Assessment Requirements for FWPSAW3212 Sharpen tipped circular saws

Release: 1

Assessment Requirements for FWPSAW3212 Sharpen tipped circular saws

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPISAW3212B Sharpen tipped circular saws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to sharpening tipped circular saws
- sharpen tipped circular saws in line with the work order and within prescribed organisational requirements
- remove and replace tipped circular saw blades from equipment
- assess the condition of blade teeth for:
 - sharpness of each tooth
 - damage to teeth
 - pitch
 - number of teeth per metre

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of circular saws for which tipped blades are sharpened:
 - circular saws
 - hot saws
 - cold saws
- features and names of different parts of circular saw blades
- purpose, features and operation of tools and equipment used to sharpen tipped circular saw blades:
 - manually or automatically adjustable grinding machines
 - abrasive wheels
- importance of sharpening and setting teeth and tension to match requirements for:
 - characteristics of various materials sawn
 - speed of the sawing process
 - direction of the sawing process
 - cutting angle for sawing
 - saw blade specifications
- methods for:
 - removing saw blades from circular saws
 - assessing saw blade condition
 - sharpening blades to specified requirements
 - setting teeth to a specified profile
 - setting concentricity of teeth
- tooth pitch and tooth angles at which blades are sharpened (blade geometry)
- range of speeds at which abrasive wheels can be operated without damaging blades
- organisational policies and procedures specific to sharpening tipped circular saw blades:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials

Assessment Conditions

The following resources must be made available:

- tools and equipment used to sharpen tipped circular saw blades:
 - manually or automatically adjustable grinding machines
 - abrasive wheels
 - measuring tools equipment
- circular saws for which blades are to be sharpened:
 - circular saws
 - hot saws
 - cold saws
- tipped circular saw blades for sharpening
- replacement tips:
 - tungsten carbide
 - satellite
 - other alloyed materials; high speed steel
- personal protective equipment suitable for sharpening tipped circular saw blades
- manufacturers' instructions for use, repair and maintenance of equipment
- work order for repair and maintenance activities with specific instructions for sharpening tipped circular saw blades in specified equipment
- documents, spreadsheets and commonly used proformas for recording processing and equipment faults
- relevant personnel for the purposes of communicating information
- organisational policies and procedures for sharpening tipped circular saw blades.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
