FWP Forest and Wood Products Training Package

Release: 4.0

CONTENTS

FWP10116 Certificate I in Forest and Forest Products 29
FWP20116 Certificate II in Forest Growing and Management 31
FWP20216 Certificate II in Harvesting and Haulage 37
FWP20316 Certificate II in Sawmilling and Processing 42
FWP20416 Certificate II in Wood Panel Products 47
FWP20516 Certificate II in Timber Manufactured Products 52
FWP20616 Certificate II in Timber Merchandising 57
FWP20716 Certificate II in Timber Truss and Frame Design and Manufacture 62
FWP30116 Certificate III in Forest Growing and Management 66
FWP30216 Certificate III in Harvesting and Haulage 73
FWP30316 Certificate III in Sawmilling and Processing 80
FWP30416 Certificate III in Wood Panel Products 88
FWP30516 Certificate III in Timber Manufactured Products 95
FWP30616 Certificate III in Timber Merchandising 101
FWP30716 Certificate III in Sawdoctoring 105
FWP30816 Certificate III in Woodmachining 109
FWP30916 Certificate III in Timber Truss and Frame Design and Manufacture 114
FWP40116 Certificate IV in Forest Operations 120
FWP40216 Certificate IV in Timber Processing 126
FWP40316 Certificate IV in Timber Truss and Frame Manufacture 132
FWP40416 Certificate IV in Timber Truss and Frame Design 137
FWP50116 Diploma of Forest and Forest Products 143
FWP50216 Diploma of Timber Truss and Frame Manufacture 151
FWP50316 Diploma of Timber Truss and Frame Design 155
FWP60116 Advanced Diploma of Forest Industry Sustainability 160
AHCARB206 Operate and maintain stump grinding machines 165
Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines 169
AHCARB307 Use advanced climbing techniques 174
Assessment Requirements for AHCARB307 Use advanced climbing techniques 177
AHCARB312 Use standard climbing techniques to access trees 181
Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees 184
AHCBUS502 Market products and services 188
Assessment Requirements for AHCBUS502 Market products and services 192
AHCCHM201 Apply chemicals under supervision 194
Assessment Requirements for AHCCHM201 Apply chemicals under supervision 197
AHCCHM303 Prepare and apply chemicals 199
Assessment Requirements for AHCCHM303 Prepare and apply chemicals 203
AHCCHM304 Transport and store chemicals 205
Assessment Requirements for AHCCHM304 Transport and store chemicals 208
AHCCHM401 Develop procedures to minimise risks in the use of chemicals 210
Assessment Requirements for AHCCHM401 Develop procedures to minimise risks in the use of chemicals 213
AHCCHM402A Plan and implement a chemical use program 215
AHCFIR201 Assist with prescribed burning 221
Assessment Requirements for AHCFIR201 Assist with prescribed burning 224
AHCILM201 Maintain cultural places 226
Assessment Requirements for AHCILM201 Maintain cultural places 228

© Commonwealth of Australia, 2025 Skills Insight
Approved Page 2 of 4021
© Commonwealth of Australia, 2025 Skills Insight

AHCILM201A Maintain cultural places 230
AHCILM401A Protect places of cultural significance 235
AHCINF202 Install, maintain and repair farm fencing 241
Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing ...244
AHCINF203 Maintain properties and structures 246
Assessment Requirements for AHCINF203 Maintain properties and structures 248
AHCINF303 Plan and construct conventional fencing 250
Assessment Requirements for AHCINF303 Plan and construct conventional fencing 252
AHCIRG306 Troubleshoot irrigation systems 254
Assessment Requirements for AHCIRG306 Troubleshoot irrigation systems 256
AHCIRG331 Install pressurised irrigation systems 257
Assessment Requirements for AHCIRG331 Install pressurised irrigation systems 260
AHCIRG333 Maintain pressurised irrigation systems 262
Assessment Requirements for AHCIRG333 Maintain pressurised irrigation systems 265
AHCIRG406A Plan on-site irrigation system installation and construction work 267
AHCIRG503 Design irrigation, drainage and water treatment systems 272
Assessment Requirements for AHCIRG503 Design irrigation, drainage and water treatment systems 276
AHCLSC302 Construct landscape features using concrete 278
Assessment Requirements for AHCLSC302 Construct landscape features using concrete281
AHCLSC304 Erect timber structures and features 283
Assessment Requirements for AHCLSC304 Erect timber structures and features 286
AHCMOM301 Coordinate machinery and equipment maintenance and repair 288
Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair 291
AHCMOM402 Supervise maintenance of property, machinery and equipment 293
Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment 296
AHCMOM402A Supervise maintenance of property machinery and equipment 298
AHCNAR303 Implement revegetation works 304
Assessment Requirements for AHCNAR303 Implement revegetation works 307
AHCNAR402A Plan the implementation of revegetation works 309
AHCNSY201 Pot up plants 315
Assessment Requirements for AHCNSY201 Pot up plants 317
AHCNSY202 Care for nursery plants 319
Assessment Requirements for AHCNSY202 Care for nursery plants 321
AHCNSY203 Undertake propagation activities 323
Assessment Requirements for AHCNSY203 Undertake propagation activities 325
AHCNSY301 Maintain nursery plants 327
Assessment Requirements for AHCNSY301 Maintain nursery plants 329
AHCNSY302 Receive and dispatch nursery products 331
Assessment Requirements for AHCNSY302 Receive and dispatch nursery products 334
AHCNSY306 Implement a propagation plan 336
Assessment Requirements for AHCNSY306 Implement a propagation plan 339
AHCNSY401 Plan a growing-on program 341
Assessment Requirements for AHCNSY401 Plan a growing-on program 344
AHCNSY402 Plan a propagation program 346
Assessment Requirements for AHCNSY402 Plan a propagation program 348
AHCNSY402A Plan a propagation program 350
AHCPGD402 Plan a plant establishment program 356
Assessment Requirements for AHCPGD402 Plan a plant establishment program 359
AHCPHT503 Manage a controlled growing environment 361
Assessment Requirements for AHCPHT503 Manage a controlled growing environment364

AHCPMG201 Treat weeds....366
Assessment Requirements for AHCPMG201 Treat weeds....368
AHCPMG202 Treat plant pests, diseases and disorders....370
Assessment Requirements for AHCPMG202 Treat plant pests, diseases and disorders....373
AHCPMG301 Control weeds....375
Assessment Requirements for AHCPMG301 Control weeds....378
AHCPMG302 Control plant pests, diseases and disorders....380
Assessment Requirements for AHCPMG302 Control plant pests, diseases and disorders383
AHCPMG402A Develop a pest management action plan within a local area....385
AHCPMG507 Develop a regional pest management plan....391
Assessment Requirements for AHCPMG507 Develop a regional pest management plan 394
AHCSAW201 Conduct erosion and sediment control activities....396
Assessment Requirements for AHCSAW201 Conduct erosion and sediment control activities....398
AHCSAW302 Implement erosion and sediment control measures....400
Assessment Requirements for AHCSAW302 Implement erosion and sediment control measures....402
AHCSAW302A Implement erosion and sediment control measures....404
AHCWAT502 Manage water systems....409
Assessment Requirements for AHCWAT502 Manage water systems....412
AHCWRK201 Observe and report on weather....414
Assessment Requirements for AHCWRK201 Observe and report on weather....417
AHCWRK203 Operate in isolated and remote situations....419
Assessment Requirements for AHCWRK203 Operate in isolated and remote situations 422
AHCWRK302 Monitor weather conditions....424
Assessment Requirements for AHCWRK302 Monitor weather conditions....426
AHCWRK304 Respond to rescue incidents....428
Assessment Requirements for AHCWRK304 Respond to rescue incidents....430
AHCWRK505 Manage trial and research material....432
Assessment Requirements for AHCWRK505 Manage trial and research material....434
AURTGA001 Drive and manoeuvre trailers....436
Assessment Requirements for AURTGA001 Drive and manoeuvre trailers....439
BSBADM311 Maintain business resources....442
Assessment Requirements for BSBADM311 Maintain business resources....445
BSBAUD501 Initiate a quality audit....447
Assessment Requirements for BSBAUD501 Initiate a quality audit....451
BSBCMM401 Make a presentation....453
Assessment Requirements for BSBCMM401 Make a presentation....456
BSBCMM402 Implement effective communication strategies....458
Assessment Requirements for BSBCMM402 Implement effective communication strategies....461
BSBCRT402 Collaborate in a creative process....463
Assessment Requirements for BSBCRT402 Collaborate in a creative process....467
BSBCUE301 Use multiple information systems....469
Assessment Requirements for BSBCUE301 Use multiple information systems....473
BSBCUE305 Process credit applications....475
Assessment Requirements for BSBCUE305 Process credit applications....479
BSBCUE306 Process complex accounts....481
Assessment Requirements for BSBCUE306 Process complex accounts....485
BSBCUS301 Deliver and monitor a service to customers....487
Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers.491
BSBCUS401 Coordinate implementation of customer service strategies....493

Approved Page 4 of 4021
© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for BSBCUS401 Coordinate implementation of customer service strategies 497
BSBCUS402 Address customer needs....499
Assessment Requirements for BSBCUS402 Address customer needs 502
BSBCUS501 Manage quality customer service....504
Assessment Requirements for BSBCUS501 Manage quality customer service 507
BSBFIA301 Maintain financial records....509
Assessment Requirements for BSBFIA301 Maintain financial records 512
BSBFIM501 Manage budgets and financial plans....514
Assessment Requirements for BSBFIM501 Manage budgets and financial plans 517
BSBFIM801 Manage financial resources....519
Assessment Requirements for BSBFIM801 Manage financial resources 523
BSBFLM303 Contribute to effective workplace relationships 525
Assessment Requirements for BSBFLM303 Contribute to effective workplace relationships 529
BSBFLM305 Support operational plan 531
Assessment Requirements for BSBFLM305 Support operational plan....534
BSBFLM312 Contribute to team effectiveness 536
Assessment Requirements for BSBFLM312 Contribute to team effectiveness....539
BSBINM201 Process and maintain workplace information 541
Assessment Requirements for BSBINM201 Process and maintain workplace information544
BSBINM301 Organise workplace information 546
Assessment Requirements for BSBINM301 Organise workplace information....549
BSBINM401 Implement workplace information system....551
Assessment Requirements for BSBINM401 Implement workplace information system ..554
BSBINM501 Manage an information or knowledge management system 556
Assessment Requirements for BSBINM501 Manage an information or knowledge management system....560
BSBINN201 Contribute to workplace innovation....562
Assessment Requirements for BSBINN201 Contribute to workplace innovation 565
BSBINN501 Establish systems that support innovation....567
Assessment Requirements for BSBINN501 Establish systems that support innovation ...571
BSBINN502 Build and sustain an innovative work environment....573
Assessment Requirements for BSBINN502 Build and sustain an innovative work environment....577
BSBINN601 Lead and manage organisational change 579
Assessment Requirements for BSBINN601 Lead and manage organisational change....583
BSBITS401 Maintain business technology 585
Assessment Requirements for BSBITS401 Maintain business technology....588
BSBITS411 Maintain and implement digital technology 590
Assessment Requirements for BSBITS411 Maintain and implement digital technology..593
BSBITU201 Produce simple word processed documents....595
Assessment Requirements for BSBITU201 Produce simple word processed documents .598
BSBITU306 Design and produce business documents....600
Assessment Requirements for BSBITU306 Design and produce business documents 603
BSBLDR402 Lead effective workplace relationships 605
Assessment Requirements for BSBLDR402 Lead effective workplace relationships....609
BSBLDR403 Lead team effectiveness 611
Assessment Requirements for BSBLDR403 Lead team effectiveness....614
BSBLDR803 Develop and cultivate collaborative partnerships and relationships....616
Assessment Requirements for BSBLDR803 Develop and cultivate collaborative partnerships and relationships 620
BSBLED401 Develop teams and individuals....622

Approved Page 5 of 4021

Assessment Requirements for BSBLED401 Develop teams and individuals 626
BSBLED501 Develop a workplace learning environment.....628
Assessment Requirements for BSBLED501 Develop a workplace learning environment 632
BSBMGT402 Implement operational plan.....634
Assessment Requirements for BSBMGT402 Implement operational plan 638
BSBMGT403 Implement continuous improvement.....640
Assessment Requirements for BSBMGT403 Implement continuous improvement 643
BSBMGT502 Manage people performance.....645
Assessment Requirements for BSBMGT502 Manage people performance 649
BSBMGT516 Facilitate continuous improvement 651
Assessment Requirements for BSBMGT516 Facilitate continuous improvement.....655
BSBMGT517 Manage operational plan.....657
Assessment Requirements for BSBMGT517 Manage operational plan 661
BSBMGT616 Develop and implement strategic plans.....663
Assessment Requirements for BSBMGT616 Develop and implement strategic plans 667
BSBMKG501 Identify and evaluate marketing opportunities 669
Assessment Requirements for BSBMKG501 Identify and evaluate marketing opportunities 672
BSBPMG415 Apply project risk management techniques 674
Assessment Requirements for BSBPMG415 Apply project risk management techniques677
BSBPMG416 Apply project procurement procedures.....679
Assessment Requirements for BSBPMG416 Apply project procurement procedures.....682
BSBPMG522 Undertake project work.....684
Assessment Requirements for BSBPMG522 Undertake project work 688
BSBRES401 Analyse and present research information.....690
Assessment Requirements for BSBRES401 Analyse and present research information ..694
BSBRES411 Analyse and present research information.....696
Assessment Requirements for BSBRES411 Analyse and present research information ..699
BSBRES801 Initiate and lead applied research 701
Assessment Requirements for BSBRES801 Initiate and lead applied research.....705
BSBRSK401 Identify risk and apply risk management processes 707
Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes 710
BSBRSK501 Manage risk 712
Assessment Requirements for BSBRSK501 Manage risk 716
BSBSMB404 Undertake small business planning.....718
Assessment Requirements for BSBSMB404 Undertake small business planning 722
BSBSMB421 Manage small business finances 724
Assessment Requirements for BSBSMB421 Manage small business finances 727
BSBSUS501 Develop workplace policy and procedures for sustainability.....729
Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability 733
BSBWHS503 Contribute to the systematic management of WHS risk 735
Assessment Requirements for BSBWHS503 Contribute to the systematic management of WHS risk 739
BSBWOR204 Use business technology 742
Assessment Requirements for BSBWOR204 Use business technology.....745
BSBWOR301 Organise personal work priorities and development 747
Assessment Requirements for BSBWOR301 Organise personal work priorities and development.....750
BSBWOR501 Manage personal work priorities and professional development 752
Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development.....755

BSBWOR502 Lead and manage team effectiveness 757
Assessment Requirements for BSBWOR502 Lead and manage team effectiveness....761
BSBWRK506A Coordinate research and analysis 763
BSBWRT401 Write complex documents....770
Assessment Requirements for BSBWRT401 Write complex documents....773
CPCCBC4001A Apply building codes and standards to the construction process for low rise building projects....775
CPCCBC4004A Identify and produce estimated costs for building and construction projects....783
CPCCBC4005A Produce labour and material schedules for ordering....791
CPCCBC4014A Prepare simple building sketches and drawings....798
CPCCBC4024A Resolve business disputes....805
CPCCCA2011A Handle carpentry materials....812
CPCCCA3006B Erect roof trusses....822
CPCCCM1015A Carry out measurements and calculations....832
CPCCLDG3001A Licence to perform dogging....840
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry....850
CPCCSV5010A Interact with clients in a regulated environment 864
CPCCSV5011A Apply building codes and standards to residential buildings 873
CPCCSV5012A Assess timber-framed designs for one and two storey buildings 881
CPCCSV5015A Assess structural requirements for domestic scale buildings....890
CPCSUS4001A Implement and monitor environmentally sustainable work practices 899
CPPSEC1002A Apply retail security procedures 912
CPPSEC3007A Maintain security of environment....921
CUADES403 Research and apply techniques in spatial design....930
Assessment Requirements for CUADES403 Research and apply techniques in spatial design 933
FWPCOR2201 Work effectively in the forest and forest products industry....935
Assessment Requirements for FWPCOR2201 Work effectively in the forest and forest products industry....938
FWPCOR2202 Communicate and interact effectively in the workplace....940
Assessment Requirements for FWPCOR2202 Communicate and interact effectively in the workplace....943
FWPCOR2203 Follow environmental care procedures 945
Assessment Requirements for FWPCOR2203 Follow environmental care procedures....948
FWPCOR2204 Follow fire prevention procedures....950
Assessment Requirements for FWPCOR2204 Follow fire prevention procedures....953
FWPCOR2205 Follow WHS policies and procedures....955
FPICOR2205B Follow OHS policies and procedures....957
Assessment Requirements for FWPCOR2205 Follow WHS policies and procedures....958
FWPCOR2207 Maintain quality and product care....960
FPICOR2207B Maintain quality and product care....962
Assessment Requirements for FWPCOR2207 Maintain quality and product care....963
FWPCOR3201 Implement safety, health and environment policies and procedures....966
Assessment Requirements for FWPCOR3201 Implement safety, health and environment policies and procedures 969
FWPCOR3202 Conduct quality and product care procedures 972
Assessment Requirements for FWPCOR3202 Conduct quality and product care procedures 975
FWPCOR3203 Evaluate fire potential and prevention 978
FPICOR3203B Evaluate fire potential and prevention....980
Assessment Requirements for FWPCOR3203 Evaluate fire potential and prevention....981

FWPCOR3204 Visually assess materials 984
Assessment Requirements for FWPCOR3204 Visually assess materials 987
FWPCOR4201 Monitor safety, health and environment policies and procedures 989
Assessment Requirements for FWPCOR4201 Monitor safety, health and environment policies and procedures 992
FWPCOR4202 Monitor and review forestry operations 994
Assessment Requirements for FWPCOR4202 Monitor and review forestry operations 997
FWPCOR4203 Monitor quality and product care procedures 1000
Assessment Requirements for FWPCOR4203 Monitor quality and product care procedures 1003
FWPCOR6201 Manage sustainability in the workplace 1006
Assessment Requirements for FWPCOR6201 Manage sustainability in the workplace. 1009
FWPCOR6202 Implement practices to maximise value from wood residues 1012
Assessment Requirements for FWPCOR6202 Implement practices to maximise value from wood residues 1015
FWPCOT2201 Stack and bind material 1018
Assessment Requirements for FWPCOT2201 Stack and bind material 1021
FWPCOT2202 Rack material 1024
Assessment Requirements for FWPCOT2202 Rack material 1027
FWPCOT2203 Finish and pack products 1029
Assessment Requirements for FWPCOT2203 Finish and pack products 1033
FWPCOT2205 Tail out materials 1035
Assessment Requirements for FWPCOT2205 Tail out materials 1038
FWPCOT2207 Dress boards and timber 1041
Assessment Requirements for FWPCOT2207 Dress boards and timber 1045
FWPCOT2208 Resaw boards and timber 1048
Assessment Requirements for FWPCOT2208 Resaw boards and timber 1052
FWPCOT2209 Produce finger jointed timber 1055
Assessment Requirements for FWPCOT2209 Produce finger jointed timber 1059
FWPCOT2210 Tally material 1062
Assessment Requirements for FWPCOT2210 Tally material 1065
FWPCOT2211 Produce pointed timber products 1068
Assessment Requirements for FWPCOT2211 Produce pointed timber products 1071
FWPCOT2212 Grade hardwood sawn and milled products 1074
Assessment Requirements for FWPCOT2212 Grade hardwood sawn and milled products 1077
FWPCOT2213 Grade softwood sawn and milled products 1079
Assessment Requirements for FWPCOT2213 Grade softwood sawn and milled products 1082
FWPCOT2214 Grade cypress sawn and milled products 1084
Assessment Requirements for FWPCOT2214 Grade cypress sawn and milled products 1087
FWPCOT2215 Visually stress grade hardwood 1090
Assessment Requirements for FWPCOT2215 Visually stress grade hardwood 1093
FWPCOT2216 Visually stress grade softwood 1095
Assessment Requirements for FWPCOT2216 Visually stress grade softwood 1098
FWPCOT2217 Visually stress grade cypress 1100
Assessment Requirements for FWPCOT2217 Visually stress grade cypress 1103
FWPCOT2218 Cross cut materials with a fixed saw 1105
Assessment Requirements for FWPCOT2218 Cross cut materials with a fixed saw 1108
FWPCOT2219 Use hand-held tools 1111
Assessment Requirements for FWPCOT2219 Use hand-held tools 1114
FWPCOT2220 Select trees for tending operations 1118
Assessment Requirements for FWPCOT2220 Select trees for tending operations 1121
FWPCOT2222 Produce laminated beams 1124
Assessment Requirements for FWPCOT2222 Produce laminated beams 1128

Assessment Requirements for FWPCOT3219 Produce standard truss or frame plans and details using computers 1344
FWPCOT3220 Quote and interpret from computerised timber manufactured product plans 1346
Assessment Requirements for FWPCOT3220 Quote and interpret from computerised timber manufactured product plans 1349
FWPCOT3221 Rehabilitate tracks, quarries and landings 1351
Assessment Requirements for FWPCOT3221 Rehabilitate tracks, quarries and landings 1354
FWPCOT3222 Present forestry information and interpretations programs 1357
Assessment Requirements for FWPCOT3222 Present forestry information and interpretations programs 1360
FWPCOT3224 Plan and monitor equipment maintenance 1362
Assessment Requirements for FWPCOT3224 Plan and monitor equipment maintenance 1365
FWPCOT3225 Mechanically stress grade timber 1367
Assessment Requirements for FWPCOT3225 Mechanically stress grade timber 1370
FWPCOT3227 Receive and measure logs 1373
Assessment Requirements for FWPCOT3227 Receive and measure logs 1376
FWPCOT3230 Operate automated stacking equipment 1378
Assessment Requirements for FWPCOT3230 Operate automated stacking equipment 1381
FWPCOT3231 Operate steam boiler 1383
Assessment Requirements for FWPCOT3231 Operate steam boiler 1386
FWPCOT3232 Operate heat plant 1389
Assessment Requirements for FWPCOT3232 Operate heat plant 1392
FWPCOT3233 Sharpen and align blades and knives 1394
Assessment Requirements for FWPCOT3233 Sharpen and align blades and knives 1397
FWPCOT3234 Cut material using CNC sizing machines 1400
Assessment Requirements for FWPCOT3234 Cut material using CNC sizing machines 1404
FWPCOT3235 Machine material using CNC machining and processing centres 1407
Assessment Requirements for FWPCOT3235 Machine material using CNC machining and processing centres 1411
FWPCOT3236 Coordinate stock control procedures 1414

Assessment Requirements for FWPCOT3236 Coordinate stock control procedures 1417
FWPCOT3237 Produce templates.....1420
Assessment Requirements for FWPCOT3237 Produce templates 1423
FWPCOT3238 Operate a pole saw.....1426
Assessment Requirements for FWPCOT3238 Operate a pole saw 1429
FWPCOT3239 Create drawings using computer aided design systems 1431
Assessment Requirements for FWPCOT3239 Create drawings using computer aided design systems 1434
FWPCOT3240 Grade heavy structural/engineered products 1437
Assessment Requirements for FWPCOT3240 Grade heavy structural/engineered products1440
FWPCOT3241 Assemble timber wall frames.....1443
Assessment Requirements for FWPCOT3241 Assemble timber wall frames 1446
FWPCOT3242 Lay up timber roof trusses.....1450
Assessment Requirements for FWPCOT3242 Lay up timber roof trusses 1453
FWPCOT3243 Operate a truss press.....1457
Assessment Requirements for FWPCOT3243 Operate a truss press 1460
FWPCOT3245 Grade, sort and mark materials.....1463
Assessment Requirements for FWPCOT3245 Grade, sort and mark materials 1466
FWPCOT3246 Test heavy structural/engineered products.....1468
Assessment Requirements for FWPCOT3246 Test heavy structural/engineered products1471
FWPCOT3247 Select timber for forestry operations 1473
Assessment Requirements for FWPCOT3247 Select timber for forestry operations.....1476
FWPCOT3248 Dry timber in solar assisted kilns 1478
Assessment Requirements for FWPCOT3248 Dry timber in solar assisted kilns 1481
FWPCOT3249 Select timber preservation techniques 1483
Assessment Requirements for FWPCOT3249 Select timber preservation techniques....1485
FWPCOT3250 Prepare timber to meet import/export compliance requirements 1488
Assessment Requirements for FWPCOT3250 Prepare timber to meet import/export compliance requirements 1491
FWPCOT3251 Promote the carbon benefits of wood products.....1493
Assessment Requirements for FWPCOT3251 Promote the carbon benefits of wood products 1496
FWPCOT3252 Use environmental care procedures to undertake fire salvage operations1498
Assessment Requirements for FWPCOT3252 Use environmental care procedures to undertake fire salvage operations 1501
FWPCOT3253 Convert timber residue into products for further use.....1504
Assessment Requirements for FWPCOT3253 Convert timber residue into products for further use 1507
FWPCOT3254 Implement environmentally sustainable work practices in the work area/work site 1509
Assessment Requirements for FWPCOT3254 Implement environmentally sustainable work practices in the work area/work site 1512
FWPCOT3255 Apply silvicultural principles.....1514
Assessment Requirements for FWPCOT3255 Apply silvicultural principles 1517
FWPCOT3256 Apply biodiversity protection principles 1520
Assessment Requirements for FWPCOT3256 Apply biodiversity protection principles1523
FWPCOT3257 Follow cultural heritage requirements 1526
Assessment Requirements for FWPCOT3257 Follow cultural heritage requirements...1529
FWPCOT3258 Comply with soil and water protection.....1532
Assessment Requirements for FWPCOT3258 Comply with soil and water protection ..1535
FWPCOT3259 Operate a four wheel drive on unsealed roads.....1538
Assessment Requirements for FWPCOT3259 Operate a four wheel drive on unsealed roads.....1542

FWPCOT3260 Recover four wheel drive vehicles 1547
Assessment Requirements for FWPCOT3260 Recover four wheel drive vehicles 1550
FWPCOT3261 Transport forestry logs using trucks 1553
Assessment Requirements for FWPCOT3261 Transport forestry logs using trucks 1557
FWPCOT3262 Transport forestry produce using trucks 1561
Assessment Requirements for FWPCOT3262 Transport forestry produce using trucks 1565
FWPCOT3263 Maintain and contribute to energy efficiency 1568
Assessment Requirements for FWPCOT3263 Maintain and contribute to energy efficiency 1571
FWPCOT3264 Build and maintain timber stacks 1573
Assessment Requirements for FWPCOT3264 Build and maintain timber stacks 1576
FWPCOT3265 Cut timber or engineered wood product to profile 1580
Assessment Requirements for FWPCOT3265 Cut timber or engineered wood product to profile 1584
FWPCOT3266 Dress timber using multi-headed machines 1588
Assessment Requirements for FWPCOT3266 Dress timber using multi-headed machines 1592
FWPCOT3267 Mechanically stress-grade engineered wood panels 1595
Assessment Requirements for FWPCOT3267 Mechanically stress-grade engineered wood panels 1598
FWPCOT3268 Plane and sand engineered wood products 1601
Assessment Requirements for FWPCOT3268 Plane and sand engineered wood products 1605
FWPCOT3269 Provide specialised timber product solutions 1608
Assessment Requirements for FWPCOT3269 Provide specialised timber product solutions 1612
FWPCOT3270 Grade and mark logs 1615
Assessment Requirements for FWPCOT3270 Grade and mark logs 1619
FWPCOT4201 Produce complex truss and frame plans and details using computers 1622
Assessment Requirements for FWPCOT4201 Produce complex truss and frame plans and details using computers 1625
FWPCOT4202 Design timber structures 1628
Assessment Requirements for FWPCOT4202 Design timber structures 1631
FWPCOT4203 Plan and coordinate product assembly 1633
Assessment Requirements for FWPCOT4203 Plan and coordinate product assembly 1637
FWPCOT4204 Schedule and coordinate load shifting 1640
Assessment Requirements for FWPCOT4204 Schedule and coordinate load shifting 1643
FWPCOT4205 Coordinate log debarking operations 1646
Assessment Requirements for FWPCOT4205 Coordinate log debarking operations 1649
FWPCOT4206 Plan and coordinate boiler operations 1651
Assessment Requirements for FWPCOT4206 Plan and coordinate boiler operations 1654
FWPCOT4207 Plan and coordinate heat plant operations 1657
Assessment Requirements for FWPCOT4207 Plan and coordinate heat plant operations 1660
FWPCOT4208 Implement workplace sustainability practices 1663
Assessment Requirements for FWPCOT4208 Implement workplace sustainability practices 1666
FWPCOT5201 Implement sustainable forestry practices 1668
Assessment Requirements for FWPCOT5201 Implement sustainable forestry practices 1671
FWPCOT5202 Manage forestry information and interpretations programs 1674
Assessment Requirements for FWPCOT5202 Manage forestry information and interpretations programs 1677
FWPCOT5203 Manage installation and commissioning of equipment 1680
Assessment Requirements for FWPCOT5203 Manage installation and commissioning of equipment 1683
FWPCOT5204 Organise enterprise maintenance programs 1686
Assessment Requirements for FWPCOT5204 Organise enterprise maintenance programs 1690
FWPCOT5205 Develop biohazard contingency plans 1693

FWP10116 Certificate I in Forest and Forest Products

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI10111 Certificate I in Forest and Forest Products (Release 3)

Qualification Description

This qualification is designed for job roles in the forest and forest products industry.

Job roles

This qualification has two employment pathways for operational environments in the forest and forest products industry.

- Arboriculture Worker
- Forestry Worker

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP10116 Certificate I in Forest and Forest Products, competency must be achieved in **seven (7)** units of competency.

- **five (5)** core units plus
- **two (2)** units from the elective group, the total of which can include one elective unit from this or any endorsed Training Package or State/Territory accredited course recommended for packaging at Certificate I or II level.

Elective units must be relevant to work undertaken in the forest and forest products sector of the industry.

CORE UNITS

© Commonwealth of Australia, 2025 Skills Insight

- FWPCOR2201 Work effectively in the forest and forest products industry
- FWPCOR2202 Communicate and interact effectively in the workplace
- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOR2207 Maintain quality and product care

ELECTIVE UNITS

- AHCILM201A Maintain cultural places
- BSBINM201 Process and maintain workplace information
- BSBWOR204 Use business technology
- FWPFGM2201 Collect seed
- FWPFGM2214 Maintain visitor sites
- PUATEA001B Work in a team

FWP20116 Certificate II in Forest Growing and Management

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification has seven employment pathways for typical operational environments of forest growing and management. These are:

- Arboriculture Worker
- Farm Forestry Worker
- Forestry Worker
- Nursery Worker
- Plantation Establishment Worker
- Plantation Forest Officer
- Silviculturalist

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP20116 Certificate II in Forest Growing and Management, competency must be achieved in **thirteen (13)** units of competency.

six (6) core units of competency

seven (7) units of competency from the elective group, consisting of:

© Commonwealth of Australia, 2025 Skills Insight

- 3 units from Group A
- 4 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the forest growing and management sector of the industry.

FWP20316 Certificate II in Sawmilling and Processing

Modification History

Release	**Comments**
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification is designed for job roles in the sawmilling and processing sector of the forest and forest products industry.

This qualification has five employment pathways for typical operational environments of sawmilling and processing. These are:

- Kiln Worker
- Timber Grader
- Treatment Plant Worker
- Production Worker
- Sawmill Worker

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 5 core units plus
  - 8 elective units.

© Commonwealth of Australia, 2025 Skills Insight

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 from Group A electives listed below
- 5 from Group A and/or Group B electives listed below, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

FWP20416 Certificate II in Wood Panel Products

Modification History

Release	**Comment**s
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification is designed for job roles in the wood panel products sector of the forest and forest products industry.

This qualification has three employment pathways for typical operational environments of wood panel products. These are:

- Production Worker (Laminates)
- Production Worker (Panel and Board)
- Production Worker (Veneer)

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 5 core units plus
  - 8 elective units.

© Commonwealth of Australia, 2025 Skills Insight

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 from Group A electives listed below
- 5 from Group A and/or Group B electives listed below, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

Core Units

FWP20516 Certificate II in Timber Manufactured Products

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI20511 Certificate II in Timber Manufactured Products (Release 4)

Qualification Description

This qualification is designed for job roles in the timber manufactured products sector of the forest and wood products industry.

Job roles

This qualification has six employment pathways for operational environments in the forest and forest products industry. These are:

- Grader
- Manufacturing Assistant (Timber Products)
- Saw Operator
- Timber Manufacturing Worker
- Timber Products Worker
- Timber Puller

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP20516 Certificate II in Timber Manufactured Products competency must be achieved in **thirteen (13)** units of competency.

five (5) core units of competency

© Commonwealth of Australia, 2025 Skills Insight

eight (8) units of competency from the elective group, consisting of:

- 3 units from Group A
- 5 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber manufactured products sector of the industry.

FWP20616 Certificate II in Timber Merchandising

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI20611 Certificate II in Timber Merchandising (Release 4)

Qualification Description

This qualification is designed for job roles in the timber merchandising sector of the forest and forest products industry.

Job roles

This qualification has one employment pathway for timber merchandising. This is:

- Customer Service / Sales Assistant (Retail or Wholesale)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP20616 Certificate II in Timber Merchandising, competency must be achieved in **thirteen (13)** units of competency.

six (6) core units of competency

seven (7) units of competency from the elective group, consisting of:

- 3 units from Group A

© Commonwealth of Australia, 2025 Skills Insight

- 4 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber merchandising sector of the industry.

FWP30116 Certificate III in Forest Growing and Management

Modification History

Release	**Comments**
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification is designed for job roles in the forest growing and management sector of the forest and forest products industry.

This qualification has seven employment pathways for typical operational environments of forest growing and management. These are:

- Arboriculture Technician
- Farm Forestry Technician
- Forestry Technician
- Nursery Technician
- Supervisor (Forestry Operations)
- Tree Planter
- Silviculturalist

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:

© Commonwealth of Australia, 2025 Skills Insight

- 6 core units plus
- 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 from Group A electives listed below
- 4 from Group A and/or Group B electives listed below, the total of which can include up to 2 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Core Units

FWP30216 Certificate III in Harvesting and Haulage

Modification History

Release	**Comment**s
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification is designed for job roles in the harvesting and haulage sector of the forest and forest products industry.

This qualification has eleven employment pathways for typical operational environments of harvesting and haulage. These are:

- Bulldozer Operator
- Excavator Operator
- Feller Buncher Operator
- Forest Harvester
- Forwarder Operator
- Harvesting Technician
- In-field Chipper Operator
- Loader Operator
- Log truck driver
- Mobile Equipment Operator
- Skidder Operator

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Skills Insight

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 7 core units plus
  - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 from Group A electives listed below
- up to 4 from Group A and/or Group B electives listed below
- up to 2 from Group C electives listed below
- the total elective units can include up to 2 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Core Units

Unit code	Unit title
BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3202	Conduct quality and product care procedures
FWPCOR3203	Evaluate fire potential and prevention
HLTAID003	Provide first aid

Elective Units

Group A

Field	Unit code	Unit title
Harvesting Operations	AHCARB307	Use advanced climbing techniques
	FWPCOT3252	Use environmental care procedures to undertake fire salvage operations

FWP30316 Certificate III in Sawmilling and Processing

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the sawmilling and processing sector of the forest and forest products industry.

Job roles

This qualification has eleven employment pathways for typical operational environments of sawmilling and processing. These are:

- Benchman
- Chipper Operator
- Head Rig Operator
- Kiln Operator
- Machine Operator (e.g. Finger Jointing, Moulding, Planing)
- Production Technician
- Sawmilling Technician
- Sawyer
- Timber Grader
- Timber Products Technician
- Treatment Plant Operator

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Skills Insight

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 6 core units plus
  - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 units from Group A
- 5 units from Group A and/or Group B, the total of which can include up to 3 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the sawmilling and processing sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3202	Conduct quality and product care procedures
FWPCOR3204	Visually assess materials

Elective Units

Group A

Logyard and/or Material Preparation

FWPCOT3203	Weigh loads
FWPCOT3227	Receive and measure logs

Sawing Operations

FWPSAW320	Produce sawn green boards

© Commonwealth of Australia, 2025 Skills Insight

2	
FWPSAW3203	Break down logs
FWPSAW3204	Saw flitches and cants
FWPSAW3227	Select and saw logs in multi-species operations
FWPSAW3229	Operate a portable sawmill

Grading and Testing

FWPCOT3208	Test strength of joints
FWPCOT3225	Mechanically stress grade timber
FWPCOT3240	Grade heavy structural/engineered products
FWPCOT3245	Grade, sort and mark materials
FWPCOT3246	Test heavy structural/engineered products
FWPCOT3250	Prepare timber to meet import/export compliance requirements
FWPCOT3267	Mechanically stress-grade engineered wood panels
FWPSAW3223	Assess wood chips

Timber Products

FWPCOT2241	Apply wood and timber product knowledge
FWPCOT3206	Cut material using high speed optimiser
FWPCOT3207	Set up, operate and maintain finger jointing operations
FWPCOT3209	Set up, operate and maintain end matching operations
FWPCOT3230	Operate automated stacking equipment
FWPCOT3234	Cut material using CNC sizing machines

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT3235	Machine material using CNC machining and processing centres
FWPCOT3253	Convert timber residue into products for further use
FWPCOT3264	Build and maintain timber stacks
FWPCOT3266	Dress timber using multi-headed machines
FWPSAW3226	Saw logs using CNC optimising systems

Timber Drying and Treatment

AHCCHM303	Prepare and apply chemicals

FWP30416 Certificate III in Wood Panel Products

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the wood panel products sector of the forest and forest products industry.

Job roles

This qualification has seven employment pathways for typical operational environments of wood panel products. These are:

- Engineered Timber Products Technician / Operator
- Kiln Operator
- Production Technician / Operator (Laminates)
- Production Technician / Operator (Panel and Board)
- Production Technician / Operator (Veneer)
- Timber Fabricator
- Timber Fabricator (Laminates)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

© Commonwealth of Australia, 2025 Skills Insight

- 13 units of competency:
  - 6 core units plus
  - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 units from Group A
- 5 units from Group A and/or Group B, the total of which can include up to 3 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the wood panel products sector of the industry.

Core Units

FWP30616 Certificate III in Timber Merchandising

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI30611 Certificate III in Timber Merchandising (Release 4)

Qualification Description

This qualification is designed for job roles in the timber merchandising sector of the forest and forest products industry.

Job roles

This qualification has five employment pathways for typical operational environments of timber merchandising. These are:

- Customer Service / Sales Assistant (Retail or Wholesale)
- Customer Service Officer
- Sales and Merchandising Team Leader
- Sales and Merchandising Team Leader (Timber Products)
- Timber Advisor

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP30616 Certificate III in Timber Merchandising, competency must be achieved in **thirteen (13)** units of competency.

five (5) core units of competency

FWP30716 Certificate III in Sawdoctoring

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI30711 Certificate III in Sawdoctoring (Release 3)

Qualification Description

This qualification is designed for job roles in the sawmilling and processing sector of the forest and forest products industry.

Job roles

This qualification has three employment pathways for typical operational environments of sawmilling and processing. These are:

- Saw Maker
- Saw Repairer
- Sawdoctor

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP30716 Certificate III in Sawdoctoring, competency must be achieved in **twenty six (26)** units of competency.

- **ten (10)** core units of competency
- **sixteen (16)** units of competency from the elective group, the total of which can include up to 2 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

FWP30816 Certificate III in Woodmachining

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the sawmilling and processing sector of the forest and forest products industry.

Job roles

This qualification has one employment pathway for typical operational environments of sawmilling and processing. This is:

- Wood Machinist

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 27 units of competency:
  - 9 core units plus
  - 18 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

© Commonwealth of Australia, 2025 Skills Insight

- 13 units from Group A
- 5 units from Group B, the total of which can include up to 2 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the sawmilling and processing sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3202	Conduct quality and product care procedures
FWPCOT3201	Hand sharpen knives and blades
FWPCOT3204	Prepare and interpret sketches and drawings
FWPCOT3247	Select timber for forestry operations
FWPSAW3228	Apply principles of blade design to sawing procedures

Elective Units

Group A

Sawing Operations

FWPCOT2207	Dress boards and timber
FWPCOT2208	Resaw boards and timber
FWPCOT3206	Cut material using high speed optimiser
FWPCOT3207	Set up, operate and maintain finger jointing operations
FWPCOT3209	Set up, operate and maintain end matching operations
FWPCOT3214	Take off material quantities
FWPCOT3239	Create drawings using computer aided design systems

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT3265	Cut timber or engineered wood product to profile
FWPCOT3266	Dress timber using multi-headed machines
FWPTMM2202	Machine material
FWPTMM3202	Manufacture using joinery machines

Sawdoctoring

FWPCOT3210	Sharpen cutting tools
FWPCOT3212	Replace saws, blades and guides
FWPCOT3213	Manufacture cutting tools
FWPCOT3216	Assess and maintain saw performance
FWPCOT3217	Assess and maintain cutter performance
FWPCOT3233	Sharpen and align blades and knives
FWPCOT3237	Produce templates
FWPSAW3208	Sharpen circular saws
FWPSAW3210	File and set saws
FWPSAW3213	Level and tension circular saws
FWPSAW3218	Replace tungsten tips

Group B

Sawing Operations

FWPCOT2205	Tail out materials
FWPCOT2219	Use hand-held tools
FWPCOT2232	Cut material to shape using a saw

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT3234	Cut material using CNC sizing machines
FWPCOT3235	Machine material using CNC machining and processing centres
FWPSAW3226	Saw logs using CNC optimising systems
FWPTMM3201	Convert timber
FWPWPP2210	Cut panels to profile

Timber Products

FWPCOT2224	Band edges of panels
FWPTMM4203	Install and commission CNC software

Safety and Quality Processes

FWPCOT3263	Maintain and contribute to energy efficiency

Timber Grading and Testing

Select a maximum of 2 of the following

FWPCOT2212	Grade hardwood sawn and milled products
FWPCOT2213	Grade softwood sawn and milled products
FWPCOT2214	Grade cypress sawn and milled products
FWPCOT2215	Visually stress grade hardwood
FWPCOT2216	Visually stress grade softwood
FWPCOT2217	Visually stress grade cypress

Administration and Business

BSBWOR204	Use business technology

FWP30916 Certificate III in Timber Truss and Frame Design and Manufacture

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber truss and frame sector of the forest and forest products industry.

The outcome of this qualification can satisfy entry requirements into FWP40416 Certificate IV in Timber Truss and Frame Design by completing the following elective units:

- FWPCOT3204 Prepare and interpret sketches and drawings
- FWPCOT3214 Take off material quantities
- FWPCOT3218 Quote and interpret from manufactured timber product plans
- FWPCOT3220 Quote and interpret from computerised timber manufactured product plans
- FWPCOT3239 Create drawings using computer aided design systems

Plus at least one of the following specialist design units:

- FWPTMM3204 Interpret designs to prepare timber roof truss drawings and documents using computers
- FWPTMM3205 Interpret designs to prepare timber floor system drawings and documents using computers
- FWPTMM3206 Interpret designs to prepare timber wall frame drawings and documents using computers

Job roles

This qualification satisfies employment pathways for typical operational environments of timber truss and frame design, including:

- Designer (Timber truss and frame)
- Production fabricator (Timber truss and frame)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

© Commonwealth of Australia, 2025 Skills Insight

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 5 core units plus
  - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 8 units of competency from the elective groups A, B or C, the total of which can include up to 2 units recommended for packaging at Certificate II, Certificate III or Certificate IV in any endorsed Training Package or State/Territory accredited course

Elective units must be relevant to work undertaken in the timber truss and frame sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3202	Conduct quality and product care procedures

Elective Units

Group A

Specialist Design

FWPTMM3204	Interpret designs to prepare timber roof truss drawings and documents using computers

© Commonwealth of Australia, 2025 Skills Insight

FWPTMM3205	Interpret designs to prepare timber floor system drawings and documents using computers

FWP40216 Certificate IV in Timber Processing

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber processing and production sector of the forest and forest products industry.

Job roles

This qualification has eight employment pathways for typical forest operations environments. These are:

- Customer Service Manager (Wholesale)
- Sawmill Supervisor
- Production Supervisor
- Treatment Plant Supervisor
- Timber Advisor Supervisor
- Timber Manufacturing Supervisor
- Timber Supervisor (Wholesale)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

© Commonwealth of Australia, 2025 Skills Insight

- 14 units of competency:
  - 3 core units plus
  - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 units from Group A
- 8 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate III, IV or Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber processing and production sectors of the industry, including sawmilling and processing, wood panel products, timber manufactured products and timber merchandising.

Core Units

BSBLED401	Develop teams and individuals
FWPCOR4201	Monitor safety, health and environment policies and procedures
FWPCOR4203	Monitor quality and product care procedures

Elective Units

Group A

Logyard and/or Material Preparation

FWPCOT4205	Coordinate log debarking operations

Sawing Operations

FWPSAW4202	Plan and monitor saw log operations
FWPSAW4205	Plan and monitor timber conversion

Sawdoctoring

FWPCOT3216	Assess and maintain saw performance
FWPCOT3217	Assess and maintain cutter performance

© Commonwealth of Australia, 2025 Skills Insight

Timber Treatment & Drying

FWPCOT4206	Plan and coordinate boiler operations
FWPCOT4207	Plan and coordinate heat plant operations
FWPSAW4201	Plan and monitor timber treatment plant operations
FWPSAW4203	Coordinate timber drying operations

Grading & Testing

FWPTMM4204	Sample and test products to specifications
FWPWPP4202	Perform laboratory testing
PSPGEN062	Collect statistical data

Board & Veneer Production

FWPWPP4203	Plan and coordinate engineered wood panel production

Trusses & Frames

FWPCOT4201	Produce complex truss and frame plans and details using computers
FWPCOT4202	Design timber structures

Timber Products

FWPCOT4203	Plan and coordinate product assembly
FWPTMM4202	Diagnose and calculate production costs
FWPTMM4203	Install and commission CNC software

© Commonwealth of Australia, 2025 Skills Insight

FWPTMM4208	Construct prototypes and samples for timber structures

Retail

SIRRINV002	Control stock
SIRRMER003	Coordinate visual merchandising activities
SIRXSLS003	Achieve sales results
SITXCCS008	Develop and manage quality customer service practices
TLIR4002	Source goods/services and evaluate contractors

Machinery & Equipment

AHCMOM402	Supervise maintenance of property, machinery and equipment
TLIC4006	Drive multi-combination vehicle

Competitive Manufacturing

MSS403001	Review competitive systems and practices
MSS403010	Facilitate change in an organisation implementing competitive systems and practices

Group B

Load Handling

FWP40316 Certificate IV in Timber Truss and Frame Manufacture

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber truss and frame sector of the forest and forest products industry.

Job roles

This qualification has one employment pathway for typical truss and frame manufacturing environments. This is:

- Production Supervisor (Timber truss and frame)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
  - 3 core units plus
  - 14 elective units.

© Commonwealth of Australia, 2025 Skills Insight

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 14 units of competency from the elective group, the total of which can include up to 3 units recommended for packaging at Certificate III, IV or Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber truss and frame sector of the industry, including sawmilling and processing, wood panel products, timber manufactured products and timber merchandising.

Core Units

BSBLED401	Develop teams and individuals
FWPCOR4201	Monitor safety, health and environment policies and procedures
FWPCOR4203	Monitor quality and product care procedures

Elective Units

Forest

FWPCOT3239	Create drawings using computer aided design systems
FWPCOT4202	Design timber structures
FWPCOT4203	Plan and coordinate product assembly
FWPTMM4202	Diagnose and calculate production costs
FWPTMM4203	Install and commission CNC software
FWPTMM4205	Prepare and advise on a broad range of timber roof truss details using computers
FWPTMM4206	Prepare and advise on a broad range of timber floor system details using computers
FWPTMM4207	Prepare and advise on a broad range of timber wall frame details using computers
FWPTMM4208	Construct prototypes and samples for timber structures

FWP40416 Certificate IV in Timber Truss and Frame Design

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber timber truss and frame sector sector of the forest and forest products industry.

Job roles

This qualification has one employment pathway for typical truss and frame manufacturing environments. This is:

- Designer (Timber truss and frame)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

The outcome of this qualification can satisfy the entry requirement into FWP50316 Diploma of Timber Truss and Frame Design. For those seeking a pathway into that qualification, the entry requirement is the successful achievement of the following units, or demonstration of equivalent competence:

- FWPCOT4202 Design timber structures
- FWPTMM4201 Construct prototypes and samples
- MSAPMSUP390A Use structured problem solving tools
- CPCCBC4001A Apply building codes and standards to the construction process for low rise building projects
- CPCSUS4001A Implement and monitor environmentally sustainable work practices.

Plus at least one of the following units:

© Commonwealth of Australia, 2025 Skills Insight

- FWPTMM4205 Prepare and advise on a broad range of timber roof truss details using computers
- FWPTMM4206 Prepare and advise on a broad range of timber floor system
- FWPTMM4207 Prepare and advise on a broad range of timber wall frame details using computers.

Entry Requirements

The entry requirement for this qualification is the successful achievement of the following units contained in FWP30916 Certificate III Timber Truss and Frame Design and Manufacture or demonstration of equivalent competence:

- FWPCOT3204 Prepare and interpret sketches and drawings
- FWPCOT3214 Take off material quantities
- FWPCOT3218 Quote and interpret from manufactured timber product plans
- FWPCOT3220 Quote and interpret from computerised timber manufactured product plans
- FWPCOT3239 Create drawings using computer aided design systems.

Plus at least one of the following units:

- FWPTMM3204 Interpret designs to prepare timber roof truss drawings and documents using computers
- FWPTMM3205 Interpret designs to prepare timber floor system drawings and documents using computers
- FWPTMM3206 Interpret designs to prepare timber wall frame drawings and documents using computers.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
  - 3 core units plus
  - 14 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 1 unit from Group A
- at least 5 units from Group A and /or Group B
- the remaining units from Group A, B or C, the total of which may also include up to 3 units recommended for packaging at Certificate III, IV or Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the truss and frame industry.

FWP50116 Diploma of Forest and Forest Products

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the forest and forest products industry.

Job roles

This qualification has twelve employment pathway for typical management environments of forest and forest products industries. These are:

- Arboriculture Manager
- Forest Manager
- Forestry Manager
- Harvesting Manager
- Nursery Manager
- Plantation Establishment Manager
- Plantation Manager
- Production Manager
- Sawmill Manager
- Timber Advisory Manager
- Timber Manufacturing Manager
- Tree Farm Manager

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
  - 6 core units plus
  - 9 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 5 units from Group A
- 4 units from Group A and /or Group B, the total of which may also include up to 2 units recommended for packaging at Certificate IV, Diploma or Advanced Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the forest and wood products industry.

Core Units

BSBCUS501	Manage quality customer service
BSBMGT502	Manage people performance
BSBMGT516	Facilitate continuous improvement
BSBWHS503	Contribute to the systematic management of WHS risk
BSBWOR501	Manage personal work priorities and professional development
BSBWOR502	Lead and manage team effectiveness

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

Fire Control

PUALAW001 B	Protect and preserve incident scene

© Commonwealth of Australia, 2025 Skills Insight

PUAOPE016A *	Manage a multi-team sector
PUAFIR501B *	Conduct fire investigation and analysis activities
PUAFIR509B	Implement prevention strategies
PUAOPE007B *	Command agency personnel within a multi-agency emergency response

Breeding & Propagation

AHCPHT503	Manage a controlled growing environment
FWPFGM5212	Manage genetic resources
FWPFGM5215	Breed Trees

Site Establishment & Maintenance

AHCIRG503	Design irrigation, drainage and water treatment systems
AHCWAT502	Manage water systems
FWPFGM5201	Plan and manage an inventory program
FWPCOT5206	Implement forestry chain of custody certification system
FWPFGM5208	Manage road construction and maintenance
FWPFGM5214	Develop a native forest regeneration plan
FWPFGM5217	Promote plantations as a sustainable form of land use
LGAPLEM404A	Prepare and present geographic information systems data
LGAPLEM612B	Protect heritage and cultural assets

© Commonwealth of Australia, 2025 Skills Insight

Tree Growing & Maintenance

AHCPGD402	Plan a plant establishment program
AHCPMG507	Develop a regional pest management plan
AHCNSY401	Plan a growing-on program
AHCNSY402	Plan a propagation program
AHCWRK505	Manage trial and research material
FWPCOT5205	Develop biohazard contingency plans
FWPFGM5210	Manage tending operations in a native forest
FWPFGM5211	Coordinate stand nutrition
FWPFGM5213	Coordinate plantation tending operations
FWPFGM5216	Manage coupe planning

Harvesting

FWPCOT5209	Manage tree harvesting to minimise environmental impact
FWPHAR5201	Design harvesting plans

Timber Products & Processes

FWPCOT4201	Produce complex truss and frame plans and details using computers
FWPCOT4202	Design timber structures
FWPCOT4204	Schedule and coordinate load shifting
FWPCOT4205	Coordinate log debarking operations
FWPCOT4206	Plan and coordinate boiler operations

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT4207	Plan and coordinate heat plant operations
FWPCOT5207	Implement sustainability in the workplace
FWPFGM5219	Undertake carbon stock sampling of forests and plantations
FWPSAW4201	Plan and monitor timber treatment plant operations
FWPSAW4202	Plan and monitor saw log operations
FWPSAW4203	Coordinate timber drying operations
FWPSAW4205	Plan and monitor timber conversion
FWPTMM4202	Diagnose and calculate production costs
FWPTMM4203	Install and commission CNC software
FWPTMM4204	Sample and test products to specifications
FWPTMM5202	Develop, trial and evaluate prototypes
FWPTMM5203	Generate and transfer complex computer-aided drawings and specifications
FWPTMM5205	Optimise CNC operations
FWPTMM5206	Plan production
FWPTMM5207	Assess timber product designs for feasibility
FWPTMM5208	Manage timber product design
FWPWPP4202	Perform laboratory testing
FWPWPP4203	Plan and coordinate engineered wood panel production

© Commonwealth of Australia, 2025 Skills Insight

Competitive Manufacturing

MSS405001	Develop competitive systems and practices for an organisation
MSS405004	Develop business plans in an organisation implementing competitive systems and practices

Group B

Machinery & Equipment

FWPCOT5203	Manage installation and commissioning of equipment
FWPCOT5204	Organise enterprise maintenance programs

Safety & Quality Processes

AHCCHM401	Develop procedures to minimise risks in the use of chemicals
BSBRSK501	Manage risk
BSBSUS501	Develop workplace policy and procedures for sustainability
FWPCOT5201	Implement sustainable forestry practices
PUAOPE016A*	Manage a multi-team sector
MSS015011	Conduct a sustainability energy audit
MSS405086	Develop sustainable energy practices

Administration & Business

BSBAUD501	Initiate a quality audit
BSBFIM501	Manage budgets and financial plans
BSBINM501	Manage an information or knowledge management system

© Commonwealth of Australia, 2025 Skills Insight

LGACOM401A	Administer contracts
LGACOM409A	Prepare tender documentation

Planning & Analysis

BSBINN502	Build and sustain an innovative work environment
BSBMGT517	Manage operational plan
BSBPMG522	Undertake project work
FWPCOT6209	Manage forest and wood products industry research
PSPGEN062	Collect statistical data

Training & Assessment

BSBLED501	Develop a workplace learning environment

Communication & Relationships

AHCBUS502	Market products and services
FWPCOT5202	Manage forestry information and interpretations programs
FWPCOT5208	Build and maintain community relationships
LGACOM502B	Devise and conduct community consultations

Prerequisite requirements

Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	**Prerequisite requirement**
PUAFIR501B* Conduct fire investigation and analysis activities	PUALAW001B Protect and preserve incident scene

© Commonwealth of Australia, 2025 Skills Insight

PUAOPE007B Command agency personnel within a multi-agency emergency response	PUAOPE012A Control a Level 1 incident PUAOPE015A Conduct briefings and debriefings
PUAOPE016A Manage a multi-team sector	PUAFIR302B Suppress urban fire OR PUAFIR303B Suppress wildfire

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 1.0.

Qualification Description

This qualification describes the skills and knowledge required to manage or lead innovative thinking and practice, collaboration and change management, as the forest and wood products industry responds to the challenges of carbon reduction, climate change and energy efficiency.

It caters for a range of employment pathways, which require skills in strategic planning, collaboration, systems thinking, project management and research and development.

Senior managers will focus on guiding and implementing projects and initiatives in a changing environment. Organisational leaders will emphasise greater thinking, planning and communication within partnerships, building the capacity to align with industries that stand to gain economic, social and environment benefits from using wood in products or processes.

A key focus of the qualification is the leadership and management of sustainable work and environmental practices and the sustainable use of resources. By building their capacity for innovative thinking, business leaders and managers will enable businesses to improve their competitiveness.

Vocational outcomes are available to organisational leaders; senior and general managers; forest, environmental or sustainability managers and planners; forestry, plantation and technical services managers; technical, value recovery and community liaison officers and forest auditors; designers.

Work involves the application of a significant range of theory, principles and complex techniques across a wide and often unpredictable variety of contexts involving both broad and highly technical job roles. Accountability and responsibility for self and others in achieving outcomes is involved.

This qualification is typically used to develop and integrate a breadth, depth and complexity of skills and knowledge for leading or managing highly specialised and technical work.

No licensing, legislative, regulatory, or certification requirements apply to units in this qualification at the time of publication.

Entry Requirements

There are no entry requirements

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
  - 2 core units plus
  - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

Core Units

FWPCOR6201	Manage sustainability in the workplace
FWPCOR6202	Implement practices to maximise value from wood residues

Elective Units

Sustainable Industry Practices

FWPCOT5201	Implement sustainable forestry practices
FWPCOT5202	Manage forestry information and interpretations programs
FWPCOT5205	Develop biohazard contingency plans
FWPCOT5206	Implement forestry chain of custody certification system
FWPCOT5207	Implement sustainability in the workplace
FWPCOT5209	Manage tree harvesting to minimise environmental impact
FWPCOT6202	Develop and manage a forestry chain of custody certification process
FWPCOT6204	Use carbon accounting to estimate emissions
FWPCOT6205	Prepare an enterprise carbon management report
FWPCOT6207	Develop forest management systems and processes

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT6210	Develop engineered wood products to meet energy efficient building design needs
FWPFGM5217	Promote plantations as a sustainable form of land use
FWPFGM5219	Undertake carbon stock sampling of forests and plantations
FWPFGM6201	Plan a biochar storage system for carbon capture and storage
FWPFGM6203	Manage sustainable tree inventory
MSS015022	Develop strategies for more sustainable use of resources
MSS015023	Design sustainable product or process

Leadership and Innovation

BSBINN501	Establish systems that support innovation
BSBINN502	Build and sustain an innovative work environment
BSBINN601	Lead and manage organisational change
BSBLDR803	Develop and cultivate collaborative partnerships and relationships
BSBMGT616	Develop and implement strategic plans
FWPCOT4208	Implement workplace sustainability practices
FWPCOT5207	Implement sustainability in the workplace
FWPCOT5208	Build and maintain community relationships
FWPCOT6201	Manage community engagement
FWPCOT6208	Manage innovative thinking and practice in the forest and wood products industry
FWPCOT6209	Manage forest and wood products industry research
FWPCOT8101	Lead forest and wood products industry innovative thinking and practice

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT8102	Initiate and lead a forest and wood products industry innovation
MSS015023	Develop strategies for more sustainable use of resources

Administration and Business

BSBAUD501	Initiate a quality audit
BSBCMM402	Implement effective communication strategies
BSBCRT402	Collaborate in a creative process
BSBFIM501	Manage budgets and financial plans
BSBFIM801	Manage financial resources
BSBRES801	Initiate and lead applied research
BSBSUS501	Develop workplace policy and procedures for sustainability
ICTSUS804	Use ICT to improve sustainability outcomes
MSMENV672	Develop workplace policy and procedures for environmental sustainability
PSPPCY010	Manage policy implementation
PSPREG029	Manage and lead inspection and monitoring programs
TLIE4006	Collect, analyse and present workplace data and information

AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate motorised stump grinding machines to remove tree stumps from the ground.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures, in accordance with manufacturers recommendations and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards

Pre-requisite Unit

AHCARB210 Work effectively in the arboriculture industry

HLTAID003 Provide first aid

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	**Performance criteria**
essential outcomes.	achievement of the element.
1. Prepare for stump removal operations	1.1 Determine site location and details and clarify with supervisor 1.2 Determine the depth below ground of stump grinding works 1.3 Determine and confirm location and depth of above-and-below-ground services 1.4 Unload stump grinder machine 1.5 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk
2. Carry out pre-operational and safety checks	2.1 Check maintenance log is complete and up to date 2.2 Check belts are appropriately tensioned and in good order 2.3 Check teeth are sharp 2.4 Check no teeth are missing or loose 2.5 Check tyre pressure is correct or tracks are appropriately tensioned 2.6 Check levels of oils and fluids 2.7 Check hoses 2.8 Check brakes are operational 2.9 Check cutter head rotates freely and is not obstructed
3. Check stump grinder safety features	3.1 Check guards for belt, power take-off (PTO) and grinder head are in place 3.2 Check kill switch clearly identifiable and working 3.3 Check that dead-man is working if fitted 3.4 Check debris curtain present and in good order 3.5 Check dust suppression system is working if fitted
4. Complete preparations for work	4.1 Select and use appropriate personal protective equipment 4.2 Confirm first aid and emergency personnel, equipment and procedures 4.3 Expose stump surrounds manually and check for and remove foreign bodies 4.4 Moisten surrounds as required 4.5 Record and implement work health, safety, site, environmental and traffic control measures
5. Position stump grinder	5.1 Determine exclusion zone for work operations 5.2 Isolate exclusion zone with barriers and signs 5.3 Position machine level within recommended ranges to avoid rollover 5.4 Avoid holes with machine wheels 5.5 Position machine to minimise impact from flying debris

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	5.6 Position operator in low risk position 5.7 Position operator to provide a clear view of the stump 5.8 Locate safety screens as required
6. Undertake removal operations	6.1 Communicate with work team during operations using voice, hand and whistle signals 6.1 Confirm work zone cleared prior to starting cutter head 6.3 Plan to complete a series of grinds across the stump 6.4 Start cutter head 6.5 Stop work if exclusion zone is breached and disengage cutter head if required 6.6 Position cutter head over stump 6.7 Engage cutter head into stump surface 6.8 Maintain engine speed in revolutions-per-minute (RPM) 6.9 Ensure grinding process is accurate, smooth and ergonomic 6.10 Grind stump to recommended depth of cut on each cutting pass 6.11 Ensure the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall 6.12 Grind stump to predetermined spread and depth 6.13 Operate equipment without damaging underground services and surrounding areas
7. Remove grindings	7.1 Reposition machine away from ground stump 7.2 Disengage cutter head 7.3 Wait and remain clear of cutter head until cutter head stops moving 7.4 Remove build-up of grindings
8. Perform ongoing grinding operations	8.1 Make check in calls at prearranged times 8.2 Inspect grinder as required between stumps and when refuelling 8.3 Shutdown immediately if abnormal vibration or noise develops 8.4 Stop the engine before refuelling and allow engine to cool as required 8.5 Follow Safe Work Method Statement instructions for refuelling 8.6 Replace and secure fuel cap before restarting 8.7 Disengage cutter head and ensure a complete stop before moving to a new stump
9. Complete stump removal operation	9.1 Back-fill stump hole to original ground level 9.2 Maintain clean and safe work area throughout work and upon completion 9.3 Collect waste material and dispose of or recycle in a manner

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	causing minimal environmental damage 9.4 Clean, maintain and store tools and equipment 9.5 Perform basic maintenance, including sharpening grinder and replacing teeth as required 9.6 Load grinder in accordance with Safe Work Method Statement 9.7 Secure grinder for transport 9.8 Update records of operator usage in log record 9.9 Update records of maintenance and replacement items

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed removing stumps using a motorised stump grinder using low-risk work procedures. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining site location and details and clarifying with supervisor
- determining the depth below ground of stump grinding works
- determining and confirm location and depth of above-and-below-ground services
- unload stump grinder machine
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- checking maintenance log complete and up to date
- checking belts appropriately tensioned and in good order
- checking teeth are sharp
- checking no teeth are missing or loose
- checking tyre pressure is correct or tracks are appropriately tensioned
- checking levels of oils and fluids
- checking hoses
- checking brakes are operational
- checking cutter head rotates freely and is not obstructed
- checking guards for belt, power take-off (PTO) and grinder head are in place
- checking kill switch clearly identifiable and working
- checking that dead-man is working if fitted
- checking debris curtain present and in good order
- checking dust suppression system is working if fitted
- selecting and use appropriate personal protective equipment
- confirming first aid and emergency personnel, equipment and procedures
- exposing stump surrounds manually and check for and remove foreign bodies
- moistening surrounds as required

© Commonwealth of Australia, 2025 Skills Insight

- recording and implementing work health, safety, site, environmental and traffic control measures
- determining exclusion zone for work operations
- isolating exclusion zone with barriers and signs
- positioning machine level within recommended ranges to avoid rollover
- avoiding holes with machine wheels
- positioning machine to minimise impact from flying debris
- positioning operator in low risk position
- positioning operator to provide a clear view of the stump
- locating safety screens as required
- communicating with work team during operations using voice, hand and whistle signals
- confirming work zone cleared prior to starting cutter head
- planning to complete a series of passes across the stump
- starting cutter head
- stopping work if exclusion zone is breached and disengage cutter head if required
- positioning cutter head over stump
- engaging cutter head into stump surface
- maintaining engine speed in revolutions-per-minute (rpm)
- ensuring grinding process is accurate, smooth and ergonomic
- grinding stump to recommended depth of cut on each cutting pass
- ensuring the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall
- grinding stump to predetermined spread and depth
- operating equipment without damaging underground services and surrounding areas
- repositioning machine away from ground stump
- disengaging cutter head if risk of making unwanted contact
- waiting and remaining clear of cutter head until cutter head stops moving
- removing build-up of grindings
- making check in calls at prearranged times
- inspecting grinder as required between stumps and when refueling
- shutting down immediately if abnormal vibration and/or noise develops
- stopping the engine before refueling and allow engine to cool as required
- following safe work method statement instructions for refueling
- replacing and securing fuel cap before restarting
- disengaging cutter head and ensure a complete stop before moving to a new stump
- back-filling stump hole to original ground level
- maintaining clean and safe work area throughout work and upon completion
- collecting waste material and dispose of or recycle in a manner causing minimal environmental damage
- cleaning, maintaining and storing tools and equipment
- performing basic maintenance, including sharpening grinder and replacing teeth as required
- loading grinder in accordance with safe work method statement

© Commonwealth of Australia, 2025 Skills Insight

- securing grinder for transport
- updating records of operator usage in log record
- updating records of maintenance and replacement items.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site hazard identification methods
- site risk assessment systems
- control measures for work health, safety, site, environmental and traffic control
- personal protective equipment
- communication systems using voice, hand and whistle signals
- first aid
- emergency procedures
- methods of locating services
- pre-operational checks of stump grinders including:
  - logs
  - belts
  - teeth
  - tyre pressure
  - oils and fluids
  - hoses
  - brakes
  - cutter head
  - guards
- safety checks of stump grinders including:
  - guards for belt, power take-off (PTO) and grinder head
  - kill switch
  - dead man
  - debris curtain
  - dust suppression
- exclusion zones
- operation of stump grinders
- cutter head engagement and disengagement
- positioning of stump grinders and operator
- work zone
- methods of determining spread and depth of cut
- recommended depths of cut
- cutting plan
- engine speed (rpm)
- abnormal vibration

© Commonwealth of Australia, 2025 Skills Insight

- methods of back-filling
- environmental implications of removal activities
- appropriate methods of collecting waste material and disposal or recycling methods
- basic maintenance of stump grinders
- methods of sharpening stump grinders
- methods of teeth replacement of stump grinders
- records of operator usage in log record
- methods of maintaining records for basic maintenance and replacement items.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes a log record, verifying ten (10) hours of operating a stump grinder, and five (5) hours of unloading and loading, setup and pre-operational and safety checks, preparatory work, backfilling and cleaning up, sharpening and basic maintenance, performed by the candidate.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
  - stump grinder
  - sharpening equipment
  - refuelling kit
  - spill kit
  - emergency communication system
  - personal protective equipment (PPE)
  - first aid and emergency kit
  - traffic management kit
  - signage – work zone
  - tree stumps
- materials:
  - stump grinder operations form
  - hazard identification and risk control form
  - pre-operational and safety check form
  - emergency preparation form

© Commonwealth of Australia, 2025 Skills Insight

- work communications form
- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes, harnesses and specialist equipment using advanced techniques for the purpose of mobility around the required sections of trees for work positioning.

This unit applies to individuals who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. The work requires the application of extensive arboricultural knowledge. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB312 Use standard climbing techniques to access trees*

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use static and dynamic rope as required 2.6 Select and use triple locking carabiners 2.7 Determine limits, relative advantages and disadvantages of friction hitches
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line safe approach distances and vegetation clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Prepare climbing spurs and gaffs for dismantling operations	4.1 Prepare climbing spurs and gaffs for dismantling operations 4.2 Check all components of climbing spurs for defects and wear 4.3 Check gaff tip profile for correct dimensions using gaff gauge 4.4 Sharpen gaff tip cutting edge with file at defined angle using gaff gauge

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	4.5 Adjust climbing spurs to provide correct operator fit 4.6 Access and perform dismantling work using climbing spurs 4.7 Maintain separation of spurs 4.8 Maintain clearance distance between spurs and ropes
5. Access and ascend tree	5.1 Access and ascend tree using low risk access route with harness and lanyard 5.2 Ascend using single rope, double rope and selected friction hitch as required 5.3 Ascend using uni-ascenders, foot and hand ascenders, and other ascension devices as required 5.4 Use micrograbs, grigris and micro-pulleys as required for mobility and work positioning 5.5 Demonstrate ability to carry out change-overs as required 5.6 Set up redirects and belays using slings and anchors as required 5.7 Select multiple lines to climb trees and tree parts as required 5.8 Select multiple lines to perform tree operations as required
6. Descend from tree	6.1 Descend tree in a controlled manner 6.2 Remove all access equipment in a controlled manner 6.3 Check, clean and store access equipment 6.4 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB307A Undertake complex tree climbing.

Assessment Requirements for AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed ascending and descending trees using advanced tree climbing practices.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts. The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using static and dynamic rope as required
- selecting and using triple locking carabiners

© Commonwealth of Australia, 2025 Skills Insight

- determine limits, relative advantages and disadvantages of friction hitches including: Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line safe approach distances and vegetation clearances
- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using single rope, double rope and selected friction hitch as required
- ascending using uni-ascenders and foot ascenders as required
- using micrograbs, grigris and micro-pulleys as required for access and tree operations
- demonstrating ability to carry out change-overs
- setting up redirects and belays using slings and anchors
- selecting multiple lines to access trees and tree parts
- selecting multiple lines to perform tree operations
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- personal protective equipment
- types of climbing ropes
- dynamic and static ropes
- rope characteristics
- uses of climbing ropes
- safe working limits of ropes
- safe working limits of equipment
- defects in ropes, tools and equipment
- climbing harnesses and lanyards

© Commonwealth of Australia, 2025 Skills Insight

- climbing equipment
- triple action carabiners
- friction hitches including:
  - Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height
- estimation of load
- safe working limits
- tree access techniques and equipment
- strength and suitability requirements
- single and double rope techniques
- uni-ascenders and foot ascenders
- micrograbs, grigris, micro-pulleys
- use of climbing spikes of various lengths
- change-overs
- redirects and belays using slings and anchors
- use of multiple lines to access trees and tree parts
- advanced climbing techniques
- low risk anchor points
- maintenance of awareness of power lines
- power line safe approach distances and vegetation clearances
- controlled descent operations
- controlled removal of access equipment
- cleaning of equipment
- storage of equipment.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of advanced climbing.

© Commonwealth of Australia, 2025 Skills Insight

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit. Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
  - single rope technique (SRT) climbing kit
  - harness
  - chaps
  - climbing friction hitches
  - high decibel whistle
  - personal protective equipment (PPE)
  - first aid and emergency kit
  - rescue kit
  - traffic management kit
  - trees
- materials:
  - climbing techniques form - advanced
  - climbing log record – advanced
  - tree inspection form
  - hazard identification and risk control form
  - equipment and PPE check form
  - knot identification form
  - work communications form
  - rescue form - aerial

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes and harnesses using standard techniques for the purpose of accessing required sections of trees.

This unit applies to workers who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use dynamic rope 2.6 Select and use triple locking carabiners
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Access and ascend tree	4.1 Access and ascend tree using low risk access route with harness and lanyard 4.2 Ascend using double rope with prussik technique 4.3 Ascend using trunk walking technique and foot ascenders as required
5. Descend from tree	5.1 Descend tree in a controlled manner 5.2 Remove all access equipment in a controlled manner 5.3 Clean and store access equipment 5.4 Clean and store personal protective equipment

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB204A Undertake standard climbing techniques.

Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed climbing trees using standard climbing techniques in a safe manner. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using dynamic rope
- selecting and using triple locking carabiners
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line clearances

© Commonwealth of Australia, 2025 Skills Insight

- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using double rope with prussik technique
- ascending using trunk walking technique and foot ascenders as required
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- personal protective equipment
- types of climbing ropes
- dynamic ropes
- rope characteristics
- uses of climbing ropes
- safe working limits of ropes
- safe working limits of equipment
- defects in ropes, tools and equipment
- climbing harnesses and lanyards
- climbing equipment
- triple locking carabiners
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height

© Commonwealth of Australia, 2025 Skills Insight

- estimation of load
- safe working limits
- tree access techniques and equipment
- strength and suitability requirements
- double rope with prussik technique
- trunk walking and foot ascenders
- standard climbing technique
- low risk anchor points
- maintenance of awareness of power lines
- power line clearances
- controlled descent operations
- controlled removal of access equipment
- cleaning of equipment
- storage of equipment
- work health and safety measures relating to own work.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of standard climbing.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
  - standard climbing kit
  - harness
  - high decibel whistle
  - personal protective equipment (PPE)
  - first aid and emergency kit
  - rescue kit
  - traffic management kit
  - trees

© Commonwealth of Australia, 2025 Skills Insight

- materials:
  - climbing techniques form- standard
  - climbing log record - standard
  - hazard identification and risk control form
  - equipment and PPE check form
  - emergency preparation form
  - work communications form
  - knot identification form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCBUS502 Market products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to market products and services.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Analyse market	1.1 Identify, research and analyse existing or new markets for

Element	Performance criteria
information	existing or new products or services using techniques to ensure reliable data 1.2 Analyse past trends and developments to determine market variability and associated risks 1.3 Develop gross margin budgets to account for market variability 1.4 Identify and evaluate competing products to determine strengths and weaknesses of own products 1.5 Monitor market environment to ensure information is current and reliable 1.6 Identify the legal, ethical and environmental constraints of the markets and their effect on the enterprise 1.7 Identify product specifications that suit market requirements and price advantage at the time 1.8 Present clear and concise information to the enterprise management team
2. Identify and evaluate factors to include in a marketing plan	2.1 Identify and evaluate production processes to ensure required product specifications are met 2.2 Identify and assess alternative selling strategies and techniques to identify marketing targets and methods 2.3 Identify and assess distribution channels and their role in your marketing strategies 2.4 Ensure the data used is reliable and the market environment and trends are substantiated 2.5 Evaluate the role of marketing professionals in providing advice
3. Develop a marketing plan for your products and services	3.1 Establish marketing objectives based on current and potential product specifications 3.2 Select appropriate production processes to ensure product specifications are met 3.3 Select selling strategies to ensure required prices are achieved 3.4 Select appropriate distribution channel options to ensure access to target markets is achieved efficiently and appropriately 3.5 Establish time-frames for production, distribution and selling activities 3.6 Develop a gross margin budget to demonstrate the cost effectiveness of the marketing plan 3.7 Develop partial gross margin budgets to account for market variability
4. Determine promotional strategies	4.1 Prepare and record detailed plans for promotional activities 4.2 Outline objectives, level of exposure and available markets 4.3 Ensure strategies take account of time management and

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	scheduling issues, and resource constraints 4.4 Create promotional materials that enhance the product and commercial presentation 4.5 Record and communicate priorities, responsibilities, timelines and budgets for promotional activities
5. Implement marketing activities	5.1 Schedule planned marketing activities within appropriate timeframes 5.2 Develop measurable performance targets that meet business plan objectives 5.3 Organise distribution channels and ensure product and service information is accurate and readily available to clients 5.4 Implement marketing activities within budgetary constraints to meet legal, ethical and enterprise requirements
6. Evaluate marketing performance	6.1 Review the established marketing objectives to ensure they remain viable 6.2 Make an objective assessment of the marketing plan and its implementation by a comparison of valid and reliable data against the established objectives 6.3 Assess product, pricing and distribution policies in relation to market changes, marketing objectives and enterprise requirements 6.4 Identify areas of positive marketing performance and take corrective action to remedy poor marketing performance areas 6.5 Document and distribute information for continual analysis and effective planning management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCBUS502 Market products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect, analyse and present data in the internal and external business environment
- identify the marketable features of the product and potential markets
- assess alternative marketing strategies and techniques to meet business plan objectives
- evaluate performance targets and recommend modifications or improvements
- plan, implement and evaluate a marketing strategy
- plan to manage promotional activities
- develop and manage budgets
- monitor product, pricing and distribution policies to improve market performance.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- financial management and budgeting
- price risk management
- performance evaluation measures
- competitors strengths and weaknesses
- business planning process
- customer relations policies
- market conditions and forces
- enterprise goals, objectives and directions
- markets and market analysis
- communication and promotion skills
- sales and marketing principles and practices

© Commonwealth of Australia, 2025 Skills Insight

- principles of trend analysis
- legal issues that affect marketing activities (trade practices, Fair Trading Acts, Sales of Goods Acts)
- industry and marketing knowledge including sales networks and distribution systems, and customer trends and preferences
- demographic studies and their application in the development of a marketing plan.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM201 Apply chemicals under supervision

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply chemicals using workplace specific application equipment under supervision.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes.

This unit applies to individuals who undertake defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well known parameters and identify and seek help with simple problems.

The skills and knowledge described in this unit underpin a broad range of activities applicable to various job roles at various levels.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Confirm the activity to be undertaken with supervisor, including identifying potential hazards and risks 1.2 Take steps to control risks as directed 1.3 Confirm tools and equipment to be used with supervisor 1.4 Wear appropriate personal protective equipment as per label instructions and ensure correct fit
2. Check application equipment	2.1 Carry out pre-operational checks of application equipment and identify and replace any damaged or worn components or report to supervisor 2.2 Prepare application equipment for use
3. Prepare application equipment	3.1 Follow all label instructions for the chemical or substance being used 3.2 Use appropriate mixing equipment 3.3 Check that output of application equipment is correct 3.4 Measure, mix and load chemical mix or substances 3.5 Confirm instructions from chemical label and supervisor in the event of a spill 3.6 Check that output of application equipment is correct and in accordance with application/spray plan.
4. Apply chemicals	4.1 Assess and record meteorological conditions and forecasts prior to and during application where relevant 4.2 Cease application if conditions become unsuitable 4.3 Apply chemical ensuring minimal risk to others and the environment 4.4 Minimise risks to others, product integrity and the environment prior to and during application
5. Transport and handle chemicals	5.1 Confirm precautions for the transport and handling of chemicals with supervisor 5.2 Transport and handle chemicals in accordance with relevant commonwealth, state and territory chemical legislation
6. Finalise work	6.1 Clean and store personal protective equipment and application equipment in accordance with manufacturers and work health and safety requirements 6.2 Dispose of excess chemicals and clean containers in accordance with label instructions and regulatory requirements 6.3 Complete incident reports as required

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	6.4 Complete application records 6.5 Store unused chemical and products in appropriate location 6.6 Adhere to all re-entry requirements

Assessment Requirements for AHCCHM201 Apply chemicals under supervision

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and adopt safe work practices
- follow directions on chemical labels and relevant Safety Data Sheets SDS
- carry out pre-operational checks of application equipment
- measure, mix and load chemical mixes
- safely apply chemical under supervision
- report spillages, accidents or deficiencies in procedures and practices to supervisor
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage
- follow enterprise work health and safety procedures
- safely dispose of chemicals
- record relevant information, including amount of chemical applied as per commonwealth, state and territory chemical legislation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant commonwealth, state and territory legislation
- various transport and handling techniques and requirements
- layout and information contained in chemical labels and SDS
- features and functions of a range of application equipment relevant to the role
- risk factors to be taken into account such as human and animal health, spillage and environmental

© Commonwealth of Australia, 2025 Skills Insight

- different broad chemical types such as insecticides, herbicides and fungicides and their mode of action symbols on the label
- paths of entry of poisons into the body and the methods of limiting exposure
- how to assess if weather conditions increase risks and when it becomes unsuitable for application to continue
- relevant applied principles of Integrated Pest and Resistance Management
- relevant parts of the workplace spray plan

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM303 Prepare and apply chemicals

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conversation and Land Management Training Package Version 2.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare and apply chemicals for the control of pests across a range of industry sectors.

This unit covers the use of general application equipment used across a variety of industries including; boom sprays, orchard air-blast sprayers, handheld spray equipment, wipers, dry chemical applicators, dips, pour-on, spot-on, vaccination and drenching equipment.

All work must be carried out to comply with workplace procedures, work hand safety and pesticide legislation and codes.

All work must be carried out to comply with chemical label instructions, Safety Data Sheets (SDS's), the organisation's application plan and relevant legislation.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Assessment Requirements for AHCCHM303 Prepare and apply chemicals

Modification History

Release	Comments
Release 3	This version released with AHC Agriculure, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the need for chemical application
- develop an application/spray plan
- identify hazards and implement risk control procedures to ensure a safe workplace
- interpret and apply chemical label requirements included in the application or spray plan
- identify weather conditions that impact on spray drift risk and implement control measures
- conduct pre-operational checks of application equipment
- calibrate handheld and/or powered application equipment relevant to the industry sector
- mix and load chemicals in accordance with label requirements
- measure and record weather conditions before and during and after application
- apply chemicals safely in compliance with labels, legislation and codes of practice
- dispose of surplus chemicals and empty containers
- record relevant information including amount of chemical applied
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate knowledge of:

- options for pest control based on the Integrated Pest and Resistance Management Plan
- pest and/or disease resistance management
- various chemical labels and SDS formats
- impact of meteorological factors on the safe and effective application of chemicals
- factors that determine spray drift risk including droplet size, wind speed, temperature and temperature inversions and approaches to controlling spray drift risk
- risk factors including human and animal health, weather prior to, during and after application, spillage, residues in plants and animals consumed as food and environmental
- how to mix chemicals including mixing order, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- how to select, operate and use a variety of application equipment including boom sprays
- features, functions and calibration techniques for a range of powered and hand held application equipment relevant to the industry sector
- spray nozzle identification, selection, operation and use
- pests, weeds and/or diseases relevant to the industry sector
- legislation, regulations and licensing requirements in relation to chemical use
- APVMA policy on spray drift management.

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

The candidate must be assessed at least once calibrating application equipment.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCHM304 Transport and store chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow legislative requirements for the safe transport of chemicals
- follow emergency procedures for chemical spillage
- handle, transport and store chemical safely
- maintain a chemical storage area and chemical manifest, including copies of SDS for each product
- follow chemical label directions and SDS requirements for handling, transporting and storage
- maintain storage records
- follow enterprise work health and safety policies
- follow enterprise environmental protection policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to read a chemical label and SDS and translate that information into actions
- appropriate legislation and regulations that apply to transporting and storing chemicals
- risk factors including human and animal health and environmental associated with transporting, handling and storing chemicals
- requirements for disposal of excess, unwanted and out-of-date chemicals and used chemical containers
- processes to clear spillages and clean up
- types of placarding required for storage of hazardous chemicals and dangerous goods
- types of emergency information that must be carried in the vehicle when transporting dangerous goods

AHCCHM401 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assess and mitigate risks associated with the use of chemicals across a range of industry sectors.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes,

This unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems. Work is carried out to industry standards.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit. Competency in this unit may be deemed to have a time limit when used as part of an accreditation or licence process.

Pre-requisite Unit

AHCCHM303 Prepare and apply chemicals

AHCCHM304 Transport and store chemicals

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify hazards and risks	1.1 Identify and source Codes of Practice, legislation, regulations and industry requirements relating to chemical use 1.2 Identify hazards involved in chemical handling and application
2. Assess risks and develop control procedures	2.1 Assess risks associated with chemicals used 2.2 Develop risk control measures and emergency action plans 2.3 Develop control procedures for transport, handling, storage, application, decontamination and disposal of chemicals 2.4 Develop a continuous improvement strategy to minimise risk
3. Monitor and assess adherence to chemical risk procedures	3.1 Provide appropriate personal protective equipment for employees using chemicals 3.2 Assess staff selection of application equipment according to procedures 3.3 Assess the ability of staff to follow restrictions on chemical use, application, decontamination and disposal 3.4 Assess how risk control procedures are followed in the workplace
4. Evaluate risk control measures and maintain records	4.1 Develop procedures for evaluating the effectiveness of risk control measures 4.2 Identify shortfalls during evaluation and subsequently rectify 4.3 Maintain risk assessment records according to industry, label, legislative and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCCHM401A Minimise risks in the use of chemicals.

Assessment Requirements for AHCCHM401 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate implementation of procedures
- identify hazards, assess risks and implement and monitor control measures
- develop risk control procedures
- develop a continuous improvement strategy to minimise risk
- interact with staff members and provide feedback
- implement, monitor and evaluate a chemical risk control strategy maintain records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- where to source Codes of Practice, legislation and industry requirements relating to chemical use
- hazard identification and risk assessment strategies
- risk factors including human and animal health, product integrity, weather, spray drift, spillage and environmental
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy current standards for RTOs.

AHCCHM402A Plan and implement a chemical use program

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the planning and implementation of a chemical use program and defines the standard required to: plan and implement a program for chemical use; supervise others in chemical use; apply and monitor risk control procedures; select and manage chemical application equipment and processes.

Application of the Unit

Application of the unit	This unit applies those whose job role includes the development and implementation a chemical use program for pesticides use. This unit may be deemed to have a time limit when used as part of an accreditation or licence process.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and document an application/spray plan	1.1. Assess risks associated with proposed control strategy. 1.2. Select preferred control procedures. 1.3. Document preferred control procedures as application/spray plan.
2. Identify requirements for chemical use	2.1. Identify and interpret guidelines, legislation and regulations and industry requirements relating to chemical use. 2.2. Assess the need for chemical use as an option within an integrated pest management and/or animal health strategy. 2.3. Ensure that personnel are adequately trained in chemical use.
3. Ensure that risk control measures are followed	3.1. Provide appropriate Personal Protective Equipment for people in the workplace using chemicals. 3.2. Monitor the implementation of safe practice in the workplace including preparation and application of chemicals. 3.3. Monitor implementation of procedures for transport, handling, storage, decontamination and disposal. 3.4. Monitor implementation of procedures to mitigate residues in produce and the environment.
4. Plan and implement a maintenance program for chemical use equipment	4.1. Develop and implement a maintenance strategy for application equipment and personal protective equipment. 4.2. Monitor implementation of maintenance procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.3. Ensure that faulty or damaged equipment is repaired or replaced.
5. Ensure the correct selection and application of chemicals	5.1. Ensure that the correct chemicals and equipment is selected in accordance with the application/spray plan. 5.2. Ensure that pre-operational checks of application equipment are carried out. 5.3. Check to ensure that calibration conforms to the requirement of the application/spray plan. 5.4. Ensure that meteorological conditions are monitored and assessed during application where relevant. 5.5. Monitor the application procedures in the event of a chemical spill.
6. Ensure work activities are finalised in accordance with procedure	6.1. Ensure that excess chemical are disposed of in accordance with label and Material Safety Data Sheet requirements. 6.2. Ensure incident reports are completed as required in accordance with legislative and/or regulatory requirements. 6.3. Ensure all required records are completed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• develop strategies to monitor the implementation of procedures • evaluate conformance with procedures • identify hazards and oversee the safety of the working environment • develop and document an application/spray plan • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• sources of information relating to chemical use including: • guidelines • legislation and regulations • industry requirements • hazard identification and risk assessment strategies • methodologies for the development of procedures • risk factors including human and animal health, weather, spray drift, spillage, residue, product integrity and environmental • transport, handling and storage for chemicals • requirements for disposal of excess chemicals, clearing spillages and equipment clean up • OHS, environmental and pesticides legislation, codes of practice and enterprise procedures. • chemical application equipment capabilities and limitations.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • plan and implement a program for chemical use • supervise others in chemical use • apply and monitor risk control procedures • select and manage chemical application equipment

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	and processes.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Agricultural chemicals include:	• insecticides • fungicides • herbicides • bactericides • algaecides • biologicals • nematacides • rodenticides • antimicrobial agents • anthelmintics • fumigants • hormone growth promotants • a range of veterinary chemicals used to treat animals for disease. It does not cover the development of general chemical use procedures.

AHCFIR201 Assist with prescribed burning

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to assist with prescribed burning for agricultural or natural resource management purposes.

This unit applies to personnel participating in lighting and conducting prescribed burns under direct supervision.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- prepare machinery and equipment to enterprise requirements before burning
- continually monitor weather conditions throughout the burn
- use personal protective equipment as required and check, clean and store on completion of the burn
- identify appropriate safe escape routes throughout the burn
- maintain communication with supervisor and other staff at all times throughout the burn
- carry out clean up operations according to supervisor instructions to enterprise standards
- apply work health and safety procedures throughout the burn.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- fire behaviour
- extinguishing media and equipment
- communication equipment and procedures
- burning tactics and techniques
- assets that need protecting throughout the burn
- fire hazards, safety techniques
- organisation’s operating procedures for prescribed burn
- contingency plans and emergency procedures for the burn

© Commonwealth of Australia, 2025 Skills Insight

- purpose and use of personal protective equipment
- work health and safety policies and procedures relevant to prescribed burning
- key concepts of work health and safety and environmental legislative and enterprise requirements.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCILM201 Maintain cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the level of work required to maintain the cultural place
- prepare for and carry out maintenance activities in accordance with organisational, cultural and environmental requirements
- report deterioration or damage to place to supervisor
- report incidents of breaches of legislation including vandalism
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential threats to area
- techniques of site maintenance and protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess maintenance work required	1.1. Works required under the plan of management and enterprise procedures are identified. 1.2. Machine, equipment and materials to carry out maintenance works are identified. 1.3. Type and amount of materials required for maintenance work are estimated.
2. Prepare for maintenance	2.1. Machine, equipment and materials to carry out maintenance works are organised. 2.2. Safety equipment and materials are prepared and assembled according to enterprise Occupational Health and Safety (OHS) policy.
3. Maintain condition of place	3.1. Maintenance work is undertaken according to work programs and according supervisor's instructions. 3.2. Presence of threats is reported to supervisor. 3.3. Evidence of deterioration and wear is reported to supervisor. 3.4. Site is made good on completion of maintenance works according to supervisor's instructions enterprise guidelines.
4. Protect cultural place	4.1. Any evidence of damage to place is reported to supervisor. 4.2. Any breach of legislation or enterprise regulations is reported to supervisor.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.3. Protective barriers and signs are maintained according to enterprise procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards an adopt safe work practices
- assess maintenance work required
- maintain condition of place
- protect cultural places
- prepare for maintenance
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- OHS responsibilities
- common pests and diseases
- techniques of site protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents
- site recording systems used by the enterprise or community
- relevant archaeological practices and procedures.

AHCILM401A Protect places of cultural significance

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the protection of places of cultural significance and defines the standard required to: develop working relationships with stakeholders in cultural sites; canvass views in determining the heritage value and preservation issues of a cultural site; plan for the protection of a cultural site including resources required and submissions to be completed; observe cultural protocols in dealing with stakeholders and land managers; identify threats and develop action and emergency plans to mitigate and manage the risk of damaging incidents or loss of heritage value; document the submissions to implement conservation and restoration activities and support the incident management activities.

Application of the Unit

Application of the unit	This unit applies to those whose work includes protecting indigenous peoples' places of culture in co-operation with stakeholders and protecting places of cultural significance with reference to indigenous communities and/or line management. A high level of cultural awareness and the need to observe cultural protocols are important in parts of the process. Note: for indigenous cultural places, the delivery and assessment against this standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Communicate with stakeholders	1.1. Working relationships are developed with stakeholders that assist in the management of culturally significant places. 1.2. Communication approaches are developed that accommodate cultural views. 1.3. Views are regularly obtained on the way in which the cultural significance and resource can be conserved and used. 1.4. Views obtained are conveyed into enterprise and park/reserve planning process.
2. Conserve significance	2.1. Enterprise conservation policies and plans are used with stakeholder views to plan ongoing conservation actions. 2.2. Operational activities are developed and implemented to implement the conservation strategies and plans in a culturally sensitive manner. 2.3. Staff are organised to implement conservation

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	actions that minimise deterioration and damage. 2.4. Staff are supervised during restoration projects. 2.5. Resources are obtained for conservation and restoration activities. 2.6. Submissions are made to the enterprise budget process for funds to implement the conservation and restoration activities.
3. Manage incident	3.1. Operational plans are developed to manage incidents consistent with plan of management and risk management analysis. 3.2. Staff responsibilities are assigned to manage types of incidents. 3.3. Equipment and supplies are obtained and maintained to enable effective response to incidents. 3.4. Staff are trained in the management of the types of incidents for which they have an involvement. 3.5. Submissions are made to the enterprise budget process for funds to support the incident management activities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• consult with indigenous communities • observe cultural protocols • plan ongoing conservation actions • conserve significance of place of culture • manage incidents and threats • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• enterprise policies and procedures for conservation of places of cultural significance • indigenous protocols, consultation processes and networks • non-indigenous cultural groups • budgetary and financial approval processes.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- select the appropriate materials and tools
- assess the fencing site for environmental impacts of the fence
- install fence posts and stays erect fences, tension fencing wire and netting, install gates and components
- undertake repairs
- record work activities
- clean up the fencing site and remove and dispose of, or recycle, waste
- use hand tools and powered fencing machinery in a safe, efficient and controlled manner.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- designs and purpose of a range of conventional fencing
- wire types, knots, tensions applications and limitations
- common hazards involved in fencing installation, maintenance and repair
- uses and types of fencing tools and equipment
- fencing materials manufacturers specifications and guidelines
- relevant work health and safety and environmental legislation, codes of practice and enterprise procedures.

AHCINF203 Maintain properties and structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and repair properties and structures in situations that don't require the specialist skills of another trade.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and confirm maintenance	1.1 Confirm work instructions with supervisor

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
requirements	1.2 Identify hazards and report to supervisor 1.3 Select and fit appropriate personal protective equipment 1.4 Inspect structures and facilities to locate and evaluate defects, deterioration and impending defects 1.5 Check property infrastructure and resources for correct operation, minor maintenance needs and damage 1.6 Confirm maintenance plan
2. Select and prepare tools, equipment and materials	2.1 Select and check tools, equipment and materials for serviceability 2.2 Identify and segregate for repair or replacement faulty or unsafe tools 2.3 Identify, assess and report existing and potential hazards to health and safety 2.4 Select and fit personal protective equipment
3. Carry out routine maintenance	3.1 Carry out routine maintenance to infrastructure, structures and facilities 3.2 Carry out minor repairs to building cladding and paint
4. Complete maintenance activities	4.1 Clean, maintain and store worksite, tools and materials 4.2 Collect, treat and dispose of or recycle unwanted materials and waste from maintenance activities 4.3 Complete workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCINF203 Maintain properties and structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed and repairing properties and structures, in a situation that does not require the specialist skills of another trade.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- interpret and apply task instructions
- communicate with work team and supervisor
- select, prepare and safely use of a broad range of tools
- carry out routine maintenance to infrastructure, structures and facilities
- store or dispose of unused or waste materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics, capabilities and limitations of materials, equipment and tools
- operation of water taps and reticulation systems
- types of building cladding and finishes, purpose and use
- identification of defects and appropriate repair methods
- appropriate selection of repair materials
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice and procedures with regard to protection of the environment

Assessment Requirements for AHCINF303 Plan and construct conventional fencing

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- site the fence line according to property or land management plan
- estimate, cost and source fencing materials and arrange delivery
- identify hazards and implement safe work practices
- carry out fencing operations safely and efficiently
- construct a fence that meets specifications in plan or contract and is within tolerances for materials
- construct gate assemblies and swing gates
- string and strain wires to manufacturer's recommended tension
- use and maintain fencing machinery and equipment
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues affecting property fence planning and construction
- procedures for planning fencing in relation to the whole property plan
- range of fencing designs, construction methods and materials
- types of fencing construction tools and equipment
- fencing materials and costings
- common fencing hazards and safety precautions
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice with regard to the protection of the environment
- hazard identification, assessment and control

Assessment Requirements for AHCIRG333 Maintain pressurised irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check connections and controllers
- check sprinkler/emitter output and function
- confirm operational pressures
- ensure proper operation of automatic flush valves
- interpret and apply maintenance procedures
- remove, service and replace valves and filters
- test irrigation equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system maintenance
- characteristics and operation of pipes, joints, valves, emitters
- common operational and maintenance problems
- components of an irrigation system
- operation of pumps and water flow rates
- sprinkler/low volume irrigation system components

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG406A Plan on-site irrigation system installation and construction work

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers planning on-site irrigation system installations and construction work and defines the standard required to: identify operational requirements from contract documentation; develop strategies and plan procedures for installation and construction; develop a project plan with tasks, responsibilities, timelines and costs.

Application of the Unit

Application of the unit	This unit applies to irrigation installers who plan on-site irrigation system installation and construction work.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Appraise contract documentation and translate into operational requirements	1.1. Copy of building approval and conditions is obtained as required. 1.2. Contract documentation is reviewed for any unusual aspects of construction, use of materials and penalties. 1.3. Availability of sub-contractors is ascertained and selected to suit job requirements. 1.4. Availability of materials is checked with suppliers. 1.5. Site access limitations are assessed. 1.6. Relevant authorities controlling construction work advised of commencement date for project as required.
2. Develop strategies for implementing the construction operations	2.1. Procedures for controlling and recording site deliveries are established. 2.2. Procedures for recording the hire of plant and equipment are determined. 2.3. Occupational Health and Safety (OHS) procedures are established, including hazard/risk management. 2.4. Procedures are established for dealing with environmental issues associated with irrigation construction work. 2.5. Procedures required for the control of multiple projects are determined.
3. Prepare project schedule for irrigation installation and construction	3.1. Construction operations are prepared in sequence. 3.2. Operations are entered into a manually prepared schedule or computer based software package. 3.3. 'Critical path' is identified and schedule revised with

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	new activities/projects, as needed, and documented. 3.4. Timeframe is adjusted to take account of anticipated delays.
4. Determine all the required resources for project	4.1. Temporary services and site accommodation is determined as required. 4.2. Plant requirements and dates are selected and accessed. 4.3. On site labour requirements are determined.
5. Prepare dilapidation report	5.1. Records are made of the condition of existing building(s) to be retained and structures on the adjacent site boundaries. 5.2. Copies of reports are submitted to adjacent building owners prior to commencing construction.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• analyse contract conditions • develop strategies • schedule projects • determine resources • identify adverse environmental impacts of irrigation activities and appropriate remedial/preventative action • incorporate legislative and enterprise OHS and environmental procedures into planning • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
abilities.
Required knowledge
• installation and construction processes for on-site irrigation systems • logical construction sequence for the system • analysis of the required project resources • environmental impacts of irrigation using water from any ground or underground source • relevant enterprise OHS and environmental procedures • relevant Australian Standards (e.g. AS3500) • effect of main soil types on approach to excavation work and installation of irrigation components.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • identify operational requirements from contract documentation • develop strategies and plan procedures for installation and construction • develop a project plan with tasks, responsibilities, timelines and costs.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Planning may include:	• the planning of installation and construction work for both gravity fed and pressurised irrigation systems.

AHCIRG503 Design irrigation, drainage and water treatment systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design irrigation, draining and water treatment systems.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine design requirements	1.1 Analyse water quantity and quality needs for a particular crop or situation so that an estimation can be made for sufficiency and timeliness

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.2 Evaluate water transfer, recharge, reuse and harvesting systems 1.3 Determine water collecting and storing processes that do not degrade the water quality 1.4 Determine construction specifications that satisfy organisational and regulatory requirements 1.5 Identify and protect environmentally sensitive areas as required by local, State and National legislation 1.6 Investigate regional geology and geography so that a prediction can be made on the sustainability of irrigation, drainage, storage and treatment system 1.7 Conduct a site investigation to assess type of soil, depth of soil, depth of ground water, water salinity, and structural or chemical impediments and to determine the most cost effective irrigation, drainage, treatment and storage systems 1.8 Document design calculations and decisions
2. Define pumping and power systems	2.1 Identify pumps that can deliver water efficiently when needed, from the water storage at the flow and at the pressure required to operate the distribution system to the design specifications 2.2 Select pump motor combinations that are efficient, reliable, functional, serviceable and flexible for the intended application 2.3 Determine energy requirements and layout of electricity lines and check with local authorities 2.4 Optimise the relationship between capital and operational costs including a comparison of energy sources 2.5 Document performance indicators, design calculations and decisions 2.6 Design construction specifications that define work required to make suitable pumping and power systems available
3. Design an irrigation distribution system	3.1 Investigate regional geology and geography so that a prediction can be made on the sustainability of irrigation 3.2 Evaluate distribution systems and design with respect to a range of key variables 3.3 Size pipes, valves and fittings according to design system specifications so that capital cost is balanced against operation costs over the anticipated system life 3.4 Calculate and document flows, water levels and pressures so that they are within the acceptable tolerances for optimum performance 3.5 Include mechanisms for controlling and adjusting pressure and confirm isolation valves to direct water to areas with different irrigation schedules 3.6 Design distribution and monitoring systems to meet industry

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	recommendations and calculate distribution system flow and velocity 3.7 Design construction plans and specifications that define the work required to achieve the required standards of uniformity and efficiency of water application
4. Design a drainage, storage and treatment system	4.1 Document predictions of leaching fractions and salt movements and develop soil amelioration and drainage management plans 4.2 Determine the need for leachate interception and dewatering system, and if required, prepare construction specifications for interception and collection, water treatment, disposal and reuse or recycle 4.3 Design drainage, storage and treatment systems to meet industry recommendations and calculate distribution system flow and velocity 4.4 Produce construction plans and specifications that define the work required to achieve standards of uniformity and efficiency of the drainage, storage and treatment systems 4.5 Determine if drains and structures are capable of carrying the design water volumes and intensities 4.6 Minimise damage from drainage, storage and treatment system issues 4.7 Use hydrological calculations to predict volumes and rates of surface run-off
5. Determine capital expense budget	5.1 Document design calculations and decisions and communicate relevant information through plans, specifications and manuals 5.2 Determine and document materials requirements from plans and specifications 5.3 Estimate labour requirements based upon documented work schedule with reasonable allowance for variances in work schedules 5.4 Base costing attributed to each component on quoted information from suppliers, or sound analysis of individual elements 5.5 Confirm budget output by checking with an appropriately experienced and qualified person
6. Determine operating expense budget	6.1 Determine an operating expense budget that includes all expenses applicable to the completed irrigation, drainage, storage and treatment systems

© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for AHCIRG503 Design irrigation, drainage and water treatment systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and analyse information
- compare costings
- develop budgets
- develop system specifications
- document outcomes
- identify adverse environmental impacts of irrigation, drainage, water treatment and storage activities and take appropriate remedial action
- identify system design requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- contractual development and obligations
- control and monitoring systems
- cost/benefit analysis
- design processes
- developments in irrigation, drainage, storage and treatment technology
- environmental impacts of irrigation, drainage and water treatment
- soil types and their impact on the systems
- work health and safety and environmental protection legislation and regulations, codes of practice and enterprise policies and procedures

AHCLSC302 Construct landscape features using concrete

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct concrete structures and features as a component of landscape project works.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Interpret plans and specifications 1.2 Check the quantity and quality of materials 1.3 Select tools and equipment and check for serviceability 1.4 Identify hazards, assess risks and implement controls

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.5 Select and use personal protective equipment (PPE) 1.6 Identify and ameliorate environmental impacts of proposed concrete works
2. Set out and prepare the site	2.1 Determine and locate services 2.2 Mark out the position of the structure or feature according to plans 2.3 Establish profiles to conform to the nominated tolerances 2.4 Prepare subsoil by removing all debris, vegetable matter and topsoil to provide a solid foundation for concrete 2.5 Install drainage systems according to plans and specifications 2.6 Install form work to the site in a manner that will ensure it remains rigid during concrete pouring operations 2.7 Place and compact sub-base material to the required finished levels 2.8 Complete preparation of the site according to the type of structure or feature to be constructed 2.9 Place reinforcement as designated in plans and specifications
3. Mix and pour concrete	3.1 Determine proportions for concrete mix according to the strength requirements of the project 3.2 Determine the volume of dry materials necessary to produce final concrete mix 3.3 Mix together all dry ingredients and required additives to ensure a thorough blending of all materials is achieved 3.4 Introduce sufficient water to produce a concrete mix to the required consistency 3.5 Pour concrete to designated levels in a manner to avoid segregation of materials 3.6 Consolidate concrete using an approved vibration method
4. Finish concrete	4.1 Screed concrete to the desired finished level 4.2 Trowel surface to desired finish 4.3 Finish concrete off according to plans and specifications
5. Check quality of work and clean-up site	5.1 Inspect the quality of finished works to ensure the required standard has been achieved 5.2 Remove and clean form work to allow reuse 5.3 Ensure all clean-up works minimise impact to the environment 5.4 Clean, maintain and store tools and equipment

Assessment Requirements for AHCLSC302 Construct landscape features using concrete

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and specifications
- set out and prepare a site for concrete
- measure and construct profiles
- establish levels using levelling equipment
- place reinforcement
- pour, consolidate and finish concrete

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of constructing concrete landscape features
- industry standards in relation to reinforcing and consolidating concrete
- MPA testing theory and what affects MPA specifications in a concrete mix
- sub-base and sub-grade materials and preparation
- the comparative environmental implications associated with soil removal and the placement of concrete

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSC304 Erect timber structures and features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- mark out a site for timber structures and features according to design drawings and specifications
- apply a variety of surface finishes
- establish levels and prepare footings where required
- estimate quantities
- use levelling equipment
- excavate footings
- fix, join or assemble timbers using a variety of recognised methods
- use a power tools efficiently and safely

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for erecting timber structures
- common timber joins
- levelling principles and techniques
- footings for timber structures and their construction methods
- timber fixing methods and products
- timber properties and characteristics

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate machinery and equipment maintenance and repair for a small enterprise.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
1. Prepare for maintenance and repair work	1.1 Clarify requirements of the work responsibilities with the supervisor 1.2 Identify equipment and material resource requirements according to the scope of the coordination work and the supervisor's instructions 1.3 Identify, document and present the priorities for maintenance and repair activities and time allocation to the supervisor for verification 1.4 Identify the environmental implications of the proposed maintenance and repair work and assess and report the likely outcomes to the supervisor 1.5 Identify work health and safety hazards, assess risks and implement risk controls 1.6 Select, use and maintain personal protective equipment according to enterprise procedures
2. Maintain and repair machinery and equipment	2.1 Maintain and repair equipment and machinery 2.2 Purchase, store and use materials to assist in maintenance and repair work 2.3 Organise delivery of materials to the site 2.4 Organise machinery and equipment to be on-site in good order when they are required 2.5 Identify and organise maintenance and repairs requiring specialist attention
3. Coordinate and report on maintenance and repair activities	3.1 Coordinate resources to suit the maintenance and repair activities and priority of work 3.2 Inform operators of their responsibilities in respect to operational maintenance requirements of machinery and equipment 3.3 Monitor and document personnel, activities, timelines and materials usage 3.4 Recognise and report contingency situations to the supervisor and take corrective actions 3.5 Report to management the maintenance and repair activities undertaken and completed

Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- perform a work health and safety risk assessment and implement safe work procedures and ensure a safe workplace
- read and interpret documentation associated with work site activities
- seek technical advice on the scale of repairs required where necessary
- establish priorities for work to be carried out
- calculate material and resource requirements
- co-ordinate a team to achieve optimum performance
- respond to contingencies and taking corrective actions where necessary
- document activities, timelines and material usage

Knowledge Evidence

The candidate must demonstrate knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery that may be required for the project
- environmental awareness associated with undertaking maintenance and repair work on machinery and equipment to ensure the impact on the environment is minimal
- relevant work health and safety issues, legislative requirements and codes of practice

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise maintenance of property, machinery and equipment.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, implement risk control strategies and oversee safe work practices
- plan, cost and schedule maintenance requirements
- order materials and allocating resources
- deal with contingencies and reschedule maintenance where necessary
- establish and monitor performance targets for maintenance team
- monitor and report on performance of maintenance activities
- dispose of waste products appropriately
- communicate effectively with work team, contractors and management
- implement enterprise work health and safety and environmental policies
- provide on job training /mentoring

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of maintenance requirements with regard to property, machinery and equipment
- maintenance and servicing cycles for property, machinery and equipment
- relevant State or Territory legislation, regulations and Codes of Practice with regard to work health and safety, environmental protection requirements, and the use and control of hazardous substances
- principles of hazard identification and risk management in the work place
- principles of on the job training and mentoring

AHCMOM402A Supervise maintenance of property machinery and equipment

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers supervising maintenance of property machinery and equipment and defines the standard required to: schedule and cost the maintenance requirements of machinery; order materials, allocate resources and schedule maintenance; carry out maintenance with regard to timelines, costs and safety; deal with contingencies and reschedule maintenance where necessary; dispose of waste products according to environmental legislation and enterprise procedures.

Application of the Unit

Application of the unit	This unit applies to those whose job role includes supervising the maintenance of property, machinery and equipment.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare maintenance plan	1.1. Maintenance requirements for property, machinery and equipment are identified form relevant information sources. 1.2. Maintenance costs are identified and quantified. 1.3. Maintenance requirements are checked against warranty, insurance agreements and indemnity provisions. 1.4. Maintenance plan is develop to promote and sustain performance and production systems in line with enterprise requirements. 1.5. Effective workplace communication strategies are established with regard to maintenance plan, environmental and Occupational Health and Safety (OHS) policies, and enterprise requirements.
2. Implement maintenance plan	2.1. Resource and supply requirements are identified, secured and included in enterprise budgets and operational considerations. 2.2. Prepared maintenance schedules and procedures are effectively communicated to staff, contractors and suppliers to minimise negative impacts on production and costs. 2.3. Maintenance plan is implemented and scheduled to minimise disruption to enterprise operations. 2.4. Potential risks are assessed with regard to staff and supply problems, and contingency plans prepared accordingly.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.5. Tasks required are aligned to staff capability, and training is provided where required. 2.6. Machinery and equipment are operated to manufacturer's specifications, OHS and enterprise requirements.
3. Monitor maintenance plan	3.1. Maintenance activities and performance are monitored against maintenance plan for efficiency and effectiveness. 3.2. Workplace hazards and environmental implications associated with maintenance procedures are monitored and controlled in line with OHS and enterprise requirements. 3.3. Costs are monitored and controlled within enterprise budget requirements. 3.4. Relevant information with regard to the maintenance plan is documented in accordance with enterprise requirements. 3.5. Property, machinery and equipment are maintained in clean and safe operational conditions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• identify hazards and oversee safe work practices • plan, cost and schedule maintenance requirements • establish and monitor performance targets for maintenance team • monitor and access performance of maintenance activities • observe the emergence and supervise the removal of workplace hazards and risks • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• types of maintenance requirements with regard to property, machinery and equipment • maintenance and servicing cycles for property, machinery and equipment • relevant State/Territory legislation, regulations and Codes of Practice with regard to workplace OHS and environmental protection requirements, and the use and control of hazardous substances • hazards and risks and respective control measures • training and instruction techniques for directing the learning of staff.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • schedule and cost the maintenance requirements of machinery • order materials, allocate resources and schedule maintenance • carry out maintenance with regard to timelines, costs and safety • deal with contingencies and reschedule maintenance where necessary • dispose of waste products according to environmental legislation and enterprise procedures.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Supervision may include:	• the range of maintenance programs performed in agriculture horticulture industry enterprises.

Unit Sector(s)

Unit sector	Machinery operation and maintenance

AHCNAR303 Implement revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement revegetation works in natural restoration areas.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for revegetation works	1.1 Identify appropriate timing and method of planting required 1.2 Select tools and materials required for the task and check functionality and cleanliness 1.3 Identify, obtain and store plant materials 1.4 Determine and organise labour and machinery requirements

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.5 Prepare a works schedule and provide to management or client 1.6 Conduct a safety risk assessment and apply work health and safety procedures
2. Prepare the revegetation site	2.1 Identify site hazards, assess risks and implement risk controls 2.2 Undertake site preparation according to planting plan or supervisor's instructions 2.3 Use soil nutrients and ameliorants, if required by plan specifications 2.4 Mark out revegetation site according to supervisor instructions or plan, applying knowledge of ecosystems and habitat requirements 2.5 Treat all diseased and competing plants, debris and pollutants according to the plan and implement risk controls 2.6 Select and apply treatments according to the risk controls selected 2.7 Install protective structures where indicated by the risk controls implemented
3. Undertake revegetation works	3.1 Carry out revegetation works in accordance with work health and safety policies and procedures and wear appropriate personal protective equipment 3.2 Inspect plant materials before revegetation works and discard defective materials 3.3 Treat plant materials with required nutrients according to documented guidelines 3.4 Plant revegetation stock according to planting program 3.5 Apply appropriate techniques for protecting, securing or anchoring new plants 3.6 Apply appropriate biosecurity and environmentally sustainable practices 3.7 Ensure all of the revegetation program requirements have been implemented 3.8 Identify and report potential threats to revegetation works
4. Maintain revegetated site	4.1 Monitor growth of plants 4.2 Maintain site according to the planting program requirements 4.3 Undertake remedial action and plant protection according to the needs of the species 4.4 Clean, maintain and store tools and equipment

Assessment Requirements for AHCNAR303 Implement revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out all revegetation works according to the planting plan or supervisor instructions
- prepare the site for revegetation works
- conduct a site hazard identification and risk control assessment
- recognise and treat plant diseases on a revegetation site
- treat weeds and competing plants
- clean and maintain the revegetated site
- use, clean, maintain and store machinery and equipment according to manufacturer instructions
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- revegetation techniques
- ecosystems, provenance and habitat requirements
- factors affecting the timing and method of planting
- identification of pests and diseases of trees
- principles and methods relating to the prevention and control of pests and diseases
- safety requirements when handling and using hazardous goods
- nutrient requirements of a range of plant species and cultivars
- physiology of plant growth

© Commonwealth of Australia, 2025 Skills Insight

- techniques for protecting and securing or anchoring trees and shrubs
- soils, nutrients and ameliorants applicable to revegetation program

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR402A Plan the implementation of revegetation works

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers planning the implementation of revegetation works and defines the standard required to: establish the purpose and client preferences for the site to be revegetated; carry out a site visit and confirm any planning requirements; develop a plan for the site, detailing the resources required and the program of works; develop timelines for the establishment and maintenance phases of the project; document the staged implementation plan.

Application of the Unit

Application of the unit	This unit applies to supervisors of revegetation programs who plan the implementation of revegetation works.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Carry out preliminary planning activities for revegetation works	1.1. Client preferences and contract requirements including the scope of the work for the revegetation project are confirmed and verified. 1.2. Specific statutory obligations and site responsibilities that may affect the implementation of works are identified. 1.3. An initial site visit is conducted to verify the biophysical and other factors of the project area including environmental considerations and historical modifications. 1.4. Occupational Health and Safety (OHS) obligations associated with the revegetation works are identified, OHS hazards are assessed and controls developed, costed and documented in the implementation plan according to enterprise guidelines. 1.5. The availability, quantity and costs of plants and other materials listed in the project schedules are verified.
2. Prepare a staged plan of work	2.1. Resources, tools and equipment required for revegetation procedures and ongoing maintenance of the site are identified, costed and availability confirmed with suppliers, contractors and appropriate personnel. 2.2. Site access and establishment issues are investigated to consider and plan for the environmental impacts of site work practices, avoid safety hazards to workers or the public, and minimise disruption to site works during the construction period.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.3. A program of works is prepared to provide a sequential allocation of resources and work tasks to meet the project contract timelines. 2.4. Timelines are developed for site establishment, the establishment period and maintenance of works. 2.5. Seasonal factors and impacts are incorporated in the staging strategy to allow for planting supply and care, wet day access, machinery use, fire hazards and establishment period. 2.6. Where required, special project works related to habitat resource development and enhancement are included in the staged implementation plan. 2.7. Document the staged implementation plan.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- assess a site for opportunities and constraints associated with implementation of revegetation works
- prepare schedules for implementation of revegetation works
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- awareness of the role of revegetation works in the restoration of the environment
- practical understanding of the environmental issues associated with undertaking revegetation works, and the need to comply with legislation and ensure that the

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
impact on the environment is minimal • principles of ecology including specific native plant and animal relationships and habitat requirements • identification, propagation and establishment techniques of specific native plant species • site evaluation techniques including methods of analysing soils, waterways and their condition • practical understanding of the advantages and disadvantages of a range of revegetation procedures • chemical, cultural and biological weed and feral animal control techniques • soil conservation and enhancement techniques and their advantages and disadvantages in reference to specific sites and habitats • soil erosion control and stormwater management techniques • maintenance requirements and practices for native plants prior to and after initial establishment • growth habits and cultural requirements of specific native plants under a range of soil and environmental conditions • OHS hazards associated with undertaking revegetation works and the controls necessary to remove or minimise risks associated with them • contract documents including specifications, plans of landscape works, services, supplies and surveyors documents.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • establish the purpose and client preferences for the site to be revegetated • carry out a site visit and confirm any planning

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	requirements • develop a plan for the site, detailing the resources required and the program of works • develop timelines for the establishment and maintenance phases of the project • document the staged implementation plan.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Revegetation works may include:	• works for disturbed, degraded or remnant natural sites.

Unit Sector(s)

Unit sector	Natural area restoration

AHCNSY201 Pot up plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to transplant established plants with developed root systems.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for potting up operations	1.1 Clarify work activity instructions with supervisor 1.2 Identify any work health and safety hazards and tell supervisor 1.3 Select and use tools and equipment for potting up 1.4 Clean and disinfect work area 1.5 Collect materials and check that there is sufficient quantity and

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	quality for potting up operations 1.6 Select and use suitable personal protective equipment (PPE)
2. Prepare growing media	2.1 Measure media components and mix as instructed 2.2 Test growing media to ensure the product complies with media specifications
3. Pot up propagated plants	3.1 Prepare plants for potting 3.2 Pot up selected propagated plants 3.3 Grade plants during the potting process to meet quality specifications and report any abnormalities to supervisor 3.4 Adjust media level in pots to produce a well-furnished plant 3.5 Ensure that placement and depth of plants comply with the planting method and plan 3.6 Add fertilisers and other products as directed
4. Complete potting up operation	4.1 Water plants in to eliminate air pockets and prevent dehydration 4.2 Perform cleaning procedures and follow hygiene practices 4.3 Collect waste and dispose of or recycle to minimise damage to the external environment 4.4 Maintain records of potting up operations in the appropriate format 4.5 Clean and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY201A Pot up plants.

Assessment Requirements for AHCNSY201 Pot up plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare tools, equipment, media and plants
- measure media components
- disinfect work areas
- operate potting machinery (if required)
- pot up propagated plants
- handle plants with care
- treat common problems of plants
- use and maintain tools

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of potting up plants
  - appropriate use of personal protective equipment
  - basic plant physiology
  - common problems in a controlled environment
  - enterprise plants and their characteristics
  - hygiene and quality control
  - methods of disposing of waste
  - properties of relevant potting media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY203 Undertake propagation activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for plant propagation according to instructions
- collect propagation material as appropriate to species
- apply pre-treatments
- apply water and nutrients
- carry out a variety of propagation techniques
- collect propagation material
- maintain environmental parameters and temperature controls
- minimise damage to and maximise viability of propagated material
- maintain records of activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of propagation
  - botany and plant physiology as it applies to propagation
  - common problems that occur while performing propagation activities
  - enterprise hygiene requirements
  - enterprise requirements for handling and disposal of nursery wastes
  - maintenance requirements of tools and equipment used for propagation
  - plant nutrition
  - propagation methods required for a range of plant species
  - quality specifications/characteristics of a range of parent plants and propagation materials

Assessment Requirements for AHCNSY306 Implement a propagation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare the growing environment to suit species and propagation method
- recognise and rectify problems and anomalies with parent plants, propagation material, propagation media, equipment and materials
- select appropriate propagation material
- handle potting mixes and propagation materials in a safe manner
- apply propagation techniques as appropriate to plants being propagated
- Provide aftercare to suit media conditions, plant requirements and propagation techniques

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for implementing a propagation plan
  - aftercare requirements for a range of propagated plants
  - problems that may occur performing propagation activities and preventative action
  - enterprise hygiene standards required for propagation activities
  - preferred types of propagation media for different species
  - propagation techniques required for a range of plants
  - quality specifications for parent plants and propagation materials
  - testing methods applied to propagation media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY401 Plan a growing-on program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan a growing-on program and monitor the implementation of the program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify issues affecting the growing-on program	1.1 Determine production requirements in consultation with management 1.2 Identify factors that could limit the production of nursery plants

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.3 Identify work health and safety hazards, assess risks and implement control measures 1.4 Consider the environmental implications of a growing-on program 1.5 Incorporate sustainable practices into the growing-on plan
2. Develop the growing-on plan	2.1 Identify activities involved in the growing-on program 2.2 Identify labour, materials, tools and equipment needs 2.3 Select environmental parameters and alter to meet plant needs and production plans 2.4 Determine growing media requirements, taking into account the needs of the plant and production plans 2.5 Determine planting dimensions and layout after consulting production plans 2.6 Identify treatments required for the growing-on program 2.7 Identify hygiene requirements for the growing-on program
3. Document the growing-on plan	3.1 Document the growing-on plan, including all information identified in the development stage 3.2 Document a budget supporting the plan and request approval by management 3.3 Organise a schedule of activities 3.4 Communicate the growing-on plan and schedule of activities to staff
4. Oversee and monitor the growing-on program	4.1 Monitor the health of the plants to ensure they are at optimum growth 4.2 Modify treatments as required to maintain optimum growth 4.3 Confirm plants are ready for dispatch meet customer specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCNSY401 Plan a growing-on program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and assess factors that could impact the growing-on program
- Identify labour, materials and activities involved in the growing-on program
- conduct research about production requirements, growth conditions and marketing implications of a growing-on program
- negotiate, budget and document plans
- communicate plans and schedules to staff
- oversee and monitor the growing-on program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of planning a growing on program
  - application techniques for chemical and non-chemical intervention or treatments
  - chemical, cultural and biological pest, weed and disease control techniques
  - common problems of growing-on and preventative actions that may apply
  - enterprise hygiene standards required for growing-on activities
  - enterprise quality standards of nursery plant production
  - optimal growing requirements of nursery plants
  - preferred types of propagation media for different species
  - processes and techniques for preparing, costing and documenting plans for and scheduling growing-on activities
  - testing methods applied to propagation media

Assessment Requirements for AHCNSY402 Plan a propagation program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- negotiate, budget and document propagation plans
- research information about production requirements, growth conditions and marketing implications
- develop a propagation plan that takes into account labour, materials and propagation media requirements and environmental conditions
- determine hygiene requirements for propagation activities
- monitor propagation activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of propagation program planning
  - aftercare requirements for a range of propagated plant varieties and cultivars
  - application techniques for chemical and non-chemical intervention or treatments
  - problems performing propagation activities and preventative action
  - hygiene standards required for propagation activities
  - identification, propagation and establishment techniques for a range of plants
  - enterprise quality specifications for parent plants and propagation materials
  - Plant Breeders Rights (PBR) and related legislation
  - preferred types of propagation media for different species
  - processes for preparing plans for and scheduling propagation activities
  - testing methods applied to propagation media

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY402A Plan a propagation program

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers planning a propagation program and defines the standard required to: determine propagation techniques and resources required; select propagation materials and media and determine optimal environmental conditions; determine plant hygiene requirements; review propagation plan by monitoring strike rate and health and quality of propagated plants; negotiate and document plans.

Application of the Unit

Application of the unit	This unit applies to plant propagators.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Carry out preliminary planning activities for a plant propagation program	1.1. Management and marketing requirements are confirmed and understood. 1.2. Space requirements for propagation program are evaluated. 1.3. Propagation techniques are determined according to species and sound horticultural practice. 1.4. Environmental parameters that impact on propagation are determined. 1.5. Budget for the propagation program is negotiated with management. 1.6. Occupational Health and Safety (OHS) hazards associated with the propagation program are identified, risks assessed and controls implemented.
2. Develop the propagation plan	2.1. Labour, materials, equipment and machinery needs are identified. 2.2. Propagation media requirements are determined according to the propagation method and needs of the plant. 2.3. Strategies to modify environmental conditions are determined according to the type of plant and propagation method used. 2.4. Selection criteria for the propagation material are determined according to the type of plant and propagation method. 2.5. Hygiene requirements for propagation activities are determined. 2.6. Propagation plan is documented and schedule of

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	activities are communicated clearly to staff.
3. Monitor success of propagation activities	3.1. Variances from plan and scheduled activities are identified and recorded. 3.2. Propagated plants are assessed for health, quality and viability according to enterprise quality standards. 3.3. Remedial procedures are planned to meet marketing objectives and business imperatives.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- plan a propagation program applies to the
- conduct literature and consultative research to obtain information about propagation requirements, growth conditions, and marketing implications
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- OHS hazards associated with undertaking propagation activities, and the controls necessary to remove or minimise risks associated with them
- practical understanding of the OHS and environmental issues associated with use and disposal of propagation media
- enterprise and industry hygiene standards required for propagation activities, including relevant quarantine regulations
- industry and enterprise quality specifications for parent plants and propagation materials
- common problems that may occur while performing propagation activities in a

REQUIRED SKILLS AND KNOWLEDGE
controlled environment, and preventative/corrective action that may apply • processes and techniques for preparing, costing and documenting plans for and scheduling propagation activities • identification, propagation and establishment techniques required for a range of plant varieties and cultivars • monitoring staff performance • Plant Breeders Rights (PBR) and related legislation • aftercare requirements for a range of propagated plant varieties and cultivars • testing methods applied to propagation media • preferred types of propagation media for different species • chemical, cultural and biological pest, weed and disease control techniques • application techniques for chemical and non-chemical intervention or treatments.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • determine propagation techniques and resources required • select propagation materials and media and determine optimal environmental conditions • determine plant hygiene requirements • review propagation plan by monitoring strike rate and health and quality of propagated plants • negotiate and document plans.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

EVIDENCE GUIDE	
	enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Propagation techniques may include:	• seed • cuttings • layering • growing on tissue cultured plants • division or splitting • budding • grafting • spores • cloning.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- plan a plant establishment program
- consult with clients
- document plans, specifications and work procedures
- comply with legislative requirements
- write plans and reports that staff, clients and contractors can understand
- calculate the cost and spatial and logistical requirements of components of the plant establishment program.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- identification, propagation and establishment techniques of specific plant species and cultivars
- the advantages and disadvantages of a range of plant establishment procedures
- maintenance requirements and practices for specific plant species and cultivars, prior to and after initial establishment
- processes and techniques for preparing, costing and documenting plans for and scheduling plant establishment activities
- processes and techniques for scheduling plant establishment activities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG201 Treat weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise significant weed species and apply a range of weed treatment control options.

This unit applies to supervised workers treating weeds in commercial crops, nurseries, parks and gardens, turf, and natural areas and is carried out following strict work instructions and under supervision.

Supervisors are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Assessment Requirements for AHCPMG201 Treat weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow supervisor instructions to prepare and apply treatments to weeds
- identify and report safety and environmental hazards according to workplace requirements
- shut down and clean and store personal protective equipment and application equipment in a way that minimises environmental impacts
- dispose of treatment waste according to workplace procedures and without causing environmental damage
- maintain records according to workplace and legislative requirements
- use standard industry terminology for plants, weeds and chemicals
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of information on weeds and treatments
- environmental considerations when using chemicals for treating weeds
- equipment required to complete the task
- equipment capabilities and limitations
- personal protective equipment required for treating weeds
- weeds and dispersal methodologies common to work area
- a range of treatment methods
- caution or hazard signs and signals
- purpose of chemical labels and safety data sheets
- where to access safety data sheets

AHCPMG301 Control weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to plan and coordinate weed control activities.

This unit applies to workers in agriculture, horticulture or land management-based enterprises who are required to carry out the control of weed infestations using cultural, biological and chemical methods to provide effective, economical control of weeds while minimising damage to the environment.

The unit applies to workers who demonstrate autonomy and judgement and take limited responsibility in known contexts.

Individuals operating in this field who use chemicals for weed control are required to hold current chemical handling certification. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Assessment Requirements for AHCPMG301 Control weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify range of weeds and beneficial organisms in the work area
- plan and coordinate weed control activities
- identify threshold levels or tolerance of weeds
- identify target weeds at different growth stages
- conduct a site hazard identification and risk control assessment for weed control
- prepare, maintain and calibrate equipment
- select and apply weed management methods appropriate to the context
- maintain records of weed management activities
- monitor, record and report the effectiveness of methods
- minimise damage to non-target species and the environment
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- suitable weed control measures and timing of weed control activities based on:
  - the lifecycle and ecology of a range of relevant weeds in the area
  - the cyclical nature of weeds and control programs
  - how weeds grow and spread and methods of weed dispersal
  - weed characteristics
  - beneficial organisms in the area

© Commonwealth of Australia, 2025 Skills Insight

  - new and emerging weed species present in the area
  - how plant health or growth requirements can be compromised by infestation levels
  - economic, aesthetic, health, fire hazard and environmental thresholds for a range of weeds, common to the area
  - weed control methods and when they should be selected, including prevention strategies
  - non-target plants common to the area, especially plants with morphological features similar to the target pest plant
  - key concepts of Integrated Pest Management
  - risk factors including human, animal health and environmental associated with control measures
- factors that affect the efficacy of weed management
- how to conduct activities in a manner that avoids or minimises disturbance to other plant or animal species
- signs of adverse impact on humans, animals, non-target plants and the environment due to implemented control measures and ways of minimising these adverse effects
- a range of site-monitoring techniques that may be used to implement the weed control plan
- hazard identification and risk assessment methodologies
- types of equipment including personal protective equipment appropriate to the control measure
- work health and safety requirements pertaining to the use of cultural, biological and chemical agents
- relevant parts of the organisation's pest management plan and survey strategy
- legislative requirements relevant to weed control.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG302 Control plant pests, diseases and disorders

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to control plant pests, diseases and disorders, taking into consideration Integrated Pest Management options. The unit describes the skills and knowledge required to identify a range of pests, diseases and disorders and beneficial organisms, assess damage or threat to plants and select and apply pest and disease controls and timing of operations. It includes preparing and calibrating equipment, monitoring the effectiveness of controls and keeping records.

This unit applies to workers in plant-based enterprises or activities working under limited supervision from others with checking only related to overall progress. Workers may require limited organisation and have limited responsibility for the work of others.

Individuals operating in this field are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess pests and disease infestation	1.1 Assess the scope and size of the infestation 1.2 Identify and report or record plant pests, diseases and disorders, beneficial organisms and hosts 1.3 Determine thresholds of pest infestations tolerated by the client, market or environment from the Integrated Pest Management strategy
2. Plan the implementation of management measures	2.1 Select management measures from Integrated Pest Management strategy suitable for the infestation 2.2 Select management measures to minimise impact on non-target plant or animal species and to meet production or environmental objectives 2.3 Select tools, equipment and machinery for each work activity according to enterprise work procedures 2.4 Identify work health and safety hazards, assess risks and implement risk controls 2.5 Select, use and maintain personal protective equipment according to label or manufacturer instructions 2.6 Select management measures in full consideration of work health and safety and environmental implications and legislation
3. Implement management measures	3.1 Follow work health and safety procedures throughout management activities 3.2 Coordinate enterprise work team, contractors and Integrated Pest Management product suppliers in a sequential, timely and effective manner in consultation with the supervisor 3.3 Implement management measures according to the Integrated Pest Management standards or industry Code of Practice 3.4 Maintain a clean and safe work area throughout and on completion of each activity 3.5 Maintain records as required by legislation and enterprise guidelines
4. Monitor management methods	4.1 Monitor management measures to identify side effects to other plants, animals or external environment 4.2 Assess effectiveness of management methods in reference to specified industry, work health and safety and enterprise standards 4.3 Make adjustments to Integrated Pest Management methods where

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can:

- identify pests, diseases and disorders, beneficial organisms and host plants in target area
- assess damage or threat to plants
- select and apply pest and disease management options and determine timing of operations according to pest management plans, to maximise impact on target species and minimise risks to non-target plant and animal species in the area
- prepare and calibrate equipment
- monitor the effectiveness of pest and disease management methods
- keep records of pest and disease management activities to regulatory and enterprise standards
- follow of work health and safety procedures when carrying out pest and disease management activities
- apply appropriate environmental sustainability practices when planning and carrying out work.
-

Knowledge Evidence

The candidate must explain:

- pest, disease and disorder and symptom recognition of host stress
- economic, aesthetic or environmental thresholds for a range of plant pests, diseases and disorders

© Commonwealth of Australia, 2025 Skills Insight

- chemical, biological and cultural methods and treatments available to the enterprise within the parameters of an Integrated Pest Management program
- range and use of tools, equipment and machinery available to the enterprise for implementing the management measures
- range of site monitoring and analysis techniques that may be used to implement an Integrated Pest Management program
- implications of choice of plant pest and disease control methods with site limitations, environmental implications, end market and production or environmental objectives for the site
- basic principles of Integrated Pest Management standards or industry Code of Practice
- work health and safety responsibilities for employees and employers
- correct use, maintenance and storage of personal protective equipment
- work health and safety and environmental legislative requirements including hazardous substances regulations.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG402A Develop a pest management action plan within a local area

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers developing a pest management action plan within a local area and defines the standard required to: determine the lifecycle, distribution and loss of production caused by the pest; document the economic losses and environmental risks and impacts of the pest; develop control measures based on a combination of strategies to control the pest at its most vulnerable stage with minimal environmental impact; establish the costs and benefits of implementing the selected control strategies; select management options to eradicate or manage the pest across a local region; negotiate an action plan to implement the management options across an area or region.

Application of the Unit

Application of the unit	This unit applies to regional pest management officers and is likely to be undertaken independently, with reference to specialist advice.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Determine land management/production objectives	1.1. Land users and other stakeholders are consulted regarding local objectives. 1.2. Objectives address major land uses and production activities in the local area affected by the impacts of the target pests. 1.3. Objectives relate to the problem definition and the reduction in the pest impacts and associated losses. 1.4. Objectives comply with national, state and regional legislation and regulations. 1.5. Objectives support strategies for land and pest management.
2. Estimate costs and advantages for management units	2.1. The diversity of land management and production values that the target pests affect within the local area is defined. 2.2. The likely costs of preferred options for control of pest populations and/or changes to land management or production activities associated with each value are estimated. 2.3. The likely costs are compared with the impacts and losses caused by the target pests.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. The management units most affected, both actually and potentially, by the target pests are defined and prioritised.
3. Define the performance level for each land management/production objective	3.1. Performance levels are defined in accordance with sustainable land use principles to address target pests population levels, economic impacts and environmental impacts. 3.2. Performance levels are realistic and measurable.
4. Select management options for the target pests	4.1. Options for controlling pest populations and/or changing land management or production practices are assessed in terms of economic factors, technical difficulty, practical feasibility, social and/or environmental acceptability. 4.2. A range of management options are assessed in terms of current and future financial support, when control activities are to be implemented, level of target pests population reduction required, and the most suitable control methods and techniques. 4.3. A management option is selected in accordance with sustainable land use principles, economic feasibility, environmental acceptability, Integrated Pest Management (IPM) principles, and statutory requirements for pest control.
5. Negotiate possible actions with relevant stakeholder	5.1. The action is based on the definition of the problem using data from measurement of abundance and impacts. 5.2. The action clearly documents the pest problem, the objectives, the stakeholders, the prioritised management units, the performance criteria, and the most suitable management options.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• identify hazards and implement safe work practices • determine land use objectives

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• estimate costs and advantages for areas affected by the target pest/s • define performance levels for pest management for each land use • select management control options for the target pest/s • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• relevant local, regional, state and national strategies for pest management including those for individual species • motivational effects of stakeholder involvement • community facilitation processes • local land management process • relevant legislative and regulatory requirements including statutory requirements for pest control • environmental protection legislation • principles of IPM • pest control methods and techniques • defining local land management and production values • determining cost benefit analysis of management options • sustainable land use principles • Occupational Health and Safety (OHS), environmental and pesticides legislation, codes of practice and enterprise procedures.

Evidence Guide

EVIDENCE GUIDE
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

AHCPMG507 Develop a regional pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a pest management plan that applies to a large or regional level. It also describes the skills and knowledge required to gain agreement and commitment from stakeholders to implement the plan.

Pest management plans are used by land managers who practice sustainable land management principles and require a collaborative approach with neighbouring landholders.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in specific technical areas, are able to analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine goals of the plan	1.1 Determine scope of the plan 1.2 Determine the need for, and establish a steering committee, where necessary 1.3 Determine consultation requirements 1.4 Conduct and document consultation with stakeholders to determine goals 1.5 Assess and document options for controlling pest populations, changing land management or production practices, in terms of economic factors, technical difficulty, practical feasibility, and social and environmental acceptability
2. Set specific objectives for the pest management plan	2.1 Define and document objectives to be achieved in consultation with stakeholders 2.2 Define roles and responsibilities of stakeholders in delivering objectives
3. Identify activities required to achieve specific objectives	3.1 Determine and document activities required to achieve objectives in consultation with stakeholders 3.2 Prioritise activities and seek commitment from relevant stakeholders, where relevant 3.3 Conduct risk management for community, environment, work health and safety and production 3.4 Ensure activities align with pest management plan, environmental sustainability policies and biosecurity plans or legislation 3.5 Determine monitoring, evaluation and reporting methods
4. Determine performance criteria for objectives	4.1 Determine measurable performance criteria in terms of target pest population levels, economic impacts and environmental impacts
5. Publish the plan	5.1 Check the plan meets all biosecurity, legislative and national and State or Territory strategic policies 5.2 Submit draft plan to stakeholders for review 5.3 Finalise plan and seek endorsement by key stakeholders 5.4 Publish and distribute plan according to organisational requirements

Assessment Requirements for AHCPMG507 Develop a regional pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a pest management plan that contains objectives and management options which comply with relevant legislation and best practice principles of pest management
- consult with stakeholders to reach agreed upon outcomes from identified objectives
- scope geographical area, landscape and land uses within area and with stakeholders
- develop pest management plan according to defined pest problem
- align pest management plan to biosecurity plans or legislation
- develop pest management plan in accordance with sustainable land use principles, economic feasibility, environmental acceptability and statutory requirements for pest control
- develop, evaluate and document all management options to control, eradicate or prevent pest populations
- achieve approval of the plan by key stakeholders
- conduct risk assessments and cost-benefit analyses of the range of management options available in order to select the best option for the specific context
- apply work health and safety policies and procedures in the context of own work
- include appropriate animal welfare Code of Practice and Standard Operating Procedures in the plan
- apply appropriate sustainability practices in the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- planning techniques

© Commonwealth of Australia, 2025 Skills Insight

- concepts of the strategic approach to pest management, the importance of monitoring and the effectiveness of management evaluation
- relevant local, regional, State/Territory and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- principles of integrated pest management
- types of monitoring technology available
- land use processes, ecological systems and production systems
- pest management options and strategies
- techniques used to validate target pest population and distribution data supplied by stakeholders, and methods of obtaining other relevant data
- how to measure or estimate economic losses and environmental impacts from pest presence
- Federal and State or Territory legislation and regulations relating to property, stock and duty of care
- target pest biology and lifecycles
- potential diseases or toxicity risks
- pest population dynamics and economic and environmental thresholds
- wildlife issues and how to minimise risks to non-target species as well as deal with pest behaviour
- environmental protection legislation
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW201 Conduct erosion and sediment control activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to control erosion and sediment using earthworks construction and other land forming activities.

Construction is often carried out using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work, they undertake defined routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Assessment Requirements for AHCSAW201 Conduct erosion and sediment control activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct erosion and sediment control activities as instructed by a supervisor
- identify hazards and follow safe operating procedures
- identify erosion and sediment control structures, measures and practices
- carry out routine work with control measures and structures
- identify areas at risk of erosion
- operate or use machinery tools and equipment required for the tasks involved safely and efficiently

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the need for erosion and sediment control, including:
- the cost of erosion and sedimentation to the community
- the effect of loss of habitat
- how water quality is affected
- how soil erosion can cause loss of production, assets and amenities
- re-occurring maintenance, repair and monitoring requirements for controls
- agents and processes of erosion and sedimentation and ways to control them
- types of erosion and sediment control structures and techniques for constructing them
- role of vegetation in erosion control
- basic catchment issues
- characteristics of soils with an emphasis on erodible soils

Assessment Requirements for AHCSAW302 Implement erosion and sediment control measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- construct, install and maintain a range of erosion and sediment control measures
- identify hazards and implement safe work procedures
- prepare for implementation and construction
- read and follow plans to carry out implementation and construction
- identify survey pegs and site indicators on site and on the plans
- carry out repairs and maintenance procedures to enterprise standards
- select equipment and materials appropriate for the task
- operate equipment and machinery according to safe work practices and manufacturer instructions
- clean and store equipment, machinery and tools according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- materials cartage pollution control
- sequence of working and timing/duration
- work health and safety issues relating to the equipment and the site
- equipment used
- materials suitable for constructing erosion and sediment control measures and where to source them on site
- limitations of structures including timing of maintenance, structure life cycle, specifications and standards

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for implementation and construction	1.1. Erosion and sediment control plan and schedule of works match site conditions. 1.2. Survey pegs and site indicators are identified on site. 1.3. Equipment and tools are matched to program works and terrain on site. 1.4. Work readiness of selected equipment and tools are verified in line with contractor policy. 1.5. Materials are selected to complete proposed works in line with construction schedule.
2. Carry out implementation and construction	2.1. Earthworks are constructed in accordance with details specified in the plan and to industry standards. 2.2. Erosion and sediment control products and materials are installed in accordance with manufacturer's recommendation and industry guidelines and plans.
3. Carry out repairs and maintenance procedures	3.1. Site works maintenance inspection schedule is applied to reinstate operating effectiveness of erosion and sediment control measures on site.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• identify hazards and implement safe work procedures • prepare for implementation and construction • carry out implementation and construction • carry out repairs and maintenance procedures • use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• materials cartage pollution control • sequence of working and timing/duration • Occupational Health and Safety (OHS) issues relating to the equipment and the site • equipment used • construct, install and maintain includes materials, quantity and where to source them on site • construction/installation techniques for all measures on the plan • limitations of structures including timing of maintenance, structure life cycle, specifications and standards • environmental impacts and procedures for erosion and sediment control.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment

Element	Performance criteria
up-grading irrigation system	1.2 Determine water quality and treatment requirements 1.3 Determine water requirements and most suitable application systems for each crop and plant type and area, and for each soil type 1.4 Determine other water requirements, such as climate control 1.5 Assess soil types to determine suitability for irrigation and the range of crop and plant types that could be grown 1.6 Determine drainage requirements in relation to each soil and crop and plant type and type of irrigation system 1.7 Assess performance data, audit reports, environmental and workplace health and safety data for existing systems 1.8 Obtain information from irrigation specialists on all relevant aspects of irrigation design 1.8 Assess and cost available irrigation system types and components and make a decision on the particular system to be used or upgrades to existing system
2. Install or modify an irrigation and drainage system as necessary	2.1 Determine and acquire materials and equipment making up the system 2.2 Install irrigation system using advice, as necessary, from irrigation specialists 2.3 Check that irrigation and drainage systems are supervised to ensure there are no leaks or blockages 2.4 Confirm that the water is being evenly distributed and that the drainage is effective and the system is in good working order
3. Evaluate irrigation system performance	3.1 Determine and value plant growth and yield increases from irrigation 3.2 Calculate the cost of irrigation 3.3 Determine the cost benefit of irrigation and compare with alternative systems and approaches

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWAT502 Manage water systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse performance and audit data
- develop and implement enterprise work health and safety and environmental procedures
- evaluate irrigation system performance
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- strategically manage irrigated production systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of water systems management
  - cost or benefit analysis
  - enterprise policies and procedures
  - environmental impacts of irrigation, using water from any ground or underground source
  - plant requirements
  - water quality

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK201 Observe and report on weather

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe and contribute to positive environmental work practices.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Clarify work instructions with supervisor 1.2 Select and use tools and equipment and carry out pre-operational

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	safety checks 1.3 Select and use personal protective equipment 1.4 Identify hazards and inform supervisor 1.5 Identify and action work health and safety policies and procedures and legislative requirements
2. Check weather and climate information	2.1 Check weather and climate information to determine likely conditions 2.2 Recognise changed weather and climate situations 2.3 Anticipate likely impact of changes in weather and climate in respect to work tasks, safety of others, property, natural resources and local environment 2.4 Report anticipated impact of weather and climate to supervisor
3. Carry out preventative action	3.1 Disseminate information and advice to relevant personnel 3.2 Determine the preventative action required according to the known effects on livestock, crops and work tasks 3.3 Implement actions to minimise loss and damage 3.4 Adjust livestock, horticultural or crop management program or schedule of work tasks according to weather and climatic changes
4. Monitor weather and climate	4.1 Access regular updates to determine ongoing suitability of current programs 4.2 Review the viability of livestock, horticultural or crop management practices to ensure suitability within meteorological conditions 4.3 Research forecasting techniques to maintain currency of information 4.4 Document relevant information

Foundation Skills

This unit of competency describes the skills and knowledge required to observe and contribute to positive environmental work practices.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

Assessment Requirements for AHCWRK201 Observe and report on weather

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor physical signs of weather in the context of available information
- relate forecasts to impact on current operations and activities
- communicate information on weather and situations that may be impacted
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of wind and rain on wind chill
- effects of wind shear and wind chill exposure
- enterprise and industry policies for monitoring weather and climate conditions, and recording and reporting weather and climate conditions
- weather and climate conditions impact upon farming and grazing activities
- effects of wind chill on metabolism of animals
- effects of prolonged dry periods on pastures and animal production, and natural resources
- effects of extreme heat on animals, including during birthing, and effects of heat stress on neonates
- work health and safety requirements and practices, especially as they relate to weather and climate monitoring and preparations for hazardous weather
- sustainability practices in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs

AHCWRK203 Operate in isolated and remote situations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, prepare for and work safely in isolated and remote situations.

The skills and knowledge described in this unit underpin a broad range of activities applicable to job roles throughout the horse industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for operating in remote environments	1.1 Collate and record information relating to the operating environment and location

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.2 Establish detailed operating and travel plans, including a disaster plan and fallback position requirements in consultation with supervising staff 1.3 Notify the appropriate authorities of the action plans and time schedules 1.4 Identify and source relevant maps 1.5 Assess factors that may impact on public and personal health and safety and the environment, for consideration in preparations
2. Prepare for operating in remote environments	2.1 Prepare personal needs for activities or travel in remote areas 2.2 Prepare transportation and equipment for use in prescribed work location or along prescribed routes 2.3 Obtain and study relevant maps prior to departure 2.4 Record planned activities and itinerary prior to departure 2.5 Identify weather patterns and indicators
3. Prepare for emergency situations	3.1 Confirm that provisioning meets expected operational and possible emergency needs 3.2 Use initial planning and regular monitoring to ensure structured usage of available provisions and resources 3.3 Structure an operating plan to include training in remote area survival techniques prior to operating in remote situations 3.4 Include emergency management procedures as an integral part of operating plans and enterprise policy
4. Operate in remote environment	4.1 Complete activities according to instructions and established time schedules 4.2 Use bushcraft skills to modify the living environment where necessary 4.3 Carry out all activities in remote situations in accordance with prescribed procedures 4.4 Handle emergency situations in accordance with prescribed procedures 4.5 Follow established reporting procedures on completion of planned activities and on return to base

Assessment Requirements for AHCWRK203 Operate in isolated and remote situations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for operating in remote environments
- prepare for emergency situations
- source and interpret maps of the area
- operate in remote environments
- implement workplace procedures to notify location, activities and travel
- prepare provisions to cover essential and emergency needs
- preparing communication equipment
- use bushcraft skills to modify the living environment and reduce the risk of mishap
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- map reading and navigation skills including direction finding (including GPS, use of compass, stars or watch)
- local topography, nearby inhabitants and locations within that area
- survival techniques and human needs relating to survival situations
- clothing requirements for sun or heat protection
- first aid procedures for common injuries
- bush craft including making a fire, cooking and wild food gathering
- water supplies, sources and generation methods
- emergency vehicle and mechanical equipment repair

© Commonwealth of Australia, 2025 Skills Insight

- the operation of communication equipment (including field communications by two-way, satellite telephony or HF radio), and distress signalling including use of signalling mirrors
- weather patterns and indicators
- work health and safety in the context of work in isolated and remote situations
- environmental impacts of work in isolated and remote situations
- rope skills including useful knots including: reef, clove hitch, truckie's hitch, and bowline; simple lashings and tying down of loads.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWRK304 Respond to rescue incidents

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate the circumstances and logistics for the emergency
- carry out preparation and move to the rescue site
- assess the situation and establish communication with additional or specialist help
- carry out the required rescue or response to emergency
- implement post incident responses
- use industry standard terminology
- apply workplace health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- local environmental conditions
- search and rescue methods
- operation and characteristics of rescue equipment, tools and vehicles
- environmental, public health and safety issues
- types of hazards and how they should be handled
- enterprise procedures, legislative and work health and safety requirements
- first aid, life preservation.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK505 Manage trial and research material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a trial and research material as part of a designated research project.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify scope and extent of work	1.1 Identify trial and research hypothesis and parameters as required by researchers 1.2 Plan the trial or research to meet research objectives 1.3 Assess the data relevant to managing trial or research materials according to research parameters

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.4 Assess data relevant to managing trial or research materials 1.5 Identify work health and safety, assess risks and develop controls and cost and document in the survey design 1.6 Identify and cost tools, equipment and machinery required for managing trial or research materials and confirm availability with suppliers, contractors and appropriate personnel 1.7 Determine research design according to the trial or research plan
2. Oversee management of trial/research materials	2.1 Prepare, maintain and monitor trial or research in line with project parameters 2.2 Conduct field work to verify and collect data as required by the trial or research design and research parameters 2.3 Monitor work activities for accuracy, validity and compliance to the parameters of the trial or research design 2.4 Undertake staged data collection as required by the trial or research design, scheduling and access requirements 2.5 Record monitoring and data
3. Prepare reports on work complete	3.1 Record collected data 3.2 Analyse data statistically to determine significance of research results 3.3 Accept or reject hypothesis based on data collected 3.4 Produce reports which conform to the structure and content required by the researcher

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK505A Manage trial and/or research material.

Assessment Requirements for AHCWRK505 Manage trial and research material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define the purpose of the trial
- identify scope and extent of work
- collate data
- oversee management of trial and research materials
- comply with legislative and enterprise requirements
- draw conclusions and apply findings of trials and research
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- scheduling and programming work within timelines
- ecological principles and terminology
- data collection and reporting
- research procedures and best practice techniques
- enterprise work team management guidelines
- data analysis techniques
- research planning and design
- research methodologies.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AURTGA001 Drive and manoeuvre trailers

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to drive and manoeuvre a trailer while it is attached to a driving vehicle. It involves inspecting the trailer before use, connecting the trailer to a vehicle, driving the trailer, and disconnecting the trailer from the vehicle.

It applies to those working in the automotive service and repair industry. The trailers may have non-pivoting axles or pivoting front axles.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Mechanical Miscellaneous

Unit Sector

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Carry out trailer safety inspection	1.1 ***Pre-operational inspections and checks*** of trailer are carried out according to manufacturer specifications and workplace procedures 1.2 Trailer load is inspected and secured according to manufacturer

© Commonwealth of Australia, 2025 Skills Insight

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	specifications and workplace procedures 1.3 Safe condition of towing vehicle is determined according to manufacturer specifications and workplace procedures
2. Connect trailer to vehicle	2.1 Trailer and vehicle are aligned and trailer is coupled to vehicle according to manufacturer specifications, workplace procedures and ***safety requirements*** 2.2 Ancillary devices are connected between vehicle and trailer according to manufacturer specifications and workplace procedures 2.3 Trailer and vehicle connections are tested according to manufacturer specifications and workplace procedures 2.4 Faults are identified and action is taken to report them according to workplace procedures
3. Drive and manoeuvre trailer	3.1 Brake lock-out devices are set according to manufacturer procedures 3.2 Trailer is safely manoeuvred by vehicle in forward and reverse directions and parked according to road safety regulations, and without causing damage to trailer, towing vehicle, other vehicles or surrounding environment
4. Disconnect trailer from vehicle	4.1 Parking devices of trailer and vehicle are applied as appropriate according to manufacturer procedures 4.2 Ancillary devices are disconnected and trailer is decoupled from vehicle according to manufacturer specifications, workplace procedures and safety requirements 4.3 Trailer or vehicle is placed in appropriate parking area according to road safety regulations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	**Description**
Learning skills to:	• locate appropriate sources of information efficiently.

© Commonwealth of Australia, 2025 Skills Insight

Skills	Description
Reading skills to:	• interpret state and territory regulations for towing trailers and road signs.
Writing skills to:	• legibly and accurately fill out workplace documentation when reporting inspection findings and trailer faults.
Oral communication skills to:	• report inspection findings and trailer faults to workplace supervisor and customers.
Numeracy skills to:	• use basic mathematical processes, including addition and subtraction, to calculate trailer load and perform simple measurements of trailer dimensions • interpret numerical information on trailers, such as aggregate trailer mass and gross trailer mass.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Pre-operational inspections and checks must include:	• braking systems • suspension and axles • electrical systems • wheels and tyres.
Safety requirements must include:	• work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for manually manoeuvring trailers.

Assessment Requirements for AURTGA001 Drive and manoeuvre trailers

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- drive and manoeuvre two different trailers on a road with curves.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to driving and manoeuvring trailers, including procedures for manually manoeuvring trailers
- key features of relevant state and territory regulations relating to trailers, including those relating to:
  - couplings
  - safe towing weights
  - towing speeds
  - braking
- application, purpose and operation of trailers, including:
  - pivot and non-pivot trailers
  - definition of aggregate trailer mass and gross trailer mass
- trailer coupling systems, including:
  - tow ball
  - lunette ring
  - weight distributing hitch
- inspection procedures for trailers, including:
  - coupling system

© Commonwealth of Australia, 2025 Skills Insight

  - electrical system
  - braking system
  - wheel assembly and bearings
  - suspension system
- loading procedures for trailers, including:
  - centre of mass location
  - tongue weight
  - methods for determining maximum towing capacity of vehicle
  - methods for determining load capacity of towbar
- driving and manoeuvring techniques, including:
  - effects of trailer on overall turning circle
  - effects of trailer on acceleration, steering and braking
  - methods of avoiding and controlling vehicle and trailer sway
  - methods of reversing a trailer.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the trailers that they have driven and manoeuvred, e.g. trailer log book.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- road with curves suitable for trailer forward and reverse driving, manoeuvring and parking
- trailer specifications and relevant state and territory regulations for towing trailers
- two different trailers and towing vehicles with suitable trailer couplings.

BSBADM311 Maintain business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine, administer and maintain resources and equipment to complete a variety of tasks.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of business resources and their basic maintenance to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Advise on resource requirements	1.1 Calculate estimates of future and present business resource needs in accordance with organisational requirements 1.2 Ensure advice is clear, concise and relevant to achieve organisational requirements 1.3 Provide information on the most economical and effective choice of equipment, materials and suppliers

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify resource shortages and possible impact on operations
2 Monitor resource usage and maintenance	2.1 Ensure resource handling is in accordance with established organisational requirements including occupational health and safety requirements 2.2 Use business technology to monitor and identify the effective use of resources 2.3 Use consultation with individuals and teams to facilitate effective decision-making on the appropriate allocation of resources 2.4 Identify and adhere to relevant policies regarding resource use in the performance of operational tasks 2.5 Routinely monitor and compare resource usage with estimated requirements in budget plans
3 Acquire resources	3.1 Ensure acquisition and storage of resources is in accordance with organisational requirements, is cost effective, and consistent with organisational timelines 3.2 Acquire resources within available timelines to meet identified requirements 3.3 Review resource acquisition processes to identify improvements in future resource acquisitions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.4, 2.5, 3.3	• Identifies and interprets information from a range of sources, including organisational policies and procedures
Writing	1.1, 1.3, 2.2, 2.5, 3.3	• Uses clear and succinct language and appropriate layout to provide information, advice and support materials
Oral Communication	1.2, 1.3, 2.3	• Presents information or advice choosing language appropriate to the context and needs of the audience • Uses active listening and questioning to confirm

© Commonwealth of Australia, 2025 Skills Insight

		understanding
Numeracy	1.1, 1.3, 1.4, 2.2, 2.4, 2.5, 3.1-3.3	• Selects and uses appropriate tools to aid with estimation and other resource assessment requirements • Uses a combination of mainly informal and some formal written mathematical equations to represent the outcomes of the resource allocation process
Navigate the world of work	1.1, 1.2, 2.1, 2.4, 3.1, 3.2	• Takes some personal responsibility for adherence to organisational procedures and protocols
Interact with others	2.3	• Uses collaborative techniques to engage personnel in consultations and negotiations
Get the work done	1.1, 1.3, 1.4, 2.2, 2.5, 3.3	• Plans a range of routine tasks and required resources, accepting goals and aiming to achieve them within allocated timeframes • Recognises and takes responsibility for addressing predictable problems in familiar work contexts • Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role • Understands the purpose and some specific functions of some common digital tools used in work contexts • Evaluates effectiveness of decisions in terms of how well they met stated goals

Assessment Requirements for BSBADM311 Maintain business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- collect and record data on resource use
- observe resource use over defined and operational timeframes
- perform routine resource maintenance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list the key provisions of relevant legislation
- identify the organisational resource acquisition policies, plans and procedures
- identify the organisational procedures for record keeping/filing systems, security and safe recording practices.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to initiate and organise a quality audit with an auditee. It covers assessing the scope and objectives of a quality audit; communicating with the auditee regarding the proposed quality audit; identifying resources required to conduct the audit; and developing and submitting a quality audit plan. The types of audits may include external or internal systems audits or process or product/service audits.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised, quality auditing and managerial techniques to plan, carry out and evaluate a quality audit. Individuals also supervise and monitor the processes and outcomes of others working in a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assess quality audit scope and objectives	1.1 Determine and discuss audit objectives with the auditee, client and all other relevant parties 1.2 Determine and discuss scope of the quality audit with the auditee, client and all other relevant parties

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify relevant standards that impact the environment in which the audit operates 1.4 Determine scope commensurate with identified risks
2 Communicate with auditee regarding proposed quality audit	2.1 Determine audit history, organisational structure and culture through consultation with the auditee 2.2 Negotiate and ensure agreement with auditee, the proposed audit methods and techniques to be applied 2.3 Outline audit processes to establish sequence of audit activities, and the roles of the auditors and auditees in the process
3 Identify resources required to conduct quality audit	3.1 Identify resources required to perform the quality audit efficiently and effectively 3.2 Select audit team members on the basis of relevant expertise 3.3 Confirm availability of resources required to conduct the audit with auditee 3.4 Assign roles and responsibilities to audit team members
4 Develop and submit quality audit plan	4.1 Develop quality audit plan according to established scope and objectives 4.2 Assign timing, schedules and responsibilities for implementation of the audit plan 4.3 Develop audit priorities and ensure agreement with auditees and audit team members 4.4 Document and submit audit plan to auditee
5 Prepare audit team	5.1 Inform audit team members of their responsibilities, audit objectives and scope 5.2 Communicate audit plan and schedules to all audit team members 5.3 Discuss and clarify audit methods and techniques with audit team members
6 Review auditee documentation	6.1 Review auditee’s previous audits to establish possible impact on the conduct of the current audit 6.2 Review and check relevant organisational documents for accuracy 6.3 Resolve arising problems with auditee and relevant parties
7 Identify and prepare checklists and audit	7.1 Develop checklists to reflect audit scope and objectives

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
related documentation	7.2 Develop or obtain documentation required for the audit 7.3 Prepare agenda for entry meeting 7.4 Include value-adding activities in audit related documentation where required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 6.1, 6.2, 7.1	• Interprets and analyses information from organisational documentation
Writing	4.1-4.4, 6.2, 7.1-7.4	• Develops a range of documents using structure, tone and vocabulary appropriate to audience, context and purpose • Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.1, 1.2, 2.1-2.3, 4.3, 5.1-5.3, 6.3	• Participates in spoken exchanges using structure and language to suit the audience • Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	• Uses mathematical calculations for project scheduling
Navigate the world of work	1.3	• Monitors adherence to organisational policies and relevant standards and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 2.1, 2.2, 3.4, 4.4, 5.1, 5.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Recognises the importance of building rapport and building effective working relationships • Collaborates with others to negotiate acceptable outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.1, 3.2, 4.1,	• Organises, plans and sequences own workload and schedules work activities of others • Uses analytical processes to decide on a course of

© Commonwealth of Australia, 2025 Skills Insight

	4.2, 4.3, 6.1, 6.3	action, establishing criteria for deciding between options and seeking advice from others before taking action when necessary • Addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the expertise of others

Assessment Requirements for BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documented audit plans for auditees across a variety of contexts including:
  - the scope and objectives of the audit
  - proposed audit methods and techniques to be used
  - required resources and schedules
  - allocation of individual audit team member responsibilities for conducting the proposed audit.
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the relevant auditing codes of practice or ethics
- describe auditing methods and techniques
- outline the requirements of auditing regulations and standards
- identify current audit practices
- outline quality auditing principles, techniques and systems
- describe the requirements of house or other style manual protocols for written communications
- identify software applications relevant to quality auditing activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

© Commonwealth of Australia, 2025 Skills Insight

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare a presentation	1.1 Plan and document presentation approach and intended outcomes 1.2 Choose presentation strategies, format and delivery methods that match the characteristics of the target audience, location, resources and personnel needed 1.3 Select presentation aids, materials and techniques that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Brief others involved in the presentation on their roles/responsibilities within the presentation 1.5 Select techniques to evaluate presentation effectiveness
2 Deliver a presentation	2.1 Explain and discuss desired outcomes of the presentation with the target audience 2.2 Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas 2.3 Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes 2.4 Use persuasive communication techniques to secure audience interest 2.5 Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences 2.6 Summarise key concepts and ideas at strategic points to facilitate participant understanding
3 Review the presentation	3.1 Implement techniques to review the effectiveness of the presentation 3.2 Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation 3.3 Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2	• Reviews and analyses documents to identify information relevant to a specific presentation
Writing	1.1, 3.3	• Develops material to convey ideas and information to target audience in an engaging way
Oral	1.4, 2.1, 2.2, 2.3,	• Presents information using words and non-verbal features appropriate to the audience and context

© Commonwealth of Australia, 2025 Skills Insight

Communication	2.4, 2.5, 2.6, 3.2	• Uses listening and questioning techniques to gather information required to develop or modify presentations • Interprets audience reactions and changes words or non-verbal features accordingly
Interact with others	1.4, 2.1, 2.2, 2.4, 2.5, 2.6, 3.2	• Selects and uses appropriate conventions and protocols to encourage interaction or to present information • Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals • Recognises the need to alter personal communication style in response to the needs or expectations of others
Get the work done	1.1-1.5, 2.2, 2.5, 3.1-3.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes • Uses feedback from others, analytical and lateral thinking to review current practices and develop new ideas • Uses the main features and functions of digital tools to complete work tasks

BSBCMM402 Implement effective communication strategies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select and use communication strategies required to respond to an enquiry.

It applies to individuals who analyse information and then either respond personally or refer the enquiry to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – interpersonal communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Receive enquiry	1.1 Establish nature of enquiry 1.2 Ensure interactions with person making enquiry are in accordance with organisation's standards and procedures and meet the person’s needs and expectations 1.3 Clearly outline legal and other limits of own responsibility to person making the enquiry 1.4 Record person's details and issues
2 Identify and apply	2.1 Use communication strategies that reflect organisational

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
appropriate communication techniques	standards and procedures 2.2 Use effective communication techniques during the enquiry 2.3 Ensure confidentiality of the enquiry is respected
3 Determine action to be taken	3.1 Identify personal limitations in taking action and seek appropriate assistance from designated individuals 3.2 Respond in an appropriate manner 3.3 Involve other parties in action if appropriate 3.4 Manage expectations of person making enquiry
4 Review outcomes of communication	4.1 Follow up with person making enquiry to ensure action was effected 4.2 Seek feedback about the communication strategies 4.3 Undertake appropriate record keeping and reporting

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1	• Interprets textual information from a range of sources to determine organisational standards and procedures
Writing	1.4, 2.1, 3.1, 3.2, 4.1, 4.3	• Accurately records information and completes documentation using required format, terminology and conventions • Prepares reports according to organisational requirements
Oral Communication	1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3, 4.1, 4.2	• Uses listening and questioning techniques to gather information required to respond to queries • Presents information using words and non-verbal features appropriate to the audience and context
Navigate the world of work	1.2, 1.3, 2.1, 3.1	• Recognises and applies organisational policies and procedures and meets expectations associated with own work

© Commonwealth of Australia, 2025 Skills Insight

Interact with others	1.2, 2.1, 2.2, 3.1, 3.2, 3.3	• Uses appropriate communication practices showing awareness of the need to adjust personal communication style when handling enquiries of a sensitive nature
Get the work done	1.1, 1.4, 3.1, 3.3, 3.4, 4.1-4.3	• Plans a range of routine and non-routine tasks and implements actions in accordance with plan to meet desired outcomes • Uses problem solving skills to analyse enquiries and propose possible solutions, seeking input from others as required • Evaluates outcomes of decisions to identify opportunities for improvement

BSBCRT402 Collaborate in a creative process

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to collaborate in a creative process that is underpinned by a commitment to trust and ethics.

It applies to individuals who are involved in what is traditionally considered a creative endeavour but is also very important in broader business and community activities where creative team effort is highly valued.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Creative Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Enter into a collaborative creative process	1.1 Adopt a personal philosophy of trustworthy and ethical behaviour 1.2 Maximise the possibilities of sustaining creative partnerships through trustworthy and ethical behaviour 1.3 Use professional discretion and judgement in dealing with others 1.4 Acknowledge and respect the different ways that different

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	people may contribute to the creative process 1.5 Acknowledge and work within the legal framework that applies to creative content as part of individual commitment to an ethical approach 1.6 Respect collaborative efforts by relinquishing individual ownership of ideas
2 Engage in a collaborative creative process	2.1 Maintain a belief in personal ideas, combined with a willingness to move on as ideas are discarded and others evolve 2.2 Be prepared to let go of own vanity and ego to allow new ideas to emerge 2.3 Use language and adopt a demeanour that demonstrates respect and trust for others 2.4 Listen to, value, respect and trust the contributions of others as material to work with rather than positions to argue against 2.5 Challenge, test and share ideas in a supportive way as part of the creative process 2.6 Move on from initial positions and preconceptions to accept and embrace new and unpredictable ideas as they emerge during the creative process 2.7 Play a role that encourages the movement and shift of ideas within the group towards a well-conceived solution
3 Reflect on own role in the collaborative creative process	3.1 Reflect on own level of participation, relationships with others and personal behaviour in the collaborative process 3.2 Identify ways to do better next time and follow up on any issues that need to be resolved 3.3 Identify and seek opportunities to refine and expand own skills and knowledge, including learning from failing

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.2, 3.3	• Reflects on own performance and seeks opportunities

© Commonwealth of Australia, 2025 Skills Insight

		to improve own skills and knowledge
Writing	3.2, 3.3	• Notes comments, suggestions and ideas for own use
Oral Communication	2.3, 2.4, 2.5, 2.6, 2.7	• Presents ideas clearly using language and features suitable to diverse audiences • Uses listening and questioning techniques to elicit the views and opinions or others and to confirm understanding
Navigate the world of work	1.1, 1.5	• Understands own legal and ethical responsibilities with specific reference to personal responsibilities in a creative context
Interact with others	1.1, 1.2, 1.3, 1.4, 1.6, 2.1, 2.2, 2.3, 2.4, 2.5, 3.1-3.3	• Actively identifies the requirements of important communication exchanges, selecting appropriate channel, format, tone and content to suit purpose and audience • Reflects on personal values, behaviours and assumptions and considers how these might be perceived by others • Looks for ways of establishing connections and building genuine understanding with a diverse range of people • Responds to and uses diverse perspectives to enrich the creative process
Get the work done	2.1, 2.5, 2.6, 2.7, 3.2	• Reflects on processes and outcomes and identifies some key principles that may be relevant in future situations • Contributes to creating a climate where people feel comfortable to suggest, explore, adapt and adopt new ideas as a regular part of work life • Uses problem-solving skills to evaluate and challenge ideas and move towards solutions

Assessment Requirements for BSBCRT402 Collaborate in a creative process

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- make a positive contribution to a collaborative creative process that generates, expands and develops ideas into a well-conceived solution
- reflect on and evaluate own role in the collaborative process
- identify and act on ways to enhance own ability to contribute effectively to a collaborative creative process.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal framework that applies to the creative process
- describe the concepts of trust and ethical behaviour in the context of creative endeavour
- identify different roles people may play in a collaborative creative process and how these roles contribute to the overall effort
- describe how the potential for creativity can be maximised within a team
- explain barriers to creativity in a group environment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation – critical thinking field of work and include access to a team of people in a collaborative creative process.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUE301 Use multiple information systems

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use multiple information systems to research information and records, and to maintain up-to-date customer information.

It applies to individuals who apply a broad range of competencies in a varied work context, using some discretion and judgement and relevant theoretical knowledge, and who may provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Engagement

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Access a range of information systems	1.1 Efficiently logon to information systems 1.2 Navigate screens efficiently to locate displays and information relevant to role 1.3 Use a database management system (DBMS) to control data access, enforce data integrity, manage concurrency, and access information 1.4 Manage use of information systems efficiently according to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements
2 Process customer information using multiple information systems	2.1 Analyse customer enquiry to identify information needs 2.2 Identify information systems required to satisfy information needs 2.3 Use information systems according to organisational processes to complete customer enquiry or transaction 2.4 Record customer information in information systems to complete customer enquiry or transaction 2.5 Use the shortest reasonable pathways to navigate between and within information systems 2.6 Maintain contact and communication with customer while operating information systems 2.7 Verify information with customer to complete transaction
3 Identify and rectify information system and processing errors	3.1 Identify errors in information system, relevant to role 3.2 Analyse errors for impact on information system and customers 3.3 Identify source of errors, where possible 3.4 Consult with stakeholders to identify actions to rectify errors 3.5 Arrange rectification and confirm amendments are accurate 3.6 Inform customers of errors and take necessary action 3.7 Identify information system faults and notify relevant personnel according to policy 3.8 Recommend procedural change according to policy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 3.5	• Recognises and interprets information to determine and confirm customer requirements
Writing	2.4, 3.7	• Records information accurately using clear language and appropriate terminology

© Commonwealth of Australia, 2025 Skills Insight

Oral Communication	2.1, 2.6, 2.7, 3.4-3.6	• Articulates requirements clearly using specific and relevant language suitable to audience • Uses appropriate tone, pace and listening and questioning to elicit information and confirm understanding
Navigate the world of work	1.4, 2.3, 3.7, 3.8	• Recognises and follows explicit organisational policies and procedures when using information systems, notifying faults and making recommendations for change
Interact with others	2.6, 2.7, 3.4, 3.6, 3.7	• Identifies and follows accepted communication practices and protocols when collecting, providing and verifying information in a service context or in consultation with colleagues and stakeholders
Get the work done	1.1-1.3, 2.1, 2.2, 2.5, 3.1-3.3, 3.5, 3.7	• Selects from a range of predetermined options in routine customer inquiry situations, identifying and taking some situational factors into account • Recognises and takes responsibility for identifying and addressing information system errors and their sources • Uses familiar digital systems and tools to access, organise, analyse, display and amend information • Recognises some general design and operating principles of digital tools and uses these when troubleshooting

Assessment Requirements for BSBCUE301 Use multiple information systems

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access, use and manage information systems to organisational requirements
- navigate systems to locate information required to complete customer inquiry or transaction
- identify and rectify information system and processing errors to established procedures and policies
- provide service to customers in accordance with organisational and regulatory requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and system troubleshooting principles
- identify enterprise business systems and operating platforms relevant to role
- identify enterprise policies, procedures and guidelines regarding use and security of information systems
- explain operation of social networking websites
- explain escalation process for reporting information technology issues.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- relevant standards and guidelines for use of systems

© Commonwealth of Australia, 2025 Skills Insight

- workplace information and data
- quality assurance and system user error reports
- troubleshooting and escalation reports
- a work environment to observe operation of systems.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUE305 Process credit applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to handle credit applications or arrangements for customers with no credit rating or a poor credit rating, and negotiation of various outcomes with customers.

It applies to individuals who apply a broad range of competencies in a varied work context, using some discretion and judgement and relevant theoretical knowledge, and who may provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Engagement

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Review and evaluate credit application	1.1 Review application to determine customer details and amount of credit required 1.2 Check existing customer records for payment history and credit standing 1.3 Obtain customer credit rating according to credit management procedures

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Establish customer's credit rating and ability to repay credit advances
2 Process credit application	2.1 Approve or decline application according to organisational policy and relevant legislation, codes, regulations and standards 2.2 If declining, explain decision to the customer and discuss alternative arrangements as necessary 2.3 Advise customer of appeal rights where appeal provisions exist and apply
3 Negotiate credit application details	3.1 Negotiate and agree payment arrangements with customer where credit approval is granted 3.2 Escalate difficulties experienced in customer negotiations according to organisational policy
4 Complete administrative arrangements	4.1 Complete and forward appropriate documentation to customer 4.2 Organise credit arrangements and record details according to organisational policy and legislative requirements 4.3 Notify customer of payment arrangements according to organisational procedures 4.4 Regularly monitor and follow up customer commitments 4.5 Resolve outstanding issues relating to credit application in an efficient and timely manner

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3	• Recognises and interprets textual information from relevant sources to determine customer requirements and position
Writing	2.1, 4.1-4.3	• Prepares specific information using different formats which conveys an understanding of outcomes and alternatives and uses terminology appropriate to intended audience
Oral	2.1-2.3, 3.1, 4.4	• Articulates clearly using specific and relevant

© Commonwealth of Australia, 2025 Skills Insight

Communication		language suitable to audience to convey requirements, and listening and questioning to confirm understanding
Numeracy	1.1, 1.2, 1.4, 2.1, 3.1, 4.2	• Interprets numerical information and applies basic mathematical calculations relating to current and future financial scenarios • Extracts, evaluates and compares numerical information
Navigate the world of work	1.3, 2.1, 3.2, 4.2, 4.3	• Appreciates implications of legislative and organisational requirements related to assessment and administration of credit applications
Interact with others	3.1, 3.2	• Selects and uses appropriate conventions and protocols in negotiations with customers
Get the work done	1.4, 4.1-4.5,	• Plans and implements credit application tasks, accepting stated goals and aiming to achieve them efficiently • Uses formal decision-making processes to establish credit rating and customer capacity to meet obligations • Monitors customer payments to identify and resolve familiar problems promptly • Uses familiar digital systems and tools to access, organise, analyse and display information relevant to credit administration

BSBCUE306 Process complex accounts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to handle difficult engagements relating to customer billing and customer accounting, primarily where the customer is defaulting.

It applies to individuals who apply a broad range of competencies in a varied work context, using some discretion and judgment and relevant theoretical knowledge, and who may provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Engagement

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Receive and review a customer default enquiry or case	1.1 Receive and review customer enquiry to identify details of case 1.2 Obtain additional information to assist in resolving case 1.3 Review options to resolve case with other staff members, where appropriate 1.4 Obtain specialist and team member advice, and escalate where necessary 1.5 Consider eligibility for hardship program

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.6 Observe relevant legislation, codes, regulations and standards 1.7 Develop initial advice to be given to customer
2 Negotiate payment with defaulting customers	2.1 Consult with customer on suggested course of action and options 2.2 Assess customer response to consultation 2.3 Develop realistic settlement options giving consideration to policy, customer response and payment history 2.4 Offer and agree on a payment option with customer according to organisational policy 2.5 Record revised payment options as agreed with customer and according to organisational procedures
3 Advise defaulting customers of cancellation	3.1 Advise defaulting customers of service or product cancellation 3.2 Negotiate successful product return with customer where appropriate 3.3 Explain debt-recovery process to customer 3.4 Initiate debt-recovery process
4 Manage default actions	4.1 Follow up payment, debt recovery or product return to ensure completion of case 4.2 Amend customer records according to organisational procedures 4.3 Follow organisational default and credit-management procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Recognises and interprets textual information from relevant sources to determine customer requirements and position
Writing	1.7, 2.5, 4.2	• Prepares specific information which conveys an understanding of alternatives and outcomes

© Commonwealth of Australia, 2025 Skills Insight

		• Records details and amends workplace documentation
Oral Communication	1.2-1.4, 2.1, 2.4, 3.1-3.3	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and uses listening and questioning to confirm understanding
Numeracy	1.1, 1.5, 2.4	• Interprets numerical information to determine financial position of customer • Uses basic calculation methods to determine payment amount and frequency
Navigate the world of work	1.6, 2.4, 2.5, 4.2, 4.3	• Takes personal responsibility for adherence to legislative and organisational requirements relevant to processing default accounts
Interact with others	1.3, 1.4, 2.1-2.4, 3.1-3.4	• Selects and uses appropriate conventions and protocols when discussing debt recovery and default matters with colleagues and customers • Assesses customer response to options and outcomes to avoid misunderstanding and negotiates mutual agreement
Get the work done	1.5, 1.7, 2.2, 2.3, 2.5, 3.4, 4.1, 4.3	• Organises workload logically and systematically to undertake clearly defined tasks of varying complexity in cooperation with colleagues and customers • Uses systematic, analytical processes to make decisions about customer default positions; setting goals, gathering relevant information, and identifying and evaluating options against criteria • Uses familiar digital systems and tools to access, organise, analyse and display information relevant to payment options and customer records

BSBCUS301 Deliver and monitor a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

It applies to individuals who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over short or long term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify customer needs	1.1 Use appropriate interpersonal skills to accurately identify and clarify customer needs and expectations 1.2 Assess customer needs for urgency to determine priorities for service delivery according to organisational and legislative requirements 1.3 Use effective communication to inform customers about available choices for meeting their needs and assist in the selection

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	of preferred options 1.4 Identify limitations in addressing customer needs and seek appropriate assistance from designated individuals
2 Deliver a service to customers	2.1 Provide prompt service to customers to meet identified needs in accordance with organisational and legislative requirements 2.2 Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery 2.3 Sensitively and courteously handle customer complaints in accordance with organisational and legislative requirements 2.4 Provide assistance or respond to customers with specific needs according to organisational and legislative requirements 2.5 Identify and use available opportunities to promote and enhance services and products to customers
3 Monitor and report on service delivery	3.1 Regularly review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements 3.2 Identify opportunities to enhance the quality of service and products, and pursue within organisational and legislative requirements 3.3 Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements 3.4 Regularly seek customer feedback and use to improve the provision of products and services 3.5 Ensure reports are clear, detailed and contain recommendations focused on critical aspects of service delivery

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2 2.1, 2.3, 2.4, 3.1, 3.5	• Comprehends textual information to determine customer service requirements • Proofreads texts for clarity of meaning and accuracy of grammar and punctuation

© Commonwealth of Australia, 2025 Skills Insight

Writing	2.3, 3.5	• Completes responses to customer complaints in required format • Prepares reports using sequencing, format and words to communicate recommendations clearly and effectively
Oral Communication	1.1, 1.3, 1.4, 2.2, 2.3, 2.4	• Provides information or advice using structure and language to suit the audience • Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.2, 2.1-2.4, 3.1, 3.2	• Recognises, understands and applies organisational policies and procedures relevant to role
Interact with others	1.1, 1.3, 1.4, 2.2, 2.3, 2.4, 3.4	• Selects and uses appropriate communication conventions to establish connections, build rapport, seek information and develop professional working relationships • Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	1.2, 2.3, 2.5, 3.1-3.5	• Plans and implements systems to gather and organise information • Monitor actions and progress against goals and implements adjustments as appropriate • Uses problem-solving skills to analyse and respond to customer complaints or enquiries • Identifies and follows up on opportunities to improve work practices and outcomes

BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2 Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3 Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with organisational procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.3, 2.4, 3.2, 3.3, 3.4, 3.5	• Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements
Writing	1.1, 3.1, 3.2, 3.3, 3.4, 3.5	• Prepares written reports, up-to-date procedures and other workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 1.2, 1.3, 2.1,	• Clearly articulates customer's needs using language suitable to diverse audiences and employs listening

© Commonwealth of Australia, 2025 Skills Insight

Communication	2.2, 3.1, 3.2	and questioning techniques to confirm understanding
Navigate the world of work	3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1-1.3, 2.1, 2.2, 3.1, 3.2	• Selects and uses appropriate communication techniques to establish and maintain positive working relationships • Establishes connections and shares information with others who can contribute to effective work outcomes
Get the work done	2.3, 2.4, 3.3-3.5	• Develops and implements plans for routine and non-routine tasks recognising the importance of aligning goals and expectations to achieve outcomes • Recognises and takes responsibility for addressing predictable and non-predictable problems in own work context • Uses digital systems to organise and store information relevant to own work

Assessment Requirements for BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- communicate effectively with customers including
  - helping customers to articulate their needs and evaluate options
  - explaining products/services and how they match customer needs
  - establishing regular communication
  - explaining customer rights and responsibilities
- address customer's needs
- use organisational procedures to document customer satisfaction
- develop and maintain networks to support meeting customer needs
- identify potential difficulties in meeting customer needs and taking appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational procedures and standards for establishing and maintaining customer service relationships

© Commonwealth of Australia, 2025 Skills Insight

- describe informed consent
- explain consumer rights and responsibilities
- describe ways to establish effective regular communication with customers
- outline details of products or services including with reference to:
  - possible alternative products and services
  - variations within a limited product and service range.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and resources
- business technology
- organisational policies, procedures, quality systems, manuals and guidelines for customer management
- examples of products/services and promotional strategies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

It applies to individuals who supervise the provision of quality customer service within an organisation's procedures framework by others. At this level, individuals must exercise considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan to meet internal and external customer	1.1 Investigate, identify, assess, and include the needs of customers in planning processes

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
requirements	1.2 Ensure plans achieve the quality, time and cost specifications agreed with customers
2 Ensure delivery of quality products and services	2.1 Deliver products and services to customer specifications within organisation's business plan 2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards 2.3 Help colleagues overcome difficulties in meeting customer service standards
3 Monitor, adjust and review customer service	3.1 Develop and use strategies to monitor progress in achieving product and/or service targets and standards 3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services 3.3 Develop, procure and use resources effectively to provide quality products and services to customers 3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups 3.5 Manage records, reports and recommendations within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1, 3.2, 3.3, 3.5	• Interprets and analyses textual information from a variety of sources and applies the knowledge that has been gained to evaluate standards for organisation's products and services
Writing	1.2, 3.1, 3.2, 3.3, 3.5	• Produces a range of text types to convey information, requirements or recommendations matching style of writing to purpose and audience
Oral Communication	1.1, 1.2, 2.1, 2.3, 3.2	• Clearly articulates systems and standards in a team environment using language suitable to diverse audiences • Uses listening and questioning techniques to obtain

© Commonwealth of Australia, 2025 Skills Insight

		feedback and confirm understanding
Numeracy	1.2	• Interprets and comprehends mathematical information in organisation's business and customer service plans.
Navigate the world of work	2.1, 2.2, 3.1, 3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1, 2.3, 3.4	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and customers • Collaborates with others, taking into account their strengths and experience, to achieve desired outcomes • Provides support in field of expertise to team
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1-3.5	• Develops and implements plans using logical processes and monitors and evaluates progress against stated goals • Accepts responsibility for addressing complex or non-routine difficulties, applying problem solving processes in determining a solution. • Uses digital technology to access, organise and present information in a format that meets requirements

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

© Commonwealth of Australia, 2025 Skills Insight

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality
  - problem identification and resolution
  - quality customer service delivery
  - record keeping and management methods
  - strategies for monitoring, managing and introducing ways to improve customer service relationships
  - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBFIA301 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling debtors' and creditors' systems, preparing and maintaining a general ledger and trial balance and includes activities associated with monitoring cash control for accounting purposes.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts and may exercise discretion and judgement using appropriate theoretical knowledge of financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Maintain daily financial records	1.1 Correctly maintain daily financial records in accordance with organisational and legislative requirements for accounting purposes 1.2 Identify and rectify or refer discrepancies or errors in documentation or transactions to designated persons in accordance with organisational and legislative requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Accurately credit and debit transactions and promptly enter into journals in accordance with organisational and legislative requirements
2 Maintain general ledger	2.1 Maintain general ledger in accordance with organisational and legislative requirements 2.2 Post transactions into general ledger in accordance with organisational and legislative reporting requirements 2.3 Reconcile systems for accounts payable and receivable with general ledger 2.4 Accurately prepare trial balance from general ledger in accordance with organisational and legislative requirements
3 Monitor cash control	3.1 Ensure cash flow is accurately accounted for in accordance with organisational and legislative requirements 3.2 Make and receive payments in accordance with organisational and legislative requirements 3.3 Collect or follow up outstanding accounts within designated timelines 3.4 Check payment documentation for accuracy of information and despatch to creditors within designated timeline

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.4	• Recognises and interprets numerical and textual information to determine and complete required activities
Writing	1.3, 2.1-2.4, 3.1-3.4	• Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material • Prepares clear and detailed information and instructions using format, structure and tone suitable to audience
Oral	1.2, 3.2, 3.3	• Explains financial issues and requirements clearly, using facts and examples, and uses listening and

© Commonwealth of Australia, 2025 Skills Insight

Communication		questioning techniques to obtain sequenced instructions
Numeracy	1.1-1.3, 2.1-2.4, 3.1-3.4	• Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals and arrange/compare numerical information
Navigate the world of work	1.1-1.3, 2.1-2.4, 3.1-3.3	• Recognises, understands and monitors adherence to legislative and organisational requirements in undertaking own work
Interact with others	3.3, 3.4	• Understands the importance of using appropriate practices and protocols when handling confidential information
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4	• Takes responsibility for own workload and monitors adherence to specified goals and timelines • Uses digital technologies to access, record, store, organise and compile data as required

Assessment Requirements for BSBFIA301 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- maintain daily transactions and identify and respond to discrepancies and errors
- transfer and record financial data accurately
- reconcile expenditures and revenue in a timely manner.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation, codes of practice and national standards that may affect financial record keeping
- discuss organisational policies and procedures relating to maintaining financial records
- define credits/creditors and debits/debtors
- describe principles of double entry bookkeeping and accrual accounting
- identify methods of presenting financial data.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer equipment and relevant software
- examples of source documents relating to financial record keeping
- case studies and, where possible, real situations.

BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan financial management approaches	1.1 Access budget/financial plans for the work team 1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3 Negotiate any changes required to be made to budget/financial

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	plans with relevant personnel within the organisation 1.4 Prepare contingency plans in the event that initial plans need to be varied
2 Implement financial management approaches	2.1 Disseminate relevant details of the agreed budget/financial plans to team members 2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances 2.3 Determine and access resources and systems to manage financial management processes within the work team
3 Monitor and control finances	3.1 Implement processes to monitor actual expenditure and to control costs across the work team 3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4 Report on budget and expenditure in accordance with organisational protocols
4 Review and evaluate financial management processes	4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team 4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3	• Interprets and analyses information to determine activities required

© Commonwealth of Australia, 2025 Skills Insight

Writing	1.1, 1.4, 4.1-4.3	• Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures
Oral Communication	1.2, 1.3, 2.1-2.3	• Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to clarify information and to confirm understanding
Numeracy	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Navigate the world of work	2.2, 3.3, 3.4, 4.3	• Recognises, understands and adheres to organisational requirements in undertaking own work
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3	• Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Get the work done	1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3	• Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines • Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Skills Insight

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM801 Manage financial resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage financial resources in a complex environment for a substantial business unit or organisation.

Leaders are typically required to forecast future financial resource needs, analyse current asset performance and capacity to a standard expected in a commercial environment, and to set business targets. There is a requirement to manage compliance mechanisms, to manage financial risk within agreed plans and mechanisms, and to monitor compliance with financial projections.

It applies to the management of financial resources relating to complex and diverse operations or projects and is an important aspect of work for managers or leaders.

It may relate equally to small-scale activities within a small to medium-sized organisation or a significant activity in a large organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
1 Forecast future financial resource needs	1.1 Establish and report on the capacity of existing financial systems 1.2 Forecast financial data and business system requirements 1.3 Analyse forecasted requirements 1.4 Prepare and plan budget forecasts according to organisational and statutory requirements 1.5 Prepare and present recommendations for budget expenditure or for modification of existing projections
2 Analyse current asset performance and capacity	2.1 Analyse the costs of, and returns from, assets and liabilities using standard accounting techniques to identify extent of debt and equity financing 2.2 Establish management responsibilities and legal requirements for reporting, in consultation with relevant organisational staff 2.3 Analyse and interpret financial reports and key information 2.4 Analyse and evaluate the effects of financial decisions on the ability of the organisation to meet planned outcomes
3 Set business targets and compliance mechanisms	3.1 Collect comparative and trend information and confirm needs for future budget and associated resources 3.2 Complete negotiations to secure resources in accordance with relevant short-term and long-term needs 3.3 Allocate resources against the budget to maximise organisation’s performance 3.4 Maintain accurate and up-to-date records of resource allocation and usage according to organisational and legislative requirements 3.5 Develop and review management systems which enable timely collection, management and processing of information 3.6 Complete and accurately report records of budget performance and expenditure according to organisational procedures and statutory requirements 3.7 Evaluate and improve budget audit mechanisms and compliance requirements as required
4 Manage financial risk	4.1 Identify and analyse financial risk factors 4.2 Document and manage financial risks according to organisational policies and procedures 4.3 Implement procedures to regularly review financial risk management activities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
5 Monitor compliance with financial projections	5.1 Identify deviations from budgets that generate an adverse effect on budget objectives 5.2 Promptly develop action plans to remedy significant deviations from budget objectives and projections 5.3 Monitor and review financial documentation against organisational objectives 5.4 Revise and renew budget priorities to meet operational contingencies and risk management 5.5 Manage costs to targets set in the budget

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 3.1, 3.4-3.7, 4.1-4.3, 5.1-5.3	• Identifies, analyses and evaluates complex text from a variety of sources to determine business requirements
Writing	1.1, 1.2, 1.4, 1.5, 2.2, 3.1, 3.4-3.6, 4.2, 5.2-5.4	• Records data accurately using relevant format, style and language suited to context and audience • Prepares specific information which clearly conveys an understanding of outcomes and uses terminology appropriate to present to relevant personnel
Oral Communication	1.5, 2.2, 3.2	• Articulates information concisely using appropriate terminology, tone and style • Uses questioning and listening techniques to exchange and clarify information
Numeracy	1.1-1.5, 2.1, 2.3, 2.4, 3.1, 3.3, 3.4, 3.6, 3.7, 4.1, 5.1, 5.3, 5.5	• Collects, records, analyses and adjusts numerical data using appropriate methods
Navigate the world of work	1.4, 2.2, 3.4, 3.6, 5.3, 5.4	• Recognises, understands and applies applicable legislation, industry standards and organisational policies and procedures in the conduct of own work
Interact with others	1.5, 2.2, 3.2, 3.6	• Tailors communication to achieve its purpose, demonstrating an understanding of the needs, interests,

© Commonwealth of Australia, 2025 Skills Insight

		issues and priorities of each audience • Collaborates and negotiates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1-1.4, 2.1, 2.4, 3.1, 3.3, 3.5, 3.7, 4.1, 4.3, 5.1, 5.3, 5.4	• Uses logical processes in planning, implementing and evaluating complex tasks to achieve stated goals • Identifies problems, establishes the causes and applies analytical processes to formulate a course of action and criteria in addressing issues • Takes responsibility for high impact decisions in complex situations involving many variables and constraints • Defines benefits, costs, risks and feasibility from a broad range of perspectives and may think laterally to redesign aspects to address potential issues

BSBFLM303 Contribute to effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather information and maintain effective relationships and networks, with particular regard to communication and representation.

This unit applies to individuals who use leadership skills including motivation, mentoring and coaching to develop efficient, effective and unified teams and facilitate communication between team members and management of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Seek, receive and communicate information and ideas	1.1 Collect information associated with the achievement of work responsibilities from appropriate sources 1.2 Communicate ideas and information to diverse audiences in an appropriate and sensitive manner 1.3 Seek contributions from internal and external sources to develop and refine new ideas and approaches in accordance with organisational processes

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Facilitate consultation processes to allow employees to contribute to issues related to their work, and promptly communicate outcomes of consultation to the work team 1.5 Promptly deal with and resolve issues raised, or refer them to relevant personnel
2 Encourage trust and confidence	2.1 Treat people with integrity, respect and empathy 2.2 Encourage effective relationships within the framework of the organisation's social, ethical and business standards 2.3 Gain and maintain the trust and confidence of colleagues, customers and suppliers through competent performance 2.4 Adjust interpersonal styles and methods in relation to the organisation's social and cultural environment
3 Identify and use networks and relationships	3.1 Identify and utilise workplace networks to help build relationships 3.2 Identify and describe the value and benefits of networks and other work relationships for the team and the organisation
4 Contribute to positive outcomes	4.1 Identify difficulties and take action to rectify the situation within own level of responsibility according to organisational and legal requirements 4.2 Support colleagues in resolving work difficulties 4.3 Regularly review workplace outcomes and implement improvements in consultation with relevant personnel 4.4 Identify and resolve poor work performance within own level of responsibility and according to organisational policies 4.5 Deal constructively with conflict, within the organisation's established processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 1.5, 4.3	• Comprehends textual information to determine regulatory requirements and adhere to job processes

© Commonwealth of Australia, 2025 Skills Insight

		and internal policies
Writing	1.1-1.5, 4.3, 4.4, 4.5	• Uses appropriate language to record key information related to the outcomes of the job • Varies writing style to meet requirements of audience and purpose
Oral Communication	1.2-1.5, 2.1, 2.2, 2.4, 3.1, 4.2-4.5	• Speaks clearly using tone and pace appropriate for the audience and purpose • Uses appropriate techniques, including active listening and questioning, to clarify information and to confirm understanding
Navigate the world of work	1.3, 2.1, 2.2, 2.4, 4.1, 4.4, 4.5	• Takes personal responsibility for adherence to explicit and implicit organisational policies, procedures, standards and legislative requirements within own job role and in all interactions with others
Interact with others	1.2, 1.3, 1.4, 1.5 2.1, 2.2, 2.3, 2.4 4.2, 4.3, 4.4, 4.5	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to build rapport, establish networks, seek or share information, • Adjusts personal communication style in response to a diverse range of individuals in the work context • Uses collaborative techniques to engage team members in consultations and negotiations • Implements strategies to respond appropriately to conflict and poor work performance
Get the work done	1.1, 1.3, 1.4,1.5, 2.3, 3.1, 3.2, 4.1, 4.2, 4.3, 4.4	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for effective outcomes • Uses formal analytical thinking techniques and broad ranging consultative processes to identify issues and implement a constructive approach to solutions and improvement opportunities • Uses familiar digital technologies and systems to access, present and communicate information

- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.
- communicate ideas and information to diverse audiences
- develop networks and build team relationships.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships and the cultural and social environment can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team
- identify relevant legislation from all levels of government that affects business operation

© Commonwealth of Australia, 2025 Skills Insight

- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods
- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant legislation and regulations
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM305 Support operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide support for operational practices and procedures within the organisation's productivity and profitability plans. This includes contributing to the operational plan, assisting in recruiting employees and acquiring resources, and monitoring and adjusting operational performance.

It applies to individuals who use planning and analytical skills to achieve the measurable, stated objectives of the team and the organisation. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non-routine activities that require some discretion and judgement.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Contribute to implementation of operational plan	1.1 Collect and record details of resource requirements and report to relevant personnel 1.2 Ensure the operational plan contributes to the achievement of the organisation's performance and business plan 1.3 Identify key performance indicators to measure own and work

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	team's performance 1.4 Undertake contingency planning as required 1.5 Support the development and presentation of proposals for resource requirements as necessary
2 Assist in recruiting employees and acquiring resources	2.1 Assist with employee recruitment and/or induction as required, within the organisation's policies, practices and procedures 2.2 Acquire physical resources and services according to the organisation's policies, practices and procedures, and in consultation with relevant personnel
3 Support operations	3.1 Identify and utilise performance systems and processes to assess team progress in achieving plans and targets 3.2 Compare actual productivity and performance with identified short-term budgets, targets and performance results 3.3 Identify and report unsatisfactory performance to relevant personnel, to enable action to be taken to rectify situation 3.4 Provide coaching to support individuals and teams to use resources effectively, economically and safely 3.5 Support consultation processes for development and/or variation of the operational plan as required 3.6 Present recommendations for variation to operational plans to relevant personnel 3.7 Follow performance systems, procedures and recording processes in accordance with organisation requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	• Contributes to ongoing organisational improvement by training others to uses resources appropriately
Reading	1.1-1.3, 2.1, 2.2, 3.1, 3.2, 3.7	• Interprets information from a range of familiar texts

© Commonwealth of Australia, 2025 Skills Insight

Writing	1.1, 1.4, 1.5, 3.3, 3.6	• Uses appropriate vocabulary and grammatical structures to achieve precise meaning in a range of documentation
Oral Communication	1.1, 2.1, 2.2, 3.3-3.6	• Articulates information concisely using appropriate terminology, tone and style • Uses questioning and listening techniques to exchange and clarify information
Numeracy	1.1, 1.2, 2.2, 3.2, 3.4	• Interprets and analyses numerical information to support resource acquisition and broader business plan
Navigate the world of work	2.1, 2.2, 3.7	• Adheres to organisational policies and procedures and understands and meets expectations associated with own role
Interact with others	1.5, 2.1, 3.4-3.6	• Selects and uses appropriate conventions and protocols when communicating with relevant personnel • Collaborates and cooperates with others to achieve joint outcomes
Get the work done	1.1-1.4, 3.1, 3.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for effective outcomes • Makes routine decisions and implements standard procedures for routine tasks • Recognises and responds to predictable routine problems related to role in the immediate work context

Assessment Requirements for BSBFLM305 Support operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assist in planning resource acquisition and usage including human resources, risk management and contingency planning
- share information and support members of the work team to achieve plans and targets
- monitor, analyse and report individual and team performance against identified targets.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the processes used to plan and acquire resources
- summarise organisational recruitment and induction processes
- explain the relationship between key performance indicators and achievement of the operational plan
- explain the role of contingency planning in supporting the operational plan
- identify systems and processes for monitoring and reporting performance
- identify alternative approaches to improving resource usage and eliminating resource inefficiencies and waste
- identify relevant legislation, regulations, standards or codes of practice that may affect the operational plan
- identify the organisational policies, practices and procedures relevant to implementation of the operational plan.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant legislation and regulations
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Contribute to team outcomes	1.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2 Support team members to meet expected outcomes

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Support team cohesion	2.1 Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility 2.2 Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward team members' efforts and contributions 2.4 Identify and address issues, concerns and problems identified by team members, or refer to relevant persons as required
3 Participate in work team	3.1 Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions 3.2 Support the team to identify and resolve problems which impede its performance 3.3 Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers
4 Communicate with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues to line manager/management and follow up to ensure action is taken in response to these matters

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.3, 2.4, 4.2, 4.3	• Uses appropriate vocabulary, grammatical structures and conventions to communicate information, matching style to purpose and audience
Oral	1.1, 1.2, 2.1-2.4, 3.1,	• Presents ideas and seeks feedback from others using vocabulary and non-verbal features appropriate to the

Assessment Requirements for BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
  - provides direction and leadership
  - assists individuals to achieve goals
  - motivates and builds team cohesion
  - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
  - group dynamics and processes
  - motivation

© Commonwealth of Australia, 2025 Skills Insight

  - negotiation
- explain why considering individual behaviour and differences is important to a manager.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBINM401 Implement workplace information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify, source and analyse information to determine
  - information system needs
  - whether it is fit for purpose
  - trends and developments
- implement and review the workplace information system
- review a workplace information system and prepare and present a submission recommending improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the information systems that are, or should be, available in the workplace
- explain the information management systems and technology typically associated with the workplace including:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- business technology
- a workplace information system
- workplace policies and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise training for others for an information or knowledge management system and to manage the use of the system.

It applies to individuals who are responsible for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes.

The unit applies to information or knowledge management systems which comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Organise learning to use information or knowledge management system	1.1 Identify learning needs of relevant personnel and stakeholders for input into and use of an information or knowledge management system 1.2 Identify and secure human, financial and physical resources

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	required for learning activities to use an information or knowledge management system 1.3 Organise and facilitate learning activities 1.4 Promote and support use of the system throughout the organisation 1.5 Monitor and document effectiveness of learning activities
2 Manage use of information or knowledge management system	2.1 Ensure implementation of policies and procedures for the information or knowledge management system are monitored for compliance, effectiveness and efficiency 2.2 Address implementation issues and problems as they arise 2.3 Monitor integration and alignment with data and information systems 2.4 Collect information on achievement of performance measures 2.5 Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required
3 Review use of information or knowledge management system	3.1 Analyse effectiveness of system and report on strengths and limitations of the system 3.2 Review business and operational plan and determine how effectively the system is contributing to intended outcomes 3.3 Make recommendations for improvement to system, policy or work practices

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.5, 3.1-3.3	• Researches and critically analyses documentation from a variety of sources to determine requirements
Writing	1.1-1.5, 2.1-2.4, 3.2, 3.3	• Prepares and produces documentation for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations

© Commonwealth of Australia, 2025 Skills Insight

Oral Communication	1.1, 1.2, 1.3, 1.4, 2.2, 2.5, 3.3	• Presents information using structure and language to suit the audience • Uses active listening and questioning and reading of verbal and non-verbal signals to clarify information and to confirm understanding
Navigate the world of work	2.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation • Modifies or develops organisational policies and procedures to comply with legislative requirements and organisation goals
Interact with others	1.1-1.4, 2.5, 3.3	• Implements strategies for a diverse range of colleagues and clients in order to build rapport and foster strong relationships • Collaborates with others sharing information to build strong work groups and avoid behaviours that are not conducive to a productive environment • Elicits feedback and provides feedback to others in order to improve self or workgroup behaviours
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities • Applies systematic and analytical processes to address problems and make decisions in complex situations • Investigates new and innovative ideas as a means to continuously improve, work practices and processes • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others

Assessment Requirements for BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify learning needs and plan and implement learning activities to enable personnel to use information or knowledge management system including
  - providing human, financial and physical resources as required
  - use of coaching, mentoring, information sessions, workshops, training programs and e-learning as appropriate
- monitor performance and address issues and contingencies as they arise including
  - accessing technical specialists as required
  - correct application of policies and procedures for the information or knowledge management system
  - alignment and effectiveness of the policies and procedures
  - effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, codes of practice and national standards relevant to privacy, freedom of information and knowledge management
- explain organisational policies and procedures including:
  - records management
  - information management
  - customer service
  - commercial confidentiality

© Commonwealth of Australia, 2025 Skills Insight

- describe the organisational operations and existing data and information systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace systems, documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN201 Contribute to workplace innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to make a pro-active and positive contribution to workplace innovation.

It applies to individuals working in any industry or community context, in both small and large organisations who take a pro-active approach to identifying, suggesting and developing ideas about better ways of doing things at a practical operational level in a specific area of activity. While the individual's overall work is undertaken with some supervision and guidance, they apply discretion, judgement and effective interpersonal skills in order to contribute to workplace innovation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify opportunities to do things better	1.1 Be aware of own role in workplace innovation 1.2 Proactively identify opportunities for improvement in own area of work 1.3 Gather and review information which may be relevant to ideas and which might assist in gaining support for ideas

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Discuss and develop ideas with others	2.1 Identify people who could provide input into ideas for improvements 2.2 Select the best way of approaching people to begin sharing ideas 2.3 Seek feedback on improvement of ideas, and discuss and develop options and possible variations 2.4 Review and select ideas for follow up based on feedback and further review
3 Address the practicalities of change	3.1 Take action to implement routine changes in consultation with others and within scope of own responsibility 3.2 Identify and articulate issues and practical processes for implementing proposed ideas 3.3 Present ideas and practical suggestions to the appropriate people about how improvements could be made

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.4, 3.2	• Categorises, interprets and reviews information from a range of sources to generate ideas relevant to the workplace
Writing	3.2, 3.3	• Communicates information using clear language and formats appropriate for the audience
Oral Communication	2.3, 3.1, 3.2, 3.3	• Actively participates in verbal exchanges of ideas and elicits the view and opinions of others by listening and questioning • Uses clear and relevant language to clarify workplace issues and promote ideas
Numeracy	1.3, 3.2	• Performs basic mathematical calculations to estimate time and cost in relation to implementation of ideas
Navigate the world of work	1.1, 1.2, 3.1	• Understands responsibilities of own role
Interact with	2.3, 3.1-3.3	• Follows accepted communication practices and protocols when discussing or presenting ideas to others

© Commonwealth of Australia, 2025 Skills Insight

others		• Seeks and takes into account perspectives and opinions of others
Get the work done	1.2, 1.3, 2.1, 2.2, 2.4, 3.1-3.3	• Plans and implements routine tasks making limited decisions and seeking assistance, when necessary • Uses analytical or lateral thinking processes to identify improvements or new ways of approaching tasks • Identifies and anticipates operational problems and develops possible solutions

Assessment Requirements for BSBINN201 Contribute to workplace innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify ideas for improvements and use information from a range of sources including other people to review and select ideas to put forward for implementation
- communicate the ideas and seek input from others in order to identify how the ideas could be implemented
- implement routine changes within scope of responsibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the role of individuals in suggesting and making improvements and the importance of pro-active involvement
- list the positive impacts and the challenges of change and innovation
- provide examples of the types of changes that can occur as a result of effective individual participation within own scope of responsibility
- give examples of the types of changes that are within and outside own scope of responsibility
- list typical reasons why suggested improvements or innovations may not be implemented, including operational and management constraints
- explain how to prepare and communicate ideas for improvement to maximise likelihood of support.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN501 Establish systems that support innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conceptualise and establish new systems that support and encourage innovation in the workplace.

It applies to individuals including managers, senior operational personnel and/or internal/external specialists who are responsible for the development of new systems in small and large organisations in any community or industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research context for new system development	1.1 Explore and analyse the impact of systems in the overall context of innovation 1.2 Explore and gain clarity around system objectives, particularly in relation to innovation 1.3 Analyse current organisational systems to identify gaps or barriers to innovation 1.4 Research and analyse current and emerging information about

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	systems in other organisations and contexts 1.5 Evaluate the resources and other commitment required to foster innovation 1.6 Identify key stakeholders who can play a role in conceptualising or supporting new system ideas
2 Generate system concepts and options	2.1 Create system concepts that will foster innovation using individual and group techniques 2.2 Evaluate and discuss a range of ideas with relevant stakeholders 2.3 Clearly articulate the ways in which innovation is better supported by system ideas and options 2.4 Clearly articulate how the system itself is innovative 2.5 Expose ideas and options to ongoing testing, exploration and challenge 2.6 Select and refine system ideas that meet the workplace requirements and which are both feasible and innovative
3 Develop a plan for the system	3.1 Determine the need for specialised assistance and integrate into system planning 3.2 Analyse the potential impact of the new system on people, resources and other organisational practices 3.3 Consult with all stakeholders who will be involved with, or affected by, the new system 3.4 Develop an operational plan for the system, with budget, timelines and responsibilities 3.5 Develop a communication strategy to support the introduction of the new system 3.6 Evaluate the coaching and training needs of those who will use the system and plan a learning and development strategy
4 Trial the system	4.1 Present and consult on system proposals with relevant stakeholders 4.2 Analyse and integrate feedback into the system development process 4.3 Determine appropriate context and parameters for the trial process 4.4 Initiate the trial, taking account of all required consultative, coaching and technical issues 4.5 Monitor and review the trial in relation to its goals for fostering

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	innovation 4.6 Open the improvement process to ongoing collaborative input and challenge 4.7 Adjust system to reflect evaluation feedback

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4	• Researches, analyses and evaluates textual information, from a wide range of sources, to identify information relevant to systems that support innovation
Writing	2.3, 2.4, 2.5, 3.3, 3.4, 3.5, 3.6, 4.1, 4.2	• Develops complex plans and strategies using language and format appropriate to the audience and purpose
Oral Communication	2.1, 2.2, 2.3, 2.4, 3.3, 4.1, 4.6	• Presents ideas and concepts to a range of audiences varying vocabulary and non-verbal features to suit the audience • Uses active listening and questioning to discuss and clarify information and to confirm understanding
Numeracy	3.4	• Interprets, analyses and presents numeric or financial information in complex documents
Navigate the world of work	1.1-1.4	• Takes responsibility for researching and evaluating systems to achieve organisational outcomes in innovation according to role requirements
Interact with others	2.1, 2.2, 2.5, 4.1, 4.4, 4.6	• Identifies and uses appropriate conventions and protocols when communicating with stakeholders from diverse backgrounds • Uses inclusive and collaborative techniques to negotiate, influence and elicit the views and opinions of a wide range of stakeholders
Get the work done	1.1-1.6, 2.1, 2.6, 3.1, 3.2, 3.4-3.6, 4.2-4.7	• Accepts responsibility for planning and implementing systems and strategies to achieve organisational goals, negotiating key aspects with others • Develops new and innovative ideas through exploration, analysis and critical thinking

© Commonwealth of Australia, 2025 Skills Insight

		• Uses digital tools or systems to access, organise, integrate and share information

Assessment Requirements for BSBINN501 Establish systems that support innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of ability to:

- design a new system for the organisation that clearly support s innovation, is innovative and is based on:
  - analysis of the organisation's objectives, current systems, resources and barriers in relation to innovation
  - individual and group techniques with stakeholders to generate, test and evaluate several concepts and options for the new system
- consult with and analyse and integrate feedback from relevant stakeholders to develop a plan for the new system that addresses:
  - the need for external assistance
  - the impact of the new system on people, resources and other organisational practices
  - budget, timelines, responsibilities
  - a communication strategy
  - a learning and development strategy
- trial the new system including taking account of all consultative, coaching and technical issues and review it in relation to its goals for fostering innovation
- open the improvement process to ongoing collaborative input and challenge
- adjust system to reflect evaluation feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how the new system supports innovation in the organisation

© Commonwealth of Australia, 2025 Skills Insight

- explain the concepts and theories of change management including ways of introducing change in different organisational contexts and change management communication strategies
- explain the concepts and theories of innovation and how these link to innovation in practice
- explain techniques for generating, testing and evaluating concepts and options for new systems
- analyse the technical context in which the system is being developed
- outline the typical ways in which systems may present barriers to innovation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents and
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others
- current industry technology used in the development of systems.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create an environment that enables and supports the application of innovative practice focusing on a holistic approach to the integration of innovation across all areas of work practice.

It applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals. The work group could be permanent or temporary in nature.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Lead innovation by example	1.1 Make innovation an integral part of leadership and management activities 1.2 Demonstrate positive reception of ideas from others and provide constructive advice 1.3 Establish and maintain relationships based on mutual respect and trust

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Take considered risks to open up opportunities for innovation 1.5 Regularly evaluate own approaches for consistency with the wider organisational or project context
2 Establish work practices that support innovation	2.1 Consult on and establish working conditions that reflect and encourage innovative practice 2.2 Introduce and maintain workplace procedures that foster innovation and allow for rigorous evaluation of innovative ideas 2.3 Facilitate and participate in collaborative work arrangements to foster innovation 2.4 Build and lead teams to work in ways that maximise opportunities for innovation
3 Promote innovation	3.1 Acknowledge suggestions, improvements and innovations from all colleagues 3.2 Find appropriate ways of celebrating and promoting innovation 3.3 Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project 3.4 Promote and support the evaluation of innovative ideas within the wider organisational or project context
4 Create a physical environment which supports innovation	4.1 Evaluate the impact of the physical environment in relation to innovation 4.2 Collaborate with colleagues about ideas for enhancing the physical work environment before taking action 4.3 Consider potential for supporting innovation when selecting physical resources and equipment 4.4 Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships
5 Provide learning opportunities	5.1 Pro-actively share relevant information, knowledge and skills with colleagues 5.2 Provide or encourage formal and informal learning opportunities to help develop the skills needed for innovation 5.3 Create opportunities in which individuals can learn from the experience of others

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.2, 4.1, 5.1	• Interprets and evaluates information that may deal with complex ideas related to issues both within and outside a given workplace context
Writing	3.3, 3.4, 5.1	• Develops information for others using language to suit the context and audience
Oral Communication	1.2, 2.1, 2.3, 3.1, 3.3, 3.4, 5.1	• Presents ideas and concepts to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to discuss and clarify information and to confirm understanding
Navigate the world of work	1.1, 1.5, 2.1, 2.2, 3.3, 5.1, 5.2	• Takes responsibility for implementing practices and procedures to achieve organisational objectives in innovation according to role requirements • Stays up to date with professional development options to provide relevant information to staff
Interact with others	1.2, 1.3, 2.3, 2.4, 3.1-3.4, 4.2, 5.1, 5.3	• Uses appropriate communication techniques to build rapport and foster strong relationships with co-workers in a range of work contexts • Uses inclusive and collaborative techniques to share, promote and convey complex information about new ideas and systems within the workplace
Get the work done	1.1, 1.4, 1.5, 2.1, 3.2, 3.3, 4.1, 4.3, 4.4, 5.2, 5.3	• Accepts responsibility for planning and implementing tasks and practices to achieve organisational goals, negotiating key aspects with others and taking into account current capabilities and needs • Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking • Facilitates a climate where people feel comfortable suggesting and discussing improvements or new ideas • Uses problem solving processes to identify, assess and respond to challenges and risks around innovation

Assessment Requirements for BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to maximise opportunities for innovation by:

- establishing procedures and practices that foster innovation including:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas
  - celebration and promotion of innovation
  - consultation
  - respectful communications and sharing of ideas and feedback
- reinforcing the value of innovation to the vision and objectives of the organisation,
- model ling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation
- evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces
- making changes to a workspace that will encourage innovation in at least one of
  - design
  - fit-out
  - decoration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts and theories of innovation and how these link to innovation in practice
- explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- research the legislative framework that impacts on operations in the relevant workplace context
- explain how different approaches to management and leadership can support or hinder innovation
- discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies.

It applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area.

The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and innovation – innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify change requirements and opportunities	1.1 Identify strategic change needs through an analysis of organisational objectives 1.2 Review existing policies and practices against strategic objectives to identify where changes are required

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Monitor the external environment to identify events or trends that impact on the achievement of organisational objectives 1.4 Identify major operational change requirements due to performance gaps, business opportunities or threats, or management decisions 1.5 Review and prioritise change requirements or opportunities with relevant managers 1.6 Consult stakeholders, specialists and experts to assist in the identification of major change requirements and opportunities
2 Develop change management strategy	2.1 Undertake cost-benefit analysis for high priority change requirements and opportunities 2.2 Undertake risk analysis and apply problem solving and innovation skills to identify barriers to change and agree and record mitigation strategies 2.3 Develop change management project plan 2.4 Obtain approvals from relevant authorities to confirm the change management process 2.5 Assign resources to the project and agree reporting protocols with relevant managers
3 Implement change management strategy	3.1 Develop communication or education plan, in consultation with relevant groups and individuals, to promote the benefits of the change to the organisation and to minimise loss 3.2 Arrange and manage activities to deliver the communication or education plans to relevant groups and individuals 3.3 Consult with relevant groups and individuals for input into the change process 3.4 Identify and respond to barriers to the change according to risk management plans 3.5 Action interventions and activities set out in project plan according to project timetable 3.6 Activate strategies for embedding the change 3.7 Conduct regular evaluation and review and modify project plan where appropriate to achieve change program objectives

Assessment Requirements for BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and interpret information about the organisation's internal and external environment and consult with stakeholders to identify requirements and opportunities for changes that support organisational objectives
- prioritise opportunities for changes with input from managers
- develop a change management project plan for the priority changes incorporating resource requirements, risk management and timelines
- develop strategies to communicate or educate the changes and embed them
- obtain approvals and agree reporting protocols with relevant managers and implement the plan including addressing barriers to change
- review and evaluate the change management project plan and modify as needed to achieve objectives.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the change management process or cycle and strategies for communicating and embedding change
- explain how organisational behaviour and the external environment can impact on change strategies
- describe the components of a change management project plan
- list potential barriers to change and explain possible strategies to address barriers.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documentation and resources
- office equipment, materials and software packages
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITS401 Maintain business technology

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain the effectiveness of business technology in the workplace. It includes maintaining existing technology and planning for future technology requirements.

It applies to individuals with a broad knowledge of business technology who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Maintain performance of hardware and software	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Use operating system, drive and disk structure, reports and files to identify performance problems 1.3 Maintain disk drives and peripherals according to manufacturers' and organisational requirements 1.4 Replace consumables in accordance with manufacturers' and organisational requirements
2. Provide basic system administration	2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements 2.2 Install and operate software applications in accordance with developers' and organisational requirements 2.3 Maintain and update security access procedures in line with organisational requirements 2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements 2.5 Regularly maintain and update virus programs in accordance with organisational requirements
3. Identify future technology requirements	3.1 Maintain knowledge of current and new technology by regularly accessing sources of information 3.2 Identify and develop improved technology systems using feedback from clients and colleagues 3.3 Assess existing technology against newly available technology to determine future needs and priorities 3.4 Identify and select new technologies to achieve and maintain continuous organisational development 3.5 Obtain management and budget approval for new selected technologies

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1-3.4	• Gathers, analyses and interprets a range of textual information from a variety of sources and identifies

© Commonwealth of Australia, 2025 Skills Insight

		relevant information
Writing	2.3, 2.4, 3.5	• Produces texts of varying complexity using appropriate language and logical structure to record and convey information
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.5	• Complies with organisational policies and legal responsibilities related to own work
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.5	• Plans, implements and monitors tasks required to achieve required outcomes • Takes responsibility for the outcomes of routine decisions directly related to own role • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete routine tasks • Identifies innovations by monitoring trends from other contexts

Assessment Requirements for BSBITS401 Maintain business technology

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install software and hardware and maintain performance according to manufacturers' and organisational requirements
- organise and access software, materials and consumables
- maintain and update technology and security systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the costs and benefits of technology maintenance
- describe the general features and capabilities of current industry-accepted hardware and software products
- explain the importance of:
  - back-up and security procedures
  - maintenance and diagnostic procedures
  - licensing, installation and purchasing procedures.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT support field of work and include access to:

- case studies and, where possible, real situations
- office equipment and resources
- examples of technology maintenance and security procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITS411 Maintain and implement digital technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to maintain the effectiveness of digital technology in the workplace. It includes maintaining existing technology, planning for future technology requirements, and identifying opportunities to improve workplace effectiveness and efficiency by introducing new digital technologies.

It applies to individuals with a broad knowledge of digital business technologies who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing digital technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Maintain performance of existing digital technologies	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements 1.2 Use operating system, available software, web-based tools, and relevant applications to identify performance problems

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Maintain digital technologies according to organisational requirements by troubleshooting solutions to diagnose issues
2. Maintain security and functionality of data and digital technologies	2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements 2.2 Install and operate software and other digital applications in accordance with developers' and organisational requirements 2.3 Identify sources of risk to digital security in line with organisational policies and requirements 2.3 Maintain and update digital security access procedures in line with organisational requirements 2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements
3. Identify future technology requirements and opportunities	3.1 Identify available and upcoming digital technology solutions by accessing relevant sources of information 3.2 Assess existing digital technologies against newly available and upcoming digital technology solutions to determine future needs, opportunities, and priorities 3.3 Identify and select new digital technologies to achieve and maintain continuous organisational development in line with organisational strategies 3.4 Develop and implement improved digital technology systems based on feedback from clients and colleagues, in line with organisational policies and requirements 3.5 Obtain management and budget approval for new selected technologies

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Gathers, analyses and interprets a range of textual information from a variety of sources and identifies relevant information
Writing	• Produces texts of varying complexity using appropriate language and logical structure to record and convey information
Navigate the	• Complies with organisational policies and legal responsibilities

Assessment Requirements for BSBITS411 Maintain and implement digital technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- identify and resolve system issues using a range of digital diagnostic tools
- perform routine system maintenance, including carrying out back-up procedures and software/application installation
- identify a range of risks to digital security and steps required to minimise/eliminate such risk
- develop and implement improved digital technology systems, drawing on research of available and upcoming digital technology solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features, capabilities, and limitations of current industry-accepted digital technology solutions
- Key features and limitations of existing organisational digital technologies, including software licences
- Key features of organisational policies and requirements related to digital security
- Key features of organisational commercial strategy relevant to digital technology
-

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT support field of work and include access to:

- case studies and, where possible, real situations
- office equipment and resources
- examples of technology maintenance and security procedures.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU201 Produce simple word processed documents

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to correctly operate word processing applications in production of workplace documents.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of word processing and software in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce documents	1.1 Use safe work practices to ensure ergonomic, work organisation, energy and resource conservation requirements are met

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Identify document purpose, audience and presentation requirements, and clarify with relevant personnel as required 1.3 Identify organisational and task requirements for document layout and design
2. Produce documents	2.1 Format document using appropriate software functions to adjust page layout to meet information requirements, in accordance with organisational style and presentation requirements 2.2 Use system features to identify and manipulate screen display options and controls 2.3 Use manuals, user documentation and online help to overcome problems with document presentation and production
3. Finalise documents	3.1 Ensure final document is previewed, checked, adjusted and printed in accordance with organisational and task requirements 3.2 Ensure document is prepared within designated timelines and organisational requirements 3.3 Name and store document in accordance with organisational requirements and exit application without information loss/damage

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 2.3, 3.1, 3.3	• Recognises textual information within organisational and task requirements to determine work requirements
Writing	3.1, 3.3	• Records numerical and textual information in accordance with requirements of task
Oral Communication	1.2	• Participates in a variety of spoken exchanges with relevant personnel in an effort to clarify document purpose, audience and presentation requirements
Navigate the world of work	1.1-1.3, 2.1, 3.1-3.3	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.2	• May seek guidance from more experienced work colleagues

© Commonwealth of Australia, 2025 Skills Insight

Get the work done	2.1-2.3, 3.1-3.3	• Understands functions and features of specific computer software and uses these to perform work tasks

Assessment Requirements for BSBITU201 Produce simple word processed documents

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documents following correct ergonomic, conservation requirements and organisational policies and procedures
- adhere to organisational style manual when formatting documents
- refer to help function and user documentation to rectify document problems
- use system features
- follow designated timelines when preparing documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify basic formatting styles and their effect on formatting, readability and appearance of documents
- describe purpose, use and function of word processing software
- outline organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- describe what is contained in an organisational style guide.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources including a style guide and user manuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and prepare resources	1.1 Select and use appropriate technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1 Identify, open and generate files and records according to task and organisational requirements 2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information 2.3 Use a range of functions to ensure consistency of design and layout 2.4 Operate input devices within designated requirements
3. Produce document	3.1 Complete document production within designated timelines according to organisational requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document to avoid loss of data 3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Make any modifications to document to meet requirements 4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage 4.4 Print and present document according to requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 3.2, 3.4, 4.1	• Recognises and interprets textual information from a range of sources to determine and adhere to requirements • Applies strategies to self-correct and verify clarity and conformity of information

© Commonwealth of Australia, 2025 Skills Insight

Writing	2.2, 2.3, 3.1, 4.2, 4.3	• Develops documents using required format, accurate spelling and grammar and terminology specific to requirements • Organises content to support purposes and audience of material, using clear and logical language
Oral Communication	1.4	• Confirms requirements with relevant personnel using specific terminology and listening and questioning techniques
Navigate the world of work	1.2, 1.3, 2.1, 2.4, 3.1, 3.2, 4.2-4.4	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.4	• Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4, 4.1-4.4	• Uses basic features and functions within applications to access, store, organise data and perform routine work tasks

Assessment Requirements for BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
  - selecting layout and style
  - opening and generating files
  - producing documents within designated timelines
  - naming and storing documents
  - printing and presenting documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements

© Commonwealth of Australia, 2025 Skills Insight

- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

This unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context.

At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning and evaluation and leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect, analyse and communicate information and ideas	1.1 Collect relevant information from appropriate sources and analyse and share with the work team to improve work performance 1.2 Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the

Assessment Requirements for BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships, and the cultural and social environment, can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team including interpersonal styles, communications, consultation, cultural and social sensitivity, networking
- explain the impact of legislation and organisational policies on workplace relationships
- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods

© Commonwealth of Australia, 2025 Skills Insight

- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

© Commonwealth of Australia, 2025 Skills Insight

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR803 Develop and cultivate collaborative partnerships and relationships

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish collaborative partnerships and relationships with business and industry stakeholders.

This unit covers communicating to influence others, cultivating new and existing partnerships, establishing positive collaborative relationships, leading the establishment of a partnership program and establishing reporting mechanisms.

It applies to people who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate to influence relevant individuals and stakeholders	1.1 Generate trust, confidence and support from relevant stakeholders by demonstrating a high standard of personal performance and conduct 1.2 Implement communication strategies to represent the organisation positively to media, local community and stakeholders 1.3 Make decisions in consultation with relevant stakeholders and relevant individuals where appropriate 1.4 Use a range of influencing strategies to increase commitment from staff and stakeholders to achieve organisational requirements and to contribute to desired culture 1.5 Undertake selected community and/or professional engagements that project a positive image of the organisation to the broader community and stakeholders
2. Cultivate new and existing partnerships with stakeholders	2.1 Establish outcomes to be achieved from the partnership 2.2 Analyse and apply models for effective consultation and collaboration within partnerships 2.3 Cultivate collaborative communities and partnerships through application of a range of communication solutions 2.4 Forge relationships, collaborative communities or partnerships between organisations
3. Establish positive collaborative relationships	3.1 Establish processes that contribute to the creation and maintenance of a positive culture that embraces collaboration 3.2 Establish processes to resolve conflict in a fair, equitable and collaborative manner 3.3 Organise and allocate work activities in a cost effective and equitable manner with clear, quantifiable and agreed performance standards 3.4 Encourage staff to undertake activities that develop their personal competence and performance 3.5 Empower individuals to develop their own ways of working within agreed boundaries of competence, cultural, diversity and organisational and legal requirements 3.6 Establish indicators and feedback processes that can be used to evaluate the health of the work environment
4. Lead establishment of a	4.1 Identify and address relevant organisational policies and

BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine development needs	1.1 Systematically identify and implement learning and development needs in line with organisational requirements 1.2 Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	implemented 1.3 Encourage individuals to self-evaluate performance and identify areas for improvement 1.4 Collect feedback on performance of team members from relevant sources and compare with established team learning needs
2. Develop individuals and teams	2.1 Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry 2.2 Ensure that learning delivery methods are appropriate to the learning goals, the learning style of participants, and availability of equipment and resources 2.3 Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate individual and team achievement of competencies 2.4 Create development opportunities that incorporate a range of activities and support materials appropriate to the achievement of identified competencies 2.5 Identify and approve resources and time lines required for learning activities in accordance with organisational requirements
3. Monitor and evaluate workplace learning	3.1 Use feedback from individuals or teams to identify and implement improvements in future learning arrangements 3.2 Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support 3.3 Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning 3.4 Document and maintain records and reports of competency according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Learning	1.1-1.4, 2.1-2.4, 3.1, 3.3	• Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1-3.4	• Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	1.1, 1.2, 1.4, 2.1, 2.5, 3.1-3.4	• Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3	• Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives
Navigate the world of work	1.1, 2.5, 3.4	• Recognises and responds to explicit and implicit organisational procedures and protocols Understands how own role meshes with others and contributes to broader goals
Interact with others	1.2, 1.3, 1.4, 2.2, 2.3, 3.1, 3.3	• Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve joint/agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.4	• Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

BSBLED501 Develop a workplace learning environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to encourage and support the development of a learning environment in which work and learning come together. Particular emphasis is on the development of strategies to facilitate and promote learning and to monitor and improve learning performance.

It applies to individuals who have a prominent role in encouraging, supporting and facilitating the development of a learning environment in which work and learning come together.

At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	• Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	• Identifies, interprets, analyses and reviews textual information related to the operational plan and

© Commonwealth of Australia, 2025 Skills Insight

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	• Communicates relationships between ideas and information, matching style of writing to purpose and audience • Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	• Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 3.6	• Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they met stated goals • Recognises and addresses an increasing range of familiar problems by implementing contingency plans

Assessment Requirements for BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

ELEMENT	PERFORMANCE CRITERIA
processes	making processes, assume responsibility and exercise initiative 1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback 1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes
2. Monitor and review performance	2.1 Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved 2.2 Improve customer service through continuous improvement techniques and processes 2.3 Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation
3. Provide opportunities for further improvement	3.1 Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan 3.2 Document work performance to aid the identification of further opportunities for improvement 3.3 Manage records, reports and recommendations for improvement within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.2, 3.3	• Evaluates and integrates facts and ideas to construct meaning from a range of text types in an effort to implement continuous improvement systems and processes
Writing	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	• Selects vocabulary, grammatical structures and conventions appropriate to text • Researches, plans and prepares continuous improvement documentation for relevant stakeholders
Oral	1.2, 1.3, 2.3	• Participates in a variety of spoken exchanges with a range of audiences using structure and language to suit

© Commonwealth of Australia, 2025 Skills Insight

Communication		the audience
Navigate the world of work	2.1	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact the work of others	1.2, 1.3, 2.3, 3.1	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to seek or share information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3	• Takes responsibility for planning and organising own workload to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals • Uses digital applications to access and filter data, extract, organise, integrate and share relevant information • Recognises the potential of new approaches to enhance work practices and outcomes

Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Develop work plans in accordance with operational plans 1.3 Allocate work in a way that is efficient, cost effective and outcome focussed 1.4 Confirm performance standards, Code of Conduct and work outputs with relevant teams and individuals 1.5 Develop and agree performance indicators with relevant staff prior to commencement of work 1.6 Conduct risk analysis in accordance with the organisational risk management plan and legal requirements
2. Assess performance	2.1 Design performance management and review processes to ensure consistency with organisational objectives and policies 2.2 Train participants in the performance management and review process 2.3 Conduct performance management in accordance with organisational protocols and time lines 2.4 Monitor and evaluate performance on a continuous basis
3. Provide feedback	3.1 Provide informal feedback to staff on a regular basis 3.2 Advise relevant people where there is poor performance and take necessary actions 3.3 Provide on-the-job coaching when necessary to improve performance and to confirm excellence in performance 3.4 Document performance in accordance with the organisational performance management system 3.5 Conduct formal structured feedback sessions as necessary and in accordance with organisational policy
4. Manage follow up	4.1 Write and agree on performance improvement and development plans in accordance with organisational policies 4.2 Seek assistance from human resources specialists, where appropriate 4.3 Reinforce excellence in performance through recognition and continuous feedback 4.4 Monitor and coach individuals with poor performance 4.5 Provide support services where necessary 4.6 Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary 4.7 Terminate staff in accordance with legal and organisational

BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives.

At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Lead continuous improvement systems and processes	1.1 Develop strategies to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative as

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	appropriate 1.2 Establish systems to ensure that the organisation's continuous improvement processes are communicated to stakeholders 1.3 Ensure that change and improvement processes meet sustainability requirements 1.4 Develop effective mentoring and coaching processes to ensure that individuals and teams are able to implement and support the organisation's continuous improvement processes 1.5 Ensure that insights and experiences from business activities are captured and accessible through knowledge management systems
2. Monitor and adjust performance strategies	2.1 Develop strategies to ensure that systems and processes are used to monitor operational progress and to identify ways in which planning and operations could be improved 2.2 Adjust and communicate strategies to stakeholders according to organisational procedures
3. Manage opportunities for further improvement	3.1 Establish processes to ensure that team members are informed of outcomes of continuous improvement efforts 3.2 Ensure processes include recording of work team performance to assist in identifying further opportunities for improvement 3.3 Consider areas identified for further improvement when undertaking future planning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.3	• Identifies and extracts relevant information from a range of complex texts • Locates, interprets and analyses workplace documentation to gather information relating to continuous improvement
Writing	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1-3.3	• Develops complex texts related to continuous improvement processes according to organisational requirements

© Commonwealth of Australia, 2025 Skills Insight

		• Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.4, 2.2	• Presents information to a range of audiences using appropriate structure and language • Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders • Confirms understanding through questioning and active listening
Navigate the world of work	1.1-1.3, 2.1, 2.2	• Develops strategies to enable compliance with legislative requirements and achievement of the organisation's goals • Monitors adherence to organisational policies, procedures and protocols and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 1.4, 2.2	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 3.1, 3.2, 3.3	• Takes responsibility for developing, implementing and monitoring systems and processes to achieve organisational outcomes • Uses analytical and lateral thinking to review current practices and develop ideas for improvement • Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals

Assessment Requirements for BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to establish systems and processes for continuous improvement that:

- facilitate effective contributions to and communications about continuous improvement processes and outcomes
- address sustainability requirements
- incorporate mentoring, coaching and other support to enable people to participate effectively in continuous improvement processes
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how systems and procedures can support effective continuous improvement
- explain how continuous improvement systems and processes relate to other business systems and requirements including, knowledge management, quality, performance management and sustainability.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.

Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan.

This unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plan.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop operational plan	1.1 Research, analyse and document resource requirements and develop an operational plan in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Develop and/or implement consultation processes as an

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	integral part of the operational planning process 1.3 Ensure the operational plan includes key performance indicators to measure organisational performance 1.4 Develop and implement contingency plans for the operational plan 1.5 Ensure the development and presentation of proposals for resource requirements is supported by a variety of information sources and seek specialist advice as required 1.6 Obtain approval for the plan from relevant parties and explain the plan to relevant work teams
2. Plan and manage resource acquisition	2.1 Develop and implement strategies to ensure that employees are recruited and/or inducted within the organisation's human resources management policies, practices and procedures 2.2 Develop and implement strategies to ensure that physical resources and services are acquired in accordance with the organisation's policies, practices and procedures 2.3 Recognise and incorporate requirements for intellectual property rights and responsibilities in recruitment and acquisition of resources and services
3. Monitor and review operational performance	3.1 Develop, monitor and review performance systems and processes to assess progress in achieving profit and productivity plans and targets 3.2 Analyse and interpret budget and actual financial information to monitor and review profit and productivity performance 3.3 Identify areas of under-performance, recommend solutions and take prompt action to rectify the situation 3.4 Plan and implement systems to ensure that mentoring and coaching are provided to support individuals and teams to effectively, economically and safely use resources 3.5 Negotiate recommendations for variations to operational plans and gain approval from designated persons/groups 3.6 Develop and implement systems to ensure that procedures and records associated with documenting performance are managed in accordance with organisational requirements

Assessment Requirements for BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
  - resource requirements
  - key performance indicators
  - monitoring processes
  - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
  - recruiting, inducting and developing personnel
  - acquiring physical resources and services
  - protecting intellectual property
  - making variations to the plan
  - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

© Commonwealth of Australia, 2025 Skills Insight

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Evidence of the ability to:

- consult and communicate effectively with relevant stakeholders to:
  - confirm or revise the organisation's mission, vision and values
  - validate findings of research and analysis
  - get input to and endorsement of strategic plans
  - brief relevant parties about the plan
- analyse organisation's internal and external environment to formulate strategic plans including:
  - background and research relevant to the plan
  - legislation, regulations and codes of practice, including for intellectual property
  - objectives, strategies and priorities
  - roles and responsibilities
  - performance indicators
  - timeframes
  - consideration of co-operative ventures
  - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Skills Insight

- outline the legislation, regulations and codes of practice relevant to the organisation's strategic plan.
- give examples of risks and risk management strategies relevant to strategic planning including:
  - intellectual property rights and responsibilities
  - other risks
- outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
- identify internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
- outline techniques for developing organisational values.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG501 Identify and evaluate marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify, evaluate and take advantage of marketing opportunities by analysing market data, distinguishing characteristics of possible markets and assessing viability of changes to operations.

It applies to individuals working in a supervisory or management marketing or advertising role within a marketing or advertising team or media organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify marketing opportunities	1.1 Analyse information on market and business needs to identify marketing opportunities 1.2 Research potential new markets and assess opportunities to enter, shape or influence each market, and the likely contribution to the business 1.3 Explore entrepreneurial, innovative approaches and creative ideas for their potential business application, and develop into potential marketing opportunities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Investigate marketing opportunities	2.1 Identify and analyse opportunities in terms of their likely fit with organisational goals and capabilities 2.2 Evaluate each opportunity to determine its impact on current business and customer base 2.3 Use an assessment of external factors, costs, benefits, risks and opportunities to determine the financial viability of each marketing opportunity 2.4 Determine probable return on investment and potential competitors 2.5 Describe and rank marketing opportunities on their viability, and likely contribution to the business
3. Evaluate required changes to current operations	3.1 Identify and document changes needed to current operations to take advantage of viable marketing opportunities 3.2 Ensure organisational changes to service an increased or different customer base including provision for continued quality of service to existing customers 3.3 Estimate resource requirements for changed operations 3.4 Determine and communicate viability of making changes to current operations to key stakeholders 3.5 Document newly identified marketing opportunities and required changes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1	• Evaluates and comprehends textual information from a range of sources and draws own conclusions
Writing	1.1-1.3, 2.5, 3.1, 3.4, 3.5	• Integrates information from a number of sources to develop material that supports purposes of documentation using suitable grammatical structure and clear, logical language
Oral Communication	2.5, 3.4	• Presents opinions, ideas and organisational requirements clearly and creatively using language and presentation techniques appropriate to audience and

© Commonwealth of Australia, 2025 Skills Insight

		environment • Elicits views and opinions of others by listening and questioning
Numeracy	2.3, 2.4, 3.3	• Evaluates financial and marketing data using whole numbers, decimals and percentages to make accurate calculations
Navigate the world of work	2.1	• Recognises and follows explicit and implicit organisational protocols and meets expectations associated with own role
Interact with others	2.5, 3.4	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.2, 3.3, 3.4	• Develops plans to manage relatively complex tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes decisions by systematically analysing information, identifying and evaluating options against set criteria, and choosing most appropriate option • Evaluates outcomes of decisions to identify opportunities for improvement • Develops new and innovative ideas through exploration, analysis and critical thinking

Assessment Requirements for BSBMKG501 Identify and evaluate marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and evaluate marketing opportunities to determine whether they can meet organisational objectives
- document how current business operations need to be modified, and list resources required, to take advantage of newly identified and evaluated opportunities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of relevant legislation, codes of practice and national standards affecting marketing operations
- describe organisational marketing plan, structure, products and services
- explain principles of marketing and marketing mix
- describe statistical methods and techniques to evaluate marketing opportunities, including forecasting techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- organisational strategic and marketing plans
- case studies and, where possible, real situations.

BSBPMG415 Apply project risk management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with aspects of risk management in a project. It specifically involves planning for, controlling and reviewing risks associated with the project, and assisting in this process where required.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with risk analysis and planning	1.1 Contribute to identifying and prioritising potential risks throughout the project life cycle, using established risk-analysis methods, techniques and tools 1.2 Contribute to developing risk management strategies and risk management plans according to established guidelines 1.3 Contribute to developing and implementing risk-reporting mechanisms
2. Perform risk-control	2.1 Monitor risks according to agreed project and risk management

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
activities	plans and advise project manager of changing circumstances 2.2 Regularly review current and proposed activities to identify potential and actual risks and opportunities 2.3 Contribute to implementing agreed risk management approaches and amending plans to reflect the changing environment 2.4 Contribute to corrective action on risks according to risk management plan and delegated authority 2.5 Contribute to review of contingency plans on an ongoing basis and, where required, ensure tasks allocated to individuals and/or team are clarified with the project manager before implementation 2.6 Apply and monitor risk-contingency measures according to risk management plan 2.7 Identify and report opportunities in the same way as risks
3. Contribute to assessing risk management outcomes	3.1 Contribute to ongoing review of project outcomes to determine effectiveness of risk management activities by accessing project risk records and other available information 3.2 Report risk management issues and responses to others for lessons learned or application to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.4, 2.6, 3.1	• Applies appropriate strategies to construct meaning from complex texts
Writing	1.1, 1.2, 1.3, 2.7, 3.2	• Documents results of analyses using required organisational formats • Develops project documentations using structure and vocabulary appropriate to audience, context and purpose
Oral communication	1.1, 1.2, 1.3, 2.1, 2.5, 2.7, 3.2	• Participates in a range of verbal exchanges using clear language and non-verbal features to provide relevant information • Uses active listening and questioning techniques to

© Commonwealth of Australia, 2025 Skills Insight

		elicit views and opinions of others
Navigate the world of work	2.4	• Understands responsibilities of own role in terms of its contribution to broader goals of work environment
Interact with others	1.1, 1.2, 1.3, 2.1, 2.5, 2.7, 3.2	• Selects appropriate communication protocols in a range of work contexts • Collaborates and cooperates with others to achieve shared goals
Get the work done	2.1-2.6, 3.1	• Sequences and schedules required tasks and activities and manages relevant communication • Reflects on outcomes to identify opportunities for future improvement • Identifies key concepts and principles that may be adaptable to future situations

Assessment Requirements for BSBPMG415 Apply project risk management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assist others in identifying and prioritising potential risks and developing risk-management strategies, plans and reporting mechanisms
- apply, monitor and review risk-control measures, including contingency measures to mitigate risks
- evaluate, review and report on risk-management processes and make recommendations for future improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify tools to help determine potential risks for a specific project
- explain strategies for managing project risks and their application in different situations
- explain the importance of risk-contingency measures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project management documentation for risk management
- case studies and, where possible, real situations
- interaction with others.

BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project.

It applies to individuals who are project practitioners working in a project support role. The individual may be operating in a large or small organisation, and applying skills in the context of enterprise projects.

The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale, self-directed team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with procurement planning	1.1 Contribute to establishing procurement requirements to achieve project objectives 1.2 Act under delegated authority to contribute to development of

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	procurement-management plan 1.3 Contribute to developing procurement documentation
2. Contribute to supplier selection process	2.1 Gather and evaluate information on potential suppliers 2.2 Make recommendations to assist in selection of preferred suppliers 2.3 Contribute to establishing agreed terms and conditions with preferred suppliers 2.4 Identify and act in line with probity and project governance constraints 2.5 Assist in developing contractual documentation
3. Conduct procurement activities	3.1 Test and accept supplies to ensure they are fit for purpose in both quality and suitability 3.2 Undertake procurement activities and maintain information in line with reporting, confidentiality and audit requirements 3.3 Receive, reconcile and register supplies according to established procedures 3.4 Monitor and control suppliers according to contractual supply documentation
4. Assist in finalising procurement activities	4.1 Assist in finalising procurement agreements 4.2 Assist in review of project outcomes using available records to determine effectiveness of procurement activities 4.3 Contribute to identifying lessons learned and possible improvements to procurement management

Foundation Skills

Assessment Requirements for BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe procurement-management policy, processes and procedures
- explain the procurement documentation requirements
- describe the components of contractual documentation and the legal obligations of all parties
- explain the process used to select preferred contractors
- identify and describe project procurement-management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

© Commonwealth of Australia, 2025 Skills Insight

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	project and project parameters 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop project plan in line with the project parameters 2.2 Identify and access appropriate project management tools 2.3 Formulate risk management plan for project, including Work Health and Safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain required recordkeeping systems throughout the project 3.4 Implement and monitor plans for managing project finances, resources and quality 3.5 Complete and forward project reports as required to stakeholders 3.6 Undertake risk management as required to ensure project outcomes are met 3.7 Achieve project deliverables
4. Finalise project	4.1 Complete financial recordkeeping associated with project and check for accuracy 4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles 4.3 Complete project documentation and obtain necessary sign-offs for concluding project
5. Review project	5.1 Review project outcomes and processes against the project scope and plan

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	1.6, 2.4, 3.4, 4.1	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information
Oral communication	2.5, 5.2	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Navigate the world of work	1.3, 1.4, 2.3, 3.1, 4.3	• Recognises and responds to organisational and legislative/regulatory requirements
Interact with others	2.5, 3.1, 3.2, 4.2, 5.2	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Get the work done	1.2, 1.5, 1.6, 2.1, 2.2, 2.3, 2.6, 3.1-3.7, 4.1, 4.2, 4.3, 5.1, 5.3	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify

Assessment Requirements for BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Skills Insight

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality of the information, and preparing and producing reports.

It applies to individuals who are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of unpredictable problems

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather and organise information	1.1 Gather and organise information in a format suitable for analysis, interpretation and dissemination in accordance with organisational requirements 1.2 Access information held by the organisation ensuring accuracy and relevance in line with established organisational requirements 1.3 Ensure that methods of collecting information are reliable and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	make efficient use of resources in accordance with organisational requirements 1.4 Identify research requirements for combining online research with non-electronic sources of information 1.5 Use business technology to access, organise and monitor information in accordance with organisational requirements 1.6 Update, modify, maintain and store information, in accordance with organisational requirements
2. Research and analyse information	2.1 Clearly define objectives of research ensuring consistency with organisational requirements 2.2 Ensure that data and research strategies used are valid and relevant to the requirements of the research and make efficient use of available resources 2.3 Identify key words and phrases for use as part of any online search strategy, including the use of Boolean operators and other search tools 2.4 Use reliable methods of data analysis that are suitable to research purposes 2.5 Ensure that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives
3. Present information	3.1 Present recommendations and issues in an appropriate format, style and structure using suitable business technology 3.2 Structure and format reports in a clear manner that conforms to organisational requirements 3.3 Report and distribute research findings in accordance with organisational requirements 3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 1.2, 1.4, 2.1-2.5, 3.4	• Analyses and evaluates textual information to develop research strategies, integrate facts and ideas and meet organisational requirements
Writing	1.1, 1.5, 1.6, 2.1, 3.1, 3.2, 3.3	• Gathers, evaluates and integrates information from a range of sources • Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience.
Oral Communication	3.3, 3.4	• Presents recommendations and issues using language appropriate to audience and according to organisational requirements
Numeracy	1.1, 1.2, 1.3, 2.2, 2.4, 3.3	• Extracts and evaluates meaning from data and interprets numerical information to apply within the context of requirements
Navigate the world of work	1.2, 1.3, 1.5, 1.6, 2.1, 2.5, 3.2, 3.3, 3.4	• Recognises and follows organisational policies and procedures and meets expectations associated with own role
Interact with others	3.3, 3.4	• Selects and uses appropriate communication practices when seeking or sharing information
Get the work done	1.1, 1.4, 1.5, 2.2, 2.3, 2.4, 3.1	• Plans, organises and implements tasks to meet organisational requirements • Takes responsibility for the outcomes of routine decisions related directly to own role • Uses the main features and functions of digital technologies and tools to complete work tasks • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts

Assessment Requirements for BSBRES401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify or confirm research requirements and objectives
- gather, organise and present workplace information and data
- update, modify, maintain and store information
- maintain and handle data and documents systematically and securely
- prepare and produce reports including:
  - recommendations based on the analysis of information
  - clear and justified assumptions and conclusions
  - use of efficient, valid and reliable methods
- use Boolean operators and other search tools
- analyse, evaluate and interpret data to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational systems for recordkeeping/filing, including security procedures
- identify organisational policies and procedures and legal and ethical obligations relating to workplace information
- explain concepts related to research and analysis including reliability and validity
- give examples of techniques for data analysis and how they are applied
- explain research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES411 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems and sources. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality and reliability of the information, and preparing and producing reports.

It applies to individuals in roles in which they are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify reliable sources of research information	1.1 Identify potential sources for research information relevant to the organisation requirements 1.2 Assess reliability of potential sources, considering accuracy, authority, audience, relevance and likelihood of bias 1.3 Access research information and extract in a format suitable for analysis, interpretation and dissemination in accordance with

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements 1.4 Store research information, in accordance with organisational requirements
2. Analyse and synthesise research information	2.1 Clearly define objectives of research ensuring consistency with organisational requirements 2.2 Ensure that information research strategies are relevant to the requirements of the research and aligned to organisational objectives 2.3 Apply information research strategy to obtain relevant information, identifying themes and drawing conclusions in line with established objectives of research 2.4 Demonstrate that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives
3. Present research information	3.1 Identify appropriate methods of reporting, considering the intended audience and relevant organisational requirements 3.2 Report on findings in an appropriate format, style and structure within a pre-determined timeframe 3.3 Report and distribute research findings in accordance with organisational requirements 3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Analyses and evaluates textual information to develop information research strategies, integrate facts and ideas and meet organisational requirements
Writing	• Gathers, evaluates and integrates information from a range of sources • Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience
Oral	• Presents recommendations and issues using language appropriate to

© Commonwealth of Australia, 2025 Skills Insight

Communication	audience and according to organisational requirements
Navigate the world of work	• Recognises and follows organisational policies and procedures and meets expectations associated with own role
Interact with others	• Selects and uses appropriate communication practices when seeking or sharing information
Get the work done	• Plans, organises and implements tasks to meet organisational requirements • Takes responsibility for the outcomes of routine decisions related directly to own role • Uses the main features and functions of digital technologies and tools to complete work tasks • Recognises and takes responsibility for addressing foreseeable problems in familiar work contexts

Assessment Requirements for BSBRES411 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- identify research requirements and objectives
- gather, organise and present research information
- communicate effectively with research stakeholders to clarify requirements
- maintain and handle information and documents systematically and securely
- preparing reports on research findings including:
  - recommendations based on the analysis of research information
  - clear and justified assumptions and conclusions
  - use of efficient and reliable research methods
- analyse, evaluate and interpret research information to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of organisational policies and procedures relating to:
  - the access of digital information
  - the storage/transmission of information
  - legal and ethical obligations relating to workplace information
- key concepts related to research and analysis including reliability and validity
- key features of research processes and strategies to identify new sources (online and print) of information and efficient and effective use.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Construct an applied research strategy	1.1 Clarify and confirm applied research purpose and needs of the target group 1.2 Determine policies and procedures in relation to conducting applied research 1.3 Establish mechanisms for collecting and maintaining data in a

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	systematic manner 1.4 Analyse factors affecting the reliability and validity of data 1.5 Review relevant research ethics and codes of conduct 1.6 Prepare applied research strategy and hypothesis 1.7 Frame a research strategy in consideration of available tools and resources
2. Use a range of applied research techniques	2.1 Review and evaluate a range of applied research methods, theories and data collection techniques 2.2 Select appropriate methods to gather and analyse data 2.3 Use suitable technology and technology services to support data collection and analysis 2.4 Access appropriate sources of information and contributors relevant to the research 2.5 Optimise relevance of the research through integrity of the data collected and analysis tools used
3. Analyse and present findings	3.1 Evaluate how research findings such as trends and changes will impact on learning strategy 3.2 Review data and research findings for accuracy of details and adherence to any legal requirements 3.3 Collate and analyse data for relevance against the original applied research strategy 3.4 Document and present research findings in a clear and logical manner consistent with audience needs 3.5 Identify the need for and an appropriate approach to, further research

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.5	• Evaluates and reflects on the need for further research to contribute to ongoing organisational improvement

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 1.2, 1.5, 2.4, 3.1, 3.2	• Collects, analyses, compares and evaluates textual information from a range of resources to inform research strategies
Writing	1.6, 3.3, 3.4	• Develops texts dealing with complex ideas and concepts • Uses specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal, ethical and organisational requirements
Oral Communication	1.1, 3.4	• Uses specialised vocabulary appropriate to context and audience to discuss and confirm research requirements • Applies listening and questioning techniques to check or confirm understanding
Numeracy	3.2, 3.3	• Applies knowledge of mathematical information to statistically analyse data and identify possible trends and confirm reliability
Navigate the world of work	1.2, 1.5, 3.2	• Is highly autonomous, taking responsibility for determining applicable organisational policies and procedures and considering legal and ethical obligations • Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others
Interact with others	3.4	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals
Get the work done	1.1, 1.2, 1.3, 1.7, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3	• Develops plans for complex activities, regularly reviewing priorities and performance during implementation, identifying and addressing issues as they arise • Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks • Uses formal analytical thinking to make informed decisions about research strategies and techniques, seeking input, advice and feedback as required

Assessment Requirements for BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
  - specific research questions or hypotheses
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - full description of the data collection methods
  - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques

© Commonwealth of Australia, 2025 Skills Insight

- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations .

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify risks	1.1 Identify the context for risk management 1.2 Identify risks using tools, ensuring all reasonable steps have

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	been taken to identify all risks 1.3 Document identified risks in accordance with relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse and document risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes
3. Treat risks	3.1 Determine appropriate control measures for risks and assess for strengths and weaknesses 3.2 Identify control measures for all risks 3.3 Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures 3.4 Choose and implement control measures for own area of operation and/or responsibilities 3.5 Prepare and implement treatment plans
4. Monitor and review effectiveness of risk treatment/s	4.1 Regularly review implemented treatment/s against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Provide assistance to auditing risk in own area of operation 4.4 Monitor and review management of risk in own area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	• Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	1.3, 2.1, 2.3, 3.5	• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes

© Commonwealth of Australia, 2025 Skills Insight

Oral communication	2.1	• Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	1.2, 4.1	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 1.3, 3.3	• Complies with organisational and legislative requirements • Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Interact with others	2.1	• Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.3, 4.4	• Determines job sequence and works logically and systematically to undertake defined tasks • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions • Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

© Commonwealth of Australia, 2025 Skills Insight

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	• Comprehends a variety of relatively complex texts • Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	1.6, 1.8, 2.1, 2.3, 4.3	• Develops textual material and organises content in a manner that effectively documents

© Commonwealth of Australia, 2025 Skills Insight

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	• Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	2.2	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 2.1, 4.3	• Refers to organisational processes, procedures and requirements when making decisions about risk management
Interact with others	1.8, 2.1, 2.3, 4.3	• Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management • Consults and negotiates with stakeholders about risk management processes and outcomes
Get the work done	1.2, 1.3, 1.5, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 4.6	• Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication • Systematically analyses information to decide on appropriate risk management treatments • Uses digital technologies and systems to access information, document plans and communicate with others

Assessment Requirements for BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify the scope and context of the risk management process including:
  - stakeholder analysis
  - political, economic, social, legal, technological and policy context
  - current arrangements
  - objectives and critical success factors for the area included in scope
  - risks that may apply to scope
- consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes
- develop and implement an action plan to treat risks
- monitor and evaluate the action plan and risk management process
- maintain documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- outline organisational policies, procedures and processes for risk management.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSMB404 Undertake small business planning

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research and develop an integrated business plan for achieving business goals and objectives.

It applies to individuals who operate a small business that operates independently, or as part of a larger organisation. Individuals in this role interpret business information and numerical data competently.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify elements of the business plan	1.1 Identify purpose of the business plan 1.2 Identify and review essential components of the business plan 1.3 Identify and document business goals and objectives as a basis for measuring business performance

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Develop a business plan	2.1 Research resources, legal and compliance requirements, specifically in relation to work health and safety (WHS), in accordance with business goals and objectives 2.2 Research market needs, and market size and potential 2.3 Identify sources and costs of finance, from financial plan, to provide required liquidity and profitability for the business 2.4 Identify methods, from marketing strategies, to promote market exposure of the business 2.5 Identify methods or means of production or operation from production or operations plan to conform with business goals and objectives 2.6 Identify staffing requirements to effectively produce or deliver products and services 2.7 Identify, assess and prioritise internal and external risks 2.8 Identify specialist services and sources of advice, where required, and cost in accordance with available resources
3. Develop strategies for minimising risks	3.1 Identify specific interests and objectives of relevant people and seek and confirm their support of planned business direction 3.2 Identify and develop risk management strategies according to business goals and objectives, and relevant legal requirements 3.3 Develop a contingency plan to address possible areas of non-conformance with the plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.7, 3.1, 3.2	• Identifies, analyses and evaluates complex workplace documentation during planning process
Writing	1.3, 2.3-2.7, 3.1-3.3	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 3.1	• Articulates ideas and requirements clearly and

© Commonwealth of Australia, 2025 Skills Insight

Communication		creatively based on techniques appropriate to assess business performance
Numeracy	2.2, 2.3, 2.5-2.7	• Interprets numerical information to determine prospective markets, resource allocations and business profits/losses
Navigate the world of work	2.1, 3.2	• Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	3.1	• Looks for strengths in others, finding ways of working with and building on these and sharing own knowledge and experience freely
Get the work done	1.1, 1.2, 2.1-2.7, 3.2, 3.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and to evaluate alternative strategies • Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Identifies concepts, principles and features of approaches in use in other contexts, and redesigns these to suit own situation • Uses formal and informal processes to monitor implementation of solutions and reflect on outcomes

Assessment Requirements for BSBSMB404 Undertake small business planning

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a business plan which provides for finance, marketing and provision of products or services to facilitate all business goals and objectives
- identify and plan all work health and safety (WHS) and duty of care responsibilities
- identify and assess internal and external risks to the business
- develop risk management strategies including a contingency plan for non-conformance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to business operation, especially in regard to WHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- explain methods of evaluation
- summarise WHS responsibilities and procedures for identifying hazards relevant to the business
- outline planning processes
- describe preparation of a business plan
- identify principles of risk management relevant to small business planning
- outline common risks particular to the small business type or industry
- explain reasons for, and benefits of, business planning

© Commonwealth of Australia, 2025 Skills Insight

- clarify relevant industry codes of practice
- outline setting goals and objectives
- explain types of business planning – feasibility studies; strategic, operational, financial and marketing planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB421 Manage small business finances

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to implement and review financial management strategies on a regular basis, including by using new and emerging digital technologies.

It applies to individuals who operate a small business that stands alone, or that is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement financial strategy	1.1 Identify financial information requirements and obtain specialist services, as required, to profitably operate the business 1.2 Produce financial budgets or projections, including cash flow estimates, as required for each forward period, and distribute to relevant people in accordance with legal requirements 1.3 Negotiate, secure and manage business capital to best enable implementation of the business plan

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements 1.5 Develop, monitor and maintain client credit policies, including contingencies for debtors in default, to maximise cash flow 1.6 Select key performance indicators to enable ongoing monitoring of financial performance in line with the business plan 1.7 Record and communicate financial procedures to relevant personnel to facilitate implementation of the business plan
2. Monitor financial performance	2.1 Use available digital technologies to regularly monitor and report on financial performance targets, and analyse data to establish extent to which the financial goals have been met 2.2 Monitor marketing and operational strategies for their effects on the financial goals 2.3 Calculate and evaluate financial ratios according to own or industry benchmarks 2.4 Assess financial plan to determine whether variations or alternative plans are needed, and change as required 2.5 Undertake research regularly to identify opportunities to implement new and emerging technologies to boost business profitability in accordance with the business plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding • Participates in verbal negotiations using tone and language suitable to audience
Numeracy	• Interprets numerical information to calculate all relevant financial information

© Commonwealth of Australia, 2025 Skills Insight

Navigate the world of work	• Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes

Assessment Requirements for BSBSMB421 Manage small business finances

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- manage the business according to financial goals, including:
  - adhering to legal requirements
  - produce relevant financial projections, including cash flow estimates
  - secure and manage business capital
  - defining strategies for debt collection and contingencies for debtors
  - managing cash flow
  - defining key performance indicators
  - communicating with relevant people
  - seeking specialist services where required
- monitor the business against financial plan and make changes as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of benchmarking
- Key features of financial decision-making relevant to the business
- Key features of significant financial indicators
- Key purposes of financial reports
- Key features of balance sheet preparation and interpretation

© Commonwealth of Australia, 2025 Skills Insight

- Key features of debt collection procedures or strategies
- Key features of profit and loss statement preparation and interpretation
- Key features of stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources, including business technology
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and implement a workplace sustainability policy and to modify the policy to suit changed circumstances.

It applies to individuals with managerial responsibilities who undertake work developing approaches to create, monitor and improve strategies and policies within workplaces and engage with a range of relevant stakeholders and specialists.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop workplace sustainability policy	1.1 Define scope of sustainability policy 1.2 Gather information from a range of sources to plan and develop policy 1.3 Identify and consult stakeholders as a key component of the policy development process 1.4 Include appropriate strategies in policy at all stages of work for

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	minimising resource use, reducing toxic material and hazardous chemical use and employing life cycle management approaches 1.5 Make recommendations for policy options based on likely effectiveness, timeframes and cost 1.6 Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 1.7 Agree to appropriate methods of implementation, outcomes and performance indicators
2. Communicate workplace sustainability policy	2.1 Promote workplace sustainability policy, including its expected outcome, to key stakeholders 2.2 Inform those involved in implementing the policy about expected outcomes, activities to be undertaken and assigned responsibilities
3. Implement workplace sustainability policy	3.1 Develop and communicate procedures to help implement workplace sustainability policy 3.2 Implement strategies for continuous improvement in resource efficiency 3.3 Establish and assign responsibility for recording systems to track continuous improvements in sustainability approaches
4. Review workplace sustainability policy implementation	4.1 Document outcomes and provide feedback to key personnel and stakeholders 4.2 Investigate successes or otherwise of policy 4.3 Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance 4.4 Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 1.2, 4.2, 4.3	• Identifies, analyses and evaluates complex textual information to determine legislative and regulatory requirements, trends and outcomes
Writing	1.2-1.7, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3, 4.4	• Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience
Oral Communication	1.2, 1.3, 2.1, 2.2, 3.1, 4.1	• Presents information and seeks advice using language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 4.3	• Interprets and uses mathematical equations to calculate numerical information relating to time durations and costs
Navigate the world of work	1.1-1.6, 3.1, 4.4	• Develops, monitors and modifies organisational policies and procedures in accordance with legislative requirements and organisation goals
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Plays a lead role in consulting and negotiating positive outcomes with a range of stakeholders
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	• Plans, organises and implements work activities of self and others that ensure compliance with organisational policies and procedures, and legislative requirements • Sequences and schedules complex activities, monitors implementation, and manages relevant communication • Uses systematic, analytical processes in relatively complex, situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum:
  - minimising resource use
  - resource efficiency
  - reducing toxic material and hazardous chemical use
  - employing life cycle management approaches
  - continuous improvement
- plan and implement sustainability policy and procedures including:
  - agreed outcomes
  - performance indicators
  - activities to be undertaken
  - assigned responsibilities
  - record keeping, review and improvement processes
- consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement
- review and improve sustainability policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy

© Commonwealth of Australia, 2025 Skills Insight

- explain policy development processes and practices
- outline organisational systems and procedures that relate to sustainability
- outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS503 Contribute to the systematic management of WHS risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the systematic management of work health and safety (WHS) risk.

It applies to individuals who provide specialised knowledge, systematic approaches and guidance to a range of personnel.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Access information and data to contribute to the	1.1 Identify sources of information and data 1.2 Obtain information and data to determine the purposes,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
systematic management of WHS risk	objectives, principles and framework of a systematic approach to managing WHS risk
2 Contribute to effective consultation and participation during all stages of risk management	2.1 Identify individuals and parties who need to participate and be consulted 2.2 Apply knowledge of effective consultation and participation to contribute to ensuring effective consultation and participation processes occur
3 Contribute to establishing the context for risk management	3.1 Apply knowledge of WHS legislation to identify duty holders and legislative requirements for WHS risk management 3.2 Identify individuals and parties impacting on risk management 3.3 Apply knowledge of organisation to identify factors that will impact on risk control 3.4 Contribute to establishing the context of the risk management process 3.5 Contribute to defining risk criteria
4 Contribute to risk assessment	4.1 Apply knowledge of workplace hazards and risks to contribute to risk identification 4.2 Apply knowledge of WHS legislation, risk assessment and workplace WHS information and data to contribute to risk analysis and evaluation
5 Contribute to risk treatment	5.1 Apply knowledge of WHS hazard and risk control, and WHS legislation to contribute to the selection of risk treatment options 5.2 Apply knowledge of the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to prepare and implement risk treatment/s
6 Contribute to monitoring, reviewing and recording risk management process	6.1 Apply knowledge of the organisation's WHSMS to contribute to monitoring and reviewing risk management processes 6.2 Apply knowledge of the organisation's WHSIS to contribute to recording risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1,	• Organises, evaluates and integrates information from a range of sources to determine requirements
Writing	2.2, 3.4, 3.5, 4.2, 5.2, 6.2	• Records results of investigations using clear and comprehensible language and layout • Creates a range of formal texts using industry language appropriate to audience and environment
Oral Communication	2.2, 3.4, 3.5, 4.2	• Uses listening and questioning techniques to clarify understanding and elicit the views of others • Presents information varying level of technical vocabulary to suit audience
Numeracy	1.1, 4.1, 4.2, 6.1, 6.2	• Collates, interprets and compares numerical and statistical information relevant to requirements
Navigate the world of work	3.1, 4.2, 5.1, 5.2, 6.1, 6.2	• Considers legal and regulatory responsibilities when implementing, monitoring or reviewing risk management processes
Interact with others	2.2, 3.4, 3.5, 4.2	• Identifies and uses appropriate conventions and protocols when communicating with others • Plays a lead role in situations requiring effective collaboration skills demonstrating the ability to guide discussions and negotiate outcomes
Get the work done	1.1, 1.2, 2.1, 3.1-3.3, 4.1, 4.2, 5.1, 5.2, 6.1, 6.2	• Develops plans or processes to manage relatively complex risk management tasks, with an awareness of how they contribute to operational and strategic goals • Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Applies problem solving processes to determine solutions to risk management issues • Uses analytical and lateral thinking to review practices and suggest improvements • Uses a range of digitally based technology and applications to access, organise and share relevant information in effective ways

Assessment Requirements for BSBWHS503 Contribute to the systematic management of WHS risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify, interpret and apply information from a range of sources to contribute to the development, implementation, monitoring and evaluation of a systematic approach to work health and safety (WHS) risk management
- apply WHS Acts, regulations codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks
- identify duty holders
- explain the differences between a hazard and a risk and identify hazards and risks in the organisation
- prepare an action plan to implement a systematic approach to WHS risk management
- prepare positive performance indicators for evaluation of a systematic approach to WHS risk management
- consult effectively with relevant stakeholders.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formal and informal communication and consultation processes, and key personnel related to communication, including duty holders
- explain how the characteristics and composition of the workforce impact on WHS risk and the management of WHS with reference to:
  - communication skills
  - cultural background/diversity
  - gender
  - labour market changes

© Commonwealth of Australia, 2025 Skills Insight

    - language, literacy and numeracy
    - structure and organisation of the workforce, for example part time, casual and contract workers, shift rosters, geographical location
    - workers with specific needs and limitations
    - workplace culture towards alcohol and other drug use
- describe internal and external sources of WHS information and data, and explain how to access these sources
- outline the limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- describe the nature of workplace processes including work flow, planning and control and hazards relevant to the workplace
- describe organisational behaviour and culture as it impacts on WHS, change and the work team
- describe the key features of organisational WHS policies, procedures, processes and systems
- identify other functional areas in the organisation that impact on the management of WHS
- outline the key features of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material
- describe the key principles and/or practices of:
    - a systematic approach to managing WHS
    - duty of care including concepts of causation, foreseeability and prevention
    - incident causation and injury processes
- describe risk analysis and assessment techniques and tools, and their application and limitations
- explain risk, as the effect of uncertainty, on objectives
- explain the duty of persons conducting businesses or undertakings (PCBUs) in regard to risk management under WHS legislation
- describe the sources of occupational disease and their prevention
- describe standard industry controls for hazards
- describe techniques, tools and processes for identifying and controlling health and safety hazards and risks including :
    - hazard and risk checklists
    - hazard hunts
    - job safety analysis
    - manifests and registers including dangerous goods, hazardous chemicals and plant
    - safe work method statements
    - surveys using questionnaires, interviews and other survey techniques
    - workplace inspections and walk throughs
- describe the key features of the toxicology of hazardous chemicals and potential health effects in the workplace.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant WHS legislation, standards, codes of practice and guidelines
- workplace policies and procedures and documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select and use computer software and organise electronic information and data.

It applies to individuals who apply a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and use technology	1.1 Select appropriate technology and software applications to achieve requirements of the task 1.2 Adjust workspace, furniture and equipment to suit user's ergonomic requirements 1.3 Use technology according to organisational requirements and in a way that promotes a safe work environment
2. Process and organise	2.1 Identify, open, generate or amend files and records according

Assessment Requirements for BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select and use technology safely and according to organisational requirements
- access, retrieve and store required data
- demonstrate basic maintenance on a range of equipment using manuals or help-files
- identify and address faults according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisation's work health and safety requirements
- outline the organisation's requirements for file naming and storage
- explain why regular back-ups of data are done
- list 'routine maintenance' tasks
- summarise the procedure for addressing equipment faults.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- electronic files and data
- workplace documentation and equipment manuals
- case studies and, where possible, real situations

BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

This unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise and complete own work schedule	1.1 Ensure that work goals, objectives or Key Performance Indicators (KPIs) are understood, negotiated and agreed in accordance with organisational requirements 1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes 1.3 Identify factors affecting the achievement of work objectives and incorporate contingencies into work plans 1.4 Use business technology efficiently and effectively to manage

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	and monitor scheduling and completion of tasks
2. Monitor own work performance	2.1 Accurately monitor and adjust personal work performance through self assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs 2.2 Ensure that feedback on performance is actively sought and evaluated from colleagues and clients in the context of individual and group requirements 2.3 Routinely identify and report on variations in the quality of and products and services according to organisational requirements 2.4 Identify signs of stress and effects on personal wellbeing 2.5 Identify sources of stress and access appropriate supports and resolution strategies
3. Co-ordinate personal skill development and learning	3.1 Identify personal learning and professional development needs and skill gaps using self assessment and advice from colleagues and clients in relation to role and organisational requirements 3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel 3.3 Access, complete and record professional development opportunities to facilitate continuous learning and career development 3.4 Incorporate formal and informal feedback into review of further learning needs

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1-3.4	• Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences
Reading	1.1, 1.2, 2.1	• Interprets textual information to determine organisation's procedures, own work performance and objectives

© Commonwealth of Australia, 2025 Skills Insight

Writing	1.3, 1.4, 2.3, 3.1, 3.2, 3.3	• Prepares written reports and workplace documents that communicate information clearly and effectively
Oral Communication	2.2, 2.3, 3.1, 3.2	• Clearly gives and receives feedback using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.3	• Understands responsibilities and scope of role and complies with organisational policies, procedures and protocols
Interact with others	1.1, 2.2, 2.3, 3.1, 3.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Fosters and nurtures a culture of constructive and respectful feedback • Proactively collaborates with others to achieve specific goals
Get the work done	1.2, 1.3, 1.4, 2.4, 2.5, 3.2	• Plans and organises work commitments to ensure deadlines and objectives are met • Uses formal analytical thinking techniques to recognise and respond to routine problems • Uses digital systems and tools to enter, store and monitor information

Assessment Requirements for BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives 2.2 Use technology efficiently and effectively to manage work priorities and commitments 2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to
3. Develop and maintain professional competence	3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans 3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence 3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence 3.4 Participate in networks to enhance personal knowledge, skills and work relationships 3.5 Identify and develop new skills to achieve and maintain a competitive edge

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	• Investigates and uses a range of strategies to develop personal competence
Reading	1.2, 3.1, 3.2	• Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning
Writing	3.2	• Uses feedback to prepare reports that summarise ways to improve competence
Oral Communication	3.2	• Uses active listening and questioning to seek and receive feedback
Navigate the world of work	1.2, 2.1	• Understands how own role contributes to broader organisational goals • Considers organisational protocols when planning own career development

© Commonwealth of Australia, 2025 Skills Insight

Interact with others	1.1, 3.2, 3.4	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to establish and build positive working relationships with others
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1	• Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare • Identifies and uses appropriate technology to improve work efficiency

Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - a personal development plan
  - personal goal setting
  - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation’s policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish team performance plan	1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives 1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team 2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2 Support the team in identifying and resolving work performance problems 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders
4. Liaise with stakeholders	4.1 Establish and maintain open communication processes with all stakeholders 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 4.4	• Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.1, 2.3, 3.1, 4.1, 4.2, 4.3	• Engages in discussions or provides information using appropriate vocabulary and non-verbal features • Uses listening and questioning techniques to confirm understanding and to engage the audience
Navigate the world of work	1.1, 2.1, 2.2, 3.3	• Understands how own role contributes to broader organisational goals • Modifies or develops policies and procedures to achieve organisational goals
Interact with others	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2, 4.3	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to gain trust and confidence of team and provides feedback to others in forms that they can understand and use • Adapts personal communication style to build positive working relationships and to show respect for the opinions, values and particular needs of others • Plays a lead role in situations requiring effective collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others
Get the work done	1.2, 2.1, 2.2, 2.4, 3.2, 4.1, 4.3, 4.4	• Develops, implements and monitors plans and processes to ensure team effectiveness • Monitors and actively supports processes and development activities to ensure the team is focused on work outcomes • Plans for unexpected outcomes and implements creative responses to overcome challenges

Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
  - encouraging and fostering shared understanding of purpose, roles and responsibilities
  - identifying and resolving problems
  - providing feedback to encourage, value and reward others
  - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

© Commonwealth of Australia, 2025 Skills Insight

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWRK506A Coordinate research and analysis

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to coordinate and undertake major research projects on behalf of the union. It covers planning research, coordinating and undertaking the research process, managing information systems, compiling reports and evaluating the research process. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals with a well established, sound theoretical knowledge base in unionism and industrial relations who provide leadership to members and staff in the union workplace. They carry high levels of responsibility and work at a senior level in the organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and implement a project plan to undertake research activities	1.1. Define and agree ***research project*** objectives and timeframes 1.2. Plan research process and implement in accordance with union policies and procedures 1.3. Ensure agreed project phases, approval and review points are implemented to accommodate all project management function requirements 1.4. Evaluate research process and report in relation to established project baselines to provide appropriate measures of performance
2. Coordinate and undertake the research process	2.1. Define information needs based on work objectives and organisational requirements 2.2. Identify and allocate appropriate resources 2.3. Allocate tasks to identified staff and gain support for the project 2.4. Develop ***strategies*** to acquire required information 2.5. Communicate the methods and aims of the research clearly 2.6. Research information in a timely and thorough way and within resource allocation 2.7. Monitor progress of research project and adjust to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	respond to internal and external factors
3. Analyse information and apply the results of analysis	3.1. Ensure ***specialist data and information*** is collected, consolidated and analysed to recommend outcomes and to advise trends to senior staff 3.2. Develop appropriate analytical techniques and processes, and apply to information in order to achieve defined objectives and meet requirements 3.3. Analyse information to identify facts, issues, patterns, interrelationships and trends 3.4. Undertake all work in a timely manner and meet defined standards of the union
4. Manage information systems	4.1. Maintain ***information systems*** so that data and system integrity is guaranteed 4.2. Maintain a range of standard and complex information systems and applications in accordance with organisational standards 4.3. Integrate information in a timely and coherent manner
5. Compile reports from information analysis	5.1. Use the findings from the analysis to provide advice and to develop policies and solutions which meet organisational requirements 5.2. Ensure reporting of results from analysis of information includes predictions, assumptions and constraints 5.3. Ensure reporting of results and analysis of information is logically sequenced, concise and clear
6. Evaluate the research process	6.1. Identify and communicate criteria for evaluating the effectiveness of research project and phases 6.2. Implement and monitor key measurements to evaluate the effectiveness of research processes 6.3. Debrief all staff involved in research project on progress and outcomes 6.4. Use appropriate strategies to ensure project outcomes are used effectively

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• high level research and analytical skills • project management skills • technology skills to store data and to manage information • well developed writing skills.
Required knowledge
• regional, national and international legislation and regulations relating to industrial relations, occupational health and safety (OHS), vocational education and training, equal opportunity and discrimination, trade practices • industry knowledge • union policies and procedures.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • documented research project plan, with research objectives, and the outcomes of the research project which meet the stated objectives • examples of how information and data in the union is effectively gathered and managed • knowledge of the industry/s involved in the research.
Context of and specific resources for assessment	Assessment must ensure: • access to a range of research documentation • access to systems for gathering and storing data and information.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of agreedresearch project objectives and timeframes • oral or written questioning to assess knowledge of union policies and procedures • assessment of written reports • review of strategies developed to acquire required information • evaluation of how the methods and aims of the research were communicated.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other workplace relations units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Research projects could involve:	• analysis of industry specific trends, statistics and issues • comparative national and international developments • information and analysis needed to develop a campaign, strategic plan, industry or sector plan and strategy, or to bargain effectively with employers • information and analysis to conduct a strategic comprehensive corporate or community campaign
Strategies could include:	• commissioned research • computer- or web-based research

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• establishing expert or pre-eminent opinions • joint/collaborative work with academics, economists, social researchers, political parties, international agencies and industry groups • use of focus groups, polls and surveys
Specialist data and information could include:	• information for a specific cultural or gender perspective • information, research and data in relation to corporations and inter-related bodies and connections within an industry and the economy • labour market, industry and employment statistics and related research • OHS statistics and related research • political and community polling around specific policy issues • vocational education and training statistics and related research
Information systems may involve:	• databases and the use of spreadsheets, graphs, trend and time series, and mathematical equations

BSBWRT401 Write complex documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan documents, draft text, prepare final text and produce documents of some complexity.

It applies to individuals who work in a range of business environments and are skilled in the creation of reports, information and general promotion documents that are more complex than basic correspondence, memos or forms and that require review and analysis of a range of information sources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Writing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan documents	1.1 Determine the purposes of documents 1.2 Choose appropriate formats for documents 1.3 Establish means of communication 1.4 Determine requirements of documents 1.5 Determine categories and logical sequences of data, information and knowledge to achieve document objectives

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.6 Develop overview of structure and content of documents
2 Draft text	2.1 Review and organise available data, information and knowledge according to proposed structure and content 2.2 Ensure data, information and knowledge is aggregated, interpreted and summarised to prepare text that satisfies document purposes and objectives 2.3 Include graphics as appropriate 2.4 Identify gaps in required data and information, and collect additional material from relevant enterprise personnel 2.5 Draft text according to document requirements and genre 2.6 Use language appropriate to the audience
3 Prepare final text	3.1 Review draft text to ensure document objectives are achieved and requirements are met 3.2 Check grammar, spelling and style for accuracy and punctuation 3.3 Ensure draft text is approved by relevant enterprise personnel 3.4 Incorporate revisions in final copy
4 Produce document	4.1 Choose basic design elements for documents appropriate to audience and purpose 4.2 Use word processing software to apply basic design elements to text 4.3 Check documents to ensure all requirements are met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.4, 3.1, 3.2, 4.3	• Interprets information to identify requirements and prepares material suitable to target audience and environment • Proofreads texts for accuracy
Writing	1.6, 2.2, 2.3, 2.5,	• Creates documents for a specific audience using cohesive and well-structured language to convey

© Commonwealth of Australia, 2025 Skills Insight

	2.6, 3.2, 3.4, 4.1	detailed and accurate information • Ensures vocabulary, layout and grammatical arrangement achieves meaning and intent of document
Oral Communication	1.1, 1.4, 2.4, 3.3	• Obtains information or clarifies requirements by asking questions and listening
Navigate the world of work	1.4, 4.3	• Adheres to organisational policies and procedures related to document production
Interact with others	1.1, 1.4, 1.5, 2.4, 3.3	• Follows accepted communication practices and protocols when seeking advice about documents from colleagues, supervisors and managers
Get the work done	1.1-1.6, 2.1-2.5, 3.3, 4.1-4.2	• Plans, organises and implements tasks required to produce documents • Makes decisions based on standard procedures, using more formal decision making processes where required • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBWRT401 Write complex documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, draft and finalise complex documents that require review and analysis of a range of information sources
- use business technology to apply formatting, and incorporate graphics
- edit the draft text to ensure accuracy and clarity of information, obtain feedback on the draft and revise the draft
- apply the enterprise style guide/house style.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the enterprise style guide/house style
- outline formatting styles and their impact on formatting, readability and appearance of documents
- explain rules and conventions for written English, as defined by general and specialist sources.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources
- organisational policies and procedures
- organisational style guides.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy NVR/AQTF assessor requirements.

CPCCBC4001A Apply building codes and standards to the construction process for low rise building projects

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to access, interpret and apply relevant building codes and standards applicable to the construction processes of residential and low rise commercial buildings (low rise' licensing classification with reference to Class 1 and 10 construction and Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

To successfully construct low rise buildings requires a thorough knowledge of the purpose and content of the Building Code of Australia (BCA), coupled with the ability to interpret other codes and standards related to a specific building.

Application of the Unit

Application of the unit

This unit of competency supports builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards in the residential and commercial construction industry.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and interpret relevant code and standard requirements.	1.1. Relevant performance requirements from the BCA that apply to individual projects (described as ***low rise***) are identified. 1.2. Requirements of relevant BCA deemed-to-satisfy (DTS) provisions are determined. 1.3. Requirements of relevant Australian standards referenced in the BCA are accessed and interpreted accordingly.
2. Classify buildings.	2.1. Nature of a building is determined according to its use and arrangement. 2.2. BCA criteria to determine the defined classification are applied. 2.3. BCA requirements for multiple classification are identified and interpreted.
3. Analyse and apply a range of solutions to a construction problem for compliance with the	3.1. Range of criteria that will ensure that construction methods comply with BCA performance requirements is determined. 3.2. Alternative solutions to a design or construction problem that will comply with BCA requirements are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
BCA.	discussed and proposed in accordance with company policies and procedures. 3.3. Performance-based solutions are identified and documented in accordance with BCA requirements. 3.4. ***Assessment methods*** referenced in the BCA to determine whether a building solution complies with ***performance requirements*** or DTS provision of the BCA are analysed and applied. 3.5. Relevant documentation is identified and completed in accordance with BCA requirements.
4. Apply fire protection requirements.	4.1. Passive and active fire control elements for low rise building required by the BCA and other legislation are identified and applied. 4.2. Level of fire resistance required for the construction of various low rise buildings is determined. 4.3. Check of existing buildings for compliance with passive and active fire protection requirements is carried out in accordance with BCA requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- analysis and interpretation skills relating to documentation from a wide range of sources, including BCA and referenced documents
- application of design concepts and principles in accordance with BCA, namely:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction
- attention to detail in applying building codes and standards
- communication skills to:
  - discuss and propose alternative solutions
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- read and interpret:
  - documentation from a variety of sources, including BCA and referenced documents
  - drawings and specifications
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- written skills to complete documentation in accordance with BCA requirements
- numeracy skills to interpret and apply mathematical information included in building codes and standards.

Required knowledge

Required knowledge for this unit is:

- basic design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- BCA performance hierarchy
- definitions and common technical terms or usage specified under general provisions of BCA
- general nature of materials and the effects of performance
- relevant Australian standards
- relevant legislative and OHS requirements, codes and practices
- types of working drawings and specifications
- understanding of the BCA relating to:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by the application of design principles and solutions specified in BCA performance requirements or DTS provisions applicable to a building project. This unit of competency can be assessed in the

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with organisational quality procedures and processes • apply and interpret relevant documentation and codes • accurately apply BCA performance requirements relating to the design and construction of a building • understand assessment methods available to determine compliance with the BCA • identify faults and problems and proposed action to rectify.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • access to BCA and relevant documents referenced in the BCA • access to relevant legislation • project documentation, including design brief, design drawings, specifications, construction schedules and other supporting documents • research resources, including product information and data • relevant computer software package and suitable hardware. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to

EVIDENCE GUIDE

modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing

	supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Low rise is described as falling within the BCA classes:	• Class 1 and 10 • Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.
Assessment methods include:	• comparison with BCA DTS provisions • evidence of suitability as described in the BCA • expert judgement as defined in the BCA • verification method as defined in the BCA.
Performance requirements include:	• performance requirements contained within other legislation applicable to a specific project • performance requirements of the BCA determined to be relevant to a specific project • performance-based contractual requirements that must be fulfilled by any party.

CPCCBC4004A Identify and produce estimated costs for building and construction projects

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to establish the estimated costs associated with the acquisition of materials and labour on building and construction sites, together with the application of relevant overhead costs and margins. Knowledge of physical resource and supplier identification, assessment of the availability of and requirements for skilled labour and application of appropriate codes, regulations and approvals gaining processes is essential.

Application of the Unit

Application of the unit This unit of competency supports the needs of estimators, builders, managers and trade contractors within the construction industry responsible for producing estimated costs for labour, materials, overheads and on-costs on various residential and commercial construction projects within their scope of work as a trade contractor or builder.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Read and interpret plans and specifications.	1.1. Appropriate plans and drawings are correctly identified. 1.2. Project ***plans and specifications*** are read and understood. 1.3. Levels, heights, gradients and other measurements are interpreted. 1.4. Measurements are made and quantities identified from plans and specifications that conform to standard industry practice.
2. Identify and calculate labour costs.	2.1. Types and numbers of appropriate on-site personnel are identified and the time required on site is estimated. 2.2. Labour hours for non-contract elements of on-site work are calculated. 2.3. Costs or rates for required on-site work are calculated.
3. Identify and establish physical resource requirements.	3.1. Physical resource requirements are identified. 3.2. Lists of materials are produced and quantities calculated. 3.3. Quantities are established against project or standard construction contracts. 3.4. Supplier prices for materials and consumables are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	obtained. 3.5. Plant or equipment requirements are identified and costed.
4. Develop estimated project costs.	4.1. Appropriate labour rates and material costs are selected and applied. 4.2. Estimates of ***unit costs*** are determined and applied as appropriate. 4.3. Costs to the project of WorkCover, Environmental Protection Agency (EPA) requirements, seeking approvals, waste management site fees and other statutory or additional costs are identified and applied. 4.4. Company overhead recovery and margins are applied. 4.5. Completed estimated ***project costs*** are calculated for inclusion in a tender or bill.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret drawings and specifications
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- contractual arrangement problem solving
- estimate labour and materials costs from written information
- numeracy skills to calculate labour hours and costs, material quantities and costs
- use appropriate costing software programs.

Required knowledge

Required knowledge for this unit is:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- how to access and interpret:
  - national codes, including Building Code of Australia (BCA) and the Plumbing Code of Australia
  - Australian standards relevant to the industry sector
- includes state or territory and local government building and construction codes, standards and government regulations relevant to the form of building or construction being undertaken (e.g. WorkCover and EPA)
- types of building and construction drawings and specifications
- types, scope and usage of labour through the employee and subcontractor systems
- operation and structure of the organisation's costing and contracting system.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by the preparation of a detailed estimate of labour, materials and other project costs as part of the preparation of a tender or bill for a residential or commercial construction project relevant to the specific trade or sector. This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify materials required for a project • gather information about material supply • interpret measurements and calculate quantities and costs

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	• plan and allocate human resources • identify and cost other related costs, such as those required to meet statutory and planning approval processes • produce documentation that meets the timeframes and quality standards established by the organisation • communicate effectively, both verbally and in writing.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • documentation that should normally be available in either a building or construction office • relevant codes, standards and government regulations • office equipment, including calculators, photocopiers and telephone systems • computers with appropriate software to view 2-D CAD drawings, run costing programs and print copies • a technical reference library with current publications on measurement, design, building construction and manufacturers' product literature • a suitable work area appropriate to the construction process. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Plans and specifications include:

- building codes
- materials lists and quantity schedules
- materials specifications
- sketches or drawings
- statements of requirements.

Plant or equipment requirements include:

- communications equipment
- conveyors
- heavy equipment, such as wheeled and tracked earthmoving equipment, trucks and articulated vehicles
- hoists
- mobile and tower cranes
- on-site equipment, such as:
  - compressors
  - pumps
  - generators
  - portable lighting
  - lifting equipment
  - portable compaction equipment.

Unit costs may include the cost of:

- construction cost per square metre
- installation of pipes per metre
- installation of sanitary ware per unit
- laying of foundation per metre
- laying of slabs per square metre
- laying of steel tray roofing per square metre
- masonry walls per square metre
- painting per square metre
- tiling per square metre.

Project costs include:

- building or construction materials
- communications costs
- cost of meeting statutory requirements, e.g. EPA

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

- fuels, lubricants and consumables
- organisational and subcontract labour hours
- overheads
- project administration costs
- site facilities, such as:
  - offices
  - toilets
  - lunch rooms
- waste removal fees.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and apply all contract conditions to the schedules.	1.1. All contractual requirements are included in the schedules. 1.2. ***Local government and regulatory bodies*** ' conditions of approval are included in the schedules. 1.3. Schedules include colour selections. 1.4. Variations to contracts, raised by the client or the builder, are included in the schedules.
2. Produce material and labour schedules, overlays and orders.	2.1. Nominated suppliers and contractors are detailed in work schedules. 2.2. Relevant overlay drawings are produced. 2.3. Orders include contract details and instructions. 2.4. Contract rates are applied to material and labour schedules.
3. Prepare site files.	3.1. All necessary site documents are included, including approved ***plans and specifications***. 3.2. Call forward sheets are prepared detailing all orders.
4. Monitor and report on project costs.	4.1. ***Project costs*** are analysed against estimates during construction. 4.2. Approved variation costs are analysed. 4.3. Final project cost analysis is provided.
5. Maintain data files of	5.1. Approved variation cost increases are incorporated

standard costs.	into site files. 5.2. Changes to standard plans, specifications and cost files are included in site files.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - communicate information effectively within the organisation and to external agencies and the client
  - read and interpret:
    - contracts
    - drawings and specifications
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - written skills to:
    - prepare and maintain site files
    - produce schedules and orders
- identify and analyse relevant information
- numeracy skills to apply calculations.

Required knowledge

Required knowledge for this unit is:

- operation and structure of the organisation's costing and contracting system
- state or territory building and construction codes, standards and regulations relevant to the form of building or construction being undertaken
- types of building or construction drawings and specifications commonly used in the industry
- types, scope and usage of labour through the employee and contractor systems.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and implement dispute resolution procedures.	1.1. Established business ***dispute resolution procedures*** are reviewed and implemented as appropriate. 1.2. Business dispute resolution procedures are developed where required and documented, and agreement to procedures is secured from all parties. 1.3. Recording procedures are established and provision for record keeping is made. 1.4. External arbitrators or conciliators are identified for consultation when disputes cannot be resolved internally.
2. Conduct an initial investigation into business disputes and possible resolution strategies.	2.1. Nature and ***cause of business disputes*** are identified and documented. 2.2. Parties to dispute are identified and approached individually, and the issues are clarified and documented. 2.3. Solutions based on an examination of the information collected and with reference to contractual arrangements are suggested.
3. Identify opportunities for dispute resolution.	3.1. Efforts are made to bring the disputing parties together. 3.2. Where necessary, external arbiters or conciliators are consulted. 3.3. Relevant statutory laws are identified, applied and followed. 3.4. Disputes are resolved in accordance with common law.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - communicate by telephone
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - research and evaluate information and circumstances surrounding a business dispute
  - read and interpret relevant legislation
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
  - written skills to:
    - complete checklists
    - send emails and faxes
    - write memos and reports
- negotiation relevant to dispute resolution situations
- problem solving in the context of dispute resolution
- research and evaluate information and circumstances surrounding a business dispute.

Required knowledge

Required knowledge for this unit is:

- contractual and business frameworks underpinning the building and construction industry
- mores, values and attitudes of various groups in the community that should be accounted for in discussions
- possible reactions from persons under pressure, such as anger and withdrawal.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by developing a set of dispute resolution procedures and demonstrating how these would apply to a selection of disputes.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- identify the nature of the dispute and the identity of the parties to the dispute
- document the details of the dispute in sufficient terms for an unambiguous evaluation of the issues to occur
- identify and follow established dispute resolution procedures
- develop and implement dispute resolution procedures, where there are none established.
- understand need to remain completely impartial in any involvement in a dispute.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in either a building, construction or civil contracting office

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- relevant codes, standards and government regulations
- suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Dispute resolution procedures include:

- arbitrated decisions
- common law outcomes
- litigated decisions
- mutual resolution
- on-site negotiations
- reference to contractual obligations.

Cause of business disputes includes:

- contract payment issues
- different opinions about design, structural layout or dimensions
- dissatisfaction with project progress
- structural finish, quality, materials or construction methodology.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions and operational details are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation*** purposes. 1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies. 1.3. Signage and barricade requirements are identified and implemented. 1.4. ***Tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. 1.5. Material quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***. 1.6. ***Materials*** appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use. 1.7. ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2. Manually handle, sort and stack carpentry materials and components.	2.1. Carpentry materials for ***handling*** are moved to specified location, applying safe manual handling techniques. 2.2. Carpentry materials and components are sorted to suit material type and size, stacked for ease of identification and retrieval and for task sequence and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	job location in accordance with job specifications. 2.3. Carpentry materials and components are ***protected*** against physical and water damage and stored clear of access ways, and for ease of identification, retrieval and distribution.
3. Prepare for mechanical handling of materials.	3.1. Carpentry materials and components are stacked/banded for mechanical handling in accordance with the type of material and plant or equipment to be used. 3.2. Carpentry materials and components are loaded, unloaded, moved or located at specified location.
4. Clean up.	4.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification. 4.2. ***Hazardous materials*** are identified for separate handling. 4.3. ***Non-toxic materials*** are removed using correct procedures. 4.4. ***Dust suppression*** procedures are used to minimise health risk to work personnel and others. 4.5. Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

    - documentation from a variety of sources
    - plans, specifications and drawings
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos characteristics and reporting requirements
- carpentry material handling techniques
- construction terminology
- hazardous materials found in construction work sites
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- material sizes
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements and types of carpentry materials
- types, characteristics, uses and limitations of tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and procedures, including quality requirements • safely and effectively use tools and equipment • communicate and work effectively and safely with others • safely handle, sort and stack varying lengths of timber, providing quick access and use • safely move and stack a given quantity of sheet material • safely handle carpentry components for one carpentry project.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured

EVIDENCE GUIDE

	learning experience must include a combination of direct, indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to handling carpentry materials
- relevant Australian standards
- safe work procedures related to handling carpentry materials
- signage
- verbal or written and graphical instructions

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• work bulletins • work schedules.
Planning and preparation include:	• work site inspection • equipment defect identification • assessment of conditions and hazards • determination of work requirements.

Safety (***OHS***) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:	• emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
	• handling of materials
	• hazard control
	• hazardous materials and substances
	• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
	  • earth leakage boxes
	  • lighting
	  • personnel
	  • power cables, including overhead service trays, cables and conduits
	  • restricted access barriers
	  • surrounding structures
	  • traffic control
	  • trip hazards
	  • work site visitors and the public
	  • working at heights
	  • working in confined spaces
	  • working with dangerous materials
	• organisational first aid
	• personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
	• use of firefighting equipment
	• use of tools and equipment
	• workplace environment and safety.

Tools and equipment include:	• banders • hammers • pallets • pinch bars • tin snips

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• wheelbarrows.
Quality requirements include relevant regulations, including:	• Australian standards • internal company quality policy and standards • manufacturer specifications, where specified • workplace operations and procedures.
Materials include:	• bricks and concrete masonry units • concrete components • glass • insulation • joinery units • metal sheeting • paints and sealants • plaster or fibre cement sheeting • reconstituted timber products • reinforcement materials • scaffolding components • structural steel sections and components • timber.
Environmental requirements include:	• clean-up protection • noise and dust • waste management.
Statutory and regulatory authorities include:	• federal, state and local authorities administering applicable Acts, regulations and codes of practice.
Handling includes:	• handling activities may require assistance of others where size or weight is a factor • manual handling, which includes using pallets, carrying materials using correct lifting techniques and control of waste • preparing for mechanical handling, which includes forklifts, pallet jacks and trucks • procedures such as MSDS, calculating quantities, and stacking and storing of materials.
Protected includes:	• correct handling and stacking techniques without damaging the material • protecting with covers.
Hazardous materials include:	• coatings • glues • inflammable materials • solvents.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Non-toxic materials include:	• general carpentry materials with appropriate labelling.
Dust suppression includes:	• keeping dust in the air to a minimum.

CPCCCA3006B Erect roof trusses

Modification History

Change to performance criterion

Equivalent to CPCCCA3006A

Added range item: solar panels

Unit Descriptor

This unit of competency specifies the outcomes required to select, set out, erect and brace roof trusses to accommodate roof coverings for waterproofing purposes. It includes gable, hip and valley, and hip roofing types.

Application of the Unit

This unit of competency supports achievement of skills to safely and efficiently erect pre-built roof trusses for gable, hip and valley, hip and flat roof construction projects, which includes working with others and as a member of a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1	Plan and prepare.	1.1	Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation*** purposes.
		1.2	***Safety (OHS)*** requirements are followed in accordance w**i**th safety plans and policies.
		1.3	Signage and barricade requirements are identified and implemented.
		1.4	Plant, ***tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.
		1.5	Material quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***.
		1.6	***Materials*** appropriate to the work application are identified, obtained, checked to ensure fitness for purpose, prepared, safely handled and located ready for use according to Australian standards.
		1.7	***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2	Erect roof trusses.	2.1	Location of ***roof trusses*** for ***hip and valley roofs*** are set out on wall top plates to plan layout and specifications.
		2.2	Steel frames are temporarily earthed during erection and are connected to permanent earthing system upon completion.
		2.3	Roof trusses are erected and fixed, including temporary bracing, to set out positions in correct sequence to line at apex and plumb.

© Commonwealth of Australia, 2025 Skills Insight

		2.4	Top chord is installed above wall plate to be constant height above wall plate.
		2.5	Ceiling trimming and creeper rafter members are fixed to specifications.
		2.6	Bottom chord of truss is used to provide lateral support for internal walls.
		2.7	***Roof bracing*** is provided through hip construction, valley construction, diagonal metal tension or timber bracing or a combination of these, and fixed to specification.
		2.8	Lateral restraints to truss chords are fixed in position to manufacturer specifications.
3	Clean up.	3.1	Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
		3.2	Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - plans, specifications and drawings
  - report faults

© Commonwealth of Australia, 2025 Skills Insight

  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- plant, tools and equipment types, characteristics, uses and limitation
- processes for the calculation of material requirements
- quality requirements for roof trusses
- roof bevels
- roof calculations for lengths, quantities and pitch
- roof load transfer
- roof shape and geometry
- roof truss erection and construction techniques
- roof truss materials and installation, including fire control and separation materials required by the National Construction Code (NCC) and other legislation
- roof types and truss components
- roofing regulations
- techniques for lifting and positioning of trusses
- temporary and permanent bracing
- timber types, structural properties and uses, including engineered timber products
- truss set out
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- set out and erect a roof comprising a minimum of one hip end, a valley and enough standard trusses to incorporate bracing for a full size roof in timber and metal.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity

© Commonwealth of Australia, 2025 Skills Insight

- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the

competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to erecting roof trusses
- relevant Australian standards
- safe work procedures related to erecting roof trusses
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Planning and preparation include:

- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.

© Commonwealth of Australia, 2025 Skills Insight

Safety (OHS) is to be in accordance with state or territory legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Tools and equipment include:

- air compressors and hoses
- clamps
- hammers
- marking equipment
- measuring tapes and rules
- nail bags
- nail guns
- power drills
- power leads
- power saws

© Commonwealth of Australia, 2025 Skills Insight

- saw stools
- scaffolding
- screwdrivers
- spanners
- spirit levels
- squares (combination/tri)
- string lines
- welding equipment.

Quality requirements include relevant regulations, including:

- Australian standards
- internal company quality policy and standards
- manufacturer specifications, where specified
- workplace operations and procedures.

Materials include:

- bolts
- bracing material
- nails
- patented fasteners
- screws
- slotted brackets for truss movement
- timber and metal trusses.

Environmental requirements include:

- clean-up protection
- noise and dust
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Roof trusses can be:

- timber or metal
- fixed to timber or steel wall plates.

Hip and valley roofs:

- include scotch valleys and hip ends
- may include Dutch gables.

Roof bracing includes:

- elementary bracing principles for various shaped roofs.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions are confirmed and applied using relevant ***information***. 1.2. ***Safety*** (***OHS***) requirements are obtained from site safety plan, other regulatory specifications or legal obligations, and are applied. 1.3. Measuring and calculating ***equipment*** selected to carry out tasks is consistent with job requirements, is checked for serviceability, and any faults are rectified or reported.
2. Obtain measurements.	2.1. Method of obtaining the measurement is selected and applied. 2.2. ***Measurements*** are obtained using a rule or tape accurate to 1mm. 2.3. Measurements, including ***areas and volumes***, are confirmed and recorded.
3. Perform calculations.	3.1. Appropriate ***calculation factors*** are determined and correct method is selected for achieving required result. 3.2. ***Material quantities*** for the project are correctly calculated using appropriate factors. 3.3. Results are confirmed and recorded.
4. Estimate approximate quantities.	4.1. Calculations for determining material requirements are taken. 4.2. Appropriate formulas for calculating quantities are selected. 4.3. Quantities are estimated from the calculations taken. 4.4. Material quantities for the project are calculated,

ELEMENT	PERFORMANCE CRITERIA
	confirmed and recorded within enterprise tolerances.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to record measurements, calculations and quantities
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements, calculations and geometry
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- basic calculators
- communication devices

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- company procedures
- construction terminology
- job safety analysis (JSA) and safe work method statements
- measuring, calculating, geometry and determination of quantities
- processes for care of measuring equipment
- project quality requirements
- site and equipment safety (OHS) requirements
- tolerances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information • comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations • comply with organisational policies and procedures, including quality requirements • safely and effectively use tools and equipment • communicate and work effectively and safely with others • complete measurements, calculations and determination of quantities for different projects of varying complexity in a range of contexts or occasions over time

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	• calculate each of the following using a realistic construction task or example:
	  • length
	  • perimeter
	  • circumference
	  • area
	  • volume
	  • number
	  • ratio
	  • percentage
	  • conversion of metres to millimetres and millimetres to metres
	  • measure using a rule or tape measure five separate tasks within 1mm accuracy.

Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:	• diagrams or sketches • instructions issued by authorised organisational or external personnel • manufacturer specifications and instructions • maps • material safety data sheets (MSDS) • memos • organisation's work specifications and requirements • plans and specifications • regulatory and legislative requirements • relevant Australian standards • safe work procedures or equivalent • signage • verbal or written and graphical instructions • work bulletins • work schedules.
Safety (***OHS***) is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan and may include:	• clothing and equipment • handling of materials • hazard control • hazardous materials and substances • organisational first aid • use of firefighting equipment • use of tools and equipment • workplace environment and safety.
Equipment includes:	• calculators and laser equipment • rulers • tape measures • trundle wheels.
Measurements are to:	• be in metric scale • cover all necessary calculations.
Areas and volumes include:	• calculating regular and irregular shapes, such as rectangles, squares, circles, triangles,

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	trapeziums, cubes, cones, pyramids and cylinders that represent calculations taken in a construction environment.
Calculation factors:	• include length, area, weight, height, width, depth, volume, mass, scales, ratios, perimeters, quantities, numbers, grade, percentages, addition, subtraction, multiplication and division • are to be performed manually and with the aid of a calculator.
Material quantities are to be:	• calculated in either packed, bulk, loose or compacted states • converted to volumes in the other states.

CPCCLDG3001A Licence to perform dogging

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

Application of the Unit

Application of the unit

This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. ***Site information*** is obtained and related to the task. 1.2. ***Hazard*** s and potential hazards associated with the slinging and directing of loads are identified. 1.3. ***Hazard control measures*** consistent with ***appropriate standards*** are identified to ensure the safety of personnel and equipment. 1.4. The weight, dimensions and centre of gravity of the load are identified and assessed. 1.5. Suitable lifting/slinging points on the load are identified. 1.6. Appropriate ***lifting equipment*** needs are assessed. 1.7. Appropriate ***communication methods*** are assessed with ***crane***/ operators and other ***appropriate personnel***. 1.8. Manufacturer's specifications/information is obtained for special loads where necessary.
2. Select and inspect equipment.	2.1. Lifting equipment appropriate to the task is selected. 2.2. Lifting equipment is inspected for serviceability. 2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected. 2.5. Appropriate ***communication equipment*** is selected and its serviceability is checked. 2.6. Appropriate ***personal protective equipment*** (PPE) is selected and checked.
3. Prepare site and equipment.	3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment. 3.2. Appropriate slinging method is selected. 3.3. Lifting equipment is prepared and assembled where appropriate. 3.4. Load destination is prepared.
4. Perform task.	4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques. 4.2. Lifting hook is positioned over the load centre of gravity. 4.3. Lifting equipment is attached and secured to the load in an appropriate manner. 4.4. Tag line is attached and secured where appropriate. 4.5. Test lift is conducted to ensure security of load. 4.6. Load is moved maintaining stability and control at all times. 4.7. Appropriate communication methods and ***communication signals*** are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator. 4.8. The load is landed to ensure that it is stable and secure from movement. 4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.	5.1. Unserviceable lifting equipment inspected and rejected. 5.2. ***Defective equipment*** is isolated and tagged. 5.3. Lifting equipment is stored in accordance with procedures and appropriate standards. 5.4. Hazard prevention/control measures are removed where appropriate. 5.5. Excess materials from the work area are removed (where applicable).

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations.
- communicate and work safely with others in the work area.
- apply Hazard prevention and control measures consistent with appropriate standards.
- apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/ operator, moving four loads of varying shapes, sizes and weights.
- use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend.
- conduct pre and post operational checks of the lifting equipment.

Context of and specific resources for assessment

- Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument
- Assessment of performance must be

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	undertaken either in the workplace or in a realistically simulated workplace setting
	• Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities
	• Applicants must have access to:
	  • personal protective equipment (PPE) for the purpose of the performance assessment.
	  • four different loads as prescribed in the endorsed assessment instrument
	  • lifting and associated equipment
	  • suitable slewing crane
	  • communication equipment (eg. fixed channel, two-way radios) as applicable.

Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment. Assessment may be in conjunction with the assessment of other units of competency. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site informationmay include but not be limited to	• local conditions such as access and egress • work method statements.
Hazards may include but not limited to:	• ground stability (eg. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes, trees, buildings, etc) • insufficient lighting • traffic (e.g. pedestrians, vehicles, plant) • weather (e.g. wind, lightning, storms) • other specific hazards (e.g. trip hazards, heights, radio interference, etc).
Hazard prevention/control measures	The systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of controls, including: 1. elimination. 2. substitution. 3. isolation. 4. engineered control measures. 5. safe work practices. 6. personal protective equipment.
Appropriate standard s may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Lifting Equipment may include but not limited to:	• fibre ropes • wire ropes • chain • wire and synthetic slings • shackles • eyebolts • beam clamps • plate clamps • spreader beams • lifting beams • pallet forks and cages • concrete kibbles • personnel boxes.
Communication Methods may include but are not limited to:	• written instructions • signage, • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol.
Cranes may include but not limited to:	• tower cranes (including self erecting) • portal boom cranes • vehicle loading cranes • slewing mobile cranes • non-slewing cranes • derrick cranes.
Appropriate personnel may include but are not limited to:	• supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.
Communication Equipment may include but not limited to:	• fixed channel two-way radios • whistles • bells.
Personal protective equipment (PPE) may include but not limited to:	• hard hat • safety boots • gloves • high visibility clothing • reflective vest • relevant breathing, hearing, sight, skin and sun protection.
Load destination may include but	• ground

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

not limited to:	• loading platforms • suspended floors • vehicles.
Communication signals may include but not limited to:	• stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle • telescope out - hand • telescope out - whistle • telescope in - hand • telescope in - whistle • slew left - hand • slew left - whistle • slew right - hand • slew right - whistle.
Defective Equipment may include but not limited to:	• excessive wear • damage • stretched • broken wires • cut/damaged fibres.

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit

This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and assess risks.	1.1. ***Hazards*** in the work area are identified, assessed and reported to ***designated personnel***. 1.2. Safety risks in the work area are identified, assessed and reported to designated personnel. 1.3. ***Safe work practices***, ***duty of care*** requirements and safe work instructions are followed for controlling risks. 1.4. OHS, hazard, accident or ***incident*** reports are contributed to according to workplace procedures and ***Australian government and state or territory OHS legislation*** and relevant ***information***.
2. Identify hazardous materials and other	2.1. ***Hazardous materials*** on a work site are correctly identified and, if appropriate, handled and used

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
hazards on work sites.	according to company and legislated procedures. 2.2. ***Measures for controlling risks*** and construction hazards are applied effectively and immediately. 2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate ***signs and symbols***. 2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.
3. Plan and prepare for safe work practices.	3.1. Correct ***personal protective equipment*** and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures. 3.2. Selection of ***tools***, ***equipment*** and ***materials***, and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures. 3.3. Required barricades and signage are determined and erected at the appropriate site location. 3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.
4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. ***Prohibited tools and equipment*** in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet ***environmental requirements***.
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	various ***types of fire*** and other emergencies are followed, including identification or use, if appropriate, of ***fire equipment*** within scope of responsibilities. 5.3. ***Emergency response and evacuation procedures*** are known, practised and carried out effectively when required. 5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
  - determine and report hazards and risks
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - MSDS, JSA and safe work method statements
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• working at heights.
Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:	• designated safety officers, determined by the enterprise, who have undertaken specific safety response training • managers or other senior personnel • personnel competent and/or licensed in the safe handling of asbestos • supervisors.

Safe work practices:	• include:
	  • day to day observation of OHS policies and procedures
	  • emergency procedures
	  • risk assessment
	  • use of basic firefighting equipment
	• relate to:
	  • access to site amenities, such as drinking water and toilets
	  • general requirements for safe use of plant and equipment
	  • general requirements for use of personal protective equipment and clothing
	  • housekeeping to ensure a clean, tidy and safer work area
	  • no drugs and alcohol at work
	  • preventing bullying and harassment
	  • smoking in designated areas
	  • storage and removal of debris.

Duty of care requirements:	• relate to:
	  • legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
	  • relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
	• may relate to:
	  • own responsibilities to comply with safe work practices, including activities that

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	require licences, tickets or certificates of competency.

Incidents include:	• accidents resulting in personal injury or damage to property
	• near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
	  • breathing apparatus malfunctioning to the extent that the user's health is in danger
	  • collapse of the floor, wall or ceiling of a building being used as a workplace
	  • collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
	  • collapse or partial collapse of a building or structure
	  • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
	  • damage to or malfunction of any other major plant
	  • electric shock
	  • electrical short circuit, malfunction or explosion
	  • uncontrolled explosion, fire or escape of gas, hazardous substance or steam
	  • any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:	• Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • JSA and safe work method statements • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• OHS and welfare Acts and regulations • safety codes of practice.
Information includes:	• diagrams or sketches • emergency situation contacts • evacuation plans • instructions issued by authorised organisational or external personnel • labels • manufacturer specifications and instructions • memos • MSDS • organisation work specifications and requirements • plans and specifications • regulatory and legislative requirements, such as Acts, regulations and codes of practice • relevant Australian standards • reports of near misses or accidents • safe work procedures or equivalent documentation • safety meeting minutes • signage • verbal or written and graphical instructions • work bulletins • work schedules.
Hazardous materials include:	• ACM • cleaning chemicals, including those in pressurised containers • glues • insulation materials • solvents • treated timber products.
Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:	• elimination • substitution • isolation • engineering control • administrative control • personal protective equipment.
Signs and symbols include:	• emergency information signs (exits, equipment, first aid) • fire signs (location of fire alarms and

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	firefighting equipment) • hazard identification, facility or location signs • regulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning) • safety tags and lockout (danger tags, out of service tags) • site safety, directional, traffic and warning signs and symbols.
Asbestos-containing materials are identified:	• includes recognising common types of ACM that may be found in construction materials and buildings • covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.
Asbestos-containing materials are ***reported*** to:	• person in control of the workplace as set out in the relevant Asbestos Management Code.
Personal protective equipment is to include:	• aprons • arm guards • caps • dust mask/respirators • ear muffs/plugs • gloves • hard hats • high visibility retro reflective vests • jackets • overalls • safety glasses/goggles • steel capped boots • UV protective clothing and sunscreen.
Tools and equipment include:	• firefighting equipment • first aid kit • ladders and work platforms • personal protective equipment.
Materials include:	• first aid materials suitable for emergency first aid treatment of minor injuries.
Prohibited tools and equipment that cannot be used near identified	• high-speed abrasive power and pneumatic tolls, high pressure water cleaners, compressed

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

ACM include:	air or abrasive blasting • any vacuum cleaning equipment not specifically designed for safe work with asbestos.
Environmental requirements are to cover workplace quality management and include:	• clean-up protection • stormwater protection • waste management.
Types of fire includes:	• electrical, chemical, gas, mechanical, paper, wood or natural fire.
Fire equipment includes:	• breathing apparatus • fire extinguishers • fire hydrant and hoses • fire reel • fire truck • manual firefighting instruments, such as fire blankets.
Emergency response and evacuation procedures include:	• emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel • extinguishing fires, organisational first aid requirements and evacuation.

ELEMENT	PERFORMANCE CRITERIA
individuals and groups.	legislation through ***presentation of information***. 3.3. Information is provided to affected parties at an appropriate time and place and in ***an appropriate way***. 3.4. Interaction is undertaken in an orderly manner to ensure all viewpoints are canvassed.
4. Record, analyse and report results.	4.1. Responses are assessed and checked against the project brief. 4.2. Appropriate suggestions for improvement are incorporated into the project brief. 4.3. Accurate report is prepared, including recommendations for approval. 4.4. Overall effectiveness of the interaction is reviewed and evaluated, with action taken where required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to prepare information in alternative formats and to provide access to consultations for diverse groups through interpreters, etc.
- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
  - consult with the community, including provision of information about legislation
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret:
    - regulations
    - legislation
    - other relevant documentation
  - use and interpret non-verbal communication

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- written skills to:
  - record and report results of interaction with the community
  - prepare information
- innovation skills to identify and implement appropriate and diverse strategies for interacting with diverse communities
- organisational and time management skills to prepare information for meetings and to arrange and conduct meetings to timelines
- problem solving skills to review feedback and select appropriate suggestions for improvement for inclusion in report
- technological skills to:
  - complete documentation, including information materials and reports
  - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- effects and psychological theories relevant to working with clients in a regulated environment, such as:
  - social stratification
  - social change
  - technological change
- local factors affecting communities and individuals
- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- strategies for consultation
- urbanisation.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with OHS regulations applicable to workplace operations • apply organisational management policies and procedures, including quality assurance requirements where applicable • perform a management role in the identification and implementation of at least one client negotiation and consultation process or equivalent • provide reports to appropriate body/individual as determined by the project brief.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments. Validity and sufficiency of evidence requires that: • competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace • where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge • all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Interested and affected individuals and parties include:	• existing community groups • government agencies • individuals and special interest groups • private sector businesses • social groups and emergency services.
Interaction strategies include:	• client meetings • home and site visits • meetings of relevant stakeholders • surveys.
Relevant information and social theory include:	• awareness of diverse cultures • collective behaviour • deviance • economic order • inequality • political order social change and interaction • stratification • technology and the environment • the family • urbanisation.
Demographics include:	• age • ethnicity • gender • individual and group profiles • social stratification.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Appropriate to the needs of the parties involved involves:	• providing material in alternative formats, such as:
	  • large print
	  • other languages.

Presentation of information includes:	• computer simulations • display plans • graphics • handouts • models • software presentations • videos.
An appropriate way includes:	• taking into account access issues, such as parking or building access and cultural requirements or protocols • using assistive technology, for example telecommunication device for the deaf (such as TTY) or video captioning • using interpreters, including sign language interpreters.

CPCCSV5011A Apply building codes and standards to residential buildings

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to ensure that the building process complies with the Building Code of Australia (BCA) and relevant Australian standards.

The unit applies to residential buildings and includes the evaluation and interpretation of building requirements, classification of buildings according to the BCA criteria and strategies for compliance.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the understanding and skills to apply building codes and standards to residential buildings within the context of relevant legislation, the BCA and Australian standards.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the purpose and basic intent of the BCA.	1.1. Objectives of the BCA and the purpose of its respective components in relation to ***construction in residential buildings*** and ***building categories*** are evaluated and documented. 1.2. Deemed-to-satisfy (DTS) concept for construction to meet BCA requirements is evaluated and documented.
2. Locate and interpret code and standard requirements applicable to particular projects.	2.1. Clauses from the BCA that apply to particular ***residential building projects requiring review of compliance issues*** are identified and documented. 2.2. Prescriptive requirements of relevant BCA clauses and ***standard specifications*** are determined. 2.3. Requirements of Australian standards referenced in the BCA are identified and documented. 2.4. Special requirements that may be applicable to specific areas of ***building surveying procedures*** are identified and documented.
3. Classify buildings.	3.1. Nature of a building is determined in regard to its proposed use and site arrangement. 3.2. BCA criteria are applied to determine the defined classification.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.3. BCA requirements are interpreted for multiple classifications.
4. Apply solutions to construction problems for compliance with the BCA.	4.1. Criteria to ensure construction methods comply with the intent of the BCA are determined. 4.2. Alternative approaches to construction problems that comply with the requirements of the BCA are reported. 4.3. Assessment methods used to determine whether a building solution complies with performance requirements or DTS provisions of BCA are analysed and applied. 4.4. Assessment methods are confirmed and identified as appropriate to meet the DTS provisions of BCA.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret:
    - Australian standards
    - BCA
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - written skills to:
    - document building requirements
    - report alternative approaches to construction problem
- innovation skills to develop compliant alternative solutions to construction

REQUIRED SKILLS AND KNOWLEDGE

problems
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
  - complete documentation and calculations
  - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- BCA and primary referenced Australian standards
- criteria for Class 1 and 10 buildings
- design, construction and structural principles of buildings
- DTS provisions
- processes for the administration and preparation of documentation
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this	A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

EVIDENCE GUIDE

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Construction in residential buildings includes:	• compliance with relevant legislation • design specifications • evaluation, interpretation and adherence to legislative requirements for BCA Class 1 and 10 buildings • maintenance specifications • relevant Australian standards.
Building categories include:	• low-rise residential buildings • single storey buildings.
Residential building projects requiring review of compliance issues include:	• calculation and processing of application or inspection fees • project milestones • provision of site access/facilities • work schedules.
Standard specifications include:	• developed or detailed specifications addressing specific components, such as structural or other requirements • industry standard specifications • preliminary and outline specifications.
Building surveying procedures include:	• mechanical, structural, electrical and other services.

CPCCSV5012A Assess timber-framed designs for one and two storey buildings

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to select structural members for a timber-framed domestic building up to and including two storeys.

It includes the evaluation of plans and specifications, and selection of structural members for ceiling and roof framing, timber wall frames, timber stumps, floor bearers and joists. It requires compliance with all relevant legislation, the Building Code of Australia (BCA) and Australian standards.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the understanding and skills to assess timber-framed designs for one and two storey buildings, assess timber-framed designs, select structural members and identify and rectify faults within the context of relevant legislation, the BCA and Australian standards.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess plans and specifications for size, span and spacing of structural members required in ceiling and roof framing.	1.1. Access is obtained to relevant plans, specifications and documentation related to ***structural members required in ceiling and roof framing*** for required ***building categories***. 1.2. Specified timber species and stress grading are identified. 1.3. True length of common rafter and overhand and economical size of common rafter are determined to support specified roof structure and covering. 1.4. Maximum span of common rafter is determined. 1.5. Position, location and direction of struts and strutting beams to support roof and ceiling loads are determined and documented. 1.6. Method of support at hip and valley rafters is determined and documented. 1.7. Location, direction and span of ceiling joists and hanging beams to support specified roof design are determined and documented. 1.8. Nominated member sizes, spans, spacings and locations are listed, documented and checked for accuracy against plans and specifications.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Assess plans and specifications for permanent wind bracing requirements for nominated design gust wind speeds.	2.1. Access is obtained to relevant plans, specifications and documentation for ***assessment of timber-framed designs***. 2.2. Location and category of building site is identified against design gust wind speed calculations. 2.3. Wind directions are selected and noted on plans. 2.4. Type and number of bracing units for each wind direction are selected. 2.5. Bracing details and description are documented, based upon calculations.
3. Assess plans and specifications for size, span and spacings of structural members for timber wall frames.	3.1. Access is obtained to relevant plans, specifications and documentation. 3.2. Specified timber species and stress grading are identified. 3.3. Roof load width for walls supporting ceiling and roof structures for a specified roof covering is determined. 3.4. Economical size for common wall studs is determined. 3.5. Size of top and bottom wall plates is determined according to load bearing conditions. 3.6. Size of studs at side window and door opening is determined. 3.7. Size of lintels to nominated openings is determined. 3.8. Size of timber posts and beams supporting overhands is determined. 3.9. Nominated member sizes, spans, spacings and locations are identified, listed, documented and checked against plans and specifications for accuracy.
4. Assess plans and specifications for size, span and spacing of structural members for timber stumps, floor bearers and joists.	4.1. Access is obtained to relevant plans, specifications and documentation. 4.2. Specified timber species and stress grading are identified. 4.3. Economical size for floor bearer and joist to suit maximum spans and spacings is determined. 4.4. Size of timber stumps and footing type and size required to support structural members are determined. 4.5. Size for timber trimmers, working and trimming joists for stair opening to suit maximum spans and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	spacings is determined. 4.6. Location, direction and span of bearers and joists to support specified structure are determined. 4.7. Nominated member sizes, spans, spacings, direction and bracings are identified, listed, documented and checked for accuracy against plans and specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret:
    - plans and specifications
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - written skills to record mathematical information
- numeracy skills to apply measurements and calculations
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
  - complete documentation and calculations
  - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or

REQUIRED SKILLS AND KNOWLEDGE

combined actions

- grading processes and grade markings used to categorise timber and timber products
- manufactured timber framing systems
- nature of timber and effect of physiology and timber pests on its performance
- processes for the administration and preparation of documentation
- processes for the application of wind force, raking forces, and bracing and tie down systems
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- structural, design and construction principles of buildings, including the application of timber in buildings.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with OHS regulations applicable to workplace operations • apply organisational management policies and procedures, including quality assurance requirements where appropriate • assess timber-framed designs, evaluate plans and specifications, and identify faults; select structural members for roofs, ceilings, walls,

EVIDENCE GUIDE

	confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments. Validity and sufficiency of evidence requires that: • competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace • where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge • all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.
Guidance information for assessment	This unit could be assessed on its own or in combination with other units relevant to the job function, for example: • CPCCSV5001A Assess the construction of domestic scale buildings • CPCCSV5006A Assess construction faults in residential buildings.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Structural members required in ceiling and roof framing:	• includes evaluation and identification of structural members used in:
	  • ceiling and roof framing
	  • floor bearer and joist installing
	  • timber stumping
	  • timber wall framing
	• suitable for the building design in compliance with:
	  • BCA
	  • design specifications
	  • legislative requirements
	  • maintenance specifications
	  • relevant legislation.

Building categories include:	• all timber-framed domestic scale buildings up to and including two storeys.
Assessment of timber-framed designs:	• includes the identification and recording and reporting of faults, in accordance with workplace providers, in verbal or written

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify structural requirements and loads commonly used in structural design.	1.1. ***Structural requirements*** relating to equilibrium, stability, strength, functionality, economy and aesthetics are determined in ***adherence to legislative requirements***. 1.2. Different types of loading and loading methods and the effect on structures are identified and documented in accordance with BCA, relevant Australian standards, suppliers' technical data and empirical methods.
2. Analyse the effects of force and moments on structural elements.	2.1. Force, moments and equilibrium of force and the effects on structures are identified and ***analysis*** is conducted and recorded. 2.2. Equilibrium of forces for co-planar systems in consideration of stability is identified and compared for performance.
3. Analyse properties and behaviour of structural materials.	3.1. Effect of force on materials in tension, compression, stress, strain and elasticity is identified and recorded. 3.2. Structural properties and performances are differentiated for common materials and recorded.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
4. Identify section properties of structural elements and their effect on structural performance.	4.1. Cross-sectional geometry and common structural shapes are identified. 4.2. Section properties and the relationship between first and second area moments, section modules and gyration and deflection of beams are identified and compared for performance. 4.3. Section properties' values for I (moment of inertia), Z (section modulus) and R (radius) for common sections are determined using tables or standard formulas and compared for performance.
5. Compare the performance and properties of spanning elements.	5.1. Structural considerations of loaded spanning elements for bending moments, shear forces, deflection and torsion are determined and compared for performance. 5.2. Bending behaviour and performance of loaded support beams of various types, shapes, spans and loads are determined and compared for performance. 5.3. Effect that connections have upon the structural performance of beams is identified and compared for performance. 5.4. Principles of slab behaviour in relation to spans and stress distribution are identified and compared for performance.
6. Determine performance criteria for columns.	6.1. Effect of slenderness ratio that changes in length, cross-sections, connections and materials will have on the strength of a column are determined and compared for performance. 6.2. Eccentric and axial load effect on the strength of column section and materials are determined and compared for performance.
7. Identify factors affecting design of connections between structural elements.	7.1. Transmission of forces between structural elements are determined and compared for performance. 7.2. Methods of distributing stresses in connections between structural elements are determined and compared for performance.
8. Outline how loads of various types occur and impinge on a building structure.	8.1. Differences between types of loading, including dead load, live load, wind load, earthquake load and other load, causing actions are determined and compared for performance. 8.2. Dead and live loads using BCA and relevant Australian standards are determined. 8.3. Indication of direction of wind pressures on the

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	various surfaces of buildings specified in BCA and relevant Australian standards are determined.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret:
    - BCA
    - relevant Australian standards
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - written skills to report findings and provide reports
- numeracy skills to analyse and apply complex mathematical information
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
  - complete documentation and calculations
  - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- nature of materials and effect on performance
- processes for the interpretation of working drawings and specifications
- processes for the preparation of documentation

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- structural and design principles for buildings.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with OHS regulations applicable to workplace operations • apply organisational management policies and procedures, including quality assurance requirements where applicable • assess, identify and report on findings for the design, positioning and sizing of structural members of at least one domestic scale building project or equivalent • provide reports to appropriate body/individual as determined by the project brief.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Assessment of ***structural requirements***:	• includes:
	  • analysis of engineering drawings
	  • evaluation of site physicality
	  • identification of safe structural practices
	• may require actual site visits.

Adherence to legislative	• domestic scale buildings (similar in characteristics to those of residential dwellings

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

requirements is limited to:	in terms of loading, construction and size and may include small industrial, commercial and public buildings).

Analysis includes:	• 'I' (moment of inertia) values
	• base unit mass, density, velocity, acceleration, force and stress
	• column changes in length, cross-sectional, restraints, material and eccentricity
	• cross-sectional geometry and common structural shapes
	• deflections for symmetrically loaded, simply supported timber beams of various shapes, spans and loads
	• directions of wind pressure loads
	• force on materials in tension, compression, stress, strain and elasticity
	• forces associated with levers identified by direction and value
	• forces for co-planar non-current force systems
	• load differences, including:
	  • dead load
	  • live load
	  • wind load
	  • earthquake load
	• minimum bracing requirements
	• removal of trusses
	• restraints for use with beams
	• second area moments and deflection of beams
	• simple roof truss transmission force
	• structural properties differentiated for common materials
	• symmetrically loaded simply supported situations for:
	  • bending moments
	  • deflection
	  • shear forces
	  • torsion
	• tension and compression stresses of roof members
	• wind forces and wind velocity for bracing.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to effectively analyse, implement and monitor environmentally sustainable work practices and their effectiveness on a work site, including contributing to consumer environmental efficiency.

Application of the Unit

Application of the unit This unit of competency supports the needs of those with responsibility for a specific area or site of work, or those who lead a work group or team by using processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

The context of this competency applies to all sectors of the construction industry. It may be applied to all sections of an organisation, including a work site, designated work area, in transit and/or an office.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage.	1.1. Environmental regulations applying to the organisation are identified. 1.2. Procedures for ensuring ***compliance*** with environmental regulations are assessed. 1.3. Information on ***environmental and resource efficiency*** systems and procedures are collected, and where appropriate, provided to ***stakeholders***, ***key personnel and specialists***. 1.4. Current resource usage is measured and documented by members of the work group. 1.5. Current ***purchasing strategies*** are analysed and documented. 1.6. Current work processes and products are analysed to access information and data and to assist in identifying areas for improvement.
2. Set targets for improvement.	2.1. Input is sought from stakeholders, key personnel and specialists and shared with them as appropriate. 2.2. External sources of information and data are accessed as required. 2.3. Alternative solutions to work site environmental issues are evaluated.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. Efficiency targets are set.
3. Implement performance improvement strategies.	3.1. ***Techniques and tools*** are sourced to assist in achieving targets. 3.2. Continuous improvement strategies are applied to work site, including ideas and possible solutions to communicate to stakeholders, key personnel and specialists. 3.3. Environmental and resource efficiency improvement plans for work site and clients are integrated with other operational activities and implemented. 3.4. ***Suggestions*** and ideas about environmental and resource efficiency management are sought from stakeholders, key personnel and specialists and shared with them to act on as appropriate. 3.5. Costing strategies are implemented to fully value environmental assets and are shared with stakeholders, key personnel and specialists as necessary.
4. Monitor performance.	4.1. Outcomes are documented and reports on targets are communicated to key personnel and stakeholders. 4.2. Strategies are evaluated. 4.3. New targets are set and new tools and strategies investigated and applied. 4.4. Successful strategies are promoted and, where possible, participants rewarded.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to source/identify the latest industry environmental sustainability concepts and technologies
- applying learning to future opportunities
- change management skills
- communication skills to:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- answer questions
- clarify and acknowledge suggestions relating to work requirements and environmental efficiency with stakeholders
- enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
- read and interpret:
  - documentation
  - environmental and resource efficiency requirements
- support information flow between various internal and external stakeholders to resolve and report on environmental and resource efficiency issues
- use and interpret non-verbal communication
- use language and concepts appropriate to cultural differences

- creating tools to measure and monitor improvements and report on outcomes to stakeholders
- innovation skills to identify improvements, apply knowledge about resource use to organisational activities and customer service, and develop resource efficiency tools
- numeracy skills to analyse data on company and stakeholder resource consumption and waste product volumes
- problem solving skills to recognise and analyse problems, including:
  - devising approaches
  - implementing and reflecting on environmental and water, energy or resource efficiency management policies and procedures relevant to work site to improve environmental sustainability
  - share alternative approaches as required
- skills to relate to different genders and people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- technology skills, including the ability to:
  - operate and shut down equipment
  - where relevant, use software systems for recording and filing documentation for measurement and improvement of resource usage and consumption.

Required knowledge

Required knowledge for this unit is:

- how tradespersons can contribute to environmental sustainability
- knowledge of compliance requirements for all relevant environmental and sustainability legislation, regulations and codes of practice including resource hazards and risks associated with work site:
  - supervision
  - job specifications
  - strategies and procedures to maximise opportunities and minimise impacts

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

relevant to stakeholders and personal area of responsibility

- relevant knowledge of environmental, resource and energy/water efficiency issues, systems and procedures specific to industry practice
- knowledge of best practice approaches and quality assurance systems relevant to area of responsibility and industry
- ability to identify and advise on water/energy efficiency opportunities for stakeholders and key personnel
- supply chain procedures
- OHS issues and requirements
- organisational structure and reporting channels and procedures
- terms and conditions of employment, including policies and procedures, such as:
  - daily tasks
  - equal opportunity
  - work area responsibilities
  - worker, supervisor and employer rights.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by analysing and monitoring effective sustainable work practices on a construction project work site. This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • implement and monitor integrated environmental and resource efficiency management policies and procedures within a work site, including:

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- access, collect, analyse and organise information from a number of sources to provide information, advice and tools or resources for improvement opportunities to stakeholders and key personnel
- identify possible areas for improved practices and resource efficiency for stakeholders
- communicate benefits of changing practices to work team and customers
- implement new approaches and improvement plans, including planning and organising activities for staff and stakeholders in relation to:
  - measurement of current use
  - devising strategies to improve environmental and resource efficiency issues
  - reporting as required ensuring appropriate action is taken within work site in relation to environmental and sustainability compliance and potential hazards
- monitor and evaluate improvement plans and efficiency targets, using evaluation and monitoring tools and technology to potentially revise and adjust approaches and strategies to ensure continuous improvement.

Evidence that could be used, reflecting the requirements of the unit of competency and work being performed as evidence, include:

- reports of activities of work group in relation to:
  - measurement of resources and efficiency
  - development of improvement strategies
- work plans outlining approaches to improved practices, with documented benchmarks
- invoices from stakeholders specifying materials recommended for improved efficiency and those actually used
- quotes and tenders
- lists of environmental hazards, risks and inefficiencies, and opportunities for

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

improvements identified in the work site
- work samples, tools, techniques or simulated activities and the outcomes.

Processes may include:

- relevant authenticated correspondence
- way in which advice is sought and suggestions made about improvements from stakeholders and key personnel
- evidence of implementation of programs, such as:
  - green building program
  - supply chain program for purchasing sustainable products
  - environmental site management framework or product recommendations
- notes on understanding external benchmarks and support for particular benchmarks to be used, with expected outcomes and including approaches to recommend products and practices to stakeholders for improving their resource use.

Resource implications for assessment must include:

- observation by the assessor over a period of time and in a range of situations and/or evidence provided to the assessor in written or verbal form, including:
- implementing tools and techniques
- review of work site and stakeholders/key personnel to assess and measure resource use, hazards and compliance
- application of learning to future activities
- recommended products and practices to stakeholders
- access to a range of information and resources for assessment as listed in the range statement, such as:
  - environmental and sustainability legislation
  - compliance documentation
  - organisational and procedural requirements or organisation plans
  - work supervision and work site documentation, including personnel and

EVIDENCE GUIDE

	responsibilities • quotes, tenders, invoices.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry-related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Compliance includes:

- meeting relevant Acts, laws, by-laws and regulations, codes of practice or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection,

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	Biodiversity Conservation Act and Building Code of Australia)
	• levels include:
	  • federal
	  • industry
	  • international
	  • local government
	  • organisation
	  • reporting breaches
	  • state and territory.

Environmental and resource efficiency includes:	• approaches of industry associations, such as:
	  • Australian Building Greenhouse Rating
	  • green plumbers
	  • green purchasing
	  • Housing Industry Association (HIA) GreenSmart
	  • ISO 14001 Environmental Management Systems
	  • lifecycle thinking
	  • Master Builders Association of Victoria Green Living, Leadership in Energy and Environmental Design (LEED), or Green Building Council of Australia (GBCA) Green Star environmental rating system
	  • National Australian Building Environmental Rating Scheme (NABERS)
	  • product stewardship
	  • supply chain management
	  • Victoria Stormwater Management Guidelines of the Environment Protection Authority (EPA)
	• implementing and using alternative practices, procedures or materials to reduce or eliminate resource consumption on work site
	• recommendations to stakeholders, including:
	  • addressing environmental and resource sustainability initiatives, such as an environmental framework, action plan, recommendations, surveys and audits with stakeholders and key personnel
	  • efficient water use (e.g. rainwater tanks,

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	grey water sprinkler systems or timers) • energy use (e.g. equipment/appliances installed; equipment, appliance and tool maintenance; transporting materials; heating and cooling; and building efficiency) • environmental site management • evaluating and implementing most appropriate waste treatment, including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment through site management • improving resource, energy and water efficiency • including environmental performance in tender and quote specifications • initiating and maintaining appropriate work site procedures for operational energy consumption, including stationary and non-stationary (transport) energy • preventing and minimising risks and maximising opportunities on work site and for stakeholders • reducing emissions of greenhouse gases • reducing material usage • reducing stormwater pollution • reducing use of non-renewable resources • types of products and materials used • reference to standards, guidelines, industry association standards, codes of practice and best practice approaches such as: • federal government standards, including five-star rating for all new homes.
Stakeholders, ***key personnel and specialists*** (individuals and groups) both within and external to the organisation who have direct or indirect interest in the organisation's conduct, actions, products and services, include:	• clients • employees at all levels of the organisation • government • investors • key personnel within the organisation • local community • specialists outside the organisation who may have particular technical expertise • suppliers

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to be aware of and report potential security risk situations in a retail environment. It requires knowledge and understanding of the range of potential security risks relevant to a retail environment, the types of suspicious customer behaviour, methods for reporting such risks and a basic understanding of legislation which may relate to the identified risk situations.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Application of the unit

This unit of competency has wide application in a range of work roles in the security industry (such as a department store). Competency requires the attainment of knowledge and understanding of potential security risk situations under supervision.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify legislative and organisational requirements.	1.1 Basic ***legislative*** and ***organisational requirements*** relevant to security in a retail environment are identified and explained. 1.2 Organisational ***security procedures*** are identified and explained. 1.3 ***Duty of care requirements*** are identified and explained. 1.4 Own level of authority, role and responsibilities are identified and explained. 1.5 Role of ***designated personnel*** for security response is identified and explained 1.6 ***Occupational Health and Safety*** (***OHS***) ***requirements*** are identified and explained.
2 Identify security risks in a retail environment.	2.1 Potential ***security risks*** relevant to a retail environment are identified and explained. 2.2 ***General procedures for monitoring*** security of a retail environment are identified and explained. 2.3 Factors which increase security risk are identified and explained. 2.4 Types and purpose of ***security equipment*** are identified and explained. 2.5 Emergency and evacuation procedures are identified and explained. 2.6 Procedures for first aid response are identified and explained.
3 Identify retail security risk	3.1 Organisational ***procedures for reporting*** security risks in a retail environment are identified and explained.

ELEMENT	PERFORMANCE CRITERIA
reporting processes.	3.2 Chain of command of designated personnel is identified and explained. 3.3 ***Communication channels*** and ***modes*** are identified and explained. 3.4 ***Communication equipment*** appropriate to the purpose is identified and explained.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- comprehension skills to:
  - explain the basic security legislative requirements which will be applicable to own work environment and role
  - explain the range of potential security risks or incidents relevant to a retail environment
  - explain general procedures for monitoring security in a retail environment
  - explain the general methods for observing potential security risks or suspicious customer behaviour
  - explain the chain of command and communication channels
  - explain security equipment, systems and procedures in accordance with organisational policy
  - explain organisational detection and apprehension procedures
  - explain the types of suspect customer behaviour
  - explain procedures for reporting identified security risks or incidents in a retail environment
- communication and interpersonal skills to:
  - ask effective questions
  - clarify security procedures
  - give accurate verbal or written descriptions of security risks or incidents
  - interpret selected pictorial, graphical and written signs and instructions
  - relay information to others.

Required knowledge

- applicable commonwealth, state or territory legislation relevant to own work environment and role

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- applicable OHS requirements
- communication chain of command
- communication modes and security equipment and systems relevant to own work environment
- duty of care requirements of self and others
- general methods for observing incidents and monitoring risks within a retail environment
- general procedures for emergency, evacuation and first aid response
- general procedures for reporting identified security risks or suspicious customer behaviour
- guidelines for use of force
- organisational procedures for responding to security alarms
- own responsibilities to comply with safe working practices
- potential security risk situations relevant to a retail environment
- role of designated personnel for security response
- signs or indications that items (eg cargo, goods, packages, baggage) have been left unattended or tampered with
- surveillance techniques.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of understanding and knowledge of the following:

- applicable legislative, organisational and OHS requirements relevant to security of a retail environment including duty of care requirements, and own role, responsibilities and level of authority
- applicable organisational policies and procedures and industry codes of practice relevant to security and theft prevention in a range of contexts and situations
- general procedures for emergency, evacuation and first aid response
- general procedures for monitoring a retail environment
- general procedures for reporting identified retail security risks

© Commonwealth of Australia, 2025 Skills Insight

	or suspicious customer behaviour to designated personnel including appropriate communication equipment and modes • the range of potential security risks relating to a retail environment.
Context of and specific resources for assessment	Context of assessment includes: • a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement. Resource implications for assessment include: • access to a suitable venue and equipment • access to plain English version of relevant statutes and procedures • work schedules, organisational policies and duty statements • assessment instruments including personal planner and assessment record book • access to a registered provider of assessment services. Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	This unit of competency should be assessed using questioning of underpinning knowledge and skills.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge. Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical. Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislative requirements may relate to:

- applicable Crimes Acts and Codes
- Australian standards, quality assurance and certification requirements
- Aviation and Maritime Transport Acts and Regulations
- award and enterprise agreements
- consumer law
- general 'duty of care' responsibilities
- privacy and confidentiality
- relevant commonwealth, state and territory legislation which affect organisational operation:
  - anti-discrimination and diversity
  - equal employment opportunity
  - industrial relations
  - OHS
- relevant industry codes of practice
- security licensing or certification
- Trade Practices and Fair Trading Acts.

Organisational requirements may relate to:

- access and equity policy, principles and practice
- client service standards
- code of conduct
- code of ethics
- communication channels and reporting procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- security licensing
- OHS policies, procedures and programs
- organisational goals, objectives, plans, systems and processes
- policies and procedures relating to own role, responsibility and delegation
- reporting systems, procedures and processes.

Security procedures may relate to:

- armed hold-up
- cash and credit cards
- customers eg bag checking
- equipment eg alarms
- keys

© Commonwealth of Australia, 2025 Skills Insight

- premises
- records
- staff
- stock
- sales representatives, contractors or vendors
- surveillance.

Duty of care requirements:

- relate to the legal responsibility under "duty of care" to do everything reasonably practicable to protect others from harm
- may relate to own responsibilities to comply with safe working practices including activities which require licences or certificates of competency.

***Designated personnel* may include**:

- emergency services (eg police, ambulance, fire brigade, emergency rescue)
- first aid officer
- OHS representatives
- security personnel
- supervisor.

Occupational Health and Safety* (*OHS*) *requirements may relate to:

- controlling and minimising risks
- correct manual handling including shifting, lifting and carrying
- first aid
- identifying and reporting hazards and risks
- knowledge of emergency and evacuation procedures
- transporting and storing cash, people, property and dangerous goods
- using and maintaining equipment
- using and maintaining personal protection equipment
- using and storing hazardous materials and substances.

***Security risks* may include**:

- spills eg liquid, chemical
- injury to persons eg customers, sales representatives, contractors or vendors
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons under the influence of intoxicating substances
- persons with criminal intent
- terrorism
- theft
- unattended packages, goods, baggage or cargo
- unattended vehicles in areas not designated for parking
- vandalism
- violence or physical threats.

© Commonwealth of Australia, 2025 Skills Insight

***General procedures for monitoring* may include**:	• following designated organisational procedures • maintaining vigilance and awareness of security while at work to promptly recognise risks or incidents • observing individual or group behaviour • recording details of observed risk situations.
***Security equipment* may include**:	• alarms • dye tags • locked and secure areas • mirrors • surveillance equipment eg cameras, CCTV (Closed Circuit Television).
***Procedures for reporting* security risks may include**:	• completing documentation such as logs, journals and activity reports • completing police reports • completing written and computer reports • contacting designated personnel • recording security risk and incident details • requesting security assistance.
***Communication channels* may include**:	• direct line supervision paths • formal communication pathways • lateral supervision paths • organisational networks.
***Communication modes* may include**:	• alarms • call codes and signs • electronic communication • hand signals • verbal communication • written communication.
***Communication equipment* may include**:	• megaphone • mobile telephone • public address system • telephone • two-way radio.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain effective relations.	1.1 Applicable provisions of ***legislative*** and ***organisational requirements*** relevant to ***assignment instructions*** are identified and complied with. 1.2 Effective ***interpersonal techniques*** are used to develop, support and promote confidence with ***relevant persons***. 1.3 Communication is courteous, professional and sensitive to individual ***social and cultural differences***. 1.4 Personal presentation is maintained in accordance with organisational requirements.
2 Maintain operational safety.	2.1 ***Environmental factors*** are continually monitored, assessed and reviewed to identify distinctive features and any change in characteristics that might indicate unusual or suspicious behaviour. 2.2 Personal safety checks are made on a systematic and routine basis in accordance with organisational procedures. 2.3 Communication is maintained continually throughout security operations using appropriate ***communication channels and processes***. 2.4 ***Resources and equipment*** are maintained and used appropriate to the security operation. 2.5 ***Security risk situations*** are accurately identified and assessed for degree of risk to self, others, property and premises.
3 Respond to security risks.	3.1 ***Response*** is formulated and carried out within scope of own role, competence and authority. 3.2 Changing circumstances are monitored and responses are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	adjusted as required to maintain security.
	3.3 Response initiative maximises the safety and security of self, others, property and premises.
	3.4 Requirements for specialist assistance or advice is identified and promptly sought in accordance with organisational procedures.
	3.5 Relevant ***documentation*** is completed and securely maintained with due regard to confidentiality in accordance with organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- communicate effectively with people from different social, cultural and ethnic backgrounds and of varying physical and mental abilities
- communicate using appropriate channels and communication codes and signals
- determine response appropriate to security risk situation
- facilitate commonsense solutions within operating parameters
- identify and comply with applicable legal and procedural requirements including licensing requirements
- identify and comply with security incident response procedures
- identify security risk factors and conduct risk assessment
- minimise hazards and risks to the health and safety of self and others
- operate security and communications equipment
- present a professional image to members of the public and colleagues
- read, analyse and interpret information
- recognise support and assistance requirements
- record and report information
- select and use equipment appropriate to the security operation.

Required knowledge

- applicable legislative provisions relevant to 'use of force' guidelines and licensing requirements
- bomb threat and counter-terrorism procedures
- communication channels, codes and signals
- documentation procedures and processes

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- emergency and evacuation procedures and instructions
- first aid principles and procedures
- limits of own responsibility and authority
- methods of restraint and associated effects (eg, restraint related injury or death)
- observation and monitoring techniques
- operational principles of security, communication and protective equipment
- premises layout and access points
- principles of effective communication including interpersonal techniques
- reporting structure and processes
- structure and responsibilities of the emergency services agencies
- types of security situations which may be encountered during guarding operations and appropriate responses.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- identifying and assessing all factors which might impact on the safety and security of persons and property
- formulating and implementing appropriate responses or contingency measures to maintain security
- systematically monitoring security activities and varying operational plans as required to meet changing circumstances
- maximising the safety and protection of people involved in incidents while carrying out response activities
- communicating effectively on a one-to-one and group basis with people from a range of diverse backgrounds and of varying abilities
- providing accurate and constructive operational observations and completing documentation in an appropriate style and format.

Context of and specific resources for assessment

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements,

© Commonwealth of Australia, 2025 Skills Insight

performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

Guidance information for assessment

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

© Commonwealth of Australia, 2025 Skills Insight

regional contexts) may also be included.

Legislative requirements may relate to:

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- force continuum, use of force guidelines
- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - Occupational Health and Safety (OHS)
- relevant industry codes of practice
- telecommunications
- trespass and the removal of persons
- use of restraints and weapons:
  - batons
  - firearms
  - handcuffs
  - spray.

Organisational requirements may relate to:

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes

© Commonwealth of Australia, 2025 Skills Insight

	and standards • resource parameters and procedures • roles, functions and responsibilities of security personnel • storage and disposal of information.
Assignment instructions may include:	• assignment purpose and objective • assignment tasks and procedures • assignment timeframe • client identification information • incident and security risk response procedures • monitoring objectives • personal presentation requirements • personal protection equipment • premises location and layout • reporting and documentation requirements • resource and equipment requirements.
Interpersonal techniques may involve:	• active listening • being non-judgemental • being respectful and non-discriminatory • constructive feedback • control of tone of voice and body language • culturally aware and sensitive use of language and concepts • demonstrating flexibility and willingness to negotiate • effective verbal and non-verbal communication • maintaining professionalism • providing sufficient time for questions and responses • reflection and summarising • two-way interaction • use of plain English • use of positive, confident and cooperative language.
Relevant persons **may include**:	• clients • colleagues • emergency services personnel • members of the public • supervisor.
Social and cultural differences **may relate to**:	• dress and personal presentation • food • language • religion • social conventions • traditional practices • values and beliefs.

© Commonwealth of Australia, 2025 Skills Insight

Environmental factors may relate to:	• access to assistance and resources • availability of exits and opportunities for escape • crowds • different degrees of light including low light and darkness • presence of several sources of threat • time of day • weather.
Communication channels and processes may relate to:	• direct line supervision paths • established communication protocols • formal communication pathways • lateral supervision paths • organisational communication networks • verbal and non-verbal communication procedures eg pro-words, phonetic alphabet, call signs, coded messages, use of abbreviations, hand signals.
Resources and equipment **may include**:	• access to emergency services and specialist personnel • back-up personnel • business equipment eg computers and computer applications • communication equipment eg two-way radio, pager, mobile telephone • defensive equipment eg batons, firearm, and the relevant licenses, permits and storage facilities • fire fighting equipment • first aid kit • personal protection equipment • security equipment eg electronic screening equipment, video cameras and monitors, alarms and signals.
Security risks may relate to:	• breaches of law eg criminal damage, offences against people, public order, misuse of drugs and alcohol • emergencies eg fire, scenes of crime, accidents • hazards eg physical, chemical, electrical, psychological, biological • threats eg bombs, sabotage, assassination.
Response **may involve**:	• checking identification • defusing the situation • evacuating the premises • isolating area of potential risk • isolating risk • issuing verbal warnings • notifying relevant emergency services agencies • offering assistance

© Commonwealth of Australia, 2025 Skills Insight

- provision of first aid
- request for support and assistance
- restraint of person
- tactical withdrawal
- use of basic defensive techniques
- use of negotiation techniques.

***Documentation* may include**:

- activity logs
- incident reports
- records of conversation
- request for assistance forms
- running sheets
- vehicle and personnel movements
- written and electronic reports.

CUADES403 Research and apply techniques in spatial design

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to test and apply techniques for the production of models or maquettes for spatial designs.

It applies to individuals who generate ideas and solutions for the layout of spaces. Spatial design solutions are required for exhibitions, fit-outs for exterior spaces or environments, and fit-outs for building foyers and offices, special events and theatre sets.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – design process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and organise requirements	1.1 Interpret requirements of design briefs, in consultation with clients or colleagues 1.2 Research financial, physical and human resources required for developing design concept to prototype stage 1.3 Investigate environmental, ethical and technical factors that impact on selection and use of resources 1.4 Select and prepare resources based on research into designs and approaches used for similar spaces, and relevant standards or

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	legislative requirements
2. Test design approaches	2.1 Produce preliminary visuals 2.2 Experiment with range of techniques and processes to test design approaches 2.3 Evaluate, challenge and refine testing processes 2.4 Critique own work and seek feedback as required 2.5 Document outcomes of testing 2.6 Select final design approach based on outcomes of testing and input from others
3. Make spatial design models or maquettes	3.1 Scope work and determine requirements for object fabrication 3.2 Select and organise materials, tools and equipment for fabrication according to design approach 3.3 Make models or maquettes consistent with design concepts and briefs 3.4 Respond to feedback and refine work as required 3.5 Present models or maquettes within agreed timeframes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4	• Evaluates detailed textual and visual information to determine conceptual and production requirements, including relevant legislation and standards
Writing	1.2, 1.4, 2.5	• Uses clear, specific language and industry-related terminology to document resources information and outcomes from idea development and testing processes
Oral Communication	1.1, 2.4, 2.6, 3.4, 3.5	• Uses questioning and active listening techniques to elicit feedback and confirm understanding • Selects and uses appropriate strategies to respond to feedback and present sample designs to others
Numeracy	1.2, 3.1	• Identifies financial needs from information that may be embedded in texts and calculates resource

© Commonwealth of Australia, 2025 Skills Insight

		requirements
Navigate the world of work	1.3, 1.4	• Understands purpose of own role and related responsibility for compliance with relevant legal and ethical requirements and design standards when planning and undertaking design work
Interact with others	1.1, 2.4, 2.6, 3.4, 3.5	• Collaborates with others to discuss work process and outcomes, elicit feedback and identify improvements • Selects and uses appropriate communication conventions and techniques to respond to feedback and present prototypes to others
Get the work done	1.2, 1.4, 2.1-2.3, 2.6, 3.1-3.4	• Plans, organises and completes tasks required to meet project and time requirements • Makes a series of analytical decisions about design options and appropriate resources required for a range of design outcomes and their representation, using input from others when required • Directs own exploration of techniques and processes, and critically evaluates effectiveness of test samples

Assessment Requirements for CUADES403 Research and apply techniques in spatial design

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- interpret requirements in a design brief in consultation with relevant people
- identify and prepare resources required to respond to the design brief
- test and use a range of approaches and techniques for the design of products, and document the results of testing
- create a prototype based on selected design approach.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline factors that impact on the selection and use of resources
- identify materials, tools and equipment, and their capabilities and application to product design and manufacture
- outline the role of experimentation and testing in the design process
- describe the techniques and processes used to test design approaches
- outline legislation and standards relevant to spatial design.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- spatial design briefs
- equipment, tools and materials used to produce models or maquettes of spatial designs
- a suitable work space.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

FWPCOR2201 Work effectively in the forest and forest products industry

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2201B Work effectively in the forest and forest products industry, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to work effectively in the forest and wood products industry; including meeting the legal and organisational requirements of the job role, prioritising tasks and learning about the industry and its operations. The unit applies to those working in a broad range of roles and in operations of all sizes, including a forest environment, saw mill, wood chip mill, veneer mill, board/plywood mill, timber treatment plant, downstream processing of timber and forest products sales and service.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS ***Elements describe the essential outcomes.***	**PERFORMANCE CRITERIA** ***Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.***
1. Identify and follow legal and procedural requirements	1.1 Identify workplace health and safety, environmental and organisational requirements relevant to working effectively in the forest and forest products industry. 1.2 Check organisational requirements relating to work order. 1.3 Identify organisation's quality standards.
2. Prioritise and complete daily work activities	2.1 Check own role and clarify responsibilities. 2.2 Identify, prioritise and complete work tasks within designated timeframes according to work order. 2.3 Review factors negatively affecting the achievement of work tasks and report to appropriate personnel. 2.4 Select equipment appropriate to work task requirements and use it according to manufacturer instructions. 2.5 Work consistently with organisational and legal requirements for diversity, access and equity, and equal employment opportunity.
3. Identify and access future learning opportunities	3.1 Actively seek feedback on performance to identify areas for improvement. 3.2 Undertake professional development in line with organisational procedures. 3.3 Seek support to assist and improve own performance to achieve personal and organisational goals and objectives. 3.4 Record and report information regarding learning and competency development in line with organisational requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Learning skills to:	• understand the forestry industry and develop own knowledge and skills.
Numeracy skills to:	• calculate time allocation for work tasks.
Oral communication skills to:	• ask others for feedback on performance and to clarify legal and procedural requirements.
Reading skills to:	• follow work order, safety signs and other workplace information.
Writing skills to:	• record and report information.

Assessment Requirements for FWPCOR2201 Work effectively in the forest and forest products industry

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2201B Work effectively in the forest and forest products industry, which was first released with FPI11 Forest and Forest Products Training Package Version 1. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete required tasks that:
  - meet agreed timelines
  - follow organisational protocols
  - meet expected standards for performance
- follow workplace health and safety procedures
- follow organisational policies and procedures.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- life cycle of forests and wood products
- concept of sustainable forest management
- role of forests, forestry and wood products in carbon capture and storage
- workplace safety and emergency procedures including:
  - personal protective equipment and clothing
  - safety equipment
  - first aid equipment
  - fire fighting equipment
  - hazard and risk control

© Commonwealth of Australia, 2025 Skills Insight

  - fatigue management
  - elimination of hazardous materials and substances
  - manual handling including shifting, lifting and carrying and machine guarding
- environmental protection requirements, including the safe disposal of waste material
- organisational structure, reporting channels and procedures for recording workplace information
- established communication channels and protocols
- terms and conditions of employment
- types of tools and equipment relevant to the work role, and procedures for their safe use and maintenance
- applicable Commonwealth, State or Territory legislation, regulations, standards, codes of practice and established safe practices relevant to the specific job role in forestry operations.

Assessment Conditions

The following resources must be made available:

- job specifications and work order
- organisational policies and procedures.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Assessment Requirements for FWPCOR2202 Communicate and interact effectively in the workplace

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2202B Communicate and interact effectively in the workplace, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow site, legal and organisational requirements and protocols relevant to communicating effectively in the workplace
- participate effectively in verbal communications
- use workplace communication equipment
- respond to workplace signs and aural signals
- use hand signals effectively
- complete written documentation to the standard required in the workplace
- maintain effective workplace relationships.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- legal and organisational requirements and codes of practice relevant to communication in the workplace
- basic principles of effective written and verbal communication
- basic principles of effective working relationships
- knowledge of hand signals appropriate to job tasks and work site
- organisational standards for the presentation of written communication

© Commonwealth of Australia, 2025 Skills Insight

- awareness of social and cultural differences that occur in the workplace.

Assessment Conditions

The following resources must be made available:

- legal and organisational requirements and codes of practice relevant to communication in the workplace
- workplace communication equipment
- personal protective equipment for communicating and interacting in the workplace
- a workplace in which to communicate effectively and maintain relationships
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOR2203 Follow environmental care procedures

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2203B Follow environmental care procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to identify, maintain and monitor environmental work practices: including recognising basic environmental risks and hazards, and implementing environmental policies and workplace or industry practices, with the aim of improving environmental care practices.

The unit applies those working in a broad range of job roles across different work settings, in a forest or harvesting environment, including saw mill, wood chip mill, veneer mill, board/plywood mill, timber treatment plant, forest products factory, and forest products sales and service, horticultural, domestic, local council and emergency services.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOR2203 Follow environmental care procedures

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2203B Follow environmental care procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow site, legal and organisational requirements and protocols relevant to environmental care
- identify environmental hazards and risks that could occur in their own work setting
- calculate the probability and consequences of those risks
- respond to environmental risks safely and according to site procedures and scope of responsibility within the workplace.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- legal and organisational requirements and codes of practice relevant to environmental care
- environmental protection requirements related to the work setting and work role
- organisational and site standards relevant to environmental care procedures
- environmental care policies and practices
- risk management, hazards and hazard identification
- established workplace and site specific communication channels and protocols
- types of tools and equipment and procedures used in response to environmental hazards and risk, and the safe use and maintenance of these tools
- procedures for recording and reporting workplace and site specific information.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

The following resources must be made available:

- resources that would be used for environmental care
- organisational and site policies and procedures for environmental care.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOR2204 Follow fire prevention procedures

Modification History

Release	Comment
1	Replaces equivalent FPICOR2204B Follow fire prevention procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prevent fires during normal work activities. It includes the use of fire extinguishing equipment and methods for detecting fire risks.

The unit applies to those working in a broad range of job roles across different work settings in a forestry environment: including saw mill, wood chip mill, veneer mill, board/plywood mill, timber treatment plant, forest products factory, and forest products sales and service, horticultural, domestic, local council and emergency services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for fire prevention	1.1 Review work order for policies and procedures for fire prevention, and check wih appropriate personnel 1.2 Identify and report existing and potential fire risks and hazards to appropriate personnel 1.3 Select appropriate fire extinguishing equipment for fire prevention 1.4 Follow workplace procedures, work instructions and legislation for fire prevention 1.5 Establish and maintain communication with others according to WHS requirements
2. Implement fire prevention activities	2.1 Eliminate or reduce fire risks and hazards and report in accordance with workplace procedures 2.2 Recognise signs of fire and raise alarm at appropriate time, according to workplace procedures 2.3 Select, check, use and store fire extinguishing equipment appropriately for the nature and type of fire 2.4 Access training and/or professional development to maintain currency of competence in assessing fires, responding to fires, and in using and/or accessing, fire extinguishing equipment 2.5 Notify appropriate personnel and complete incident and other required reports about the fire 2.6 Record and report fire prevention procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for FWPCOR2204 Follow fire prevention procedures

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2204B Follow fire prevention procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify problems and equipment faults that might lead to fires, and recognise signs of fires
- select and use fire extinguishing equipment
- follow site, legal and organisational requirements and protocols relevant to fire procedures in the workplace
- locate, record and report information about fires.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- legal and organisational requirements and codes of practice relevant to the full range of processes for fire prevention
- environmental protection requirements, including the safe disposal of waste material
- organisational and site policies and procedures for fire prevention
- environmental risk assessment and hazard identification for:
  - flammable liquid and gases that might be used or found in the workplace
  - storage areas for flammable liquids or gases
  - mixing and blending vessels for flamable liquids or gases
- types of tools and equipment, and their safe use, for fire prevention

© Commonwealth of Australia, 2025 Skills Insight

- procedures for recording and reporting workplace information
- signs of fire
- personal protective equipment and its fire protection properties
- fire weather evaluation.

Assessment Conditions

The following resources must be made available:

- fire extinguishers
- policies and procedures for fire prevention
- personal protective equipment.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOR2205 Follow WHS policies and procedures

Modification History

Release	Comment
1	Replaces equivalent, FPICOR2205B Follow OHS policies and procedures which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

The unit of competency describes the outcomes required to follow WHS policies and procedures: it covers risk identification and emergency procedures that could reasonably be expected to occur in a forestry or wood products environment.

The unit applies to applies to those working in a broad range of job roles across different work settings, including a forest environment, saw mill, wood chip mill, veneer mill, board/plywood mill, timber treatment plant, forest products factory, and forest products sales and service, horticultural, domestic, local council and emergency services.

Licensing, legislative, regulatory or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. In some states, this unit is one of a group of units required to obtain a Forest Operator Licence.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Follow safe work practices	1.1 Identify organisational and site WHS policies and procedures. 1.2 Operate and use tools, equipment and machinery appropriate to work task and according to manufacturer's recommendations. 1.3 Select, use and store personal protective equipment and clothing appropriate to work task requirements. 1.4 Use plant and equipment guards according to manufacturer's specifications. 1.5 Identify and follow safety signs and symbols.
2. Identify risks	2.1 Identify existing and potential hazards in the work area and report to appropriate personnel. 2.2 Identify WHS issues and risks in the work area and report to appropriate personnel. 2.3 Follow workplace procedures and work instructions for controlling risks and protecting the environment. 2.4 Complete hazard, accident or incident reports accurately and clearly and according to organisational policies and procedures.
3. Follow emergency procedures	3.1 Notify appropriate personnel in the event of an emergency. 3.2 Follow workplace procedures for dealing with accidents and emergencies. 3.3 Practise emergency and evacuation procedures and carry out emergency and evacuation procedures in the event of an emergency. 3.4 Record and accurately report emergencies and evacuation procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Reading skills to:	• understand safety signs and symbols • understand manufacturer’s specifications for plant and equipment guards

© Commonwealth of Australia, 2025 Skills Insight

	• understand organisational policies and procedures.
Numeracy skills to:	• use a risk matrix and calculate risk • estimate weight and volume, and establish centre of gravity.
Writing skills to:	• complete a hazard report clearly and legibly
Communication skills to:	• notify and report hazards to appropriate personnel.
Problem solving skills to:	• manage risks and respond to hazards.

Assessment Requirements for FWPCOR2205 Follow WHS policies and procedures

Modification History

Release	Comment
1	Replaces superseded equivalent, FPICOR2205B Follow OHS policies and procedures which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify risks and hazards in the workplace and implement appropriate actions to address those risks and hazards
- use and maintain personal protective equipment and clothing to ensure their own safety
- follow emergency and evacuation procedures
- interpret and follow safety signs and symbols
- complete and maintain workplace information, records and reports about hazards, risks and incidents.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- legal and organisational requirements and codes of practice relevant to WHS
- enterprise and site standards, policies and procedures for WHS, as they apply to the job role
- environmental risks and hazard identification
- hazard and risk control
- equipment used for workplace health and safety, and procedures for its safe use and maintenance
- personal protective equipment and clothing and its properties
- firefighting equipment

© Commonwealth of Australia, 2025 Skills Insight

- fatigue management
- elimination of hazardous substances
- machine guarding
- manual handling including shifting, lifting and carrying
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- personal protective equipment
- organisational policies and procedures
- manufacturer's instructions for the safe use of equipment.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOR2207 Maintain quality and product care

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2207B Maintain quality and product care, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

The unit of competency describes the outcomes required to maintain and monitor the quality of one's own personal output, as well as of the products being produced according to work health and safety (WHS) policies and procedures. The unit includes using timber technology to assess timber products in order to maintain their quality and care.

It applies to hardwood and softwood cell structured timber, native and imported species of timber, and in a variety of work settings, including a forest environment, a saw mill, wood chip mill, veneer mill, board/plywood mill, timber treatment plants, downstream processing of timber, forest products factory, forest products sales and service, horticultural, domestic, local council and emergency services environment.

This unit is relevant for a broad range of job roles across a range of industry sectors.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS Elements describe the essential outcomes.	PERFORMANCE CRITERIA Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare to maintain quality output.	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify quality system procedures to be applied to own work. 1.3 Visually inspect products before processing in line with WHS policies and procedures. 1.4 product specification requirements.
2. Use technology to assess timber.	2.1 Classify species and timber structure and confirm with appropriate personnel as required. 2.2 Locate timber features and compare them with product specification requirements. 2.3 Evaluate timber characteristics and record drying or treatment requirements as required by the enterprise. 2.4 Assess visual appearance of timber and report in line with workplace procedures and organisational requirements.
3. Monitor and control product care.	3.1 Monitor product recovery to optimise resource value and minimise waste. 3.2 Check potential of materials to provide the highest value add return with appropriate personnel. 3.3 Regularly maintain and adjust machinery and equipment to minimise waste and damage. 3.4 Identify problems as they occur and promptly report them to appropriate personnel to avoid producing de-valued product. 3.5 Record and report on quality and product care procedures in line with workplace procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• establish and maintain communication with others in the workplace while working with products to ensure own safety and that of others.
Reading skills to:	• read at times complex workplace procedures and product documentation.
Numeracy skills to:	• estimate and measure products and compare them to specifications.
Problem solving skills to:	• identify and interpret work requirements.

Assessment Requirements for FWPCOR2207 Maintain quality and product care

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR2207B Maintain quality and product care, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to maintaining quality and product care
- maintain quality and product care in line with workplace procedures and environmental care
- maintain effective communication and safe work practices.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace procedures relating to the maintenance of quality and product care specified in performance evidence:
  - communicating product requirements and work output
  - product care and processing
  - identifying and resolving faults with product
  - maximising product or resource use
  - assessing timber for recovery
  - recording and reporting workplace information
- product specifications in relation to:
  - specifications set for optimisation of timber set in line with the available resource

© Commonwealth of Australia, 2025 Skills Insight

  - customer requirements
  - industry standard cross sections and lengths
  - enterprise standards
- environmental protection requirements in relation to:
  - identifying environmental hazards and identifying their risk
  - safely disposing of waste material
  - organisational guidelines for recycling defective product, off-cuts and residue
  - minimising carbon emissions
  - minimising impact of the use of machinery and equipment on the environment
- mathematical procedures for estimating and measuring product against specifications
- optimisation of timber
- requirements of the following quality systems that would apply to product care and quality:
- enterprise-based system
- ISO9000 series
- second party certification
- third party certification
- types of tools and equipment used in the product process, and procedures for their safe use and maintenance
- assessing visual appearance of products including:
  - appropriateness of defects
  - contamination
  - timber colours
  - insect attack
  - surface finishes
  - holes
  - breakages
  - machine caused defects
- work health and safety policies and procedures relevant to product care and quality:
  - personal protective equipment and clothing
  - safety equipment
  - first aid equipment
  - hazard identification and risk control
  - fatigue management
  - elimination of hazardous materials and substances
  - identifying hazards in the work process and assessing and controlling their risk
  - manual handling techniques
  - machine isolation and guarding.

Elements and Performance Criteria

ELEMENTS Elements describe the essential outcomes.	**PERFORMANCE CRITERIA** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Apply SHE practices	1.1 Identify safety, health and environmental policies and procedures policies and procedures. 1.2 Identify and assess organisational environmental goals. 1.3 Monitor environmental measures. 1.4 Perform tasks in a safely, legally and in accordance with organisational SHE policies and procedures. 1.5 Organise duties, equipment and materials in line with SHE requirements and organisational procedures.
2. Assess and control risks	2.1 Identify and assess SHE issues and hazards in the work area. 2.2 Address issues and control hazards, or escalate issue where necessary. 2.3 Analyse and improve work practices to address SHE issues. 2.4 Complete SHE, hazard, environmental or incident reports in line with organisational procedures.
3. Follow emergency procedures	3.1 Identify and contact appropriate personnel in an emergency. 3.2 Follow workplace procedures for dealing with own safety, safety of others, environmental incidents, accidents, and emergencies within scope of responsibilities. 3.3 Practise, implement and record emergency and evacuation procedures as required. 3.4 Record and report SHE incidents in line with workplace procedures.
4. Implement environmental procedures	4.1 Identify and assess organisational environmental goals 4.2 Implement training and operational controls in line with workplace procedures 4.3 Monitor environmental measures and take corrective action if required in line with workplace procedures. 4.4 Integrate care for the environment into all day-to-day activities.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure and monitor environmental performance.
Oral communication skills to:	• escalate issues requiring attention. • communicate with colleagues about risks and hazards.
Reading skills to:	• interpret policies and procedures.
Writing skills to:	• make reports about incidents.
Intitatve and enterprise skills to:	• find safer and more environmentally ways of working.

Assessment Requirements for FWPCOR3202 Conduct quality and product care procedures

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR3202B Conduct quality and product care procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to conducting quality and product care procedures
- conduct quality and product care procedures in line with environmental legislation and workplace procedures
- record and report workplace information and maintain documentation in regard to the product care and control.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace procedures relating to product quality and care specified in performance evidence:
  - communicating product requirements and outcomes of product review
  - identifying and resolving faults with product
  - recording and reporting workplace information
  - maximising product or resource use
  - assessing timber for recovery
- environmental protection requirements in relation to:
  - safely disposing of waste material

© Commonwealth of Australia, 2025 Skills Insight

    - organisational guidelines for recycling defective product, off-cuts and residue
- indicators of sub-standard product:
    - breakages
    - contamination
    - holes
    - insect attack
    - machine-caused defects
    - variable surface finishes
    - timber colour
- mathematical procedures for estimating and measuring product against specifications
- requirements of the following quality systems that would apply to product care and quality:
    - enterprise-based system
    - ISO9000 series
    - second party certification
    - third party certification
- specifications of the products being processed
- types of tools and equipment used in the product process, and procedures for their safe use and maintenance
- work health and safety policies and procedures relevant to product care and quality:
    - personal protective equipment and clothing
    - safety equipment
    - eliminating hazardous materials and substances
    - first aid equipment
    - identifying hazards in the work process and assessing and controlling their risk
    - managing fatigue
    - manual handling techniques
    - machine isolation and guarding.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must:

hold the appropriate competency standards as outlined in the regulations; and

be able to demonstrate vocational competencies at least to the level being assessed; and

be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Assessment Conditions

The following resources must be made available:

- product and equipment relevant to undertaking work applicable to this unit

© Commonwealth of Australia, 2025 Skills Insight

- product specification manuals
- work instructions and procedures:
- customer service procedures
- product care procedures
- quality system information
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOR3203 Evaluate fire potential and prevention

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR3203B Evaluate Fire Potential and Prevention, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit describes the outcomes required to continually monitor and assess the potential for fire during normal work activities. The unit includes implementing basic fire prevention measures.

The unit applies to those working in a range of job roles across the forestry and forest products industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare for fires	1.1 Identify policies and procedures for fire prevention and evacuation. 1.2 Ensure that fire prevention and fire extinguishing equipment and systems are operational. 1.3 Participate in fire drills and clarify roles and responsibilities for fire events. 1.4 Plan evaluation processes in line with site procedures.
2. Assess fire potential	2.1 Monitor weather conditions and inspect reports for changing conditions including storms and high winds. 2.2 Monitor equipment conditions for overheating and electrical sparking. 2.3 Check hazardous and flammable substances to assess the potential for spillage and combustion. 2.4 Report potential of fire to appropriate personnel.
3. Prevent fires	3.1 Control fire risks and hazards in line with designated responsibilities and workplace procedures. 3.2 Handle hazardous or flammable substances in line with WHS and environmental management regulations. 3.3 Recognise signs of fire potential and raise alarm. 3.4 Record and report fire potential and prevention activity.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Reading skills to:	• interpret information about flammable substances • monitor weather conditions • interpret evacuation procedures.
Writing skills to:	• record and report on activity and monitoring.
Problem solving skills to:	• respond to fire risks.

Assessment Requirements for FWPCOR3203 Evaluate fire potential and prevention

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR3203B Evaluate fire potential and prevention, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures for fire potential and prevention
- follow applicable licensing or certification requirements
- identify and safely store flammable substances
- use and maintain personal protective equipment and clothing
- complete and maintain workplace information, records and reports.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- organisational policies and procedures for fire prevention
- fire types including:
  - wildfires
  - electrical storm induced fires
  - arson
  - accidental fires
  - electrical fires
- fire prevention methods including:
  - cutting fire breaks
  - clearing undergrowth

© Commonwealth of Australia, 2025 Skills Insight

    - ensuring combustible materials are safely stored
    - ensuring the work area is clear of waste and that exits are accessible
    - quarantining equipment to be serviced in line with workplace procedures
- fire service approved fire suppression extinguishing agents
- extinguishers for fires that are:
    - electrical
    - chemical
    - gas
    - mechanical
    - paper
    - wood or natural fires
- weather conditions and their effect on fires:
    - high winds
    - electrical storms
    - lightning strikes
    - excessive heat and low humidity
- fire risks including:
    - welding or grinding sparks
    - dry undergrowth
    - potential of equipment use and unsafe work practices to create fire
    - combustible materials including dry or dead scrub, tall grasses, rubbish, oily rags
    - waste material proximity to equipment
    - flammable liquids
    - inappropriate storing of materials and equipment
    - blocked or no access and exit
- safe methods for storing flammable, combustible or waste materials
- methods for controlling vegetation to minimize fire risks
- requirements for fire breaks.

Assessment Conditions

The following resources must be made available:

- policies and procedures for fire prevention
- fire evacuation plans
- fire extinguishers and fire retardants
- personal protective equipment.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

© Commonwealth of Australia, 2025 Skills Insight

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for assessing	1.1 Review and clarify work order and site procedures for visual assessment processes with appropriate personnel. 1.2 Identify and confirm material to be visually assessed. 1.3 Select equipment for assessing, check operational effectiveness and review manufacturer's instructions. 1.4 Review options for processing operations following assessment. 1.5 Prepare to work safely.
2. Visually assess material	2.1 Visually assess characteristics and defects of material against industry standards. 2.2 Mark defects for treatment or sawing according to organisational and site procedures. 2.3 Record and report assessment outcomes and distribution problems.
3. Distribute material	3.1 Move materials to storage or processing operations according to site procedures. 3.2 Dispose of sub-standard materials in line with site requirements. 3.3 Monitor on-site movement of material to ensure intended flow is achieved. 3.4 Label storage according to site procedures.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Elements and Performance Criteria

ELEMENTS Elements describe the essential outcomes.	**PERFORMANCE CRITERIA** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Monitor safety, health and environment (SHE) practices	1.1 Monitor tasks in a safe manner in line with legislative requirements and environmental management systems, organisational policies and procedures 1.2 Monitor organisation of duties, equipment and materials in line with SHE requirements and organisational procedures 1.3 Establish and maintain communication with others in line with SHE requirements
2. Monitor and assess risks	2.1 Monitor and assess hazards in the work area, and report to designated personnel. 2.2 Monitor and assess SHE issues and risks in the work area, and report to appropriate personnel 2.3 Analyse work practices and processes to identify areas for improvement in relation to SHE issues and risks 2.4 Determine and implement changes to work practices and processes to improve SHE concerns 2.5 Monitor workplace procedures and work instructions for controlling risks and protecting the environment 2.6 Check SHE or incident reports to ensure they are in line with workplace procedures and State or Territory legislation
3. Monitor emergency procedures	3.1 Monitor appropriate personnel verification in an emergency. 3.2 Monitor workplace procedures for dealing with own safety, safety of others, environmental incidents, accidents, and emergencies within scope of responsibilities 3.3 Monitor emergency and evacuation procedures after an emergency, and make suggestions to appropriate personnel about lessons learnt and changes required 3.4 Record and report SHE procedures in line with workplace procedures
4. Monitor environmental procedures	4.1 Monitor and record community and organisational environmental goals

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	4.2 Monitor training and operational controls to ensure they are in line with workplace procedures 4.3 Check and monitor environmental measures for corrective action 4.4 Integrate care for the environment into all day-to-day activites 4.5 Conduct progress reviews to assess impact on the environment

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure and monitor environmental performance.
Oral communication skills to:	• escalate issues requiring attention. • communicate with colleagues about risks and hazards.
Reading skills to:	• interpret policies and procedures.
Writing skills to:	• make reports about incidents.
Intitatve and enterprise skills to:	• find safer and more environmentally ways of working.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice relevant to monitoring and reviewing forestry operations
- follow organisational policies and procedures relevant to monitoring and reviewing forestry operations
- monitor and review operational policies and procedures within the organisation
- develop new and flexible approaches for conducting forestry operations
- measure improvement outcomes.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable Commonwealth, State or Territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for monitoring and reviewing forestry operations
- environmental protection and care requirements including:
  - environmental sustainability
  - protection of water courses and water quality
  - soil and salinity management
  - reduction and disposal of waste

© Commonwealth of Australia, 2025 Skills Insight

  - energy efficiency
  - biodiversity and habitat protection
  - conservation of natural resources
  - fire management
- organisational and site standards, requirements, policies and procedures relevant to monitoring and reviewing forestry operations
- sustainable procurement practices, including selecting products and services on the basis of how they minimise and monitor their impact on the environment
- types of equipment used in forestry operations, their procedures for use, operation and maintenance
- forestry operations, techniques and technology, including:
  - improvement of timber technology methodologies
  - on-site forestry operations
  - ancillary forest operations
- environmental risks and hazard identification
- environmental management systems, including:
  - compliance, improvement and prevention
  - continuous cycle of plan, implement, monitor, review and improve environmental practices and systems
- established communication channels and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- access to a forestry operation
- applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice relevant to monitoring and reviewing forestry operations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Core

Elements and Performance Criteria

ELEMENTS Elements describe the essential outcomes.	PERFORMANCE CRITERIA Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Coordinate quality system practices	1.1 Communicate quality standards, policies, procedures and quality assurance monitoring activities to production personnel. 1.2 Confirm understanding, encourage and support participation in

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	quality practices. 1.3 Monitor operational activities to ensure policies and procedures are followed and quality standards are maintained. 1.4 Check product specifications and coordinate workplace compliance. 1.5 Record and report quality and product care outcomes for all monitoring processes.
2. Monitor and control product care	2.1 Coordinate visual inspection of product before processing or completion. 2.2 Plan product recovery to optimise resource value and minimise waste. 2.3 Plan potential of materials to provide highest value added return. 2.4 Monitor assessment of species, timber structure, features and characteristics and report in line with organisational procedures. 2.5 Monitor material grading and direct to best end use in line with industry standards. 2.6 Monitor machinery and equipment maintenance and adjust to minimise production waste. 2.7 Assess problems immediately and rectify to avoid repetition of lost product.
3. Control product supply quality	3.1 Assess products against quality and customer specifications. 3.2 Monitor and control product despatch processes to prevent and minimise damage. 3.3 Ensure products are supplied on time and to customer expectations.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret complex numerical data in quality standards, product specifications and production reports relating to dimensions, volume and grades.
Oral communication skills to:	• provide clear and unambiguous information about quality standards, policies, procedures and quality assurance monitoring activities to production personnel.

© Commonwealth of Australia, 2025 Skills Insight

Reading skills to:	• interpret familiar and detailed organisational policies and procedures and complex documents: • quality standards • quality system monitoring records
Writing skills to:	• maintain accurate comprehensive quality system records • produce detailed reports on performance against quality standards.
Initiative and enterprise skills to:	• generate ideas for maximising resources and minimising waste.
Planning and organising skills to:	• coordinate all aspects of the organisation's quality system using specified quality standards to guide activities.
Problem-solving skills to:	• identify deficiencies in production practices and implement timely responses to ensure quality outcomes and compliance with quality standards. • monitor and assess production activities and rectify problems swiftly.
Self-management skills to:	• critically, rationally and logically analyse production performance against quality standards.
Teamwork skills to:	• take a lead role and work as part of a team to achieve compliance with quality standards.

Technology skills to:	• optimise the capabilities of machinery and equipment
	• use:
	  • a computer, keyboard and printer
	  • the system capabilities and functions of a word processing software to produce and file quality system documents.

Assessment Requirements for FWPCOR4203 Monitor quality and product care procedures

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR4203B Monitor quality and product care procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to monitoring of quality and product care procedures
- monitor and control product care and supply against an organisation specific or second or third party certification quality system for a real or simulated business operation
- monitor and control product care and supply for a specified product
- complete accurate comprehensive quality system records
- produce detailed reports on performance against quality standards.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose of quality systems for the forest and wood products industry and for the individual organisation
- format, content and use of:
  - industry and organisation specific quality standards
  - organisational policies and procedures that align to quality standards
  - quality system monitoring records
- visual inspection aspects of tree, log or timber products which includes:
  - assessing the appropriateness of features

© Commonwealth of Australia, 2025 Skills Insight

  - contamination
  - tree, log or timber colours
  - tree, log or timber characteristics
  - insect damage
  - surface finish and texture
  - loose surfaces
  - organic defects
  - breakages
  - machine damage
- scheduling requirements for quality system monitoring activities
- record keeping requirements for quality systems
- roles and responsibilities of quality system coordinators and production personnel in quality system management processes
- methods for communicating quality standards, policies, procedures and quality assurance monitoring activities to production and despatch personnel
- methods for assessing quality of materials, production and despatch processes and finished products
- techniques to optimise the use of machinery and equipment
- organisational procedures for documenting quality system records and reports.

Assessment Conditions

The following resources must be made available:

- computers, keyboards, printers and software used to produce and maintain quality system records and reports
- industry and organisation specific quality standards
- a suite of organisational policies and procedures that align to the quality standards
- template quality system monitoring records and reports
- schedules for quality system monitoring activities
- comprehensive real or simulated information in order to coordinate and monitor quality processes
- organisational policies and procedures for documenting quality system records and reports
- production personnel with whom the individual can interact.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

1	Replaces equivalent unit FPICOR6201A Manage sustainability in the workplace which was first released with FPI11 Forest and Forest Products Training Package Version 2.2

Application

This unit of competency describes the outcomes required to design and manage approaches to sustainability, including the development and implementation of sustainability policies across a range of forest and wood products industry workplaces and operations of all sizes.

The unit applies to job roles including Forest/Timber Harvester, Forest Planner, Forest Sustainability Manager, Forestry Manager, General Manager, Plantation Manager, Sustainability Manager, Technical Forester and Technical Services Manager.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Evaluate workplace sustainability requirements	1.1 Assess existing organisational policies and procedures for sustainability. 1.2 Conduct research to define scope of organisational sustainability requirements. 1.3 Consult stakeholders as a key component of the research process. 1.4 Document recommendations based on research outcomes and provide feedback to appropriate personnel and stakeholders.
2. Design policy	2.1 Design policy that reflects organisational commitment to sustainability as an integral part of business planning. 2.2 Develop and circulate draft policy to stakeholders and appropriate personnel for feedback. 2.3 Review and revise policy, based on feedback. 2.4 Agree, document and communicate appropriate strategies for implementation to stakeholders
3. Manage policy implementation	3.1 Establish timelines and budget for implementation. 3.2 Allocate resources to the implementation process, in line with timelines and budget. 3.3 Assign implementation responsibilities to appropriate personnel and advise expected outcomes. 3.4 Establish targets and indicators to maximise policy outcomes. 3.5 Establish processes to facilitate policy implementation.
4. Review policy	4.1 Evaluate changing trends and consider opportunities for improved workplace sustainability policy. 4.2 Monitor reports for feedback that supports continuous improvement of sustainability practices. 4.3 Regularly evaluate policy and modify to enhance sustainability practices.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• Interpret and calculate complex numerical data to establish and

	manage budgets.
Oral communication skills to:	• Hold high-level consultative discussions to generate ideas for and negotiate content of sustainability policies.
Reading skills to:	• Interpret complex information in a range of internal and external source documents to plan organisational sustainability policy.
Writing skills to:	• Develop and document comprehensive sustainability policies in a style and format easily understood by the full scope of organisational employees.
Planning and organising skills to:	• Source, collect and organise a range of data to inform sustainability policies. • Plan and manage own timing and productivity to complete initial and amended policies, budgets and implementation plans.
Technology skills to:	• Use a computer, keyboard and software to prepare policies, budgets and plans.

Assessment Requirements for FWPCOR6201 Manage sustainability in the workplace

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR6201A Manage sustainability in the workplace which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Manage the policy development and implementation process for one of the following types of sustainability policies:
  - economic
  - social
  - environmental.
- Produce a detailed written policy.
- Determine, document and communicate key targets and performance indicators for the success of the sustainability policy.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Purpose and key content of environmental or sustainability laws applicable to the forest and wood products industry and organisation.
- Key content of current government and industry sustainability initiatives, codes of practice and guidelines.
- Features, at an in-depth level of understanding, of different aspects of sustainability, including:
  - economic
  - social
  - environmental

© Commonwealth of Australia, 2025 Skills Insight

- Impacts of forest and wood products industry production process on the environment and environmental protection practices, at an in-depth level of understanding, for:
  - reducing water and energy use
  - cleaning of plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
  - reducing use of toxic materials and hazardous chemicals
  - minimising resource use through changes in process, facility design and management.
- Processes and practices for managing sustainability in the workplace, including:
  - internal and external consultation
  - gathering and responding to feedback
  - policy development
  - policy implementation
  - evaluating and modifying policy.
- Format, content and use of policy documents.
- Targets and performance indicators for effectiveness of sustainability practices and methods of communicating these to team members.
- Methods to monitor and respond to organisational performance in managing sustainability.

Assessment Conditions

The following resources must be made available:

- Computers, keyboards, printers and software used to prepare budgets, document policies and implementation plans.
- Comprehensive information about the operation of a real or simulated business to determine sustainability management requirements.
- Documents and proformas commonly used in the management of sustainability, such as:
  - worksheets
  - record and data collection sheets
  - sustainability policies.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOR6202 Implement practices to maximise value from wood residues

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR6202A Implement practices to maximise value from wood residues which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the outcomes required to evaluate and implement effective wood management practices that ensure maximum product value recovery and adherence to environmentally sustainable principles. It can apply to the full scope of forest and wood products industry workplaces and to operations of all sizes.

The unit applies to job roles including Designer (Manufacturing and Engineered Wood Products), Environmental Planner and Manager, Forest Planner, Forest Sustainability Manager, Forestry Manager, General Manager, Plantation Manager, Sustainability Manager, Technical Forester, Technical Services Manager and Value Recovery Officer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	**PERFORMANCE CRITERIA** *is used, further information is detailed in the range of conditions.*
1. Scope a value maximisation plan	1.1 Review management plans and organisational priorities with respect to value maximisation requirements 1.2 Identify required production authorisations, determine timeline and budget and check with appropriate personnel. 1.3 Determine applications and demand for wood and residue material and document in line with organisational procedures. 1.4 Determine and document any special process requirements and product value chain. 1.5 Consult with stakeholders to obtain input to the plan. 1.6 Determine and document most appropriate value maximisation options for the organisation or site.
2. Develop and document a value maximisation plan	2.1 Identify legal, organisational, environmental protection and best practice parameters governing wood management practices. 2.2 Determine and document in the plan the most appropriate value maximisation practices for the organisation or site. 2.3 Document methodology, schedule, budget and legal requirements for implementation of value maximisation practices 2.4 Define technology, materials and resources required for implementation of value maximisation plan 2.5 Develop value maximisation plan and submit to the appropriate personnel for approval.
3. Implement value maximisation practices	3.1 Implement value maximisation practices identified in the plan in line with methodology, schedule, budget and legal requirements. 3.2 Obtain required authorisations for use of technology, materials and resources. 3.3 Communicate production schedule for value maximisation plan to appropriate personnel. 3.4 Establish processes to monitor implementation of the plan.
4. Review and improve value maximisation practices	4.1 Monitor value maximisation plan and review against methodology and production schedule. 4.2 Analyse information and data to determine effectiveness of value maximisation practices. 4.3 Prepare improvement recommendations based on information, data analysis and consultative processes. 4.4 Record and report outcomes to appropriate personnel.

Assessment Requirements for FWPCOR6202 Implement practices to maximise value from wood residues

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR6202A Implement practices to maximise value from wood residues which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Manage the development, implementation and evaluation process for one wood value maximisation plan.
- Produce a detailed written plan with clearly identified value maximisation practices.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Purpose and key content and of legislation or regulation applicable to wood management practices.
- Key content of current government and industry initiatives, codes of practice and guidelines relevant to wood management practices.
- Different applications for wood and residue material, markets and general market value, including:
  - poles
  - piles and bridge timbers
  - veneer logs
  - saw logs
  - chip logs
  - charcoal logs
  - woody biomass
  - structural and non-structural timbers

© Commonwealth of Australia, 2025 Skills Insight

    - timber composites
    - timber panel products
    - timber engineered products
    - eucalyptus oil
    - extractives.
- Potential uses for wood residues and by products, markets and general market value
- Production practices that avoid or reduce wood residues.
- Role of wood or waste products in generating renewable energy through biomass.
- Types of authorisations, permits and licences relating to the following:
    - sites or properties
    - hours of operation
    - use and application of chemicals
    - environmental issues.
- Processes and practices for:
    - internal and external consultation
    - developing and implementing value maximisation plans
    - collecting and analysing relevant data
    - evaluating and modifying plans.
- Format, content and use of value maximisation plans.

Assessment Conditions

The following resources must be made available:

- Computers, keyboards, printers and software used to prepare budgets and document plans.
- Comprehensive information about the operation of a real or simulated business to determine value maximisation practices.
- Documents and proformas commonly used to plan, implement, review and improve value maximisation practices, including:
    - worksheets
    - budgets
    - policies and procedures
    - value maximisation plans.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and

FWPCOT2201 Stack and bind material

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2201B Stack and bind material, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to stack material, manually build packs and apply strapping and wrapping. Work is completed in a wood products factory setting.

The unit applies to Sawmill Worker, Production Worker, Manufacturing Assistant.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPCOT2201 Stack and bind material

Modification History

Release	Comment
1	Replaces equivalent FPICOT2201B Stack and bind material, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to stacking and binding materials
- identify materials using visual assessment or measurement processes to allocate standard sizes
- build packs manually following site standards for dimension, component numbers, end and vertical alignment and bearer quality
- apply protective strips to packs
- apply wrapping to packs to prevent water penetration during storage and transportation
- strap packs
- label packs ready for storage or transportation.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- methods of visual estimation, grading, colour identification and tagging of at least one of the following materials
  - sawn or dressed finished timber
  - differing timber species
  - preservative treated timber, including water borne preservatives and light organic solvent preservatives (LOSP)

© Commonwealth of Australia, 2025 Skills Insight

  - panel types , including laminated veneer, chipboard, fibreboard, medium density fibreboard and boards made from material other than wood.
  - panels with various treatments, coatings and hardware items
- range of industry standard lengths, cross sections, appearance grades and applicable terminology
- purpose, features and operation of equipment used to manually build packs
- methods used to build, wrap and strap packs
- requirements for quality and dimensions of bearers
- organisational policies and procedures specific to stacking and binding material:
  - workplace health and safety with particular emphasis on use of personal protective equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
  - labelling products for identification
- environmental protection practices for stacking and binding material:
  - reducing water and energy use
  - disposing of, recycling and reusing timber and other waste.
  -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to manually build packs
- hand-held equipment used to tighten straps
- personal protective equipment suitable for stacking and binding material
- commercial quantities of materials to be stacked, wrapped and strapped
- timber products from which to build packs
- consumable strapping, packaging and labelling materials
- work order with specific instructions for stacking and binding material
- template documents for recording production outcomes and equipment faults
- organisational policies and procedures for stacking and binding material.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

Elements	Performance Criteria
	using suitable packing materials. 4.4 Record packaged products in line with site procedures. 4.5 Record and report finishing process to appropriate personnel.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Numeracy skills to:	• measure coating ingredients.
Oral communication skills to:	• communicate with relevant personnel to ensure safety and production requirements are met • ask questions to clarify and confirm production information.
Reading skills to:	• read dials on equipment, safety data sheets (SDS) and shift changeover reports.
Writing skills to:	• record and report faults • complete routine inspection checklists.
Planning and organising skills to:	• follow guidelines relating to minimising, disposing of, recycling and re-using waste.
Problem solving skills to:	• inspect the work area for hazards and control risk according to the hierarchy of risk control.
Technology skills to:	• operate and maintain plant and machinery.

Assessment Requirements for FWPCOT2203 Finish and pack products

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- set up finishing and coating operations according to workplace requirements and site procedures
- conduct finishing and coating operations according to safe work procedures
- prepare coating chemicals in line with manufacturer recommendations and site procedures
- assess and rectify defects and faults during the coating process in line with safe work procedures
- package finished products according to organisational guidelines
- record and report faults and finishing and packing process information
- perform emergency stop.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures involved in finishing and packing finished products
- emergency response procedures relevant to the job (accident, fire, serious process fault)
- environmental protection requirements relating to the safe disposal of waste material (including preservative treated timber), the safe use and storage of chemicals, and the cleaning of plant, tools and equipment
- criteria for recycling and re-using material with defects
- hazards and risks associated with finishing and coating fabricated products, including environmental hazards and risks

© Commonwealth of Australia, 2025 Skills Insight

- problem identification and resolution strategies, common fault finding techniques, and typical product and coat defects
- procedures for the operation and maintenance of tools and equipment
- procedures for recording and reporting equipment and product faults, and process information.
-

Assessment Conditions

The following resources must be made available:

- work order
- product to coat
- coating equipment and tools
- coating chemicals
- material for packaging
- personal protective equipment required for finishing products.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2205 Tail out materials

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPCOT2205B Tail out materials, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2 This is the first release of this unit in the new standards format.

Application

This unit of competency specifies the outcomes required to clear sawn or machined materials and waste from a saw or machine while maintaining process flow and checking and sorting the finished product.

The unit applies to Timber Puller.

No licensing or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Timber Merchandising

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for cutting or	1.1 Review work order and identify required finished board sizes

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
machining process	and quantities in line with operator. 1.2 Prepare to work safely according to workplace work health and safety (WHS) requirements. 1.3 Check sequence of cuts or machining passes with operator and work order, where multiple cuts are required.
2. Maintain process flow.	2.1 Control flitch, cant or board to maintain process flow in line with sawing or dressing speed, WHS requirements and production standards. 2.2 Control and regularly clear sawn waste and material in line with site procedures and environmental requirements. 2.3 Assess flitch, cant or board for further processing requirements and return to operator in line with production standards. 2.4 Identify and report problems in flow or processing of materials to operator for resolution. 2.5 Dispose of faulty or defective material in line with site procedures and environmental requirements, as directed by operator.
3. Sort finished product and follow record-keeping procedures.	3.1 Sort and stack boards in line with site procedures and specific operational requirements. 3.2 Assess boards for standard sizes in line with site procedures. 3.3 Segregate and store or direct recoverable material and waste for further processing in line with site procedures. 3.4 Record and report production and quality information in line with site procedures and organisational requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• estimate and evaluate size of tail out materials • sort finished material into required grades by visually estimating them or using a measuring tool.
Oral communication skills to:	• communicate effectively with relevant personnel to ensure safety and production requirements are met • ask questions to clarify and confirm information.

© Commonwealth of Australia, 2025 Skills Insight

Writing skills to:	• complete production records, quality records, tally sheets and maintenance records.
Reading skills to:	• read charts for stress grading and standard timber profiles and cross sections • read workplace safety and operating procedures related to tailing material.
Planning and organising skills to:	• follow manual handling procedures • implement waste minimisation and disposal, recycling and re-use guidelines.
Initiative skills to:	• apply fatigue management strategies.
Technology skills to:	• use plant, tools and equipment.

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT2205 Tail out materials

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2205B Tail out materials, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to tailing out materials
- tail out material while maintaining process flow according to safe work procedure
- identify and respond to processing faults according to workplace requirements and organisational policy
- sort finished material according to safe work procedure
- dispose of waste material according to environmental protection requirements
- follow record keeping procedures for recording quality and production requirements.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures for tailing out materials:
  - standard operating procedure (SOP)
  - personal protective equipment (PPE) requirements
  - procedures for safely disposing of waste material in an environmentally sustainable manner
- methods of controlling materials including:
  - material movement
  - position of the material being sawn or dressed

© Commonwealth of Australia, 2025 Skills Insight

    - avoiding contact with tail of saw or cutter
    - removing waste
- common work area and environmental hazards and risks and how to control them
- tailing out processes and procedures
- common industry terminology
- criteria for recycling and re-using material with faults or defects
- industry standard cross-section and length dimensions and tolerances
- established communication channels and protocols used to ensure safety and productivity
- flow or control problems including
    - speed of production
    - flow of product
    - sharpness of blades or cutters
    - quality of materials
    - communication
    - housekeeping
    - burn marks
    - rough finish
    - tear out
    - machine marks
    - irregular size of finished product
- types of tools and equipment, and procedures for their safe use, operation and maintenance
- mathematical procedures used to calculate timber size and dimension
- procedures for recording and reporting quality and production requirements.
-

Assessment Conditions

- specifications and work instructions

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2207 Dress boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2207B Dress boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit describes the outcomes required to prepare and dress boards and timber. The unit includes evaluating and monitoring dressing conditions and processes; and setting, adjusting and maintaining equipment. Work is completed in a forest products factory setting.

The unit applies to Sawmill Worker, Production Worker, Timber Products Worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for dressing process	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify sizes and quantities for dressed boards and obtain material for dressing. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Plan sequence of machining operations in line with work order and to suit multiple passes.
2. Dress boards and timber	2.1 Identify defective boards prior to dressing and dispose of or recycle in line with environmental protection practices. 2.2 Follow lock out procedures and adjust guides, conveyors, speeds and feeds to suit dimensions and grade outcomes. 2.3 Use equipment in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.4 Adjust guides, conveyors, speeds and feeds to suit dimensions and grade outcomes, and select cutting sequence. 2.5 Maintain feed rate appropriate to timber condition and board size. 2.6 Regularly tally dressed boards against work orders. 2.7 Clear work area regularly in line with organisational safety procedures.
3. Assess conditions and maintain optimum dressing processes	3.1 Assess dressing conditions regularly to ensure continuity of supply and processing. 3.2 Adjust conditions to optimise feed rate and maintain finished dimensions in line with work order. 3.3 Evaluate finish regularly and make adjustments to ensure product quality. 3.4 Measure dressed board dimensions and profiles regularly and record in line with organisational procedures. 3.5 Identify routine processing and equipment faults and resolve or report to appropriate personnel. 3.6 Complete production and quality records and report in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check cutters and saw blades for bluntness or damage. 4.3 Remove and replace cutters and blades in line with manufacturer's recommendations. 4.4 Dispose of used blades in line with organisational procedures and environmental protection practices. 4.5 Complete basic non-specialist maintenance for equipment. 4.6 Record and report equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and count raw materials • interpret order sizes and set up equipment to achieve correct dimensions and grades • calculate the feed rate to optimise quality and quantity of production output • measure finished dimensions and profiles with accuracy appropriate to tolerances • complete routine production records involving dimensions, profiles and quantities tallied against orders.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify and dispose of defective materials • recognise faulty equipment and resolve by reporting or rectifying.
Technology skills to:	• select, use and maintain appropriate machinery, tools and personal protective equipment used for dressing boards and timber.

Assessment Requirements for FWPCOT2207 Dress boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2207B Dress boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organisational policies and procedures relevant to dressing boards and timber
- communicating and working safely with others in the work area

preparing for, evaluating and maintaining dressing processes and conditions

- setting, adjusting, and operating equipment to suit required dimensions, cutting sequence, feed rates and finish
- complete these types of basic non-specialist maintenance:
- cleaning the machine of wood chips and sawdust
- replacing blunt cutters or saw blades
- inspecting machine parts for wear or damage, including guards
- greasing and lubricating moving parts
- checking the operation of emergency stop buttons and lock out systems.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment

© Commonwealth of Australia, 2025 Skills Insight

    - disposing of, recycling and reusing timber
- typical timber defects and how these affect ability to produce a quality finished product:
    - warp
    - wane
    - cupping
    - shakes
    - insect defects
    - knots
    - resin pockets
- typical dressing problems triggering adjustment of process to ensure product quality:
    - blunt or damaged cutters
    - burn marks
    - extra cuts
    - excessive cutter marks
    - dimensional errors
- range of industry standard profiles, lengths, cross sections and tolerances and applicable terminology
- types of tools and equipment used for dressing boards; their purpose, features, operation and basic non-specialist repair and maintenance:
    - moulder
    - jointer/buzzer or thicknesser
    - machine incorporating splitting saw
    - planing machine
    - moulding machine
- problems that can occur when dressing boards and timbers, including:
    - equipment faults and malfunctions
    - quality of product and machine settings
    - efficient rejection prior to dressing of boards that do not meet processing requirements
    - transfer and flow of material
    - dressing problems
    - feed rate
    - product finish
- methods for assessing cutters and saw blade condition
- organisational procedures specific to dressing boards and timber:
    - workplace health and safety with particular emphasis on equipment lock out
    - use and maintenance of equipment
    - communication reporting lines
    - recording and reporting production outcomes and equipment faults.
    -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to dress boards and timber:
  - moulder
  - jointer/buzzer or thicknesser
  - machine incorporating splitting saw
  - planing machine
  - moulding machine
- maintenance tools and equipment
- consumable components; cutters, saw blades
- personal protective equipment suitable for dressing boards and timber
- a diverse, comprehensive and commercial product range of timber boards
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific details of:
  - material to be dressed
  - special client requirements
  - production timelines
- template documents for recording production outcomes and equipment faults
- organisational procedures for dressing boards and timber
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2208 Resaw boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2208B Resaw boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan and produce boards by resawing larger boards. Work is completed in a forest products factory setting and includes adjusting and maintaining sawing equipment.

The unit applies to Saw Operators, Sawyers, Benchmen, and Wood Machinists

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for operation	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify sizes and quantities for resawn boards and obtain material for resawing. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Plan sequence of machining operations in line with work order and to suit multiple cuts.
2. Produce Boards	2.1 Follow lock out procedures and adjust saws, carriage, speeds and feeds to suit types of boards and timber, dimensions, and cutting sequence. 2.2 Use equipment in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.3 Select and follow cutting sequence to produce required quantity. 2.4 Maintain feed rate appropriate to timber condition and board size. 2.5 Regularly tally resawn boards and timber against work orders. 2.6 Clear work area regularly in line with in line with organisational safety procedures. 2.7 Identify damaged sawn material and dispose of or recycle in line with environmental protection practices.
3. Assess conditions and maintain optimum sawing processes	3.1 Assess sawing conditions regularly to determine optimal feed rate and finish. 3.2 Adjust sawing feed rate to achieve finished dimensions in line with work order. 3.3 Evaluate finish regularly and make adjustments to maximise product quality. 3.4 Regularly measure cross section dimensions of sawn boards against standard sizes and tolerances and adjust sawing process. 3.5 Identify routine processing and equipment faults and resolve or report to appropriate personnel. 3.6 Complete production and quality records and report in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check cutters and saw blades for bluntness or damage. 4.3 Remove and replace cutters and blades in line with manufacturer's recommendations. 4.4 Dispose of used blades in line with organisational procedures and environmental protection practices. 4.5 Complete basic non-specialist maintenance for equipment. 4.6 Record and report equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and count raw materials • interpret order sizes and set up equipment to achieve correct dimensions • calculate the feed rate to optimise quality and quantity of production output • accurately measure cross section dimensions of sawn boards against standard sizes and tolerances • complete routine production records involving dimensions and quantities tallied against orders.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify and dispose of damaged sawn material • recognise faulty equipment and resolve by reporting or rectifying.

Assessment Requirements for FWPCOT2208 Resaw boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2208B Resaw boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete resawing jobs, in line with an individual work order for each job, on one or more of these types of timber:
  - softwood
  - hardwood
  - treated
  - untreated
  - laminated boards
- across the above jobs, complete these processes:
  - resawing larger boards, recovering boards from one edge at each pass
  - splitting a larger board into two or more sections
- complete these types of basic non-specialist maintenance:
  - cleaning the machine of wood chips and sawdust
  - replacing blunt cutters or saw blades
  - inspecting machine parts for wear or damage, including guards
  - greasing and lubricating moving parts
  - checking the operation of emergency stop buttons and lock out systems.
  -

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber including:
    - recycling damaged sawn material
    - re-using damaged sawn material
    - redirecting damaged sawn material for energy recovery
- range of industry standard lengths, cross sections and tolerances and applicable terminology
- typical cutting patterns
- machines and equipment used for resawing boards and timber; their purpose, features, operation and basic non-specialist repair and maintenance:
  - simple table saws
  - complex saw and conveyor systems
  - circular or band saws
  - single or multiple saws
- methods for assessing cutters and saw blade condition
- problems that may occur during sawing operations including:
  - equipment faults and malfunctions
  - quality of product and machine settings
  - transfer and flow of material
  - routine sawing problems
  - feed rate and product finish
  - infeed and outfeed systems
  - damage to sawn board
  - damage to saw blade
  - timber positioning
- organisational procedures specific to resawing boards and timber:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- one or more of the following tools and equipment used to resaw boards and timber:
  - simple saw benches

© Commonwealth of Australia, 2025 Skills Insight

  - complex saw and conveyor systems
  - circular or band saws
  - single or multiple saws
- tools and equipment for operator maintenance of saws
- consumable components; cutters, saw blades
- personal protective equipment suitable for resawing boards and timber
- a diverse, comprehensive and commercial product range of board and timber
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific details of:
  - material to be resawn
  - special client requirements
  - production timelines
- template documents for recording production outcomes and equipment faults
- organisational procedures for resawing boards and timber.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Assessment Requirements for FWPCOT2209 Produce finger jointed timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2209B Produce finger jointed timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- produce finger jointed timber in line with an individual work orders involving the following processes:
  - identify and confirm cross section of cleats/shooks to match finger jointing machine setup
  - load cleats/shooks to conveyor
  - reject cleats/shooks not meeting grading requirements
  - feed cleats/shooks to jointing operation
  - machine fingers on cleats/shooks
  - cure and apply glue to cleats/shooks
- monitor process to ensure continuity of production by completing these processes:
  - recognise and rectify blunt or damaged cutters
  - check and adjust settings for glue curing
  - clean and fill glue spreader
  - coordinate supply of cleats/shooks
  - dock finished boards with others to ensure continuous supply.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - safely disposing of, recycling and reusing timber and other waste
- types of glue used for producing finger jointed timber; procedures and standards for mixing, curing and applying it
- range of industry standard cross sections, their strength, tolerances and applicable terminology
- types of tools and equipment used for producing finger jointed timber; their purpose, features, operation and basic non-specialist repair and maintenance:
  - that used for glue mixing and preparation
  - finger jointing machine stations and equipment
  - conveyors
- methods for assessing cutters and blade condition
- monitoring processes for automated jointing machines
- organisational procedures specific to producing finger jointed timber:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to produce finger jointed material
- maintenance tools and equipment for saws
- glue
- consumable components; cutters, saw blades
- personal protective equipment suitable for producing finger jointed timber
- a diverse, comprehensive and commercial product range of timber
- manufacturers:
  - instructions for mixing and curing glue
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific instructions for producing finger jointed timber products
- template documents for recording production outcomes and equipment faults
- organisational procedures for producing finger jointed timber.

© Commonwealth of Australia, 2025 Skills Insight

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2210 Tally material

Modification History

Release	Comment
1	Replaces superseded equivalent FPICOT2210B Tally material, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare and record manual or electronic tallies of finished packs of material. Work is completed in a forest products factory setting.

The unit applies to production worker, sawmill worker, manufacturing assistant, timber products worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for tallying	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify location of material to be tallied; arrange access in line with organisational procedures. 1.3 Select and use suitable tallying and personal protective equipment. 1.4 Plan tallying activities in line with work order and to ensure continuous workflow.
2. Record piece or pack details	2.1 Count pieces or packs and legibly and accurately record in line with organisational formats. 2.2 Clear work area regularly to maintain a safe and efficient workflow. 2.3 Monitor and replace supply of tally sheets, bar coding material or other documents. 2.4 Check packs to ensure conformance with relevant specifications. 2.5 Identify operational problems, non-conformances and damaged material and report to appropriate personnel. 2.6 Accurately record and report tallying results in line with organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• count numbers of pieces and packs • complete routine calculations for timber volumes or lineal metres in a pack • input accurate numerical data for routine tallying records and reports.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on operational problems.
Reading skills to:	• interpret: • organisational procedures • work orders.
Writing skills to:	• complete accurate basic records of tallying results and non-conformant and damaged packs.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• complete tallying activities in a logical and time-efficient sequence using work order to guide activities.
Problem-solving skills to:	• recognise operational problems, non-conformances and damaged material and resolve by reporting.

•
•

Assessment Requirements for FWPCOT2210 Tally material

Modification History

Release	Comment
1	Replaces equivalent FPICOT2210B Tally material, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- in line with an individual work order, complete tallying jobs of one or more of these materials:
  - timber
  - hardware items and fittings
  - packs of random timber cross sections, lengths or panel sizes
  - packs of set timber cross sections, lengths or panel sizes
- complete tally sheets or electronic record for each tallying job (depending on the workplace system being manual or electronic)
- complete records for non-conformances and damaged material identified during each tallying job.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- manual and electronic methods used to tally material in a forest products factory setting
- format, content and use of common industry and organisation specific documents used to record and report tallies
- industry standard sizing and names for timber, timber profiles and boards
- industry and organisational specific standard specifications for packaging timber products
- common features of non-conformant packs and methods to recognise these

© Commonwealth of Australia, 2025 Skills Insight

- tools and equipment used for tallying material in a forest products factory setting; their purpose, features and use:
  - electronic bar coding equipment
  - personal protective equipment
- organisational procedures specific to tallying material:
  - communication reporting lines
  - recording and reporting non-conformances and damaged material
  - recording and reporting tallying results.

Assessment Conditions

The following resources must be made available:

- manual or electronic tools and equipment used for tallying material, to suit the particular workplace:
  - tally sheets
  - electronic bar coding equipment
- a selection of materials to be tallied (of one or more of these materials):
  - timber
  - hardware items and fittings
  - packs of random timber cross sections, lengths or panel sizes
  - packs of set timber cross sections, lengths or panel sizes
- work order for tallying activities with specific details of material to be tallied; product types, packs, categories of products
- template documents to record:
  - non-conformances and damaged material
  - tallying results
- organisational procedures specific to tallying material
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2211 Produce pointed timber products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2211B Produce pointed timber products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare and conduct pointing operations of hardwood and softwood material using cutter or saw type machinery.

The unit applies to operators who produce pointed timber products in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for pointing operation	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Plan pointing operations in line with work order.
2. Maintain pointing operation	2.1 Follow lock out procedures and adjust machinery to suit size and type of timber to be processed. 2.2 Use equipment in line with organisational safety procedures, manufacturer's instructions environmental protection practices. 2.3 Produce posts and pegs at optimal rate consistent with material type, acceptable surface finish and equipment capability. 2.4 Monitor pointing operation to ensure consistency of product dimension, quality and finish in line with organisational quality standards. 2.5 Monitor shaving and sawdust removal system to ensure waste material is effectively controlled. 2.6 Coordinate supply of material with appropriate personnel and report timber faults. 2.7 Sort and process finished products in line with organisational procedures. 2.8 Identify routine processing and equipment faults and resolve or report to appropriate personnel.
3. Shut down operation	3.1 Shut down pointing operation in line with manufacturer's recommendations. 3.2 Complete basic non-specialist maintenance for equipment in line with manufacturer's recommendations. 3.3 Record and report equipment faults and maintenance requirements to appropriate personnel. 3.4 Clear work area and dispose of waste in line with environmental protection practices. 3.5 Complete production and quality records and report in line with organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret order sizes and set up equipment to achieve correct dimensions and grades • measure finished dimensions with accuracy appropriate to tolerances.

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• ask questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.
Reading skills to:	• interpret: • workplace health and safety and other organisational procedures • work orders • manufacturers' instructions and maintenance recommendations.
Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify and reject faulty timber • recognise faulty equipment and resolve by reporting or rectifying.
Technology skills to:	• select, use and maintain appropriate machinery, tools and personal protective equipment used for producing pointed timber products.

Assessment Requirements for FWPCOT2211 Produce pointed timber products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2211B Produce pointed timber products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- produce pointed timber products in line with an individual work orders, which includes the following types of posts:
  - round poles covering the full range of sizes for which the equipment is suitable
  - rectangular sawn material covering the full range of sizes for which the equipment is suitable
- complete these types of basic non-specialist maintenance:
  - cleaning the machine of wood chips and sawdust
  - replacing blunt cutters or saw blades
  - inspecting machine parts for wear or damage, including guards
  - greasing and lubricating moving parts
  - checking the operation of emergency stop buttons and lock out systems.
  -

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:

© Commonwealth of Australia, 2025 Skills Insight

  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- typical timber defects and how these affect ability to produce a quality finished product:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- stages of the pointing process
- tools and equipment used for producing pointed timber products; their purpose, features and operation including:
  - manually loaded equipment
  - rotating cutters and saws
- organisational procedures specific to producing pointed timber products including:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.

Assessment Conditions

The following resources must be made available:

- tools and equipment used to produce pointed timber products:
  - manually loaded equipment
  - rotating cutters and saws
- maintenance tools and equipment for rotating cutters and saws
- consumable components; cutters and saw blades
- personal protective equipment suitable for producing pointed timber products
- timber used to produce pointed timber products
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific details of:
  - material to be pointed
  - special client requirements
  - production timelines
- template documents for recording production outcomes and equipment faults

© Commonwealth of Australia, 2025 Skills Insight

- organisational procedures for producing pointed timber products
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2212 Grade hardwood sawn and milled products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2212B Grade hardwood sawn and milled products, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to visually evaluate hardwood sawn and milled product characteristics for classification into various strength and appearance grades. It includes sorting hardwood into classifications and marking material in line with grade type.

The unit applies to those who grade hardwood sawn and milled products in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for grading	1.1 Review work order to grade hardwood sawn and milled products and clarify with appropriate personnel. 1.2 Obtain type and quantity of sawn and milled products to be graded from storage locations. 1.3 Select equipment appropriate to work order and check for operational effectiveness. 1.4 Plan grading process in line with site procedures. 1.5 Establish and maintain communication with others at site to ensure safety.
2. Grade products	2.1 Visually assess size of sawn and milled products in line with industry standards and number of ranges estimated. 2.2 Evaluate material characteristics of each product are evaluated against industry standards for grade type. 2.3 Measure moisture content and evaluate against standards and seasoning requirements. 2.4 Mark characteristics for docking. 2.5 Sort material in line with its grade classification and clearly mark with markers or stickers. 2.6 Reject and dispose of sub-standard material in line with site requirements. 2.7 Record and report grading outcomes and distribution problems to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Writing skills to	• accurately compile and complete grading reports.
Numeracy skills to:	• accurately identify if length of product meets industry standard for cross section • measure moisture content using a moisture meter • calibrate equipment.

Assessment Requirements for FWPCOT2212 Grade hardwood sawn and milled products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2212B Grade hardwood sawn and milled products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare for and grade a full range of hardwood sawn and milled products in readiness for storage or processing
- follow work order for grading hardwood sawn and milled products
- work safely and communicate effectively with others at work site
- identify characteristics and defects in hardwood sawn and milled products and mark for sorting
- follow organisational policies and procedures, standards and codes of practice for grading hardwood sawn and milled products
- record and report grading activity.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for grading hardwood sawn and milled products
- organisational and site standards, policies and procedures for grading hardwood sawn and milled products
- environmental risks and hazards associated with grading timber
- criteria for recycling and re-using and redirecting sub-standard material for other use
- methods of visual estimation, grading, colour identification and tagging

© Commonwealth of Australia, 2025 Skills Insight

- sorting, marking and distribution processes
- industry standard cross sections and lengths
- storage systems, including locations and labelling procedures
- established communication channels and protocols
- problem identification and resolution strategies, and common fault finding techniques
- typical tools and equipment used for grading timber, along with their safe operation and maintenance
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- hardwood sawn and milled products for grading
- measuring equipment
- moisture meters
- lifting equipment for the movement of sawn and milled products
- work order, workplace requirements and site standards for grading hardwood sawn and milled products
- personal protective equipment suitable for grading hardwood sawn and milled products.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

- environmental risks and hazards associated with grading timber
- criteria for recycling re-using or redirecting sub-standard material to other uses

© Commonwealth of Australia, 2025 Skills Insight

- methods of visual estimation, grading, colour identification and tagging
- sorting, marking and distribution processes
- industry standard cross sections and lengths
- storage systems and labelling procedures:
  - storage racks
  - storage bays
  - bins
  - stacks
  - pallet boxes
  - modularised storage components
  - temporary stacking bays (stand, frame or ground)

and divided into one or more of the following:

  - standard product classification
  - product designation
  - size
  - dimension
  - stack number
  - weight
  - grade
  - shelf life
  - stock rotation position
- characteristics of cypress sawn and milled products:
  - warp
  - wane
  - curvature
  - shakes
  - insect defects
  - knots
  - resin pockets
- established communication channels and protocols
- problem identification and resolution strategies, and common fault finding techniques
- typical tools and equipment used for grading timber, along with their safe operation and maintenance
- procedures for recording and reporting workplace information.
-

Assessment Conditions

The following resources must be made available:

- cypress sawn and milled products for grading

© Commonwealth of Australia, 2025 Skills Insight

- measuring equipment
- moisture meters
- lifting equipment for the movement of sawn and milled products
- work order, workplace requirements and site standards for cypress sawn and milled products
- personal protective equipment suitable for grading cypress sawn and milled products
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2215 Visually stress grade hardwood

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2215B Visually stress grade hardwood, which was first released with FPI05 or FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to visually stress grade hardwood by assessing material for strength against set classifications detailed in Australian Standard AS2858 as a minimum standard.

The unit applies to those who visually stress-grade hardwood in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for	1.1 Review work order for visually stress-grading hardwood and

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2215B Visually stress grade hardwood, which was first released with FPI05 or FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan, prepare for, evaluate and visually stress grade hardwood in readiness for processing or storage
- follow work order for visually stress grading hardwood
- accurately identify characteristics and defects in hardwood
- accurately interpret grading standards and specifications
- work safely and communicate effectively with others at work site
- follow organisational policies and procedures, standards and codes of practice for visually stress grading hardwood
- record and report grading activity.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for visually stress-grading hardwood
- organisational and site standards, policies and procedures for visually stress-grading hardwood
- environmental risks and hazards associated with grading timber
- criteria for recycling and re-using sub-standard material
- visual stress-grading techniques and methods
- grading markings and standards
- characteristics and properties of hardwood

- plan, prepare for, evaluate and visually stress grade cypress in readiness for processing or storage
- follow work order for visually stress grading cypress
- accurately identify characteristics and defects in cypress
- accurately interpret grading standards and specifications
- work safely and communicate effectively with others at work site
- follow organisational policies and procedures, standards and codes of practice for visually stress grading cypress
- record and report grading activity.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for visually stress-grading cypress, including Australian Standard AS2858
- organisational and site standards, policies and procedures for visually stress-grading cypress

© Commonwealth of Australia, 2025 Skills Insight

- environmental risks and hazards associated with grading timber
- grading markings and standards
- characteristics and properties of cypress
- visual stress-grading techniques and methods
- structural grade: structural conformity of the timber, consistency of the structural quality, defects which may weaken strength, including knots, shakes and short grain
- appearance of contamination, surface characteristics and grain pattern
- criteria for recycling and re-using sub-standard material
- recycling timber with inappropriate defects or contamination
- re-using timber with inappropriate defects or contamination
- redirecting timber with inappropriate defects or contamination for energy recovery
- storage systems and labelling procedures
- established communication channels and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- cypress for visual stress grading
- work order, workplace requirements and site standards for visually stress grading cypress
- vernier callipers
- moisture meters (resistance and/or capacitance)
- tapes
- marking implements
- personal protective equipment required for visually stress grading cypress
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

FWPCOT2218 Cross cut materials with a fixed saw

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2218B Cross cut materials with a fixed saw, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to position and saw materials with a circular saw or fixed chainsaw. The unit includes equipment maintenance.

The unit applies to those who cross cut materials with a fixed saw in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for operation	1.1 Review work order and clarify with appropriate personnel. 1.2 Select equipment appropriate to work requirements and check for operational effectiveness.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	1.3 Prepare, check and clear work area, ready for operations. 1.4 Carry out pre-start checks on fixed saw in line with site requirements. 1.5 Establish and maintain communication with others in work area to ensure safety.
2. Cross cut material	2.1 Visually assess material to be cut for defects that may present unsafe work conditions and review cut. 2.2 Cut material within site standard tolerances for length and angle relative to centre line. 2.3 Use cutting techniques to industry standard lengths, maximising volume and quality of recovery material. 2.4 Operate fixed saw effectively, in line with manufacturer's recommendations. 2.5 Regularly check and clear work are in line with WHS requirements and site procedures. 2.6 Dispose of sub-standard material in line with site procedures and environmental requirements 2.7 Identify and report problems in line with site procedures
3. Maintain saw	3.1 Lock-out, clean and maintain fixed saw in line with manufacturer's recommendations and site procedures. 3.2 Identify blunt or damaged saws and replace or sharpen, in line with site procedures and manufacturer's recommendations. 3.3 Record and report fixed operations and maintenance to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Problem solving skills to:	• identify defects in materials and problems with equipment, and rectify.

Assessment Requirements for FWPCOT2218 Cross cut materials with a fixed saw

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2218B Cross cut materials with a fixed saw, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and efficiently use a fixed saw to cross cut materials to the full range of timber, timber sizes and species
- follow organisational policies and procedures relevant to operating a fixed saw
- use appropriate methods to cross cut either of the following materials with a fixed saw
  - individual pieces of timber
  - packs of timber
- carry out start-up and lock out procedures for a fixed saw
- correctly positioning and securing materials onto carriage or conveyor for cross cutting
- identify defects and problems with fixed saw operations
- identify blunt or damaged saws
- effectively maximise volume and quality recovery
- communicate effectively with others at the work site
- carry out routine maintenance on a fixed saw.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- workplace requirements and standards for operating a fixed circular saw or fixed chainsaw
- environmental protection requirements and safe disposal of waste material
- operational procedures and checks including start-up and shut-down procedures
- cutting techniques including the following aspects:
  - cutting positions
  - work order requirements
  - industry standard lengths
  - straightness requirements
  - cutting patterns
  - maximising volume and quality of recovery requirements
  - cutting procedures that minimise capping and splitting of material
  - placing material on conveyor or carriage
  - securing material
  - cutting at optimum feed rate to avoid damage to saw blade
- aspects relating to clearing when cross cutting materials including
  - using hand tools and a water jet to clear debris from the surface of material
  - clearing the work are of off –cuts
  - debris
  - ensuring saw clearance around material
  - depositing off-cuts and debris in recognised areas
  - clearing surfaces of debris likely to cause saw damage in the cutting area
- equipment processes, technical capability and limitations of a fixed saw
- industry standard length dimensions
- common industry terminology
- established communication channels and protocols to maintain safety
- processes for managing risks and hazards associated with fixed saw operations including lock –out procedures
- knowledge of defects in timber that can effect processing and cause risk
- workplace health and safety requirements and emergency evacuation procedures
- procedures for recording and reporting workplace records and information.

Assessment Conditions

The following resources must be made available:

- a fixed circular saw or fixed chainsaw
- material to be processed
- work order, workplace requirements and site standards for cross cutting materials with a fixed saw
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

© Commonwealth of Australia, 2025 Skills Insight

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2219 Use hand-held tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2219B Use hand-held tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to select and a use variety of manual hand tools and power tools for various tasks. Work is completed in work settings and involves completing basic non-specialist maintenance.

The unit applies to Production Worker, Manufacturing Assistant, Timber Manufacturing Worker, Sawmill Worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for using hand-held tools	1.1 Review work order and, where required, check with appropriate personnel. 1.2 Assess production requirements and select serviceable hand-held

© Commonwealth of Australia, 2025 Skills Insight

	tools appropriate to complete tasks. 1.3 Plan hand-held tool operating process in line with work order.
2. Operate and maintain hand-held tools	2.1 Select and use appropriate personal protective equipment. 2.2 Follow lock out procedures and check tools for safe operation in line with manufacturer's recommendations. 2.3 Identify unsafe, faulty or unserviceable items and mark for repair or replacement in line with organisational procedures. 2.4 Use hand and power tools in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.5 Apply appropriate techniques with tools to produce required production outcomes. 2.6 Check tool operation regularly to assess need for sharpening and other maintenance requirements. 2.7 Complete basic non-specialist maintenance for hand and power tools in line with manufacturer’s recommendations and safety procedures. 2.8 Record and report tool faults, serviceability issues and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify tension measurements of tools • capability to identify and interpret units of measurement for appropriate hand held tools
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on equipment faults.

Reading skills to:	• interpret:
	  • WHS and other organisational procedures
	  • work orders
	  • manufacturers’ instructions and maintenance recommendations.

Writing skills to:	• complete basic fault tags and accurate basic records for equipment faults and maintenance requirements.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• schedule time into day to day activities to complete maintenance activities as part of a logical and time-efficient work flow.
Problem-solving skills to:	• recognise equipment wear and damage and resolve by maintaining or reporting as unserviceable.

Assessment Requirements for FWPCOT2219 Use hand-held tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2219B Use hand-held tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- safely use appropriate manual and portable power tools:
  - manual hand tools:
    - handsaws
    - knives
    - chisels
    - hammers
    - hand drills
    - files
    - rasps
  - portable power tools:
    - drills
    - grinders
    - sanders
    - saws
    - nail guns
- complete basic non-specialist maintenance in line with manufacturers' recommendations, including:
  - sharpening at appropriate speed and at correct pitch and angle to obtain a sharp edge
  - cleaning

© Commonwealth of Australia, 2025 Skills Insight

- lubricating
- tightening
- adjusting
- checking consumable components for bluntness, wear and other damage
- removing and replacing consumable components.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for the use and maintenance of hand-held tools:
  - cleaning tools
  - safely disposing of waste and used consumables
- types of hand-held tools; their purpose, features and operation:
  - manual hand tools:
    - handsaws
    - knives
    - chisels
    - hammers
    - hand drills
    - files
    - rasps
  - portable power tools:
    - drills
    - grinders
    - sanders
    - saws
    - nail guns
- basic non-specialist repair and maintenance requirements and techniques for hand-held tools:
  - sharpening
  - cleaning

- organisational procedures for operating and maintaining hand-held-tools
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2220 Select trees for tending operations

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2220B Select trees for tending operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to select appropriate trees for tending operations which involves selecting trees to be thinned, pruned, treated for pests and other tending treatments used to provide a healthy environment for tree and forest growth. Work is completed in in a forest environment setting and involves identifying tree characteristics and marking them for specific treatments.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for selection process	1.1 Determine tree distribution, characteristics and selection method from work order and where required check with appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	1.2 Identify and follow site environmental protection practices and associated regulatory compliance requirements. 1.3 Determine existing and potential site hazards and assess associated risks in line with organisational procedures. 1.4 Select appropriate personal protective and other equipment and check for operational effectiveness.
2. Select and mark trees for tending	2.1 Locate forest area for tree selection in line with work order. 2.2 Designate trees for particular tending treatments according to designated work order method, site procedures and environmental regulations. 2.3 Mark or re-mark trees using appropriate marking method and equipment. 2.4 Make recommendations for further tree selection to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• count numbers of branches and trees at regular intervals during selection process.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • environmental regulations or plain English equivalent documents.

Planning and organising skills to:	• complete tree selection and marking activities in an efficient and logical sequence using designated work orders methods to guide activities.

Assessment Requirements for FWPCOT2220 Select trees for tending operations

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2220B Select trees for tending operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- use one or more of the following methods to identify, select and mark trees for tending treatments in line with an individual work order:
  - selecting a predetermined number of trees in a given area
  - counting and selecting trees at regular intervals
  - selecting trees with particular characteristics
  - selecting trees for particular treatment.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- basic content and application of applicable commonwealth, state, territory or local government environmental protection regulations relevant to tree tending operations
- use and care of tools and materials used to select trees for tending operations:
  - tags
  - tape
  - paint
  - tools for blaze marking
- typical workplace hazards present during tree selection activities and methods of minimising risks:

© Commonwealth of Australia, 2025 Skills Insight

    - slope
    - water
    - rock
    - undergrowth
    - slash
    - depressions and holes
    - falling or fallen branches
- key types of tending treatments and their purpose:
    - thinning
    - pruning
    - disease treatment
    - thinning
    - cleaning
    - seed collection
- characteristics of trees and distribution relevant to tending treatments:
    - dominance and vigour
    - leader defects
    - straightness
    - lean
    - size
    - angle
    - number of branches
    - spacing and overall tree health
    - stocking
    - green crowns
    - insect infestation
- common methods used to select trees for tending operations:
    - selecting predetermined number of trees in a given area
    - counting and selecting trees at regular intervals
    - selecting trees with particular characteristics
    - selecting trees for particular treatment
- organisational procedures specific to selecting and marking trees for tending:
    - workplace health and safety with particular emphasis on risk control and use of personal protective equipment
    - communication reporting lines.

Assessment Conditions

The following resources must be made available as appropriate:

- tags

© Commonwealth of Australia, 2025 Skills Insight

- tape
- paint
- tools for blaze marking
- personal protective equipment suitable for selecting and marking trees
- environmental regulations affecting site operations
- work order with designated methods for tree selection
- organisational procedures for selecting and marking trees for tending.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2222 Produce laminated beams

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2222B Produce laminated beams, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare and cut boards for beam production.

The unit applies to production workers who produce laminated beams in a forest products factory setting and involves laying up and clamping beams, and joining timber components.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Sawmilling and Processing

Wood Panel and Board Production

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for assembly	1.1 Review construction plan and work order and where required check with appropriate personnel.

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Identify type and quantity of timber and glue required and obtain materials. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Select and prepare required assembly jigs.
2. Cut boards for beams	2.1 Visually assess condition of boards and check moisture content. 2.2 Use equipment in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.3 Straight or scarf cut boards; optimise quantity and eliminate faults. 2.4 Sort cut boards according to length and mark in line with organisational procedures. 2.5 Reject defective components and dispose of in line with environmental protection practices. 2.6 Store assembly jigs for further use or dispose of in line with environmental protection practices.
3. Assemble beams	3.1 Select timber components from pre-cut material in line with cutting list and beam design. 3.2 Mix glue in line with manufacturer’s recommendations. 3.3 Set glue spreader to apply even coating and apply glue line to ensure minimal wastage. 3.4 Lay components in jigs ready for joining with allowable faults, joins and grain in line with construction standards and grading rules. 3.5 Start press and check controls and operation in line with organisational procedures. 3.6 Set press with jigs and position beam to correct orientation. 3.7 Apply load and heat to beam. 3.8 Check and remove beam from press. 3.9 Identify routine processing and equipment faults and resolve or report to appropriate personnel.
4. Prepare beams for despatch and report	4.1 Check and label finished beams in line with work order. 4.2 Remove components from jigs and safely stack in designated location. 4.3 Strap, pack and label finished beams ready for transportation. 4.4 Avoid wastage of strapping and packaging materials and maximise use of recycled materials. 4.5 Complete production and quality records and report in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work plans and count raw materials • calculate routine mixing ratios for glue • calculate time for glue to cure • complete routine production records involving quantities tallied against orders.
Oral communication skills to:	• ask questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • safety data sheets for glue
	  • manufacturer's recommendations for equipment and glue use.

Writing skills to:	• produce basic clear labels for product identification and transportation • complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify and dispose of defective materials • recognise faulty equipment and resolve by reporting or rectifying.
Technology skills to:	• select and use appropriate machinery, tools and personal protective equipment used for producing laminated beams.

Assessment Requirements for FWPCOT2222 Produce laminated beams

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2222B Produce laminated beams, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- prepare and cut boards for beam production in line with individual work orders
- across the above jobs, complete these processes:
  - straight cut timber to length with a vertical cut
  - scarf cut timber at a level, providing a larger end grain surface for bonding
  - strap, pack and label bundles of completed products ready for transportation
  -

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - safely disposing of, recycling and reusing timber and other waste
- types of glue used for producing laminated beams; procedures and standards for mixing, curing and applying it
- range of industry standard cross sections, their strength, tolerances and applicable terminology
- assembly sequences

FWPCOT2224 Band edges of panels

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2224B Band edges of panels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format

Application

This unit of competency describes the outcomes required to set up, operate and maintain edge banding machines that use automated processes to apply and finish edge treatments.

The unit applies to timber products operators that apply edge banding to timber panels in a wood products factory setting

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for edge banding	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify type and quantity of panels to be edge banded and obtain panels.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Select edge banding process in line with work order.
2. Set up edge banding equipment	2.1 Follow lock out procedures, set machine to suit material to be edged and adjust as required. 2.2 Use equipment in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.3 Conduct test runs to check machine operation, accuracy and quality of finished work and make adjustments to machine settings. 2.4 Use suitable tested materials for processing or reject and dispose of in line with environmental protection practices.
3. Apply edging	3.1 Feed panels into machine in line with manufacturer's instructions and safety procedures. 3.2 Monitor machine operations to ensure product quality and output. 3.3 Minimise waste by checking trim distances for cut off on each panel. 3.4 Repair sub-standard panels, dispose of or recycle in line with environmental protection practices. 3.5 Identify routine processing and equipment faults and resolve or report to appropriate personnel. 3.6 Complete production and quality records and report in line with organisational procedures.
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check edging mechanisms for bluntness and build-up of glue and rectify. 4.3 Check and reload edge treatments in line with manufacturer recommendations. 4.4 Clear dust and debris from machine area. 4.5 Record and report equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- key features of panel products and purpose of edging
- edge banding techniques:
  - checking the trim distances for cut off on each panel
- appropriate machine settings for:
  - panel size
  - squareness
  - profile
  - edge treatment width
  - alignment of the edge treatment
  - speed of the application
  - trim allowances
  - glue application rates (if not glue-backed)
- types of tools and equipment used for banding edges of panels; their purpose, features, operation and basic non-specialist repair and maintenance:
  - automated edge banding machines
  - mechanical edge banding machines
  - glue-backed veneer edge strip role
  - timber edging strips
  - laminate edge stripping (glue-backed or glued, on a role or in strips)
- methods for assessing condition of edging mechanisms
- organisational procedures specific to banding edges of panels:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines.
  -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to band edges of panels including:
  - automated edge banding machines
  - mechanical edge banding machines
  - glue-backed veneer edge strip role
  - timber edging strips

© Commonwealth of Australia, 2025 Skills Insight

  - laminate edge stripping (glue-backed or glued, on a role or in strips)
- maintenance tools and equipment for edging mechanisms
- personal protective equipment suitable for banding edges of panels
- a diverse, comprehensive and commercial product range of panels
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific instructions for banding the edges of panels
- template documents for recording production outcomes and equipment faults
- organisational procedures for banding edges of panels.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment Requirements for FWPCOT2225 Chip or flake wood

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2225B Chip or flake wood, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- produce chips and flakes of varying sizes and grades in line with individual work orders
- complete assessments of the source wood for:
  - species
  - size
  - moisture content
  - contamination issues.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- characteristics of wood for assessment and how these affect finished wood chips and flakes:
  - species
  - size
  - moisture content

© Commonwealth of Australia, 2025 Skills Insight

- typical contamination issues associated with wood, and how these affect ability to produce quality chips and flakes:
  - logs
  - billets
  - off-cuts
  - waste timber
  - down grade timber
  - residue
  - chips
  - reject boards
- stages of the chip and flake production process
- industry and organisational specific quality specifications for wood chips and flakes
- types of tools and equipment used to chip and flake wood; their purpose, features, operation and basic non-specialist repair and maintenance:
  - chippers
  - hoggers
  - shredders and knife mills
  - mechanised feed systems
  - conveyors
  - chutes or track systems
- methods for assessing blade and knife condition
- organisational procedures specific to chipping and flaking wood:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to chip and flake wood:
  - chippers
  - hoggers
  - shredders and knife mills
  - mechanised feed systems
  - conveyors
  - chutes or track systems
- maintenance tools and equipment for removing and replacing blades and knives
- consumable components; blades and knives
- personal protective equipment suitable for chipping and flaking wood

© Commonwealth of Australia, 2025 Skills Insight

- wood materials for processing
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific instructions for assessing wood and chip and flake requirements
- template documents for recording production outcomes and equipment faults
- organisational procedures for chipping and flaking wood
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2226 Debark logs mechanically

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.2.

Application

This unit of competency describes the skills and knowledge required to debark logs mechanically to a set diameter and length in a saw mill or wood processing plant.

The unit applies to individuals who debark logs using mechanical equipment. Operators generally work under broad direction and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Core Technical (COT)

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for debarking	1.1 Review work order and clarify with appropriate personnel 1.2 Assess type and quantity of logs to be processed by mechanical debarker

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
	1.3 Select equipment and check for operational effectiveness 1.4 Plan debarking process in line with site work, health and safety and operating procedures and environmental requirements 1.5 Identify emergency plan procedures to follow in the event of an emergency 1.6 Establish and maintain communication with others in line with work health and safety requirements
2. Debark logs	2.1 Carry out pre-operational checks on mechanical debarker in line with workplace procedures or manufacturers' recommendations 2.2 Feed material into the machine at the rate prescribed by workplace requirements 2.3 Regularly check and adjust conveyors to maximise feed rate and maintain desired quality and output 2.4 Segregate logs with defects and dispose of in line with site procedures and environmental requirements 2.5 Direct debarked logs to storage in a designated location in line with work order 2.6 Report processing faults to appropriate personnel
3. Conduct operator maintenance	3.1 Lock-out mechanical debarker in line with site procedures 3.2 Conduct visual inspection to identify issues and faults 3.3 Check mechanical debarker for blunt of damaged cutters and remove and replace, in line with manufacturers' specifications 3.4 Repair or replace blunt or damaged cutters in line with site procedures and environmental requirements 3.5 Record and report mechanical debarker operations, faults and maintenance activities

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• read standard operating procedures and/or manufacturers' instructions for the operation of debarker
Writing	• record operation, production and machine maintenance on paper based or electronic media
Oral Communication	• interact verbally with others on site to ensure safe and effective debarking operations • use appropriate vocabulary, including technical language directly relevant to role
Numeracy	• interpret gauges relevant to safe operation of debarker
Navigate the world of work	• understand main tasks, responsibilities and boundaries of own role
Interact with others	• communicate and report operational and safety information to on-site personnel
Get the work done	• recognise and respond to routine problems • plan and organise own work activities and resources

Assessment Requirements for FWPCOT2226 Debark logs mechanically

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.2.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- safely and effectively operated a mechanical debarker in line with a work order
- assessed logs to be debarked for defects that will effect processing
- communicated effectively with others in the work area
- followed workplace procedures for operating a mechanical debarker
- carried out routine maintenance on a mechanical debarker
- recorded and reported debarker operations and maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace procedures for operating a mechanical debarker as outlined in workplace procedures and production plan
- environmental protection requirements and safe disposal of waste as outlined in workplace procedures and production plan
- characteristics of trees and timber defects that can cause processing problems
- industry or workplace-accepted communication protocols and procedures to maintain work safety during mechanical deberker operations
- processes for managing risks and hazards associated with debarking logs
- work health and safety requirements and emergency evacuation procedures
- procedures for recording and reporting operation and machine maintenance records.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a log processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - mechanical debarker
  - logs to be debarked
  - personal protective equipment
- specifications:
  - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupational Health and Safety Acts , regulations and related industry standards and codes of practice applicable to forest harvesting operations
  - access to workplace policies and procedures which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
  - access to workplace policies and procedure for operating a mechanical debarker
  - access to site emergency procedure.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2227 Process orders and despatch products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2227B Process orders and despatch products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to process orders, select, compile and wrap products and to organise their despatch. Work is completed in a forest products factory setting.

The unit applies to Sawmill Worker, Production Worker, Manufacturing Assistant.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for orders and despatch	1.1 Review orders and consignment documentation and where required check with appropriate personnel. 1.2 Plan and sequence despatch schedules in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

2. Process orders	2.1 Use safe manual handling techniques when selecting and processing goods to avoid personal injury. 2.2 Select and compile products in line with order documentation. 2.3 Check products using product knowledge, labels and other identification systems. 2.4 Wrap finished product orders to avoid damage during transportation. 2.5 Avoid wastage of packaging materials; reuse recycled materials and recycle offcuts. 2.6 Check order against despatch schedule and order documentation. 2.7 Sort and consolidated compiled orders in line with organisational procedures.
3. Despatch products	3.1 Complete records for despatch and product movement. 3.2 Complete, attach and check load labels and documentation. 3.3 Organise loading in line with organisational procedures. 3.4 Explain transportation requirements to driver. 3.5 Update stock records in line with organisational procedures. 3.6 Record order and despatch problems and report to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numbers of goods on order documentation, count items to match • input accurate numerical data into stock records.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of orders and consignment documentation • provide clear instructions to delivery driver.

Reading skills to:	• interpret detailed and familiar documents:
	  • organisational procedures
	  • orders, consignment documents, despatch schedules, product labels and stock records.

Writing skills to:	• complete basic accurate records of orders and despatch • accurately record information on despatch labels

© Commonwealth of Australia, 2025 Skills Insight

	• make simple reports about order and despatch problems.
Planning and organising skills to:	• complete order and despatch activities in a logical and time-efficient sequence using despatch schedules to guide activities.
Problem-solving skills to:	• identify, record and report order discrepancies and quality issues.

Technology skills to:	• use:
	  • a computer and keyboard
	  • the system capabilities and functions of an order and despatch system
	  • equipment used to assist with shifting goods.

Assessment Requirements for FWPCOT2227 Process orders and despatch products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2227B Process orders and despatch products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organisational policies and procedures relevant to processing orders and despatching products
- process orders including
  - selecting and compiling orders
  - sort and consolidate products
  - wrap products
- despatch products including
  - labelling
  - organising transport.
  -

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- system functions and capabilities of industry and specific organisational order and despatch software systems
- format, content and use of:
  - order and consignment documentation

© Commonwealth of Australia, 2025 Skills Insight

  - despatch schedules
  - despatch labels
- storage layout and categories of finished products for a forest products factory setting
- key features of the product range of the organisation
- transport conditions for different types of products and packaging requirements to avoid damage
- environmental protection practices for packaging products for despatch:
  - avoiding waste when wrapping and packaging
  - reusing recycled materials on hand
  - disposing of and recycling wrapping and packaging materials
- safe manual handling techniques for selecting and compiling orders; those for bending, lifting and shifting and carrying heavy items
- organisational policies and procedures specific to processing orders and despatching products
- workplace health and safety and use of assistive equipment to shift heavy items
- processing and despatching orders; completion of required documentation and labelling
- communication reporting lines
- recording and reporting order and despatch problems.
-

Assessment Conditions

The following resources must be made available:

- computers, keyboards and printers
- industry current software programs used to control order and despatch processes
- assistive equipment to shift heavy items
- personal protective equipment used for selecting and compiling orders
- a diverse range of products to be selected, compiled and packaged for despatch:
  - timber
  - wood panel products
  - manufactured timber products
- wrapping and packaging materials for products despatched from a forest products factory setting
- order and consignment documentation
- despatch schedules
- despatch labels
- template reports for recording order and despatch problems
- organisational policies and procedures for processing orders and despatching products.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

© Commonwealth of Australia, 2025 Skills Insight

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2228 Store materials

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to receive and store packs of timber and timber products in a timber racking system and storage bay. Work is completed in in a forest products factory setting.

The unit applies to Sawmill Worker, Production Worker, Manufacturing Assistant.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for storage	1.1 Review work order and where required check with appropriate personnel. 1.2 Inspect and check the type and quantity of material for grading, labelling and storage.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	1.3 Select required storage locations and isolate in line with organisational procedures 1.4 Select appropriate personal protective and lifting equipment and request assistance with lifting.
2. Receive materials	2.1 Place packs containing material to be stored on stand, frame or ground. 2.2 Release or unbind packs in a clear area to avoid personal injury and damage to material. 2.3 Check material tallies against labelled or expected content. 2.4 Report packs not meeting work order or containing contaminated material to appropriate personnel. 2.5 Regularly clear area of packing and loose material in line with organisational safety procedures.
3. Categorise and store materials	3.1 Separate material by size and category and store in designated storage locations. 3.2 Dispose of material not meeting quality requirements in line with environmental protection practices. 3.3 Label storage locations in line with organisational systems. 3.4 Complete, process and maintain records and reports in line with organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• tally numbers of timber packs and timber products against stock receipt documents • estimate sizes of cross-sections widths, lengths and profiles of materials and sort into common dimensions • complete basic stock records and reports involving quantities and dimensions.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.
Reading skills to:	• interpret: • workplace health and safety and other organisational procedures

© Commonwealth of Australia, 2025 Skills Insight

	• work orders • basic stock receipt documents.
Writing skills to:	• complete accurate basic labels and records and reports for incoming stock.
Planning and organising skills to:	• efficiently and logically sequence the stages of receipt and storage of timber products using work order to guide activities.

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to storing materials
- prepare for, receive and inspect a pack of timber or timber products for storage
- sort a pack of timber, move and allocate its contents to storage locations in line with organisational requirements
- complete records and reports for incoming materials.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- methods of visual estimation, grading, colour identification and tagging
- range of industry standard lengths, cross sections, appearance grades and applicable terminology
- layout of stores area in forest products factories and typical methods to categorise, label and store timber and timber products:
  - standard product classification
  - product designation
  - size
  - dimension
  - stack number
  - weight
  - grade
  - shelf life

FWPCOT2229 Dock material to length

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2229B Dock material to length, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare and dock material to length with a power driven saw. Work is completed in forest products factory setting and includes operator maintenance.

The unit applies to Timber Manufacturing Worker, Production Worker, Customer Service Assistant, and Sawmill Worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for cutting	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify type and quantity of materials to be cut and obtain from storage. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Interpret cutting list and plan material cutting patterns and saw set-up sequences in line with work order.
2. Cut material to length	2.1 Mark up material and set stops in preparation for cutting. 2.2 Use equipment and machinery in line with organisational procedures, manufacturer's instructions and environmental protection practices. 2.3 Follow cutting sequence and patterns to produce required quantity. 2.4 Check cuts for length within a set tolerance. 2.5 Dispose of incorrect cuts, off-cuts and material with defects in line with environmental protection practices. 2.6 Stack material safely in designated location in line with work order requirements. 2.7 Identify routine processing and equipment faults and resolve or report to appropriate personnel. 2.8 Complete production and quality records and report in line with organisational procedures.
3. Complete operator maintenance	3.1 Follow organisational safety procedures to lock out equipment. 3.2 Check saw blades for blunt or damaged condition 3.3 Repair or send for repair blunt saw blades according to organisational site procedures and manufacturer’s instructions 3.4 Recycle or dispose of used blades in line with organisational procedures and environmental protection practices 3.5 Complete basic non-specialist maintenance for equipment. 3.6 Keep saw area clear of dust, off-cuts and debris. 3.7 Record and report equipment faults and maintenance requirements to appropriate personnel.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and count raw materials • complete basic calculations of required length to determine saw set up • complete routine production records involving dimensions and quantities tallied against orders.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify and dispose of incorrect cuts and defective material • recognise faulty equipment and resolve by reporting or rectifying.
Technology skills to:	• select, use and maintain appropriate machinery, tools and personal protective equipment used for machining activities.

Assessment Requirements for FWPCOT2229 Dock material to length

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2229B Dock material to length, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organizational policies and procedures relevant to docking material to length
- cut material to length in line with a work order and within prescribed organisational tolerances
- stack batches of cut material in line with organisational procedures
- complete basic non-specialist maintenance including:
  - cleaning the machine of wood chips and sawdust
  - replacing blunt cutters or saw blades according to site procedures
  - inspecting machine parts for wear or damage, including guards
  - greasing and lubricating moving parts
  - checking the operation of emergency stop buttons and lock out systems.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- cutting patterns and sequences for single angles requiring one cutting pass or single vertical cuts
- optimal docking practices

© Commonwealth of Australia, 2025 Skills Insight

- range of industry standard lengths, cross sections and tolerances and applicable terminology
- types of tools and equipment used for docking material to length; their purpose, features, operation and basic non-specialist repair and maintenance:
  - measuring equipment
  - manually controlled docking and trimming saws
  - bench saws
  - radial arm saws
  - saws with adjustable angle
  - saws with automatic feed
  - saws with one blade
  - table saws
- methods for assessing saw blade condition
- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and blunt saw blades
- storage layout and categories for:
  - raw materials
  - stacking finished materials
- typical timber defects and how these affect ability to produce a quality finished product:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- organisational procedures specific to docking material to length:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to dock material to length:
  - measuring equipment
  - manually controlled docking and trimming saws

© Commonwealth of Australia, 2025 Skills Insight

  - bench saws
  - radial arm saws
  - saws with adjustable angle
  - saws with automatic feed
  - saws with one blade
  - table saws
- maintenance tools and equipment for saws
- consumable components; saw blades
- personal protective equipment suitable for docking material to length
- a diverse, comprehensive and commercial product range of timber
- manufacturer instructions for equipment use and operator maintenance
- work order with specific instructions for cutting timber
- documents, spreadsheets and commonly used proformas documents for recording production outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for docking material to length.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence

FWPCOT2230 Assemble products

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPICOT2230B Assemble products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the skills and knowledge required to prepare and assemble construction-ready timber products. Work also involves stacking, strapping and despatching assembled timber products in readiness for transport to a construction site.

The unit applies to individuals who assemble products for despatch in a timber product manufacturing facility. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Wood Panel and Board Production

Sawmilling and Processing

Elements and Performance Criteria

Elements	Performance Criteria

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for assembly work	1.1 Review construction plans, work order, workplace health and safety requirements, environmental protection practices and emergency procedures for assembly operation and, where required, clarify with appropriate personnel 1.2 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislation to maintain safe work practices 1.3 Identify and obtain the type and quantity of material to be assembled and hardware 1.4 Select appropriate tools and equipment and check for operational effectiveness according to manufacturer recommendations 1.5 Identify and prepare set-up jigs required for assembly
2. Set up timber components	2.1 Select timber components from the pre-cut material according to cutting list 2.2 Reject material with defects and dispose of according to environmental protection practices 2.3 Use equipment according to workplace health and safety procedures and manufacturer instructions 2.4 Position and clamp timber components in jigs ready for joining, and check for allowable faults, joins and grain according to construction standards and grading rules 2.5 Staple timber components to maintain temporary alignment during assembly
3. Install assembly hardware	3.1 Position and install hardware on joints according to construction plans 3.2 Nail or staple temporary bracing to the product according to construction standards 3.3 Correct assembly faults 3.4 Identify routine processing and equipment faults and resolve or report to appropriate personnel
4. Prepare timber products for despatch and report	4.1 Check finished timber product for quality and label according to work order 4.2 Remove timber product from jigs and safely stack in a designated location 4.3 Strap, pack and label finished timber products ready for transportation

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4 Avoid wastage of strapping and packaging materials and maximise use of recycled materials 4.5 Complete quality records and report for production outcomes, equipment faults and maintenance requirements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	• Produce basic clear labels for product identification and transportation
Numeracy	• Count quantities of materials and hardware components and select appropriate sizes • Complete routine calculations for component layouts • Accurately measure lengths and angles
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Assessment Requirements for FWPCOT2230 Assemble products

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPICOT2230B Assemble products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- assembled three or more of the following types of timber products according to an individual work order, construction plan and workplace health and safety requirements:
  - pallets
  - crates
  - trellises
  - stairs
  - doors
  - windows
  - beams
- strapped, packed and labelled bundles of completed timber products ready for transportation
- completed a detailed and accurate report for production outcomes and equipment faults.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to assembling timber products, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to assembling timber products:
  - health and safety, with particular emphasis on personal protective equipment (PPE) and equipment lockout

© Commonwealth of Australia, 2025 Skills Insight

    - use of equipment for assembling timber products
    - communication reporting lines
    - recording and reporting production outcomes and equipment faults
- environmental protection practices for timber product manufacturing facilities:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing timber
- typical timber component defects and how these affect the ability to produce a quality finished product:
    - warp
    - wane
    - cupping
    - shakes
    - insect defects
    - knots
    - resin pockets
- assembly sequences
- componentry and construction standards
- typical assembly faults triggering a correction to ensure timber product quality, including:
    - incorrectly positioned joints
    - timber splits from nailing
    - incorrectly positioned hardware
- storage layout and categories for stacking finished timber products
- types of tools, equipment and assembly hardware used for assembling timber products, their purpose, features and operation:
    - measuring equipment
    - assembly jigs
    - nail plate presses
    - staple guns
    - nail guns
    - compressor or compressed air supply
    - marking equipment
    - strapping equipment
    - nailing plates
    - gang nails
    - nail gun nails
    - staples.

Assessment Conditions

Assessment of skills must take place under the following conditions:

© Commonwealth of Australia, 2025 Skills Insight

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - tools and equipment used to assemble timber products
  - assembly hardware
  - PPE suitable for assembling timber products
  - pre-cut sections of timber
- specifications:
  - manufacturer instructions for equipment use
  - work order and construction plan with specifications for assembling timber products
  - template documents for recording production outcomes and equipment faults
  - workplace procedures for assembling timber products, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2231 Pack products

Modification History

Release	Comment
1	Replaces equivalent FPICOT2231B Pack products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan and pack routine and special orders, and to modify packing of routine orders, in readiness for despatch to customers.

The unit applies to those packing products in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare to pack orders.	1.1 Review work order in line with site procedures. 1.2 Prepare to work safely according to workplace requirements. 1.3 Assess strength, flexibility and liability to damage of material to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	be packed. 1.4 Ensure sizes and weights of planned pack are consistent with handling systems at despatch and delivery site. 1.5 Communicate information with relevant personnel as required, in line with workplace requirements.
2. Pack orders.	2.1 Select packing material to suit the specific order requirements. 2.2 Apply standard site packing methods according to relevant regulations, and site requirements and procedures. 2.3 Use stacking, bracing and strapping methods to provide strength and minimise damage during transport. 2.4 Apply labelling methods in line with site procedures. 2.5 Minimise and deal with bracing and strapping waste material in line with site procedures, manufacturer recommendations and environmental requirements.
3. Modify packing of routine orders.	3.1 Determine changes to type or quantity of material to be packed in line with work order. 3.2 Review or alter transport packing methods. 3.3 Report and rectify pack handling problems or material damage resulting from changes. 3.4 Review changes resulting in potential major problems with the customer.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numbers of goods on order documentation, count items to match • input accurate numerical data into stock records • calculate size and weight of packs to be distributed
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of orders and consignment documentation • provide clear instructions to delivery driver.

Reading skills to:	• interpret detailed and familiar documents:
	  • organisational procedures
	  • orders, consignment documents, despatch schedules, product

© Commonwealth of Australia, 2025 Skills Insight

	labels and stock records.
Writing skills to:	• complete basic accurate records of orders and despatch • accurately record information on despatch labels • make simple reports about order and despatch problems.
Planning and organising skills to:	• complete order and despatch activities in a logical and time-efficient sequence using despatch schedules to guide activities.
Problem-solving skills to:	• identify, record and report order discrepancies and quality issues.

Technology skills to:	• use:
	  • a computer and keyboard
	  • the system capabilities and functions of an order and despatch system
	  • equipment used to assist with shifting goods.

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT2231 Pack products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2231B Pack products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to packing products
- pack products in line with work order and safe work procedure
- stack, brace, strap and label packs of products in line with organisational requirements and work health safety (WHS) requirements
- monitor the packing process for faults and respond according to organisational requirements
- use labelling methods according to workplace requirements
- modify packing of routine orders in line with work order and organisational requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures involved in packing and handling products
- environmental protection procedures including the safe and efficient disposal, recycling or re-use of waste material (including bracing and strapping waste material) and the minimisation of carbon emissions
- procedures for identifying and resolving common faults and problems
- procedures for recording and reporting workplace information
- products and their use
- characteristics of pack shift and movement, its impact on safety and how to control it
- packing sequences and weight distribution and their impact on safety and productivity

© Commonwealth of Australia, 2025 Skills Insight

- packing methods that apply to different types of products (stacking, bracing, strapping
- tools and equipment used for packing and procedures for their safe use and maintenance.

Assessment Conditions

The following resources must be made available:

- workplace location or realistic simulated workplace
- materials and equipment used to pack products:
  - packing tools and materials
  - labelling materials
- work order containing packaging and despatch instructions for timber and timber products from the work site.
- Organisational policies and procedures relevant to packing products

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2232 Cut material to shape using a saw

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2232B Cut material to shape using a saw, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare and cut material to shape using sawing equipment in order to produce shaped timber products. Work is completed in forest products factory setting and includes operator maintenance.

The unit applies to Production Worker, Sawmill Worker, Manufacturing Assistant, Saw Operator.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for shaping	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify type and quantity of materials to be shaped and obtain from storage location. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Identify profile to be cut and select cutting blades.
2. Set up shaping equipment	2.1 Follow lock out procedures, select and attach machine guides to machinery. 2.2 Check saw blade for sharpness and correct alignment. 2.3 Use equipment in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.4 Set cut in line with required shape and to minimise waste. 2.5 Dispose of off-cuts in line with environmental protection practices. 2.6 Stack material stack in close proximity to maximise ease of machine feeding. 2.7 Test equipment set-up for correct alignment through trial run on timber and adjust as required.
3. Cut material to shape	3.1 Reject material with defects and dispose of in line with environmental protection practices. 3.2 Feed material into machine at feed rate prescribed by organisational requirements. 3.3 Follow, maintain and adjust cutting sequence to produce required quantity and maximise feed rate. 3.4 Check jig or shape line regularly and adjust to maintain desired cut. 3.5 Stack material safely in designated location in line with work order requirements. 3.6 Identify routine processing and equipment faults and resolve or report to appropriate personnel. 3.7 Complete production and quality records and report in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check saw blades for bluntness or damage. 4.3 Remove and replace saw blades in line with manufacturer's recommendations. 4.4 Dispose of used blades in line with organisational procedures and environmental protection practices. 4.5 Complete basic non-specialist maintenance for equipment. 4.6 Keep machine area clear of dust, off-cuts and debris. 4.7 Record and report equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify material quantities required in work orders and count raw materials • calculate feed rates to optimise quality and quantity of production output • complete routine production records involving dimensions and quantities tallied against orders.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.

© Commonwealth of Australia, 2025 Skills Insight

Problem-solving skills to:	• identify and dispose of defective material • recognise faulty equipment and resolve by reporting or rectifying.
Technology skills to:	• select, use and maintain appropriate machinery, tools and personal protective equipment used for shaping activities.

Assessment Requirements for FWPCOT2232 Cut material to shape using a saw

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2232B Cut material to shape using a saw, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organizational policies and procedures relevant to cutting material to shape using a saw
- cut one or more of the following types of material to shape in line with a work order and prescribed organisational specifications:
  - native timber species
  - imported timber species
  - dressed timber
  - in-the-rough timber
  - stress and non-stress graded timber
  - preservative treated timber
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard and other manufactured board products
- complete these types of basic non-specialist maintenance:
- cleaning the machine of wood chips and sawdust
- replacing blunt cutters or saw blades
- inspecting machine parts for wear or damage, including guards

© Commonwealth of Australia, 2025 Skills Insight

- greasing and lubricating moving parts
- checking the operation of emergency stop buttons and lock out systems.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- types of tools and equipment used for cutting material to shape; their purpose, features, operation and basic non-specialist repair and maintenance:
  - measuring equipment
  - band saws
  - jig saws
  - machine guides
- methods for assessing saw blade condition
- shapes, feed rates and finish
- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- storage layout and categories for:
  - raw materials
  - stacking finished materials
- typical timber defects and effect on producing a quality finished shaped timber product:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- organisational procedures specific to cutting material to shape:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to cut materials to shape:

© Commonwealth of Australia, 2025 Skills Insight

  - measuring equipment
  - band saws
  - jig saws
  - machine guides
- maintenance tools and equipment for saws
- consumable components; saw blades
- personal protective equipment suitable for cutting materials to shape
- a diverse, comprehensive and commercial product range of timber
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific instructions for cutting and shaping timber
- template documents for recording production outcomes and equipment faults
- organisational procedures for cutting material to shape.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2233 Navigate in forest areas

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2233B Navigate in forest areas, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit describes the outcomes required to navigate in forest areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for navigation	1.1 Identify assignment instructions, destination and relevant information about geographical factors and likely weather conditions enroute. 1.2 Select and check maps and navigation equipment for accuracy,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	currency and operational effectiveness. 1.3 Detect and correct faults or errors in maps and equipment 1.4 Establish and maintain communication with others in line with WHS and organisational requirements
2. Plan the route	2.1 Plan route according to assignment instructions and organisational safety procedures. 2.2 Examine maps to identify relevant symbols, geographical information and navigation data. 2.3 Plan optimum route according to time and safety considerations. 2.4 Plan alternate routes to allow for contingencies and emergency exit routes. 2.5 Identify limitations in planning and seek assistance from appropriate personnel.
3. Navigate the route	3.1 Navigate to and from destination according to planned route and schedule. 3.2 Use navigation equipment, in line with manufacturer's instructions throughout journey 3.3 Orientate maps to surroundings and utilise compass and environmental navigation aids to assist. 3.4 Navigate alternative routes to bypass obstacles and improve efficiency of route. 3.5 Navigate routes and courses to minimise impact on the environment.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numerical data and symbols on maps and navigation equipment to complete calculations involving route time, terrain and distances.
Oral communication skills to:	• ask questions and actively listen to clarify assistance with difficult navigation issues.
Reading skills to:	• interpret: • workplace health and safety procedures

Assessment Requirements for FWPCOT2233 Navigate in forest areas

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2233B Navigate in forest areas, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan routes in line with an individual assignment instructions, destination and timeline
- use navigation equipment when planning routes:
  - standard magnetic compass using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
  - global positioning system (GPS)
  - cadastral maps (maps that show the boundaries and ownership of land parcels)
  - topographic maps
  - photographs
  - general maps
- use a compass and environmental navigation aids enroute to navigate to and from destinations according to the planned route using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
- establish and maintain communication with others as required
- respond to environmental circumstances enroute and adapt by navigating alternative routes.
-

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for minimising damage to the local environment when navigating in forest areas
- purpose, features and operation of navigation equipment and aids, including:
  - global positioning system (GPS) device
  - magnetic compass, including adjustments for local magnetic variation
  - locator beacons
  - cadastral and topographic maps
  - charts
  - guide books
  - photographs and other digital imagery
  - sketches
  - diagrams
- advantages and disadvantages of different map and chart types and sources of error
- representation of topographic features and symbols on maps and charts
- common scales used on maps and plans
- techniques for estimating distances and times using electronic navigation equipment and maps
- features and uses of environmental navigation aids:
  - survey markers
  - track markers
  - signs
  - arrows
  - natural landmarks
- personal protective equipment and clothing
- modes and methods of communication with others
- organisational workplace health and safety procedures for navigation activities.
-

Assessment Conditions

The following resources must be made available:

- cadastral, topographic and general maps
- magnetic compass
- global positioning system (GPS) device
- track and survey markers
- beacons
- manufacturers' instruction for navigation equipment use
- personal protective equipment required to navigate in forest areas
- communication devices

© Commonwealth of Australia, 2025 Skills Insight

- assignment instructions with specific information on destinations and deadlines
- organisational workplace health and safety procedures for navigation activities
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2235 Assess timber for manufacturing potential

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2235A Assess timber for manufacturing potential, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess timber for its manufacturing potential for frame and truss construction. Timber is assessed for ability to hold nail plates and retain engineered strength ratings with particular attention given to serviceability.

Work is completed in a factory environment, usually as part of production of prefabricated trusses, frames and floors.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

1. Prepare for assessing	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify type and quantity of material to be assessed and obtain from storage location. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Plan visual assessment process in line with organisational procedures.
2. Assess timber	2.1 Identify requirements for storage and subsequent processing of materials. 2.2 Assess characteristics and defects of material against industry and Australian Standards to determine plating potential. 2.3 Identify defects prior to plating or sawing. 2.4 Orientate timber components to make best use of characteristics. 2.5 Select timber assessed as unsuitable for plating for reprocessing to minimise wastage. 2.6 Record assessment outcomes and distribution problems and report to appropriate personnel.
3. Distribute material	3.1 Reject sub-standard materials; dispose of or recycle in line with environmental protection practices. 3.2 Organise movement of material to storage or processing operations in line with organisational procedures. 3.3 Monitor on-site movement of material to ensure intended flow is achieved. 3.4 Label material in line organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of assessable material within work orders and count raw materials • measure size of undesirable timber characteristics • complete routine assessment records involving numerical grades, dimensions and quantities tallied against orders.
Oral communication	• ask questions and actively listen to clarify contents of work orders.

© Commonwealth of Australia, 2025 Skills Insight

skills to:	

Reading skills to:	• interpret:
	  • organisational procedures
	  • work orders.

Writing skills to:	• produce basic clear labels for timber identification • complete accurate basic reports on assessment outcomes.
Planning and organising skills to:	• sequence the stages of assessment using work order to guide activities • coordinate efficient on-site movement of assessed timber to maximise production outputs.
Problem-solving skills to:	• recognise undesirable timber characteristics and assess as unfit for plating purpose • identify and dispose of defective materials.

Assessment Requirements for FWPCOT2235 Assess timber for manufacturing potential

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2235A Assess timber for manufacturing potential, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- assess the following range of timber for its manufacturing potential for frame and truss construction:
  - native timber species
  - imported timber species
  - dressed timber
  - in-the-rough timber
  - stress and non-stress graded timber
  - preservative treated timber
- use the following equipment during assessments:
  - charts
  - gauges
  - picture cards
  - measuring equipment
- complete an assessment report for each timber assessment identifying timber characteristics and defects and how these would impact on nail plate holding ability.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- basic aspects of guidelines and standards for provisions relevant to engineered strength ratings and timber ability to hold nail plates
- environmental protection practices for safely disposing of, recycling and reusing timber in a forest products factory setting
- range of timber characteristics and defects and how these affect nail plate holding ability including:
  - bow, spring and twist
  - wane/want and collapse
  - cupping and other distortion
  - knots and knot holes
  - borer damage
  - gum/resin veins and pockets
  - decay
  - end splits, internal checks and surface checks
  - low density material
  - compression failures and fractures
  - durability
  - heart in material
  - joint strength
- range of industry standard timber species and materials and how these affect nail plate holding ability including:
  - native timber species
  - imported timber species
  - dressed timber
  - in-the-rough timber
  - stress and non-stress graded timber
  - preservative treated timber
  - laminated veneer coated and treated timber products
  - beams or laminated beams
- range of industry standard lengths, cross sections and grades and how these affect nail plate holding ability
- storage requirements for timber as it relates specifically to the organisation’s operation
- processing requirements for timber as it relates specifically to the organisation’s product range
- methods to orientate components to make best use of timber characteristics
- methods to label assessed timber and common terms used
- types of tools and equipment used for assessing timber; their purpose, features and use:
  - charts
  - gauges

© Commonwealth of Australia, 2025 Skills Insight

  - picture cards
  - measuring equipment
- organisational procedures specific to assessing timber:
  - communication reporting lines
  - recording and reporting assessment outcomes.

Assessment Conditions

The following resources must be made available:

- tools and equipment used for assessing timber:
  - charts
  - gauges
  - picture cards
  - measuring equipment
- a comprehensive commercial range of timber to be assessed with characteristics and defects
- personal and protective equipment for assessing timber for manufacturing potential
- work order for timber assessment activities
- template timber assessment reports
- organisational procedures for assessing timber.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2236 Fall trees manually (basic)

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess and manually fall small trees with a low level of complexity and to complete operator maintenance.

Basic trees typical to the scope of this unit may include the following characteristics:

- lean and distribution of the crown weight does not create a complex situation to assess or fell
- small dimensions relative to local forest size distribution
- no excessive lean
- no visible damage or defect
- species that are not prone to free splitting and adverse reactions during felling
- single stem or non-complex multi-stems
- diameter of tree is less than chainsaw bar length
- grown on terrain and slope that does not add significant complexity to the operation

The unit applies to those in a forest, agricultural, local council, emergencies services and other government agency environment. With the exception of minor forest produce, it is not relevant to commercial harvesting operations.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for felling	1.1 Identify and adhere to work specifications and site environmental protection measures relevant to felling basic trees in line with organisational requirements and relevant regulations 1.2 Review and check job requirements with appropriate personnel 1.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations 1.4 Identify trees to be retained and felled 1.5 Establish and maintain communication with others according to WHS requirements
2. Prepare for felling	2.1 Review location and stability for conditions likely to affect felling activities 2.2 Identify and report site environmental conditions to appropriate personnel 2.3 Identify and control potential and existing risks and hazards 2.4 Monitor and exclude location and activity of other personnel on the work site
3. Assess tree and plan felling	3.1 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required 3.2 Confirm that tree is safe to fell 3.3 Visually assess tree for felling characteristics, defects and stresses 3.4 Assess and check required falling direction and possible deviation 3.5 Plan sequence of cuts to fell tree according to standard felling procedures 3.6 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements
4. Apply tree felling techniques	4.1 Fell individual trees using selected cutting techniques according to WHS and job requirements 4.2 Adjust cutting technique in response to movement and condition of tree

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	4.3 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable 4.4 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen 4.5 Identify and implement procedures for removal of trees that are hung-up 4.6 Dispose of waste materials in line with environmental and operational requirements
5. Maintain equipment	5.1 Inspect equipment on completion of trimming and cutting activities 5.2 Identify damaged saws and cutting attachments for repair or replacement according to organisational requirements and manufacturer recommendations 5.3 Remove, clean, adjust or replace chain and other components according to manufacturer recommendations 5.4 Maintain tools and equipment according to WHS requirements and manufacturer recommendations

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• estimate tree dimensions, including height, length, diameter and volume • complete routine calculations and report on size, length, diameter of felled trees.
Oral communication skills to:	• select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees • interpret hand signals with other operators to ensure safe tree felling

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' maintenance recommendations.

Writing skills to:	• complete accurate basic records for tree felling process, equipment faults and maintenance requirements.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• identify an unsafe tree • efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.

Assessment Requirements for FWPCOT2236 Fall trees manually (basic)

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at a basic level
- comply with organisational policies and procedures relevant to felling trees manually at a basic level
- comply with applicable licensing or certification requirements relevant to felling trees manually
- effectively communicate and use safe working practices, including maintaining an awareness of activity by other personnel in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at a basic level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route

© Commonwealth of Australia, 2025 Skills Insight

- fell basic trees using a appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up
- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at a basic level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
  - PPE and clothing
  - safety equipment
  - first aid equipment
  - firefighting equipment
  - hazard and risk control procedures
  - fatigue management procedures
  - appropriate signage
  - elimination of hazardous materials and substances procedures
  - safe forest practices, including required actions relating to fire
  - techniques for manual handling, including shifting, lifting and carrying
- types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
  - shakes
  - insect defects
  - knots and resin pockets
  - pipe
  - drysides
- identifying trees:
  - that contain hazards and are deemed unsafe to fell
  - considered outside own skill level
  - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
  - uneven and unstable terrain
  - unsafe trees
  - fires
  - overhead and underground services

© Commonwealth of Australia, 2025 Skills Insight

  - excavations
  - traffic
  - structures
  - hazardous materials
  - insects and animals
  - other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
  - native vegetation
  - soil and water
  - heritage and archeological artefacts
  - flora and fauna
  - geomorphologic features
  - landscape
  - external site pollution
  - recreational opportunities
  - regeneration opportunities
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on basic tree felling activities:
  - general forest lean
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - gullies
  - presence and density of seed and habitat trees
  - water courses
  - wet and adverse weather conditions
  - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  - warning signs
  - chainsaw and components
  - PPE and clothing
  - first aid equipment
  - maintenance requirements
  - support tools.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment that contains small trees with a low level of falling complexity
- PPE and clothing including:
  - safety helmet
  - safety gloves
  - protective footwear
  - eye protection
  - hearing protection
  - high visibility clothing
  - leg protection (trousers or chaps)
- materials and equipment including;
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers' instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - relevant state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2237 Maintain chainsaws

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to maintain engine or electrically operated hand-held chainsaws. It includes sharpening chains and completing routine and frequently required service requirements as well as periodic servicing. Work is completed in a variety of work settings including a forest environment, agricultural, workshop, arboretum and horticultural settings.

The unit applies to chainsaw operators.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for chainsaw maintenance	1.1 Select appropriate personal protective, maintenance and repair equipment and check for operational effectiveness in line with manufacturer's recommendations.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	1.2 Plan repair and maintenance activities in line with manufacturer's instructions and recommendations and organisational requirements
2. Complete chainsaw maintenance	2.1 Follow organisational safety procedures to lock out equipment. 2.2 Complete routine and frequently required service requirements on chainsaws in line with manufacturer's instructions and organisational requirements 2.3 Complete periodic service requirements on chainsaws in line with manufacturer's recommendations and organisational requirements 2.4 Check chain for bluntness or damage. 2.5 Remove, sharpen, adjust and replace chain and other components in line with manufacturer's recommendations. 2.6 Identify, diagnose, tag and report chainsaw faults, malfunctions or irregular operation for repair or replacement. 2.7 Reassemble serviced chainsaw components, check for operational effectiveness, tag and store.
3. Complete maintenance records and clean up	3.1 Complete, process and maintain records and reports in line with organisational procedures. 3.2 Clear and clean work area and tools, and dispose of and recycle waste materials in line with environmental protection practices.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• calculate ratios and measure quantities of oils and fuels.

Reading skills to:	• interpret:
	  • workplace health and safety procedures
	  • work orders
	  • manufacturer’s instructions and maintenance recommendations.

Writing skills to:	• complete basic accurate records of repairs, maintenance activities and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence stages of repair and maintenance work.

Assessment Requirements for FWPCOT2237 Maintain chainsaws

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement. This is the first release of this unit in the new standards format.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete these routine and frequently required service requirements on chainsaws in line with manufacturer's instructions:
  - removing, checking and cleaning air filter for damage and penetration of foreign material
  - cleaning saw body, air intake vents and cooling fins
  - cleaning chain brake
  - inspecting chain and guide bar
  - checking screws and nuts for tightness
  - checking safety devices
  - filling fuel tanks and chain oil tanks
- complete these types of periodic service requirements on chainsaws in line with manufacturer's instructions:
  - replacing drive sprocket
  - cleaning or replacing and setting spark plug
  - checking and replacing fuel filter
  - checking chain brake, oil system, flywheel assembly, anti-vibration system, muffler and spark arrestor
  - inspecting and replacing starter cord and starter spring

© Commonwealth of Australia, 2025 Skills Insight

  - matching pitches and gauges of cutting components
  - dressing and cleaning cutter bar
  - cleaning fly wheel
  - removing and cleaning exhaust and fire screen
- complete these activities to check and sharpen chain saw chains in line with manufacturer's instructions:
  - inspecting and adjusting chain
  - inspecting and replacing chain that is worn, damaged or incorrectly sharpened
  - sharpening chain types and setting of depth gauges.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- types, purpose, features and operation of chainsaws for which repairs are completed
- features and names of different parts of chainsaws
- purpose, features and operation of tools and equipment used to repair and maintain chainsaws
- specifications and types of bars, chains and sprockets
- differences between frequent and periodic chainsaw maintenance requirements
- techniques for:
  - removing chains and other chainsaw components
  - assessing chain condition
  - sharpening chains to specified requirements
  - reassembling chainsaw components
- hazards for maintaining chainsaws and methods to minimise associated risks:
  - loud noise and exhaust fumes
  - mechanical vibration
  - handling hazardous substances
  - cuts and hot surfaces
  - rotating parts
- organisational procedures specific to repairing and maintaining chainsaws:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection practices for repairing and maintaining chainsaws:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials
  - disposing of hazardous substances.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

The following resources must be made available:

- engine or electrically operated hand-held chainsaws
- tools and equipment used to repair and maintain chainsaws
- consumable chainsaw parts, oil and fuel
- personal protective equipment suitable for repairing and maintaining chainsaws including:
  - Safety boots
  - Safety helmet
  - Cut resistant leg protection
  - First aid kit
  - Hearing protection
  - High visibility clothing
  - Eye protection
  - Apron
  - Chain mesh gloves
- manufacturers' instructions and recommendations for repair and maintenance of chainsaws
- template documents for recording repairs, maintenance activities and equipment faults.
- organisational procedures for repairing and maintaining chainsaws.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2238 Cut materials with a hand-held chainsaw

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2238A Cut materials with a hand-held chainsaw, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare and cut materials with a hand-held chainsaw. This unit includes basic operator maintenance checks. More comprehensive servicing and maintenance procedures are covered in FWPCOT2237 Maintain chainsaws.

The unit applies to those who cut materials with a hand-held chainsaw in a variety of work settings including a construction, saw mill, forest products factory, timber retail yard or horticultural environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for operation	1.1 Review work order and clarify with appropriate personnel. 1.2 Select equipment appropriate to work requirements and check for operational effectiveness. 1.3 Prepare, check and clear work area, ready for hand-held chainsaw operations. 1.4 Carry out pre-start checks on chainsaw in line with site requirements. 1.5 Establish and maintain communication with others in work area to ensure safety.
2. Cut material	2.1 Visually assess materials to be cut for defects that may present unsafe work conditions, and review cutting plan. 2.2 Place cutting supports to ensure a stable base. 2.3 Cut material within site standard tolerances for length and angle relative to centre line. 2.4 Use cutting techniques to industry standard lengths, maximising volume and quality of recovery material. 2.5 Operate chainsaw effectively, in line with manufacturer's recommendations. 2.6 Clear and dispose of debris in line with site procedures and environmental requirements. 2.7 Complete production and quality reports. 2.8 Identify processing problems and equipment faults and report to appropriate personnel.
3. Conduct chainsaw maintenance	3.1 Clean, maintain and store chainsaw in line with manufacturer's recommendations and site procedures. 3.2 Identify blunt or damaged saws and replace or sharpen, in line with site procedures and manufacturer's recommendations. 3.3 Record and report maintenance activities to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Problem solving skills	• identify defects in materials and problems with equipment, and rectify.

Assessment Requirements for FWPCOT2238 Cut materials with a hand-held chainsaw

Modification History

Release	Comment
1	Replaces equivalent FPICOT2238A Cut materials with a hand-held chainsaw, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and efficiently use a hand-held chainsaw to cut materials
- follow organisational policies and procedures relevant to operating a hand-held chainsaw
- use appropriate methods to cut materials with a hand-held chainsaw
- carry out start-up and lock out procedures for a hand-held chainsaw
- identify defects and problems with chainsaw operations
- identify blunt or damaged saws
- effectively maximise volume and quality recovery
- communicate effectively with others at the work site
- carry out routine maintenance on a hand-held chainsaw.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements and standards for operating a hand-held chainsaw
- environmental protection requirements and safe disposal of waste material
- operational procedures and checks including start-up and shut-down procedures
- equipment processes, technical capability and limitations of a hand-held chainsaw
- established communication channels and protocols to maintain safety

© Commonwealth of Australia, 2025 Skills Insight

- processes for managing risks and hazards associated with chainsaw operations
- knowledge of defects in timber that can effect processing and cause risk
- workplace health and safety requirements, fire protocols and emergency evacuation procedures
- procedures for recording and reporting workplace records and information.

Assessment Conditions

The following resources must be made available:

- a hand-held chainsaw
- material to be cut
- personal protective equipment required for cutting materials with a hand held chain saw
- work order, workplace requirements and site standards for cutting materials with a hand-held chainsaw.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2239 Trim and cut felled trees

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit describes the outcomes required to trim and cut felled trees with a chainsaw and to complete operator maintenance. It applies to situations where the production of timber is not the primary focus of the activity.

The unit applies to a forestry worker, chainsaw operator, forest harvester, harvesting technician and arboriculture worker.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Assessment Requirements for FWPCOT2239 Trim and cut felled trees

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and efficiently use a chainsaw to complete these activities:
  - trim and cut hardwood or softwood trees
  - delimb trees
  - trim branches
  - trim burls and other small growths
- use these cutting techniques:
  - bridging cuts
  - swinging cuts
  - side bind cuts
  - boring
  - wedge cut
  - ripping cuts
- trim and cut trees in these environmental conditions:
  - dry weather condition
  - wet weather condition
  - low and moderate wind speeds
- complete the following maintenance on a chainsaw:
  - sharpening
  - refuelling
  - inspection, identification and replacement of bar, chain, drive sprockets

© Commonwealth of Australia, 2025 Skills Insight

- bar oil checks and top up
- air filter, check, clean and replacement
- cleaning of saw body, air intake vents and cooling fans
- fitting spare chain and tension chain.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection measures including:
  - action to limit the impact of noise, wind speed and direction, fallen trees, ground slope, ground hazards and obstacles, general forest lean
  - action to limit the impact to ground growth, canopy, density of trees
  - action to limit the impact on flora, fauna and habitat
  - soil and water protection
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and effects on tree cutting and trimming activities:
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - wet and adverse weather conditions
  - wind speed and direction
- typical tree defects and how they affect tree cutting activities:
  - splits
  - falling damage
  - fire damage
  - insect infestation
  - pipe
  - shake
  - twist
  - knots and resin pockets
- typical tree stresses and how they affect tree cutting activities
  - tension (fibres being stretched)
  - compression (fibres being squashed)
  - neutral fibres
- range of chainsaw cutting techniques:
  - bridging cuts
  - swinging cuts
  - side bind cuts

© Commonwealth of Australia, 2025 Skills Insight

    - delimbing
    - boring
    - wedge cut
    - ripping cuts
- cutting patterns used to optimise time and recovery of product from trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- purpose, features, operation and basic non-specialist repair and maintenance: of chainsaws
- methods for assessing chain condition
- organisational procedures specific to tree trimming and cutting activities:
    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting tree cutting outcomes, equipment faults and maintenance requirements.

Assessment Conditions

The following resources must be made available:

- chainsaws
- chainsaw fuel and oil containers
- support tools (hammer, wedges, logging tape, cant hook or breaking bar)
- maintenance tools and equipment for chainsaws
- personal protective equipment suitable for cutting trees and maintaining chainsaws
- manufacturers' instructions for use and maintenance of equipment
- work order with specific instructions for tree cutting activities
- template reports for recording tree cutting outcomes, equipment faults and maintenance requirements
- organisational procedures for tree trimming and cutting activities.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2240 Cut material with a pole saw

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2240 Cut materials with a pole saw, which was first released with FPI11 Forest and Forest Products Training Package Version 2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to cut materials at a distance reachable with manual blade and power driven pole-mounted chain saws to unblock components of machinery.

The unit applies to those who operate a pole saw in a saw mill or timber processing environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare to cut and	1.1 Review work order and clarify with appropriate personnel.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
unblock materials	1.2 Select pole saw, and check for operational effectiveness. 1.3 Select and use personal protective and safety equipment appropriate to work requirements. 1.4 Carry out pre start-up checks, equipment set-up and adjustments in line with site requirements and to suit cutting conditions. 1.5 Apply and follow equipment lock-out procedures.
2. Assess materials	2.1 Establish and maintain communication with others in work area to ensure safety. 2.2 Assess location and stability of materials for conditions likely to affect safety of cutting activities. 2.3 Identify materials unable to be cut safely and refer to appropriate personnel.
3. Use pole saw to cut and unblock materials	3.1 Operate pole saw to safely cut and remove materials. 3.2 Adjust cutting technique in response to equipment requirements and allowances. 3.3 Ensure blockage is removed whilst complying with safe work practices. 3.4 Clear waste and debris from the site in line with standard operating procedures and environmental requirements.
4. Maintain equipment	4.1 Clear pole saw of dust, shavings and debris. 4.2 Check chain for serviceability, including worn or damaged condition. 4.3 Remove, sharpen, tension, adjust, replace and lubricate chain and other components in line with manufacturer recommendations. 4.4 Recycle, reuse or dispose of chain and other components in line with environmental requirements. 4.5 Record and report cutting operations, equipment faults and maintenance activities to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Writing skills to:	• record cutting and unblocking activity and maintenance log.

© Commonwealth of Australia, 2025 Skills Insight

Problem solving skills to:	• identify problems and equipment faults and select treatments.

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT2240 Cut material with a pole saw

Modification History

Release	Comment
	Replaces equivalent unit FPICOT2240 Cut materials with a pole saw, which was first released with FPI11 Forest and Forest Products Training Package Version 2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and effectively operate manual blade and power driven pole-mounted chain saws to cut and unblock materials from timber processing machinery
- assess materials to be cut for safe working conditions
- follow work order for cutting and unblocking materials
- adjust operating techniques in response to materials and processing conditions
- follow workplace procedures, site standards and safe work practices for cutting and unblocking materials with a pole saw
- conduct pre-operational checks and adjustments of pole saw
- carry out routine maintenance including cleaning, lubrication, chain tensioning and replacement
- record and report cutting activities and maintenance.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements and site standards and safe work practices for carrying out pole saw operations

© Commonwealth of Australia, 2025 Skills Insight

- environmental risks and hazards associated with using a pole saw to cut and unblock materials
- characteristics of trees and timber defects
- methods for assessing condition of pole saw chain
- pole saw types, including manual blade and power driven pole-mounted chain saws
- pole saw components including blades, conveyors, chains, roller drums, pulleys.
- established communication channels and protocols
- problem identification and resolution strategies, and common fault finding techniques
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- manual blade and power driven pole-mounted chain saws
- worksite with machinery to demonstrate cutting and unblocking materials with a pole saw
- personal protective and safety equipment required for safely operating a pole saw
- work order, workplace procedures and site standards for conducting pole saw operations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence

FWPCOT2241 Apply wood and timber product knowledge

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2241 Apply wood and timber product knowledge, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to apply wood and timber product knowledge in the workplace and promote the benefits of wood and timber products to a range of customers and other stakeholders. It involves identifying products and providing accurate information to customers and other stakeholders about those products.

The unit applies to Customer Service/Sales Assistant, Sales and Merchandising Team Leader, Timber Advisor.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Timber Merchandising

Wood Panel Products

Elements and Performance Criteria

ELEMENTS Elements describe the essential outcomes.	PERFORMANCE CRITERIA Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Develop knowledge of wood and timber products.	1.1 Identify and evaluate information sources for wood and timber products for reliability, validity and currency in line with organisational policies and procedures. 1.2 Research wood and timber product certification bodies, schemes and their roles. 1.3 Identify properties of wood and timber. 1.4 Identify main features of timber products. 1.5 Analyse differences between imported versus Australian wood and timber products with relevant personnel. 1.6 Maintain currency of wood and timber product knowledge.
2. Relate wood and timber product knowledge to own workplace.	2.1 Prepare to work safely according to workplace work health and safety (WHS) requirements. 2.2 Identify and review workplace wood and timber production process. 2.3 Consult with supervisors and colleagues about current wood and timber product issues. 2.4 Analyse common wood and timber treatment methods, preservatives and exposure hazards. 2.5 Match timber coatings and finishes to a specific use.
3. Promote wood and timber products to stakeholders.	3.1 Promote characteristics of timber to stakeholders according to organisational procedures. 3.2 Respond to stakeholder enquiries about wood and timber products and their respective advantages according to organisational procedures. 3.3 Advise on appropriate timber(s) for specific end uses.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Learning skills to:	• find and evaluate relevant product information • ask questions to learn new product information.
Reading skills to:	• analyse and interpret information on wood and timber products • read safety data sheets (SDS).

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• communicate effectively with stakeholders.

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT2241 Apply wood and timber product knowledge

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2241 Apply wood and timber product knowledge, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify, research and evaluate information relating to wood and timber products
- follow organisational policies and procedures relevant to applying and communicating wood and timber product knowledge
- provide advice on and promote wood and timber products to stakeholders.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- common timber species and their origin, appearance, properties and uses including
  - durability
  - density
  - sawing orientation
  - strength group
  - shrinkage
  - joint strength
  - lyctus susceptibility
  - fire rating

© Commonwealth of Australia, 2025 Skills Insight

  - hardness
- knowledge of products applicable to enterprise requirements
- benefits of common wood and timber types for different end uses
- suitable species and product types for wood and timber applications
- life cycle of forests and forest products and how this impacts on sustainability
- methods, preservatives and exposure hazards relating to manufactured timber: engineered products, laminated veneer lumber (LVL), medium density fibreboard (MDF), plywood, and particle board
- manufacturer product literature covering features and benefits of wood and timber products
- certification and chain of custody schemes and their purpose in the forestry industry
- timber grades and their uses for client applications
- procedures for matching timber coatings and finishes to specific end uses
- wood preservatives and their safety data sheets:
- action required to stay up-to-date with product knowledge
- procedures for recording and reporting information provided to stakeholders.

Assessment Conditions

The following resources must be made available:

- materials and equipment relevant to applying wood and timber product knowledge:
  - product information from manufacturers and industry stakeholders
  - relevant safety data sheets (SDS)
- specifications and work instructions relevant to production of wood and timber products in own workplace
- organisational policies and procedures relevant to applying wood and timber product knowledge
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2242 Segregate and sort logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to segregate and sort logs in a commercial forest harvesting environment or a timber processing plant, in line with specified quality characteristics for the best end-usage.

The unit applies to individuals who segregate and sort logs at the roadside, landing area or timber mill. Operators generally work under broad direction and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Core Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to segregate and sort logs	1.1 Review log product specifications for species, product usage and size in reference to the segregation and sorting of logs 1.2 Review the production plan, confirm its targets and assess wood flow requirements to ensure efficient operations and overall productivity 1.3 Confirm, identify and report health, safety, environmental and

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	heritage risks of operation in line with standard operating procedures and site safety and environmental management plan 1.4 Apply risk control measures in line with standard operating procedures, site operational plan, legislative requirements and industry standards to eliminate or minimise risks 1.5 Identify emergency plan procedures to follow in the event of an emergency 1.6 Select appropriate log size measuring tools and calibration methods 1.7 Calibrate log measuring tools to ensure accuracy of length and diameter measurements
2. Segregate and sort logs	2.1 Visually assess and measure logs for size, species and quality characteristics to determine their best end-use in line with product specifications and to identify logs which are to be recovered 2.2 Mark and report logs that cannot be clearly and safely assessed 2.3 Direct mechanical equipment to extract specified logs from the stack and segregate them by specified product usage 2.4 Assist log positioning and segregation into end-use stacks to avoid log damage, provide stability, restrict height for efficient extraction and allow space for the conduct of other operations in line with planned worksite layout 2.5 Ensure stacks are tagged for identification in line with industry standards and production plan requirements 2.6 Record and report measurements and sorting outcomes

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Skill	Description
Reading	• read and understand standard operating procedures, site operational plan, site safety management plan, product specifications and industry standards for log segregation and presentation

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Writing	• record information about logs that cannot be graded
Oral Communication	• interact verbally with machine operators on site to create log stacks • confirm how logs should be segregated and seek assistance where necessary • use appropriate vocabulary including technical language directly relevant to role
Numeracy	• count logs and measure log diameter and length
Navigate the world of work	• understand main tasks, responsibilities and boundaries of own role • calibrate and use log measuring tools according to workplace procedures
Interact with others	• use modes of communication suitable to purpose to confirm and clarify understanding • participate in conversations relevant to role by responding and explaining as required
Get the work done	• plan and organise own activities and resources

Unit Mapping Information

Assessment Requirements for FWPCOT2242 Segregate and sort logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- safely and correctly assessed and measured logs for size, species and quality characteristics for specified product usage in line with a production plan
- checked risks associated to the operation and applied standard operating procedures
- used log measuring tools and methods to measure logs and logs defects
- applied knowledge of log species, log quality characteristics and defects
- identified and assessed log defects
- assisted positioning and segregation of logs into end-use stacks for ensuring minimal log damage and efficient transportation and identification
- followed log product specifications and production plan requirements for sorting logs.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in log product specifications and a production plan
- health and operational hazards or risks related to log segregation and sorting operations and factors that can change or introduce new hazards
- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for log segregation and sorting operations as outlined in workplace procedures and production plan
- required emergency response procedure, including firefighting resources and emergency response
- industry-accepted warning signs, their correct positioning and procedures to maintain communication and work safety

© Commonwealth of Australia, 2025 Skills Insight

- industry-accepted environmental control measures, restrictions, legal obligations of current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for log segregation and sorting operations as outlined in workplace procedures and production plan
- log species, quality characteristics and log defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets, values
- maximum log damage or defect allowance and minimum quality allowance particular to a production system
- criteria for recycling and re-using logs with significant defects
- log measuring tools for length and diameter measurements
- methods for calibrating and verifying log measuring tools
- techniques and methods for measuring log diameter and length using standard and digital tools
- causes of manual length and diameter measurement error
- industry-accepted methods for product identification.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - logs for segregation and sorting
  - standard and digital log measuring tools
  - personal protective equipment
- specifications:
  - access to workplace policies and procedure which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
  - access to workplace policies and procedure which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
  - access to production plan, site operational plan and log product specifications
  - access to site emergency procedure
  - access to workplace standard operating procedure for log segregation and sorting.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3201 Hand sharpen knives and blades

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3201B Hand sharpen knives and blades, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to hand sharpen knives and blades for a variety of machines. The work is performed in a forest products factory setting.

The unit applies to Sawmill Worker, Production Worker, Machine Operator, Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting and Haulage

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for sharpening	1.1 Review work order is reviewed and clarify with appropriate personnel. 1.2 Remove knives and blades to be sharpened from designated

© Commonwealth of Australia, 2025 Skills Insight

	machinery. 1.3 Select sharpening equipment appropriate to work requirements and check for operational effectiveness. 1.4 Plan sharpening process is in line with site procedures and environmental requirements. 1.5 Establish and maintain communication with others to ensure work site is safe.
2. Assess condition and set up knives and assemblies	2.1 Assess cutting performance of knife for sharpening requirements. 2.2 Clean knife holders to enterprise standards. 2.3 Assess condition of knife holder and correct defects. 2.4 Select jig setting for knife assembly. 2.5 Separate and reassemble knife assembly in line with manufacturer's recommendations.
3. Sharpen knives and blades	3.1 Clean excess build-up from knives or blades and inspect for defects, replacing those unable to be repaired by sharpening. 3.2 Select geometry for knives or blades from manufacturer's instructions. 3.3 Select manual sharpening equipment and suitable attachment for holding the knife or blade. 3.4 Feed sharpening equipment across blade, into cutting edge, to obtain clean cutting edge that conforms with geometric requirements without defects and burns. 3.5 Inspect blade or knife after sharpening for accuracy, and hone remaining burrs to obtain a sharp cutting edge. 3.6 Record and report sharpening and equipment faults to the appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify the pitch and angle that a knife or blade is sharpened at.

Assessment Requirements for FWPCOT3201 Hand sharpen knives and blades

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3201B Hand sharpen knives and blades, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to hand sharpening knives and blades
- safely and effectively hand sharpen knives and blades, using powered and manual sharpening equipment
- follow requirements of work order
- remove and replace knives and blades from equipment
- record and report workplace activity.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for hand sharpening knives and blades
- geometry of knife blades including the pitch and angle that a knife or blade is sharpened at, allowing for the device that the knife or blade is in and the material it will be cutting
- defects of knife blades including: cutting edges with:
  - burrs
  - burns

© Commonwealth of Australia, 2025 Skills Insight

  - chips
  - splits
  - dents
- characteristics of metal, knives and blades including at least one of the following:
  - saw blades
  - planer blades
  - thicknesser blades
  - spindle moulder knives
  - another production equipment type with knives or blades.
- sharpening methods and geometry including:
  - pitch
  - depth of cut
  - speed the knife or blade is sharpened at to obtain a sharp edge
- manual sharpening equipment, procedures for their safe use and maintenance including:
  - power driven sharpening equipment with procedures for safe use and lock-out
  - files (round, triangular, square and flat)
  - honing tools
  - saw sets
- environmental protection requirements, including the safe disposal of waste material, the cleaning of plant, tools and equipment
- organisational and site standards, requirements, policies and procedures for hand sharpening knives and blades
- environmental risks and hazards associated with hand sharpening knives and blades
- procedures for recording and reporting workplace records and information.
- established communication channels and protocols

Assessment Conditions

The following resources must be made available:

- knives and blades to be hand sharpened
- sharpening equipment
- work order, workplace requirements and site standards for hand sharpening knives and blades.
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and

© Commonwealth of Australia, 2025 Skills Insight

- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to navigate in untracked, remote areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids.

The unit applies to a Forestry Worker, Plantation Worker, Forest Harvester, Harvesting Technical Forestry Technician, Tree Planter, Mobile Equipment Operator and Arboriculture Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

1. Prepare for navigation	1.1 Identify and gather information and relevant factors and check with appropriate personnel. 1.2 Select suitable maps, equipment and navigation aids and check for accuracy, currency and operational effectiveness. 1.3 Detect and correct faults or errors in maps and equipment. 1.4 Establish communication with others in line with WHS and organisational requirements
2. Plan the route	2.1 Plan route in line with work instructions and WHS requirements. 2.2 Examine maps to identify relevant symbols, information, navigation data and environmental requirements. 2.3 Calculate accurate grid and magnetic bearings using maps and equipment in line with assignment instructions. 2.4 Plan emergency exit routes and contingencies to combat other risks.
3. Conduct navigation	3.1 Undertake navigation in line with planned route and schedule. 3.2 Orientate maps are correctly to surroundings in line with planned route. 3.3 Use equipment and navigation aids in line with manufacturer recommendations. 3.4 Navigate alternative routes to bypass obstacles and improve efficiency of course. 3.5 Minimise impact on the environment as a result of navigation. 3.6 Record and report navigation activities.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret scales, symbols, grid references, distance and data included on maps and navigation equipment • estimate travel time and distances • locate own position on a map.
Planning and organising skills to:	• estimate resource and equipment requirements • effectively bypass obstacles.
Problem solving skills to:	• identify and solve problems with equipment and navigation route.

Assessment Requirements for FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures for navigating in a remote or trackless area
- select, interpret, and use maps and other written and diagrammatic information for navigation
- use maps, compass and navigation aids to plan routes and navigate in remote or trackless area which must be either:
  - standard magnetic compass using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
  - global positioning system (GPS)
  - cadastral maps (maps that show the boundaries and ownership of land parcels)
  - topographic maps
  - general maps
- plan and conduct an efficient navigation, effectively bypassing obstacles within designated timeframes
- maintain navigation tools and equipment
- establish and maintain effective communication with appropriate personnel as required
- record navigation activities.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for navigating in a remote or trackless area

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition on completion of activity
- organisational and site standards, requirements, policies and procedures for navigating in remote or trackless areas
- factors that may affect navigation, including:
  - types of terrain and gradient
  - weather conditions
  - obstacles
  - distance
  - estimated travelling time
  - availability of resources, including water, rest stops, camp sites
  - access and exit routes
- use and features of various maps, images and charts including:
  - cadastral and topographic maps
  - charts
  - guide books
  - photographs and other digital imagery
  - sketches
  - diagrams
- representation of topographic features on maps and plans, including:
  - grid lines and numbers
  - contour lines
  - magnetic variation
  - scale
  - map legend
  - local features
  - markers and beacons
  - water depth
- common scales and reference information used on maps and plans
- features and uses of environmental navigation aids:
- survey markers
- track markers and beacons
- signs
- arrows
- natural landmarks and reference points
- purpose, features and operation of navigation equipment, and procedures for their safe use and maintenance, including
  - global positioning system (GPS) device
  - magnetic compass, including adjustment for local magnetic variation
  - locator beacons

© Commonwealth of Australia, 2025 Skills Insight

- personal protective equipment and clothing
- techniques for estimating distance travelled within a particular activity context
- established communication modes, methods and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- site to navigate
- navigation equipment
- work order, workplace requirements and site standards for navigating in remote or trackless areas.
- communication devices.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3203 Weigh loads

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3203B Weigh loads, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to check, weigh and record vehicle loads and to direct vehicles when loading and unloading material. Work is completed in a forest products factory setting.

The unit applies to Production Worker, Treatment Plant Operator, Manufacturing Assistant.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare for weighing	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify material for despatch or delivery. 1.3 Identify vehicles delivering or collecting loads; check documents and loads.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Check that load height and stability meet site requirements.
2. Weigh and record loads	2.1 Select appropriate personal protective equipment and check for operational effectiveness. 2.2 Complete weighing operations in line with work order and organisational safety procedures. 2.3 Identify vehicle gross and tare weights using appropriate weighing equipment. 2.4 Calculate and record nett weight. 2.5 Obtain confirmation of delivery and despatch records from driver. 2.6 Record delivery and despatch documentation and maintain in line with organisational procedures.
3. Direct vehicles for loading and unloading	3.1 Obtain loading and unloading documentation and check against work order. 3.2 Identify potential and existing hazards and control risks associated with on-site vehicle movements. 3.3 Direct vehicles clearly and accurately to loading and unloading areas. 3.4 Notify despatch and delivery personnel of loading and unloading requirements. 3.5 Monitor on-site vehicle movements and attend to driver needs as required.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numerical data from work orders including schedule times, weights, dimensions and quantities of materials • complete complex calculations of: • gross, tare and nett weights • heights of empty and loaded vehicles • read weight gauges on weighbridges and truck scales • record numerical data involving times, weights and dimensions.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • provide clear, unambiguous directions to vehicle drivers.

© Commonwealth of Australia, 2025 Skills Insight

Reading skills to:	• interpret detailed familiar and unfamiliar: • workplace health and safety and other organisational procedures • work orders • delivery and despatch documentation.
Writing skills to:	• complete basic accurate records of delivery and despatch details.
Planning and organising skills to:	• coordinate safe on-site movement of multiple vehicles.

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT3203 Weigh loads

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3203B Weigh loads, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to weighing loads
- apply mathematical procedures to calculate load weight and measure dimensions
- safely and efficiently implement the correct procedures to weigh loads
- clearly and accurately record and maintain delivery and despatch documentation
- safely and effectively direct and monitor vehicles for loading and unloading

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of weighbridges and truck scales
- site capacity and compliance requirements for vehicle load height, stability and weight
- overall site layout and layout of loading and unloading areas
- categories of products or materials received or despatched by the organisation and where these are loaded and unloaded
- typical workplace hazards present when weighing loads and during on-site vehicle movement and methods of minimising risks
- key features of these varying signal systems used for directing vehicles:
  - hand signals
  - whistles
  - loud speaker announcements

© Commonwealth of Australia, 2025 Skills Insight

- format, content and use of delivery and despatch documentation:
  - weighbridge dockets
  - order dockets
  - tally sheets
  - load manifests
  - delivery and despatch records
- organisational procedures specific to weighing loads:
  - workplace health and safety with particular emphasis on use of personal protective equipment and identifying hazards and controlling associated risks
  - communication reporting lines
  - recording and reporting delivery and despatch details.
  -

Assessment Conditions

The following resources must be made available:

- weighing equipment:
  - weighbridge
  - truck scales
- personal protective equipment suitable for weighing loads
- work order with specific information about loads to be weighed and delivery and despatch schedules
- template documents:
  - weighbridge dockets
  - order dockets
  - tally sheets
  - load manifests
  - delivery and despatch records
- organisational policies and procedures for weighing loads.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3204 Prepare and interpret sketches and drawings

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3204B Prepare and interpret sketches and drawings, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to identify, select and interpret a sketch or drawing.

This unit includes interpreting sketch and drawing details, and preparing sketches and drawings using dimensions, tolerances and notes following industry and site conventions.

Work is completed in a forest products office setting.

The unit applies to Timber Advisor, Customer Service Officer, Timber Fabricator.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Identify and select correct sketch or drawing	1.1 Obtain initial sketches or drawings and confirm work order requirements with appropriate personnel. 1.2 Interpret, check and validate notes, sketches and drawings, to

© Commonwealth of Australia, 2025 Skills Insight

	determine correct application.
2. Interpret basic sketch or drawing detail	2.1 Identify and interpret basic sketch and drawing features to provide a three-dimensional picture of components, assemblies or structures. 2.2 Use sketches and drawings to orientate and fit components or assemblies. 2.3 Interpret dimensions and tolerances to correctly measure, select, mark or set up items or equipment. 2.4 Identify areas of insufficient detail and report in line with organisational procedures.
3. Prepare sketch or drawing	3.1 Identify items for drawing to ensure clear communication of requirements. 3.2 Select drawing views to present required information with minimal drawing complexity. 3.3 Develop clear and accurate production sketches or drawings in line with customer expectations, organisational procedures and industry standards. 3.4 Incorporate explanatory notes within sketches and drawings. 3.5 Record and report sketch and drawing interpretation and preparation activities to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numerical data from basic sketches and drawings to calculate dimensions for product components and clearly represent these in production sketches and drawings.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify types of drawings and sketches to be completed.

Reading skills to:	• interpret:
	  • organisational procedures
	  • work orders
	  • notations on initial sketches and drawings.

Writing skills to:	• incorporate clear unambiguous explanatory notes within drawings • complete accurate basic records for sketching and drawing outcomes.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• plan processing of drawings in a logical sequence and manage own timing and productivity to complete drawings within deadlines.

Assessment Requirements for FWPCOT3204 Prepare and interpret sketches and drawings

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3204B Prepare and interpret sketches and drawings, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to preparing and interpreting sketches and drawings
- interpret sketch and drawing details to determine material requirements and provide a three-dimensional picture of components, assemblies or structures
- determine areas of insufficient detail or omissions from sketch and drawing detail
- prepare a sketch or drawing that correctly represents intended items and follows industry and site conventions.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- types of sketches and drawings used as a basis for selecting, preparing or assembling components or products
- standard industry and site conventions for views notes, dimensions and tolerances
- typical product and production symbols used in sketches and drawings and their meaning
- meaning and features of drawings that present one, two or three projections

© Commonwealth of Australia, 2025 Skills Insight

- common drawing and organisation specific conventions for, and ways of incorporating these features in sketches and drawings
  - base lines
  - datum points
  - views and projections
  - dimensions and tolerances
  - instructions and notes
  - product and production symbols
- organisational policies and procedures for producing sketches and drawings.

Assessment Conditions

The following resources must be made available:

- sketching and drawing equipment
- basic sketches and drawings on which to base production versions
- template documents for recording drawing processes
- organisational policies and procedures for producing sketches and drawings.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3206 Cut material using high speed optimiser

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3206B Cut material using high speed optimiser, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare and cut material to differing lengths and angles using computer programmable optimising saws. It requires the ability to select and load computer programs and cutting sequences, assess problems and determine appropriate responses. Work is completed in a forest products factory setting.

The unit applies to Machine Operator, Sawmill Worker, Engineered Timber Products Technician, Production Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for cutting	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate personal protective equipment and check for operational effectiveness.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Obtain type and quantity of material to be cut from storage location. 1.4 Identify required cutting patterns and saw setup sequences. 1.5 Check cutting equipment, make adjustments and start in line with manufacturer recommendations.
2. Operate programmed machinery	2.1 Select and set computer program to job specifications and check machine cycle. 2.2 Complete trial run to check system operation and check board for length and angle specification within set tolerance. 2.3 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.4 Load materials into machine, operate saw and monitor use regularly to minimise waste and ensure correct lengths and angles are produced. 2.5 Monitor processing regularly to ensure continuity of material flow, and quality and quantity of production output. 2.6 Dispose of incorrect cuts, off-cuts and material with defects in line with environmental protection practices. 2.7 Identify routine processing problems and resolve or report to appropriate personnel.
3. Monitor and adjust processing	3.1 Follow organisational safety procedures to lock out equipment. 3.2 Check saw blades for bluntness or damage. 3.3 Remove and replace saw blades in line with manufacturer's recommendations. 3.4 Dispose of used blades in line with environmental protection practices. 3.5 Keep work area clear of dust and debris in line with organisational safety procedures. 3.6 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and

© Commonwealth of Australia, 2025 Skills Insight

	count numbers to be cut • set numerical data on computer optimising program according to length and angle specifications • measure finished dimensions for specified length and angle and allowable tolerances.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret detailed familiar and unfamiliar:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.

Assessment Requirements for FWPCOT3206 Cut material using high speed optimiser

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3206B Cut material using high speed optimiser, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to cutting material using high speed optimisers
- prepare optimizing machinery for cutting, including selecting and loading programs
- operate programmed machinery, including maintaining equipment and cutters, and assessing and resolving problems

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of computer-controlled docking optimising and trimming saws
- range of cutting patterns used with computer-controlled optimising saws to achieve maximum output of timber materials
- range of industry standard lengths, cross sections and tolerances and applicable terminology
- system functions and capabilities of computer optimising software for saws
- methods for assessing saw blade condition
- organisational policies procedures specific to cutting material using high speed optimisers:

© Commonwealth of Australia, 2025 Skills Insight

    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting production outcomes, equipment faults and maintenance requirements.
- environmental protection practices for forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing timber and other waste

Assessment Conditions

The following resources must be made available:

- computer-controlled docking optimising and trimming saws
- computer program for optimising saws
- maintenance tools and equipment for optimising saws
- consumable saw blades
- personal protective equipment suitable for cutting material using high speed optimisers
- a diverse range of commercial timber:
    - laminated veneer
    - plywood
    - chipboard
    - medium density fibreboard
    - dressed timber
    - preservative treated timber
- manufacturers' instructions for use and maintenance of equipment
- work order with specific instructions for cutting material using high speed optimisers
- template documents for recording production outcomes, equipment faults and maintenance requirements
- organisational policies and procedures for cutting material using high speed optimisers.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3207 Set up, operate and maintain finger jointing operations

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3207B Set up, operate and maintain finger jointing operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to coordinate operational logistics for finger jointing activities which includes planning schedules for operators, setting up equipment for production runs, resolving processing problems and coordinating equipment shut-down and maintenance.

The unit applies to timber process operators that co-ordinate the production of finger jointed timber in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Sawmilling and Processing

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan production parameters	1.1 Interpret production orders for grades, quantities, cross sections, end use and plan finger jointing operations.

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Develop finger jointing schedules to ensure optimum production outcomes and communicate to operators in line with organisational procedures.
2. Set up and monitor jointing operation	2.1 Check equipment for operational effectiveness and adjust set up to meet production requirements. 2.2 Select, check and prepare cutters to suit finger profile and timber cross sections. 2.3 Cut trial joints and check finger profiles against specifications. 2.4 Set feed rates, guides, conveyors, glue spreader and curing controls to suit finger profile, timber cross section characteristics and glue requirements. 2.5 Machine trial cleats, join, and test for strength and appearance. 2.6 Accept or reject trialled material and dispose of in line with environmental protection practices. 2.7 Resolve any machining problems, make final adjustments and start the jointing process. 2.8 Monitor finger jointing processes; identify and resolve processing and equipment faults. 2.9 Record and report production outcomes to appropriate personnel.
3. Coordinate shut-down and maintenance	3.1 Coordinate equipment shutdown with operators in line with organisational safety procedures. 3.2 Assist maintenance personnel to identify and resolve equipment faults. 3.3 Plan and coordinate routine maintenance of finger jointing equipment in line with organisational procedures and maintenance schedules.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• complete calculations to determine:
	  • material amounts required to satisfy production orders
	  • finger jointing schedules considering human and equipment resource capacity
	• interpret order sizes and set up equipment to achieve correct dimensions and profiles
	• measure trialled material dimensions and profiles against

© Commonwealth of Australia, 2025 Skills Insight

	specifications and allowable tolerances.

Oral communication skills to:	• provide clear, unambiguous:
	  • directions to operators for shutting down equipment
	  • information about equipment faults to maintenance personnel

Reading skills to:	• interpret:
	  • production orders
	  • workplace health and safety and other organisational procedures
	  • maintenance schedules.

Writing skills to:	• develop finger jointing schedules in a style and format easily understood by others • complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• source and organise production data to inform finger jointing schedules • efficiently and logically sequence the stages of setting up jointing equipment and operations • coordinate maintenance of finger jointing equipment to minimise downtime.
Technology skills to:	• use a computer, keyboard and software to prepare finger jointing schedules and maintenance requests.

Range of Conditions

Assessment Requirements for FWPCOT3207 Set up, operate and maintain finger jointing operations

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3207B Set up, operate and maintain finger jointing operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- plan and monitor finger jointing operations
- determine, document and communicate finger jointing schedules providing details of:
  - timber cross sections to be finger jointed
  - finger joint profiles
  - required and acceptable cleat lengths
  - finished product grades
  - quantities to be produced
  - changeover times
- complete production records.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste

© Commonwealth of Australia, 2025 Skills Insight

- operational capacity of finger jointing equipment
- typical work flow processes for finger jointing operations
- methods of determining finger jointing schedules to maximise equipment, labour and material use
- format, content and use of finger jointing schedules
- monitoring processes for automated jointing machines and overall production process
- typical processing and equipment faults and solutions for minimal production disruption
- industry standard cross sections, their strength, tolerances and applicable terminology
- purpose, features and operation and maintenance requirements of finger jointing equipment:
  - finger jointing machine stations and equipment
  - glue spreader
  - conveyors
- organisational procedures specific to coordinating finger jointing operations:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines for operator team members and self
  - documenting and communicating finger jointing schedules
  - recording and reporting production outcomes and maintenance schedules.

Assessment Conditions

The following resources must be made available:

- computers, keyboards, printers and software used to prepare finger jointing schedules and maintenance documents
- tools and equipment used to produce finger jointed material
- consumable glue and cutters
- personal protective equipment suitable for finger jointing operations
- commercial timber
- production orders with specific information about grades, quantities and cross sections for specified finger jointed timber products
- template documents for recording:
- finger joi**nting schedules**
- **productio**n outcomes
- maintenance schedules for finger jointing equipment
- organisational procedures for coordinating finger jointing operations
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

© Commonwealth of Australia, 2025 Skills Insight

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3208 Test strength of joints

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3208B Test strength of joints, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to collect samples and prepare, test and report on the strength of joints. The unit includes interpreting test results for the identification of problems in production, and making necessary changes to processes.

The unit applies to those working in a broad range of technical roles across different sectors in the forest and wood products industry.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3208 Test strength of joints

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3208B Test strength of joints which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational and quality procedures for testing the strength of joints
- safely and efficiently collect samples
- accurately interpret test results
- identify problems that may affect test results
- complete accurate records and reports.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- joint strength and issues that may affect joint strength
- different types of joints: glued joints, joints formed with nail plates
- methods and procedures for testing joints: bending test, wet or dry cleavage chisel test, bloc shear test, nail plate pull out test
- problems associated with the testing process: test accuracy; sample quality; faulty material; defects
- criteria for recycling and re-using faulty material
- procedures for recording and reporting workplace information: tally sheets, quality sheets, forms
- production sheets and downtime sheets.
- criteria for recycling and re-using faulty material.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

The following resources must be made available:

- joints for testing
- equipment necessary for testing
- personal protective equipment for testing strength of joints.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3209 Set up, operate and maintain end matching operations

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to coordinate operational logistics for end matching activities which includes planning schedules for operators, setting up equipment for production runs, resolving processing problems and coordinating equipment shut-down and maintenance.

The unit applies to timber process operators that co-ordinate end matching activities in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan production parameters	1.1 Interpret production orders for grades, quantities of timber requiring rework, cross sections, end use and plan end matching

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	operations. 1.2 Develop end matching schedules to ensure optimum production outcomes and communicate to operators in line with organisational procedures.
2. Set up and monitor end matching operation	2.1 Check equipment for operational effectiveness and adjust set up to meet production requirements. 2.2 Select, check, prepare and install cutters to suit end profile and timber cross section. 2.3 Set feed rates, guides and conveyors to suit timber cross section and characteristics. 2.4 Cut trial joints and check end profiles against specifications. 2.5 Join trial boards and test for strength and appearance. 2.6 Accept or reject trialled material and dispose of in line with environmental protection practices. 2.7 Resolve any machining problems, make final adjustments and start the end matching process. 2.8 Monitor end matching processes; identify and resolve processing and equipment faults. 2.9 Record and report production outcomes to appropriate personnel.
3. Coordinate shut-down and maintenance	3.1 Coordinate equipment shutdown with operators in line with organisational safety procedures. 3.2 Assist maintenance personnel to identify and resolve equipment faults. 3.3 Plan and coordinate routine maintenance of end matching equipment in line with organisational procedures and maintenance schedules.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• complete calculations to determine: • material amounts required to satisfy production orders

© Commonwealth of Australia, 2025 Skills Insight

	• end matching schedules considering human and equipment resource capacity • interpret order sizes and set up equipment to achieve correct dimensions and profiles • measure trialled material dimensions and profiles against specifications and appropriate tolerances.
Oral communication skills to:	• provide clear, unambiguous: • directions to operators for shutting down equipment • information about equipment faults to maintenance personnel.
Reading skills to:	• interpret: • production orders • workplace health and safety and other organisational procedures • maintenance schedules.
Writing skills to:	• develop end matching schedules in a style and format easily understood by others • complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• source and organise production data to inform end matching schedules • efficiently and logically sequence the stages of setting up end matching equipment and operations • coordinate maintenance of end matching equipment to minimise downtime.
Technology skills to:	• use a computer, keyboard and software to prepare end matching schedules and maintenance requests.

Assessment Requirements for FWPCOT3209 Set up, operate and maintain end matching operations

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan and monitor end matching operations
- determine, document and communicate end matching schedules providing details of:
  - timber cross sections to be end matched
  - end matching profiles
  - finished product grades
  - quantities to be produced
  - changeover times
- complete production records for the above production jobs.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- operational capacity of end matching equipment
- typical work flow processes for end matching operations
- methods of determining end matching schedules to maximise equipment, labour and material use
- format, content and use of end matching schedules

© Commonwealth of Australia, 2025 Skills Insight

- monitoring processes for end matching machines and overall production process
- typical processing and equipment faults and solutions for minimal production disruption
- range of industry standard cross sections, their strength, tolerances and applicable terminology
- purpose, features, operation and maintenance requirements of equipment used to produce end matched products including:
  - guides
  - cutters
  - conveyors
- organisational procedures specific to coordinating end matching operations
- workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
- communication reporting lines for operator team members and self
- documenting and communicating end matching schedules
- recording and reporting production outcomes and maintenance schedules.

Assessment Conditions

The following resources must be made available:

- computers, keyboards, printers and software used to prepare end matching schedules and maintenance documents
- tools and equipment used to end matched timber products:
- personal protective equipment suitable for end matching operations
- a diverse range of commercial timber
- production orders with specific information about grades, quantities and cross sections for specified end matched timber products
- template documents for recording:
  - end matching schedules
  - production outcomes
- maintenance schedules for end matching equipment
- organisational procedures for coordinating end matching operations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3210 Sharpen cutting tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3210B Sharpen cutting tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to verify cutting tool dimensions, select and set up grinder and attachments, and sharpen cutting tools. Tools include cutters, profile cutters, routers and other rotary cutting tools. Work is completed in a forest products factory setting.

The unit applies to Sawdoctor, Sawmaker, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Determine required cutting tool dimensions	1.1 Review work order and where required check with appropriate personnel. 1.2 Obtain site documentation and drawings and verify cutting tool dimensions. 1.3 Check cutter angles to improve efficiency of expended cutting

© Commonwealth of Australia, 2025 Skills Insight

	energy in mill operations. 1.4 Check cutting tool condition against required dimensions, angles and finish. 1.5 Assess and document additional cutting processes in line with work order.
2. Select and set up grinder	2.1 Select appropriate repair, maintenance and personal protective equipment and check for operational effectiveness. 2.2 Select grinding wheel of appropriate diameter to suit sharpening requirements and mount on grinder. 2.3 Dress grinding wheel to maintain cutting surface and suit cutting tool dimensions. 2.4 Configure grinder attachments to suit cutting tool dimensions and profile.
3. Operate grinder to sharpen cutting tool blades	3.1 Follow organisational safety procedures and manufacturer's recommendations throughout all repair and maintenance processes. 3.2 Select grinding speeds and feeds to suit cutting tool material, grinding wheel material and configuration. 3.3 Maintain cutting angles and grind cutting edges to remove nicks, lands and other imperfections. 3.4 Check cutting teeth systematically for consistent measurements to specifications. 3.5 Monitor grinder for operational effectiveness and apply coolant as required. 3.6 Remove cutting tool and store to maintain cutting edges. 3.7 Dispose of unserviceable and damaged cutting tools in line with environmental protection practices. 3.8 Record and report processing problems and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret required tool dimensions from equipment specifications and drawings • read basic grinding wheel settings; set and adjust speeds to suit

© Commonwealth of Australia, 2025 Skills Insight

	cutting tool material • complete precise calculations to machine cutting tools to specified profile and angle.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify content of work orders.
Reading skills to:	• interpret documents: • workplace health and safety and other organisational procedures • work orders • manufacturers' maintenance recommendations.
Writing skills to:	• complete basic accurate records for processing problems and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and repair work using work order to guide activities.

Assessment Requirements for FWPCOT3210 Sharpen cutting tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3210B Sharpen Cutting tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organizational policies and procedures relevant to sharpening cutting tools
- determine cutting tool dimensions
- select and set up grinder and attachments
- sharpen cutting tools in line with an individual work order
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of cutting equipment for which cutters are sharpened:
  - cutters
  - profile cutters
  - routers
- purpose, features, operation and limitations of tools and equipment used to sharpen cutting tools:
  - grinding machines
  - grinding machine attachments
  - abrasive grinding wheels
- methods for:

© Commonwealth of Australia, 2025 Skills Insight

    - determining cutting tool dimensions
    - removing cutters from cutting equipment
    - assessing cutter condition
    - selecting appropriate grinding wheels; diameter and material
    - sharpening cutters to specified requirements
    - setting cutters to a specified profile
- pitch and angles at which cutters are sharpened
- abrasive wheel technology, including wheel types, safe use and storage, cutting speeds, special applications, selection, specifications and design limitations.
- range of speeds at which abrasive wheels can be operated without damaging cutting tools
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials
- organisational procedures specific to sharpening cutting tools:
    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting processing problems and equipment faults.
    -

Assessment Conditions

The following resources must be made available:

- tools and equipment used to sharpen cutting tools including grinders and one or more of the following:
    - abrasive grinding wheels in a variety of diameters
    - slicers
    - mincer plates
    - chucks
    - collets
    - clamps
    - dividing heads
    - drill bit holders
    - vices
    - resting brackets
- cutting equipment for which cutters are to be sharpened:
    - cutters
    - profile cutters
    - routers

© Commonwealth of Australia, 2025 Skills Insight

- coolant
- personal protective equipment suitable for sharpening cutting tools
- manufacturers' instructions for use, repair and maintenance of equipment
- work order for repair and maintenance activities with specific instructions for sharpening cutting tools in specified equipment
- template documents for recording processing problems and equipment faults
- organisational policies and procedures for sharpening cutting tools.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3211 Maintain sawdoctoring tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3211B Maintain sawdoctoring tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess tool wear and the need to recondition straight edges and tension guides by grinding, machining or filing. Work is completed in a forest products factory setting.

The unit applies to Sawdoctor, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for maintenance	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate repair, maintenance and personal protective equipment and check for operational effectiveness. 1.3 Remove sawdoctoring tools for reconditioning from designated machinery.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Plan maintenance process in line with work order.
2. Recondition straight edge	2.1 Follow organisational safety procedures and manufacturer's recommendations throughout all repair and maintenance processes. 2.2 Assess straight edge damage and wear select appropriate reconditioning method. 2.3 Determine correct work angle for re-surfacing or removal of wear. 2.4 Clamp straight edge at correct angle to prevent movement, vibration and slippage during the re-surfacing process. 2.5 Inspect abrasive wheel or cutting tool, clean or change as required to suit work material removal, tolerance and surface texture requirements. 2.6 Grind, machine or file straight edge to remove distortions and maintain edge straightness and flatness without overheating or causing distortion, 2.7 Remove all signs of wear or damage from reference surfaces. 2.8 Clean straight edge and debur edges. 2.9 Dispose of distorted sawdoctoring tools in line with environmental protection practices.
3. Recondition tension gauge	3.1 Select grinder or other appropriate enterprise method for reconditioning tension gauges in line with organisational procedures. 3.2 Set grinder to produce required radius or circle diameter for the tension gauge. 3.3 Position tension gauge and clamp in grinder securely, ensuring cord height is central to gauge length and arc is ground square to plane of the gauge body. 3.4 Inspect grinding wheel, and dress and change to suit work, material and required tolerance. 3.5 Grind gauge to required accuracy and profile until all visible edge and face wear is removed. 3.6 Select and monitor grinding speed and feed rates to avoid overheating, distortion and burn marks. 3.7 Dispose of tension gauges distorted during the process in line with environmental protection practices. 3.8 Record and report processing problems and equipment faults to appropriate personnel.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• read basic grinding wheel settings; set and adjust speeds to suit straight edge and tension gauge requirements.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete basic accurate records for processing problems and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and repair work using work order to guide activities.

FWPCOT3212 Replace saws, blades and guides

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3212B Replace saws, blades and guides first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to remove blunt or damaged saw blades, knives and guides and to install reconditioned ones in various types of cutting equipment. Work is completed in a forest products factory setting.

The unit applies to Sawdoctor, Saw repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare for replacement	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate repair, maintenance and personal protective equipment and check for operational effectiveness. 1.3 Transport saws, blades and guides for replacement to designated machinery, using mechanical lifting aids as required.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Plan replacement process in line with work order.
2. Replace saws, blades and guides	2.1 Follow organisational safety procedures throughout all repair and maintenance repair processes. 2.2 Lock-out equipment and remove mechanical and safety components to provide access to saws or blades and guides without damaging components. 2.3 Store removed components temporarily in a safe location. 2.4 Replace blades and guides in line with manufacturer's recommendations. 2.5 Replace and secure mechanical and safety components in line with manufacturer recommendations. 2.6 Check serviced equipment for correct alignment, position and overall free operational performance. 2.7 Dispose of used blades and guides in line with environmental protection practices or transfer for reconditioning. 2.8 Record and report processing problems and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure precise alignment of blades and guides to specification..
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' maintenance recommendations.

Writing skills to:	• complete basic accurate records for processing problems and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and repair work using work order to guide activities.

Assessment Requirements for FWPCOT3212 Replace saws, blades and guides

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3212B Replace saws, blades & guides, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organisational policies and procedures relevant to replacing saws, blades and guides
- replace saws, blades and knives for these types of equipment in line with a work order
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of tools and equipment used to remove and replace saws, blades and knives:
  - spanners, wrenches and sockets
  - mechanical lifting aids including:
    - block and chain
    - pedestrian operated crane
    - pulley system
- methods for:
  - isolation of equipment
  - removing mechanical and safety components without damaging these

© Commonwealth of Australia, 2025 Skills Insight

    - removing saws blades and knives cutters from saws and cutting equipment
    - installing and checking replacement saws blades and knives for correct alignment and free operation
- features and names of different parts of saws, blades and knives for:
    - circular saws
    - chippers
    - canters
    - narrow and wide band saws
- mechanical and safety equipment components and their positioning and tolerance specifications in relation to other components including
    - electrical motors
    - riving knives
    - access covers
    - saw guards
    - extraction equipment
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
- reducing water and energy use
- cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials
- organisational policies and procedures specific to replacing saws, blades and guides:
    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting processing problems and equipment faults.

Assessment Conditions

The following resources must be made available:

- cutting equipment for which saws, blades and guides are to be replaced including one or more of the following:
    - circular saws
    - chippers
    - canters
    - narrow and wide band saws
- new or reconditioned cutters and blades and knives for those pieces of equipment
- new or reconditioned guides for those pieces of equipment
- mechanical lifting aids
- spanners, wrenches and sockets for removing parts
- personal protective equipment suitable for replacing saws, blades and guides
- manufacturers' instructions for use, repair and maintenance of equipment

© Commonwealth of Australia, 2025 Skills Insight

- work order for repair and maintenance activities with specific instructions for replacing saws, blades and guides in specified equipment
- template documents for recording processing problems and equipment faults
- organisational policies and procedures for replacing saws, blades and guides.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3213 Manufacture cutting tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3213B Manufacture cutting tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to manufacture cutting tools by selecting appropriate material and machining blanks to specified profiles. Work is completed in a wood products factory setting.

The unit applies to Sawdoctor, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Select required material	1.1 Review work order and where required check with appropriate personnel. 1.2 Obtain information about timber and equipment and review to determine preferred material type and cutting tool dimensions. 1.3 Select appropriate personal protective equipment and check for operational effectiveness.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Select material and cut to suitable lengths for machining cutting tool blank. 1.5 Plan processes to produce blank in line with work order.
2. Machine blank	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Determine blank dimensions and tolerances in line with work order. 2.3 Set up machining equipment in line with manufacturer's recommendations and industry practices. 2.4 Machine blank to required dimensions and tolerances using selected processes. 2.5 Check blank surface finish and dimensions against specifications.
3. Machine required profiles	3.1 Position blank in suitable attachments to machine tooth profiles. 3.2 Complete set-up and machine blanks to ensure each tooth profile and dimension meets required tolerances. 3.3 Check profile surface finish and dimensions against specifications. 3.4 Dispose of sub-standard profiled material in line with environmental protection practices. 3.5 Record and report processing problems and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• complete precise calculations to machine and profile cutting tools to specified diameters, profiles, widths, lengths and angles within tolerances.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete basic accurate records for processing problems and equipment faults.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and profiling activities using work order to guide activities.

Assessment Requirements for FWPCOT3213 Manufacture cutting tools

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3213B Manufacture cutting tools, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organizational policies and procedures relevant to manufacturing cutting tools
- safely manufacture cutting tools that meet industry standards and technical requirements

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of tools and equipment used to machine and profile blanks for cutting tools
- importance of profiling cutting tools to match requirements for:
  - characteristics of various materials sawn
  - speed of the cutting process
  - direction of the cutting process
  - cutting angle
  - cutting tool specifications
- methods for:
  - calculating cutting tool dimensions
  - machining and profiling blanks to required profile

© Commonwealth of Australia, 2025 Skills Insight

    - assessing surface finish and measuring dimensions of finished tool against specifications and tolerances
- industry standard and organisational tolerances
- organisational procedures specific to manufacturing cutting tools:
    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting processing problems and equipment faults
- environmental protection practices for machining tools and equipment in forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials

Assessment Conditions

The following resources must be made available:

- tools and equipment used to machine and profile blanks for cutting tools
- measuring equipment which includes one or more of the following:
    - vernier callipers
    - micrometers
    - rules
- blank stock for cutting tools
- personal protective equipment suitable for manufacturing cutting tools
- manufacturers' instructions for use, repair and maintenance of equipment
- work order for machining activities with specific instructions for manufacturing cutting tools for specified equipment
- template documents for recording processing problems and equipment faults
- organisational policies and procedures for manufacturing cutting tools.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3214 Take off material quantities

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3214B Take off material quantities, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to determine correct material quantities and pricing from completed designs that estimate requirements. It involves itemising materials, detailing material sizes and quantities, and calculating quantity pricing. Work is completed in a forest products factory setting.

The unit applies to Designer (Timber Truss & Frame), Production Fabricator (Timber Truss & Frame), Timber Manufactured Products Technician

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Itemise materials	1.1 Obtain and interpret production specifications to determine material types and job costing requirements. 1.2 Identify components to be listed; integrate general detailing and dimensioning systems.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Prepare tables for listing, list and categorise items in line with industry standards. 1.4 Complete itemised list of all materials in line with order requirements and organisational procedures. 1.5 Select common industry materials where no specific information is provided and material is not critical to design.
2. Detail material sizes and quantities	2.1 Calculate, scale or extract physical dimensions for components from tables in line with order requirements. 2.2 Estimate material quantities and express as industry standard lengths or sheet sizes, allowing for wastage. 2.3 Accumulate multiple requirements for identical material and document total quantities. 2.4 Complete and maintain detailed notes and records of material usage, and cutting and machining requirements.
3. Calculate quantities and prices	3.1 Calculate and document total requirements for each line item in take-off. 3.2 Express quantities in measurement units that match item type, order and production requirements. 3.3 Calculate total order costs from item rate. 3.4 Complete and maintain accurate records of pricing in line with organisational requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret detailed in-house material specifications involving codes, dimensions and pricing • complete complex calculations involving dimensions, quantities, scales and unit price costs • record precise numerical details of measurements, quantities and costs.
Reading skills to:	• interpret detailed and unfamiliar production specifications • interpret detailed and familiar: • organisational procedures for preparing and documenting material quantities and pricing • material description sheets.

© Commonwealth of Australia, 2025 Skills Insight

Writing skills to:	• record clear and unambiguous information about material use and cutting requirements • develop detailed records of final material quantities and pricing.
Planning and organising skills to:	• complete work orders in logical sequence and manage own timing and productivity to complete pricing within deadlines.
Technology skills to:	• use a computer, keyboard and software to prepare and document quantities and pricing.

Assessment Requirements for FWPCOT3214 Take off material quantities

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3214B Take off material quantities, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- determine final material quantities and pricing from at least two original designs in line with an individual set of specifications for each job
- for each of the above jobs, complete and maintain accurate records of all calculations, material quantities, usage and pricing.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- typical categories of different timber based construction materials listed in itemised tables and applicable terminology
- range of industry standard lengths and sheet sizes and applicable terminology
- methods used to calculate:
  - wastage
  - lineal metres
  - cubic metres
  - unit numbers
- industry and specific organisational:

© Commonwealth of Australia, 2025 Skills Insight

  - quantifying processes
  - sources of costs for materials
  - formats for tables for listing and categorising materials
- organisational procedures for preparing and documenting material quantities and pricing.

Assessment Conditions

The following resources must be made available:

- computers, keyboards and printers
- industry current software programs used to determine final material quantities and pricing from estimates
  - initial designs and production specifications on which to base final material requirements and prices:
  - sketches, drawings and notes
  - components lists
  - dimensional and detailing data
  - customer requirements
- in-house material price lists, product description sheets or manuals; either electronic or hard copy
- template tables for listing and categorising materials
- organisational procedures for preparing and documenting material quantities and pricing:

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3215 Swage and shape saw blades

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3215B Swage and shape saw blades, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to widen then press into shape, through a cold forming process, the cutting points of saw teeth to create a block that has the required hook, back, tangential and radial clearance angles for efficient saw operation. Work is completed in a wood products factory setting.

The unit applies to Sawdoctor, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Set up equipment	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify required swage shape and thickness from existing saws and relevant records. 1.3 Select appropriate personal protective and other equipment and

© Commonwealth of Australia, 2025 Skills Insight

	check for operational effectiveness. 1.4 Set up saw, swage and shaping equipment to meet production requirements. 1.5 Check die or swage clamp or vice shape against required shape, clearances and kerf, and change as required. 1.6 Secure saw in a swage clamp or vice or swager with teeth aligned to swager or vice shape. 1.7 Apply anti-scuffing paste to areas of saw for swaging.
2. Swage teeth	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Complete trial swage, check and adjust swaging setup. 2.3 Accept or reject trialled material and dispose of in line with environmental protection practices. 2.4 Inspect swage shape and thickness and measure for tangential and radial clearance and kerf. 2.5 Adjust swaging operation to meet production specifications. 2.6 Check dies for wear and adjust to ensure accurate operation. 2.7 Swage remaining teeth in line with production and manufacturer specifications.
3. Shape teeth	3.1 File and shape excess material resulting from swaging process. 3.2 Complete trial shape and check tooth tolerances, adjusting as required. 3.3 Accept or reject trialled material and dispose of in line with environmental protection practices. 3.4 Assess shape and check tooth alignment, adjusting remaining teeth as required. 3.5 Record and report processing problems and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• complete precise calculations to swage and shape saw blades specified hook, back, tangential and radial clearance angles.

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' recommended specifications for swaging and shaping teeth.

Writing skills to:	• complete basic accurate records for processing problems and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.

Assessment Requirements for FWPCOT3215 Swage and shape saw blades

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3215B Swage and shape saw blades which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to swaging and shaping saw blades
- inspect kerf and swage block to assess both as part of the setup procedures for swaging and shaping
- swage and shape teeth in line with organisational requirements and specifications

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of circular, band and gang saws for which saw blades are shaped and swaged
- features and names of different parts of circular, band and gang saw blades
- purpose, features and operation of tools and equipment used to shape and swage blades:
  - swagers
  - swage clamps or vices
  - dies
  - measuring equipment
- importance of swaging and shaping saw blades to match requirements for:
  - characteristics of various materials sawn

© Commonwealth of Australia, 2025 Skills Insight

    - speed of the sawing process
    - direction of the sawing process
    - cutting angle for sawing
    - saw blade specifications
- techniques used to swage and shape saw teeth to specified hook, back, tangential and radial clearance angles
- industry standard and organisational tolerances
- organisational procedures specific to swaging and shaping saw blades:
    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting processing problems and equipment faults.
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials

Assessment Conditions

The following resources must be made available:

- tools and equipment used to swage and shape saw blades:
    - swagers
    - swage clamps or vices
    - dies
- measuring equipment including one or more of the following:
    - wire gauges
    - test bars
    - rules
    - micrometers
    - vernier callipers
- saw blades to suit:
- circular saws
- band saws
- gang saws
- personal protective equipment suitable for swaging and shaping saw blades
- manufacturers' instructions for use of equipment and recommended specifications for swaging and shaping teeth
- work order with specific instructions for swaging and shaping saw blades for specified equipment
- template documents for recording processing problems and equipment faults

© Commonwealth of Australia, 2025 Skills Insight

- organisational policies and procedures for swaging and shaping saw blades

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3216 Assess and maintain saw performance

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3216B Assess and maintain saw performance, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess, test, verify and rectify cutting problems for chipping and sawing machines, saw blades, knives and associated equipment. Work is completed in a wood products factory setting.

The unit applies to Sawdoctor, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Inspect and test saw and equipment	1.1 Obtain information relating to current and past performance problems and review to assess process problems. 1.2 Select appropriate personal protective equipment and check for operational effectiveness. 1.3 Observe saw and equipment under operating conditions to determine extent of problems.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Examine timber fed through saw to determine potential causes of cutting problem. 1.5 Lock-out equipment and inspect saw and equipment to identify worn, broken and loose components.
2. Assess technical performance	2.1 Compare technical performance against other equipment. 2.2 Assess technical performance of sawing operation to identify future improvements and feasibility of options for new equipment. 2.3 Obtain endorsement from appropriate personnel for identified improvements.
3. Rectify saw problems	3.1 Identify characteristics of occurring problems and diagnose possible causes. 3.2 Refer to other trades and operations personnel to validate assessed causes. 3.3 Canvass responses and discuss with relevant personnel to identify and agree on preferred option. 3.4 Implement selected course of action, review cutting results and communicate to appropriate personnel. 3.5 Record and report causes of cutting problems and action taken in line with organisational procedures.

Foundation Skills

his section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret routine numerical data involving angles, dimensions, and speeds in equipment fault and cutting performance records.
Oral communication skills to:	• ask open and closed probe questions and actively listen when discussing problems, potential causes and options to rectify.
Reading skills to:	• interpret basic documents recording faults and performance of equipment • interpret detailed and familiar workplace health and safety procedures.
Writing skills to:	• complete accurate basic records of cutting problems, the fault diagnosis process and rectification outcomes.
Planning and organising skills to:	• manage own timing and productivity to assess, diagnose and rectify saw problems.

Assessment Requirements for FWPCOT3216 Assess and maintain saw performance

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3216B Assess and maintain saw performance, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to assessing and maintaining saw performance
- assess saw problems through information gathering, testing and inspecting equipment, and assessing possible causes
- select and implementing the correct course of action to rectify saw problems
- complete a basic report providing details of cutting problems, the fault diagnosis process and rectification outcomes.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of sawing tools including:
  - band saws
  - circular saws
  - gang saws
  - chippers
  - canters
- typical causes of damage and poor saw performance:

© Commonwealth of Australia, 2025 Skills Insight

  - forcing timber through the equipment
  - damage from foreign matter
  - incorrect operating speeds
  - oversized material removal
  - incorrect setting of equipment
  - poor sharpening or setting of saw blades
- methods for:
  - assessing condition of saw blades and performance of equipment
  - diagnosing causes of damage and poor performance
  - rectifying problems and improving saw performance.
- organisational procedures specific to assessing and maintaining saw performance:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting cutting problems, the fault diagnosis process and rectification outcomes.

Assessment Conditions

The following resources must be made available:

- sawing tools for assessment and maintenance which includes one or more of the following:
  - band saws
  - circular saws
  - gang saws
  - chippers
  - canters
- personal protective equipment suitable for assessing and maintaining saw performance
- equipment fault and cutting performance records
- template documents for recording and reporting cutting problems, the fault diagnosis process and rectification outcomes
- organisational policies and procedures for assessing and maintaining saw performance.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and

Assessment Requirements for FWPCOT3217 Assess and maintain cutter performance

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3217B Assess and maintain cutter performance, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to assessing and maintaining cutter performance
- assess cutter problems through information gathering, testing and inspecting equipment, and assessing possible causes
- select and implement the correct course of action to rectify cutter problems
- complete a basic report providing details of cutting problems, the fault diagnosis process and rectification outcomes.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of cutting tools which includes one or more of the following:
  - routers
  - moulders
  - planers
  - chippers
  - canters

© Commonwealth of Australia, 2025 Skills Insight

- typical causes of damage and poor cutter performance:
  - forcing timber through the equipment
  - damage from foreign matter
  - incorrect operating speeds
  - oversized material removal
  - incorrect setting of equipment
  - poor sharpening or setting of cutter blades
- methods for:
  - assessing condition of cutter blades and performance of equipment
  - diagnosing causes of damage and poor performance
  - rectifying problems and improving cutter performance
- organisational policies and procedures specific to assessing and maintaining cutter performance:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting cutting problems, the fault diagnosis process and rectification outcomes.

Assessment Conditions

The following resources must be made available:

- cutting tools for assessment and maintenance which includes one or more of the following:
  - routers
  - moulders
  - planers
  - chippers
  - canters
- personal protective equipment suitable for assessing and maintaining cutter performance
- equipment fault and cutting performance records
- template documents for recording and reporting cutting problems, the fault diagnosis process and rectification outcomes
- organisational policies and procedures for assessing and maintaining cutter performance.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and

© Commonwealth of Australia, 2025 Skills Insight

- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3218 Quote and interpret from manufactured timber product plans

Modification History

Release	Comment
1	Replaces equivalent FPICOT3218B Quote and interpret from manufactured timber product plans, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to interpret plans and layouts and manually prepare quotations for standard roof and floor trusses and wall frames.

The unit applies to workers who plan and quote on timber and wood products in a facility that produces these products.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Interpret plans and loading conditions	1.1 Interpret and assess plans, drawing views and notes; identify loading information and design requirements and restrictions. 1.2 Obtain additional information and data from appropriate

© Commonwealth of Australia, 2025 Skills Insight

	personnel and other sources. 1.3 Create functional and pictorial images of structure, simple trusses, frames or floors based on design requirements.
2. Complete manual quote for roof and floor trusses	2.1 Select roof truss types to meet order requirements and define structure using common industry spacing's for trusses and components. 2.2 Determine layouts, spacing and sizing of individual structural members progressively, in line with order requirements. 2.3 Calculate and document quantities for bracing and roof truss ancillaries. 2.4 Select appropriate floor trusses from range of certified standard designs. 2.5 Prepare, check and record quotation for roof and floor trusses in line with organisational procedures.
3. Complete manual quote for wall frames	3.1 Measure and calculate wall frame lengths from plans and dimensions appropriate to timber sizes. 3.2 Prepare, check and record quotation for wall frames including costing per unit length in line with organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numerical data from designs and plan specifications involving height, length, angles, shape, pitch and load • complete calculations involving dimensions, quantities and unit price costs • record precise numerical details of measurements, quantities and costs.
Oral communication skills to:	• ask questions and actively listen to clarify contents of designs, plans, drawings and notes.
Reading skills to:	• interpret designs, plans and technical notes.
Writing skills to:	• develop, document and present quotations in a clear format.
Planning and organising skills to:	• plan processing of quotations in a logical sequence and manage own timing and productivity to complete quotations within deadlines.

Assessment Requirements for FWPCOT3218 Quote and interpret from manufactured timber product plans

Modification History

Release	Comment
1	Replaces equivalent FPICOT3218B Quote and interpret from manufactured timber product plans, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete quotations regarding the following types of manufactured timber products in line with an individual design and set of specifications for each for each job:
  - timber roof trusses
  - timber floor trusses
  - timber wall frames
- prepare documentation advising on production and installation to accompany quotations.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable building and structural regulations for timber wall frames, roof and floor trusses
- common industry terminology for all components of timber wall frames, roof and floor trusses
- common industry standard layouts, spacing and sizing dimensions of individual members for timber wall frames, roof and floor trusses
- relationship between component loads and supports and spans

© Commonwealth of Australia, 2025 Skills Insight

- methods used to manually calculate, using tables and scientific calculators:
  - layout of roof trusses
  - truss, beam and frame materials and quantities
- industry and specific organisational:
  - quotation processes for timber wall frames, roof and floor trusses
  - sources of costs for materials and labour to manufacture
  - formats for and inclusions of quotations
  - formats for and inclusions of production and installation advice documents
- organisational procedures for preparing and documenting quotations for timber wall frames, roof and floor trusses.

Assessment Conditions

The following resources must be made available:

- computers, keyboards and industry current software programs used to produce documents
- scientific calculators
- designs, plans, technical specifications and notes for timber wall frames, roof and floor trusses on which to base quotation
- in-house material price lists, product description sheets or manuals; either electronic or hard copy
- template documents for recording calculations and quotations
- sample production and installation advice documents
- organisational procedures for preparing and documenting quotations for timber wall frames, roof and floor trusses.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3219 Produce standard truss or frame plans and details using computers

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to use computerised systems to produce standard truss or frame plans, including layout production, fabrication and installation instructions. Work is completed in a forest products factory setting.

The unit applies to Customer Service/Sales Assistant (retail or wholesale), Customer Service officer, Sales and Merchandising Team leader, Timber Advisor.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common technical

Elements and Performance Criteria

Element *Elements describe the essential outcomes.*	**Performance Criteria** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Select software	1.1 Identify and interpret work order, review and evaluate

© Commonwealth of Australia, 2025 Skills Insight

	software options. 1.2 Select appropriate software program to meet production outcomes.
2. Interpret plans and loading conditions	2.1 Interpret and assess plans, drawing views and notes; identify loading information and design requirements and restrictions. 2.2 Obtain additional information and data from appropriate personnel and other sources. 2.3 Create functional and pictorial image of structures, trusses and or frames based on design requirements. 2.4 Refer design requirements outside software limitations to appropriate personnel for resolution.
3. Test and select design options	3.1 Transfer fixed design details to layout data in line with software requirements. 3.2 Specify frame or truss types and select timber type and species in line with material suitability and availability. 3.3 Set common industry spacing of frames, trusses and components to defined design structure in line with industry standards. 3.4 Fix component sizes to clarify and confirm design options. 3.5 Select layouts, spacing and sizing of individual structural members progressively in line with software requirements. 3.6 Select, review and revise design details in line with work order.
4. Produce layouts and cutting requirements	4.1 Review design records for integrity, completeness and consistency in line with certifying authority standards. 4.2 Produce structural layout drawings and truss or frame assembly drawings using appropriate software. 4.3 Produce component cutting detail in line with production requirements and schedules. 4.4 Prepare and document production and installation advice in line with organisational procedures and industry standards. 4.5 Complete and maintain design records and documentation in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

5. Provide advice on design and production issues	5.1 Answer questions about designs and assembly requirements clearly and comprehensively. 5.2 Use effective communication techniques to assist and develop production personnel. 5.3 Provide alternative materials or sizes for components within design scope and production requirements. 5.4 Discuss common site problems and examine and adopt prevention strategies to ensure future practice meets design requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numerical data from designs involving height, length, angles, shape, and load • input complex numerical data into software systems for layout, spacing and dimensions of structural members.
Oral communication skills to:	• ask detailed open and closed probe questions and actively listen to clarify contents of designs, plans, drawings and notes • provide clear unambiguous information about designs and assembly requirements • negotiate solutions to site installation problems.
Reading skills to:	• interpret detailed and unfamiliar designs and technical notes.
Writing skills to:	• input clear written text into software systems • produce clear and detailed documents to support interpretation of drawings and assist with production and installation.
Planning and organising skills to:	• plan and organise own work in logical sequence and manage own timing and productivity to complete plans, drawings and documents within deadlines.

Assessment Requirements for FWPCOT3221 Rehabilitate tracks, quarries and landings

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3221B Rehabilitate tracks, quarries and landings, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan to safely rehabilitate tracks, quarries and landings after harvesting operations that includes inspection of:
  - analysing the current state of the track, quarry or landing
  - identifying natural water flow and water courses
  - checking for recoverable logs and equipment
  - considering the impact of harvesting or transportation.
- and which includes consideration of:
  - ground slope and stability
  - damage to the environment
  - weather conditions
  - access to suitable equipment and other resources
  - safety
  - further damage that may result from renovations
  - waste disposal.
- safely and efficiently use one or more of the following items of equipment and tools appropriate to the task and according to manufacturer’s instructions
  - dozer
  - front-end loader
  - skidder

© Commonwealth of Australia, 2025 Skills Insight

    - grader using bucket or blade attachments
- perform rehabilitation tasks that returns the environment to its original or near to original condition
- perform renovation which includes where required:
    - pulling out and removing construction materials
    - breaking up ramps and constructions
    - filling and ripping surfaces
    - breaking up and burying crushed rock, sand and other stabilising materials
    - spreading and compacting top soil over base materials
- establish run-off and drainage channels suitable to the site
- conduct revegetation with plants suited to the location
- manage the problems and risks associated with performing rehabilitation tasks.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements for performing the rehabilitation of tracks, quarries and landings
- environmental protection requirements, including the safe disposal of waste material
- problem identification and resolution strategies, and common fault finding techniques
- tools and equipment used for rehabilitation of tracks, quarries and landings, their suitability for different procedures, and their safe use and maintenance
- mathematical procedures for estimating and measuring tasks, time and resources, including calculating time to complete tasks
- procedures for recording and reporting workplace information
- water run-off patterns, soil types and erosion
- WHS practices including:
    - manual handling, including shifting, lifting and carrying
    - personal protective equipment and clothing
    - elimination of hazardous materials and substances
- plants suitable for revegetation
- techniques for managing environmental risks and hazards, including:
    - uneven and unstable ground
    - overhead and underground services
    - excavations
    - hazardous materials
    - traffic
    - insects and animals
    - fires.

Assessment Conditions

The following resources must be made available:

© Commonwealth of Australia, 2025 Skills Insight

- tracks, quarries or landings requiring rehabilitation
- machinery and equipment necessary for the rehabilitation, and manufacturer's instructions for their use
  - dozer
  - front-end loader
  - skidder
  - grader using bucket or blade attachments
- personal protective equipment necessary for the rehabilitation
- workplace documentation

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3222 Present forestry information and interpretations programs

Modification History

Release	Comment
1	Replaces equivalent FPICOT3222B Present forestry information and interpretations programs, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to deliver forestry information and interpretations programs to client groups. The unit also includes the evaluation of program outcomes.

The unit applies to Forestry worker, Arboriculture worker, Farm forestry worker, Nursery worker

Plantation establishment worker, Plantation forest officer, Silviculturist.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

1. Plan information and interpretations programs	1.1 Identify suitable topics or themes and assess against existing programs and organisational priorities. 1.2 Obtain necessary approvals from appropriate personnel and organize resources in line with organisational procedures. 1.3 Develop promotional material in a format suitable for dissemination to target participants in line with program timeframes
2. Conduct information and interpretations programs	2.1 Conduct information and interpretations programs to meet identified objectives that are suitable to the size and nature of target participants 2.2 Address particular needs of participants in the design and delivery of programs 2.3 Use appropriate presentation methods, equipment and materials to enhance participant interest and involvement. 2.4 Identify problems in the presentation and make adaptations where possible.
3. Evaluate presentations	3.1 Monitor program presentation and evaluate in line with organisational procedures. 3.2 Collect feedback and analyse against program objectives. 3.3 Evaluate materials and format and results document in line with organisational procedures. 3.4 Record and report on program processes to the appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Oral communication skills to:	• Build rapport with an audience • Clearly communicate key messages and information

Assessment Requirements for FWPCOT3222 Present forestry information and interpretations programs

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3222B Present forestry information and interpretations programs, which was first released with FPI11 Forest and Forest Products Training Package Version 1. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify suitable activities and deliver information and interpretations programs suitable to participant needs and program objectives, that includes one or more of the following activities:
  - seminars
  - talks
  - information in in-house publications
  - exhibitions
  - media releases
  - technology based training
  - marketing and promotional programs
- evaluate and promote information and interpretations programs and introduce improvements where necessary.
- use appropriate communication and interpersonal techniques and methods with colleagues and others
- follow organisational policies and procedures related to presenting forestry information and interpretations programs

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- organisational policies and procedures for presenting forestry information and interpretations programs
- media relations and marketing principles and processes in relation to presenting forestry information and interpretations programs
- determining participant needs and target audience requirements
- appropriate training locations within a workplace
- training and presentation techniques
- methods to engage an audience
- computer-based presentation techniques and tools

Assessment Conditions

The following resources must be made available:

- Work order or similar requirement outlining the type of information or program required to be delivered
- Suitable equipment to develop and present the activity including PC's, materials, audio-visual equipment

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3224 Plan and monitor equipment maintenance

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3224B Plan and monitor equipment maintenance, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to establish a routine maintenance plan, and facilitate repairs for equipment.

The unit applies to people working in a broad range of roles across different forest and forest product industry sectors.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Timber Manufactured Products

Timber Merchandising

Wood Panel Products

Timber Truss and Frame Design and Manufacture

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan routine maintenance	1.1 Review routine servicing requirements of site equipment, and prepare maintenance schedules. 1.2 Determine and organize tools, equipment and material requirements for maintenance work. 1.3 Plan, schedule and communicate maintenance procedures to appropriate personnel. 1.4 Assign roles and responsibilities to personnel who hold required skills and expertise 1.5 Plan maintenance processes in line with site procedures and environmental requirements, and modify in response to changes in equipment, personnel and site condition.
2. Monitor equipment operation	2.1 Conduct work according to work order. 2.2 Check site servicing and maintenance records for completeness and abnormal activity. 2.3 Maintain stock levels of routine service items, and minor repair components, to maximise availability and optimum operational performance of equipment. 2.4 Monitor equipment operation and identify operating faults and frequent or recurring breakdowns. 2.5 Obtain expert advice and specialist assistance when required, according to site procedures. 2.6 Review condition of equipment and ensure and efficient operation.
3. Facilitate equipment repair	3.1 Conduct visual inspection and fault finding procedures. 3.2 Diagnose and report faults, malfunctions or problems with equipment. 3.3 Assess equipment breakdowns and select and organise suitable repairs. 3.4 Organise movement of equipment to suitable repair site. 3.5 Monitor and modify repair procedures as required. 3.6 Periodically review and revise maintenance schedule to maintain operational integrity. 3.7 Deal with equipment that cannot be repaired in line with site procedures, manufacturer recommendations and environmental

© Commonwealth of Australia, 2025 Skills Insight

	requirements. 3.8 Complete and maintain accurate records and reports for equipment repair and maintenance

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure and replace fluids.
Reading skills to:	• read manufacturer's manuals and site procedures
Planning and organising skills to:	• arrange efficient repairs and minimise disruptions.

Assessment Requirements for FWPCOT3224 Plan and monitor equipment maintenance

Modification History

Release	Comment
	Replaces equivalent unit FPICOT3224B Plan and monitor equipment maintenance, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- develop and implement a plan for equipment maintenance that includes
  - equipment maintenance and repair needs
  - current operational conditions
  - current work patterns
  - disposal of contaminants and waste
- perform maintenance procedures including:
  - visual inspections
  - pre-start check
  - shutdown checks
  - removing and replacing parts or components
  - facilitating equipment repairs.
- undertake routine repairs of faulty equipment.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe disposal of waste materials from equipment repairs
- safe use and storage of chemicals used for the maintenance and repair of equipment
- protective equipment and safety procedures for working with equipment

© Commonwealth of Australia, 2025 Skills Insight

- organisational and site standards, policies and procedures for planning and monitoring equipment maintenance
- problem identification and resolution strategies, including typical breakdown situations and available options for correction
- Assessment of equipment breakdown including:
  - nature
  - cause
  - seriousness
  - likely repair requirements
  - potential for further damage and personal injury
  - availability of alternatives
  - reference to manufacturer's instructions
- tools used for maintenance of equipment and procedures for their safe use and maintenance
- range of site equipment and respective technical capabilities and limitations
- routine maintenance requirements for site equipment
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- materials and equipment relevant to the site and work role of the candidate
- manufacturer's instructions for these pieces of equipment
- site policies and procedures for maintaining equipment
- personal protective equipment.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3225 Mechanically stress grade timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3225B Mechanically stress grade timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to stress grade timber with mechanical stress graders and high speed mechanical graders to test boards for strength and durability against set grades.

The unit applies to those who mechanically stress grade timber in a wood products factory setting and includes operator maintenance.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for stress-grading	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate personal protective equipment and check for

© Commonwealth of Australia, 2025 Skills Insight

	operational effectiveness. 1.3 Obtain type and quantity of timber for stress grading from storage location. 1.4 Plan stress-grading process in line with work order.
2. Set up equipment	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Complete pre start-up checks on equipment to ensure operational effectiveness. 2.3 Set up spray guns or branding rolls for use in line with work order. 2.4 Complete calibration process using verification boards and set grade thresholds in line with organisational procedures.
3. Stress grade timber	3.1 Complete automatic grading process, monitor and adjust material flow to machine. 3.2 Monitor machinery to ensure consistent grade marking and board appearance in line with industry standards. 3.3 Withdraw samples for independent testing and prepare according to testing procedures.
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check and clean photo-electric cells and reflectors in line with environmental protection practices. 4.3 Check and refill spray guns or branding rolls. 4.4 Adjust and maintain mechanical stress grade rollers, auto-feed and load pressure in line with manufacturer's recommendations. 4.5 Keep stress-grading area clear of dust and debris in line with organisational safety procedures. 4.6 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of timber required within work orders and count numbers of timber boards to be graded • calibrate mechanical stress grading equipment to specified grade thresholds.

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• ask questions and actively listen to clarify contents of work orders where necessary

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• logically sequence the stages of preparation and stress grading work using work order to guide activities.

Range of Conditions

Assessment Requirements for FWPCOT3225 Mechanically stress grade timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3225B Mechanically stress grade timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- operate a mechanical stress grading machine, in line with work orders, to grade the following types of timber boards:
- native timber species
- imported timber species
- dressed timber
- in-the-rough timber
- preservative treated timber
- complete operator maintenance on the mechanical stress grading equipment.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- typical flow of material supply in and out of the grading area
- typical work flow processes and techniques used to mechanically stress grade timber
- range of industry standard strength grades and thresholds and applicable terminology
- markings used on timber boards to identify grades
- reason for independent testing of boards and processes for sampling and preparing boards for testing
- purpose, features and operation of equipment used to mechanically stress grade timber:

© Commonwealth of Australia, 2025 Skills Insight

  - mechanical stress-graders or high speed mechanical graders
  - spray guns
  - branding rolls
  - verification boards
- methods used to:
  - calibrate equipment to grades using verification boards
  - clean and maintain mechanical stress grading equipment
- organisational procedures specific to mechanically stress grading timber:
  - workplace health and safety with particular emphasis on equipment lock out, use of personal protective equipment and handling hazardous substances
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of hazardous substances.
  -

Assessment Conditions

The following resources must be made available:

- mechanical stress-graders or high speed mechanical graders
- spray guns
- branding rolls
- maintenance tools and equipment for mechanical stress graders
- verification boards
- consumable dye
- personal protective equipment suitable for mechanically stress grading timber
- a diverse range of commercial timber:
  - native timber species
  - imported timber species
  - dressed timber
  - in-the-rough timber
  - preservative treated timber
- manufacturers' instructions for use and maintenance of equipment
- work order with specific instructions for types and quantities of timber to be graded
- template documents for recording production outcomes, equipment faults and maintenance requirements

© Commonwealth of Australia, 2025 Skills Insight

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3227 Receive and measure logs

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3227B Receive and measure logs, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to receive deliveries of logs, measure logs for length and diameter, estimate and calculate log weight and volume, weigh and direct trucks and complete delivery documentation.Work is completed in a forest products factory setting.

The unit applies to Sawmill Worker, Production Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Estimate log weights and volumes	1.1 Select appropriate personal protective equipment and check for operational effectiveness. 1.2 Identify potential and existing hazards and control risks associated with receiving, measuring and weighing logs. 1.3 Measure length and average diameter of logs. 1.4 Calculate estimated log weights and volumes in line with

© Commonwealth of Australia, 2025 Skills Insight

	organisational formulas.
2. Check, estimate and record loads	2.1 Stop trucks delivering loads, and check delivery documents. 2.2 Check that load height and stability meet site requirements. 2.3 Inspect type and quantity of logs; assess suitability of size, species and quality for acceptable receipt. 2.4 Calculate and record weight and volume of each log. 2.5 Record delivery documentation and equipment faults in line with organisational procedures.
3. Weigh trucks	3.1 Identify truck gross weight using weighbridge in line with organisational safety procedures. 3.2 Obtain truck tare weight from existing records or note need for weighing. 3.3 Identify truck tare weight on departure using weighbridge in line with organisational safety procedures. 3.4 Calculate and record nett weight of logs and type delivered in line with organisational procedures.
4. Direct trucks for unloading	4.1 Notify log yard personnel of delivery and unloading requirements. 4.2 Direct trucks clearly and accurately to unloading area in line with log classification. 4.3 Monitor and coordinate on-site truck movements, ensuring a safe operating environment.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• complete complex calculations of:
	  • log lengths and averages
	  • estimated log weights and volumes using assistive formulas
	  • gross, tare and nett weights
	  • heights of loaded vehicles
	• read weight gauges on weighbridges
	• record numerical data involving times, weights and dimensions.

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• provide clear, unambiguous directions to truck drivers.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • delivery documentation.

Writing skills to:	• complete basic accurate records of delivery details and equipment faults.
Planning and organising skills to:	• coordinate safe on-site movement of multiple trucks.

Assessment Requirements for FWPCOT3227 Receive and measure logs

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3227B Receive and measure logs, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to receiving and measuring logs
- receive and measure logs
- convey material to loading areas
- weigh truck to ensure they follow and meet regulations
- estimate and calculate log weights and volumes

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of electronic measuring equipment and weighbridges
- site capacity and compliance requirements for vehicle load height, stability and weight
- overall site layout and layout of log unloading areas
- typical workplace hazards present when measuring logs and weighing loads; and during on-site truck movement and methods of minimising risks
- methods used to estimate log weights and volumes using formulas and data tables
- key features of these varying signal systems used for directing trucks:
  - hand signals
  - whistles
  - loud speaker announcements

© Commonwealth of Australia, 2025 Skills Insight

- format, content and use of delivery documentation:
  - weighbridge dockets
  - tally sheets
  - load manifests
  - delivery records
- organisational policies and procedures specific to receiving and measuring logs:
  - workplace health and safety with particular emphasis on use of personal protective equipment and identifying hazards and controlling associated risks
  - communication reporting lines
  - recording and reporting delivery details.

Assessment Conditions

The following resources must be made available:

- measuring tapes or electronic measuring equipment
- weighbridge
- personal protective equipment suitable for receiving and measuring logs
- formulas and data tables used to estimate and calculate weights and volumes
- template documents:
  - weighbridge dockets
  - tally sheets
  - load manifests
  - delivery records.
- organisational policies and procedures for receiving and measuring logs.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3230 Operate automated stacking equipment

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPICOT3230B Operate automated stacking equipment, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the skills and knowledge required to use automatic or semi-automatic equipment to stack, monitor, strap and record packs of timber or timber products in preparation for despatch.

The unit applies individuals who operate automatic timber stacking equipment in a timber manufacturing facility. Operators generally work under broad or limited direction to complete routine activities related to their own work and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Elements and Performance Criteria

Elements	Performance Criteria

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for stacking packs of timber or timber products	1.1 Review work order, workplace health and safety requirements, environmental protection practices and emergency procedures for timber stacking operation and, where required, check with appropriate personnel 1.2 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislative requirements to maintain safe work practices 1.3 Obtain the type and quantity of timber products to be stacked from a storage location
2. Stack, wrap and strap packs of timber or timber products	2.1 Set up stacking machine to produce specified timber pack sizes according to work order 2.2 Build timber packs using products of a consistent type, size and thickness 2.3 Check bearers and protective strips for consistent thickness and damage 2.4 Place specified bearers, spacing sticks and protective strips squarely, evenly and consistently 2.5 Monitor stacked timber or timber products for grade and quality, and reprocess or dispose of unacceptable components 2.6 Stack timber packs to a correct material count or dimension, and check the safety of stacking 2.7 Strap, wrap and label timber packs according to workplace procedures 2.8 Avoid wastage of strapping and packaging materials, and maximise use of recycled materials
3. Complete operator maintenance	3.1 Lock out stacking equipment according to workplace health and safety procedures 3.2 Check, maintain and clean automatic stacking machine mechanism 3.3 Keep machine area clear of dust and debris according to workplace health and safety procedures 3.4 Record and report production outcomes and equipment faults to appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identify quantities of required material within work orders, and count numbers to be stacked, wrapped and packed
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Assessment Requirements for FWPCOT3230 Operate automated stacking equipment

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPICOT3230B Operate automated stacking equipment, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that, on at least one occasion, the individual has:

- stacked and built timber or timber products packs using an automatic stacking machine according to a work order prescribing different types, dimensions and numbers of materials to be packed
- applied protective strips to timber packs
- applied wrapping to timber packs to prevent water penetration during storage and transportation
- strapped timber packs
- labelled timber packs ready for storage or transportation
- completed operator maintenance on the automatic stacking machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to operating automatic or semi-automatic equipment for stacking packs of timber or timber products as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to operating automatic or semi-automatic timber stacking machines:

© Commonwealth of Australia, 2025 Skills Insight

  - health and safety, with particular emphasis on equipment lockout and the use of personal protective equipment (PPE)
  - use of automatic or semi-automatic timber stacking equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
  - labelling products for identification
- environmental protection practices for stacking and binding timber or timber products:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- range of industry standard lengths, cross-sections, appearance grades, markings for timber and timber products and applicable terminology
- purpose, features and operation of automatic or semi-automatic stacking machines
- typical workflow processes used to build, wrap and strap timber packs automatically
- requirements for quality and dimensions of bearers.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or a productive environment that accurately reflects performance in a workplace
- resources, equipment and materials:
  - automatic or semi-automatic stacking machines
  - PPE suitable for operating automatic stacking machines
  - commercial quantities of timber, including timber products to be packed, stacked, wrapped and strapped
  - consumable strapping, packaging and labelling materials
- specifications:
  - work order with specific instructions for automatically stacking material
  - workplace procedures for operating automatic stacking machines, including health and safety and emergency procedures and environmental protection procedures
  - template documents for recording production outcomes and equipment faults.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3231 Operate steam boiler

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3231B Operate steam boiler, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to start up, operate and store a steam-generating boiler.

The unit applies to steam boiler operators in a timber processing plant setting and includes shutting down and cleaning equipment.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel and Board Production

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for operation	1.1 Review operational order and where required check with appropriate personnel. 1.2 Select appropriate personal protective equipment and check for operational effectiveness.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Identify and set quantity of steam to be generated for allocated process. 1.4 Plan steam generation in line with work order.
2. Operate and monitor boiler	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Complete pre-operational safety and pre start-up checks to ensure operational effectiveness. 2.3 Start boiler and bring safely on line; communicate recent performance to appropriate personnel. 2.4 Assess continued operation of boiler against pre-operational checks, maintenance requirements and operating conditions. 2.5 Monitor boiler operation, diagnose status and adjust to maintain safe and efficient operation. 2.6 Store and record boiler house chemicals, in line with safety procedures and environmental protection practices. 2.7 Follow emergency shutdown procedures in cases of fire. 2.8 Complete operating log, record fuel efficiency and report to appropriate personnel.
3. Shut down and store boiler	3.1 Follow organisational safety procedures to shut down equipment. 3.2 Prepare boiler for inspection process; remove valves and fittings in line with organisational safety procedures. 3.3 Clean boiler externally and internally if appropriate in line with environmental protection practices. 3.4 Select storage mode and store boiler in line with organisational safety procedures. 3.5 Record and report and equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• read basic numerical machine settings and select according to operational requirements • record numerical data involving fuel efficiency • calculate approximate heating requirements and volumes of steam

© Commonwealth of Australia, 2025 Skills Insight

	• measure and record chemical usage
Oral communication skills to:	• ask questions and actively listen to clarify contents of operational orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures including Material Safety Data Sheets
	  • operational orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for boiler operations, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of bolier start up, shut down and cleaning using work order to guide activities.

Assessment Requirements for FWPCOT3231 Operate steam boiler

Modification History

Release	Comment
	Replaces equivalent unit FPICOT3231B Operate steam boiler, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organisational policies and procedures relevant to operating a steam boiler
- start, operate, monitor and shut down a steam boiler in line with statutory requirements and standard operating procedures
- prepare boiler for annual inspection
- complete operating and maintenance logs

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for boiler operations:
  - cleaning plant, tools and equipment
  - disposing of hazardous substances
- characteristics and dangers of steam
- purpose, features and operation of :
  - steam-generating boilers, including liquid or vapour restricted to water or steam
  - fuel and fuel supply system
- processes for boiler startup, shutdown, cleaning and storage
- range of data used to evaluate boiler performance:

© Commonwealth of Australia, 2025 Skills Insight

  - steam levels
  - pressure levels
  - energy generation levels
  - heat build-up
  - system overload information
  - test outcomes for water quality and chemicals
  - past performance records
- methods used to:
  - remove valves and fittings
  - clean boilers internally and externally
  - safely handle and store boiler house chemicals
- organisational procedures specific to operating steam boilers:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting operating logs, fuel efficiency records, equipment faults and maintenance requirements.

Assessment Conditions

The following resources must be made available:

- steam-generating boilers, including liquid or vapour restricted to water or steam
- fuel and fuel supply system
- boiler house chemicals and labels
- personal protective equipment suitable for operating steam boilers
- manufacturers' instructions for use and maintenance of equipment
- operational order with specific instructions for required steam generation levels and quantities and operating times
- template documents:
  - operating logs
  - fuel efficiency records
  - records of equipment faults and maintenance requirements
- organisational procedures for operating steam boilers.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and

© Commonwealth of Australia, 2025 Skills Insight

- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3232 Operate heat plant

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3232B Operate heat plant, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to start up, operate and store an energy producing heat plant.

The unit applies to heat plant operators in a timber processing plant setting and includes shutting down and cleaning equipment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel and Board Production

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for operation	1.1 Review operational order and where required check with appropriate personnel. 1.2 Select appropriate personal protective equipment and check for operational effectiveness.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Identify and set quantity of energy to be generated for allocated process. 1.4 Plan heat generation in line with work order.
2. Operate and monitor heat plant	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Complete pre-operational safety and pre start-up checks to ensure operational effectiveness. 2.3 Start plant and bring safely on line; communicate recent performance to appropriate personnel. 2.4 Assess continued operation of heat plant against pre-operational checks, maintenance requirements and operating conditions. 2.5 Monitor heat plant operation, diagnose status and adjust to maintain safe and efficient operation. 2.6 Follow emergency shutdown procedures in cases of fire. 2.7 Complete operating log, record fuel efficiency and report to appropriate personnel.
3. Shut down and store heat plant	3.1 Follow organisational safety procedures to shut down equipment. 3.2 Remove or replace valves and fittings in line with organisational safety procedures if required 3.3 Maintain cleanliness of heat plant and plant room in line with environmental protection practices 3.4 Select storage mode and store heat plant in line with organisational safety procedures. 3.5 Record and report and equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• read basic numerical machine settings and select according to operational requirements • record numerical data involving fuel efficiency.
Oral communication skills to:	• ask questions and actively listen to clarify contents of operational orders.
Reading skills to:	• interpret: • workplace health and safety and other organisational

Assessment Requirements for FWPCOT3232 Operate heat plant

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3232B Operate heat plant, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- operate a heat plant, in line with operating orders for each period prescribing different energy generation requirements
- after the above jobs:
  - complete operating logs and fuel efficiency records
  - maintain cleanliness of plant and plant room.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

  - environmental protection practices for heat plant operations:
  - cleaning plant, tools and equipment
  - disposing of hazardous substances
- characteristics and dangers of heat and energy generated by heat plants
- purpose, features and operation of energy generating heat plants
- processes for heat plant startup, shutdown, cleaning and storage
- range of data used to evaluate heat plant performance:
  - heat levels
  - pressure levels
  - energy generation levels
  - heat build-up

FWPCOT3233 Sharpen and align blades and knives

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3233B Sharpen and align blades and knives, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to sharpen and align straight and angled blades and knives for a variety of machines that use either babbitting or set screw processes for positioning blades and knives in disc chippers, canters, chipping heads and/or reducers. Work is completed in a forest products factory setting.

The unit applies to Sawdoctor, Saw Repairer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare blades and knives for sharpening	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate repair, maintenance and personal protective equipment and check for operational effectiveness. 1.3 Plan sharpening and aligning process in line with work order.

© Commonwealth of Australia, 2025 Skills Insight

2. Assess condition and set up blade and knife assemblies	2.1 Follow organisational safety procedures and manufacturer's recommendations throughout all repair and maintenance processes. 2.2 Remove blade or knife for sharpening from designated machinery. 2.3 Assess cutting performance of blade or knife to determine sharpening requirements. 2.4 Assess condition of knife holder, jig and chuck and correct defects. 2.5 Clean and secure knife holder to chuck in line with organisational procedures. 2.6 Select jig type and setting for required blade or knife setup.
3. Set up equipment	3.1 Clean blades or knives of excess build-up, inspect babbitts for defects and replace where unserviceable. 3.2 Select angle for sharpening blade to suit its use in specified equipment. 3.3 Set up grinder with suitable attachment for holding knife or blade and examine and dress grinding wheel. 3.4 Select grinding wheel speed and feeds to suit blade or knife, grinding wheel material and configuration.
4. Operate grinder to sharpen blades and knives	4.1 Feed grinding wheel across and into cutting edge to sharpen blade to geometric requirements without defects or burns. 4.2 Monitor grinder for operational effectiveness and apply coolant as required. 4.3 Inspect blade or knife after sharpening for accuracy and hone remaining burrs to obtain sharp cutting edge. 4.4 Dispose of unserviceable and damaged blades and knives in line with environmental protection practices.
5. Align blades and knives	5.1 Inspect babbitts to assess reconditioning requirements. 5.2 Heat babbitt material to required pouring temperature. 5.3 Set up blade or knife in pouring jig to required dimensions. 5.4 Pour babbitt without to minimise material waste and avoid cavities and shrinkage. 5.5 Cool assembly and remove excess material to allow correct positioning in machinery. 5.6 Inspect set screws and replace bent or broken screws. 5.7 Adjust set screws to position knife or blade at correct depth and lock into position to avoid knife or blade movement.

© Commonwealth of Australia, 2025 Skills Insight

	5.8 Record and report processing problems and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• read basic grinding wheel settings; set and adjust speeds to suit blade and knife requirements • complete precise calculations involving measurement of angles, depth and temperature to specifications.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' maintenance recommendations.

Writing skills to:	• complete basic accurate records for processing problems and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and repair work using work order to guide activities.

Assessment Requirements for FWPCOT3233 Sharpen and align blades and knives

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3233B Sharpen and align blades and knives, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to sharpening and aligning blades and knives
- remove and replace babbits and set screws in line with standard operating procedures and machine settings
- pour babbits to site procedures and finishing standard

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose, features and operation of equipment for which blades and knives are sharpened
- blade and knife properties, at a basic level of understanding:
  - metal from which blades and knives are made
  - tensile strength
  - geometry
- features of typical blade and knife defects:
  - burrs
  - burns
  - chips
  - splits

© Commonwealth of Australia, 2025 Skills Insight

    - dents
- purpose, features and operation of tools and equipment used to sharpen blades and knives:
    - grinding machines
    - grinding machine attachments
    - abrasive grinding wheels
    - babbitt making equipment
- methods for:
    - removing blades and knives from machinery
    - assessing blade and knife condition
    - selecting appropriate grinding wheels; diameter and material
    - cleaning blades and knives
    - sharpening blades and knives to specified requirements
    - reconditioning babbitts
    - aligning blades and knives to specified requirements
- angles at which blades and knives are sharpened
- range of speeds at which abrasive wheels can be operated without damaging blades and knives
- organisational procedures specific to sharpening and aligning blades and knives:
    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting processing problems and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials

Assessment Conditions

The following resources must be made available:

- tools and equipment used to sharpen and align blades and knives:
    - grinding machines
    - grinding machine attachments
    - abrasive grinding wheels in a variety of diameters
    - babbitt making equipment
- machinery for which which blades and knives are to be sharpened
- blades and knives for sharpening including one or more of the following:
    - chipper and canter or reducer knives
    - planer and thicknesser blades
    - spindle moulder knives

© Commonwealth of Australia, 2025 Skills Insight

  - guillotine blades
  - other blades and knives that can be sharpened through a parallel grinding process
- consumable coolant and screws
- personal protective equipment suitable for sharpening and aligning blades and knives
- manufacturers' instructions for use, repair and maintenance of equipment
- work order for repair and maintenance activities with specific instructions for sharpening and aligning blades and knives in specified equipment
- template documents for recording processing problems and equipment faults
- organisational policies and procedures for sharpening and aligning blades and knives.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3234 Cut material using CNC sizing machines

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent FPICOT3234B Cut material using CNC sizing machines, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the skills and knowledge required to set up and operate computer numerical control (CNC) sizing machines to achieve accurate dimensional cuts of engineered wood products and timber components in a manufacturing facility. Work also involves operator maintenance.

The unit applies to individuals who work as production workers, engineered timber products technicians, machine operators or timber fabricators. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for cutting engineered wood product or timber	1.1 Review work order, specifications, workplace health and safety requirements, environmental protection practices and emergency procedures for CNC cutting operations and, where required, check with appropriate personnel 1.2 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislation to maintain safe work practices 1.3 Obtain the type and quantity of material to be cut from a storage location
2. Set up the CNC sizing machine	2.1 Set CNC optimising program to meet work specifications 2.2 Check the CNC cutting machine mechanisms, emergency stops, gauges, guards and controls for safe and effective operation 2.3 Adjust the CNC cutting machine settings according to work specifications 2.4 Complete trial run to check system and machine operation for accuracy, quality and dimensions of finished work 2.5 Accept or reject trialled material and dispose of according to environmental protection practices 2.6 Complete final adjustments to CNC optimising program, cutting tools and equipment
3. Operate the CNC sizing machine	3.1 Use the CNC sizing machine, cutting tools and equipment according to workplace health and safety procedures, manufacturer instructions, operating capacity and purpose and environmental protection practices 3.2 Feed engineered wood product or timber into the CNC machine, operate cutting tools according to tooling requirements and regularly monitor to minimise waste and ensure correct dimensions are produced 3.3 Repair or dispose of incorrect cuts, off-cuts and material with defects according to environmental protection practices 3.4 Identify routine processing problems and resolve or report to appropriate personnel
4. Complete operator maintenance	4.1 Lock out the CNC sizing machine according to workplace health and safety procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.2 Check blades for bluntness or damage 4.3 Remove and replace blades according to manufacturer recommendations 4.4 Dispose of used blades according to environmental protection practices 4.5 Keep machine clear of dust and debris according to organisational safety procedures 4.6 Record and report production outcomes, machine and equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identify quantities of required material within work orders, and count numbers to be cut • Set numerical data on CNC optimising program according to sizing specifications • Calculate the feed rate to optimise quality and quantity of production output • Measure finished dimensions against specifications and allowable tolerances
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Assessment Requirements for FWPCOT3234 Cut material using CNC sizing machines

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent FPICOT3234B Cut material using CNC sizing machines, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed organisational workplace health and safety requirements and environmental protection procedures for cutting engineered wood product or timber using one or both of the following types of computer numerical control (CNC) sizing machines:
  - CNC beam saw
  - CNC double end profiling machine
- set computer programs for the CNC sizing machines according to work specifications
- cut one or more of the following types of engineered wood product or timber using the CNC sizing machines according to work specifications, manufacturer recommendations and within prescribed organisational tolerances:
  - glued laminated beams (glulam)
  - cross-laminated timber (CLT)
  - laminated veneer
  - chipboard
  - medium density fibreboard
  - dressed timber
  - preservative treated timber
- conducted operator maintenance on the CNC sizing machines,cutting tools and equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to operating CNC sizing machines for cutting engineered wood products or timber as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace policies and procedures specific to cutting material using CNC sizing machines:
  - health and safety, with particular emphasis on equipment lockout and the use of personal protective equipment (PPE)
  - use of CNC sizing machines, cutting tools and equipment
  - communication reporting lines
  - recording and reporting production outcomes, machine and equipment faults and maintenance requirements
- environmental protection practices for manufacturing facilities:
  - reducing water and energy use
  - cleaning plant, cutting tools and equipment
  - disposing of, recycling and reusing timber and other waste
- range of cutting patterns used with CNC sizing machines to achieve accurate dimensions and quality of the finished product
- characteristics of timber, timber products and timber defects
- system functions and capabilities of CNC software for sizing machines, including cutting patterns and sequences
- purpose, features and operation of CNC sizing machines:
  - CNC beam saws
  - CNC double end profiling machines
- methods for assessing saw blade condition.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - one or both types of CNC sizing machines
  - computer program for sizing machines
  - maintenance tools for CNC sizing operations
  - saw blades suitable for CNC sizing machines
  - PPE suitable for cutting material using CNC sizing machines

© Commonwealth of Australia, 2025 Skills Insight

  - engineered wood product or timber suitable for cutting operations using CNC sizing machines
  - CNC program suitable for the cutting operations
- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - work order with specific instructions for cutting material using CNC sizing machines
  - workplace policies and procedures for cutting material using CNC sizing machines, including health and safety and emergency procedures and environmental protection procedures
  - template documents for recording production outcomes, equipment faults and maintenance requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

	4.2 Check cutting tools for bluntness or damage 4.3 Remove and replace cutting tools according to manufacturer recommendations 4.4 Dispose of used cutting tools according to environmental protection practices 4.5 Keep machining area clear of dust and debris according to organisational safety procedures 4.6 Record and report production outcomes, machine and equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identify quantities of required material within work plans, and count numbers to be machined • Set numerical data on CNC program according to machining specifications • Calculate the feed rate to optimise quality and quantity of production output • Measure finished dimensions against specifications and appropriate tolerances
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Assessment Requirements for FWPCOT3235 Machine material using CNC machining and processing centres

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for processing engineered wood product or timber using one or more of the following types of computer numerical control (CNC) machining and processing centres:
  - CNC three-axis machining centres
  - CNC multi-tasking machining centres
  - CNC flat-bed routers and mortisers
- set computer programs for the CNC machining and processing centres according to work specifications
- machined one or more of the following types of engineered wood products or timber using the CNC machining and processing centres according to work specifications, manufacturer recommendations and within prescribed tolerances:
- glued laminated timber (glulam)
- cross-laminated timber (CLT)
- laminated veneer
- chipboard
- medium density fibreboard
- dressed timber
- preservative treated timber
- conducted operator maintenance on the CNC machining and processing centres, cutting tools and equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to operating a CNC machine and processing centre for engineered wood products and timber as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace policies and procedures specific to machining engineered wood products and timber using CNC machine and processing centres:
  - health and safety, with particular emphasis on equipment lockout and the use of personal protective equipment (PPE)
  - use of CNC machines, cutting tools and equipment
  - communication reporting lines
  - recording and reporting production outcomes, machine and equipment faults and maintenance requirements
- environmental protection practices for timber manufacturing facilities:
  - reducing water and energy use
  - cleaning plant, cutting tools and equipment
  - disposing of, recycling and reusing timber and other waste
- range of cutting patterns used with CNC machining and processing centres to achieve accurate dimensions and quality of finished work
- system functions and capabilities of CNC software for machining and processing centres
- purpose, features and operation of CNC machining and processing centres and equipment used to machine engineered wood products and timber:
  - three-axis machining centres
  - multi-tasking machining centres
  - flat-bed routers and mortisers
  - dust extraction equipment
  - jigs and shaped templates for routing
- timber characteristics, timber products and timber defects
- methods for assessing cutting tools condition.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - one or more types of CNC machining and processing centres
  - dust extraction equipment
  - jigs and shaped templates for routing

© Commonwealth of Australia, 2025 Skills Insight

  - maintenance tools for boring, routing and mortising operations
  - cutting tools suitable for machining operations including cutter, router, boring, drilling and mortising bits
  - PPE suitable for machining material using CNC machining and processing centres
  - engineered wood product or timber suitable for machining operations using CNC machining and processing centres
  - CNC program suitable for the machining operations
- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - work order with specific instructions for machining material using CNC machining and processing centres
  - workplace policies and procedures for machining material using CNC machining and processing centres, including health and safety and emergency procedures and environmental protection procedures
  - template documents for recording production outcomes, equipment faults and maintenance requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3236 Coordinate stock control procedures

Modification History

Release	Comment
1	Replaces superseded equivalent FPICOT3236B Coordinate stock control procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to coordinate and review stock line operations, stock inventory levels, and stock security: to identify and rectify problems, and to implement ongoing solutions for smooth receipt and dispatch of products. Work is completed in a forest products factory setting.

The unit applies to Customer Service/ Sales Assistant, Customer Service Officer, Timber Advisor.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Monitor stock control	1.1 Delegate product group recording to appropriate personnel. 1.2 Monitor stock levels and maintain at optimum level in line with organisational procedures. 1.3 Monitor stock re-order cycles and adjust to maintain consistent

© Commonwealth of Australia, 2025 Skills Insight

	supply. 1.4 Analyse management inventory reports and where required take corrective action. 1.5 Notify buyers of stock levels in line with organisational procedures.
2. Monitor receipt and despatch of products	2.1 Delegate receipt and despatch of products to appropriate personnel. 2.2 Ensure staff compliance with receipt and despatch procedures including documentation processes. 2.3 Coordinate distribution of products within organisation in line with organisational procedures. 2.4 Ensure incoming products and those for despatch are securely stored in designated location. 2.5 Report anomalies in quantity or quality of received products. 2.6 Inspect, assess and report stock damage and losses, against loss forecasts, and investigate unacceptable cases. 2.7 Provide advice to management on appropriate way of dealing with damaged stock.
3. Monitor and maintain site security policies	3.1 Monitor effectiveness of site security procedures and provide feedback to management. 3.2 Advise staff of security procedures for stores and ensure compliance. 3.3 Advise management of requirements for security policy development and training.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret complex numerical data within inventory reports • calculate accurate details of stock on hand, stock losses and produce sometimes complex numerically based reports.
Oral communication skills to:	• make accurate verbal reports on stock losses and quality issues.

Reading skills to:	• interpret:
	  • familiar and detailed organisational policies and procedures for stock control and store security
	  • basic order and despatch documentation.

© Commonwealth of Australia, 2025 Skills Insight

Writing skills to:	• complete and maintain accurate comprehensive stock control records • develop stock loss reports including advice on how to minimise damage and loss.
Planning and organising skills to:	• source, collect and organise information to maintain stock levels to organisational requirements • efficiently and logically manage operational logistics for stock control activities.
Problem-solving skills to:	• investigate, resolve and report stock losses and discrepancies.
Technology skills to:	• use a computer, keyboard and the system capabilities and functions of a stock control system.

Assessment Requirements for FWPCOT3236 Coordinate stock control procedures

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3236B Coordinate stock control procedures, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to co-ordinating stock control procedures
- co-ordinate stock control procedures for a work site, including coordinating staff and inventory
- implement site security procedures for the control of stock

Knowledge Evidence

Knowledge evidence

A person competent in this unit must be able to demonstrate knowledge of:

- role boundaries and responsibilities of self, other stock control personnel and buyers for maintaining stock
- typical product groups for forest product factories
- principles of stock control:
  - rotation and replenishment
  - product life cycle and maximising the use of all stock
  - financial implications of stock level control
- typical stock control processes:
  - recording incoming stock

© Commonwealth of Australia, 2025 Skills Insight

  - recording and reporting discrepancies and quality deficiencies
  - recording stock levels
  - monitoring and maintaining quality of stock
  - monitoring and maintaining stock at optimum levels
  - maintaining security of stock
  - waste handling, sorting, disposal and recycling
- organisational stock reorder cycles
- internal distribution processes
- reasons for stock loss and damage and methods to control these
- layout of stores area in forest products factories
- environmental storage requirements to maintain materials in optimum condition
- methods to categorise and label stock materials
- format, content and use of stock control documents and reports
- features, functions and system capabilities of stock control software.
- organisational policies and procedures specific to stock control, store and site security.
-

Assessment Conditions

The following resources must be made available:

- computers, keyboards and printers
- industry current software programs used to control stock
- template stock control documents:
  - receipt and despatch orders
  - inventory reports
  - stock level reports
  - stock loss reports
  - quality deficiency reports
- organisational policies and procedures for stock control, store and site security.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3237 Produce templates

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3237B Produce templates, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to produce templates which assist with the operation of static machines and computer numerically controlled (CNC) equipment used to produce shaped, tapered or moulded products. Work is completed in a forest products factory setting.

The unit applies to Timber Products Technician, Machine Operator.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan template production	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify type and quantity of required templates and plan process in line with work order. 1.3 Select template material of appropriate size, strength and flexibility for equipment use.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Interpret drawings and specifications for templates and equipment application. 1.5 Measure and plot dimensions; maintain correct angles, arcs and curves to produce pattern. 1.6 Check pattern dimensions, shape and measurements against drawings and specifications through visual inspection.
2. Produce templates	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Construct template using patterns to ensure accurate outcomes. 2.3 Position hardware so that it does not affect or obstruct equipment use. 2.4 Date and sign template patterns, and make detailed notations for use. 2.5 Dispose of rejected templates and off-cuts in line with environmental protection practices. 2.6 Store plans in line with organisational procedures. 2.7 Record and report production outcomes and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• interpret detailed production data from work orders, drawings and specifications to:
	  • count quantities of materials and hardware components and select appropriate sizes
	  • precisely measure and check angles, arcs and curves against specifications.

Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions
	  • notations on template drawings and specifications.

© Commonwealth of Australia, 2025 Skills Insight

Writing skills to:	• complete detailed notations for future use of patterns • complete accurate basic records for production outcomes and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of template production using work order, drawings and specifications to guide activities.

Assessment Requirements for FWPCOT3237 Produce templates

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3237B Produce templates, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to producing templates
- produce templates in line with the work order and product requirements

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- key features of patterns and templates and their purpose
- types and key features of equipment that are assisted by templates
- types and key features of shaped, tapered or moulded products produced with the assistance of templates
- characteristics of materials used for templates and how these affect template use:
  - strength
  - direction of grain
  - hardness
  - flexibility
- typical assembly sequences and range of techniques used to produce templates
- purpose, features and operation of equipment used to assemble templates
- purpose, features and use of assembly componentry
- organisational policies and procedures specific to producing templates

© Commonwealth of Australia, 2025 Skills Insight

  - workplace health and safety with particular emphasis on on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
- environmental protection practices for producing templates:
  - reducing water and energy use
  - disposing of, recycling and reusing timber and other waste

Assessment Conditions

The following resources must be made available:

- measuring equipment
- patterns
- assembly equipment
- personal protective equipment suitable for producing templates
- consumable metal and ply suitable for pattern preparation
- consumable materials suitable for templates including one or more of the following:
  - dressed timber
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard
- consumable nails, screws and adhesives
- manufacturers' instructions for equipment use
- work order, drawings and specifications for template production
- template documents for recording production outcomes and equipment faults
- organisational procedures for producing templates.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3238 Operate a pole saw

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to trim high branches reachable with a power driven pole saw and to promote tree growth by trimming and felling excess branches.

Power driven pole saw in this unit refers to professional standard pole-mounted chain saws that are typically fuel types, but may be battery powered, and generally telescopic.

It applies to those who operate a pole saw in a forest environment and includes equipment maintenance.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Elements and Performance Criteria

Element *Elements describe the essential outcomes.*	**Performance Criteria** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for	1.1 Identify and follow WHS, environmental, legal and organisational

trimming	requirements for operating a pole saw. 1.2 Review work order and clarify with appropriate personnel. 1.3 Select equipment appropriate to work requirements and check for serviceable condition in line with manufacturer recommendations. 1.4 Carry out pre-startup checks of pole saw in line with site requirements. 1.5 Establish and maintain communication with others to ensure safety.
2. Assess trees	2.1 Identify and assess tree type, location and stability for safe working conditions. 2.2 Plan the trim of a tree in line with site procedures and environmental conditions. 2.3 Identify trees unable to be trimmed safely and refer to appropriate personnel. 2.4 Determine whether the height of the branch is within safe reach when using the pole saw 2.5 Establish general falling direction of branches and limbs to be trimmed and identify clear escape route.
3. Trim trees	3.1 Trim accessible branches and knots to specifications in line with manufacturer recommendations and organisational safe work practices for angle and height allowances. 3.2 Monitor movement and whereabouts of other personnel to ensure work site is safe. 3.3 Undertake sequence of cuts to trim tree branches. 3.4 Operate pole saw in line with safety regulations, adjusting technique in response to condition of the tree. 3.5 Diagnose unexpected characteristics of a tree during trimming operations and review tree assessment if required. 3.6 Complete cutting once initiated, to minimise splitting. 3.7 Clear cut branches from the site in line with standard operating procedures and environmental requirements. 3.8 Record and report trimming activity.
4. Conduct operator maintenance	4.1 Follow lock-out procedures in line with WHS legislation and site procedures. 4.2 Inspect condition of saw and other equipment on completion of trimming activities. 4.3 Remove, sharpen, adjust or replace chain and other components, in line with manufacturer recommendations. 4.4 Recycle, re-use or dispose of blunt or damaged chain and other

© Commonwealth of Australia, 2025 Skills Insight

	components in line with environmental requirements. 4.5 Clear pole saw of dust, shavings and debris and check to make sure it meets relevant operational standards. 4.6 Record and report equipment faults and maintenance activity.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• sharpen chain with files set to correct angles.
Writing skills to:	• record trimming activity and maintenance records.
Problem solving skills to:	• to identify problems and equipment faults and select treatments • identify appropriate branches to be trimmed • assess the capacity and suitability of equipment to the task of trimming trees.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- undertake trimming with a pole saw to correctly and safely demonstrate competency in the following:
- assess trees and site conditions to work safely
- correct use of safety attire and protective equipment
- conduct pre-operational checks of pole saw
- trim trees at safe height and angle in line with manufacturer recommendations and organisational safe working practices
- select/adjust trimming sequence and cutting techniques in response to various tree characteristics and site conditions
- conduct operator maintenance.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements and site standards for carrying out pole saw operations
- environmental risks and hazards associated with trimming trees with a pole saw
- characteristics of trees and timber defects
- Branch Bark Ridge (BBR) and Bark Branch Collar (BBC)
- appropriate trimming sequence and cutting techniques
- manufacturer recommendations and organisational safe working practices for operating a pole saw at safe height and angle limits
- methods for assessing condition of pole saw chain
- established communication channels and protocols

© Commonwealth of Australia, 2025 Skills Insight

- problem identification and resolution strategies, and common fault finding techniques
- procedures for recording and reporting workplace information.
-

Assessment Conditions

The following resources must be made available:

- a professional standard fuel or battery powered pole-mounted chain saw with telescopic extension
- work order, workplace requirements and site standards for conducting pole saw operations
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3239 Create drawings using computer aided design systems

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3239B Create drawings using computer aided design systems, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to prepare the computer aided design (CAD) environment, create two dimensional (2D) drawings and produce linked materials lists. Drawings can include plans, diagrams, charts and elevations. Work is completed in a forestry office setting.

The unit applies to Engineered Timber Products Technician, Timber Fabricator.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for drawing	1.1 Identify type of drawings to be created with computer-aided design (CAD) systems and where required check with appropriate personnel. 1.2 Select appropriate equipment and check for operational effectiveness.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Plan CAD process in line with organisational procedures.
2. Set up CAD environment	2.1 Customise system variables, menus and drawing defaults to suit production outcomes. 2.2 Develop macros to suit production outcomes.
3. Create 2D drawings	3.1 Create drawings using full capability of available software system 3.2 Link drawing entities to database attributes to suit production outcomes. 3.3 Create detailed views using various scales. 3.4 Save files in various formats in line with organisational procedures. 3.5 Format linked drawing entities as materials lists in line with production requirements. 3.6 Extract supplementary product dimension data from drawings. 3.7 Record and report drawing process and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• calculate dimensions for product components and clearly represent these in drawings.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify types of drawings to be completed.
Reading skills to:	• interpret detailed familiar organisational procedures for computer drawing activities.
Writing skills to:	• complete accurate basic reports on drawing processes and equipment faults.
Planning and organising skills to:	• plan processing of drawings in a logical sequence and manage own timing and productivity to complete drawings within deadlines.

Assessment Requirements for FWPCOT3239 Create drawings using computer aided design systems

Modification History

Release	Comment
1	Replaces equivalent FPICOT3239B Create drawings using computer aided design systems, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to creating drawings using CAD systems
- create drawings using CAD systems in line with site requirements
- produce linked materials lists
- across the above jobs, produce these different types of drawings using CAD systems:
  - plans
  - diagrams
  - charts
  - elevations
  - exploded views
- incorporate these drawing entities:
  - lines
  - arcs
  - circles
  - text
  - hatch
  - dimensions
- complete a basic report on drawing processes and equipment faults.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- common products for which computer aided 2D drawings are produced, their features, use and standard material sizes
- for the drawing software:
  - available 2D drawing types
  - system functions and capabilities
  - methods to:
    - set up system variables, menus and macros
    - prepare 2D drawings
    - prepare and explode detailed views
    - link drawing entities to materials lists
    - extract supplementary product dimension data from drawings
    - store and retrieve drawings and materials lists
- formats for and inclusions of materials lists
- organisational policies and procedures for producing drawings and documents using computers.

Assessment Conditions

The following resources must be made available:

- computers, keyboards and industry current software programs used to produce computer aided 2D drawings and material lists
- product information on which to base drawings
- template materials lists
- template documents for recording drawing processes and equipment faults
- organisational policies and procedures for producing drawings and documents using computers.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3240 Grade heavy structural/engineered products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3240B Grade heavy structural/engineered products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to visually assess material characteristics and defects for classification into various strength and appearance grades. Materials can be sleepers, crossings, mine guides, piles, posts and other heavy structural or engineered products.

The unit applies to those who grade heavy structural and/or engineered products in a forest environment setting

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for grading	1.1 Review work order and where required check with appropriate personnel.

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Select appropriate personal protective equipment and check for operational effectiveness. 1.3 Obtain type and quantity of material to be graded from storage location. 1.4 Plan grading process in line with work order.
2. Grade heavy structural or engineered products	2.1 Identify requirements for storage and subsequent processing of materials. 2.2 Assess characteristics and defects of each timber piece against industry standards for grade type. 2.3 Measure and record moisture content. 2.4 Mark defects for docking clearly, in line with organisational procedures. 2.5 Mark timber and sort according to grade classification, using clearly identifiable markers or stickers.
3. Distribute material	3.1 Label storage locations and direct material to storage or processing operations in line with organisational procedures. 3.2 Reject sub-standard materials; dispose of or recycle in line with environmental protection practices. 3.3 Monitor on-site movement of material to achieve intended flow. 3.4 Record assessment outcomes and distribution problems and report to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of assessable material within work orders and count numbers • measure size of undesirable timber characteristics • complete routine assessment records involving numerical grades, dimensions and quantities.
Oral communication skills to:	• ask questions and actively listen to clarify content of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders

© Commonwealth of Australia, 2025 Skills Insight

	• industry grading standards.
Writing skills to:	• produce basic clear labels for timber identification • complete accurate basic reports on assessment outcomes.
Problem-solving skills to:	• recognise undesirable timber characteristics and assess as unfit for specified purpose • identify and dispose of or recycle defective materials.

Assessment Requirements for FWPCOT3240 Grade heavy structural/engineered products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3240B Grade heavy structural/engineered products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- visually evaluate different types of heavy structural and engineered product for classification into strength and appearance grades, in line with an individual work order for each grading job
- heavy structural and engineered products for classification are to be chosen from the following list:
  - sleepers
  - crossings
  - mine guides
  - piles
  - cross arms for overhead lines
  - decking for wharves and bridges
  - poles
- after each job, complete a basic report on assessment outcomes.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for disposing of, recycling and reusing timber
- features and uses of heavy structural and engineered products:

© Commonwealth of Australia, 2025 Skills Insight

    - sleepers, crossings, mine guides, piles and cross arms for overhead lines
    - decking for wharves and bridges
    - poles
- typical timber defects and how they affect ability to produce a quality finished product:
    - incorrect moisture content
    - warp
    - wane
    - cupping
    - shakes
    - insect defects
    - knots
    - resin pockets
- typical work flow processes and techniques used to grade heavy structural and engineered products
- range of industry standard lengths and cross sections and applicable terminology
- range of industry standard strength and appearance grades and applicable terminology
- markings used on heavy structural and engineered products to identify grades
- typical flow of material supply in and out of the grading area
- typical industry and organisation specific storage layout and storage categories for heavy structural and engineered products
- methods to label heavy structural and engineered products for storage locations and common terms used
- purpose, features and operation of equipment used to grade heavy structural and engineered products:
    - moisture meters
    - lifting equipment for the movement of material
- organisational procedures specific to grading heavy structural and engineered products:
    - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
    - communication reporting lines
    - recording and reporting assessment outcomes and distribution problems.

Assessment Conditions

The following resources must be made available:

- moisture meters
- lifting equipment
- personal protective equipment suitable for grading heavy structural and engineered products
- a diverse range of heavy structural and engineered products including:
    - sleepers, crossings, mine guides, piles and cross arms for overhead lines
    - decking for wharves and bridges

© Commonwealth of Australia, 2025 Skills Insight

  - poles
- work order with specific instructions for grading and transferring heavy structural and engineered products to downstream processing or storage
- organisational procedures for grading heavy structural and engineered products.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3241 Assemble timber wall frames

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to assemble construction-ready timber wall frame sections and to strap and pack them in readiness for transport to a construction site. Work is completed in a timber and wood products production setting.

The unit applies to Press operator, Timber manufactured products technician, Jig setter, Machine operator, saw operator.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

FWPCOT3245 Grade, sort and mark materials

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to visually evaluate material for classification into various strength or appearance grades. It includes sorting material into classifications, and marking material in line with site procedures.

The unit applies to those working in a wide of roles in the forestry and forest products industry.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common technical

Elements and Performance Criteria

Element *Elements describe the essential outcomes.*	**Performance Criteria** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for grading, sorting and marking	1.1 Review and check work order. 1.2 Obtain type and quantity of material to be graded, sorted and marked from the storage location.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Select equipment to assist with moving, and check for operational effectiveness. 1.4 Review site procedures for grading, sorting and marking.
2. Implement procedures for grading, sorting and marking material	2.1 Identify requirements for material storage and subsequent processing operations. 2.2 Evaluate material characteristics and features of each piece against industry standards for grade type. 2.3 Measure moisture content, and follow procedures for recording and reporting. 2.4 Mark features clearly for docking. 2.5 Grade, mark and sort material according to grade classification, using markers or stickers that are clearly understood. 2.6 Record and report grading outcomes and distribution problems.
3. Distribute material	3.1 Material is directed and moved to storage or processing operations in line with site requirements. 3.2 Sub-standard material is rejected and disposed of in line with site requirements 3.3 On-site movement of material is monitored to ensure intended flow is achieved. 3.4 Storage locations are labelled in line with site systems.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure moisture content • count required quantities of materials
Reading skills to:	• interpret work order • complete records and reports

Assessment Requirements for FWPCOT3245 Grade, sort and mark materials

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to grading, sorting and marking material
- safely and efficiently grade sort and mark materials from the workplace
- identify materials defects, including:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - loose or missing knots
  - resin pockets
  - dents
  - loose surface
  - lifting coatings
  - thin or missing coatings
  - chipped edges
  - splits
  - voids
  - splintered or missing edges
  - pin holes
- safely use workplace equipment for lifting and moving materials

© Commonwealth of Australia, 2025 Skills Insight

- produce accurate reports and records.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- methods of visual estimation, grading, colour identification and tagging
- sorting, marking and distribution processes
- industry standard cross sections and lengths
- types of material for grading and sorting native timber species, imported timber species, dressed timber, in-the-rough timber, stress and non-stress graded timber, preservative treated timber, medium density fibreboard, laminated veneer, chipboard, plywood, fibreboard and other manufactured board products, coated and/or treated timber products, and debarked logs
- assessment of material for number and frequency of defects
- features including warp, wane, cupping, shakes, insect defects, loose or missing knots, resin pockets, dents, loose surface, lifting coatings, thin or missing coatings, chipped edges, splits, voids, splintered or missing edges, pin holes
- criteria for recycling and re-using sub-standard material
- safe disposal of waste preservative treated timber.

Assessment Conditions

The following resources must be made available:

- material and resources for grading and marking
- personal protective equipment required for grading, sorting and marking material.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3246 Test heavy structural/engineered products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3246B Test heavy structural/engineered products, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to test heavy structural and engineered products in line with product quality specifications. The unit includes establishing specifications and test methods, conducting and interpreting tests, and reporting findings.

The unit applies to those working in a forest and wood products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Timber Truss and Frame Design and Manufacture

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare for testing	1.1 Review and check work order.

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Obtain type and quantity of products to be tested are acquired from the storage location. 1.3 Select equipment and check for operational effectiveness in line with manufacturer instructions. 1.4 Follow workplace procedures to plan testing.
2. Implement procedures to test heavy structural and engineered products	2.1 Select heavy structural and engineered products for testing in line with 2.2 Conduct test in line with established test methods and quality assurance procedures. 2.3 Identify testing problems are identified and resolved or report these. 2.4 Obtain test results and compare data are made against product specifications.
3. Report outcomes of test	3.1 Identify potential or existing problems that might affect product quality and make recommendations for improvement. 3.2 Record and report outcomes of testing.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure for testing
Reading skills to:	• read quality and product specifications

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT3246 Test heavy structural/engineered products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3246B Test heavy structural/engineered products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational and quality procedures for testing heavy structural/engineered products
- safely and efficiently collect data
- accurately interpret test results
- identify problems that may affect test results
- complete accurate records and reports.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- different types of products that might require testing and methods suitable for conducting those tests
- benchmarks or standards for products being tested
- issues that might affect function or suitability of structural/engineered products
- problems associated with the testing process: test accuracy; sample quality; faulty material; defects
- testing methods for modulus of elasticity, surface hardness, modulus of rupture, sheer strength and compression strength
- types of tools and equipment used for testing heavy structural/engineered products and maintenance [procedures for those tools and equipment]

© Commonwealth of Australia, 2025 Skills Insight

- criteria for recycling, re-using, repairing or disposing of faulty products
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- heavy structural/engineered products for testing
- equipment necessary for testing
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- personal protective equipment required for testing heavy structural/engineered products.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3247 Select timber for forestry operations

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3247B Select timber for forestry operations, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to select timber for use in forestry operations, by applying knowledge of timber technology.

The unit applies to those working in technical roles in the forest and wood products industry.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Timber Merchandising

Wood Panel Products

Timber Truss and Frame Design and Manufacture
