	pits and clarifier. 1.5 Run sludge from clarifier and drain water from sludge beds in line with organisational procedures and environmental protection practices.
2. Distribute water to pasture	2.1 Set flow rate and pump water to pasture area. 2.2 Check absorption and pH levels; monitor and adjust flow rate for optimal distribution.
3. Complete operator maintenance	3.1 Follow organisational safety procedures to lock out equipment. 3.2 Drain settling pits and clean to collection point. 3.3 Clean solids from discharge drain and dispose of in line with environmental protection practices. 3.4 Recirculate water from catchment area to irrigation. 3.5 Monitor dam banks for weed and vermin. 3.6 Keep effluent plant area clear of foreign bodies and debris in line with organisational safety procedures. 3.7 Record and report effluent processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure correct amount of treatment solution required for settling pits and clarifier • complete routine calculations to determine optimal flow rate for water distribution and pH levels.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • safety data sheets
	  • manufacturers' instructions.

Writing skills to:	• complete accurate basic records for effluent processing and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of effluent treatment and water distribution.
Problem-solving skills to:	• identify and dispose of foreign material • recognise faulty equipment and resolve by reporting or

© Commonwealth of Australia, 2025 Skills Insight

	rectifying.
Technology skills to:	• select and use appropriate personal protective equipment for processing production effluent • efficiently and safely operate and monitor mechanical pumps used for processing effluent.

Assessment Requirements for FWPWPP3217 Process production effluent

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3217B Process production effluent, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- process production effluent over two four hour shifts
- across those two shifts complete these activities:
  - treat production effluent
  - distribute treated water to pasture
  - drain and clean equipment and dispose of solids
  - complete basic written records of process outcomes and equipment faults.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable commonwealth, state, territory or local government regulations relevant to effluent discharge
- environmental protection practices for processing production effluent:
  - reducing energy use
  - distributing treated water with appropriate levels of acidity and alkalinity
  - monitoring presence of weeds and vermin
  - disposing of solids and hazardous substances
- purpose of treating effluent and distributing water to pasture
- typical work flow processes and effluent treatment techniques

© Commonwealth of Australia, 2025 Skills Insight

- properties, at a basic level of understanding, of treatment solutions used in effluent treatment
- range of acceptable levels of acidity and alkalinity in processed effluent to minimise environmental impacts on the local area
- purpose, features and operation of equipment used to process production effluent:
  - pumping lines
  - mixing tanks
  - effluent line settling pits
  - clarifiers
  - sludge beds
- methods used to:
  - safely handle chemicals used in the treatment process
  - drain and clean equipment
- organisational procedures specific to processing production effluent:
  - workplace health and safety with particular emphasis on equipment lock out, use of personal protective equipment and handling hazardous substances
  - communication reporting lines
  - recording and reporting process outcomes and equipment faults.

Assessment Conditions

The following resources must be made available:

- effluent processing and water distribution plant including:
  - pumping lines
  - mixing tanks
  - effluent line settling pits
  - clarifiers
  - sludge beds
- personal protective equipment suitable for processing production effluent
- treatment solution
- manufacturers':
  - safety data sheets
  - instructions for equipment use
  - recommendations for draining and cleaning equipment
- template documents for recording process outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for processing production effluent.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

© Commonwealth of Australia, 2025 Skills Insight

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3218 Plan and coordinate machining of panels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3218B Plan and coordinate machining of panels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to manage operational logistics for panel machining activities which includes planning cutting patterns and schedules for operators.

The unit applies to production operators and technicians who plan and coordinate machining of panels in a forest and wood products factory and also involves monitoring and evaluating processes and problems to determine and recommend improvements.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan machining operations	1.1 Interpret production orders and plan production of panel types and sizes. 1.2 Develop panel machining schedules to ensure optimum production outcomes.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Plan and document cutting patterns to maximise output and minimise wastage. 1.4 Communicate all information to operators in line with organisational procedures
2. Coordinate panel cutting operations	2.1 Identify and record variations in panel condition and report to operators. 2.2 Assist operators to resolve machining problems. 2.3 Monitor panel cutting processes; assess effectiveness of cutting pattern and ability to maintain schedule. 2.4 Modify cutting patterns and schedules to ensure optimum performance and communicate changes to operators. 2.5 Ensure machined panels are directed to designated area for storage or transferred for further processing. 2.6 Direct processes for rejecting and disposing of sub-standard machined panels and off-cuts in line with organisational safety procedures and environmental protection practices. 2.7 Complete and maintain operating logs and cutting records in line with organisational procedures. 2.8 Investigate and record major processing and equipment faults and resolve or report to appropriate personnel.
3. Evaluate machining performance	3.1 Monitor and evaluate panel cutting operations and output to determine process improvements. 3.2 Analyse systematic problems with equipment and panel quality for potential to improve machining processes. 3.3 Document recommended process improvements and communicate to appropriate personnel in line with organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• complete calculations to determine:
	  • panel amounts required to satisfy production orders
	  • optimum volume return from panels
	  • machining schedules considering human and equipment resource capacity.
	• complete routine production records involving dimensions, panel

© Commonwealth of Australia, 2025 Skills Insight

	profiles and quantities tallied against work orders. • analyse machining process data to measure performance of cutting operations.

Oral communication skills to:	• provide clear and unambiguous information to operators about:
	  • initial and changing cutting patterns and schedules
	  • requirements to dispose of sub-standard panels and off-cuts.

Reading skills to:	• interpret production orders.

Writing skills to:	• develop documents in a style and format easily understood by others:
	  • cutting patterns and schedules
	  • reports on systematic issues with machining processes, potential process improvements including rationale for recommendations
	• complete accurate basic records of cutting output and equipment faults.

Planning and organising skills to:	• source, collect and organise data to inform cutting schedules and process improvement reports • efficiently and logically manage operational logistics for machining activities.
Problem-solving skills to:	• assess machining processes during operation and take quick action to modify schedules to resolve output problems • investigate equipment faults, consider systematic issues and resolve • analyse production problems, consider various solutions and determine process improvements.
Teamwork skills to:	• take responsibility for coordinating a team of operators for effective machining operations.
Technology skills to:	• monitor and evaluate the operational effectiveness of machining equipment • use a computer, keyboard and software to prepare cutting patterns, machining schedules, and reports.

Assessment Requirements for FWPWPP3218 Plan and coordinate machining of panels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3218B Plan and coordinate machining of panels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan and coordinate panel machining operations for production jobs in line with different production orders for each job
- determine, document and communicate cutting patterns and schedules for each of the above jobs
- assess panel output during machining operations for:
  - size
  - volume recovery
  - quality finish
  - dimensional consistency
- monitor, assess and modify schedules in response to changing circumstances within each of the above production jobs
- complete operating logs and cutting records for each of the above production jobs
- complete a detailed report about systematic issues arising across the jobs covering problems with processes, equipment and panels including recommendations for process improvements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for machining panels:

© Commonwealth of Australia, 2025 Skills Insight

  - reducing water and energy use
  - disposing of, recycling and reusing timber and other waste
- operational capacity of panel machining equipment
- stages of the panel machining process
- typical flow of panel supply in and out of the machining area
- range of cutting patterns used on panels to achieve maximum output
- methods of determining cutting schedules to maximise:
  - equipment and labour use
  - volume return from panels
  - efficient handling of panels to be machined
- typical timber panel defects and how they affect ability to produce quality machined panels:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- methods used to:
  - assess panel cutting processes for quality of outcomes
  - diagnose and analyse systematic problems with equipment and panels
- format, content and use of:
  - cutting pattern documents
  - cutting schedules
  - operating logs and cutting records
  - process improvement reports
- organisational procedures specific to planning and coordinating panel machining operations:
  - communication reporting lines for operator team members and self
  - documenting cutting patterns, schedules and reports
  - recording and reporting systematic equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- computers, keyboards, printers and software used to prepare planning and production documents
- machining production line with a continuous conveyor belt system
- saws which must include at least one of the following:

© Commonwealth of Australia, 2025 Skills Insight

  - manually controlled docking and trimming saws
  - band saws
  - bench saws
  - panel saws
  - saws with adjustable angle
  - saws with one or multiple blades
  - table saws
- personal protective equipment suitable for coordinating machining production lines
- panels of various dimensions which must include one or more of the following:
  - laminated
  - veneered
  - plywood
  - chipboard
  - fibreboard
  - medium density fibreboard
- templates for:
  - cutting pattern documents
  - cutting schedules
  - operating logs and cutting records
  - process improvement reports
  - records for equipment faults
- production order for panels with specific instructions for sizes, shapes or profiles
- organisational procedures for planning and coordinating panel machining operations
- a team of operators with whom the individual can interact.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting. Machining operations must be present in order that the individual can monitor, assess and modify schedules in response to changing circumstances.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3219 Blend and test binding mixes

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPIWPP3219B Blend and test binding mixes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the skills and knowledge required to blend and test binding mixes used in the production of engineered wood panels.

The unit applies to individuals who work as production operators and technicians in an engineered wood panel facility. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for blending binding mix	1.1 Review work order, workplace health and safety requirements, environmental protection practices and emergency procedures for blending binding mix and, where required, check with appropriate personnel 1.2 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislation to maintain safe work practices 1.3 Obtain the type and quantity of binding mix for blending from storage 1.4 Select and plan blending process according to work order
2. Set up equipment and blend binding mix	2.1 Use equipment according to workplace health and safety procedures, manufacturer instructions and environmental protection practices 2.2 Set blend cycles according to work order 2.3 Measure ingredients and additives and blend to ensure minimum wastage 2.4 Transfer blend to appropriate storage location or production equipment through transfer lines without contamination 2.5 Monitor rate of including additives and, where required, adjust pumps
3. Test binding mix results	3.1 Test blend samples regularly, checking tack and adhesion properties 3.2 Interpret test results and, where required, adjust blend to achieve desired properties 3.3 Reject and dispose of incorrect blend according to environmental protection practices
4. Maintain and clean equipment	4.1 Clean blending, storage and transfer equipment according to workplace health and safety procedures 4.2 Turn off pumps and flush equipment according to manufacturer instructions 4.3 Dispose of excess blended material and additives according to environmental protection practices 4.4 Store equipment and ingredients according to workplace health and safety procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.5 Record and report production outcomes and equipment faults to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret safety data sheets
Numeracy	• Identify the quantity of ingredients to meet work order production requirements, and counts amounts • Calculate routine mixing ratios for blends • Interpret numerical data from binding mix test samples
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Assessment Requirements for FWPWPP3219 Blend and test binding mixes

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPIWPP3219B Blend and test binding mixes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for blending binding mix used in the production of engineered wood panels
- prepared binding mixes for one or more of the following types of materials according to individual work orders that prescribe varying quantities of ingredients:
  - chips
  - flakes
  - fibre
- demonstrated use of water- and resin-based glues
- taken samples and test mix for types of properties that include:
  - mix quantities
  - viscosity
  - colour
  - spread
  - tack
  - cured bond strength
  - setting speed
  - how weather conditions may be affecting the process.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to blending binding mix for the production of engineered wood products as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to blending and testing mixes:
  - health and safety, with particular emphasis on equipment lockout, emergency procedures, use of personal protective equipment (PPE) and handling hazardous substances according to safety data sheets
  - use of equipment for blending binding mix
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
- environmental protection practices for blending and testing binding mixes:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of hazardous substances
- storage layout and categories for:
  - raw materials
  - finished mixes
- typical flow of material supply in and out of the mixing area
- typical workflow processes for blending and testing binding mixes
- properties, at a basic level of understanding, of ingredients and their uses:
  - rubber-based adhesives
  - polyvinyl acetate
  - epoxy resins and formaldehydes
  - chips
  - flakes or fibre
  - hardeners
  - softeners
  - accelerants
  - decelerators
  - dyes
- effects of weather conditions on blending processes
- methods used to:
  - blend binding mix
  - test samples of the mix
  - safely store glue and additives
- purpose, features, operation and basic non-specialist maintenance of mixing systems used to blend binding mix:

© Commonwealth of Australia, 2025 Skills Insight

- mixers with manually controlled feed
- mixers with pre-programmed mix quantities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - blending system with transfer pumps
  - personal protective equipment suitable for blending and testing mixes
  - ingredients for binding mix including chips, flakes or fibre
- specifications:
  - recipes for mixing ingredients
  - manufacturer safety data sheets, instructions for equipment use and recommendations for maintaining equipment
  - work order with specific instructions for blending binding mixes
  - template documents for recording production outcomes and equipment faults
  - workplace procedures for blending and testing mixes, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPWPP3220 Plan and coordinate panel painting

Modification History

Release	Comment
1	Replaces equivalent FPIWPP3220B Plan and coordinate panel painting, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to manage operational logistics for the roller coating, curtain coating and spray painting lines.

The unit applies to production operators and technicians who plan and coordinate panel painting in a forest and wood products setting and also involves monitoring and evaluating processes and problems to determine improvements.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan painting operations	1.1 Review and interpret work orders to determine production requirements. 1.2 Develop painting schedules and communicate to operators in line with organisational procedures. 1.3 Plan and schedule equipment settings and operations. 1.4 Plan and prescribe control measures to minimise waste of paint and

© Commonwealth of Australia, 2025 Skills Insight

	additives. 1.5 Identify, monitor and assess variations in paint mixtures.
2. Coordinate painting operations	2.1 Direct operators to load and unload painting equipment. 2.2 Coordinate paint application and curing processes and monitor for quality finish and completion rates. 2.3 Check paint line performance and interpret data to ensure accuracy and intended coverage. 2.4 Modify schedules to ensure optimum and cost effective production outcomes and communicate changes to operators. 2.5 Coordinate the disposal of excess paint in line with environmental protection practices. 2.6 Direct correct processes for cleaning painting equipment to ensure compliance with organisational safety procedures and environmental protection practices. 2.7 Investigate, record and report major processing and equipment faults and resolve or report to appropriate personnel
3. Evaluate and modify painting processes.	3.1 Monitor and evaluate painting operations and output to determine process improvements. 3.2 Analyse systematic problems with plant, equipment, paints and panels for potential to improve painting processes. 3.3 Document recommended process improvements, communicate to appropriate personnel and seek approval. 3.4 Trial new processes, document outcomes and introduce appropriate system changes.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• complete calculations to determine:
	  • paint amounts required to satisfy work orders
	  • optimum volume return from paint
	  • painting schedules considering human and equipment resource capacity.
	• analyse painting process data to measure paint line performance.

Oral communication	• provide clear and unambiguous information to operators about:

© Commonwealth of Australia, 2025 Skills Insight

skills to:	• initial and changing painting schedules • requirements to dispose of excess paint and clean equipment.
Reading skills to:	• interpret work orders.

Writing skills to:	• develop comprehensive documents in a style and format easily understood by others:
	  • painting schedules
	  • reports on systematic issues with painting processes, potential process improvements including rationale for recommendations
	• complete accurate basic records of equipment faults.

Planning and organising skills to:	• source, collect and organise data to inform painting schedules and process improvement reports • efficiently and logically manage operational logistics for painting activities.
Problem-solving skills to:	• assess painting processes during operation and take quick action to modify schedules to resolve output problems • investigate major equipment faults, consider systematic issues and resolve • analyse production problems, consider various solutions and determine process improvements.
Teamwork skills to:	• take responsibility for coordinating a team of operators for effective painting operations.
Technology skills to:	• monitor and evaluate the operational effectiveness of painting equipment • use a computer, keyboard and software to prepare painting schedules, and reports.

FWPWPP3222 Press laminated ply

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3222B Press laminated ply, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to set up, operate and shut down hot and cold presses as well as their combined operation used to press laminated ply.

The unit applies to production technicians and operators who press laminated ply in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for pressing.	1.1 Review and check work order with appropriate personnel. 1.2 Identify hazards and control risk in the work area. 1.3 Acquire type and quantity of ply to be pressed from the assembly process. 1.4 Conduct pre-start checks on equipment in line with manufacturer's recommendations and site requirements.

© Commonwealth of Australia, 2025 Skills Insight

	1.5 Select pressing process in line with site procedures. 1.6 Communicate with relevant personnel as required, to ensure safety and production requirements are met.
2. Operate, monitor and report pressing process.	2.1 Set and adjust press cycle times, pressures, temperatures and product parameters to meet production requirements. 2.2 Assess assembled ply and check tack level before loading with defective assemblies returned for reworking. 2.3 Operate and monitor hot or cold press to press boards in line with site requirements. 2.4 Perform unload and reload cycles. 2.5 Regularly assess pressed and finished ply and action necessary changes to assembly and pressing processes. 2.6 Dispose of sub-standard pressed ply in line with site procedures and environmental requirements. 2.7 Record and report pressing process and equipment faults to appropriate personnel.
3. Unload, maintain and load press.	3.1 Open press in line with operating procedures. 3.2 Separate and remove ply and plates. 3.3 Load ply into transport or storage racks for cooling. 3.4 Monitor plate condition during unloading, clean and spray with release agent and remove defective plates for repair. 3.5 Stack assembled ply, plates and overlay panels in press to specified height or number and squareness. 3.6 Transfer finished ply for further processing in line with site requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret instruments, gauges and data recording equipment.
Reading skills to:	• interpret safety data sheets (SDS) • monitor process information displayed on screens
Writing skills to:	• maintain documentation (log activity) • record quality outcomes.

Assessment Requirements for FWPWPP3222 Press laminated ply

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3222B Press laminated ply, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify hazards and control risks in the work area
- operate hot and cold pressing equipment to produce laminated ply according to safe work procedure:
  - set parameters
  - load press
  - unload press
  - restart press cycle
- monitor quality of pressed and finished ply and adjust pressing process
- dispose of sub-standard ply according to site and environmental protection requirements
- inspect plates for faults and remove defective plates for repair
- record and report pressing process according to workplace procedure
- redistribute material on site using designated equipment according to workplace procedures.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedure for pressing ply
- environmental protection requirements relevant to safe disposal or re-use of waste material
- procedures for identifying and controlling hazards and risks associated with pressing ply

© Commonwealth of Australia, 2025 Skills Insight

- laminated ply characteristics
- hot, cold and combination pressing methods
- storage areas for cooling ply
- procedures for identifying and rectifying faults during the pressing process
- procedures for identifying signs of defective pressing plates
- procedures for equipment lock-out
- procedures for recording and reporting pressing process and faults
- procedures for transferring finished ply
- procedures for removing and cleaning press plates.
-

Assessment Conditions

The following resources must be made available:

- work order
- hot or cold press
- release agent
- ply
- overlay panels
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3223 Immunise veneer

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3223B Immunise veneer, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan and prepare a veneer immunisation process, treat veneer for protection against insects, pack veneer and report information.

The unit applies to production technicians and operators who immunise veneer in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for veneer immunisation.	1.1 Work order is reviewed and checked with appropriate personnel 1.2 Identify hazards and control risk according to site procedures. 1.3 Retrieve from storage location and assess type and quantity

© Commonwealth of Australia, 2025 Skills Insight

	of veneer to be immunised. 1.4 Check equipment for operational effectiveness in line with manufacturer's recommendations. 1.5 Plan immunising process in line with site procedures. 1.6 Communicate plan with relevant personnel in line with site requirements.
2. Prepare chemicals and perform veneer immunisation process.	2.1 Access and prepare type and quantity of chemicals and solutions to be used. 2.2 Operate ancillary equipment used to add chemical solutions in line with operating procedures. 2.3 Regularly test samples of solution in line with standard operating procedures. 2.4 Plan load and unload cycles to provide selected treatment and drainage time for veneer. 2.5 Load and unload veneer from solution tanks in line with standard operating procedures. 2.6 Operate transfer equipment to shift veneer and visually assess treated veneer to establish modifications required to treatment process. 2.7 Monitor drainage of treated veneer to ensure even drying.
3. Reject or pack and label veneer panels and report information.	3.1 Reject and dispose of, recycle or re-use veneer panels with a failed immunisation process, in line with site procedures and environmental requirements. 3.2 Pack and label dried veneer panels in line with standard operating procedures. 3.3 Record and report veneer immunising process and equipment faults to appropriate personnel.
4. Clean up and store chemicals.	4.1 Perform veneer immunisation clean up in line with safe work procedures. 4.2 Check condition of treating mechanisms and rectify if required. 4.3 Clear treatment area of dust, shavings and debris in line with site requirements. 4.4 Store chemicals in line with statutory requirements.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure chemical quantities • set numerical data
Reading skills to:	• interpret safety data sheets (SDS) • monitor process information displayed on screens
Writing skills to:	• log veneer process information • complete shift change-over reports

Assessment Requirements for FWPWPP3223 Immunise veneer

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3223B Immunise veneer, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare the work area for the veneer immunisation process according to work health and safety (WHS) requirements and site requirements
- prepare chemicals and immunise veneer according to standard operating procedure
- load and unload at least three cycles of veneer
- visually assess immunised veneer for faults and dispose of according to standard operating procedure and environmental requirements
- record veneer immunisation process and faults according to workplace procedures
- store chemicals according to statutory requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- procedures for environmental protection requirements, including the safe disposal of waste material, the safe use and storage of chemicals and safe cleaning of plant and work area
- safe work procedures for immunising veneer
- hazards and risks associated with immunising veneer and how to control them according to hierarchy of risk control
- veneer immunising techniques
- procedures for fault finding during visual inspection of veneer to determine suitability for packing

© Commonwealth of Australia, 2025 Skills Insight

- safety data sheets relevant to chemicals used to immunise veneer
- characteristics of veneer (quarter sawn, back sawn, radial/rotary sawn)
- storage locations and stock rotation positions
- procedures for packing and labelling dried veneer panels
- procedures for checking condition of treating mechanisms
- procedures for recording and reporting veneer immunisation process and faults using manual or electronic recording systems
- procedures for equipment lock-out
- statutory requirements for the safe storage and handling of chemicals.

Assessment Conditions

The following resources must be made available:

- work order
- chemicals or chemical solutions used to immunise veneer which must include one or more of the following:
  - insecticides
  - solvents
  - preservative oils
  - waterborne preservatives
- types of veneers including quarter sawn, back sawn or radial/rotary sawn
- equipment used to immunise veneer: chemical solution tanks, chemical mixing and transfer equipment, veneer transfer equipment
- documents, spreadsheets and commonly used proforma documents
- relevant personnel for the purposes of communicating information
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3224 Profile sand products

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3224B Profile sand products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to profile sand surfaces of curved or shaped products to achieve a smooth surface.

The unit applies to production technicians and operators that profile sanding products in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Timber Manufactured Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan and prepare for sanding.	1.1 Review and check work order with relevant personnel. 1.2 Identify hazards and control risk according to site procedures. 1.3 Retrieve type and quantity of profiles to be sanded from the production process. 1.4 Check equipment for operational effectiveness in line with

© Commonwealth of Australia, 2025 Skills Insight

	manufacturer's recommendations, using an inspection checklist. 1.5 Plan sanding process in line with site procedures. 1.6 Communicate plan with relevant personnel according to site procedures.
2. Sand profiles and report faults.	2.1 Set sanding profile and feed rate for optimal smoothing of product and adjust to suit varying products. 2.2 Perform profile sanding in line with site requirements. 2.3 Regularly check and clean dust extraction equipment to avoid blockages. 2.4 Visually assess product quality to ensure specified outcome has been achieved. 2.5 Remove and replace worn sanding medium as required. 2.6 Reject and dispose of products with sanding defects in line with site procedures and environmental requirements. 2.7 Record and report sanding process and equipment faults to appropriate personnel.
3. Grade and distribute products and clean up.	3.1 Grade products in line with site requirements and industry standards. 3.2 Move material to storage or processing operations in line with site requirements. 3.3 Clean work area in line with site requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• set and adjust parameters on equipment • use grading codes

Assessment Requirements for FWPWPP3224 Profile sand products

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3224B Profile sand products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- control risk in the work environment
- safely and efficiently profile sand products in line with workplace requirements using profile sanding machinery
- set profile sanding parameters for different products
- clean dust extraction equipment
- remove and replace sanding mediums
- visually assess product quality and dispose of defective products
- grade products in preparation for distribution
- distribute products on-site using designated equipment.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- site standards, workplace requirements and safe work procedures for profile sanding products
- hazards and risks associated with the profile sanding process, and how to control them
- different sanding techniques suited to different products with varying characteristics and profile types
- characteristics of timber and panels
- procedures for visually inspecting product quality and identifying defects

© Commonwealth of Australia, 2025 Skills Insight

- procedures for disposal of defective products according to environmental guidelines
- distribution procedures following profile sanding operations
- established communication channels and protocols
- procedures for the use, operation and maintenance of tools and equipment used to profile sand products
- procedures for recording and reporting sanding process and equipment faults
- procedures for cleaning the work area.

Assessment Conditions

The following resources must be made available:

- work order
- profile sanding machine
- sanding medium: sandpaper, emery cloth, sanding belt
- transferral equipment
- timber products which must include one or more of the following:
  - solid timber/moulded panel strips
  - building components
  - furniture components
  - bench tops
  - shaped panels
  - articles with moulded or shaped edges/surfaces
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3225 Produce profile sanding shoes and wheels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3225B Produce profile sanding shoes and wheels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to produce profile sanding shoes and wheels that match the product profile to be sanded.

The unit applies to production technicians and operators that produce profile sanding shoes and wheels in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Timber Manufactured Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for production.	1.1 Review and check work order with appropriate personnel. 1.2 Identify hazards and control risk in the work area according to work health and safety (WHS) requirements. 1.3 Retrieve from stock, type and quantity of blanks for shoes and

© Commonwealth of Australia, 2025 Skills Insight

	wheels to be produced. 1.4 Conduct pre-start checks on equipment in line with manufacturer's recommendations and site requirements. 1.5 Plan production process in line with site procedures. 1.6 Communicate plan with others as required, to ensure safety and production requirements are met, in line with site procedures.
2. Produce shoes and wheels.	2.1 Produce template from tin or other metal plate to match profile. 2.2 Position shoe or wheel in machine and shape in line with template, stopping regularly to check shaping with template. 2.3 Label wheels or shoes to follow profile. 2.4 Install wheels or shoes into profile sander in preparation for profile sanding operations. 2.5 Reject and dispose of templates with defects in line with site procedures and environmental requirements. 2.6 Record and report production process and equipment faults to appropriate personnel.
3. Conduct operator maintenance.	3.1 Follow equipment lock-out procedures in line with site procedures. 3.2 Check and maintain condition of shoe or wheel shaping equipment. 3.3 Check shaper cutters for blunt or damaged condition and sharpen as required. 3.4 Clean tool room and clear of waste in line with site procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• set and adjust parameters on profile sanding equipment.
Reading skills to:	• read manual or computer-based information: production, quality, maintenance information.
Writing skills to:	• record equipment inspection and maintenance information (checklists, fault reports) • complete log book requirements (manual or electronic).

Assessment Requirements for FWPWPP3225 Produce profile sanding shoes and wheels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3225B Produce profile sanding shoes and wheels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- produce profile sanding shoes and wheels in line with safe work procedure
- insert profile sanding shoes and wheels in a profile sanding machine to match given profiles
- mount a wheel in a metal lathe
- form the shape of a profile with the aid of a template
- visually assess templates to identify defects and dispose of defective materials according to site and environmental protection requirements
- lock-out equipment, visually inspect condition of components and sharpen or replace worn components
- record production, quality and maintenance information using manual or computer-based data entry system (log book or computer).

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures for producing profile sanding shoes and wheels
- procedures for set-up of profile sanding equipment procedures for hazard identification and risk control relevant to own work role
- procedures for recycling or re-using defective templates and disposing of waste material according to environmental protection requirements

© Commonwealth of Australia, 2025 Skills Insight

- profiling techniques
- wheel and shoe production methods
- established communication channels and protocols used to interact with workplace personnel
- procedures for fault finding to determine product quality
- procedures for use, operation and maintenance of shaping equipment and components, including equipment lock-out procedures
- procedures for recording and reporting production, quality and maintenance information.

Assessment Conditions

The following resources must be made available:

- work order
- pre-start checklist
- shoe and wheel shaping equipment
- profile sander, sanding shoes and wheels
- template material
- manual or computer-based recording system to record production, quality and maintenance information
- relevant personnel for the purposes of communicating information
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3227 Vacuum paint

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3227B Vacuum paint, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to paint articles using a vacuum painting line with drying ovens and de-nibbing machines.

The unit applies to production technicians and operators who vacuum paint in a forest products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for vacuum painting process.	1.1 Work order is reviewed and checked with appropriate personnel. 1.2 Identify and follow safe work procedure for vacuum painting. 1.3 Acquire type and quantity of articles to be vacuum painted from storage location. 1.4 Check equipment for operational effectiveness in line with

© Commonwealth of Australia, 2025 Skills Insight

	manufacturer's recommendations and site requirements. 1.5 Plan and select vacuum painting process, feed rates and paint in line with site procedures. 1.6 Load paint products in equipment in line with manufacturer's specifications and safe work procedure. 1.7 Manufacture and fit paint templates according to manufacturer's specifications and safe work procedure. 1.8 Communicate with relevant personnel as required, to ensure safety and production requirements are met.
2. Vacuum paint.	2.1 Operate vacuum paint coater in line with recipes and manufacturer's recommendations. 2.2 Apply paint and continuously monitor and adjust flow rates and viscosity in line with site requirements. 2.3 Continuously monitor paint operations and wet film thickness, clearing blockages and filters to maintain paint coverage to specifications. 2.4 Regularly check products for surface quality and contamination in line with site requirements and take corrective action. 2.5 Remove sub-standard painted items from painting process and review for further action. 2.6 Calibrate test equipment and regularly test samples of paint.
3. Operate drying oven.	3.1 Start ovens and bring to operating temperature in line with manufacturer's specifications. 3.2 Monitor oven drying processes in line with standard operating procedures. 3.3 Reject and dispose of products with oven drying defects in line with site procedures and environmental requirements. 3.4 Adjust drying operations in response to paint adhesion test results.
4. Operate de-nibber.	4.1 Set up and start de-nibbing machine in line with manufacturer's recommendations. 4.2 Select and install profile flap brushes. 4.3 Process and assess sample strips. 4.4 Reject and dispose of products with de-nibber defects in line with site procedures and environmental requirements. 4.5 Adjust de-nibbing process in line with sample results. 4.6 Operate and monitor de-nibbing machine in line with standard operating procedures.

© Commonwealth of Australia, 2025 Skills Insight

	4.7 Investigate and resolve routine de-nibbing problems.
5. Shut down and clean equipment and record information.	5.1 Shut down equipment in coordination with other line operators and site procedures. 5.2 Turn off vacuum coater, dryer and de-nibber and flush equipment in line with standard operating procedures. 5.3 Dispose of excess paint and flushing liquid in line with statutory requirements and environmental regulations. 5.4 Store equipment and paint in line with statutory requirements and environmental regulations. 5.5 Record and report processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• enter numerical data when setting machinery • measure paint quantities • measure paint template dimensions • calculate paint flow rates and viscosity • set and adjust oven temperatures
Reading skills to:	• monitor dials and gauges • read log sheet information
Writing skills to:	• complete log sheet information (manually or electronically) • record pre-start inspection information
Problem solving skills to:	• respond to faults and problems throughout the vacuum paint process.

Range of Conditions

Not Applicable

Assessment Requirements for FWPWPP3227 Vacuum paint

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3227B Vacuum paint, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify hazards and control risk in the work area
- set up vacuum painting process
- set parameters on equipment
- load paint products
- manufacture and fit paint templates
- operate vacuum paint coater and maintain paint coverage according to work order specifications
- adjust paint flow rates and viscosity
- clear vacuum paint blockages and filters
- calibrate test equipment and test samples of paint throughout the vacuum paint process
- operate, monitor and adjust drying oven according to standard operating procedure
- set up and operate de-nibbing machine
- install profile flap brushes in de-nibbing machine
- identify, remove and dispose of defective products during the vacuum painting, oven drying and de-nibbing process
- shut down and clean vacuum paint coater, drying oven and de-nibbing machine according to standard operating procedure
- shut-down and flush equipment
- store materials and equipment and dispose of waste according to statutory and environmental protection requirements.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures relevant to the set-up, operation, shut-down and cleaning of vacuum painting, oven drying and de-nibbing equipment
- procedures for hazard identification and risk control during the entire vacuum painting process including:
- paints, their viscosity, film thickness, film wetness and feed rates
- procedures for the safe handling, use and storage of paints including their safety data sheets (SDS)
- procedures for clearing blockages and cleaning filters during the vacuum paint process
- procedures for safe disposal of waste materials according to environmental protection requirements
- workplace storage and labelling systems used to support the vacuum painting process
- workplace communication channels and protocols used to communicate with relevant personnel
- procedures for sample testing and calibration of sample testing equipment
- paint recipes and how they are applied in the vacuum paint process
- procedures for identifying product contamination and defects including:
- dust, water spots, oil spots from equipment or oily finger prints
- orange peel effect
- incomplete cover
- solvent boil
- procedures for equipment lock-out
- procedures for identifying, recording and reporting vacuum painting process and equipment fault information
- procedures for emergency response (accident, fire, serious equipment fault).

Assessment Conditions

The following resources must be made available:

- work order
- articles to be vacuum painted
- storage location
- personal protective equipment required to vacuum paint
- vacuum painting chamber
- drying oven
- de-nibber together with continuous roller conveyors
- paint suitable for vacuum coating
- paint templates
- vacuum paint recipes
- relevant personnel for the purposes of communicating information
- established recording and reporting mechanisms (manual or computer-based log book)

© Commonwealth of Australia, 2025 Skills Insight

- sample safe work procedures for:
  - vacuum painting, drying and de-nibbing process
  - testing samples
  - cleaning machinery
  - manufacturer's equipment guidebook

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3228 Dry Wood Flakes

Modification History

Release	Comment
1	Replaces superseded equivalent FPIWPP3228B Dry wood flakes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to dry wood flakes for downstream use in board production and to operate dryers and other ancillary equipment.

The unit applies to production technicians and operators who dry wood flakes in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare to dry wood flakes.	1.1 Review work order and check with appropriate personnel. 1.2 Identify hazards and control risk in the work environment. 1.3 Acquire type and quantity of flakes to be dried from production process, and assess. 1.4 Select equipment appropriate to work requirements and conduct pre-start checks in line with manufacturer's recommendations and

© Commonwealth of Australia, 2025 Skills Insight

	site procedures. 1.5 Plan drying process in line with site procedures. 1.6 Establish and maintain communication with relevant personnel in line with work health and safety (WHS) requirements.
2. Dry wood flakes and monitor quality.	2.1 Start dryer and hot oil system and monitor continuously in line with operational procedures. 2.2 Set drying temperature, humidity and feed rate for optimal recovery of product. 2.3 Position flakes and feed at a rate appropriate to machine speed, capacity, flakes moisture content, thickness and condition. 2.4 Visually assess flakes and measure moisture levels to ensure specified outcome has been achieved. 2.5 Coordinate out-feed to ensure efficient recovery of dried flakes. 2.6 Reject and dispose of sub-standard flakes in line with site procedures and environmental requirements.
3. Grade and redistribute wood flakes.	3.1 Grade flakes in line with site requirements and industry standards. 3.2 Move flakes to storage or processing operations in line with site requirements. 3.3 Reject and dispose of sub-standard material in line with site requirements.
4. Clean up, maintain equipment and record information.	4.1 Clean work area in line with site requirements. 4.2 Follow equipment lock-out procedures in line with site procedures. 4.3 Check drying mechanism for effective condition. 4.4 Check and maintain oil levels, air filters, conveyors and chains. 4.5 Clear dust, shavings and debris from drying area in line with workplace requirements. 4.6 Record and report drying process and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Numeracy skills to:	• interpret gauges, dials and screens displaying numerical information (levels, capacity, speed) • estimate flakes size, quantity and thickness • use grading codes.
Reading skills to:	• monitor drying process information.
Writing skills to:	• enter data • record production, quality and maintenance information.
Problem solving skills to:	• identify irregularities in temperature and levels and make appropriate adjustments.

Range of Conditions

Assessment Requirements for FWPWPP3228 Dry Wood Flakes

Modification History

Release	Comment
1	Replaces superseded equivalent FPIWPP3228B Dry wood flakes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- operate drying equipment and hot oil systems to dry wood flakes in line with work order and safe work procedures in readiness for storage and/or processing
- monitor and adjust equipment parameters to ensure production requirements are met
- visually assess dried wood flakes to identify faults and determine quality for grading
- grade and redistribute flakes on-site using designated equipment
- identify hazards and control risk throughout the drying wood flakes process
- perform emergency shut-down procedure in response to fire
- perform operator maintenance on drying equipment:
  - perform equipment lock-out procedure
  - check and maintain oil levels, air filters, conveyers, chains
- clean up work area and clear drying area of waste
- appropriately dispose of waste
- record production, quality and fault information using designated workplace recording systems.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures relevant to operating drying equipment and hot oil systems to dry wood flakes

© Commonwealth of Australia, 2025 Skills Insight

- procedures for the safe disposal of waste materials according to environmental protection guidelines
- wood flakes drying techniques (using pre-dryers, dryers, cooling sections, steam, gas, heated air)
- procedures for visually assessing wood flakes to determine characteristics, faults, finish and quality
- procedures for grading and redistributing wood flakes
- established communication channels and protocols used to communicate with relevant personnel
- procedures for identifying irregularities and faults with machinery and ancillary equipment, and appropriate resolution strategies
- procedures for the operation and maintenance of drying equipment
- procedures for recording and reporting production, quality and fault information
- procedures for setting, monitoring and adjusting feed rate and moisture content
- storage systems appropriate for the storage of wood flakes:
  - storage racks
  - storage bays
  - bins, stacks
  - pallet boxes
  - modularised storage compartments
  - temporary stacking bays
- workplace specific dryers and ancillary equipment used to dry wood flakes
- waste minimisation, disposal, recycling and re-use guidelines
- emergency procedures in response to fire, accident, and serious equipment fault.

Assessment Conditions

The following resources must be made available:

- work order
- manual or computer-based recording and reporting systems for:
  - production records
  - quality records
  - maintenance records
  - tally sheets
- wood flakes
- storage area
- wood flakes transfer equipment
- drying equipment
- relevant personnel for the purposes of communicating information
- personal protective equipment required for drying wood flakes.

FWPWPP3229 Classify flake

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3229B Classify flake, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate specialist equipment to classify flake in readiness for downstream production of panel products, while monitoring and maintaining the flow of operation. The unit includes operator maintenance.

The unit applies to those classifying flake in a forest and wood products factory setting. The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare to classify flake.	1.1 Check and review work order with appropriate personnel. 1.2 Identify, clarify and follow safe work procedure for classifying flake. 1.3 Identify hazards and control risk in the work area.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Conduct pre-start checks on equipment in line with manufacturer's recommendations and site procedures. 1.5 Acquire and assess from stockpile type and quantity of flake to be classified. 1.6 Plan flake classifying process in line with site procedures.
2. Operate equipment and classify flake.	2.1 Adjust screens and feed systems to separate flake into required sizes and operate equipment in line with site requirements. 2.2 Monitor flake flow, usage and silo levels and take action to ensure optimal production and availability of sufficient storage space. 2.3 Direct output to designated silos and immediately clear blockages to ensure smooth transfer. 2.4 Reject and dispose of flake unsuitable for classification in line with site procedures and environmental requirements.
3. Maintain equipment, clean up and maintain record keeping procedure.	3.1 Lock out equipment in line with workplace requirements and site procedures. 3.2 Check grinding elements for faulty, blunt or damaged condition, and remove and replace as required, in line with manufacturer's recommendations. 3.3 Clear machine and surrounding area of foreign matter and debris in line with workplace requirements. 3.4 Record and report processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• estimate storage capacity, flake quantities and flow rates.
Reading skills to:	• monitor information on screens.
Writing skills to:	• enter log sheet data • complete pre-start checklist.
Problem solving skills to:	• detect faults and take immediate action to rectify problems including blockages requiring emergency shut-down and immediate rectification.

Assessment Requirements for FWPWPP3229 Classify flake

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3229B Classify flake, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- operate equipment to classify flake according to work order and safe work procedures
- respond to a blockage requiring emergency shutdown
- visually assess flake to determine it classification characteristics
- identify and appropriately dispose of unsuitable flake
- conduct operator maintenance on flake classifying equipment
- store flake in line with workplace requirements
- record and report production, quality and maintenance information using designated workplace recording systems (manual or computer-based).

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedure relevant to classifying flake
- hazards and risk controls relevant to the classifying flake process
- process faults that require emergency shut-down and immediate resolution
- emergency response procedures relevant to fire, accident, serious equipment or process fault
- environmental protection requirements: waste minimisation and disposal, recycling and reuse guidelines
- organisational and site standards, requirements, policies and procedures for classifying flake

© Commonwealth of Australia, 2025 Skills Insight

- flake classification process
- flake characteristics:
  - size categories
  - species
  - core fraction
  - surface fraction
  - overs and dust
  - moisture content
- storage systems and labelling requirements
- established communication channels and protocols
- procedures for identifying and resolving problems and faults during the classify flake process
- procedures for the operation and maintenance of equipment
- procedures for recording and reporting faults, processing and equipment maintenance information (production, quality, maintenance and tally sheets).

Assessment Conditions

The following resources must be made available:

- personal protective equipment required for classifying flake
  - flake (any of the following):
    - wood flake, planer shavings, sawdust, shredded board
- classifiers
- flake towers
- screens and silos
- sifters
- mechanised feed systems (conveyors, transfer cars or chutes)
- transfer equipment (regular feed systems, blow lines or drag chains)
- relevant personnel for the purposes of communicating information
- site documents: work order, safe work procedure, equipment lock-out procedure, log book or computer-based equivalent.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3230 Produce decorative veneers

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3230B Produce decorative veneers, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to produce decorative veneers in readiness for application to chipboard, medium density fibreboard, plywood or other board products following customer order specifications.

The unit applies to production operators and technicians who produce decorative veneers in a forest and wood products factory setting

Licensing, legislative, regulatory or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for production of veneer.	1.1 Review work order and check with appropriate personnel. 1.2 Identify and follow safe work procedure for producing decorative veneers. 1.3 Identify hazards and control risk in the work area. 1.4 Acquire type and quantity of decorative veneer to be

© Commonwealth of Australia, 2025 Skills Insight

	produced, from veneer production process. 1.5 Select equipment and conduct pre-start check in line with manufacturer's recommendations and site requirements. 1.6 Select veneer production process in line with site procedures. 1.7 Establish and maintain communication with relevant personnel as required, to ensure safety and production requirements are met.
2. Produce decorative veneer and dispose of sub-standard material	2.1 Visually inspect veneer for decorative qualities, layout design, defects and select for use. 2.2 Select joining points and cut veneer in line with layout design. 2.3 Prepare decorative veneers for joining and bonding to panel product. 2.4 Check completed veneers for conformity to work order and repair any imperfections. 2.5 Mark completed veneers for designated joining sequence in line with layout design. 2.6 Reject and dispose of sub-standard decorative veneers in line with site procedures and environmental requirements.
3. Regrade and redistribute veneer, clean up and maintain records.	3.1 Assess joins and regrade veneer in line with site requirements and industry standards. 3.2 Direct and move material to storage or processing operations in line with site requirements. 3.3 Reject and dispose of sub-standard material in line with site requirements. 3.4 Clean work area in line with safe work procedure and site requirements. 3.5 Record and report decorative veneer process and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• use measuring equipment • lay out design in patterns that best accentuate the decorative veneer.

© Commonwealth of Australia, 2025 Skills Insight

Reading skills to:	• interpret work orders.
Writing skills to:	• record pre-start check information • set parameters for veneer production process.
Problem solving skills to:	• control risk throughout the veneer production process • maintain production flow by responding appropriately to production faults.

Range of Conditions

Assessment Requirements for FWPWPP3230 Produce decorative veneers

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3230B Produce decorative veneers, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- set up the work area in preparation for producing decorative veneers
- produce decorative veneers in line with safe work procedure and while controlling risk in the work area
- visually inspect veneers for defects and characteristics to determine grading status
- regrade, label and redistribute veneers on-site using designated equipment
- clean equipment according to safe work procedure (includes performing lock-out procedure)
- dispose of production and cleaning waste according to site procedures and environment requirements
- record production, quality and fault information using workplace record keeping procedure.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- site standards, industry standards, workplace requirements, policies and safe work procedures relevant to the production of decorative veneers
- emergency response procedures (fire, accident and serious equipment malfunction) relevant to own role and responsibility

© Commonwealth of Australia, 2025 Skills Insight

- environmental management requirements, including guidelines for waste minimisation, recycling, re-use and the safe disposal of waste material from production and cleaning
- hazards and risks associated with the production of decorative veneers and appropriate risk controls as referred to the in the range of conditions
- procedures for visually assessing and selecting decorative veneer based on the following characteristics: species, colour, type, width, length, thickness and defects (warp, wane, cupping, shakes, insect defects, knots, resin pockets)
- types of decorative veneers: growth ring, ray, ribbon, wavy, curly, fiddle-back, crotch, swirl, birds eye, burl, burr, butt or stump
- types of production techniques: book matching, end matching, four piece butt matching, diamond matching, herring-bone matching, segmental matching, slip drawn matching
- types of panel products including medium density fibreboard, chipboard, fibreboard, plywood.
- veneer matching and joining techniques
- product distribution procedures
- workplace specific storage systems and product grading and labelling procedures
- established communication channels and protocols
- procedures for monitoring production and identifying and resolving problems during the decorative veneer production process, to maintain production flow
- procedures for the safe operation and cleaning of equipment
- procedures for recording and reporting production, quality and fault information (manual or computer-based).

Assessment Conditions

The following resources must be made available:

- work order
- safe work procedure for producing decorative veneers
- personal protective equipment required to produce decorative veneers
- first aid equipment
- decorative veneers
- production equipment
- conveyor belt system, track system
- lifting equipment
- relevant personnel for the purposes of communicating information
- site records for recording production, quality and equipment faults.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and

© Commonwealth of Australia, 2025 Skills Insight

- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3231 Produce veneer from prepared flitches

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3231B Produce veneers from prepared flitches, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate a vertical or horizontal slicing machine to produce leaves of timber veneers from prepared flitches. The unit includes operator maintenance.

The unit applies to production officers and technicians who produce veneers from prepared flitches in a forest and wood products factory setting.

Licensing, legislative, regulatory or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare to slice veneers.	1.1 Review work order and check with appropriate personnel. 1.2 Identify and follow safe work procedure for producing veneers from prepared flitches. 1.3 Identify hazards and control risk in the work area.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Acquire type and quantity of timber species to be sliced from storage location. 1.5 Select equipment and conduct pre-start check in line with manufacturer's recommendations and site requirements. 1.6 Plan veneer slicing process and thickness in line with site procedures. 1.7 Establish and maintain communication with relevant personnel as required, to ensure safety and production requirements are met.
2. Load flitches, slice veneers and dispose of waste.	2.1 Check size and condition of prepared flitches and load acceptable flitches into slicer. 2.2 Position flitches to maximise available veneer and remove waste product. 2.3 Set and operate veneer slicing process to optimise veneer recovery in line with site procedures. 2.4 Constantly adjust machine speed and control of veneer cut to suit flitch characteristics in line with site procedures. 2.5 Dispose of defective material and rejected flitch and backing-board in line with site procedures and environmental requirements.
3. Maintain equipment, clean up and follow record keeping procedure.	3.1 Lock out equipment according to standard operating procedure. 3.2 Check cutting blades for blunt or damaged condition in line with manufacturer’s recommendations and site procedures, and remove and replace as required. 3.3 Clear dust, off-cuts and debris from machine area and dispose of in line with in line with safe work procedure and environmental requirements. 3.4 Record and report processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• monitor and adjust machine speed to suit production requirements • calculate slicing rates according to flitch characteristics and

© Commonwealth of Australia, 2025 Skills Insight

	required veneer thickness • use numerical data to interpret work order and set equipment parameters.
Reading skills to:	• monitor control panels.
Writing skills to:	• record production, quality and faults information.
Problem solving skills to:	• identify and resolve routine problems during the production process, to maintain production flow.

Assessment Requirements for FWPWPP3231 Produce veneer from prepared flitches

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3231B Produce veneers from prepared flitches, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- slice timber veneers from prepared flitches in line with work order and safe work procedure, using a slicing machine
- identify hazards and control risk to self, others and plant throughout the veneer production process
- visually inspect prepared flitches to determine suitability for loading into slicer
- identify defective materials throughout the production process and dispose of appropriately
- perform lock-out, blade inspection, replacement and cleaning procedure on slicer
- record and report production, quality and fault information using workplace record keeping procedure and systems.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- site standards, industry standards, workplace requirements, policies and safe work procedures relevant to producing veneers from prepared flitches
- emergency response procedures (fire, accident and serious equipment malfunction) relevant to own role and responsibility

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection requirements, including guidelines for waste minimisation, recycling, re-use and the safe disposal of waste material created by production and cleaning
- hazards and risks associated with production of veneers from prepared flitches and appropriate risk controls as referred to the in the range of conditions
- veneer types: quarter sawn, back sawn, radial (or rotary) sawn
- characteristics of timber veneers: type, width, length, thickness
- characteristics of flitch and timber defects: warp, wane, cupping, shakes, insect defects, knots, resin pockets
- slicing processes using vertical or horizontal slicing equipment
- established communication channels and protocols for communicating with relevant personnel as part of the production process
- problem identification and resolution strategies and common fault finding techniques
- procedures for the safe operation of slicing machine and visual inspection, removal and replacement of cutting blades
- procedures for the lock-out and cleaning of equipment
- procedures for recording and reporting production, quality, maintenance and faults information (manual or computer-based).

Assessment Conditions

The following resources must be made available:

- work order
- safe work procedure for producing veneer from prepared flitches
- personal protective equipment required to produce veneer from prepared flitches
- first aid equipment
- vertical or horizontal slicing machine
- prepared flitches
- relevant personnel for the purposes of communicating information
- manual or computer-based information recording systems for recording production, quality and fault information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3232 Operate a heat roll bonding machine to laminate or veneer engineered wood panel surfaces

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to operate heat roll bonding machines and ancillary equipment to apply laminate or veneer to engineered wood panel surfaces in a manufacturing facility.

The unit applies to individuals who work as production operators and technicians in an engineered wood panel facility. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

	health and safety procedures 3.5 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret safety data sheets for glue
Numeracy	• Identify quantities of required material within work orders, and count numbers of engineered wood panels and other materials • Read basic numerical machine settings to set temperatures and glue feed rate
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Assessment Requirements for FWPWPP3232 Operate a heat roll bonding machine to laminate or veneer engineered wood panel surfaces

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for laminating engineered wood panels
- laminated one or more of the following engineered wood panels according to individual work orders prescribing different laminating thicknesses and quantities of panels:
  - medium density fibreboard
  - chipboard
  - fibreboard
  - plywood
- applied one or more of the following types of laminating material:
  - laminate
  - veneer
- stripped and cleaned the heat roll bonding machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to using heat roll bonding machines and ancillary equipment for laminating engineered wood panels, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to laminating engineered wood panel surfaces:
  - health and safety, with particular emphasis on equipment lockout, emergency procedures, use of personal protective equipment (PPE) and handling hazardous substances according to safety data sheets for glue

© Commonwealth of Australia, 2025 Skills Insight

  - use of laminating equipment
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for engineered wood panel facilities:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing boards
  - disposing of hazardous substances
- typical flow of material supply in and out of the engineered wood panel laminating area
- properties, at a basic level of understanding, of laminating materials and their uses for different types of engineered wood panels:
  - laminate
  - veneer
- characteristics of engineered wood products types and the effects of lamination:
  - medium density fibreboard
  - chipboard
  - fibreboard
  - plywood
- typical workflow processes and techniques used to laminate and veneer engineered wood panels:
  - applying laminating material and veneer
  - spreading glue
  - heat rolling material to boards
- purpose, features and operation of equipment used to laminate or veneer engineered wood panel surfaces:
  - laminate bonding machines
  - glue spreading stations
  - heat rollers
- methods used to strip and clean laminate and veneer bonding machines.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or a productive environment that accurately reflects performance in a workplace
- resources, equipment and materials:
  - heat roll bonding machine and ancillary equipment for laminating engineered wood panels
  - maintenance tools and equipment

© Commonwealth of Australia, 2025 Skills Insight

  - PPE suitable for laminating and veneering engineered wood panel surfaces
  - engineered wood panels suitable for lamination operations
  - laminating material
  - glue
- specifications:
  - manufacturer instructions for use and cleaning of equipment
  - work order with specific instructions for laminating and veneering engineered wood panel surfaces
  - template documents for recording production outcomes, equipment faults and maintenance requirements
  - workplace procedures for laminating and veneering engineered wood panel surfaces, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPWPP3233 Operate a laminating press for engineered wood panels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to operate laminating presses and ancillary equipment to laminate engineered wood panels in a manufacturing facility.

The unit applies to individuals who work as production operators and technicians. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPWPP3234 Operate a continuous press for the production of engineered wood panels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for forming and pressing engineered wood panels
- operated blending and continuous press equipment to bond and produce engineered wood panel according to production requirements
- identified defective engineered wood panels using visual assessment and by testing sample panels
- disposed of defective engineered wood panels
- redistributed finished engineered wood panels onsite using designated equipment
- performed lockout procedure and cleaned press equipment according to workplace health and safety procedure
- recorded and reported forming and pressing process information (production, quality, faults) using workplace specific recording and reporting channels and protocols (manual or computer-based log, communication with relevant personnel).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and operational safety hazards or risks related to forming and pressing engineered wood panels, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to forming and pressing engineered wood panels:
  - health and safety, with particular emphasis on equipment lockout, emergency procedures, use of personal protective equipment (PPE) and handling hazardous substances
  - use and maintenance of forming and pressing equipment

© Commonwealth of Australia, 2025 Skills Insight

  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
- environmental protection practices for forming and pressing engineered wood panels:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - identifying and disposing of engineered wood panels and waste materials
- engineered wood panel defects: surface blemishes, discolouration, natural timber defects, deformities and clean scalping from 'pendistors'
- ingredients and blending methods used in the engineered wood panels pressing process
- chip, flake and fibre characteristics
- procedures for testing engineered wood panel samples to check conformance with industry standard
- adjustment of feed rates to meet production requirements
- common pressed engineered wood panel types: medium density fibreboard, chipboard, fibreboard.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE required for operating a continuous press
  - continuous press with continuous forming line
  - forming equipment
  - chips, flakes or fibre, binding ingredients and hardening agents suitable for the production of engineered wood panels
  - transfer equipment
  - manual or computer-based log to record production, quality and fault information
- specifications:
  - work order
  - pre-start checklist
  - template documents for recording production outcomes, equipment faults and maintenance requirements
  - workplace procedures for forming and pressing engineered wood panels, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPWPP3235 Trim new engineered wood panels to size

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to trim new engineered wood panels to size with automated trimming saws as they progress along the production line.

The unit applies individuals who work as production operators and technicians in an engineered wood panel facility. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPWPP3235 Trim new engineered wood panels to size

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for trimming new engineered wood products
- produced one or more of the following types of trimmed engineered wood panels according to individual work orders prescribing different lengths and tolerances and number of panels:
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard
  - plywood
  - continuous ply
- completed cutting patterns and sequences for single straight cuts and angles requiring one cutting pass set for multiple cuts of the same size
- stacked batches of cut panels in storage location according to a common length
- completed operator maintenance on the automated trimming saw used.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to trimming engineered wood panels with automated trimming saws, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to trimming new engineered wood panels to size:

© Commonwealth of Australia, 2025 Skills Insight

  - health and safety, with particular emphasis on equipment lockout, emergency procedures and use of personal protective equipment (PPE)
  - use of automated trimming saw
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for engineered wood panel facilities:
  - reducing water and energy use
  - cleaning of plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- typical engineered wood panel defects and how they affect the ability to produce quality trimmed panels:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- cutting patterns and sequences for single straight cuts and angles requiring one cutting pass
- range of industry standard lengths, cross-sections and tolerances and applicable terminology
- typical flow of material supply in and out of the trimming area
- storage layout and categories for stacking finished engineered wood panels
- purpose, features and operation of equipment used to trim new engineered wood panels to size:
  - automated trimming saws
  - conveyor belt systems
- methods for assessing saw blade condition and completing and basic non-specialist repair and maintenance for saws.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - automated trimming saws
  - maintenance tools and equipment for saws
  - consumable saw blades

© Commonwealth of Australia, 2025 Skills Insight

- PPE suitable for trimming engineered wood panels to size
- engineered wood panels suitable for trimming operations

FWPWPP4202 Perform laboratory testing

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP4202B Perform laboratory testing, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to test blends, glues, additives, materials, products and any other entities produced by the enterprise, to ascertain causes of a problem or to improve techniques.

The unit applies to those performing laboratory testing in a forest and wood products factory setting.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Timber Truss and Frame Design and Manufacture

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for testing.	1.1 Review work order and check with appropriate personnel. 1.2 Identify, clarify and follow safe work procedures for performing

© Commonwealth of Australia, 2025 Skills Insight

	laboratory testing. 1.3 Identify hazards and control risk in the work environment relevant to own role and responsibility. 1.4 Obtain type and quantity of items for testing. 1.5 Select and calibrate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.6 Plan testing process in line with site procedures.
2. Test samples.	2.1 Interpret and analyse problem or improvement requirement. 2.2 Prepare samples and identify manufacturing dates, times and batches from production records. 2.3 Establish, review and interpret test data. 2.4 Conduct test in line with industry standards. 2.5 Check results by further sampling and testing.
3. Evaluate and report test outcomes.	3.1 Evaluate test results for implications and impacts on production process. 3.2 Take action to rectify or improve upon test results achieved. 3.3 Communicate test results to production personnel to facilitate process control or changes. 3.4 Provide results to external authorities in line with registration systems. 3.5 Record and report testing process and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numerical data • use measuring instruments • estimate quantities when choosing samples for testing.
Reading skills to:	• follow written instructions.
Writing skills to:	• write reports of test results.

Assessment Requirements for FWPWPP4202 Perform laboratory testing

Modification History

Release	Comment
1	Replaces equivalent unit FWPWPP4202B Perform laboratory testing, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and efficiently perform laboratory testing in line with work order and safe work procedure
- follow relevant legislative and regulatory requirements, codes of practice and workplace policies and procedures relevant to performing laboratory testing
- control risk to self, others and equipment
- set up and calibrate testing equipment
- evaluate impact of test outcomes on production outcomes
- record and report test results following workplace specific record keeping procedure.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- legislation, regulations, standards, codes of practice, site standards, policies and safe work procedures relevant to performing laboratory testing
- hazards and risks involved with performing laboratory testing, and how to control them
- environmental protection requirements, including the safe disposal of waste material
- safety data sheets relevant to ingredients and additives used in the laboratory testing process
- workplace specific sampling and testing techniques
- laboratory testing conditions and facilities

© Commonwealth of Australia, 2025 Skills Insight

- storage systems and labelling conventions relevant to items used in the laboratory testing process
- established communication channels and protocols for communicating with relevant personnel
- procedures for use and maintenance of laboratory testing equipment
- emergency procedures (fire, accident, serious equipment fault) relevant to own role and responsibility
- recording and reporting requirements and procedures including protocols for reporting results to external agencies (environmental agencies, local authorities or government bodies).

Assessment Conditions

The following resources must be made available:

- work order
- personal protective equipment
- safe work procedures
- safety data sheets (if relevant)
- first aid equipment
- laboratory testing equipment
- gauges
- hand tools used for laboratory testing
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- workplace specific samples to be used in the laboratory testing process.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP4203 Plan and coordinate engineered wood panel production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0

Application

This unit of competency describes the skills and knowledge required to plan, coordinate and monitor production of engineered wood panels.

The unit applies to individuals who work as production supervisors in an engineered wood panel manufacturing facility. They generally demonstrate autonomy, judgement and limited responsibility in known or changing contexts and within established parameters.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Timber Manufactured Products

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan engineered wood	1.1 Review engineered wood panel production schedule, workplace

panel production	health and safety requirements, environmental protection practices and emergency procedures, and confirm requirements with relevant personnel 1.2 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislation to maintain safe work practices 1.3 Inspect engineered wood panel characteristics and record and report variations to operators 1.4 Plan, schedule and communicate engineered wood panel type, sizes and production methods to operators 1.5 Maintain communication with operators as required, to ensure health and safety and production requirements are met
2. Monitor engineered wood panel production outcomes and record information	2.1 Monitor engineered wood panel production for effective forming, laminating or veneering outcomes and panel condition 2.2 Assist operators to evaluate engineered wood panels, identify faults and rectify production problems 2.3 Develop processes for rejecting and disposing of sub-standard engineered wood panels produced according to site procedures and environmental requirements 2.4 Monitor engineered wood panel production and output management and record possible process improvements
3. Coordinate engineered wood panel production and record information	3.1 Modify production methods or schedules as required, to ensure optimum performance 3.2 Communicate to operators and record production improvement modifications according to site procedures 3.3 Direct produced engineered wood panels to storage or transfer for further processing 3.4 Record and report engineered wood panel production data, output data, quality data and equipment faults according to record keeping procedure and site requirements

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	• Complete operating logs and cutting records
Numeracy	• Interpret numerical data displayed on screens
Navigate the world of work	• Source, collect and organise data to inform product assembly schedules and process improvement
Interact with others	• Take responsibility for coordinating a team of operators for effective assembly operations
Get the work done	• Take responsibility for planning and organising own workload • Identify and rectify faults during the engineered wood panel production process • Consider how to schedule different production jobs

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
FWPWPP4203 Plan and coordinate engineered wood panel production	FWPWPP4201 Plan and coordinate panel production	Updated industry terminology, workplace health and safety requirements and foundation skills; clarified intent of the unit and assessment requirements; changed unit title and code for compliance and consistency with the updates. Assessment Requirements for FWPWPP4203 Plan and coordinate engineered wood panel production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned and coordinated engineered wood panel production according to workplace health and safety requirements and environmental procedures
- monitored engineered wood panel production outcomes and identified and rectified production and equipment problems and faults
- recorded and reported production information including output, quality and faults
- modified production methods and schedules for engineered wood panel production
- communicated effectively and coordinated personnel to follow the planning, communications and scheduling required for the engineered wood panel production.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety procedures, including personal protective equipment (PPE), site procedures, policies and site standards relevant to planning and coordinating engineered wood panel production
- environmental protection requirements, including the safe disposal of waste material
- hazards and risks associated with the engineered wood panel production process, and risk control strategies as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- types of engineered wood panels, including laminated, veneered, plywood, chipboard, fibreboard, medium density fibreboard; and characteristics, including panel type, size, surface treatment, thickness and grade
- engineered wood panel production methods, including:
  - mat-forming
  - daylight press process

© Commonwealth of Australia, 2025 Skills Insight

  - board laminating
  - pressing laminated ply
  - applying laminates or veneers
- establishing communication channels and protocols used to communicate with relevant operators
- problem identification and resolution strategies and common fault-finding techniques
- procedures for recording and reporting production, quality and fault information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - computers, keyboards, printers and software used to prepare planning and production documents
  - PPE required for planning and coordinating engineered wood panel production
- specifications:
  - engineered wood panel production schedule
  - process improvement reports
  - record for equipment faults
  - workplace health and safety and emergency procedure for engineered wood panel production
  - environmental protection procedures
  - manual or computer-based information recording systems for recording production, quality and fault information
- relationships:
  - relevant personnel for the purposes of communicating information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

HLTAID003 Provide first aid

Modification History

Release	Comments
Release 6	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and manage immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer’s instructions 2.7 Monitor the casualty’s condition and respond in accordance with first aid principles
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Evaluate the incident and own performance	4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents 4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAID003 Provide first aid

Modification History

Release	Comments
Release 6	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Skills Insight

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

© Commonwealth of Australia, 2025 Skills Insight

  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

© Commonwealth of Australia, 2025 Skills Insight

  - unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID005 Provide first aid in remote situations

Modification History

Release	Comments
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment, including use of contextualised remote scenarios.

Application

This unit describes the skills and knowledge required to provide first aid response and emergency life support to a casualty in a remote and/or isolated situation.

The unit applies to workers who may be required to prepare for and provide a first aid response in locations beyond the reach of timely medical assistance.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to a remote emergency situation	1.1 Plan for isolated travel or work if required, accounting for expected contingencies
	1.2 Recognise an emergency situation
	1.3 Identify, assess and manage immediate hazards to health and safety of self and others
	1.4 Assess the casualty and recognise the need for first aid response
	1.5 Assess the situation and evaluate options for medical assistance
	1.6 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, risks, transport availability and casualty condition
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
	2.2 Provide first aid in accordance with established first aid principles
	2.3 Display respectful behaviour towards casualty
	2.4 Obtain consent from casualty where possible
	2.5 Use available resources and equipment to make the casualty as comfortable as possible
	2.6 Operate first aid equipment according to manufacturer’s instructions
	2.7 Monitor the casualty’s condition and respond in accordance with first aid principles
3. Manage the incident	3.1 Seek assistance from others present to manage incident circumstances
	3.2 Establish communication links with emergency response services and convey incident details
	3.3 Report details of casualty condition, changes in

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	condition, management and responses
	3.4 Assist in the evacuation of the casualty by following directions given by emergency response services as required
	3.5 Maintain confidentiality of records and information in line with statutory and/or organisational policies
4. Evaluate the incident and own performance	4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents
	4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of embedded content from HLTFA412A Apply First Aid. New evidence requirements for assessment. Removal of pre-requisite unit.

Application

This unit describes the skills and knowledge required to provide an advanced first aid response, including management of the incident and other first aiders, until the arrival of medical or other assistance.

The unit applies to workers who may be required to provide, coordinate and manage a first aid response across a range of complex situations, including community and workplace settings.

© Commonwealth of Australia, 2025 Skills Insight

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and manage immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services 1.5 Deploy resources to appropriate locations as required in line with workplace procedures
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer’s instructions 2.7 Monitor the casualty’s condition and respond in accordance with first aid principles

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Skills Insight

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - performed at least 2 minutes of Bag-valve-mask ventilation and at least 2 minutes of compression during a two rescuer procedure on an adult resuscitation manikin placed on the floor
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed the prompts of a Automated External Defibrillator (AED)
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - conducted a visual and verbal secondary survey assessment of the casualty
  - assessed vital signs (respirations, pulse and temperature)
  - communicated effectively with a first aid team providing direction and coordination of other first aiders
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - conducted a basic triage for multiple casualty incident
  - envenomation (using pressure immobilisation)
  - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation principles)
  - head, neck and spinal injuries (using immobilisation principles)
  - respiratory distress - including asthma
  - seizures - including epilepsy
  - shock
- located and interpreted workplace policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR and first aid
  - guidelines of Australian national peak clinical bodies
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - capabilities of emergency management services
  - consent
  - duty of care requirements
  - importance of debriefing
  - own skills and limitations
  - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
  - privacy and confidentiality requirements
  - respectful behaviour towards a casualty
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - assessment and interpretation of vital signs, including respirations, temperature and pulse
  - chain of survival
  - how to conduct a visual and verbal secondary survey assessment of casualty
  - priorities of management in first aid when dealing with life-threatening conditions
  - procedures for dealing with casualties who are aged or infirmed
  - procedures for dealing with major and minor accidents in the workplace
  - procedures when providing first aid to children
  - standard precautions
- principles and procedures for first aid management of the following scenarios, including complications:
  - abdominal injuries
  - allergic reaction

© Commonwealth of Australia, 2025 Skills Insight

  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns, including thermal, chemical, friction and electrical
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - drowning
  - emergency childbirth
  - envenomation
  - environmental impact including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - febrile convulsions
  - head, neck and spinal injuries
  - levels of consciousness
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - skin injuries
  - soft tissue musculoskeletal, including injuries including sprains, strains, dislocations and fractures
  - stroke
  - substance misuse, including common drugs and alcohol, including illicit drugs
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest, skeleton, joints and muscles
  - response/level of consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

© Commonwealth of Australia, 2025 Skills Insight

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device.
- bag-valve-mask
- eye patch
- placebo bronchodilator and spacer device
- roller bandages
- thermometer
- triangular bandages
- workplace first Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID008 Manage first aid services and resources

Modification History

Release	Comments
Release 3	Updated mapping information.
Release 2	Updated mapping information.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of all embedded material from HLTFA404C and HLTFA412A. New evidence requirements for assessment. Removal of prerequisite unit

Application

This unit describes the skills and knowledge required to establish, maintain and facilitate the provision of appropriate first aid in the workplace.

The unit applies to workers in nominated occupational first aid or management roles.

Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Determine workplace first aid requirements	1.1 Identify workplace hazards and assess associated risks as a basis for determining first aid resource requirements 1.2 Identify first aid equipment, resources and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	personnel required to address workplace requirements
	1.3 Develop first aid action plans in consultation with relevant parties
	1.4 Provide information to encourage risk minimisation and enable access to first aid facilities
2. Establish and maintain workplace first aid facilities	2.1 Monitor and maintain availability of first aid equipment, resources and personnel to support workplace first aid response
	2.2 Conduct regular inspections of stock and equipment to ensure currency and operational readiness in line with workplace requirements
	2.3 Ensure equipment is recovered and reprocessed and that waste is disposed of safely according to legislative and workplace procedures
	2.4 Ensure equipment and resources are stored and maintained in line with relevant legislation and manufacturer's/supplier's instructions
	2.5 Deploy appropriate equipment, resources and personnel to ensure timely and effective first aid response in line with workplace requirements
3. Maintain workplace first aid records	3.1 Ensure documentation is completed as required according to legislation and workplace procedures
	3.2 Maintain first aid records in line with legislative requirements and workplace security practices
	3.3 Send relevant documents to appropriate bodies in line with workplace and legislative requirements
	3.4 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisational policies
4. Review the provision of first aid in the workplace	4.1 Participate in debriefing/evaluation to improve future operations and address individual needs

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	4.2 Evaluate management of workplace first aid incidents in relation to required resources, personnel, current organisational procedures and individual first aid action plans
	4.3 Contribute to the review of workplace policies and procedures in accordance with risk assessment and evaluation of first aid provision

Foundation Skills

The Foundation Skills described those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit

Assessment Requirements for HLTAID008 Manage first aid services and resources

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of all embedded material from HLTFA404C and HLTFA412A. New evidence requirements for assessment. Removal of prerequisite unit

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks at least once in line with State/Territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- conducted a workplace risk assessment
- developed a first aid response plan including strategies for management of incidents
- used a first aid checklist to service a workplace first aid kit for supplies' replacement and equipment maintenance
- maintained first aid equipment and resources according to manufacturer's instructions
- used and maintained documentation required by the workplace and regulatory authorities.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory regulations, first aid codes of practice and workplace procedures including:
  - workplace requirements for first aid provision in line with the relevant state/territory Work Health and Safety requirements

© Commonwealth of Australia, 2025 Skills Insight

  - duty of care in relation to first aid provision
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions based on incident
  - requirements for currency of skill and knowledge
- legal, workplace or community issues relating to the provision of CPR including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - consent
  - capabilities of emergency management services
  - privacy and confidentiality requirements
  - importance of debriefing.

Assessment Conditions

Skills must be demonstrated:

- in a workplace environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- first aid equipment such as:
- first aid kit and contents checklist
- an incident report form
- relevant state/territory Work Health and Safety First Aid Code of Practice.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment, including workplace resources required by the relevant state/territory Work Health and Safety Regulatory Authority.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid equipment according to manufacturers' instructions. 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

© Commonwealth of Australia, 2025 Skills Insight

3. Communicate details of the incident.	3.1. Accurately convey incident details to emergency services. 3.2. Report details of incident in line with appropriate workplace or site procedures. 3.3. Complete applicable workplace or site documentation, including incident report form. 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.	4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed
  - shock

© Commonwealth of Australia, 2025 Skills Insight

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally

© Commonwealth of Australia, 2025 Skills Insight

  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening and life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

© Commonwealth of Australia, 2025 Skills Insight

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

ICTICT308 Use advanced features of computer applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use computer applications employing advanced features. It involves manipulating data and accessing support resources to solve routine problems.

It applies to individuals who have achieved a degree of autonomy as advanced information and communications technology (ICT) users, and support information technology activities in software applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Manipulate data	1.1 Employ advanced features of applications in the preparation and presentation of data 1.2 Transfer data between applications, linking and embedding related data files as required 1.3 Create and employ objects, macros and templates for routine activities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Use shortcuts and features to increase personal productivity
2. Access and use support resources	2.1 Solve routine problems using support resources 2.2 Use online help to overcome difficulties with applications 2.3 Solve problems with manuals and training booklets 2.4 Access and apply technical support for system problems, using troubleshooting results and alert messages

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1-2.4	• Identifies and interprets a variety of hard copy, online and software generated technical information containing software specific language, syntax and code to apply features and functions of applications to their fullest extent and to solve problems
Oral Communication	2.1, 2.4	• Discusses and resolves problems using technical terms and language, and effective listening and questioning techniques
Get the work done	1.1-1.4, 2.1-2.4	• Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology

Assessment Requirements for ICTICT308 Use advanced features of computer applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use at least three computer applications employing advanced features and import and export capacities for efficiency and productivity purposes
- solve routine problems using support resources.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the basic features and functions of relevant operating systems software and system tools
- outline relevant vendor product directions in computer applications
- identify commonly available vendor applications and their features.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a site where advanced features of computer applications may be used
- computer applications currently used in industry
- documents or information containing data suitable to demonstrate advanced features of computer applications
- support resources, including online, manuals and training booklets.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSUS804 Use ICT to improve sustainability outcomes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use ICT tools and technologies to improve sustainability outcomes for a range of industries through monitoring and reporting on greenhouse gas emissions.

It applies to individuals with a high level of autonomy who are excellent communicators with telecommunications and systems skills and management abilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Design and manage a sustainability audit	1.1 Use audit tool that reflects criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirements 1.2 Define scope, objectives and benchmarks for audit in consultation with relevant stakeholders 1.3 Document requirements for audit resources, timing, schedule and responsibilities consistent with industry best practice and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	relevant standards 1.4 Ensure collection strategies are objective and systematic, and that information and data is valid and reliable 1.5 Report outcomes clearly and concisely, including benefits to be achieved by adoption of audit recommendations
2. Monitor energy consumption and emissions	2.1 Analyse requirements of National Greenhouse and Energy Reporting System (NGERS) and other relevant legislation and industry standards in relation to a range of industries and needs of specific organisations 2.2 Identify links with functional areas and environmental management systems to ensure comprehensive information and data collection 2.3 Determine hardware and software required for collecting, collating, analysing and reporting emissions-related information and data 2.4 Factor requirement for an external audit into the monitoring proposal 2.5 Critically evaluate energy consumption and emissions data 2.6 Develop improvement strategies based on review of data 2.7 Use industry best practice as quality benchmark
3. Develop ICT solutions to improve sustainability outcomes	3.1 Research and analyse mitigation and adaptation strategies appropriate for a range of industries 3.2 Benchmark and document performance expectations in consultation with relevant stakeholders 3.3 Develop and document technical specifications including hardware, software, networking, interface and security and hazard management requirements 3.4 Determine timelines, resources and costs for implementation and ongoing monitoring and maintenance 3.5 Analyse impact of ICT solution in relation to performance benchmarks 3.6 Analyse opportunities and develop recommendations to improve sustainability of enterprise products, services and processes 3.7 Present report for client sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 2.5-2.7, 3.3	• Identifies, analyses and evaluates complex textual information to inform sustainability solutions
Writing	1.2, 1.3, 1.5, 2.4, 2.6, 3.2, 3.3, 3.6, 3.7	• Produces detailed reports and related documentation and develops recommendations using precise language and specialised terminology to convey understanding of outcomes
Oral Communication	1.2, 1.5, 3.2, 3.7	• Articulates clearly using specific language suitable to client and stakeholder audiences to convey requirements, and uses listening and questioning techniques to confirm understanding
Numeracy	1.1, 2.5, 3.4	• Uses mathematical formulae to plan budgetary requirements and evaluate timelines for solution implementation and ongoing monitoring requirements • Interprets complex energy consumption and emissions data to identify workplace improvements
Navigate the world of work	1.1, 1.3, 2.1	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Get the work done	1.1-1.4, 2.2, 2.3	• Develops flexible plans for complex, high impact activities with strategic implications involving diverse stakeholders with potentially competing demands • Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with those of the work group • Systematically gathers and analyses all relevant information and evaluates options to make high-impact and informed decisions • Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and reduce risks

Assessment Requirements for ICTSUS804 Use ICT to improve sustainability outcomes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- audit and critically analyse patterns of energy use
- develop monitoring and reporting systems that comply with regulatory requirements
- develop a workable implementation strategy
- formulate solutions to improve sustainability outcomes
- develop benchmarks for reviewing and improving performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain auditing sustainability processes and practices
- discuss corporate social responsibility
- describe development processes and practices
- clarify hazard identification and control
- explain industry standards
- discuss the legislative framework underpinning sustainability
- summarise principles, practices and available tools and techniques of sustainability management relevant to a range of industries
- outline relevant international business and organisational standards
- discuss sustainability from a local, national and international perspective
- summarise sustainability including ecological, economic and social issues
- discuss technical performance measurements.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Sustainability industry and include access to:

- relevant reports, legislation, regulations and standards
- suitable hardware, software, resources and equipment
- internet connection with suitable bandwidth
- relevant documentation including manufacturers' technical specifications.

Assessors must satisfy NVR/AQTF assessor requirements.

LGACOM401A Administer contracts

Modification History

LGACOM401A Release 2: Layout adjusted.

LGACOM401A Release 1: Primary release.

Unit Descriptor

This unit covers the administration, monitoring and transition of contracts.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish administration procedures	1.1 Administrative processes for contracts are implemented according to council quality improvement 1.2 Contract requirements are confirmed with relevant contract personnel. 1.3 Complaint system is established according to council policy and procedures. 1.4 Consistent and accurate records of contract progress are maintained.
2 Monitor contract time frame and specifications	2.1 Regular inspections of contract services are undertaken to ensure compliance with specifications and program for completion. 2.2 Regular planned progress meetings are held and documented between all contract personnel to ensure problems are identified and resolved early. 2.3 Variations between the specified scope of services and the contract are identified and documented, and relevant personnel are notified without delay. 2.4 Testing of services in progress is carried out as required by the contract and in accordance with legislation, regulations and council policy.
3 Monitor costs	3.1 Contract costs are monitored on a regular basis to ensure that the service is carried out in accordance with financial and contractual requirements. 3.2 Payments for contract services are authorised in accordance with the conditions of contract and delegation of officer. 3.3 Transaction costs are monitored through an established system.
4 Resolve contractual disputes	4.1 Disagreements are investigated to identify cause and validity. 4.2 Terms of resolution are negotiated and agreed. 4.3 Contract provisions for dispute resolution are followed. 4.4 Legal and management advice is sought at an early stage of any dispute to ensure that the contractor has a clear understanding of the council's legal position and that the council is not exposed to undue legal risk. 4.5 Appropriate legal advice is sought at any stage in order to clarify any technical aspects of a dispute.
5 Implement contract transition	5.1 Contract conditions and responsibilities are reviewed with relevant personnel to ensure satisfactory completion of contract.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	5.2 Contract completion is authorised in writing to confirm completed services have been undertaken according to contract objectives and specifications.
	5.3 Final statement is reconciled.
	5.4 Contractor performance and level of service are evaluated against agreed benchmark.
	5.5 End-of-service or renewed contracts are coordinated to meet council requirements.
	5.6 Quality of contract documentation is assessed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- negotiation and liaison across a range of internal and external customers
- contingency management
- contract interpretation
- project management
- conflict resolution
- client interaction
- financial and time management

Required Knowledge

- relevant legislation, regulations, codes of practice and policies applicable to the industry and the council, including those relating to environmental/sustainable practice and OHS
- relevant systems and procedures to aid in the achievement of sustainable practice
- contract procedures
- contract law
- knowledge of the contract service
- performance standards and analysis
- complaint procedures
- costing processes

Evidence Guide

Overview of assessment A person who demonstrates competency in this unit will be

requirements	able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	• Maintenance of files relating to records of meetings, payments, progress reports, file notes and discussions. • Effective communication with the contractor. • Monitoring of industry changes. • Making recommendations covering a range of contracts. • Maintenance of WorkCover, OHS and audit processes and up-to-date insurance files. • Monitoring relevant laws, by laws and regulations or best practice on environmental performance and sustainability
Context of assessment	On the job or in a simulated work environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to a workplace or simulated case study that provides such resources as: • a range of council contract documentation and records • relevant commercial law texts on contracts • relevant council policies and procedures documents.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different

work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Administrative processes for contracts may include:	• supervision • management • monitoring • overseeing
Records of contract progress may include:	• photographs • data • progress reports • customer surveys • minutes of meetings
Services may include:	• product • maintenance • supply • cleaning • waste • research • environmental initiatives • civil • child care • other council services
Testing may include:	• samples • routine checks • audits • observations • meetings • laboratory
Payments may include:	• progressive • lump sum
Conditions of contract may include:	• tender documentation • maintenance plan • compliance with sustainable practice guidelines • defects liability
Contractor performance is evaluated in terms of:	• adherence to timelines and estimated costs • progress towards objectives • adherence to quality standards, environmental and sustainability standards and OHS and EEO practices

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the extent and nature of services to be contracted	1.1. Scope of the ***services*** is confirmed and reviewed to ensure ***parameters*** meet current requirements. 1.2. Statutory and council requirements are identified to determine available options. 1.3. Detailed parameters are specified to enable a complete brief to be prepared. 1.4. The extent of the contract package is determined.
2. Select appropriate method for tender	2.1. Area to be contracted is examined. 2.2. Contract options are identified and analysed. 2.3. Benefits, costs and opportunities of each option are identified. 2.4. Appropriate contract option is selected.
3. Prepare tender specifications according to council and Australian standards	3.1. Complete and detailed service specifications are prepared consistent with council policy and Australian standards and based on service profile and review. 3.2. ***Legislative***, environmental, sustainability practices, occupational health and safety and risk management requirements are applied. 3.3. Quality assurance methods are applied to the preparation of service specifications. 3.4. Service specifications are prepared in consultation with relevant staff that complement required outcomes. 3.5. Details on methods, standards, materials, products, contractors and performance period are provided by quality service specifications, as applicable.
4. Prepare evaluation criteria	4.1. A tender review panel or team is selected from appropriate personnel. 4.2. Criteria are established based on the specifications, product and service required. 4.3. Criteria are written clearly to enable bids to be compared. 4.4. Criteria are ranked against council procedures.
5. Prepare tender document	5.1. ***Tender documents*** are ***prepared*** clearly and concisely. 5.2. Tender documents are prepared that enable competitive pricing of products. 5.3. Tender documents are designed to enable valid ***comparisons*** between tenders received.
6. Invite tenders	6.1. Invitations are prepared based on the type of tendering method used.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	6.2. Source list is prepared according to council procedures. 6.3. ***Advertisement*** is prepared and placed according to the tender method.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- report and specification writing
- qualitative and quantitative research
- analytical
- consultation with relevant personnel
- specification interpretation
- negotiation with relevant internal and external people
- observation of protocol and probity policies

Required Knowledge

- relevant council policies, procedures and codes of conduct
- sustainability practices
- quality assurance systems
- relevant Australian and industry standards
- statutory and council tender requirements
- contractual processes
- industrial agreements
- statutory council requirements
- tendering codes of practice
- national competition policy

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also

© Commonwealth of Australia, 2025 Skills Insight

	required to be demonstrated.
Critical aspects of evidence to be considered	• Contract authorisation process is undertaken • Appropriate advertisement is placed • Required specifications are produced • Conditions of contract are produced • Industry standard conditions of contract are applied • Confidentiality and probity are observed for both in-house bids and/or external tenders
Context of assessment	On the job or in a simulated work environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to a workplace or simulated case study that provides the following resources: • relevant council policies and procedures • national competition policy information

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Services may include:	• works • function • provision • community expectations
Parameters may include:	• budget range

© Commonwealth of Australia, 2025 Skills Insight

	• council resources • level of risk • council policies, such as 'buy local'
Tendering methodology may include:	• lump sum • unit rate • partnership • services process
Tendering method may include:	• expression of interest • public tender • invitation • verbal • written • in-house bid • select tender
Advertisement may include:	• newspaper • in-house • trade magazines • according to council policy
Legislative requirements may include:	• WorkCover • risk management • occupational health and safety • sustainability • equal employment opportunity • sexual harassment • public liability • professional indemnity • evidence of insurance cover • quality assurance
Tender documents may include:	• general conditions • special clauses • technical conditions • standard specifications • code of tendering • statutory declaration • evaluation criteria • drawings • implementation plan • legislative amendments • legal endorsement
Comparative statement may include:	• matrix • data

LGACOM502B Devise and conduct community consultations

Modification History

LGACOM502B Release 2: Layout adjusted. Range statement edited.

LGACOM502B Release 1: Primary release.

Unit Descriptor

This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

© Commonwealth of Australia, 2025 Skills Insight

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise consultation strategies	1.1. A range of consultation strategies is identified and assessed for suitability. 1.2. ***Interested and affected parties*** are identified. 1.3. ***Resources*** required to conduct consultation are assessed. 1.4. ***Consultation strategies*** are chosen that ***enable and encourage relevant groups*** or individuals to be involved. 1.5. ***Legislative*** and council requirements are reviewed to ensure strategies meet all criteria.
2. Conduct consultations	2.1. ***Information*** is prepared that is clear, accurate and appropriate to the needs of all parties. 2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved. 2.3. ***Information is presented*** to affected parties at an appropriate time and place. 2.4. ***Access and equity*** requirements are implemented in the consultations. 2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame. 2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.
3. Record, analyse and report on results	3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed. 3.2. Appropriate suggestions for improvement are incorporated into design parameters. 3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised. 3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern. 3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to devise and conduct community consultations where: • consultation ensures council's image or reputation is maintained or enhanced • community consultation produces valid and useful information

© Commonwealth of Australia, 2025 Skills Insight

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including: • public and community meetings and forums • surveys and door knocks • appropriate communications equipment and aids such as overhead projectors and computer-based presentations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Interested and affected parties may include:	• community groups • other authorities • individuals • emergency authorities (police, fire and ambulance) • private sector business interests • special interest groups • experts
Resources may include:	• human

- financial
- locations

Consultation strategies may include:

- public meetings
- phone-ins
- questionnaires
- informal gatherings
- door knocks
- council meetings

Enabling and encouraging relevant groups to be involved may include:

- physical accessibility
- diverse language needs
- culture, including Indigenous, youth and non-English speaking background
- physical environment
- number of people

Legislation may include:

- local government
- anti-discrimination
- planning

Information may include:

- written and oral records
- anecdotes
- reports
- instructions
- directions from supervisor or management
- interviews
- formal and informal team meetings
-

Access and equity may include:

- subject matter
- manner in which consultations are conducted
- physical accessibility
- community profile
-
-

Presentation of information may include:

- graphics
- models
- computer animations
- video displays
- overhead transparencies
- handouts
- display plans
- interpreter service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 **Prepare inventory of heritage and cultural assets**	1.1 ***Heritage*** and cultural assets within the community, and council expectations and requirements relating to them, are identified. 1.2 The ***significance*** of each heritage and cultural asset is assessed according to established criteria and community expectations. 1.3 An adequate ***information*** base of significant places is obtained through comprehensive field investigation and research. 1.4 ***Data*** is collected accurately and objectively on heritage and cultural assets. 1.5 A comprehensive inventory of heritage and cultural assets is prepared with full and detailed descriptions of history and significance.
2 **Assess threats and opportunities for the protection of heritage and cultural assets**	2.1 ***Threats*** and opportunities are identified to ensure all factors are fully assessed. 2.2 Based on input from council and the community, criteria are established to enable threats and opportunities to be prioritised.
3 **Identify and develop strategies for the protection of heritage and cultural assets**	3.1 ***Criteria*** are established to identify priorities. 3.2 Consultation with the community and property owners is undertaken to seek views on the conservation action required to protect the significant attributes of the area. 3.3 A framework for the legal protection of heritage and cultural assets is established through existing legislation. 3.4 Practical and appropriate strategies to conserve heritage and cultural assets are determined. 3.5 The effectiveness of strategies is assessed through a comparison with methods used elsewhere. 3.6 The policy elements of the proposed heritage program are determined. 3.7 Innovative approaches are developed to protect heritage and cultural assets in response to the local community need.
4 **Implement strategies for the protection of heritage and cultural assets**	4.1 The study and program are adopted by the local authority. 4.2 Consultation is undertaken with the community and property owners about the study and proposed heritage program. 4.3 Financial resources are identified and procured within budget cycles to support the achievement of required

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	outcomes. 4.4 Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met. 4.5 Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes. 4.6 Community education and ***information*** materials are prepared and distributed to ensure ongoing support for the strategy. 4.7 The strategy is incorporated into council policies and procedures and relevant legislation. 4.8 A timetable for implementation is established and priorities are set.
5 **Monitor and review the effectiveness of strategies to protect heritage and cultural assets**	5.1 Further research is undertaken on ***places*** listed as being of local significance in the study. 5.2 Additional plans of significance are identified and reviewed. 5.3 An annual heritage report is prepared if required. 5.4 Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- research
- collation of information from local, national and international sources
- evaluation methodologies
- consultation with a range of community and government agencies
- strategic planning
- budgeting and lifecycle costings
- community education strategies
- project management

Required Knowledge

LGAWORK212A Perform field support duties in a roadwork environment

Modification History

LGAWORK212A Release 2: Layout adjusted.

LGAWORK212A Release 1: Primary release.

Unit Descriptor

This unit covers the competencies required to undertake relevant field support duties in the construction and maintenance of roads within Council areas. The unit looks at establishing the facilities required for road works, the preparation of surfaces and materials necessary for road construction and maintenance and the use of appropriate signage at the work site.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations that provide the boundaries for the operation of councils is essential. The ability to use appropriate materials, construction methods and processes and adhere to relevant standards must be appropriately reflected.

ELEMENT	PERFORMANCE CRITERIA
	repaired and cleared where necessary. 4.6 Trees and shrubs are trimmed or removed and weeds are controlled according to council requirements. 4.7 Verges are mown by tractor signs in relation to their meaning, positioning and material.
5 **Maintain records for road construction and maintenance**	5.1 Information is recorded in accordance with council and legislative requirements. 5.2 Details are recorded clearly, accurately and legibly. 5.3 ***Records*** are secured, accessible and up-to-date.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- written and verbal communication skills
- reading and interpreting plans and specifications, plant and equipment capabilities and estimation of plant output
- civil works construction techniques and methods
- calculation of quantities
- trade specific skills related to work undertaken
- material testing

Required Knowledge

- OH&S requirements
- construction and maintenance practices
- materials technology associate with roads construction and maintenance
- work scheduling, inspection, testing and monitoring
- work site traffic management
- monitoring and testing methods and procedures

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example,

© Commonwealth of Australia, 2025 Skills Insight

	the knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	Demonstrated ability to use appropriate materials, construction methods and processes for the construction and maintenance of roads. Demonstrated ability to adhere to plans and specifications. Demonstrated ability to adhere to relevant occupational health and safety practices on site. Demonstrated ability to adhere to Australian standards, codes of practice and advisory standards.
Context of assessment	Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined in the Range Statement. Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package. Assessment of the performance requirements in this unit should be undertaken in an actual workplace or simulated environment. Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the Key Competency levels at the end of this unit.
Relationship to other units(prerequisite or co-requisite units)	To enable holistic assessment this unit may be assessed with other units that form part of the job role.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completing workplace documentation • third party reports from experienced practitioner • completion of self-paced learning materials including personal reflection and feedback from trainer/coach/supervisor
Evidence required for demonstration of	Evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and

© Commonwealth of Australia, 2025 Skills Insight

consistent performance	variety of situations.
Resource implications	The learner and the trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Signage includes:	• statutory • directional and information • road lines/road markings • reflectors • centrelines • directional lines • shoulder lines
Earthworks may include:	• clearing • grading • levelling • excavating • trenching
Plant and equipment may include:	• bulldozers • excavators • trucks • graders • compactors • loaders • skid steers • pumps
Types of construction materials may include:	• soils (clay, sand, gravel, silt) • crushed rock • soil aggregates • concrete aggregates • filter sands and aggregates • bitumen • cutback bitumen • bitumen emulsion
Types of surfaces may include:	• bitumen and emulsion seal • unsealed

© Commonwealth of Australia, 2025 Skills Insight

- gravel
- concrete
- segmental pavers
- asphalt
- pre-mix
- primer seal

Types of records may include:

- test reports
- job diaries
- instructions
- correspondence
- time-sheets
- accident reports
- costing sheets

MEM05004C Perform routine oxy acetylene welding

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers preparing materials and performing routine oxy acetylene welding.

Application of the Unit

Application of the unit	This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels. Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, OHS regulations and/or licensing requirements, Unit MEM05022C (Perform advanced welding using oxy acetylene process) should be selected. **Band**: **A** **Unit Weight**: **2**

Licensing/Regulatory Information

Refer to Application of the Unit

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected.
4. Perform routine welding using *oxy acetylene*	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Materials	Mild and low carbon steel and cast iron
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, blowpipes, regulators
Consumables	Filler rods, fluxes
Oxy acetylene	The term 'oxy-acetylene' is used here to describe a range of fuel gases, including acetylene, LPG, hydrogen etc.
Cleaned	Fluxes

MEM05006C Perform brazing and or silver soldering

Modification History

Corrections to descriptor and range to clarify inclusion of 'braze welding'.

Unit Descriptor

Unit descriptor	This unit covers performing brazing (including braze welding) and silver soldering. It includes the preparation of materials and equipment and the inspection of the completed work.

Application of the Unit

Application of the unit	This unit applies to silver soldering and brazing using all grades of silver solder and braze. It also includes soldering of copper and refrigeration work. Work includes the preparation of materials and equipment and the inspection of the completed work. Work is undertaken in a production or maintenance environment using predetermined standards of quality, safety and work procedures. **Band**: **A** **Unit Weight**: **2**

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare materials and equipment	1.1. Job requirements are determined from specifications and/ or instructions. 1.2. Materials are correctly prepared using appropriate tools and techniques. 1.3. Materials are correctly assembled/aligned to meet specifications as required. 1.4. Distortion prevention measures are identified and appropriate action is taken as required. 1.5. Heating equipment is assembled and set up safely and correctly in accordance with standard operating procedures. 1.6. Correct and appropriate consumables are selected and prepared. 1.7. Test run is undertaken and verified as required.
2. Braze and/or silver	2.1. The correct process is selected to meet specifications.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
solder	2.2. Materials are preheated as required. 2.3. Consumables are applied using correct techniques. 2.4. Jointing material is applied correctly and in appropriate quantities to meet job/specifications. 2.5. Material temperature is annealed using correct and appropriate techniques.
3. Inspect joints	3.1. Excess jointing materials are removed using correct and appropriate techniques. 3.2. Inspection of joints is undertaken to standard operating procedures. 3.3. Inspection results are reported/recorded using standard operating procedures as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • preparing materials • performing brazing, braze welding, silver soldering • undertaking visual inspection • reading and interpreting routine information on written job instructions, specifications and standard operating procedures • following oral instructions
Required knowledge
Look for evidence that confirms knowledge of: • the reasons for selecting specific methods of assembly/alignment • the procedures for minimising distortion of the materials being brazed/braze welded/silver soldered • the procedures for assembling and setting up the specific heating equipment • the reasons for selecting specific heating equipment • the reasons for selecting specific consumables • conducting test runs

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• typical applications of brazing/braze welding and silver soldering processes • the procedures and precautions for preheating the materials to be joined • the effects of the use of inappropriate techniques on the performance of the jointed materials • the effect of inappropriate quantities of jointing material on the performance of the jointed materials • the procedures for normalising the temperature of jointed materials • the consequences of using inappropriate techniques to normalise the temperature of the joint • the procedures for removing excess jointing material • the procedures for inspecting brazed/braze welded/silver soldered joints • use and application of personal protective equipment for silver soldering and brazing/braze welding • safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Shut down machine/equipment	1.1. Machine/equipment operational function is determined and understood. 1.2. Shut-down sequence is undertaken safely and to standard operating procedures. 1.3. Machine/equipment is depressurised/emptied/de-energised/bled to standard operating procedures. 1.4. Safe shut-down of machine/equipment is verified. 1.5. Safety/security lock-off devices and signage are installed to standard operating procedures. 1.6. Machine/equipment is left in clean and safe state.
2. Isolate machine/equipment	2.1. Machine/equipment operational function is determined and understood. 2.2. Isolation methods and points are recognised and identified.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.3. Isolation is undertaken safely and to standard operating procedures. 2.4. Safe isolation of machine/equipment is verified. 2.5. Safety/security lock-off devices and signage are installed to standard operating procedure. 2.6. Machine/equipment is left in clean and safe state.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, specifications and other applicable reference documents
- checking and clarifying task-related information
- entering information onto proformas and standard workplace forms
- shutting down machine/equipment
- purging/de-energising equipment
- installing safety/security lock-off devices and signage\

Required knowledge

Look for evidence that confirms knowledge of:

- the operational function of the machine/equipment
- the shut-down sequence
- the procedures for shutting down and isolating the machine/equipment
- safety precautions for shutting down and isolating the machine/equipment
- procedures for purging/de-energising the machine/equipment and reasons for doing so
- procedures for verifying machine/equipment shut-down and isolation and reasons for verifying
- the safety/security lock-off devices and signage to be installed
- the reasons and procedures for installing lock-off devices and signage
- the reasons for ensuring the machine/equipment is left in a clean, safe state
- hazards and control measures
- use and application of personal protective equipment

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Shut down/isolate	Shut down/isolation means and includes isolation of mechanical, electrical drives, pipework (pressure) rotating equipment etc. utilising electrical lock-off isolators, mechanical and power driven valves etc. in accordance with standard operating instructions. Relevant regulations, Australian standards and legislative requirements governing isolation and shut-down must be complied with
Machine/equipment	Manual, semi automatic and automatic machines of a stand-alone, continuous production or process nature.

MSFGG2008 Glaze and re-glaze residential windows and doors

Modification History

Release 2 - Update of Australian Standards codes. Statement regarding currency of Australian Standards included in Range of Conditions and Performance Evidence.

Release 1 - New unit of competency

Application

This unit of competency covers fitting glass to residential windows and doors, other openings, or to other frames performed in workplaces involving on-site and off-site fabrication, installation and replacement of glass.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Glass and Glazing

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify work requirements	1.1	Work requirements for the type of glass to be used and the method of fixing are identified from work instructions
		1.2	Work health and safety (WHS) requirements for glazing/re-glazing of windows and doors, including personal protective equipment, are observed throughout the work
		1.3	The process for fitting glass to window and doorframes is identified
2	Prepare for work	2.1	Work sequence is planned in a logical order to suit the job

© Commonwealth of Australia, 2025 Skills Insight

			and in accordance with workplace procedures
		2.2	Tools, equipment and materials (other than glass and frames) are selected and checked prior to use to ensure they are appropriate for the work, serviceable and in a safe condition
		2.3	Type of glass to be fitted and frames are selected to match job requirements and glass checked for type, size and imperfections
		2.4	Glass fixing method is selected and frame condition is assessed to ensure suitability for glazing in accordance with customer order and Australian Standards
		2.5	Defective frames are reported for repair or replacement in accordance with workplace procedures
		2.6	Fixing and sealing materials are prepared by mixing or cutting to length, as appropriate
3	Identify site conditions and restraints	3.1	On-site difficulties are recognised and corrective action taken in accordance with regulations and workplace requirements
		3.2	Covering material is applied, where necessary, to protect existing fixtures and fittings
		3.3	Special characteristics of the window or door which may affect the finished job are identified and corrective action taken
		3.4	Prefabricated, modular scaffolding system to a maximum of one platform is erected safely and in the correct order of assembly, if required
		3.5	Access stairway or ladder and edge protection components are fitted to the modular scaffolding, where used
4	Perform glazing	4.1	Frame is prepared to receive glass by checking size against specifications, removing remains of glass and any sealants, cleaning and surface preparation, if required
		4.2	Glass is fixed to the frame using the selected method and in accordance with recognised industry procedures and Australian Standards
		4.3	Solvents and sealants are used in accordance with manufacturer recommendations and Australian Standards

© Commonwealth of Australia, 2025 Skills Insight

		4.4	Excess sealing material is removed and glass and frame cleaned after fixing
5	Complete work	5.1	Completed installation is checked to ensure compliance with customer requirements and specifications
		5.2	Prefabricated modular scaffolding, where used, is dismantled safely in the correct order and packed for transport
		5.3	Tools, equipment and materials are cleaned and stored following workplace procedures
		5.4	Work area is cleaned and left in a safe condition and rubbish disposed of, as appropriate
		5.5	Waste and scrap materials are removed for disposal or recycling, as required
		5.6	Workplace documentation is completed in accordance with workplace requirements including calculating the cost of glass, fittings, materials and labour

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods code, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation

© Commonwealth of Australia, 2025 Skills Insight

	insurance requirements • work requires individuals to demonstrate some discretion, judgement and problem solving
Types of glass include:	• annealed glass • toughened glass • laminated glass • wired glass • tinted and heat reflective glass • coated glass and insulated glass units • patterned glass
Methods of glazing include:	• channel glazing • beaded glazing and double glazing

Glazing and re-glazing includes:	• installation of glass to metal and/or timber doors, windows and other frames, and re-glazing of existing windows and doors
	• residential glazing/re-glazing that is confined to simple doors and windows:
	  • residential windows, such as fixed, sliding, casement, awning and double hung and louvres
	  • residential doors, such as sliding, hinged, pivot and bi-fold

Tools and equipment include:	• tungsten wheel glass cutters • speed cutters • cutting lubricants • running pliers • straight edges and squares • tape measures • glass handling and lifting equipment • hack-out knives • chisels • putty knives • sprig/diamond guns • vinyl cutters and rollers • pry bars • sealant guns • blade and Phillips head screwdrivers • pop rivet guns • electric and pneumatic drills • rubber mallets • claw hammers • nail punches • personal protective equipment

© Commonwealth of Australia, 2025 Skills Insight

Materials include:	• flat glass and acrylic glazing products • plastic • aluminium • steel • solid timber • gaskets • sealants • adhesives • glazing tapes • setting blocks
Matching job requirements includes:	• customer order • existing glass type
Glass fixing factors include:	• specification • type of glass and frame • security requirements • sealing methods • compliance with relevant Australian Standards
Prefabricated, modular restricted height scaffolding includes:	• completed scaffolding less than 3 m in completed height from the ground • erection as close as practicable to the working face, and where the scaffold is greater than 225 mm from the working face, guardrails and mid-rails to the inner face must be installed • dismantling by accessing the scaffold platform by stairway or ladder and start dismantling from an end bay • dismantling sequence is to dismantle guardrails, mid-rails, ledgers, transoms and standards first

Personal protective equipment includes:	• that prescribed under legislation, regulation and enterprise policies and practices:
	  • gauntlets
	  • gloves
	  • safety glasses
	  • hard hats
	  • safety footwear
	  • aprons and overalls

Information and procedures include:	• workplace procedures relating to the use of tools and equipment and personal protective equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

© Commonwealth of Australia, 2025 Skills Insight

- on-site procedures and regulations relating to the handling and movement of glass
- Australian Standards:
  - AS 1288:2006 Glass in buildings - Selection and installation
  - AS/NZS 2208:1996 Safety glazing materials in buildings
  - AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass
  - AS 2047:2014 Windows in buildings - Selection and installation
  - AS/NZS 4666:2012 Insulating glass units

Note, wherever Australian Standards are listed they apply at the time of publication, but the most current version (including amendments) or replacement versions are to be used.

Unit Mapping Information

Supersedes and is equivalent to LMFGG2008C Glaze/re-glaze residential windows and doors.

Assessment Requirements for MSFGG2008 Glaze and re-glaze residential windows and doors

Modification History

Release 2 - Update of Australian Standards codes. Statement regarding currency of Australian Standards included in Range of Conditions and Performance Evidence.

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Optimise glass sizes for economical cutting and assembling of required materials and glaze or re-glaze the following:
  - timber putty faced window sashes or door panel
  - timber beaded sidelight, fixed panel, sliding, hinged, pivot and/or bi-fold doors
  - metal framed channel glazed door or window
  - metal framed beaded door or window
- Glazing is to include:
  - calculating glazing clearance and cutting size
  - cutting glass to AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass
    - *Note, wherever Australian Standards are listed they apply at the time of publication, but the most current version (including amendments) or replacement versions are to be used).*
  - selecting correct glazing tools, equipment, glazing sealants, vinyls and tapes
  - preparing the working area
  - preparing glazing rebates and channels prior to installation
  - cleaning glass, tools, equipment and work area
  - calculating the cost of glass, glazing materials and labour
  - selecting re-glazing tools and equipment
  - hacking out/removing beads and glass safely from timber windows and doors
  - removing and disassembling metal window sashes and doors and removing glass safely

© Commonwealth of Australia, 2025 Skills Insight

    - installing and/or adjusting sash cords, unique, spiral or spring balances on double hung windows
- Erect, use and dismantle modular scaffolding equipment safely
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Qualities and characteristics of glass, including hazards and handling requirements
- Techniques, methods, materials and process of glazing simple/complex window and doorframes
- Workplace safety system requirements related to the glazing simple/complex window and doorframes
- Relevant Australian Standards
- Work flow requirements in relation to fitting glass
- Characteristics, purpose and operation of tools and equipment used in glazing simple/complex window and doorframes
- Safe methods for erecting and dismantling restricted height modular scaffolding systems
- Correct identification of equipment, processes and procedures

Assessment Conditions

- Assessors must:
    - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
    - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
    - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor’s reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to frames, glass, fixing material, sealants, modular scaffolding, workplace operating procedures and work orders, personal protective equipment and an appropriate work area/site.

MSMENV672 Develop workplace policy and procedures for environmental sustainability

Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Application

This unit of competency covers the skills and knowledge required to develop and implement a workplace sustainability policy, including the modification of the policy to suit changed circumstances.

This unit of competency applies to team leaders/supervisors/managers who are required to develop approaches to environmental sustainability within workplaces, including the development and implementation of policy.

It includes communicating with relevant stakeholders, developing and monitoring sustainability policies and reviewing and improving sustainability policies.

This unit of competency applies to all sectors of the manufacturing industry. It may also be applied to all sections of an organisation, including the office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Develop workplace sustainability policy	1.1	Define the scope of sustainability policy
		1.2	Identify and consult with stakeholders during the policy development process
		1.3	Review the environmental sustainability strategies relevant to all stages of work covered by the policy
		1.4	Make recommendations for policy options based on likely effectiveness, timeframes and cost
		1.5	Develop policy that reflects the organisation's commitment to sustainability as an integral part of the business planning, and as a business opportunity
		1.6	Agree upon appropriate methods of implementation
2	Communicate the policy	2.1	Promote the policy, including its expected outcome to key stakeholders
		2.2	Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned
3	Implement the policy	3.1	Develop and communicate procedures to help implement the policy
		3.2	Employ strategies for implementation of policy in resource efficiency
		3.3	Establish recording systems for tracking changes in sustainability approaches and assign responsibilities
4	Review policy	4.1	Record outcomes and provide feedback to key personnel

© Commonwealth of Australia, 2025 Skills Insight

implementation		and stakeholders
	4.2	Investigate success or otherwise of policy
	4.3	Monitor records to identify trends that may require remedial action to implemented policy and procedures
	4.4	Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)

© Commonwealth of Australia, 2025 Skills Insight

- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027

Assessment Requirements for MSMENV672 Develop workplace policy and procedures for environmental sustainability

Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- scope and develop an integrated sustainability policy and procedure within an enterprise
- raise awareness among stakeholders and those involved in implementing the policy of expected outcomes
- develop a workable implementation strategy
- ensure policy implementation is monitored, reviewed and modified where

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant policy development and implementation processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Application

This unit describes the skills and knowledge required to use structured process improvement tools to solve process and other problems. It describes the broad application of in-depth and rigorous structured problem-solving techniques to identify opportunities for improvement.

This unit applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit and/or equipment.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
  - specific, measurable, achievable, relevant, timed (SMART) objectives
  - resource requirements
  - methods for reaching objectives
  - timelines
  - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMSUP404 Coordinate maintenance

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS404A Co-ordinate maintenance

Application

This unit of competency covers the skills and knowledge required to coordinate maintenance of a manufacturing facility.

It applies to experienced technicians, supervisors, maintenance coordinators or team leaders, working either independently or as part of a team. They will be required to apply knowledge of equipment operating principles, service requirements and workplace production operations to the coordination of maintenance activities to meet the objectives of restoring the plant/equipment condition, consistent with production requirements. They will not be required to actually do the maintenance.

This unit of competency applies to all work environments and sectors within the manufacturing industry. It applies to coordination of one or more of:

- predictive and preventative operational maintenance
- proactive maintenance
- reactive maintenance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Plan maintenance	1.1	Develop work plans for scheduled routine maintenance activities
		1.2	Develop contingency plans for unscheduled maintenance activities
		1.3	Source maintenance providers (internal/external)
		1.4	Develop costings for maintenance work
		1.5	Identify and control hazards
		1.6	Document and record required production interruptions, processes and procedures
		1.7	Obtain required authorisations for the maintenance work
2	Organise maintenance	2.1	Schedule maintenance activities, with reference to production requirements and availability of resources
		2.2	Review available maintenance expertise and arrange appropriate training and assessment where necessary
		2.3	Obtain approvals for maintenance schedule as necessary to coordinate with production requirements
3	Assemble maintenance requirements	3.1	Determine resources required (equipment, personnel and consumables) to meet maintenance schedule
		3.2	Locate and coordinate supply of consumables, equipment and expertise to meet maintenance schedule
		3.3	Purchase equipment, consumables and expertise as required

© Commonwealth of Australia, 2025 Skills Insight

4	Complete maintenance	4.1	Complete maintenance schedule
		4.2	Make appropriate readings, measurements and recordings and compare to equipment, product and other relevant specifications
		4.3	Identify areas requiring further testing of plant, which has been subject to maintenance, and recommend appropriate procedures to supervisory staff
		4.4	Make appropriate adjustments to the maintenance schedule
		4.5	Complete records as required, noting areas where changes to equipment operation or routine maintenance are required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

© Commonwealth of Australia, 2025 Skills Insight

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Tools and equipment

Tools and equipment include one or more of the following:

- hand tools specific for the task
- testing equipment
- measuring and aligning equipment
- computer equipment
- relevant personal protective equipment (PPE)

Hazards

Hazards include one or more of the following:

- ineffective isolations of energy sources, motive power and process materials
- manual handling of machinery components
- hot, cold or components containing dangerous materials
- external hazards (e.g. traffic into a maintenance area)
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity

© Commonwealth of Australia, 2025 Skills Insight

- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Data and plant records

Data and plant records include one or more of the following:

- plant data
- log sheets
- operational and performance reports
- equipment performance (e.g. speed, output and variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired)
- physical aspects, such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures
- manufacturer specifications, instructions, service manuals and other information

Unit Mapping Information

Assessment Requirements for MSMSUP404 Coordinate maintenance

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS404A Co-ordinate maintenance

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- plan for maintenance requirements in standard and non-standard situations and determine appropriate action consistent with operation guidelines and regulatory framework
- identify and interpret information from a range of internal and external sources
- develop and adjust work plans for the maintenance activities
- coordinate resources to meet maintenance work plans
- communicate effectively with team/work group, supervisors and other personnel
- monitor work plans for maintenance activities**.**

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- characteristics and capabilities of relevant equipment, materials and processes
- functions and troubleshooting of internal components and their problems
- routine and non-routine causes of equipment failures and processes to develop solutions
- service conditions which may increase maintenance
- urgency and timeliness factors in planning maintenance activities in relation to production requirements
- proactive, predictive, preventative and reactive maintenance principles.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency

© Commonwealth of Australia, 2025 Skills Insight

  - must include the coordination of maintenance in an appropriate industrial context
  - may use industry-based simulation for part only of the unit where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSS015002A Develop strategies for more sustainable use of resources

Modification History

Not applicable.

Unit Descriptor

This unit of competency covers identifying strategies for more sustainable uses of resources. The unit includes the identification of waste as defined in lean manufacturing (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

Application of the Unit

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations.

The unit assumes that a decision to attempt to achieve more sustainable use of resources has already been made. The unit covers the skills needed for developing a strategic approach to resource use at the organisation or value chain level.

The unit does not cover the technical skills required to implement specific initiatives that may be identified as part of the strategic plan. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation's processes. Where required, appropriate mathematics and statistics units should be selected from the MEM05 Metal and Engineering Training Package or other appropriate Training Package.

Where the carbon footprint (or water footprint or similar) of an enterprise or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint.

It would typically be undertaken by a manager or technical specialist who had a major responsibility for sustainability as part of a broader work role, or sustainability may be their primary work responsibility.

For specific techniques covering the auditing of water, energy, emissions and transport, refer to relevant sustainability audit units.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

1 Quantify resource consumption	1.1 Identify all significant resources used by process
	1.2 Identify consumption measurements available for each resource
	1.3 Determine consumption for each resource
2 Quantify resource loss	2.1 Determine theoretical consumption of each resource
	2.2 Compare theoretical consumption with actual consumption
	2.3 Determine loss (emission) for each resource
3 Recommend strategies for reducing waste	3.1 Short-list high emission process steps
	3.2 Analyse process to identify emission steps or locations
	3.3 Determine root cause of emission
	3.4 Investigate methods for reducing emission
	3.5 Develop strategies and recommendations for improvement
4 Prepare resources use audit report	4.1 Identify purpose of report and key stakeholders
	4.2 Compile data, implications and recommendations
	4.3 Consult with stakeholders as appropriate
	4.4 Draft and present report

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

Required knowledge includes:

- the concept of muda. Muda is usually summarised under the headings of the 'seven wastes' which include:
  - overproduction
  - delay/waiting
  - transportation
  - over processing
  - excess inventory
  - unnecessary motion
  - defects and rework
- methods of material balancing
- methods of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping manufacturing processes and resources consumed
- methods of measuring actual resource usage
- concept of muda and muda categories
- muda reduction methods and strategies
- AS/NZS ISO 14000 Environmental Management Standards

Required skills include:

- calculating, manipulating and interpreting numerical data, including establishing series, means and averages, absolute and proportional material and energy usage per product or process, correlations and rates of change
- analysing and conducting root cause analysis
- calculating theoretical consumption of resources as the minimum amount of resources per product or process step as defined by the customer multiplied by the rate of production or process
- calculating actual consumption of resources per unit (e.g. per product, operation, site or value chain)
- writing technical reports
- consulting with technical experts and internal and external stakeholders

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

Overview of assessment	A person who demonstrates competency in this unit must be able to identify and quantify resources and waste in a process, recommend strategies to reduce waste and prepare a report with recommendations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include: • quantifying significant resource consumption and emission using materials balancing • identifying and consulting with stakeholders • developing strategies for reducing emissions • preparing and presenting a resources use report.
Context of and specific resources for assessment	• This unit of competency is to be assessed in the workplace or a simulated workplace environment. • Assessment should emphasise a workplace context and procedures found in the candidate's workplace. • This unit of competency may be assessed with other relevant units addressing sustainability at the enterprise level or other units requiring the exercise of the skills and knowledge covered by this unit. • The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.
Method of assessment	• In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. • Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. • The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work-like environment.
Guidance information for assessment	

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

Waste	Waste in this unit is used in the broader sense of 'muda' as used in lean manufacturing and the competitive manufacturing units of competency developed by Manufacturing Skills Australia (MSA)

Emissions	Emissions means all materials which enter the process/site but which do not leave as part of the product and so includes:
	• known or able to be physically measured emissions of:
	  • gases, vapours and fumes
	  • liquids
	  • solids
	• assumed emissions through material balancing
	• assumed emissions through energy loss, including heat, friction and other energy conversion yield losses

Theoretical consumption	Theoretical consumption of resources is the minimum amount of resources per product as defined by the customer multiplied by the rate of production
Actual consumption	Actual consumption is the amount of a resource entering the value chain
Significant resources	Significant resources includes resources which are deemed to be significant because they are: • high volume • high value • high environmental significance • important to the product or process • covered by legislation or regulation • important to the enterprise It need not include resources which are incidental to the activity and which are not otherwise significant

MSS015011 Conduct a sustainability energy audit

Modification History

Release 1. Supersedes and is equivalent to MSS015011A Conduct a sustainability energy audit.

Application

This unit of competency covers conducting an audit for the specific resource of energy in an organisation or part or all of its value chain and to prepare recommendations for a reduction of, and more efficient use of, energy.

This unit applies inside organisations and their value chains. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations (e.g. supplier of goods or services or a customer).

The energy audit may be conducted to assist in regulatory compliance or as part of a strategy to improve the sustainability of manufacturing operations. The emphasis in the unit is on informing decision making in regards to energy use in a value chain or site.

A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this, or sustainability may be their primary work responsibility. The manager or technical specialist may undertake this alone or as part of a team.

The technical measurement of operational performance or measurement of emissions or other environmental impact is not covered by this unit. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation’s processes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify all sources and uses of energy in process**	1.1	Identify all sources of energy external to the site.
		1.2	Identify all sources of energy within the site.
		1.3	Identify all uses of energy by process unit.
		1.4	Identify energy type and intensity required by each process unit.
2	**Calculate theoretical use of energy**	2.1	Calculate theoretical net use of energy by type and intensity for each process unit.
		2.2	Calculate overall energy balance for process/site.
		2.3	Evaluate the need for energy consumption by process and units within the process compared to alternative processes/units.
3	**Measure actual use of energy**	3.1	Determine actual net energy use for overall process/site.
		3.2	Determine actual net energy use for each process unit.
		3.3	Calculate difference between theoretical and actual energy use by unit and overall.
		3.4	Identify actual energy type used by each process unit.
4	**Develop strategies for**	4.1	Rank units by difference between theoretical and actual energy use.

© Commonwealth of Australia, 2025 Skills Insight

	reducing the use of energy	4.2	Rank units by actual energy use.
		4.3	Identify units using higher intensity energy than required.
		4.4	Develop strategies to reduce energy consumption and/or use lower intensity energy.
5	**Prepare a recommendation for an energy use reduction strategy**	5.1	Consult with key stakeholders.
		5.2	Identify strategies required to meet regulatory or similar requirements.
		5.3	Rank strategies by benefit/cost ratio.
		5.4	Short-list preferred energy reduction strategies.
		5.5	Prepare recommendation for improving energy usage.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Energy/energy type includes one or more of	• operational heating and cooling • motive energy • lighting • waste energy.
Energy intensity includes one or more	• temperature • power

Assessment Requirements for MSS015011 Conduct a sustainability energy audit

Modification History

Release 1. Supersedes and is equivalent to MSS015011A Conduct a sustainability energy audit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one or more processes, to:

- define appropriate boundaries for the sustainability energy audit
- conduct energy balance analyses for a site, value chain or process
- identify high energy use/waste units/areas
- undertake benefit/cost ratio analyses
- ensure improvement strategies proposed reflect stakeholder needs and regulatory environment.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to audit energy usage including knowledge of:

- nature of energy wastage
- energy balancing techniques for process and process steps (sometimes known as heat balancing)
- methods of measuring actual process amount/flows
- waste reduction/energy efficiency strategies and methods along with costs, effectiveness and alternative strategies (e.g. efficient lighting, efficient window glass and efficient motors)
- cost-benefit analysis
- relevant legislation, regulation and protocols.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
    - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

© Commonwealth of Australia, 2025 Skills Insight

  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where a sustainability energy audit is conducted for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS015011A Conduct a sustainability energy audit

Modification History

Not applicable.

Unit Descriptor

This unit of competency covers conducting an audit for the specific resource of energy in an organisation or part or all of its value chain and to prepare recommendations for a reduction of, and more efficient use of, energy.

Application of the Unit

This unit applies inside organisations and their value chains. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations (e.g. supplier of goods or services or a customer).

The energy audit may be conducted to assist in regulatory compliance or as part of a strategy to improve the sustainability of manufacturing operations. The emphasis in the unit is on informing decision making in regards to energy use in a value chain or site. Where complex electrical and other energy analysis skills are required appropriate units should be selected from the MEM05 Metal and Engineering Training Package.

It would typically be undertaken by a manager or technical specialist who had a major responsibility for sustainability as part of a broader work role, or sustainability may be their primary work responsibility. The manager or technical specialist may undertake this alone or as part of a team.

The technical measurement of operational performance or measurement of emissions or other environmental impact is not covered by this unit. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation’s processes. Where required, appropriate mathematics and statistics units should be selected from the MEM05 Metal and Engineering Training Package or other appropriate Training Package.

	and/or use lower intensity energy
5 Prepare a recommendation for an energy use reduction strategy	5.1 Consult with key stakeholders
	5.2 Identify strategies required to meet regulatory or similar requirements
	5.3 Rank strategies by benefit/cost ratio
	5.4 Short-list preferred energy reduction strategies
	5.5 Prepare recommendation for improving energy usage

Required Skills and Knowledge

Required knowledge includes:

- nature of energy wastage:
  - efficiency
  - friction/fouling/scaling
  - temperature/pressure range of operation
- energy balancing techniques for process and process steps (sometimes known as heat balancing)
- methods of measuring actual process amount/flows
- waste reduction/energy efficiency strategies and methods along with costs, effectiveness and alternative strategies (e.g. efficient lighting, efficient window glass and efficient motors)
- cost-benefit analysis
- relevant legislation, regulation and protocols
- AS/NZS ISO 14000 Environmental Management Standards

Required skills include:

- mapping processes and energy flows
- interpreting schematics and drawings
- calculating, manipulating and interpreting numerical data, including establishing series, means, correlations and rates of change
- ranking energy consumption and waste based on energy balancing
- consulting with technical and operative staff on possible non-obvious energy wastes
- consulting and negotiating with stakeholders on implementation process for sustainability improvement
- preparing recommendations

Evidence Guide

Overview of assessment	A person who demonstrates competency in this unit must be able to conduct an energy audit, including calculation of theoretical and actual use of energy and preparation of recommendations for energy use reduction.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include: • defining appropriate boundaries for the sustainability energy audit • conducting energy balance analyses for a site or value chain • identifying high energy use/waste units/areas • undertaking benefit/cost ratio analyses • ensuring improvement strategies proposed reflect stakeholder needs and regulatory environment.
Context of and specific resources for assessment	• This unit of competency is to be assessed in the workplace or a simulated workplace environment. • Assessment should emphasise a workplace context and procedures found in the candidate's workplace. • This unit of competency may be assessed with other relevant units addressing sustainability at the enterprise level or other units requiring the exercise of the skills and knowledge covered by this unit. • The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.
Method of assessment	• In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. • Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. • The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work-like environment.
Guidance information for assessment	

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

Energy/energy type	Energy/energy type includes: • operational heating and cooling • motive energy • lighting • waste energy
Theoretical use of energy	The amount of energy (work) required to move a mass or heat matter is a basic physics calculation. This is the theoretical use of energy. Anything used above this is waste (although in physics it may be referred to as inefficiency)
Energy intensity	Energy intensity includes: • required temperature, power and pressure, as relevant

MSS015022 Develop strategies for more sustainable use of resources

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to identify strategies for more sustainable uses of resources. The unit includes the identification of waste (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability.

Where the carbon footprint (or water footprint or similar) of an organisation or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint. A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this, or sustainability may be their primary work responsibility.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Assessment Requirements for MSS015022 Develop strategies for more sustainable use of resources

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- quantified significant resource consumption and emission using materials balancing for at least 1 organisation or value chain, including developing strategies for reducing emissions and preparing and presenting a resources use audit report.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the concept of muda (waste) and muda categories
- muda reduction methods and strategies
- methods and uses of material balancing
- methods and uses of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping processes and resources consumed
- methods of measuring actual resource usage
- AS/NZS ISO 14001 Environmental Management Systems or its authorised replacement.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS402001 Apply competitive systems and practices

Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Application

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

		1.4	Identify and recommend methods of increasing own contribution to the value chain.
2	**Improve the product and process value**	2.1	Identify customer features/benefits in the product and process.
		2.2	Identify aspects of product and process which contribute to customer features/benefits.
		2.3	Identify aspects of product and process which do not contribute to customer benefits/features.
		2.4	Recommend methods of reducing waste and increasing features/benefits.
3	**Use competitive systems and practices**	3.1	Identify competitive systems and practices used in organisation and own work area.
		3.2	Apply practices appropriate for the job or process.
		3.3	Monitor the job/process and make adjustments to improve it in accordance with procedures.
		3.4	Identify own skill requirements and seek skill development, if required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Customers include one or more of:

- internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable
- final customers used as the basis for the identification of value and waste.

Suppliers include one or more of:

- internal suppliers
- external suppliers sufficiently close to the individual's work as to be easily identifiable.

Procedures (written, verbal, visual, computer based, etc.) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions

© Commonwealth of Australia, 2025 Skills Insight

- any similar instructions provided for the smooth running of the plant.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Assessment Requirements for MSS402001 Apply competitive systems and practices

Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to always apply competitive systems and practices to their own job to:

- identify own place in the value chain relevant to their job
- use competitive systems and practices tools and thinking
- recommend improvements in product and/or process.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- customer requirements and their role in fulfilling them
- the value chain for products they make and their place in it
- identification of muda (waste) and its reduction.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of competitive systems and practice in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402001A Apply competitive systems and practices

Modification History

New unit, superceding MSACMS200A Apply competitive manufacturing practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

Application of the Unit

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 Skills Insight

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify own place in the value chain	1.1	Identify customers relevant to own work and their needs/requirements
		1.2	Identify suppliers for own work
		1.3	Identify value contributions along the chain
		1.4	Identify and recommend methods of increasing own contribution to the value chain
2	Improve the product and process value	2.1	Identify customer features/benefits in the product and process
		2.2	Identify aspects of product and process which contribute to customer features/benefits
		2.3	Identify aspects of product and process which do not contribute to customer benefits/features
		2.4	Recommend methods of reducing waste and increasing features/benefits
3	Use competitive systems and practices	3.1	Identify competitive systems and practices used in organisation and own work area
		3.2	Apply practices appropriate for the job or process
		3.3	Monitor the job/process and make adjustments to improve it in accordance with procedures
		3.4	Identify own skill requirements and seek skill development, if required

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope of competitive systems and practices implementation and contributing suggestions for improvement
- visualising normal operational procedures in terms of flow and contribution to customer outcomes
- planning own tasks to support competitive systems and practices implementation
- implementing competitive systems and practices in own work area according to instructions
- identifying waste (muda)

Required knowledge

Required knowledge includes:

- internal and external customers and the value they derive from operations
- suppliers, their capabilities and contribution to value (this may be obtained from an existing value stream map or other enterprise documentation)
- waste (muda)
- relevant competitive systems and practices for own job and how to apply them
- factors impacting on product, operations and waste, particularly those wholly or partially under their control (and how to control them)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person being assessed against this unit will work effectively in a competitive systems and practices environment, making continual positive contributions to the improvement of the business within the scope of their job.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the scope of competitive systems and

© Commonwealth of Australia, 2025 Skills Insight

	practices implemented in their work area • identify services and/or functions supplied by suppliers and to customers • identify own tasks and responsibilities and relate them to organisation and customer requirements • identify aspects of products and process which add to or detract from customer benefit • contribute suggestions for improvement.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads, and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

© Commonwealth of Australia, 2025 Skills Insight

Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control And Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted

© Commonwealth of Australia, 2025 Skills Insight

	so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Customers	Customers may include: • internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable • final customers used as the basis for the identification of value and waste The individual does not need to interface directly with the external customer, but should be provided with sufficient information to enable them to identify customer benefits and customer features
Suppliers	Suppliers may be: • internal or external suppliers and should be sufficiently close to the individual's work as to be easily identifiable The operator does not need to interface directly with external suppliers, but should be provided with sufficient information to enable them to identify supplier contribution to their own work and to customer benefit
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the organisation • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS402050 Monitor process capability

Modification History

Release 1. Supersedes and is equivalent to MSS402050A Monitor process capability

Application

This unit of competency covers the skills and knowledge required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.

This unit applies to an individual in an organisation adopting specific competitive systems and practices, usually either six sigma or statistical process control/three sigma, as a means of determining and improving the capability of their process to customer requirements. The individual is involved in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a nominated computer program). The information is typically presented to team members in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.

This unit requires the application of skills associated with entering and monitoring operational data and information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Collect and process data**	1.1	Take specified measurements/readings/observations, as required.
		1.2	Enter data in log, computer or other record.
		1.3	Manipulate and/or chart data as required by procedures.
2	**Identify variations that are not random and take action**	2.1	Examine chart and/or reliability information.
		2.2	Distinguish between random variations and those with an identifiable cause.
		2.3	Take action specified in procedures when a variation with an identifiable cause occurs.
3	**Assist in process improvement**	3.1	Collect data for process capability improvement trials.
		3.2	Make recommendations for improvement.
		3.3	Implement revised capability monitoring procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems	• lean operations

© Commonwealth of Australia, 2025 Skills Insight

and practices include one or more of:	• agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Process capability includes one or more of:	• the capability of the process to deliver to customer defined requirements • process stability against standardised practices and documentation to eliminate variation against customer requirements • statistical capability to deliver product within a specified range • a statistical technique to determine the range within which a product might be expected to fall.

Assessment Requirements for MSS402050 Monitor process capability

Modification History

Release 1. Supersedes and is equivalent to MSS402050A Monitor process capability

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to assist in one (1) or more process improvements and to routinely:

- collect and process data
- identify non-random variations and take the action specified in the procedures
- make recommendations for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- defects and defective product
- variation and the related statistical distribution
- control charting (or similar) methods
- analysis of information to identify trends or other non-random results
- determination of identifiable causes from variation information
- process capability determination from variation data.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include routine collection of data and identification of non-random variation in own workplace
  - must include participation in a process capability improvement project

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include the use of appropriate statistical tools, aids and apps.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402051A Apply quality standards

Modification History

New unit, superseding MSACMT251A Apply quality standards - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

Application of the Unit

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1	Assess own work	1.1	Continuously check completed work against workplace standards relevant to the operation being undertaken
		1.2	Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned
		1.3	Identify and isolate faulty components, products or processes
		1.4	Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures
2	Assess quality of received components, parts or materials	2.1	Continuously check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance
		2.2	Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service
		2.3	Identify and isolate faulty components, parts, materials or information that relate to the operator's work
		2.4	Record and/or report faults and any identified causes in accordance with workplace procedures
		2.5	Identify causes of any identified faults and take corrective action as specified in workplace procedures
3	Measure components, parts or materials	3.1	Measure materials, component parts, information, service or products, as required, using the appropriate measuring instruments in accordance with workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

4	Record information on production indicator	4.1	Record basic information on quality and other indicators of process performance in accordance with workplace procedures
5	Investigate causes of quality deviations	5.1	Investigate and report causes of deviations from specified quality standards for components
		5.2	Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting work instructions, specifications, standards and patterns appropriate to own work
- carrying out relevant visual inspections of materials, component parts and final products
- carrying out relevant physical/chemical measurements or tests
- maintaining accurate work records in accordance with procedures
- carrying out work in accordance with occupational health and safety (OHS) policies and procedures
- meeting work specifications
- communicating effectively within defined workplace procedures
- interpreting and applying defined procedures

Required knowledge

Required knowledge includes:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- basic characteristics of materials used in the relevant production processes
- safety and environmental aspects of relevant production processes
- relevant measurement techniques and quality checking procedures
- workplace procedures
- reporting procedures

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • interpret, relevant work instructions, standards and specifications appropriate to own work • check and measure relevant quality parameters • interpret results of quality checks in terms of specifications, patterns and work standards • take required action where standards of materials, component parts, final product or work processes are found to be unacceptable • maintain accurate records.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of

© Commonwealth of Australia, 2025 Skills Insight

	contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis

© Commonwealth of Australia, 2025 Skills Insight

	• 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Quality parameters	Quality parameters may include: • finish • size • durability • product or process variations • materials • alignment • colour • damage and imperfections • time
Quality checks	Quality checks are against set parameters for the process or product. Examples include: • visual inspection • physical measurements • chemical tests • checks against patterns, templates and guides • processing time
Materials	Materials may include: • physical raw materials • orders, forms and other documentation • services required for undertaking an operation (e.g. power, water, compressed air and fuel)

© Commonwealth of Australia, 2025 Skills Insight

Measure	Measure includes: • those measurements which may be taken by the employee in the workplace/at their work station
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the operation of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format
Indicators of production performance	Indicators of production performance may include: • number of items/production rate • delays and causes of delays (where known) • other information as specified in the procedures
Data entry/recording	Data entry/recording may include: • keyboard • written (including ticks or signs) • verbal
Sources of information/ documents	Sources of information/documents may include: • quality and Australian standards and procedures • work instructions, patterns, designs and recipes • organisation work procedures • manufacturer instructions for materials and equipment • organisational or external personnel • customer requirements
Investigate and report	Investigate and report includes: • following set procedures defined for such investigations Set procedures may include: • verbal instructions

© Commonwealth of Australia, 2025 Skills Insight

	• documented procedures • other quality procedures as implemented within an organisation or work environment

Workplace context	Workplace context includes:
	• work organisation procedures and practices relating to the manufacture and quality outcomes for products
	• conditions of service, legislation and industrial agreements, including:
	  • workplace agreements and awards
	  • federal or state/territory legislation
	  • standard work practice

Reporting/communication	Reporting/communication may include: • verbal and written communication in accordance with organisational policies and procedures • oral, written or visual communication and may include simple data
Being responsible for the maintenance of own work quality	Being responsible for the maintenance of own work quality may include: • contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures • following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation
Applicable regulations and legislation	Applicable regulations and legislation may include: • OHS legislation relevant to workplace activities • workers compensation legislation

MSS402082 Apply cost factors to work practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to identify cost components in work practices and determine, in general terms, the cost impacts of alternative actions.

The unit applies to assessing the relative costs of the alternatives and using this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

Employees are required to use problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Assessment Requirements for MSS402082 Apply cost factors to work practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified cost factors and cost implications of at least 1 product or process in own work and applied cost-effective practices.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concepts of expense, income and capital
- relative impact of fixed and variable cost components relevant to own work, including:
  - power and energy
  - materials, plant and equipment
  - production or process time, including impact of salary and wages
  - office expenses
  - government taxes and charges
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS402083 Use planning software systems in operations

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to access planning software (often known as Enterprise Resource Planning (ERP), Materials Resource Planning (MRP and MRPII), and often by a proprietary name, to make routine business decisions required of the person as a regular part of their job.

This unit applies to an individual in an organisation using a planning software system and who must interface with that system. The unit applies to both accessing information from the planning software system and using it as an aid to decision making. This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Use interface**	1.1	Identify terminals relevant to own workstation and functions
		1.2	Use peripherals to access system

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
		1.3	Navigate through system and screens to find program menu and data relevant to own work
		1.4	Identify and input information on own work processes at required frequency and to required detail
		1.5	Access message section and read and acknowledge messages
		1.6	Identify problems and make suggestions for improvements to relevance of planning software to own work
2	**Access information**	2.1	Identify work processes that require information from planning software system
		2.2	Obtain data and information on current operations from the planning software system
		2.3	Identify the status of items in the value stream
		2.4	Access and read historical data and information
		2.5	Read and interpret information and identify and prioritise actions required in response to information
3	**Take action in accordance with procedures**	3.1	Take action in response to information obtained from planning software
		3.2	Follow up to ensure anticipated results have occurred
		3.3	Record adjustments and variations
		3.4	Identify any learning needs to use planning software and seek support

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402060 Use planning software systems in operations.

Assessment Requirements for MSS402083 Use planning software systems in operations

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit and:

- used planning software systems for at least 3 different purposes, utilising outcomes to aid decision making.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- planning software system and operation, including:
  - terminal locations and types
  - security and access arrangements
  - information held in planning software relevant to own work
  - data collection methods for operations in work area
  - assistance arrangements for users of planning software
  - business activities exercised with the planning software system
- procedures for recommending improvements
- data and information sources.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
  - planning software systems.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403001 Review competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403001A Implement competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by an individual to review competitive systems and practices in their own work in a way that integrates with others in the team or work area who are also implementing competitive systems and practices. The unit focuses on the holistic application of competitive systems and practices to achieve improved performance in own work and in activities with others in the team or work area that contribute to improving customer benefit. Depending on the operations or processes in the team or work area the unit may also include interaction with other teams and work areas.

The unit is suitable for individuals who have formal responsibility for the work of others, such as team leaders. It is also suitable for individuals, such as technicians and tradespeople, who must integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation.

The unit applies to the areas of cost, quality, delivery, safety/environment, and employee capability, including continuous reviewing of performance against these five areas in liaison with other relevant people. Improvement initiatives in these five areas are usually developed and implemented with the support of technical support staff. Whereas other units may emphasise the competence to use one or more competitive practices, this unit emphasises the ability to advance on all five key areas over a moderate time period.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to identify opportunities to make improvements and maximise performance. Communication, the ability to work in a team and planning and organising skills are required to implement improvements and address any conflicts that arise. This unit also requires an ability to identify appropriate technology, and to consider and integrate feedback on how personal performance can be improved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Contribute to the improvement of the operations system in team or work area**	1.1	Identify key performance indicators (KPIs) for area of operations.
		1.2	Review competitive systems and practices to improve health, safety and environment (HSE) performance of self and others.
		1.3	Review competitive systems and practices to maximise quality consistency.
		1.4	Review competitive systems and practices and identify any skill and training issues that need to be addressed to improve capability of self and others.
		1.5	Review competitive systems and practices to maximise customer benefit/cost ratio.
		1.6	Review competitive systems and practices to reduce lead time to delivery within the scope of authority and responsibility.
		1.7	Work with relevant stakeholders to resolve conflicts which arise from implementation of competitive systems and practices.
		1.8	Select improvements which will deliver the greatest overall benefit for the resources required/available without reducing current performance on individual factors.
2	**Implement improvements**	2.1	Implement the chosen improvement/s.
		2.2	Check the selected improvements improve the system as

© Commonwealth of Australia, 2025 Skills Insight

a whole and do not result in unintended consequences.

2.3 Monitor implementation and make adjustments, as required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Customer includes one or more of:	• internal customers • external customers

© Commonwealth of Australia, 2025 Skills Insight

	• final customer.
Supplier includes one or more of:	• internal supplier • external supplier • ultimate source of inputs (e.g. raw materials) to the process.
Muda (waste) includes all of:	• any activity which does not contribute to customer perceived benefit/features • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • other activities which do not yield any benefit to the organisation or any benefit to the organisations customers.
Operations includes all of:	• process • plant and equipment • procedures and practices • skills and work organisation of the workforce • other components which make up the productive organisation.
Implement improvements within one or more of:	• own job role • processes and operations in the work area or team.

Assessment Requirements for MSS403001 Review competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403001A Implement competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to contribute to and implement improvements on one (1) or more occasions and to improve performance in:

- cost
- quality
- delivery
- safety/environment
- employee capability.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- techniques for monitoring cost, quality, delivery, safety/ environment and employee capability
- muda (waste)
- kaizen (continuous improvement)
- key performance indicators (KPIs), their use and problems
- cost components of products (goods or services)
- techniques for identifying and improving employee capability.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403010 Facilitate change in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by individuals responsible for facilitating change processes in an organisation implementing competitive operational practices.

This unit applies to individuals who facilitate the change process resulting from implementing one or more competitive systems or practices. This implementation may also be associated with other changes, such as the introduction of new products, processes or equipment. The unit will usually apply to individuals whose responsibility is at the team, area or section level rather than the whole organisation. The responsibility may be formally designated or be informal, as in mentoring and assisting fellow employees.

This unit assumes that consultation and agreement on the implementation of the competitive systems and practices and other associated changes has already occurred and the nature and extent of the change has been agreed.

This unit does not cover the negotiation of change in a formal industrial relations sense but does cover the skills needed to identify real or potential change implementation issues, including those that may need to be referred to formal consultation and/or dispute settlement procedures.

This unit has a strong emphasis on planning, encouraging and facilitating in a changing environment within the organisation, including using appropriate communication, teamwork, problem solving, initiative and self-management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Define nature and impact of change for designated area and processes**	1.1	Identify the organisation's aims and objectives for the competitive systems and practices techniques related to the change process.
		1.2	Identify opportunities for implementation of change within work area.
		1.3	Determine impacts of change for work area, including potential benefits and impacts on own work and work of fellow employees.
2	**Identify key performance indicators (KPIs)**	2.1	Liaise, where required, with managers, engineers and other staff responsible for designing and/or implementing change.
		2.2	Identify KPIs for own work responsibility and that of the work area.
		2.3	Communicate KPIs to fellow employees.
		2.4	Check that data collection and processing are appropriate for KPIs.
		2.5	Raise and resolve issues related to KPIs with relevant personnel.
3	**Liaise with key stakeholders**	3.1	Identify key stakeholders impacted by the change.
		3.2	Communicate with key stakeholders within scope of authority.

© Commonwealth of Australia, 2025 Skills Insight

		3.3	Identify and address issues and concerns of each stakeholder if within scope of authority.
		3.4	Develop and/or locate information required to address key concerns.
		3.5	Refer issues and concerns outside of scope of authority to appropriate personnel.
4	**Develop a strategy to help implement change**	4.1	Identify or develop a work plan for implementing change.
		4.2	Make information required to support change available to team members.
		4.3	Communicate/circulate draft work plan to other employees in work area, supervisors, technical experts and other appropriate personnel for comment.
		4.4	Assess suggested changes and incorporate into work plan, where appropriate.
5	**Implement change**	5.1	Obtain authorisation to commence change implementation in accordance with organisation procedures.
		5.2	Implement change in accordance with work plan and organisational work health and safety (WHS) and consultation procedures.
6	**Monitor implementation of change**	6.1	Maintain open communication channels with all stakeholders during implementation.
		6.2	Monitor KPIs during implementation.
		6.3	Encourage and facilitate improvement suggestions of team members.
		6.4	Identify areas requiring improvement in change implementation.
		6.5	Make improvements to implementation according to organisation procedures.

Assessment Requirements for MSS403010 Facilitate change in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more changes, to:

- identify competitive systems and practices in own workplace
- identify changes to own work and work area flowing from implementation of relevant competitive systems and practices
- consult with stakeholders regarding changes and issues
- develop a strategy to implement required changes
- make suggestions for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- features of competitive operational practices in own work area
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation procedures
- planning and implementation strategies
- employee assistance mechanisms within organisation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency

© Commonwealth of Australia, 2025 Skills Insight

  - must include facilitating change in relation to the implementation of competitive operational practices in own work area
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Application

This unit of competency covers the skills and knowledge required to analyse manual handling in terms of its efficiency and safety.

This unit applies to an individual who is required to examine the manual handling component of a job and improve it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others or it may be for the person's own job.

This unit primarily requires the application of skills associated with problem solving, initiative and enterprise to identify safe and efficient manual handling, and planning and organising to ensure processes are implemented. This unit also requires communication with, and involvement of, others to ensure they understand the approach and to facilitate training.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Assess manual**	1.1	Identify manual handling hazards in work area.

© Commonwealth of Australia, 2025 Skills Insight

	handling risks	1.2	Assess risks arising from manual handling hazards.
2	**Analyse physical effort requirements of job**	2.1	Determine basic manual handling requirements of job.
		2.2	Analyse requirements in terms of components, such as lift, move, place and hold.
		2.3	Analyse items to be handled in terms such as weight, size, shape or other hazards.
3	**Determine time/effort components of physical effort**	3.1	Break required movement pattern down into movement components.
		3.2	Determine time and effort requirements for movements.
		3.3	Develop alternative movement patterns.
		3.4	Determine time and effort requirements for alternative movements.
		3.5	Determine handling aids required to assist movement.
		3.6	Determine preferred movement pattern.
4	**Analyse the ergonomics of physical effort**	4.1	Analyse the ergonomics of the preferred movement pattern.
		4.2	Develop substitute movements for any movement which is not ergonomically sound.
		4.3	Determine handling aids required to improve ergonomics of required movements.
5	**Optimise application of physical effort**	5.1	Select movement patterns which are ergonomically sound and time and effort efficient.
		5.2	Ensure all relevant people are trained to use these methods.
		5.3	Ensure procedures and practices reflect the optimum methods.

© Commonwealth of Australia, 2025 Skills Insight

5.4 Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Procedures (written,	• work instructions

© Commonwealth of Australia, 2025 Skills Insight

verbal, visual, computer based, etc.) include one or more of:	• standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Manual handling hazards include one or more of	• loads that pose a risk of injury • ergonomically unsound movements • hazard requirements as defined by relevant work health and safety (WHS) Acts and regulations, industry standards and best practice.
Ergonomically unsound movements include one or more of	• awkward and repetitive movements • carrying, pushing, pulling or lifting of heavy loads • carrying or movement of hard, sharp, slippery or other difficult to grasp loads.
Ergonomically sound movements include one or more of	• keeping loads close to the body and near the person's centre of gravity • using diagonal foot positions for lifting • moving loads at waist height rather than directly from the floor.

Assessment Requirements for MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for at least (1) one job/process, to:

- analyse manual handling requirements and risks
- distinguish between ergonomically sound and unsound movement
- analyse manual handling movements and risks for an individual
- relate manual handling requirements to job efficiency.

Knowledge Evidence

- Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:
- principles of ergonomics/safe movement
- principles of work analysis
- relevant work health and safety (WHS) Acts and regulations as they apply to manual handling
- principles of job and work method design as applied to efficient and safe movement
- aids that can assist with or substitute for manual handling.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include analysing manual handling processes in own workplace

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include the use of appropriate manual handling guides, tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403087 Mistake proof an operational process

Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to analyse a process that a team is responsible for and determine methods of mistake proofing it. This includes determining, implementing and sustaining improvement activities.

The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to mistake proof the production process in their area.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse process**	1.1	Identify sources of variability and non-conformance in the process
		1.2	Identify critical control points in process
		1.3	Analyse causes of variability and non-conformance

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
2	**Develop preventative options**	2.1	Liaise with team members and other people to develop mistake proof options for performing operation
		2.2	Test and validate mistake proofing options
3	**Implement permanent fix**	3.1	Liaise with relevant people to have systems and procedures changed to implement solution
		3.2	Liaise with relevant people to implement the solution
		3.3	Liaise with relevant people to ensure self and others in the team or work area have appropriate skills
		3.4	Follow through to ensure implementation occurs
4	**Monitor implementation**	4.1	Critically observe the implementation
		4.2	Compare the results of the implementation against the expected outcomes
		4.3	Modify solution to improve outcomes
		4.4	Confirm procedures reflect change
		4.5	Confirm training and assessment reflects change
		4.6	Audit change at agreed period or cycle
		4.7	Address any observed deviation
5	**Seek improvements**	5.1	Observe and monitor changes
		5.2	Analyse process again to ensure improvements are sustained

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS403051 Mistake proof an operational process.

Assessment Requirements for MSS403087 Mistake proof an operational process

Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- mistake proofed (applied baka yoke or poka yoke) to at least 1 operational process.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- baka yoke and poka yoke approaches
- factors causing variability in the process and methods of controlling it
- error causes and control options
- cost benefit analysis, feasibility, regulatory compliance and perceived value to the customer
- validation of baka yoke and poka yoke proposals.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS404052 Apply statistics to operational processes

Modification History

Release 1. Supersedes and is equivalent to MSS404052A Apply statistics to operational processes

Application

This unit covers the ability to gather and analyse process data to support the control of processes and operations. It includes interpretation of sampling procedures, frequency distributions, random and non-random variations in data/control charts; use of control limits to determine whether or not monitored processes are in control; and communicating this information to others.

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

This unit primarily requires the application of skills associated with gathering and analysing data and communicating statistical information to others. This unit also has a strong emphasis on problem solving, initiative and enterprise, planning and organising, and self-management to solve problems and manage processes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Collect process data**	1.1	Interpret sampling scheme.
		1.2	Obtain measurements in accordance with standard sampling procedures.
		1.3	Handle data in accordance with procedures.
2	**Interpret data**	2.1	Plot data on appropriate control chart.
		2.2	Distinguish between random and non-random patterns of results.
		2.3	Identify results outside the control limits.
		2.4	Recognise situations requiring action.
		2.5	Take action in accordance with procedures.
		2.6	Determine cost of non-conformance.
3	**Calculate control limits**	3.1	Consult relevant stakeholders to determine appropriate limits.
		3.2	Use relevant methods to calculate/revise control limits.
		3.3	Plot limits on control chart and complete other records in accordance with procedures.
		3.4	Explain impact of limit to relevant stakeholders.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Sampling schemes include one or more of:

- sampling for attributes or sampling for variables
- batch, continuous or custom made products
- type of sample
- size of sample
- number of items/samples
- number/type of measurements to be done on each sample
- timing of sampling
- location of sampling points
- sampling equipment
- measurement/testing equipment/methods.

Checking, analysing and storing data includes one or more of:

- calculating means, ranges, mean of means and standard deviations (using appropriate calculation aids)
- entering data into a software package
- recording data either in writing or electronically

© Commonwealth of Australia, 2025 Skills Insight

	• other required manipulations of the data.
Control charts include one or more of:	• run • tally • mean/range • attributes • other relevant charts.
Variations include all of:	• random variations for which no cause can be found • non-random variations for which a cause can be found and so the cause of the variation eliminated (also called identifiable cause, assignable cause or special cause) • non-random variations used to predict possible breaches of the control limits.
Limits include one or more of:	• control limits (also referred to as process capability) within which the process will operate if it is 'under control' • appropriate limits: 1 sigma warning limits, 2 sigma warning limits, 3 sigma control limits, and 6 sigma limits.
Costs of non-conformance include one or more of:	• reprocessing/rework • expediting • unplanned service • excess inventory • complaint handline • downtime • returns • scrap • labour costs • material costs • infrastructure costs/overhead • utility costs.
Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of

© Commonwealth of Australia, 2025 Skills Insight

the process.

Assessment Requirements for MSS404052 Apply statistics to operational processes

Modification History

Release 1. Supersedes and is equivalent to MSS404052A Apply statistics to operational processes

Performance Evidence

Evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria under the specified conditions of assessment and must include on two (2) or more occasions:

- gathering, analysing and interpreting process data to support the control of processes and operations
- applying specified sampling procedures
- investigating the causes of variation in a process
- communicating with other employees to obtain samples/data and to explain results and limits
- calculating and plotting data and control limits
- completing other required documentation.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- purpose of sampling and measurement
- sampling methods to be used
- methods of calculating means, standard deviations and the like and their purpose in statistical control
- concept of limits, including 1, 2, 3 and 6 sigma limits
- types of control charts and their applications to different types of process/product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process (e.g. measurement) causes of variation
- recognition of stable and unstable processes
- causes of stability/instability in the process
- calculation of control limits/process capability and the applications of different control limits
- the standard distribution curve and confidence limits.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of statistics to an operational process in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS404060 Facilitate the use of planning software systems in a work area or team

Modification History

Release 1. Supersedes and is equivalent to MSS404060A Facilitate the use of planning software systems in a work area or team

Application

This unit of competency covers the skills and knowledge required to facilitate the use of planning software in an organisation in an individual's work area or team. These systems are known by various generic names, such as Enterprise Resource Planning (ERP), Materials Resource Planning (MRPII, MRP III etc.) or by proprietary names.

This unit applies to an individual who will access the planning software system for their own work, but will also need to provide support and organise skill development programs for their team or work group members. The individual will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to facilitate the use of the planning software system. The planning software system will be used routinely in the work of the team or work group.

This unit primarily requires the application of skills associated with using communication technology and supporting team use of planning software. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that planning software is used efficiently. This requires aspects of learning and self-management to ensure own performance and that of the team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify scope of planning software**	1.1	Identify categories of information held by planning software.
		1.2	Identify information categories relevant to team and area processes.
		1.3	Identify range of information able to be provided to planning software by team or work group.
		1.4	Identify range of information able to be provided to team or work group by planning software.
2	**Communicate using the planning software system**	2.1	Send and receive information using planning software.
		2.2	Send and receive messages using planning software.
3	**Make decisions using planning software**	3.1	Interrogate the planning software system to find required current, historical or predicted information.
		3.2	Take actions appropriate to the information in accordance with procedures.
4	**Monitor the use of planning software**	4.1	Routinely monitor planning software information.
		4.2	Review performance and use of planning software with team.
5	**Support others to use planning software**	5.1	Regularly communicate with team or other work group members, both using planning software and face to face.
		5.2	Identify improvements required.
		5.3	Take action to implement improvements in accordance with procedures.

Assessment Requirements for MSS404060 Facilitate the use of planning software systems in a work area or team

Modification History

Release 1. Supersedes and is equivalent to MSS404060A Facilitate the use of planning software systems in a work area or team

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, to facilitate and/or provide support on three (3) or more occasions, to:

- identify team or work group area information requirements and relate to planning software categories
- lead and motivate others in using planning software
- ensure information sent to planning software is accurate and appropriate
- obtain regular and one-off information from planning software
- make decisions using planning software generated information.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- hierarchy of planning software system and operation
- information available from/through the planning software system
- query facilities and information analysis capabilities offered by planning software
- support/training/skill development mechanisms available for access by team members.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include facilitating and/or support for teams or work groups using planning software systems in own workplace

MSS404082 Assist in implementing a proactive maintenance strategy

Modification History

Release 1. Supersedes and is equivalent to MSS404082A Assist in implementing a proactive maintenance strategy

Application

This unit of competency covers the skills and knowledge required by a maintenance person to assist in the implementation of a proactive maintenance strategy in an organisation. This unit includes the interaction between a maintenance worker and operators, as appropriate.

This unit applies to a maintenance person in an organisation that has adopted or is implementing total preventative/productive maintenance (TPM), reliability centred maintenance (RCM) or similar strategies. As part of this, the maintenance person is expected to assist in the implementation by determining appropriate maintenance related schedules and also by providing maintenance related assistance to non-maintenance personnel, such as assisting production personnel to fulfil their role in the TPM/RCM strategy.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to analyse maintenance requirements. Communication, teamwork and planning and organising skills will be required to implement reliability strategies. This requires aspects of self-management to ensure improvement of own performance and learning.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Develop components of reliability strategy for a work/plant area**	1.1	Determine manufacturer's recommended inspection, servicing and related schedules for relevant plant.
		1.2	Consult with relevant people with regard to appropriate inspections, services and schedules.
		1.3	Discuss any conflicts with relevant people and seek resolution of conflicts.
		1.4	Develop schedules in liaison with relevant people.
		1.5	Identify inspections and servicing which may be done by operations personnel in liaison with relevant stakeholders.
2	**Assess current practice for maintenance implications**	2.1	Identify the overall equipment effectiveness (OEE) or other organisation targets for equipment/plant.
		2.2	Evaluate procedures for plant/equipment reliability implications.
		2.3	Discuss current practices with relevant people to determine any plant/equipment reliability implications.
		2.4	Recommend changes to improve plant/equipment reliability in accordance with procedures.
3	**Assist in implementing the reliability strategy**	3.1	Arrange for schedules to be incorporated in relevant work plans.
		3.2	Identify training needs in discussion with relevant personnel.
		3.3	Assist personnel to develop required skills for inspections/ servicing within scope of authority.
		3.4	Collect data/information as required by own work plan.
		3.5	Compare data/information with performance indicators.
		3.6	Recommend improvements to reliability strategy in

© Commonwealth of Australia, 2025 Skills Insight

accordance with procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Strategies include one or more of:

- mean time between failure (MTBF) which is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is

© Commonwealth of Australia, 2025 Skills Insight

	failing • failure mode and effects analysis (FMEA) which is a systematic approach that identifies potential failure modes in a system, product or equipment based operations caused by either design or operation/process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring • industry sectors have highly adapted forms of FMEA and which may practice traditional FMEA in their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification. HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability • condition monitoring which often involves quite sophisticated monitoring of equipment, including such things as vibration monitoring, instrumental analysis of lubricating oil, and so on, to determine the current state of the equipment, monitor the change in this condition and predict when it needs servicing/maintenance to maintain reliability.
Inspection includes one or more of:	• reading dials, gauges and meters • observations, including those using sight, hearing, smell and feel • observations of product quality/faults/rejects.
Servicing includes one or more of:	• cleaning • lubricating • topping up • adjusting.
Procedures (written, verbal, visual, computer based, etc.) include one or more of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.

Assessment Requirements for MSS404082 Assist in implementing a proactive maintenance strategy

Modification History

Release 1. Supersedes and is equivalent to MSS404082A Assist in implementing a proactive maintenance strategy

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more work/plant areas, to:

- source information from manuals and other technical documentation or software
- effectively communicate with users on equipment operational and maintenance history
- develop schedules for maintenance activities, including seeking technical assistance, where appropriate
- differentiate between proactive and traditional maintenance strategies.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- requirements of the proactive maintenance strategy being implemented
- operating principles and procedures for equipment/plant subject to proactive maintenance strategy
- purpose and processes for data collection in proactive maintenance strategies
- procedures relevant to own job and organisation implementation of proactive maintenance
- methods of making/recommending improvements.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS404084 Undertake process capability improvements

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required to make process capability improvements, including analysing data from the process, developing improvements to eliminate variation due to assignable causes and then implementing actions.

This unit applies to a person who reviews a range of process capability data and information and makes (or arranges for) changes to be made to procedures, equipment or process and then recalculates the process capability and monitors resulting improvement actions. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to suggest and justify process capability improvements.

Process capability may have been determined using either a six sigma or three sigma processes. This unit applies to the application of statistical methods and the determination of capability based on those methods.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Assessment Requirements for MSS404084 Undertake process capability improvements

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and implemented at least 1 process capability improvement.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- data collection and manipulation techniques
- variability, normal distribution and three and six sigma limits
- type of variations:
  - random variation (no assignable cause)
  - non-random variation (which has an assignable cause).
- causes of non-random variation in the process
- approaches to reducing variability.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405001 Develop competitive systems and practices for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405001A Develop competitive systems and practices for an organisation

Application

This unit of competency covers the skills and knowledge required to develop new strategies for competitive systems and practices or make improvements to existing systems and practices.

This unit applies to a manager, technical specialist or similar in an organisation implementing competitive systems and practices, or in an organisation wishing to embark on the competitive systems and practices path. The person needs to be able to analyse the needs of the organisation and develop strategies and systems for effective implementation and continuous improvement of competitive systems and practices in the organisation. They may be developing competitive systems and practices for the first time for this organisation, or may be developing/improving existing systems and practices.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to determine effective competitive systems and practices strategies for the organisation. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine appropriate analytical techniques**	1.1	Liaise with key stakeholders to determine objectives of operations strategy.
		1.2	Examine current operations to determine major areas requiring improvement
		1.3	Compare possible strategies, techniques and tools against organisation needs.
		1.4	Select possible strategies, techniques and tools.
		1.5	Consult with key stakeholders to confirm selected strategies, techniques and tools.
2	**Develop competitive systems and practices strategies**	2.1	Estimate benefit/cost ratio for major stakeholders and the value stream overall.
		2.2	Determine preferred operations strategy.
		2.3	Examine and adapt strategy to organisation needs and priorities.
		2.4	Examine and adapt competitive systems and practices techniques and tools required to implement strategy.
		2.5	Negotiate with key stakeholders to develop an implementation plan.
		2.6	Determine key information and performance indicators required.
3	**Implement strategy**	3.1	Determine data collection required.
		3.2	Identify and evaluate methods of collecting and processing required data.

© Commonwealth of Australia, 2025 Skills Insight

		3.3	Determine hardware and other resources required.
		3.4	Evaluate skill needs required.
		3.5	Ensure all resources/training are available and completed.
		3.6	Implement strategy.
4	**Monitor implementation of strategy**	4.1	Compare information/performance indicators with desired levels.
		4.2	Liaise with key stakeholders regarding strategy issues.
		4.3	Identify areas requiring adjustment.
		4.4	Make required adjustments.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring

© Commonwealth of Australia, 2025 Skills Insight

	and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Competitive systems and practices techniques and tools include one or more of:	• value stream mapping • 5S • JIT • mistake proofing • process mapping • establishing customer pull • kaizen and kaizen blitz • setting of KPIs/metrics • identification and elimination of waste (muda) • standardisation.
Customer requirement stages where value stream actions may occur include one or more of:	• sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support.

Assessment Requirements for MSS405001 Develop competitive systems and practices for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405001A Develop competitive systems and practices for an organisation

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop the competitive systems and practices of an entire organisation, department or equivalent and to:

- determine analytical techniques which are currently appropriate for the organisation
- develop/improve the strategies used
- implement and monitor the new/improved strategy.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop the organisation's competitive systems and practices, including knowledge of:

- competitive systems and practices tools which may be relevant
- kaizen and kaizen blitz techniques
- muda identification and minimisation
- benefit/cost determination and application
- matching and prioritising strategies to organisation goals.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project aimed at developing an organisation's competitive systems and practices for an operational workplace.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405004 Develop business plans in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Application

This unit of competency covers the skills and knowledge required to develop business plans in an organisation implementing competitive systems and practices. This unit applies to an individual in an organisation implementing competitive systems and practices (e.g. a production/plant manager, purchasing/technical officer or similar) who is required to develop a section business plan to meet the requirements of the overall strategic plan of the organisation. The plan includes the impact on the value stream and other critical competitive systems and practices factors. Due to competitive pressures this may be a reasonably frequent activity and can occur at any time over the business cycle. The plan may be in response to a specific change, or it may be a plan for the next period.

This unit assumes that up-to-date information about the organisation's role in the value stream is available.

This unit primarily requires the application of skills associated with gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to develop an effective and measurable business plan. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine purpose of plan**	1.1	Confirm reason for developing plan and expected outcomes from plan.
		1.2	Confirm purpose of plan with all relevant stakeholders.
		1.3	Check expected outcomes from plan with overall strategic plan for organisation.
		1.4	Identify any potential areas for conflict between proposed plan and strategic directions.
		1.5	Negotiate with relevant stakeholders to resolve issues.
2	**Develop objectives and strategies**	2.1	Draft objectives for business plan.
		2.2	Draft strategies to achieve these objectives.
		2.3	Determine implications for value stream.
		2.4	Determine capital or workplace layout/organisation implications for objectives and strategies.
3	**Develop plans to meet objectives and strategies**	3.1	Negotiate with relevant stakeholders over implications for objectives and strategies.
		3.2	Liaise with relevant stakeholders to develop plans to meet objectives.
		3.3	Determine relevant key performance indicators (KPIs) for plan.
		3.4	Check KPIs are appropriate for purpose of plan.
		3.5	Check plan will deliver planned purpose.
		3.6	Map plan to changed value stream.

© Commonwealth of Australia, 2025 Skills Insight

		3.7	Adjust plan to optimise value stream.
		3.8	Validate plan with relevant stakeholders.
4	**Monitor the implementation of the plan**	4.1	Release plan for implementation.
		4.2	Check the key progress points against the key stages of the plan.
		4.3	Note any discrepancies.
		4.4	Take action to ensure correct implementation of plan.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams

© Commonwealth of Australia, 2025 Skills Insight

- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Objectives include performance in one or more of:

- sales
- profit
- quality
- work health and safety (WHS)
- environment
- competitive systems and practices
- human, physical, financial and environmental/resource use.

Strategies to meet objectives include one or more areas:

- human and industrial relations practice
- material/component and resources use
- sustainable environmental practices
- sales and marketing
- financial
- regulatory compliance.

Relevant stakeholders include one or more of:

- other team members
- other workers
- management
- technical specialists
- other members of the value stream.

Customer requirement stages where value stream actions may occur include one or more of:

- sales outlet/representative
- information gathering, data analysis and research
- product design
- raw material sourcing
- intermediate processing
- final assembler/ collation/preparation
- support services (e.g. accounting, finance and legal)
- storage and delivery to customer
- after market support.

Assessment Requirements for MSS405004 Develop business plans in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop one (1) or more business plans covering an organisation, department or section (or similar) and to:

- determine the purpose of the plan
- draft objectives of the plan and strategies for achieving them
- develop a plan which uses the strategies to deliver the objectives and optimise the value stream
- monitor the implementation of the plan and make changes as needed.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop and modify a business plan, including knowledge of:

- techniques and purposes of developing business plans
- parameters for business plans, including scope, period and risk
- relationship between business plans and competitive systems and practices
- impacts of alternatives on the value stream
- key performance indicators (KPIs) and the characteristics of good (optimises the whole) and poor KPIs
- risk mitigation, including business, quality, sustainability and other risks.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real business plan development for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405030 Optimise cost of a product or service

Modification History

Release 1. Supersedes and is equivalent to MSS405030A Optimise cost of a product or service

Application

This unit of competency covers the skills and knowledge required to examine the costs of a product or service and determine methods of reducing costs. This unit applies to an individual a who is required to undertake a detailed study of a product or service's costs, including analysing it by its cost components to determining the best method of lowering the cost overall. This unit differs from *MSS405031 Undertake value analysis of a product or process costs in terms of customer requirements*, in that it looks at all costs, including overheads and takes a wider and more traditional approach to the cost of the product. Information and cost reduction strategies gained from the application of this unit may support other cost approaches in the enterprise, including value stream costing.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to calculate cost components and determine cost optimisation strategies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into costing methods.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse total cost components of a product or service**	1.1	Identify all cost components of product or service.
		1.2	Allocate cost components to major categories, such as overhead, depreciation, energy, consumables and labour.
		1.3	Distinguish between costs which directly deliver customer features/benefits and muda (waste).
2	**Optimise costs**	2.1	Analyse causes of costs which lead to customer features/benefit.
		2.2	Determine methods of increasing the customer benefit/cost ratio.
		2.3	Analyse causes of muda costs.
		2.4	Determine methods of reducing/eliminating muda costs.
		2.5	Analyse interactions between cost components.
		2.6	Check that one method of reducing costs does not cause an increase in another cost/reduction in consumer benefit.
		2.7	Check that cost reduction plans do not reduce required levels of regulatory compliance or work health and safety (WHS).
3	**Implement cost optimisation**	3.1	Develop cost optimisation plans.
		3.2	Negotiate with relevant people to agree on implementation plans.
		3.3	Take actions to implement the cost optimisation.
		3.4	Monitor the implementation of the cost optimisation.
		3.5	Make adjustments to the plan, as required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Muda (waste) includes all of:	• excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any

© Commonwealth of Australia, 2025 Skills Insight

benefit to the organisations customers.

Cost includes all of:

- the monetary value of expenditures able to be directly identified for supplies, services, direct labour, materials, components, cost of inventory, faults and reworks, rejects/scrap, equipment and other items used in the production of the product
- allocations and estimates for indirect costs (e.g. indirect labour, rent, energy, water and cost of capital) where a direct monetary value cannot be identified.

Cost optimisation plans include all of:

- application scope (e.g. product/s, services, areas, employees and suppliers included in plan)
- target costs and target cost reductions
- implementation period
- method of monitoring
- method of communicating progress to stakeholders.

Assessment Requirements for MSS405030 Optimise cost of a product or service

Modification History

Release 1. Supersedes and is equivalent to MSS405030A Optimise cost of a product or service

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to optimise costs for one (1) or more products or services and to:

- analyse all cost components
- optimise costs and minimise muda
- implement the cost optimisation.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to optimise costs, including knowledge of:

- cost component categories
- methods of allocating indirect costs and their implications
- expressing customer perceived benefit in cost or dollar value terms
- major controllable costs for the organisation, and how to control them
- types of muda and how to reduce it
- benefit cost/ratios, their determination and application.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real cost optimisation project for an operational workplace.

MSS405031 Undertake value analysis of product or process costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS405031A Undertake value analysis of product or process costs in terms of customer requirements

Application

This unit of competency covers the skills and knowledge required by an individual who is required to analyse products and processes to determine the value-adding factors, including design and processing costs that most impact on meeting customer requirements and which may also include competitor benchmarking. The unit also includes implementing identified changes that increase cost-efficiency. The unit may be applied individually or in a team environment.

In this unit an individual uses an analysis of the benefits/features which a customer perceives to be in a product or service as a basis for determining appropriate or unnecessary (muda) cost and so identifying and reducing muda (waste).

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to determine cost-efficiencies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into costing methods.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse customer benefits to determine appropriate or muda (waste) costs**	1.1	Analyse product or service to determine features/benefits perceived by customer in product.
		1.2	Analyse cost components of product or service and determine those which deliver customer features/benefits and those which are either appropriate or muda.
		1.3	Determine any additional features that may be added to improve saleability.
		1.4	Analyse muda cost components and allocate to direct and indirect cost categories.
		1.5	Determine options for reducing direct and indirect muda costs.
		1.6	Select cost-related actions which maximise customer benefits and minimise costs.
		1.7	Where required, undertake competitor benchmarking to provide reference points.
2	**Analyse performance variance**	2.1	Identify muda processing or operational steps for product or service following completion of customer benefit analysis.
		2.2	Analyse all costs and determine methods of reducing costs and muda.
		2.3	Develop plan and recommendations for actions required to achieve cost improvement or added customer benefits to improve saleability.
		2.4	Submit plan and recommendations to stakeholders.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Assessment Requirements for MSS405031 Undertake value analysis of product or process costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS405031A Undertake value analysis of product or process costs in terms of customer requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to undertake value analysis on one (1) or more products or processes and to:

- distinguish between appropriate costs and muda
- distinguish between direct and indirect costs
- determine methods of reducing both appropriate costs and muda
- develop a plan to increase customer perceived benefits/ saleability and/or reduce costs and muda.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to undertake value analysis, including knowledge of:

- cost components, direct and indirect costs
- customer perceived benefits
- factors influencing saleability
- impact of customer features/benefits on sales, market share and firms profitability
- major costs which are controllable (and how to control them)
- types of muda
- methods of reducing muda.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real value analysis project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405070 Develop sustainable energy practices

Modification History

Release 1. Supersedes and is equivalent to MSS405070A Develop and manage sustainable energy practices

Application

This unit of competency covers the skills and knowledge required by an individual to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. Areas covered include efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of enterprises.

The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and muda (waste) with the muda being further categorised into necessary muda and unnecessary muda. Strategies for eliminating or minimising energy muda are covered with benefit/cost analyses being required for strategies.

This unit primarily requires the application of communication and problem solving skills associated with collecting and analysing information. An ability to analyse energy use of technology or processes will be applied. Initiative and enterprise, and planning and organising are also required to develop plans for efficient energy use. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of processes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse energy use**	1.1	Identify all energy consuming processes.
		1.2	Determine quantity and nature of energy consumed.
		1.3	Analyse energy consumed and generated in different parts of the process.
		1.4	Determine source of energy consumed in process.
2	**Develop energy conservation plans**	2.1	Determine the efficiency of use of energy by all energy consuming processes.
		2.2	Determine causes of low efficiency of use.
		2.3	Develop plans for increasing the efficiency of energy use.
		2.4	Determine benefit/cost of plans.
3	**Develop energy trading plans**	3.1	Compare energy generating activities with energy consuming activities.
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities.
		3.3	Develop plans for energy trading.
		3.4	Determine benefit/cost of plans.
4	**Investigate alternative sources of energy**	4.1	Develop a specification for energy required.
		4.2	Identify a range of sources for that energy.
		4.3	Determine benefit/cost for alternative energy sources.
5	**Develop plans for**	5.1	Compare benefit/costs for different alternatives

© Commonwealth of Australia, 2025 Skills Insight

	more efficient energy use		developed.
		5.2	Rank proposals based on benefit/cost compare to limited resources.
		5.3	Check proposals meet regulatory requirements.
		5.4	Recommend proposals for improving energy efficiency.
6	**Implement selected plans**	6.1	Liaise with relevant people to implement energy efficiency plans.
		6.2	Follow through to ensure implementation occurs.
		6.3	Monitor implementation and make adjustments, as required.
		6.4	Check new energy usage to ensure improvements have occurred.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis

© Commonwealth of Australia, 2025 Skills Insight

- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Muda includes all of:

- excess production and early production
- delays
- movement and transport
- poor process design
- inventory
- inefficient performance of a process
- making defective items
- activities which do not yield any benefit to the organisation or any benefit to the organisations customers.

Necessary muda includes all of:

- an activity or cost which does contribute directly to customer benefit/feature in the product
- an activity or cost which cannot be avoided (e.g. regulatory compliance and fixed costs).

Unnecessary muda includes all of:

- an activity or cost which does not contribute directly to customer benefit/features in the product
- an activity or cost which can be avoided.

Sources and use of energy includes one or more of:

- all sources of energy used by the process be it electricity, gas/oil/coal or mobile transport fuel
- used for heating and cooling
- used for moving materials (e.g. pumps and conveyors)
- used for modifying materials (e.g. cutting, forming, weaving, knitting, reacting, moulding, extruding and mixing)
- used for generating pressure/vacuum or providing motive power for equipment and transport.

© Commonwealth of Australia, 2025 Skills Insight

Energy trading includes one or more of:	• formal trading, such as buying of energy through alternative suppliers and tender processes and selling of excess energy produced by the organisation to energy companies or other producers • internal trading of excess energy from one area to an energy consuming area elsewhere in the organisation.

Assessment Requirements for MSS405070 Develop sustainable energy practices

Modification History

Release 1. Supersedes and is equivalent to MSS405070A Develop and manage sustainable energy practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop sustainable energy practices for one (1) or more businesses and to:

- analyse current energy use
- develop conservation and trading plans
- investigate alternative sources of energy
- develop plans for more efficient energy use
- monitor plans implemented and check energy improvements have occurred.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop sustainable energy practices, including knowledge of:

- sources of data and required calculations
- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- relevant regulatory/legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
    - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

© Commonwealth of Australia, 2025 Skills Insight

  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project developing sustainable energy practices for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405070A Develop and manage sustainable energy practices

Modification History

New unit, superseding MSACMT670A Develop and manage sustainable energy practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. Areas covered include efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of enterprises.

Application of the Unit

This unit applies to an individual who is required to establish systems for improved energy practices in an organisation. The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and waste with the waste being further categorised into necessary waste and unnecessary waste. Strategies for eliminating or minimising energy waste are covered with benefit/cost analyses being required for strategies.

This unit primarily requires the application of communication and problem solving skills associated with collecting and analysing information. An ability to analyse energy use of technology or processes will be applied. Initiative and enterprise, and planning and organising are also required to develop plans for efficient energy use. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of processes.

Where the quantum of energy used is not easily available or a formal calculation of energy use is required through an energy balancing calculation (e.g. for regulatory purposes) the unit *MSS015011A Conduct a sustainability energy audit* may also be required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse energy use	1.1	Identify all energy consuming processes
		1.2	Determine quantity and nature of energy consumed
		1.3	Analyse energy consumed and generated in different parts of the process
		1.4	Determine source of energy consumed in process
2	Develop energy conservation plans	2.1	Determine the efficiency of use of energy by all energy consuming processes
		2.2	Determine causes of low efficiency of use
		2.3	Develop plans for increasing the efficiency of energy use
		2.4	Determine benefit/cost of plans
3	Develop energy trading plans	3.1	Compare energy generating activities with energy consuming activities
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities

© Commonwealth of Australia, 2025 Skills Insight

		3.3	Develop plans for energy trading
		3.4	Determine benefit/cost of plans
4	Investigate alternative sources of energy	4.1	Develop a specification for energy required
		4.2	Identify a range of sources for that energy
		4.3	Determine benefit/cost for alternative energy sources
5	Develop plans for more efficient energy use	5.1	Compare benefit/costs for different alternatives developed
		5.2	Rank proposals based on benefit/cost compare to limited resources
		5.3	Check proposals meet regulatory requirements
		5.4	Recommend proposals for improving energy efficiency
6	Implement selected plans	6.1	Liaise with relevant people to implement energy efficiency plans
		6.2	Follow through to ensure implementation occurs
		6.3	Monitor implementation and make adjustments, as required
		6.4	Check new energy usage to ensure improvements have occurred

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using common units, symbols and formulae common in energy-related calculations
- applying mathematics

© Commonwealth of Australia, 2025 Skills Insight

- communicating with a variety of groups and individuals using different media
- solving complex problems individually and as part of a team
- reviewing range of existing data for suitability and determining where new data gathering is required
- planning and organising complex whole of organisation activities relating to energy use, including objectives, timelines, implementation procedures and monitoring strategy
- determining where energy balancing techniques are required
- accessing manufacturers' data and other sources of energy consumption for individual equipment and processes
- mapping processes and energy flows
- calculating, manipulating and interpreting numerical data
- ranking energy consumption and waste for area, sites or processes
- calculating the efficiency of use of energy by equipment and processes
- consulting with technical and operative staff on possible non-obvious energy wastes
- consulting and negotiating with stakeholders on implementation process for sustainability improvement

Required knowledge

Required knowledge includes:

- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- relevant regulatory/legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of their ability to: • gather appropriate data to allow energy analyses • categorise energy use into necessary use and waste • develop options for energy reduction including

© Commonwealth of Australia, 2025 Skills Insight

	presenting of alternatives and benefit/cost analyses • develop strategies and plans for energy use and monitor implementation.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise

© Commonwealth of Australia, 2025 Skills Insight

	• the work organisation, culture, regulatory environment and the industry sector
Waste	Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within operations, categories of waste include: • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers
Necessary waste	Necessary waste is: • any activity or cost which does not contribute directly to customer benefit/feature in the product, and which cannot be avoided (e.g. regulatory compliance and fixed costs). Necessary waste cannot be eliminated but should be managed
Unnecessary waste	Unnecessary waste is: • any activity or cost which does not contribute directly to customer benefit/features in the product and can be avoided. Unnecessary waste should be eliminated as quickly as practical
Energy	Energy includes: • all sources of energy used by the process be it electricity, gas or mobile transport fuel The uses of the energy will also be potentially wide and include: • heating and cooling • moving materials (e.g. pumps and conveyors) • modifying materials (e.g. cutting, forming, weaving, knitting, reacting, moulding, extruding and mixing) • generating pressure/vacuum or providing motive power for equipment and transport
Energy trading	Energy trading means both formal trading where the organisation investigates alternatives to:

© Commonwealth of Australia, 2025 Skills Insight

	• the buying of energy through alternative suppliers and tender processes • selling of excess energy produced by the organisation to energy companies or other producers and • internal trading of excess energy from one area to an energy consuming area elsewhere in the organisation

MSS405075 Facilitate the development of a new product

Modification History

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

Application

This unit of competency covers the skills and knowledge required to facilitate the development of a new or evolutionary product within an existing range of products and encompasses design for manufacture, determining the process capability and the facilitation of its initial production.

This unit applies to an individual responsible for the development of a new product. The unit assumes an initial product design has been prepared by a designer and also assumes a working knowledge of all main processes and materials so that an informed choice can be made between them. The person will normally be a manager or technical expert and be required to work closely with a range of other management and operations personnel.

The unit requires balancing the business and technical sides of the new product and would typically be done as part of a cross-functional team. This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Confirm design brief of new product in consultation with relevant people**	1.1	Review product design with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements.
		1.2	Determine any regulatory, industry code/intellectual property (IP) requirements for product.
		1.3	Identify any required tooling, process or equipment needs.
		1.4	Confirm design brief, including relevant drawings, to meet needs.
		1.5	Determine design brief conforms to organisation objectives and capability.
		1.6	Obtain approval on total design brief from all relevant personnel.
2	**Determine material requirements for product**	2.1	Select appropriate materials or combination of materials/ components in liaison with key stakeholders.
		2.2	Determine material/component testing and evaluation regime required to meet product end use requirements, including regulatory/industry code requirements.
		2.3	Arrange for testing and evaluation of trial materials/ components.
		2.4	Guide material trial process and interpret material trial results.
		2.5	Determine final materials/components specifications and details of value chain.

© Commonwealth of Australia, 2025 Skills Insight

3	**Determine process requirements for product**	3.1	Select appropriate process to make product in liaison with key stakeholders and based on relevant factors.
		3.2	Determine any special process/equipment requirements for this product.
		3.3	Communicate with production personnel to determine any concerns and/or training or other needs.
		3.4	Adjust the design, as required, to satisfy customer and production needs.
4	**Ensure process needs for new product have been met**	4.1	Liaise with equipment design/procurement personnel.
		4.2	Interpret hardware specifications and ensure they are appropriate for the job required.
		4.3	Liaise with process personnel to ensure appropriate draft procedures for new product have been developed.
		4.4	Validate product cost and design meets organisation requirements and capability.
5	**Trial new product through the process**	5.1	Design trialling procedure to deliver required information.
		5.2	Liaise with relevant stakeholders.
		5.3	Ensure health, safety and environment (HSE) requirements are observed.
		5.4	Coordinate the trialling of the new product.
		5.5	Interpret product trial results and guide product trial process.
		5.6	Tune process to optimise production of new product.
6	**Determine process capability**	6.1	Plot appropriate statistical process control charts.
		6.2	Determine confidence limits.
		6.3	Compare confidence limits with product specification.

© Commonwealth of Australia, 2025 Skills Insight

7	**Coordinate product trials**	7.1	Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements.
		7.2	Arrange for testing and evaluation of trial product/prototype.
		7.3	Interpret product trial results and guide product trial process.
		7.4	Determine final product specification in liaison with key stakeholders.
		7.5	Make required changes to materials, process and equipment.
8	**Implement standard procedures for new product**	8.1	Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to customer, regulatory and organisation requirements.
		8.2	Ensure process specifications are updated and reflect the optimised operation developed.
		8.3	Ensure standard operating procedures (SOPs) are correct for the new product.
		8.4	Ensure equipment and other hardware records are updated to reflect additions/changes.
		8.5	Ensure project records are complete and all required reports have been completed and submitted.
		8.6	Archive records according to company procedure.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Organisation objectives and requirements include one or more of:	• cost/profit requirements for new products (e.g. minimum return and capital expenditure limits) • encouragement/discouragement of different types of products (e.g. on sustainability, ethical or other non-individual customer-related criteria) • potential or actual capacity conflicts with other customers or product/process activities • activities that require/may require community consultation (e.g. on noise or other environmental grounds).
Typical regulatory requirements include one or more	• work health and safety (WHS) • environmental regulations • structural codes

© Commonwealth of Australia, 2025 Skills Insight

of:	• product/industry-specific requirements.
Typical problems include one or more of:	• defining product end-use requirements in terms meaningful to the product design and manufacture • matching suitable materials and processes to the product needs and company expertise and facilities • matching (and improving) process capability to product tolerances.
Relevant factors include one or more of	• type of material • dimensional precision of product • length of run/number of products • required aesthetics • size and complexity of product • available capital funding • process equipment available • HSE factors.

Unit Mapping Information

Assessment Requirements for MSS405075 Facilitate the development of a new product

Modification History

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to facilitate the development of one (1) or more new/modified products and to:

- confirm the design brief
- determine material and process requirements
- ensure process needs have been met
- trial the new product and determine process capability
- conduct product trials
- standardise the new product.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to facilitate the development of a new product, including knowledge of:

- appropriate types of materials/components and criteria for choosing between them
- alternative processes/plant/equipment for making the new product and criteria for choosing between them
- determination of process capability
- appropriate sampling and testing for materials/components and products
- determination of processing time, product cost, benefit cost of the new product
- interpretation of trial/field test results.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real new/modified product development project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405085 Develop a documentation control strategy for an organisation

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required to develop and implement a documentation control strategy for an organisation implementing a competitive systems and practices strategy which is part of the value stream for such an organisation. The documentation control strategy might be needed to comply with AS/NZS ISO 9000:2016 Quality management systems - Fundamentals and vocabulary or other reasons.

This unit applies to a manager, technical specialist or similar who is required to use problem solving, initiative, planning and organising skills to develop and/or improve a system to ensure operations and related supporting documents are controlled in a manner which is appropriate for their use in the organisation.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

	management procedures and standards		maintenance, logistics, sales and marketing systems
		1.3	Identify any external standards, requirements and conventions
		1.4	Agree on document control, tracking, updating and storage processes
		1.5	Write document management processes and standards and circulate to stakeholders
		1.6	Negotiate any variations
2	**Determine document style, standards and conventions**	2.1	Consider potential document styles
		2.2	Agree on document conventions and layout
		2.3	Agree on standard symbols, abbreviations
		2.4	Produce a style sheet, document model or template
		2.5	Check document style conforms to document management standards
		2.6	Circulate to stakeholders and negotiate any variations
3	**Implement document control strategy**	3.1	Write a document control strategy and procedures, including arrangements for ongoing review of strategy
		3.2	Establish mechanisms to check documents conform to the control strategy
		3.3	Arrange for staff development
		3.4	Monitor implementation of document control strategy
		3.5	Make improvements to the documentation control strategy

Assessment Requirements for MSS405085 Develop a documentation control strategy for an organisation

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and implemented documentation control strategy and procedures for at least 1 organisation implementing a competitive systems and practices strategy.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- needs of the organisation and its individuals
- word processing, spreadsheet, database, drawing and other software capable of producing files and documentation
- types of documentation used in organisations
- document control, archive and destruction systems
- AS/NZS ISO 9000:2016 Quality management systems - Fundamentals and vocabulary requirements or equivalent
- legislative and regulatory requirements associated with documentation relevant to the organisation.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405086 Develop sustainable energy practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required by an individual to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. This includes efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of organisations.

The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and muda (waste) with the muda being further categorised into necessary muda and unnecessary muda. Strategies for eliminating or minimising energy muda are covered with cost benefit analyses being required for strategies.

This unit applies to a manager, technical specialist or similar who is required to use problem solving, initiative, planning and organising skills to develop plans for efficient energy use.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse energy**	1.1	Identify all energy consuming processes

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	use	1.2	Determine quantity and nature of energy consumed
		1.3	Analyse energy consumed and generated in different parts of the process
		1.4	Determine source of energy consumed in process
2	**Develop energy conservation plans**	2.1	Determine the efficiency of use of energy by all energy consuming processes
		2.2	Determine causes of low efficiency of use
		2.3	Develop plans for increasing the efficiency of energy use
		2.4	Calculate cost benefit of plans
3	**Develop energy trading plans**	3.1	Compare energy generating activities with energy consuming activities
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities
		3.3	Develop plans for energy trading
		3.4	Calculate cost benefit of plans
4	**Investigate alternative sources of energy**	4.1	Write a specification for energy required
		4.2	Identify sources for that energy
		4.3	Calculate cost benefit for alternative energy sources
5	**Develop plans for more efficient energy use**	5.1	Compare cost benefit for different alternatives developed
		5.2	Rank proposals based on cost benefit compared to limited resources

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	5.3	Check proposals meet regulatory requirements
	5.4	Recommend proposals for improving energy efficiency
6 **Implement selected plans**	6.1	Liaise with relevant people to implement energy efficiency plans
	6.2	Follow through to ensure implementation occurs
	6.3	Monitor implementation and adjust
	6.4	Check new energy usage to ensure improvements have occurred

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS405070 Develop sustainable energy practices.

Assessment Requirements for MSS405086 Develop sustainable energy practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed sustainable energy practices for at least 1 organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of data and required calculations
- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- sustainability regulatory and legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy
- muda (waste) including: necessary and unnecessary

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN062 Collect statistical data

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV521A Collect statistical data. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop a data collection plan and then collect new data. It includes preparing for data collection, defining data requirements, preparing data collection tools for direct collection, conducting data collection using direct collection, conducting data collection from existing source/s and collating and organising information/data.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously consulting others as required, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for data collection	1.1 Study the project or survey question and clarify where necessary. 1.2 Define expected data outputs. 1.3 Familiarise yourself with proposed technology and customise where necessary. 1.4 Confirm the population for the source of data. 1.5 Assess the survey design for suitability.
2. Define data requirements	2.1 Determine the accuracy requirements (precision) of the data to be collected. 2.2 Define the requirements of proposed information management system with regard to storage and processing of data. 2.3 Define and communicate information requirements to all staff involved in data collection. 2.4 Identify and assess data sources for accessibility and reliability. 2.5 Define the type and extent of data required. 2.6 Apply classification standards to the proposed data.
3. Prepare data collection tools for direct collection	3.1 Define data collection methods and techniques clearly relative to data requirements. 3.2 Identify the optimum method for gathering the proposed data after research of alternatives has occurred. 3.3 Design the survey vehicle or questionnaire in conjunction with a suitably qualified person. 3.4 Test and evaluate the survey vehicle.
4. Conduct data collection using direct collection	4.1 Identify and/or construct the proposed sampling frame. 4.2 Select a sample and implement a pilot study. 4.3 Re-evaluate the proposed survey design based on the results of the pilot study. 4.4 Conduct the main survey according to accepted professional standards. 4.5 Take opportunities to establish and maintain contacts with those who may provide useful information, with due consideration of respondent burden.
5. Conduct data collection from existing source/s	5.1 Source data for the project. 5.2 Identify a range of statistics necessary for the project in conjunction with a suitably qualified person.

© Commonwealth of Australia, 2025 Skills Insight

	5.3 Review sources of information regularly for usefulness, reliability and cost. 5.4 Use channels and sources of information effectively.
6. Collate and organise information/data	6.1 Identify statistics to support the project question. 6.2 Collate data electronically. 6.3 Evaluate the accuracy and appropriateness of data. 6.4 Record data in the desired format.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV521A Collect statistical data.

Assessment Requirements for PSPGEN062 Collect statistical data

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to statistical data collection
- deciding which survey method to use
- designing questionnaires
- using communication methods including consultation, establishing and maintaining contacts
- reading information and data requirements
- writing survey questions that are unambiguous and reflect intended meaning

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to statistical data collection, privacy and confidentiality
- the advantages and disadvantages of different data sources
- the differences between census and survey data
- the importance of identifying a good frame
- the quality of the statistics and for what purpose the data can be used
- the limitations of the statistics used
- different data collection methodologies and how they affect results
- data collection and sampling methodologies
- the effects of non-response on survey estimates

© Commonwealth of Australia, 2025 Skills Insight

- the impact of types of errors
- national and international classification standards
- information management systems

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGOV521A Collect statistical data

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the process of developing a data collection plan and then collecting new data. It includes preparing for data collection, defining data requirements, preparing data collection tools for direct collection, conducting data collection using direct collection, conducting data collection from existing source/s and collating and organising information/data.

In practice, collecting statistical data may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, working safely, managing a project, undertaking research and analysis, etc.

This is one of 5 units of competency in the *Working in Government Competency Field* that deal with statistics. Related units are:

- PSPGOV520A Scope statistical data collection
- PSPGOV522A Process statistical data
- PSPGOV523A Interrogate and analyse statistical data
- PSPGOV524A Interpret data and related statistics
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Prepare for data collection**	1.1 The project/survey question is studied and where necessary clarified. 1.2 ***Expected data outputs*** are defined in accordance with the project scope. 1.3 Proposed technology is familiarised and customised where necessary. 1.4 The population for the source of data is confirmed. 1.5 The survey design (if necessary) is assessed for suitability.
2. **Define data requirements**	2.1 The accuracy requirements (precision) of the data to be collected are determined. 2.2 The requirements of proposed information management system with regard to storage and processing of data are defined. 2.3 Information requirements are defined and communicated to all staff involved in data collection. 2.4 ***Data sources*** are identified and assessed for accessibility and reliability 2.5 The type and extent of data required is defined. 2.6 ***Classification standards*** are applied to the proposed data.
3. **Prepare data**	3.1 Data collection methods and techniques are clearly defined

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
collection tools for direct collection	relative to data requirements. 3.2 The optimum method for gathering the proposed data is identified after research of alternatives has occurred. 3.3 The ***survey vehicle***/questionnaire is designed in conjunction with a suitably qualified person. 3.4 The survey vehicle is tested and evaluated.
4. Conduct data collection using direct collection	4.1 The proposed ***sampling*** frame is identified and/or constructed. 4.2 A sample is selected and a pilot study implemented. 4.3 Re-evaluation of the proposed survey design is undertaken based on the results of the pilot study. 4.4 The main survey is conducted according to accepted professional and/or organisational standards. 4.5 Opportunities are taken to establish and maintain contacts with those who may provide useful information, with due consideration of respondent burden.
5. Conduct data collection from existing source/s	5.1 Data for the project is sourced. 5.2 A range of statistics necessary for the project is identified in conjunction with a suitably qualified person. 5.3 Sources of information are regularly reviewed for usefulness, reliability and cost. 5.4 Channels and sources of information are used effectively in accordance with organisational standards.
6. Collate and organise information/data	6.1 Statistics are identified to support the project question. 6.2 Data is researched and/or collated from sources in accordance with ***legislation, policy and guidelines.*** 6.3 Data is collated electronically. 6.4 The accuracy and appropriateness of data are evaluated. 6.5 Data is recorded in the desired format in accordance with professional, organisational and project requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to statistical data collection

© Commonwealth of Australia, 2025 Skills Insight

- deciding which survey method to use
- designing questionnaires
- using a range of communication methods including consultation, establishing and maintaining contacts
- reading information and data requirements
- writing survey questions that are unambiguous and reflect intended meaning
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of statistical data collection

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to statistical data collection
- legislation and policies governing privacy and confidentiality
- the advantages and disadvantages of different data sources
- the differences between census and survey data
- the importance of identifying a good frame
- the quality of the statistics and for what purpose the data can be used
- the limitations of the statistics used
- different data collection methodologies and how they affect results
- data collection and sampling methodologies
- the effects of non-response on survey estimates
- the impact of types of errors
- national and international classification standards
- information management systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of statistical data collection

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

© Commonwealth of Australia, 2025 Skills Insight

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV520A Scope statistical data collection
- PSPGOV522A Process statistical data
- PSPGOV523A Interrogate and analyse statistical data
- PSPGOV524A Interpret data and related statistics
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPPM502B Manage complex projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- collection of statistical data in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the collection of statistical data
- case studies and workplace scenarios to capture the range of situations likely to be encountered when collecting statistical data

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when collecting statistical data, including coping with difficulties, irregularities and breakdowns in routine
- collection of statistical data in a range of (3 or more) contexts (or occasions, over time) where contexts may include data collection via both primary and secondary sources.

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

© Commonwealth of Australia, 2025 Skills Insight

	Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • demonstration • portfolios • projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Expected data outputs may include:	• variable names • attributes
Data sources may include:	• Australian Bureau of Statistics data • government agency sources
Classification standards may include:	• national and international definitions for collating and coding information
Survey vehicle may include:	• opinion polls • mail-out questionnaires • computer-aided telephone interviewing (CATI) • face-to-face interviews
Sampling methods may include:	• simple random sampling • systematic sampling • multi stage sampling
Legislation, ***policy and guidelines*** may include:	• State/Territory and Commonwealth legislation and regulations such as:

© Commonwealth of Australia, 2025 Skills Insight

	• public sector management acts • financial management acts • privacy legislation • equal employment opportunity and anti-discrimination legislation • occupational health and safety legislation • ethics and accountability standards • public sector standards • risk management standards • fraud control standards • government security standards • knowledge management standards • organisational policy, procedures and protocols

Unit Sector(s)

PSPPCY010 Manage policy implementation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPOL603A Manage policy implementation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to interpret policy and manage policy implementation process. It includes interpreting and communicating the requirements of policy, and policy implementation.

This unit applies to those working as public sector staff required to manage policy implementation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, with staff supervision responsibilities, while performing complex tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret and communicate requirements of policy	1.1 Identify the expected outcomes of policy implementation and communicate to staff. 1.2 Interpret policy relative to workplace responsibilities and accountabilities. 1.3 Communicate the impact on work activities of policy implementation to staff and other stakeholders. 1.4 Assist staff with the interpretation of policy and its application to their work.
2. Implement policy	2.1 Identify potential or impending policy changes and prepare strategies to accommodate and communicate those changes. 2.2 Prepare work plans consultation with staff and management to ensure that policy is implemented as intended. 2.3 Monitor staff performance to ensure that it complies with policy. 2.4 Assist staff in adjusting to changes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPOL603A Manage policy implementation.

Assessment Requirements for PSPPCY010 Manage policy implementation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting complex and formal documents
- providing leadership to the workgroup in the interpretation and implementation of policy
- managing policy implementation on 2 or more occasions or in 2 or more contexts

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- range and type of policies relating to the public sector
- public sector code/s of ethics and code/s of conduct
- organisation and government procedures

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Determine inspection and monitoring program requirements	1.1 Determine outputs and performance indicators for programs, and inspection and monitoring responsibilities. 1.2 Determine strategic, operational, technical, financial and administrative requirements. 1.3 Undertake operational and procedural assessments for quality improvement. 1.4 Interpret legislation and regulations and make recommendations on related policies and procedures. 1.5 Interpret and explain risk management practices, workplace health and safety and environmental requirements to staff in accordance with their needs.
2. Manage and lead inspection and monitoring programs	2.1 Provide leadership and assist individuals to deliver agreed outputs. 2.2 Manage inspection and monitoring programs and supervise program performance, resources and expenditure. 2.3 Develop policy and procedures for dealing with non-compliance through information, development or extension activities and prosecution. 2.4 Manage compliance programs as required in accordance with set procedures and timelines. 2.5 Manage implementation of the performance management system for inspection and monitoring staff. 2.6 Enforce legislative requirements, risk management practices, workplace health and safety and environmental procedures.
3. Manage reporting systems, information and training	3.1 Manage records management and reporting systems in accordance with performance indicators. 3.2 Prepare high-level correspondence and advice, submissions and reports. 3.3 Prepare evidence for legal action under relevant legislation. 3.4 Monitor inspection and monitoring training and develop and implement initiatives to improve staff performance.

Assessment Requirements for PSPREG029 Manage and lead inspection and monitoring programs

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating leadership and performance management in the context of inspection and monitoring
- undertaking risk management and problem-solving
- communicating with a diverse range of clients and staff
- writing reports, submissions and Ministerial correspondence, requiring discretion and judgment to determine content and style audience approach
- dealing with referrals from other staff on matters that are more difficult, or of potential interest to external parties including the media, public or political parties
- using computers for word processing and records management

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- interpretation, application, evaluation and review of enabling legislation and regulations
- performance and procedural assessment strategies
- performance indicators
- organisational policy and procedures
- inspection procedures
- monitoring procedures
- responses to complex/serious non compliance

© Commonwealth of Australia, 2025 Skills Insight

- elements of an offence
- rules of evidence
- workplace and industry environment
- public sector legislation, including WHS, environment, privacy

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUACOM012B Liaise with media at a local level

Modification History

Release	TP Version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V2	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the liaison with media at a low level incident and providing information about local events.

Application of the Unit

This unit applies to workers of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Skills Insight

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine media requirements	1.1 ***Organisational protocols*** are followed when ***liaising with the media.***
	1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate.
	1.3 ***Operational responsibilities*** are balanced against the provision of information to the ***media.***
2. Provide information to the media	2.1 A positive image of the ***organisation*** is maintained when liaising with the media.
	2.2 Every opportunity is used to promote the organisation, its services and personnel.
	2.3 ***Relevant and succinct information*** is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media.
3. Publicise an event	3.1 Relationship is established with media contacts.
	3.2 ***Event*** details and support materials are gathered and presented in a logical, relevant and concise manner to the media.
	3.3 Information provided to media is recorded and maintained.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to

© Commonwealth of Australia, 2025 Skills Insight

media
- public speaking
- retaining professionalism under duress

Required Knowledge

- organisational protocols relating to media liaison, for example legal and organisation requirements relating to:
  - confidentiality
  - libel
  - accuracy
  - discrimination
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
  - newspapers
  - magazines
  - radio
  - television (local, regional, national media)
- communication skills
- establishing media relationship

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. **Specific resources for assessment** No special requirements.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisation may include	• Fire • Police • State Emergency Service • Emergency Management
Organisational protocols may include	• organisational policies and procedures • personal presentation being as neat as possible considering the operational circumstances • ensuring media liaison person is fully briefed and prepared • acknowledge support of other organisations • seeking advice from headquarters where appropriate • limiting comments on role of own service • relevant Federal and State legislation and regulations
Liaising with the media may include	• print (local, community, daily newspapers, magazines) • television (live or pre-recorded) • radio (live or pre-recorded)
Operational responsibilities may include	• preservation of life and property, which is the principal concern to all public safety personnel • presenting information relevant to the public
Event may include	• long service to organisation • medal presentation • awarding of certificates • donations/sponsorships/fundraising • recruiting • new equipment • VIP visit • open day • training • unusual rescues • self help information
Media's potential interest may include:	• enormous media event • standard report • human interest • in the public's interest
Media's requirements may include:	• deadlines • capabilities

© Commonwealth of Australia, 2025 Skills Insight

- visual and verbal requirements
- types of medium
- variation
- journalists
- amenities
- briefing area
- access to media liaison person
- bilingual personnel and bilingual information

Media may include:

- representatives from mainstream, community and ethnic television
- print and broadcast media

Organisational positive image may include:

- promote the relevance and efficiency of the service
- report the facts
- heroism of personnel
- organisational personnel are co-operative and responsive
- organisational personnel well presented
- handling media in most positive manner in even the most adverse conditions/circumstances

Media opportunity may include:

- opportunity to promote the services
- provide educational information to the public
- airplay

Relevant and succinct information may include:

- information that according to protocol is available for public release
- report facts and avoid speculation
- do not supply classified information
- use language that can be readily understood by all to avoid misinterpretation

PUAEQU001B Prepare, maintain and test response equipment

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Application and Evidence Guide revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to inspect, maintain and test a range of equipment according to organisation's procedures.

Application of the Unit

This unit applies to workers who have either a primary role in the maintenance of equipment or are required to test and maintain equipment as part of an operational role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR215 Prevent injury (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Skills Insight

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect response equipment	1.1 Equipment is ***inspected*** in accordance with ***organisation's procedures.***
	1.2 Missing parts are identified and reported according to organisation's procedures.
	1.3 Faulty or damaged equipment is reported and recorded in accordance with organisation's procedures.
2. Test response equipment	2.1 Equipment is tested according to approved procedures and is fit for purpose according to ***organisation's standards.***
	2.2 Test results are ***recorded*** according to regulatory and organisation's requirements.
	2.3 Defective equipment and sub-standard performance is reported and recorded according to organisation's procedures.
3. Clean, maintain and restow equipment	3.1 Equipment is cleaned, maintained, assembled and stowed according to organisation's procedures.
	3.2 Equipment records are updated according to organisation's procedures.
	3.3 Equipment is recovered, restowed and made ready for future use.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- comply with material safety data sheets
- inspect equipment according to organisation's procedures
- safely use cleaning agents and chemicals
- service and clean equipment according to organisation's procedures
- test equipment according to organisation's procedures

© Commonwealth of Australia, 2025 Skills Insight

Required Knowledge

- identification of equipment
- occupational health and safety policy relevant to the maintenance, servicing and testing of equipment
- organisation's policies and procedures concerning the use, testing, cleaning and servicing of response equipment
- relevant parts of environmental legislation relating to waste water run off/pollution
- safe working practices when maintaining, servicing and testing equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence can be demonstrated in organisational procedures for inspection testing, cleaning and servicing of response equipment. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency must be assessed in the context of applying organisation's procedures to equipment used in the workplace. **Specific resources for assessment** Access to relevant equipment is required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational procedures may include:	• regulatory requirements • equipment manufacturer’s specifications and procedures • Australian Standards • industry practices • occupational health and safety requirements

© Commonwealth of Australia, 2025 Skills Insight

Organisational procedures may be specified in:	• maintenance schedules • operational directives • organisation's procedures • manufacturer's manuals • operations manuals • quality system documentation • induction documentation • workplace notices • operator's manual
Reporting/recording procedures may include:	• Verbal • record sheets or books • computer data bases • card systems • microfiche systems • maintenance schedules
Organisation's standards may include:	• Australian Standards • state/territory or federal standards • industry standards • manufacturer's procedures • international standards
Response equipment may include:	• ropes • hand tools • hoses • branches and nozzles • ladders • pumps • rescue tools • salvage tools • protective clothing and equipment • breathing apparatus • forcible entry tools • portable fire extinguishers • drip torches • maps • powered equipment • organisational specialist equipment • chainsaws • communications equipment • knapsacks • lighting equipment • first aid equipment

© Commonwealth of Australia, 2025 Skills Insight

	• pumps • equipment required to undertake specific function such as compressor, generator, hydraulic pump • audible warning systems such as sirens, horns • visual warning systems such as lights • light crystal display signs • Global Positioning Systems • vehicle tracking systems • navigational systems
Inspection may include:	• visual, auditory and tactile inspection to identify possible operational failure of motorised equipment or seizure or physical failure of equipment
Maintenance may include:	• lubrication checks • pressure checks • fuel and water checks • flow rate checks • sharpening • cleaning • flushing
Faulty/damaged equipment may include:	• inoperative • not fit for purpose • operates ineffectively • defects • anomalies • not clean • physical damage

PUAFIR204B Respond to wildfire

Modification History

Release	TP Version	Comments
2	PUA12 V2	Content reviewed Application of the Unit added Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to respond to a wildfire, work as a safe and situationally-aware member of a crew to attack and extinguish a fire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR215 Prevent injury

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1. Prepare to respond to fire	1.1 Information about location of fire, ***type of wildfire*** and most effective route to the fire is obtained, taking into account local conditions. 1.2 Personal protective clothing and equipment, and food and fluid requirements are identified and relevant preparations undertaken prior to departure as per organisational standards.
2. Proceed to fire	2.1 Location of the fire and ***type of fuel*** is confirmed on approach. 2.2 Access to the area is gained safely without damage to vehicles and equipment, and minimum damage to the environment. 2.3 ***Evidence relevant to fire cause*** is noted and brought to the attention of the supervisor. 2.4 ***Indicators of fire behaviour*** are observed and communicated to supervisor.
3. Obtain and use firefighting equipment and extinguishing media	3.1 Nominated ***extinguishing media*** and ***firefighting equipment*** are located and obtained. 3.2 Equipment is used in accordance with organisational and manufacturer's procedures.
4. Combat wildfire	4.1 Instructions are received, ***firefighting strategies and tactics*** are confirmed and implemented in accordance with organisational safe work practices and procedures. 4.2 ***Suppression techniques***, equipment and extinguishing media appropriate to wildfire conditions are used. 4.3 Control lines are prepared in accordance with supervisor’s instructions. 4.4 Equipment is positioned, made ready for use and protected from damage in accordance with

© Commonwealth of Australia, 2025 Skills Insight

	organisational procedures.
	4.5 Fire is attacked taking into account ***wildfire hazards*** as directed and in accordance with organisational procedures.
	4.6 Evidence of fire cause and area of fire origin are protected.
	4.7 ***Communication*** is maintained at all times in accordance with organisational procedures.
5. Observe and react to wildfire and weather conditions	5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor.
	5.2 ***Weather conditions*** and changes to fire behaviour are observed and reported to supervisor.
	5.3 ***Variations in topography***, ***fuel features*** and fuel arrangements are observed and effect on fire behaviour is reported to supervisor as required.
	5.4 ***Escape routes*** and ***safety zones*** are identified and maintained at all times.
	5.5 Communication is maintained with other firefighting personnel and supervisor throughout operational activities.
6. Participate in mop-up and patrol activities and support operations	6.1 Mopping-up activities are carried out in accordance with organisational procedures.
	6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures.
	6.3 Activities to ***support firefighting operations*** are carried out in accordance with organisational procedures.
7. Recover and store equipment	7.1 Equipment and ***consumables*** are recovered as directed.
	7.2 Equipment is stored in accordance with organisational procedures.
	7.3 Cleaning and maintenance are carried out in accordance with organisational procedures.
	7.4 Damaged or lost equipment is reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills

- detect hot spots, hazardous trees, unsecured wildfire perimeter
- undertake dry and wet wildfire attack
- use wildfire control tools and equipment
- work as a member of a team

Required Knowledge

- communication on the fireground
- extinguishing media, water, foam, suppressants
- fire behaviour (fuel, weather and topography)
- health and fitness requirements
- hygiene and wellbeing
- organisational operating procedures
- safe work practices
- wildfire control tactics and techniques
- wildfire hazards, safety techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- react to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- use firefighting equipment
- participate in dry wildfire control
- use extinguishing media in wildfire control
- maintain health and safety of self, other workers and people in the immediate work area
- participate in mop-up and patrol
- undertake operational activities safely

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated field-based workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an agency approved simulated and/or field-based workplace environment.

Specific resources for assessment

Access is required to:

© Commonwealth of Australia, 2025 Skills Insight

- controlled or contained fires and/or simulated workplace environment
- firefighting equipment and extinguishing media

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated workor in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Type of wildfire must include:	• crown • ground • surface
Type of fuel may include:	• crop • forest • grass • heath • peat, coal and combustible soils • plantation • scrub
Evidence relevant to fire cause may include:	• fresh vehicles tracks • items or objects at scene • nature and behaviour of fire at the scene upon arrival

© Commonwealth of Australia, 2025 Skills Insight

	• nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
Indicators of fire behaviour may include:	• flame height and length • noise • rate of spread • smoke colour and density • spotting
Extinguishing media must include:	• water
and may also include:	• Class A foam • retardants • soil • wetting agents
Firefighting equipment must include:	• drip torch • hand tools • hose and small gear • knap sack • pump • tanker
and may also include:	• chainsaw • ropes and lines
Firefighting strategies must include:	• defensive • direct attack • indirect attack • offensive: • parallel attack
Firefighting tactics may include:	• backburning • burning out • contol line construction • mopping-up • patrol • use of extinguishing media
Suppression techniques may include:	• dry firefighting • wet firefighting
Wildfire hazards may include:	• burns • disorientation • electrical installations and powerlines • embers

© Commonwealth of Australia, 2025 Skills Insight

	• falling branches/trees • fatigue • heat related illness • lack of visibility • machinery/vehicle • manual handling • noise • radiant heat • smoke inhalation • snake or insect bite • sprain or fracture • trips and falls • water bombing operations
Communication may include:	• paging • personal contact • phone • radio • written notes
Weather conditions may include:	• atmospheric stability • relative humidity • temperature • variations to wind speed and direction
Variations in topography may include:	• aspect • elevation • landscape features • slope
Fuel features must include:	• arrangement/distribution • moisture content • quantity • size • type
Escape routes may include:	• prepared tracks • roads • trails • waterways
Safety zones may include:	• bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

© Commonwealth of Australia, 2025 Skills Insight

Support firefighting operations may include:	• providing/transporting food, water and equipment for an incident • working with earth moving equipment such as bulldozer, grader, tractor with blade
Consumables may include:	• flagging tape • fuel • rubbish • signs

PUAFIR209B Work safely around aircraft

Modification History

Release	TP Version	Comments
2	PUA12 V2	Application of the Unit added Unit revised to reflect current work requirements Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to apply safe work practices when operating in or around aircraft at an airbase and when engaged in a range of non-specialist, air operations activities.

Aviation operations occur in a heavily regulated environment. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

This unit applies to personnel performing primary aviation roles within the Australasian Inter-service Incident Management System (AIIMS) and all other aviation support roles when operating in or around aircraft. The primary AIIMS aviation roles that require this unit are Air Operations Manager, Aircraft Officer, Air Observer, Air Attack Supervisor and Air Base Manager.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Work safely in the vicinity of aircraft**	1.1 ***Briefing*** is received prior to deployment or whenever circumstances relevant to their safety or current tasking have changed. 1.2 Briefing on work to be undertaken is undertaken in an ***appropriate location***. 1.3 ***Suitable visible clothing and protective equipment*** are used. 1.4 ***Appropriate precautions*** and clearances are followed when operating on or near aircraft movement areas. 1.5 Any approach to an operating ***aircraft*** is made according to ***organisational aircraft approach procedures***, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew. 1.6 Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes. 1.7 Typical manoeuvring patterns of aircraft are anticipated through ***activities***. 1.8 Any instructions or signals from pilots or ***staff controlling aircraft*** are complied with 1.9 ***Site hazards*** are identified.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. **Facilitate safe ground support**	2.1 Appropriate precautions are observed when positioning vehicles or equipment close to aircraft. 2.2 Aircraft design features are respected while boarding, loading or handling aircraft. 2.3 Instructions from pilots and organisational staff coordinating aircraft operations, and organisational procedures and placards are followed during ground support operations. 2.4 Aircraft loading is conducted under pilot or flight crew member supervision and appropriate weight, balance and loading system are complied with. 2.5 Areas are designated and separated according to site features and the specific operations being conducted. 2.6 Fitting of equipment to an aircraft is conducted under pilot supervision in accordance with appropriate regulatory approvals. 2.7 Aircraft fuels, oils, and supplies are stored and handled according to regulatory requirements and organisational procedures. 2.8 Any suspected defects or hazards to aircraft or equipment are reported to pilot or other appropriate supervisor. 2.9 Appropriate aerodrome regulations are complied with.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- using specialist aviation support equipment

Required Knowledge

- aerodrome familiarisation
- aerodrome working and lighting
- aircraft familiarisation
- aircraft movement characteristics
- aircraft performance, operation, loading and refuelling precautions

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- comply with regulatory requirements and organisational procedures
- identify hazards and precautions effected on a consistent, conscious and continuing basis
- implement procedures for unusual events
- take action with an overriding concern for safety and quality rather than minimal observance of requirements.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated work environment.

Specific resources for assessment

Access is required to:

- actual or simulated aircraft and aerodrome facilities

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Briefing must include:	• situation • mission • execution • administration • command and communications • safety • questions

Appropriate location must include:	• area that is:
	  • free of distractions (movement, noise)
	  • safe
	  • convenient to subsequent deployment needs
	  • necessary facilities and equipment

Suitable visible clothing and protective equipment may include:	• fire extinguisher • first aid kit • head, hand, eye, ear and foot protection • high visibility overalls/vests • protective overalls • respiratory protection • signalling devices, lighting or beacons
Appropriate precautions may include:	• advisory instructions • avoiding obstructions/hazards and navigation aids • clearances (radio) • fixed wing and helicopter marshalling • ground markings/lighting • light signals • observing aerodrome limits
Aircraft may include:	• aeroplanes • helicopters • unmanned aerial vehicles • other airborne vehicles
Organisational aircraft approach procedures include:	• complying with operational placards • complying with pilot or flight crew instructions • maintaining visibility with pilot or flight crew

© Commonwealth of Australia, 2025 Skills Insight

Activities may Include:	• circuit procedures • ground manoeuvring capabilities • special procedures (such as at night or in poor weather) • take-off, approach and landing characteristics
Staff controlling aircraft may include:	• aircraft coordinating personnel • flight crew • ground support supervisor • pilot
Site hazards may include:	• dust • level of visibility • livestock • masts/aerials • native fauna • public • terrain • trees • weather conditions • wires/powerlines/fences

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify workplace hazards and risks, and advise others	1.1 Procedures and practices are followed to identify ***hazards*** and ***risks*** in the ***workplace***. 1.2 Identified hazards and risks in the work area are communicated to team members and supervisors. 1.3 Identified factors which may create or escalate the immediate risk to life, property or the environment are reported.
2. Implement hazard and risk control procedures	2.1 Appropriate ***personal protective clothing and equipment*** is selected and donned in accordance with organisational procedures. 2.2 Appropriate procedures for dealing with hazards and ***controlling risks*** in the workplace are followed in accordance with work health and safety guidelines and organisational procedures. 2.3 Equipment appropriate for dealing with a hazard is selected for use and checked in accordance with standard operating procedures. 2.4 Personal health and welfare is managed in accordance with organisational policy.
3. Monitor effectiveness of hazard and risk control procedures	3.1 Situation is monitored to ensure the continued effectiveness of the hazard and risk control procedures. 3.2 ***Changes in incident behaviour and conditions*** are reported immediately to supervisor. 3.3 Activities and ***debriefings*** regarding hazard and risk control procedures are participated in as appropriate.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply safe work practices in accordance with organisational work health and safety policies and procedures
- identify typical hazards and risks in the workplace, and apply control measures
- select equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- select personal protective clothing

Required Knowledge

- basic principles of risk assessment
- methods of hazard and risk control and reporting, and debriefings
- occupational hazards and risks encountered in the workplace
- organisational health and fitness guidelines
- personal protective clothing and equipment requirements
- risk control measure such as eliminate, isolate and substitute
- signs of fatigue, heat related illness, dehydration, fatigue and stress
- situational awareness
- welfare management, such as signs of occupational stress, limiting stress, dealing with stress and seeking assistance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- correctly identify hazards and risks in the workplace
- apply organisational procedures including the correct selection and use of personal protective equipment and clothing
- advise and report workplace hazards and risks, and apply and monitor control measures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific

Context of assessment

resources for assessment	Competency should be assessed on-the-job and/or in a range of simulated environments. **Specific resources for assessment** Access is required to: • appropriate protective clothing and equipment organisational procedures.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Hazards may include:	• aerial retardant drops • aircraft • broken terrain • biological, bites, infections, stings • chemicals • confined space • electricity • entrapment • environmental • falling objects • explosions

© Commonwealth of Australia, 2025 Skills Insight

	• structural collapse • subsidence • water load • fire • flood, storm and tempest rescues • hazardous chemicals • heavy machinery • manual handling • personal • dehydration • heat stress • psychological such as critical incident stress, shock • prescribed burning activities • travelling in vehicles • vehicle and industrial rescue/extrication
Risks may include:	• damage to property and environment • injury to self and/or team members • loss of life and property
Workplace may include:	Locations where activities and operations may occur such as: • confined spaces • mobile property • open spaces • public and private property (including crown land) • structures • water
Personal protective clothing and equipment must include:	• emergency response clothing
and may also include:	• chainsaw chaps • chemical protective clothing • eye, ear and head protection • face shield • personal accessories kit • personal distress units • personal lines • respiratory protection
Controlling risks must include:	• adequate food, fluid and other welfare needs during operations • appropriate training • eye, sight, hearing protection

© Commonwealth of Australia, 2025 Skills Insight

	• fire blankets/roll over protection • goggles, face shield, hearing protection and chainsaw chaps • hierarchy of control • safety warning signs • use of clothing and equipment to provide protection
Changes in incident behaviour and conditions may include:	• environmental conditions • escalation of incident
Debriefings may include:	• end of incident • end of shift

PUAFIR303B Suppress wildfire

Modification History

Release	**TP Version**	**Comments**
2	PUA12 V2	Application of the Unit added Unit revised to reflect current work requirements Context of Assessment revised Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to work as a situation-aware member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive and report details of wildfire	1.1 Details of the wildfire including its location, ***type***, behaviour and development are received and recorded.
	1.2 Fire details are reported in accordance with organisational procedures.
2. Prepare to respond to fire	2.1 Location of the wildfire is confirmed and the safest effective ***access*** route is determined.
	2.2 ***Personal protective clothing and equipment***, apparel, food and water are obtained before departure, in accordance with organisational requirements.
	2.3 Most appropriate method of transport to the wildfire is selected and used.
3. Proceed to fire	3.1 Location of the wildfire is confirmed by observation or from instructions while on approach.
	3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or ***environmentally sensitive areas***.
	3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of the appropriate authority.
	3.4 ***Navigational aids*** are used for planning and operational purposes.
4. Protect people and assets	4.1 As far as conditions allow, number, location and safety of people and ***assets*** in the threatened area is determined and assessed.

© Commonwealth of Australia, 2025 Skills Insight

	4.2 Appropriate ***protective procedures*** are implemented under direction, to protect persons in the path of a wildfire.
	4.3 Access by the public and personnel to hazardous locations is controlled as directed and in accordance with organisational procedures.
	4.4 Defensibility of property is considered and, if appropriate, assistance is provided to help occupiers.
	4.5 Safety of people and assets in the threatened area is monitored during the course of the fire.
	4.6 Safety of people and security of assets in the area is checked and reported after the passing of the fire.
5. Combat wildfire	5.1 Access to the area of operations is gained in the safest and most effective manner.
	5.2 Notification of arrival and appropriate report is provided.
	5.3 Briefing is received including area of operations, strategies and tactics to be employed.
	5.4 Most suitable location to commence wildfire control operations is selected.
	5.5 ***Firefighting media and equipment*** are selected and used effectively and safely in accordance with organisational procedures.
	5.6 ***Fire hazards*** are identified and action taken to minimise the risk of injury to the public, personnel and self.
	5.7 ***Firefighting strategies*** are implemented to achieve objectives in accordance with organisational procedures.
	5.8 Fire control activities are undertaken to minimise overall damage and impact on assets and the environment.
	5.9 ***Potential fire behaviour*** is considered and acted upon to ensure safety and achievement of objective.
	5.10 ***Fuel***, ***weather*** and ***topographical factors*** are observed and potential fire behaviour anticipated.
	5.11 Communication is maintained with supervisor and other firefighters in the work area.
	5.12 ***Fire reports*** are provided to supervisor as required.
	5.13 Area of origin and ***evidence of fire cause*** are protected and brought to attention of supervisor or relevant authority.
	5.14 ***Escape routes*** and ***safety zones*** are established

© Commonwealth of Australia, 2025 Skills Insight

	and communicated to personnel.
6. Conduct mop-up and patrol activities	6.1 Mop-up activities are carried out in accordance with guidelines and conditions. 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures and guidelines.
7. Recover and maintain equipment	7.1 Equipment is made up and made ready for operational use in accordance with organisational procedures. 7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in writing and orally
- detect hot spots and hazardous trees
- interpret fire weather, fuels and terrain and predict the likely impact on fire behaviour
- mop-up
- read maps
- receive briefings and confirm instructions
- undertake back burning and burning out
- use wildfire control tools and equipment
- work as part of a team

Required Knowledge

- defensive/offensive firefighting strategies and tactics:
  - asset protection
  - backburning and burning out
  - control lines and firebreaks
  - defendable space
  - direct, indirect, parallel attack
  - fire attack procedures
  - lighting patterns
  - standard operating procedures; reporting; patrol; mop-up
  - wet, dry firefighting
- fire behaviour:

© Commonwealth of Australia, 2025 Skills Insight

    - fire development
    - flame height and intensity
    - rate of spread,
    - junction zones
    - spotting
- firefighting protocols
- fireground hazards
- fire weather conditions and impact on fire behaviour:
    - atmospheric stability
    - relative humidity
    - temperature
    - wind speed and direction
- fuel and its impact on fire behaviour
    - moisture content, quantity, type, arrangement and distribution,
    - size, drought effect, curing
- organisational first aid requirements
- organisational procedures for dealing with injury
- protection of area of origin and evidence of fire cause
- safety near vehicles and machines
- terrain and physical feature and their impact on fire behaviour and suppression:
    - aspect
    - fuel variations
    - slope
    - weather variations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- anticipate and react to changing wildfire behaviour
- observe and react to weather behaviour
- accurately assess whether or not it is safe to defend assets
- undertake dry wildfire control activity
- monitor effectiveness of tactics
- use firefighting equipment and extinguishing media
- maintain safety and health of self, other workers and

© Commonwealth of Australia, 2025 Skills Insight

	people in the wildfire area • use communication equipment • read maps • protect area of origin and evidence of fire cause **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Evidence of performance at a wildfire or prescribed burn is required for attainment of Elements 5 and 6 of this unit. The remaining elements should be assessed in an agency approved field-based environment or simulation. **Specific resources for assessment** Access is required to: • access to wildfire or prescribed burns and/or approved field-based environment • firefighting equipment and extinguishing media
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2025 Skills Insight

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Types must include:	• crown • ground • surface
Access may include:	• aircraft • boat • foot • vehicle

Environmentally sensitive areas may include:	• areas of:
	  • fragile soils
	  • native flora and fauna
	  • rare and endangered species
	  • threat to water quality

Navigational aids must include:	• maps
and may also include:	• aerial photographs • compass • global positioning systems
Assets may include:	• area of rare or sensitive flora and fauna • buildings • culturally significant sites • crops • plantations • property • public lands • stock • utilities and infrastructure (rail, power and telephone lines, water supply structures, communications towers, bridges)
Protective procedures may include:	• alerts and warnings • in-situ protection • relocation
Firefighting media must include:	• water
and may also include:	• Class A foam • earth • fire suppressants (short and long term) • retardants

© Commonwealth of Australia, 2025 Skills Insight

	• wetting agent
Firefighting equipment must include:	• driptorch • hand tools • hose and small gear • pump • tanker
and may also include:	• aircraft • chainsaw • earth moving machinery • knap sack • ropes and lines
Fire hazards must include:	• burns • disorientation • environmental • falling branches and trees • falling objects • fatigue • heat-related illness (heat exhaustion and dehydration) • lack of visibility • manual handling • mine shafts • rolling objects • smoke inhalation • snake or insect bite • sprain or fracture • trips/falls • water bombing operation
Firefighting strategies must include:	• combination attack • combined strategy • defensive strategy • direct attack • indirect attack • mop-up • offensive strategy • parallel attack • patrol
Potential fire behaviour may include:	• fire development • flame height and intensity • fuel load and arrangement • rate of spread

© Commonwealth of Australia, 2025 Skills Insight

	• spotting • change due to terrain, topography • change due to weather conditions - winds, fire whirls

Fuel may include:	• crop
	• forest
	• grass
	• heath
	• plantation:
	  • stage 1 – post establishment
	  • stage 2 – pre-canopy closure
	  • stage 3a – canopy closure (unpruned)
	  • stage 3b – canopy closure (pruned)
	  • stage 4 – thinned
	  • stage 5 – mature
	  • stage 6 – harvesting/clear felling
	• scrub

Fuel factors which may impact on fire development must include:	• arrangement/distribution • effects of drought • moisture content • quantity • seasonal effects • size • topography • type
Weather factors which may impact on fire development must include:	• anabatic winds • atmospheric stability • cold fronts • diurnal variations • katabatic winds • land breezes • local effects • relative humidity • sea breezes • temperature • vegetation edge effects • wind changes • wind direction and speed
Topographical factors which may impact on fire development must include:	• aspect • elevation • local wind effects

© Commonwealth of Australia, 2025 Skills Insight

	• slope • wind turbulence
Fire reports may include:	• effectiveness of strategies and tactics • fire behaviour • number and status of resources • safety and hazards • weather • welfare of personnel • work achieved and required
Evidence of fire cause may include:	• fresh vehicles tracks • nature and behaviour of fire at the scene upon arrival • nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
Escape routes may include:	• prepared tracks • roads • trails • waterways
Safety zones may include:	• bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

PUAFIR309B Operate pumps

Modification History

Release	**TP Version**	**Comments**
2	PUA12 V2	Content reviewed Application of the Unit added Unit revised to reflect current work requirements Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to operate a portable and/or appliance-mounted pump at an incident.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies personnel responsible for operating centrifugal, appliance-mounted and portable pumps and foams systems at an incident. Typically, this work requires the application of the basic principles of hydraulics i.e. the study and behaviour of water.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare pump to deliver water	1.1 ***Type of pump*** selected is appropriate to the operation/incident. 1.2 ***Suitability of water supply*** for operational purposes is determined. 1.3 Pump is sited and positioned to receive and deliver water supply in accordance with organisational requirements. 1.4 Pump and ***primer*** are engaged in accordance with manufacturer guidelines and ***organisational procedures***. 1.5 Appropriate ***foam agents*** and ***foam equipment*** are prepared for the production of foam at an incident, where required.
2. Operate pump	2.1 Pump components, ***ancillary equipment*** and principles of operation are utilised to draught water from a ***static supply*** to boost water from a ***reticulated supply*** and/or to deliver water from the

© Commonwealth of Australia, 2025 Skills Insight

	appliance tank in accordance with appliance capability.
	2.2 Pump operation is in accordance with manufacturer specifications, organisational procedures and workplace health and safety (WHS) guidelines
	2.3 ***Principles of hydraulics*** are considered when determining pump settings.
	2.4 Pumps are operated and ***observed*** to ensure that pressure and flow meet operational requirements and that safety to personnel is maintained.
	2.5 Pump performance is monitored and maintained to ensure maximum efficiency of operation, to detect and correct pumping and safety problems, and to take appropriate action in accordance with organisational procedures.
	2.6 Pump operations are carried out avoiding injury to personnel and damage to equipment and facilities.
	2.7 Mechanical malfunctions are reported to supervisor according to organisational procedures.
3. Conclude pump operations	3.1 Pump operations are concluded in accordance with organisational procedures.
	3.2 Ancillary equipment is collected and stowed in accordance with organisational requirements.
	3.3 Maintenance procedures and checks are undertaken to ensure pump and ancillary equipment are serviceable in accordance with organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- operate a pump using gauges and controls
- position a pump
- prime and operate a pump
- supply water to a location by use of a relay pump

Required Knowledge

- determination of water supply capacity
- discharge and flow rates
- hand signals to indicate water and pump requirements

© Commonwealth of Australia, 2025 Skills Insight

- positioning pumps
- jet reaction
- power train for pump
- principles of hydraulics (flow and pressure)
- principles of priming and operating pumps
- pump components and their principles of operation
- pump gauges and controls
- relay pumping
- simple hydraulic calculations including friction loss
- types of foam concentrate
- types of pumps and primers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- maintain water supply to branch operators
- maintain appropriate levels of pressure
- respond appropriately to changing circumstances
- when using foam, supply/deliver the correct proportion of foam and water and maintain supply of foam concentrate
- when pumping from an appliance tank, monitor levels of water remaining in appliance tank to ensure minimum levels for crew protection
- pump without injury to personnel or damage to equipment

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job and/or in a range of simulated environments.

Specific resources for assessment

Access is required to:

- range of pumps

© Commonwealth of Australia, 2025 Skills Insight

Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Type of pump may include:	• appliance-mounted pumps • centrifugal • ejector • free-standing, trailer or vehicle-mounted • multi-stage centrifugal • peripheral • petrol or diesel driven • portable pumps • positive displacement • series/parallel centrifugal • single-stage centrifugal • water turbine
Suitability of water supply may include:	• capacity • pressure • salinity • turbidity
Primer may include:	• diaphragm • exhaust ejector

© Commonwealth of Australia, 2025 Skills Insight

	• force pump • rotary gear • rotary vane • water ring
Organisational procedures may include:	• fireground procedures • maintenance procedures and checks • manufacturer specifications • WHS guidelines • pumping practices • service procedures • standard operating procedures • training manuals
Foam agents may include:	• alcohol resistant type foam • aqueous film forming foam • Class A foam • protein foam
Foam equipment may include:	• Class A foam systems • Class B foam systems • compressed air foam system • electronic foam systems • foam-making branch pipes • high back-pressure (sub-surface injection) foam system • high expansion foam equipment • in-line inductors • in-line foam generators • medium expansion foam equipment • pick-up tubes • pressure-balanced foam systems • round-the-pump proportioners
Ancillary equipment may include:	• adaptors and matching pieces • breechings • couplings • delivery hose • hose clamps • hydrant tools and openers • ropes/lines • standpipes • suction hoses, spanners, strainers, baskets
Static supply may include:	• dams • lakes

© Commonwealth of Australia, 2025 Skills Insight

	• portable dams • reservoirs • rivers • seawater • swimming pools • tanks
Reticulated supply may include:	• distributary mains • reticulation mains • trunk mains
Principles of hydraulics may include:	• discharge and flow rates • friction loss • head pressure calculations • jet reaction • required branch and nozzle pressures
Observed may include	• branch operator activities, where possible • checking water supply levels • monitoring of gauges and warning lights • pump operators working on other units when relay pumping • use of pressure relief valves and transfer valves • use of pump performance charts or tables illustrating information such as optimum nozzle pressure and friction loss

PUAFIR412 Conduct simple prescribed burns

Modification History

Release	TP Version	Comments
2	PUA12 V2.1	Editorial changes.
1	PUA12 V2	New unit.

Unit Descriptor

This unit covers the competency required to prepare, conduct and evaluate simple prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives.

A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Compliance with legislative requirements will be required.

Application of the Unit

This unit applies to personnel responsible for preparing, conducting, and evaluating a simple prescribed burn on public and private land.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR303B Suppress wildfire

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to burn	1.1 ***Burn plan*** operations are identified for the ***type of burn*** required in accordance with organisational procedures and legislative requirements.
	1.2 ***Contingency plan*** is developed based on ***local conditions at the time of burn*** and communicated to all personnel.
	1.3 Permits are obtained in accordance with organisational procedures and legislative requirements.
	1.4 Burn notifications and plans are issued to ***person/s or organisations*** in accordance with organisational procedures and legislative requirements.
	1.5 ***Resource*** requirements are identified with reference to burn plan.
	1.6 Control lines are specified and prepared in accordance with organisational procedures.
	1.7 Required preparatory hazard mitigation and ***asset*** protection works identified in burn plan are completed.
	1.8 ***Weather conditions*** are monitored.
2. Conduct burn	2.1 Day of burn notifications are issued.
	2.2 Pre burn checks are conducted.
	2.3 Resources are gathered and personnel briefed and deployed in accordance with burn plan.
	2.4 ***Lighting techniques and patterns*** are implemented

© Commonwealth of Australia, 2025 Skills Insight

	in accordance with plan or organisational procedures. 2.5 Burning is ***monitored*** to ensure safety and operational changes are made as required. 2.6 Contingencies are implemented in accordance with prescribed burn plan as required. 2.7 Burn records are kept in accordance with organisational procedures. 2.8 Burn operations are ***concluded and burn security*** is implemented in accordance with organisational requirements. 2.9 Crews are debriefed and resources released from the burn. 2.10 Incidents are reported and investigated in accordance with organisational procedures.
3. Conduct post burn activities	3.1 ***Outcomes of the burn*** are assessed and reported. 3.2 Variations from the burn plan are reported in accordance with organisational procedures. 3.3 ***Restoration and rehabilitation works*** are identified and/or carried out in accordance with organisational requirements. 3.4 Prescribed burn activities are recorded in accordance with the organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply fuel sampling methods
- conduct briefings and debriefings
- establish control lines for prescribed burns
- interpret a simple prescribed burn plan
- interpret existing and forecast weather conditions
- interpret fire behaviour conditions
- monitor patrol activities
- monitor the burn
- plan for contingencies
- use fire prediction tools

Required Knowledge

- fire prediction tools

© Commonwealth of Australia, 2025 Skills Insight

- fuel sampling methods
- ground ignition patterns and techniques
- legislative and organisational authorisations required for conducting a burn
- legislative and organisational policy and procedures for conducting a prescribed burn
- procedures for monitoring prescribed burns and securing burn
- resource requirements
- safe work practices
- seasonal restrictions on prescribed burns
- types of prescribed burns

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- implement a simple burn plan for a designated area
- conduct an effective operational briefing and debriefing
- conduct a safe and effective burn, utilising the appropriate resources and recording actions taken
- conclude activities once the burn is completed

Consistency in performance

Competency should be demonstrated in a range of actual and/or field-based workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence collected from undertaking a simple prescribed burn is required.

Specific resources for assessment

Access is required to:

- simple prescribed burn plans
- fire management plans
- lighting equipment
- suppression equipment
- lighting and suppression crews

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training

© Commonwealth of Australia, 2025 Skills Insight

environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Burn plan includes:	• approval of the plan for the conduct of prescribed burning • map identifying the area to be burned • specifications and conditions under which the operation is to be conducted
Type of burn must Include:	• Simple prescribed burn, characterised by low risk, low intensity, small area, low potential impact on assets, completed in one shift and involves minimal variation of fuel and terrain
Contingency planning may include:	• dealing with escapes • resource breakdowns • resource requirements • safety considerations (e.g. escape routes and safety zones) • special resources/secondary control lines • wind changes
Local conditions at the time of burn may include:	• actual or anticipated changes in conditions • weather conditions (temperature, relative humidity, wind, atmospheric stability, drought index, weather forecasts, fire danger index)

© Commonwealth of Australia, 2025 Skills Insight

Person/s or organisation/s may include ***:***	• people or organisations who • have an interest in adjacent land to which a burn could spread • have an interest in managing the consequences of a burn • have an interest in specific assets • have an interest in the area to be burned • may be concerned by evidence of a burn
Burn notifications may include:	• verbal notification • written notification
Resources may include:	• contingency resources • crews for control and suppression • crews for ground ignition • equipment and supplies • logistical support • other vehicles • tankers
Assets may include:	• area of rare or sensitive flora and fauna • buildings and other property • camps or recreational areas • crops • cultural values • historic relics • machinery • plantations • research plots, reference areas • stock • utilities (power and telephone lines, water supply structures, communications towers)
Weather conditions must include:	• relative humidity • temperature • wind
Lighting techniques and patterns may include:	• contour lighting • echelon • grid • line • multi-line • spot
Monitoring burn may include:	• fire shape and spread • flame height • fuel moisture content

© Commonwealth of Australia, 2025 Skills Insight

	• predictions • rate of spread • recording • safety considerations • smoke development • weather observation • wind speed and direction
Concluding operations and burn security may include:	• black out • mitigating hazards for public safety e.g. checking trees for falling limbs • mop-up • patrolling burn area • reopening roads
Outcomes of the burn may include:	• achievement of burn objectives • escapes • external impacts • levels of scorch • percentage of area burnt
Restoration and rehabilitation works may include:	• restoring areas disturbed by machinery • revegetating control lines • repairing fences • revegetation of damaged areas • restoring vehicle track damage

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify burn areas and burn objectives	1.1 Areas requiring prescribed burning are identified in the ***prescribed burn plan*** in accordance with organisational procedures
	1.2 ***Burn objectives*** and actions required are developed in accordance with organisational procedures
	1.3 ***Target groups*** are identified and consultation process is initiated in accordance with organisational procedures
2. Prepare plans for prescribed burning	2.1 Fuel types and quantities within the burn area are determined
	2.2 Fire behaviour and intensity required to meet burn objectives are determined
	2.3 ***Burn ignition strategies and tactics*** suited to the location and that provide the fire behaviour required to meet objectives, are nominated in accordance with organisational procedures
	2.4 Result of consultation undertaken and input is factored into the planning process in accordance with organisational procedures
	2.5 Legislative requirements are identified and complied with
	2.6 ***Hazards,*** the safety of ***people,*** and protection of ***property***, ***assets,*** and the ***environment*** are taken into account through proposed ignition and control strategies and tactics
	2.7 Required preparatory hazard mitigation and asset

© Commonwealth of Australia, 2025 Skills Insight

	protection works are identified
	2.8 Type and quantity of ***resources*** required are identified
	2.9 Conditions for implementation of the strategies and tactics are specified in accordance with organisational procedures
	2.10 Contingencies are outlined in prescribed burn plan
3. Gain prescribed burn approval	3.1 Burn plan is submitted for approval in accordance with legislative requirements and organisational procedures
	3.2 Modifications and amendments to burn plan are made based on feedback received
	3.3 Burn plan approval is gained

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess fuel types and quantities
- assess risk
- communicate effectively in writing
- consult and liaise with the community
- predict fire behaviour
- prepare plans
- read maps
- recommend actions to be taken and communicate these actions with others

Required Knowledge

- effects of fire on vegetation, fauna and accumulated fuels
- effects of fire on areas and places of cultural significance
- fire behaviour for fuel type being prescribed
- legislation relevant to the application of prescribed fire
- prescribed burning ignition and suppression strategies
- safe work practices
- organisational procedures
- wildfire hazards

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop timelines for burn planning and conduct of burn
- identify risks and hazards
- develop burn objectives
- develop strategies and tactics to meet burn objectives
- identify actions required to minimise unacceptable impacts of burn preparation and conduct
- identify and consult with target groups

Consistency in performance

Competency should be demonstrated in a range of actual and/or field-based workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an agency approved simulated and/or workplace environment.

Specific resources for assessment

Access is required to:

- area requiring the application of fire under prescribed conditions
- existing management plans and data relevant to the area being prescribed

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate

© Commonwealth of Australia, 2025 Skills Insight

- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Prescribed burn plan includes:	• approval of the plan for the conduct of prescribed burning • map identifying the area to be burned • specifications and conditions under which the operation is to be conducted
Burn objectives may address:	• asset protection • community protection • habitat management • hazard reduction • management of cultural sites and activities • vegetation management
Target groups may include:	• adjacent land owners and/or managers • commercial operations within the impact zone • community groups with specific interests • government organisations including local, state and federal • other groups and people within the prescribing organisation
Burn ignition strategies and tactics may include:	• contingency planning • fire behaviour to be achieved • ignition methods, lighting patterns, sequencing and timing of ignition
Hazards may include:	• adjoining land use, proximity to urban areas • adverse terrain or weather conditions • falling trees and limbs • flammable vegetation • flammable hazardous materials • road traffic
People may include:	• people involved with burn implementation • people on areas adjacent to the burn area • people permanently or temporarily in the burn area

© Commonwealth of Australia, 2025 Skills Insight

	• smoke vulnerable communities
Property and assets may include:	• commercial crops or other assets on the burn area • cultural sites, historical buildings, etc. • property and assets adjacent to or within the burn area • stock
Protection of the ***environment*** may include:	• consideration of location of native flora and fauna, including rare and endangered species • safe use of chemical fire suppressants • smoke management • soil conservation • water quality
Resources may include:	• crews for ground ignition and suppression • equipment back-up • ignition and suppression equipment and supplies • logistical support • other vehicles • tankers

2	PUA12 V2	Application of the Unit added Unit revised to reflect current work requirements Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to respond to an incident and to undertake a preliminary fire investigation prior to the arrival of a specialist fire investigator.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel required to conduct a fire investigation at a fire or related incident.

This unit is not intended to replace the role of the specialist fire investigator; the role of the specialist fire investigator is encompassed within the PUA60912 Advanced Diploma of Public Safety (Fire Investigation).

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan fire/incident investigation and analysis activities	1.1 Roles and responsibilities of government and non-government organisations involved at a fire/incident investigation are identified. 1.2 Procedures and ***protocols for the cooperation and coordination of relevant organisations*** involved in the fire/incident investigation are identified, agreed and implemented. 1.3 Strategies required to conduct a fire/incident investigation and analysis are identified and implemented in accordance with organisational procedures. 1.4 Preliminary and background ***sources of information*** concerning the context of the fire/incident investigation is prepared. 1.5 Relevant legislative requirements that impact on the collection and recording of ***evidence*** are identified. 1.6 Evidence and information gathering process at the incident site is planned in accordance with organisational and legislative requirements, environmental conditions and resource availability. 1.7 Required fire investigation equipment and resources for the incident are identified and assembled.
2. Collect, collate and preserve evidence	2.1 ***Methods and techniques of evidence and information collection*** appropriate to the investigation are applied. accordance with legislative requirements 2.2 Various types of evidence and information pertinent

© Commonwealth of Australia, 2025 Skills Insight

	to the investigation are recorded and/or collected in accordance with organisational and legislative procedures.
	2.3 Procedures for continuity and ***preservation of evidence*** are followed in accordance with legislative requirements.
	2.4 Appropriate ***packaging*** and identification techniques for the transportation of evidence for the purpose of laboratory testing are followed in accordance with organisational and legislative requirements.
3. Determine origin and cause of fire at incident	3.1 Procedures required to determine the origin and ***cause of fire*** are followed.
	3.2 ***Specialist personnel*** are liaised with to support determination of cause of fire.
	3.3 Assistance is rendered to laboratory personnel and specialist organisations as required, in accordance with organisational procedures.
	3.4 Physical evidence that can lead to the determination of the origin and cause of fire is identified and examined.
	3.5 Preliminary findings are documented and validated in accordance with organisational procedures.
	3.6 Origin and cause of fire are determined.
	3.7 Findings, methodologies, support data and briefing notes are documented in accordance with organisational and legislative procedures.
4. Conduct analysis of incident	4.1 Information relating to incident is gathered in accordance with organisational policies and procedures.
	4.2 Information relating to incident is evaluated in accordance with organisational procedures.
5. Record and report information collected	5.1 Information for a fire/incident investigation is recorded in accordance with the Rules of Evidence and legislative requirements.
	5.2 Information collected for a fire/incident investigation is prepared and documented in a report in accordance with organisational requirements.
	5.3 Report is submitted to supervisor in accordance with organisational requirements.
6. Prepare personnel for proceedings	6.1 Briefings are participated in with counsel as required.
	6.2 Other personnel involved in the proceedings are briefed as required.
	6.3 Additional information and/or clarification of

© Commonwealth of Australia, 2025 Skills Insight

	fire/incident investigation procedures/findings are provided as required. 6.4 ***Protocols for giving of evidence*** at a coronial/civil/criminal proceeding are followed.
7. Review and evaluate fire/incident investigation	7.1 Outcomes of proceedings are reviewed to ensure knowledge of investigations, trends and precedents is current. 7.2 Changes to organisational policy and procedures arising from rulings and decisions are formulated and reported. 7.3 Fire/incident cause determination/documentation/ recommendations are forwarded in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively verbally and in writing
- conduct briefings
- cooperate with other organisations and community groups
- display evidence gathering techniques
- display evidence packaging techniques
- handle dangerous goods and hazardous substances
- record incident and investigation details

Required Knowledge

- collection of physical evidence
- determining point of origin by deductive evidence
- differences between fire conditions
- differing fire behaviour such as flashover, backdraught
- distinguishing between fires that are accidentally, negligently and deliberately or naturally lit
- examination of the fire scene
- factors affecting fire behaviour
- fatality and criminal involvement procedures
- identification of fire scene hazards
- legal implications of evidence collection and legislative requirements
- motives of the fire setter
- security of the scene, scene contamination and preservation
- use of personal protective clothing and equipment

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- secure the scene and preserve the evidence
- determine the point of origin and cause of fire
- distinguish between fires that are caused deliberately or accidentally, negligently and naturally lit
- collect evidence in accordance with legislative requirements
- record incident and investigation details in accordance with organisational procedures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or via simulations or exercises.

Specific resources for assessment

Access is required to:

- relevant fire investigation equipment and resources
- real or simulated test fire sites (forest/rural)
- training building with appropriate fire investigation training rooms
- fire crews and pumpers
- thermal detection equipment
- appropriate protective clothing and equipment
- classrooms equipped with computers and appropriate training aids, text and reference materials
- appropriate role play scripts for the appropriate personnel (police, witnesses, barristers, solicitors, forensic scientist, insurance adjustors and investigators).

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training

© Commonwealth of Australia, 2025 Skills Insight

environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Protocols for the cooperation and coordination of relevant organisations may include:	• advising and cooperating with other agencies • canvassing witnesses • collecting and securing physical evidence • collecting, collating and analysing information • conducting examinations • conducting interviews • making sketches and maps • prepairing reports • producing information • taking notes
Sources of information may include:	• correspondence • databases • incidence mapping • internet • inter-organisational activities • intra-organisational activities • journals

© Commonwealth of Australia, 2025 Skills Insight

Evidence must include:	• debris • documents • drawings • electrical appliance/equipment • gas appliance/equipment • manifests • maps • personal notes • physical evidence • plans • sketches • soil
and may also include:	• audio tapes • video tapes
Methods and techniques of evidence and information collection must include:	• advising and cooperating with other agencies • canvassing witnesses • collecting and securing physical evidence • collecting, collating and analysing information • conducting examinations • conducting interviews • making sketches and maps • preparing reports • producing information • taking notes
Preservation of evidence must include:	• maintaining chain of evidence • maintaining log of events • tagging secure encasements
Packaging may include:	• glass receptacles • non-leaching bags • non-lined tins • rigid and non-rigid receptacles
Causes of fire must include:	• accidental • chemical • deliberate • electrical origin • environmental or natural occurrences • flammable liquids • gas • gas explosion • lightning • matches and lighters

© Commonwealth of Australia, 2025 Skills Insight

	• mechanical defect • motor vehicles • smoking • spontaneous combustion
Specialist personnel may include:	• arson squad • crime scene police • forensic specialist • insurance investigators • laboratory technicians • lawyers • medical examiners • other relevant authorities
Protocols for giving evidence must include:	• court practices • court procedures • pre-court briefings • rules of evidence

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse needs
- communicate effectively verbally and in writing
- negotiate
- resolve conflicts

Required Knowledge

- emergency management concepts and principles
- legislative requirements relevant to emergency management
- organisational policies and procedures
- organisational documentation (emergency/disaster management plans, standard operating procedures, policies, procedures and guidelines)
- problem solving and decision making techniques
- relevant legislation, regulations and codes of practice
- source of risk (commercial and legal relationships, economic, human behaviour, individual activities, management activities and controls, natural events, political circumstances, technology/technical issues)
- techniques for the prioritisation and evaluation of public safety risk management systems

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- Effectively implement the selected public safety risk prevention strategy.
- Review the effectiveness of these strategies and provide feedback
- Ensure risk prevention strategies implemented by personnel are consistent with the organisation’s community safety policy and approved arrangements.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

© Commonwealth of Australia, 2025 Skills Insight

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on-the-job or in a simulated workplace environment. **Specific resources for assessment** Access is required to: • complex scenarios sufficient to allow evidence to be gathered from a variety of sources and stakeholders on more than one occasion and over an extended period.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Public safety risk prevention strategies may include:	• all aspects of comprehensive emergency management evolved from considering prevention/mitigation • building codes • community restoration • critical incident stress management • emergency management planning • financial support

PUAFIR511 Conduct complex prescribed burns

Modification History

Release	TP Version	Comments
2	PUA12 V2.1	Editorial changes.
1	PUA12 V2	New unit.

Unit Descriptor

This unit covers the competency required to prepare and conduct complex prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives.

An approved prescribed burn plan includes a map identifying the area to be burned, and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, medium to large areas, significant potential impact on assets and involve a variety of fuels and terrain.

The burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. It may require several separate ignitions (ground and/or aerial), possibly over several days. It may have a number of high value assets requiring complex protection actions.

Compliance with legislative or regulatory requirements will be required.

Application of the Unit

This unit applies to personnel responsible for preparing, conducting and evaluating simple and complex prescribed burns on public and private land.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to burn	1.1 ***Simple*** and ***complex burn operations*** are identified in accordance with organisational procedures, legislative and regulatory requirements. 1.2 ***Contingency plan*** is reviewed based on ***local conditions at the time of burn*** and communicated to all personnel. 1.3 Permits are obtained in accordance with organisational procedures, legislative and regulatory requirements. 1.4 ***Burn notifications*** and plans are issued to ***person/s or organisations*** in accordance with organisational procedures and legislative requirements. 1.5 ***Resource requirements*** are identified with reference to burn plan. 1.6 Control lines are specified and prepared in accordance with organisational procedures. 1.7 ***Assets*** are protected in accordance with organisational procedures. 1.8 Required preparatory hazard mitigation and asset protection works programs are carried out in line with the plan.

© Commonwealth of Australia, 2025 Skills Insight

	1.9 ***Weather conditions*** are monitored.
2. Conduct burn	2.1 Day of burn notifications are issued. 2.2 Pre burn checks are conducted. 2.3 Resources are gathered and personnel briefed and deployed in accordance with burn plan. ***2.4 Lighting techniques, patterns*** and ***lighting sequence*** are implemented in accordance with plan or organisational procedures. ***2.5 Burning is monitored*** to ensure safety and operational changes are made as required. 2.6 Contingencies are implemented in accordance with burn plan as required for the duration of the burn. 2.7 Burn records are kept in accordance with organisational procedures. 2.8 Burn operations are ***concluded*** and ***burn security*** is implemented in accordance with organisational requirements. 2.9 Crews are debriefed and resources released from the burn. 2.10 Incidents are reported and investigated in accordance with organisational procedures.
3. Conduct post burn activities	***3.1 Outcomes of the burn*** are assessed and reported. 3.2 Variations from burn plan are reported in accordance with organisational procedures. ***3.3 Restoration and rehabilitation works*** are identified and/or carried out in accordance with organisational requirements. 3.4 Prescribed burn activities are recorded in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply fuel sampling methods
- apply ignition patterns and techniques
- conduct briefings and debriefings
- establish control lines for prescribed burns
- interpret a complex prescribed burn plan
- interpret existing and forecast weather conditions

© Commonwealth of Australia, 2025 Skills Insight

- interpret fire behaviour conditions
- manage teams
- monitor patrol activities
- monitor the burn
- plan for contingencies
- use fire prediction tools

Required Knowledge

- fire prediction tools and their use
- fuel sampling methods
- ignition patterns and techniques
- legislative and organisational policy and procedures for conducting a prescribed burn
- legislative, regulatory and organisational authorisations required for conducting a burn
- procedures for monitoring prescribed burns and securing burn
- resource requirements
- safe work practices
- seasonal restrictions on prescribed burns
- types of prescribed burns

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- implement a complex burn plan for a designated area
- conduct an effective operational briefing and debriefing
- conduct an effective burn, utilising the appropriate resources and record actions taken
- conclude activities once the burn is completed

Consistency in performance

Competency should be demonstrated in an operational environment.

Context of and specific resources for assessment

Context of assessment

- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Simple burn may be characterised by:	• completed in one shift • involves minimal variation of fuels and terrain • low intensity • low potential impact on assets • low risk • small area
Complex burn may be characterised by:	• involvement of a variety of fuels and terrain • medium to large areas • moderate to high risk

© Commonwealth of Australia, 2025 Skills Insight

	• range of fire intensity • significant potential impact on assets
Burn operations must include:	• simple burns • complex burns
Contingency plan may include:	• command structure • dealing with escapes • resource requirements • safety considerations (such as escape routes and safety zones) resource breakdowns • special resources/secondary control lines • wind changes
Local conditions at the time of burn may include:	• actual or anticipated changes in conditions • weather conditions (temperature, relative humidity, wind, atmospheric stability, drought index, weather forecasts, fire danger index)
Burn notifications may include:	• verbal notification • written notification
Person/s or organisations may include:	People or organisations who: • may have adjacent land to which a burn could spread • have an interest in managing the consequences of a burn • have an interest in specific assets • have an interest in the area to be burned • may be concerned by evidence of a burn
Resource requirements may include:	• contingency resources • crews for aircraft ground support • crews for control and suppression • crews for ground ignition • equipment and supplies • logistical support • navigators, bombardiers for aerial ignition • tankers • other vehicles
Assets may include:	• area of rare or sensitive flora and fauna • buildings • camps or recreational areas • crops • cultural values • historic relics

© Commonwealth of Australia, 2025 Skills Insight

	• machinery • other property • plantations • research plots, reference areas • utilities (power and telephone lines, water supply structures, • communications towers)
Weather conditions must include:	• relative humidity • temperature • wind
Lighting techniques and patterns may include:	• contour lighting • echelon • grid • line • multi-line • spot
Lighting sequence may include:	• fuel hazard • slope • time of day • wind direction
Monitoring burn may include:	• fire development and spread • flame height • fuel moisture content • observations • predictions • rate of spread • recording • safety consideration • smoke development • weather observation
Conclusion and burn security activities may include:	• mitigating hazards for public safety such as checking trees for falling limbs • mopping-up/blacking out • patrolling burn area • reopening roads
Outcomes of the burn may include:	• achievement of burn objectives • escapes • external impacts • levels of scorch • percentage of area burnt
Restoration and	• restoring areas disturbed by machinery

© Commonwealth of Australia, 2025 Skills Insight

rehabilitation works may include:	• control lines • repairing fences • re-vegetation of damaged areas • vehicle tracks

PUAFIR513 Develop complex prescribed burn plans

Modification History

Release	TP Version	Comments
2	PUA12 V2.1	Editorial changes.
1	PUA12 V2	New unit.

Unit Descriptor

This unit covers the competency required to develop complex prescribed burn plans for specified burn areas to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives.

An approved prescribed burn plan includes a map identifying the area to be burned, and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, medium to large areas, significant potential impact on assets and involve a variety of fuels and terrain.

The burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. It may require several separate ignitions (ground and/or aerial), possibly over several days. It may have a number of high value assets requiring complex protection actions.

Compliance with legislative requirements will be required.

Application of the Unit

This unit applies to personnel responsible for developing simple and complex burn prescriptions.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify burn area and burn objectives	1.1 Areas requiring ***simple*** and ***complex prescribed burn plans*** are identified in accordance with organisational procedures. 1.2 ***Burn objectives*** and actions required are developed in accordance with organisational procedures. 1.3 ***Target groups*** are identified and consultation process is initiated in accordance with organisational procedures.
2. Prepare plans for prescribed burning	2.1 Fuel types and quantities within the burn area are determined. 2.2 Fire behaviour and intensity required to meet burn objectives are determined. 2.3 Impact of variations in fuel, terrain, weather and season on the required fire behaviour is identified and mitigated. 2.4 ***Burn ignition strategies and tactics*** suited to the location that will provide the fire behaviour required to meet objectives, are nominated in accordance with organisational procedures. 2.5 Result of consultation undertaken and input is factored into the planning process in accordance

© Commonwealth of Australia, 2025 Skills Insight

	with organisational procedures. 2.6 Legislative and regulatory requirements are identified and complied with. 2.7 ***Hazards,*** the ***safety of people*** and ***protection of property***, ***assets*** and the ***environment*** are taken into account through proposed ignition and control strategies and tactics. 2.8 Required preparatory hazard mitigation and asset protection works are identified. 2.9 Type and quantity of ***resources required*** are identified. 2.10 Conditions for implementation of the strategies and tactics are specified in accordance with organisational procedures. 2.11 ***Contingencies*** are outlined in the prescribed burn plan.
3. Gain prescribed burn approval	3.1 Burn plan is submitted for approval in accordance with legislative and organisational requirements. 3.2 Modifications and amendments to burn plan are made based on feedback received. 3.3 Burn plan approval is gained.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess characteristics of multiple fuel types
- communicate effectively in writing and orally
- consult and liaise with the community
- implement prescribed burn strategies
- prepare plans
- predict fire behaviour
- read maps
- recommend actions to be taken and communicate this with others
- undertake risk assessment

Required Knowledge

- effects of fire on vegetation, fauna and accumulated fuel
- effects of fire on areas and places of cultural significance
- fire behaviour in the fuel types being prescribed for
- legislation and regulations relevant to the application of prescribed fire

© Commonwealth of Australia, 2025 Skills Insight

- organisational procedures
- prescribed burning ignition and suppression strategies including ignition patterns and sequences
- resource capabilities
- risk management
- safe work practices

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- work effectively as part of a team
- develop timelines for burn planning and conduct
- identify risks and hazards
- develop burn objectives
- develop strategies and tactics to meet burn objectives
- identify actions required to minimise unacceptable impacts of burn preparation and conduct
- identify and consult with target groups
- document prescribed burn plan
- develop tactics for a complex burn involving multiple fuel types
- develop ignition patterns and sequences for proposed conditions.

Consistency in performance

Competency should be demonstrated over time in an operational environment or in an agency-approved simulated workplace environment.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an agency approved simulated and/or workplace environment.

Specific resources for assessment

Access is required to:

- area requiring the application of fire under prescribed conditions
- existing management plans and data relevant to the

© Commonwealth of Australia, 2025 Skills Insight

area being prescribed.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Simple prescribed burn is characterised by:	• completion in one shift • low intensity • low potential impact on assets • low risk • minimal variation of fuel and terrain • small area
Complex prescribed burn is characterised by:	• medium to large areas • moderate to high risk • range of fire intensity • significant potential impact on assets • variety of fuels and terrain
Prescribed burn plans may include:	• approval of the plan for the conduct of prescribed burning • map identifying the area to be burned • specifications and conditions under which the operation is to be conducted

© Commonwealth of Australia, 2025 Skills Insight

Burn objectives may include:	• asset protection • biodiversity protection • community protection • habitat management • hazard reduction • management of cultural sites and activities • protection of fire sensitive communities • vegetation management
Target groups may include:	• adjacent land owners and/or managers • community groups with specific interests • commercial operations within the impact zone • government organisations including local, state and federal • other groups and people within the prescribing organisation
Burn ignition strategies and tactics may include	• contingency planning • fire behaviour to be achieved • ignition methods, lighting patterns, sequencing and timing of ignition
Hazards may include	• adjoining land use, proximity to urban areas • adverse terrain and/or weather conditions • falling trees and limbs • flammable hazardous materials • flammable vegetation • high fuel loads • powerlines • road traffic
Safety of people may include	• people involved with burn implementation • people on areas adjacent to the burn area • people permanently or temporarily in the burn area • smoke vulnerable communities
Protection of property and assets may include	• commercial crops or other assets on the burn area • cultural sites, historical buildings, etc • property and assets adjacent to or within the burn area • stock
Protection of the environment may include	• native flora and fauna including rare and endangered species • safe use of chemical fire suppressants • smoke management • soil conservation

© Commonwealth of Australia, 2025 Skills Insight

	• water quality
Resources required may include	• aircraft and crews including incendiary operations supervisor and incendiary machine operator for aerial ignition • aircraft ground support • crews and supervisors for ground ignition, control and patrol work • equipment and supplies (fuel, incendiaries) • planning and logistical support • tankers, other ignition and suppression vehicles, equipment and fuel
Contingencies may include	• dealing with escapes • period for which the burn will be 'live' • resource requirements • safety considerations (such as escape routes and safety zones) • resource breakdowns • special resources/secondary control lines • wind changes

PUALAW001B Protect and preserve incident scene

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application reviewed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required, on arrival at the scene of an accident or incident, to conduct initial assessment, take action to maintain public safety and preserve the scene, and note and record details and information.

The unit is particularly applicable in cases where organisation personnel are the first to arrive at the scene of an accident or incident.

Application of the Unit

This unit applies to all public safety workers at an incident who need to understand the importance of maintaining the legal integrity of the scene. It is not a specialist Crime Scene Investigation unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Secure and preserve scene	1.1 Initial ***assessment*** is participated in to identify ***factors which will impact*** on public safety and scene preservation. 1.2 ***Incident/accident scene*** is effectively secured to ***preserve the scene*** and maintain public safety in line with legislative requirements.
2. Record and report details of incident scene	2.1 ***Details of the scene*** are noted, ***recorded and reported*** according to organisation's policies and procedures. 2.2 ***Witness details*** and information volunteered are recorded in accordance with ***organisational and legislative requirements.*** 2.3 Information is communicated to ***relevant personnel*** in line with organisation's procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- listening
- note taking
- observation
- questioning
- reporting

Required Knowledge

- legislative and organisation requirements relating to scene preservation

© Commonwealth of Australia, 2025 Skills Insight

- methods of securing scene
- organisation requirements for taking witness details and information
- regulatory requirements for taking witness details and information
- techniques for estimating distance
- techniques for removing public from scene
- types of information which may assist in investigations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation's policies and procedures. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident scene may include:

- urban fire
- wild fire
- vehicle fire
- crime scene
- search for missing persons or evidence
- vehicle accident
- natural disaster
- industrial/mining accident
- incident involving death or injury to person or

© Commonwealth of Australia, 2025 Skills Insight

	damage to property • urban scene • rural scene • indoor scene • outdoor scene • animal incident • marine • aircraft • train • explosions • hazardous materials
Assessment of scene may be conducted:	• at scene • en route to and from scene
Factors impacting may include:	• public safety risk factors including factors that could impact on the safety of investigators • response team • the security/preservation of the actual site • the security and preservation of situational evidence • traffic • tactical factors affecting the quality of the investigation including environmental circumstances • chronology of events • access to scene • number of persons at scene • availability of support services • boundaries
Persons at scene may include:	• incident scene specialists • forensic experts • potential witnesses • victims • other bystanders • personnel from other organisations • media • coroners • pathologists • medical practitioners • undertakers • forensic accountants • information technology consultants • legal officers • owners and/or occupiers

© Commonwealth of Australia, 2025 Skills Insight

Security of scene may be affected by:	• topography • climatic conditions • human interference • animal interference • preservation of life/property • structural integrity • availability of personnel
Securing scene may include:	• removing non-emergency personnel from scene • isolating scene • erecting barriers
Details of scene may include:	• date • time • location • damage • persons present • property involved • possible causes • items of evidence • injuries • status of utilities services such as broken water pipes • animal species present • flora • fauna • size and construction of building • occupancy • insurance details
Witness details may include:	• name • contact details • other details in accordance with organisation's policies and procedures
Relevant personnel may include:	• supervisor • team leader • police • investigating officer • other organisation's personnel
Communication may include:	• verbal • completing standard forms • written
Recording and reporting may include:	• taking notes • completing standard forms • making sketches

© Commonwealth of Australia, 2025 Skills Insight

	• taking photographs • taping • electronic videoing
Preserving scene may include:	• preserving evidence and the area of origin
Organisational and legislative requirements may vary between sectors and organisations and may include:	• legislation relevant to the operation/incident/response • legislation relevant to the organisation • operational • corporate and strategic plans • operational procedures • operational performance standards • organisation's personnel practices and guidelines • organisation's quality standards

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct initial assessment of scene	1.1 Scene is assessed with regard to occupational health and safety and all actions are undertaken in line with organisation's policies, procedures, guidelines and duty of care requirements. 1.2 Communication is established with the senior ***investigating officer*** and liaison is maintained throughout the investigation. 1.3 Circumstances surrounding the scene are ascertained from visual assessment and reports from other personnel. 1.4 Scene boundary is defined/redefined as required to preserve physical evidence for collection. 1.5 Obvious and accessible ***physical evidence*** is located and, where appropriate, protected from possible contamination.
2. Control integrity of scene	2.1 Appropriate ***arrangements for scene access and egress*** are established and maintained. 2.2 All non-essential persons are removed from the scene and relevant details are recorded accurately and legibly in accordance with organisation and regulatory procedures. 2.3 ***Additional resources*** are identified and accessed to secure incident scene. 2.4 The personal and health and safety needs of those involved in the incident are attended to.
3. Examine scene	3.1 An appropriate search pattern is instigated in accordance with instructions from senior investigating officer to ensure all evidence is located and preserved. 3.2 ***Details of the scene*** are recorded comprehensively

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	and accurately in line with organisation's operating procedures.
	3.3 Evidence is located, collected, packaged, labelled and stored to ensure preservation for further post-scene examination.
	3.4 An accurate log of all evidence is maintained.
	3.5 Scenes are correctly assessed for future investigative requirements and appropriate persons notified.
4. Identify potential witnesses and initial statements recorded	4.1 Bystanders are canvassed to identify potential witnesses.
	4.2 Details of potential witnesses are recorded.
	4.3 Appropriate recording practices are used that are in accordance with legislative and regulatory requirements and organisation's policies and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurate written recording and compilation of interviews and statements
- attention to detail
- implementing methodical and systematic approach
- listening to bystanders
- putting bystanders at ease
- questioning bystanders
- use of recording and specialised evidence collection equipment
- working with a variety of professionals

Required Knowledge

- anti discrimination public safety
- appropriate use of interpreting services
- collection and recording of various types of evidence ranging from large objects to minute traces
- details of scene
- equal employment opportunity
- features and use of a variety of specialised equipment to search
- functions and roles of other professionals and experts
- incident scene protection and preservation

© Commonwealth of Australia, 2025 Skills Insight

- indicators of emotional distress
- indicators of need for specialised investigations
- legislative requirements relating to occupational health and safety
- policies and procedures relating to occupational health and safety
- policies and procedures relating to recording details of persons
- public safety and duty of care at accident/incident scene
- recognition
- record and collect evidence
- shock
- taking and compiling statements
- taking of statements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Correct application of legislative requirements and organisation policies and procedures in all situations. **Consistency in performance** Evidence will need to be gathered over time in a range of actual and/or simulated environment.
Context of and specific resources for assessment	**Context of assessment** A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial investigation:	• those enquiries conducted by the first public safety official on scene
Incident scene may include:	• structural fire • wild fire

© Commonwealth of Australia, 2025 Skills Insight

	• vehicle fire • crime scene • vehicle accident • natural disaster • industrial/mining accidents and incidents • accident/incident involving death or injury to person or damage to property
Incident scene may be:	• indoor or outdoor • in a rural or urban environment
Incident scene may be affected by:	• prevailing weather and require additional resources to preserve and protect incident scene
Security of an incident scene may be affected by:	• topography • climatic conditions • human interference • animal interference • preservation of life/property
Public safety risk factors include:	• those factors at the incident scene that could impact on: the safety of investigators; the security/preservation of the actual site • the security and preservation of situational evidence
Investigating incident scenes may include:	• dangerous or distasteful conditions and may involve handling injured or deceased persons
Circumstances surrounding scene may include:	• sequence of events • possible causes • people involved • property involved • victims • suspects • witnesses • damage • injury • organisation personnel involved • other agencies involved • current status of investigation • action taken to date
Tactical factors may include:	• environmental circumstances • chronology of events • access to scene • number of persons at scene • availability of support services • boundaries

© Commonwealth of Australia, 2025 Skills Insight

Persons at incident scene may include:	• Incident scene specialists and forensic experts; witnesses • victims • other bystanders; police and emergency services; media; coroners • pathologists • medical practitioners • undertakers; forensic accountants • information technology consultants and legal officers
Activities at incident scenes may be recorded by:	• running sheets • exhibit logs • receipts and personnel movement • video photography
Physical evidence may include:	• shoe impressions • tyre prints • skid marks • fingerprints • containers • fibres • flammable and combustible liquids • tool marks • bloodstains • identifying numbers • bodily fluids • burn patterns
Methods of collection may include:	• vacuuming • tape lifts • shovelling • photographing • casing
Methods of packaging may include:	• metal containers • plastic bags • paper bags • glass vials
Additional resources may include:	• organisation personnel • other organisation personnel • expert personnel • audio visual services • emergency lighting • forensic personnel

© Commonwealth of Australia, 2025 Skills Insight

Relevant details from persons may include:	• name • contact details • other details in accordance with standard operating procedures
Liaison with investigating officer may include:	• professional and technical advice • identification of avenues of inquiry • significance of located evidence
Arrangements for scene access and egress:	• clear brief as to who has control of access • physical barriers may also be required • roster guards • limit entry to essential personnel • delegation of authority to control entry • record all persons who enter or depart the scene and reasons
Arrangements to protect integrity of evidence:	• roster scene guards • cover evidence • may require removal of evidence to ensure its protection
Details of scene:	• time • date • location • damage to property • injury to persons • personnel present • physical details of scene • evidence

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine hazards at incident site	1.1 Issues affecting safety of self and other personnel are established by identification of ***hazards*** and assessment of ***risks***, and by liaison with others at the scene.
	1.2 Relevant operational safety procedures are implemented in accordance with organisation's policies.
	1.3 Duties are undertaken in line with organisational health and safety codes of practice and ***relevant legislation.***
2. Implement hazard controls at incident scene	2.1 Hazards are identified and mitigation procedures are selected in line with work instructions and procedures.
	2.2 Hazardous situations rectified where possible and reported and/or recorded according to organisation's policies and procedures.
	2.3 Changes in situation and/or conditions are reported immediately to ***designated person.***
	2.4 ***Hazard controls*** are monitored and communicated to relevant personnel to ensure continuing effectiveness.
	2.5 Hazard control and mitigation measures are implemented with minimum damage to the environment, while maintaining safety of self and others.
	2.6 Incident/accident scene is effectively secured to preserve the scene and maintain ***public safety*** in line with legislative requirements.
3. Maintain personal safety	3.1 ***Personal protective clothing and equipment*** is selected and checked according to organisational procedures to ensure it is operational prior to entry into incident situation.
	3.2 Personal protective clothing and equipment

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	appropriate to dealing with the hazard is worn/fitted and used in accordance with organisation's policies and procedures and manufacturer's guidelines.
	3.3 Water and food intake, rest breaks and shelter requirements are maintained.
	3.4 ***Survival technique strategies*** are implemented in accordance with organisation's policies and guidelines.
4. Contribute to maintaining safety of other work group members	4.1 Impact of own actions on safety of others is recognised.
	4.2 Contact is maintained at all times with other work group members.
	4.3 Signals are correctly used, interpreted, confirmed and acted upon in a timely manner.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate non-verbally and verbally
- follow procedures and instructions
- record information
- use communication equipment
- work with others in a team situation

Required Knowledge

- accidents and incidents
- commonly encountered hazards and procedures and safety precautions to prevent injury on encountering various hazards
- employee responsibilities and obligations
- food intake
- hazards
- heat induced illness - factors leading to prevention
- injuries
- labelling and storage of hazardous substances
- manual handling hazards
- means of relaying warnings to other personnel
- methods of hazard control and reporting
- organisation's occupational health and safety policy

© Commonwealth of Australia, 2025 Skills Insight

- problems associated with insufficient water intake
- procedures for investigating injuries
- procedures for participating in occupational health and safety arrangements
- procedures for reporting hazards
- protection
- relevant standard operating procedures
- respiratory system - functions
- rest breaks
- State and Territory occupational health and safety requirements
- survival techniques for various situations
- symptoms and treatment
- techniques and aids
- use and limitations of relevant protective clothing and equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in maintaining personal safety and safety of others. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. Written or verbal questions may be used as supporting evidence. **Specific resources for assessment** A range of protective clothing and equipment may be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Skills Insight

Working environment may be:	• hazardous • unpredictable • subject to time pressure • chaotic and expose responders to risk
Public Safety workplaces include:	• any location where a Public Safety incident occurs
Response situation include:	• single and multi agency response situations
Hazards include:	• all potential sources of injury or damage to property or the environment including identified and potential hazards to persons • equipment or the environment
Risk is:	• the likelihood of injury or damage occurring and the potential consequences of any injury or damage

Incidents may include:	• a variety of natural or man made events including but not limited to rescues and extrications
	• flood
	• storm
	• tempest
	• natural disaster
	• vehicle
	• aircraft
	• rail
	• industrial
	• civil defence
	• fires:
	  • structural
	  • wild
	  • prescribed burning
	• search and rescue :
	  • urban
	  • rural
	  • sea
	• hazardous materials and dangerous goods

Hazards may be identified by:	• scene assessment • visual inspections • plan reviews • recognising hazard warnings • accessing data bases • interviewing others at scene • seeking expert advice

© Commonwealth of Australia, 2025 Skills Insight

Others at scene may include:	• organisational personnel • personnel from other organisations • general public
Hazardous materials may include:	• thermal • mechanical • explosives • toxic • corrosive • asphyxiant • radiation • etiological hazards • mutagenic materials
Biological hazards may include:	• bacteria • viruses • fungi and yeasts • including exotic organisms
Physical hazards may include:	• noise • slippery surfaces • poor visibility • smoky environments • fallen/falling objects • fatigue
Electrical hazards may include:	• pole fires • electrical fires • electricity in damaged/burning structures • energised vehicles/structures due to downed wires • photovoltaic generation systems
Manual handling hazards may include:	• heavy objects • content and shape of containers
Environmental hazards may include:	• temperature • darkness • fire • snow • floods • winds • rain • hail • flora • fauna • postural restrictions and access • terrain

© Commonwealth of Australia, 2025 Skills Insight

	• traffic
Hazard control measures may include:	• erection of barriers • establishment of control zone • use of spill clean up kits • use of electrically insulated tools and equipment • vehicle protection hoses and devices • life support equipment (heat radiation shielded crew cabin • vehicle cabins with/without sprays) • entry control procedures to hazardous areas • decontamination • isolation of electricity supply
Relevant legislation may include:	• state or territory occupational health and safety acts and regulations
Personal protective clothing and equipment may include:	• breathing apparatus • personal lines • air lines • personal distress units • respiratory protection • protective hoods • goggles • hearing protectors • sunscreen • chemical protective clothing • personal flotation devices • wet suits • turnout uniform • gloves • hard hat • safety boots • overalls • chainsaw chaps • bullet proof vests • firearms • batons • handcuffs
Hazard control equipment may include:	• atmospheric monitoring equipment • meteorological equipment • radiation monitoring equipment • oxygen meters • flammable gas detectors

© Commonwealth of Australia, 2025 Skills Insight

Reporting may include:	• verbal • written reports • completing standard forms • logs • sitreps • note taking • logging entry to hazardous areas
Designated person may include:	• supervisor • team leader • workplace occupational health and safety representative • officer in charge
Survival strategies which may be applied in:	• buildings • wildfire situations • water • extreme heat or cold
Factors which may require monitoring may include:	• traffic • weather conditions • vegetation type • spectators • temperature • structural integrity • relative humidity • slope • terrain • water supply/pressure • fire development • stream flows • suspect atmospheres
Contact with other personnel may include:	• visual • vocal • touch • radio • audible warnings • signalling

PUAOPE001B Supervise response

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competency to supervise a response by a small team to incidents and may include the use of aircraft, which are time critical and/or potentially threatening to life, property or the environment.

The unit includes the competency to proceed to the incident, assess the incident, and plan and implement an operational response and post-response activities.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Pre-Requisites

Prerequisite Unit/s	PUAFIR302B Suppress urban fire OR PUAFIR303B Suppress wildfire (Fire specific)

Employability Skills Information

Employability Skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Receive incident response request**	1.1 Requests for response are received and dealt with in accordance with ***organisational policy*** and guidelines 1.2 Relevant incident information is obtained and assessed to enable personnel to make appropriate preparations 1.3 An appropriate response is determined according to the type of incident and information available in accordance with organisational policies and procedures 1.4 The location of the incident and the most appropriate route to the incident are ascertained
2. **Proceed to incident**	2.1 Personnel, equipment and ***transport*** resources are dispatched promptly, consistent with the nature of the incident and the information available 2.2 Communication is established and maintained 2.3 An appropriate route to the incident is followed

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	to minimise response time
	2.4 ***En-route hazards*** are recognised and negotiated to minimise risk
	2.5 Multi-vehicle response is conducted in accordance with the organisation's procedures
3. **Assess the incident**	3.1 Observations are made en route to assist with ***incident*** assessments
	3.2 Assigned personnel's arrival at the incident is confirmed according to organisational policies and procedures
	3.3 ***Communication*** with on-site personnel is established
	3.4 An initial assessment of the incident is carried out promptly
	3.5 ***Hazards*** or potential hazards are assessed and minimised or controlled
	3.6 Assigned ***resources*** to deal with the incident are established at the earliest opportunity
	3.7 The need for additional resources is identified and resources requested in accordance with organisational policy and procedures
	3.8 Hazards are monitored during the incidents and changes in the situation acted upon
4. **Plan and implement an operational response to the incident**	4.1 A safe and effective operational environment is established and maintained in accordance with occupational health and safety guidelines and organisation's policies and procedures
	4.2 Incident information is communicated to assigned personnel clearly, accurately and in a timely manner
	4.3 ***Incident plan*** is developed based on available information and organisational procedures
	4.4 Strategies and tactics are determined and tasks allocated to appropriate personnel
	4.5 An incident plan is implemented, continually monitored, reported and reviewed in the light of additional information and communicated in accordance with the organisation's policies and procedures
	4.6 Leadership and supervision are provided to ensure that performance and practice are to operational standards

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.7 Appropriate equipment and materials are deployed to deal with the incident
	4.8 Changes in the incident plan are communicated to relevant personnel and organisations
5. **Conclude operation**	5.1 Incident is terminated in accordance with the organisation's procedures
	5.2 Incident records of incident actions and decisions are maintained in accordance with the organisation's requirements
	5.3 Incident assessment is conducted in accordance with the organisation's requirements
6. **Supervise post-response activities**	6.1 Equipment cleaning, repair, storage and replenishment is supervised
	6.2 Debriefing requirements are met
	6.3 Post operation reports are prepared to organisation's requirements
	6.4 ***Welfare of team members*** is monitored and appropriate action taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse an incident
- assess risks and apply safe work practices
- communicate effectively
- conduct an incident assessment
- conduct briefings and debriefings for aircraft based work
- deploy personnel and equipment to deal with the incident
- for aircraft based work the ability to work in an aircraft for an extended period
- make decisions
- respond promptly to an incident
- use communication equipment

Required Knowledge

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- hazards/potential hazards and their effects
- knowledge of current navigational practices to perform navigation
- knowledge of current practices to perform conduct briefings and debriefings
- organisational policies and procedures relating to operations

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in implementation of an appropriate strategy to deal effectively with the incident **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** Evidence of competent performance should be obtained by observing an individual in responding to and dealing with an actual or simulated incident operation and supplemented by appropriate questions **Specific resources for assessment** Assessment of this competency will require access to relevant transport, communication and emergency equipment
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incidents may include	fires public disorder crime flood storms accident hazardous materials incidents rescues
Transport may include	on-road off-road aviation maritime
En route hazards may include	smoke crowds traffic unauthorised redirection prevailing weather road conditions terrain debris tidal flow spot fires restricted areas wires masts/aerials other aircraft interference to communications
Hazardous conditions may include	adverse weather and fire behaviour

PUAOPE007B Command agency personnel within a multi-agency emergency response

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competence to command an organisation's personnel within a multi-agency emergency response environment.

Command is the internal direction of the members and resources of an organisation in the performance of the organisation's roles and tasks by agreement or in accordance with relevant legislation. Command operates vertically within an organisation.

Application of the Unit

This unit applies to Public Safety personnel who have a command role within their own organisation and are required to administer that command in a multi-agency response environment. It does not include the requirement to administer command of personnel from other agencies in a multi-agency response.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAOPE021A Control a Level 1 incident

PUAOPE015A Conduct briefings and debriefings (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take command	1.1 Command is exercised in accordance with organisation authority and guidelines. 1.2 The identity, location and contact details of the commander are communicated to internal personnel and to relevant external authorities/organisations/individuals pertinent to the emergency/incident.
2. Establish a command facility	2.1 An appropriate ***command facility*** is established and operated in accordance with organisational guidelines. 2.2 Details of the facility are communicated to internal personnel and to relevant external authorities/organisations/individuals as required.
3. Establish a command structure	3.1 A command structure is established appropriate to the nature and complexity of the task (s) undertaken by the organisation. 3.2 The command structure is expanded, contracted or modified in response to changes within the emergency environment.
4. Establish procedures to permit command to be exercised	4.1 Command structure is communicated to internal personnel and external authorities/individuals whom may have a regulatory interest applicable to the emergency/incident. 4.2 Command ***information management system*** is implemented. 4.3 Communication mechanisms and procedures are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	implemented between levels of command in accordance with organisational guidelines.
	4.4 Liaison is established and maintained to meet control and command requirements.
	4.5 A public information system is established in accordance with control plan requirements.
5. Determine operational command plan	5.1 Tasks are received and/or determined in accordance with the control requirements.
	5.2 Operational command plan to implement strategies is developed and modified as required in accordance with organisational guidelines.
	5.3 Appropriate tactics to effectively manage the emergency/incident are identified in accordance with the operational command plan.
6. Manage resources under organisation command	6.1 ***Resources*** are deployed to ensure that the operational command plan is implemented in accordance with organisational guidelines.
	6.2 Human and physical resources are effectively managed to achieve command plan outcomes.
7. Manage operation(s)	7.1 Operations are conducted in accordance with the operational command plan.
	7.2 Significant changes in status and actions taken are reported consistent with organisational policy and procedures.
	7.3 Operations are redirected as required to meet changes in the conditions which affect the emergency/incident situation.
8. Conclude operation(s)	8.1 Physical, human and capital resources are accounted for in accordance with organisational guidelines.
	8.2 ***Debriefing*** requirements are met in accordance with organisational guidelines.
	8.3 Operational documentation is completed to organisation standards.
	8.4 Reports are produced as required.
9. Review operations	9.1 Plans and guidelines are evaluated and reviewed.
	9.2 Effectiveness of command and interaction with control is evaluated and documented.
	9.3 Reports are produced and communicated in accordance with established protocols.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility, other organisations' personnel and external authorities
- analyse emergency situations both functionally and strategically
- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
  - operative and non-operative personnel
  - materials
  - equipment and consumables
- effective deployment, monitoring and communication of organisation allocated task(s)
- identification and correct use of equipment
- implement response in accordance with organisational procedures and within bounds of authority
- incorporate risk management and contingency processes
- liaise effectively with emergency controller
- operation of work systems and equipment
- processes and procedures
- secure emergency/operations site
- select, prioritise, implement and evaluate appropriate strategies
- strategically react to changes within the emergency environment
- using a range of information technology devices including:
  - computers
  - radio frequency devices
  - electronic data exchange systems etc
- using tools and techniques to solve problems

Required Knowledge

- applications of relevant agreements
- code of practice or other legislative requirements
- emergency site layout
- identification and correct use of equipment
- knowledge of current principles and practices to conduct an activity which exercises elements of public safety management
- organisational command structure
- processes and procedures
- security and confidentiality of material

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- Effective deployment, monitoring and communication of organisation allocated task(s)
- analysis of emergency situations both functionally and strategically
- selection, prioritisation, implementation and evaluation of appropriate strategies
- implementation of response in accordance with organisational procedures and within bounds of authority
- securing emergency/operations site
- strategic reaction to changes within the emergency environment,
- incorporation of risk management and contingency processes
- effective liaison with emergency controller and
- logging and recording all actions and decisions

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment.

Specific resources for assessment

Resources should involve access to or simulation of emergency situations in a multi-organisation response environment. This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2025 Skills Insight

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of emergencies (imminent or actual) may include:	• natural events • drought • fire (forest • range • urban) • avalanche snow/ice/hail • tsunami • windstorm/tropical storm • hurricane/typhoon • biological • extreme heat/cold • flood/wind driven water • earthquakes/land shifts • volcanic eruption • tornado/cyclone • landslide/mudslide • dust/sand storms • lightning storm • search and rescue • fauna rescues e.g. marine life rescue
Technological/industrial events may include:	• radiological accidents • dam/levee failure • fuel/resource shortages • hazardous material releases • explosions/fire • transportation accidents • building/structure collapse • power/utility failure • extreme air pollution • strikes • business interruption • financial collapse
Civil/political events may include:	• economic • general strike • terrorism • sabotage • hostage situation(s) • civil unrest • eco-terrorism

© Commonwealth of Australia, 2025 Skills Insight

Considerations in the determination of the nature, extent and potential of an emergency may include:	• enemy attack • risk to life • risk to property • risk to environment • scope and scale of incident including likely duration of incident • resource availability • potential for changes in situation • topography • weather • speed of onset • hazard agent location • demography
Resources may include:	• human-operations personnel • volunteers • support personnel • local • state/territory and federal governments • physical-equipment • machinery • vehicles • technology devices • communication devices • aviation and marine vessels
Information management system may include:	• data receival • recording • storage and dispatch modes • procedures and protocols • types of technology – electronic data exchange devices • audio and visual recording mechanisms • public/media information dissemination • security and authorisation assignment • recording and documenting of incident
Personnel support activities may include supply of:	• catering • sanitation • shelter • rest/relief counselling services • stress management services
Command facility establishment procedures and principles may include	• proximity to emergency/incident • size and type of structure • special incident requirements

© Commonwealth of Australia, 2025 Skills Insight

consideration of:	• communication modes • logistical operations • site access and exit requirements • security requirements • equipment characteristics • support services • amenities • parking • topography • environment • climatic conditions • logistical operations
Communication processes and systems may include:	• designation of appropriate modes and channels of communication • communication responsibilities of personnel • radio communications • inter organisation liaison • data transfer • telecommunications • interpersonal communications
Internal and external personnel and authorities may include:	• operational personnel • emergency organisations • ancillary organisations • higher authorities • public • media • clients • government and semi government authorities and departments • witnesses • victims • occupational health and safety specialists • emergency management specialists • service providers • other analysts and stakeholders
Support services may include:	• emergency agencies • water • gas and power agencies • welfare and counselling organisations • medical organisations • equipment suppliers • contractors

© Commonwealth of Australia, 2025 Skills Insight

- community service organisations
- land management agencies
- transport

Debriefing may include:

- critical incident stress debriefing
- performance evaluations
- operational analysis

Agreed reporting mechanisms will involve:

- authorisation
- distribution and development of reports in accordance with regulatory and organisational requirements and may include:
  - media reports
  - ministerial reports
  - coronial reports
  - situation reports-within emergency for external distribution-status reports
  - performance evaluations
  - legal reports
  - final reports
  - briefing papers

Activities controlled include:

- operations
- planning
- logistics
- communications

Sources of information/ documents may include:

- emergency procedures
- standard operating procedures
- maps
- field reports
- relevant Australian or international documentation in disaster/emergency management
- organisational and workplace operating procedures and policies
- client requirements
- communications technology equipment
- oral
- aural or signed communications
- personal and work area work procedures and practices
- evacuation procedures
- occupational health and safety procedures
- applicable state, territory, commonwealth legislation and regulations which relate to:
  - public safety

© Commonwealth of Australia, 2025 Skills Insight

- state of emergency
- occupational health and safety regulations and legislation
- Workplace Relations Act(s)
- workers compensation
- privacy and confidentiality legislation
- freedom of information
- environment protection legislation

- equal opportunity
- equal employment opportunity and affirmative action legislation
- standards and certification requirements
- quality assurance procedures
- memorandum of understanding/agreement
- conventions
- protocols
- policies
- codes of practice

PUAOPE013A Operate communications systems and equipment

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

Application of the Unit

This unit applies to a person who is required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This work may occur either in the field or from a facility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use communications systems and equipment	1.1 ***Communications equipment*** and techniques including ***verbal communications*** and ***voice procedures***, are selected to best meet the task, context and needs of the situation 1.2 Equipment is operated safely to support communications consistent with organisational policies and procedures 1.3 ***Communications system*** is correctly utilised to facilitate transmission and reception
2. Transmit and receive communications	2.1 Information is transmitted concisely and clearly to facilitate accurate reception of the message in accordance with organisational policies and procedures 2.2 Contact is acknowledged, communication is confirmed and action is initiated 2.3 Communication faults and deficiencies are reported according to organisational policies and procedures 2.4 Alternative communications strategies are employed according to organisational procedures to address identified faults and deficiencies in communication 2.5 Communication is processed and recorded in accordance with organisational policies and procedures
3. Maintain communications equipment	3.1 Communications equipment is inspected to ensure operational readiness 3.2 Fault finding techniques are applied and basic maintenance is conducted according to organisational policies and procedures 3.3 Faulty equipment is identified and noted for repair, and documentation is completed in accordance with organisational procedures

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- maintain communications equipment according to organisational procedures
- operate the different communications equipment required by the organisation
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communications system
- utilise the organisation's communications processes and systems

Required Knowledge

- organisational policies and procedures relevant to the operation of communications equipment (such as relevant legislation; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisation's communications system
- range of communications equipment available to the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • use communications equipment under non-operational and operational conditions • accurately transmit and receive communications using the organisation's communications systems and equipment. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environmentor in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment**

© Commonwealth of Australia, 2025 Skills Insight

	Access is required to: • relevant communications equipment.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communications equipment may include:	• Computers • Facsimiles • Pagers • Radio • Signalling devices • Telephones (mobile, landline and satellite)
Verbal communications procedures may include:	• Call signs • Coded messages • Emergency procedures • Phonetic alphabet • Pro-words • Use of abbreviations
Voice procedures may include:	• Corrections • Pitch • Repetitions • Rhythm

© Commonwealth of Australia, 2025 Skills Insight

Communications systems may include:	• Sentences • Speed • Volume • Communication protocols • Communications software • Organisation's networks • Verbal communication procedures

PUAOPE016A Manage a multi-team sector

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Fire specific prerequisites removed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to manage a multi-team response to incidents which may be time critical and/or potentially threatening to life, property or the environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit typically applies to Sector/Division Commanders and Level 1 Operations Officer who are responsible for:

- implementing their portion of the Incident Action Plan (IAP)
- allocating resources within their sector
- reporting on incident situation, the progress of operations, emerging risks and the status of resources within the sector
- maintaining situational awareness

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR302B Suppress urban fire (Fire sector specific)

OR

PUAFIR303B Suppress wildfire (Fire sector specific)

ELEMENT	PERFORMANCE CRITERIA
	3.4 Operational reports are issued in accordance with organisational policies and procedures
	3.5 Operations are modified as required by the situation
4. Manage and monitor sector operations	4.1 Sector is managed is accordance with agency workplace policies
	4.2 Safe work practices, health and welfare arrangements are implemented and monitored
	4.3 Strategies are implemented and tactics are determined in accordance with IAP
	4.4 Team leaders are briefed and tasked in accordance with the IAP
	4.5 Specific tasks are reviewed and modified as required
	4.6 Regular exchange of information is maintained with Operations Officer on incident situation, progress, achievement of incident, objectives and emerging risks
	4.7 All unexpected situations that require a quick and decisive response are recognised and responded to in accordance with operational requirements and procedures
	4.8 Reports are provided to Operations Officer on required modification to the IAP, additional resources required, surplus resources and hazards present
	4.9 Need for additional resources and logistical support is identified and communicated to Operations Officer
	4.10 Activities are coordinated with adjacent sectors
5. Manage post incident operations	5.1 Resources are accounted for and demobilised in accordance with organisational policies and procedures
	5.2 Post operational ***documentation*** is completed to organisational requirements
	5.3 Sector debrief is conducted in accordance with organisational guidelines
	5.4 Recommendations are made for changes in policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

Required Skills:

- access information and support from the control facility
- brief and debrief personnel
- develop and maintain incident situational awareness
- effectively and efficiently deploy human and physical resources
- identify and correctly use equipment
- lead teams
- make decisions, negotiate and resolve conflict
- manage resources

Required Knowledge:

- agency procedures for managing operations
- Australasian Inter-service Incident Management System (AIIMS) structure
- codes of practice and legislation
- emergency site layout
- equipment and personnel capabilities for incident type
- focus of operation of work systems and equipment
- IAP (objectives, strategies and tactics) and development of appropriate tactics
- industrial awards and agreements, and agency personnel practices and guidelines
- organisational command structure
- post operational procedures
- processes for implementing, monitoring, amending and reviewing tactics
- reporting and recording requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • assess effectiveness of strategies and tactics on sector • implement relevant part of the IAP for the sector • adapt tactics, where required • provide reports to operational supervisor. • Consistency in performance • Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	Context of assessment Competency should be assessed in an operational environment or in an industry-approved simulated workplace environment.

© Commonwealth of Australia, 2025 Skills Insight

	Specific resources for assessment Access is required to: • emergency situations or simulation of emergency situations, in a multi-team response environment • equipment, personnel, facilities etc. appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

Risk assessment may include:	• Adequacy of allocated equipment • Capability of assigned personnel • Forecasts • Hazards • Information gathered from existing plans/databases • Meteorological profiles • Property and environment • Risk to life • Type of incident
Resources may include:	• Aircraft • Amenities • Communication devices • Equipment characteristics

© Commonwealth of Australia, 2025 Skills Insight

Incidents may include:	• Human:
	  • operations personnel
	  • specialised personnel such as aviation authorities
	  • support personnel/services
	  • volunteers
	• Local, federal and state/territory governments
	• Parking
	• Physical:
	  • aircraft
	  • equipment
	  • machinery
	  • material
	  • safety equipment
	  • vehicles
	• Technology devices
	• Life threatening situations
	• Protection of property and the environment
	• Risks to life and property such as:
	  • biological agents
	  • fauna rescue
	  • fire
	  • flood
	  • hazardous materials
	  • landslip
	  • severe storm

Constraints may include:	• Aboriginal and Torres Strait Islander sacred sites • Constraints on road closure • Existing emergency management plans • Financial • Hazardous areas • Legislative • Military areas • Other areas requiring permission and/or authorisation to enter • Other areas of environmental and cultural significance • Prevailing weather • Redirection of water course • Resources • Restrictions on duration of work or the conditions under which personnel may be employed

© Commonwealth of Australia, 2025 Skills Insight

	• Seasonal factors • Time • Wilderness areas
Initial response options will be determined by:	• Availability of resources and estimated outcome • Legislative requirements • Organisational guidelines • Regulatory authorities
Organisational policies and procedures may include:	• Civil Aviation Orders • Corporate and strategic plans • Legislation relevant to the operation/incident/response • Legislation relevant to the organisation • Operational performance standards • Operational procedures • Organisational performance standards • Organisational personnel practices and guidelines • Organisational quality standards • Organisation's approach to environmental management and sustainability • Procedures/action • Search and rescue time procedures and action
Communications systems may include:	• Computer • Facsimile • Mobile data terminal • Pager • Radio • Satellite • Signage • Signalling • Telephone • Warnings
IAP may include:	• Area or region • Aims and objectives of the response/incident/operation • Consideration or aircraft type • Contingencies and alternatives • Coverage of one or more places • Document (formal or informal) • Flight plans • Limitations • Monitoring and evaluative procedures • Part of an overall plan

© Commonwealth of Australia, 2025 Skills Insight

	• Performance and suitability • Possible strategies to achieve objectives • Possible tactics to implement strategies • Pre-plans • Reporting requirements • Resources required including their availability
Monitoring of operations may include:	• Progress against plan • Utilisation of resources and potential of incident • Welfare of personnel
Documentation may include:	• Assessment of safety procedures utilised • Completion of logs • Financial statements • Input to debriefs • Journal records • Post-operational report • Situational reports

PUATEA001B Work in a team

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers competency in working with others and making a positive contribution to the effectiveness and efficiency of a team in a work environment when predominantly under direct supervision. Limited responsibility towards others is required.

Application of the Unit

This unit applies to all workers working in the Public Safety industry, but is particularly relevant to new workers in assisting integration with the organisational team culture of the agency.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to team activities	1.1 Roles and responsibilities of team members are recognised. 1.2 Contribution is made to identifying team goals and objectives. 1.3 ***Activities*** are completed to required standard within timeframe and in accordance with ***organisation's policies and procedures.*** 1.4 ***Assistance*** in the completion of tasks is requested from other team members where appropriate. 1.5 Team members are assisted to ensure efficient and safe completion of tasks in accordance with organisation's policies and procedures. 1.6 Participation by team members is encouraged and acknowledged. 1.7 Changes in allocated role and responsibilities are implemented. 1.8 Team meetings are attended regularly and punctually.
2. Share knowledge and information	2.1 Information relevant to work is communicated effectively with team members to enable efficient completion of tasks in accordance with the organisation's policies and procedures. 2.2 Knowledge and skills are shared between team members.
3. Give and receive support to/from team members	3.1 ***Feedback***/assistance is given to other team members in an appropriate manner. 3.2 Team members are supported in achieving workplace goals. 3.3 Feedback from other team members is acted upon appropriately.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge

- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals. **Consistency in performance** Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated workplace environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Skills Insight

Teams comprise	• two or more people working towards a shared purpose
Appropriate situation to request assistance may include:	• difficulty meeting timelines • to comply with occupational health and safety requirements • unsure of best method to complete task • to maximise efficiency
Assisting other team members may include:	• own tasks completed • to comply with occupational health and safety requirements • assistance requested • actions of others do not comply with requirements • other team member appears to be having difficulty completing task
Contribute to workplace goals may include:	• completion of task • achievement of new competencies • development of new skills • attainment of new knowledge • personal development
Activities may include:	• working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies • civil/political emergencies and non emergency operations including community events • public relations – activities • sporting events • parades • festivals
Conditions under which this competency may be required include	• hazardous conditions eg adverse weather • after dark operations • difficult terrain • time pressure • varying time frames from immediate/short term to long term response operations • varying access to equipment/resources necessitating the use of improvised techniques • single or multi organisation responses • dealing with human behaviours that result from emergency situations • non-emergency operations and events eg training and community education
Appropriate feedback on	• acknowledging initiative

© Commonwealth of Australia, 2025 Skills Insight

performance may include:	• aptitude • ideas • performance and assistance • providing constructive criticism
Organisation's policy and procedures may vary between sectors and organisations and may include:	• legislation relevant to the operation/incident/response • legislation relevant to the organisation • operational • corporate and strategic plans • operational procedures • operational performance standards • organisation's personnel practices • policy and procedures • organisation's quality standards • organisation's approach to environmental management and sustainability
Communication processes may include:	• established organisation's procedures for recording and reporting • the use of logs • notebooks • pagers • radios and telephones • team members may be geographically dispersed and require communication systems and technology to remain in contact

1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers competency for working as a member of a team or as an individual for periods of time without direct supervision and for mentoring and coaching either in an operational or non-operational environment.

Application of the Unit

This unit applies to all workers working in the Public Safety Industry, but is particularly relevant for new workers to understand the organisation’s expectations and limits in regards decision making.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUATEA001B Work in a team (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake work activities	1.1 Work requirements are identified and undertaken. 1.2 Instructions and directions are understood and implemented. 1.3 Communication is maintained with team leader advising of progress of task/activity. 1.4 Personal safety and safety of others is maintained. 1.5 Any legal requirements and/or ramifications of ***activities*** are communicated to team leader. 1.6 ***Work area*** is determined or selected in accordance with operational or organisation's requirements. 1.7 Equipment is operated in accordance with the manufacturer's specifications. 1.8 OH&S and the organisation's policies and procedures.
2. Accept responsibilities	2.1 Responsibilities are accepted according to the organisation's policy and procedures. 2.2 Team leader is appraised of the outcome of task/activity. 2.3 Any activity that exceeds the scope of the defined task is referred to the supervisor.
3. Set performance requirements	3.1 ***Performance requirements*** are based on objectives and goals and agreed with supervisor.
4. Maintain team performance	4.1 Individual performance is monitored against defined performance requirements and appropriate action taken to maintain performance if required. 4.2 Performance of others is monitored and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met. 4.3 Supervisor is provided with feedback and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	constructive advice.
	4.4 Issues which cannot be rectified or addressed are referred to the supervisor for appropriate action according to the organisation's policy.
	4.5 Supervisor is advised of any changes in priorities or tasks.
	4.6 All ***required documentation*** relevant to performance is completed.
5. Act as a team leader as required	5.1 Responsibility for the performance of the team is accepted.
	5.2 Goals are set, tasks identified and presented to team members.
	5.3 Instructions and directions are communicated to team members clearly and unambiguously.
	5.4 Team members' concerns and queries are recognised, discussed and dealt with.
	5.5 Any legal requirements and/or ramifications of team activities are communicated to team members.
	5.6 Duties, rosters and responsibilities are allocated to team members having regard to the skills and knowledge required to properly undertake the assignment or task and according to organisation's policy and procedures.
	5.7 Feedback on own performance is provided as required.
	5.8 Level of authority is recognised and adhered to.
	5.9 Operational debrief is conducted in accordance with the organisation's requirements.

Required Skills and Knowledge

Required Skills

- communicating instructions and directions
- communicating performance expectations
- completing a range of documentation
- encouraging team members
- informal performance counselling
- providing feedback on performance
- representing issues to management

© Commonwealth of Australia, 2025 Skills Insight

- team building

Required Knowledge

- defined OH&S policies and procedures
- knowledge of current principles and practices
- legal requirements and ramifications of team activities
- method of monitoring performance
- organisation's policy for referring performance issues
- organisation's policy relevant to hours of work and work allocation
- organisation's requirements for documenting team performance and activities
- procedures and methods of setting performance expectations
- required to work in a team
- team members' duties and responsibilities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in communication of performance expectations and providing feedback to team members. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. Where workplace observation is insufficient simulations or case studies may be used. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Scope of allocated task may include:	• extent of activity • content of activity • degree of responsibility for task

© Commonwealth of Australia, 2025 Skills Insight

Performance requirements include	• goals • objectives • plans • standards • performance indicators • production rates
Work area may be dependent upon	• activity conducted • road accessibility • logistical support • water availability • vicinity of built-up areas • areas of reduced visibility • distance to operation • hazards • vehicle parking
Performance issues may include:	• occupational health and safety • hours of work details • concerns about ability to complete work • inadequate resources
Appropriate personnel may include:	• manager • human resource personnel • team leader • supervisor • team members
Required documentation may include:	• forms • proformas • incident reports • rosters • timesheets • written reports • logs • standard operating procedures • checklists

Activities may include:	• non operational activities:
	  • tasks
	  • projects
	  • preparing documentation
	• operational activities:
	  • responding in a combat or support role to natural emergencies (fire/flood)
	  • technological/industrial emergencies

© Commonwealth of Australia, 2025 Skills Insight

	• civil/political emergencies and non-emergency operations including community events • public relations activities • sporting events • parades • festivals
Conditions under which operational activities may be may include:	• hazardous conditions including adverse weather • after dark operations • emergency operations • difficult terrain • time pressure • varying time frames from immediate/short term to long term response operations • varying access to equipment necessitating the use of improvised techniques • varying levels of resources • single or multi organisation responses

Unit Sector(s)

Not applicable.

RIIHAN308E Load and unload plant

Modification History

Release	Comment
1	This unit replaces RIIHAN308D Load and unload plant. Added performance criteria 2.7 securing plant and mapping table.

Application

This unit describes a participant's skills and knowledge required to load and unload plant in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and industry sectors. Relevant information must be sourced prior to application of the unit.

Elements and Performance Criteria

1. Plan and prepare to load and unload plant	1.1 Access, interpret and apply load handling documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement signage and barriers and ensure the loading/unloading site is made safe and isolated from general traffic flow
2. Load the plant	2.1 Confirm the dimensions and capacity of the float/trailer to safely carry the plant item 2.2 Select tools and loading equipment, check for serviceability/faults and rectify or report, verbally or in writing, prior to commencement 2.3 Confirm preparation of the plant for transportation has been completed 2.4 Place and secure loading aids

© Commonwealth of Australia, 2025 Skills Insight

	2.5 Confirm loading procedure with operator and/or guide before loading commences 2.6 Move the plant item onto the trailer/float and halt at the designated position 2.7 Secure plant to trailer/float
3. Unload the plant	3.1 Confirm the unloading procedure with operator and/or guide before unloading commences 3.2 Place and secure unloading aids, including ramps, in accordance with the trailer/float specifications 3.3 Slacken securing devices and remove in a sequence which optimises safety 3.4 Move the plant item off the trailer/float and halt at the designated position 3.5 Stow loading aids including ramps, bridging materials and securing devices

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIHAN308E Load and unload plant

Modification History

Release	Comment
1	This unit replaces RIIHAN308D Load and unload plant. Added performance criteria 2.7 securing plant and mapping table.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of loading and unloading plant including:
  - applying operational safety
  - driving mobile plant
  - accessing, interpreting and applying technical information
  - calculating volume and weights
  - maintaining equipment records
  - applying fault finding techniques
  - complying with environmental requirements
  - disposing of environmentally sensitive fluids and materials
- works effectively with others to undertake and complete the loading and unloading plant that meets all of the required outcomes including:
  - complying with written and verbal reporting requirements and procedures
  - communicating clearly and concisely with others to receive and clarify work instructions
  - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of loading and unloading plant that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - selecting, checking and using the required tools and equipment
  - placing and securing loading and unloading aids
  - moving the plant item onto and off the trailer/float
  - slackening securing devices and removing in a safe sequence

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate knowledge of the following when loading and unloading plant:

- National Standard for high risk work
- site and equipment safety requirements
- understanding of required hand signals
- techniques and processes for preparing plant for transportation
- basic motion and restraint theory related to heavy plant on floats or trailers
- basic centre of gravity and balance theory related to heavy plant on floats or trailers
- types, operation, uses and imitations of load securing equipment
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet
- levelling techniques
- job safety analyses/safe work method statement

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other units of competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this unit of competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,

© Commonwealth of Australia, 2025 Skills Insight

- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	**AQF** Level**	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered to indicate the AQF level.

RIIMPO315D Conduct tractor operations

Modification History

Release	Comment
1	This unit replaces RIIMPO315A Conduct tractor operations. Performance Criteria amended to include Manoeuvring, Driving, Parking Up; requirements made more explicit; Housekeeping element added and differentiated from Operator Maintenance.
2	Editorial corrections; Modification History added; amend reference to Licensing requirements in Unit Application.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct tractor operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for tractor operations	1.1 Access, interpret and apply tractor operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work instructions 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for

© Commonwealth of Australia, 2025 Skills Insight

	work activities 1.5 Identify, obtain and implement traffic management signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate tractor	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Drive and operate tractor, and modify the operating technique to meet changing work conditions 2.4 Complete work plan within the operating capacity of the equipment 2.5 Act on or report monitoring systems and alarms 2.6 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment
3. Select, remove and fit attachments	3.1 Select attachment for the task 3.2 Remove and fit attachment 3.3 Test attachment to ensure correct fitting and operation 3.4 Use attachment in accordance with recommendations and design limits 3.5 Clean and store removed attachments in designated location
4. Relocate tractor	4.1 Prepare tractor for relocation 4.2 Move tractor safely between worksites, observing relevant codes and traffic management requirements
5. Carry out machine operator maintenance	5.1 Prepare machine for maintenance 5.2 Conduct inspection and fault finding 5.3 Carry out scheduled maintenance tasks 5.4 Process written maintenance records
6. Conduct housekeeping activities	6.1 Clear work area and dispose of or recycle materials 6.2 Process records

Assessment Requirements for RIIMPO315D Conduct tractor operations

Modification History

Release	Comment
1	This unit replaces RIIMPO315A Conduct tractor operations. Performance Criteria amended to include Manoeuvring, Driving, Parking Up; requirements made more explicit; Housekeeping element added and differentiated from Operator Maintenance.
2	Editorial corrections; Modification History added; amend reference to Licensing requirements in Unit Application.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of tractor operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying tractor and attachment operating techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safe parking and securing of equipment

© Commonwealth of Australia, 2025 Skills Insight

- works effectively with others to undertake and complete tractor operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of conducting tractor operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - completing a variety of tractor operations during the three occasions, selected from the following:
    - post hole digging
    - spraying of herbicides/fertilisers
    - mowing/slashing
    - lifting
    - sweeping
    - blade based functions
- fitting and removing at least three (3) attachments selected from the following:
  - a front blade
  - forklift
  - slasher
  - mower
  - auger
  - drag broom
  - power broom
  - loading platform
  - rotary hoe
  - concrete mixer
  - spraying equipment
  - disc plough

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting tractor operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed

© Commonwealth of Australia, 2025 Skills Insight

- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- complying with project quality requirements
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	**AQF** Level**	**Required assessor or Industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years

© Commonwealth of Australia, 2025 Skills Insight

Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIMPO317E Conduct roller operations

Modification History

Release	Comment
1	This unit replaces RIIMPO317D Conduct roller operations. Unit modified to remove Element 3, reference to 'select, remove and fit attachments'. Added performance criteria 2.6. Performance evidence amended to clarify adjusting roller attachment specifics.

Application

This unit describes a participant's skills and knowledge required to conduct roller operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare roller operations	1.1 Access, interpret and apply roller operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic management signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency

© Commonwealth of Australia, 2025 Skills Insight

2. Operate roller	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate roller, and modify the operating technique to meet changing work conditions 2.5 Complete work plan within the operating capacity of the equipment 2.6 Adjust interchangeable drums, and/or spray bars, and/or scraper bars, and/or wheel/drum brooms and/or drag brooms and/or blades for operational effectiveness and efficiency 2.7 Engage and disengage the compacting device 2.8 Identify, remove or manage contaminants 2.9 Act on or report monitoring systems and alarms
3. Prepare to relocate the roller	3.1 Prepare the roller for relocation 3.2 Move the machine safely within and/or between work areas, observing relevant codes and traffic management requirements 3.3 Load and unload machine from float/trailer
4. Carry out machine operator maintenance	4.1 Prepare machine for maintenance 4.2 Conduct inspection and fault finding 4.3 Carry out scheduled maintenance tasks 4.4 Return machine to service 4.5 Process written maintenance records
5. Conduct housekeeping activities	5.1 Clear work area and dispose of or recycle materials 5.2 Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for RIIMPO317E Conduct roller operations

Modification History

Release	Comment
1	This unit replaces RIIMPO317D Conduct roller operations. Unit modified to remove Element 3, reference to 'select, remove and fit attachments'. Added performance criteria 2.6. Performance evidence amended to clarify adjusting roller attachment specifics.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of roller operations in the civil construction industry including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying operating techniques for levelling and compacting
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safe parking and securing of equipment
- works effectively with others to undertake and complete roller operations in the civil construction industry that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions

© Commonwealth of Australia, 2025 Skills Insight

- demonstrates completion of conducting roller operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - completion of operations using a variety of different material types and include the mandatory tasks of:
    - compacting materials to pattern and density
    - sealing and finishing
    - adjusting at least two (2) of the following:
      - interchangeable drums
      - spray bars
      - scraper bars
      - wheel/drum brooms
      - drag brooms
      - blades

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting roller operations:

- ground conditions
- isolation procedures
- equipment processes, technical capability and limitations
- preparation for fire/accident/emergency
- signs of operator fatigue and how it should be managed
- drawings and sketches
- site isolation and traffic control responsibilities and authorities
- civil construction terminology
- project quality requirements
- basic principles of soil technology and soil compaction for civil works
- basic earthworks calculations
- Civil construction activity sequences of road construction, earthworks and drainage
- operational, maintenance and basic diagnostics
- housekeeping activities

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector’s work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,

© Commonwealth of Australia, 2025 Skills Insight

- assessment may be conducted in conjunction with the assessment of other units of competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this unit of competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	**AQF** Level**	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

RIIMPO318E Conduct civil construction skid steer loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO318D Conduct civil construction skid steer loader operations. Performance criteria 3.3 and 5.2 amended. Element 5 title amended. Amendments made to performance and knowledge evidence. All changes were minor in relation to lifting, attachments, refuelling and relocating plant.

Application

This unit describes the skills and knowledge required to conduct civil construction skid steer loader operations in civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for skid steer loader operations	1.1 Access, interpret and apply skid steer loader operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Obtain, identify and implement traffic signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared

© Commonwealth of Australia, 2025 Skills Insight

	for fire/accident/emergency
2. Operate skid steer loader	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate loader, and modify the operating technique to meet changing work conditions 2.5 Complete work plan within the operating capacity of the equipment 2.6 Act on or report monitoring systems and alarms
3. Load, carry and place materials	3.1 Conduct communication practices associated with transportation and lifting of materials 3.2 Establish weight of load and ensure it is within safe operational limits of the machine 3.3 Select, appropriate attachment and/or required equipment in accordance with safe working load requirements 3.4 Position machinery to ensure stability and locate to effectively shift materials according to job specifications 3.5 Shift load safely and effectively 3.6 Move load using hand/audible/communication signals
4. Select, remove and fit attachments	4.1 Select attachment for the task 4.2 Remove and fit attachment 4.3 Test attachment and ensure correct fitting and operation 4.4 Use attachment in accordance with recommendations and design limits 4.5 Clean and store removed attachments in designated location
5. Prepare to relocate the skid steer loader	5.1 Prepare for relocation of skid steer loader 5.2 Move skid steer loader safely within and/or between work areas, observing relevant codes and traffic management requirements 5.3 Load and unload machine from float/trailer
6. Carry out machine operator maintenance	6.1 Prepare machine for maintenance 6.2 Conduct inspection and fault finding 6.3 Carry out scheduled maintenance tasks

© Commonwealth of Australia, 2025 Skills Insight

	6.4	Process written maintenance records
7. Conduct housekeeping activities	7.1	Clear work area and dispose of or recycle materials
	7.2	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO318E Conduct civil construction skid steer loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO318D Conduct civil construction skid steer loader operations. Performance criteria 3.3 and 5.2 amended. Element 5 title amended. Amendments made to performance and knowledge evidence. All changes were minor in relation to lifting, attachments, refuelling and relocating plant.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of civil construction skid steer loader operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying levelling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safely parking and securing equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete civil construction skid steer loader operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions

© Commonwealth of Australia, 2025 Skills Insight

- demonstrates completion of conducting civil construction skid steer loader operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - completion of operations to specification using a variety of material types including:
    - stripping/spreading topsoil and materials
    - backfilling
    - lifting, loading vehicles
    - excavations
    - mixing materials
    - site clean-up
  - selecting, fitting, testing, using and removing a minimum of one (1) of the following attachments:
    - multipurpose bucket
    - forks
    - dozer blade
    - backhoe
    - auger
    - chain digger
    - power broom
    - profiler
    - tiller/mixer
    - rotary hoe
    - hammer
    - asphalt cutter/saw
    - concrete cutter/saw
    - rake

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction skid steer loader operations:

- ground conditions
- isolation procedures
- equipment processes, technical capability and limitations
- preparation for fire/accident/emergency
- signs of operator fatigue and how it should be managed
- interpretation of drawings and sketches
- site isolation and traffic control responsibilities and authorities
- Civil construction terminology
- project quality requirements
- basic principles of soil technology and soil compaction for civil works

© Commonwealth of Australia, 2025 Skills Insight

- basic earthworks calculations
- Civil construction activity sequences of road construction, earthworks and drainage
- methods for calculating safe working loads
- operational, maintenance and basic diagnostics
- housekeeping activities
- vehicle refuelling requirements and procedures

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other units of competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this unit of competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	**AQF** Level**	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years

© Commonwealth of Australia, 2025 Skills Insight

Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered to indicate the AQF level.

RIIMPO319D Conduct backhoe/loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO319A Conduct backhoe loader operations.
2	Amended Performance Evidence and Performance Criteria; amend reference to Licensing requirements in Unit Application.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct backhoe/loader operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for backhoe/loader operations	1.1 Access, interpret and apply backhoe/loader operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work instructions 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement signage traffic management

© Commonwealth of Australia, 2025 Skills Insight

	requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate backhoe/ loader	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks , and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate machine, and modify the operating technique to meet changing work conditions 2.5 Complete work plan within the operating capacity of the equipment 2.6 Act on or report monitoring systems and alarms
3. Load, carry and place materials	3.1 Conduct communication practices associated with transportation and lifting of materials 3.2 Establish weight of load and ensure it is within safe operational limits of the machine 3.3 Select, attach and apply slings and lifting gear in accordance with safe working load requirements 3.4 Position and locate machinery to ensure stability to effectively shift materials according to job specifications 3.5 Shift load safely and effectively 3.6 Move load using hand/audible/communication signals
4. Select, remove and fit attachments	4.1 Select attachment for the task 4.2 Remove and fit attachment 4.3 Test attachment and ensure correct fitting and operation 4.4 Use attachment in accordance with recommendations and design limits 4.5 Clean and store removed attachments in designated location
5. Relocate the backhoe/ loader	5.1 Prepare backhoe/loader for relocation 5.2 Move backhoe/loader safely between worksites, observing relevant codes and traffic management requirements
6. Carry out machine	6.1 Prepare machine for maintenance

© Commonwealth of Australia, 2025 Skills Insight

operator maintenance	6.2	Conduct inspection and fault finding
	6.3	Carry out scheduled maintenance tasks
	6.4	Process written maintenance records
7. Clean up	7.1	Clear work area and dispose of or recycle materials
	7.2	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO319D Conduct backhoe/loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO319A Conduct backhoe loader operations.
2	Amended Performance Evidence and Performance Criteria; amend reference to Licensing requirements in Unit Application.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of backhoe/ loader operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying leveling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safely parking and securing of equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete backhoe/ loader operations that meet all of the required outcomes including:

© Commonwealth of Australia, 2025 Skills Insight

  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of conducting backhoe/loader operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - completion of operations to specification using a variety of material types including:
    - mixing materials
    - stripping/spreading topsoils and materials
    - trench excavation
    - backfilling
    - lifting and carrying materials
    - loading dump trucks, wagons, hoppers, chutes, and cutting/boxing
  - fitting and removal a variety of attachments selected from the following:
    - extending devices
    - tilt bucket
    - buckets
    - compaction wheel
    - ripper
    - plate compactor
    - rock breaker
    - auger
    - broom
    - mower/slasher
    - forklift
    - 4 in 1 bucket and free/rock grab

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting backhoe/loader operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities

© Commonwealth of Australia, 2025 Skills Insight

- using civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil construction activity sequences of road construction, earthworks and drainage
- applying leveling techniques
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	**AQF** Level**	**Required assessor or Industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

© Commonwealth of Australia, 2025 Skills Insight

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIMPO320E Conduct civil construction excavator operations

Modification History

Release	Comment
1	This unit replaces RIIMPO320D Conduct civil construction excavator operations. Performance criteria 5.3 amended grammatically. Performance evidence ‘carrying out vehicle refuelling requirements and procedures’ moved to knowledge evidence. Unit mapping table included.

Application

This unit describes a participant’s skills and knowledge required to conduct civil construction excavator operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for excavator operations	1.1 Access, interpret and apply excavator operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Obtain, identify and implement traffic management signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency

© Commonwealth of Australia, 2025 Skills Insight

2. Operate excavator	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate excavator, and modify the operating technique to meet changing work conditions
3. Lift, carry and place materials	3.1 Conduct communication practices associated with transportation and lifting of materials 3.2 Establish weight of load and ensure it is within safe operational limits of the machine 3.3 Select, attach and use slings and lifting gear in accordance with safe working load requirements 3.4 Position machinery and ensure stability and locate to effectively shift materials according to job specifications 3.5 Shift load safely and effectively 3.6 Move load using hand/audible/communication signals
4. Select, remove and fit attachments	4.1 Select attachment for the task 4.2 Remove and fit attachment according to manufacturer's manual and site requirements 4.3 Test attachment and ensure correct fitting and operation 4.4 Use attachment in accordance with recommendations and design limits 4.5 Remove, clean and store attachments in designated location
5. Prepare to relocate the excavator	5.1 Prepare excavator for relocation 5.2 Move excavator safely within and/or between work areas, observing relevant codes and traffic management requirements 5.3 Load and unload machine from float/trailer
6. Carry out machine operator maintenance	6.1 Prepare machine for maintenance 6.2 Conduct inspection and fault finding 6.3 Carry out scheduled maintenance tasks 6.4 Process written maintenance records
7. Conduct housekeeping activities	7.1 Clear work area and dispose of or recycle materials 7.2 Process records

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO320E Conduct civil construction excavator operations

Modification History

Release	Comment
1	This unit replaces RIIMPO320D Conduct civil construction excavator operations. Performance criteria 5.3 amended grammatically. Performance evidence ‘carrying out vehicle refuelling requirements and procedures’ moved to knowledge evidence. Unit mapping table included.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of excavator operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying levelling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safely parking and securing equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete excavator operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions

© Commonwealth of Australia, 2025 Skills Insight

- demonstrates completion of conducting civil construction excavator operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - completing operations to specification using a variety of material types and activities including:
    - loading, cutting/boxing
    - stripping/spreading
    - lifting and carrying materials
    - bulk excavation
    - mixing/backfilling
    - trench excavation
    - stockpiling
    - battering
    - benching
    - site clean up
  - fitting and removal of a variety of attachments selected from the following:
    - tilt bucket
    - buckets
    - lifting device
    - vibrating compaction wheel
    - ripper/tyne
    - compaction plate
    - compaction wheel
    - rock breaker
    - auger

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction excavator operations:

- ground conditions
- isolation procedures
- equipment processes, technical capability and limitations
- prepararion for fire/accident/emergency
- signs of operator fatigue and how it should be managed
- drawings and sketches
- site isolation and traffic control responsibilities and authorities
- civil construction terminology
- project quality requirements
- basic principles of soil technology and soil compaction for civil works
- basic earthworks calculations

© Commonwealth of Australia, 2025 Skills Insight

- Civil construction activity sequences of road construction, earthworks and drainage
- vehicle refuelling requirements and procedures
- using methods for calculating safe working loads
- operational, maintenance and basic diagnostics
- housekeeping activities

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other units of competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this unit of competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	**AQF** Level**	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years

© Commonwealth of Australia, 2025 Skills Insight

Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered to indicate the AQF level.

RIIMPO321E Conduct civil construction wheeled front end loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO321D Conduct civil construction wheeled front end loader operations. Unit application amended. Element related to attachments and related performance evidence removed. Performance criteria 4.2 amended grammatically. Performance evidence ‘carrying out vehicle refuelling requirements and procedures’ moved to knowledge evidence. Unit mapping table included.

Application

This unit describes the skills and knowledge required to conduct civil construction wheeled front end loader operations.

This unit is appropriate for those working in operational roles.

Where equipment being assessed requires the fitting and removal of attachments to be demonstrated an integrated tool carrier unit should be used.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for wheeled front end loader operations	1.1 Access, interpret and apply wheeled front end loader operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work instructions 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Obtain, identify and implement traffic management signage requirements

© Commonwealth of Australia, 2025 Skills Insight

	1.6 Select equipment for work activities and check for faults 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate front end loader	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate front end loader, and modify the operating technique to meet changing work conditions 2.5 Complete work plan within the operating capacity of the equipment 2.6 Act on or report monitoring systems and alarms
3. Attach, secure, lift, carry and place materials	3.1 Conduct communication practices associated with transportation and lifting of materials 3.2 Establish weight of load and ensure it is within safe operational limits of the machine 3.3 Select, attach and use slings and lifting gear in accordance with safe working load requirements 3.4 Position machinery to ensure stability and locate to effectively shift materials according to job specifications 3.5 Shift load safely and effectively 3.6 Move load using hand/audible/communication signals
4. Prepare to relocate the front end loader	4.1 Prepare front end loader for relocation 4.2 Move front end loader safely within and/or between work areas, observing relevant codes and traffic management requirements 4.3 Load and unload machine from float/trailer
5. Carry out machine operator maintenance	5.1 Prepare machine for maintenance 5.2 Conduct inspection and fault finding 5.3 Carry out scheduled maintenance tasks 5.4 Process written maintenance records
6. Conduct housekeeping activities	6.1 Clear work area and dispose of or recycle materials 6.2 Process records

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Performance criteria 4.2 amended grammatically. Performance evidence ‘carrying out vehicle refuelling requirements and procedures’ moved to knowledge evidence. Unit mapping table included.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of civil construction wheeled front end loader operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying levelling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safely parking and securing equipment
- works effectively with others to undertake and complete civil construction wheeled front end loader operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions

© Commonwealth of Australia, 2025 Skills Insight

- demonstrates completion of civil construction wheeled front end loader operations that safely, effectively and efficiently meets all of the required outcomes on at least one (1) occasion including:
  - completion of operations to specification in a minimum of two different material types including:
    - mixing materials
    - stripping/spreading topsoil and materials
    - loading, cutting/boxing
    - backfilling
  - lifting and carrying materials
  - site clean-up on

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction wheeled front end loader operations:

- ground conditions
- isolation procedures
- equipment processes, technical capability and limitations
- preparation for fire/accident/emergency
- signs of operator fatigue and how it should be managed
- drawings and sketches
- site isolation and traffic control responsibilities and authorities
- civil construction terminology
- project quality requirements
- basic principles of soil technology and soil compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- vehicle refuelling requirements and procedures
- methods for calculating safe working loads
- operational, maintenance and basic diagnostics
- housekeeping activities

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector’s work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,

© Commonwealth of Australia, 2025 Skills Insight

- assessment may be conducted in conjunction with the assessment of other units of competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this unit of competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	**AQF** Level**	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered to indicate the AQF level.

RIIMPO322D Conduct civil construction tracked front end loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO322A Conduct civil construction tracked front end loader operations. Performance Criteria amended to include Manoeuvring, Driving and Parking Up; made requirements more explicit; introduced Housekeeping element.
2	Editorial corrections; Modification History added.
3	Removed repetition from Performance Criteria; amended Performance Evidence wording; amend reference to Licensing requirements in Unit Application; editorial corrections.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct civil construction tracked front end loader operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for tracked front end loader	1.1 Access, interpret and apply tracked front end loader operations documentation and ensure the work activity is compliant

© Commonwealth of Australia, 2025 Skills Insight

operations	1.2 Obtain, read, interpret, clarify and confirm work instructions 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic management signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate front end loader	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks , and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate front end loader, and modify the operating technique to meet changing work conditions 2.5 Complete work plan within the operating capacity of the equipment 2.6 Act on or report monitoring systems and alarms
3. Attach, secure, lift, carry and place	3.1 Conduct communication practices associated with transportation and lifting of materials 3.2 Establish weight of load and ensure it is within safe operational limits of the machine 3.3 Select , attach and use slings and lifting gear in accordance with safe working load requirements 3.4 Position machinery to ensure stability and locate to effectively shift materials according to job specifications 3.5 Shift load safely and effectively 3.6 Move load using hand/audible/communication signals
4. Relocate the front end loader	4.1 Prepare front end loader for relocation 4.2 Move front end loader safely between work sites, observing relevant codes and traffic management requirements 4.3 Load and unload machine from float/trailer
5. Carry out machine	5.1 Prepare machine for maintenance

© Commonwealth of Australia, 2025 Skills Insight

operator maintenance	5.2 Conduct inspection and fault finding 5.3 Carry out scheduled maintenance tasks 5.4 Return machine to service 5.5 Process written maintenance records
6. Conduct housekeeping activities	6.1 Clear work area and dispose of or recycle materials in accordance with project environmental management plan 6.2 Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

No equivalent unit

Assessment Requirements for RIIMPO322D Conduct civil construction tracked front end loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO322A Conduct civil construction tracked front end loader operations. Performance Criteria amended to include Manoeuvring, Driving and Parking Up; made requirements more explicit; introduced Housekeeping element.
2	Editorial corrections; Modification History added.
3	Removed repetition from Performance Criteria; amended Performance Evidence wording; amend reference to Licensing requirements in Unit Application; editorial corrections.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of tracked front end loader operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying leveling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel

© Commonwealth of Australia, 2025 Skills Insight

  - safely parking and securing of equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete tracked front end loader operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of civil construction tracked front end loader operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - completion of operations to specification using a variety of material types including:
    - mixing materials
    - stripping/spreading topsoil and materials
    - loading
    - cutting/boxing
    - backfilling
    - lifting and carrying materials
    - site clean-up

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction tracked front end loader operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil construction activity sequences of road construction, earthworks and drainage
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics

© Commonwealth of Australia, 2025 Skills Insight

- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	**AQF** Level**	**Required assessor or Industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is	

© Commonwealth of Australia, 2025 Skills Insight

	specified should comply with any relevant regulation.

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIMPO323D Conduct civil construction dozer operations

Modification History

Release	Comment
1	This unit replaces RIIMPO323A Conduct civil construction dozer operations. Performance Criteria amended to include Manoeuvring, Driving and Parking Up; made requirements more explicit; introduced Housekeeping element.
2	Editorial corrections; corrected Performance Criteria numbering; Modification History added.
3	Removed repetition from Performance Criteria; amended Performance Evidence wording; amend reference to Licensing requirements in Unit Application; editorial corrections.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct civil construction dozer operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for dozer operations	1.1 Access, interpret and apply dozer operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work instructions

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic management signage requirements 1.6 Select, and check for faults, tools, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate dozer	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate dozer, and modify the operating technique to meet changing work conditions 2.5 Complete work plan within the operating capacity of the equipment 2.6 Act on or report monitoring systems and alarms
3. Select, remove and fit attachments	3.1 Select attachment for the task 3.2 Remove and fit attachment 3.3 Test attachment and ensure correct fitting and operation 3.4 Use attachment in accordance with recommendations and design limits 3.5 Remove, clean and store attachments in designated location
4. Relocate the dozer	4.1 Prepare dozer for relocation 4.2 Move dozer safely between worksites, observing relevant codes and traffic management requirements 4.3 Load and unload machine from float/trailer
5. Carry out machine operator maintenance	5.1 Prepare machine for maintenance 5.2 Conduct inspection and fault finding 5.3 Carry out scheduled maintenance tasks 5.4 Process written maintenance records

© Commonwealth of Australia, 2025 Skills Insight

6. Conduct housekeeping activities	6.1	Clear work area and dispose of or recycle materials
	6.2	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO323D Conduct civil construction dozer operations

Modification History

Release	Comment
1	This unit replaces RIIMPO323A Conduct civil construction dozer operations. Performance Criteria amended to include Manoeuvring, Driving and Parking Up; made requirements more explicit; introduced Housekeeping element.
2	Editorial corrections; corrected Performance Criteria numbering; Modification History added.
3	Removed repetition from Performance Criteria; amended Performance Evidence wording; amend reference to Licensing requirements in Unit Application; editorial corrections.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of conduct dozer operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying leveling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel

© Commonwealth of Australia, 2025 Skills Insight

  - safely parking and securing of equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete the conduct dozer operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of civil construction dozer operations that safely, effectively and efficiently meets all of the required outcomes including:
  - completion of operations to specification in a minimum of two (2) different soil types on three (3) occasions including:
    - stripping/spreading topsoil and materials
    - cut and fill
    - battering
    - stockpiling
    - bulk excavation
    - cutting drains
    - benching
    - backfilling
    - site clean-up on
  - fitting and removal of a minimum of three (3) attachments selected from the following:
    - stick rakes
    - root rakes
    - push blade
    - angle blade
    - bull blade
    - power angle tilt blade
    - rippers, winch
    - tree pusher
    - cable plough
    - stump plough
    - power control unit
    - cable drum

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction dozer operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil construction activity sequences of road construction, earthworks and drainage
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

© Commonwealth of Australia, 2025 Skills Insight

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	**AQF** Level**	**Required assessor or Industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

RIIMPO324E Conduct civil construction grader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO324D Conduct civil construction grader operations. 'Use of machine guidance system and laser levelling equipment' moved from performance evidence to knowledge evidence. Grammatical amendments made to the performance criteria. Added mapping table.

Application

This unit describes a participant's skills and knowledge required to conduct civil construction grader operations in civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for grader operations	1.1 Access, interpret and apply grader operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work instructions 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic management signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency

© Commonwealth of Australia, 2025 Skills Insight

2. Operate grader	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.4 Identify and apply operating techniques for grader to achieve optimum output within specified tolerances 2.5 Drive and operate grader, and modify the operating technique to meet changing work conditions 2.6 Complete work plan within the operating capacity of the equipment 2.7 Act on or report monitoring systems and alarms
3. Select, remove and fit attachments	3.1 Select attachment for the task 3.2 Remove and fit attachment 3.3 Test attachment and ensure correct fitting and operation 3.4 Use attachment in accordance with recommendations and design limits 3.5 Clean and store removed attachments in designated location
4. Relocate Prepare to relocate the grader	4.1 Prepare grader for relocation 4.2 Move grader safely within and between worksiteswork areas, observing relevant codes and traffic management requirements 4.3 Load and unload machine from float/trailer
5. Carry out machine operator maintenance	5.1 Prepare machine for maintenance 5.2 Conduct inspection and fault finding 5.3 Carry out scheduled maintenance tasks 5.4 Process written maintenance records
6. Conduct housekeeping activities	6.1 Clear work area and dispose of or recycle materials in accordance with project environmental management plan 6.2 Process records

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO324E Conduct civil construction grader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO324D Conduct civil construction grader operations. 'Use of machine guidance system and laser levelling equipment' moved from performance evidence to knowledge evidence. Grammatical amendments made to the performance criteria. Added mapping table.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of grader operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying leveling techniques
  - applying cut and fill techniques
  - conducting towing of equipment/plant
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safely parking and securing of equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete grader operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures

© Commonwealth of Australia, 2025 Skills Insight

  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of civil construction grader operations that safely, effectively and efficiently meet all of the required outcomes on more than one (1) occasion including:
  - completion of operations to specification using a variety of material types including:
    - cutting and maintaining drains
    - forming/upgrading/maintaining roads
    - mixing/ spreading materials
    - scarifying and ripping
    - cutting and trimming of batters
    - trimming of road sub-grades and pavements
    - site clean-up
    - form and carry a windrow
    - select, fit and remove at least two (2) attachments

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction grader operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being preparedpreparation for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil Civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil Civil construction activity sequences of road construction, earthworks and drainage
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities
- use machine guidance system and laser levelling equipment

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successorsAssessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units units of Competencycompetency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit unit of Competencycompetency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	**AQF** Level**	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being

RIIVEH304D Conduct tip truck operations

Modification History

Release	Comment
1	This unit replaces RIIVEH304A Conduct tip truck operations
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
3	Grammatical correction to Knowledge Evidence. No new content.

Application

This unit describes a participant's skills and knowledge required to conduct tip truck operations in the Resources and Infrastructure Industries.

This unit is appropriate for those working in supervisory and technical specialist roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1. Plan and prepare for tip truck operations	1.1 Access, interpret and apply vehicle haulage documentation and ensure the work activity is compliant 1.2 Obtained, confirm and apply work requirements such as; shift briefings/handover details/work orders, /plans/specifications/quality requirements/operational details 1.3 Identify, obtain and implement signage requirements per the project traffic management plan 1.4 Select vehicle, tools and equipment 1.5 Check tools and equipment for serviceability and rectify or report faults 1.6 Identify, confirm and apply environmental protection requirements from the project environmental management plan
2. Conduct tip	2.1 Carry out pre-start, start-up, park and shutdown

© Commonwealth of Australia, 2025 Skills Insight

truck pre-operational checks	2.2 Check tip truck controls and functions, including tray, steering, brakes and manoeuvrability for serviceability and ensure any faults are rectified or reported
3. Operate tip truck	3.1 Identify and manage site operating hazards and risks, apply safe operating techniques 3.2 Manage engine power, ensure efficiency of truck movements, and minimise strain on the engine, drive line and gears 3.3 Coordinate engine power with gear selection, ensure smooth transition and operation within torque range 3.4 Operate tip truck to work instructions 3.5 Monitor road/traffic conditions, consider road conditions, traffic flow, distance and load, ensure safety of people, property, equipment, loads and facilities 3.6 Halt vehicle smoothly, using the engine retarder, gears and brakes
4. Load, transport and tip materials	4.1 Position tip truck at load and discharge points with a minimum of manoeuvre 4.2 Carry out smooth and controlled tip truck movements including the raising and lowering of the tray 4.3 Ensure weight and distribution of load is assessed for type of material and size of vehicle within vehicle capacity 4.4 Maintain safety and security of load, including load cover requirements, from loading site to discharge site 4.5 Discharge load on slope and/or over face at fill site 4.6 Dump/spread material evenly, to work instructions 4.7 Clear, lower and secure tray before resuming travel
5. Carry out operator maintenance	5.1 Ensure tip truck is safely parked and prepared for operator maintenance and shutdown 5.2 Conduct visual and physical inspection and fault finding 5.3 Remove and replace defective parts 5.4 Carry out scheduled maintenance 5.5 Maintain/update and submit vehicle written records
6. Clean up	6.1 Clear work area and dispose of, or recycle, materials 6.2 Clean, check, maintain and store vehicle, tools and equipment

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIVEH304D Conduct tip truck operations

Modification History

Release	Comment
1	This unit replaces RIIVEH304A Conduct tip truck operations
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
3	Grammatical correction to Knowledge Evidence. No new content.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and completion of tip truck operations to meet all required outcomes including:
  - preparing for and organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
  - using a range of communication techniques and aids to advise others of work activity and exclusion zones
- demonstrates completion of tip truck operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - organising work activities to comply with site standards
  - obtain and apply signage requirements
  - carry out log-on, pre-start, start-up, park-up and shutdown procedures
  - operate, steer, manoeuvre and position tip truck
  - raise and lower tray smoothly
  - apply load cover
  - discharge load on slope and/or over face
  - dump and spread materials

© Commonwealth of Australia, 2025 Skills Insight

- halt and park tip truck
- carry out inspections and identify faults
- process written records and reports

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting tip truck operations through:

- recording, reporting and handover procedures
- start up and shutdown procedures
- vehicles within specifications and limitations and reporting faults in vehicles and ancillary equipment
- tip truck types, characteristics, technical capabilities and limitations
- safety requirements
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- safety data sheet and materials handling methods
- load quantity calculations

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing: and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

© Commonwealth of Australia, 2025 Skills Insight

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to control traffic with stop-slow bat in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Plan and prepare	1.1 Access, interpret and apply site traffic plan procedures and ensure the work activity is compliant 1.2 Obtain, confirm, clarify and apply work instructions 1.3 Obtain, confirm, clarify and apply safety requirements 1.4 Identify, obtain and implement signage and devices 1.5 Select tools and equipment, check for serviceability and rectify or report any faults

© Commonwealth of Australia, 2025 Skills Insight

	1.6 Identify, confirm, clarify and apply environmental protection requirements
2. Control traffic	2.1 Position or confirm temporary traffic signs and barriers 2.2 Direct traffic correctly 2.3 Control vehicles and pedestrian traffic and ensure safety 2.4 Monitor traffic, make adjustments for changing conditions and position waiting vehicles for smooth traffic flow 2.5 Use hand held stop/slow bats 2.6 Use visibly clear and unobstructed hand signals 2.7 Report traffic offenders
3. Operate communication devices	3.1 Adjust communication device controls for optimum reception/transmission results 3.2 Transmit messages clearly and concisely 3.3 Maintain communication device power supply 3.4 Check communications contact after nominated period of non-contact
4. Clean up	4.1 Remove or cover signs and devices sequentially to provide warning to motorists during shutdown 4.2 Clean, check, maintain and store tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of controlling traffic with a stop-slow bat that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - reading and interpreting the work instruction and planning work activity accordingly
  - positioning signage and barriers
  - directing and controlling vehicle traffic
  - directing and controlling pedestrian traffic
  - communicating to drivers and pedestrians clearly using hand signals
  - using approved communication devices such as hand held radios or phones to transmit message and report of offenders
  - removing or covering signs after work completion

Knowledge Evidence

The candidate must demonstrate knowledge of controlling traffic with stop-slow bat through:

- site and equipment safety requirements

© Commonwealth of Australia, 2025 Skills Insight

- traffic controlling requirements and procedures
- complying with traffic management plans
- erecting traffic control signage and barricades
- communication device operations
- determine equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- detailing site isolation and traffic control responsibilities and authorities
- describing the effects of travel speed and vehicle mass on stopping distances
- interpreting and implementing safe work method statement

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal	1	1 Year

© Commonwealth of Australia, 2025 Skills Insight

Mining, Extractive (Quarrying) and Civil Construction	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

SIRRINV002 Control stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor stock receipt and dispatch.	1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock. 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

© Commonwealth of Australia, 2025 Skills Insight

	correctly. 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards. 1.4. Act on variations to quantity and quality of delivered stock. 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.	2.1. Monitor stock and maintain stock at required levels. 2.2. Maintain, monitor and adjust stock reorder cycles as required. 2.3. Provide clear information to team members about individual stock recording responsibilities. 2.4. Maintain stock storage and movement records. 2.5. Record and report stock discrepancies. 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.	3.1. Process and raise stock orders according to organisational procedures. 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met. 3.3. Liaise with suppliers to ensure continuity of supply. 3.4. Resolve routine supply problems or refer to appropriate personnel for action. 3.5. Distribute stock within the organisation according to required allocations. 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.	4.1. Regularly check storage of stock and ensure its protection. 4.2. Identify, record and report stock losses. 4.3. Identify avoidable losses and establish reasons for them. 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.	5.1. Explain procedures for stocktake and cyclical counts to team members. 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task. 5.3. Provide team members with clear directions for performance of each task. 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.

Numeracy skills to:	• calculate:
	  • supplier costs and complex order costs
	  • complex details of stock on hand and stock losses and produce complex numerically-based reports
	• reconcile incoming stock and invoices against purchase orders.

Technology skills to:	• use business technology for inventory management.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)

© Commonwealth of Australia, 2025 Skills Insight

  - manual handling
  - licensing for mechanical movement of stock
- principles of stock control:
  - rotation and replenishment
  - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to coordinate store visual merchandising activities and ensure adherence to organisational standards, policies and procedures for the display of merchandise.

It applies to individuals working in frontline roles in a diverse range of retail industry sectors and business contexts that display retail products for sale. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Coordinate visual merchandise requirements.	1.1. Access and interpret organisational visual merchandising guidelines, and policies and procedures. 1.2. Communicate visual merchandising standards and display

© Commonwealth of Australia, 2025 Skills Insight

	requirements to team members. 1.3. Plan appropriate timing for producing and dismantling visual merchandise displays. 1.4. Communicate roles and responsibilities for visual merchandising to team members. 1.5. Plan and coordinate promotional and special event displays as directed by management.
2. Supervise visual merchandise activities.	2.1. Supervise construction and maintenance of displays to achieve balance and visual impact. 2.2. Ensure display information accurately depicts product or service being promoted. 2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow. 2.4. Ensure displays meet organisational standards and visual merchandise guidelines. 2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.
3. Review impact of visual merchandise activities.	3.1. Evaluate promotions or special event displays and determine impact on sales results. 3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Problem solving skills to:	• overcome difficulties relevant to the display of merchandise.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
  - an existing merchandise range
  - a new merchandise range
  - a seasonal merchandise range
  - a promotional event
  - discounted merchandise
- for each of the above visual merchandising activities:
  - communicate requirements with team members
  - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - merchandise labelling and pricing
  - required stock levels
  - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
  - Australian Consumer Law
  - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
  - types of displays and their impact

© Commonwealth of Australia, 2025 Skills Insight

    - display location
    - display lighting
    - display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
    - customer complaints
    - profitability
- safe work practices for displaying merchandise with particular emphasis on:
    - safe use of equipment
    - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
    - price
    - features
    - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
    - organisational visual merchandise display guidelines
    - organisational policies and procedures for:
        - merchandise labelling and pricing
        - required stock levels
        - merchandise rotation and replenishment
    - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
        - Australian Consumer Law
        - Work Health and Safety (WHS)
- team members; these can be:
    - individuals in an industry workplace, or

© Commonwealth of Australia, 2025 Skills Insight

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRRPK214 Recommend specialised products and services

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRRRPK014A Recommend specialised products and services.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to recommend and provide advice on specialised products and services to customers.

It covers the application of specialised product knowledge to provide advice to customers and other sales staff, with regard to specific product features, technical characteristics, warranties and prices. It also includes the provision of information on organisation services and repairs.

Application of the Unit

This unit applies to experienced frontline sales staff working in a retail environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Demonstrate knowledge of product range.	1.1. Identify product and ***service range***. 1.2. Demonstrate knowledge of location of product range. 1.3. Operate ***inventory system***. 1.4. Develop ***product knowledge*** by accessing ***relevant sources of information***. 1.5. Develop knowledge and application of manufacturer technical information and specifications of product range. 1.6. Research comparisons between products and services and communicate product information. 1.7. Convey product information to ***customers*** and other staff members as required and in line with organisational policies and procedures.
2. Advise on products and services to meet customer requirements.	2.1. Identify and evaluate ***customer requirements*** to provide advice on product suitability to assist buying decisions. 2.2. Determine suitability of products and materials according to customer requirements and manufacturer specifications. 2.3. Provide accurate advice on product specifications to meet customer requirements according to ***relevant legislation***. 2.4. Convey features and benefits of products to customers to assist buying decisions. 2.5. Demonstrate or explain use and operation of products to customers in a systematic manner as required to create a buying environment and in line with organisational policies and procedures. 2.6. Apply correct measuring, fitting or sizing procedures as relevant to the product. 2.7. Explain relevant maintenance and care requirements of product to customer. 2.8. Clearly explain to customer safety features and safe usage relevant to the product. 2.9. Maximise sales opportunities by use of add-on and complementary sales techniques.

© Commonwealth of Australia, 2025 Skills Insight

	2.10. Estimate quantities of product required and communicate to customer.
3. Advise on product warranties.	3.1. Clearly explain to customer ***comparisons*** between product and manufacturer warranty terms. 3.2. Confirm and convey individual product warranty terms and conditions to customer by accessing relevant sources of information. 3.3. Provide customer with written information regarding individual product warranty terms and conditions, especially extended or promotional warranties, according to legislative requirements and ***organisational policy and procedures***.
4. Quote on price and payment options.	4.1. Calculate organisation-recommended pricing for various product and service options and convey to customer according to legislative requirements. 4.2. ***Negotiate individual product prices*** where appropriate according to pricing determinants and organisational policy. 4.3. Convey payment and credit options to customer and negotiate a preferred option following organisational procedures.
5. Advise on and arrange product service and repair.	5.1. Advise customer on range of service and repairs according to organisational policy and procedures. 5.2. Question and actively listen to customer to determine nature of problem. 5.3. Complete ***diagnosis of problem*** in terms of operator and equipment faults. 5.4. Offer solutions according to nature of problem, available product information, and organisational policy. 5.5. Identify service and repair process and communicate to customer according to company and enterprise policy. 5.6. Identify price and timelines for basic service and repairs and quote to customer where applicable. 5.7. Identify customer details and transcribe to service report according to organisational procedures and legislative requirements. 5.8. Label and securely store item for repair according to organisational policy. 5.9. Organise service according to availability, customer requirements and legislative requirements. 5.10. Notify customer without undue delay on completion of service and repair. 5.11. Take ***follow-up action*** as necessary to ensure customer satisfaction.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - apply product knowledge by providing information and advice to customers and staff
  - ask questions in order to identify and confirm requirements
  - handle customers with special needs, including difficult or abusive customers
  - interpret and apply non-verbal cues
  - make recommendations and advise on warranties and product service and repair through clear and direct communication
  - respond to customer needs and respect cultural differences
- literacy and numeracy skills to:
  - advise and negotiate price and payment options
  - measure and estimate accurately
  - read and interpret warranties
  - read and interpret product information and specifications
  - read and interpret store policy and procedures
  - write order specifications and delivery details

Required knowledge

- manufacturer technical information
- organisational policy and procedures in regard to:
  - customer complaints
  - methods of dealing with special needs and requests of customers
  - price negotiation and payment options
  - returns and warranty claims
  - sales and customer service, up-selling and on-selling
  - services and repairs
- organisation’s product range
- manufacturer technical information
- pricing procedures, including GST requirements
- product and manufacturer warranty terms and conditions
- relevant industry codes of practice, legislation and statutory requirements relating to the recommendation of specialised products and services

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- updates and applies product knowledge to provide comprehensive advice to customers and staff, including technical information and advice on warranties and insurance policies where applicable
- applies organisational policy and procedures and industry codes of practice in regard to sales and customer service procedures
- advises customers and informs sales team members of organisation's range of products, their features and benefits, performance, complementary products, product availability and warranties
- advises customers and sales team members on operation, storage and use of products
- estimates and quotes on quantities of product required, as relevant to the product and customer requirements
- negotiates and administers price and payment options with customers as per organisational policy and procedures
- advises on and arranges for internal and external organisation services, including repairs, according to organisational policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant sources of product information
- relevant documentation, such as:
  - organisational policy and procedures manuals
  - industry codes of practice and relevant legislation
  - organisational inventory
- an appropriate range of products
- a range of customers with different requirements.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- written or verbal answers to questions about specific

© Commonwealth of Australia, 2025 Skills Insight

	skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Service range may include:	• delivery • finance options • installation • insurance facilities • material measuring and cutting • product service and repairs.
Inventory system may be:	• centralised • electronic • manual.
Product knowledge may include:	• accessories • age suitability and rating • available styles, sizes and colour range • brand options • component parts • country of manufacture • design features • durability • energy efficiency • environmental considerations and recycled products • health and hygiene • manufacturing process and construction • materials, ingredients and composition • operation • performance • price • quality

- safety features and toxicity
- storage and care requirements
- supply and availability
- sustainability characteristics, such as:
  - recyclable
  - non-toxic
- warranties
- workmanship.

Relevant sources of information may include:

- catalogues
- contacting suppliers direct
- customer feedback
- designated staff members
- internet
- manufacturer brochures and specifications
- organisation or trade product manuals
- supplier product leaflets
- trade shows.

Customers may include:

- individuals or organisations
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities
- people with routine or special requests
- people with special needs
- regular and new customers.

Customer requirements may include:

- age suitability
- colour preferences and style
- culture and ethnicity
- durability, function and usage
- existing skills and knowledge
- fashion and preferences
- health factors
- interests
- lifestyle
- price
- size
- usage requirements.

Relevant legislation may relate to:

- censorship, licensing and copyright laws relevant to the retail sales environment
- customs regulations
- industry codes of practice
- work health and safety (WHS)
- pricing procedures, including GST requirements

© Commonwealth of Australia, 2025 Skills Insight

	• privacy laws • sale of second-hand goods • Australian consumer law relevant to the retail sales environment.
Comparisons between product and manufacturer warranty terms may relate to:	• benefits • duration • features • limitations • price, where applicable.
Organisational policy and procedures may include:	• interaction with customers • processing items for service and repair • selling specialised products and services.
Negotiating individual product prices may include:	• adding value to purchase • bulk discounts • individual discounts • price matching.
Diagnosis of problem may occur:	• by electronic or postal correspondence • by telephone • face-to-face.
Follow-up action may occur:	• by appointment • by electronic or postal correspondence • by telephone • face-to-face • formally or informally.

SIRWINV302 Monitor inventory capacity to meet demand

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRWINV003A Monitor inventory capacity to meet demand.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage business systems inventory required by a business to meet operational and customer requirements.

It focuses on managing and monitoring inventory procedures and documentation for the receipt, dispatch and secure storage of goods. It involves using business systems to monitor inventory levels, storage, movement and reorder cycles, and coordinate stock movement to ensure that inventory is available to meet business needs.

Application of the Unit

This unit applies to staff responsible for monitoring an organisation’s business systems in a business-to-business environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Monitor receipt and dispatch of goods.	1.1. Determine responsibility for receipt and dispatch of products. 1.2. Implement ***business policy and procedures*** in regard to receipt, dispatch and secure storage of products. 1.3. Observe staff functions to ensure business procedures are followed and ***documentation*** is completed correctly. 1.4. Implement business procedures to ensure products are inspected for quantity and quality on receipt. 1.5. Act upon variations to quantity and quality of delivered products according to business policy. 1.6. Supervise ***safe handling and storage*** of products according to business policy.
2. Maintain stock records.	2.1. Monitor stock levels and maintain at required levels. 2.2. Maintain, monitor and adjust stock reorder cycles as required. 2.3. Inform ***team members*** of their individual responsibilities in regard to recording stock. 2.4. Maintain stock storage and movement ***records*** according to business policy. 2.5. Record stock discrepancies and follow procedures according to business policy. 2.6. Monitor ***stock performance*** and identify and ***report*** fast and slow selling items according to business policy.
3. Ensure inventory is on hand.	3.1. Coordinate deliveries to meet inventory demand. 3.2. Match ***logistics*** of delivery to inventory supply requirements. 3.3. Implement improvements to supply chain management as required.
4. Coordinate stocktake or cyclical count.	4.1. Interpret policy and procedures in regard to stocktaking and cyclical counts and explain to team members. 4.2. ***Roster*** staff according to allocated budget and time constraints. 4.3. Allocate stocktaking tasks to individual team members. 4.4. Provide team members with clear directions for the performance of each task.

© Commonwealth of Australia, 2025 Skills Insight

	4.5. Allocate team members to ensure effective use of staff resources to complete task. 4.6. Produce accurate reports for management on stocktake data, including discrepancies.
5. Identify stock losses.	5.1. Identify and record losses and assess against potential loss forecast on a regular basis. 5.2. Identify avoidable losses and establish reason. 5.3. Recommend and implement possible solutions for stock losses.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - give instructions
  - provide information to staff, including allocating tasks and providing clear directions through clear and direct communication
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
  - check product labelling to ensure compliance
  - collect, analyse and organise information
  - maintain stock ordering and recording systems
  - map inventory demands
  - read and understand a range of workplace documents
- operations management and leadership skills
- planning and organising skills to plan and prioritise work schedule
- self-management skills to apply standards applicable to inventory control
- technology skills to safely use available business technology

Required knowledge

- business policy and procedures with regard to:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - reporting of stock discrepancies and damage
  - stock control
  - stock replenishment and reordering
- industry codes of practice, including food handling codes

© Commonwealth of Australia, 2025 Skills Insight

- impact of business planning and sales forecasts on inventory
- inter- and intra-business transfers
- legislation and statutory requirements, including consumer law relevant to inventory control
- market trends and impact of special events of inventory
- work health and safety (WHS) legislation and codes of practice, including:
  - manual handling regulations and codes of practice
  - plant and equipment regulations
- organisational and referral mechanisms for facilitating inventory demand monitoring

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- manages and monitors staff implementation of inventory procedures and documentation for the receipt, dispatch and secure storage of goods
- uses relevant business systems to monitor inventory levels, storage, movement and reorder cycles on a regular basis
- organises and coordinates stock movement to ensure that inventory is available to meet business needs
- completes relevant business documentation accurately, in a timely manner and in agreed format
- organises and coordinates stocktake and cyclical counts to monitor and review inventory levels, identify discrepancies and develop solutions to stock loss.

Context of and specific resources for assessment

Assessment must ensure access to:

- a business-to-business sales work environment
- relevant documentation, such as:
  - business policy and procedures manuals
  - WHS legislation and codes of practice
- an inventory control system
- relevant business technology.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace

© Commonwealth of Australia, 2025 Skills Insight

- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Business policy and procedures may relate to:

- job roles and responsibilities
- merchandise and product range
- pricing, labelling and packaging requirements
- procurement processes
- receipt and dispatch of goods
- stocktaking and cyclical counts
- transport, handling and storage of goods.

Documentation may include:

- asset registers
- corporate credit card transaction statements
- evaluation process documentation
- financial statements
- invoices and payment requests
- offer and contract documents
- purchase requests and orders
- records of authorised officers' decisions
- records of conversations
- records of supplier performance
- statements and petty cash vouchers.

Safe handling and storage of goods may include:

- product segregation
- optimum maintenance of storage areas, including:
  - cleanliness and sanitation
  - lighting
  - climate control
  - pest control
  - ventilation
- packaging products for storage

© Commonwealth of Australia, 2025 Skills Insight

- labelling of goods
- stock rotation
- disposal of damaged or spoiled goods
- safe manual handling and lifting techniques
- safe use of equipment, such as ladders and trolleys
- storage in:
  - cool rooms
  - dry stores
  - freezers
  - refrigeration.

Safe handling and storage techniques may vary according to:

- industry codes of practice
- WHS
- stock characteristics.

Team members may:

- come from a variety of social, cultural and ethnic backgrounds
- vary in competencies
- vary in literacy and numeracy skills.

Records may be:

- electronic
- manual
- templated.

Stock performance may vary according to:

- advances in technology
- customer demand
- environmental factors
- quality demands
- seasonal cycles
- selling approaches.

Reports for management may include:

- business documents
- financial reports
- informal reports
- stocktake reports.

Logistics may include:

- infrastructure resources
- levels of service
- milestones
- outputs
- payment schedules
- phases or stages of the supply and distribution chain
- targets
- timeframes.

Factors affecting staff ***roster*** may include:

- available or required staffing levels
- awards and agreements
- budget allocation

© Commonwealth of Australia, 2025 Skills Insight

- full-time, part-time, casual or contract staff
- range of staff responsibilities
- routine or busy trading conditions
- varying levels of staff training.

resolution.

3.7. Confirm ***trading terms*** for different products and services with each customer.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - build relationships with customers
  - communicate product range through clear and direct communication
  - consult with others
  - seek feedback and guidance
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- initiative and enterprise skills to use a range of sales approaches and techniques
- literacy and numeracy skills to:
  - document procedures for improving sales
  - establish, confirm and review trading terms
  - read and interpret information
- planning and organising skills to plan a personal training program in collaboration with team and supervisor
- self-management skills to identify own learning needs
- teamwork skills to collaborate in the workplace
- technology skills to use a range of business technology, including data input

Required knowledge

- advantages of maintaining long-term customer relationships
- alternative sales approaches across a range of situations
- variety of strategies for closing sales
- business policy and procedures in regard to:
  - allocated duties and responsibilities
  - customer service
  - selling products and services
- business customer relationships and current service range
- factors influencing customer decisions
- lifetime value of a customer
- relevant legislation, statutory requirements and codes of practice relating to the retail

© Commonwealth of Australia, 2025 Skills Insight

industry, including:
  - work health and safety (WHS)
  - consumer law
  - commercial law and legislation
- product knowledge, including:
  - availability
  - characteristics
  - comparative advantages
  - features
  - price
  - special features, such as warranties and after sales support
  - strengths and weaknesses

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- maximises sales opportunities by using effective selling techniques, applying detailed product knowledge and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- communicates performance summary information effectively to team members and senior colleagues according to business policy and procedures
- participates in personal and team sales performance evaluation to maximise future sales
- actively seeks feedback from peers and supervisors to identify personal skills gaps
- maintains communication with supervisors to access training and development needs in an agreed timeframe within the context of required work activities
- identifies, describes and constructs the foundations required for long-term customer relationships.

Context of and specific resources for assessment

Assessment must ensure access to:

- a business-to-business sales work environment
- relevant sources of product information
- relevant documentation, such as:
  - business policy and procedures manuals

© Commonwealth of Australia, 2025 Skills Insight

	• industry codes of practice and relevant legislation • WHS legislation and codes of practice • a range of business customers with different requirements • an appropriate range of products or equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • customer feedback • written or verbal questioning to assess knowledge and understanding • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Communication may include:	• body language, including facial expressions • electronic media, such as email • reading, writing, speaking and listening • telephone • assistive technology, such as telephone typewriter (TTY) • forms of visual communication, such as sign language • languages other than English, including local community languages and Indigenous languages • using open and inclusive language.
Supervisors and team members may:	• be responsible for a range of workplace functions • come from a variety of social, cultural and ethnic backgrounds • vary in competencies • vary in literacy and numeracy skills.
Feedback may be sought and given:	• in groups • in writing

© Commonwealth of Australia, 2025 Skills Insight

	• individually • verbally.
Training and development may include:	• coaching and mentoring • conferences • formal training or education • informal learning • information seminars • job rotation • online learning.
Sales techniques may include:	• closing a sale • cut-ins • gaining a customer • negotiation skills • over-the-phone empathy creation • range-ins • securing payment • tie-ins • trade-ins • trade-ups.
Business customer may include:	• commercial companies • community and not-for-profit organisations • customers with routine or special requests • governments • internal business units and divisions • new or repeat contacts • people from a range of social, cultural and ethnic backgrounds • people with varying physical and mental abilities • public agencies or organisations.
Territory may be defined by:	• account customers • demographic parameters • size, type and location of stores • territory size, location and geographic spread.

Sales, service and performance strategies may vary according to:	• product or service
	• promotional strategies in regard to:
	  • duration
	  • cycle
	  • area or territory coverage
	  • product
	  • service focus sales
	  • objectives

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Operate point-of-sale equipment.	1.1. Open and close point-of-sale terminal according to ***store policy and procedures***. 1.2. Clear point-of-sale terminal and transfer tender according to store procedure. 1.3. Handle cash according to store security procedures. 1.4. Maintain supplies of change in point-of-sale terminal according to store policy. 1.5. Attend active point-of-sale terminals according to store policy. 1.6. Complete records for transaction errors according to store policy. 1.7. Maintain adequate supplies of dockets, vouchers and ***point-of-sale documents***. 1.8. Inform ***customers*** of delays in the point-of-sale operation where required.
2. Ensure accuracy of transactions.	2.1. Identify and perform ***numerical calculations*** to ensure accurate pricing and collection of money. 2.2. Collect numerical information from various sources and calculate accurately with or without the use of a calculator.
3. Perform point-of-sale transactions.	3.1. Complete ***point-of-sale transactions*** according to store policy. 3.2. Identify and apply store procedures in respect of cash and non cash transactions. 3.3. Identify and apply store procedures in regard to exchanges and returns. 3.4. Move goods through point-of-sale area efficiently and with attention to fragility and packaging. 3.5. Enter information into ***point-of-sale equipment***. 3.6. State price or total and amount of cash received verbally to customer. 3.7. Tender correct change.

© Commonwealth of Australia, 2025 Skills Insight

4. Complete sales.	4.1. Complete customer order forms, invoices and receipts and process any loyalty card transactions. 4.2. Identify and process customer delivery requirements according to set timeframes. 4.3. Process sales transactions or direct customers to point-of-sale terminals according to store policy without undue delay. 4.4. Acknowledge and thank customer in line with store policy and procedures.
5. Wrap and pack goods.	5.1. Maintain and request adequate supplies of ***wrapping and packaging materials***. 5.2. Select appropriate wrapping or packaging material. 5.3. Wrap merchandise neatly and effectively where required. 5.4. Pack items safely to avoid damage in transit, and attach labels where required. 5.5. Arrange transfer of merchandise for parcel pick up or other ***delivery methods*** if required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - inform customers of delays
  - listen actively
  - request adequate supplies of wrapping material or bags through clear and direct communication
  - share information
  - state price or total and amount of cash received
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- self-management skills to:
  - deal with different types of transactions
  - follow set routines and procedures
- literacy and numeracy skills to:
  - document sales and delivery information
  - render change
  - undertake work functions, including addition, division, multiplication, percentages and subtraction

© Commonwealth of Australia, 2025 Skills Insight

Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale equipment
  - calculating non-cash documents
  - change required, denominations of change and tendering change
  - clearance of terminal and transference of tender
  - counting cash
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- functions and procedures for operating point-of-sale equipment, including:
  - calculators
  - electronic scales
  - numerical display board
  - registers
- merchandise handling techniques, including wrapping and packaging techniques
- range of services provided by the store
- relevant legislation and statutory requirements, including:
  - industry codes of practice
  - work health and safety (WHS)
  - Australian consumer law
  - scanners
- store policy and procedures in relation to:
  - allocated duties and responsibilities
  - bag checking
  - customer service
  - exchanges and returns
  - handling, packing and wrapping goods or merchandise
  - point-of-sale transactions
- stock availability
- key features of a calculator

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • operates point-of-sale equipment according to manufacturer instructions and store policy and procedures • applies store policy and procedures in regard to cash handling and point-of-sale transactions • interprets, calculates and records numerical information accurately • processes sales transaction information responsibly and accurately according to store policy and procedures • applies store policy and procedures in regard to the handling, packing, wrapping and delivery of goods or merchandise.

Context of and specific resources for assessment	Assessment must ensure access to:
	• a real or simulated retail work environment
	• relevant documentation, such as:
	  • stock, inventory and price lists
	  • financial transaction dockets and slips
	  • lay-by, credit and product return slips
	  • store policy and procedures manuals
	• a range of point-of-sale equipment.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the work • role play • customer feedback • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, work and job role is recommended, for example: • SIRXCCS202 Interact with customers • SIRXFIN201 Balance and secure point-of-sale terminal • SIRXINV001A Perform stock control procedures • SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the

© Commonwealth of Australia, 2025 Skills Insight

performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Store policy and procedures in regard to:	• cash handling • financial transactions • handling techniques of stock • operation of point-of-sale equipment • sales transactions • security.
Point-of-sale documents may include:	• credit slips • lay-by slips • message pads • order forms • product return slips • promotional materials.
Customers may include:	• customers with routine or special requests • internal and external contacts • new or repeat contacts • people from a range of social, cultural and ethnic backgrounds • people with varying physical and mental abilities.
Numerical calculations may include:	• addition and subtraction • calculations of cash amounts and change • calculations of discount amounts • estimation of quantities • measurement • multiplication and division • percentages.
Point-of-sale transactions may include:	• cheques • credit cards and store cards • EFTPOS • exchanges • gift vouchers • lay-by • returns • smart cards • travellers cheques.
Point-of-sale equipment may include:	• cash drawer • cash register • EFTPOS terminal • electronic scales • numerical display board

© Commonwealth of Australia, 2025 Skills Insight

	• scanner • security tagging.
Wrapping and packaging materials may include:	• adhesive tape • bags • boxes • bubble wrap • gift wrapping • paper • ribbon • string.
Delivery methods may include:	• courier • domestic or international delivery • freight • parcel pick-up • post or express post.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Deliver service to customers.	1.1. ***Communicate*** with ***customers*** in a professional, courteous manner according to store policy. 1.2. Meet ***customer needs*** and reasonable requests or refer to supervisor, according to store policy and ***legislative requirements***. 1.3. Record customer details and information where necessary. 1.4. Identify and anticipate possible problems and take action to minimise the effect on customer satisfaction. 1.5. Recognise and act upon opportunities to deliver additional levels of ***service*** beyond the customer's immediate request. 1.6. Maintain contact with customer until sale is completed according to store policy. 1.7. Use verbal and non-verbal communication to develop rapport with customers during service delivery. 1.8. Encourage repeat customers by promotion of appropriate services or products according to store policy. 1.9. Farewell customer appropriately and courteously according to store policy.
2. Respond to customer complaints.	2.1. Convey a positive, helpful attitude to customers when handling ***complaints***, according to store policy. 2.2. Handle complaints sensitively, courteously and with discretion. 2.3. Establish and confirm with customer nature of complaint by active listening and questioning. 2.4. Take action to resolve complaint to customer's satisfaction wherever possible. 2.5. Promptly refer unresolved customer dissatisfaction or

© Commonwealth of Australia, 2025 Skills Insight

	complaints to supervisor. 2.6. Take the opportunity to turn incidents of customer dissatisfaction into a demonstration of high-quality service to customer according to store policy. 2.7. Complete documentation regarding customer dissatisfaction or complaints accurately and legibly. 2.8. Take ***follow-up action*** as necessary to ensure customer satisfaction.
3. Receive and process sales orders.	3.1. Record customer details and information accurately. 3.2. Promptly refer customers to appropriate area as required. 3.3. Provide customers with information in clear, concise manner. 3.4. Process, record and act upon sales orders according to store policy. 3.5. Process customer returns or refunds according to store policy and procedures.
4. Identify special customer requirements.	4.1. Promptly identify customers with special needs or requirements by observation and questioning. 4.2. Verbally and non-verbally convey a willingness to assist. 4.3. Promptly service, refer or redirect customers' needs as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - build rapport and understanding
  - clarify and feed back information
  - deal with difficult customers
  - listen to customers' needs
  - negotiate with and persuade customers to buy
  - promote products and services
  - respond to complaints effectively and politely
- literacy and numeracy skills to:
  - calculate costs and discounts
  - document sales, stock and delivery information
  - follow procedures for recording customer orders that are placed in person, by telephone or by electronic means

© Commonwealth of Australia, 2025 Skills Insight

  - handle legal tender
  - take messages in person or by telephone
  - write records of complaints
  - weigh and measure goods
- observation and analysis skills to anticipate customer behaviour
- self-management skills to follow set routines and procedures

Required knowledge

- add-on selling concepts
- conflict-resolution strategies
- functions and procedures for operating the store telephone system and other communication equipment, and the relevant numbers
- greeting and farewelling techniques
- location of store departments
- merchandise and service range of store departments
- non-verbal cues indicating customer behaviour
- questioning and active listening techniques
- relevant legislation and statutory requirements, including work health and safety (WHS)
- store policy and procedures in regard to:
  - customer service
  - dealing with customer complaints
  - allocated duties and responsibilities
  - customer returns and refunds
  - lay-by, gift voucher and rain-check procedures
- strategies for handling difficult or abusive customers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • accesses, records and processes sales orders accurately and responsibly, according to store policy and procedures • identifies the nature of customer complaints, resolves complaints and provides service to customers according to store policies • collaboratively works within a team to meet customers' needs

© Commonwealth of Australia, 2025 Skills Insight

- applies store policy and procedures and industry codes of practice in regard to customer service
- provides a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure
- uses effective questioning, active listening and observation skills to identify special customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - sales order forms
  - complaint and return forms
  - stock, inventory and price lists
  - store policy and procedures manuals
- a range of customers with different requirements
- point-of-sale equipment and materials
- a communication system or a range of communication equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility

© Commonwealth of Australia, 2025 Skills Insight

of the item, and local industry and regional contexts) may also be included.

Communication techniques may include:	• face-to-face or telephone contact with customers • non-verbal communication • speaking clearly and concisely • using appropriate language • using open and inclusive language.
Customers may include:	• customers with routine or special requests • internal and external contacts • new or repeat contacts • people from a range of social, cultural and ethnic backgrounds • people with varying physical and mental abilities.
Store policy may relate to:	• cash handling • customer service • dealing with customer complaints • processing sales orders.
Customer needs may include:	• information regarding store facilities and services • location of specific items within the store • product information • returns or refunds.
Legislative requirements may include:	• liquor licensing regulations • lottery legislation • sale of second-hand goods • sale of X and R-rated products • tobacco laws • Trade Practices Act • trading hours • transport, storage and handling of goods.
Service may include:	• all store activities • internal and external customers • follow-up in event of delays in service provision.
Complaints may relate to:	• prices • products • service.

Follow-up action may require:	• communication with:
	  • customers
	  • staff
	  • supervisors and management
	  • suppliers
	• recommendations to supervisor regarding policy and procedure development or alteration.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
  - customers from diverse backgrounds
  - resolution of two routine customer problems
  - provision of accurate information to address two general customer enquiries
  - referral of unresolved customer enquiry
  - use of effective communication techniques and positive body language.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
  - designated customer service response times
  - interacting with customers
  - solving routine customer problems
  - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
  - open and closed questioning
  - paraphrasing
  - effective listening
  - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
  - positive customer service
  - poor customer service

© Commonwealth of Australia, 2025 Skills Insight

- organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational service standards and procedures for:
    - designated customer service response times
    - interacting with customers
    - solving routine customer problems
    - providing information to customers
- customers from a diverse range of backgrounds; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- self management skills to complete tasks witin a set timeframe
- literacy skills to interpret documentation
- numeracy skills to:
  - process petty cash transactions
  - receive and process deliveries
  - perform sales transactions
  - balance cashbook entries and takings
  - generate invoices
- interpersonal skills to:
  - refer and report irregularities, discrepancies and errors in transactions to relevant personnel
  - resolve creditor enquiries or refer to relevant personnel through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication

Required knowledge

- store policy and procedures in regard to:
  - register or terminal balance
  - security of cash and non-cash transactions
  - petty cash
  - cash balances
  - banking procedures
  - purchase requisitions or orders
  - issuing of receipts
  - delivery dockets
  - credit notes
  - statements
  - remittance advices
  - cash register rolls
  - deposit books
  - change required and denomination of change
  - operation of equipment used at register or terminal

© Commonwealth of Australia, 2025 Skills Insight

- processing delivery and delivery document discrepancies
- invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements

- cash and non-cash handling procedures, including:
  - opening and closing point-of-sale terminal
  - clearance of terminal and transference of tender
  - maintenance of cash balances
  - counting cash
  - calculating non-cash documents
  - customer credit ratings
  - balancing point-of-sale terminal
  - recording takings
  - change required and denominations of change
  - EFTPOS
  - credit cards
  - processing of cheques
  - gift vouchers
  - lay-by
  - cash on delivery (COD)
  - lay-by
  - credits and returns
  - customer refunds

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consistently applies store policy and procedures in regard to petty cash and non-cash transactions, invoicing, banking processes and processing delivery and document discrepancies • consistently applies skills related to the reconciliation and payments of invoices for creditors and debtors, according to store policy and procedures.
Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated work environment

Balance all transaction calculations.
4. Receive and document payments and takings.	4.1. Count cash correctly and give correct change, if applicable. 4.2. Verify cheque and credit card payments with the ***relevant personnel*** or department prior to acceptance. 4.3. Complete and issue receipts.
5. Dispatch statements to debtors and follow up outstanding accounts.	5.1. Check debtor statements for accuracy of contents. 5.2. Rectify any noted discrepancies accurately. 5.3. Dispatch debtor statements within designated time limits. 5.4. Collect outstanding accounts within designated credit periods. 5.5. Review and control credit terms to ensure payment within designated time limits. 5.6. Maintain debtors ledger to reflect current situation. 5.7. Review customer credit terms when indicated, according to ***store policy and procedures.***
6. Dispatch payments to creditors.	6.1. Check payment documentation prepared by others for accuracy of information and dispatch to creditors within designated time limits.

© Commonwealth of Australia, 2025 Skills Insight

	6.2. Reconcile creditors' statements with accounting ***records***. 6.3. Input relevant data to creditors' ledger. 6.4. Reconcile general ledger against accounting records.
7. Generate financial documents.	7.1. Clarify purpose of the report with relevant personnel. 7.2. Identify and obtain relevant data from nominated internal or external ***sources***. 7.3. Update nominated internal records to show current status of financial report. 7.4. Transcribe data onto nominated form and in the authorised manner.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- literacy skills to:
  - interpret documentation
  - write reports
- numeracy skills to:
  - reconcile accounts
  - count cash
  - calculate non-cash transactions
  - report on takings
- interpersonal skills to:
  - verify cheque and credit card payments with relevant personnel or department prior to acceptance
  - clarify purpose of report with relevant personnel
  - identify and obtain relevant data through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication

Required knowledge

- store policy and procedures in regard to:
  - register or terminal balance
  - cash and non-cash transactions security
  - cash balances
  - banking procedures
  - purchase requisitions and orders

© Commonwealth of Australia, 2025 Skills Insight

  - issuing of receipts
  - delivery dockets
  - credit notes
  - statements
  - remittance advices
  - cash register rolls
  - deposit books
  - change required and denomination of change
  - operation of equipment used at register or terminal
  - processing delivery document discrepancies
  - invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements
- relevant legislation and statutory requirements
- cash and non-cash handling procedures, including:
  - balancing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
  - change required and denominations of change
  - EFTPOS
  - credit cards
  - gift vouchers
  - lay-by
  - credits and returns

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consistently applies store policy and procedures when producing financial reports • consistently applies store policy and procedures in regard to handling cash • consistently applies store policy and procedures in regard to the accurate and effective recording of data for reporting and processing document discrepancies and the reconciliation of reports for preparation of trial balances

© Commonwealth of Australia, 2025 Skills Insight

- consistently applies store policy and procedures in regard to receiving, recording and dispatching to debtors and creditors
- applies follow-up procedures for outstanding accounts.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - financial transaction dockets, slips and invoices
  - recording and tally sheets
  - store policy and procedures manuals
- recording, documenting and filing systems
- registers and related equipment, including EFTPOS facilities and equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Transactions may include:

- cash
- cheque
- credit card
- EFTPOS
- store card
- internet payments
- lay-by
- gift vouchers

© Commonwealth of Australia, 2025 Skills Insight

	• returns.
Nominated system may include:	• recording • documenting • reporting systems • accounting.
Relevant personnel may include:	• supervisor • team leader • manager.
Store policy and procedures in regard to:	• financial systems • cash handling • reconciling accounts.
Records may be:	• manual • electronic.
Sources may include:	• staff members • formal or informal reports • written or verbal data • formal or informal meetings • quantitative and qualitative data.

SIRXFIN201 Balance and secure point-of-sale terminal

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXFIN001A Balance point-of-sale terminal.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment. It involves clearing the register, counting money, calculating non-cash transactions, and reconciling and recording takings.

The unit requires the application of store policy and procedures in undertaking those tasks.

Application of the Unit

This unit applies to frontline retail staff working under some supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Balance and secure takings from register or terminal.	1.1. Perform ***register or terminal*** balance at designated times according to ***store policy and procedures***. 1.2. Separate cash float from takings prior to balancing procedure and secure according to store policy. 1.3. Supply change to register or terminal according to store policy. 1.4. Obtain and interpret register or terminal reading or print-out. 1.5. Secure cash and ***non cash documents*** according to store security policy and procedures.
2. Reconcile takings.	2.1. Count cash accurately. 2.2. Calculate non cash documents accurately. 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions. 2.4. Report discrepancies between register or terminal reading and sum of cash and non cash transactions to ***relevant personnel*** according to store policy. 2.5. Record store and individual department takings and file ***records*** according to store policy.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
  - balance the register or terminal
  - count cash
  - calculate non-cash transactions
  - calculate discrepancies between reported and actual takings
  - complete documentation

© Commonwealth of Australia, 2025 Skills Insight

  - interpret documentation
  - report on takings
- planning and organising skills to complete tasks in a set timeframe
- technology skills to operate register or terminal

Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale terminal
  - calculating non-cash documents
  - change required and denominations of change
  - clearance of terminal and transference of tender
  - counting cash
  - credit and returns
  - credit cards
  - EFTPOS
  - gift vouchers
  - lay-by
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- store policy and procedures in regard to:
  - cash float
  - operation of equipment used at register or terminal
  - register or terminal balance
  - security of cash and non-cash transactions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- applies store policy and procedures in regard to cash float

© Commonwealth of Australia, 2025 Skills Insight

- applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - financial transaction dockets, slips and invoices
  - sample debit card and credit card vouchers
  - recording and tally sheets
  - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Register or terminal may be:

- cleared at intervals during or at close of trading
- cleared by operator or specialist staff
- electronic

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of ***equipment*** used in store or department. 1.2. Operate equipment, according to design specifications and ***safety requirements***. 1.3. Identify equipment faults and report to ***relevant personnel***. 1.4. Identify and apply maintenance program for retail equipment according to ***store policy and procedures***.
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
  - read store procedures for operating equipment
  - enter data
  - perform point-of-sale transactions
  - follow common fault-finding procedures

Required knowledge

© Commonwealth of Australia, 2025 Skills Insight

- store policy and procedures in regard to:
  - the operation and maintenance of store retail equipment
  - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
  - store policy and procedure manuals
  - manufacturer instructions and operation manuals
- a range of store retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Skills Insight

	• observation of performance in the workplace • a role play • third-party reports from a supervisor • customer feedback • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Equipment may include:	• point-of-sale terminals • electronic bar coding equipment for price labelling and stocktaking • portable data entry • printers • EFTPOS terminals • electronic ordering equipment • wrapping and packing equipment • equipment for carrying or moving merchandise • equipment for storage of merchandise, including refrigerators • weighing machines • thermometers • security tag systems • trolley return equipment • computers • scanners • numerical keyboard equipment, including calculators.
Safety requirements may include:	• hazard identification (e.g. workplace inspections) • emergency, fire and accident procedures • personal safety procedures • stress management • procedures for the use of personal protective clothing and equipment

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Use store information technology system.	1.1. Demonstrate operation of store ***information technology system*** to ***staff members*** according to ***store policy and procedures***, as required. 1.2. Identify and operate ***hardware*** and ***software*** according to manufacturer instructions and store policy and procedures. 1.3. Interpret the ***application and uses*** of information technology systems available. 1.4. Transmit data according to electronic data interchange (EDI) procedures as required. 1.5. Use keyboard skills to enter ***information*** accurately and as required by store policy. 1.6. Regularly perform ***back-up procedures*** according to store policy.
2. Edit and update information.	2.1. Identify information to be edited and updated according to store procedures. 2.2. Edit and update information on system according to store policy and procedures. 2.3. Identify and enter price changes into store system as required. 2.4. Ensure shelf data price and computer records match according to store policy.
3. Solve information technology system problems.	3.1. Identify equipment, hardware and software ***faults*** and rectify where possible or seek expert assistance without delay. 3.2. Monitor and implement maintenance program for hardware and software systems according to manufacturer specifications and store procedures. 3.3. Handle routine problems using appropriate ***problem-solving techniques*** and refer to ***relevant personnel*** as required. 3.4. Evaluate and resolve problems arising at point of sale according to store procedures and ***relevant legislation***. 3.5. Provide assistance positively and actively to staff as problems arise.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - convey knowledge of store technology system to other staff members
  - provide assistance to staff through clear and direct communication
  - refer problems to appropriate personnel
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to process and record information
- technology skills to:
  - apply and use hardware and software
  - use store technology information systems

Required knowledge

- manufacturer specifications in regard to operation of hardware and software
- problem-solving techniques
- relevant industry codes of practice
- relevant legislation and statutory requirements, including:
  - consumer law
  - credit procedures
- software licensing specifications
- store policy and procedures in regard to use and operation of store information technology systems, including:
  - efficient and sustainable use of resources
  - work health and safety (WHS) and ergonomic requirements
  - operation of equipment
  - solutions to problems and breakdowns
  - use and maintenance of hardware and software systems
- store products and services range, including pricing structure

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential:
	• applies store policy and procedures in regard to information technology systems, including:
	  • resolving system faults
	  • using and applying store credit and EFTPOS
	  • reviewing and entering information on store system
	• follows requirements of relevant legislation and statutory requirements, including Australian consumer law and credit procedures.

Context of and specific resources for assessment	Assessment must ensure access to:
	• a real or simulated retail work environment
	• hardware and software instruction manuals
	• information technology system
	• relevant documentation, such as:
	  • store or sample policy and procedures on management of information technology systems
	  • legislation and statutory requirements
	  • WHS requirements
	  • industry codes of practice.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • role play • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Receive and process incoming goods.	1.1. Maintain cleanliness and orderliness in receiving bay according to ***store policy and procedures***. 1.2. Unpack goods using correct ***handling techniques*** and ***equipment***, according to store policy. 1.3. Remove and promptly dispose of packing materials, according to store policy and relevant ***legislative requirements***. 1.4. Check incoming stock and validate against purchase orders and delivery documentation, according to store policy and relevant legislative requirements. 1.5. Inspect items received for damage, quality, use by dates, breakage or discrepancies and record, according to store policy. 1.6. Record stock levels on store ***stock systems***, according to store policy. 1.7. Rotate and store stock, according to the first in first out (FIFO) principle. 1.8. Dispatch stock to appropriate area or department. 1.9. Apply stock price and code labels when required according to store policy.
2. Rotate stock.	2.1. Carry out stock rotation procedures, according to store routine and policy. 2.2. Perform store code checking and reporting procedures, including recording of waste and markdowns. 2.3. Place merchandise to achieve a balanced, fully stocked display appearance and promote sales. 2.4. Place excess stock in storage or dispose of, according to store policy and legislative requirements. 2.5. Maintain safe lifting, shifting and carrying techniques according to store Work Health and Safety (WHS) policy and legislative requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- literacy and numeracy skills to:
  - follow set routines and procedures
  - use electronic labelling and ticketing equipment
  - stock records and delivery documentation
  - report problems

Required knowledge

- store policy and procedures in regard to:
  - stock control
  - store labelling policy
  - product quality standards
  - correct unpacking of goods
  - out-of-date, missing or damaged stock
  - equipment used
  - stock location
  - waste disposal
  - methods of storage
  - delivery documentation
  - stock record documentation
  - dispatch documentation
  - reporting faults and problems
- relevant legislation and statutory requirements in regard to stock control, including WHS
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to stock control • consistently applies safe working practices in the manual handling and moving of stock according to

© Commonwealth of Australia, 2025 Skills Insight

WHS legislation and store policy
- interprets and applies manufacturer instructions with regard to handling stock and using relevant equipment
- receives and processes incoming goods and dispatches outgoing goods according to store policy and procedures
- rotates stock and performs out-of-code checking and reporting according to store policy and procedures
- interprets and processes information accurately and responsibly.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant equipment, including:
  - stock moving equipment
  - manual and electronic labelling and ticketing equipment
- computers and stock recording equipment
- relevant documentation, such as:
  - invoices, packing slips, dispatch documents and order forms
  - recording and tally sheets
  - store policy and procedures manuals
  - WHS regulations
  - relevant legislation and statutory requirements
  - industry codes of practice.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXRSK001A Minimise theft
- SIRXCCS002A Interact with customers

© Commonwealth of Australia, 2025 Skills Insight

- SIRXFIN001A Balance point-of-sale terminal.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures may relate to:	• stock control • reception and dispatch • WHS • food safety.
Handling techniques may vary according to:	• stock characteristics • industry codes of practice • legislative requirements.
Equipment may include:	• electronic bar coding equipment • weighing machines • thermometers • trolley return equipment • portable data entry • cutting equipment • protective clothing.
Legislative requirements may include:	• WHS • hazardous substances and dangerous goods • labelling of workplace substances • waste removal and environmental protection • transport, storage and handling of goods.
Stock systems may be:	• manual • electronic.

First Release	This is a revised unit, based on and equivalent to SIRXMER001A Merchandise products.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to merchandise products within a retail store. It involves the consistent application of store policies and procedures in regard to displaying, merchandising, ticketing, labelling, pricing and storing stock. It also includes the application of correct manual handling, storage and display techniques according to stock characteristics, industry codes of practice, and relevant legislation.

Application of the Unit

This unit applies to frontline retail personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Place and arrange merchandise.	1.1. Unpack ***merchandise*** according to ***store policy and procedures*** and ***legislative requirements***. 1.2. Place merchandise on floor, fixtures and shelves in determined locations according to work health and safety (WHS) legislative requirements. 1.3. ***Display*** merchandise to achieve a balanced, fully-stocked appearance and promote sales. 1.4. Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedures. 1.5. Place stock range in line with fixtures, ticketing, prices and bar codes. 1.6. Rotate stock according to stock requirements and store procedure. 1.7. Ensure stock presentation conforms to special ***handling techniques*** and other ***safety requirements***.
2. Prepare and apply labels and tickets.	2.1. Prepare ***labels and tickets*** for window, wall or floor displays according to store policy. 2.2. Prepare tickets using electronic equipment or neatly by hand according to design specifications and store procedures. 2.3. Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action according to store procedures. 2.4. Use, maintain and store electronic ticketing and labelling equipment according to manufacturer's instructions and store procedures. 2.5. Place labels and tickets visibly and correctly on merchandise. 2.6. Replace labels and tickets according to store policy.
3. Maintain displays.	3.1. Reset or dismantle unsuitable or out-of-date displays and ***special promotion areas*** as directed. 3.2. Assist supervisor in selection of merchandise for display. 3.3. Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures. 3.4. Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and

© Commonwealth of Australia, 2025 Skills Insight

	legislative requirements. 3.5. Identify optimum stock levels and replenish stock according to store policy. 3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.
4. Protect merchandise.	4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - read and interpret store procedures and guidelines
  - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

Required knowledge

- store policies and procedures in regard to:
  - availability and use of display materials
  - correct storage of stock
  - correct storage procedures for labelling and ticketing equipment and materials
  - location of display areas
  - merchandise range
  - merchandising, ticketing and pricing of stock
  - scheduling for building or rotating displays
  - stock replenishment
  - stock rotation
  - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
  - manual handling
  - hygiene and sanitation

© Commonwealth of Australia, 2025 Skills Insight

  - hazardous substances
  - labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
  - store policy and procedures
  - industry codes of practice
  - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props

© Commonwealth of Australia, 2025 Skills Insight

- cleaning materials
- relevant documentation, such as:
  - store policy and procedure manuals on housekeeping, merchandising and WHS
  - manufacturer instructions and operation manuals for electronic ticketing equipment
  - relevant legislation and industry codes of practice.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS201 Sell products and services
- SIRXSLS002A Advise on products and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Merchandise may be characterised by:

- type
- brand
- size
- customer needs
- colour
- price.

Store policy and procedures in regard to:

- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.

Legislative

- pricing requirements, including GST requirements

© Commonwealth of Australia, 2025 Skills Insight

requirements may include:	• industry codes of practice • discounted items • Australian Consumer law.
Display may include:	• setting new displays • maintaining existing displays.
Handling techniques may vary according to:	• stock characteristics • store policy • legislative requirements • industry codes of practice.
Safety requirements may relate to:	• transport, storage and handling of goods • hazardous substances • labelling of workplace substances.
Preparation of ***labels and tickets*** may involve:	• pricing gun • shelf tickets • shelf talkers • written labels • swing ticketing • bar coding • price boards • header boards.
Special promotion areas may be:	• permanent or temporary • interior or exterior • publicly accessible • windows • shelves • wall fixtures • on floor.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify requirements for displays.	1.1. Identify ***purpose, audience*** and products for each display. 1.2. Identify organisational requirements and research ***relevant information*** where required. 1.3. Identify available budget and ***resources*** required to create the display. 1.4. Identify and consider ***constraints or factors*** that may affect the creation of the display.
2. Develop display ideas.	2.1. Generate ideas for the display using ***creative thinking techniques***. 2.2. Test ideas against display and ***organisational requirements***. 2.3. Discuss ***display options*** with relevant personnel. 2.4. Modify display ideas and refine according to ***feedback*** and confirm with ***relevant personnel***.
3. Plan and build displays.	3.1. Develop ideas into simple ***display plans***. 3.2. Source resources, materials and products to meet plan requirements. 3.3. Create displays following display plans. 3.4. Seek assistance from relevant personnel where required. 3.5. Review display and make refinements as required.
4. Maintain displays.	4.1. Regularly clean and tidy displays and replace products as necessary according to display plans. 4.2. Make changes or alterations to the display as appropriate.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:

© Commonwealth of Australia, 2025 Skills Insight

  - communicate display ideas to others
  - seek and accept feedback through clear and direct communication
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- creative thinking and design skills to generate ideas for improving displays
- initiative and enterprise skills to ensure efficient and cost-effective use of resources
- observation skills to identify when display needs to be changed, updated or altered
- sketching and writing skills to represent ideas in a simple display plan

Required knowledge

- audiences for and required effects of displays
- basic design principles, including:
  - colour
  - flow of product
  - shape
  - use of space
- organisational requirements, including:
  - environment, health and safety compliance
  - location of displays
  - visual merchandising standards
- visual merchandising display options

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies the requirements for new displays • creates display plans that meet the requirements of the product, audience and organisation • plans and builds displays, according to plans • maintains displays.
Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated retail work environment • relevant documentation, such as store policy and procedures manuals • display space • a range of display products and materials.

© Commonwealth of Australia, 2025 Skills Insight

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • third-party reports from a supervisor • customer feedback • written or verbal questioning to assess knowledge and understanding.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Purpose of display may include:	• attracting customers into the store • new products • new range • promotion • sale.
Audience for display may include:	• internal and external foot or vehicular traffic • new or repeat customers • people from a range of social, cultural and ethnic backgrounds • people with varying physical and mental abilities • people of different ages • people with varying degrees of language and literacy.
Relevant information may be sourced from:	• colleagues • direct observation • internet • magazines • marketing personnel • technical personnel • written reports.
Resources may include:	• equipment and technology • fixtures and fittings

© Commonwealth of Australia, 2025 Skills Insight

	• labels and tickets • new or recycled materials • staff • time.
Constraints or factors may include:	• availability of materials • budget • product characteristics • space • staff • time.
Creative thinking techniques may include:	• brainstorming • creative writing • drawings • lateral thinking • mind mapping • product association • telling stories • using prompts • visualising.

Organisational requirements may include:	• aesthetics
	• allocated space
	• branding
	• budget
	• work health and safety (WHS)
	• organisational standards
	• staff
	• store policy and procedures, including:
	  • housekeeping and waste disposal procedures
	  • WHS procedures.

Display options may include:	• indoor or outdoor • lighting • sound • static or moving.
Feedback may be sought and received:	• in groups • in writing • individually • verbally.
Relevant personnel may include:	• external personnel with visual merchandising expertise • manager • team leader.
Display plans may	• checklist of materials and equipment required

SIRXMER303 Coordinate merchandise presentation

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER002A Coordinate merchandise presentation.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply knowledge of store merchandising and pricing policy and standards to support and coordinate relevant frontline staff members and ensure that they arrange, present and label or price merchandise according to store requirements.

It also involves informing staff of store merchandise presentation requirements for sales, promotions and special events, and providing feedback to management in regard to improvement of store marketing and promotional activities.

Application of the Unit

This unit applies to frontline visual merchandisers who supervise sales and other staff implementing and maintaining displays according to store merchandising standards.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Instruct and coordinate staff.	1.1. Communicate and demonstrate store ***display standards and requirements*** to ***staff***. 1.2. Identify occurrence and timing of promotions and special events and inform staff. 1.3. Identify items to be advertised or promoted, according to store merchandising policy and inform staff. 1.4. Identify appropriate timing for dismantling and disposing of displays and inform staff.
2. Supervise construction and maintenance of presentations.	2.1. Plan and coordinate promotions and special events as directed by management. 2.2. Plan and supervise construction and maintenance of ***displays*** in order to achieve balance and visual impact. 2.3. Ensure product or service ***display information*** accurately depicts product or service being promoted. 2.4. Ensure displays are completed according to required time schedule, with minimum disruption to ***customer*** service and traffic flow. 2.5. Ensure displays are constructed and maintained in a safe and secure manner. 2.6. Regularly monitor replenishment of merchandise and rotation of stock on store displays and take action as required.
3. Implement merchandise pricing.	3.1. Implement store policy and procedures in regard to pricing and ticketing. 3.2. Identify current prices for products and services and amend according to store policy. 3.3. Inform team members of price changes and current pricing policies.
4. Review merchandise presentations.	4.1. Evaluate promotions or special events against sales turnover and store presentation standards. 4.2. Evaluate merchandise presentation against sales turnover and store presentation standards. 4.3. Provide management with feedback in regard to improvement of

© Commonwealth of Australia, 2025 Skills Insight

store marketing and promotional activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - give instructions
  - provide feedback to management through clear and direct communication
  - provide information to staff
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - present and price merchandise
  - read and interpret store policies and procedures
- observation skills to assess display and presentation compliance with visual merchandising standards
- technology skills to operate and maintain electronic labelling and ticketing equipment
- team leadership skills to:
  - instruct and support staff
  - supervise staff activities

Required knowledge

- availability and use of materials
- correct storage procedures for labelling and ticketing equipment and materials
- load-bearing capacity of fixtures and display areas
- location of display areas
- manufacturer specifications for the use of electronic labelling and ticketing equipment
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication skills
- principles of display and design
- procedure for accessing information and implementing price changes
- relevant industry codes of practice relating to coordinating merchandise presentation
- relevant legislation and statutory requirements relating to coordinating merchandise presentation, including Australian Consumer Law

© Commonwealth of Australia, 2025 Skills Insight

- relevant work health and safety (WHS) legislation and codes of practice
- store policies and procedures in regard to:
  - efficient use of resources
  - merchandise range
  - merchandising, pricing and ticketing
  - minimum stock levels required
  - stock rotation and replenishment
  - storage of stock
- store promotional themes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- implements and instructs staff regarding store display, merchandising, ticketing and pricing policies and procedures
- coordinates and monitors display, promotion and presentation of merchandise according to store policies and procedures and legislative requirements
- identifies products to be advertised or promoted according to store merchandising policies
- coordinates construction and maintenance of displays within time schedule set in regard to advertising, catalogues, special offers and in-store promotions in a safe and secure manner
- informs staff of pricing policies, promotions, special events, display standards and requirements, and timing for dismantling and disposing of displays
- evaluates and reports effectiveness of store merchandising and promotional activities to management and staff as required by store policies and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- pricing and ticketing equipment
- merchandise for display
- display materials and props
- relevant documentation, such as:
  - store policy and procedures manuals on merchandising
  - WHS requirements

© Commonwealth of Australia, 2025 Skills Insight

- manufacturer instructions and operation manuals on electronic ticketing equipment
- legislation and statutory requirements
- industry codes of practice
- a work team.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • third-party reports from a supervisor • customer feedback • answers to questions about specific skills and knowledge.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Display standards and requirements may include:	• maintaining existing displays • safety • setting up new displays • ticketing and display signage.
Staff may be:	• from a range of social, cultural and ethnic backgrounds • from within or outside own work team • full-time, part-time, casual or contract.
Displays may be located in a variety of areas, including:	• fixtures on floor • interior or exterior • permanent or temporary • publicly accessible areas • shelves • walls • windows.
Display information may include:	• discount information • price

SIRXMER406 Monitor in-store visual merchandising display

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER003A Monitor in-store visual merchandising display.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to interpret organisational visual merchandising plans and manuals and monitor in-store displays to ensure that they reflect and maintain current organisational visual merchandising directions.

It involves applying fundamental design principles, making decisions with regard to merchandise for display, and ensuring that displays contribute to the visual merchandising standards of the organisation and are constructed and located to ensure customer and staff safety.

Application of the Unit

This unit applies to frontline visual merchandising team members and other staff with a responsibility for monitoring displays to ensure they reflect and maintain current organisational visual merchandising directions.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Interpret a visual merchandising plan.	1.1. Identify ***design requirements*** of visual merchandising plan or manual. 1.2. Source ***resources required*** to implement plan. 1.3. Identify ***factors that may affect the plan***. 1.4. Apply organisation's visual merchandising standards to the plan.
2. Monitor display requirements.	2.1. Regularly monitor display to ensure it meets the requirements of the ***visual merchandising plan***. 2.2. Identify ***damage or changes to the display***. 2.3. Take action to rectify unwanted changes to the display.
3. Maintain displays in line with organisational requirements and plan.	3.1. Maintain display so that it is clean and tidy. 3.2. Make additions or changes to display to ensure it consistently adheres to the visual merchandising plan. 3.3. Maintain organisation's requirements for visual merchandising in the display.
4. Contribute to the visual merchandising standards of the organisation.	4.1. Interpret visual merchandising standards of the organisation. 4.2. Identify opportunities for improving visual merchandising standards. 4.3. Make contributions to the visual merchandising standards as appropriate.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- artistic interpretation skills to create displays according to visual merchandising standards
- communication skills to share ideas
- creative thinking skills to generate ideas for improving visual merchandising standards
- literacy skills to interpret visual merchandising manuals

© Commonwealth of Australia, 2025 Skills Insight

- observation skills to identify damage to displays or deviations from visual merchandising standards
- practical skills to maintain and update displays according to the visual merchandising plan

Required knowledge

- basic design principles
- basic principles of visual merchandising
- work health and safety (WHS) requirements relating to monitoring displays
- organisation's visual merchandising principles
- resources required to implement visual merchandising plans
- procedures for safe use of tools, equipment and materials used in visual merchandising displays

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets and identifies the design requirements of a visual merchandising plan
- monitors the display closely and completes regular maintenance to ensure it meets the requirements of the visual merchandising plan and the organisation's visual merchandising standards
- contributes appropriately to the ongoing development of the organisation's visual merchandising standards.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail visual merchandising work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store visual merchandising standards.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Guidance information

Holistic assessment with other units relevant to the industry sector,

© Commonwealth of Australia, 2025 Skills Insight

for assessment workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Design requirements may include:
- colours used
- functionality
- layout of display
- location of display in store
- merchandise for display
- size of display.

Resources required may include:
- fixtures and fittings
- lights
- materials
- people
- supports
- time.

Factors that may affect the plan may include:
- availability of display stands and structures
- availability of staff
- budget requirements
- merchandise availability
- store promotions
- time requirements.

Visual merchandising plan may include:
- display location
- retail image
- store plan and design.

Damage or changes to the display may include:
- changes in the appearance of the display
- damage to fixtures, fittings or display supports
- damage to items on display.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Interpret the need for innovation.	1.1. Observe the need for ***innovation*** within workplace context. 1.2. Challenge assumptions about products and processes to identify opportunities for innovation. 1.3. Project possible future contexts and environments for the innovation. 1.4. Define ***end user requirements***. 1.5. Identify ***resources and constraints***. 1.6. Research ***factors and ethical considerations*** that may impact on the idea. 1.7. Access relevant ***organisational knowledge***.
2. Generate ideas.	2.1. Conceptualise ideas using a range of ***creative thinking techniques***. 2.2. Apply relevant knowledge to explore a range of approaches. 2.3. Seek ***stimulation from alternative sources***. 2.4. Test ideas against brief and other factors. 2.5. Select preferred option.
3. Collaborate with others.	3.1. Develop ideas in conjunction with ***relevant people***. 3.2. Seek and accept ***feedback*** from relevant people in an appropriate fashion. 3.3. Modify ideas according to feedback. 3.4. Maintain and utilise a ***network of peers*** to discuss ideas.
4. Analyse and reflect on ideas.	4.1. Analyse ideas from different perspectives. 4.2. Use appropriate strategies to capture ***reflections***. 4.3. Examine ideas to ensure they meet context requirements, best practice and future needs. 4.4. Allow time for the development and analysis of ideas.
5. Represent ideas.	5.1. Select an appropriate ***communication technique*** for the target ***audience***. 5.2. Develop the ***presentation of the idea*** with the audience in mind. 5.3. Present the idea to educate and inform the client.

© Commonwealth of Australia, 2025 Skills Insight

	5.4. Modify the idea according to client feedback.
6. Evaluate ideas.	6.1. ***Review*** ideas using appropriate ***evaluation methods*** to ensure they meet required needs.
	6.2. Modify ideas as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - collaborate with others and represent ideas through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - work within teams
- analytical and lateral thinking skills to examine self and external factors

Required knowledge

- relevant technical knowledge
- broad industry and market knowledge
- organisational culture
- social, environmental and work culture impacts
- principles of innovation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets the need for innovation in the workplace
- identifies resources and constraints and researches affecting factors when generating innovative ideas
- generates ideas using creative thinking techniques
- tests ideas against brief and other relevant factors
- presents and discusses ideas with relevant people
- seeks feedback and modifies ideas accordingly

© Commonwealth of Australia, 2025 Skills Insight

	• analyses and reflects on ideas to ensure they meet end user requirements • presents ideas using appropriate communication methods • reviews and modifies idea using appropriate evaluation methods.
Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated work environment • relevant documentation, such as store policy and procedures manuals • a range of communication equipment.
Methods of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • third-party reports from a supervisor • a detailed case study • written or verbal questioning to assess knowledge and understanding • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Innovation may include:	• generating new ideas or solutions • developing new uses for old ideas and making them useful or a means of improvement.
End user requirements may refer to:	• who will be using the end product • why the product or process is needed • how will it be used • advantages will it provide • where it will be used.
Resources and constraints may	• time required

© Commonwealth of Australia, 2025 Skills Insight

include:	• costs • equipment • human resources • work culture • management practice • technology needed.
Factors and ethical considerations may include:	• aesthetic requirements • functionality • information available • WHS • environmental considerations.
Organisational knowledge may include:	• technical knowledge • information gained from books and audiovisual resources • knowledge from different work areas • informatin from work colleagues • work processes • product • materials • systems • tools • working conditions.
Feedback may be:	• formal or informal • verbal • in writing • in groups • individual.
Creative thinking techniques may include:	• brainstorming • visualising • making associations • building on associations • telling stories • creative writing • lateral thinking games • mind mapping, drawings • six thinking hats • using prompts.
Stimulation from alternative sources may include:	• reading books and industry journals • talking with colleagues and friends

© Commonwealth of Australia, 2025 Skills Insight

	• visiting art galleries and museums • going to industry workshops • networks.
Relevant people may include:	• colleagues • team members • supervisors • managers • the client.
Maintaining a ***network of peers*** may include:	• participating in forums • participating in industry training • attending workshops • becoming a member of a network.
Capture of ***reflections*** may include:	• mind mapping • assessing alternatives • drawing comparisons • imagining possible outcomes • imagining best and worst case scenarios.
Communication techniques may include:	• writing a proposal • building a model • showing a film • presenting a talk • preparing a report • drawing a diagram.
The ***audience*** may include:	• external contacts • internal contacts, such as management and other team members • groups or individuals • people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.
Presentation of ideas may include:	• helping the client visualise and understand the idea • actively listening • asking questions • accepting others opinions • explaining the proposal • clarifying details.
Formal review of the idea may involve:	• checking that the idea can be implemented • that it meets the client and end user needs • best practice

© Commonwealth of Australia, 2025 Skills Insight

- financial requirements
- resource requirements.

Evaluation methods may include:

- developing checklists
- discussing the process with colleagues or supervisors
- writing a report of the outcomes.

SIRXRSK001 Identify and respond to security risks

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to identify security risks related to customers, team members, merchandise and money, and take appropriate action, within scope of job role, to eliminate or minimise those risks.

It applies to individuals at all levels working in frontline roles in a diverse range of industry sectors and business contexts.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify potential security risks.	1.1. Identify potential risks to merchandise, cash and non-cash, and take swift action to prevent escalation of security risk in line with organisational procedures. 1.2. Identify potential risks to safety of customers, self or team members, and take swift action to prevent escalation of security

© Commonwealth of Australia, 2025 Skills Insight

	risk in line with organisational procedures. 1.3. Remain vigilant and alert to potential security risks, and follow organisational policies and procedures to minimise security risks. 1.4. Maintain security of merchandise, cash and non-cash according to organisational procedures.
2. Respond to security breaches.	2.1. Identify security breaches and respond in line with organisational policies and procedures. 2.2. Recognise security breaches outside of scope responsibility and promptly refer to relevant personnel. 2.3. Prioritise personal safety when responding to security breaches.
3. Report on security issues.	3.1. Report suspicious behaviour to relevant personnel. 3.2. Report faulty security equipment to relevant personnel. 3.3. Report on security breaches and ongoing security risks in line with organisational policies and procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Writing skills to:	• complete basic written reports regarding security breaches.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXRSK001 Identify and respond to security risks

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures to demonstrate the appropriate response, within scope of job role, to four of the following security issues:
  - faulty security equipment
  - suspicious customer behaviour
  - suspicious team member behaviour
  - breaches of cash handling security procedures
  - breaches of merchandise movement security procedures
  - theft of cash
  - theft of merchandise
  - armed robbery
  - individual posing threat to personal safety
- identify potential security risks within the workplace and determine appropriate measures to eliminate the risk.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - use of security equipment
  - suspicious customer behaviour
  - suspicious team member behaviour
  - armed robbery
  - cash and non-cash security
  - merchandise security
  - theft
  - responding to security breaches
  - reporting security risks and breaches
  - surveillance of merchandise

© Commonwealth of Australia, 2025 Skills Insight

  - personal security
- common security risks within the retail workplace and techniques to:
  - identify risk
  - minimise risk
- impacts of security breaches on individuals and organisation:
  - emotional distress
  - financial loss
  - commercial loss.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures relevant to security as listed in the Knowledge Evidence
- customers and team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment
- assessment activities that allow the individual to work with commercial speed and timing.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSLS001 Sell to the retail customer

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish customer needs.	1.1. Connect with the customer within designated response times and establish rapport. 1.2. Use questioning and active listening to facilitate effective two-way communication.

© Commonwealth of Australia, 2025 Skills Insight

	1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues. 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.	2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable. 2.2. Clearly explain and promote product and service features and benefits where relevant. 2.3. Advise on promotional events where relevant. 2.4. Provide additional information to address customer questions and objections. 2.5. Offer comparisons to competitor product or service range as required. 2.6. Collaborate with the customer to determine product or service option most suited to their needs. 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.	3.1. Select and use appropriate techniques to close sale. 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures. 3.3. Farewell customer on leaving, and invite to return. 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to:	• interpret:
	  • detailed in-house and supplier product information documents
	  • plain English documents that outline organisational customer service policy and procedures.

Numeracy skills to:	• interpret basic fee information from in-house documents and complete basic pricing calculations.
Problem-solving skills to:	• respond to customer objections and provide appropriate solutions to satisfy customer needs.
Technology skills to:	• use technologies equipped with search functionality and information systems to source product and service information.

Assessment Requirements for SIRXSLS001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
  - appropriate communication
  - establishment and clarification of customer needs, wants and expectations
  - product and/or service knowledge
  - appropriate sales approach to sell benefits and features of products and/or services
  - overcome objections and close sales
  - upsell and/or cross sell additional products and/or services that complement the sale
  - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
  - cultural diversity
  - special needs
- sales techniques:
  - opening techniques
  - recognising buying signals
  - strategies to focus customer on specific products and services
  - selling add-ons and complementary products
  - overcoming customer objections
  - closing techniques

© Commonwealth of Australia, 2025 Skills Insight

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
  - professional service standards and protocols for retail industry personnel
  - attitudes and attributes expected by the retail industry to work with customers
  - different customer service needs and expectations
- for the particular retail organisation:
  - product and service knowledge:
    - product and service range offering
    - product specifications, features and benefits
  - designated response times for providing customer service
  - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for:
    - customer service
    - sale of products and services
    - resolving customer complaints
    - collection and storage of customer details
  - organisational product information and price lists
  - supplier brochures, information sheets and price lists
  - promotional activity information
  - current plain English regulatory documents distributed by government regulators for:
    - consumer protection law
    - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

© Commonwealth of Australia, 2025 Skills Insight

- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for SIRXSLS002 Follow point-of-sale procedures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow procedures for set up, maintenance and close of point-of-sale area/terminal on three different occasions
- perform three point-of-sale transactions for each of the following:
  - cash sales
  - non-cash sales
- perform three point-of-sale transactions for each of the following:
  - refunds
  - exchanges
- make six accurate financial calculations relating to product pricing that individually or cumulatively involve:
  - multiple products
  - products of varying prices
  - products with percentage discounts
- follow procedures to complete four sales that require post purchase activity.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - exchanges
  - refunds
  - lay-by
- basic key aspects of legislation that impact point-of-sale activities:
  - Australian Consumer Law
- features of products sold by the organisation
- functions and procedures for operating point-of-sale equipment:
  - opening and closing
  - clearance of terminal and transference of tender

© Commonwealth of Australia, 2025 Skills Insight

  - recording takings
  - consumables required by system
  - security
- cash handling procedures:
  - counting cash
  - handling cash floats
  - change required, denominations of change and tendering change
  - security
- procedures for non-cash transactions:
  - credit cards
  - EFTPOS
  - vouchers
- types of purchase follow up activities and associated organisational policies and procedures:
  - placing of orders
  - delivery
  - issuing of invoices
  - issuing of receipts
  - wrapping and packing.

Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for point-of-sale activities
- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation that impact point-of-sale activities as listed in the Knowledge Evidence
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for SIRXSLS003 Achieve sales results

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- monitor sales performance against sales targets over a designated organisational sales period by:
  - reviewing sales targets and determining strategies for achievement
  - communicating sales targets to team members
  - responding to the following situations:
    - sales targets consistently not achieved
    - sales targets achieved
    - internal factors impacting on sales
    - external factors impacting on sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - customer service
  - sales process
- internal factors impacting on sales:
  - lack of resources
  - stock issues
  - team lacking sales skills
- external factors impacting on sales:
  - competitor activity
  - operating environmental impacts
- strategies for:
  - interpreting sales targets
  - achieving sales targets
  - corrective action for response to poor performance
- sales processes and how they are used to achieve sales targets
- required action to improve sales when the following problems occur:

© Commonwealth of Australia, 2025 Skills Insight

- operational issues
- lack of resources
- stock issues
- competitor activity.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for sales process and customer service standards
  - sales targets
  - records of previous sales
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSLS201 Sell products and services

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSLS001A Sell products and services.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to sell products and services in a retail environment.

It involves the use of sales techniques and encompasses key selling skills, from approaching the customer to closing the sale.

It requires a basic level of product knowledge and the recognition and demonstration of verbal and non-verbal communication skills to determine customer requirements, sell the benefits of products and services, overcome objections and close sales.

Personal evaluation is used to maximise sales, according to industry codes of practice, relevant legislation and store policy.

Application of the Unit

This unit applies to frontline sales personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop and apply product knowledge.	1.1. Develop ***product knowledge*** by accessing ***relevant sources of information*** and confirm with relevant staff. 1.2. Apply knowledge of the use and application of relevant products and services in interactions with customers according to store policy and ***legislative requirements***. 1.3. Identify gaps in product knowledge and resolve by accessing relevant sources of information.
2. Approach customer.	2.1. Identify ***customers*** by name where possible. 2.2. Develop knowledge of customer buying behaviour by accessing relevant sources of information. 2.3. Determine and apply appropriate timing of customer approach according to store policy and customer behaviour. 2.4. Initiate customer contact according to store policy. 2.5. Convey a positive impression to encourage customer interest according to store policy.
3. Gather and respond to information.	3.1. Apply questioning techniques and listening skills to determine customer buying motives and requirements. 3.2. Interpret and clarify non verbal communication cues. 3.3. Direct customer to specific merchandise according to customer requirements and store policy.
4. Sell benefits.	4.1. Match customer needs to appropriate products and services. 4.2. Communicate knowledge of product features and benefits clearly to customers. 4.3. Describe product use and safety requirements to customers. 4.4. Refer customers to appropriate product specialist as required. 4.5. Answer ***routine customer questions*** about merchandise accurately and honestly or refer to senior sales staff.

© Commonwealth of Australia, 2025 Skills Insight

5. Overcome objections.	5.1. Identify and acknowledge customer objections according to store policy. 5.2. Categorise objections into price, time and merchandise characteristics and consider solutions. 5.3. Offer solutions to customer objections according to store policy. 5.4. Apply ***problem solving*** within personal scope of responsibilities to overcome customer objections or refer to senior staff.
6. Close sale.	6.1. Monitor, identify and respond appropriately to customer buying signals. 6.2. Encourage customer to make purchase decisions. 6.3. Select and apply appropriate method of closing sale.
7. Maximise sales opportunities.	7.1. Recognise and apply opportunities for making additional ***sales*** according to store policy. 7.2. Advise customer of complementary products or services according to customer's identified need. 7.3. Review personal sales outcomes and consider strategies to maximise future sales in consultation with relevant staff.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Re**quired skills**

- communication and interpersonal skills to:
  - handle difficult customers
  - verbal and non-verbal communication skills to:
    - question, listen and observe
    - overcome objections and close sale
- literacy and numeracy skills to:
  - handle payments for goods
  - read product information
  - read store policies and procedures
  - record information
  - weigh and measure goods
- selling skills to use a range of selling techniques

Required knowledge

- customer types and needs, including:
  - customer behaviour and cues

© Commonwealth of Australia, 2025 Skills Insight

  - customer buying motives
  - demographics, lifestyle and income
  - individual and cultural differences
  - types of customer needs, such as:
    - functional
    - psychological
- relevant industry codes of practice, legislation and statutory requirements relating to the sale of products and services
- selling techniques, including:
  - add-ons and complementary sales
  - closing techniques
  - opening techniques
  - overcoming customer objections
  - recognising buying signals
  - using strategies to focus customer on specific merchandise
- specific product knowledge for area or section
- store merchandise and service range
- store policies and procedures in regard to:
  - allocated duties and responsibilities
  - selling products and services and sales performance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future

© Commonwealth of Australia, 2025 Skills Insight

sales.

Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated retail work environment • relevant documentation, such as policy and procedures manuals • a range of customers with different requirements • a range of merchandise and products appropriate to the retail workplace • product labels and sources of product information.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the candidate in the workplace • customer feedback • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Product knowledge may include:	• features and benefits • handling and storage requirements • price • safety features • stock availability • use-by dates • warranties.
Relevant sources of information may include:	• demonstrations • internet • labels • product profiles

© Commonwealth of Australia, 2025 Skills Insight

	• staff members • store or supplier product manuals • store tours • videos.
Legislative requirements may include:	• industry codes of practice • liquor laws • lottery legislation • work health and safety (WHS) • sale of second-hand goods • sale of X and R-rated products • tobacco laws • Australian consumer law and fair trading Acts • trading hours • transport, storage and handling of goods.
Customers may include:	• customers with routine or special requests • internal and external contacts • new or repeat contacts • people from a range of social, cultural and ethnic backgrounds • people with varying physical and mental abilities.
Routine customer questions may relate to:	• availability • features and benefits • price and price reductions • quality.
Problem solving may be affected by:	• resource implications • store policies and procedures.
Sales transactions may be completed:	• face-to-face • online • over the telephone.

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSLS004A Build relationships with customers.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and maintain expert knowledge to provide accurate product information to customers, including post-sales support.

It also covers communication, analysis and sales techniques to plan and implement sales presentations, build positive relationships with customers, and resolve customer complaints to ensure positive business outcomes.

Application of the Unit

This unit applies to senior sales personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop relationships with customers.	1.1. Establish rapport with ***customers*** and express genuine interest to ***clarify customer requirements*** and enhance ***outcomes.***
	1.2. Maintain ***professional ethics*** with the customer to promote store image and credibility.
	1.3. Identify ***customer needs and preferences*** to maximise sales opportunities.
	1.4. Maximise sales opportunities by use of add-on and complementary ***sales techniques***.
	1.5. Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.
	1.6. Use effective methods to close sales.
2. Apply expert knowledge.	2.1. Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to ***legislative requirements***.
	2.2. Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.
	2.3. Provide evaluation of product range, demonstrate features and benefits of products or services where appropriate, and make recommendations to the customer to maximise sales potential.
	2.4. Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to ***store policy***.
	2.5. Calculate prices and discounts according to pricing determinants and store policy.
3. Provide post-sales support.	3.1. Provide evidence of ongoing support as sale is concluded.
	3.2. Explain ***back-up service*** and reassure customer according to legislative requirements and store policy.
	3.3. Provide customer with store or salesperson’s contact details to ensure customer follow-up according to store policy.
	3.4. Enter customer and transaction details into ***customer database*** according to store policy.

© Commonwealth of Australia, 2025 Skills Insight

4. Plan sales presentations.	4.1. Plan presentation to complement ***product characteristics***. 4.2. Select client group according to product characteristics and store merchandising policy. 4.3. Access ***promotional materials*** where required and distribute to client group. 4.4. Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.
5. Implement sales presentations.	5.1. Ensure sufficient numbers of adequately briefed support staff, where required, for presentation. 5.2. Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups. 5.3. Demonstrate products or services to create a buying environment. 5.4. Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future ***sales presentations***, according to store sales policy.
6. Maintain and use a customer database.	6.1. Maintain customer confidentiality as required by store policy and legislative requirements. 6.2. Develop and maintain accurate ***customer records*** and store securely according to store policy and procedures. 6.3. Identify and follow up regular customers according to store marketing policy. 6.4. Use customer records to advise customers on products and services of possible interest. 6.5. Implement ***customer loyalty schemes*** where required according to store promotional activities.
7. Deal with difficult customers.	7.1. Acknowledge customer complaints and problems and reassuringly support difficult customers to produce positive outcome. 7.2. Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration. 7.3. Develop customer's confidence in the candidate and product or service to promote long-term trust and commitment to store. 7.4. Establish mutually acceptable resolution of complaint.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Skills Insight

- communication and interpersonal skills to resolve conflict
- literacy and numeracy skills to:
  - access and read relevant product information
  - calculate prices and discounts
  - read store policies and procedures
  - record client and sales information
- sales skills to apply selling techniques, including:
  - add-ons and complementary sales
  - identifying buying signals
  - opening and closing techniques
  - overcoming customer objections
  - presenting product information
  - promoting enhanced sustainability features of selected products and services
  - using strategies to focus customer on specific merchandise

Required knowledge

- customer types and needs, including:
  - customer buying motives, customer behaviour and cues
  - functional and psychological needs
  - individual and cultural differences, demographics, lifestyle and income
- work health and safety (WHS) requirements relating to:
  - manual handling
  - plant and equipment
  - hazardous substances and dangerous goods
  - workers compensation
- relevant industry codes of practice, legislation and statutory requirements relating to building relationships with clients
- store policies and procedures in regard to:
  - efficient use of resources
  - establishing, maintaining and using customer records
  - methods of maintaining customer confidentiality and secure storage of customer details
  - price negotiation and payment and credit options
  - pricing, including GST requirements
  - resolving customer complaints
  - updating and maintaining customer mailing lists
- store and area merchandise and service range

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies:
  - detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
  - industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
  - store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations, and providing after-sales support
- develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and discerning customer buying motives, requirements and preferences
- establishes, records and maintains customer records and details, maintaining customer confidentiality, ensuring secure storage of data, and using customer records to maximise customer interest and create a buying atmosphere
- evaluates personal or team sales performance to maximise future sales
- maximises sales opportunities by using effective selling techniques, applying detailed product knowledge, and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- plans, prepares and conducts sales presentations and briefs
- supports staff where required, to create a buying environment and maximise sales performance
- resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution
- uses effective questioning, listening and observation skills to determine customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:

© Commonwealth of Australia, 2025 Skills Insight

- policy and procedures manuals
- industry codes of practice and relevant legislation
- WHS legislation and codes of practice
- a range of customers with different requirements
- an appropriate range of products and equipment
- a customer database system.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Customers may include:

- a single customer, couples, families or groups
- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Clarification of customer requirements may be achieved by:

- active listening
- appropriate questioning
- empathy
- observation
- reassurance and confirmation.

Outcomes may include:

- credibility of store
- customer commitment

© Commonwealth of Australia, 2025 Skills Insight

	• customers' trust • increased return customer base.
Maintaining ***professional ethics*** with the customer may include:	• confirmed appraisals of products and services • honesty • positive statements.
Customer needs and preferences may include:	• brand • customer physical needs • price • product characteristics • product type • size.
Sales techniques will include:	• add-on and complementary products and services • selling up or down • suggestive selling • variety of methods of closing sales.
Legislative requirements may include:	• environmental protection legislation • health and welfare law specific to local government, state and federal legislation • liquor laws • WHS • pricing procedures, including GST requirements • privacy laws • sale of second-hand goods • tobacco laws • Australian Consumer Law and fair trading Acts • transport, storage and handling of goods.
Store policy and procedures in regard to:	• dealing with difficult customers • maintaining and using client records • promotional, marketing, discounting and reward programs • resolving customer complaints • selling products and services.
Back-up service may include:	• delivery specifications • financial products and services • installation • returns policies • technical support • warranties and guarantees.
Customer database may be:	• computer-based • manual.

© Commonwealth of Australia, 2025 Skills Insight

Product characteristics may include:	• features and benefits • price range • supplier or manufacturer information • target group.
Promotional materials may include:	• brochures • business cards • pamphlets • posters • promotional merchandise • vouchers.
Sales presentations may be:	• at client site • in-house • verbal • visual.
Customer records may include:	• anniversaries and special dates • details of items bought or returned • name and contact details • personal preferences • transaction records.
Customer loyalty schemes may include:	• credit or discount facilities • customer clubs • customer reward schemes • special offers.

SITTPPD402 Develop interpretive activities

Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITTPPD005A Plan and develop interpretive activities. Title simplified.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives, develop operational aspects and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE304 Prepare and present tour commentaries or activities.

Application of the Unit

This unit applies to many industry sectors and has particular relevance in tourism, sport and recreation and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and development of interpretive activities may be for a series of activities within a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Establish need for activities.	1.1 Identify need for ***interpretive activities***, based on customer, organisation and community needs.
	1.2 Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues.
2. Create activities.	2.1 Identify and evaluate a range of potential information and ***resources***, including ***other specialists*** as required.
	2.2 Develop interpretive framework for activities.
	2.3 Generate and select ideas for potential messages, themes and storylines.
	2.4 Consider relationships between themes, storylines and the site.
	2.5 Incorporate interpretive media that matches the site.
	2.6 Conduct a risk assessment and incorporate controls into activity development.
	2.7 Evaluate and integrate legal, ethical and sustainability considerations.
	2.8 Develop resources to support activities.
	2.9 Develop activity within budget to meet agreed objectives.
	2.10 Promote activities according to organisational marketing objectives.
3. Evaluate activities.	3.1 Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities.
	3.2 Modify activities according to feedback received.
	3.3 Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to consult with colleagues about development issues for interpretive activities
- critical thinking skills and research skills to evaluate wide ranging information and tease out creative themes and messages for activities
- literacy skills to:
  - analyse complex information and to interpret this for creative communication to customers
  - develop resources and information materials for the activities
- numeracy skills to calculate costs and work within established budgets
- planning and organising skills to coordinate creative and practical aspects of activities
- problem-solving skills to evaluate and adjust activities.

Required knowledge

- subject matter around which activities are developed
- principles of interpretation, including work of Freeman Tilden
- physical and digital interpretive media
- practical processes that support activity development, including:
  - budgeting
  - evaluation
  - needs analysis
  - resource development
  - scheduling
- creative communication techniques for interpretive activities, including:
  - games
  - illustrated talks
  - role-playing
  - sensory awareness exercises
  - storytelling
  - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes, including:
  - determining overall risk level
  - determining the exposure to the risk
  - estimating the probability of negative impacts
  - identifying the consequences that could result from the identified risk

© Commonwealth of Australia, 2025 Skills Insight

- legal, ethical and sustainability considerations for activity development, including:
  - cultural appropriateness
  - duty of care
  - minimal impact
  - minimising waste and conserving resources.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • plan and develop multiple interpretive activities with varying themes and messages that meet the needs of different customer groups and commercial and operational constraints • apply subject matter knowledge to the development of interpretive activities • plan and develop interpretive activities for a number of different delivery environments.
Context of and specific resources for assessment	Assessment must ensure use of: • a real or simulated environment for which interpretive activities can be planned and developed.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • evaluation of a project undertaken by the individual to develop and evaluate activities for a nominated customer group or organisation • evaluation of activities by professional interpretation organisations • written or oral questioning to assess knowledge of interpretation principles and activity development processes • use of case studies to assess ability to tailor activities and information to suit particular customer needs • review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

© Commonwealth of Australia, 2025 Skills Insight

Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE304 Prepare and present tour commentaries or activities
- SITTGDE306 Research and share general information on Australian Indigenous culture
- SITTGDE307 Prepare specialised interpretive content on flora, fauna and landscape
- SITTGDE308 Prepare specialised interpretive content on marine environments
- SITTGDE309 Prepare specialised interpretive content on cultural and heritage environments.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Interpretive activities:

- may include:
  - guided site activities
  - guided walks
  - one or more activities that may be combined in an overall tour program
  - sporting activities
  - touring activities
  - virtual activities
- may relate to a range of subjects, including:
  - art
  - birds
  - built environment
  - culture
  - domestic and farm animals
  - festivals or seasonal themes
  - history and heritage
  - natural environment
  - sports

© Commonwealth of Australia, 2025 Skills Insight

- wildlife.

Resources may include:

- actors and performers
- apps and other digital content
- costumes
- guest speakers
- handouts
- information and communications technology
- natural resources
- props
- professional organisations
- special interest organisations.

Other specialists may include:

- actors and performers
- creative designers
- cultural advisers
- designers
- environmental educators
- heritage specialists
- historians
- interpretation consultants
- marketers
- subject matter experts
- technical experts.

SITXCCS008 Develop and manage quality customer service practices

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop, monitor and adjust customer service practices. It requires the ability to consult with colleagues and customers, develop policies and procedures for quality service provision, and manage the delivery of customer service.

The unit applies to senior managers who operate independently, have responsibility for others and are responsible for making a range of operational and strategic decisions.

This includes individuals working in a range of tourism, travel, hospitality and event contexts and to any small, medium or large organisation.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

essential outcomes.	demonstrate achievement of the element.
1. Develop quality customer service practices.	1.1. Obtain information on customer needs, expectations and satisfaction levels using both formal and informal research. 1.2. Provide opportunities for customers and staff to give feedback on products and services. 1.3. Review changes in internal and external environments and integrate findings into planning for quality service. 1.4. Provide opportunities for staff to participate in development of customer service practices. 1.5. Develop policies and procedures for quality service provision.
2. Manage delivery of quality service.	2.1. Communicate policies, procedures and expectations to staff. 2.2. Make policies readily available to customers and staff. 2.3. Monitor customer service in the workplace to ensure standards are met. 2.4. Initiate staff training to enhance customer service. 2.5. Take responsibility for service outcomes and dispute resolution. 2.6. Act as a positive role model for professional standards expected of service industry personnel.
3. Monitor and adjust customer service.	3.1. Seek ongoing feedback from staff and customers to improve performance. 3.2. Assess effectiveness of customer service practices. 3.3. Identify systemic customer service problems and adjust policies and procedures to improve service quality. 3.4. Develop, document and communicate new approaches to customer service to staff involved in service delivery.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret customer service surveys and unfamiliar complex documents on current industry trends and changes that affect service delivery • research customer service requirements.
Writing skills to:	• produce comprehensive yet easily accessible policies and procedures that provide service expectations.

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• discuss customer service needs with staff and customers.
Numeracy skills to:	• calculate and interpret customer satisfaction statistics and business performance data.
Learning skills to:	• contribute to change management in workplace customer service.
Problem-solving skills to:	• allow for a rational and logical evaluation of the characteristics and needs of the organisation in order to design tailored customer service practices.
Planning and organising skills to:	• plan for, establish and regularly monitor all components of the customer service system.
Self-management skills to:	• take responsibility for customer service outcomes.
Technology skills to:	• use software to analyse customer satisfaction data.

Assessment Requirements for SITXCCS008 Develop and manage quality customer service practices

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- research and develop customer service policies and procedures for at least three different areas of the business that meet industry standards
- implement and monitor practices for quality customer service in line with above policies and procedures over four service periods
- evaluate practices for quality service provision and identify any failings
- review policies and procedures, adjust as necessary, and communicate any new practices to staff.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- principles of quality customer service
- specific industry sector:
  - professional service standards for service industry personnel
  - attitudes and attributes expected by the service industries to work with customers
- roles and responsibilities of management, supervisors and operational personnel in providing quality service
- sources of information on current service trends and changes that affect service delivery
- internal and external environmental changes and their effect on planning for quality customer service:
  - changes in the competitive environment
  - economic climate
  - introduction of new technologies or equipment
  - management changes and organisational restructures
  - recruitment practices
  - trends in customer service preferences
- methods of formal and informal customer research:
  - analysis of competitive environment and industry service trends
  - customer service surveys

© Commonwealth of Australia, 2025 Skills Insight

  - customer focus groups
  - qualitative or quantitative research
  - seeking feedback from service delivery colleagues
  - questioning customers
- methods of implementing quality service provision:
  - developing, implementing and monitoring customer service policies and procedures
  - involving staff in the development of customer service practices
  - evaluating staff and customer feedback
- methods of assessing the effectiveness of customer service practices:
  - examining overall business performance
  - monitoring the ongoing effectiveness of:
    - staff in meeting customer service standards
    - policies and procedures in explaining practices
  - reviewing numbers and nature of:
    - complaints
    - disputes
    - responses of customers
  - reviewing customer satisfaction survey statistics
- methods of obtaining feedback from customers:
  - customer service discussions with employees during the course of each business day
  - discussions with customers
  - formal customer interviews
  - regular staff meetings that involve service discussions
  - seeking staff suggestions for content of customer service policies and procedures
  - surveys of internal customers, external customers and staff
  - improvements suggested by:
    - customers involved in complaints or disputes
    - suppliers
    - staff, supervisors and managers
- industry schemes, accreditation schemes and codes of conduct aimed at improving customer service
- areas where organisational policies and procedures assist in ensuring quality customer service:
  - acknowledging and greeting customers
  - complaint and dispute management
  - authority for different level personnel to resolve complaints, disputes, service issues and customer compensation
  - loyalty programs
  - presentation standards for customer environment and customer service personnel
  - pricing and service guarantees

© Commonwealth of Australia, 2025 Skills Insight

  - product quality
  - refunds and cancellation fees
  - response times
  - staff training for:
    - customer service
    - technical skills
- objectives, components and comprehensive details of consumer protection laws that relate to customer service, and the business' responsibility for:
  - nominating and charging cancellation fees
  - providing information on potential price increases
  - providing refunds
  - supplying products as described or substituting suitable products when unable
  - formats for and content of policies and procedures.

Assessment Conditions

Skills must be demonstrated in an operational business environment for which tailored customer service practices are required. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government consumer protection regulators
- codes of practice and standards for customer service issued by industry groups
- sources of information on customer needs, complaints and feedback
- customer surveys and feedback collection tools and templates
- team members with whom the individual can interact; these can be:
  - staff in an industry workplace during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions

following organisational arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards

© Commonwealth of Australia, 2025 Skills Insight

- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency
- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to implement an assessment plan, and gather quality evidence to assess the competence of a candidate using compliant assessment tools.

It applies to teachers, trainers and assessors in enterprises and registered training organisations (RTOs) and those providing assessment advisory services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for the assessment	1.1 Interpret assessment planning documentation and applicable organisational, legal and ethical requirements for conducting the assessment and confirm with the relevant people 1.2 Access and interpret units of competency that are to be used as

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	benchmarks for assessment, and the nominated assessment tools, to confirm the requirements for the evidence to be collected 1.3 Determine opportunities for integrated assessment activities and document any changes to the assessment instruments, where required 1.4 Determine opportunities for evidence-gathering in actual or simulated activities, through consultation with the candidate and relevant personnel 1.5 Conduct a candidate briefing and explain, discuss and agree on the details of the planned assessment 1.6 Arrange identified material and physical resource requirements 1.7 Identify any specialist support requirements for the assessment, and organise if necessary
2. Gather quality evidence	2.1 Use agreed assessment methods and tools to gather, organise and document evidence in a format suitable for determining competence 2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence
3. Support the candidate	3.1 Discuss and guide candidates in gathering their own evidence to support the recognition of prior learning (RPL) 3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to individual differences and enables two-way feedback 3.3 Make decisions on reasonable adjustments with the candidate, based on the candidate's needs and characteristics 3.4 Access specialist support, if required, in accordance with the assessment plan 3.5 Address any workplace health and safety (WHS) risk to a person or equipment immediately
4. Make the assessment decision	4.1 Assess the collected evidence, and to evaluate whether it reflects the evidence required to demonstrate competence 4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence 4.3 Make the assessment decision in line with agreed assessment procedures and according to the agreed assessment plan 4.4 Provide clear and constructive feedback to the candidate regarding the assessment decision, and clearly document

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	follow-up, if required
5. Record and report the assessment decision	5.1 Record assessment outcomes promptly and accurately 5.2 Complete and submit required assessment documentation, according to assessment procedures and confidentiality conventions 5.3 Inform other relevant parties of the assessment decision, according to confidentiality conventions
6. Review the assessment process	6.1 Review the assessment process in consultation with candidates and other relevant people to improve future practice 6.2 Document and record the review according to relevant assessment system policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 4.1	• Accesses and interprets procedural and compliance documentation relevant to the assessment process • Examines and evaluates assessment evidence
Writing	1.1, 1.3, 1.5, 2.1, 3.1, 5.1, 5.2, 5.3, 6.2	• Completes workplace documentation accurately using appropriate language and following organisational requirements
Oral Communication	1.1, 1.4, 1.5, 3.1, 3.4, 4.4, 5.3, 6.1	• Communicates information and assessment process requirements clearly, using techniques appropriate to the audience and environment • Interacts appropriately with candidates to build rapport and understanding, and obtain specific information to support the assessment process
Navigate the world of work	1.1, 3.5, 5.3	• Identifies, confirms and takes responsibility for adherence to legal and ethical requirements • Recognises, and follows, explicit and implicit protocols and meets expectations associated with own role

© Commonwealth of Australia, 2025 Skills Insight

Interact with others	1.1, 1.4, 1.5, 3.1, 3.2, 3.4, 5.3, 6.1	• Adjusts personal communication style in recognition of the values and experiences of others to build rapport • Cooperates and collaborates with others and contributes to activities requiring joint responsibility and accountability
Get the work done	1.1, 1.2, 1.3, 1.4, 1.6, 1.7, 2.1, 2.2, 3.3, 3.4, 4.1, 4.2, 4.3, 6.1, 6.2	• Uses systematic, analytical processes in complex, non-routine situations, gathering information, and identifying and evaluating options against agreed criteria • Organises work according to specific requirements taking some responsibility for decisions regarding the format of information • With guidance, reviews the effectiveness of solutions in relation to the set goals

Assessment Requirements for TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements

reviewing the assessment process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- competency-based assessment, including:
  - VET as a competency-based system
  - how competency based assessment differs from other types of assessment
  - competency standards as the basis of qualifications
  - structure and application of competency standards
  - the principles of assessment and how they are applied
  - the distinction between assessment tools and assessment instruments
  - the rules of evidence and how they are applied
  - the range of assessment purposes and assessment contexts, including RPL
  - different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
  - reasonable adjustments and when they are applicable
  - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
  - the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations in assessment activities
- current legislative requirements relevant to the assessor and the assessment process
- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for the use of relevant personal protective equipment
  - the safe use and maintenance of relevant equipment
  - sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS403 Participate in assessment validation

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor updates to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0*

Application

This unit describes the skills and knowledge required to participate in an assessment validation process.

It applies to assessors and workplace supervisors with assessment validation responsibilities participating in, but not necessarily leading, the process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for validation	1.1 Discuss and confirm the purpose, context and scope of the validation process within relevant assessment system policies and procedures 1.2 Arrange materials for validation activities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Check all documents used in the validation process for accuracy and version control 1.4 Analyse relevant units of competency and agree on the evidence needed to demonstrate competence
2. Participate in the validation of assessment tools	2.1 Demonstrate active and appropriate participation in validation sessions and activities using agreed communication methods and modes 2.2 Apply principles of assessment and rules of evidence during validation sessions and activities 2.3 Check that context and conditions of assessment include clear instructions for assessor and candidate and relate directly to the assessment conditions of the relevant unit 2.4 Check that tasks to be administered to the candidate include clear and concise instructions and an outline of evidence requirements 2.5 Check that assessment decision-making rules and benchmarks, are clear and enable consistent outcomes 2.6 Check that recording mechanisms are clear and allow for sufficient information to be recorded 2.7 Review and use assessment maps to assist in determining validity of assessment instruments
3. Contribute to validation outcomes	3.1 Discuss validation findings to support improvements in the quality of assessment in a collective environment 3.2 Discuss, agree and record recommendations to improve assessment practice

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.3, 2.4, 2.5, 2.6, 2.7	• Analyses and interprets relevant policies and procedures, benchmarks and validation materials
Writing	1.1, 3.2	• Records key information from the validation process accurately to meet requirements
Oral Communication	1.1, 1.4, 2.1, 2.2, 3.1, 3.2	• Communicates with others to confirm approaches, exchange ideas and information, articulate opinions, and reach agreement with others, using suitable tone, style and language
Navigate the world of work	1.1	• Identifies, confirms and takes responsibility for adherence to policies and procedures
Interact with others	1.1, 2.1, 2.2, 3.1, 3.2	• Collaborates with others and contributes to activities requiring joint responsibility and accountability
Get the work done	1.1, 1.2, 1.3, 1.4, 2.3, 2.4, 2.5, 2.6, 2.7, 3.2	• Organises and prioritises work commitments with a sense of what is achievable within the timeframe • Uses analytical processes in non-routine situations gathering information, and identifying and evaluating options against agreed criteria

Assessment Requirements for TAEASS403 Participate in assessment validation

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Updates to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- actively participating in a minimum of three validation sessions that address the critical aspects of validation
- clearly identifying the purpose for each validation, and the legal and ethical responsibilities of assessors
- collating and presenting documentation for each validation in a logical manner
- communicating and liaising with relevant people
- providing feedback and interpreting documentation in validation sessions
- recording their contribution to validation findings.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to determine the evidence needed to demonstrate competence in a competency-based environment
- the reasons for carrying out validation and different approaches to validation that may be appropriate before, during and after an assessment
- the components of assessment tools
- critical aspects of validation, including validation of assessment processes, methods and products
- how principles of assessment are addressed in validation

© Commonwealth of Australia, 2025 Skills Insight

- how rules of evidence are addressed in validation
- work health and safety legislation, codes of practice, standards and guidelines that impact on assessment
- obligations of an assessor under applicable legislation and/or standards, particularly in relation to validation activities.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- the texts and tasks usually found in the workplace
- units of competency and other materials used in validation sessions.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	materials for suitability and relevance, and seek assistance to interpret the contextual application 1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2 Follow the learning program and/or delivery plan to cover all learning objectives 2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training 2.4 Use delivery techniques to structure, pace and enhance learning 2.5 Apply coaching techniques to assist learning 2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7 Provide opportunities for practice during instruction and through work activities 2.8 Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge 3.2 Monitor learner progress and outcomes in consultation with the learner 3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs
4. Review personal training performance	4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2 Maintain, store and secure learner records, according to organisational and legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Learning	4.1	• Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	• Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	• Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	• Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	• Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes • Asks questions in order to clarify understanding, and to provide and seek feedback • Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	• Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to plan, organise and deliver training for individuals within a group.

It applies to a person working as an entry-level trainer, teacher or facilitator structuring a learning program developed by others in, or with, a training and assessment organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret learning environment and delivery requirements	1.1 Access, read, and interpret learning program documentation to determine delivery requirements 1.2 Use available information and documentation to identify group and individual learner needs, and learner characteristics 1.3 Identify and assess constraints, and risks to delivery

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm personal role and responsibilities in planning, and delivering training, with relevant personnel
2. Prepare session plans	2.1 Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2 Develop session plans and document these plans for each segment of the learning program 2.3 Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1 Contextualise learning materials to meet the needs of the specific learner group 3.2 Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3 Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1 Conduct each session according to the session plan, modified where appropriate to meet learner needs 4.2 Use the diversity of the group as another resource to support learning 4.3 Employ a range of delivery methods to optimise learner experiences 4.4 Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1 Monitor, and document, learner progress to ensure outcomes are being achieved, and individual learner needs are being met 5.2 Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3 Manage inappropriate behaviour to ensure that learning can take place 5.4 Maintain and store learner records according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.1, 5.1	• Access, read and interpret documentation relevant to the learning context, including program documents, learning materials, policies and procedures relevant to the context
Writing	2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 5.1, 5.2, 5.4	• Develops and maintains workplace documentation accurately and in response to required needs
Oral Communication	1.2, 1.3, 4.1, 4.3, 4.4	• Uses communication techniques to build rapport and explore requirements • Facilitates training in an appropriate style for both individuals and groups
Navigate the world of work	1.4, 5.4	• Recognises and follows organisational protocols, policies and procedures relevant to own role
Interact with others	1.4, 3.3, 4.4, 5.3	• Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm that outcomes meet requirements • Recognises inappropriate behaviours and the potential for conflict, and implements strategies to maintain an appropriate learning environment
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.4, 5.1-5.4	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to problems and opportunities for improvement and considers options for different approaches • Uses information and communications technology (ICT) based tools to access, organise, analyse and display information relevant to role

Assessment Requirements for TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete the tasks outlined in the elements and performance criteria of this unit, including:

- facilitating group-based learning by preparing and delivering at least three training sessions, including:
  - at least two consecutive sessions of at least 40 minutes duration, that follow one of the learning program designs, to a learner group of at least eight individuals
  - at least one session delivered to a learner group of at least eight individuals, with evidence of how the characteristics and needs of this group were addressed
- identifying and responding to individual needs
- accessing and using documented resources, and any support personnel required to guide inclusive practices.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learning theories and principles
- resources available to identify different learner styles
- the relevant industry area and subject matter of the delivery
- the learner group profile, including characteristics and needs of individual learners in the group
- the requirements of the learning program and/or delivery plan, and the content purpose
- different delivery methods and techniques appropriate to face-to-face group delivery

© Commonwealth of Australia, 2025 Skills Insight

- different techniques for the recognition and resolution of inappropriate behaviours
- behaviours that may indicate learner difficulties, and the methods used to address these difficulties
- the purpose of organisational record-management systems and reporting requirements
- evaluation and revision techniques used to improve session plans
- specific resources, equipment and support services available for learners with special needs
- assessment and risk control measures relating to the facilitation of group-based learning
- policies and procedures relevant to the learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to learning program designs in use in the learning environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish effective work environment for learning	1.1 Establish, and agree upon, the objectives and scope of the work-based learning 1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning
2. Develop a work-based learning pathway	2.1 Address contractual requirements and responsibilities for learning at work 2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway 2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1 Identify the context for learning and the individual's learning style 3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner 3.3 Develop, document and discuss an individualised learning plan with the learner 3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment 3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement the work-based learning pathway	4.1 Explain the objectives of work-based learning, and the processes involved, to the learner 4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.3 Encourage learner to take responsibility for learning and to self-reflect 4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge
5. Maintain and develop the learning-facilitation relationship	5.1 Prepare for each session 5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum 5.4 Practise ethical behaviour at all times 5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
6. Close and evaluate the learning-facilitation relationship	6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship 6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 6.4 Recommend improvements to work-based practice in light of the review process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 3.1, 3.4, 3.5, 6.3	• Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace, in the context of consultation and continuous improvement, to apply relevance to requirements
Writing	1.1, 2.3, 3.3, 4.1, 6.3	• Develops and maintains documentation relevant to workplace learning, including learning plans and evaluations, in accordance with organisational and workplace requirements
Oral Communication	2.2, 3.3, 4.2, 5.5, 6.1	• Uses oral communication techniques to identify needs, build rapport, agree on learning plans, facilitate effective learning and monitor practice • Selects appropriate vocabulary adjusting language, tone and pace to maintain effective interactions, and to build and maintain engagement with individuals or groups
Navigate the world of work	1.3, 2.1, 5.4	• Follows organisational protocols, policies and procedures in the management of records • Recognises and responds to contractual and ethical requirements associated with own role
Interact with others	1.1, 2.3, 3.5, 4.3, 6.2	• Asks questions to clarify understanding, and seeks feedback and further information • Cooperates and collaborates with others as part of

© Commonwealth of Australia, 2025 Skills Insight

		routine activities to achieve team results, and to confirm outcomes meet requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.3, 5.5, 6.1-6.3	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs • Identifies and responds to problems and opportunities for improvement, considering options for different approaches • Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks

Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
  - with at least two individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes, or techniques, identified.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways

© Commonwealth of Australia, 2025 Skills Insight

- workplace health and safety (WHS) relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of WHS information.
  -

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES401 Design and develop learning programs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine its design, outline the content, and review its effectiveness.

It applies to trainers or facilitators who work under limited supervision to design, or develop, learning programs that are discrete, and provide a planned learning approach that relates to specific learning and training needs, or part of the learning design for a qualification.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define the parameters	1.1 Clarify the purpose and type of learning program with key

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
of the learning program	stakeholders 1.2 Access and confirm the competency standards, and other training specifications, on which to base the learning program 1.3 Identify language, literacy and numeracy requirements of the program 1.4 Identify and consider characteristics of the target learner group
2. Work within the VET policy framework	2.1 Access relevant vocational education and training (VET) policies and frameworks, and apply to work practices 2.2 Identify changes to training packages and accredited courses, and apply these to program development 2.3 Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1 Research, develop and document specific subject matter content, according to agreed design options 3.2 Evaluate existing learning resources for content relevance and quality 3.3 Specify assessment requirements of the learning program
4. Design the structure of the learning program	4.1 Break the learning content into manageable segments, and document the timeframe for each segment 4.2 Determine and confirm delivery strategies, required assessment methods and tools 4.3 Document the complete learning program in line with organisational requirements 4.4 Review the complete program with key stakeholders, and adjust as required 4.5 Ensure a safe learning progression by analysing risks in the learning environment, and including a risk control plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.2, 4.4, 4.5	• Interprets specific information and instructions from a range of sources, to identify relevance to requirements
Writing	1.1, 3.1, 3.3, 4.1, 4.2, 4.3, 4.4, 4.5	• Develops documents and content using the required format, accurate spelling, and grammar and terminology specific to the purpose and audience
Oral Communication	1.4	• Uses appropriate language, questioning and listening techniques to provide and elicit information, confirm understanding and explore others' views.
Numeracy	4.1	• Interprets familiar measurements relating to timeframes and compares against requirements
Navigate the world of work	4.3	• Follows organisational protocols, policies and procedures regarding program documentation
Interact with others	1.1, 1.2, 4.2, 4.4	• Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.5	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to potential risks, considering options for different approaches • Uses information and communications technology (ICT) based tools to conduct research, design work processes, and to complete work tasks

Assessment Requirements for TAEDES401 Design and develop learning programs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- designing, developing and reviewing learning programs within the vocational education and training (VET) context
- preparing and developing a minimum of two learning programs:
- that contain differentiated learning program designs to reflect particular needs, contexts and timelines

at least one of which must be based on competency standards or accredited courses, and must cover at least one entire unit of competency or accredited course module.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- the distinction and relationship between a training package/accredited course, learning strategy and learning program
- the different purposes and focus of learning programs

© Commonwealth of Australia, 2025 Skills Insight

- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials, and pre-developed learning activities
- methodologies relating to developing and documenting new learning activities, and related learning materials
- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation, that may affect training and assessment in the VET sector
- describe relevant workplace health and safety (WHS) knowledge relating to the work role, and WHS considerations that need to be included in the learning program.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to competency standards or accredited courses relevant to the learning programs.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES402 Use training packages and accredited courses to meet client needs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to use training packages and accredited courses as tools to support industry, organisation and individual competency development needs.

It applies to individuals who are working in or with training and/or assessment organisations as an entry-level trainer, teacher, facilitator or assessor using a pre-defined training product, such as a training package or accredited course.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select appropriate training package or	1.1 Confirm the training and/or assessment needs of the client 1.2 Identify and source training packages, qualifications and/or

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
accredited course	accredited courses that could satisfy client needs 1.3 Use training products in line with vocational education and training (VET) sector requirements, and the training and assessment organisation's quality assurance policies and procedures
2. Analyse and interpret the qualifications framework	2.1 Read and interpret the qualification framework, and packaging rules of the identified qualification 2.2 Review and determine applicable licensing requirements and prerequisites 2.3 Determine suitable electives that meet client needs and job roles
3. Analyse and interpret units of competency and accredited modules	3.1 Select skill set, individual unit or accredited module to meet client needs and document reasons for selection 3.2 Read, analyse and interpret all parts of each selected unit, or accredited module, for application to client needs 3.3 Analyse links between the units, and/or accredited modules, to develop effective applications for the client
4. Contextualise units and modules for client applications	4.1 Use information from the client to contextualise units, or accredited modules, to meet client needs 4.2 Use advice on contextualisation produced by the training package developer or course developer to meet client needs
5. Analyse and interpret assessment information	5.1 Read and analyse the assessment information of the relevant training package or accredited course 5.2 Provide appropriate advice to the client about assessment requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.2,	• Sources, analyses and interprets information, to identify relevance to client needs

© Commonwealth of Australia, 2025 Skills Insight

	3.3, 4.2, 5.1, 5.1	
Writing	3.3, 3.4, 4.1, 4.2, 5.1, 5.2	• Prepares information that incorporates the interpretation and analysis of information, using appropriate language in a format and style suited to the audience and context
Oral Communication	1.1, 4.1, 5.2	• Uses appropriate communication techniques to provide and elicit information, confirm understanding and communicate conclusions
Navigate the world of work	1.3	• Follows organisational protocols, policies and procedures regarding quality assurance
Interact with others	1.1	• Recognises the importance of consultation and negotiation to confirm client needs
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1, 4.2, 5.1, 5.2	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to problems and opportunities for improvement and innovation, and considers options for different approaches • Uses information and communications technology (ICT) based tools to conduct research, design work processes, and to complete work tasks

Assessment Requirements for TAEDES402 Use training packages and accredited courses to meet client needs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- analysing a training package and/or accredited course, to examine its component parts, identify relevant qualifications and units of competency or modules, and contextualise those to meets the specific needs of one client
- demonstrate a minimum of two examples of analysing training specifications, including at least one training package; the other may be another training package or an accredited course that meets a specific client need.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of the:

- Australian Qualifications Framework (AQF) guidelines, including characteristics of AQF qualification types
- functions and responsibilities of training package developers, and course accreditation agencies, and their roles as key vocational education and training (VET) organisations
- dimensions of competency
- format and structure of accredited courses
- format and structure of units of competency, and assessment requirements
- function of training packages and accredited curriculum as benchmarks in a competency-based VET training and assessment system

© Commonwealth of Australia, 2025 Skills Insight

- methodology relating to analysing and using competency standards for a range of applications and purposes, to meet the needs of a diverse range of VET clients
- terminology used in training packages and accredited courses
- parts of training packages that can be contextualised and parts that cannot
- Standards for Training Packages, including the role and purpose of each endorsed component
- non-endorsed components of training packages
- sources of training package information.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- training package components developed to meet the Standards for Training Packages, and those developed to meet the requirements of the Training Package Development Handbook.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to pick and process orders in accordance with relevant codes, regulations and workplace requirements within the transport and logistics industry.

It includes identifying workplace order picking processes, policies and procedures; picking and despatching orders; and recording stock levels.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify workplace order picking processes, policies	1.1 Workplace procedures for order picking and related workplace documentation are interpreted
	1.2 Stock allocation and location systems are identified and

© Commonwealth of Australia, 2025 Skills Insight

	and procedures		located
		1.3	Appropriate manual handling equipment is selected in accordance with work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
2	**Pick and despatch an order**	2.1	Work requirements are planned and appropriate equipment and documentation is assembled
		2.2	Warehouse zones where required products are stored, are identified and located
		2.3	Pick path is established
		2.4	Appropriate pallet/s for orders are selected and stacked to minimise stock damage and to maximise stability, as required
		2.5	Products are selected and consolidated
		2.6	Products/pallets are located in despatch areas
		2.7	Products are assembled to meet workplace schedules
		2.8	Orders are consolidated, secured, arranged and placed in storage zones in accordance with schedules
3	**Record stock levels**	3.1	Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures
		3.2	Workplace records are completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit replaces and is equivalent to TLIA2012A Pick and process orders.

Assessment Requirements for TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when picking and processing orders
- completing documentation related to picking and processing orders
- estimating the size, shape and special requirements of goods/loads
- identifying relevant stock and goods coding and labelling, including Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting, and following instructions, procedures, signs and labels relevant to picking and processing orders
- selecting and using relevant equipment and communications technology when picking and processing orders
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- documentation and record requirements when picking and processing an order
- equipment used during picking and processing operations and the precautions and procedures to be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for picking and processing orders
- problems that may occur when picking and processing an order and appropriate action that can be taken to resolve these problems
- regulations relevant to picking and processing orders, including relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for picking and processing orders.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIA3015 Complete receival/despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete receival/despatch documentation in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIA3015 Complete receival/despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing receival and despatch documentation
- estimating size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) Code markings and emergency information panels
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant computer, communications and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and International Standards, codes and regulations relevant to completing receival/despatch documentation, including current ADG Code and relevant bond, quarantine or other legislative requirements
- documentation requirements for receiving and despatching goods
- focus of operation of work systems, equipment, management and site operating systems for receiving and despatching goods
- housekeeping standards and procedures
- problems that may occur when completing receival and despatch documentation and

© Commonwealth of Australia, 2025 Skills Insight

appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- site layout and obstacles
- specifications and standards for checking and inspecting received and despatched goods
- workplace procedures and policies for completing receival/despatch documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA3016 Use inventory systems to organise stock control

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use inventory systems to organise stock control in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes identifying inventory and stock control systems in use in the workplace, using re-order procedures to maintain stock levels, organising cyclical stock counts and reporting discrepancies or variances.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify inventory	1.1 Workplace inventory and stock control equipment, software

	and stock control systems in use in the workplace		and systems are identified
		1.2	Reasons for common database approach to inventory records and documentation in the warehouse are explained
		1.3	Procedures for identifying and reporting discrepancies or variances are identified
2	**Use re-order procedures to maintain stock levels**	2.1	Stock level maintenance checking is conducted
		2.2	Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures
		2.3	Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures
3	**Organise cyclical stock counts and report discrepancies or variances**	3.1	Process for cyclical stock count is planned and work is allocated to team members
		3.2	Clear directions on tasks to be performed are given
		3.3	Stocktake activities are conducted in accordance with workplace procedures
		3.4	Types and causes of record discrepancies are identified
		3.5	Procedures for noting and correcting minor discrepancies are used
		3.6	Major discrepancies are reported in accordance with workplace procedures
		3.7	Workplace documentation is completed
4	**Produce reports on record keeping and inventory functions**	4.1	Types of reports to be produced from inventory records systems are identified
		4.2	Reports are produced in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIA3016 Use inventory systems to organise stock control

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and using relevant communications, computing and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- applications of different types of inventory systems and stock management approaches
- Australian codes and regulations relevant for organising stock control
- computer records and documentation requirements for stock control, including forms, checklists and inventory reports
- housekeeping standards and procedures
- operational inventory systems, equipment, management and site operating systems for controlling stock
- principles of operation and functions of inventory systems
- workplace procedures and policies for using inventory systems to organise stock control
- workplace processes for records management and producing inventory reports.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Resources for assessment include:
- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIA3018 Organise despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise despatch operations in accordance with codes/regulations and workplace requirements in the transport and logistics industry.

It includes planning and organising despatch operations, organising the storage and despatch of stock, and completing all required documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan and organise despatch operations	1.1 Knowledge of product characteristics and workplace procedures are applied to stock analysis

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Resources including manual handling equipment, employee competencies, storage areas and goods management equipment are identified to match product characteristics
	1.3 Deadlines are scheduled to meet order requirements
	1.4 Work processes are planned to meet deadlines
2 Organise the storage and despatch of stock	2.1 Employees, equipment and storage areas are allocated and supervised
	2.2 Individuals are informed of work requirements and deadlines
	2.3 Work processes are monitored to ensure that human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
	2.4 Stock discrepancies are noted and reported in accordance with company procedures
3 Complete documentation	3.1 Required despatch documentation and records are confirmed
	3.2 Required despatch documentation and records are completed clearly and proofread
	3.3 Required despatch documentation and records are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for TLIA3018 Organise despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- estimating size, shape and special requirements of goods and loads
- identifying relevant stock and goods coding and labelling, including Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment and communications technology
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- documentation and record requirements for despatch operations
- equipment used when organising despatch operations, and the precautions and procedures that should be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for organising despatch operations
- problems that may occur and appropriate action that can be taken to resolve these problems
- regulations relevant for organising despatch operations, including the ADG Code and relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for organising despatch operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA3038 Control and order stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to control and order stock for a workplace store in accordance with relevant codes of practice, regulations and workplace procedures.

It specifically covers maintaining stock levels and records, organising and administering stocktakes, identifying stock losses, processing stock orders and following up orders.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Maintain stock levels	1.1 Stock levels are monitored and maintained at levels

© Commonwealth of Australia, 2025 Skills Insight

and records		prescribed by workplace specifications
	1.2	Stock security systems are monitored and adjusted as required
	1.3	Stock re-order cycles are maintained, monitored and adjusted as required
	1.4	Colleagues are informed about their individual responsibilities for recording stock
	1.5	Stock storage and movement records are maintained in accordance with workplace procedures
	1.6	Stock performance is monitored and fast/slow moving items are identified and reported in accordance with workplace procedures
2 Organise and administer stocktakes	2.1	Stocktakes are organised at the appropriate time and responsibilities are allocated to staff
	2.2	Accurate reports on stocktake data are produced within designated timelines
3 Identify stock losses	3.1	Losses are accurately identified, recorded and assessed against potential loss as forecast, on a regular basis
	3.2	Identified losses are reported in accordance with workplace procedures
	3.3	Avoidable losses are identified, reasons are established, and appropriate solutions are recommended and implemented to prevent future avoidable losses
4 Process stock orders	4.1	Orders for stock are accurately processed in accordance with workplace procedures
	4.2	Stock ordering and recording systems are accurately maintained
	4.3	Purchase and supply agreements are correctly used and appropriate details are recorded
	4.4	Negotiated purchase and supply agreements are recorded accurately and filed for retrieval
5 Follow up orders	5.1	Delivery process is monitored to meet agreed deadlines
	5.2	Appropriate liaison is undertaken with colleagues and suppliers to ensure continuity of supply

© Commonwealth of Australia, 2025 Skills Insight

	5.3 Routine supply problems are followed up or referred to the appropriate person in accordance with workplace policy
	5.4 Stock is distributed in accordance with agreed allocations
6 Complete documentation	6.1 Required records and documentation are confirmed
	6.2 Required records and documentation are completed clearly and proofread
	6.3 Required records and documentation are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLIC2002 Drive light rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a light rigid vehicle safely, in accordance with relevant state/territory roads and traffic authority licence requirements and regulations for light rigid vehicles.

It includes systematic and efficient control of all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial light rigid vehicle across a variety of driving contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Drive light rigid vehicle	1.1 Light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions
	1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
	1.3 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.4 Light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
	1.5 Light rigid vehicle is parked, shut down and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
	1.6 Appropriate procedures are followed in a driving emergency
2 Monitor traffic and road conditions	2.1 Most efficient route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through vehicle pre-operational inspections and checks
	3.2 Performance and efficiency of vehicle operation is monitored during use
	3.3 Defective or irregular performance or malfunctions are reported to appropriate authority
	3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Assessment Requirements for TLIC2002 Drive light rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- carrying out pre-operational checks on vehicle
- completing relevant documentation
- demonstrating low-risk driving behaviours
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating traffic hazards and taking appropriate action
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related action that can be taken
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term fatigue management

© Commonwealth of Australia, 2025 Skills Insight

- light rigid vehicle controls, instruments and indicators and their use
- light rigid vehicle handling procedures
- map reading and road navigation techniques including using a global positioning system (GPS) device as required
- pre-operational checks carried out on vehicle and related action
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory road traffic authority.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIC3003 Drive medium rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a medium rigid vehicle safely in accordance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to medium rigid vehicles.

It includes systematically and efficiently controlling vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of vehicles include all medium rigid vehicles, for example any 2-axle rigid vehicle, including trucks and buses greater than 8 tonnes gross vehicle mass (GVM).

Driving is performed with limited or minimum supervision, within duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIC3004 Drive heavy rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- carrying out pre-operational checks
- completing relevant documentation
- demonstrating low-risk driving behaviours
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle and its equipment, and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related action that can be taken
- fatigue management strategies and on-road techniques
- heavy rigid vehicle controls, instruments and indicators, and their use

© Commonwealth of Australia, 2025 Skills Insight

- heavy rigid vehicle handling procedures
- lifestyles that promote the effective long-term fatigue management
- pre-operational checks carried out on heavy rigid vehicle and related action
- principles of operation of air brakes and procedures for their use
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory road traffic authority.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIC3005 Drive heavy combination vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a heavy combination vehicle safely.

It includes maintaining systematic and efficient control of all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, coupling and uncoupling a trailer, and effectively managing hazardous situations.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence requirements and regulations for heavy combination vehicles.

Driving is performed with limited supervision, and duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1 Drive heavy combination vehicle	1.1	Heavy combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions
	1.2	Engine power is managed to ensure efficiency and performance, and to minimise engine and gear damage
	1.3	Engine operation is maintained within the manufacturer specified torque range and temperature, through effective gear selection and smooth transition in gear changes
	1.4	Heavy combination vehicle braking system is managed and operated to ensure effective vehicle control under all conditions
	1.5	Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.6	Heavy combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
	1.7	Heavy combination vehicle is parked, uncoupled, shut down and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
	1.8	Over width and overweight permit applications are completed and submitted in accordance with relevant regulatory requirements as required
	1.9	Appropriate signage and lights are checked for operational effectiveness and for conformity to prescribed traffic regulations
	1.10	Appropriate procedures are followed in a driving emergency
2 Monitor traffic and road conditions	2.1	Most efficient route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2	Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment loads and facilities
3 Monitor and maintain vehicle	3.1	Vehicle performance is maintained through pre-operational inspections and vehicle checks

© Commonwealth of Australia, 2025 Skills Insight

performance	3.2	Prime mover and trailer are aligned and coupled in accordance with manufacturer instructions and workplace procedures
	3.3	Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm it is fully operational
	3.4	Performance and efficiency of vehicle operation is monitored during use
	3.5	Defective or irregular performance or malfunctions are reported to appropriate authority
	3.6	Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3005A Drive heavy combination vehicle.

TLIC3063 Operate vehicle carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to safely operate a vehicle carrying a special load in accordance with road traffic authority and other relevant government regulations and company policies, and to effectively manage hazardous situations.

It involves carrying out pre-operational checks, driving a vehicle carrying special loads, and applying routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations and specific regulatory and permit requirements for the special load being carried.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Carry out pre-operational checks	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Pre-operational checks for special purpose vehicle and associated ancillary equipment are carried out in accordance with manufacturer requirements, government regulations, and workplace policies and procedures
	1.3 Faults and defects identified during checks are repaired or reported in accordance with workplace procedures
2 Drive a vehicle carrying special loads	2.1 Vehicle is manoeuvred in accordance with regulations/permit requirements for vehicle class involved and load being carried
	2.2 Vehicles carrying explosives or dangerous goods are driven along designated routes in accordance with relevant codes, government regulations and workplace policies
	2.3 Load is transported and vehicle is manoeuvred in accordance with required precautions relating to load unusual/special characteristics and/or relevant government regulations for special load including the current Australian Dangerous Goods (ADG) Code and the current Australian Code for the Transport of Explosives by Road and Rail
	2.4 Signs, placards or indicators are fixed to vehicle as required
	2.5 Appropriate procedures are followed for load concerned in a driving emergency
	2.6 Documentation is completed and proofread in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIC3063 Operate vehicle carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle, its equipment and load, and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing vehicle and its equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related action that can be taken by a driver
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term fatigue management
- map reading and road navigation techniques
- pre-operational checks carried out on vehicle and related action
- procedures to be followed in a driving emergency
- relevant Australian regulations and codes of practice for handling and transporting dangerous goods and hazardous substances, including the current Australian Dangerous Goods (ADG) Code and the current Australian Code for the Transport of Explosives by Road and Rail
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- vehicle controls, instruments and indicators, and their use
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Practical assessment must be in vehicles designed to carry special loads, for example concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier, recovery vehicle.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

© Commonwealth of Australia, 2025 Skills Insight

requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIC4006 Drive multi-combination vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a multi-combination vehicle safely, including maintaining systematic and efficient control of all vehicle functions, coupling and uncoupling dollies, monitoring traffic and road conditions, managing vehicle condition and performance and effectively managing hazardous situations.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence requirements and regulations for multi-combination vehicles.

Driving is performed with limited supervision, and duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads, in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific code, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Load and unload vehicle	**1.1** Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
	1.2 Hazardous and specialised cargo including powders,

© Commonwealth of Australia, 2025 Skills Insight

			raw grain product and controlled waste are identified and handled in accordance with required workplace procedures, work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and regulated requirements
		1.3	Vehicle is loaded in consultation with relevant documentation and personnel in accordance with vehicle loading regulations and workplace safety requirements
		1.4	Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.5	Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.6	Ancillary equipment is operated in accordance with workplace procedures and manufacturer instructions during loading and unloading operations
2	**Secure and protect vehicle and load**	**2.1**	Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions
		2.2	Load is protected in accordance with legal and workplace safety requirements
		2.3	Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity
		2.4	Loaded vehicle is inspected and checked for security to travel
3	**Complete documentation**	**3.1**	Documentation is completed and proofread in accordance with workplace procedures
		3.2	All required cargo transportation documentation is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating and working collaboratively effectively with others when loading and unloading special loads
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and correctly using load handling equipment when loading and unloading hazardous cargo and specialised cargo including:
  - powders
  - raw grain product
  - controlled waste
- identifying and interpreting containers and goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of relevant documentation
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment and conforming to industry and work health safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) standards
- using manual handling techniques safely

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

© Commonwealth of Australia, 2025 Skills Insight

the requirements of the elements and performance criteria and include knowledge of:

- characteristics of special loads including:
  - powders
  - raw grain product
  - controlled waste
- containers and goods coding, IMDG Code markings and emergency information panels, including their meaning and implications for loading and unloading processes
- housekeeping standards and procedures
- methods for securing special loads
- national Load Restraint Guide (LRG)
- relevant state/territory mass and loading regulations for special loads, including current Australian Dangerous Goods (ADG) Code and Australian Code for the Transport of Explosives by Road and Rail
- risks and hazards when loading and unloading special loads, and related precautions to control the risk
- site layout considerations and obstacles to unloading operations
- WHS/OHS/OSH procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national LRG, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Assess risks associated with	1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

© Commonwealth of Australia, 2025 Skills Insight

relocating load	1.2	Storage locations are determined and potential routes to be followed are identified
	1.3	Effect of load relocation on original load base is predicted
	1.4	Points of balance are estimated
	1.5	Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
	1.6	Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
	1.7	Risks in potential routes are considered
	1.8	Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
	1.9	Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
	1.10	Team lifting processes are considered when moving loads
	1.11	Appropriate personal protective equipment is determined
	1.12	Size to weight ratio of items to be manually handled are identified
2 Plan load relocation	2.1	Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
	2.2	Process for relocating load is proposed including predicting and planning for potential difficulties
	2.3	Proposed process is checked for compliance with code of practice and workplace procedures
3 Relocate load	3.1	Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
	3.2	Applications appropriate for team relocation of load are identified
	3.3	Team lifting tasks are coordinated
	3.4	Planned process and route are followed

© Commonwealth of Australia, 2025 Skills Insight

3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability

3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
- controlled actions on a movement during lifting
- distance over which load is to be shifted
- frequency of shifting operations
- load on the spine during lifting
- postures and positions during lifting
- rotation and side movement of the spine during lifting
- time allowed for shifting the load
- type, weight and position of the load
- work layout
- site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Load and unload goods/cargo**	1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
		1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
		1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
		1.4 Load is packed/unpacked to make safe and effective use of available spaces
		1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
		1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
		1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
2	**Secure and protect load**	2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
		2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
		2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
		2.4 Load is protected in accordance with legal and workplace safety requirements
3	**Complete**	3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

© Commonwealth of Australia, 2025 Skills Insight

documentation		and current ADG Code, as required
	3.2	All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2004A Load and unload goods/cargo.

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national Load Restraint Guide (LRG), codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by driver
	1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures
3 Operate forklift to handle loads	3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
	3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures
4 Monitor site conditions	4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
	4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

© Commonwealth of Australia, 2025 Skills Insight

5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use
	5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
	5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLID2012 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with codes, permits, workplace requirements and relevant regulatory requirements, as part of work undertaken in the stevedoring, transport, warehousing and logistics industries.

It includes planning work for current working conditions; using controls and equipment operating systems to manage moving the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work for current working conditions	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Traffic flow and work area conditions are constantly assessed and anticipated to ensure no injury to people, or damage to equipment, loads or facilities
	1.3 Load characteristics are taken into account to ensure appropriate attachments are used to transport load as required
	1.4 Safe working load (SWL) or working load limit (WLL) is calculated
	1.5 Occurrences in work area that affect safety and efficiency of operations are reported to appropriate personnel
2 Use controls and equipment operating systems to manage moving unit and accessory operations	2.1 Equipment is prepared and appropriate attachment is fitted
	2.2 Gear and operational levers are checked to ensure they are in neutral position prior to inserting ignition key and starting engine
	2.3 Engine is started in accordance with manufacturer guidelines to bring engine up to speed
	2.4 Instruments and gauges are monitored during start up and operations to ensure operation is within manufacturer specifications and workplace procedures
	2.5 Engine power is managed to ensure efficiency of equipment movement and economy of equipment operations
	2.6 Equipment operations are conducted in accordance with manufacturer specified torque range
	2.7 Faults or damage to equipment are immediately reported to appropriate personnel in accordance with workplace procedures
3 Locate load and identify load characteristics	3.1 Load is located and identified in accordance with workplace procedures
	3.2 Loading and unloading plans are followed to ensure efficiency and safety of operations
	3.3 Load characteristics are taken into account to ensure appropriate loading and unloading workplace procedures are

© Commonwealth of Australia, 2025 Skills Insight

			followed
		3.4	Hazardous goods are identified and relevant procedures are taken into account when planning and conducting work
		3.5	Load weight and dimensions are established within equipment capacity
4	**Move materials and loads**	4.1	Equipment is manoeuvred and positioned using smooth and controlled movements
		4.2	Manoeuvres are made within equipment limits and in accordance with manufacturer specifications
		4.3	Materials are moved ensuring no injury to personnel or damage to equipment or goods
5	**Monitor and operate controls**	5.1	Equipment controls are monitored and operated in accordance with manufacturer operating instructions
		5.2	Control systems are interpreted and acted on in accordance with statutory authority regulations, manufacturer guidelines and site workplace procedures
		5.3	Control faults are identified and reported in accordance with manufacturer instructions and workplace guidelines
6	**Stop, park and secure equipment**	6.1	Equipment is brought to a controlled halt in accordance with manufacturer guidelines
		6.2	Equipment is parked without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures
		6.3	Equipment is secured on a flat, even surface, clear of doorways, aisles, access ways or blind corners in accordance with securing procedures for appropriate equipment
		6.4	Problems, faults or malfunctions are reported and/or rectified in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLID2012 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of specialised load shifting equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- planning own working, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- selecting and using relevant gear and accessories
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- conveyed material potential for toxicity, reactiveness, material grade, type and purpose including information from relevant safety data sheets (SDSs)/material safety data sheets (MSDSs) and current Australian Dangerous Goods (ADG) Code documentation
- documentation, record requirements and housekeeping standards including:
  - relevant permit and licence requirements
  - site layout and obstacles
- operational safety requirements and precautions for specialised load shifting equipment concerned
- operational work systems, equipment, management and site operating systems for operating specialised load shifting equipment
- problems that may occur and appropriate action that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of specialised load shifting equipment
- relevant regulations for operating specialised load shifting equipment, including current ADG Code and relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for operating specialised load shifting equipment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, low level order pickers, conveyor systems and mechanised pallet movers.

It includes selecting appropriate mechanical moving equipment, moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning moving materials mechanically using automated equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Select load moving equipment	1.1 Mechanised handling equipment, route to be taken and procedures to be used are selected appropriate to goods characteristics
	1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, WHS/OHS requirements and workplace procedures
2 Move goods	2.1 Hazards are identified, risks are assessed and control measures are implemented
	2.2 Goods are moved using selected materials handling equipment in accordance with WHS/OHS regulations, manufacturer instructions and workplace procedures
	2.3 Problems moving goods and materials using automated equipment are identified and reported in accordance with workplace procedures
3 Check goods and complete documentation	3.1 Relocated goods are inspected for possible damage during transit/movement and appropriate action is taken
	3.2 Appropriate documentation is completed to track moved goods in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- ensuring servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- implementing contingency plans
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of automated equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for using automated equipment to move materials mechanically
- problems that may occur and appropriate action that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of automated materials moving equipment
- relevant regulations, workplace procedures and policies for using automated equipment to move materials mechanically
- relevant WHS/OHS and environmental protection procedures and guidelines
- risks when using automated equipment to move materials and related precautions to control the risks
- site layout and obstacles.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

TLID2047 Prepare cargo for transfer with slings

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare cargo for the transfer with slings in accordance with workplace requirements and relevant regulatory requirements, within the transport and logistics industry.

It includes preparing for cargo transfer, calculating safe working load (SWL) or working load limit (WLL) of slings and loads, slinging and unslinging cargo, and strapping and unstrapping goods.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated high risk work licence requirements and to comply with relevant codes of practice and/or guidelines.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare cargo transfer	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Working area is prepared and maintained in accordance with national standards, safety codes and site operating procedures
	1.3 Unsafe work practices and/or faulty equipment is reported in accordance with enterprise procedures
	1.4 Correct protective equipment is identified and worn/used
2 Calculate safe working load or working load limit of slings and loads	2.1 SWL or WLL is calculated using standardised formulae for different types of lifting cables
	2.2 Lifting equipment is checked to determine SWL
	2.3 Slinging gear is checked for conformity with safety equipment
3 Sling and unsling cargo	3.1 Cargo is slung/unslung in accordance with national standards, safety codes and site operating procedures
	3.2 Correct securing devices are identified and used
	3.3 Load is steadied by tag lines as required
	3.4 Damaged cargo is identified and reported in accordance with enterprise procedures
	3.5 Slinging attachments are released from load ensuring no injury to personnel or damage to machinery or cargo
4 Strap and unstrap goods	4.1 Cargo is strapped and unstrapped in accordance with national standards, safety codes and site operating procedures
	4.2 Mechanical strapping equipment is used in accordance with manufacturer instructions
	4.3 Damaged cargo is identified and reported in accordance with enterprise reporting procedures
	4.4 Strapping arrangements are secured/released to/from load ensuring no injury to personnel or damage to machinery or

Assessment Requirements for TLID2047 Prepare cargo for transfer with slings

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant high risk work legislation and workplace procedures
- calculating safe working load (SWL) and working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- inspecting equipment prior to use
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant gear and equipment when preparing cargo for transfer with slings
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using balance points and estimating weights in setting up loads to be shifted
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- cargo potential for toxicity, reactiveness, material grade, type and purpose including information from relevant safety data sheets (SDSs)/material safety data sheets (MSDSs) and current Australian Dangerous Goods (ADG) Code documentation
- documentation and record requirements
- gear and equipment used when transferring cargo with slings, and precautions and procedures that should be followed in their use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating procedures for transferring cargo with slings
- problems that may occur when preparing cargo for transfer with slings and appropriate action that can be taken to resolve these problems
- relevant regulations for transferring cargo with slings, including current ADG Code and bond, quarantine and other high risk work legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- requirements for SWL and WLL
- slings, dogging and rigging licence to perform high risk work requirements
- site layout and obstacles
- workplace procedures and policies for transferring cargo with slings.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and

TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, in accordance with relevant state/territory high risk work licence requirements and regulations, in a variety of operational contexts.

It includes checking attachments and worksite for suitability, selecting type of forklift and accessories for required workplace task, shifting load and completing work in accordance with operational requirements.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift

A person who operates a forklift must hold a high risk work licence.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check attachments and worksite for suitability	1.1 Suitable work area is selected for operations
	1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.3 Work area is checked for overhead obstructions and proximity to service delivery lines
	1.4 Barriers or warning signs are erected in areas subject to passing traffic
	1.5 Attachments and platforms are securely fixed to carriage or tines
	1.6 Personnel support platforms are inspected to ensure accordance with relevant Australian Standard/s
2 Select type of forklift and accessories for required workplace task	2.1 Special equipment, accessories or attachments are identified to match load characteristics and work requirements
	2.2 Appropriate specialised equipment is selected
	2.3 Existing attachments are removed and stored in accordance with workplace procedures
	2.4 Specialised equipment is fitted in accordance with manufacturer instructions and workplace procedures
	2.5 Designated staff are notified about specialist operations
3 Shift load and complete work	3.1 Equipment is operated within safe working limits and to maximise efficiency of operations
	3.2 Load is lifted, carried and set down in accordance with workplace and manufacturer procedures, and regulatory requirements
	3.3 Documentation is completed damage or faults to goods or equipment are reported to appropriate personnel
	3.4 Specialist equipment and forklift are returned to appropriate storage/parking area

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3011A Conduct specialised forklift operations.

Assessment Requirements for TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes during work activities
- checking forklift compliance plate for safe weight limits
- communicating effectively with others
- completing relevant documentation
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- handling procedures for forklifts involved in specialised operations
- high risk work licence workplace requirements
- operating hazards, and related defensive driving and hazard control techniques
- pre-operational checks carried out on forklift and accessories, and related action
- procedures to be followed in an operational emergency
- relevant duty of care requirements for specialised operation of a forklift
- relevant WHS/OHS and environmental procedures and regulations
- safe weight limits
- site layout and obstacles
- types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID3014 Load and unload vehicles carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads, in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific code, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Load and unload vehicle**	1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
		1.2 Hazardous cargo is identified and handled in accordance with required workplace procedures for hazardous and dangerous cargo
		1.3 Vehicle is loaded in accordance with vehicle loading regulations and workplace safety requirements
		1.4 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.6 Ancillary equipment is operated in accordance with company procedures and manufacturer instructions during loading and unloading operations
2	**Secure and protect vehicle and load**	2.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions
		2.2 Load is protected in accordance with legal and workplace safety requirements
		2.3 Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity
		2.4 Loaded vehicle is inspected and checked for security to travel
3	**Complete documentation**	3.1 Documentation is completed and proofread in accordance with workplace procedures
		3.2 All required cargo transportation documentation is completed in accordance with workplace requirements

Assessment Requirements for TLID3014 Load and unload vehicles carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and correctly using equipment required to load and unload various types of special loads
- identifying and interpreting containers and goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment and conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- using manual handling techniques safely
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of various types of special loads
- containers and goods coding, IMDG Code markings and emergency information panels, including their meaning and implications for loading and unloading processes
- housekeeping standards and procedures
- methods for securing various types of special loads
- national Load Restraint Guide (LRG)
- relevant state/territory mass and loading regulations for various types of special loads, including current Australian Dangerous Goods (ADG) Code and Australian Code for the Transport of Explosives by Road and Rail
- risks and hazards when loading and unloading various types of special loads, and related precautions to control the risk
- site layout and obstacles
- WHS/OHS procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLID3033 Operate a vehicle-mounted loading crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a vehicle-mounted loading crane to shift loads with a capacity of less than 10 metre tonnes.

It includes positioning and stabilising a vehicle-mounted crane, operating a vehicle-mounted crane, monitoring lift conditions, packing up a vehicle-mounted crane after operations, and completing all required job records.

Work must be carried out in accordance with the relevant state/territory authority licence/permit requirements and regulations pertaining to vehicle-mounted loading cranes.

Work is performed under general supervision. It involves the application of routine principles and procedures when operating a vehicle-mounted loading crane in a variety of operational contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Position and stabilise vehicle-mounted crane	1.1 Crane is driven to position as specified in job plan to ensure safe operation in accordance with applicable Australian standards, codes of practice, manufacturer specifications, and relevant regulatory and local government requirements
	1.2 Barriers, fencing, temporary boundaries and signage are used as required to isolate working area in accordance with safe working practice and lift requirements
	1.3 Ground is checked to ensure it is firm enough to bear load to be taken
	1.4 Appropriate plates or packing are correctly used to adequately distribute load
	1.5 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturer instructions, appropriate Australian standard and other relevant statutory regulations or local authority requirements
	1.6 Outrigger packing is checked for adequacy prior to and after load is taken
2 Operate vehicle-mounted crane	2.1 Planned hazard control strategies are implemented
	2.2 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
	2.3 Load mass is assessed and correlated with crane lifting capacity throughout proposed radii of operation
	2.4 Appropriate lifting gear is selected and load is secured
	2.5 Load is hoisted and lowered into position using crane movements in accordance with appropriate Australian standard
	2.6 Crane controls are operated smoothly
	2.7 Crane is shut down and secured during periods of non-operation in accordance with manufacturer specifications and workplace procedures
3 Monitor lift conditions	3.1 Load is constantly monitored to ensure load and structural stability

© Commonwealth of Australia, 2025 Skills Insight

	3.2 Conditions that may affect continuing stability of crane are identified and monitored
	3.3 Unplanned situations are responded to in accordance with workplace procedures in a manner that minimises risk to personnel and equipment
	3.4 Advice is sought from supervisor where there is doubt about correct response to unanticipated conditions or conflict with customer request
	3.5 Supervisor/allocator is advised of concerns about completing job within timeframe
	3.6 Shut-down procedures are implemented in an emergency in accordance with manufacturer instructions
	3.7 Relevant motion locks and brakes are applied
	3.8 Crane is shut down using correct sequence of procedures in accordance with manufacturer specifications and workplace procedures
	3.9 Routine post-operational equipment checks are carried out in accordance with manufacturer specifications
4 Pack up vehicle-mounted crane	4.1 All lifting equipment and crane components are checked for any signs of deterioration or damage in accordance with the appropriate Australian standard
	4.2 Damaged or worn equipment is segregated and reported to an authorised person for testing/repair/destruction
	4.3 Crane equipment is correctly stowed and secured in accordance with manufacturer instructions and the appropriate Australian standard
	4.4 Crane is immobilised and secured for travel in accordance with manufacturer instructions, workplace guidelines and regulatory requirements
5 Complete job records	5.1 Customer feedback is sought regarding satisfaction with completed job and areas of concern are reported in accordance with workplace procedures
	5.2 Customer signature is obtained on job completion documentation
	5.3 Required workplace records are updated accurately and promptly, and processed in accordance with workplace

Assessment Requirements for TLID3033 Operate a vehicle-mounted loading crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids, and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- monitoring performance of crane and its equipment, and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- application of relevant agreements, codes of practice and other legislative requirements
- hazard management that is consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- high risk work licence requirements
- mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- operational procedures for crane crews
- operational work procedures concerning setting up and rigging a mobile crane at a worksite
- operational work systems and equipment
- prioritising and multi-tasking work
- problems that may arise when operating a vehicle-mounted loading crane and actions that should be taken to prevent or solve these problems
- relevant WHS/OHS and environmental procedures and regulations
- relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID3035 Operate a boom type elevating work platform

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a boom type elevating work platform less than 11 metres boom length, in accordance with relevant state/territory licence/permit requirements and regulations, in a variety of operational contexts.

It includes inspecting and testing elevating work platform, assessing job and work requirements, planning work and setting up for lift, and carrying out elevation. It also includes implementing planned hazard controls and strategies, and packing up work platform after operations.

Work is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

essential outcomes.	demonstrate achievement of the element.
1 Inspect and test elevating work platform	1.1 Work platform is visually inspected prior to operation for evidence of damage, structural weakness or interference in accordance with pre-operational safety check procedures
	1.2 Routine pre-operational equipment checks are carried out in accordance with available checklists
	1.3 Work platform logbook is checked, service requirements are noted and maintenance personnel are advised of requirements
	1.4 Elevating work platform is started in accordance with manufacturer guidelines and start-up procedures for operations, and abnormal noise or movement is reported to authorised person for corrective action
	1.5 Start-up checks are conducted in accordance with manufacturer specifications and company procedures to ensure work platform and equipment are operating correctly
	1.6 Faults are corrected or reported to authorised person for corrective action in accordance with company procedures
	1.7 Operating and emergency controls are checked for correct operation in accordance with manufacturer specifications, including use of emergency decent device
	1.8 Boom is lowered under simulated emergency conditions to check for operational effectiveness
	1.9 Gear and accessories are checked and damaged or worn gear is segregated and reported to authorised person for testing/repair/destruction
	1.10 Results of inspections are recorded and reported in accordance with company procedures
2 Assess job requirements and work	2.1 Briefing, handover details, authorisations and clearances are received, interpreted and clarified in accordance with company and site procedures, and legislative requirements
	2.2 Work area is inspected, potential hazards are identified and appropriate elimination or control measures are selected
	2.3 Weight of load including personnel and equipment, is correctly estimated to ensure job is within limits of work platform capacity

© Commonwealth of Australia, 2025 Skills Insight

3	**Plan work and set up for lift**	3.1 Work plan is developed and agreed with relevant workplace personnel, including hazard prevention/control measures, and safety and emergency procedures in line with applicable Australian Standards
		3.2 Suitable firm and level standing is chosen and prepared for location of elevating work platform
		3.3 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturer instructions and appropriate Australian Standards
		3.4 Appropriate plates or packing are correctly used under footplates as required to adequately distribute loading
		3.5 Ground is checked before and after packing is installed to ensure it is firm enough to bear load
		3.6 Job plan is developed including hazard prevention/control measures and safety procedures in accordance with applicable Australian Standards and equipment manufacturer specifications
		3.7 Work platform load chart is located and information on permissible loads, radii and heights is taken into account in planning job
		3.8 Job requirements, and workplace rules and procedures are taken into account in job plan
		3.9 Job plan is discussed and confirmed with relevant personnel
		3.10 Work gear and tools are properly stowed in elevating work platform in accordance with Australian Standards, company procedures and guides
4	**Carry out elevation**	4.1 Configuration and operation of elevating work platform are checked as required to ensure safe lift
		4.2 Operation of work platform is carried out in accordance with job plan, appropriate Australian Standard and manufacturer specifications
5	**Implement planned hazard control strategies**	5.1 Load is constantly monitored to ensure safety of personnel, load and structural stability
		5.2 Unplanned situations are responded to in accordance with company procedures, in a manner that minimises risk to personnel and equipment

© Commonwealth of Australia, 2025 Skills Insight

	5.3	Required signals are correctly given, interpreted and followed in accordance with appropriate Australian Standards
6 Pack up work platform	6.1	Elevating work platform is shut down using correct sequence of procedures in accordance with manufacturer instructions
	6.2	Routine post-operational equipment checks are carried out in accordance with manufacturer instructions and available checklists, and defects are recorded and reported in accordance with company procedures
	6.3	Elevating work platform is dismantled in accordance with job plan, manufacturer instructions and relevant statutory regulations
	6.4	Outriggers and stabilisers are secured and stowed in accordance with manufacturer instructions
	6.5	Elevating work platform is correctly stowed and secured in accordance with manufacturer instructions and company procedures

Assessment Requirements for TLID3035 Operate a boom type elevating work platform

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of equipment
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- reading and interpreting relevant instructions, procedures, regulations, codes of practice and manuals
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and workplace operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- boom type elevating work platform applications, capacities, configurations, safety hazards and control mechanisms
- capability on boom type elevating work platform compliance plate
- operational work systems and equipment
- problems that may arise when operating a boom type elevating work platform and actions that should be taken to prevent or solve these problems
- relevant road rules, regulations, permit and licence requirements for boom type elevating work platform operation
- relevant WHS/OHS and environmental procedures and regulations
- risks and hazards involved in operating a boom type elevating work platform and associated action that can be taken to eliminate or minimise the risk/hazards concerned
- wind speed equipment capability (wind loading)
- workplace procedures for operating a boom type elevating work platform less than 11 metres boom length, at a worksite.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID3036 Lift and move load using a mobile crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to lift and move a load using a non-slewing mobile crane or a slewing mobile crane, in a variety of operational contexts.

It includes operating mobile crane to complete job requirements, monitoring lift conditions, implementing shut-down procedures, packing up crane after operations and completing all required job records.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated high risk work licence requirements and to comply with relevant codes of practice and/or guidelines for mobile crane operations.

Work is performed with limited supervision and duty of care responsibility for self and others, in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Operate mobile crane	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 In ascent and descent to/from crane, correct use is made of means provided, in accordance with relevant codes of practice and workplace procedures
	1.3 Required signals are correctly given, interpreted and followed in accordance with appropriate workplace procedures
	1.4 Boom is positioned to ensure load to be lifted is plumbed under hook
	1.5 Load is hoisted and lowered into position using crane movements, in accordance with appropriate workplace procedures
	1.6 Crane controls are operated smoothly
	1.7 Crane is shut down and secured during periods of non-operation, in accordance with manufacturer specifications and workplace procedures
2 Monitor lift conditions	2.1 Load is constantly monitored to ensure load and structural stability
	2.2 Conditions that may affect continuing stability of crane are identified and monitored
	2.3 Unplanned situations are responded to in accordance with workplace procedures in a manner that minimises risk to personnel and equipment
	2.4 Dogger is advised of new information that affects lift
	2.5 Necessary changes to job plan are discussed and confirmed with rest of crew
	2.6 Advice is sought from supervisor where there is doubt about correct response to unanticipated conditions, or conflict with customer request

© Commonwealth of Australia, 2025 Skills Insight

		2.7	Supervisor/allocator is advised of concerns about completing job within timeframe
3	**Implement shut-down procedures**	3.1	Relevant motion locks and brakes are applied
		3.2	Crane is shut down using correct sequence of procedures in accordance with manufacturer specifications and workplace procedures
		3.3	Routine post-operational equipment checks are carried out in accordance with manufacturer specifications
4	**Pack up crane**	4.1	Crane is de-rigged with other crane personnel in accordance with manufacturer instructions
		4.2	All lifting equipment and crane components are checked in consultation with crane personnel for signs of deterioration or damage in accordance with appropriate Australian Standard
		4.3	Damaged or worn equipment is segregated and reported to authorised person for testing/repair/destruction
		4.4	Crane and equipment are correctly stowed and secured in accordance with manufacturer instructions and appropriate Australian Standard
5	**Complete job records**	5.1	Customer feedback is sought about satisfaction with completed job, and areas of concern are reported in accordance with workplace procedures
		5.2	Customer signature on job completion documentation is obtained
		5.3	Required workplace records are updated accurately and promptly, and processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3036A Lift and move load using a mobile crane.

Assessment Requirements for TLID3036 Lift and move load using a mobile crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant high risk work legislation and workplace procedures
- applying risk assessment and management procedures
- calculating safe working load (SWL) and working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- effectively completing pre-operational checks, positioning, stabilising, set-up, post-operational checks of mobile crane
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of equipment
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- operating crane, including all functions to their maximum extension, in lifting and moving a load
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing equipment in terms of maintenance schedule and standard operating procedures
- using load charts to determine crane limitations and/or required crane set-up
- using mathematical procedures to determine load weight and lifting equipment required for lift.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communications systems used during a lift
- hazard management, using the principle of hierarchy of control
- high risk work licence requirements
- mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- operational work systems and equipment
- problems that may occur during a lift, and associated action that can be taken to address these problems
- relevant road rules, regulations, permit and licence requirements for mobile crane operation
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- risks and hazards involved in mobile crane operations, and associated action that can be taken to eliminate or minimise the risk
- workplace procedures for operating a mobile crane at a worksite.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID3043 Shift loads using gantry equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads using gantry equipment in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes planning work for the prevailing working conditions, using controls and operating systems to manage the operation of equipment, and locating and identifying load characteristics. It also includes safely moving the load, monitoring controls and stopping, shutting down and securing equipment after the completion of operations.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1 Plan work for the prevailing working conditions	1.1 Traffic flow, weather and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
	1.2 Load characteristics are taken into account to ensure appropriate attachments/gear are used to move the load as required
	1.3 Occurrences in the work area that may affect the safety and efficiency of operations are reported to appropriate personnel
2 Use controls and operating systems to manage the operation of the equipment	2.1 Equipment is prepared and appropriate attachments are fitted as required
	2.2 Gear and operational levers are checked to ensure they are in the neutral position prior to inserting ignition key and starting engine
	2.3 Engine is started in accordance with manufacturer guidelines to bring engine to speed
	2.4 Instruments and gauges are monitored during start up and operations to ensure operation is within manufacturer specifications, and workplace and regulatory safety requirements
	2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
	2.6 Equipment operations are conducted within manufacturer specified torque range
	2.7 Faults or damage to equipment are immediately reported to appropriate personnel
3 Locate load and identify load characteristics	3.1 Load is located and identified in accordance with instructions
	3.2 Requirements for safe working load (SWL) and working load limit (WLL) of gantry equipment are identified
	3.3 Load weight and dimensions are checked to ensure they fall within equipment capacity
	3.4 Loading and unloading plans are followed to ensure efficiency and safety of operations

© Commonwealth of Australia, 2025 Skills Insight

	3.5 Load characteristics are taken into account to ensure appropriate loading and unloading procedures are followed
	3.6 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting work
4 Safely move load	4.1 Equipment is operated and positioned using smooth and controlled movements
	4.2 Manoeuvres are within equipment limits and in line with manufacturer specifications
	4.3 Load is moved ensuring no injury to personnel or damage to equipment or cargo
	4.4 Continuous communication is maintained with personnel assisting the operator in the load movement operations using appropriate communications technology and procedures
	4.5 In an incident or emergency, equipment is immediately stopped and workplace emergency procedures are followed
	4.6 Safety incidents and emergencies are reported in accordance with workplace procedures and regulatory requirements
5 Monitor and operate controls	5.1 Equipment controls are monitored and operated in accordance with manufacturer operating instructions
	5.2 Control systems are confirmed and acted on in accordance with regulatory requirements, manufacturer guidelines and workplace operating procedures
	5.3 Control faults are identified and reported in accordance with enterprise guidelines
	5.4 Hazards in the work area are identified and appropriate measures are adopted to control the risks in accordance with regulatory requirements and workplace procedures
6 Stop, shut down and secure equipment	6.1 Equipment is brought to a controlled halt and is shut down without injury to personnel or damage to equipment, loads or facilities in accordance with manufacturer guidelines and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

6.2 Equipment is secured in accordance with manufacturer instructions and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

Assessment Requirements for TLID3043 Shift loads using gantry equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying effective eye-hand coordination to operational tasks
- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others

© Commonwealth of Australia, 2025 Skills Insight

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes, regulations, licence/permit requirements relevant for using gantry equipment to shift loads
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for using gantry equipment to shift loads
- problems that may occur and appropriate action that can be taken to resolve these problems
- relevant bond, quarantine or other legislative requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- relevant safety codes and emergency procedures
- requirements for safe working load (SWL) and working load limit (WLL) of gantry equipment
- types of gantry equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for using gantry equipment to shift loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID4032 Plan and conduct specialised lift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to plan and conduct specialised lift by a mobile crane (excluding demolition work).

It involves a lift that may be specialised in terms of job and equipment requirements, load qualities, or critical aspects of lift location/s.

It includes inspecting site, planning lift, setting up lift, working effectively in a team, lifting and moving load, and following up on a job.

Work must be carried out in accordance with high risk work licence/permit requirements and relevant state/territory authority regulations for specialised mobile crane operations.

Work is performed under general supervision. It involves the application of some judgement and routine principles and procedures for planning and conducting of specialised lifts in a variety of operational contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Inspect site	1.1 Site is inspected as required with other relevant personnel, to assess job requirements
	1.2 All necessary parameters are measured to ensure accuracy of calculations
	1.3 Hazards are identified through inspection of site and load, and required action is taken to minimise, control or eliminate identified hazards
	1.4 Additional information about load and possible hazards is sought from customer and expert personnel, as required
	1.5 Special site requirements are identified
2 Plan lift	2.1 Operation plan is developed in consultation with other relevant personnel, including hazard prevention/control measures in accordance with workplace procedures, applicable Australian Standards and codes of practice
	2.2 Approval to carry out lift is obtained from appropriate statutory authority, as required
	2.3 Multiple crane lifts are planned, as required, to encompass determination of types of cranes suitable for use and an assessment of load share to be carried by each crane
	2.4 Crane load chart is interpreted and information on permissible loads, radii, weights, boom and jib are taken into account in planning job
	2.5 Safe working load (SWL) or working load limit (WLL) is calculated
	2.6 Appropriate drawings and simulations are created to check feasibility of planned operations
	2.7 Information from previous lifts is used in developing operational plan
	2.8 Range of alternatives is considered to ensure effective and safe lift

© Commonwealth of Australia, 2025 Skills Insight

	2.9	Unsolicited, irrelevant information is disregarded to focus on task at hand
	2.10	Need for additional/specialised equipment is ascertained and arrangements are made for collection/delivery to site
	2.11	Communications system is determined and all team members are briefed on its use when conducting lift
3 Set up lift	3.1	Site measurements and SWL/WLL are checked to verify accuracy
	3.2	Operating and emergency controls are checked to ensure crane is in safe working order
	3.3	Appropriate personal protective equipment is selected and worn in accordance with manufacturer specifications and site requirements
	3.4	Site is isolated as required and assistance is sought to ensure public safety as required
	3.5	Other personnel on site are directed, as required to ensure risks to personnel and equipment are minimised
	3.6	Variables that affect operation predictability are eliminated wherever possible
4 Work effectively in a team	4.1	Consultation with all team members is sought in developing operational plan
	4.2	Ideas are discussed and evaluated with team members to determine viability and to reach consensus on an effective plan
	4.3	Individual roles and responsibilities are clarified and agreed
	4.4	Other team members are assisted as required, to ensure operation can be completed safety and efficiently
5 Lift and move load	5.1	Nominated authorised person is recognised as being in control and instructions are followed
	5.2	Test runs are conducted as required to ensure a safe lift
	5.3	Load is hoisted and lowered into position using crane movements in accordance with the appropriate Australian Standard

© Commonwealth of Australia, 2025 Skills Insight

	5.4	Danger is anticipated by monitoring crane and load, and instruction to stop operation is given, when there are concerns lift is not proceeding as planned
	5.5	Potential impact of change in one area of operation on lift as a whole, is recognised
	5.6	In unanticipated situations, contribution is made to developing alternative operational plan
6 Follow up on job	6.1	Specialised equipment is checked and re-stored in accordance with workplace procedures
	6.2	Operation is reviewed in consultation with relevant personnel and contribution is made to recommendations for review of procedures as required
	6.3	Need for further after-job debriefing or counselling is recognised and appropriate action is taken
	6.4	Records are completed promptly in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID4032A Plan and conduct specialised lift.

Assessment Requirements for TLID4032 Plan and conduct specialised lift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- calculating safe working load (SWL) or working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- developing contingency plans
- ensuring use of required personal protective equipment conforms to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapt to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- prioritising and multi-tasking work
- providing leadership and working collaboratively with others
- reading and interpreting relevant instructions, procedures, information, technical data, manuals and signs
- reporting and/or rectifying problems promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- calculations for SWL or WLL
- focus of operation of work systems and equipment
- mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- hazard management, consistent with the principle of hierarchy of control
- high risk work licence requirements
- problems that may arise when planning and supervising a specialised lift using a mobile crane and actions that should be taken to prevent or solve these problems
- relevant agreements, codes of practice or other legislative requirements
- relevant road rules, regulations, permit and licence requirements for mobile crane operation
- relevant WHS/OHS and environmental procedures and regulations
- safe work method statement
- workplace procedures for crane crews
- workplace procedures for setting up and rigging a mobile crane at a worksite.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- mobile crane, of the type currently used in industry
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1 Estimate loads for transport or storage	1.1 Order forms/work orders are read and requirements are noted
	1.2 Shape, balance characteristics, dimensions and mass of load/s are identified
	1.3 Area/volume required for storage is estimated
	1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
2 Estimate load limits of transport and/or storage	2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
	2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated
3 Organise load	3.1 Load/s is restricted to allowable range
	3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
	3.3 Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

© Commonwealth of Australia, 2025 Skills Insight

- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE4006 Collect, analyse and present workplace data and information

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to collect, analyse and present workplace data and information as part of workplace operations.

It includes identifying required information, analysing and preparing information for use, explaining information and presenting workplace information to others.

Work is performed under general or limited supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Collect required data	1.1 Purpose of data and information collection is confirmed

© Commonwealth of Australia, 2025 Skills Insight

and information	1.2 Sources of data and information are established
	1.3 Appropriate data and information is identified
2 Prepare data and information for use	2.1 Data and information is collated and analysed in accordance with workplace procedures
	2.2 Data and information are organised and presented in a logical manner
	2.3 Checks for accuracy are made
3 Explain information	3.1 Data and information collection and analysis is explained to others in a way that effectively contributes to workplace operations
	3.2 Outcomes of data and information analysis are presented to others using appropriate presentation modes and resources
	3.3 Questions are answered and appropriate clarification is given
4 Present workplace information	4.1 Information is processed and forwarded to appropriate personnel in accordance with workplace procedures
	4.2 Processed information is collated and stored in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit replaces and is equivalent to TLIE4006A Collect, analyse and present workplace data and information.

Links

Assessment Requirements for TLIE4006 Collect, analyse and present workplace data and information

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others when collecting, analysing and presenting workplace data and information
- completing relevant documentation
- identifying and using required communications and presentation technology
- monitoring and prioritising work activities in terms of planned schedule
- planning own work including predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions and procedures
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- presentation and communication techniques including barriers to effective communication and how to overcome them
- principles of effective presentation and communication of information
- protocols and procedures for the collection, analysis and presentation of workplace data and information using relevant technology
- relevant procedures and duty of care requirements
- sources of data and information and procedures for processing the information for workplace use
- typical presentation and communications problems, and appropriate action and solutions.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIF1002 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct housekeeping activities in the workplace.

It includes identifying housekeeping requirements, procedures and resources of different areas of the workplace; monitoring and maintaining cleanliness and tidiness in the workplace; and completing assigned housekeeping tasks.

Work is performed under some supervision generally in a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F - Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine housekeeping requirements for different workplace areas	1.1 Workplace housekeeping procedures are identified
	1.2 Equipment and consumables are selected in accordance with work area requirements

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Specific procedures and resources for housekeeping activities in different parts of the work area are identified and followed
2 Monitor and maintain cleanliness and tidiness in the workplace	2.1 Initiative is used to continuously monitor worksite cleanliness and tidiness
	2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures
	2.3 Housekeeping equipment is operated in accordance with manufacturer instructions and workplace policy
	2.4 Housekeeping equipment and supplies are maintained and stored
3 Complete assigned housekeeping duties	3.1 Assigned housekeeping duties are conducted in accordance with workplace procedures and ensuring that waste is removed
	3.2 Maintenance requirements of any damaged items are notified to appropriate personnel
	3.3 Schedules and records for housekeeping duties are maintained
	3.4 Work areas are checked and required workplace standards are met
	3.5 Work is carried out following enterprise practices and safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIF1002 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- communicating and working effectively with others when carrying out housekeeping activities
- identifying workplace housekeeping requirements and undertaking housekeeping in the workplace
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring condition and performance of housekeeping tools and equipment and servicing, in terms of servicing schedule and standard operating procedures
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reporting and rectifying within limits of own role, problems, faults and malfunctions identified when carrying out housekeeping activities, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards
- purpose of housekeeping within the workplace

© Commonwealth of Australia, 2025 Skills Insight

- relevant enterprise practices and safeworking procedures for own job role
- risks when carrying out housekeeping tasks and related precautions to control them
- servicing procedures for housekeeping equipment
- site layout and obstacles
- workplace procedures and policies for carrying out housekeeping activities in the workplace.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIF2010 Apply fatigue management strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry. Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify and act on signs of fatigue	1.1 Potential causes of fatigue are identified and action is taken to minimise their effects in accordance with company procedures

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Personal warning signs of fatigue are recognised and necessary steps are taken in accordance with workplace procedures, to ensure that effective work capability and alertness are maintained
2 Implement strategies to minimise fatigue	2.1 Workplace procedures are assessed to minimise fatigue
	2.2 Factors that increase the risk of fatigue-related accidents and incidents are minimised
	2.3 Fatigue management strategies are implemented in accordance with workplace policy
	2.4 Lifestyle choices are made that promote the effective long-term management of fatigue
	2.5 Effective practices in combating fatigue are adopted and applied
	2.6 Personal fatigue management strategies are communicated to relevant people
	2.7 Appropriate counter measures are planned to combat fatigue

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIF2010 Apply fatigue management strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required action to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate action in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance

© Commonwealth of Australia, 2025 Skills Insight

- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIF4007 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate accident and emergency procedures in accordance with relevant regulations and workplace procedures.

It includes responding to the incident, coordinating on-site activities and completing follow-up actions.

Work is performed under some supervision generally within a team environment. It involves the application of basic emergency response principles when implementing accident and emergency procedures, and includes providing assistance ranging for simple injuries to applying life support systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1 Respond to incident	1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed
	1.2 Hazards are identified, risks are assessed and control measures are implemented
	1.3 Immediate coordination requirements are identified and actioned in accordance with organisation procedures
	1.4 Travel to incident site is undertaken by the shortest, fastest, legal means and routes
2 Coordinate on-site activities	2.1 Control of site activities is assumed on arrival, and operator and other authorities present are informed of this action
	2.2 Assistance is provided to clients and operators within limitations of duty of care and organisational requirements
	2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, in accordance with organisational policies and procedures
	2.4 Assistance is provided to relevant authorities within legal and policy limitations
3 Complete follow-up actions	3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisational procedures
	3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with organisational policies and procedures
	3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to interpret road maps and to navigate routes as part of transport operations.

It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements.

Work is performed under general or limited supervision. It involves the application of map reading principles and procedures when interpreting street directories and road maps, and following pre-determined routes.

Work must be carried out in accordance with relevant state/territory roads and traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify and determine pre-planned route	1.1 Pre-determined route documentation is accessed and interpreted
	1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed
	1.3 Street directory, GPS and road map symbols are recognised and interpreted
	1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate map
	1.5 Pre-determined route directions are interpreted and route is traced using a street directory, GPS and road map
	1.6 Key intersections and other landmarks along route are identified for use in following planned route
	1.7 Alternative contingency routes are identified for emergencies or traffic delays
	1.8 Pre-determined route is correctly followed
2 Complete necessary documentation	2.1 Required route documentation is completed in accordance with purpose of transportation and workplace requirements
	2.2 Required route documentation is filed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing documentation related to route navigation
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment in accordance with workplace protocols
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job role
- reading and interpreting relevant instructions, procedures, information and signs
- using global positioning system (GPS) devices to navigate pre-determined routes as required
- using maps and other route documentation to correctly identify and interpret:
  - map symbols
  - roads and intersections
  - town and suburb locations
- working collaboratively with others as required (such as fleet managers, sales team)
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on a particular route
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations/rest stops as required
- operational procedures for interpreting road maps, using GPS devices and navigating routes
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards and issues
- traffic conditions at various times of the day/night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate action that should be taken
- workplace requirements for recording and documenting route information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck high risk work (HRW) licence.

This unit requires a person operating a forklift truck to plan the work, conduct routine checks on a forklift truck, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

© Commonwealth of Australia, 2025 Skills Insight

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work	1.1 Potential workplace hazards are identified
	1.2 Risk control measures are identified consistent with regulatory requirements and the hierarchy of control
	1.3 Appropriate forklift truck is selected in accordance with load and workplace conditions
	1.4 Working area is inspected to determine appropriate paths for moving loads and forklift truck in accordance with workplace conditions
	1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures
2 Conduct routine checks	2.1 Prior to operation, forklift truck is visually checked for any damage or defects
	2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard
	2.3 All controls are located, identified and confirmed
	2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
	2.5 Forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise
	2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

	2.7 All forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures
	2.8 Issues, defects and damage identified during routine checks are reported and recorded in accordance with workplace procedures, and appropriate action is taken
3 Shift load	3.1 Weight of load is assessed to ensure compliance with forklift truck data plate specifications
	3.2 Appropriate hazard prevention/control measures are implemented and communicated to personnel in the work area
	3.3 Forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures
	3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards
	3.5 Load movement is monitored constantly to ensure safety of personnel and load, and structural stability
	3.6 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans
4 Shut down and secure forklift truck	4.1 Forklift truck is parked to avoid hazards
	4.2 Forklift truck is shut down in accordance with manufacturer specifications and workplace procedures
	4.3 Routine post-operational forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures
	4.4 Forklift truck is secured to prevent unauthorised access/use
	4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

Skill	Performance feature
Employment skills to:	• operate a forklift truck in different types of workplaces transferring key principles of safe operation to different contexts • improve own performance in safely and efficiently operating a forklift truck by incorporating learnings from different workplaces and different conditions into current performance

Numeracy skills to:	• interpret numerical information including:
	  • selecting appropriate forklift in accordance with load and workplace conditions
	  • load weight assessment, to ensure compliance with forklift truck data plate specifications
	  • controlling and monitoring instrument readings

Language skills to:	• use and interpret vocabulary specific to forklift truck operations and workplace procedures to communicate with other workplace personnel • use non-verbal feedback to support effective communication • use relevant communications conventions

Literacy (reading) skills to:	• interpret documentation that includes technical specificity including:
	  • forklift truck data plate
	  • plant operation manuals and manufacturer specifications
	  • workplace procedures, including emergency plan
	  • workplace signage and labels

Literacy (writing) skills to:	• accurately record and maintain information relating to operating a forklift truck, including:
	  • incident reports
	  • vehicle checking and maintenance records

Self-management skills	• implement risk control measures • initiate emergency management strategies

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2001A Licence to operate a forklift truck

Assessment Requirements for TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a forklift truck and satisfy all of the unit elements, performance criteria and foundations skills requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating a forklift truck
- carrying out post-start operational checks, which must ensure:
  - attachment movements and control functions are smooth and comply with operating requirements
  - hazard warning systems (e.g. lights and horns) are functional
  - safety devices are checked, including
    - deadman's switch
    - emergency descent device (hydraulic)
    - reversing beepers
  - start-up is in accordance with procedures
  - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
  - battery charge checks, as required
  - ensuring availability of logbook, records, handbook and/or operating manuals
  - fitting and interpreting forklift truck data plate
  - fluid checks
  - forklift truck attachment security checks
  - identifying approved modifications and/or attachments fitted, to manufacturer specifications in accordance with forklift truck or attachment data plate
  - locating, identifying and confirming all controls
  - safety equipment checks
  - signage and label visibility and legibility checks
  - updating records as required
- communicating with other workplace personnel through
  - using appropriate worksite protocols

© Commonwealth of Australia, 2025 Skills Insight

    - listening
    - making and interpreting hand signals
    - questioning to confirm understanding
    - signage
    - verbal and non-verbal language
    - written instructions
- complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
- conducting and monitoring safe forklift truck operations that include moving loads safely, driving and manoeuvring, picking up and placing loads at various stack heights and carrying out all functions to the maximum height and load capacity
- driving a forklift truck with load in forward and reverse, while maintaining visibility
- planning and preparing for forklift truck operations including:
    - conducting a workplace risk assessment
    - identifying hazards associated with operating a forklift truck, which must include
        - forklift truck instability (e.g. due to overloading, poor load placement, irregular loads)
        - ground conditions (e.g. condition of pavement, slopes)
        - insufficient lighting
        - overhead hazards (e.g. electric lines, service pipes)
        - traffic (e.g. pedestrians, vehicles, other plant) and the risk of collision with people, moving plant and fixed structures
        - weather conditions (e.g. wind, lightning, rain)
    - selecting hazard prevention strategies in accordance with the hierarchy of control
    - putting in place effective controls for identified hazards
    - visually checking a forklift truck for any damage or defects prior to operation including
        - evidence of damage
        - leaks
        - structural weaknesses (including paint separation or stressed welds)
- receiving and interpreting workplace instructions, safety information and emergency procedures
- shutting down a forklift truck in accordance with manufacturer specifications and workplace procedures including
    - parking in a suitable location away from dangerous areas
    - correctly positioning fork arms (tips down, tilted forward, lowered to ground)
    - selecting appropriate transmission/gear for parking (relevant to transmission type)
    - applying hand/parking brake
    - turning off engine power
    - removing ignition key as required
    - shutting off LPG gas cylinder valve as required

© Commonwealth of Australia, 2025 Skills Insight

  - securing equipment in accordance with manufacturer specifications and against unauthorised operation
  - securing site
  - ensuring access ways are clear
  - identifying and segregating defective equipment and reporting to authorised personnel
  - connecting batteries to charger as required
- verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including
  - environmental conditions (e.g. wind, lightning, storms)
  - failure/loss of control (e.g. brakes and steering)
  - failure of equipment (e.g. hydraulic system)
  - forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards relevant to operating a forklift truck
- Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one's own responsibilities
- forklift truck characteristics and capabilities (including use of load data plates)
- forklift truck operations and safe operating techniques
- hierarchy of control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
  - control labels
  - forklift data plates/labels
  - forklift warning decals
- organisational and workplace standards, requirements, policies and procedures for operating a forklift truck
- procedures for recording, reporting and maintaining workplace records and information
- relevant Australian and industry standards, codes of practice and guidelines to safely

© Commonwealth of Australia, 2025 Skills Insight

operate a forklift truck
- risk control measures including:
  - barricades and traffic control (e.g. traffic management plan)
  - compliance with permit condition requirements from electrical supply authority, including
    - adequate illumination
    - disconnected power
    - excavation safeguards
    - insulated electric lines
    - maintaining safety observer zone
    - movement of obstructions
    - observing limits of approach
    - pedestrian control (barricades, signs, etc.)
    - power disconnection or compliance with electrical supply authority requirements
    - safety tags on electrical switches/isolators
    - using safety observer inside exclusion zone
    - using personal protective equipment
- selecting forklift truck to suit load and workplace conditions
- typical routine problems encountered operating a forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for *Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements.

© Commonwealth of Australia, 2025 Skills Insight

If the working zone is located at a 'live' site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must **not** be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring that candidates have access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of Performance Assessment
- relevant workplace procedures and standards for operating a forklift truck, including:
  - approved codes of practice and guidance
  - relevant Australian and international technical standards
  - manufacturer guidelines (instructions, specifications or checklists) for the purpose of Performance Assessment
  - relevant industry standards and operating procedures (where applicable)
  - safe work method statements (SWMS), as required.

TLILIC2002 Licence to operate an order picking forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate an order picking forklift truck safely.

Order picking forklift truck means a forklift truck where the operator controls are incorporated with the lifting media and elevate with the lifting media.

A person performing this work is required to hold an order picking forklift truck high risk work (HRW) licence.

This unit requires a person operating an order picking forklift truck to plan the work, conduct routine checks on order-picking forklift trucks, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

© Commonwealth of Australia, 2025 Skills Insight

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work	1.1 Potential workplace hazards are identified
	1.2 Risk control measures are identified to ensure the safety of personnel and equipment, consistent with regulatory requirements and the hierarchy of control
	1.3 Order picking forklift truck is selected in accordance with load and workplace conditions
	1.4 Working area is inspected to determine appropriate path of movement for loads and order picking forklift truck, for the workplace conditions
	1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures
2 Conduct routine checks	2.1 Prior to operation, order picking forklift truck is visually checked for any damage or defects
	2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard
	2.3 All controls are located, identified and confirmed
	2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
	2.5 Order picking forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise
	2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
	2.7 All order picking forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

	2.8 Defects and damage are reported and recorded in accordance with workplace procedures, and appropriate action is taken
3 Shift load	3.1 Weight of load is assessed to ensure compliance with order picking forklift truck data plate
	3.2 Hazard prevention/control measures are implemented and communicated with personnel in the work area, as required
	3.3 Order picking forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures
	3.4 Work is conducted safely at heights and safety equipment is used safely and efficiently
	3.5 Loads are moved and placed to ensure stability of material and avoidance of hazards
	3.6 Load movement is monitored constantly, to ensure safety of personnel and load, and order picking forklift truck stability
	3.7 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans
4 Shut down and secure forklift	4.1 Order picking forklift truck is parked to avoid hazards
	4.2 Order picking forklift truck is shut down in accordance with manufacturer specifications and workplace procedures
	4.3 Routine post-operational order picking forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures
	4.4 Order picking forklift truck is secured to prevent unauthorised access/use
	4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

© Commonwealth of Australia, 2025 Skills Insight

FOUNDATION SKILLS	
Skill	**Performance feature**
Employment skills to:	• operate an order picking forklift truck in different types of workplaces transferring key principles of safe operation to different contexts • improve own performance in safely and efficiently operating an order picking forklift truck by incorporating learnings from different workplaces and different conditions into current performance

Numeracy skills to:	• interpret numerical information including:
	  • selecting appropriate order picking forklift truck in accordance with load and workplace conditions
	  • load weight assessment, to ensure compliance with order picking forklift truck data plate specifications
	  • controlling and monitoring instrument readings

Language skills to:	• use and interpret vocabulary specific to order picking forklift truck operations and workplace procedures to communicate with other workplace personnel • use non-verbal feedback to support effective communication • use relevant two-way radios conventions

Literacy (Reading) skills to:	• interpret documentation that includes technical specificity including:
	  • order picking forklift truck data plate
	  • plant operation manuals and manufacturer specifications
	  • workplace procedures, including emergency plan
	  • workplace signage and labels

Literacy (Writing) skills to:	• accurately record and maintain information relating to operating an order picking forklift truck, including:
	  • incident reports
	  • vehicle checking and maintenance records

Self-Management skills	• implement risk control measures • initiate emergency management strategies

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit is equivalent to TLILIC2002A Licence to operate an order picking forklift truck.

Assessment Requirements for TLILIC2002 Licence to operate an order picking forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating an order picking forklift truck and satisfy all of the unit elements, performance criteria and foundation requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating an order picking forklift truck
- carrying out post-start operational checks, which must ensure:
  - attachment movements and control functions are smooth and comply with operating requirements
  - hazard warning systems (e.g. lights and horns) are functional
  - safety devices are checked, including
    - safety gates and interlocks
    - reversing beepers
    - emergency descent device (hydraulic)
    - deadman’s switch
  - start up is in accordance with procedures
  - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
  - all controls are located, identified and confirmed
  - all signage and labels are visible and legible
  - identifying approved modifications and/or attachments fitted to manufacturer specifications in accordance with order picking forklift data plate
  - battery charge checks
  - checks for adaptations or modifications outside manufacturer specifications (i.e. not listed on the order picking forklift data plate)
  - fluid checks
  - ensuring availability of logbook, handbook or operating manuals
  - ensuring safety devices/alarms are fitted and operational
  - fitting and interpreting order picking forklift data plate
  - order picking forklift truck attachment security checks

© Commonwealth of Australia, 2025 Skills Insight

  - updating records as required
  - safety equipment checks
- communicating with other workplace personnel through:
  - using appropriate worksite protocol
  - listening
  - making and interpreting hand signals
  - questioning to confirm understanding
  - signage
  - verbal and non-verbal language
  - written instructions
- complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
- conducting and monitoring safe order picking forklift truck operations that includes picking and placing loads safely at various heights, driving, manoeuvring and placing loads in a safe manner, and carrying out all functions to the maximum height and load capacity
- driving order picking forklift truck with load in forward and reverse, while maintaining visibility
- planning and preparing for order picking forklift truck operations including:
  - conducting a workplace risk assessment
  - identifying hazards associated with operating an order picking forklift truck, which must include :
    - ground conditions (e.g. condition of surface, slopes)
    - insufficient lighting
    - overhead hazards (e.g. electric lines, service pipes)
    - risk of collision with people, moving plant and fixed structures
    - order picking forklift instability (e.g. overloading, poor load placement, irregular loads)
    - other specific hazards (e.g. falling from platform, dangerous materials)
    - traffic (e.g. pedestrians, vehicles, other plant)
    - weather conditions (e.g. wind, lightning, rain)
- putting in place effective hazard controls for those hazards identified
- receiving and interpreting workplace instructions, safety information and emergency procedures
- selecting hazard prevention strategies, in accordance with the hierarchy of control
- shutting down order picking forklift truck and equipment in accordance with manufacturer specifications and workplace procedures including:
  - parking in a suitable location away from dangerous areas
  - lowering forks to the ground
  - ensuring brakes and motion locks are applied
  - turning off engine power
  - securing equipment in accordance with manufacturer specifications and against

© Commonwealth of Australia, 2025 Skills Insight

unauthorised movement
  - securing site
  - ensuring access ways are clear
  - removing ignition key as required
  - identifying and segregating defective equipment and reporting to authorised personnel
  - connecting batteries to charger as required
- verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
  - environmental conditions (e.g. wind, lightning, storms)
  - failure/loss of control (e.g. brakes and steering)
  - failure of equipment (e.g. hydraulic system)
  - order picking forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads)
- visually checking order picker forklift truck for any damage or defects prior to operation including:
  - evidence of damage
  - leaks
  - structural weaknesses (including paint separation or stressed welds)
- working safely at heights using safety equipment safely and efficiently.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards relevant to operating an order picking forklift truck
- Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one's own responsibilities
- hierarchy of control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
  - control labels
  - forklift data plates/labels

© Commonwealth of Australia, 2025 Skills Insight

    - forklift warning decals
- order picking forklift truck operations and safe operating techniques
- order picking forklift truck characteristics and capabilities, (including use of load data plates)
- organisational and workplace standards, requirements, policies and procedures for operating an order picker forklift truck
- procedures for recording, reporting and maintaining workplace records and information
- rated capacity and working load limits identification
- relevant Australian and industry standards, codes of practice and guidelines to safely operate an order picking forklift truck
- risk control measures including:
    - barricades and traffic control (e.g. traffic management plan)
    - compliance with permit condition requirements from electrical supply authority, including
        - adequate illumination
        - bridging plates
        - disconnected power
        - excavation safeguards
        - insulated electric lines
        - maintaining safety observer zone
        - movement of obstructions
        - observing limits of approach
        - pedestrian control (barricades, signs, etc.)
        - power disconnection or compliance with electrical supply authority requirements
        - safety tags on electrical switches/isolators
        - using safety observer inside exclusion zone
        - using personal protective equipment
- selecting order picking forklift truck to suit load and workplace conditions
- typical routine problems encountered operating an order picker forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for *Registered Training Organisations* current at the time of assessment.

© Commonwealth of Australia, 2025 Skills Insight

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Order picking forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements

If the working zone is located at a 'live' site, assessment should continue in all weather conditions unless the safet**y o**f the candidate or others could be compromised.

Simulators must not be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring candidates have access to:

- a suitable order picking forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to order picking forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of the Performance Assessment
- safety equipment, such as:
  - appropriate attachment point
  - harnesses
  - lanyard
- where appropriate, relevant workplace procedures and standards for operating an order picking forklift truck, including:
  - approved codes of practice and guidance
  - relevant Australian and international technical standards
  - industry standards and operating procedures (where applicable)
  - manufacturer guidelines (instructions, specifications or checklists) for the purpose of the Performance Assessment
  - safe work method statements (SWMS), as required.

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Analyse supply requirements	1.1 Purpose and specifications of required goods/services are identified
	1.2 Criteria to evaluate potential or existing contractor performance is established
	1.3 Quantities of required goods/services are determined
	1.4 Frequency of ordering/requesting of goods/services is identified
2 Evaluate potential contractors	2.1 Contractors of requested goods/materials/services are identified
	2.2 Comparative costings for goods/materials/services are obtained
	2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed
	2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures
	2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service
	2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors
	2.7 Information and data generated during selection process is filed and maintained in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4002A Source goods/services and evaluate contractors.

Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

© Commonwealth of Australia, 2025 Skills Insight

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services, and evaluating potential supply contractors.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

FWPSS00001 Skill set for forest and wood product innovation for leaders

Modification History

FWP R1

Generic unit BSBINN801A Lead innovative thinking and practice replaced by equivalent forest industry-specific unit in new standard format. Skill set code change from FPI to FWP.

FPI11 V2

Primary release with FPI11 Training Package V2.

Description

This skill set provides the skills and knowledge required by leaders to drive innovative practice and thinking to build a culture within the industry that enables new and emerging business opportunities.

Pathways Information

Pathway	These units provide credit towards FWP60116 Advanced Diploma of Forest Industry Sustainability

Licensing/Regulatory Information

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Skill Set Requirements

Units	FWPCOT5207 Implement sustainability in the workplace
	FWPCOT8101 Lead forest and wood products industry innovative thinking and practice
	BSBINN501 Establish systems that support innovation
	BSBINN502 Build and sustain an innovative work environment

© Commonwealth of Australia, 2025 Skills Insight

Target Group

Target group	The skill set is targeted at leaders driving innovative practice and thinking within an organisation.

Suggested words for Statement of Attainment

Suggested words for Statement of Attainment	These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for leaders to drive innovative practice and thinking to build a culture within the industry that enables new and emerging business opportunities.

FWPSS00014 Skill set for a heavy production mobile chipper operator

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2.3 to FWP Release 2.0.

FPI11 V2.3

Superseded unit updated:

- HLTAID003 replaces HLTFA311A

FPI11 V2

Superseded units updated:

- HLTFA311A replaces HLTFA301C
- FPIHAR3215C replaces FPIHAR3215B

Pathway qualification code updated to reflect changes made in FPI11 V2.

FPI11 V1

Skill set code updated to FPI11 to reflect Training Package update from FPI05 V3 to FPI11 V1.

Description

This skill set is for people wishing to work as a heavy production mobile chipper operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Pathways Information

These units provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

In a number of jurisdictions some of these units are required for the issuing of a timber harvesting operator's licence as a heavy production mobile chipper operator.

© Commonwealth of Australia, 2025 Skills Insight

Skill Set Requirements

FWPCOR2203 Follow environmental care procedures

FWPCOR2205 Follow WHS policies and procedures

HLTAID003 Provide first aid

FWPHAR3215 Operate a heavy production mobile chipper

Target Group

This skill set is for people wishing to work as a heavy production mobile chipper operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

FWPSS00016 Skill set for a mechanical processor operator

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0. It supersedes and is equivalent to FWPSS00016 Skill set for a mechanical processor operator (Release 1). It was updated to reflect one revised unit of competency: FWPHAR3210
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Description

This skill set is designed to meet industry requirements for activities related to mechanical processor operations in a commercial forest harvesting environment or the harvesting and haulage sector of the forest and wood products industry.

^ From 1 July 2022 the unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

These units of competency provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3210 Operate mechanical processor operations
- HLTAID003 Provide first aid

© Commonwealth of Australia, 2025 Skills Insight

- **^ HLTAID011 Provide First Aid (must be delivered from 1 July 2022)**

Target Group

This skill set is for people wishing to work as a mechanical processor operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a mechanical processor in a commercial forest harvesting environment.

Skill Set Requirements

FWPCOT3258 Comply with soil and water protection

FWPCOR2203 Follow environmental care procedures

AHCSAW302 Implement erosion and sediment control measures

Target Group

This skill set is for forestry workers and people wishing to work in a forest soil and water protection role within a forestry environment.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for Forest Soil and Water Protection.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00025 Skill set for carbon accounting

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2 to FWP Release 2.0.

FPI11 V2

Primary release with FPI11 Training Package V2

Description

This skill set provides the specialised skills and knowledge required to design plantations, develop a tree inventory, and undertake carbon storage sampling.

Pathways Information

These units provide credit towards a number of qualifications, including FWP60114 Advanced Diploma of Forest Industry Sustainability

Licensing/Regulatory Information

To be registered as an auditor, candidates need to meet the requirements of the National Greenhouse and Energy Reporting (NGER) guidelines as set out in the National Greenhouse and Energy Reporting Act 2007.

Further information is available at www.cleanenergyregulator.gov.au

Skill Set Requirements

FWPGM4203 Design plantations

FWPGM5219 Undertake carbon stock sampling of forests and plantations

FWPGM6203 Manage sustainable tree inventory

Target Group

The skill set is targeted at enterprises and individuals who are providing services to landowners undertaking, or wishing to undertake, farm forestry projects.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements to design plantations, develop a tree inventory, and undertake carbon stock sampling.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00026 Skill set for a forestry log truck driver

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2 to FWP Release 2.0.

FPI11 V2

Primary release with FPI11 Training Package V2

Description

Not applicable.

Pathways Information

This skill set provides credit towards a number of qualifications, including FWP30216 Certificate III in Harvesting and Haulage, which allows for specialisation for the role of log truck driver.

Licensing/Regulatory Information

This skill set provides credit towards a number of qualifications, including FWP30216 Certificate III in Harvesting and Haulage, which allows for specialisation for the role of log truck driver.

Skill Set Requirements

FWPCOR2203 Follow environmental care procedures

FWPCOR2205 Follow WHS policies and procedures

FWPCOT3261 Transport forestry logs using trucks

Target Group

This skill set is for people wishing to work as a log truck driver in commercial forest operations in the harvesting and haulage sector of the forest and wood products industry.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for driving a log truck, as well as knowing the workplace procedures for loading and unloading log trucks. They may meet state and territory licensing requirements for driving heavy vehicles that transport forestry logs, depending on individual state requirements.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00027 Skill set for a forestry produce truck driver

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2 to FWP Release 2.0.

FPI11 V2

Primary release with FPI11 Training Package V2

Description

Not applicable.

Pathways Information

This skill set provides credit towards a number of qualifications, including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

In a number of jurisdictions, some of the units in this skill set are required for the issuing of licences to drive heavy vehicles, which include vehicles required to transport forestry produce from a forestry harvesting site.

Skill Set Requirements

FWPCOR2203 Follow environmental care procedures

FWPCOR2205 Follow WHS policies and procedures

FWPCOT3262 Transport forestry produce using trucks

Target Group

This skill set is for people wishing to work as a truck driver transporting forestry produce (apart from forestry logs) in commercial forest operations in the harvesting and haulage sector of the forest and wood products industry.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for driving a heavy vehicle used for the transport of forestry produce. They may meet state and territory licensing requirements for driving heavy vehicles that transport forestry produce, depending on individual state requirements.

FWPSS00028 Skill set for a finger jointing plant operator

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2 to FWP Release 2.0.

FPI11 V2

Primary release with FPI11 Training Package V2

Description

Not applicable.

Pathways Information

These units provide credit towards a number of qualifications, including:

FWP30316 Certificate III in Sawmilling and Processing

FWP30516 Certificate III in Timber Manufactured Products

FWP30816 Certificate III in Wood Machining

Licensing/Regulatory Information

General workplace legislative and regulatory requirements apply to the units in this skill set; however there are no specific licensing or certification requirements at the time of publication.

Skill Set Requirements

FWPCOT2209 Produce finger jointed timber

FWPCOT3207 Set up, operate and maintain finger jointing operations

FWPCOT3212 Replace saws, blades and guides

MEM18011C Shut down and isolate machines/equipment

Target Group

This skill set is for people who set up, operate and maintain finger jointing operations in a forest and wood products factory setting. Their job role will involve planning production parameters, maintaining and replacing equipment, resolving problems, shutting down and isolating equipment as required to produce finger jointed timber to required specifications.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for setting up, operating and maintaining finger jointing operations to produce finger jointed timber according to established production parameters.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00029 Skill set for a finger jointing moulder operator

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0. Updated units of competency.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0. This skill set supersedes and is equivalent to FPISS00030 Skill set for a finger jointing moulder operator.

Description

This skill set reflects the job role of wood machinists who dress, profile, finger joint and assess timber against specifications in a sawmill environment.

Pathways Information

These units provide credit towards a number of qualifications including:

- FWP30316 Certificate III in Sawmilling and Processing
- FWP30516 Certificate III in Timber Manufactured Products
- FWP30816 Certificate III in Wood Machining

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR3204 Visually assess materials
- FWPCOT3217 Assess and maintain cutter performance
- FWPCOT3266 Dress timber using multi-headed machines

© Commonwealth of Australia, 2025 Skills Insight

Target Group

This skill set is for people who assess and maintain cutter performance and dressing boards using multi-headed machines in a forest products factory setting that produces finger jointed timber.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package* meet the industry requirements for planning and evaluating dressing conditions and processes to set, adjust and maintain cutters and equipment for finger jointed timber. The competencies also meet industry requirements to inspect and test moulding and planing machines and other associated equipment for moulder operators producing finger jointed timber.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00030 Skill set for a finger jointing grader operator

Modification History

FWP Release 2.0
