FWPSIL4009 Plan for and coordinate tending operations in a native forest or plantation

Release: 1

FWPSIL4009 Plan for and coordinate tending operations in a native forest or plantation

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan for and implement tending operations within a forested area, which may be a managed native forest or plantation.

The unit applies to individuals responsible for coordinating the implementation of tending operations in either managed native forests or plantations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Silviculture (SIL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan tending operation	1.1 Review plan for forested area and confirm objectives of tending operations 1.2 Identify environmental protection requirements for the forested

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	area 1.3 Identify, assess and take actions to mitigate risks and hazards associated with tending operations 1.4 Review workplace health and safety procedures, including the use of personal protective equipment, chemical safety and safe use of tools and equipment 1.5 Review tending and associated operational requirements for the forested area 1.6 Consult with stakeholders about tending requirements for the forested area 1.7 Document a tending plan, including specifications, quality, hazard analysis and performance targets and obtain approvals for implementation according to workplace procedures
2. Implement tending plan	2.1 Obtain resources required to implement the tending plan 2.2 Implement emergency treatments and hazard notification procedures 2.3 Organise site schedule with technical operators 2.4 Operationalise tending plan with reference to budget, schedule, performance indicators and objectives
3. Monitor tending operations	3.1 Obtain data about performance at key milestones or established review periods 3.2 Check that environmental, workplace health and safety and legislative compliance requirements are met and that documentation is accurate and up-to-date 3.3 Maintain communication with operations supervisor throughout implementation of the plan 3.4 Amend tending operation plan to ensure that specifications, quality and performance targets are met
4. Review tending operation	4.1 Review outcomes against established objectives 4.2 Determine operational improvements for the future and formulate recommendations 4.3 Record and report on tending operations to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Extract information from industry guides and standard references
Writing	- Complete workplace forms - Annotate site plans
Oral communication	- Ask open and closed questions and use active listening techniques to clarify contents of work orders - Use interactive verbal and non-verbal communication to direct the activities of work crews
Numeracy	Collect, collate and interpret basic statistics on quality and performance indicators related to tending operations

Unit Mapping Information
