Assessment Requirements for FWPCOT2203 Finish and pack products

Release: 1

Assessment Requirements for FWPCOT2203 Finish and pack products

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT2203B Finish products, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- set up finishing and coating operations according to workplace requirements and site procedures
- conduct finishing and coating operations according to safe work procedures
- prepare coating chemicals in line with manufacturer recommendations and site procedures
- assess and rectify defects and faults during the coating process in line with safe work procedures
- package finished products according to organisational guidelines
- record and report faults and finishing and packing process information
- perform emergency stop.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures involved in finishing and packing finished products
- emergency response procedures relevant to the job (accident, fire, serious process fault)
- environmental protection requirements relating to the safe disposal of waste material (including preservative treated timber), the safe use and storage of chemicals, and the cleaning of plant, tools and equipment
- criteria for recycling and re-using material with defects
- hazards and risks associated with finishing and coating fabricated products, including environmental hazards and risks
- problem identification and resolution strategies, common fault finding techniques, and typical product and coat defects
- procedures for the operation and maintenance of tools and equipment
- procedures for recording and reporting equipment and product faults, and process information.
-

Assessment Conditions

The following resources must be made available:

- work order
- product to coat
- coating equipment and tools
- coating chemicals
- material for packaging
- personal protective equipment required for finishing products.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
