FWPCOT4214 Plan for and coordinate quarry operations

Release: 1

FWPCOT4214 Plan for and coordinate quarry operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan for and develop a quarry (borrow pit) for the purpose of sourcing material for the construction and maintenance of forest roads and tracks.

The unit applies to individuals involved in planning and supervising quarry development as part of forestry operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for quarry development	1.1 Review need for and processes for establishing a quarry 1.2 Consult with relevant parties about possible quarry sites 1.3 Inspect possible quarry sites and assess in terms of location, access to forestry operations, land tenure and quantity and quality of material

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>available for extraction</p> <p>1.4 Analyse samples of materials from possible quarry sites and test for suitability</p> <p>1.5 Identify environmental protection, adjacent land use, regulatory or zoning issues that may impact on the selection of the proposed quarry site</p> <p>1.6 Conduct a cost-benefit analysis to assess the viability and lifespan of the proposed quarry site</p> <p>1.7 Determine the location of the quarry</p> <p>1.8 Determine and document operational and site procedures for quarry development</p> <p>1.9 Obtain necessary licences or permits for quarry development</p>
2. Coordinate quarry development	<p>2.1 Confirm type and quantity of material and methods of extracting material according to the quarry development plan</p> <p>2.2 Establish schedule for quarry development according to quarry development plan</p> <p>2.3 Identify, assess and take actions to mitigate risks and hazards associated with quarrying operations</p> <p>2.4 Coordinate and schedule people, materials and equipment required for quarry development</p> <p>2.5 Liaise with employees and contractors to ensure that a coordinated approach is taken to the development and implementation of work plans, road maintenance and construction plans associated with quarry development</p> <p>2.6 Monitor quarry development for compliance with quarry development plan and safety, regulatory and environmental requirements</p> <p>2.7 Document quarry development activities according to workplace procedures</p> <p>2.8 Adjust quarry development plan as required in accordance with workplace procedures</p>
3. Review quarry development	<p>3.1 Review approach to quarry development</p> <p>3.2 Monitor quarry development and identify potential improvements according to workplace procedures</p> <p>3.3 Report on outcomes of quarry development to appropriate</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret familiar and detailed workplace policies and procedures and complex documents such as quarry plans
Writing	<ul style="list-style-type: none"> Produce detailed written reports on quarry site selection and development
Oral communication	<ul style="list-style-type: none"> Ask open and closed questions and use active listening techniques to gather information related to quarry development
Numeracy	<ul style="list-style-type: none"> Interpret complex numerical data relating to the quality and quantity of quarry materials
