wood products**

Release: 1

Assessment Requirements for FWPCOT4224 Conduct internal audit of chain of custody certification for forest and wood products

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted one internal audit of chain of custody certification in either a forest and wood processing, sales or distribution business.

In performing this task, the individual has:

- sourced standards and internal audit requirements for the relevant chain of custody certification scheme
- complied with legislation, standards and codes of practice relevant to chain of custody operations
- communicated the internal audit process, requirements and findings to workplace personnel
- planned the internal audit
- explained features of ethical behaviour to audit team
- applied communication and negotiation skills to facilitate internal audit processes, including conducting one-on-one and group meetings and applying conflict resolution skills, as required
- identified and followed an audit trail
- identified, collected and analysed evidence
- gathered, analysed, recorded and distributed internal audit data using business information systems
- interpreted evidence and made compliance judgements
- prepared factual and objective written internal audit reports
- recommended corrective actions, if required
- verified implementation of corrective actions, if required.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, standards and codes of practice relevant to chain of custody operations, including current Australian Standard on internal auditing requirements
- ethical behaviour of internal auditors, including:
 - integrity
 - objectivity
 - confidentiality
 - competency
- purpose of internal audit of chain of custody certification
- chain of custody certification, including:
 - purpose of certification
 - roles and responsibilities of personnel responsible for chain of custody implementation and monitoring in workplace
 - chain of custody certification process and period of chain of custody certification
 - certification documentation, including product groups
 - chain of custody certification bodies and schemes
 - functions in chain of custody schemes
- key components of chain of custody system, including:
 - system for purchasing, acquiring and receipting certified materials
 - system for handling certified material and reason for separating from non-certified materials
 - system for providing certified material to customers
- chain of custody certification requirements, including:
 - workplace chain of custody procedures
 - responsible sourcing, including information requirements and verification of certification claims by suppliers
 - classification of materials (certified, neutral and other)
 - controlled sources
 - traceability
 - chain of custody implementation methods (physical separation method, percentage-based method and credit method)
 - types, meaning, conditions of use and correct use of chain of custody trademarks, logos and labels
- format, content and use of chain of custody workplace documents used for certification, audit and quality purposes, including:
 - timber source documents
 - receipts
 - processing records
 - quality records

- numbering and labelling documents
- workplace and chain of custody certification scheme internal audit requirements and processes, including:
 - scheduling of audits
 - role of internal auditors
 - process, documentation and reporting
 - procedures for multi-site audits
 - reasons for inclusion of contractors and organisations providing outsourced functions in internal audits
 - requirements for and methods of responding to non-compliances and process improvements identified by audit
 - relationship between internal and external audit processes
 - information needs and communication methods relevant for different groups and audience engaged in internal audit process
 - evidence appropriate for use in internal audit of chain of custody certification for forest and wood products
 - evidence collection methods
 - key features of legislation that impacts on the conduct of internal audit procedures, including privacy, workplace health and safety and anti-discrimination legislation
 - structure, authority levels and lines of reporting in workplace
 - vocabulary and terms relating to chain of custody certification for forest and wood products.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber and wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - internet access and computer equipment to research information on chain of custody certification scheme
- specifications:
 - workplace documentation relevant to operation of chain of custody certification scheme
 - chain of custody certification scheme documentation, including policy, procedures and standards
 - templates or formats for collecting evidence and completing audit report.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
