Assessment Requirements for FWPCOT2210 Tally material

Release: 1

Assessment Requirements for FWPCOT2210 Tally material

Modification History

| Release | Comment |
|---------|---|
| 1 | <p>Replaces equivalent FPICOT2210B Tally material, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p> |

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- in line with an individual work order, complete tallying jobs of one or more of these materials:
 - timber
 - hardware items and fittings
 - packs of random timber cross sections, lengths or panel sizes
 - packs of set timber cross sections, lengths or panel sizes
- complete tally sheets or electronic record for each tallying job (depending on the workplace system being manual or electronic)
- complete records for non-conformances and damaged material identified during each tallying job.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- manual and electronic methods used to tally material in a forest products factory setting
- format, content and use of common industry and organisation specific documents used to record and report tallies
- industry standard sizing and names for timber, timber profiles and boards
- industry and organisational specific standard specifications for packaging timber products
- common features of non-conformant packs and methods to recognise these

- tools and equipment used for tallying material in a forest products factory setting; their purpose, features and use:
 - electronic bar coding equipment
 - personal protective equipment
- organisational procedures specific to tallying material:
 - communication reporting lines
 - recording and reporting non-conformances and damaged material
 - recording and reporting tallying results.

Assessment Conditions

The following resources must be made available:

- manual or electronic tools and equipment used for tallying material, to suit the particular workplace:
 - tally sheets
 - electronic bar coding equipment
- a selection of materials to be tallied (of one or more of these materials):
 - timber
 - hardware items and fittings
 - packs of random timber cross sections, lengths or panel sizes
 - packs of set timber cross sections, lengths or panel sizes
- work order for tallying activities with specific details of material to be tallied; product types, packs, categories of products
- template documents to record:
 - non-conformances and damaged material
 - tallying results
- organisational procedures specific to tallying material
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
