Assessment Requirements for FWPCOT2205 Tail out materials

Release: 1

Assessment Requirements for FWPCOT2205 Tail out materials

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT2205B Tail out materials, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to tailing out materials
- tail out material while maintaining process flow according to safe work procedure
- identify and respond to processing faults according to workplace requirements and organisational policy
- sort finished material according to safe work procedure
- dispose of waste material according to environmental protection requirements
- follow record keeping procedures for recording quality and production requirements.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures for tailing out materials:
 - standard operating procedure (SOP)
 - personal protective equipment (PPE) requirements
 - procedures for safely disposing of waste material in an environmentally sustainable manner
- methods of controlling materials including:
 - material movement
 - position of the material being sawn or dressed

- avoiding contact with tail of saw or cutter
- removing waste
- common work area and environmental hazards and risks and how to control them
- tailing out processes and procedures
- common industry terminology
- criteria for recycling and re-using material with faults or defects
- industry standard cross-section and length dimensions and tolerances
- established communication channels and protocols used to ensure safety and productivity
- flow or control problems including
 - speed of production
 - flow of product
 - sharpness of blades or cutters
 - quality of materials
 - communication
 - housekeeping
 - burn marks
 - rough finish
 - tear out
 - machine marks
 - irregular size of finished product
- types of tools and equipment, and procedures for their safe use, operation and maintenance
- mathematical procedures used to calculate timber size and dimension
- procedures for recording and reporting quality and production requirements.
-

Assessment Conditions

- specifications and work instructions

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-
