FWPFGM3206 Plan and implement non-commercial thinning operations

Release: 1

FWPFGM3206 Plan and implement non-commercial thinning operations

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3206B Plan and implement non-commercial thinning operations, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to control non-commercially thin species growing on site, to maintain the health of the stand, improve productivity and long-term sustainability, and ensure maximum growth vigour to optimise product outcome. It includes treatment with chemicals and the use of mechanical equipment.

The unit applies to a variety of work settings, including: forest environments, farms, agriculture operations, nurseries and local councils.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Plan thinning	1.1 Review and assess relevant plans and site information for thinning

operations	<p>operations.</p> <p>1.2 Identify sample area and measure growth.</p> <p>1.3 Plan level of overwood treatment accounting for habitat or seed tree considerations.</p> <p>1.4 Plan thinning operation methods in line with budget and resources and confirm with appropriate personnel.</p> <p>1.5 Seek and obtain necessary approvals.</p>
2. Implement thinning operations	<p>2.1 Obtain and coordinate required resources and equipment and authorisations in line with organisational requirements.</p> <p>2.2 Organise schedule for operations with appropriate personnel.</p> <p>2.3 Mark trees for treatment in line with plan and organisational procedures</p> <p>2.4 Establish and maintain communication with others to coordinate work and keep work site safe.</p> <p>2.5 Coordinate thinning operations in line with plans, budget, OHS, environmental and legislative requirements.</p> <p>2.6 Monitor and adjust operations in line with site conditions to ensure effective and efficient work and minimal damage to stand.</p>
3. Review thinning operations	<p>3.1 Review operation against relevant plan and organisational and environmental requirements.</p> <p>3.2 Analyse information to determine effectiveness of thinning operations and possible improvements to future operations.</p> <p>3.3 Prepare recommendations for future operations, based on assessment of information collected.</p> <p>3.4 Record and report operation activities and results to the appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	<ul style="list-style-type: none"> determine forest growth in terms of number of trees per hectare, height, girth review and analyse information to determine cost effectiveness of operations.
Planning and organising skills	<ul style="list-style-type: none"> identify work requirements in line with site conditions analyse data and requirements to plan efficient

to:	operations.
