FWPCOR3202 Conduct quality and product care procedures

Release: 1

FWPCOR3202 Conduct quality and product care procedures

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR3202B Conduct quality and product care procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

The unit of competency describes the outcomes required to monitor the quality of output, following quality and product care procedures in a variety of work settings, including a forest environment, saw mill, wood chip mill, veneer mill, board/plywood mill, timber treatment plants, downstream processing of timber, forest products factory, forest products sales and service, horticultural, domestic, local council, emergency services environment.

This unit is relevant for a broad range of job roles across a range of industry sectors. The product referred to in this unit may be trees, logs, seed, planting stock, timber, panels or board.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Timber Manufactured Products

Timber Merchandising

Wood Panel Products

Timber Truss and Frame Design and Manufacture

Elements and Performance Criteria

ELEMENTS <i>Elements describe the essential outcomes.</i>	PERFORMANCE CRITERIA <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare to apply quality and product care procedures.	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify quality system procedures to be applied. 1.3 Visually inspect products before processing in line with work health and safety (WHS) policies and procedures. 1.4 Determine product specifications.
2. Monitor and control care of products.	2.1 Plan product recovery to optimise the resource value and minimise waste. 2.2 Plan potential of materials to provide the highest value added return. 2.3 Assess and report on species, timber structure, features and characteristics as required by the enterprise. 2.4 Grade materials and direct to best end use in line with industry standards as required by the enterprise. 2.5 Regularly maintain and adjust machinery and equipment to minimise waste and damage. 2.6 Assess and rectify problems as they occur to avoid further loss of product.
3. Monitor and control quality of output.	3.1 Assess products against quality and customer specification requirements. 3.2 Prepare products for despatch in a manner that prevents or minimises damage. 3.3 Supply customer with finished products in line with work order and workplace procedures. 3.4 Record and report on quality and product care procedures in line with workplace procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and

are not explicit in the performance criteria.	
Oral communication skills to:	<ul style="list-style-type: none">establish and maintain communication with others in the workplace while inspecting products to ensure own safety and that of others.
Reading skills to:	<ul style="list-style-type: none">read at times complex workplace procedures and product documentation.
Numeracy skills to:	<ul style="list-style-type: none">estimate and measure products and compare them to specifications.
