FWPCOT3349 Assess timber against quality requirements and specifications

Release: 1

FWPCOT3349 Assess timber against quality requirements and specifications

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to evaluate timber against quality requirements and specifications for use in timber processing and manufacturing operations.

The unit applies to individuals who evaluate and select timber in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for timber selection	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety and environmental protection

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	practices and/or procedures, 1.3 Identify, assess and take actions to mitigate risks and hazards associated with assessing and selecting timber 1.4 Review workplace and quality procedures on timber selection 1.5 Conduct visual inspection of timber for suitability 1.6 Review and check timber against product specifications
2. Evaluate timber for selection	2.1 Assess growth and durability of timber and assess suitability for production requirements 2.2 Assess species, timber structure, features and characteristics of timber and assess suitability for production requirements 2.3 Measure moisture content of selected timber and assess suitability for production requirements 2.4 Identify density and working properties of timber and assess suitability for production requirements 2.5 Identify faults and features in timber and assess suitability for production requirements 2.6 Select sawing patterns that best suits selected timber
3. Finalise timber selection	3.1 Assess timber against quality and specification requirements 3.2 Prepare timber for despatch, ensuring that damage is prevented or minimised 3.3 Record and report on timber selection outcomes and procedures, and identify any problems with the process and report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Extracts key information from industry standards, workplace procedures and quality procedures on criteria for timber selection

Skill	Description
Numeracy	Extracts numerical information from graphical and statistical information on timber properties

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
FWPCOT3349 Assess timber against quality requirements and specifications	FWPCOT3285 Apply knowledge of wood technology principles to end use applications	Corrected title to reflect work outcomes Foundation Skills updated Minor changes to Performance Criteria and Knowledge Evidence	Equivalent
