FWPCOT3216 Assess and maintain saw performance

Release: 1

FWPCOT3216 Assess and maintain saw performance

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3216B Assess and maintain saw performance, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess, test, verify and rectify cutting problems for chipping and sawing machines, saw blades, knives and associated equipment. Work is completed in a wood products factory setting.

The unit applies to Sawdoctor, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Inspect and test saw and equipment	<p>1.1 Obtain information relating to current and past performance problems and review to assess process problems.</p> <p>1.2 Select appropriate personal protective equipment and check for operational effectiveness.</p> <p>1.3 Observe saw and equipment under operating conditions to determine extent of problems.</p> <p>1.4 Examine timber fed through saw to determine potential causes of</p>

	cutting problem. 1.5 Lock-out equipment and inspect saw and equipment to identify worn, broken and loose components.
2. Assess technical performance	2.1 Compare technical performance against other equipment. 2.2 Assess technical performance of sawing operation to identify future improvements and feasibility of options for new equipment. 2.3 Obtain endorsement from appropriate personnel for identified improvements.
3. Rectify saw problems	3.1 Identify characteristics of occurring problems and diagnose possible causes. 3.2 Refer to other trades and operations personnel to validate assessed causes. 3.3 Canvass responses and discuss with relevant personnel to identify and agree on preferred option. 3.4 Implement selected course of action, review cutting results and communicate to appropriate personnel. 3.5 Record and report causes of cutting problems and action taken in line with organisational procedures.

Foundation Skills

his section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	<ul style="list-style-type: none"> interpret routine numerical data involving angles, dimensions, and speeds in equipment fault and cutting performance records.
Oral communication skills to:	<ul style="list-style-type: none"> ask open and closed probe questions and actively listen when discussing problems, potential causes and options to rectify.
Reading skills to:	<ul style="list-style-type: none"> interpret basic documents recording faults and performance of equipment interpret detailed and familiar workplace health and safety procedures.
Writing skills to:	<ul style="list-style-type: none"> complete accurate basic records of cutting problems, the fault diagnosis process and rectification outcomes.
Planning and organising skills to:	<ul style="list-style-type: none"> manage own timing and productivity to assess, diagnose and rectify saw problems.

Range of Conditions

Not Applicable
