rear mounted rippers/scarifiers • the blade and attachment controls are normally hydraulic; however, they may be mechanical
Grader tasks are to include:	<ul style="list-style-type: none"> • cutting and maintaining drains, forming/upgrading/maintaining roads, mixing/spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements
Grader tasks may include:	<ul style="list-style-type: none"> • stripping/spreading topsoil and materials, cutting/boxing, cut and fill
Work instructions may include:	<ul style="list-style-type: none"> • plans, specifications, quality requirements and operational details • quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction • soil types and information • survey data, including: cut and fill levels, layer thicknesses, finished levels, finished grades and cross-falls
Safety requirements are to be:	<ul style="list-style-type: none"> • in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> • the site safety plan and organisational policies and procedures • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices • safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel,

	<p>restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public</p> <ul style="list-style-type: none"> • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks may include but not be limited to installed services, damaged or defective pressurise hoses and fastenings, abandoned equipment, adverse weather conditions (electrical storms, floods, fires), chemicals, contaminants, ancillary equipment, fences, holes and pot holes, over-hanging rocks, personnel, unsafe ground, unstable faces, vehicles, powerlines, dust and noise, conveyors, overhead services and stored energy which may include: engine components, radiators and cooling systems, hydraulic tanks and reservoirs, air tanks and reservoirs, hydraulic hoses, air hoses, tyres, air conditioning components, electrical components, braking systems, centrifugal forces • hazardous and emergency situations, which may include: motor vehicle accidents, lighting strikes (potential tyre explosion) and tyre fires (isolation procedures) • emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> • hand tools and maintenance equipment relevant to the particular grader
Environmental requirements are to include:	<ul style="list-style-type: none"> • organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
pre-start, start-up, park and shutdown procedures may include:	<ul style="list-style-type: none"> • external check of the machine • inspection of attachments to ensure security and identify defects • checking of fluid levels (windscreen washer tank, hydraulic oil, coolant, grease, water,

	<p>engine oil, fuel)</p> <ul style="list-style-type: none"> • carry out lubrication • checking of display instrumentation and gauges (indicators, gauges, laser levels), computer systems, including: <ul style="list-style-type: none"> • brake air pressure • brake oil temperature • computer indicators • engine oil pressure • fuel filter • parking brake • retarder • service meter • speedometer/odometer • steering filters • tachometer • torque converter • oil temperature • transmission filter • voltmeter • water temperature • inspection of air filter restriction indicator • inspection and checking of cab (horn, lights, air conditioner) • testing of engine and stop engine lights • testing visual and audio warning devices and lights • checking instruments and control lever • reporting of defects and damage • secure equipment as required by site procedures • render attachments safe • clear access ways
Materials may include:	<ul style="list-style-type: none"> • clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes • rock types may include metamorphic, igneous and sedimentary
Attachments are to include:	<ul style="list-style-type: none"> • tynes/scarifiers
Attachments may include:	<ul style="list-style-type: none"> • dozer blade, machine guidance system, laser levelling equipment, ripper, slash

Operator maintenance is to include:	<ul style="list-style-type: none">• cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

RIIOHS205A Control traffic with stop-slow bat

Modification History

Not applicable.

Unit Descriptor

This unit covers controlling of traffic with a stop-slow bat in resources and infrastructure industries. It includes: planning and preparing; coordinating traffic; operating radios; and cleaning up.

Application of the Unit

This unit is appropriate for those working in a operational roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Plan and prepare</p>	<p>1.1. Access, interpret and apply compliance documentation relevant to controlling of traffic with a stop-slow bat</p> <p>1.2. Obtain, confirm and apply work instructions relevant to the allotted task</p> <p>1.3. Obtain, confirm and apply safety requirements from the site safety plan and organisational policies and procedures for the allotted task</p> <p>1.4. Identify, obtain and implement signage and devices requirements from the project traffic management plan</p> <p>1.5. Select tools and equipment to carry out tasks that are consistent with the requirements of the job; check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan</p>
<p>2. Coordinate traffic</p>	<p>2.1. Position or confirm temporary traffic signs and barriers in accordance with regulations</p> <p>2.2. Direct traffic in accordance with site traffic plan and away from services or areas of potential damage or danger</p> <p>2.3. Control vehicles and pedestrian traffic within the worksite to ensure safety of workers</p> <p>2.4. Monitor traffic, and make adjustments for changing conditions, and position waiting vehicles to allow for smooth traffic flow</p> <p>2.5. Use hand held stop/slow bats in accordance with regulatory authority approved procedures</p> <p>2.6. Use hand signals in accordance with regulatory authority approved procedures</p> <p>2.7. Report traffic offenders in accordance with regulatory authority approved procedures</p>

<p>3. Operate radio</p>	<p>3.1.Adjust <i>radio</i> controls for optimum reception/transmission results</p> <p>3.2.Transmit messages concisely and in accordance with operating procedures or best practice</p> <p>3.3.Maintain radio power supply</p> <p>3.4.Check radio contact after nominated period of non contact</p>
<p>4. Clean up</p>	<p>4.1.Remove or cover signs and devices sequentially to provide warning to motorists during shutdown</p> <p>4.2.Clean, check, maintain and store tools and equipment in accordance with recommendations and standard work practices</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to control traffic with a stop-slow bat:

- apply legislative, organisation and site requirements and procedures

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to control traffic with a stop-slow bat:

- site and equipment safety requirements
- traffic controlling
- traffic management plans
- traffic control signage and barricades
- radio operations
- equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities

- affects of travel speed and vehicle mass on stopping distances
- quality requirements
- JSAs/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for controlling traffic with a stop-slow bat • implementation of requirements, procedures and techniques for the safe, effective and efficient control of traffic with a stop-slow bat • working with others to control traffic with a stop-slow bat that meets all of the required outcomes • consistent timely control of traffic with a stop-slow bat that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Evidence for assessment is best gathered using the outcomes of products and processes of the workplace context. • The assessment environment should not

	<p>disadvantage the participant. 	statement. Assessment of performance is to be consistent with the evidence guide.
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply <i>compliance documentation and procedures</i> relevant to the work activity</p> <p>1.2. Work instructions, including plans, specifications, <i>quality requirements</i> and operational details are obtained, confirmed and applied to the allocated task</p> <p>1.3. Signage requirements are identified and obtained from the project traffic management plan and implemented</p> <p>1.4. Vehicle, <i>tools and equipment</i> selected to carry out <i>tip truck tasks</i> are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported</p> <p>1.5. Environmental protection requirements are identified from the project environmental management plan, confirmed and applied to the allocated task</p>
2. Conduct machine pre-operational checks	<p>2.1. Pre-start, start-up, park and shutdown procedures are carried out</p> <p>2.2. Tip truck controls and functions, including tray, steering, brakes and manoeuvrability are checked for serviceability and any faults are rectified or reported</p>
3. Operate truck	<p>3.1. Site hazards associated with tip truck operations are identified and safe operating techniques are used to minimise risk</p> <p>3.2. Engine power is managed to ensure efficiency of truck movements and to minimise damage to the engine and gears</p> <p>3.3. Engine power is coordinated with gear selection ensuring smooth transition and operation within torque range</p> <p>3.4. <i>Tip truck</i> is operated to work instructions</p> <p>3.5. Road/traffic conditions are constantly</p>

	<p>monitored taking into account of road standards, traffic flow, distance and load, ensuring no injury to people or damage to property, equipment, loads and facilities</p> <p>3.6. Vehicle is brought to a halt smoothly, minimising the wear and tear on vehicle using the engine retarder, gears and brakes</p>
4. Load, transport and tip materials	<p>4.1. Vehicle is positioned at load and discharge points with a minimum of manoeuvre</p> <p>4.2. Tip truck movements including the raising and lowering of the tray are smooth and controlled</p> <p>4.3. Weight and distribution of load is assessed for type of <i>material</i> and size of vehicle to ensure it is within vehicle capacity</p> <p>4.4. Safety and security of load, including load cover requirements, are maintained from loading site to discharge site</p> <p>4.5. Load is discharged on slope and/or over face at fill site</p> <p>4.6. Material is dumped/spread evenly to work instructions</p> <p>4.7. Tray is cleared, lowered and secured before resuming travel</p>
5. Carry out operator maintenance	<p>5.1. Tip truck is safely parked, prepared for <i>operator maintenance</i> and shutdown</p> <p>5.2. Inspection and fault finding are conducted</p> <p>5.3. Defective parts are removed and replaced safely and effectively</p> <p>5.4. Regular programmed maintenance tasks are carried out</p>
6. Clean up	<p>6.1. Work area is cleared and materials disposed of or recycled</p> <p>6.2. Vehicle, tools and equipment are cleaned, checked, maintained and stored</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to conduct tip truck operations:

- apply legislative, organisation and site requirements and procedures for conducting tip truck operations

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to conduct tip truck operations:

- tip truck types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- tip truck operational techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- load quantity calculations
- JSA's/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions for conducting tip truck operations

	<ul style="list-style-type: none"> • implementation of requirements, procedures and techniques for the safe, effective and efficient conduct of tip truck operations • working with others to undertake and complete the conduct of tip truck operations that meets all of the required outcomes • consistent timely completion of tip truck operations that safely, effectively and efficiently meets the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment should sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p>

	<ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirements, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistent achievement of required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete tip truck operations
<p>Guidance information for assessment</p>	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

<p>Compliance documentation and procedures may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • OHS requirements including protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • safe operating procedures including (but not limited to) recognising and preventing hazards associated with fill-site traffic movement, overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices including (but not limited to) ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks including (but not limited to) uneven/unstable terrain, trees, fires, overhead and
--	---

	<p>underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials</p> <ul style="list-style-type: none"> • emergency procedures related to this unit including (but not limited to) emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation • environmental requirements including (but not limited to) organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Quality requirements may include:	<ul style="list-style-type: none"> • dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
Tools and equipment includes:	<ul style="list-style-type: none"> • the hand tools and maintenance equipment associated with the particular tip truck
Tip truck tasks should include:	<ul style="list-style-type: none"> • the transporting and tipping of soils, sand, rocks and construction gravels on public roads and worksites • static tipping and mobile tipping and spreading, discharging/tipping on slopes and discharging/tipping over edges • discharging into bins and hoppers and spreading aggregate
Tip trucks may include:	<ul style="list-style-type: none"> • self-propelled vehicle designed for on road use to transport a variety of construction materials to and from construction sites • vehicles that are rigid (with or without a dog trailer) or articulated • various configurations of tip trucks, the number of vehicle axles, the weight of each vehicle and load capacities are dependent on the vehicle class • loads that are normally discharged by tipping from the rear of the vehicle or trailer but, methods of material discharge may also include side and belly dumping • National Licence Classes for trucks • MR (Medium rigid) – a vehicle (2 axle only) which is greater than 8t GVM, plus a trailer of not more than 9t GVM • HR (Heavy Rigid) – a vehicle (no axle limit) which is

	<p>greater than 8t GVM, plus a trailer of not more than 9t GVM</p> <ul style="list-style-type: none"> • HC (Heavy combination) – a heavy rigid vehicle with a trailer greater than 9t GVM or a prime mover and semi trailer • MC (Multi combination) - multi-combination vehicles like Road Trains and B-Double Vehicles. Also includes vehicles in class 'HC'.
Materials may include:	<ul style="list-style-type: none"> • materials may include but are not limited to clays, silts, stone, gravel, mud, rock, sand, topsoil, bituminous mixes, timber, blended materials, organic materials, typical construction site materials/waste and aggregates • rock types may include metamorphic, igneous and sedimentary
Operator maintenance may include:	<ul style="list-style-type: none"> • cleaning, authorised servicing and the monitoring, recording and reporting of faults • the conduct of authorised minor replacements • the provision of assistance to maintenance personnel during maintenance and repair activities

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Research store product range.	<p>1.1. Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i>.</p> <p>1.2. Identify <i>store product range</i>, according to relevant product information.</p>
2. Recommend home and home improvement products.	<p>2.1. Identify relevant products to meet expressed <i>customer requirements</i> to assist their buying decisions.</p> <p>2.2. Demonstrate <i>features and benefits of products to customers</i> to create a buying environment.</p> <p>2.3. Convey technical features and benefits as outlined in manufacturer specifications.</p>
3. Advise on product warranties.	<p>3.1. Clearly explain comparisons between product and manufacturer warranty terms to customers.</p> <p>3.2. Confirm individual product warranty terms and by accessing relevant sources of information and accurately conveying to customers.</p> <p>3.3. Provide customers with written information regarding individual product warranty terms and conditions, especially extended or promotional warranties, according to store policy and procedures.</p>
4. Estimate quantities and order product.	<p>4.1. <i>Estimate area and product quantities</i>, where required, based on manufacturer specifications, plan provided or customer needs.</p> <p>4.2. Arrange for area measurement where indicated by product type and according to store procedures.</p> <p>4.3. Calculate cost to customers and prepare quotes <i>according to store policy and procedures</i>.</p> <p>4.4. Order product and arrange customer pick up and delivery or installation where required.</p> <p>4.5. Provide customers with accurate information regarding product availability, delivery and installation procedures as required, including date and time of delivery.</p> <p>4.6. Notify customers promptly of any undue delays regarding completion, supply or installation of products.</p>
5. Negotiate price and	5.1. Convey store recommended retail pricing for various brand options accurately conveyed to customers according to legislative

- | | |
|--|---|
| payment options. | requirements. |
| | 5.2.Negotiate individual product prices according to store policy where necessary to achieve sales. |
| | 5.3.Convey store payment options to customers and negotiate preferred option following store procedures. |
| 6. Advise on and arrange product service and repair. | 6.1.Diagnose problem in terms of operator and equipment faults by observation, customer questioning and accessing manufacturer information. |
| | 6.2.Offer solutions according to nature of problem, available product information and store policy. |
| | 6.3.Identify and accurately describe service and repair process to customers, as required, according to store policy. |
| | 6.4.Prepare and supply quotations and timelines to customers for basic service and repairs. |
| | 6.5.Identify and accurately transcribe customer details to repair form according to store procedures. |
| | 6.6.Label and securely store items for repair according to store policy. |
| | 6.7.Notify customers without undue delay on completion of service and repair. |

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - apply product knowledge by providing information and advice to customers and staff, including advice on warranties and product service and repair
 - make recommendations and advise on services through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - handle customers with special needs, including difficult or abusive customers
 - demonstrate product features and operation
 - negotiate price and payment options
- using and applying technology required to demonstrate operation of store product range
- literacy skills to:
 - interpret product information
 - interpret product warranties and guarantees

- numeracy skills to:
 - advise and negotiate price and payment options
 - measure and estimate accurately
 - use metric and imperial measuring scales
 - estimate measurements from architects or builders plans
- technical skills to take measurements from surface areas

Required knowledge

- store policy and procedures in regard to:
 - sales and customer service
 - methods of dealing with special needs and requests of customers
 - customer complaints
 - store pricing and payment and warranty terms and conditions, including GST requirements
 - store product service and repair policy and procedures
- store home and home improvement product range
- design and technical information and features and function and operation of store product range
- quality, energy efficiency and environmental considerations of products
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- continually updates and applies product knowledge to provide comprehensive advice to customers and other sales team members
- understands and applies available product information when providing advice to customers
- consistently applies store policy and procedures and industry codes of practice in regard to sales and customer service procedures
- advises customers and informs other sales team members on store home and home improvement products in the store merchandise range. Advises customers and other sales team members on store merchandise range warranties and store pricing and payment options.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
 - store policy and procedures manuals
 - industry codes of practice and relevant legislation
 - WHS legislation and codes of practice
- an appropriate range of home and home improvement products
- a range of customers with different requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Product knowledge*** may include:
- function
 - brand and product options
 - warranties
 - quality
 - accessories
 - component parts
 - storage and operation
 - design features
 - style
 - available colour range
 - manufacturing process

- price
- partner or complementary products
- country of manufacture
- energy efficiency
- safety features, including flammability
- environmental considerations
- materials and fibre types
- construction of products
- care and maintenance requirements
- stain and dirt resistance
- product performance
- colour fastness, colour fading properties
- availability.

Relevant sources of information may include:

- supplier product leaflets
- store product manuals
- energy rating information
- warranty information
- internet
- trade shows
- customer feedback
- consulting store information
- designated staff members
- contacting suppliers direct.

Store product range may include:

- home and home improvement products
- furniture products
- floor covering products and services
- kitchen and bathroom renovation products
- hardware products
- home gardening products
- soft furnishings
- manchester
- haberdashery.

Customer requirements may include:

- usage requirements
- lifestyle
- price range.

Features and benefits of products may include:

- product type
- product performance features
- product durability
- function
- warranties
- quality
- design aspects of colour and texture feel

- thickness and weight of furnishing fabrics
 - acoustic and thermal insulation properties of materials
 - manufacturing process
 - price
 - country of manufacture
 - energy efficiency
 - environmental considerations.
- Customers* may include:
- new and existing customers
 - people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
 - customers with routine or special needs.
- Estimating area and product quantities* may include:
- using measuring tools
 - using a calculator
 - estimating from builders' and architects' plans
 - on-site measuring
 - estimating based on measurements provided by customer
 - making allowances for pattern matching
 - estimating linear or volume-based quantities.
- Store policy and procedures* may include:
- policy and procedures relating to sales, payment and credit options, store reward schemes and customer service.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element

Performance criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Demonstrate knowledge of product range.

- 1.1. Identify product and *service range*.
- 1.2. Demonstrate knowledge of location of product range.
- 1.3. Operate *inventory system*.
- 1.4. Develop *product knowledge* by accessing *relevant sources of information*.
- 1.5. Develop knowledge and application of manufacturer technical information and specifications of product range.
- 1.6. Research comparisons between products and services and communicate product information.
- 1.7. Convey product information to *customers* and other staff members as required and in line with organisational policies and procedures.

2. Advise on products and services to meet customer requirements.

- 2.1. Identify and evaluate *customer requirements* to provide advice on product suitability to assist buying decisions.
- 2.2. Determine suitability of products and materials according to customer requirements and manufacturer specifications.
- 2.3. Provide accurate advice on product specifications to meet customer requirements according to *relevant legislation*.
- 2.4. Convey features and benefits of products to customers to assist buying decisions.
- 2.5. Demonstrate or explain use and operation of products to customers in a systematic manner as required to create a buying environment and in line with organisational policies and procedures.
- 2.6. Apply correct measuring, fitting or sizing procedures as relevant to the product.
- 2.7. Explain relevant maintenance and care requirements of product to customer.
- 2.8. Clearly explain to customer safety features and safe usage relevant to the product.
- 2.9. Maximise sales opportunities by use of add-on and complementary sales techniques.

- 2.10. Estimate quantities of product required and communicate to customer.
3. Advise on product warranties.
 - 3.1. Clearly explain to customer **comparisons** between product and manufacturer warranty terms.
 - 3.2. Confirm and convey individual product warranty terms and conditions to customer by accessing relevant sources of information.
 - 3.3. Provide customer with written information regarding individual product warranty terms and conditions, especially extended or promotional warranties, according to legislative requirements and **organisational policy and procedures**.
4. Quote on price and payment options.
 - 4.1. Calculate organisation-recommended pricing for various product and service options and convey to customer according to legislative requirements.
 - 4.2. **Negotiate individual product prices** where appropriate according to pricing determinants and organisational policy.
 - 4.3. Convey payment and credit options to customer and negotiate a preferred option following organisational procedures.
5. Advise on and arrange product service and repair.
 - 5.1. Advise customer on range of service and repairs according to organisational policy and procedures.
 - 5.2. Question and actively listen to customer to determine nature of problem.
 - 5.3. Complete **diagnosis of problem** in terms of operator and equipment faults.
 - 5.4. Offer solutions according to nature of problem, available product information, and organisational policy.
 - 5.5. Identify service and repair process and communicate to customer according to company and enterprise policy.
 - 5.6. Identify price and timelines for basic service and repairs and quote to customer where applicable.
 - 5.7. Identify customer details and transcribe to service report according to organisational procedures and legislative requirements.
 - 5.8. Label and securely store item for repair according to organisational policy.
 - 5.9. Organise service according to availability, customer requirements and legislative requirements.
 - 5.10. Notify customer without undue delay on completion of service and repair.
 - 5.11. Take **follow-up action** as necessary to ensure customer satisfaction.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - apply product knowledge by providing information and advice to customers and staff
 - ask questions in order to identify and confirm requirements
 - handle customers with special needs, including difficult or abusive customers
 - interpret and apply non-verbal cues
 - make recommendations and advise on warranties and product service and repair through clear and direct communication
 - respond to customer needs and respect cultural differences
- literacy and numeracy skills to:
 - advise and negotiate price and payment options
 - measure and estimate accurately
 - read and interpret warranties
 - read and interpret product information and specifications
 - read and interpret store policy and procedures
 - write order specifications and delivery details

Required knowledge

- manufacturer technical information
- organisational policy and procedures in regard to:
 - customer complaints
 - methods of dealing with special needs and requests of customers
 - price negotiation and payment options
 - returns and warranty claims
 - sales and customer service, up-selling and on-selling
 - services and repairs
- organisation's product range
- manufacturer technical information
- pricing procedures, including GST requirements
- product and manufacturer warranty terms and conditions
- relevant industry codes of practice, legislation and statutory requirements relating to the recommendation of specialised products and services

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- updates and applies product knowledge to provide comprehensive advice to customers and staff, including technical information and advice on warranties and insurance policies where applicable
- applies organisational policy and procedures and industry codes of practice in regard to sales and customer service procedures
- advises customers and informs sales team members of organisation's range of products, their features and benefits, performance, complementary products, product availability and warranties
- advises customers and sales team members on operation, storage and use of products
- estimates and quotes on quantities of product required, as relevant to the product and customer requirements
- negotiates and administers price and payment options with customers as per organisational policy and procedures
- advises on and arranges for internal and external organisation services, including repairs, according to organisational policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant sources of product information
- relevant documentation, such as:
 - organisational policy and procedures manuals
 - industry codes of practice and relevant legislation
 - organisational inventory
- an appropriate range of products
- a range of customers with different requirements.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- written or verbal answers to questions about specific

skills and knowledge

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Service range may include:

- delivery
- finance options
- installation
- insurance facilities
- material measuring and cutting
- product service and repairs.

Inventory system may be:

- centralised
- electronic
- manual.

Product knowledge may include:

- accessories
- age suitability and rating
- available styles, sizes and colour range
- brand options
- component parts
- country of manufacture
- design features
- durability
- energy efficiency
- environmental considerations and recycled products
- health and hygiene
- manufacturing process and construction
- materials, ingredients and composition
- operation
- performance
- price
- quality

Relevant sources of information may include:

- safety features and toxicity
- storage and care requirements
- supply and availability
- sustainability characteristics, such as:
 - recyclable
 - non-toxic
- warranties
- workmanship.
- catalogues
- contacting suppliers direct
- customer feedback
- designated staff members
- internet
- manufacturer brochures and specifications
- organisation or trade product manuals
- supplier product leaflets
- trade shows.

Customers may include:

- individuals or organisations
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities
- people with routine or special requests
- people with special needs
- regular and new customers.

Customer requirements may include:

- age suitability
- colour preferences and style
- culture and ethnicity
- durability, function and usage
- existing skills and knowledge
- fashion and preferences
- health factors
- interests
- lifestyle
- price
- size
- usage requirements.

Relevant legislation may relate to:

- censorship, licensing and copyright laws relevant to the retail sales environment
- customs regulations
- industry codes of practice
- work health and safety (WHS)
- pricing procedures, including GST requirements

- privacy laws
 - sale of second-hand goods
 - Australian consumer law relevant to the retail sales environment.
- Comparisons* between product and manufacturer warranty terms may relate to:
- benefits
 - duration
 - features
 - limitations
 - price, where applicable.
- Organisational policy and procedures* may include:
- interaction with customers
 - processing items for service and repair
 - selling specialised products and services.
- Negotiating individual product prices* may include:
- adding value to purchase
 - bulk discounts
 - individual discounts
 - price matching.
- Diagnosis of problem* may occur:
- by electronic or postal correspondence
 - by telephone
 - face-to-face.
- Follow-up action* may occur:
- by appointment
 - by electronic or postal correspondence
 - by telephone
 - face-to-face
 - formally or informally.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Process incoming and outgoing mail.	<p>1.1. <i>Sort and dispatch incoming mail</i> to nominated recipients or locations.</p> <p>1.2. Collect and check outgoing mail to ensure all items are correctly prepared for dispatch.</p> <p>1.3. Record mail according to <i>store policy and procedures</i>.</p> <p>1.4. Dispatch mail within designated time limits.</p>
2. Process bulk mail.	<p>2.1. Collate documents as required.</p> <p>2.2. Sort and batch envelopes according to Australia Post specifications.</p> <p>2.3. Lodge batched items for delivery.</p>
3. Operate office equipment.	<p>3.1. Identify appropriate <i>equipment</i> for intended application.</p> <p>3.2. Operate equipment according to manufacturer instructions.</p> <p>3.3. Identify and rectify equipment faults or report to <i>relevant personnel</i>.</p> <p>3.4. Follow opening and shutdown processes according to store procedures.</p> <p>3.5. Apply maintenance program for equipment to ensure down time is minimised.</p>
4. File and retrieve documents.	<p>4.1. <i>File documents</i> according to store policy.</p> <p>4.2. Identify and retrieve documents as requested.</p> <p>4.3. Update and modify existing records.</p> <p>4.4. Remove, process and store designated inactive files according to store policy.</p>
5. Establish contact with internal and external customers.	<p>5.1. Use telephone system functions according to store policy.</p> <p>5.2. Obtain and accurately record telephone and fax number or email <i>address</i>.</p> <p>5.3. Answer incoming calls promptly and according to store policy.</p> <p>5.4. Establish and clearly convey purpose of <i>contact</i>.</p> <p>5.5. Transfer or place calls on hold as required.</p> <p>5.6. Keep customers informed of delays and action being taken.</p> <p>5.7. Record messages accurately and promptly return calls if</p>

required.

- | | |
|-----------------------------------|--|
| 6. Prepare simple correspondence. | 6.1.Prepare and present correspondence for approval or signature according to set timeframes.
6.2.Write text using clear, concise language.
6.3.Use correct spelling, punctuation and grammar.
6.4.Use standard form letters according to store policy. |
|-----------------------------------|--|

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- technical skills to operate a range of office technology
- planning and organising skills to complete tasks in a set timeframe
- literacy and numeracy skills to:
 - process, record and document information
 - generate a range of retail documents
- interpersonal communication skills to:
 - report equipment faults
 - answer telephone calls and keep customers informed of delays and action being taken through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication

Required Knowledge

- store policy and procedures in regard to:
 - store administration and clerical systems
 - receiving and dispatching incoming and outgoing mail
 - processing information
 - reporting problems and faults
- relevant regulatory and licensing requirements, such as:

- Work Health and Safety (WHS)
- privacy policies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies procedures for the processing of mail, including bulk mail
- operates and maintains office equipment according to store policy and procedures
- files and retrieves documents according to store policy and procedures
- follows procedures for establishing contact with internal and external customers
- applies procedures for the preparation of simple correspondence.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - manufacturer instructions and operation manuals
- a range of retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXICT001A Operate retail technology
- SIRXFIN002A Perform retail finance duties.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Procedures to ***sort and dispatch incoming mail*** may relate to:
- internal systems
 - Australia Post
 - courier services.
- Store policy and procedures*** in regard to:
- store administration
 - clerical systems
 - operating and maintaining retail equipment.
- Equipment*** may include:
- fax machine
 - telephone system
 - photocopier
 - answering machine or voicemail
 - public address system
 - paging system
 - franking machine
 - typewriters
 - computers
 - calculators
 - adapted equipment for people with a disability, for example, talking calculators, computer hard and software, and TTY.
- Relevant personnel*** may include:
- supervisor
 - team leader
 - manager.
- Systems used to record or ***file documents*** may be:
- manual
 - electronic.
- Contact*** may be established by:
- telephone
 - fax
 - email
 - letter
 - face-to-face contact.

SIRXCCS201 Apply point-of-sale handling procedures

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release Date	Comments
First Release:	This is a revised unit, based on and equivalent to SIRXCCS001A Apply point-of-sale handling procedures.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate point-of-sale equipment, apply store policy and procedures to a range of transactions, interact with customers, and package or wrap an item for transportation.

It covers demonstration of the ability to operate a range of point-of-sale equipment in order to complete sales, returns and exchange transactions, and process a number of methods of payment, according to store policies.

Application of the Unit

This unit applies to frontline service personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Operate point-of-sale equipment.	<p>1.1. Open and close point-of-sale terminal according to <i>store policy and procedures</i>.</p> <p>1.2. Clear point-of-sale terminal and transfer tender according to store procedure.</p> <p>1.3. Handle cash according to store security procedures.</p> <p>1.4. Maintain supplies of change in point-of-sale terminal according to store policy.</p> <p>1.5. Attend active point-of-sale terminals according to store policy.</p> <p>1.6. Complete records for transaction errors according to store policy.</p> <p>1.7. Maintain adequate supplies of dockets, vouchers and <i>point-of-sale documents</i>.</p> <p>1.8. Inform <i>customers</i> of delays in the point-of-sale operation where required.</p>
2. Ensure accuracy of transactions.	<p>2.1. Identify and perform <i>numerical calculations</i> to ensure accurate pricing and collection of money.</p> <p>2.2. Collect numerical information from various sources and calculate accurately with or without the use of a calculator.</p>
3. Perform point-of-sale transactions.	<p>3.1. Complete <i>point-of-sale transactions</i> according to store policy.</p> <p>3.2. Identify and apply store procedures in respect of cash and non cash transactions.</p> <p>3.3. Identify and apply store procedures in regard to exchanges and returns.</p> <p>3.4. Move goods through point-of-sale area efficiently and with attention to fragility and packaging.</p> <p>3.5. Enter information into <i>point-of-sale equipment</i>.</p> <p>3.6. State price or total and amount of cash received verbally to customer.</p> <p>3.7. Tender correct change.</p>

4. Complete sales.
 - 4.1. Complete customer order forms, invoices and receipts and process any loyalty card transactions.
 - 4.2. Identify and process customer delivery requirements according to set timeframes.
 - 4.3. Process sales transactions or direct customers to point-of-sale terminals according to store policy without undue delay.
 - 4.4. Acknowledge and thank customer in line with store policy and procedures.
5. Wrap and pack goods.
 - 5.1. Maintain and request adequate supplies of ***wrapping and packaging materials***.
 - 5.2. Select appropriate wrapping or packaging material.
 - 5.3. Wrap merchandise neatly and effectively where required.
 - 5.4. Pack items safely to avoid damage in transit, and attach labels where required.
 - 5.5. Arrange transfer of merchandise for parcel pick up or other ***delivery methods*** if required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - inform customers of delays
 - listen actively
 - request adequate supplies of wrapping material or bags through clear and direct communication
 - share information
 - state price or total and amount of cash received
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- self-management skills to:
 - deal with different types of transactions
 - follow set routines and procedures
- literacy and numeracy skills to:
 - document sales and delivery information
 - render change
 - undertake work functions, including addition, division, multiplication, percentages and subtraction

Required knowledge

- cash and non-cash handling procedures, including:
 - balancing point-of-sale equipment
 - calculating non-cash documents
 - change required, denominations of change and tendering change
 - clearance of terminal and transference of tender
 - counting cash
 - maintenance of cash float
 - opening and closing point-of-sale terminal
 - recording takings
 - security of cash and non-cash transactions
- functions and procedures for operating point-of-sale equipment, including:
 - calculators
 - electronic scales
 - numerical display board
 - registers
- merchandise handling techniques, including wrapping and packaging techniques
- range of services provided by the store
- relevant legislation and statutory requirements, including:
 - industry codes of practice
 - work health and safety (WHS)
 - Australian consumer law
 - scanners
- store policy and procedures in relation to:
 - allocated duties and responsibilities
 - bag checking
 - customer service
 - exchanges and returns
 - handling, packing and wrapping goods or merchandise
 - point-of-sale transactions
- stock availability
- key features of a calculator

Evidence Guide

Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none">• a real or simulated retail work environment• relevant documentation, such as:<ul style="list-style-type: none">• stock, inventory and price lists• financial transaction dockets and slips• lay-by, credit and product return slips• store policy and procedures manuals• a range of point-of-sale equipment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none">• observation of performance in the work• role play• customer feedback• answers to questions about specific skills and knowledge• review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, work and job role is recommended, for example:</p> <ul style="list-style-type: none">• SIRXCCS202 Interact with customers• SIRXFIN201 Balance and secure point-of-sale terminal• SIRXINV001A Perform stock control procedures• SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the

performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Store policy and procedures*** in regard to:
- cash handling
 - financial transactions
 - handling techniques of stock
 - operation of point-of-sale equipment
 - sales transactions
 - security.
- Point-of-sale documents*** may include:
- credit slips
 - lay-by slips
 - message pads
 - order forms
 - product return slips
 - promotional materials.
- Customers*** may include:
- customers with routine or special requests
 - internal and external contacts
 - new or repeat contacts
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying physical and mental abilities.
- Numerical calculations*** may include:
- addition and subtraction
 - calculations of cash amounts and change
 - calculations of discount amounts
 - estimation of quantities
 - measurement
 - multiplication and division
 - percentages.
- Point-of-sale transactions*** may include:
- cheques
 - credit cards and store cards
 - EFTPOS
 - exchanges
 - gift vouchers
 - lay-by
 - returns
 - smart cards
 - travellers cheques.
- Point-of-sale equipment*** may include:
- cash drawer
 - cash register
 - EFTPOS terminal
 - electronic scales
 - numerical display board

Wrapping and packaging materials may include:

- scanner
- security tagging.
- adhesive tape
- bags
- boxes
- bubble wrap
- gift wrapping
- paper
- ribbon
- string.

Delivery methods may include:

- courier
- domestic or international delivery
- freight
- parcel pick-up
- post or express post.

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Deliver service to customers.	<p>1.1. <i>Communicate</i> with <i>customers</i> in a professional, courteous manner according to store policy.</p> <p>1.2. Meet <i>customer needs</i> and reasonable requests or refer to supervisor, according to store policy and <i>legislative requirements</i>.</p> <p>1.3. Record customer details and information where necessary.</p> <p>1.4. Identify and anticipate possible problems and take action to minimise the effect on customer satisfaction.</p> <p>1.5. Recognise and act upon opportunities to deliver additional levels of <i>service</i> beyond the customer's immediate request.</p> <p>1.6. Maintain contact with customer until sale is completed according to store policy.</p> <p>1.7. Use verbal and non-verbal communication to develop rapport with customers during service delivery.</p> <p>1.8. Encourage repeat customers by promotion of appropriate services or products according to store policy.</p> <p>1.9. Farewell customer appropriately and courteously according to store policy.</p>
2. Respond to customer complaints.	<p>2.1. Convey a positive, helpful attitude to customers when handling <i>complaints</i>, according to store policy.</p> <p>2.2. Handle complaints sensitively, courteously and with discretion.</p> <p>2.3. Establish and confirm with customer nature of complaint by active listening and questioning.</p> <p>2.4. Take action to resolve complaint to customer's satisfaction wherever possible.</p> <p>2.5. Promptly refer unresolved customer dissatisfaction or</p>

- complaints to supervisor.
- 2.6. Take the opportunity to turn incidents of customer dissatisfaction into a demonstration of high-quality service to customer according to store policy.
 - 2.7. Complete documentation regarding customer dissatisfaction or complaints accurately and legibly.
 - 2.8. Take **follow-up action** as necessary to ensure customer satisfaction.
3. Receive and process sales orders.
 - 3.1. Record customer details and information accurately.
 - 3.2. Promptly refer customers to appropriate area as required.
 - 3.3. Provide customers with information in clear, concise manner.
 - 3.4. Process, record and act upon sales orders according to store policy.
 - 3.5. Process customer returns or refunds according to store policy and procedures.
 4. Identify special customer requirements.
 - 4.1. Promptly identify customers with special needs or requirements by observation and questioning.
 - 4.2. Verbally and non-verbally convey a willingness to assist.
 - 4.3. Promptly service, refer or redirect customers' needs as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - build rapport and understanding
 - clarify and feed back information
 - deal with difficult customers
 - listen to customers' needs
 - negotiate with and persuade customers to buy
 - promote products and services
 - respond to complaints effectively and politely
- literacy and numeracy skills to:
 - calculate costs and discounts
 - document sales, stock and delivery information
 - follow procedures for recording customer orders that are placed in person, by telephone or by electronic means

- handle legal tender
- take messages in person or by telephone
- write records of complaints
- weigh and measure goods
- observation and analysis skills to anticipate customer behaviour
- self-management skills to follow set routines and procedures

Required knowledge

- add-on selling concepts
- conflict-resolution strategies
- functions and procedures for operating the store telephone system and other communication equipment, and the relevant numbers
- greeting and farewelling techniques
- location of store departments
- merchandise and service range of store departments
- non-verbal cues indicating customer behaviour
- questioning and active listening techniques
- relevant legislation and statutory requirements, including work health and safety (WHS)
- store policy and procedures in regard to:
 - customer service
 - dealing with customer complaints
 - allocated duties and responsibilities
 - customer returns and refunds
 - lay-by, gift voucher and rain-check procedures
- strategies for handling difficult or abusive customers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- accesses, records and processes sales orders accurately and responsibly, according to store policy and procedures
- identifies the nature of customer complaints, resolves complaints and provides service to customers according to store policies
- collaboratively works within a team to meet customers' needs

- applies store policy and procedures and industry codes of practice in regard to customer service
- provides a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure
- uses effective questioning, active listening and observation skills to identify special customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
 - sales order forms
 - complaint and return forms
 - stock, inventory and price lists
 - store policy and procedures manuals
- a range of customers with different requirements
- point-of-sale equipment and materials
- a communication system or a range of communication equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility

of the item, and local industry and regional contexts) may also be included.

Communication

techniques may include:

- face-to-face or telephone contact with customers
- non-verbal communication
- speaking clearly and concisely
- using appropriate language
- using open and inclusive language.

Customers may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Store policy may relate to:

- cash handling
- customer service
- dealing with customer complaints
- processing sales orders.

Customer needs may include:

- information regarding store facilities and services
- location of specific items within the store
- product information
- returns or refunds.

Legislative requirements may include:

- liquor licensing regulations
- lottery legislation
- sale of second-hand goods
- sale of X and R-rated products
- tobacco laws
- Trade Practices Act
- trading hours
- transport, storage and handling of goods.

Service may include:

- all store activities
- internal and external customers
- follow-up in event of delays in service provision.

Complaints may relate to:

- prices
- products
- service.

Follow-up action may require:

- communication with:
 - customers
 - staff
 - supervisors and management
 - suppliers
- recommendations to supervisor regarding policy and procedure development or alteration.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Process petty cash transactions.	1.1. Check petty cash claims for approval, accuracy and authenticity before processing. 1.2. Check and balance transactions according to <i>store policy and procedures</i> . 1.3. Note irregularities and refer to <i>relevant personnel</i> for resolution. 1.4. Process and record petty cash transactions within designated time limits.
2. Prepare banking documents.	2.1. Balance cashbook entries against record of takings. 2.2. Compile and balance deposit entries. 2.3. List cash and <i>non cash transactions</i> on banking deposit forms, according to the banking institution's guidelines. 2.4. Process in store credit systems according to store policy.
3. Process non cash transactions.	3.1. Balance non cash transactions and present <i>documentation</i> to relevant personnel for checking. 3.2. Note irregularities and refer to relevant personnel for resolution.
4. Reconcile invoices for payment to creditors.	4.1. Identify discrepancies between invoices and delivery notes and report to relevant personnel or section for resolution. 4.2. Identify errors in invoice charges and report to relevant personnel or section for correction or resolution. 4.3. Rectify discrepancies and errors as directed. 4.4. Process corrected and authorised invoices for payment within designated time limits. 4.5. Resolve creditor enquiries or refer to relevant personnel or section for resolution.
5. Prepare invoices for debtors.	5.1. Perform <i>preparatory calculations</i> to produce accurate customer invoices. 5.2. Complete relevant documentation to ensure accuracy of contents. 5.3. Distribute documents to relevant personnel or section for certification prior to being dispatched. 5.4. Dispatch verified documents within designated time limits. 5.5. Copy and <i>file</i> documents for auditing purposes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- self management skills to complete tasks within a set timeframe
- literacy skills to interpret documentation
- numeracy skills to:
 - process petty cash transactions
 - receive and process deliveries
 - perform sales transactions
 - balance cashbook entries and takings
 - generate invoices
- interpersonal skills to:
 - refer and report irregularities, discrepancies and errors in transactions to relevant personnel
 - resolve creditor enquiries or refer to relevant personnel through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication

Required knowledge

- store policy and procedures in regard to:
 - register or terminal balance
 - security of cash and non-cash transactions
 - petty cash
 - cash balances
 - banking procedures
 - purchase requisitions or orders
 - issuing of receipts
 - delivery dockets
 - credit notes
 - statements
 - remittance advices
 - cash register rolls
 - deposit books
 - change required and denomination of change
 - operation of equipment used at register or terminal

- processing delivery and delivery document discrepancies
- invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements
- cash and non-cash handling procedures, including:
 - opening and closing point-of-sale terminal
 - clearance of terminal and transference of tender
 - maintenance of cash balances
 - counting cash
 - calculating non-cash documents
 - customer credit ratings
 - balancing point-of-sale terminal
 - recording takings
 - change required and denominations of change

 - customer refunds

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures in regard to petty cash and non-cash transactions, invoicing, banking processes and processing delivery and document discrepancies
- consistently applies skills related to the reconciliation and payments of invoices for creditors and debtors, according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment

- relevant documentation, such as:
 - store policy and procedures manuals
 - financial transaction dockets, slips and invoices
 - banking deposit forms
- EFTPOS facilities and equipment
- registers and related equipment
- relevant financial management systems.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXADM001A Apply retail office procedures
- SIRXICT001A Operate retail technology.

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Store policy and procedures in regard to:

- store financial systems.

Relevant personnel may include:

- manager
- supervisor
- team leader
- specialist staff.

Non-cash transactions may include:

- EFTPOS and credit cards
- customer credit ratings
- cheques
- hire-purchase
- lay-by

Documentation may include:

- cash on delivery (COD)
- customer refunds.
- purchase requisitions
- purchase orders
- invoices
- receipts
- delivery dockets and receipts
- credit notes
- statements
- remittance advices
- cash register rolls
- deposit books.

Preparatory calculations may include:

- application of prior credit
- discounting
- quantity
- calculation of GST.

Methods used to *file* documents may include:

- manual
- electronic.

 - cash and non-cash transactions security
 - cash balances
 - banking procedures
 - purchase requisitions and orders

- issuing of receipts
- delivery dockets
- credit notes
- statements
- remittance advices
- cash register rolls
- deposit books
- change required and denomination of change
- operation of equipment used at register or terminal
- processing delivery document discrepancies
- invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements
- relevant legislation and statutory requirements
- cash and non-cash handling procedures, including:
 - balancing point-of-sale terminal
 - recording takings
 - security of cash and non-cash transactions
 - change required and denominations of change
 - EFTPOS
 - credit cards
 - gift vouchers
 - lay-by
 - credits and returns

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment Evidence of the following is essential:

and evidence required to demonstrate competency in this unit

- consistently applies store policy and procedures when producing financial reports
- consistently applies store policy and procedures in regard to handling cash
- consistently applies store policy and procedures in regard to the accurate and effective recording of data for reporting and processing document discrepancies and the reconciliation of reports for preparation of trial balances

- consistently applies store policy and procedures in regard to receiving, recording and dispatching to debtors and creditors
- applies follow-up procedures for outstanding accounts.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - financial transaction dockets, slips and invoices
 - recording and tally sheets
 - store policy and procedures manuals
- recording, documenting and filing systems
- registers and related equipment, including EFTPOS facilities and equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Transactions may include:

- cash
- cheque
- credit card
- EFTPOS
- store card
- internet payments
- lay-by
- gift vouchers

- Nominated system*** may include:
- returns.
 - recording
 - documenting
 - reporting systems
 - accounting.
- Relevant personnel*** may include:
- supervisor
 - team leader
 - manager.
- Store policy and procedures*** in regard to:
- financial systems
 - cash handling
 - reconciling accounts.
- Records*** may be:
- manual
 - electronic.
- Sources*** may include:
- staff members
 - formal or informal reports
 - written or verbal data
 - formal or informal meetings
 - quantitative and qualitative data.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Control costs.	<p>1.1. Implement cost reduction measures according to <i>store policy and procedures</i>.</p> <p>1.2. Assess and interpret <i>information</i> on costs and <i>resource</i> allocation.</p> <p>1.3. Encourage <i>team members</i> actively to control costs in their areas of responsibility.</p> <p>1.4. Promptly implement recommendations for improving cost reduction or <i>communicate to relevant personnel</i>.</p>
2. Control budget.	<p>2.1. Monitor and maintain expenditure within budget targets according to store policy.</p> <p>2.2. Compare actual income and expenditure to budget targets at regular intervals, according to store policy.</p> <p>2.3. Monitor, analyse and compare gross profit and loss figures by department or section and store, with budget targets.</p> <p>2.4. Monitor and analyse net profit figures, including floor space profitability, according to budget targets.</p> <p>2.5. Monitor and analyse stock turnover figures according to budget targets.</p> <p>2.6. Promptly inform relevant personnel, where potential occurs for budget under or overspend.</p> <p>2.7. Take prompt corrective action where significant deviations from budget occur.</p> <p>2.8. Negotiate necessary changes or allocations to agreed budget in advance of requirement.</p> <p>2.9. Ensure modifications to existing budgets are authorised according to store policy.</p>
3. Propose expenditure.	<p>3.1. Ensure estimates of costs and benefits are supported by valid, relevant information.</p> <p>3.2. Ensure final recommendations are supported by realistic alternatives and contain accurate, clear <i>proposals</i>.</p> <p>3.3. Ensure recommendations clearly indicate net benefits over designated timeframe and related changes in operations.</p> <p>3.4. Clarify contentious issues by further explanation.</p>

- 3.5. Compare estimates to actual costs and benefits to improve future proposals.
4. Maintain store accounting systems.
- 4.1. Manage and maintain store policy and procedures in regard to **record-keeping systems**.
- 4.2. Monitor and maintain store systems for recording sales figures, revenue and expenditure.
- 4.3. Monitor and maintain systems for recording and retrieving financial, personnel and payroll information as required by store policy.
5. Prepare store sales budgets.
- 5.1. Maintain store policy and procedures in regard to preparation of **budget or target figures**.
- 5.2. Compare, analyse, document and report budget and actual sales revenue and expenditure figures, according to budget targets and store policy.
- 5.3. Maintain accurate records on past sales budgets or targets according to store policy.
- 5.4. Present proposed budgets or targets accurately and concisely.
- 5.5. Justify variations to proposed targets and report according to store policy.
6. Negotiate budgets.
- 6.1. Conduct budget negotiations within a set timeframe and in a manner likely to promote good relationships.
- 6.2. Ensure budget negotiations reflect the overall store policies and objectives relevant to the manager's area of responsibility.
- 6.3. Seek clarification, where areas of uncertainty or disagreement occur.
- 6.4. Inform all relevant personnel promptly of budget decisions.
- 6.5. Present proposals clearly, concisely, in an appropriate form, and emphasising benefits to store operation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - encourage team members to control costs
 - provide information to relevant personnel where potential occurs for budget under or overspend
 - negotiate budgets and provide information on budget decisions through clear and direct communication
 - ask questions to identify and confirm requirements

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- time management skills to prepare, negotiate and complete budgets within set timeframes
- literacy and numeracy skills to:
 - write and present reports
 - compile and analyse budgetary figures

Required knowledge

- store policy and procedures in regard to:
 - financial management
 - resource utilisation
- store revenue
- capital and overhead costs
- interest rates
- pricing policies, including GST requirements
- cost of stock, materials and equipment
- staffing costs
- operational costs
- principles and techniques in:
 - interpersonal communication
 - monitoring resource utilisation and costs
 - analysing efficiency and effectiveness
 - cost-benefit analysis
 - differential analysis
 - risk analysis

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently negotiates, develops and implements store budgets according to store policy and procedures
- monitors, analyses and reports on income and expenditure against budgets according to store policy and procedures
- manages and maintains accurate accounting systems according to store policy and procedures
- develops and maintains store policy and procedures in

regard to store sales budgets or targets.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- store or sample policy and procedures in regard to financial management
- an accounting system
- budgetary information
- a team involved in budget control.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research project
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- financial management
- reporting mechanisms.

Information may include:

- resource utilisation
- capital and overhead costs
- interest rates
- stock, materials and equipment
- staffing levels
- operational costs.

Information may be obtained by:

- direct observation
- written reports
- numerical data.

Resources may include:

- people

- materials
 - equipment and technology
 - finances
 - time.
- Team members*** may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Communication*** may be:
- formal and informal
 - with individuals or groups
 - written, faxed, emailed or spoken.
- Relevant personnel*** may include:
- relevant managers
 - supervisor
 - team leader.
- Proposals*** may include:
- profitability
 - productivity
 - quality of service
 - environmental impact
 - working conditions
 - working relationships
 - team motivation
 - long-term goals
 - short-term goals.
- Record keeping systems*** may include:
- manual
 - computerised.
- Budget or target figures*** may encompass:
- sales
 - cash flow
 - net profit
 - payroll
 - staff expenditure
 - capital
 - maintenance
 - advertising and promotion.

SIRXFIN201 Balance and secure point-of-sale terminal

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXFIN001A Balance point-of-sale terminal.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment. It involves clearing the register, counting money, calculating non-cash transactions, and reconciling and recording takings.

The unit requires the application of store policy and procedures in undertaking those tasks.

Application of the Unit

This unit applies to frontline retail staff working under some supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element

Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- | | |
|--|---|
| 1. Balance and secure takings from register or terminal. | 1.1. Perform <i>register or terminal</i> balance at designated times according to <i>store policy and procedures</i> .
1.2. Separate cash float from takings prior to balancing procedure and secure according to store policy.
1.3. Supply change to register or terminal according to store policy.
1.4. Obtain and interpret register or terminal reading or print-out.
1.5. Secure cash and <i>non cash documents</i> according to store security policy and procedures. |
| 2. Reconcile takings. | 2.1. Count cash accurately.
2.2. Calculate non cash documents accurately.
2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
2.4. Report discrepancies between register or terminal reading and sum of cash and non cash transactions to <i>relevant personnel</i> according to store policy.
2.5. Record store and individual department takings and file <i>records</i> according to store policy. |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
 - balance the register or terminal
 - count cash
 - calculate non-cash transactions
 - calculate discrepancies between reported and actual takings
 - complete documentation

- interpret documentation
- report on takings
- planning and organising skills to complete tasks in a set timeframe
- technology skills to operate register or terminal

Required knowledge

- cash and non-cash handling procedures, including:
 - balancing point-of-sale terminal
 - calculating non-cash documents
 - change required and denominations of change
 - clearance of terminal and transference of tender
 - counting cash
 - credit and returns
 - credit cards
 - EFTPOS
 - gift vouchers
 - lay-by
 - maintenance of cash float
 - opening and closing point-of-sale terminal
 - recording takings
 - security of cash and non-cash transactions
- store policy and procedures in regard to:
 - cash float
 - operation of equipment used at register or terminal
 - register or terminal balance
 - security of cash and non-cash transactions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- applies store policy and procedures in regard to cash float

- applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
 - financial transaction dockets, slips and invoices
 - sample debit card and credit card vouchers
 - recording and tally sheets
 - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Register or terminal*** may be:
- cleared at intervals during or at close of trading
 - cleared by operator or specialist staff
 - electronic

- Store policy and procedures*** in regard to:
- manual.
 - cash handling
 - register or terminal balance
 - security.
- Non-cash documents*** may relate to:
- cash on delivery (COD)
 - cheques
 - credit cards
 - customer credit ratings
 - customer refunds
 - gift vouchers
 - hire-purchase
 - lay-by.
- Relevant personnel*** may include:
- manager
 - supervisor
 - team leader.
- Records*** may be:
- electronic
 - manual.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of <i>equipment</i> used in store or department. 1.2. Operate equipment, according to design specifications and <i>safety requirements</i> . 1.3. Identify equipment faults and report to <i>relevant personnel</i> . 1.4. Identify and apply maintenance program for retail equipment according to <i>store policy and procedures</i> .
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
 - read store procedures for operating equipment
 - enter data
 - perform point-of-sale transactions
 - follow common fault-finding procedures

Required knowledge

- store policy and procedures in regard to:
 - the operation and maintenance of store retail equipment
 - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedure manuals
 - manufacturer instructions and operation manuals
- a range of store retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Equipment may include:

- point-of-sale terminals
- electronic bar coding equipment for price labelling and stocktaking
- portable data entry
- printers
- EFTPOS terminals
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- computers
- scanners
- numerical keyboard equipment, including calculators.
- hazard identification (e.g. workplace inspections)
- emergency, fire and accident procedures
- personal safety procedures
- stress management
- procedures for the use of personal protective clothing and equipment

Safety requirements may include:

- Relevant personnel** may include:
- reporting incidents and accidents in the workplace.
 - supervisor
 - team leader
 - manager.
- Store policy and procedures** in regard to:
- store administration
 - clerical systems
 - operating and maintaining retail equipment
 - Work Health and Safety (WHS).

Provide assistance positively and actively to staff as problems arise.</p> |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - convey knowledge of store technology system to other staff members
 - provide assistance to staff through clear and direct communication
 - refer problems to appropriate personnel
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to process and record information
- technology skills to:
 - apply and use hardware and software
 - use store technology information systems

Required knowledge

- manufacturer specifications in regard to operation of hardware and software
- problem-solving techniques
- relevant industry codes of practice
- relevant legislation and statutory requirements, including:
 - consumer law
 - credit procedures
- software licensing specifications
- store policy and procedures in regard to use and operation of store information technology systems, including:
 - efficient and sustainable use of resources
 - work health and safety (WHS) and ergonomic requirements
 - operation of equipment
 - solutions to problems and breakdowns
 - use and maintenance of hardware and software systems
- store products and services range, including pricing structure

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policy and procedures in regard to information technology systems, including:
 - resolving system faults
 - using and applying store credit and EFTPOS
 - reviewing and entering information on store system
- follows requirements of relevant legislation and statutory requirements, including Australian consumer law and credit procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- hardware and software instruction manuals
- information technology system
- relevant documentation, such as:
 - store or sample policy and procedures on management of information technology systems
 - legislation and statutory requirements
 - WHS requirements
 - industry codes of practice.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Information technology system** used may be:
- centrally based
 - store-based
 - networked.
- Staff members** may be:
- full-time, part-time or casual
 - under contract
 - people with varying degrees of language and literacy
 - people from a range of cultural, social and ethnic backgrounds
 - people with a range of responsibilities and job descriptions.
- Store policy and procedures** in regard to:
- efficient and sustainable use of resources
 - information technology systems
 - WHS
 - processing sales orders.
- Hardware** may include:
- bar coding
 - hand-held pricing equipment
 - personal computers or terminals (stand-alone or networked)
 - point-of-sale terminals
 - scanning equipment.
- Software** may include:
- databases
 - EDI
 - financial
 - spreadsheets
 - word processing.
- Application and uses** may include:
- arrangement of credit for customer via a third party
 - credit checks for granting of credit or loans
 - customer records
 - electronic cataloguing
 - financial management
 - individual, department or item sales performance analysis
 - inventory control
 - point-of-sale operations, including:
 - credit cards
 - EFTPOS
 - loyalty cards
 - online sales
 - smart cards
 - pricing and price changes
 - staff payroll, from staff log-in and log-out information
 - staff rosters
 - stock transfers and delivery
 - use of internet facilities

- Information** may include:
- use of multimedia.
 - customer details or records, including:
 - names
 - contact details
 - consumer information or profiles
 - orders
 - price changes
 - staffing information
 - stock records
 - stock transfers.
- Back-up procedures** may include:
- CD
 - digital tape
 - DVD
 - external hard drive
 - off-site data storage
 - zip disc.
- Faults** may include:
- hardware faults or breakdowns
 - point-of-sale functionality problems, such as:
 - cheque clearances
 - credit facilities
 - EFTPOS
 - pricing variations
 - software functionality problems
 - staff error or lack of training.
- Problem-solving techniques** may include:
- following routine procedures or manufacturer recommendations
 - lateral thinking
 - referral to:
 - operator
 - manager
 - specialist.
- Relevant personnel** may include:
- manager
 - supervisor
 - team leader
 - technical specialist.
- Relevant legislation** may include:
- consumer law
 - credit procedures
 - WHS.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Receive and process incoming goods.	<p>1.1. Maintain cleanliness and orderliness in receiving bay according to <i>store policy and procedures</i>.</p> <p>1.2. Unpack goods using correct <i>handling techniques</i> and <i>equipment</i>, according to store policy.</p> <p>1.3. Remove and promptly dispose of packing materials, according to store policy and relevant <i>legislative requirements</i>.</p> <p>1.4. Check incoming stock and validate against purchase orders and delivery documentation, according to store policy and relevant legislative requirements.</p> <p>1.5. Inspect items received for damage, quality, use by dates, breakage or discrepancies and record, according to store policy.</p> <p>1.6. Record stock levels on store <i>stock systems</i>, according to store policy.</p> <p>1.7. Rotate and store stock, according to the first in first out (FIFO) principle.</p> <p>1.8. Dispatch stock to appropriate area or department.</p> <p>1.9. Apply stock price and code labels when required according to store policy.</p>
2. Rotate stock.	<p>2.1. Carry out stock rotation procedures, according to store routine and policy.</p> <p>2.2. Perform store code checking and reporting procedures, including recording of waste and markdowns.</p> <p>2.3. Place merchandise to achieve a balanced, fully stocked display appearance and promote sales.</p> <p>2.4. Place excess stock in storage or dispose of, according to store policy and legislative requirements.</p> <p>2.5. Maintain safe lifting, shifting and carrying techniques according to store Work Health and Safety (WHS) policy and legislative requirements.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- literacy and numeracy skills to:
 - follow set routines and procedures
 - use electronic labelling and ticketing equipment
 - stock records and delivery documentation
 - report problems

Required knowledge

- store policy and procedures in regard to:
 - stock control
 - store labelling policy
 - product quality standards
 - correct unpacking of goods
 - out-of-date, missing or damaged stock
 - equipment used
 - stock location
 - waste disposal
 - methods of storage
 - delivery documentation
 - stock record documentation
 - dispatch documentation
 - reporting faults and problems
- relevant legislation and statutory requirements in regard to stock control, including WHS
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to stock control
- consistently applies safe working practices in the manual handling and moving of stock according to

WHS legislation and store policy

- interprets and applies manufacturer instructions with regard to handling stock and using relevant equipment
- receives and processes incoming goods and dispatches outgoing goods according to store policy and procedures
- rotates stock and performs out-of-code checking and reporting according to store policy and procedures
- interprets and processes information accurately and responsibly.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant equipment, including:
 - stock moving equipment
 - manual and electronic labelling and ticketing equipment
- computers and stock recording equipment
- relevant documentation, such as:
 - invoices, packing slips, dispatch documents and order forms
 - recording and tally sheets
 - store policy and procedures manuals
 - WHS regulations
 - relevant legislation and statutory requirements
 - industry codes of practice.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXRSK001A Minimise theft
- SIRXCCS002A Interact with customers

- SIRXFIN001A Balance point-of-sale terminal.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures may relate to:

- stock control
- reception and dispatch
- WHS
- food safety.

Handling techniques may vary according to:

- stock characteristics
- industry codes of practice
- legislative requirements.

Equipment may include:

- electronic bar coding equipment
- weighing machines
- thermometers
- trolley return equipment
- portable data entry
- cutting equipment
- protective clothing.

Legislative requirements may include:

- WHS
- hazardous substances and dangerous goods
- labelling of workplace substances
- waste removal and environmental protection
- transport, storage and handling of goods.

Stock systems may be:

- manual
- electronic.

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain and order stock in a retail environment. It involves monitoring receipt and dispatch of goods, maintaining stock records, coordinating stocktake, identifying stock losses, processing orders and following up on orders.

Application of the Unit

This unit applies to retail staff who are responsible for monitoring and coordinating stock levels, storage, distribution and reorder cycles. It includes rostering staff, organising and coordinating stocktakes, maintaining accurate records and routinely reporting on inventory status to relevant personnel according to store policy and procedures.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Monitor receipt and dispatch of goods.	<p>1.1. Delegate responsibility for receipt and dispatch of goods to <i>appropriate staff</i>.</p> <p>1.2. Implement store procedures in regard to receipt, dispatch and secure storage of goods.</p> <p>1.3. Observe <i>staff</i> functions to ensure store procedures are followed and documentation is completed correctly.</p> <p>1.4. Implement store procedures to ensure goods inspected for quantity and quality on receipt.</p> <p>1.5. Act upon variations to quantity and quality of delivered goods, according to <i>store policy and procedures</i>.</p> <p>1.6. Supervise safe <i>handling and storage of goods</i>, according to store policy.</p>
2. Maintain stock records.	<p>2.1. Monitor and maintain stock levels at required levels.</p> <p>2.2. Maintain, monitor and adjust stock reorder cycles as required.</p> <p>2.3. Inform team members of their individual responsibilities in regard to recording of stock.</p> <p>2.4. Maintain stock storage and movement <i>records</i>, according to store policy.</p> <p>2.5. Record stock discrepancies and follow procedures according to store policy.</p> <p>2.6. Monitor stock performance and identify and <i>report</i> fast and slow selling items according to store policy.</p>
3. Coordinate stocktake or cyclical count.	<p>3.1. Interpret policy and procedures in regard to <i>stocktaking</i> and cyclical counts and explain to team members.</p> <p>3.2. <i>Roster</i> staff, according to allocated budget and time constraints.</p> <p>3.3. Allocate stocktaking tasks to individual team members.</p> <p>3.4. Provide team members with clear directions for the performance of each task.</p> <p>3.5. Allocate team members to ensure effective use of staff resources to complete task.</p> <p>3.6. Produce accurate reports on stocktake data, including discrepancies, for management.</p>

- | | |
|---------------------------|---|
| 4. Identify stock losses. | 4.1. Identify, record and assess losses against potential loss forecast on a regular basis. |
| | 4.2. Identify avoidable losses and establish reasons. |
| | 4.3. Recommend and implement possible solutions. |
| 5. Process orders. | 5.1. Process and raise orders for stock as requested, according to store policy and procedures. |
| | 5.2. Maintain ordering and recording system . |
| | 5.3. Ensure availability of sample range, according to buying plan. |
| | 5.4. Order pricing materials as required. |
| | 5.5. Record negotiated purchase and supply agreements and file for retrieval. |
| 6. Follow up orders. | 6.1. Monitor delivery process to meet agreed deadlines. |
| | 6.2. Handle routine supply problems or refer to management as required by store policy. |
| | 6.3. Maintain ongoing liaison with buyers, store or departments, warehouse and suppliers to ensure continuity of supply. |
| | 6.4. Distribute stock, according to store or department allocation. |

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- technical skills to:
 - use store stocktaking systems
 - use electronic recording equipment
- interpersonal skills to:
 - inform team members of their responsibilities and give instructions
 - explain policies and procedures to staff
 - allocate tasks and provide directions for performance of tasks
 - liaise with buyers, store and departments, warehouse and suppliers through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- management skills to coordinate stock takes
- negotiation skills to handle supply problems
- literacy and numeracy skills to:
 - prepare and present stock control reports and documentation

- process orders
- maintain delivery and supply records
- maintain stock distribution records
- maintain stock ordering and recording systems

Required knowledge

- store policy and procedures in regard to:
 - stock control
 - store merchandising system
 - current and future stock levels
 - bar codes, labels and price tags
 - store stock recording system
 - stock replenishment and reorder procedures
 - inter- and intra-store and department transfers
 - reporting of stock discrepancies and damage
 - identifying and recording stock losses
 - identifying and recording discrepancies
 - existing suppliers
 - quality control procedures and requirements
 - receipt and dispatch of goods, including inspection for quality and quantity
- relevant licensing requirements for moving stock mechanically
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant Work Health and Safety (WHS) legislation and codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment Evidence of the following is essential:

and evidence required to demonstrate competency in this unit

- consistently implements and monitors store policy and procedures regarding receipt, dispatch and secure storage of goods
- regularly monitors staff implementation of store procedures and documentation in regard to receipt, dispatch and secure storage of goods
- monitors stock levels, storage, movement and reorder cycles on a regular basis.
- organises and coordinates stocktake according to store

policy and procedures

- consistently raises and processes stock orders and maintains record system according to store policy and procedures
- monitors delivery processes and distributes stock to ensure continuity of supply.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures for receipt and dispatch of goods
 - store procedures for stocktake
 - WHS legislation and codes of practice
 - industry codes of practice
 - legislation and statutory requirements
 - store merchandising and marketing policy and procedures
 - inter- and intra-store and department transfer procedures
 - store quality control procedures and requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Appropriate staff may include:

- frontline staff
- relevant managers

- Staff** may include:
- supervisor
 - team leader
 - specialist staff.
 - full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Store policy and procedures** in regard to:
- stock control
 - stock control system
 - recording procedures
 - procedures for investigating discrepancies
 - store merchandise and marketing
 - pricing, labelling and packaging requirements
 - quality control policy and procedures.
- Handling and storage of goods** may vary according to:
- stock characteristics
 - industry codes of practice.
- Records** may be:
- manual
 - digital.
- Reports** for management may include:
- financial reports
 - business documents
 - informal reports
 - stocktake reports.
- Stocktaking** may be:
- cyclical
 - compliance driven.
- Roster** may include:
- varying levels of staff training
 - staffing levels
 - routine or busy trading conditions
 - full-time, part-time or casual staff
 - range of staff responsibilities.
- Ordering and recording system** may be:
- manual
 - digital.
- Suppliers** may include:
- existing contacts
 - new contacts
 - local suppliers
 - overseas supplies.

SIRXINV004A Buy merchandise

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit

Application of the unit

This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse market.	<p>1.1 Identify and analyse <i>store merchandise and marketing policy and procedures</i>.</p> <p>1.2 Monitor <i>customer requirements</i> formally and informally in order to evaluate market trends and customer needs.</p> <p>1.3 Research new products and services.</p> <p>1.4 Identify, evaluate, implement and review opportunities to improve sales.</p> <p>1.5 Monitor <i>merchandise range</i> to identify the demand for individual items and seasonal variations.</p> <p>1.6 Monitor market competition.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Analyse factors affecting stock levels and range requirements.	2.1 Apply mathematical calculations to measure analyse and report on existing and potential stock loss and dissipation and its <i>impact on business operations</i> . 2.2 Analyse store or department sales figures to determine contribution rates of product lines. 2.3 Determine store or department space requirements and brand product mix according to store policy. 2.4 Determine future directions for merchandise ranges according to store policy.
3 Plan merchandise ranges.	3.1 Develop and implement buying plan according to outcomes of analysis and store policy. 3.2 Determine future directions for merchandise ranges according to store policy. 3.3 Liaise with <i>relevant personnel</i> to coordinate promotional and marketing activities. 3.4 Analyse store or department sales figures to determine contribution rates of product lines. 3.5 Determine investment levels with reference to previous years' sales figures, predicted demand and projected gross profit. 3.6 Identify and act upon contribution improvement opportunities. 3.7 Determine store or department space requirements and brand product mix according to store policy. 3.8 Determine stock levels according to peak seasons, special events and supplier lead time. 3.9 Analyse, evaluate and amend merchandise range and sources of supply according to management, staff and customer <i>feedback</i> .
4 Establish supplier relations.	4.1 Develop cooperative relationships with supplier representatives according to store policy. 4.2 Continuously review existing suppliers in regard to quality, profitability, service and delivery status. 4.3 Identify new suppliers and delete existing suppliers according to <i>performance indicators</i> .

ELEMENT	PERFORMANCE CRITERIA
5 Negotiate supply of goods.	<p>5.1 <i>Negotiate</i> and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.</p> <p>5.2 Authorise special <i>pricing arrangements</i> and customer payment agreements and communicate to relevant staff and management personnel according to store policy.</p> <p>5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.</p> <p>5.4 Identify <i>market factors</i> affecting supply and communicate to relevant personnel.</p> <p>5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.</p> <p>5.6 Take immediate corrective action where potential or actual problems with supply are indicated.</p> <p>5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.</p> <p>5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback.</p>
6 Monitor quality control.	<p>6.1 Establish merchandise quality standards with suppliers according to <i>legal requirements</i>, customer requirements and store policy.</p> <p>6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.</p> <p>6.3 Record and analyse stock return figures against target figure.</p>
7 Introduce product ranges.	<p>7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.</p> <p>7.2 Implement <i>staff training</i> in product knowledge to introduce product range.</p> <p>7.3 Demonstrate or display new ranges to <i>staff</i> according to store merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
8 Maximise profit.	<p>8.1 Calculate or estimate individual product range contributions against budget and targets.</p> <p>8.2 Develop and implement product range assessment checks against budget and targets.</p> <p>8.3 Calculate or estimate overall selling space contributions according to store merchandising plan.</p> <p>8.4 Maximise profit margins in negotiations with suppliers.</p> <p>8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law.</p> <p>8.6 Negotiate specifications for <i>terms of trade</i>.</p>
9 Rationalise stock.	<p>9.1 Review and update stock range at regular intervals.</p> <p>9.2 Identify stock lines to be <i>deleted</i> and take action to minimise adverse effect on profit.</p> <p>9.3 <i>Consolidate stock</i> as required to maximise sales potential.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
 - market trends and projections
 - sales figures and investment levels
 - space requirements
- negotiation skills
 - interpersonal communication skills to:
 - liaise with relevant personnel
 - establish supplier relationships, negotiate supply of goods
 - provide information and training on product range
 - provide feedback and coaching through clear and direct communication

REQUIRED SKILLS AND KNOWLEDGE

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
 - developing pricing policies
 - calculating and estimating product range contributions
 - calculating the cost of stock loss and dissipation
 - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - marketing
 - buying
 - profit margins
 - quality control
 - stock inventory levels: current and future
 - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
 - market needs
 - range of merchandise available
 - market competition
 - existing and possible new suppliers
 - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
 - pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
 - store policy and procedures
 - legislation and statutory requirements
 - industry codes of practice
 - merchandise and supplier data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback

EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store merchandise and marketing policies may include:

- store culture
- current market position
- target market.

Customer requirements may be monitored by:

- questionnaires
- surveys
- observation.

Merchandise range may include:

- existing stock
- new stock.

RANGE STATEMENT

Impact on business operations may include:

- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:

- verbally
- in writing
- in groups
- individually.

Performance indicators may include:

- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:

- face-to-face
- correspondence
- meetings
- telephone or electronic media.

Pricing arrangements may include:

- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

Market factors may include:

- fashion trends

RANGE STATEMENT

- product availability
- sales performance.

Legal requirements may include:

- sale of second-hand goods
- Trade Practices and Fair Trading Acts
- licence, patent or copyright arrangements
- pricing procedures, including GST requirements.

Staff training may include:

- on-the-job
- off-the-job
- one-on-one coaching
- any combination of the above.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Terms of trade may include:

- special buys
- payment terms
- promotional deals with supplier.

Stock lines may be *deleted* due to:

- changes in store policy and culture
- sales performance
- customer requirements
- fashion trends
- product availability
- problems with supply.

Methods to *consolidate stock* may include:

- movement of stock between departments or stores.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage store merchandising.	<p>1.1 Ensure layout and presentation support market position and promote customer flow according to store <i>visual merchandising policies and plans</i>.</p> <p>1.2 Develop and implement layout assessment checks.</p> <p>1.3 Define standards for visual presentations and displays and clearly communicate to all staff</p> <p>1.4 Consult floor staff to assess customer response to space allocations.</p>
2 Plan and manage store advertising and promotions.	<p>2.1 Manage and implement store policies and procedures, in regard to store <i>promotional activities</i>.</p> <p>2.2 Organise activities in line with anticipated or researched customer requirements.</p> <p>2.3 Manage <i>promotions</i> in order to achieve maximum customer impact.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4 Negotiate arrangements with suppliers in regard to special promotional activities.
	2.5 Coordinate store activities to complement shopping centre or retail complex promotions.
	2.6 Develop and implement assessment checks to measure effectiveness of promotions, including layout, visual impact and customer response.
	2.7 Document and report on promotional activities.
3 Manage store pricing policies.	3.1 Maintain store pricing according to <i>organisation pricing policies and procedures</i> in regard to pricing.
	3.2 Maintain accurate information on pricing trends and changes and communicate to relevant staff.
	3.3 Develop and implement procedures for pricing according to store policies and <i>legislative requirements</i> .
4 Manage housekeeping.	4.1 Develop and implement store policies and procedures in regard to <i>store housekeeping and maintenance</i> .
	4.2 Develop and manage rosters or schedules, ensuring store housekeeping standards are monitored and maintained.
	4.3 Initiate <i>contingency plan</i> in the event of merchandise or store presentation problems.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- providing feedback on performance
- interpersonal communication skills to:
 - communicate store standards and expectations to staff
 - consult floor staff
 - negotiate arrangements with suppliers, through clear and direct communication
 - ask questions to identify and confirm requirements

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- roster development
- report writing
- literacy skills in regard to:
 - researching, analysing and interpreting a broad range of written material
 - preparing rosters
 - preparing reports
 - documenting results

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - layout and presentation
 - advertising and promotions
 - pricing or marking down of goods, including risk assessment
 - housekeeping for premises, fittings, fixtures and equipment
 - store merchandise and service range
 - store merchandising plan
 - range and availability of new products and services
 - customer demand and market trends
 - product quality standards
- OHS legislation and codes of practice
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements
- principles and techniques in:
 - visual merchandising
 - project management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- collaboratively plans layout and presentation of merchandise according to store policies and procedures
- assesses effectiveness of layout and presentation according to sales targets or predetermined objectives
- collaboratively plans, coordinates and implements advertising and promotions activities according to store policies and procedures
- assesses and reports on effectiveness of advertising and promotions to staff and management according to store policies and procedures
- collaboratively plans, coordinates and implements pricing activities according to store policies and procedures
- collaboratively plans, coordinates and implements housekeeping activities according to store policies and procedures and OHS legislation, regulations and codes of practice.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - store merchandising plan
 - legislation and statutory requirements
 - OHS legislation, regulations and codes of practice
- a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the

EVIDENCE GUIDE

industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Visual merchandising policies and plans may include:

- target market
- market research
- store image
- store layout and space availability
- seasonal lines
- pricing policy.

Promotional activities may involve:

- external and in-store activities
- corporate or locally based activities
- dealing with advertising agencies and consultants.

Promotions may include:

- advertising
- catalogues
- newspapers
- posters

RANGE STATEMENT

Organisation pricing policies and procedures may include:

- radio or TV
- suppliers
- internet
- website.
- marking down of slow moving stock
- soiled or damaged goods
- goods close to use-by date
- end of season stock
- pricing policies, including GST requirements.

Legislative requirements may include:

- Trade Practices and Fair Trading Acts
- consumer law.

Store housekeeping and maintenance may include:

- store premises
- fittings
- fixtures
- equipment.

Contingency plan may include:

- major spillages
- flood, storm or cyclone
- breakages
- blackout
- break-in.

SIRXMER201 Merchandise products

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER001A Merchandise products.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to merchandise products within a retail store. It involves the consistent application of store policies and procedures in regard to displaying, merchandising, ticketing, labelling, pricing and storing stock. It also includes the application of correct manual handling, storage and display techniques according to stock characteristics, industry codes of practice, and relevant legislation.

Application of the Unit

This unit applies to frontline retail personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Place and arrange merchandise.	<p>1.1.Unpack <i>merchandise</i> according to <i>store policy and procedures</i> and <i>legislative requirements</i>.</p> <p>1.2.Place merchandise on floor, fixtures and shelves in determined locations according to work health and safety (WHS) legislative requirements.</p> <p>1.3.<i>Display</i> merchandise to achieve a balanced, fully-stocked appearance and promote sales.</p> <p>1.4.Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedures.</p> <p>1.5.Place stock range in line with fixtures, ticketing, prices and bar codes.</p> <p>1.6.Rotate stock according to stock requirements and store procedure.</p> <p>1.7.Ensure stock presentation conforms to special <i>handling techniques</i> and other <i>safety requirements</i>.</p>
2. Prepare and apply labels and tickets.	<p>2.1.Prepare <i>labels and tickets</i> for window, wall or floor displays according to store policy.</p> <p>2.2.Prepare tickets using electronic equipment or neatly by hand according to design specifications and store procedures.</p> <p>2.3.Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action according to store procedures.</p> <p>2.4.Use, maintain and store electronic ticketing and labelling equipment according to manufacturer's instructions and store procedures.</p> <p>2.5.Place labels and tickets visibly and correctly on merchandise.</p> <p>2.6.Replace labels and tickets according to store policy.</p>
3. Maintain displays.	<p>3.1.Reset or dismantle unsuitable or out-of-date displays and <i>special promotion areas</i> as directed.</p> <p>3.2.Assist supervisor in selection of merchandise for display.</p> <p>3.3.Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures.</p> <p>3.4.Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and</p>

- legislative requirements.
- 3.5. Identify optimum stock levels and replenish stock according to store policy.
- 3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.
4. Protect merchandise.
- 4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
 - prepare machine or manual labels and tickets
 - read and interpret store procedures and guidelines
 - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

Required knowledge

- store policies and procedures in regard to:
 - availability and use of display materials
 - correct storage of stock
 - correct storage procedures for labelling and ticketing equipment and materials
 - location of display areas
 - merchandise range
 - merchandising, ticketing and pricing of stock
 - scheduling for building or rotating displays
 - stock replenishment
 - stock rotation
 - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
 - manual handling
 - hygiene and sanitation

- hazardous substances
- labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
 - store policy and procedures
 - industry codes of practice
 - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props

- cleaning materials
- relevant documentation, such as:
 - store policy and procedure manuals on housekeeping, merchandising and WHS
 - manufacturer instructions and operation manuals for electronic ticketing equipment
 - relevant legislation and industry codes of practice.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS201 Sell products and services
- SIRXSLS002A Advise on products and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Merchandise may be characterised by:

- type
- brand
- size
- customer needs
- colour
- price.
- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.
- pricing requirements, including GST requirements

Store policy and procedures in regard to:

Legislative

- requirements** may include:
- industry codes of practice
 - discounted items
 - Australian Consumer law.
- Display** may include:
- setting new displays
 - maintaining existing displays.
- Handling techniques** may vary according to:
- stock characteristics
 - store policy
 - legislative requirements
 - industry codes of practice.
- Safety requirements** may relate to:
- transport, storage and handling of goods
 - hazardous substances
 - labelling of workplace substances.
- Preparation of **labels and tickets** may involve:
- pricing gun
 - shelf tickets
 - shelf talkers
 - written labels
 - swing ticketing
 - bar coding
 - price boards
 - header boards.
- Special promotion areas** may be:
- permanent or temporary
 - interior or exterior
 - publicly accessible
 - windows
 - shelves
 - wall fixtures
 - on floor.

SIRXMER202 Plan, create and maintain displays

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER005A Create a display.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify requirements for displays, develop display ideas, obtain approval from relevant personnel, and plan and build displays. It also covers maintaining displays to meet the requirements of the product, the audience and the organisation.

Application of the Unit

This unit applies to floor and sales team members responsible for merchandise displays for a retail business.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify requirements for displays.	1.1. Identify <i>purpose, audience</i> and products for each display. 1.2. Identify organisational requirements and research <i>relevant information</i> where required. 1.3. Identify available budget and <i>resources</i> required to create the display. 1.4. Identify and consider <i>constraints or factors</i> that may affect the creation of the display.
2. Develop display ideas.	2.1. Generate ideas for the display using <i>creative thinking techniques</i> . 2.2. Test ideas against display and <i>organisational requirements</i> . 2.3. Discuss <i>display options</i> with relevant personnel. 2.4. Modify display ideas and refine according to <i>feedback</i> and confirm with <i>relevant personnel</i> .
3. Plan and build displays.	3.1. Develop ideas into simple <i>display plans</i> . 3.2. Source resources, materials and products to meet plan requirements. 3.3. Create displays following display plans. 3.4. Seek assistance from relevant personnel where required. 3.5. Review display and make refinements as required.
4. Maintain displays.	4.1. Regularly clean and tidy displays and replace products as necessary according to display plans. 4.2. Make changes or alterations to the display as appropriate.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:

- communicate display ideas to others
- seek and accept feedback through clear and direct communication
- use and interpret non-verbal communication
- use language and concepts appropriate to cultural differences
- creative thinking and design skills to generate ideas for improving displays
- initiative and enterprise skills to ensure efficient and cost-effective use of resources
- observation skills to identify when display needs to be changed, updated or altered
- sketching and writing skills to represent ideas in a simple display plan

Required knowledge

- audiences for and required effects of displays
- basic design principles, including:
 - colour
 - flow of product
 - shape
 - use of space
- organisational requirements, including:
 - environment, health and safety compliance
 - location of displays
 - visual merchandising standards
- visual merchandising display options

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- identifies the requirements for new displays
- creates display plans that meet the requirements of the product, audience and organisation
- plans and builds displays, according to plans
- maintains displays.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as store policy and procedures manuals
- display space
- a range of display products and materials.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: <ul style="list-style-type: none">• observation of performance in the workplace• third-party reports from a supervisor• customer feedback• written or verbal questioning to assess knowledge and understanding.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Purpose</i> of display may include:	<ul style="list-style-type: none">• attracting customers into the store• new products• new range• promotion• sale.
<i>Audience</i> for display may include:	<ul style="list-style-type: none">• internal and external foot or vehicular traffic• new or repeat customers• people from a range of social, cultural and ethnic backgrounds• people with varying physical and mental abilities• people of different ages• people with varying degrees of language and literacy.
<i>Relevant information</i> may be sourced from:	<ul style="list-style-type: none">• colleagues• direct observation• internet• magazines• marketing personnel• technical personnel• written reports.
<i>Resources</i> may include:	<ul style="list-style-type: none">• equipment and technology• fixtures and fittings

- labels and tickets
 - new or recycled materials
 - staff
 - time.
- Constraints or factors*** may include:
- availability of materials
 - budget
 - product characteristics
 - space
 - staff
 - time.
- Creative thinking techniques*** may include:
- brainstorming
 - creative writing
 - drawings
 - lateral thinking
 - mind mapping
 - product association
 - telling stories
 - using prompts
 - visualising.
- Organisational requirements*** may include:
- aesthetics
 - allocated space
 - branding
 - budget
 - work health and safety (WHS)
 - organisational standards

store marketing and promotional activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - give instructions
 - provide feedback to management through clear and direct communication
 - provide information to staff
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
 - prepare machine or manual labels and tickets
 - present and price merchandise
 - read and interpret store policies and procedures
- observation skills to assess display and presentation compliance with visual merchandising standards
- technology skills to operate and maintain electronic labelling and ticketing equipment
- team leadership skills to:
 - instruct and support staff
 - supervise staff activities

Required knowledge

- availability and use of materials
- correct storage procedures for labelling and ticketing equipment and materials
- load-bearing capacity of fixtures and display areas
- location of display areas
- manufacturer specifications for the use of electronic labelling and ticketing equipment
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication skills
- principles of display and design
- procedure for accessing information and implementing price changes
- relevant industry codes of practice relating to coordinating merchandise presentation
- relevant legislation and statutory requirements relating to coordinating merchandise presentation, including Australian Consumer Law

- relevant work health and safety (WHS) legislation and codes of practice
- store policies and procedures in regard to:
 - efficient use of resources
 - merchandise range
 - merchandising, pricing and ticketing
 - minimum stock levels required
 - stock rotation and replenishment
 - storage of stock
- store promotional themes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- implements and instructs staff regarding store display, merchandising, ticketing and pricing policies and procedures
- coordinates and monitors display, promotion and presentation of merchandise according to store policies and procedures and legislative requirements
- identifies products to be advertised or promoted according to store merchandising policies
- coordinates construction and maintenance of displays within time schedule set in regard to advertising, catalogues, special offers and in-store promotions in a safe and secure manner
- informs staff of pricing policies, promotions, special events, display standards and requirements, and timing for dismantling and disposing of displays
- evaluates and reports effectiveness of store merchandising and promotional activities to management and staff as required by store policies and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- pricing and ticketing equipment
- merchandise for display
- display materials and props
- relevant documentation, such as:
 - store policy and procedures manuals on merchandising
 - WHS requirements

- manufacturer instructions and operation manuals on electronic ticketing equipment
- legislation and statutory requirements
- industry codes of practice
- a work team.

Method of assessment A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Display standards and requirements may include:

- maintaining existing displays
- safety
- setting up new displays
- ticketing and display signage.

Staff may be:

- from a range of social, cultural and ethnic backgrounds
- from within or outside own work team
- full-time, part-time, casual or contract.

Displays may be located in a variety of areas, including:

- fixtures on floor
- interior or exterior
- permanent or temporary
- publicly accessible areas
- shelves
- walls
- windows.

Display information may include:

- discount information
- price

- product brand
- special guarantees
- product characteristics, such as:
 - size
 - weight capacity
 - materials.

- Customers* may include:
- internal and external contacts
 - new or repeat contacts
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying physical and mental abilities.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Interpret a visual merchandising plan.	1.1. Identify <i>design requirements</i> of visual merchandising plan or manual. 1.2. Source <i>resources required</i> to implement plan. 1.3. Identify <i>factors that may affect the plan</i> . 1.4. Apply organisation's visual merchandising standards to the plan.
2. Monitor display requirements.	2.1. Regularly monitor display to ensure it meets the requirements of the <i>visual merchandising plan</i> . 2.2. Identify <i>damage or changes to the display</i> . 2.3. Take action to rectify unwanted changes to the display.
3. Maintain displays in line with organisational requirements and plan.	3.1. Maintain display so that it is clean and tidy. 3.2. Make additions or changes to display to ensure it consistently adheres to the visual merchandising plan. 3.3. Maintain organisation's requirements for visual merchandising in the display.
4. Contribute to the visual merchandising standards of the organisation.	4.1. Interpret visual merchandising standards of the organisation. 4.2. Identify opportunities for improving visual merchandising standards. 4.3. Make contributions to the visual merchandising standards as appropriate.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- artistic interpretation skills to create displays according to visual merchandising standards
- communication skills to share ideas
- creative thinking skills to generate ideas for improving visual merchandising standards
- literacy skills to interpret visual merchandising manuals

- observation skills to identify damage to displays or deviations from visual merchandising standards
- practical skills to maintain and update displays according to the visual merchandising plan

Required knowledge

- basic design principles
- basic principles of visual merchandising
- work health and safety (WHS) requirements relating to monitoring displays
- organisation's visual merchandising principles
- resources required to implement visual merchandising plans
- procedures for safe use of tools, equipment and materials used in visual merchandising displays

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets and identifies the design requirements of a visual merchandising plan
- monitors the display closely and completes regular maintenance to ensure it meets the requirements of the visual merchandising plan and the organisation's visual merchandising standards
- contributes appropriately to the ongoing development of the organisation's visual merchandising standards.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail visual merchandising work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - store visual merchandising standards.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Guidance information

Holistic assessment with other units relevant to the industry sector,

for assessment workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Design requirements

may include:

- colours used
- functionality
- layout of display
- location of display in store
- merchandise for display
- size of display.

Resources required may include:

- fixtures and fittings
- lights
- materials
- people
- supports
- time.

Factors that may affect the plan may include:

- availability of display stands and structures
- availability of staff
- budget requirements
- merchandise availability
- store promotions
- time requirements.

Visual merchandising plan may include:

- display location
- retail image
- store plan and design.

Damage or changes to the display may include:

- changes in the appearance of the display
- damage to fixtures, fittings or display supports
- damage to items on display.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Interpret the need for innovation.	1.1.Observe the need for <i>innovation</i> within workplace context. 1.2.Challenge assumptions about products and processes to identify opportunities for innovation. 1.3.Project possible future contexts and environments for the innovation. 1.4.Define <i>end user requirements</i> . 1.5.Identify <i>resources and constraints</i> . 1.6.Research <i>factors and ethical considerations</i> that may impact on the idea. 1.7.Access relevant <i>organisational knowledge</i> .
2. Generate ideas.	2.1.Conceptualise ideas using a range of <i>creative thinking techniques</i> . 2.2.Apply relevant knowledge to explore a range of approaches. 2.3.Seek <i>stimulation from alternative sources</i> . 2.4.Test ideas against brief and other factors. 2.5.Select preferred option.
3. Collaborate with others.	3.1.Develop ideas in conjunction with <i>relevant people</i> . 3.2.Seek and accept <i>feedback</i> from relevant people in an appropriate fashion. 3.3.Modify ideas according to feedback. 3.4.Maintain and utilise a <i>network of peers</i> to discuss ideas.
4. Analyse and reflect on ideas.	4.1.Analyse ideas from different perspectives. 4.2.Use appropriate strategies to capture <i>reflections</i> . 4.3.Examine ideas to ensure they meet context requirements, best practice and future needs. 4.4.Allow time for the development and analysis of ideas.
5. Represent ideas.	5.1.Select an appropriate <i>communication technique</i> for the target <i>audience</i> . 5.2.Develop the <i>presentation of the idea</i> with the audience in mind. 5.3.Present the idea to educate and inform the client.

- 5.4. Modify the idea according to client feedback.
- 6. Evaluate ideas.
 - 6.1. **Review** ideas using appropriate *evaluation methods* to ensure they meet required needs.
 - 6.2. Modify ideas as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - collaborate with others and represent ideas through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - work within teams
- analytical and lateral thinking skills to examine self and external factors

Required knowledge

- relevant technical knowledge
- broad industry and market knowledge
- organisational culture
- social, environmental and work culture impacts
- principles of innovation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment Evidence of the following is essential:

and evidence required to demonstrate competency in this unit

- interprets the need for innovation in the workplace
- identifies resources and constraints and researches affecting factors when generating innovative ideas
- generates ideas using creative thinking techniques
- tests ideas against brief and other relevant factors
- presents and discusses ideas with relevant people
- seeks feedback and modifies ideas accordingly

- analyses and reflects on ideas to ensure they meet end user requirements
- presents ideas using appropriate communication methods
- reviews and modifies idea using appropriate evaluation methods.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as store policy and procedures manuals
- a range of communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- a detailed case study
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Innovation may include:

- generating new ideas or solutions
- developing new uses for old ideas and making them useful or a means of improvement.

End user requirements may refer to:

- who will be using the end product
- why the product or process is needed
- how will it be used
- advantages will it provide
- where it will be used.

Resources and constraints may

- time required

include:

- costs
- equipment
- human resources
- work culture
- management practice
- technology needed.

Factors and ethical considerations may include:

- aesthetic requirements
- functionality
- information available
- WHS
- environmental considerations.

Organisational knowledge may include:

- technical knowledge
- information gained from books and audiovisual resources
- knowledge from different work areas
- information from work colleagues
- work processes
- product
- materials
- systems
- tools
- working conditions.

Feedback may be:

- formal or informal
- verbal
- in writing
- in groups
- individual.

Creative thinking techniques may include:

- brainstorming
- visualising
- making associations
- building on associations
- telling stories
- creative writing
- lateral thinking games
- mind mapping, drawings
- six thinking hats
- using prompts.

Stimulation from alternative sources may include:

- reading books and industry journals
- talking with colleagues and friends

- visiting art galleries and museums
 - going to industry workshops
 - networks.
- Relevant people** may include:
- colleagues
 - team members
 - supervisors
 - managers
 - the client.
- Maintaining a **network of peers** may include:
- participating in forums
 - participating in industry training
 - attending workshops
 - becoming a member of a network.
- Capture of **reflections** may include:
- mind mapping
 - assessing alternatives
 - drawing comparisons
 - imagining possible outcomes
 - imagining best and worst case scenarios.
- Communication techniques** may include:
- writing a proposal
 - building a model
 - showing a film
 - presenting a talk
 - preparing a report
 - drawing a diagram.
- The **audience** may include:
- external contacts
 - internal contacts, such as management and other team members
 - groups or individuals
 - people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.
- Presentation of ideas** may include:
- helping the client visualise and understand the idea
 - actively listening
 - asking questions
 - accepting others opinions
 - explaining the proposal
 - clarifying details.
- Formal review** of the idea may involve:
- checking that the idea can be implemented
 - that it meets the client and end user needs
 - best practice

Evaluation methods may include:

- financial requirements
- resource requirements.
- developing checklists
- discussing the process with colleagues or supervisors
- writing a report of the outcomes.

SIRXRSK001A Minimise theft

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to minimise theft in a retail environment. It involves applying routine store security, taking appropriate action to minimise theft and maintaining security of cash, registers or terminals and keys.

Application of the Unit

Application of the unit

This unit applies to frontline service personnel. It requires the team member to apply store policy and procedures and industry codes of practice in regard to store security and theft prevention, reporting theft or suspicious behaviour to relevant personnel and monitoring stock, work areas, customers and staff to minimise opportunities for theft.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply routine store security.	1.1 Apply store <i>security systems and procedures</i> according to store policy. 1.2 Handle and secure cash according to <i>store policy and procedures</i> . 1.3 Observe and deal with suspect behaviour by <i>customers</i> according to store policy and <i>legislative requirements</i> . 1.4 Deal with internal and external theft according to store policy and legislative requirements. 1.5 Store products and equipment in a secure manner.
2 Minimise theft.	2.1 Take appropriate action to minimise theft by applying store procedures and legislative requirements. 2.2 Match merchandise to correct price tags. 2.3 Maintain surveillance of merchandise according to store policy and <i>legislative requirements</i> .

ELEMENT

PERFORMANCE CRITERIA

- 2.4 Check customers' bags as required at point of sale according to store policy and legislative requirements.
- 2.5 Maintain security of cash, cash register and keys according to store policy.
- 2.6 Maintain security of stock, cash and equipment in regard to customers, *staff* and outside contractors according to store policy and legislative requirements.
- 2.7 Deal with suspected or potential thieves according to store policy and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy and numeracy skills in:
 - recording of stolen items
 - reporting of theft.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - security
 - checking customers' bags and purchases
 - reporting problems and faults
- relevant legislation and statutory requirements, particularly in regard to checking customers' bags and purchases
- Trade Practices and Fair Trading Acts
- store merchandising system
- security procedures relating to cash and non-cash transactions
- location and operation of store security equipment
- reporting procedures for internal and external theft or suspicious circumstances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures and legislative requirements, including industry codes of practice in regard to store security and theft prevention in a range of contexts and situations
- consistently applies store policy and procedures in regard to following security procedures and for reporting theft or suspicious behaviour to relevant personnel
- monitors stock, work area, customers and staff to minimise opportunities for theft.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - legislation and statutory regulations
 - industry codes of practice
 - Trade Practices and Fair Trading Acts
- relevant security equipment
- point-of-sale equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a simulated work environment
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge

EVIDENCE GUIDE

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXCCS002A Interact with customers
- SIRXINV001A Perform stock control procedures
- SIRXFIN001A Balance point-of-sale terminal.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Security systems and procedures may deal with:

- customers
- staff
- keys
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash, credit cards

RANGE STATEMENT

- equipment, including:
 - alarm systems
 - video surveillance
 - mirrors
 - security tags
- locked and secure areas
- premises
- armed hold-up.

Store policy and procedures may relate to:

- security
- surveillance of merchandise
- reporting problems and faults.

Customers may include:

- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Legislative requirements may include:

- privacy and confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards and agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

Staff may include:

- management
- other staff members
- full-time, part-time and casual staff
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Provide staff with ongoing supervision and <i>training</i> to facilitate awareness and detection of theft.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - provide information, feedback and training to staff

- report relevant matters through clear and direct communication
- ask questions to identify and confirm requirements
- share information
- give instructions
- use and interpret non-verbal communication
- provide team leadership
- literacy skills to:
 - interpreting and applying Work Health and Safety (WHS) documents
 - reporting procedures
 - analytical skills to evaluate performance analysis

Required knowledge

- store policy and procedures in regard to:
 - security
 - cash and non-cash transactions
 - external or internal theft
 - suspicious circumstances
 - armed robbery
 - staff security training
 - procedures for opening and closing premises
- relevant legislation and statutory regulations, particularly in relation to checking of customers' bags and purchases
- types of store alarm and security systems used in the retail industry

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to store security
- accurately applies relevant legislation and statutory regulations particularly in regard to checking of customers' bags and purchases
- interprets, applies and monitors security procedures in regard to:
 - cash handling, and cash and non-cash transactions

- internal or external theft or suspicious circumstances
- armed robbery
- opening and closing premises
- implements store policy and procedures in regard to:
 - reporting on matters related to store security
 - staff security supervision and training.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures in regard to security
 - legislation and statutory requirements
 - WHS legislation
- relevant equipment such as:
 - alarm systems
 - point-of-sale equipment
 - communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- third-party reports from a supervisor
- observation of performance in the workplace
- a role play
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXOHS002A Maintain store safety.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the

performance criteria is detailed below.

Store policy and procedures in regard to:

- security
- checking bags
- cash and non-cash transactions
- surveillance of merchandise
- reporting problems and faults.

Security procedures may deal with:

- customers
- staff or staff property
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash and cash movement
- equipment
- premises
- opening and closing of premises
- theft
- armed robbery
- events likely to endanger customers or staff.

Legislative requirements may include:

- privacy or confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards or agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

Transactions may include:

- cash
- EFTPOS
- cheques
- credit cards or store cards
- smart cards
- lay-by
- returns
- exchanges
- gift vouchers.

Team members may include:

- small work teams
- store team
- corporate team

- full-time, part-time, casual or contract staff
- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Feedback may be given:

- verbally
- in writing
- in groups
- individually.

Training may include:

- mentoring or coaching
- off-the-job training
- on-the-job training.

Report may be:

- verbal
- written
- formal
- informal.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain store security systems.	1.1. Operate <i>security equipment</i> , according to manufacturer instructions and <i>store policy and procedures</i> . 1.2. Regularly check security equipment to ensure operational effectiveness and identify faults. 1.3. Organise regular servicing according to store procedures or manufacturer specifications. 1.4. Apply surveillance of specific store areas according to store procedures and <i>legislative requirements</i> . 1.5. Enter <i>security data</i> accurately and update as required by store policy and procedures.
2. Deal with potentially unsecured situations.	2.1. Identify factors that increase security risk and regularly monitor, record and <i>report</i> on them according to instructions.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- technical skills to apply surveillance techniques
- literacy and numeracy skills to:
 - interpret legal documents
 - interpret store policy
 - record security data
 - generate reports

Required knowledge

- store policy and procedures in regard to:
 - dealing with theft and other property offences, including customer bag checking procedures
 - dealing with other property offences, including criminal deception (false pretences) and criminal (wilful) damage
 - operation and maintenance of store security equipment, taking into account manufacturer maintenance and operating procedures
 - reporting requirements
- relevant law and industry codes of practice and their application in relation to store policy and procedures, including privacy and the checking of customers' bags and purchases

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently operates and maintains store security equipment
- identifies and reports potential security risks according to store policy.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
- equipment such as:
 - security systems
 - communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop product and service knowledge.	1.1. Develop and maintain <i>product knowledge</i> according to <i>store policy</i> and <i>legislative requirements</i> . 1.2. Convey product knowledge to other <i>staff</i> as required. 1.3. Research and apply comparisons between products and services. 1.4. Demonstrate knowledge of competitors' product and service range and <i>pricing structure</i> .
2. Recommend specialised products or services.	2.1. Evaluate merchandise according to <i>customer requirements</i> . 2.2. Demonstrate features and benefits of products and services to <i>customer</i> to create a buying environment. 2.3. Apply detailed specialised knowledge of product to provide accurate advice to customers.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - convey product knowledge to staff
 - apply knowledge to provide advice to customers
 - handle difficult customers through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy skills in regard to:
 - use a range of communication and electronic equipment
 - access relevant product and service information
 - interpret product information
 - interpret store policies and procedures

- record information
- numeracy skills to:
 - estimate and calculate costs relevant to pricing products

Required knowledge

- specialised product knowledge, including:
 - warranties
 - benefits and features
 - shelf life and use-by date
 - storage requirements
 - ingredients or materials contained in product
 - product and ingredient origins
 - care and handling of products
 - corresponding or complementary products and services
 - stock availability
- store and industry manuals and documentation
- stock and merchandise range
- service range
- store policies and procedures including:
 - procedures for taking orders
 - pricing procedures, including GST requirements
- relevant legislation and statutory requirements and industry code of practice relating to the retail industry

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- consistently applies store policies and procedures and industry codes of practice in regard to customer service and selling products and services
- develops, maintains and conveys product knowledge to customers and other staff
- applies detailed and specialised product knowledge to provide accurate advice according to the needs of the customer.

Context of and specific

Assessment must ensure access to:

resources for assessment

- a retail work environment
- a range of stock and merchandise
- relevant documentation, such as:
 - price lists
 - policy and procedures manuals
- a range of customers with different requirements
- a range of communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Product knowledge may include:

- brand options
- product features and benefits
- warranties
- safety features
- use-by dates
- handling and storage requirements
- stock availability
- price.

Product knowledge may be developed and maintained by:

- accessing the internet
- attending product launches
- attending product seminars
- discussions with staff
- accessing product information booklets and

- Store policy* and procedures in regard to:
- pamphlets.
 - interaction with customers
 - selling products and services.
- Legislative requirements* may include:
- Trade Practices and Fair Trading Acts
 - tobacco laws
 - liquor laws
 - lottery legislation
 - industry codes of practice
 - WHS
 - sale of second-hand goods
 - sale of X and R rated products
 - trading hours
 - transport, storage and handling of goods.
- Staff* may include:
- full-time, part-time or casual
 - under contract
 - people with varying degrees of language and literacy
 - people from a range of cultural, social and ethnic backgrounds
 - people with a range of responsibilities and job descriptions.
- Customer requirements* may include:
- specific brand
 - sizing
 - quality
 - quantity
 - price range
 - usage.
- Customers* may include:
- new or repeat contacts
 - external and internal contacts
 - customers with routine or special requests
 - people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.
- Pricing structure* may include:
- sales reductions
 - pricing procedures, including GST requirements
 - mark-downs.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop and apply product knowledge.	<p>1.1. Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i> and confirm with relevant staff.</p> <p>1.2. Apply knowledge of the use and application of relevant products and services in interactions with customers according to store policy and <i>legislative requirements</i>.</p> <p>1.3. Identify gaps in product knowledge and resolve by accessing relevant sources of information.</p>
2. Approach customer.	<p>2.1. Identify <i>customers</i> by name where possible.</p> <p>2.2. Develop knowledge of customer buying behaviour by accessing relevant sources of information.</p> <p>2.3. Determine and apply appropriate timing of customer approach according to store policy and customer behaviour.</p> <p>2.4. Initiate customer contact according to store policy.</p> <p>2.5. Convey a positive impression to encourage customer interest according to store policy.</p>
3. Gather and respond to information.	<p>3.1. Apply questioning techniques and listening skills to determine customer buying motives and requirements.</p> <p>3.2. Interpret and clarify non verbal communication cues.</p> <p>3.3. Direct customer to specific merchandise according to customer requirements and store policy.</p>
4. Sell benefits.	<p>4.1. Match customer needs to appropriate products and services.</p> <p>4.2. Communicate knowledge of product features and benefits clearly to customers.</p> <p>4.3. Describe product use and safety requirements to customers.</p> <p>4.4. Refer customers to appropriate product specialist as required.</p> <p>4.5. Answer <i>routine customer questions</i> about merchandise accurately and honestly or refer to senior sales staff.</p>

- | | |
|----------------------------------|---|
| 5. Overcome objections. | 5.1. Identify and acknowledge customer objections according to store policy. |
| | 5.2. Categorise objections into price, time and merchandise characteristics and consider solutions. |
| | 5.3. Offer solutions to customer objections according to store policy. |
| | 5.4. Apply <i>problem solving</i> within personal scope of responsibilities to overcome customer objections or refer to senior staff. |
| 6. Close sale. | 6.1. Monitor, identify and respond appropriately to customer buying signals. |
| | 6.2. Encourage customer to make purchase decisions. |
| | 6.3. Select and apply appropriate method of closing sale. |
| 7. Maximise sales opportunities. | 7.1. Recognise and apply opportunities for making additional <i>sales</i> according to store policy. |
| | 7.2. Advise customer of complementary products or services according to customer's identified need. |
| | 7.3. Review personal sales outcomes and consider strategies to maximise future sales in consultation with relevant staff. |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - handle difficult customers
 - verbal and non-verbal communication skills to:
 - question, listen and observe
 - overcome objections and close sale
- literacy and numeracy skills to:
 - handle payments for goods
 - read product information
 - read store policies and procedures
 - record information
 - weigh and measure goods
- selling skills to use a range of selling techniques

Required knowledge

- customer types and needs, including:
 - customer behaviour and cues

- customer buying motives
- demographics, lifestyle and income
- individual and cultural differences
- types of customer needs, such as:
 - functional
 - psychological
- relevant industry codes of practice, legislation and statutory requirements relating to the sale of products and services
- selling techniques, including:
 - add-ons and complementary sales
 - closing techniques
 - opening techniques
 - overcoming customer objections
 - recognising buying signals
 - using strategies to focus customer on specific merchandise
- specific product knowledge for area or section
- store merchandise and service range
- store policies and procedures in regard to:
 - allocated duties and responsibilities
 - selling products and services and sales performance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future

sales.

Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • a real or simulated retail work environment • relevant documentation, such as policy and procedures manuals • a range of customers with different requirements • a range of merchandise and products appropriate to the retail workplace • product labels and sources of product information.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • observation of the candidate in the workplace • customer feedback • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Product knowledge</i> may include:	<ul style="list-style-type: none"> • features and benefits • handling and storage requirements • price • safety features • stock availability • use-by dates • warranties.
<i>Relevant sources of information</i> may include:	<ul style="list-style-type: none"> • demonstrations • internet • labels • product profiles

- staff members
 - store or supplier product manuals
 - store tours
 - videos.
 - industry codes of practice

SIRXSL303 Build relationships with customers

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSL004A Build relationships with customers.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and maintain expert knowledge to provide accurate product information to customers, including post-sales support.

It also covers communication, analysis and sales techniques to plan and implement sales presentations, build positive relationships with customers, and resolve customer complaints to ensure positive business outcomes.

Application of the Unit

This unit applies to senior sales personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop relationships with customers.	<p>1.1. Establish rapport with <i>customers</i> and express genuine interest to <i>clarify customer requirements</i> and enhance <i>outcomes</i>.</p> <p>1.2. Maintain <i>professional ethics</i> with the customer to promote store image and credibility.</p> <p>1.3. Identify <i>customer needs and preferences</i> to maximise sales opportunities.</p> <p>1.4. Maximise sales opportunities by use of add-on and complementary <i>sales techniques</i>.</p> <p>1.5. Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.</p> <p>1.6. Use effective methods to close sales.</p>
2. Apply expert knowledge.	<p>2.1. Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to <i>legislative requirements</i>.</p> <p>2.2. Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.</p> <p>2.3. Provide evaluation of product range, demonstrate features and benefits of products or services where appropriate, and make recommendations to the customer to maximise sales potential.</p> <p>2.4. Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to <i>store policy</i>.</p> <p>2.5. Calculate prices and discounts according to pricing determinants and store policy.</p>
3. Provide post-sales support.	<p>3.1. Provide evidence of ongoing support as sale is concluded.</p> <p>3.2. Explain <i>back-up service</i> and reassure customer according to legislative requirements and store policy.</p> <p>3.3. Provide customer with store or salesperson's contact details to ensure customer follow-up according to store policy.</p> <p>3.4. Enter customer and transaction details into <i>customer database</i> according to store policy.</p>

4. Plan sales presentations.
 - 4.1. Plan presentation to complement *product characteristics*.
 - 4.2. Select client group according to product characteristics and store merchandising policy.
 - 4.3. Access *promotional materials* where required and distribute to client group.
 - 4.4. Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.
5. Implement sales presentations.
 - 5.1. Ensure sufficient numbers of adequately briefed support staff, where required, for presentation.
 - 5.2. Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups.
 - 5.3. Demonstrate products or services to create a buying environment.
 - 5.4. Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future *sales presentations*, according to store sales policy.
6. Maintain and use a customer database.
 - 6.1. Maintain customer confidentiality as required by store policy and legislative requirements.
 - 6.2. Develop and maintain accurate *customer records* and store securely according to store policy and procedures.
 - 6.3. Identify and follow up regular customers according to store marketing policy.
 - 6.4. Use customer records to advise customers on products and services of possible interest.
 - 6.5. Implement *customer loyalty schemes* where required according to store promotional activities.
7. Deal with difficult customers.
 - 7.1. Acknowledge customer complaints and problems and reassuringly support difficult customers to produce positive outcome.
 - 7.2. Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration.
 - 7.3. Develop customer's confidence in the candidate and product or service to promote long-term trust and commitment to store.
 - 7.4. Establish mutually acceptable resolution of complaint.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to resolve conflict
- literacy and numeracy skills to:
 - access and read relevant product information
 - calculate prices and discounts
 - read store policies and procedures
 - record client and sales information
- sales skills to apply selling techniques, including:
 - add-ons and complementary sales
 - identifying buying signals
 - opening and closing techniques
 - overcoming customer objections
 - presenting product information
 - promoting enhanced sustainability features of selected products and services
 - using strategies to focus customer on specific merchandise

Required knowledge

- customer types and needs, including:
 - customer buying motives, customer behaviour and cues
 - functional and psychological needs
 - individual and cultural differences, demographics, lifestyle and income
- work health and safety (WHS) requirements relating to:
 - manual handling
 - plant and equipment
 - hazardous substances and dangerous goods
 - workers compensation
- relevant industry codes of practice, legislation and statutory requirements relating to building relationships with clients
- store policies and procedures in regard to:
 - efficient use of resources
 - establishing, maintaining and using customer records
 - methods of maintaining customer confidentiality and secure storage of customer details
 - price negotiation and payment and credit options
 - pricing, including GST requirements
 - resolving customer complaints
 - updating and maintaining customer mailing lists
- store and area merchandise and service range

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies:
 - detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
 - industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
 - store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations, and providing after-sales support
- develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and discerning customer buying motives, requirements and preferences
- establishes, records and maintains customer records and details, maintaining customer confidentiality, ensuring secure storage of data, and using customer records to maximise customer interest and create a buying atmosphere
- evaluates personal or team sales performance to maximise future sales
- maximises sales opportunities by using effective selling techniques, applying detailed product knowledge, and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- plans, prepares and conducts sales presentations and briefs
- supports staff where required, to create a buying environment and maximise sales performance
- resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution
- uses effective questioning, listening and observation skills to determine customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:

- policy and procedures manuals
- industry codes of practice and relevant legislation
- WHS legislation and codes of practice
- a range of customers with different requirements
- an appropriate range of products and equipment
- a customer database system.

Method of assessment A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Customers may include:

- a single customer, couples, families or groups
- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Clarification of customer requirements may be achieved by:

- active listening
- appropriate questioning
- empathy
- observation
- reassurance and confirmation.

Outcomes may include:

- credibility of store
- customer commitment

- Maintaining *professional ethics* with the customer may include:
- customers' trust
 - increased return customer base.
 - confirmed appraisals of products and services
 - honesty
 - positive statements.
- Customer needs and preferences* may include:
- brand
 - customer physical needs
 - price
 - product characteristics
 - product type
 - size.
- Sales techniques* will include:
- add-on and complementary products and services
 - selling up or down
 - suggestive selling
 - variety of methods of closing sales.
- Legislative requirements* may include:
- environmental protection legislation
 - health and welfare law specific to local government, state and federal legislation
 - liquor laws
 - WHS
 - pricing procedures, including GST requirements
 - privacy laws
 - sale of second-hand goods
 - tobacco laws
 - Australian Consumer Law and fair trading Acts
 - transport, storage and handling of goods.
- Store policy* and procedures in regard to:
- dealing with difficult customers
 - maintaining and using client records
 - promotional, marketing, discounting and reward programs
 - resolving customer complaints
 - selling products and services.
- Back-up service* may include:
- delivery specifications
 - financial products and services
 - installation
 - returns policies
 - technical support
 - warranties and guarantees.
- Customer database* may be:
- computer-based
 - manual.

- Product characteristics*** may include:
- features and benefits
 - price range
 - supplier or manufacturer information
 - target group.
- Promotional materials*** may include:
- brochures
 - business cards
 - pamphlets
 - posters
 - promotional merchandise
 - vouchers.
- Sales presentations*** may be:
- at client site
 - in-house
 - verbal
 - visual.
- Customer records*** may include:
- anniversaries and special dates
 - details of items bought or returned
 - name and contact details
 - personal preferences
 - transaction records.
- Customer loyalty schemes*** may include:
- credit or discount facilities
 - customer clubs
 - customer reward schemes
 - special offers.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - give instructions
 - provide feedback, coaching and performance analysis through clear and direct communication
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
 - analyse store, department and individual sales figures
 - process and record information
 - read store policy and procedures

Required knowledge

- customer profiles
- factors that enhance sales performance
- location of store departments and importance of sales to store performance
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication
- relevant industry codes of practice
- relevant legislation and statutory requirements, including:
 - work health and safety (WHS) requirements
 - sustainability requirements
- stock control procedures
- store and department sales targets
- store merchandise and services
- store policies and procedures in regard to:
 - allocated duties and responsibilities
 - efficient use of resources
 - internal and external customer contact
 - selling products and services

Evidence Guide

SIRXSL406 Manage sales and service delivery

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSL005A Manage sales and service delivery.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to monitor, maintain and improve sales and service delivery. It involves market research, developing new markets, and marketing products and services within the culture of the overall store policy.

The unit requires the team member to develop and maintain excellence in sales and service delivery by ensuring the provision of a well-resourced working environment for fellow staff. The team member is required to proactively pursue the continuous improvement of operations by seeking, evaluating and reporting feedback from customers and colleagues on sales and service delivery and working conditions; and locating and negotiating adequate supply of stock and other necessary resources according to store policy.

Application of the Unit

This unit applies to staff with managerial responsibility.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Establish and respond to customer requirements.	<p>1.1. Plan and develop strategies to enhance provision of customer service according to store policy.</p> <p>1.2. Research and <i>analyse customer needs</i> in regard to local geographic and cultural issues.</p> <p>1.3. Resolve <i>customer</i> complaints referred by <i>staff</i>, according to store policy.</p> <p>1.4. Monitor sales and service targets and plans to ensure that customer requirements are met, and take appropriate remedial action if required.</p> <p>1.5. Encourage staff to take responsibility for meeting customer requirements.</p> <p>1.6. Seek and use feedback from customers to improve future operations.</p>
2. Monitor, maintain and improve sales and service delivery.	<p>2.1. Implement, communicate and review <i>policies and procedures for sales and service delivery</i> on a regular basis.</p> <p>2.2. Maintain adequate <i>resource</i> allocation for client service provision in line with <i>store policy and procedures</i>.</p> <p>2.3. Ensure sales and service targets and plans are consistent with quality and functional <i>specifications</i>.</p> <p>2.4. Communicate sales and service targets and plans to <i>relevant personnel</i> according to implementation schedules.</p> <p>2.5. Provide <i>feedback</i> to staff on operations and outcomes.</p> <p>2.6. Take corrective measures to minimise <i>factors that may cause disruption to operations</i>.</p> <p>2.7. Monitor and evaluate effectiveness of corrective actions for future operational planning.</p> <p>2.8. Ensure current and accurate <i>records</i> on sales are available to authorised personnel.</p>

- 2.9. Interpret and act on relevant reports as required.
3. Negotiate supply of goods.
- 3.1. *Negotiate* and implement *arrangements with suppliers*, according to store policies and procedures, and communicate to relevant personnel.
- 3.2. Authorise and communicate special pricing arrangements and customer payment agreements to relevant staff and management personnel according to store policy.
- 3.3. Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.
- 3.4. Identify and communicate market factors affecting *supply* to relevant personnel.
- 3.5. Convey complete and accurate records of negotiations and agreements to appropriate personnel within designated time limits.
- 3.6. Take immediate corrective action where potential or actual *problems with supply* are indicated.
- 3.7. Identify and develop new suppliers to maintain and improve sales and service delivery.
4. Provide productive work environment.
- 4.1. Establish and maintain a sufficient supply of resources of the necessary quantity and quality to meet customer requirements.
- 4.2. Regulate and monitor access to and use of resources for maximum efficiency and sustainability.
- 4.3. Maintain staff working conditions to meet requirements of *relevant legislation* and store policy.
- 4.4. Ensure that maintenance frequency and use of equipment conform to recommended schedules and procedures.
- 4.5. Replace, repair or adapt resources that do not meet requirements as soon as practicable and with minimum disruption to work activity.
- 4.6. Communicate *recommendations* for improving conditions to relevant personnel within designated timeframe.
- 4.7. Maintain complete, accurate records and make them available to authorised personnel.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - communicate with staff through clear and direct communication
 - negotiate with suppliers and customers
 - present information
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
 - calculate costs and pricing arrangements
 - document results
 - estimate volume
 - interpret and maintain data
 - prepare reports
 - research, analyse and interpret a broad range of written material
- technical skills to use new technology

Required knowledge

- customer demand and market trends
- principles and techniques for:
 - interpersonal communication
 - purchasing and supply specifications
 - stock control
- product quality standards
- range and availability of new products and services, especially those with enhanced sustainability features
- relevant industry codes of practice applicable to the sales environment
- relevant legislation and statutory requirements, including work health and safety (WHS) requirements applicable to the sales environment
- store merchandise and service range
- store merchandising plan
- store policies and procedures in regard to:
 - efficient and sustainable use of resources
 - pricing procedures, including GST requirements
 - quality assurance and control
 - sales and service delivery
 - stock maintenance and control
 - supply specifications

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- maintains, monitors and evaluates sales and service delivery
- communicates sales and service targets and plans and provides feedback on operations and outcomes to relevant personnel according to store policy
- proactively improves sales and service delivery operations
- interprets and maintains data on sales and services delivery
- negotiates and arranges supply of goods according to store policy and procedures
- authorises pricing and payment agreements according to store policy and procedures
- maintains, monitors and evaluates supply of stock.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - policy and procedures manuals
 - sales and service delivery targets and plans
 - records of sales and service
 - legislation and statutory requirements
 - industry codes of practice
 - WHS legislation and codes of practice
- suppliers
- a team.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Methods used to ***analyse customer needs*** may be:

- qualitative
- quantitative.

Customer may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Policies and procedures for sales and service delivery may involve:

- customer complaints
- customer service and sales training
- service standards
- staff induction
- staff presentation.

Resource may include:

- equipment and technology
- finances
- materials
- people
- time.

Store policy and procedures in regard to:

- interaction with customers
- interaction with other team members
- WHS
- quality assurance and control
- acquisition and sale of products and services.

Specifications may include:

- customer agreements
- operational means for meeting agreements
- specific functional duties within the organisation.

Relevant personnel may

- managers

- include:
- members of own or other work teams
 - supervisors.
- Feedback** may be sought and given:
- in groups
 - in writing
 - individually
 - verbally.
- Factors that may cause disruption to operations** may include:
- operational resources
 - quality of materials
 - supply.
- Records** may be:
- electronic
 - hard copy.
- Techniques used to **negotiate** with suppliers may include:
- correspondence
 - email
 - face-to-face contact
 - meetings
 - telephone.
- Arrangements with suppliers** may relate to:
- credit levels
 - delivery
 - partnerships and exclusivity
 - pricing.
- Sources of **supply** may include:
- external organisations
 - internal departments and teams
 - internal and external personnel.
- Problems with supply** may involve:
- cost
 - coverage or content
 - quality
 - quantity
 - time schedules or scales.
- Relevant legislation** may include:
- equal employment opportunity and anti-discrimination laws
 - federal, state and local legislation
 - WHS.
- Recommendations** may be communicated to:
- colleagues, specialists, staff from other departments
 - external organisations with a health, safety or environmental responsibility
 - government bodies
 - higher-level managers
 - subordinates.

SIRXWHS302 Maintain store safety

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXOHS002A Maintain store safety.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain store safety in a retail environment.

It involves informing and involving team members with regard to work health and safety (WHS), monitoring and maintaining a safe work environment, implementing emergency procedures, identifying the need for WHS training, and maintaining WHS records. It is based on the National Occupational Health and Safety Commission (NOHSC) guidelines.

Application of the Unit

This unit applies to store managers and team leaders.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element

Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- | | |
|---|---|
| <p>1. Inform team members about WHS matters.</p> | <p>1.1. Clearly and accurately explain store policy and procedures in regard to WHS and <i>emergency procedures to team members</i>.</p> <p>1.2. Ensure access for team members to store <i>WHS policy and procedures</i>.</p> <p>1.3. Clearly and accurately explain relevant provisions of WHS legislation and codes of practice to team members.</p> <p>1.4. Regularly provide clear and accurate information on identified <i>hazards</i> and risk control procedures to team members.</p> <p>1.5. Model the implementation of WHS and emergency procedures to reinforce information.</p> |
| <p>2. Involve team members in WHS matters.</p> | <p>2.1. Provide <i>opportunities and processes for team members to consult and contribute</i> on WHS issues according to store policy.</p> <p>2.2. Promptly resolve issues raised or refer to relevant personnel according to store policy.</p> <p>2.3. Promptly convey outcomes of issues raised on WHS matters to team members.</p> |
| <p>3. Monitor and maintain a safe work environment.</p> | <p>3.1. Implement store policy and procedures with regard to identifying, preventing and reporting potential hazards.</p> <p>3.2. Take prompt action to deal with hazardous events according to store policy.</p> <p>3.3. Investigate unsafe or hazardous events, identify cause, and report inadequacies in risk control measures or <i>resource allocation</i> for risk control to <i>relevant personnel</i>.</p> <p>3.4. Implement and monitor control measures to prevent recurrence and minimise risks of unsafe and hazardous events according to store policy and <i>hierarchy of control</i>.</p> <p>3.5. Handle and store <i>hazardous goods</i> according to store policy and WHS regulations.</p> <p>3.6. Maintain <i>equipment</i> according to store policy and WHS regulations.</p> <p>3.7. Monitor team performance to ensure use of <i>safe manual handling techniques</i>.</p> |

- 3.8. Implement *store emergency policy and procedures* promptly in the event of an emergency.
4. Identify need for WHS training.
- 4.1. Identify WHS training needs, specifying gaps between WHS competencies required and those held by team members.
- 4.2. Organise and arrange *training* according to store policy.
5. Maintain WHS records.
- 5.1. Complete and maintain WHS *records* regarding occupational injury and disease according to store policy and *legislative requirements*.
- 5.2. Use information from records to identify hazards and monitor risk control procedures according to store policy.

Required Skills and Knowledge

this section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - provide information, coaching and feedback to team members
 - involve team members
 - refer issues to appropriate personnel through clear and direct communication
 - motivate and lead a team
 - use and interpret non-verbal communication
- literacy and numeracy skills to:
 - generate reports
 - interpret and apply WHS regulations
 - interpret symbols used for WHS signage
 - read store policy and procedures
- technical skills to:
 - identify broken or damaged equipment
 - identify hazardous goods and substances
 - locate and use safety alarms, fire extinguishers and emergency exits

Required knowledge

- hierarchy of risk control:
 - elimination of hazards
 - engineering controls to reduce risk
 - administrative controls
 - use of personal protective equipment

- job role and responsibilities
- location of nearest first aid assistant or facility
- manual handling and safe lifting techniques
- possible fire and safety hazards
- principles and techniques in interpersonal communication
- relevant WHS legislation and codes of practice
- sickness and accident procedures
- store policies and procedures in regard to:
 - manual handling
 - WHS emergency procedures
 - unsafe or hazardous goods
 - handling and storage
 - disposal
 - bomb threat procedures
 - store evacuation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies and monitors store policy, industry codes of practice, relevant legislation and statutory requirements in regard to WHS and emergency procedures
- applies and monitors safe work practices in the handling and moving of stock, according to WHS legislation and codes of practice
- interprets and monitors the implementation of manufacturer instructions with regard to handling stock and using relevant equipment
- applies and monitors safe work practices in the handling, storage and disposal of unsafe or hazardous materials
- identifies WHS training needs and maintains WHS records.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant equipment, such as:
 - stock moving equipment
 - alarm systems

- first aid equipment
- firefighting equipment
- communication equipment
- relevant documentation, such as:
 - WHS legislation
 - store evacuation procedures
 - store policy and procedures manuals
 - incident reporting forms.

Method of assessment A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXRSK002A Maintain store security.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Emergency procedures may relate to:

- accidents
- bomb threats
- cyclones
- dealing with dangerous customers
- fire
- flooding
- product recall and contamination
- sickness
- store evacuation involving staff or customers.

Team members may include:

- full-time, part-time, casual or contract
- new or existing staff

WHS policy and procedures may relate to:

- people from a range of cultural, social and ethnic backgrounds
- people with varying levels of language and literacy.
- basic safety procedures
- customers
- dangerous goods
- emergency procedures
- equipment and tools
- issue-resolution procedures
- premises
- reporting procedures
- safe manual handling and lifting
- staff
- stock.

Hazards may include:

- broken or damaged equipment
- chemical spills
- damaged packing material or containers
- electricity and water
- fires
- manual handling
- sharp cutting tools and instruments
- stress
- unguarded equipment.

Opportunities and processes for team members to consult and contribute may include:

- identification of health and safety representatives
- WHS meetings
- staff meetings
- suggestions from staff for improving existing tasks and procedures.

Resource allocation may include:

- equipment and technology
- finances
- materials
- people
- time.

Relevant personnel may include:

- manager
- safety representative
- supervisor
- team leader.

Hierarchy of control may include:

- appropriate use of personal protective clothing and equipment
- eliminating hazards
- isolating hazards
- substitution
- using administrative controls
- using engineering controls.

- Hazardous goods*** may include:
- chemicals
 - electrical equipment
 - flammable goods
 - waste.
- Equipment*** may include:
- computers
 - EFTPOS terminals
 - equipment for carrying or moving merchandise
 - equipment for storage of merchandise, including refrigerators
 - point of sale terminals
 - printers
 - security tag systems
 - thermometers
 - trolley return equipment
 - weighing machines
 - wrapping and packing equipment, such as shrink wrapping.
- Safe manual handling techniques*** may include:
- job procedures
 - lifting or shifting practices
 - using equipment, such as ladders and trolleys.
- Store emergency policy and procedures*** may relate to:
- alarm systems and procedures
 - events likely to endanger staff, contractors, customers or visitors
 - firefighting procedures
 - medical attention procedures
 - product recall and contamination
 - store evacuation procedures for staff and customers
 - transport arrangements for sick or injured persons.
- Training*** may include:
- emergency procedures
 - evacuation procedures
 - first aid
 - manual handling techniques
 - reporting procedures
 - stress management.
- Records*** may include:
- centralised
 - departmental
 - electronic
 - manual.
- Legislative requirements*** may include:
- federal, state or territory and local legislation
 - WHS regulations
 - privacy legislation
 - workers' compensation regulations.

SITTPPD402 Develop interpretive activities

Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITTPPD005A Plan and develop interpretive activities. Title simplified.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives, develop operational aspects and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE304 Prepare and present tour commentaries or activities.

Application of the Unit

This unit applies to many industry sectors and has particular relevance in tourism, sport and recreation and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and development of interpretive activities may be for a series of activities within a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- | | |
|-----------------------------------|---|
| 1. Establish need for activities. | 1.1 Identify need for <i>interpretive activities</i> , based on customer, organisation and community needs. |
| | 1.2 Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues. |
| 2. Create activities. | 2.1 Identify and evaluate a range of potential information and <i>resources</i> , including <i>other specialists</i> as required. |
| | 2.2 Develop interpretive framework for activities. |
| | 2.3 Generate and select ideas for potential messages, themes and storylines. |
| | 2.4 Consider relationships between themes, storylines and the site. |
| | 2.5 Incorporate interpretive media that matches the site. |
| | 2.6 Conduct a risk assessment and incorporate controls into activity development. |
| | 2.7 Evaluate and integrate legal, ethical and sustainability considerations. |
| | 2.8 Develop resources to support activities. |
| | 2.9 Develop activity within budget to meet agreed objectives. |
| | 2.10 Promote activities according to organisational marketing objectives. |
| 3. Evaluate activities. | 3.1 Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities. |
| | 3.2 Modify activities according to feedback received. |
| | 3.3 Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives. |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to consult with colleagues about development issues for interpretive activities
- critical thinking skills and research skills to evaluate wide ranging information and tease out creative themes and messages for activities
- literacy skills to:
 - analyse complex information and to interpret this for creative communication to customers
 - develop resources and information materials for the activities
- numeracy skills to calculate costs and work within established budgets
- planning and organising skills to coordinate creative and practical aspects of activities
- problem-solving skills to evaluate and adjust activities.

Required knowledge

- subject matter around which activities are developed
- principles of interpretation, including work of Freeman Tilden
- physical and digital interpretive media
- practical processes that support activity development, including:
 - budgeting
 - evaluation
 - needs analysis
 - resource development
 - scheduling
- creative communication techniques for interpretive activities, including:
 - games
 - illustrated talks
 - role-playing
 - sensory awareness exercises
 - storytelling
 - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes, including:
 - determining overall risk level
 - determining the exposure to the risk
 - estimating the probability of negative impacts
 - identifying the consequences that could result from the identified risk
- legal, ethical and sustainability considerations for activity development, including:

- cultural appropriateness
- duty of care
- minimal impact
- minimising waste and conserving resources.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- plan and develop multiple interpretive activities with varying themes and messages that meet the needs of different customer groups and commercial and operational constraints
- apply subject matter knowledge to the development of interpretive activities
- plan and develop interpretive activities for a number of different delivery environments.

Context of and specific resources for assessment

Assessment must ensure use of:

- a real or simulated environment for which interpretive activities can be planned and developed.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- evaluation of a project undertaken by the individual to develop and evaluate activities for a nominated customer group or organisation
- evaluation of activities by professional interpretation organisations
- written or oral questioning to assess knowledge of interpretation principles and activity development processes
- use of case studies to assess ability to tailor activities and information to suit particular customer needs
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE304 Prepare and present tour commentaries or activities
- SITTGDE306 Research and share general information on Australian Indigenous culture
- SITTGDE307 Prepare specialised interpretive content on flora, fauna and landscape
- SITTGDE308 Prepare specialised interpretive content on marine environments
- SITTGDE309 Prepare specialised interpretive content on cultural and heritage environments.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Interpretive activities:

- may include:
 - guided site activities
 - guided walks
 - one or more activities that may be combined in an overall tour program
 - sporting activities
 - touring activities
 - virtual activities
- may relate to a range of subjects, including:
 - art
 - birds
 - built environment
 - culture
 - domestic and farm animals
 - festivals or seasonal themes
 - history and heritage
 - natural environment
 - sports

- wildlife.
- Resources** may include:
- actors and performers
 - apps and other digital content
 - costumes
 - guest speakers
 - handouts
 - information and communications technology
 - natural resources
 - props
 - professional organisations
 - special interest organisations.
- Other specialists** may include:
- actors and performers
 - creative designers
 - cultural advisers
 - designers
 - environmental educators
 - heritage specialists
 - historians
 - interpretation consultants
 - marketers
 - subject matter experts
 - technical experts.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.

The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

ELEMENT

unit of competency.

PERFORMANCE CRITERIA

is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Determine assessment approach	<p>1.1 Identify candidate and confirm <i>purposes and context of assessment/RPL</i> with relevant people according to <i>legal, organisational and ethical requirements</i></p> <p>1.2 Identify and access <i>benchmarks for assessment/RPL</i> and any specific assessment guidelines</p>
2. Prepare the assessment plan	<p>2.1 Determine evidence and <i>types of evidence</i> needed to demonstrate competence, according to the <i>rules of evidence</i></p> <p>2.2 Select <i>assessment methods</i> which will support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3 Document all aspects of the <i>assessment plan</i> and confirm with relevant personnel</p>
3. Develop assessment instruments	<p>3.1 Develop <i>simple assessment instruments</i> to meet target group needs</p> <p>3.2 Analyse <i>available assessment instruments</i> for their suitability for use and modify as required</p> <p>3.3 <i>Map assessment</i> instruments against unit or course requirements</p> <p>3.4 Write clear instructions for candidate about the use of the instruments</p> <p>3.5 Trial draft assessment instruments to validate content and applicability, and record outcomes</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
 - interpret competency standards and other assessment documentation, including material

- relating to reasonable adjustment
- identify opportunities for integrated competency assessment
- contextualise competency standards to the operating assessment environment, including RPL
- consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
 - obtain competency standards, assessment tools and other relevant assessment resources
 - research candidate characteristics and any reasonable adjustment needs
 - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
 - demonstrate sensitivity to access and equity considerations and candidate diversity
 - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.
- **Required knowledge**
- ethical and legal requirements of an assessor
- competency-based assessment, including:
 - work focused
 - criterion referenced
 - standards based
 - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence
- assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • Evidence of the ability to: • plan and organise the assessment process on a minimum of two occasions • collect evidence that demonstrates: <ul style="list-style-type: none"> • documented assessment plans • having covered a range of assessment events • catering for a number of candidates • different competency standards or accredited curricula • an RPL assessment • contextualisation of competency standards and the selected assessment tools, where required • incorporation of reasonable adjustment strategies • development of simple assessment instruments for use in the process • organisational arrangements.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to training products, such as training packages and accredited course documentation.</p>
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purposes of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • recognising current existing competence of candidates • determining if competence has been achieved following learning • establishing candidate progress towards achievement of competence • determining language, literacy and numeracy needs of candidates • certifying competence through a qualification or Statement of Attainment • licensing or regulatory requirements.
<p><i>Context of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • environment in which the assessment/RPL will be carried out, including real or simulated workplace • opportunities for collecting evidence in a number of situations • relationships between competency standards and: <ul style="list-style-type: none"> • evidence to support RPL • work activities in the candidate's workplace • learning activities • who carries out the assessment/RPL.
<p><i>Organisational, legal and ethical requirements</i> may include:</p>	<ul style="list-style-type: none"> • assessment system policies and procedures • assessment strategy requirements • reporting, recording and retrieval systems for assessment, including RPL • quality assurance systems • business and performance plans • access and equity policies and procedures • collaborative and partnership arrangements • defined resource parameters • mutual recognition arrangements • industrial relations systems and processes, awards, and enterprise agreements • Australian Quality Training Framework • registration scope • human resources policies and procedures • legal requirements, including: <ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements • OHS considerations, including: <ul style="list-style-type: none"> • ensuring OHS requirements are adhered to during the

	<p>assessment process</p> <ul style="list-style-type: none"> identifying and reporting OHS hazards and concerns to relevant personnel.
Benchmarks for assessment/RPL may include:	<ul style="list-style-type: none"> criterion against which the candidate is assessed or prior learning recognised, which may be: <ul style="list-style-type: none"> competency standard/unit of competency assessment criteria of course curricula performance specifications of an enterprise or industry product specifications.
Types of evidence may include:	<ul style="list-style-type: none"> direct indirect supplementary.
Rules of evidence ensure that evidence collected is:	<ul style="list-style-type: none"> valid sufficient authentic current.
Assessment methods are the particular techniques used to gather evidence and may include:	<ul style="list-style-type: none"> direct observation, for example: <ul style="list-style-type: none"> real work/real time activities at the workplace work activities in a simulated workplace environment structured activities, for example: <ul style="list-style-type: none"> simulation exercises and role-plays projects presentations activity sheets questioning, for example: <ul style="list-style-type: none"> written questions, e.g. on a computer interviews self-assessment verbal questioning questionnaires oral or written examinations (applicable at higher AQF levels) portfolios of evidence, for example: <ul style="list-style-type: none"> collection of work samples compiled by candidate product with supporting documentation historical evidence journal or log book information about life experience review of products, for example: <ul style="list-style-type: none"> testimonials and reports from employers and supervisors

	<ul style="list-style-type: none"> evidence of training authenticated prior achievements interview with employer, supervisor, or peer.
<i>Assessment plan</i> may include:	<ul style="list-style-type: none"> overall planning document describing: <ul style="list-style-type: none"> what is to be assessed when assessment is to take place where assessment is to take place how assessment is to take place.
<i>Simple assessment instruments</i> may include:	<ul style="list-style-type: none"> instruments developed by an assessor as part of formative or summative assessment activities, including: <ul style="list-style-type: none"> profiles of acceptable performance measures templates and proformas specific questions or activities evidence and observation checklists checklists for the evaluation of work samples recognition portfolios candidate self-assessment materials instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
<i>Available assessment instruments</i> may include:	<ul style="list-style-type: none"> commercially available instruments those created by others inside the registered training organisation.
<i>Map assessment</i> means:	<ul style="list-style-type: none"> showing a clear relationship between the evidence and the requirements of the unit.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to assess the competence of a candidate.

Application of the Unit

This unit typically applies to assessors.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT

Elements describe the essential outcomes of a unit of competency.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Prepare for assessment	<p>1.1 Interpret <i>assessment plan</i> and confirm organisational, legal and ethical requirements for conducting assessment with relevant people</p> <p>1.2 Access and interpret relevant <i>benchmarks for assessment</i> and nominated <i>assessment tools</i> to confirm the requirements for evidence to be collected</p> <p>1.3 Arrange identified material and physical resource requirements according to assessment system policies and procedures</p> <p>1.4 Organise <i>specialist support</i> required for assessment</p> <p>1.5 Explain, discuss and agree details of the assessment plan with candidate</p>
2. Gather quality evidence	<p>2.1 Use agreed <i>assessment methods</i> and instruments to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence</p> <p>2.3 Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel</p> <p>2.4 Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required</p>
3. Support the candidate	<p>3.1 Guide candidates in gathering their own evidence to support recognition of prior learning (RPL)</p> <p>3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to <i>individual differences</i> and enables two-way <i>feedback</i></p> <p>3.3 Make decisions on reasonable adjustments with the candidate, based on candidate's needs and characteristics</p> <p>3.4 Access required specialist support in accordance with the assessment plan</p> <p>3.5 Address any OHS risk to person or equipment immediately</p>
4. Make the assessment decision	<p>4.1 Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence</p> <p>4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3 Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan</p> <p>4.4 Provide clear and constructive feedback to candidate regarding</p>

	the assessment decision and develop any follow-up action plan required
5. Record and report the assessment decision	5.1 Record assessment outcomes promptly and accurately 5.2 Complete and process an assessment report according to agreed assessment procedures 5.3 Inform other relevant parties of the assessment decision according to confidentiality conventions
6. Review the assessment process	6.1 Review the assessment process in <i>consultation</i> with relevant people to improve own future practice 6.2 Document and record the review according to relevant assessment system policies and procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
 - break down competency standards
 - interpret assessment tools and other assessment information, including those used in RPL
 - identify candidate needs
 - make judgements based on assessment of available evidence
- observation skills to:
 - recognise candidate's prior learning
 - determine candidate's performance
 - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
 - access required human and material resources for assessment
 - access assessment system policies and procedures
 - access RPL policies and procedures
 - evaluate evidence
 - evaluate assessment process
- cognitive skills to:
 - weigh up the evidence and make a judgement
 - consider and recommend reasonable adjustments
- decision-making skills to:
 - recognise a candidate's prior learning

- make a decision on a candidate's competence
- literacy skills to:
 - read and interpret relevant information to conduct assessment
 - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
 - explain the assessment, including RPL process
 - give clear and precise instructions
 - ask effective questions
 - provide clarification
 - discuss process with other relevant people
 - give appropriate feedback
 - discuss assessment outcome
 - use language appropriate to candidate and assessment environment
 - establish a working relationship with candidate.

Required knowledge

- competency-based assessment, including:
 - vocational education and training as a competency-based system
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - competency standards as the basis of qualifications
 - structure and application of competency standards
 - principles of assessment and how they are applied
 - rules of evidence and how they are applied
 - range of assessment purposes and assessment contexts, including RPL
 - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
 - reasonable adjustments and when they are applicable
 - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
 - potential barriers and processes relating to assessment tools and methods
 - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
 - copyright and privacy laws in terms of electronic technology
 - security of information

- plagiarism
- training packages and competency standards
- licensing requirements
- industry and workplace requirements
- duty of care under common law
- recording information and confidentiality requirements
- anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
- workplace relations
- industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for use of relevant personal protective equipment
 - safe use and maintenance of relevant equipment
 - sources of OHS information.
-

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan • assess at least one candidate for RPL • consider reasonable adjustment and the reasons for decisions in at least one assessment • cover an entire unit of competency and show: <ul style="list-style-type: none"> • the application of different assessment methods and instruments involving a range of assessment activities and events • two-way communication and feedback • how judgement was exercised in making the assessment decision • how and when assessment outcomes were recorded and reported

	<ul style="list-style-type: none"> assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements how the assessment process was reviewed.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Assessment plan</i> may include:	<ul style="list-style-type: none"> overall planning, describing: <ul style="list-style-type: none"> what is to be assessed when assessment is to take place where assessment is to take place how assessment is to take place.
<i>Benchmarks for assessment:</i>	<ul style="list-style-type: none"> refer to a criterion against which the candidate is assessed may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
<i>Assessment tools</i> include:	<ul style="list-style-type: none"> the learning or competency unit(s) to be assessed the target group, context and conditions for the assessment the tasks to be administered to the candidate an outline of the evidence to be gathered from the candidate the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules) the administration, recording and reporting requirements the evidence of how validity and reliability have been tested and built into the design and use of the tool.

<p><i>Specialist support</i> may include:</p>	<ul style="list-style-type: none"> • assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels • support from lead assessors • advice from policy development experts.
<p><i>Assessment methods</i> include:</p>	<ul style="list-style-type: none"> • particular techniques used to gather different types of evidence, such as: <ul style="list-style-type: none"> • direct observation • structured activities • oral or written questioning • portfolios of evidence • review of products • third-party feedback.
<p><i>Individual differences</i> may include:</p>	<ul style="list-style-type: none"> • English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
<p><i>Feedback</i> may include:</p>	<ul style="list-style-type: none"> • ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and

	presentation.
<i>Consultation</i> may involve:	<ul style="list-style-type: none">• moderation with other assessors, or training and assessment coordinators• discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors• technical and subject experts• English language, literacy and numeracy experts.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in an assessment validation process.

Application of the Unit

This unit typically applies to those participating in assessment validation. It does not address leading the validation process.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Prepare for validation	<p>1.1 Discuss and confirm the approach to validation according to defined purposes, context, and relevant <i>assessment system policies and procedures</i></p> <p>1.2 Analyse relevant <i>benchmarks for assessment</i> and agree on the evidence needed to demonstrate competence</p> <p>1.3 Arrange <i>materials</i> for <i>validation activities</i></p>
2. Contribute to validation process	<p>2.1 Demonstrate active <i>participation</i> in validation sessions and activities using appropriate communication skills</p> <p>2.2 Participate in validation sessions and activities by applying the principles of assessment and rules of evidence</p> <p>2.3 Check all documents used in the validation process for accuracy and version control</p>
3. Contribute to validation outcomes	<p>3.1 Collectively discuss validation findings to support improvements in the quality of assessment</p> <p>3.2 Discuss, agree and record recommendations to improve assessment practice</p> <p>3.3 Implement changes to own assessment practice, arising from validation</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- planning skills to participate in validation activities within agreed timeframes
- problem-solving skills to identify information that is inconsistent, ambiguous or contradictory
- evaluation skills to:
 - determine evidence requirements from competency standards
 - review assessment process, tools and methods
 - review collected evidence
- communication skills to share information in validation meetings.

Required knowledge

- how to interpret competency standards and other related assessment information to determine the evidence needed to demonstrate competence, including:
 - criterion-referenced assessment as distinct from norm-referenced assessment

- various reasons for carrying out validation and the different approaches to validation that may be appropriate before, during and after assessment
- critical aspects of validation, including validation of assessment processes, methods and products
- relevant OHS legislation, codes of practice, standards and guidelines, impacting on assessment
- legal and ethical requirements of assessors, particularly in relation to validation activities
- principles of assessment
- rules of evidence.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • actively participate in a minimum of two validation sessions or meetings which, in combination, address the critical aspects of validation using different validation approaches and activities • clearly explain purposes of validation and the legal and ethical responsibilities of assessors • collate documentation relating to validation process in a logical manner • demonstrate communication and liaison with relevant people • provide feedback and interpret documentation in validation sessions • record contribution to validation findings.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • assessment reports and records • other documentation relevant to validation.
Method of assessment	
Guidance information	

for assessment	
-----------------------	--

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Assessment system policies and procedures</i> may include:	<ul style="list-style-type: none"> • candidate selection • rationale and purpose of competency-based assessment • assessment records, and data and information management • recognition of current competency, recognition of prior learning and credit arrangements • assessment reporting procedures • assessment appeals • candidate grievances and complaints • validation • evaluation and internal audit • costs and resourcing • access and equity, and reasonable adjustment • partnership arrangements • links with human resource or industrial relations system • links with overall quality management system.
<i>Benchmarks for assessment:</i>	<ul style="list-style-type: none"> • refers to criterion against which the candidate is assessed • may be one or more units of competency or assessment criteria of course curricula.
<i>Materials</i> may include:	<ul style="list-style-type: none"> • assessment tools • samples of collected evidence • documentation outlining the basis of assessment decisions • reports and records of assessment decisions • samples of benchmarks of appropriate evidence • Assessment Guidelines of the relevant training packages • information from the evidence guide of the relevant units of competency.
<i>Validation activities</i> may include:	<ul style="list-style-type: none"> • analysing and reviewing: <ul style="list-style-type: none"> • assessment tools • collected evidence • assessment decisions and records of assessment outcomes

	<ul style="list-style-type: none"> • other aspects of assessment policies, processes and outcomes • recording evidence of validation processes and outcomes.
<i>Participation</i> may include comparison and evaluation of:	<ul style="list-style-type: none"> • assessment practices • assessment plans • interpretation of units of competency • assessment methods and instruments • assessment decisions • collected evidence.

TAEDEL301A Provide work skill instruction

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information,

ELEMENT	PERFORMANCE CRITERIA
	instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbal and non-verbal communication techniques, such as:
 - asking relevant and appropriate questions
 - providing explanations
 - demonstrating
 - using listening skills
 - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
 - identify hazards
 - conduct prestart-up checks if required
 - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:

REQUIRED SKILLS AND KNOWLEDGE

- ensure all learning objectives are covered
- pace learning
- reflection skills in order to:
 - identify areas for improvement
 - maintain personal skill development
- literacy skills to:
 - complete and maintain documentation
 - read and follow learning programs and plans
 - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
 - engage, motivate and connect with learners
 - provide constructive feedback
 - maintain appropriate relationships
 - establish trust
 - use appropriate body language
 - maintain humour
 - demonstrate tolerance
 - manage a group
 - recognise and be sensitive to individual difference and diversity
- observation skills to:
 - monitor learner acquisition of new skills, knowledge and competency requirements
 - assess learner communication and skills in interacting with others
 - identify learner concerns
 - recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency

REQUIRED SKILLS AND KNOWLEDGE

procedures

- risk controls for the specific learning environment

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
 - different learning objectives
 - a range of techniques and effective communication skills appropriate to the audience.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

Method of assessment**Guidance information for assessment**

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement**RANGE STATEMENT**

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Learner characteristics</i> may include:	<ul style="list-style-type: none"> • language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
<i>Safe learning environment</i> may include:	<ul style="list-style-type: none"> • exit requirements • personal protective equipment • safe access • safe use of equipment.
<i>Instruction and demonstration objectives</i> may include:	<ul style="list-style-type: none"> • competencies to be achieved • generic and technical skills, which may be: <ul style="list-style-type: none"> • provided by the organisation • developed by a colleague • individual or group objectives • learning outcomes.
<i>Learning resources</i> may include:	<ul style="list-style-type: none"> • any material used to support learning, such as: <ul style="list-style-type: none"> • learner and user guides • trainer and facilitator guides • example training programs • specific case studies • professional development materials • assessment materials • a variety of formats • those produced locally • those acquired from other sources.
<i>Learning materials</i> may include:	<ul style="list-style-type: none"> • handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
<i>Details</i> may include:	<ul style="list-style-type: none"> • location and time • outcomes of instruction or demonstration • reason for instruction or demonstration • who will be attending instruction session.

RANGE STATEMENT	
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> • emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> • coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
<i>Coaching</i> may include:	<ul style="list-style-type: none"> • learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
<i>Measures</i> may include:	<ul style="list-style-type: none"> • informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret learning environment and delivery requirements	1.1. Access, read and interpret <i>learning program documentation</i> to determine delivery requirements 1.2. Use available information and documentation to identify group and individual learner needs and learner characteristics 1.3. Identify and assess constraints and risks to delivery 1.4. Confirm personal role and responsibilities in planning and delivering training with relevant personnel
2. Prepare session plans	2.1. Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2. Develop <i>session plans</i> and document these for each segment of the learning program 2.3. Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1. Contextualise existing learning materials to meet the needs of the specific learner group 3.2. Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3. Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1. Conduct each session according to session plan, modified where appropriate to meet learner needs 4.2. Use the diversity of the group as another resource to

ELEMENT	PERFORMANCE CRITERIA
	support learning 4.3. Employ a range of delivery methods as training aids to optimise learner experiences 4.4. Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 5.2. Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3. Manage <i>inappropriate behaviour</i> to ensure learning can take place 5.4. Maintain and store learner records according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- presentation skills to ensure delivery is engaging and relevant, including:
 - synthesising information and ideas
 - preparing equipment, such as data projectors and computer presentation applications
 - speaking with appropriate tone and pitch
 - using language appropriate to audience
 - encouraging and dealing appropriately with questions
- group facilitation skills to ensure that:
 - every individual has an opportunity for participation and input
 - group cohesion is maintained
 - behaviour that puts others at risk is observed, interpreted and addressed
 - discussion and group interaction are enhanced
- conflict resolution and negotiation skills to:
 - identify critical points, issues, concerns and problems
 - identify options for changing behaviours
- oral communication and language skills to:

REQUIRED SKILLS AND KNOWLEDGE

- motivate learners to transfer skills and knowledge
- engage with the learner
- interpersonal skills to maintain appropriate relationships and ensure inclusivity
- observation skills to monitor individual and group progress

Required knowledge

- introductory knowledge of learning theories
- sound knowledge of learning principles
- sound knowledge of learner styles
- industry area and subject matter of the delivery
- learner group profile, including characteristics and needs of individual learners in the group
- content and requirements of the learning program and/or delivery plan
- different delivery methods and techniques appropriate to face-to-face group delivery
- techniques for the recognition and resolution of inappropriate behaviours
- behaviours in learners that may indicate learner difficulties
- organisational record-management systems and reporting requirements
- evaluation and revision techniques
- specific resources, equipment and support services available for learners with special needs
- relevant policy, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
- OHS relating to the facilitation of group-based learning, including:
 - assessment and risk control measures
 - reporting requirements for hazards
 - safe use and maintenance of relevant equipment
 - emergency procedures
 - sources of OHS information
 - role of key workplace persons
- policies and procedures relevant to the learning environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> facilitate group-based learning by preparing and delivering a series of training sessions, including: <ul style="list-style-type: none"> at least two consecutive sessions, of a duration commensurate with a substantive training session (e.g. 40-60 minutes), that follow one of the learning program designs at least one session delivered to a different learner group, with evidence of how the characteristics and needs of this group were addressed identify and respond to diversity and individual needs access and use documented resources and support personnel to guide inclusive practices.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: <ul style="list-style-type: none"> training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>Learning program documentation</i> may include:	<ul style="list-style-type: none"> • competencies or other benchmarks to be achieved • for each chunk or segment of the learning program: <ul style="list-style-type: none"> • specific learning outcomes derived from the benchmarks • overview of content to be covered • learning resources, learning materials and activities • delivery methods • number and duration of training sessions or classes required, and overall timelines • OHS issues to be addressed in delivery • identification of assessment points to measure learner progress • assessment methods and tools to be used to collect evidence of competency, where assessment is required.
<i>Session plans</i> may include:	<ul style="list-style-type: none"> • outline of objectives and content to be addressed • plan of delivery methods and learning activities to be used within the session • timelines and duration for each learning activity • formative assessment points and opportunities • learning materials required.
<i>Inappropriate behaviour</i> may include:	<ul style="list-style-type: none"> • violent or inappropriate language • verbal or physical abuse or bullying • insensitive verbal or physical behaviour towards other learners or the trainer/facilitator, including cultural, racial, disability or gender-based insensitivities • dominant or overbearing behaviour • disruptive behaviour • non-compliance with safety instructions.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish effective work environment for learning	1.1. Establish and agree upon objectives and scope of the work-based learning 1.2. Analyse work practices and routines to determine their effectiveness in meeting established learning objectives 1.3. Identify and address <i>OHS implications</i> of using work as the basis for learning
2. Develop a work-based learning pathway	2.1. Address <i>contractual requirements</i> and responsibilities for learning at work 2.2. Arrange for integration and monitoring of external learning activities with the <i>work-based learning pathway</i> 2.3. Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1. Identify context for learning and individual's learning style 3.2. Select appropriate technique or process to facilitate learning and explain the basis of the technique to learner 3.3. Develop, document and discuss <i>individualised learning plan</i> with learner 3.4. Access, read and interpret documentation outlining the OHS responsibilities of the various parties in the learning environment 3.5. Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure

ELEMENT	PERFORMANCE CRITERIA
	learner's health and safety
4. Implement work-based learning pathway	4.1. Sequence introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.2. Explain objectives of work-based learning and the processes involved to learner 4.3. Encourage learner to take responsibility for learning and to self-reflect 4.4. Develop techniques that facilitate learner's transfer of skills and knowledge
5. Maintain and develop the learning/facilitation relationship	5.1. Prepare for each session 5.2. Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3. Observe learner cues and change approaches where necessary to maintain momentum 5.4. Practise <i>ethical behaviour</i> at all times 5.5. Monitor effectiveness of the learning/facilitation relationship through regular meetings between the parties
6. Close and evaluate the learning/facilitation relationship	6.1. Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2. Seek feedback from learner on the outcomes achieved and value of the relationship 6.3. Evaluate and document process, including <i>impact, self evaluation and reflection</i> , and file according to legal and organisational requirements
7. Monitor and review the effectiveness of the work-based learning pathway	7.1. Document work performance and learning achievement and keep records according to organisational requirements 7.2. Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 7.3. Recommend improvements to work-based practice in light of the review process

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- oral communication and language skills to:
 - motivate the learner
 - transfer skills and knowledge
- interpersonal skills to maintain appropriate relationships
- observation skills to monitor individual progress
- literacy skills to:
 - read and interpret organisational documents, legal documents and contracts
 - complete and maintain documentation
- organisational skills to provide guidance and feedback to individuals
- communication skills, including:
 - using effective verbal and non-verbal language
 - using critical listening and questioning techniques
 - giving constructive and supportive feedback
 - assisting learners to paraphrase advice or instructions back to the trainer/facilitator
 - providing clear and concrete options and advice
 - using appropriate industry/profession terminology and language
 - ensuring language, literacy and numeracy used is appropriate to learners

Required knowledge

- systems, processes and practices within the organisation where work-based learning is taking place
- operational demands of the work and impact of changes on work roles
- organisational work culture, including industrial relations environment
- systems for identifying skill needs
- introductory knowledge of different learning styles and how to encourage learning in each, for example:
 - visual learners
 - audio learners
 - kinaesthetic learners
 - theoretical learners
- relevant policy, legislation, codes of practice and national standards that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, including:
 - hazards relating to the industry and specific workplace
 - reporting requirements for hazards and incidents

REQUIRED SKILLS AND KNOWLEDGE

- specific procedures for work tasks
- safe use and maintenance of relevant equipment
- emergency procedures
- sources of OHS information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- prepare and facilitate work-based learning
- provide evidence of a minimum of two examples of developing work-based learning pathways, that include:
 - identifying needs for learning
 - analysing work practices, work environment and work activities
 - organising and allocating work in a way that reflects learning needs and provides effective learning opportunities through work processes
- provide a minimum of two examples of a learning facilitation relationship being conducted:
 - with different individuals
 - demonstrating communication skills and flexibility
 - demonstrating one or more of the processes or techniques identified.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

EVIDENCE GUIDE	
	Assessment must ensure access to information about work activities.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>OHS implications</i> may include:	<ul style="list-style-type: none"> • OHS obligations • workplace OHS policies and procedures • ensuring work practices, routines and proposed changes do not pose a risk to learners and others.
<i>Contractual requirements</i> may include:	<ul style="list-style-type: none"> • training plans under apprenticeships/traineeships • requirements of government-funded training programs, such as Workplace English Language and Literacy (WELL).
<i>Work-based learning pathway</i> may include:	<ul style="list-style-type: none"> • identifying specific goals for work-based learning • identifying job tasks or activities to be included in learning process • appropriate sequencing of job tasks/activities to reflect learner incremental development • direct guidance and modelling from experienced co-workers and experts • opportunities for practice.
<i>Individualised learning plan</i> may include:	<ul style="list-style-type: none"> • information about individual's learning style, learner characteristics, and the context for learning • clear boundaries and expectations of the learning/facilitation relationship • documented equity or additional support needs for the learner

RANGE STATEMENT	
	<ul style="list-style-type: none"> • performance benchmarks to be achieved • activities and processes which together will achieve the benchmarks.
<i>Ethical behaviour</i> includes:	<ul style="list-style-type: none"> • trust • integrity • privacy and confidentiality of the session • following organisational policies • knowing own limitations • having a range of other intervention referrals ready when needed • honesty • fairness to others.
<i>Impact</i> may be:	<ul style="list-style-type: none"> • successful achievement, rate of achievement, or lack of achievement of identified goals • achievement of other outcomes as a result of the relationship • development of new goals • new or increased motivation to learn • greater capacity to learn • increase in learner's self-confidence.
<i>Self-evaluation and reflection</i> may include:	<ul style="list-style-type: none"> • asking critical questions about: <ul style="list-style-type: none"> • own ability • what worked or didn't work • how the relationship building process could be improved • reviewing records and journals on sessions and critically evaluating own performance • reviewing feedback from learner and identifying critical aspects and areas for improvement.

Co-requisite units

Co-requisite units		

TAEDES401A Design and develop learning programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine the design, outline the content and review its effectiveness.
------------------------	---

Application of the Unit

Application of the unit	This unit typically applies to a trainer or facilitator who designs or develops learning programs. A learning program can be discrete, providing a planned learning approach that relates to specific learning and training needs, or it may form part of the learning design for a qualification.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define parameters of the learning program	1.1. Clarify <i>purpose</i> and type of learning program with key stakeholders 1.2. Access and confirm the competency standards and <i>other training specifications</i> on which to base the learning program 1.3. Identify language, literacy and numeracy requirements of the program 1.4. Identify and consider characteristics of the target learner group
2. Work within the vocational education and training (VET) policy framework	2.1. Access relevant <i>VET policies</i> and frameworks, and apply to work practices 2.2. Identify changes to training packages and accredited courses and apply these to program development 2.3. Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1. Research, develop and document specific subject matter content according to agreed design options 3.2. Evaluate existing learning resources for content relevance and quality 3.3. Specify assessment requirements of the learning program
4. Design structure of the learning program	4.1. Break the learning content into manageable segments and document timeframe for each segment

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2. Determine and confirm <i>delivery strategies</i> and required assessment methods and tools</p> <p>4.3. Document complete learning program in line with organisational requirements</p> <p>4.4. Review complete program with key stakeholders and adjust as required</p> <p>4.5. Ensure a safe learning progression by analysing risks in the learning environment and including a risk control plan</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- organisational skills to ensure resources are available and suitable
- evaluation skills to determine the time required for each learning segment and the overall timelines of the learning program
- cognitive skills to develop the learning program content and design its structure
- language and literacy skills to read and interpret a range of documentation, including technical and subject matter documents, references and texts

Required knowledge

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- distinction and relationship between a training package/accredited course, learning strategy and learning program, where linked
- different purposes and focus of learning programs
- sound knowledge of learning principles
- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials and pre-developed learning activities
- methodology relating to developing and documenting new learning activities and

REQUIRED SKILLS AND KNOWLEDGE

related learning materials

- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the VET sector
- relevant OHS knowledge relating to the work role, and OHS considerations that need to be included in the learning program

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • design, develop and review learning programs within the VET context • prepare and develop a minimum of two learning programs: <ul style="list-style-type: none"> • that contain differentiated learning program designs to reflect particular needs, contexts and timelines • at least one of which must be based on competency standards or accredited courses and must cover at least one entire unit of competency or accredited course module.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the

EVIDENCE GUIDE

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select appropriate training package or accredited course	1.1. Confirm training and/or assessment needs of <i>client</i> 1.2. Identify and source training packages and/or accredited courses which could satisfy client needs 1.3. Use training products in line with the <i>training and assessment organisation's quality assurance policies</i> and procedures
2. Analyse and interpret the qualifications framework	2.1. Read and interpret qualification rules 2.2. Review and determine applicable licensing requirements and prerequisites 2.3. Determine suitable electives that meet client needs and job roles
3. Analyse and interpret units of competency and accredited modules	3.1. Select individual unit or accredited module to meet client needs 3.2. Read, analyse and interpret all parts of the unit or accredited module for application to client needs 3.3. Analyse links between unit and/or accredited module to develop effective applications for the client 3.4. Document analysis of unit or accredited module in a clear and accessible manner
4. Contextualise units and modules for client applications	4.1. Use information from the client to <i>contextualise the unit</i> or accredited module to meet client needs 4.2. Use advice on contextualisation produced by the

ELEMENT	PERFORMANCE CRITERIA
	training package developer or course developer to meet client needs
5. Analyse and interpret assessment guidance	5.1. Read, analyse and apply the assessment guidance of the relevant training package or accredited course 5.2. Determine any special requirements for assessment or reasonable adjustment to suit client needs

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to collaborate with others in using training products
- planning skills to develop a structure for a particular application of training packages and accredited courses
- cognitive skills to analyse, interpret and apply the various components of selected training packages and accredited courses
- research skills to analyse and interpret training package and accredited course content to meet client needs

Required knowledge

- Australian Qualifications Framework (AQF) guidelines, including characteristics of AQF qualification levels
- functions and responsibilities of training package developers and course accreditation agencies, and their roles as key vocational education and training (VET) organisations
- dimensions of competency
- format and structure of accredited courses
- format and structure of competency standards
- function of training packages and accredited curriculum as benchmarks in a competency-based VET training and assessment system
- methodology relating to analysing and using competency standards for a range of applications and purposes to meet the needs of a diverse range of VET clients
- language and terminology used in training packages and accredited courses
- parts of training packages that can be contextualised and parts that cannot
- structure of training packages and the role and purpose of each endorsed component

REQUIRED SKILLS AND KNOWLEDGE

- sources of training package information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • analyse a training package and or accredited course to examine its component parts, identify relevant units of competency or modules, and contextualise those to meet a specific client need • demonstrate a minimum of two examples of analysing training specifications, including at least one training package; the other may be another training package or an accredited course that meets a specific client need.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: <ul style="list-style-type: none"> • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Client</i> may include:	<ul style="list-style-type: none"> • individual learners • candidates for assessment • organisations or enterprises with specific training needs.
<i>Training and assessment organisation</i> may include:	<ul style="list-style-type: none"> • registered training organisation (RTO) • organisation working in a partnership arrangement with an RTO to provide recognised training and assessment services • organisation that provides non-recognised training and assessment services.
<i>Quality assurance policies</i> may include:	<ul style="list-style-type: none"> • Australian Quality Training Framework requirements as they apply to RTOs • organisational internal quality policies and procedures.
<i>Contextualising units:</i>	<ul style="list-style-type: none"> • means linking the requirements of the competency standard to the work environment of a particular client or client group • may include: <ul style="list-style-type: none"> • identifying specific types of tools and equipment relevant to the competency • identifying specific organisational policies, procedures, processes and forms relevant to the competency • linking organisation-specific terminology to the competency • identifying specific people relevant to the competency.

Co-requisite units

Co-requisite units	

TLIA2012A Pick and process orders

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to pick and process orders in accordance with workplace requirements including identifying workplace order picking processes, policies and procedures; picking and despatching orders, and recording stock levels. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with relevant codes/regulations and workplace requirements for the picking and processing of orders.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures to the picking and processing of orders in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Identify workplace order picking processes, policies and procedures | 1.1 Workplace procedures for order picking and related workplace documentation are interpreted
1.2 Stock allocation and location systems are identified and located
1.3 Appropriate manual handling equipment is selected in accordance with OH&S regulations and workplace procedures |
| 2 Pick and despatch an order | 2.1 Work requirements are planned with appropriate equipment and documentation assembled
2.2 Zones of the warehouse which store required products are identified and located
2.3 Pick path is established
2.4 Where required, appropriate pallet(s) for orders are selected and stacked to minimise stock damage and maximise stability
2.5 Products are selected and consolidated
2.6 Products/pallets are located in despatch areas
2.7 Products are assembled to meet workplace schedules
2.8 Orders are consolidated, secured, arranged and placed in storage zones in accordance with the schedule |
| 3 Record stock levels | 3.1 Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures
3.2 Workplace records are completed in accordance with workplace requirements |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the picking and processing of orders, including relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the picking and processing of orders
- Focus of operation of work systems, equipment, management and site operating systems for the picking and processing of orders
- Problems that may occur when picking and processing an order and appropriate action that can be taken to resolve the problems
- Documentation and record requirements when picking and processing an order
- Equipment used during picking and processing operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when picking and processing orders
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, signs and labels relevant to the picking and processing of orders
- Complete documentation related to picking and processing orders
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when picking and processing orders
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when picking and processing orders in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when picking and processing orders
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when picking and processing orders
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods/loads

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|---|---|
| Work may be conducted: | <ul style="list-style-type: none"> • by day or night • in a range of work environments |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none"> • large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none"> • limited or restricted spaces • exposed conditions • controlled or open environments |
| Problems that may occur when picking and processing an order include: | <ul style="list-style-type: none"> • wrong stock is picked • wrong carton for order • incorrect location • damaged stock • no stock at location • incorrect quantity • failing to meet a special order requirement |
| Special order requirements may include: | <ul style="list-style-type: none"> • pricing • special packing • specific size of carton • special categories of stock |
| Hazards in the work area may include exposure to: | <ul style="list-style-type: none"> • chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • oil or water on floor • a fire or explosion |

RANGE STATEMENT

- Consultative processes may involve:
- damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
 - workplace personnel
 - supervisors and managers
 - customers/clients
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - RF communications
 - barcode readers
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock requisitions and bar codes
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements

RANGE STATEMENT

Applicable regulations and legislation may include:

- quality assurance procedures
- emergency procedures
- relevant codes and regulations pertaining to the picking and processing of orders
- Australian Dangerous Goods Code
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations
- workers compensation regulations

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan and organise despatch operations

- 1.1 Knowledge of product characteristics and workplace procedures are applied to the analysis of the stock
- 1.2 Resources including manual handling equipment, employee competencies, storage areas and goods management equipment are identified to match stock characteristics
- 1.3 Deadlines are scheduled to meet order requirements
- 1.4 Work processes are planned to meet deadlines

2 Organise the storage and despatch of stock

- 2.1 Employees, equipment and storage areas are allocated and supervised
- 2.2 Individuals are informed of work requirements and deadlines
- 2.3 Work processes are monitored to ensure that resources, both human and equipment, are maintained at productive levels and in accordance with workplace procedures and OH&S requirements
- 2.4 Discrepancies in stocks are noted and reported in accordance with company procedures

3 Complete documentation

- 3.1 Required despatch documentation and records are completed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the organising of despatch operations, including the ADG Code and

REQUIRED KNOWLEDGE AND SKILLS

relevant bond, quarantine or other legislative requirements

- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of despatch operations
- Focus of operation of work systems, equipment, management and site operating systems for the organising of despatch operations
- Problems that may occur when organising despatch operations and appropriate action that can be taken to resolve the problems
- Documentation and record requirements for despatch operations
- Equipment used during the organisation of despatch operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising despatch operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of despatch operations
- Complete documentation related to the organising of despatch operations
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when organising despatch operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising despatch operations in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant equipment and communications technology when organising despatch operations
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
- Goods to be despatched may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods, dangerous goods or hazardous substances
- Problems that may occur when despatching an order include:
- wrong stock is despatched
 - wrong carton for order
 - incorrect location
 - damaged stock
 - no stock at location
 - incorrect quantity
 - failing to meet a special order requirement
 - failing to meet customers delivery requirements
- Special order requirements may include:
- pricing
 - special packing
 - specific size of carton
 - special categories of stock
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - oil or water on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax

RANGE STATEMENT

- email
 - internet
 - RF communications
 - barcode readers
 - oral, aural or signed communications
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Consultative processes may involve:
- workplace personnel
 - supervisors and managers
 - customers/clients
 - drivers and agents
 - contractors
 - official representatives
- Information/documents may include:
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock requisitions and bar codes
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies
 - supplier and/or client instructions
 - dangerous goods declarations and material safety data sheets (where applicable)
 - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - relevant legislation, regulations and related documentation including the ADG Code
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable regulations and legislation may include:
- relevant codes and regulations pertaining to the organising of despatch operations
 - Australian and international regulations and codes of practice for the handling and transport of dangerous goods

RANGE STATEMENT

and hazardous substances, including:

- Australian and International Dangerous Goods Codes
- Australian Marine Orders and the International Maritime Dangerous Goods Code
- IATA Dangerous Goods by Air Regulations
- Australian and international explosives codes
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a light rigid vehicle safely including systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition, and performance and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to light rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial light rigid vehicle across a variety of driving contexts.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Drive the light rigid vehicle

- 1.1 The light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.4 The light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.5 The light rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.6 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment, loads and facilities

3 Monitor and maintain vehicle performance

- 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
- 3.2 Performance and efficiency of vehicle operation is monitored during use
- 3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority

ELEMENT**PERFORMANCE CRITERIA**

3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Light rigid vehicle controls, instruments and indicators and their use
- Light rigid vehicle handling procedures
- Driving hazards and related defensive driving techniques
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Map reading and road navigation techniques including the use of a GPS device where applicable
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Workplace driving and operational instructions
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a commercial light rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a commercial light rigid vehicle

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a commercial light rigid vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a commercial light rigid vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a commercial light rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a commercial light rigid vehicle
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checkson the vehicle in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills

EVIDENCE GUIDE

- Context of and specific resources for assessment**
- relevant legislation and workplace procedures
 - other relevant aspects of the range statement
 - Performance is demonstrated consistently over a period of time and in a suitable range of contexts
 - Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Type of vehicle includes:
- all light rigid vehicles including trucks and buses greater than 4.5 tonnes or seating more than 12 adults including the driver
- Driving may be carried out in typical road transport situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road

RANGE STATEMENT

- Vehicle handling procedures may include:
- on a private road
 - while at a depot, base or warehouse
 - while at a client's workplace or work site
 - starting a vehicle
 - steering and manoeuvring a vehicle
 - accelerating and braking
 - positioning and stopping a vehicle
 - reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Minor routine repairs may include:
- replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage
 - bridge/tunnel damage

RANGE STATEMENT

- road works
 - building construction
 - emergency situations such as bushfires, building fires, etc.
 - road closures for special events such as marches, parades, etc.
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- Documentation/records may include:
- state/territory light rigid vehicle driving licence requirements
 - state/territory road rules
 - workplace driving instructions and procedures
 - vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
 - emergency procedures
 - vehicle log book or record book (where required)
- Applicable procedures and codes may include:
- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to light rigid vehicles
 - relevant state/territory road rules
 - relevant state/territory permit regulations and requirements
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Drive the medium rigid vehicle

- 1.1 The medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective transmission use
- 1.4 Braking system of medium rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 The medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.7 The medium rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.8 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people

ELEMENT	PERFORMANCE CRITERIA
3 Monitor and maintain vehicle performance	or damage to property, equipment, loads and facilities 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle 3.2 Performance and efficiency of vehicle operation is monitored during use 3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority 3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Medium rigid vehicle controls, instruments and indicators and their use
- Medium rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Workplace driving and operational instructions
- Driving hazards and related defensive driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Principles of stress management when driving a vehicle
- Map reading and road navigation techniques including the use of a GPS device where applicable
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents

REQUIRED KNOWLEDGE AND SKILLS

- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a medium rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to work activities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a medium rigid vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a medium rigid vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a medium rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checks on a medium rigid vehicle
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Type of vehicle includes:
- all medium rigid vehicles, for example any 2-axle rigid vehicle, including truck and bus greater than 8 tonnes GVM
- Driving may be carried out in typical road transport situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road
 - on a private road
 - while at a depot, base or warehouse
 - while at a client's workplace or work site
- Vehicle handling procedures may include:
- starting a vehicle
 - steering and manoeuvring a vehicle
 - accelerating and braking
 - positioning and stopping a vehicle
 - reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using air brakes
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Minor routine repairs may include:
- replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel

RANGE STATEMENT

Factors that can cause traffic delays and diversions may include:

- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions
- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works
- building construction
- emergency situations such as bushfires, building fires, etc.
- road closures for special events such as marches, parades, etc.
- holiday traffic
- road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Documentation/records may include:

- state/territory medium rigid vehicle driving licence requirements
- state/territory road rules
- workplace driving instructions and procedures
- vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
- emergency procedures
- vehicle log book or record book (where required)

Applicable procedures and codes may include:

- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to medium rigid vehicles
- relevant state/territory road rules
- relevant state/territory permit regulations and requirements
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Drive the heavy rigid vehicle

- 1.1 The heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective gear selection and smooth transition in gear changes
- 1.4 Braking system of heavy rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 The heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning.
- 1.7 The heavy rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
- 1.9 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy rigid vehicle controls, instruments and indicators and their use
- Heavy rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on heavy rigid vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Workplace driving and operational instructions
- Driving hazards and related defensive driving techniques
- Principles of stress management when driving a vehicle
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies and on-road techniques

REQUIRED KNOWLEDGE AND SKILLS

- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a commercial heavy rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to when the driving of a commercial heavy rigid vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a commercial heavy rigid vehicle
- Work collaboratively with others when driving a commercial heavy rigid vehicle
- Operate electronic communication equipment to required protocol
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a commercial heavy rigid vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a commercial heavy rigid vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of the vehicle and its equipment and take appropriate action where required
- Carry out pre-operational checks in the course of work activities

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Drive the heavy combination vehicle

PERFORMANCE CRITERIA

- 1.1 The heavy combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective gear selection and smooth transition in gear changes
- 1.4 Braking system of heavy combination vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 The heavy combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.7 The heavy combination vehicle is parked, uncoupled, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
- 1.9 Appropriate signage, lights and the like are checked for

ELEMENT	PERFORMANCE CRITERIA
	operational effectiveness and for conformity to prescribed traffic regulations
	1.10 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Prime mover and trailer are aligned and coupled in accordance with manufacturers instructions and workplace procedures
	3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
	3.4 Performance and efficiency of vehicle operation is monitored during use
	3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority
	3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy combination vehicle controls, instruments and indicators and their use
- Heavy combination vehicle handling procedures
- Workplace driving and operational instructions
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies

REQUIRED KNOWLEDGE AND SKILLS

- Efficient driving techniques
- Pre-operational checks carried out on heavy combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques
- Map reading and navigation of the vehicle and related action
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a heavy combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a heavy combination vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a heavy combination vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a heavy combination vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a heavy combination vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when driving a heavy combination vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Apply map reading and road navigation techniques to the operation of a heavy combination vehicle
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

EVIDENCE GUIDE

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all heavy combination vehicles that may be driven on public and private roads and work sites

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes

RANGE STATEMENT

- Minor routine repairs may include:
- checks of coupling equipment
 - replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
 - work site hazards including power and service lines, buildings, structures, facilities, underground services, uneven or unstable ground and recently filled trenches, stationary and moving machinery and equipment, hazardous or dangerous materials, noise, light, energy sources, and obstructions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage
 - bridge/tunnel damage
 - road works
 - building construction
 - emergency situations such as bushfires, building fires, etc.
 - road closures for special events such as marches, parades, sporting events, etc.
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
- Depending on the type of organisation concerned and the
- company procedures
 - enterprise procedures

RANGE STATEMENT

local terminology used, workplace procedures may include:

- organisational procedures
- established procedures

Documentation/records may include:

- state/territory heavy combination vehicle driving licence/permit requirements
- state/territory road rules
- workplace driving instructions and procedures
- vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
- emergency procedures
- vehicle log book or record book (where required)

Applicable procedures and codes may include:

- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to heavy combination vehicles
- relevant state/territory road rules
- relevant state/territory permit regulations and requirements
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

TLIC3063A Operate vehicle carrying special loads

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a vehicle carrying a special load safely including compliance with road traffic authority and other relevant government regulations and company policies; and effective management of hazardous situations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence and permit requirements and regulations of the relevant state/territory roads and traffic authority as well as the specific regulatory and permit requirements pertaining to the special load being carried.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Carry out pre-operational checks

- 1.1 The pre-operational checks for the special purpose vehicle and its associated ancillary equipment are carried out in accordance with manufacturers requirements, government regulations and workplace policies and procedures
- 1.2 All faults and defects identified during checks are repaired or reported in accordance with workplace procedures

2 Drive a vehicle carrying special loads

- 2.1 The vehicle is manoeuvred in accordance with the regulations/permit requirements for the class of vehicle involved and the load being carried
- 2.2 Vehicles carrying explosives or dangerous goods are driven along designated routes in accordance with the relevant codes, relevant government regulations and workplace policies
- 2.3 The load is transported and the vehicle manoeuvred in accordance with any required precautions relating to unusual/special characteristics of the load and/or relevant government regulations pertaining to the special load including the Australian Dangerous Goods Code and the Australian Explosives Code
- 2.4 Signs or indicators are fixed to the vehicle if required
- 2.5 Appropriate procedures are followed for the load concerned in the event of a driving emergency

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Where applicable, Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
- Relevant OH&S and environmental procedures and regulations
- Vehicle controls, instruments and indicators and their use
- Workplace driving and operational instructions
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Map reading and road navigation techniques
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a vehicle designed to carry special loads
- Read and interpret instructions, procedures, information and signs relevant to the driving of a vehicle designed to carry special loads
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a vehicle designed to carry special loads
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a vehicle designed to carry special loads
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Required skills:

- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when driving a vehicle designed to carry special loads in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a vehicle designed to carry special loads
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a vehicle designed to carry special loads
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle and its equipment and load and take appropriate action if required
- Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period

EVIDENCE GUIDE

for assessment

of time and in a suitable range of contexts

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all vehicles designed to carry special loads, for example concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier, recovery vehicle

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse

RANGE STATEMENT

- Vehicle handling procedures may include:
- while at a client's workplace or work site
 - starting a vehicle
 - steering and manoeuvring a vehicle
 - accelerating and braking
 - positioning and stopping a vehicle
 - reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Minor routine repairs may include:
- replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Designated routes are:
- those that are determined by permit/regulatory requirements for a specific class of load such as explosives or dangerous goods
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage

RANGE STATEMENT

- bridge/tunnel damage
 - road works
 - building construction
 - emergency situations such as bushfires, building fires, etc
 - road closures for special events such as marches, parades, etc
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Documentation/records may include:
- state/territory driving licence requirements
 - state/territory road rules
 - workplace driving instructions and procedures for drivers of vehicles carrying the specific load concerned
 - vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
 - procedures/designated routes prescribed by the relevant authority for vehicles carrying the specific loads concerned
- Applicable procedures and codes may include:
- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to the class of vehicle
 - relevant regulations/permit requirements specific to the load being carried
 - Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant State/Territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a multi-combination vehicle safely, including systematic and efficient control of all vehicle functions, coupling and uncoupling of dollies, monitoring of traffic and road conditions, management of vehicle condition and performance, and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to multi-combination vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial multi-combination vehicle across a variety of driving contexts.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Drive the multi-combination vehicle

PERFORMANCE CRITERIA

- 1.1 The multi-combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Braking system of multi-combination vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 The multi-combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.6 The multi-combination vehicle is parked, shut down, uncoupled and secured according to manufacturers specifications, traffic regulations and workplace procedures
- 1.7 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations
- 1.8 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient and permissible route of travel is taken through monitoring and anticipation of traffic flows and

ELEMENT	PERFORMANCE CRITERIA
3 Monitor and maintain vehicle performance	<p>conditions, road standards and other factors likely to cause delays or route deviations</p> <p>2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities</p> <p>3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle</p> <p>3.2 Prime mover, dollies and trailer are aligned and coupled in proper sequence in accordance with manufacturers instructions and workplace procedures</p> <p>3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational</p> <p>3.4 Performance and efficiency of vehicle operation is monitored during use</p> <p>3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority</p> <p>3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Multi-combination vehicle controls, instruments and indicators and their use
- Multi-combination vehicle handling procedures
- Workplace driving and operational instructions
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on multi-combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques

REQUIRED KNOWLEDGE AND SKILLS

- Map reading and road navigation techniques
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a multi-combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a multi-combination vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a multi-combination vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a multi-combination vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a multi-combination vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a multi-combination vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a multi-combination vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required

Required skills:

- Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated

EVIDENCE GUIDE

environment at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all multi-combination vehicles that may be driven on public and private roads and work sites

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes
- checks of coupling equipment

Minor routine repairs may include:

- replacement of blown globes in vehicle lights
- replacement of broken fan belt
- replacement of blown fuse
- replacement of door mirrors
- repairs to rear tail-light lens

RANGE STATEMENT

Driving hazards may include (examples only):

- changing of tyres
- repair of tyre punctures
- replacement of broken coolant hose
- wet and iced roads
- oil on road
- animals and objects on road
- fire in vehicle
- leaking fuel
- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions

Factors that can cause traffic delays and diversions may include (examples only):

- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works
- building construction
- emergency situations such as bushfires, building fires, etc.
- road closures for special events such as marches, parades, etc.
- holiday traffic
- road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Documentation/records may include:

- state/territory multi-combination vehicle driving licence/permit requirements
- state/territory road rules
- workplace driving instructions and procedures
- vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
- emergency procedures
- vehicle log book or record book (where required)

RANGE STATEMENT

Applicable procedures and codes may include:

- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to multi-combination vehicles
- relevant state/territory road rules
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

TLID1001A Shift materials safely using manual handling methods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Assess risks associated with the relocation of the load

- 1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation
- 1.2 Locations for storage are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made
- 1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered
- 1.7 Potential risks in route(s) which may be followed are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered for application
- 1.11 Appropriate personal protective equipment is worn
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned consistent with the code of practice for manual handling
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties
- 2.3 Proposed process is checked against code of practice and workplace procedures for compliance

ELEMENT	PERFORMANCE CRITERIA
3 Relocate load	<p>3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements</p> <p>3.2 Applications appropriate for team relocation of load are identified</p> <p>3.3 Team lifting tasks are coordinated</p> <p>3.4 Planned process and route are followed</p> <p>3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability</p> <p>3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods

Required skills:

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - interpreting manual handling risks
 - using correct manual handling practices
 - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Materials to be shifted may include:

- goods
- large luggage items
- baggage items

RANGE STATEMENT

- equipment and tools
 - cleaning materials
 - components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc.
 - materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - weight of items being handled
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for

RANGE STATEMENT

Applicable regulations and legislation may include:

- Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - relevant state/territory OH&S legislation
 - relevant state/territory environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
 - licence, patent or copyright arrangements
 - dangerous goods and air freight regulations
 - export/import/quarantine/bond requirements
 - marine orders

TLID2004A Load and unload goods/cargo

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to load and unload goods and cargo, including loading and unloading goods, securing and protecting the load and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations/permit requirements including those of the relevant state/territory roads and traffic authority concerning the loading of goods/cargo.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles, routine procedures and regulatory/permit requirements to the loading and unloading of goods/cargo.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Load and unload goods/cargo

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
- 1.2 Dangerous or hazardous goods are identified and handled in accordance with the Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
- 1.3 Load is packed/unpacked to make safe and effective use of available spaces
- 1.4 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
- 1.5 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation
- 1.6 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load
- 1.7 Goods requiring special handling and/or documentation are identified and appropriate procedures followed
- 1.8 Relocated material is restacked appropriate for the transport method, safe height, weight loading, size and crushability of the goods

2 Secure and protect load

- 2.1 The distribution of the load is checked to ensure that it is even, legal and within safe working capacity
- 2.2 Load is checked to ensure that dangerous goods and hazardous substances are appropriately segregated in accordance with the ADG Code
- 2.3 Load is secured using the correct load restraint and protection equipment for different loads, carrying and storage conditions
- 2.4 The load is protected in accordance with legal and workplace safety requirements

3 Complete

- 3.1 The load is inspected and checked for security to travel in

ELEMENT	PERFORMANCE CRITERIA
documentation	accordance with relevant regulations/permit requirements and the ADG Code where applicable 3.2 All required documentation for the goods is completed in accordance with workplace requirements including the ADG Code where applicable

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian standards and regulations including state/territory mass and loading regulations
- National Load Restraint Guide
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks when loading and unloading goods/cargo and related precautions to control the risk
- Security awareness requirements when loading and unloading vehicles and in particular the recognition, isolation and reporting of suspicious cargo and goods
- Workplace procedures and policies for the loading and unloading of goods/cargo
- Housekeeping standards procedures required in the workplace
- Methods of securing a load
- Site layout and obstacles
- Problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve them

Required skills:

- Communicate effectively with others when loading and unloading goods and cargo
- Read and interpret instructions, procedures, information, signs and labels relevant to the loading and unloading of goods and cargo
- Identify containers and goods coding, ADG and IMDG markings and, where applicable, emergency information panels and take appropriate action
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading and unloading of goods and cargo

Required skills:

- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads and take appropriate action
- Work collaboratively with others when loading and unloading goods and cargo
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when loading and unloading goods and cargo in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when loading and unloading goods and cargo
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading and unloading of goods and cargo
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in cargo and equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

for assessment

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Goods/cargo to be loaded or

- require special precautions

RANGE STATEMENT

unloaded may:

Loads to be shifted may be:

- irregularly shaped
- packaged or unpackaged
- labelled or unlabelled
- palleted or unpalleted

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Communication in the work area may include:

- phone
- electronic data interchange
- fax
- email
- internet
- radio
- oral, aural or signed communications

Loading operations may be carried out:

- manually
- with the aid of lifting equipment and/or appliances

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs
- manifests, bar codes, goods and container identification
- manufacturers specifications for equipment/tools
- workplace procedures and policies for the loading and unloading of goods/cargo
- ADG Code and associated regulations
- supplier and/or client instructions
- material safety data sheets

RANGE STATEMENT

Applicable regulations and legislation may include

- EPGs and Initial Response Guide (HB76:1998 or equivalent)
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- Load Restraint Guide
- relevant Australian standards and regulations including state/territory mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1 Check forklift condition | <p>1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task</p> <p>1.2 Attachments are checked to ensure appropriate adjustment and operation</p> <p>1.3 Mirrors and seats are adjusted for safe operation by the driver</p> <p>1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements</p> |
| 2 Drive the forklift | <p>2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions</p> <p>2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage</p> <p>2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques</p> <p>2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures</p> |
| 3 Operate a forklift to handle loads | <p>3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected</p> <p>3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures</p> |

ELEMENT	PERFORMANCE CRITERIA
4 Monitor site conditions	4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use 5.2 Defective/irregular performance and malfunctions reported to relevant personnel 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

Required skills:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

EVIDENCE GUIDE

demonstrate competency in this unit

requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks

RANGE STATEMENT

- Operations may be carried out in typical forklift operational situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road
 - on a private road or worksite
 - while at a workplace
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may require:
- special precautions
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palleted or unpalleted
 - chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
- Hazards in the work area may include exposure to:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Forklift handling procedures may include:
- starting a forklift
 - steering and manoeuvring a forklift
 - accelerating and braking
 - positioning and stopping a forklift
 - reversing a forklift
 - operating forklift controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of forklift
 - checking and topping up of fluid levels
 - checks of tyres
 - checks of operation of forklift lights and indicators
 - checks of brakes
- Hazards may include (examples only):
- wet and iced operating surfaces
 - oil on operating surface

RANGE STATEMENT

- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- faulty brakes
 - workplace obstacles and other operational equipment and vehicles
 - damaged loads and pallets
 - other personnel in work area
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protection equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
 - manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification
 - Australian Standard 2359 - Industrial Truck Code
 - manufacturers specifications for forklift and associated equipment
 - operations and service record book or log
 - workplace procedures and policies for the operation of forklifts
 - supplier and/or client instructions
 - ADG Code and material safety data sheets
 - regulatory requirements concerning the use of forklifts
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations pertaining to the operation of forklifts
 - relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with workplace requirements and relevant regulatory requirements, including planning work for the current working conditions; using controls and equipment operating systems to manage movement of the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes, regulations, licence and/or permit and workplace requirements relevant to operation of the specialised load shifting equipment concerned.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the operation of specialised load shifting equipment in the stevedoring, transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan work for the current working conditions

- 1.1 Traffic flow and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
- 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments are used to transport the load
- 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel

2 Use controls and equipment operating systems to manage movement of the unit and accessory operations

- 2.1 Equipment is prepared and any appropriate attachment fitted
- 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine
- 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed
- 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and enterprise safety requirements
- 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
- 2.6 Equipment operations are conducted within the manufacturer's specified torque range
- 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
3 Locate load and identify load characteristics	<p>3.1 Load is located and identified according to instructions</p> <p>3.2 Loading and unloading plans are followed to ensure efficiency and safety of operations</p> <p>3.3 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed</p> <p>3.4 Hazardous goods are identified and relevant procedures are taken into account when planning and conducting the work</p> <p>3.5 Load weight and dimensions are within the capacity of the equipment</p>
4 Move materials and loads	<p>4.1 Equipment is manoeuvred and positioned using smooth and controlled movements</p> <p>4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications</p> <p>4.3 Materials are moved ensuring no injury to personnel or damage to equipment or goods</p>
5 Monitor and operate controls	<p>5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions</p> <p>5.2 Control systems are understood and acted upon in accordance with statutory authority regulations, manufacturers guidelines and site operating procedures</p> <p>5.3 Control faults are identified and reported in accordance with manufacturers instructions and workplace guidelines</p>
6 Stop, park and secure equipment	<p>6.1 Equipment is brought to a controlled halt within manufacturers guidelines</p> <p>6.2 Equipment is parked without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures</p> <p>6.3 Equipment is secured on a flat, even surface and not close to doorways, aisles, access-ways or blind corners and in accordance with securing procedures for the appropriate equipment</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

REQUIRED KNOWLEDGE AND SKILLS

- Regulations relevant to the operation of specialised load shifting equipment, including, where relevant, the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the operation of the specialised load shifting equipment
- Focus of operation of work systems, equipment, management and site operating systems for the operation of the specialised load shifting equipment
- The purpose, characteristics, capabilities, requirements and limitations of the specialised load shifting equipment
- Conveyed materials' potential for toxicity, reactivity, material grade, type and purpose including information from relevant material safety data sheets and ADG Code documentation (where applicable)
- Problems that may occur when operating specialised load shifting equipment and appropriate action that can be taken to resolve the problems
- Operational safety requirements and precautions for the specialised load shifting equipment concerned
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles
- Relevant permit and licence requirements

Required skills:

- Communicate effectively with others when operating specialised load shifting equipment
- Read and interpret instructions, procedures, information and signs relevant to work activities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of specialised load shifting equipment
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating specialised load shifting equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when operating specialised load shifting equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating specialised load shifting equipment
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of specialised load shifting equipment
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant gear and accessories when operating specialised load shifting equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of specialised load shifting equipment and take appropriate action where required
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace

EVIDENCE GUIDE

- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - holds on ships
 - exposed conditions
 - controlled or open environments
 - even or uneven surfaces
 - wet or dry surfaces
- Equipment may include:
- reach stackers
 - straddle trucks
 - excavators
 - front-end loaders (over 10 tonne)

RANGE STATEMENT

- Requirements for work may include:
- bulldozers (both in transport and shipping terminals and in the holds of ships)
 - straddle carriers
 - site restrictions and procedures
 - use of safety and personal protective equipment
 - communications equipment
 - specialised lifting and/or handling equipment
 - additional gear and equipment
 - noise restrictions
 - hours of operations
 - authorities and permits
- Hazards in the work area may include exposure to:
- chemicals and fumes
 - dangerous or hazardous substances
 - stationary and moving machinery, goods, materials and vehicular traffic
 - contamination of, or from, materials being handled
 - service lines
 - spills, leakages and ruptures
 - dust/vapours
 - faulty gear/equipment/tools
- Consultative processes may involve:
- workplace personnel including supervisors and managers
 - equipment manufacturers and suppliers
 - site visitors and contractors
 - union representatives, industrial relations and OH&S specialists
 - other professional or technical staff
- Communication in the work area may include:
- phone
 - fax
 - email
 - internet
 - electronic data interchange (EDI)
 - RF communications
 - bar code readers
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - respirators and fume masks
 - protective clothing

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

Information/documents may include:

Applicable regulations and legislation may include:

- high visibility clothing
- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- workplace procedures and policies for the operation of the specialised load shifting equipment concerned
- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- manufacturers specifications for equipment/tools
- equipment identification labels, bar codes and serial numbers
- supplier and/or client instructions
- relevant OH&S requirements and policies
- relevant Australian standards and certification requirements
- material safety data sheets where applicable
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation including the ADG Code
- award, enterprise bargaining agreement and other industrial arrangements
- quality assurance procedures
- emergency procedures
- relevant codes, regulations and licence/permit requirements pertaining to the operation of the specialised load shifting equipment concerned including the ADG Code (where applicable)
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian standards and certification requirements
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

TLID2013A Move materials mechanically using automated equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Select load moving equipment

1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods

1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures

2 Move goods

2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures

2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures

3 Check goods and complete documentation

3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken

3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment,

EVIDENCE GUIDE

- and
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- The operations may be conducted:
- in a range of work environments
 - by day or night
 - in a range of typical weather conditions
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Mechanised equipment may include a range of goods and materials handling equipment such as:
- automatic guided vehicle
 - tow motors
 - high level order picker
 - conveyor system
 - mechanised pallet mover
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios

RANGE STATEMENT

- Hazards in the work area may include exposure to:
- high visibility clothing
 - chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - moving and rotating equipment and vehicles
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - manufacturers instructions concerning the use and servicing of automated mechanical equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable regulations and legislation may include:
- relevant state/territory OH&S legislation
 - relevant state/territory environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
 - ADG Code and regulations

Competency Field

Competency Field D - Load Handling

TLID2047A Prepare cargo for transfer with slings

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to prepare cargo for transfer with slings in accordance with workplace requirements and relevant regulatory requirements, including preparing for transfer of cargo, calculating Safe Working Load (SWL) or Working Load Limit (WLL) of slings and loads, slinging cargo and unslinging cargo, and strapping and unstrapping goods. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes/regulations and workplace requirements relevant to the preparation of cargo for transfer with slings.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the preparation of cargo for transfer with slings in the stevedoring, transport, warehousing, distribution and/or storage industries.

- 4.4 Strapping arrangements are secured/released to/from load ensuring no injury to personnel or damage to machinery or cargo

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the transfer of cargo with slings, including, where relevant, the Australian Dangerous Goods Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the transfer of cargo with slings
- Focus of operation of work systems, equipment, management and site operating procedures for the transfer of cargo with slings
- Cargos potential for toxicity, reactivity, material grade, type and purpose including information from relevant material safety data sheets and Australian Dangerous Goods Code documentation (where applicable)
- Gear and equipment used during the transfer of cargo with slings and the precautions and procedures that should be followed in their use
- Problems that may occur when preparing cargo for transfer with slings and appropriate action that can be taken to resolve the problems
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when preparing cargo for transfer with slings
- Read and interpret instructions, procedures, information and signs relevant to the preparation of cargo for transfer with slings
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the preparation of cargo for transfer with slings
- Operate electronic communication equipment to required protocol

Required skills:

- Work collaboratively with others when preparing cargo for transfer with slings
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when preparing cargo for transfer with slings in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Implement contingency plans for unanticipated situations that may arise when preparing cargo for transfer with slings
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the preparation of cargo for transfer with slings
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant gear and equipment when preparing cargo for transfer with slings
- Use balance points and estimate weights in setting up loads to be shifted
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

for assessment

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- limited or restricted spaces
- exposed conditions
- controlled or open environments
- even or uneven surfaces

RANGE STATEMENT

- Slings gear may include:
- wet or dry surfaces
 - fibre ropes
 - wire ropes
 - chains
 - webbing slings
- Hazards in the work area may include exposure to:
- chemicals and fumes
 - dangerous or hazardous substances
 - stationary and moving machinery, goods, materials and vehicular traffic
 - contamination of, or from, materials being handled
 - service lines
 - spills, leakages and ruptures
 - dust/vapours
 - faulty gear/equipment/tools
- Requirements for work may include:
- site restrictions and procedures
 - use of safety and personal protective equipment
 - communications equipment
 - specialised lifting and/or handling equipment
 - additional gear and equipment
 - noise restrictions
 - hours of operations
 - authorities and permits
- Consultative processes may involve:
- workplace personnel including supervisors and managers
 - equipment manufacturers and suppliers
 - site visitors and contractors
 - union representatives, industrial relations and OH&S specialists
 - other professional or technical staff
- Communication in the work area may include:
- phone
 - fax
 - email
 - internet
 - RF communications
 - bar code readers
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - respirators and fume masks

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- protective clothing
- high visibility clothing
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- workplace procedures and policies for the preparation of cargo for transfer with slings
- goods identification numbers and codes
- manifests, bar codes, goods and container identification/serial number
- manufacturers specifications
- equipment identification labels, bar codes and serial numbers
- supplier and/or client instructions
- relevant OH&S requirements and policies
- relevant Australian standards and certification requirements including Australian Standard on wire rope, chain and webbing slings
- material safety data sheets where applicable
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation including the ADG Code (where applicable)
- award, enterprise bargaining agreement and other industrial arrangements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations pertaining to the transfer of cargo with slings
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian standards and certification requirements, including Australian Standard 2359 - Industrial Truck Code
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, including checking attachments and worksite for suitability, selecting the type of forklift and accessories for required load shifting tasks, and shifting load and completing work in accordance with operational requirements. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Specialised operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift in a wide variety of operational contexts.

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the specialised operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- Handling procedures for forklifts involved in specialised operations
- Procedures to be followed in the event of an operational emergency
- Operating hazards and related defensive driving and hazard control techniques
- Engine power management and safe operating strategies
- Efficient driving techniques
- Pre-operational checks carried out on forklift and accessories and related action
- Site layout and obstacles
- Principles of stress management when driving a forklift

Required skills:

- Communicate effectively with others when conducting specialised forklift operations
- Read and interpret instructions, procedures, information and signs relevant to specialised forklift operations
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to specialised forklift operations
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when conducting specialised forklift operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when conducting specialised forklift operations in accordance with regulatory requirements

Required skills:

and workplace procedures

- Implement contingency plans for unexpected events that may occur when conducting specialised forklift operations
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during specialised forklift operations
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:

EVIDENCE GUIDE

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
- access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks
- container-handling heavy forklifts
- vacuum
- top frame

Specialised forklift operations may be carried out in typical forklift operational situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road or worksite
- while at a workplace

RANGE STATEMENT

- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Specialised forklift may be used to assist in a range of workplace tasks, including:
- stock/goods/container handling
 - loading and unloading vehicles
 - stacking stock and goods
 - lifting and moving equipment
 - transporting materials and goods in a workplace
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may require:
- special precautions
- Specialised forklift operations may involve the use of a range of attachments and accessories, including:
- spikes
 - drum carriers
 - bale carriers
 - tines
 - personnel carriers
 - high reaching
 - pantograph
 - jibs
 - paper clamps
 - hooks
 - side lifters
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palletted or unpalletted
 - containerised
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Forklift operational procedures may include:
- starting a forklift (including pre-start checks)
 - steering and manoeuvring a forklift
 - accelerating and braking
 - positioning and stopping a forklift
 - reversing a forklift
 - operating forklift controls, instruments and indicators
 - using defensive driving techniques

RANGE STATEMENT

Pre-operational checks may include but are not limited to:

- managing engine performance
- visual checking of forklift and its associated accessories and equipment
- checking and topping up of fluid levels
- checks of tyres
- checks of operation of forklift lights and indicators
- checks of brakes

Post-operational checks may include but are not limited to:

- parking in a safe place
- shutting down forklift
- lowering all equipment
- visually checking for faults or damage

Hazards may include (examples only):

- wet and iced operating surfaces
- oil on operating surface
- faulty brakes
- workplace obstacles and other operational equipment and vehicles
- damaged loads and pallets
- other personnel in work area

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
- manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification
- Australian Standard 2359 - Industrial Truck Code
- manufacturers specifications for forklift and associated accessories and equipment
- operations and service record book or log
- workplace procedures and policies for the operation of forklifts
- supplier and/or client instructions
- material safety data sheets
- regulatory requirements concerning the use of forklifts

RANGE STATEMENT

Applicable procedures and codes may include:

- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant state/territory regulations pertaining to the operation of forklifts
- relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

TLID3014A Load and unload vehicles carrying special loads

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads. It includes loading and unloading the special load onto and from the vehicle, securing and protecting the vehicle and the load, and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence and permit requirements and regulations of the relevant state/territory roads and traffic authority as well as the specific code, regulatory and permit requirements pertaining to the special load being carried.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles, routine procedures and regulatory requirements to the loading and unloading of vehicles designed to carry special loads.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Load and unload vehicle

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
- 1.2 Hazardous cargo is identified and handled in accordance with required procedures for hazardous and dangerous cargo
- 1.3 Vehicle is loaded demonstrating compliance with vehicle loading regulations and workplace safety requirements
- 1.4 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation
- 1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load
- 1.6 Ancillary equipment is operated in accordance with company procedures and manufacturers instructions during loading and unloading operations

2 Secure and protect vehicle and load

- 2.1 The vehicle load is secured using the correct load restraint and protection equipment for different loads, vehicles and carriage conditions
- 2.2 The load is protected in accordance with legal and workplace safety requirements
- 2.3 The distribution of the load is checked to ensure that it is even, legal and within the safe working capacity of the vehicle

3 Complete documentation

- 3.1 The loaded vehicle is inspected and checked for security to travel
- 3.2 All required transportation documentation for the cargo is completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant state/territory mass and loading regulations and regulations pertaining to the various types of special loads, including Australian Dangerous Goods (ADG) and Australian Explosives Code, where applicable
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Characteristics of various types of special loads
- Risks and hazards when loading and unloading various types of special loads, and related precautions to control the risk
- Workplace procedures and policies for the loading and unloading of vehicles designed to carry special loads
- Containers and goods coding, IMDG markings and, where applicable, emergency information panels, including their meaning and implications for loading and unloading processes
- Housekeeping standards procedures required in the workplace
- Methods of securing various types of special loads
- Site layout and obstacles

Required skills:

- Communicate effectively with others when loading and unloading special loads from vehicles
- Read and interpret instructions, procedures, information and signs relevant to the loading and unloading of special loads from vehicles
- Identify and interpret containers and goods coding, IMDG markings and, where applicable, emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading and unloading of special loads from vehicles
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when loading and unloading special loads from vehicles
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when loading and unloading special loads from vehicles in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when loading and unloading special loads from vehicles

Required skills:

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading and unloading of special loads from vehicles
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify and correctly use equipment required to load and unload the various types of special loads
- Safely use manual handling techniques to operate manually

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - demonstrating the safe loading and unloading of a load
 - applying techniques for the security of loads
 - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment,

EVIDENCE GUIDE

and/or

- access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle may include all vehicles designed to carry special loads, for example:

- concrete agitator
- livestock transporter
- armoured car
- tanker
- refrigerated vehicle
- waste vehicle
- fresh produce vehicle
- car carrier
- container carrier
- recovery vehicle
- vehicle carrying dangerous goods or explosives
- vehicle carry over dimensional load

Loading and unloading operations may be conducted:

- in a range of work environments and weather conditions
- by day or night

RANGE STATEMENT

- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palleted or unpalleted
 - liquid loads
 - motor vehicles
 - motor bikes
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Loading operations may be carried out:
- manually
 - with the aid of lifting equipment and/or appliances
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing

RANGE STATEMENT

Information/documents may include:

- goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs
- manifests, bar codes, goods and container identification
- manufacturers specifications for equipment/tools
- workplace procedures and policies
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- supplier and/or client instructions
- material safety data sheets
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- National Load Restraint Guide
- Australian Truck Drivers Manual
- award, enterprise bargaining agreement, other industrial arrangements
- relevant standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- state/territory mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
 - Code of Practice for the Safe Transport of Radioactive Substances
 - state/territory legislation covering the safe handling of infectious substances
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a vehicle-mounted loading crane to shift loads, including positioning and stabilising the crane, operating the vehicle-mounted crane, monitoring lift conditions, packing up the crane after operations, and completing all required job records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to vehicle-mounted loading cranes.

Work is performed under general supervision. It involves the application of routine principles and procedures to the operation of a vehicle-mounted loading crane in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Position and stabilise crane

- 1.1 Crane is driven to position as per job plan to ensure safe operation in accordance with applicable Australian standards, codes of practice, manufacturers specifications and, where applicable, regulatory and local government requirements
- 1.2 Where appropriate, barriers, fencing, temporary boundaries, signage and the like are used to isolate working area in accordance with safe working practice and lift requirements
- 1.3 Ground is checked to ensure it is firm enough to bear the load
- 1.4 Appropriate plates or packing are correctly used to adequately distribute the load
- 1.5 Any outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturers instructions and the appropriate Australian standard and other relevant statutory regulations or local authority requirements
- 1.6 Outrigger packing is checked for adequacy prior to and after load is taken

2 Operate vehicle-mounted crane

- 2.1 Planned hazard control strategies are implemented
- 2.2 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
- 2.3 Load mass is assessed and correlated with lifting capacity of crane throughout proposed radii of operation
- 2.4 Appropriate lifting gear is selected and load secured
- 2.5 Load is hoisted and lowered into position using crane movements in accordance with the appropriate Australian standard
- 2.6 Crane controls are operated smoothly
- 2.7 Crane is shut down and secured during periods of non-operation according to manufacturers specifications and workplace procedures

ELEMENT	PERFORMANCE CRITERIA
3 Monitor lift conditions	<p>3.1 Load is constantly monitored to ensure load and structural stability</p> <p>3.2 Conditions which may affect the continuing stability of the crane are identified and monitored</p> <p>3.3 Unplanned situations are responded to in line with workplace procedures in a manner that minimises risk to personnel and equipment</p> <p>3.4 Advice is sought from supervisor where there is doubt about correct response to unanticipated conditions, or conflict with customer request</p> <p>3.5 Supervisor/allocator is advised of any concern about completing the job within timeframe</p> <p>3.6 Shut-down procedures are implemented in accordance with manufacturers instructions in the event of an emergency</p> <p>3.7 The relevant motion locks and brakes are applied</p> <p>3.8 Crane is shut down using the correct sequence of procedures in accordance with manufacturers specifications and workplace procedures</p> <p>3.9 Routine post-operational equipment checks are carried out in accordance with manufacturers specifications</p>
4 Pack up crane	<p>4.1 All lifting equipment and crane components are checked for any signs of deterioration or damage in accordance with the appropriate Australian standard</p> <p>4.2 Damaged or worn equipment is segregated and reported to an authorised person for testing/repair/destruction</p> <p>4.3 Crane equipment is correctly stowed and secured in accordance with manufacturers instructions and the appropriate Australian standard</p> <p>4.4 Crane is immobilised and secured for travel in accordance with manufacturers instructions, workplace guidelines and regulatory requirements</p>
5 Complete job records	<p>5.1 Customer feedback is sought regarding satisfaction with the completed job and any areas of concern reported according to workplace procedures</p> <p>5.2 Customer's signature on job completion documentation is obtained</p> <p>5.3 Required workplace records are updated accurately and promptly and processed according to workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation
- Relevant OH&S and environmental procedures and regulations
- Mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- Operational procedures for crane crews
- Prioritising and multi-tasking work
- Company work procedures concerning the setting up and rigging of a mobile crane at a work site
- Problems that may arise when operating a vehicle-mounted loading crane and actions that should be taken to prevent or solve them
- Focus of operation of work systems and equipment
- Application of relevant agreements, codes of practice or other legislative requirements

Required skills:

- Communicate effectively with others when operating a vehicle-mounted loading crane
- Read and interpret instructions, procedures, information and signs relevant to the operation of a vehicle-mounted loading crane
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a vehicle-mounted loading crane
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a vehicle-mounted loading crane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when operating a vehicle-mounted loading crane in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when operating a vehicle-mounted loading crane
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a vehicle-mounted loading crane
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and

Required skills:

environments

- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of crane and its equipment and take appropriate action where required
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and

EVIDENCE GUIDE

- Method of assessment**
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
 - Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- day or night
 - in a variety of weather conditions
- Environment may include movement of:
- equipment
 - goods
 - materials
 - vehicular traffic
- Customers may be:
- internal or external
- Mobile crane may be involved in work in a range of industry sectors including:
- construction and demolition
 - manufacturing
 - waterfront
 - mining
 - primary industry
 - utilities (electricity, gas, water)
 - arboricultural
 - swimming pool
 - quarrying
- Hazards may include:
- power lines
 - noise, light, energy sources

RANGE STATEMENT

- overhead service lines
 - surrounding buildings, structures, facilities
 - underground services
 - obstructions
 - uneven or unstable ground and recently filled trenches
 - stationary and moving machinery and equipment
 - hazardous or dangerous materials
 - traffic hazards and congestion
- Hazard management is:
- consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Consultative processes may involve:
- other employees and supervisors
 - management
 - union representatives
 - clients
 - industrial relations and OH&S specialists
 - other professional or technical staff
- Requirements for access and/or lift may include:
- site restrictions and procedures
 - authorities and permits
 - hours of operation
 - induction
 - slings, chains, nets, brackets and other specialised lifting equipment
 - noise restrictions
 - personal protective equipment
 - support trucks
 - additional gear and equipment
 - communications equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - sunscreen, sunglasses and safety glasses
 - two-way radios
 - high visibility clothing
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
 - site procedures
- Documentation/records may
- operations manuals for vehicle-mounted loading cranes

RANGE STATEMENT

include:

- Safe Working Load (SWL) and Working Load Limit (WLL)
- material safety data sheets
- induction documentation
- competency standards and training materials
- job specifications and procedures
- manufacturers specifications for vehicle-mounted loading cranes
- workplace operating procedures and policies
- supplier and/or client instructions
- communications technology equipment, oral, aural or signed communications
- personal and work area work procedures and practices
- conditions of service, legislation and industrial agreements including:
 - workplace agreements and awards
 - occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures

Applicable procedures and codes may include:

- relevant state/territory regulations and licence/permit requirements pertaining to vehicle-mounted loading cranes
- relevant state/territory road rules
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

TLID3035A Operate a boom type elevating work platform

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a boom type elevating work platform, including inspecting and testing the elevating work platform, assessing job requirements and work, planning work and setting up for lift, carrying out the elevation, implementing planned hazard control and strategies, and packing up the work platform after operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to boom type elevating work platform operations.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles and procedures to the operation of a boom type elevating work platform in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Inspect and test elevating work platform

- 1.1 Work platform is visually inspected prior to operation for any evidence of damage, structural weakness or interference according to pre-operational safety check procedures
- 1.2 Routine pre-operational equipment checks are carried out in accordance with available checklists
- 1.3 Work platform log book is checked, service requirements are noted and maintenance personnel advised of any requirements
- 1.4 Elevating work platform is started in accordance with manufacturers guidelines and start-up procedures for operations and any abnormal noise or movement reported to an authorised person for corrective action
- 1.5 Start-up checks are conducted according to manufacturers specifications and company procedures to ensure work platform and equipment are operating correctly
- 1.6 Faults are corrected or are reported to an authorised person for corrective action according to company procedures
- 1.7 The operating and emergency controls are checked for correct operation in accordance with manufacturers specifications including use of the emergency decent device
- 1.8 Boom is lowered under simulated emergency conditions to check for operational effectiveness
- 1.9 Gear and accessories are checked and damaged or worn gear is segregated and reported to an authorised person for testing/repair/destruction
- 1.10 Results of inspections are recorded and reported according to company procedures

ELEMENT	PERFORMANCE CRITERIA
2 Assess job requirements and work	<p>2.1 Briefing, hand-over details, authorisations and clearances are received, interpreted and clarified in accordance with company and site procedures and legislative requirements</p> <p>2.2 Work area is inspected and potential hazards are identified and appropriate elimination or control measures selected</p> <p>2.3 Weight of load including personnel and equipment is correctly estimated to ensure job is within limits of work platform capacity</p>
3 Plan work and set up for lift	<p>3.1 A work plan is developed and agreed with relevant workplace personnel to include hazard prevention/control measures and safety and emergency procedures in line with applicable Australian standards</p> <p>3.2 A suitable firm and level standing is chosen and prepared for the location of the elevating work platform</p> <p>3.3 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturers instructions and appropriate Australian standards</p> <p>3.4 Appropriate plates or packing are correctly used under the footplates as required to adequately distribute the loading</p> <p>3.5 Ground is checked before and after packing is installed to ensure it is firm enough to bear the load</p> <p>3.6 The job plan is developed to include hazard prevention/control measures and safety procedures in line with applicable Australian standards and to equipment manufacturers specifications</p> <p>3.7 Work platform load chart is located and information on permissible loads, radii and heights taken into account in planning the job</p> <p>3.8 The job plan takes into account job requirements and workplace rules and procedures</p> <p>3.9 Job plan is discussed and confirmed with relevant personnel</p> <p>3.10 Work gear and tools are properly stowed in the elevating work platform in accordance with Australian standards, company procedures and guides</p>
4 Carry out elevation	<p>4.1 Configuration and operation of elevating work platform are checked as necessary to ensure safe lift</p> <p>4.2 Operation of work platform is carried out in accordance with the job plan, the appropriate Australian standard and manufacturers specifications</p>
5 Planned hazard control and strategies are implemented	<p>5.1 Load is constantly monitored to ensure safety of personnel, load and structural stability</p> <p>5.2 Unplanned situations are responded to in line with company</p>

ELEMENT	PERFORMANCE CRITERIA
	procedures in a manner that minimises risk to personnel and equipment
	5.3 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
6 Pack up work platform	6.1 The elevating work platform is shut down using the correct sequence of procedures in accordance with manufacturers instructions
	6.2 Routine post-operational equipment checks are carried out in accordance with manufacturers instructions and available checklists and defects recorded and reported in line with company procedures
	6.3 The elevating work platform is dismantled in accordance with the job plan, manufacturers instructions and relevant statutory regulations
	6.4 The outriggers and stabilisers are secured and stowed in accordance with manufacturers instructions
	6.5 The elevating work platform is correctly stowed and secured in accordance with manufacturers instructions and company procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to boom type elevating work platform operation
- Relevant OH&S and environmental procedures and regulations
- Boom type elevating work platform applications, capacities, configurations, safety hazards and control mechanisms
- Workplace procedures concerning the operation of a boom type elevating work platform at a worksite
- Problems that may arise when operating a boom type elevating work platform and actions that should be taken to prevent or solve them
- Risks and hazards involved in the operation of a boom type elevating work platform and the associated action that can be taken to eliminate or minimise the risk/hazards concerned
- Focus of operation of work systems and equipment

Required skills:

- Communicate effectively with others when operating a boom type elevating work platform
- Read and interpret instructions, procedures, regulations, codes of practice and manuals relevant to the operation of a boom type elevating work platform
- Interpret and follow operational instructions
- Complete documentation related to the operation of a boom type elevating work platform
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a boom type elevating work platform
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when operating a boom type elevating work platform in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Prioritise and multi-task work
- Implement contingency plans for unanticipated situations that may arise when operating a boom type elevating work platform
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a boom type elevating work platform
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Identify and correctly use equipment, processes and procedures
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- by day or night
 - in a variety of weather conditions
- Environment may include movement of:
- equipment
 - goods
 - materials
 - vehicular traffic
- Customers may be:
- internal or external
- Boom type elevating work platform may be involved in work in a range of industry sectors including:
- construction and demolition
 - manufacturing
 - waterfront
 - mining
 - primary industry
 - utilities (electricity, gas, water)
 - arboricultural
 - swimming pool
 - quarrying
- Hazards may include:
- power lines
 - noise, light, energy sources
 - overhead service lines
 - surrounding buildings, structures, facilities
 - underground services
 - obstructions
 - uneven or unstable ground and recently filled trenches
 - stationary and moving machinery and equipment
 - hazardous or dangerous materials
 - traffic hazards and congestion
- Hazard management is consistent with:
- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Consultative processes may involve:
- other employees and supervisors
 - management
 - union representatives
 - clients
 - industrial relations and OH&S specialists
 - other professional or technical staff

RANGE STATEMENT

Requirements for access and/or lift may include:

- site restrictions and procedures
- authorities and permits
- hours of operation
- induction
- slings, chains, nets, brackets and other specialised lifting equipment
- noise restrictions
- personal protective equipment
- support trucks
- additional gear and equipment
- communications equipment

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- sunscreen, sunglasses and safety glasses
- two-way radios
- high visibility clothing

Elevating platforms may include:

- mechanically operated equipment
- hydraulically operated equipment
- electrically operated equipment

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- site procedures

Documentation/records may include:

- operations manuals
- Safe Working Load (SWL) and Working Load Limit (WLL)
- site plans
- induction documentation
- competency standards and training materials
- job specifications and procedures
- manufacturers specifications
- workplace operating procedures and policies
- supplier and/or client instructions
- communications technology equipment, oral, aural or signed communications
- personal and work area work procedures and practices
- conditions of service, legislation and industrial agreements including:
 - workplace agreements and awards

RANGE STATEMENT

- occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations and licence/permit requirements pertaining to the operation of boom type elevating work platforms
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

TLID3036A Lift and move load using a mobile crane

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to lift and move a load using a non-slewing mobile crane or a slewing mobile crane. It includes operating the mobile crane to complete job requirements, monitoring lift conditions, implementing shut-down procedures, packing up crane after operations, and completing all required job records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to operations of mobile cranes.

Work is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles, procedures and regulations to lift and move loads using slewing and non-slewing mobile cranes in a variety of operational contexts.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Operate mobile crane

- 1.1 In ascent and descent to/from crane correct use is made of the means provided in accordance with codes of practice and workplace procedures
- 1.2 Planned hazard control strategies are implemented
- 1.3 Required signals are correctly given, interpreted and followed in accordance with appropriate workplace procedures
- 1.4 Boom is positioned to ensure load to be lifted is plumbed under hook
- 1.5 Load is hoisted and lowered into position using crane movements in accordance with the appropriate workplace procedures
- 1.6 Crane controls are operated smoothly
- 1.7 Crane is shut down and secured during periods of non-operation according to manufacturers specifications and workplace procedures

2 Monitor lift conditions

- 2.1 Load is constantly monitored to ensure load and structural stability
- 2.2 Conditions which may affect the continuing stability of the crane are identified and monitored
- 2.3 Unplanned situations are responded to in line with workplace procedures in a manner that minimises risk to personnel and equipment
- 2.4 Dogger is advised of any new information which affects the lift
- 2.5 Any necessary changes to job plan are discussed and confirmed with rest of crew
- 2.6 Advice is sought from supervisor where there is doubt about

ELEMENT	PERFORMANCE CRITERIA
	correct response to unanticipated conditions, or conflict with customer request
	2.7 Supervisor/allocator is advised of any concern about completing the job within timeframe
3 Implement shut-down procedures	3.1 The relevant motion locks and brakes are applied
	3.2 Crane is shut down using the correct sequence of procedures in accordance with manufacturers specifications and workplace procedures
	3.3 Routine post-operational equipment checks are carried out in accordance with manufacturers specifications
4 Pack up crane	4.1 Crane is de-rigged with other crane personnel in accordance with manufacturers instructions
	4.2 All lifting equipment and crane components are checked in consultation with crane personnel for any signs of deterioration or damage in accordance with the appropriate Australian Standard
	4.3 Damaged or worn equipment is segregated and reported to an authorised person for testing/repair/destruction
	4.4 Crane and equipment are correctly stowed and secured in accordance with manufacturers instructions and the appropriate Australian Standard
5 Complete job records	5.1 Customer feedback is sought regarding satisfaction with the completed job, and any areas of concern are reported according to workplace procedures
	5.2 Customer's signature on job completion documentation is obtained
	5.3 Required workplace records are updated accurately and promptly and processed according to workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation
- Relevant OH&S and environmental procedures and regulations

REQUIRED KNOWLEDGE AND SKILLS

- Mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- Risks and hazards involved in mobile crane operation, and associated action that can be taken to eliminate or minimise the risk
- Workplace procedures concerning the operation of a mobile crane at a worksite
- Problems that may occur during a lift, and associated action that can be taken to address the problems concerned
- Communication systems used during a lift
- Focus of operation of work systems and equipment

Required skills:

- Communicate effectively with others when lifting and moving a load using a mobile crane
- Read and interpret instructions, procedures, information and signs relevant to the lifting and moving of a load using a mobile crane
- Complete documentation related to the lifting and moving of a load using a mobile crane
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when lifting and moving a load using a mobile crane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when lifting and moving a load using a mobile crane in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when lifting and moving a load using a mobile crane
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the lifting and moving of a load using a mobile crane
- Plan own work including predicting consequences and identifying improvements
- Prioritise and multi-task work
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment

Required skills:

- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - applying relevant legislation and workplace procedures
 - complying with OH&S licensing legislation
 - applying risk assessment and management procedures for mobile crane operations
 - effectively completing the pre-operational checks, positioning, stabilising, set-up, post-operational checks of a mobile crane
 - using mathematical procedures to determine the weight of a load and the lifting equipment required for the lift
 - using load charts to determine the limitations of the crane and/or crane set-up required
 - operating the crane including all functions to their maximum extension in the lifting and moving of a load

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace

EVIDENCE GUIDE

- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through appropriately simulated activities at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- by day or night
 - in a variety of weather conditions
- Environment may include movement of:
- equipment
 - goods
 - materials and vehicular traffic
- Customers may be:
- internal or external
- Mobile crane may be any slewing and non-slewing crane and may be involved in work in a range of industry sectors including:
- construction and demolition
 - manufacturing
 - waterfront
 - mining
 - primary industry
 - utilities (electricity, gas, water)
 - arboricultural
 - swimming pool
 - quarrying
- Hazards may include:
- power lines
 - noise, light, energy sources

RANGE STATEMENT

- overhead service lines
 - surrounding buildings, structures, facilities
 - underground services
 - obstructions
 - uneven or unstable ground and recently filled trenches
 - stationary and moving machinery and equipment
 - hazardous or dangerous materials
 - traffic hazards and congestion
- Hazard management is consistent with:
- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - sunscreen, sunglasses and safety glasses
 - two-way radios
 - high visibility clothing
- Consultative processes may involve:
- other employees and supervisors
 - management
 - union representatives
 - clients
 - industrial relations and OH&S specialists
 - other professional or technical staff
- Requirements for access and/or lift may include:
- site restrictions and procedures
 - authorities and permits
 - hours of operation
 - induction
 - slings, chains, nets, brackets and other specialised lifting equipment
 - noise restrictions
 - personal protective equipment
 - support trucks
 - additional gear and equipment
 - communications equipment
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
 - site procedures
- Documentation/records may
- site plans

RANGE STATEMENT

include:

- Safe Working Load (SWL) and Working Load Limit (WLL)
- operations manuals including load charts and crane and rigging manuals
- induction documentation
- competency standards and training materials
- job specifications and procedures
- manufacturers specifications
- workplace operating procedures and policies
- supplier and/or client instructions
- communications technology equipment, oral, aural or signed communications
- personal and work area work procedures and practices
- conditions of service, legislation and industrial agreements including:
 - workplace agreements and awards
 - occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures

Applicable procedures and codes may include:

- relevant state/territory regulations and licence/permit requirements pertaining to mobile cranes
- relevant Australian Standards and certification requirements
- relevant state/territory road rules
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Unit Sector(s)

Competency Field

Competency Field

D - Load Handling

TLID3043A Shift loads using gantry equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using gantry equipment in accordance with workplace and regulatory requirements, including planning the work for the prevailing working conditions; using the controls and operating systems to manage the operation of the equipment; locating the load and identifying the load characteristics; safely moving the load; monitoring the controls; and stopping, shutting down and securing the equipment after the completion of operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the shifting of loads using gantry equipment.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements when shifting loads using gantry equipment as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan work for the prevailing working conditions

- 1.1 Traffic flow, weather and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
- 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments/gear are used to move the load
- 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel

2 Use controls and operating systems to manage the operation of the equipment

- 2.1 Equipment is prepared and appropriate attachments fitted (where applicable)
- 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine
- 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed
- 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and workplace and regulatory safety requirements
- 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
- 2.6 Equipment operations are conducted within manufacturers specified torque range
- 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel

3 Locate load and identify

- 3.1 Load is located and identified according to instructions

ELEMENT	PERFORMANCE CRITERIA
load characteristics	<p>3.2 Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of the gantry equipment are identified</p> <p>3.3 Load weight and dimensions are checked to ensure they fall within the capacity of the equipment</p> <p>3.4 Loading and unloading plans are followed to ensure efficiency and safety of operations</p> <p>3.5 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed</p> <p>3.6 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting the work</p>
4 Safely move load	<p>4.1 Equipment is operated and positioned using smooth and controlled movements</p> <p>4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications</p> <p>4.3 Load is moved ensuring no injury to personnel or damage to equipment or cargo</p> <p>4.4 Continuous communication is maintained with personnel assisting the operator in the load movement operations using appropriate communications technology and procedures</p> <p>4.5 In the event of a safety incident or emergency, the equipment is immediately stopped and workplace emergency procedures followed</p> <p>4.6 Safety incidents and emergencies are reported in accordance with workplace procedures and regulatory requirements</p>
5 Monitor and operate controls	<p>5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions</p> <p>5.2 Control systems are understood and acted upon in accordance with regulatory requirements, manufacturers guidelines and workplace operating procedures</p> <p>5.3 Control faults are identified and reported in accordance with enterprise guidelines</p> <p>5.4 Hazards in the work area are identified and appropriate measures are adopted to control the risks in accordance with regulatory requirements and workplace procedures</p>
6 Stop, shut down and secure equipment	<p>6.1 Equipment is brought to a controlled halt and shut down without injury to personnel or damage to equipment, loads or facilities in accordance with manufacturers guidelines and workplace procedures</p> <p>6.2 Equipment is secured in accordance with manufacturers instructions and workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes, regulations, licence/permit requirements relevant to the use of gantry equipment to shift loads
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of gantry equipment to shift loads
- Focus of operation of work systems, equipment, management and site operating systems for the use of gantry equipment to shift loads
- Problems that may occur when using gantry equipment to shift loads and appropriate action that can be taken to resolve the problems
- Relevant safety codes and emergency procedures
- Types of gantry equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of gantry equipment
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

Required skills:

- Communicate effectively with others when shifting loads using gantry equipment
- Read and interpret instructions, procedures, information and labels relevant to the shifting of loads using gantry equipment
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the shifting of loads using gantry equipment
- Receive, acknowledge and send messages with appropriate communications equipment
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when shifting loads using gantry equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when shifting loads using gantry equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when shifting loads

Required skills:

using gantry equipment

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using gantry equipment
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant equipment, processes and procedures when using gantry equipment to shift loads
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Apply effective eye-hand coordination to operational tasks
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or

EVIDENCE GUIDE

- other simulated practical and knowledge assessment, and/or
- access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
 - even or uneven surfaces
 - wet or dry surfaces
- Cargo/freight may include:
- goods/containers with specialist requirements, including

RANGE STATEMENT

- Range of equipment may include:
- temperature controlled goods and dangerous goods
 - various types of bridge and gantry cranes
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods, materials and vehicular traffic
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - protective clothing
 - high visibility clothing
- Communication in the work area may include:
- phone
 - fax
 - email
 - electronic data transfer (EDI)
 - RF systems
 - radio
 - oral, aural or signed communications
- Personnel in work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Consultative processes may involve:
- staff members
 - management
 - union representatives
 - industrial relations, OH&S specialists
 - other professional or technical staff
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, and container identification/serial number
 - Australian and international codes of practice and regulations relevant to the shifting of loads using gantry equipment
 - Australian and international regulations and codes of

RANGE STATEMENT

- practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - dangerous goods declarations and material safety data sheets
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - relevant codes and regulations for the shifting of cargo/containers using gantry equipment
 - Australian and international regulations and codes of practice for the handling of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
 - relevant Australian Standards including AS 1418 and AS 2550
 - licence, patent or copyright arrangements
 - water and road use and licence arrangements
 - export/import/quarantine/bond requirements
 - marine orders
 - relevant state/territory OH&S and environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
- Applicable regulations and legislation may include:

Unit Sector(s)

Competency Field

Competency Field

D - Load Handling

TLID4032A Plan and conduct specialised lift

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to plan and conduct a specialised lift by a mobile crane (excluding demolition work). It involves a lift which may be specialised in terms of job and equipment requirements, the qualities of the load, or the critical aspects of the location(s) of the lift. It includes inspecting the site, planning the lift, setting up the lift, working effectively in a team, lifting and moving the load, and following up on the job. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to specialised mobile crane operations.

Work is performed under general supervision. It involves the application of some judgement and routine principles and procedures to the planning and conduct of specialised lifts in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Inspect site

- 1.1 Site is inspected as required with other relevant personnel to assess job requirements
- 1.2 All necessary parameters are measured to ensure accuracy of calculations
- 1.3 Hazards are identified through inspection of site and load
- 1.4 Additional information regarding load and possible hazards is sought from customer and expert personnel
- 1.5 Special site requirements are identified

2 Plan the lift

- 2.1 Operation plan is developed in consultation with other relevant personnel to include hazard prevention/control measures in line with workplace procedures, applicable Australian standards and codes of practice
- 2.2 Where required, approval to carry out lift is obtained from the appropriate statutory authority
- 2.3 Multiple crane lifts are planned (as applicable) to encompass the determination of the types of cranes suitable for use and an assessment of the share of the load to be carried by each crane
- 2.4 Cranes load chart is interpreted and information on permissible loads, radii, weights, boom and jib taken into account in planning the job
- 2.5 Safe Working Load (SWL) or Working Load Limit (WLL) is calculated
- 2.6 Appropriate drawings and simulations are created to check feasibility of planned operations
- 2.7 Information from previous lifts is used in developing the operational plan

ELEMENT	PERFORMANCE CRITERIA
	2.8 A range of different alternatives is considered to ensure effective and safe lift
	2.9 Unsolicited, irrelevant information is disregarded to focus on the task at hand
	2.10 Need for additional/specialised equipment is ascertained and arrangements made for collection/delivery to site
	2.11 Communication system is determined and all team members are briefed on its use in conducting lift
3 Set up lift	3.1 Site measurements are checked to verify accuracy
	3.2 Operating and emergency controls are checked to ensure the crane is in safe working order
	3.3 Appropriate personal protective equipment is selected and worn in accordance with manufacturers specifications and site requirements
	3.4 Site is isolated as necessary and, when required, assistance sought to ensure public safety
	3.5 Other personnel on site are directed as necessary to ensure risks to personnel and equipment are minimised
	3.6 Variables which affect the predictability of the operation are eliminated wherever possible
4 Work effectively in team	4.1 The advice of all team members is sought in developing the operational plan
	4.2 Ideas are discussed and evaluated with team members to determine viability and reach consensus on an effective plan
	4.3 Individual roles and responsibilities are clarified and agreed
	4.4 Other team members are assisted as necessary to ensure the operation can be completed safely and efficiently
5 Lift and move load	5.1 Nominated authorised person is recognised as being in control and instructions are followed
	5.2 Test runs are conducted as necessary to ensure a safe lift
	5.3 Load is hoisted and lowered into position using crane movements in accordance with the appropriate Australian standard
	5.4 Danger is anticipated by monitoring of crane and load, and instruction to stop operation given where there are any concerns the lift is not proceeding as planned
	5.5 Potential impact of change in one area of operation on the lift as a whole is recognised
	5.6 In the event of unanticipated situations, contribution is made to developing alternative operational plan
6 Follow up on job	6.1 Specialised equipment is checked and re-stored in accordance

ELEMENT**PERFORMANCE CRITERIA**

- with workplace procedures
- 6.2 Operation is reviewed in consultation with relevant personnel and contribution is made to recommendations for review of procedures where appropriate
- 6.3 Need for further after job debriefing or counselling is recognised and appropriate action is taken
- 6.4 Records are completed promptly in line with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation
- Relevant OH&S and environmental procedures and regulations
- Mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- Operational procedures for crane crews
- Prioritising and multi-tasking work
- Company work procedures concerning the setting up and rigging of a mobile crane at a work site
- Problems that may arise when planning and supervising a specialised lift using a mobile crane and actions that should be taken to prevent or solve them
- Focus of operation of work systems and equipment
- Relevant agreements, codes of practice or other legislative requirements

Required skills:

- Communicate effectively with others when planning and supervising a specialised lift using a mobile crane
- Read and interpret instructions, procedures, information, technical data, manuals and signs relevant to the planning and supervision of a specialised lift using a mobile crane
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the planning and supervision of a specialised lift using a mobile crane

Required skills:

- Operate electronic communication equipment to required protocol
- Provide leadership and work collaboratively with others when planning and supervising a specialised lift using a mobile crane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any problems identified when planning and supervising a specialised lift using a mobile crane in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Develop contingency plans for possible unanticipated situations
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the planning and supervision of a specialised lift using a mobile crane
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Ensure the use of required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

for assessment

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:

- day or night
- in a variety of weather conditions

Environment may include movement of:

- equipment
- goods
- materials
- vehicular traffic

Customers may be:

- internal or external

Mobile crane may be involved in work in a range of industry sectors

- construction and demolition
- manufacturing

RANGE STATEMENT

including:

- waterfront
- mining
- primary industry
- utilities (electricity, gas, water)
- arboricultural
- swimming pool
- quarrying

Specialised lifts may include:

- large surface areas-pools
- tilt-up panels
- drive-in movie screens
- tree removal and replacement
- bridge beams
- multiple crane lifts
- passing loads to other cranes
- tailing out of loads
- turning loads over
- lifting high value goods
- recovery work
- specialised operations-drag lines
- clam shell
- pile driving
- barge work
- work involving work box duties

Hazards may include:

- power lines
- noise, light, energy sources
- overhead service lines
- surrounding buildings, structures, facilities
- underground services
- obstructions
- uneven or unstable ground and recently filled trenches
- stationary and moving machinery and equipment
- hazardous or dangerous materials
- traffic hazards and congestion

Hazard management is:

- consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment

Consultative processes may involve:

- other employees and supervisors
- management
- union representatives

RANGE STATEMENT

- clients
 - industrial relations and OH&S specialists
 - other professional or technical staff
- Requirements for access and/or lift may include:
- site restrictions and procedures
 - authorities and permits
 - hours of operation
 - induction
 - slings, chains, nets, brackets and other specialised lifting equipment
 - noise restrictions
 - personal protective equipment
 - support trucks
 - additional gear and equipment
 - communications equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - sunscreen, sunglasses and safety glasses
 - two-way radios
 - high visibility clothing
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
 - site procedures
- Documentation/records may include:
- site plans
 - Safe Working Load (SWL) and Working Load Limit (WLL)
 - operations manuals including load charts and crane and rigging manuals
 - induction documentation
 - competency standards and training materials
 - job specifications and procedures
 - manufacturers specifications
 - workplace operating procedures and policies
 - supplier and/or client instructions
 - communications technology equipment, oral, aural or signed communications
 - personal and work area work procedures and practices
 - conditions of service, legislation and industrial agreements including:

RANGE STATEMENT

- workplace agreements and awards
 - occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations and licence/permit requirements pertaining to specialised mobile crane operations
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Competency Field D - Load Handling

TLIE3002A Estimate/calculate mass, area and quantify dimensions

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to estimate and calculate mass and area and quantify dimensions of loads as part of work functions in the transport, stevedoring, warehousing, and/or storage sectors. This includes estimating loads to be transported or placed in storage, identifying mass, area and volume limitations of available transport/storage systems and carrying out calculations required to organise load(s) to match identified transport/storage limitations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with workplace requirements and any relevant regulations related to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace tasks.

Work is performed under some supervision generally within a team environment. It involves the application of basic mathematical principles and operations to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace activities in the transport, stevedoring, warehousing, distributi

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1 Estimate loads for transport or storage | 1.1 Order forms/work orders are read and requirements are noted
1.2 Shape, balance characteristics, dimensions and mass of the load(s) are identified
1.3 Area/volume required for storage is estimated
1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system |
| 2 Estimate load limits of transport and/or storage | 2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
2.2 Capacity of transport and storage systems in terms of mass, area and volume are calculated |
| 3 Organise load | 3.1 Load(s) is restricted to allowable range(s)
3.2 Load(s) is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
3.3 Appropriate workplace documentation is completed |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities including the quantification of dimensions
- Basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- Focus of operation of work systems, equipment, management and site operating systems for the transport and/or storage of goods and stock
- Problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities and appropriate action that can be taken to resolve the problems
- Documentation requirements for the workplace activities concerned

Required skills:

- Communicate effectively with others when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities
- Read and interpret instructions, procedures, information and labels relevant to the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities in accordance with workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant calculators, computing and office equipment when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:

EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|---|
| Work may be conducted: | <ul style="list-style-type: none"> • in a range of work environments • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none"> • large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none"> • limited or restricted spaces • exposed conditions • controlled or open environments |
| Estimating/calculation tasks may include: | <ul style="list-style-type: none"> • estimating loads to be transported or placed in storage • identifying mass, area and volume limitations of available transport/storage systems • carrying out calculations required to organise load(s) to match identified transport/storage limitations • calculations and estimations of weights and dimensions of cargo and containers to be shifted, stored or lifted |
| Calculations may include mathematical operations of addition, subtraction, multiplication and division and may be carried out: | <ul style="list-style-type: none"> • manually • with the aid of a calculator • with the aid of a computer • using appropriate tables and/or charts |
| Consultative processes may involve: | <ul style="list-style-type: none"> • other employees and supervisors • suppliers, customers and clients • relevant authorities and institutions • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff |
| Communication in the work area | <ul style="list-style-type: none"> • phone |

RANGE STATEMENT

may include:

- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- RF systems
- oral, aural or signed communications

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- workplace procedures and policies
- operations manuals, job specifications and induction documentation
- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes, goods and container identification/serial number
- Australian and international codes of practice and regulations relevant to workplace activities including mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- manufacturers specifications for equipment
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations relevant to workplace activities
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods

RANGE STATEMENT

- and hazardous substances
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to collect, analyse and present workplace data and information including identifying required information, analysing and preparing information for use, explaining information, and presenting workplace information to others. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Data collection, analysis and presentation is carried out as an integral part of operations in the context of the workplace concerned.

Work is performed under general or limited supervision, generally within a team environment. It involves the application of established principles and practice to the collection, analysis and presentation of information and data as part of workplace operations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Identify required information | 1.1 Purpose of the information/data collection is identified
1.2 Sources of information are established
1.3 Appropriate information is collected |
| 2 Prepare information for use | 2.1 Information is collated and analysed in accordance with workplace procedures
2.2 Processed information is organised and presented in a logical manner
2.3 Checks for accuracy are made |
| 3 Explain information | 3.1 Data collection and analysis is explained to others in a way that effectively contributes to the workplace operations
3.2 Outcomes of data/information analysis are presented to others using appropriate presentation modes and resources
3.3 Questions are answered and appropriate clarifications are given |
| 4 Present workplace information | 4.1 Processed information is forwarded to appropriate personnel in accordance with workplace procedures
4.2 Processed information is collated and stored in accordance with workplace procedures |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant procedures and duty of care requirements
- Relevant OH&S responsibilities
- Sources of information and data and procedures for processing the information for workplace use
- Protocols and procedures for the collection, analysis and presentation of workplace information and data using relevant technology
- Presentation and communication techniques including an understanding of barriers to effective communication and how to overcome them
- Basic principles of effective presentation and communication of information
- Techniques for communicating effectively with a multilingual persons or persons with a limited ability to speak or understand English
- Typical presentation and communication problems and appropriate action and solutions

Required skills:

- Communicate effectively with others when collecting, analysing and presenting workplace data and information
- Read and interpret instructions and procedures relevant to the collection, analysis and presentation of workplace data and information
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the collection, analysis and presentation of workplace data and information
- Identify and use required communication and presentation technology
- Work collaboratively with others when collecting, analysing and presenting workplace data and information
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when collecting, analysing and presenting workplace data and information in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Implement contingency plans for unanticipated situations that may arise when collecting, analysing and presenting workplace data and information
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments

Required skills:

- Work systematically with required attention to detail
- Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated

EVIDENCE GUIDE

environment at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Data collection, analysis and presentation will be:

- that required for workplace operations
- may occur by day or night and in a variety of work contexts

Customers may be:

- internal or external

Presentation modes may include:

- written documentation
- oral reports
- group presentations using appropriate technology
- completion of standard forms and checklists
- routine written reporting
- entry of collected/processed information into a computer
- participation in workplace discussions

Presentations/communications may involve:

- English-speaking persons
- multilingual staff
- persons with limited ability to communicate in English

Presentation/communication problems may include:

- misunderstanding
- limited ability of others to communicate in English
- noisy environments or communications channels
- illegible writing or print
- use of non-standard vocabulary
- incorrect assumption that information has been received and/or correctly understood

Depending on workplace context, consultative processes may involve

- managers
- supervisors/team leaders
- workplace personnel
- clients
- private and/or public sector security personnel
- police

RANGE STATEMENT

- security consultants
 - visitors
 - contractors
 - official representatives
 - union representatives
 - industrial relations
 - OH&S specialists
 - other professional or technical staff
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Presentation/communication may involve the use of a range of technology, including:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - overhead or computer controlled projector
 - plain or electronic white board
 - flip charts
 - microphone and amplifier
 - video player and monitor
- Information/documentation may include:
- workplace procedures, checklists and instructions
 - operations manuals
 - induction documentation
 - competency standards and training materials
 - job specifications
 - manufacturers specifications
 - HAZCHEM and dangerous/hazardous goods codes
 - goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - manufacturers specifications
 - workplace policies
 - supplier and/or client instructions
 - material safety data sheets
 - relevant codes of practice including the national standards for manual handling and the industry safety code
 - legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial

RANGE STATEMENT

Applicable regulations and legislation may include:

- arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes
- dangerous goods and freight regulations and codes
- relevant Australian and state/territory standards and certification requirements
- relevant Australian and state/territory OH&S legislation
- equal employment legislation and related policies
- environmental protection regulations

TLIF1002B Conduct housekeeping activities

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to conduct housekeeping activities in the workplace, including identifying required housekeeping requirements, procedures and resources for different areas of the workplace; monitoring and maintaining cleanliness and tidiness in the workplace; and completing assigned housekeeping tasks.

Licensing, legislative, regulatory and certification requirements are applicable to this unit.

Application of the Unit

Work must be carried out in accordance with workplace housekeeping procedures.

Work is performed under some supervision generally in a team environment. It involves the application of basic safety principles to the completion of housekeeping tasks as part of workplace operations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Identify the housekeeping requirements, procedures and resources of different areas of the workplace

- 1.1 Workplace procedures for housekeeping are identified
- 1.2 Equipment and consumables are selected in accordance with work area requirements
- 1.3 Specific requirements for housekeeping activities in different parts of the work area are identified and followed

2 Monitor and maintain cleanliness and tidiness in the workplace

- 2.1 Initiative is used to continuously monitor the cleanliness and tidiness of the worksites
- 2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures
- 2.3 Housekeeping equipment is operated in accordance with manufacturer instructions and company policy
- 2.4 Housekeeping equipment and supplies are maintained and stored

3 Complete assigned housekeeping duties

- 3.1 Assigned housekeeping duties are conducted following workplace procedures and ensuring that waste is removed
- 3.2 Maintenance requirements of any damaged items are notified to appropriate personnel
- 3.3 Schedules and records for housekeeping duties are maintained
- 3.4 Work areas are checked and meet required workplace standards
- 3.5 Work is carried out following enterprise practices and safe work procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Workplace procedures and policies for carrying out housekeeping tasks in the workplace
- Risks when carrying out housekeeping tasks and related precautions to control them
- Housekeeping standards required in the workplace
- Purpose of housekeeping within the workplace
- Site layout and obstacles
- Servicing procedures for housekeeping equipment
- Relevant enterprise practices and safe work procedures for the job role

Required skills:

- Communicate effectively with others when carrying out housekeeping tasks
- Interpret and follow operational instructions and prioritise work
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out housekeeping tasks
- Report and rectify within limits of own role problems, faults and malfunctions identified when carrying out housekeeping tasks in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Monitor condition and performance of housekeeping tools and equipment
- Service housekeeping tools and equipment in terms of servicing schedule and standard operating procedures
- Select and use required personal protective equipment (PPE), conforming to industry and OH&S standards
-
-

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - identifying workplace housekeeping requirements
 - undertaking housekeeping in the workplace

Context of and specific resources for assessment

- Access is required to:
 - relevant and appropriate materials and equipment to meet the performance criteria
 - applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Practical assessment must occur:
 - in three different activities of the job role in the workplace
 - if in a simulated work environment, using industry-standard equipment

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Housekeeping tasks may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- tight or restricted spaces
- exposed conditions
- controlled or open environments

Housekeeping duties may include:

- cleaning
- returning goods or equipment to storage
- repacking
- waste removal
- maintenance

- Hazards in the work area may include exposure to:**
- chemicals
 - dangerous or hazardous substances
 - movement of equipment, goods and materials
- Personnel in the work area may include:**
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:**
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Depending on workplace context, PPE may include:**
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
 - eye wash
- Information and documents may include:**
- OH&S and environmental protection regulations
 - workplace housekeeping procedures and policies
 - codes of practice, including the National Standard for Manual Handling and the industry safety code
 - material safety data sheets
 - policies and procedures for entry and work in confined spaces
 - manufacturer instructions concerning the use and servicing of equipment
 - supplier and customer instructions
 - emergency procedures
 - regulations and policies concerning noise, smoking, work station ergonomics and other critical OH&S issues
 - goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
- Applicable regulations and legislation may include:**
- relevant state and territory:
 - OH&S legislation
 - environmental protection legislation
 - workplace relations regulations

- dangerous goods and air freight regulations
-

Competency Field

Competency Field F - Safety Management

TLIF2010A Apply fatigue management strategies

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to apply fatigue management strategies, including identifying and acting upon signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in accordance with legislative and regulatory requirements. Licensing or certification requirements are not applicable to this unit.

Application of the Unit

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable federal and state/territory legislation and relevant regulations covering the management of fatigue in the workplace.

Work is performed under some supervision generally within a team environment. It involves the application of the relevant regulations, codes and guidelines of the federal government and state/territory authorities concerning fatigue management during work activities and in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1 Identify and act upon signs of fatigue | <p>1.1 Potential causes of fatigue are identified and action is taken to minimise their effects in accordance with company procedures</p> <p>1.2 Personal warning signs of fatigue are recognised and necessary steps are taken in accordance with workplace procedures to ensure that effective work capability and alertness are maintained</p> |
| 2 Implement strategies to minimise fatigue | <p>2.1 Workplace procedures are assessed to minimise fatigue</p> <p>2.2 Factors which increase the risk of fatigue-related accidents and safety incidents are understood and minimised</p> <p>2.3 Strategies to manage fatigue are implemented in accordance with company policy</p> <p>2.4 Lifestyle choices are made which promote the effective long-term management of fatigue</p> <p>2.5 Effective practices in combating fatigue are adopted and applied</p> <p>2.6 Personal fatigue management strategies are communicated to other relevant people</p> <p>2.7 Appropriate counter measures are planned to combat fatigue</p> |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Relevant codes, regulations, permit and licence requirements related to fatigue management
- Relevant OH&S regulations as they relate to fatigue
- Workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents
- Sources of information on fatigue
- The risks and hazards created by fatigue in the workplace
- How fatigue affects workplace performance
- How fatigue contributes to workplace accidents
- Ways of recognising fatigue
- Strategies and ways of managing fatigue
- Causes and effects of fatigue on workers/drivers
- Factors which increase fatigue-related accidents
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when applying fatigue management strategies
- Read and interpret instructions, procedures, regulations and signs related to fatigue management and apply them to work activities
- Recognise symptoms of fatigue and take appropriate action in accordance with fatigue management regulations and workplace procedures
- Work collaboratively with others to manage and minimise the effects of fatigue during work activities
- Adjust lifestyle patterns to ensure effective fatigue management during work activities
- Modify activities and take appropriate initiatives to manage fatigue in the workplace depending on differing work contexts, risk situations and environments
- Apply precautions and required action to minimise and control the effects of fatigue when carrying out own work functions
- Adapt to changes in rosters and standard operating procedures as they may relate to fatigue management
- Participate in identifying and meeting own learning needs on matters related to fatigue management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and other/or simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and/or equipment, and/or
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Workplace may include:

- any work environment requiring safety critical operational judgements to be made and in particular when operating equipment, vehicles, load shifting equipment, trains, marine vessels and aircraft at night

The need for fatigue management in a range of industry situations including:

- operations conducted at all times but particularly at night
- typical weather conditions
- while working and/or driving at a workplace, depot, base or warehouse
- while working and/or driving at a client's workplace or worksite
- driving a motor vehicle on the open road
- driving a motor vehicle on a private road
- driving a train, locomotive or motive power unit
- operating a marine vessel in coastal or international waters
- operating an aircraft
- operating load shifting equipment
- operating safety critical industrial plant and equipment

Work-related factors that may contribute to fatigue include:

- work demands such as: workload, work duration, shift pattern, time of day, frequency and duration of breaks and the type of work (such as working in isolation, repetitive tasks and boring, monotonous or under-challenging tasks)
- organisational factors such as: work environment (including temperature, ventilation, continual rhythmic vibration from equipment), payment system, trip and work scheduling, and the predictability of work

Worker/operator-related factors that may contribute to fatigue include:

- lifestyle factors such as: sleep patterns, alcohol and drug use, quantity and timing of food and drink, and opportunities for relaxation with family and friends
- working multiple jobs
- personal or biological factors such as: state of mental and/or physical health, inadequate sleep, sleep disorders, emotional stress, family responsibilities, relationship difficulties, inadequate competence to complete work tasks, and circadian rhythms

Responsibilities of individual for fatigue risk management may include:

- following the organisation's fatigue management policy and procedures
- using time away from work appropriately to rest and recover
- checking and ensuring fitness for work
- reporting symptoms of fatigue

RANGE STATEMENT

- Schedules may include:
- taking action to minimise risk when symptoms of fatigue are recognised
 - rosters
 - vehicle schedules
 - timetabling
 - workplans
- Depending on the organisation, operating procedures may include:
- standard operating procedures
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information and documents may include:
- federal and state/territory regulations and guidelines concerning fatigue management in various transport and workplace situations
 - workplace instructions and procedures on fatigue management
 - relevant OH&S regulations and procedures
 - work schedules and shift rosters
 - emergency procedures
 - log book or record book (where required)
 - records and reports of fatigue-related errors and safety incidents
 - relevant standards and certification requirements
 - quality assurance procedures
- Applicable legislation, regulations and codes may include:
- relevant regulations and codes of the federal government and the state/territory regulatory authorities concerning fatigue management
 - relevant state/territory road rules
 - relevant rail industry safe working codes and regulations (where applicable)
 - relevant state/territory permit regulations and requirements
 - relevant state/territory OH&S legislation

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| 1 Respond to the incident | <p>1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed</p> <p>1.2 Immediate coordination requirements are identified and actioned in accordance with organisation procedures</p> <p>1.3 Travel to the incident site is by the shortest, fastest, legal means and routes</p> |
| 2 Coordinate on-site activities | <p>2.1 Control of site activities is assumed on arrival and the operator and other authorities present are informed of this action</p> <p>2.2 Assistance is provided to clients and operators within the limitations of duty of care and organisation requirements</p> <p>2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, following enterprise procedures</p> <p>2.4 Assistance is provided to relevant authorities within legal and policy limitations</p> |
| 3 Complete follow-up actions | <p>3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisation procedures</p> <p>3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with enterprise policies and procedures</p> <p>3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons</p> |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- Risks and hazards in the workplace and related precautions to control the risk
- Workplace procedures and policies for responding to accident/emergency situations
- Types of accidents and emergencies that can occur in a workplace and the appropriate action to be taken in each case
- Types of emergency equipment in the workplace and instructions for its use
- Site layout and obstacles
- Means to control and organise the accident scene, provide practical assistance and cooperate with others at the scene
- Focus of operation of work systems, equipment, management and site operating systems

Required skills:

- Communicate effectively with others when implementing and coordinating accident and emergency procedures
- Read and interpret instructions, procedures, information and signs relevant to the implementation and coordination of accident and emergency procedures
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the implementation and coordination of accident and emergency procedures
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when implementing and coordinating accident and emergency procedures
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when implementing and coordinating accident and emergency procedures in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when implementing and coordinating accident and emergency procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Required skills:

- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use emergency equipment, processes and procedures
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Method of assessment	<p style="text-align: center;">operation manuals</p> <ul style="list-style-type: none"> • Assessment of this unit must be undertaken by a registered training organisation • As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests • Practical assessment must occur: <ul style="list-style-type: none"> • through activities in an appropriately simulated environment at the registered training organisation, and/or • in an appropriate range of situations in the workplace
-----------------------------	---

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	<ul style="list-style-type: none"> • in a range of work environments and weather conditions • by day or night
Customers may be:	<ul style="list-style-type: none"> • internal or external
Workplaces may comprise:	<ul style="list-style-type: none"> • large, medium or small worksites
Work may be conducted in:	<ul style="list-style-type: none"> • restricted spaces • exposed conditions • controlled or open environments
Action to be taken in the event of an accident-emergency may include:	<ul style="list-style-type: none"> • identifying and following established emergency procedures • assessing the nature and extent of the emergency • rendering assistance and first aid • isolating and coordinating safety of the scene • alerting relevant organisational personnel and emergency services • recording relevant information and reporting on accident/emergency situation in accordance with regulatory and workplace requirements
Emergency equipment may include:	<ul style="list-style-type: none"> • first aid kit • fire extinguishers • fire hose

RANGE STATEMENT

- Hazards in the work area may include:
- fire blanket
 - resuscitation equipment
 - exposure to chemicals
 - exposure to dangerous or hazardous substances
 - movements of equipment, goods and materials
 - accidents involving chemicals, toxic substances and other harmful substances
 - accidents involving equipment and vehicles
 - explosion and/or fire
 - personal accidents including lifting injuries
 - waste management and disposal
 - violent incidents such as armed robberies
- Consultative processes may include:
- workplace personnel and management
 - designated workplace emergency officers
 - emergency services personnel including ambulance, police, fire services, etc.
 - union representatives
 - industrial relations and OH&S specialists
 - other professional or technical staff
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
 - breathing apparatus
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may
- workplace emergency/fire/accident procedures

RANGE STATEMENT

include:

- workplace procedures for the use of emergency equipment and personal protection equipment
- first aid instructions and procedures
- manufacturers instructions concerning the use and servicing of equipment
- manifests, bar codes, goods and container identification goods identification numbers and codes
- material safety data sheets
- codes of practice including the Dangerous Goods Code
- IMDG code markings, HAZCHEM codes and where applicable emergency information panels
- relevant legislation, regulations and related documentation related to emergency response situations
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- supplier and/or client advice on the hazards involved with goods or cargo
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- emergency procedures regulations
- dangerous goods and hazardous goods regulations
- relevant Australian standards and certification including Australian Standard AS 2865 - Safe Working in a Confined Space Code
- workplace relations regulations
- workers compensation regulations

Applicable regulations and legislation may include:

TLIH2001A Interpret road maps and navigate pre-determined routes

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to interpret road maps and navigate routes as part of transport operations. It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant state/territory roads and traffic authorities.

Work is performed under general or limited supervision. It involves the application of the basic map reading principles and procedures when interpreting street directories and road maps and following pre-determined routes as part of transport operations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Identify and determine the pre-planned route

- 1.1 Documentation on the pre-determined route is accessed and interpreted
- 1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed
- 1.3 Street directory, GPS and road map symbols are recognised and interpreted
- 1.4 Points of departure and destination are identified in a directory index and the information is used to locate designated places on the appropriate map
- 1.5 Directions for a pre-determined route are interpreted and the route is traced using a street directory, GPS and road map
- 1.6 Key intersections and other landmarks along the route are identified for use in following the planned route
- 1.7 Alternative routes are identified for possible contingency situations such as emergencies or traffic delays
- 1.8 Pre-determined route is correctly followed

2 Complete necessary documentation

- 2.1 Required route documentation is completed in accordance with purpose of transportation and with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant state and territory permit and licence regulations and requirements

REQUIRED KNOWLEDGE AND SKILLS

- Operational procedures for interpreting road maps, using GPS devices and navigating routes
- Road conditions for various routes, including sections undergoing road works
- Height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- Traffic conditions at various times of the day along specific routes
- Security hazards and issues (where relevant)
- Current information on accidents or emergencies that might close or restrict traffic on a particular route
- Location of service stations/rest stops where relevant
- Typical problems that may arise concerning the interpretation of road maps, the use of GPS devices and the navigation of pre-determined routes, and appropriate action that should be taken
- Workplace requirements for recording and documenting route information

Required skills:

- Communicate effectively with others when interpreting road maps, using GPS devices and navigating pre-determined routes
- Read and interpret instructions, procedures, information and signs relevant to route navigation
- Identify and correctly use maps and other route documentation including: identification of town and suburb locations, identification of roads and intersections, reading and interpretation of map symbols, and estimation of route distances using map information
- Where applicable, use GPS devices to navigate pre-determined routes
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to route navigation
- Operate electronic communication equipment to required protocol
- Where applicable work collaboratively with others (such as fleet managers, sales team etc.) when interpreting road maps, using GPS devices and navigating pre-determined routes
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when interpreting road maps, using GPS devices and navigating pre-determined routes in accordance with workplace procedures
- Plan for alternative routes in the event of contingencies such as road works, emergencies or delays
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments

Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - applying relevant legislation and workplace procedures
 - plotting a route from one destination to another relevant to the job role
 - demonstrating the ability to navigate a pre-determined route

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be

EVIDENCE GUIDE

conducted through appropriate assessments using written/practical/oral assessments

- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace
- A simulator/online assessment is not suitable for the final assessment of this unit of competency

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| This unit covers: | <ul style="list-style-type: none"> • work of transport and distribution personnel involved in the delivery of a range of possible goods and materials including valuables, secured products and documents and materials |
| Operations may be conducted: | <ul style="list-style-type: none"> • in a range of work environments and weather conditions • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Routes will be pre-determined but may include: | <ul style="list-style-type: none"> • alternative routes to accommodate contingency situations |
| Map areas may include: | <ul style="list-style-type: none"> • metropolitan areas • country and regional areas • interstate locations |
| Depending on the type of transport service being provided, consultative processes may involve: | <ul style="list-style-type: none"> • clients • other employees and supervisors • management • other professional or technical staff • private security personnel • public sector security personnel • police and other emergency services • security consultants |
| Communication in the work area may include: | <ul style="list-style-type: none"> • mobile and fixed phones • radio |

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

Information/documents may include:

Applicable regulations and legislation may include:

- oral, aural or signed communications
- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- workplace procedures and policies
- route specifications
- maps and street directories
- published information on route hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- competency standards and training materials
- supplier and/or client route documentation
- quality assurance procedures
- emergency procedures
- relevant state/territory road rules and traffic acts
- regulations and codes related to the transport of dangerous goods, explosives and hazardous materials

Elements and Performance Criteria

ELEMENT <i>Elements describe the essential outcomes of a unit of competency.</i>	PERFORMANCE CRITERIA <i>Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
1. Plan work	1.1 Potential workplace <i>hazards</i> are identified 1.2 <i>Hazard control measures</i> are identified consistent with <i>appropriate standards</i> to ensure the safety of personnel and equipment 1.3 Appropriate <i>forklift</i> truck is selected according to the load and workplace conditions 1.4 Working area is inspected to determine appropriate path of movement for loads and forklift truck 1.5 <i>Communication methods</i> are identified according to <i>procedures</i>
2. Conduct routine checks	2.1 Forklift is visually checked for any damage or defects 2.2 All <i>signage and labels</i> are visible and legible according to the <i>appropriate standard</i> 2.3 All controls are located and identified 2.4 <i>Pre-start operational checks</i> are carried out according to <i>procedures</i> 2.5 <i>Forklift</i> is started according to <i>procedures</i> and checked for any abnormal noise 2.6 <i>Post-start operational checks</i> are carried out according to <i>procedures</i> 2.7 All forklift functions and safety devices are tested to their maximum according to <i>procedures</i>

	2.8 Defects and damage are reported and recorded according to <i>procedures</i> , and appropriate action is taken
3. Shift load	<p>3.1 The weight of load is assessed to ensure compliance with <i>forklift</i> truck data plate specifications</p> <p>3.2 Appropriate <i>hazard prevention/control measures</i> are implemented and communicated with personnel in the work area</p> <p>3.3 <i>Forklift</i> is operated at a safe speed and according to <i>procedures</i></p> <p>3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards</p> <p>3.5 Load movement is monitored constantly ensuring safety to personnel and load, and structural stability</p> <p>3.6 <i>Unplanned and/or unsafe situations</i> are responded to in line with <i>procedures</i></p>
4. Shut down and secure forklift truck	<p>4.1 <i>Forklift</i> truck is parked to avoid hazards</p> <p>4.2 Forklift is <i>shut down</i> according to <i>procedures</i></p> <p>4.3 Routine post-operational forklift checks are carried out according to <i>procedures</i></p> <p>4.4 Forklift is secured to prevent unauthorised access/use</p> <p>4.5 All defects and damage are reported and recorded according to <i>procedures</i>, and appropriate action is taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills:

- Accurately interpret information relating to conducting forklift truck operations (e.g. procedures)
- Safely conduct forklift truck operations including all functions to the maximum height and load capacity
- Identify hazards associated with the operation of the forklift truck, assess risks and put into place effective hazard prevention/control measures for those hazards identified
- Use communication skills at a level sufficient to communicate with other site personnel (e.g. receive and interpret work instructions, safety information, emergency procedures)

REQUIRED SKILLS AND KNOWLEDGE

- Drive forklift with load in forward and reverse, maintaining visibility
- Verify problems and equipment faults and demonstrate appropriate response procedures

Required knowledge:

- Methodology of determining the weight of a load
- Commonwealth, state or territory OH&S legislation, standards relevant to the safe operation for the forklift trucks
- Understanding of forklift characteristics and capabilities (including use of load data plates)
- Understanding of the hierarchy of hazard identification and control
- Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class
- Procedures for the recording, reporting and maintenance of workplace records and information
- Forklift truck operations and safe operating techniques
- Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.

Overview of assessment

- Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work.
- State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Compliance with OH&S licensing legislation.
- Communicate and work safely with others in the work area.
- Identify hazards associated with the operation of the forklift truck and put in place effective hazard controls for those hazards identified.

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Conduct pre-start-up, operational, moving loads and shut down and secure checks of the forklift truck according to procedures. • Operate the forklift truck and move loads safely, including driving and manoeuvring, picking up and placing of loads at various stack heights. • Drive forklift truck with load in forward and reverse, maintaining visibility.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • Assessment of the safe application of knowledge and skills to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument. • Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. • Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. • Applicants must have access to: <ul style="list-style-type: none"> • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment • associated equipment appropriate to forklift truck operations • suitable loads as described by the endorsed Assessment Instrument • manufacturers specifications • appropriate forklift truck in a safe condition.
Method of assessment	<ul style="list-style-type: none"> • Assessment must be conducted using the endorsed Assessment Instrument. These Instruments provide instruction on their application. • The use of 'simulators' in the assessment of this unit of competency is not acceptable. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for	<ul style="list-style-type: none"> • Further information about endorsed Assessment Instruments may be obtained from state/territory

EVIDENCE GUIDE**assessment**

OH&S regulators.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.

Hazards

May include but not limited to:

- ground conditions (e.g. condition of pavement, slopes)
- overhead hazards (e.g. powerlines, service pipes)
- insufficient lighting
- traffic (e.g. pedestrians, vehicles, other plant)
- weather (e.g. wind, lightning, rain)
- forklift instability (e.g. overloading, poor load placement, irregular loads)
- other hazards (e.g. dangerous materials)

Hazard control measures

Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls

It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:

- 1 elimination
- 2 substitution
- 3 isolation
- 4 engineering control measures
- 5 using safe work practices
- 6 personal protective equipment

Appropriate standards

May include but not limited to:

- legislation
- Australian standards
- manufacturer's specifications
- industry standards (where applicable)

RANGE STATEMENT	
Forklift truck	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> • counterbalanced • reach trucks • rough terrain • internal combustion petrol, diesel, gas • electric
Communications methods	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Procedures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Pre-start operational checks	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • safety devices fitted where appropriate • forklift data plate fitted and interpreted • logbook, handbook or operating manuals available • external visual check including, evidence of damage, leaks, visual evidence of structural weaknesses (including paint separation or stressed welds) is carried out • forklift attachment is checked for security • approved modifications and/or attachments fitted to manufacturer's specifications (e.g. as per forklift or attachment data plate) are identified • checks for adaptations or modifications outside manufacturer's specifications (e.g. not listed on the forklift or attachment data plate) are carried out • maintenance logbook/records checked

RANGE STATEMENT	
Post-start operational checks	<p>May include checks of the forklift truck and equipment after start-up to ensure:</p> <ul style="list-style-type: none"> • hazard warning systems (for example lights and horns), are functional • attachment movements and control functions are smooth and comply with operating requirements • steering, transmission and brake functions comply with operating requirements
Hazard prevention/control measures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • barricades and traffic control • safety tags on electrical switches/isolators • insulated powerlines • safety observer used inside exclusion zone • disconnected power • pedestrian control (barricades, signs, etc.) • excavation safeguards • movement of obstructions • personal protective equipment • adequate illumination
Unplanned and/or unsafe situations	<p>May include but not limited:</p> <ul style="list-style-type: none"> • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental condition
Shut down	<p>May include, but is not limited to:</p> <ul style="list-style-type: none"> • parking in a suitable location away from dangerous areas • fork arms are correctly positioned (tips down, tilted forward, lowered to ground) • appropriate transmission/gear is selected for parking (relevant to transmission type) • hand/parking brake is applied • engine power is turned off • ignition key is removed (if applicable) • LPG gas cylinder valve is shut off (where fitted) • securing equipment against unauthorised operation • securing the site • ensuring access ways are clear • identifying and segregating defective equipment

RANGE STATEMENT	
	and reporting to authorised personnel <ul style="list-style-type: none">• batteries are connected to the charger (if applicable)

TLILIC2016B Licence to drive a heavy rigid vehicle

Modification History

New release. This unit replaces and is equivalent to TLILIC2016A.

Unit Descriptor

This unit involves the skills and knowledge required to obtain a licence to drive a heavy rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

Application of the Unit

This unit applies to driving that is carried out in compliance with the licence requirements and regulations of the relevant state/territory driver licensing authority pertaining to heavy rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and operate a heavy rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Heavy Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Heavy Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | |
|---|---|
| 1 Drive a heavy rigid vehicle | <ul style="list-style-type: none">1.1 Heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped according to traffic regulations, manufacturer instructions and relevant vehicle handling procedures1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and gear damage1.3 Braking system of heavy rigid vehicle is managed and operated efficiently to ensure effective control of vehicle under all conditions1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving1.5 Heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning1.6 Heavy rigid vehicle is parked, shutdown and safely secured according to traffic regulations1.7 Load is safely and effectively restrained |
| 2 Monitor traffic and road conditions | <ul style="list-style-type: none">2.1 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities2.2 Interaction with other road users is conducted courteously according to road rules to ensure safe and efficient traffic flow |
| 3 Monitor and maintain vehicle performance | <ul style="list-style-type: none">3.1 Vehicle performance is maintained through pre-operational inspections and vehicle checks3.2 Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations |

Required Skills and Knowledge

This section describes the knowledge and skills required for this unit.

Required knowledge:

- Driving hazards and related defensive driving techniques
- Efficient driving techniques
- Engine power management and safe driving strategies
- Heavy rigid vehicle controls, instruments and indicators and their use
- Heavy rigid vehicle handling procedures
- Pre-operational checks carried out on vehicle and related action
- Relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements

Required skills:

- Anticipate and monitor and traffic hazards and take appropriate action
- Apply precautions and required action to eliminate, minimise or control hazards that may exist when driving a heavy rigid vehicle
- Carry out pre-operational vehicle checks
- Communicate effectively with others when driving a heavy rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to driving a heavy rigid vehicle

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:

- applying relevant procedures that reflect legislative requirements
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings).

Context of and specific resources for assessment

Resources for assessment include access to:

- range of relevant exercises, case studies and/or other simulated practical and knowledge assessment
- appropriate range of relevant on-road operational situations or in the workplace
- relevant and appropriate materials and equipment
- applicable documentation such as workplace procedures, regulations, codes of practice and operation manuals.

Method of assessment

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit according to licensing authority requirements.

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Heavy rigid vehicle includes:

- Rigid vehicle, not being an unladen prime mover, with a minimum of three axles and a minimum 15 tonnes GVM
- Modified three axle prime mover with a certified detachable tray (with capacity to carry 75% of its specified GVM) with a GVM of 15 tonnes
- Three axle articulated bus
- Three axle bus above 15 tonnes GVM

Vehicle handling procedures may include:

- Accelerating and braking
- Managing engine performance
- Operating vehicle controls, instruments and indicators
- Positioning and stopping a vehicle
- Reversing a vehicle
- Starting a vehicle
- Steering and manoeuvring a vehicle
- Using defensive driving techniques

Driving hazards may include:

- Animals and objects on road
- Faulty:

- Traffic and road conditions may include:
- brakes
 - steering mechanism on vehicle
 - Fire in vehicle
 - Flooded sections of road
 - Foggy conditions
 - Leaking fuel
 - Oil on road
 - Parked vehicles on road
 - Pedestrians crossing road
 - Wet and iced roads
 - Windy sections of road
 - Negotiating a range of more complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
 - On open or private roads including roads with moderate inclines and declines
 - Operations conducted during the day or night
 - Typical weather conditions
 - While at a depot, base or warehouse
 - While at a client workplace or worksite
- Pre-operational inspections and equipment checks may include:
- Checking and topping up fluid levels
 - Checking:
 - brakes
 - operation of vehicle lights and indicators
 - tyre pressures
 - Visually checking vehicle

Unit Sector(s)

performance

- 3.2 Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations
- 3.3 Prime mover and trailer are correctly aligned and coupled
- 3.4 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm it is fully operational

Required Skills and Knowledge

This section describes the knowledge and skills required for this unit.

Required knowledge:

- Driving hazards and related defensive driving techniques
- Efficient driving techniques
- Engine power management and safe driving strategies
- Heavy combination vehicle controls, instruments and indicators and their use
- Heavy combination vehicle handling procedures
- Pre-operational checks carried out on vehicle and related action
- Relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements

Required skills:

- Anticipate and monitor and traffic hazards and take appropriate action
- Apply precautions and required action to eliminate, minimise or control hazards that may exist when driving a heavy combination vehicle
- Carry out pre-operational vehicle checks
- Communicate effectively with others when driving a heavy combination vehicle
- Monitor performance of vehicle, its trailers and its equipment, and take appropriate action where required
- Read and interpret instructions, procedures, information and signs relevant to driving a heavy combination vehicle

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:
- applying relevant procedures that reflect legislative requirements
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings).

Context of and specific resources for assessment

Resources for assessment include access to:

- range of relevant exercises, case studies and/or other simulated practical and knowledge assessment
- appropriate range of relevant on-road operational situations or in the workplace
- relevant and appropriate materials and equipment
- applicable documentation such as workplace procedures, regulations, codes of practice and operation manuals.

Method of assessment

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit according to licensing authority requirements.

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Heavy combination vehicle includes:

- Prime mover with a minimum of three axles and a semi-trailer with a minimum of two axles - vehicle must have a GCM rating of at least 24 tonnes
- Heavy rigid vehicle towing a trailer - trailer must have at least two axles and a GVM of 12 tonnes or more

Vehicle handling procedures may include:

- Accelerating and braking
- Managing engine performance
- Operating vehicle controls, instruments and indicators
- Positioning and stopping a vehicle

- Driving hazards may include:
- Reversing a vehicle
 - Starting a vehicle
 - Steering and manoeuvring a vehicle
 - Using defensive driving techniques
 - Animals and objects on road
 - Faulty:
 - brakes
 - steering mechanism on vehicle
 - Fire in vehicle
 - Flooded sections of road
 - Foggy conditions
 - Leaking fuel
 - Oil on road
 - Parked vehicles on road
 - Pedestrians crossing road
 - Wet and iced roads
 - Windy sections of road
- Traffic and road conditions may include:
- Negotiating a range of more complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
 - On open or private roads including roads with moderate inclines and declines
 - Operations conducted during the day or night
 - Typical weather conditions
 - While at a depot, base or warehouse
 - While at a client workplace or worksite
- Pre-operational inspections and equipment checks may include:
- Checking and topping up fluid levels
 - Checking:
 - brakes
 - operation of vehicle lights and indicators
 - tyre pressures
 - Visually checking vehicle

Competency Field

LIC - Licensing

TLILIC3018B Licence to drive a multi combination vehicle

Modification History

New release. This unit replaces and is equivalent to TLILIC3018A.

Unit Descriptor

This unit involves the skills and knowledge required to obtain a licence to drive a multi-combination vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, coupling and uncoupling of dollies, and effectively managing hazardous situations.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

Application of the Unit

This unit applies to driving that is carried out in compliance with the licence requirements and regulations of the relevant state/territory driver licensing authority pertaining to multi-combination vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and operate a multi-combination vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Multi-Combination Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Multi-Combination Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | |
|--|---|
| 1 Drive a multi-combination vehicle | <p>1.1 Multi-combination vehicle is started, steered, manoeuvred, positioned and stopped according to traffic regulations, manufacturer instructions and relevant vehicle handling procedures</p> <p>1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage</p> <p>1.3 Braking system of multi-combination vehicle is managed and operated efficiently to ensure effective control of vehicle under all conditions</p> <p>1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving</p> <p>1.5 Multi-combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>1.6 Multi-combination vehicle is parked, shutdown, uncoupled and safely secured according to traffic regulations</p> <p>1.7 Load is safely and effectively restrained</p> |

performance

- 3.2 Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations
- 3.3 Prime mover, dollies and trailer are correctly aligned and coupled in proper sequence
- 3.4 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm it is fully operational

Required Skills and Knowledge

This section describes the knowledge and skills required for this unit.

Required knowledge:

- Driving hazards and related defensive driving techniques
- Efficient driving techniques
- Engine power management and safe driving strategies
- Multi-combination vehicle controls, instruments and indicators and their use
- Multi-combination vehicle handling procedures
- Pre-operational checks carried out on vehicle and related action
- Relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements

Required skills:

- Anticipate and monitor and traffic hazards and take appropriate action
- Apply precautions and required action to eliminate, minimise or control hazards that may exist when driving a multi-combination vehicle
- Carry out pre-operational vehicle checks
- Communicate effectively with others when driving a multi-combination vehicle
- Monitor performance of vehicle, its trailers and its equipment, and take appropriate action where required
- Read and interpret instructions, procedures, information and signs relevant to driving a multi-combination vehicle

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment

guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:

- applying relevant procedures that reflect legislative requirements
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings).

Context of and specific resources for assessment

Resources for assessment include access to:

- range of relevant exercises, case studies and/or other simulated practical and knowledge assessment
- appropriate range of relevant on-road operational situations or in the workplace
- relevant and appropriate materials and equipment
- applicable documentation such as workplace procedures, regulations, codes of practice and operation manuals.

Method of assessment

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit according to licensing authority requirements.

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Multi-combination vehicle includes:

- Heavy combination B-double rated vehicle at least 22 metres in length with more than one trailer, which has all pertinent documentation permits etc.
- Three axle prime mover with an A and B trailer each with bogie axles

Vehicle handling procedures

- Accelerating and braking
- Managing engine performance

may include:

- Operating vehicle controls, instruments and indicators
- Positioning and stopping a vehicle
- Reversing a vehicle
- Starting a vehicle
- Steering and manoeuvring a vehicle
- Using defensive driving techniques

Driving hazards may include:

- Animals and objects on road
- Faulty:
 - brakes
 - steering mechanism on vehicle
- Fire in vehicle
- Flooded sections of road
- Foggy conditions
- Leaking fuel
- Oil on road
- Parked vehicles on road
- Pedestrians crossing road
- Wet and iced roads
- Windy sections of road

Traffic and road conditions may include:

- Negotiating a range of more complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
- On open or private roads including roads with moderate inclines and declines
- Operations conducted during the day or night
- Typical weather conditions
- While at a depot, base or warehouse
- While at a client workplace or worksite

Pre-operational inspections and equipment checks may include:

- Checking and topping up fluid levels
- Checking:
 - brakes
 - operation of vehicle lights and indicators
 - tyre pressures
- Visually checking vehicle

TLIR4002A Source goods/services and evaluate contractors

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to source goods/materials/services and evaluate contractors including analysing supply requirements, and evaluating and selecting appropriate potential contractor(s). Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures. This includes the application of established workplace procedures to source goods and to evaluate potential contractors.

A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations' goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Analyse supply requirements

- 1.1 Purpose and specifications of required goods/services are identified
- 1.2 Criteria to evaluate potential or existing contractor performance is established
- 1.3 Quantities of required goods/services are determined
- 1.4 Frequency of ordering/requesting of goods/services is identified

2 Evaluate potential contractors

- 2.1 Contractors of requested goods/materials/services are identified
- 2.2 Comparative costings for goods/materials/services are obtained
- 2.3 Contractors' ability to provide a consistent level of performance on repeat jobs is assessed
- 2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures
- 2.5 A prioritised contractor shortlist is established based on the capacity of contractors to provide a cost competitive quality service
- 2.6 The outcomes of the contractor selection process are documented including recommendations for actioning agreements/contracts with selected contractors
- 2.7 Information and data generated during the selection process is filed and maintained in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulatory and code requirements
- Relevant OH&S responsibilities and procedures
- Workplace policies, procedures and protocols for the sourcing and supply of goods/services, and the evaluation of potential supply contractors
- Workplace grievance and disputation handling policies and procedures
- Workplace business policies and plans as they relate to supply contracts, including procedures for maintenance of confidentiality
- Focus of operation of recording, reporting and statistical analysis systems and resources
- Resource availability including the processing capacity of equipment and software systems for statistical analysis of data
- Typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

Required skills:

- Communicate and negotiate effectively with others when sourcing goods and services and evaluating contractors
- Read and interpret instructions, procedures and information and signs relevant to the sourcing of goods and services and the evaluation of contractors
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the sourcing of goods and services and the evaluation of contractors
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when sourcing goods and services and evaluating contractors
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when sourcing goods and services and evaluating contractors in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and appropriately apply technology, information systems and procedures to workplace

Required skills:

tasks

- Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation,

EVIDENCE GUIDE

and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:

- single and multi-site location
- large, medium or small companies

Services, products, risks, work systems and requirements may:

- potentially vary across different sections of the workplace

Operations require:

- customer and supplier contact and coordination

Contractors may be:

- for one-off or repeat supplies/contract services

Document/data interchange may be:

- electronic
- paper-based

Selection processes include:

- procedures for maintenance of confidentiality and integrity

Personnel in work area may include

- other employees and supervisors
- customers and suppliers
- external authorities and agencies
- management and union representatives
- industrial relations, occupational health and safety specialists
- other professional or technical staff, contractors and maintenance personnel

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documentation may include:

- quality and work specifications and procedures
- specifications for required products or services
- manufacturers specifications and/or suppliers handling and storage advice

RANGE STATEMENT

Applicable regulations and legislation may include:

- workplace procedures, policies and instructions
- OH&S regulations and procedures
- supplier and/or client instructions
- materials safety data sheets
- relevant agreements, codes of practice including the national standards for manual handling and the industry safety code
- legislation, regulations and related documentation, including regulations related to hazardous substances, dangerous goods and environment protection
- reports of accidents and incidents within regulatory requirements and enterprise procedures
- workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information
- quality assurance procedures
- relevant regulations, standards and codes of practice
- relevant Australian and state/territory OH&S legislation
- equal employment legislation and related policies
- environmental protection regulations
- hazardous substances and dangerous goods codes
- relevant Australian standards and certification requirements
- licence, patent or copyright arrangements
