

FWPCOT3210 Sharpen cutting tools

Release: 1

FWPCOT3210 Sharpen cutting tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3210B Sharpen cutting tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.
	This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to verify cutting tool dimensions, select and set up grinder and attachments, and sharpen cutting tools. Tools include cutters, profile cutters, routers and other rotary cutting tools. Work is completed in a forest products factory setting.

The unit applies to Sawdoctor, Sawmaker, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
Determine required cutting tool dimensions	1.1 Review work order and where required check with appropriate personnel. 1.2 Obtain site documentation and drawings and verify cutting tool dimensions.
	1.3 Check cutter angles to improve efficiency of expended cutting energy in mill operations.

Approved Page 2 of 4

	1.4 Check cutting tool condition against required dimensions, angles and finish. 1.5 Assess and document additional cutting processes in line with work order.
2. Select and set up grinder	2.1 Select appropriate repair, maintenance and personal protective equipment and check for operational effectiveness.
	2.2 Select grinding wheel of appropriate diameter to suit sharpening requirements and mount on grinder.
	2.3 Dress grinding wheel to maintain cutting surface and suit cutting tool dimensions.
	2.4 Configure grinder attachments to suit cutting tool dimensions and profile.
3. Operate grinder to sharpen cutting tool blades	3.1 Follow organisational safety procedures and manufacturer's recommendations throughout all repair and maintenance processes.
	3.2 Select grinding speeds and feeds to suit cutting tool material, grinding wheel material and configuration.
	3.3 Maintain cutting angles and grind cutting edges to remove nicks, lands and other imperfections.
	3.4 Check cutting teeth systematically for consistent measurements to specifications.
	3.5 Monitor grinder for operational effectiveness and apply coolant as required.
	3.6 Remove cutting tool and store to maintain cutting edges.
	3.7 Dispose of unserviceable and damaged cutting tools in line with environmental protection practices.
	3.8 Record and report processing problems and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:

• interpret required tool dimensions from equipment specifications and drawings

• read basic grinding wheel settings; set and adjust speeds to suit

cutting tool material

Approved Page 3 of 4

complete precise calculations to machine cutting tools to

	specified profile and angle.
Oral communication skills to:	ask open and closed probe questions and actively listen to clarify content of work orders.
Reading skills to:	 interpret documents: workplace health and safety and other organisational procedures work orders manufacturers' maintenance recommendations.
Writing skills to:	complete basic accurate records for processing problems and equipment faults.
Planning and organising skills to:	efficiently and logically sequence the stages of preparation and repair work using work order to guide activities.
