FWP Forest and Wood Products Training Package

Release: 5.0

CONTENTS

FWP10116 Certificate I in Forest and Forest Products 32
FWP20116 Certificate II in Forest Growing and Management 34
FWP20216 Certificate II in Harvesting and Haulage....40
FWP20316 Certificate II in Sawmilling and Processing....45
FWP20416 Certificate II in Wood Panel Products 52
FWP20516 Certificate II in Timber Manufactured Products....58
FWP20616 Certificate II in Timber Merchandising....63
FWP20716 Certificate II in Timber Truss and Frame Design and Manufacture....68
FWP30116 Certificate III in Forest Growing and Management....72
FWP30216 Certificate III in Harvesting and Haulage 79
FWP30316 Certificate III in Sawmilling and Processing....86
FWP30416 Certificate III in Wood Panel Products....95
FWP30516 Certificate III in Timber Manufactured Products....103
FWP30616 Certificate III in Timber Merchandising....109
FWP30916 Certificate III in Timber Truss and Frame Design and Manufacture....113
FWP31019 Certificate III in Saw Technology....119
FWP31119 Certificate III in Wood Machining....126
FWP40116 Certificate IV in Forest Operations....131
FWP40216 Certificate IV in Timber Processing....137
FWP40316 Certificate IV in Timber Truss and Frame Manufacture 144
FWP40416 Certificate IV in Timber Truss and Frame Design....149
FWP50116 Diploma of Forest and Forest Products 155
FWP50216 Diploma of Timber Truss and Frame Manufacture 163
FWP50316 Diploma of Timber Truss and Frame Design....167
FWP60116 Advanced Diploma of Forest Industry Sustainability....172
FWPCOT2205 Tail out materials....177
Assessment Requirements for FWPCOT2205 Tail out materials 180
FWPCOT2207 Dress boards and timber....183
Assessment Requirements for FWPCOT2207 Dress boards and timber 187
FWPCOT2208 Resaw boards and timber 190
Assessment Requirements for FWPCOT2208 Resaw boards and timber....194
FWPCOT2212 Grade hardwood sawn and milled products 197
Assessment Requirements for FWPCOT2212 Grade hardwood sawn and milled products200
FWPCOT2213 Grade softwood sawn and milled products 202
Assessment Requirements for FWPCOT2213 Grade softwood sawn and milled products205
FWPCOT2214 Grade cypress sawn and milled products....207
Assessment Requirements for FWPCOT2214 Grade cypress sawn and milled products 210
FWPCOT2215 Visually stress grade hardwood....213
Assessment Requirements for FWPCOT2215 Visually stress grade hardwood 216
FWPCOT2216 Visually stress grade softwood....218
Assessment Requirements for FWPCOT2216 Visually stress grade softwood 221
FWPCOT2217 Visually stress grade cypress 223
Assessment Requirements for FWPCOT2217 Visually stress grade cypress....226
FWPCOT2243 Tail out timber product and waste material 228
Assessment Requirements for FWPCOT2243 Tail out timber product and waste material231
FWPCOT2244 Operate and maintain a thicknesser 234
Assessment Requirements for FWPCOT2244 Operate and maintain a thicknesser....238
FWPCOT2245 Operate and maintain a table saw....241
Assessment Requirements for FWPCOT2245 Operate and maintain a table saw 245

FWPCOT2246 Appearance grade hardwood sawn and milled products....248
Assessment Requirements for FWPCOT2246 Appearance grade hardwood sawn and milled products....251
FWPCOT2247 Appearance grade softwood sawn and milled products....253
Assessment Requirements for FWPCOT2247 Appearance grade softwood sawn and milled products....256
FWPCOT2248 Appearance grade cypress sawn and milled products....258
Assessment Requirements for FWPCOT2248 Appearance grade cypress sawn and milled products....261
FWPCOT2249 Visually stress grade hardwood....263
Assessment Requirements for FWPCOT2249 Visually stress grade hardwood....266
FWPCOT2250 Visually stress grade softwood....268
Assessment Requirements for FWPCOT2250 Visually stress grade softwood....271
FWPCOT2251 Visually stress grade cypress....273
Assessment Requirements for FWPCOT2251 Visually stress grade cypress....277
FWPCOT2252 Band edges of panels....279
Assessment Requirements for FWPCOT2252 Band edges of panels....283
FWPCOT3271 Hand sharpen knives and blades for commercial and domestic cutting services....286
Assessment Requirements for FWPCOT3271 Hand sharpen knives and blades for commercial and domestic cutting services....289
FWPCOT3272 Set up and run multi-head moulder/planer to produce simple profiles....292
Assessment Requirements for FWPCOT3272 Set up and run multi-head moulder/planer to produce simple profiles....296
FWPCOT3273 Set up and run multi-head moulder to produce complex profiles....299
Assessment Requirements for FWPCOT3273 Set up and run multi-head moulder to produce complex profiles....304
FWPCOT3274 Cut timber products using high-speed optimiser....307
Assessment Requirements for FWPCOT3274 Cut timber products using high-speed optimiser....311
FWPCOT3275 Set up, operate and maintain end matching machines....314
Assessment Requirements for FWPCOT3275 Set up, operate and maintain end matching machines....318
FWPCOT3276 Sharpen cutters using a straight knife grinder....321
Assessment Requirements for FWPCOT3276 Sharpen cutters using a straight knife grinder....325
FWPCOT3277 Sharpen cutters in head using a profile knife grinder....328
Assessment Requirements for FWPCOT3277 Sharpen cutters in head using a profile knife grinder....332
FWPCOT3278 Sharpen cutters in head using a straight knife grinder....335
Assessment Requirements for FWPCOT3278 Sharpen cutters in head using a straight knife grinder....339
FWPCOT3279 Assess and maintain saw technology tools....342
Assessment Requirements for FWPCOT3279 Assess and maintain saw technology tools....346
FWPCOT3280 Replace saw blades, knives and guides....349
Assessment Requirements for FWPCOT3280 Replace saw blades, knives and guides....352
FWPCOT3281 Manufacture profile cutters....355
Assessment Requirements for FWPCOT3281 Manufacture profile cutters....358
FWPCOT3282 Assess and maintain saw blade and sawing machine performance....361
Assessment Requirements for FWPCOT3282 Assess and maintain saw blade and sawing machine performance....365
FWPCOT3283 Sharpen and position blades or knives in chipper, canter and reducer....368

© Commonwealth of Australia, 2025 Skills Insight
Approved Page 3 of 4381
© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for FWPCOT3283 Sharpen and position blades or knives in chipper, canter and reducer....372
FWPCOT3284 Grade, sort and mark timber materials....375
Assessment Requirements for FWPCOT3284 Grade, sort and mark timber materials....379
FWPCOT3285 Apply knowledge of wood technology principles to end use applications 382
Assessment Requirements for FWPCOT3285 Apply knowledge of wood technology principles to end use applications....385
FWPCOT3286 Identify levelling and tensioning requirements for saw blades....389
Assessment Requirements for FWPCOT3286 Identify levelling and tensioning requirements for saw blades....392
FWPCOT3287 Operate CNC equipment for grinding, tensioning and levelling saw blades395
Assessment Requirements for FWPCOT3287 Operate CNC equipment for grinding, tensioning and levelling saw blades....399
FWPCOT3288 Set up, operate and maintain finger jointing machines....401
Assessment Requirements for FWPCOT3288 Set up, operate and maintain finger jointing machines....405
FWPCOT3289 Load and prove operating program for CNC machine....408
Assessment Requirements for FWPCOT3289 Load and prove operating program for CNC machine....412
FWPCOT3290 Apply knowledge of timber properties, sawmill operations and sawmilling equipment....415
Assessment Requirements for FWPCOT3290 Apply knowledge of timber properties, sawmill operations and sawmilling equipment....418
FWPCOT3291 Apply principles of timber and process optimisation in sawmill operations421
Assessment Requirements for FWPCOT3291 Apply principles of timber and process optimisation in sawmill operations....424
FWPCOT3292 Calibrate and maintain scanning equipment used in sawmilling operations426
Assessment Requirements for FWPCOT3292 Calibrate and maintain scanning equipment used in sawmilling operations....430
FWPCOT3293 Use scanning equipment for timber grading....433
Assessment Requirements for FWPCOT3293 Use scanning equipment for timber grading437
FWPCOT3294 Swage and shape saw blades....439
Assessment Requirements for FWPCOT3294 Swage and shape saw blades....443
FWPCOT3295 Assess and maintain cutter performance....446
Assessment Requirements for FWPCOT3295 Assess and maintain cutter performance....449
FWPCOT3296 Mechanically stress grade timber....451
Assessment Requirements for FWPCOT3296 Mechanically stress grade timber....454
FWPCOT3297 Operate automated stacking equipment....457
Assessment Requirements for FWPCOT3297 Operate automated stacking equipment....460
FWPCOT3298 Produce templates....462
Assessment Requirements for FWPCOT3298 Produce templates....466
FWPCOT3299 Cut timber or engineered wood product to profile....468
Assessment Requirements for FWPCOT3299 Cut timber or engineered wood product to profile....472
FWPHAR2203 Hook up felled logs using cables (choker)....476
Assessment Requirements for FWPHAR2203 Hook up felled logs using cables (choker)479
FWPHAR2204 Perform landing duties (chaser)....482
Assessment Requirements for FWPHAR2204 Perform landing duties (chaser)....485
FWPHAR2207 Trim and cut harvested trees....488
Assessment Requirements for FWPHAR2207 Trim and cut harvested trees....492
FWPHAR3201 Monitor log recovery (rigging slinger)....496
Assessment Requirements for FWPHAR3201 Monitor log recovery (rigging slinger)....500
FWPHAR3222 Use on-board computer systems for forwarder....503

© Commonwealth of Australia, 2025 Skills Insight
Approved Page 4 of 4381
© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for FWPHAR3222 Use on-board computer systems for forwarder....507
FWPSAW2211 Round softwood logs....509
Assessment Requirements for FWPSAW2211 Round softwood logs....513
FWPSAW3230 Perform primary log breakdown....516
Assessment Requirements for FWPSAW3230 Perform primary log breakdown....520
FWPSAW3231 Perform secondary log breakdown....523
Assessment Requirements for FWPSAW3231 Perform secondary log breakdown....527
FWPSAW3232 Sharpen band saw blades....530
Assessment Requirements for FWPSAW3232 Sharpen band saw blades....534
FWPSAW3233 Sharpen circular saw blades....537
Assessment Requirements for FWPSAW3233 Sharpen circular saw blades....541
FWPSAW3234 File and set saw blades for hand saws and circular saws....544
Assessment Requirements for FWPSAW3234 File and set saw blades for hand saws and circular saws....548
FWPSAW3235 Recondition saw guides....551
Assessment Requirements for FWPSAW3235 Recondition saw guides....554
FWPSAW3236 Sharpen tipped circular saw blades....557
Assessment Requirements for FWPSAW3236 Sharpen tipped circular saw blades....560
FWPSAW3237 Level and tension circular saw blades....563
Assessment Requirements for FWPSAW3237 Level and tension circular saw blades....567
FWPSAW3238 Replace Stellite tips....570
Assessment Requirements for FWPSAW3238 Replace Stellite tips....574
FWPSAW3239 Assess and maintain wide band saw blades....577
Assessment Requirements for FWPSAW3239 Assess and maintain wide band saw blades581
FWPSAW3240 Assess and maintain band saw wheels....584
Assessment Requirements for FWPSAW3240 Assess and maintain band saw wheels....588
FWPSAW3241 Set up and operate production saws used in sawmill operations....591
Assessment Requirements for FWPSAW3241 Set up and operate production saws used in sawmill operations....595
FWPSAW3242 Treat timber....597
Assessment Requirements for FWPSAW3242 Treat timber....601
FWPSAW3243 Produce sawn green boards....605
Assessment Requirements for FWPSAW3243 Produce sawn green boards....609
FWPSAW3244 Align sawing production systems....612
Assessment Requirements for FWPSAW3244 Align sawing production systems....616
FWPSAW3245 Join band saw blades....619
Assessment Requirements for FWPSAW3245 Join band saw blades....622
FWPSAW3246 Hard face saw teeth....625
Assessment Requirements for FWPSAW3246 Hard face saw teeth....628
FWPSAW3247 Replace tungsten tips....630
Assessment Requirements for FWPSAW3247 Replace tungsten tips....633
FWPSAW3248 Profile saw blanks....636
Assessment Requirements for FWPSAW3248 Profile saw blanks....639
FWPSAW3249 Saw logs using CNC optimising systems....642
Assessment Requirements for FWPSAW3249 Saw logs using CNC optimising systems..646
FWPSAW3250 Select and saw logs in multi-species operations....649
Assessment Requirements for FWPSAW3250 Select and saw logs in multi-species operations....653
FWPSAW3251 Apply principles of blade design to sawing procedures....656
Assessment Requirements for FWPSAW3251 Apply principles of blade design to sawing procedures....659
FWPSAW4206 Monitor output timber for optimum volume and value recovery....662

Assessment Requirements for FWPSAW4206 Monitor output timber for optimum volume and value recovery 665
FWPSAW4207 Optimise timber production for volume and value recovery 668
Assessment Requirements for FWPSAW4207 Optimise timber production for volume and value recovery 672
FWPTMM2202 Machine material 674
Assessment Requirements for FWPTMM2202 Machine material 677
FWPTMM2204 Machine material 680
Assessment Requirements for FWPTMM2204 Machine material 684
FWPTMM3203 Estimate and cost job 687
Assessment Requirements for FWPTMM3203 Estimate and cost job 690
FWPTMM3210 Convert timber 693
Assessment Requirements for FWPTMM3210 Convert timber 697
FWPTMM3211 Manufacture using joinery machines 700
Assessment Requirements for FWPTMM3211 Manufacture using joinery machines 704
FWPTMM3212 Estimate and cost job 707
Assessment Requirements for FWPTMM3212 Estimate and cost job 710
FWPWPP2212 Cut panels to profile 713
Assessment Requirements for FWPWPP2212 Cut panels to profile 717
AHCARB206 Operate and maintain stump grinding machines 720
Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines 724
AHCARB307 Use advanced climbing techniques 729
Assessment Requirements for AHCARB307 Use advanced climbing techniques 732
AHCARB312 Use standard climbing techniques to access trees 736
Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees 739
AHCBUS502 Market products and services 743
Assessment Requirements for AHCBUS502 Market products and services 747
AHCCHM201 Apply chemicals under supervision 749
Assessment Requirements for AHCCHM201 Apply chemicals under supervision 752
AHCCHM303 Prepare and apply chemicals 754
Assessment Requirements for AHCCHM303 Prepare and apply chemicals 758
AHCCHM304 Transport and store chemicals 760
Assessment Requirements for AHCCHM304 Transport and store chemicals 763
AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases 765
Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases 769
AHCCHM401 Develop procedures to minimise risks in the use of chemicals 773
Assessment Requirements for AHCCHM401 Develop procedures to minimise risks in the use of chemicals 776
AHCCHM402A Plan and implement a chemical use program 778
AHCFIR201 Assist with prescribed burning 784
Assessment Requirements for AHCFIR201 Assist with prescribed burning 787
AHCILM201 Maintain cultural places 789
Assessment Requirements for AHCILM201 Maintain cultural places 791
AHCILM201A Maintain cultural places 793
AHCILM401A Protect places of cultural significance 798
AHCINF202 Install, maintain and repair farm fencing 804
Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing 807
AHCINF203 Maintain properties and structures 809
Assessment Requirements for AHCINF203 Maintain properties and structures 811
AHCINF303 Plan and construct conventional fencing 813

Approved Page 6 of 4381
© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for AHCINF303 Plan and construct conventional fencing 815
AHCIRG306 Troubleshoot irrigation systems 817
Assessment Requirements for AHCIRG306 Troubleshoot irrigation systems 819
AHCIRG331 Install pressurised irrigation systems 820
Assessment Requirements for AHCIRG331 Install pressurised irrigation systems 823
AHCIRG333 Maintain pressurised irrigation systems.....825
Assessment Requirements for AHCIRG333 Maintain pressurised irrigation systems 828
AHCIRG406A Plan on-site irrigation system installation and construction work.....830
AHCIRG503 Design irrigation, drainage and water treatment systems 835
Assessment Requirements for AHCIRG503 Design irrigation, drainage and water treatment systems 839
AHCLSC302 Construct landscape features using concrete.....841
Assessment Requirements for AHCLSC302 Construct landscape features using concrete844
AHCLSC304 Erect timber structures and features.....846
Assessment Requirements for AHCLSC304 Erect timber structures and features 849
AHCMOM207 Conduct front-end loader operations.....851
Assessment Requirements for AHCMOM207 Conduct front-end loader operations 855
AHCMOM301 Coordinate machinery and equipment maintenance and repair 857
Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair.....860
AHCMOM402 Supervise maintenance of property, machinery and equipment.....862
Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment.....865
AHCMOM402A Supervise maintenance of property machinery and equipment.....867
AHCNAR303 Implement revegetation works 873
Assessment Requirements for AHCNAR303 Implement revegetation works.....876
AHCNAR402A Plan the implementation of revegetation works.....878
AHCNSY201 Pot up plants 884
Assessment Requirements for AHCNSY201 Pot up plants.....886
AHCNSY202 Care for nursery plants.....888
Assessment Requirements for AHCNSY202 Care for nursery plants 890
AHCNSY203 Undertake propagation activities.....892
Assessment Requirements for AHCNSY203 Undertake propagation activities 894
AHCNSY301 Maintain nursery plants 896
Assessment Requirements for AHCNSY301 Maintain nursery plants.....898
AHCNSY302 Receive and dispatch nursery products.....900
Assessment Requirements for AHCNSY302 Receive and dispatch nursery products 903
AHCNSY306 Implement a propagation plan.....905
Assessment Requirements for AHCNSY306 Implement a propagation plan 908
AHCNSY401 Plan a growing-on program 910
Assessment Requirements for AHCNSY401 Plan a growing-on program 913
AHCNSY402 Plan a propagation program 915
Assessment Requirements for AHCNSY402 Plan a propagation program.....917
AHCNSY402A Plan a propagation program 919
AHCPGD402 Plan a plant establishment program 925
Assessment Requirements for AHCPGD402 Plan a plant establishment program.....928
AHCPHT503 Manage a controlled growing environment.....930
Assessment Requirements for AHCPHT503 Manage a controlled growing environment933
AHCPMG201 Treat weeds.....935
Assessment Requirements for AHCPMG201 Treat weeds 937
AHCPMG202 Treat plant pests, diseases and disorders.....939
Assessment Requirements for AHCPMG202 Treat plant pests, diseases and disorders ..942
AHCPMG301 Control weeds.....944

Approved Page 7 of 4381
© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for AHCPMG301 Control weeds 947
AHCPMG302 Control plant pests, diseases and disorders....949
Assessment Requirements for AHCPMG302 Control plant pests, diseases and disorders952
AHCPMG402A Develop a pest management action plan within a local area....954
AHCPMG507 Develop a regional pest management plan 960
Assessment Requirements for AHCPMG507 Develop a regional pest management plan 963
AHCSAW201 Conduct erosion and sediment control activities....965
Assessment Requirements for AHCSAW201 Conduct erosion and sediment control activities 967
AHCSAW302 Implement erosion and sediment control measures....969
Assessment Requirements for AHCSAW302 Implement erosion and sediment control measures 971
AHCSAW302A Implement erosion and sediment control measures....973
AHCWAT502 Manage water systems....978
Assessment Requirements for AHCWAT502 Manage water systems 981
AHCWRK201 Observe and report on weather 983
Assessment Requirements for AHCWRK201 Observe and report on weather....986
AHCWRK203 Operate in isolated and remote situations....988
Assessment Requirements for AHCWRK203 Operate in isolated and remote situations 991
AHCWRK302 Monitor weather conditions 993
Assessment Requirements for AHCWRK302 Monitor weather conditions....995
AHCWRK304 Respond to rescue incidents 997
Assessment Requirements for AHCWRK304 Respond to rescue incidents....999
AHCWRK312 Operate in isolated and remote situations....1001
Assessment Requirements for AHCWRK312 Operate in isolated and remote situations1005
AHCWRK505 Manage trial and research material 1007
Assessment Requirements for AHCWRK505 Manage trial and research material....1009
AURTGA001 Drive and manoeuvre trailers....1011
Assessment Requirements for AURTGA001 Drive and manoeuvre trailers 1014
BSBADM311 Maintain business resources 1017
Assessment Requirements for BSBADM311 Maintain business resources....1020
BSBAUD501 Initiate a quality audit 1022
Assessment Requirements for BSBAUD501 Initiate a quality audit....1026
BSBCMM401 Make a presentation....1028
Assessment Requirements for BSBCMM401 Make a presentation 1031
BSBCMM402 Implement effective communication strategies 1033
Assessment Requirements for BSBCMM402 Implement effective communication strategies 1036
BSBCRT402 Collaborate in a creative process 1038
Assessment Requirements for BSBCRT402 Collaborate in a creative process....1042
BSBCUE301 Use multiple information systems....1044
Assessment Requirements for BSBCUE301 Use multiple information systems 1048
BSBCUE305 Process credit applications 1050
Assessment Requirements for BSBCUE305 Process credit applications....1054
BSBCUE306 Process complex accounts....1056
Assessment Requirements for BSBCUE306 Process complex accounts 1060
BSBCUS301 Deliver and monitor a service to customers 1062
Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers1066
BSBCUS401 Coordinate implementation of customer service strategies 1068
Assessment Requirements for BSBCUS401 Coordinate implementation of customer service strategies 1072
BSBCUS402 Address customer needs....1074
Assessment Requirements for BSBCUS402 Address customer needs 1077

FWP10116 Certificate I in Forest and Forest Products

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI10111 Certificate I in Forest and Forest Products (Release 3)

Qualification Description

This qualification is designed for job roles in the forest and forest products industry.

Job roles

This qualification has two employment pathways for operational environments in the forest and forest products industry.

- Arboriculture Worker
- Forestry Worker

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP10116 Certificate I in Forest and Forest Products, competency must be achieved in **seven (7)** units of competency.

- **five (5)** core units plus
- **two (2)** units from the elective group, the total of which can include one elective unit from this or any endorsed Training Package or State/Territory accredited course recommended for packaging at Certificate I or II level.

Elective units must be relevant to work undertaken in the forest and forest products sector of the industry.

CORE UNITS

© Commonwealth of Australia, 2025 Skills Insight

- FWPCOR2201 Work effectively in the forest and forest products industry
- FWPCOR2202 Communicate and interact effectively in the workplace
- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOR2207 Maintain quality and product care

ELECTIVE UNITS

- AHCILM201A Maintain cultural places
- BSBINM201 Process and maintain workplace information
- BSBWOR204 Use business technology
- FWPFGM2201 Collect seed
- FWPFGM2214 Maintain visitor sites
- PUATEA001B Work in a team

FWP20216 Certificate II in Harvesting and Haulage

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification is designed for job roles in the forest growing and management sector of the forest and forest products industry.

This qualification has seven employment pathways for typical operational environments of forest growing and management. These are:

- Arboriculture Worker
- Farm Forestry Worker
- Forestry Worker
- Nursery Worker
- Plantation Establishment Worker
- Plantation Forest Officer
- Silviculturalist

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:

© Commonwealth of Australia, 2025 Skills Insight

- 7 core units plus
- 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 from Group A electives listed below
- 4 from Group A and/or Group B electives listed below, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

Core Units

Unit code	Unit title
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR2203	Follow environmental care procedures
FWPCOR2204	Follow fire prevention procedures
FWPCOR2205	Follow WHS policies and procedures
FWPCOR2207	Maintain quality and product care
HLTAID003	Provide first aid

Elective Units

Group A

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FWP20316 Certificate II in Sawmilling and Processing

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the sawmilling and processing sector of the forest and forest products industry.

This qualification has seven employment pathways for typical operational environments in sawmilling and processing. These are:

- Kiln Worker
- Timber Grader
- Treatment Plant Worker
- Production Worker
- Sawmill Worker
- Saw Technician
- Wood Machinist

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:

© Commonwealth of Australia, 2025 Skills Insight

- 5 core units plus
- 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 from Group A electives listed below
- 5 from Group A and/or Group B electives listed below, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other currently endorsed Training Package or accredited course.

Core Units

FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR2203	Follow environmental care procedures
FWPCOR2205	Follow WHS policies and procedures
FWPCOR2207	Maintain quality and product care

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details. All prerequisite units are included in the qualification.

Group A

Logyard and/or Material Preparation

FWPCOT2226	Debark logs mechanically
FWPCOT3203	Weigh loads

Sawing Operations

FWPCOT2202	Rack material
FWPCOT2218	Cross cut materials with a fixed saw

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT2229	Dock material to length
FWPCOT2238	Cut materials with a hand-held chainsaw
FWPCOT2243	Tail out timber product and waste material
FWPCOT2245	Operate and maintain a table saw
FWPCOT3271	Hand sharpen knives and blades for commercial and domestic cutting services
FWPCOT3276	Sharpen cutters on a straight knife grinder
FWPCOT3290	Apply knowledge of timber properties, sawmill operations and sawmilling equipment
FWPSAW2202	Sort boards manually
FWPSAW2203	Sort boards mechanically
FWPSAW2204	Dock boards with mechanical feed
FWPSAW2208	Split wood products
FWPSAW2209	Dismantle, transport and assemble hand portable sawmill
FWPSAW2211	Round softwood logs
FWPSAW3247	Replace tungsten tips

Grading and Testing

FWPCOT2246	Appearance grade hardwood sawn and milled products
FWPCOT2247	Appearance grade softwood sawn and milled products
FWPCOT2248	Appearance grade cypress sawn and milled products
FWPCOT2849	Visually stress grade hardwood
FWPCOT2250	Visually stress grade softwood
FWPCOT2251	Visually stress grade cypress
FWPSAW2201	Grade round poles and debarked logs

Timber Products

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT2203	Finish and pack products
FWPCOT2209	Produce finger jointed timber
FWPCOT2211	Produce pointed timber products
FWPCOT2222	Produce laminated beams
FWPCOT2230	Assemble products
FWPCOT2241	Apply wood and timber product knowledge
FWPCOT2244	Operate and maintain a thicknesser
FWPSAW2205	Assemble materials using nail plates
FWPSAW2206	De-stack seasoning racks

Timber Drying and Treatment

AHCCHM201	Apply chemicals under supervision
FWPSAW2210	Prepare for timber treatment operations

Woodchipping

FWPCOT2225	Chip or flake wood

Group B

Warehousing and Distribution

FWPCOT2201	Stack and bind material
FWPCOT2210	Tally material
FWPCOT2227	Process orders and despatch products
FWPCOT2228	Store materials
FWPCOT2231	Pack products
FWPCOT3264	Build and maintain timber stacks
TLIF1002	Conduct housekeeping activities

© Commonwealth of Australia, 2025 Skills Insight

Machinery and Equipment

FWPCOT2219	Use hand-held tools
FWPCOT2237	Maintain chainsaws
FWPCOT2240	Cut material with a pole saw
FWPCOT3259	Operate a four wheel drive on unsealed roads
MEM05006*	Perform brazing and/or silver soldering
MEM11011*	Undertake manual handling
MEM18011*	Shut down and isolate machines/equipment

Load Handling

AHCMOM207	Conduct front-end loader operations
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID2012	Operate specialised load shifting equipment
TLID2013	Move materials mechanically using automated equipment
TLID2047	Prepare cargo for transfer with slings
TLILIC0003	Licence to operate a forklift truck

Safety & Quality Processes

AHCWRK312	Operate in isolated and remote situations
FWPCOT2233	Navigate in forest areas
FWPCOT3263	Maintain and contribute to energy efficiency
HLTAID003	Provide first aid

© Commonwealth of Australia, 2025 Skills Insight

MEM13015	Work safely and effectively in manufacturing and engineering

Administration & Business

BSBINM201	Process and maintain workplace information

FWP20616 Certificate II in Timber Merchandising

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI20611 Certificate II in Timber Merchandising (Release 4)

Qualification Description

This qualification is designed for job roles in the timber merchandising sector of the forest and forest products industry.

Job roles

This qualification has one employment pathway for timber merchandising. This is:

- Customer Service / Sales Assistant (Retail or Wholesale)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP20616 Certificate II in Timber Merchandising, competency must be achieved in **thirteen (13)** units of competency.

six (6) core units of competency

seven (7) units of competency from the elective group, consisting of:

- 3 units from Group A

© Commonwealth of Australia, 2025 Skills Insight

- 4 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber merchandising sector of the industry.

FWP20716 Certificate II in Timber Truss and Frame Design and Manufacture

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI20711 Certificate II in Timber Truss and Frame Design and Manufacture (Release 4)

Qualification Description

This qualification is designed for job roles in the timber truss and frame sector of the forest and forest products industry.

Job roles

This qualification has one employment pathway for typical operational environments of timber truss and frame design. This is:

- Production Assistant (Timber Truss & Frame)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP20716 Certificate II in Timber Truss and Frame Design and Manufacture, competency must be achieved in **thirteen (13)** units of competency.

seven (7) core units of competency

six (6) units of competency from the elective group, consisting of:

- up to 6 units from Group A

© Commonwealth of Australia, 2025 Skills Insight

- the balance of units from Group B, the total of which can include up to 2 units recommended for packaging at Certificate I, II or III level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber truss and frame sector of the industry.

FWP30116 Certificate III in Forest Growing and Management

Modification History

Release	**Comment**s
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification is designed for job roles in the forest growing and management sector of the forest and forest products industry.

This qualification has seven employment pathways for typical operational environments of forest growing and management. These are:

- Arboriculture Technician
- Farm Forestry Technician
- Forestry Technician
- Nursery Technician
- Supervisor (Forestry Operations)
- Tree Planter
- Silviculturalist

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:

© Commonwealth of Australia, 2025 Skills Insight

- 6 core units plus
- 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 from Group A electives listed below
- 4 from Group A and/or Group B electives listed below, the total of which can include up to 2 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Core Units

Unit code	Unit title
BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3203	Evaluate fire potential and prevention
HLTAID003	Provide first aid

Elective Units

Group A

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Field	Unit code	Unit title
Fire Control	AHCWRK302	Monitor weather conditions

FWP30216 Certificate III in Harvesting and Haulage

Modification History

Release	**Comment**s
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Release 2.0.

Qualification Description

This qualification is designed for job roles in the harvesting and haulage sector of the forest and forest products industry.

This qualification has eleven employment pathways for typical operational environments of harvesting and haulage. These are:

- Bulldozer Operator
- Excavator Operator
- Feller Buncher Operator
- Forest Harvester
- Forwarder Operator
- Harvesting Technician
- In-field Chipper Operator
- Loader Operator
- Log truck driver
- Mobile Equipment Operator
- Skidder Operator

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit’s parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 7 core units plus
  - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 from Group A electives listed below
- up to 4 from Group A and/or Group B electives listed below
- up to 2 from Group C electives listed below
- the total elective units can include up to 2 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Core Units

Unit code	Unit title
BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry

FWP30316 Certificate III in Sawmilling and Processing

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the sawmilling and processing sector of the forest and forest products industry.

Job roles

This qualification has twelve employment pathways for typical operational environments of sawmilling and processing. These are:

- Benchman
- Chipper Operator
- Head Rig Operator
- Kiln Operator
- Machine Operator (e.g. Finger Jointing, Moulding, Planing)
- Production Technician
- Sawmilling Technician
- Optimisation Technician
- Sawyer
- Timber Grader
- Timber Products Technician
- Treatment Plant Operator

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states and territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 6 core units plus
  - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 units from Group A
- 5 units from Group A and/or Group B, the total of which can include up to 3 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the sawmilling and processing sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3202	Conduct quality and product care procedures
FWPCOR3204	Visually assess materials

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details. All prerequisite units are included in the qualification.

Group A

Logyard and/or Material Preparation

FWPCOT3203	Weigh loads

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT3227	Receive and measure logs

Sawing Operations

FWPSAW3229	Operate a portable sawmill
FWPSAW3230	Perform primary log breakdown
FWPSAW3231	Perform secondary log breakdown
FWPSAW3241	Set up and operate production saws used in sawmill operations
FWPSAW3243	Produce sawn green boards
FWPSAW3250	Select and saw logs in multi-species operations

Grading and Testing

FWPCOT3208	Test strength of joints
FWPCOT3240	Grade heavy structural/engineered products
FWPCOT3246	Test heavy structural/engineered products
FWPCOT3250	Prepare timber to meet import/export compliance requirements
FWPCOT3267	Mechanically stress-grade engineered wood panels
FWPCOT3284	Grade, sort and mark timber materials
FWPCOT3292	Calibrate and maintain scanning equipment used in sawmilling operations
FWPCOT3293	Use scanning equipment for timber grading
FWPCOT3296	Mechanically stress grade timber
FWPSAW3223	Assess wood chips

Timber Products

FWPCOT2241	Apply wood and timber product knowledge

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT2245	Operate and maintain a table saw
FWPCOT3234	Cut material using CNC sizing machines
FWPCOT3235	Machine material using CNC machining and processing centres
FWPCOT3253	Convert timber residue into products for further use
FWPCOT3264	Build and maintain timber stacks
FWPCOT3272	Set up and run multi-head moulder/planer to produce simple profiles
FWPCOT3273	Set up and run multi-head moulder to produce complex profiles
FWPCOT3274	Cut timber products using high-speed optimiser
FWPCOT3275	Set up, operate and maintain end matching machines
FWPCOT3288	Set up, operate and maintain finger jointing machines
FWPCOT3290	Apply knowledge of timber properties, sawmill operations and sawmilling equipment
FWPCOT3297	Operate automated stacking equipment
FWPSAW3249	Saw logs using CNC optimising systems

Timber Drying and Treatment

AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
FWPCOT3231	Operate steam boiler
FWPCOT3232	Operate heat plant
FWPCOT3248	Dry timber in solar assisted kilns
FWPCOT3249	Select timber preservation techniques
FWPSAW3205	Dry hardwood
FWPSAW3206	Dry softwood
FWPSAW3242	Treat timber

© Commonwealth of Australia, 2025 Skills Insight

Sawdoctoring

FWPCOT3271	Hand sharpen knives and blades for commercial and domestic cutting services
FWPCOT3279	Assess and maintain saw technology tools
FWPCOT3280	Replace saw blades, knives and guides
FWPCOT3281	Manufacture profile cutters
FWPCOT3282	Assess and maintain saw blade and sawing machine performance
FWPCOT3283	Sharpen and position blades or knives in chipper, canter and reducer
FWPCOT3286	Identify levelling and tensioning requirements for saw blades
FWPCOT3294	Swage and shape saw blades
FWPCOT3295	Assess and maintain cutter performance
FWPCOT3298	Produce templates
FWPSAW3232	Sharpen band saw blades
FWPSAW3233	Sharpen circular saw blades
FWPSAW3234	File and set saw blades for hand saws and circular saws
FWPSAW3235	Recondition saw guides
FWPSAW3236	Sharpen tipped circular saw blades
FWPSAW3237	Level and tension circular saw blades
FWPSAW3238	Replace Stellite tips
FWPSAW3239	Assess and maintain wide band saw blades
FWPSAW3240	Assess and maintain band saw wheels
FWPSAW3244	Align sawing production systems
FWPSAW3245	Join band saw blades

FWP30416 Certificate III in Wood Panel Products

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

Qualification Description

This qualification is designed for job roles in the wood panel products sector of the forest and forest products industry.

Job roles

This qualification has seven employment pathways for typical operational environments of wood panel products. These are:

- Engineered Timber Products Technician / Operator
- Kiln Operator
- Production Technician / Operator (Laminates)
- Production Technician / Operator (Panel and Board)
- Production Technician / Operator (Veneer)
- Timber Fabricator
- Timber Fabricator (Laminates)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states and territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

FWP30516 Certificate III in Timber Manufactured Products

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber manufactured products sector of the forest and forest products industry.

Job roles

This qualification has five employment pathways for typical operational environments of timber manufactured products. These are:

- Press Operator
- Jig Setter
- Machine Operator (e.g. Finger Jointing, Moulding, Planing)
- Saw Operator
- Timber Manufactured Products Technician

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states and territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Skills Insight

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 6 core units plus
  - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 units from Group A
- 4 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber manufactured products sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3202	Conduct quality and product care procedures
FWPCOR3204	Visually assess materials

Elective Units

Group A

Sawdoctoring

FWPCOT3276	Sharpen cutters using a straight knife grinder
FWPCOT3277	Sharpen cutters in head using a profile knife grinder

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT3278	Sharpen cutters in head using a straight knife grinder
FWPCOT3279	Assess and maintain saw technology tools
FWPCOT3280	Replace saw blades, knives and guides
FWPCOT3282	Assess and maintain saw blade and sawing machine performance
FWPCOT3295	Assess and maintain cutter performance
FWPCOT3299	Cut timber or engineered wood product to profile

Timber Grading & Testing

FWPCOT3208	Test strength of joints
FWPCOT3240	Grade heavy structural/engineered products
FWPCOT3246	Test heavy structural/engineered products
FWPCOT3250	Prepare timber to meet import/export compliance requirements

Trusses & Frames

FWPCOT3204	Prepare and interpret sketches and drawings
FWPCOT3214	Take off material quantities
FWPCOT3218	Quote and interpret from manufactured timber product plans
FWPCOT3219	Produce standard truss or frame plans and details using computers
FWPCOT3220	Quote and interpret from computerised timber manufactured product plans
FWPCOT3239	Create drawings using computer aided design systems
FWPCOT3241	Assemble timber wall frames
FWPCOT3242	Lay up timber roof trusses
FWPCOT3243	Operate a truss press

FWP30616 Certificate III in Timber Merchandising

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI30611 Certificate III in Timber Merchandising (Release 4)

Qualification Description

This qualification is designed for job roles in the timber merchandising sector of the forest and forest products industry.

Job roles

This qualification has five employment pathways for typical operational environments of timber merchandising. These are:

- Customer Service / Sales Assistant (Retail or Wholesale)
- Customer Service Officer
- Sales and Merchandising Team Leader
- Sales and Merchandising Team Leader (Timber Products)
- Timber Advisor

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the FWP30616 Certificate III in Timber Merchandising, competency must be achieved in **thirteen (13)** units of competency.

five (5) core units of competency

© Commonwealth of Australia, 2025 Skills Insight

eight (8) units of competency from the elective group, consisting of:

3 units from Group A

5 units from Group A and/or Group B, the total of which can include up to two units recommended for packaging at Certificate II, III or IV level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber merchandising sector of the industry.

FWP30916 Certificate III in Timber Truss and Frame Design and Manufacture

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber truss and frame sector of the forest and forest products industry.

The outcome of this qualification can satisfy entry requirements into FWP40416 Certificate IV in Timber Truss and Frame Design by completing the following elective units:

- FWPCOT3204 Prepare and interpret sketches and drawings
- FWPCOT3214 Take off material quantities
- FWPCOT3218 Quote and interpret from manufactured timber product plans
- FWPCOT3220 Quote and interpret from computerised timber manufactured product plans
- FWPCOT3239 Create drawings using computer aided design systems

Plus at least one of the following specialist design units:

- FWPTMM3204 Interpret designs to prepare timber roof truss drawings and documents using computers
- FWPTMM3205 Interpret designs to prepare timber floor system drawings and documents using computers
- FWPTMM3206 Interpret designs to prepare timber wall frame drawings and documents using computers

Job roles

This qualification satisfies employment pathways for typical operational environments of timber truss and frame design, including:

- Designer (Timber truss and frame)
- Production fabricator (Timber truss and frame)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

© Commonwealth of Australia, 2025 Skills Insight

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 5 core units plus
  - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 8 units of competency from the elective groups A, B or C, the total of which can include up to 2 units recommended for packaging at Certificate II, Certificate III or Certificate IV in any endorsed Training Package or State/Territory accredited course

Elective units must be relevant to work undertaken in the timber truss and frame sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures

FWP31019 Certificate III in Saw Technology

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0

Qualification Description

This qualification reflects the job role of Saw Technicians who service, maintain and align saw blades, knives and guides for timber sawmilling machines and other applications. Saw Technicians may also inspect, test, maintain and troubleshoot mechanical components on sawing machine centres to achieve sawing production rates and product tolerances.

The elective groups and units of competency within this qualification can provide Saw Technicians with two pathway options. Saw Technicians can use the qualification to develop skills in performing general saw servicing operations or develop skills in saw maintenance engineering roles.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 26 units of competency:
  - 7 core units plus
  - 19 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- All 4 units from either Group A or Group B
- A minimum of 8 units from Group C
- Remaining 7 units from Group C and/or Group D
- Up to 2 units from any currently endorsed Training Package or accredited course.

© Commonwealth of Australia, 2025 Skills Insight

Elective units must be relevant to work undertaken in the sawmilling and processing sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOT3279	Assess and maintain saw technology tools
FWPCOT3283	Sharpen and position blades or knives for chipper, canter and reducer
FWPCOT3286	Identify levelling and tensioning requirements for saw blades
FWPCOT3290	Apply knowledge of timber properties, sawmill operations and sawmilling equipment
FWPSAW3247	Replace tungsten tips
FWPSAW3251	Apply principles of blade design to sawing procedures

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details. All prerequisite units are included in the qualification.

Group A – General electives (service operations)

FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOT3204	Prepare and interpret sketches and drawings

Group B – General electives (maintenance engineering)

MEM09002*	Interpret technical drawing
MEM13015	Work safely and effectively in manufacturing and

© Commonwealth of Australia, 2025 Skills Insight

	engineering
MEM14006*	Plan work activities
MEM16006*	Organise and communicate information

Group C – Saw technology (service operations)

Servicing saw blades and guides

FWPCOT3280	Replace saw blades, knives and guides
FWPCOT3282	Assess and maintain saw blade and sawing machine performance
FWPCOT3287	Operate CNC equipment for grinding, tensioning and levelling saw blades
FWPCOT3294	Swage and shape saw blades
FWPSAW3232	Sharpen band saw blades
FWPSAW3233	Sharpen circular saw blades
FWPSAW3235	Recondition saw guides
FWPSAW3236	Sharpen tipped circular saw blades
FWPSAW3237	Level and tension circular saw blades
FWPSAW3238	Replace Stellite tips
FWPSAW3239	Assess and maintain wide band saw blades

Servicing cutters for timber processing

FWPCOT3276	Sharpen cutters using a straight knife grinder
FWPCOT3277	Sharpen cutters in head using a profile knife grinder
FWPCOT3278	Sharpen cutters in head using a straight knife grinder
FWPCOT3281	Manufacture profile cutters
FWPCOT3295	Assess and maintain cutter performance
FWPCOT3298	Produce templates

© Commonwealth of Australia, 2025 Skills Insight

Servicing sawing machine

FWPSAW3240	Assess and maintain band saw wheels
FWPSAW3244	Align sawing production systems

Other services

FWPCOT2245	Operate and maintain a table saw
FWPCOT3271	Hand sharpen knives and blades for commercial and domestic cutting services
FWPSAW3234	File and set saw blades for hand saws and circular saws

Group D – Saw technology (maintenance engineering)

Mechanical maintenance

MEM11011*	Undertake manual handling
MEM12023*	Perform engineering measurements
MEM12024*	Perform computations
MEM18001*	Use hand tools
MEM18002*	Use power tools/hand held operations
MEM18055*	Dismantle, replace and assemble engineering components

Welding

FWPSAW3245	Join band saw blades
MEM05006*	Perform brazing and/or silver soldering
MEM05049*	Perform routine gas tungsten arc welding
MEM05050*	Perform routine gas metal arc welding

Quality processes

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT3263	Maintain and contribute to energy efficiency
FWPCOT3285	Apply knowledge of wood technology principles to end use applications
FWPCOT3291	Apply principles of timber and process optimisation in sawmill operations
MSMSUP390	Use structured problem-solving tools
MSS402040	Apply 5S procedures
MSS404054	Apply statistics to operational processes

Prerequisite requirements

Unit of competency	**Prerequisite requirement**

FWP31119 Certificate III in Wood Machining

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0

Qualification Description

This qualification reflects the job role of Wood Machinists who work in a sawmill or other timber processing environment and set up, operate and maintain machines such as large automated planers/moulders and saws to cut, plane and profile timber to specifications. This involves interpreting work orders to establish job requirements, selecting and setting up knives and cutters to machinery, aligning knives, operating machines to cut, plane and profile timber, and cleaning and maintaining machines and equipment.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 27 units of competency:
  - 8 core units plus
  - 19 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- A minimum of 8 units from Group A
- A minimum of 4 units from Group B
- Remaining 7 units from Group A, B, C and/or D
- Up to 2 units from any currently endorsed Training Package or accredited course.

© Commonwealth of Australia, 2025 Skills Insight

Elective units must be relevant to work undertaken in the sawmilling and processing sector of the industry.

Core Units

BSBFLM312	Contribute to team effectiveness
FWPCOR2201	Work effectively in the forest and forest products industry
FWPCOR2202	Communicate and interact effectively in the workplace
FWPCOR3201	Implement safety, health and environment policies and procedures
FWPCOR3202	Conduct quality and product care procedures
FWPCOT2219	Use hand-held tools
FWPCOT3204	Prepare and interpret sketches and drawings
FWPCOT3290	Apply knowledge of timber properties, sawmill operations and sawmilling equipment

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A – Operating timber processing machines

FWPCOT2244	Operate and maintain a thicknesser
FWPCOT2245	Operate and maintain a table saw
FWPCOT3235	Machine material using CNC machining and processing centres
FWPCOT3272	Set up and run multi-head moulder/planer to produce simple profiles
FWPCOT3273	Set up and run multi-head moulder to produce complex profiles
FWPCOT3274	Cut timber products using high speed optimiser

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT3275	Set up, operate and maintain end matching machines
FWPCOT3288	Set up, operate and maintain finger jointing machines
FWPCOT3289	Load and prove operating program for CNC machine
FWPSAW3241	Set up and operate production saws used in sawmill operations
MSFFM3012	Set up, operate and maintain sawing machines
MSFFM3017	Set up, operate and maintain routing and shaping machines

Group B – Grinding and maintaining cutting tools

FWPCOT3271	Hand sharpen knives and blades for commercial and domestic cutting services
FWPCOT3276	Sharpen cutters using a straight knife grinder
FWPCOT3277	Sharpen cutters in head using a profile knife grinder
FWPCOT3278	Sharpen cutters in head using a straight knife grinder
FWPCOT3280	Replace saw blades, knives and guides
FWPCOT3281	Manufacture profile cutters
FWPCOT3283	Sharpen and position blades or knives in chipper, canter and reducer
FWPCOT3286	Identify levelling and tensioning requirements for saw blades
FWPCOT3295	Assess and maintain cutter performance
FWPCOT3298	Produce templates
FWPSAW3233	Sharpen circular saw blades
FWPSAW3237	Level and tension circular saw blades
FWPSAW3247	Replace tungsten tips
FWPSAW3251	Apply principles of blade design to sawing procedures

© Commonwealth of Australia, 2025 Skills Insight

Group C – Grading and testing timber

FWPCOT2246	Appearance grade hardwood sawn and milled products
FWPCOT2247	Appearance grade softwood sawn and milled products
FWPCOT2248	Appearance grade cypress sawn and milled products
FWPCOT2249	Visually stress grade hardwood
FWPCOT2250	Visually stress grade softwood
FWPCOT2251	Visually stress grade cypress
FWPCOT3285	Apply knowledge of wood technology principles to end use applications
FWPCOT3292	Calibrate and maintain scanning equipment used in sawmilling operations
FWPCOT3293	Use scanning equipment for timber grading
FWPCOT3296	Mechanically stress grade timber

Group D – General electives

FWPCOT2243	Tail out timber product and waste material
FWPCOT3214	Take off material quantities
FWPCOT3239	Create drawings using computer aided design systems
FWPCOT3263	Maintain and contribute to energy efficiency
FWPCOT3291	Apply principles for timber and process optimisation in sawmill operations
FWPTMM4204	Sample and test products to specifications
MSMSUP390	Use structured problem-solving tools
MSS402040	Apply 5S procedures
MSS404054	Apply statistics to operational processes

© Commonwealth of Australia, 2025 Skills Insight

FWP40116 Certificate IV in Forest Operations

Modification History

Release	Comments
Release 1	This qualification first released with FWP Forest and Wood Products Training Package Release 2.0. It is equivalent to FPI40111 Certificate IV in Forest Operations (Release 4)

Qualification Description

This qualification is designed for job roles in the forest operations sector of the forest and forest products industry.

Job roles

This qualification has eight employment pathways for typical forest operations environments. These are:

- Arboriculture Supervisor
- Farm Forestry Supervisor
- Forestry Supervisor
- Forestry Operations Supervisor
- Harvesting Supervisor
- Harvesting Team Leader
- Propagation and Stand Health Supervisor
- Tree Farm Supervisor

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Skills Insight

Packaging Rules

To be awarded the FWP40116 Certificate IV in Forest Operations, competency must be achieved in **fourteen (14)** units of competency.

five (5) core units of competency

nine (9) units of competency from the elective group, consisting of:

- 2 units from Group A
- 7 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate III, IV or Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the forest operations sector of the industry.

CORE UNITS

Field	**Unit Code**	**Unit Title**
Core	BSBLED401	Develop teams and individuals
	FWPCOR3203	Evaluate fire potential and prevention
	FWPCOR4201	Monitor safety, health and environment policies and procedures
	FWPCOR4202	Monitor and review forestry operations
	FWPCOR4203	Monitor quality and product care procedures

GROUP A ELECTIVE UNITS

Field	**Unit Code**	**Unit Title**
Fire Control	PUAFIR511	Conduct complex prescribed burns
		Prerequisite PUAFIR303B Suppress wildfire
	PUAFIR513	Develop complex prescribed burn plans
		Prerequisite PUAFIR303B Suppress wildfire
	PUAOPE001B	Supervise response
		Prerequisite

© Commonwealth of Australia, 2025 Skills Insight

		PUAFIR302B Suppress urban fire OR PUAFIR303B Suppress wildfire (Fire specific)
Breeding & Propagation	AHCNSY402A	Plan a propagation program
Site Establishment & Maintenance	AHCNAR402A	Plan the implementation of revegetation works
	AHCILM401A	Protect places of cultural significance
	AHCIRG406A	Plan on-site irrigation system installation and construction work
	FWPFGM4201	Implement a forest establishment plan
	FWPFGM4207	Conduct a forest site assessment
	FWPFGM4208	Plan a quarry
	FWPFGM4209	Interpret and use aerial photographs for forest management

FWP40216 Certificate IV in Timber Processing

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber processing and production sector of the forest and forest products industry.

Job roles

This qualification has eight employment pathways for typical forest operations environments. These are:

- Customer Service Manager (Wholesale)
- Sawmill Supervisor
- Production Supervisor
- Treatment Plant Supervisor
- Timber Advisor Supervisor
- Timber Manufacturing Supervisor
- Timber Supervisor (Wholesale)
- Optimisation Manager

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states and territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Skills Insight

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 3 core units plus
  - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 units from Group A
- 8 units from Group A and/or Group B, the total of which can include up to 2 units recommended for packaging at Certificate III, IV or Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber processing and production sectors of the industry, including sawmilling and processing, wood panel products, timber manufactured products and timber merchandising.

Core Units

BSBLED401	Develop teams and individuals
FWPCOR4201	Monitor safety, health and environment policies and procedures
FWPCOR4203	Monitor quality and product care procedures

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

Logyard and/or Material Preparation

FWPCOT4205	Coordinate log debarking operations

Sawing Operations

FWPSAW4202	Plan and monitor saw log operations

© Commonwealth of Australia, 2025 Skills Insight

FWPSAW4205	Plan and monitor timber conversion

Sawdoctoring

FWPCOT3295	Assess and maintain cutter performance
FWPCOT3282	Assess and maintain saw blade and sawing machine performance

Timber Treatment & Drying

FWPCOT4206	Plan and coordinate boiler operations
FWPCOT4207	Plan and coordinate heat plant operations
FWPSAW4201	Plan and monitor timber treatment plant operations
FWPSAW4203	Coordinate timber drying operations

Grading & Testing

FWPTMM4204	Sample and test products to specifications
FWPWPP4202	Perform laboratory testing
PSPGEN062	Collect statistical data

Board & Veneer Production

FWPWPP4203	Plan and coordinate engineered wood panel production

Trusses & Frames

FWPCOT4201	Produce complex truss and frame plans and details using computers
FWPCOT4202	Design timber structures

Timber Products

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT4203	Plan and coordinate product assembly
FWPTMM4202	Diagnose and calculate production costs
FWPTMM4203	Install and commission CNC software
FWPTMM4208	Construct prototypes and samples for timber structures

Retail

SIRRINV002	Control stock
SIRRMER003	Coordinate visual merchandising activities
SIRXSLS003	Achieve sales results
SITXCCS008	Develop and manage quality customer service practices
TLIR4002	Source goods/services and evaluate contractors

Machinery & Equipment

AHCMOM402	Supervise maintenance of property, machinery and equipment
TLIC4006	Drive multi-combination vehicle

Competitive Manufacturing

MSS403001	Review competitive systems and practices
MSS403010	Facilitate change in an organisation implementing competitive systems and practices

Group B

Load Handling

FWPCOT4204	Schedule and coordinate load shifting
TLID4032	Plan and conduct specialised lift

Safety & Quality Processes

© Commonwealth of Australia, 2025 Skills Insight

BSBMGT403	Implement continuous improvement
BSBRSK401	Identify risk and apply risk management processes
FWPSAW4206	Monitor output timber for optimum volume and value recovery
FWPSAW4207	Optimise timber production for volume and value recovery
HLTAID006	Provide advanced first aid
HLTAID008	Manage first aid services and resources
MSS015011	Conduct a sustainability energy audit
MSS405086	Develop sustainable energy practices
TLIF4007	Implement and coordinate accident-emergency procedures

Administration & Business

BSBCUS401	Coordinate implementation of customer service strategies
BSBINM401	Implement workplace information system
BSBITS411	Maintain and implement digital technology
BSBLDR402	Lead effective workplace relationships
BSBLDR403	Lead team effectiveness
BSBPMG416	Apply project procurement procedures
BSBSMB421	Manage small business finances
BSBWRT401	Write complex documents
LGACOM409A	Prepare tender documentation

Training & Assessment

BSBCMM401	Make a presentation
TAEASS401	Plan assessment activities and processes

© Commonwealth of Australia, 2025 Skills Insight

TAEASS402	Assess competence
TAEASS403	Participate in assessment validation
TAEDEL301	Provide work skill instruction
TAEDEL401	Plan, organise and deliver group-based learning

FWP40416 Certificate IV in Timber Truss and Frame Design

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber timber truss and frame sector sector of the forest and forest products industry.

Job roles

This qualification has one employment pathway for typical truss and frame manufacturing environments. This is:

- Designer (Timber truss and frame)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

The outcome of this qualification can satisfy the entry requirement into FWP50316 Diploma of Timber Truss and Frame Design. For those seeking a pathway into that qualification, the entry requirement is the successful achievement of the following units, or demonstration of equivalent competence:

- FWPCOT4202 Design timber structures
- FWPTMM4201 Construct prototypes and samples
- MSAPMSUP390A Use structured problem solving tools
- CPCCBC4001A Apply building codes and standards to the construction process for low rise building projects
- CPCSUS4001A Implement and monitor environmentally sustainable work practices.

Plus at least one of the following units:

© Commonwealth of Australia, 2025 Skills Insight

- FWPTMM4205 Prepare and advise on a broad range of timber roof truss details using computers
- FWPTMM4206 Prepare and advise on a broad range of timber floor system
- FWPTMM4207 Prepare and advise on a broad range of timber wall frame details using computers.

Entry Requirements

The entry requirement for this qualification is the successful achievement of the following units contained in FWP30916 Certificate III Timber Truss and Frame Design and Manufacture or demonstration of equivalent competence:

- FWPCOT3204 Prepare and interpret sketches and drawings
- FWPCOT3214 Take off material quantities
- FWPCOT3218 Quote and interpret from manufactured timber product plans
- FWPCOT3220 Quote and interpret from computerised timber manufactured product plans
- FWPCOT3239 Create drawings using computer aided design systems.

Plus at least one of the following units:

- FWPTMM3204 Interpret designs to prepare timber roof truss drawings and documents using computers
- FWPTMM3205 Interpret designs to prepare timber floor system drawings and documents using computers
- FWPTMM3206 Interpret designs to prepare timber wall frame drawings and documents using computers.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
  - 3 core units plus
  - 14 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 1 unit from Group A
- at least 5 units from Group A and /or Group B
- the remaining units from Group A, B or C, the total of which may also include up to 3 units recommended for packaging at Certificate III, IV or Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the truss and frame industry.

Core Units

© Commonwealth of Australia, 2025 Skills Insight

BSBLED401	Develop teams and individuals
FWPCOR4201	Monitor safety, health and environment policies and procedures
FWPCOR4203	Monitor quality and product care procedures

Elective Units

Group A

Forest

FWPTMM4205	Prepare and advise on a broad range of timber roof truss details using computers
FWPTMM4206	Prepare and advise on a broad range of timber floor system details using computers
FWPTMM4207	Prepare and advise on a broad range of timber wall frame details using computers

Group B

Forest

FWPCOT4202	Design timber structures
FWPTMM4208	Construct prototypes and samples for timber structures

Business

BSBLED501	Develop a workplace learning environment

Manufacturing

MSMSUP390	Use structured problem-solving tools
MSS015011	Conduct a sustainability energy audit
MSS405086	Develop sustainable energy practices

Construction

© Commonwealth of Australia, 2025 Skills Insight

CPCCBC4001A	Apply building codes and standards to the construction process for low rise building projects
CPCSUS4001A	Implement and monitor environmentally sustainable work practices

Group C

Forest

FWPCOT4203	Plan and coordinate product assembly
FWPTMM4202	Diagnose and calculate production costs
FWPTMM4203	Install and commission CNC software

Business

BSBCMM401	Make a presentation
BSBCUS401	Coordinate implementation of customer service strategies
BSBINM401	Implement workplace information system
BSBITS411	Maintain and implement digital technology
BSBMGT402	Implement operational plan
BSBPMG415	Apply project risk management techniques
BSBPMG522	Undertake project work

Construction

CPCCBC4004A	Identify and produce estimated costs for building and construction projects
CPCCBC4005A	Produce labour and material schedules for ordering
CPCCBC4024A	Resolve business disputes
CPCCCA3006B	Erect roof trusses

© Commonwealth of Australia, 2025 Skills Insight

CPCCSV5010A	Interact with clients in a regulated environment
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Visual Arts, Crafts and Design

CUADES403	Research and apply techniques in spatial design

Health and Safety

HLTAID006	Provide advanced first aid
HLTAID008	Manage first aid services and resources

Manufacturing

MSMSUP404	Coordinate maintenance
MSS402050	Monitor process capability
MSS403001	Review competitive systems and practices
MSS403010	Facilitate change in an organisation implementing competitive systems and practices
MSS404060	Facilitate the use of planning software systems in a work area or team
MSS404082	Assist in implementing a proactive maintenance strategy
MSS404084	Undertake process capability improvements

Training

TAEASS401	Plan assessment activities and processes
TAEASS402	Assess competence
TAEDEL401	Plan, organise and deliver group-based learning
TAEDEL402	Plan, organise and facilitate learning in the workplace

FWP50116 Diploma of Forest and Forest Products

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the forest and forest products industry.

Job roles

This qualification has twelve employment pathway for typical management environments of forest and forest products industries. These are:

- Arboriculture Manager
- Forest Manager
- Forestry Manager
- Harvesting Manager
- Nursery Manager
- Plantation Establishment Manager
- Plantation Manager
- Production Manager
- Sawmill Manager
- Timber Advisory Manager
- Timber Manufacturing Manager
- Tree Farm Manager

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
  - 6 core units plus
  - 9 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 5 units from Group A
- 4 units from Group A and /or Group B, the total of which may also include up to 2 units recommended for packaging at Certificate IV, Diploma or Advanced Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the forest and wood products industry.

Core Units

BSBCUS501	Manage quality customer service
BSBMGT502	Manage people performance
BSBMGT516	Facilitate continuous improvement
BSBWHS503	Contribute to the systematic management of WHS risk
BSBWOR501	Manage personal work priorities and professional development
BSBWOR502	Lead and manage team effectiveness

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

Fire Control

PUALAW001 B	Protect and preserve incident scene

© Commonwealth of Australia, 2025 Skills Insight

PUAOPE016A *	Manage a multi-team sector
PUAFIR501B *	Conduct fire investigation and analysis activities
PUAFIR509B	Implement prevention strategies
PUAOPE007B *	Command agency personnel within a multi-agency emergency response

Breeding & Propagation

AHCPHT503	Manage a controlled growing environment
FWPFGM5212	Manage genetic resources
FWPFGM5215	Breed Trees

Site Establishment & Maintenance

AHCIRG503	Design irrigation, drainage and water treatment systems
AHCWAT502	Manage water systems
FWPFGM5201	Plan and manage an inventory program
FWPCOT5206	Implement forestry chain of custody certification system
FWPFGM5208	Manage road construction and maintenance
FWPFGM5214	Develop a native forest regeneration plan
FWPFGM5217	Promote plantations as a sustainable form of land use
LGAPLEM404A	Prepare and present geographic information systems data
LGAPLEM612B	Protect heritage and cultural assets

© Commonwealth of Australia, 2025 Skills Insight

Tree Growing & Maintenance

AHCPGD402	Plan a plant establishment program
AHCPMG507	Develop a regional pest management plan
AHCNSY401	Plan a growing-on program
AHCNSY402	Plan a propagation program
AHCWRK505	Manage trial and research material
FWPCOT5205	Develop biohazard contingency plans
FWPFGM5210	Manage tending operations in a native forest
FWPFGM5211	Coordinate stand nutrition
FWPFGM5213	Coordinate plantation tending operations
FWPFGM5216	Manage coupe planning

Harvesting

FWPCOT5209	Manage tree harvesting to minimise environmental impact
FWPHAR5201	Design harvesting plans

Timber Products & Processes

FWPCOT4201	Produce complex truss and frame plans and details using computers
FWPCOT4202	Design timber structures
FWPCOT4204	Schedule and coordinate load shifting
FWPCOT4205	Coordinate log debarking operations
FWPCOT4206	Plan and coordinate boiler operations

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT4207	Plan and coordinate heat plant operations
FWPCOT5207	Implement sustainability in the workplace
FWPFGM5219	Undertake carbon stock sampling of forests and plantations
FWPSAW4201	Plan and monitor timber treatment plant operations
FWPSAW4202	Plan and monitor saw log operations
FWPSAW4203	Coordinate timber drying operations
FWPSAW4205	Plan and monitor timber conversion
FWPTMM4202	Diagnose and calculate production costs
FWPTMM4203	Install and commission CNC software
FWPTMM4204	Sample and test products to specifications
FWPTMM5202	Develop, trial and evaluate prototypes
FWPTMM5203	Generate and transfer complex computer-aided drawings and specifications
FWPTMM5205	Optimise CNC operations
FWPTMM5206	Plan production
FWPTMM5207	Assess timber product designs for feasibility
FWPTMM5208	Manage timber product design
FWPWPP4202	Perform laboratory testing
FWPWPP4203	Plan and coordinate engineered wood panel production

© Commonwealth of Australia, 2025 Skills Insight

Competitive Manufacturing

MSS405001	Develop competitive systems and practices for an organisation
MSS405004	Develop business plans in an organisation implementing competitive systems and practices

Group B

Machinery & Equipment

FWPCOT5203	Manage installation and commissioning of equipment
FWPCOT5204	Organise enterprise maintenance programs

Safety & Quality Processes

AHCCHM401	Develop procedures to minimise risks in the use of chemicals
BSBRSK501	Manage risk
BSBSUS501	Develop workplace policy and procedures for sustainability
FWPCOT5201	Implement sustainable forestry practices
PUAOPE016A*	Manage a multi-team sector
MSS015011	Conduct a sustainability energy audit
MSS405086	Develop sustainable energy practices

Administration & Business

BSBAUD501	Initiate a quality audit
BSBFIM501	Manage budgets and financial plans
BSBINM501	Manage an information or knowledge management system

© Commonwealth of Australia, 2025 Skills Insight

LGACOM401A	Administer contracts
LGACOM409A	Prepare tender documentation

Planning & Analysis

BSBINN502	Build and sustain an innovative work environment
BSBMGT517	Manage operational plan
BSBPMG522	Undertake project work
FWPCOT6209	Manage forest and wood products industry research
PSPGEN062	Collect statistical data

Training & Assessment

BSBLED501	Develop a workplace learning environment

Communication & Relationships

AHCBUS502	Market products and services
FWPCOT5202	Manage forestry information and interpretations programs
FWPCOT5208	Build and maintain community relationships
LGACOM502B	Devise and conduct community consultations

Prerequisite requirements

Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	**Prerequisite requirement**
PUAFIR501B* Conduct fire investigation and analysis activities	PUALAW001B Protect and preserve incident scene

© Commonwealth of Australia, 2025 Skills Insight

PUAOPE007B Command agency personnel within a multi-agency emergency response	PUAOPE012A Control a Level 1 incident PUAOPE015A Conduct briefings and debriefings
PUAOPE016A Manage a multi-team sector	PUAFIR302B Suppress urban fire OR PUAFIR303B Suppress wildfire

FWP50316 Diploma of Timber Truss and Frame Design

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Qualification Description

This qualification is designed for job roles in the timber truss and frame sector of the forest and wood products industry

Job roles

This qualification has one employment pathway for typical management environments of forest and wood products industries. This is:

- Designer (Timber truss and frame)

Licensing, legislative, regulatory, or certification requirements may apply to units in this qualification in some states & territories at the time of publication and may differ according to jurisdiction.

Some imported units in the elective bank may be subject to licensing, legislative, regulatory, or certification requirements. These units must be implemented in line with the licensing requirements outlined in the unit's parent Training Package.

Entry Requirements

The entry requirement for this qualification is the successful achievement of the following units contained in FWP40416 Certificate IV Timber Truss and Frame Design, or demonstration of equivalent competence:

- FWPCOT4202 Design timber structures
- FWPTMM4201 Construct prototypes and samples
- MSAPMSUP390A Use structured problem solving tools
- CPCCBC4001A Apply building codes and standards to the construction process for low-rise building projects
- CPCSUS4001A Implement and monitor environmentally sustainable work practices

Plus at least one of the following units:

© Commonwealth of Australia, 2025 Skills Insight

- FWPTMM4205 Prepare and advise on a broad range of timber roof truss details using computers
- FWPTMM4206 Prepare and advise on a broad range of timber floor system
- FWPTMM4207 Prepare and advise on a broad range of timber wall frame details using computers.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 19 units of competency:
  - 5 core units plus
  - 14 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 5 units from Group A
- at least 6 units from Group B
- the remaining units from Group A and/or Group B, the total of which may include up to three units recommended for packaging at Certificate IV, Diploma or Advanced Diploma level from this or any other endorsed Training Package or state/territory accredited course.

Elective units must be relevant to work undertaken in the timber truss and frame industry.

Core Units

BSBCUS501	Manage quality customer service

FWP60116 Advanced Diploma of Forest Industry Sustainability

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 1.0.

Qualification Description

This qualification describes the skills and knowledge required to manage or lead innovative thinking and practice, collaboration and change management, as the forest and wood products industry responds to the challenges of carbon reduction, climate change and energy efficiency.

It caters for a range of employment pathways, which require skills in strategic planning, collaboration, systems thinking, project management and research and development.

Senior managers will focus on guiding and implementing projects and initiatives in a changing environment. Organisational leaders will emphasise greater thinking, planning and communication within partnerships, building the capacity to align with industries that stand to gain economic, social and environment benefits from using wood in products or processes.

A key focus of the qualification is the leadership and management of sustainable work and environmental practices and the sustainable use of resources. By building their capacity for innovative thinking, business leaders and managers will enable businesses to improve their competitiveness.

Vocational outcomes are available to organisational leaders; senior and general managers; forest, environmental or sustainability managers and planners; forestry, plantation and technical services managers; technical, value recovery and community liaison officers and forest auditors; designers.

Work involves the application of a significant range of theory, principles and complex techniques across a wide and often unpredictable variety of contexts involving both broad and highly technical job roles. Accountability and responsibility for self and others in achieving outcomes is involved.

This qualification is typically used to develop and integrate a breadth, depth and complexity of skills and knowledge for leading or managing highly specialised and technical work.

No licensing, legislative, regulatory, or certification requirements apply to units in this qualification at the time of publication.

Entry Requirements

There are no entry requirements

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
  - 2 core units plus
  - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

Core Units

FWPCOR6201	Manage sustainability in the workplace
FWPCOR6202	Implement practices to maximise value from wood residues

Elective Units

Sustainable Industry Practices

FWPCOT5201	Implement sustainable forestry practices
FWPCOT5202	Manage forestry information and interpretations programs
FWPCOT5205	Develop biohazard contingency plans
FWPCOT5206	Implement forestry chain of custody certification system
FWPCOT5207	Implement sustainability in the workplace
FWPCOT5209	Manage tree harvesting to minimise environmental impact
FWPCOT6202	Develop and manage a forestry chain of custody certification process
FWPCOT6204	Use carbon accounting to estimate emissions
FWPCOT6205	Prepare an enterprise carbon management report
FWPCOT6207	Develop forest management systems and processes

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT6210	Develop engineered wood products to meet energy efficient building design needs
FWPFGM5217	Promote plantations as a sustainable form of land use
FWPFGM5219	Undertake carbon stock sampling of forests and plantations
FWPFGM6201	Plan a biochar storage system for carbon capture and storage
FWPFGM6203	Manage sustainable tree inventory
MSS015022	Develop strategies for more sustainable use of resources
MSS015023	Design sustainable product or process

Leadership and Innovation

BSBINN501	Establish systems that support innovation
BSBINN502	Build and sustain an innovative work environment
BSBINN601	Lead and manage organisational change
BSBLDR803	Develop and cultivate collaborative partnerships and relationships
BSBMGT616	Develop and implement strategic plans
FWPCOT4208	Implement workplace sustainability practices
FWPCOT5207	Implement sustainability in the workplace
FWPCOT5208	Build and maintain community relationships
FWPCOT6201	Manage community engagement
FWPCOT6208	Manage innovative thinking and practice in the forest and wood products industry
FWPCOT6209	Manage forest and wood products industry research
FWPCOT8101	Lead forest and wood products industry innovative thinking and practice

© Commonwealth of Australia, 2025 Skills Insight

FWPCOT8102	Initiate and lead a forest and wood products industry innovation
MSS015023	Develop strategies for more sustainable use of resources

Administration and Business

BSBAUD501	Initiate a quality audit
BSBCMM402	Implement effective communication strategies
BSBCRT402	Collaborate in a creative process
BSBFIM501	Manage budgets and financial plans
BSBFIM801	Manage financial resources
BSBRES801	Initiate and lead applied research
BSBSUS501	Develop workplace policy and procedures for sustainability
ICTSUS804	Use ICT to improve sustainability outcomes
MSMENV672	Develop workplace policy and procedures for environmental sustainability
PSPPCY010	Manage policy implementation
PSPREG029	Manage and lead inspection and monitoring programs
TLIE4006	Collect, analyse and present workplace data and information

FWPCOT2205 Tail out materials

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPCOT2205B Tail out materials, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2 This is the first release of this unit in the new standards format.

Application

This unit of competency specifies the outcomes required to clear sawn or machined materials and waste from a saw or machine while maintaining process flow and checking and sorting the finished product.

The unit applies to Timber Puller.

No licensing or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Timber Merchandising

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for cutting or	1.1 Review work order and identify required finished board sizes

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
machining process	and quantities in line with operator. 1.2 Prepare to work safely according to workplace work health and safety (WHS) requirements. 1.3 Check sequence of cuts or machining passes with operator and work order, where multiple cuts are required.
2. Maintain process flow.	2.1 Control flitch, cant or board to maintain process flow in line with sawing or dressing speed, WHS requirements and production standards. 2.2 Control and regularly clear sawn waste and material in line with site procedures and environmental requirements. 2.3 Assess flitch, cant or board for further processing requirements and return to operator in line with production standards. 2.4 Identify and report problems in flow or processing of materials to operator for resolution. 2.5 Dispose of faulty or defective material in line with site procedures and environmental requirements, as directed by operator.
3. Sort finished product and follow record-keeping procedures.	3.1 Sort and stack boards in line with site procedures and specific operational requirements. 3.2 Assess boards for standard sizes in line with site procedures. 3.3 Segregate and store or direct recoverable material and waste for further processing in line with site procedures. 3.4 Record and report production and quality information in line with site procedures and organisational requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• estimate and evaluate size of tail out materials • sort finished material into required grades by visually estimating them or using a measuring tool.
Oral communication skills to:	• communicate effectively with relevant personnel to ensure safety and production requirements are met • ask questions to clarify and confirm information.

© Commonwealth of Australia, 2025 Skills Insight

Writing skills to:	• complete production records, quality records, tally sheets and maintenance records.
Reading skills to:	• read charts for stress grading and standard timber profiles and cross sections • read workplace safety and operating procedures related to tailing material.
Planning and organising skills to:	• follow manual handling procedures • implement waste minimisation and disposal, recycling and re-use guidelines.
Initiative skills to:	• apply fatigue management strategies.
Technology skills to:	• use plant, tools and equipment.

Assessment Requirements for FWPCOT2205 Tail out materials

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2205B Tail out materials, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to tailing out materials
- tail out material while maintaining process flow according to safe work procedure
- identify and respond to processing faults according to workplace requirements and organisational policy
- sort finished material according to safe work procedure
- dispose of waste material according to environmental protection requirements
- follow record keeping procedures for recording quality and production requirements.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures for tailing out materials:
  - standard operating procedure (SOP)
  - personal protective equipment (PPE) requirements
  - procedures for safely disposing of waste material in an environmentally sustainable manner
- methods of controlling materials including:
  - material movement
  - position of the material being sawn or dressed

© Commonwealth of Australia, 2025 Skills Insight

    - avoiding contact with tail of saw or cutter
    - removing waste
- common work area and environmental hazards and risks and how to control them
- tailing out processes and procedures
- common industry terminology
- criteria for recycling and re-using material with faults or defects
- industry standard cross-section and length dimensions and tolerances
- established communication channels and protocols used to ensure safety and productivity
- flow or control problems including
    - speed of production
    - flow of product
    - sharpness of blades or cutters
    - quality of materials
    - communication
    - housekeeping
    - burn marks
    - rough finish
    - tear out
    - machine marks
    - irregular size of finished product
- types of tools and equipment, and procedures for their safe use, operation and maintenance
- mathematical procedures used to calculate timber size and dimension
- procedures for recording and reporting quality and production requirements.
-

Assessment Conditions

- specifications and work instructions

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2207 Dress boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2207B Dress boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit describes the outcomes required to prepare and dress boards and timber. The unit includes evaluating and monitoring dressing conditions and processes; and setting, adjusting and maintaining equipment. Work is completed in a forest products factory setting.

The unit applies to Sawmill Worker, Production Worker, Timber Products Worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for dressing process	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify sizes and quantities for dressed boards and obtain material for dressing. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Plan sequence of machining operations in line with work order and to suit multiple passes.
2. Dress boards and timber	2.1 Identify defective boards prior to dressing and dispose of or recycle in line with environmental protection practices. 2.2 Follow lock out procedures and adjust guides, conveyors, speeds and feeds to suit dimensions and grade outcomes. 2.3 Use equipment in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.4 Adjust guides, conveyors, speeds and feeds to suit dimensions and grade outcomes, and select cutting sequence. 2.5 Maintain feed rate appropriate to timber condition and board size. 2.6 Regularly tally dressed boards against work orders. 2.7 Clear work area regularly in line with organisational safety procedures.
3. Assess conditions and maintain optimum dressing processes	3.1 Assess dressing conditions regularly to ensure continuity of supply and processing. 3.2 Adjust conditions to optimise feed rate and maintain finished dimensions in line with work order. 3.3 Evaluate finish regularly and make adjustments to ensure product quality. 3.4 Measure dressed board dimensions and profiles regularly and record in line with organisational procedures. 3.5 Identify routine processing and equipment faults and resolve or report to appropriate personnel. 3.6 Complete production and quality records and report in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check cutters and saw blades for bluntness or damage. 4.3 Remove and replace cutters and blades in line with manufacturer's recommendations. 4.4 Dispose of used blades in line with organisational procedures and environmental protection practices. 4.5 Complete basic non-specialist maintenance for equipment. 4.6 Record and report equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and count raw materials • interpret order sizes and set up equipment to achieve correct dimensions and grades • calculate the feed rate to optimise quality and quantity of production output • measure finished dimensions and profiles with accuracy appropriate to tolerances • complete routine production records involving dimensions, profiles and quantities tallied against orders.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify and dispose of defective materials • recognise faulty equipment and resolve by reporting or rectifying.
Technology skills to:	• select, use and maintain appropriate machinery, tools and personal protective equipment used for dressing boards and timber.

Assessment Requirements for FWPCOT2207 Dress boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2207B Dress boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organisational policies and procedures relevant to dressing boards and timber
- communicating and working safely with others in the work area

preparing for, evaluating and maintaining dressing processes and conditions

- setting, adjusting, and operating equipment to suit required dimensions, cutting sequence, feed rates and finish
- complete these types of basic non-specialist maintenance:
- cleaning the machine of wood chips and sawdust
- replacing blunt cutters or saw blades
- inspecting machine parts for wear or damage, including guards
- greasing and lubricating moving parts
- checking the operation of emergency stop buttons and lock out systems.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment

© Commonwealth of Australia, 2025 Skills Insight

    - disposing of, recycling and reusing timber
- typical timber defects and how these affect ability to produce a quality finished product:
    - warp
    - wane
    - cupping
    - shakes
    - insect defects
    - knots
    - resin pockets
- typical dressing problems triggering adjustment of process to ensure product quality:
    - blunt or damaged cutters
    - burn marks
    - extra cuts
    - excessive cutter marks
    - dimensional errors
- range of industry standard profiles, lengths, cross sections and tolerances and applicable terminology
- types of tools and equipment used for dressing boards; their purpose, features, operation and basic non-specialist repair and maintenance:
    - moulder
    - jointer/buzzer or thicknesser
    - machine incorporating splitting saw
    - planing machine
    - moulding machine
- problems that can occur when dressing boards and timbers, including:
    - equipment faults and malfunctions
    - quality of product and machine settings
    - efficient rejection prior to dressing of boards that do not meet processing requirements
    - transfer and flow of material
    - dressing problems
    - feed rate
    - product finish
- methods for assessing cutters and saw blade condition
- organisational procedures specific to dressing boards and timber:
    - workplace health and safety with particular emphasis on equipment lock out
    - use and maintenance of equipment
    - communication reporting lines
    - recording and reporting production outcomes and equipment faults.
    -

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

The following resources must be made available:

- tools and equipment used to dress boards and timber:
  - moulder
  - jointer/buzzer or thicknesser
  - machine incorporating splitting saw
  - planing machine
  - moulding machine
- maintenance tools and equipment
- consumable components; cutters, saw blades
- personal protective equipment suitable for dressing boards and timber
- a diverse, comprehensive and commercial product range of timber boards
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific details of:
  - material to be dressed
  - special client requirements
  - production timelines
- template documents for recording production outcomes and equipment faults
- organisational procedures for dressing boards and timber
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2208 Resaw boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2208B Resaw boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan and produce boards by resawing larger boards. Work is completed in a forest products factory setting and includes adjusting and maintaining sawing equipment.

The unit applies to Saw Operators, Sawyers, Benchmen, and Wood Machinists

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical; applies across sectors

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for operation	1.1 Review work order and where required check with appropriate personnel. 1.2 Identify sizes and quantities for resawn boards and obtain material for resawing. 1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.4 Plan sequence of machining operations in line with work order and to suit multiple cuts.
2. Produce Boards	2.1 Follow lock out procedures and adjust saws, carriage, speeds and feeds to suit types of boards and timber, dimensions, and cutting sequence. 2.2 Use equipment in line with organisational safety procedures, manufacturer’s instructions environmental protection practices. 2.3 Select and follow cutting sequence to produce required quantity. 2.4 Maintain feed rate appropriate to timber condition and board size. 2.5 Regularly tally resawn boards and timber against work orders. 2.6 Clear work area regularly in line with in line with organisational safety procedures. 2.7 Identify damaged sawn material and dispose of or recycle in line with environmental protection practices.
3. Assess conditions and maintain optimum sawing processes	3.1 Assess sawing conditions regularly to determine optimal feed rate and finish. 3.2 Adjust sawing feed rate to achieve finished dimensions in line with work order. 3.3 Evaluate finish regularly and make adjustments to maximise product quality. 3.4 Regularly measure cross section dimensions of sawn boards against standard sizes and tolerances and adjust sawing process. 3.5 Identify routine processing and equipment faults and resolve or report to appropriate personnel. 3.6 Complete production and quality records and report in line with organisational procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check cutters and saw blades for bluntness or damage. 4.3 Remove and replace cutters and blades in line with manufacturer's recommendations. 4.4 Dispose of used blades in line with organisational procedures and environmental protection practices. 4.5 Complete basic non-specialist maintenance for equipment. 4.6 Record and report equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and count raw materials • interpret order sizes and set up equipment to achieve correct dimensions • calculate the feed rate to optimise quality and quantity of production output • accurately measure cross section dimensions of sawn boards against standard sizes and tolerances • complete routine production records involving dimensions and quantities tallied against orders.
Oral communication skills to:	• ask open and closed probe questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment faults.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.

© Commonwealth of Australia, 2025 Skills Insight

Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify and dispose of damaged sawn material • recognise faulty equipment and resolve by reporting or rectifying.

Assessment Requirements for FWPCOT2208 Resaw boards and timber

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2208B Resaw boards and timber, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete resawing jobs, in line with an individual work order for each job, on one or more of these types of timber:
  - softwood
  - hardwood
  - treated
  - untreated
  - laminated boards
- across the above jobs, complete these processes:
  - resawing larger boards, recovering boards from one edge at each pass
  - splitting a larger board into two or more sections
- complete these types of basic non-specialist maintenance:
  - cleaning the machine of wood chips and sawdust
  - replacing blunt cutters or saw blades
  - inspecting machine parts for wear or damage, including guards
  - greasing and lubricating moving parts
  - checking the operation of emergency stop buttons and lock out systems.
  -

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber including:
    - recycling damaged sawn material
    - re-using damaged sawn material
    - redirecting damaged sawn material for energy recovery
- range of industry standard lengths, cross sections and tolerances and applicable terminology
- typical cutting patterns
- machines and equipment used for resawing boards and timber; their purpose, features, operation and basic non-specialist repair and maintenance:
  - simple table saws
  - complex saw and conveyor systems
  - circular or band saws
  - single or multiple saws
- methods for assessing cutters and saw blade condition
- problems that may occur during sawing operations including:
  - equipment faults and malfunctions
  - quality of product and machine settings
  - transfer and flow of material
  - routine sawing problems
  - feed rate and product finish
  - infeed and outfeed systems
  - damage to sawn board
  - damage to saw blade
  - timber positioning
- organisational procedures specific to resawing boards and timber:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- one or more of the following tools and equipment used to resaw boards and timber:
  - simple saw benches

© Commonwealth of Australia, 2025 Skills Insight

  - complex saw and conveyor systems
  - circular or band saws
  - single or multiple saws
- tools and equipment for operator maintenance of saws
- consumable components; cutters, saw blades
- personal protective equipment suitable for resawing boards and timber
- a diverse, comprehensive and commercial product range of board and timber
- manufacturers':
  - instructions for equipment use
  - recommendations for cleaning, repairing and maintaining
- work order with specific details of:
  - material to be resawn
  - special client requirements
  - production timelines
- template documents for recording production outcomes and equipment faults
- organisational procedures for resawing boards and timber.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2212 Grade hardwood sawn and milled products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2212B Grade hardwood sawn and milled products, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to visually evaluate hardwood sawn and milled product characteristics for classification into various strength and appearance grades. It includes sorting hardwood into classifications and marking material in line with grade type.

The unit applies to those who grade hardwood sawn and milled products in a forest products factory setting.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare for grading	1.1 Review work order to grade hardwood sawn and milled products and clarify with appropriate personnel. 1.2 Obtain type and quantity of sawn and milled products to be graded from storage locations. 1.3 Select equipment appropriate to work order and check for operational effectiveness. 1.4 Plan grading process in line with site procedures. 1.5 Establish and maintain communication with others at site to ensure safety.
2. Grade products	2.1 Visually assess size of sawn and milled products in line with industry standards and number of ranges estimated. 2.2 Evaluate material characteristics of each product are evaluated against industry standards for grade type. 2.3 Measure moisture content and evaluate against standards and seasoning requirements. 2.4 Mark characteristics for docking. 2.5 Sort material in line with its grade classification and clearly mark with markers or stickers. 2.6 Reject and dispose of sub-standard material in line with site requirements. 2.7 Record and report grading outcomes and distribution problems to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Writing skills to	• accurately compile and complete grading reports.
Numeracy skills to:	• accurately identify if length of product meets industry standard for cross section • measure moisture content using a moisture meter • calibrate equipment.

Assessment Requirements for FWPCOT2212 Grade hardwood sawn and milled products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2212B Grade hardwood sawn and milled products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare for and grade a full range of hardwood sawn and milled products in readiness for storage or processing
- follow work order for grading hardwood sawn and milled products
- work safely and communicate effectively with others at work site
- identify characteristics and defects in hardwood sawn and milled products and mark for sorting
- follow organisational policies and procedures, standards and codes of practice for grading hardwood sawn and milled products
- record and report grading activity.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for grading hardwood sawn and milled products
- organisational and site standards, policies and procedures for grading hardwood sawn and milled products
- environmental risks and hazards associated with grading timber
- criteria for recycling and re-using and redirecting sub-standard material for other use
- methods of visual estimation, grading, colour identification and tagging

© Commonwealth of Australia, 2025 Skills Insight

- sorting, marking and distribution processes
- industry standard cross sections and lengths
- storage systems, including locations and labelling procedures
- established communication channels and protocols
- problem identification and resolution strategies, and common fault finding techniques
- typical tools and equipment used for grading timber, along with their safe operation and maintenance
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- hardwood sawn and milled products for grading
- measuring equipment
- moisture meters
- lifting equipment for the movement of sawn and milled products
- work order, workplace requirements and site standards for grading hardwood sawn and milled products
- personal protective equipment suitable for grading hardwood sawn and milled products.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare for and grade a full range of softwood sawn and milled products in readiness for storage or processing
- follow work order for grading softwood sawn and milled products
- work safely and communicate effectively with others at work site
- identify characteristics and defects in softwood sawn and milled products and mark for sorting
- follow organisational policies and procedures, standards and codes of practice for grading softwood sawn and milled products
- record and report grading activity.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for grading softwood sawn and milled products
- organisational and site standards, policies and procedures for grading softwood sawn and milled products
- environmental risks and hazards associated with grading timber
- criteria for recycling and re-using sub-standard material
- methods of visual estimation, grading, colour identification and tagging

© Commonwealth of Australia, 2025 Skills Insight

- sorting, marking and distribution processes
- industry standard cross sections and lengths
- storage systems, locations and labelling procedures
- established communication channels and protocols
- problem identification and resolution strategies, and common fault finding techniques
- typical tools and equipment used for grading timber, along with their safe operation and maintenance
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- softwood sawn and milled products for grading
- measuring equipment moisture meters
- personal protective equipment suitable for grading softwood sawn and milled products
- lifting equipment for the movement of sawn and milled products
- work order, workplace requirements and site standards for grading softwood sawn and milled products
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT2214 Grade cypress sawn and milled products

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2214B Grade cypress sawn and milled products, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to visually evaluate cypress sawn and milled product characteristics for classification into various strength and appearance grades. It includes sorting cypress into classifications and marking material in line with grade type.

The unit applies to those who grade cypress sawn and milled products.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for grading	1.1 Review work order for grading cypress sawn and milled products

© Commonwealth of Australia, 2025 Skills Insight

ELEMENTS	PERFORMANCE CRITERIA
	and clarify with appropriate personnel. 1.2 Obtain type and quantity of sawn and milled product to be graded from storage location. 1.3 Select equipment appropriate to work order and check for operational effectiveness in line with manufacturer recommendations. 1.4 Plan grading process in line with site procedures. 1.5 Establish and maintain communication with others at site to ensure safety.
2. Grade products	2.1 Visually assess size of sawn and milled products in line with industry standards and number of ranges estimated. 2.2 Evaluate material characteristics of each product are evaluated against industry standards for grade type. 2.3 Measure moisture content and evaluate against standards and seasoning requirements. 2.4 Mark characteristics for docking. 2.5 Sort material in line with its grade classification and clearly mark with markers or stickers. 2.6 Reject and dispose of sub-standard material in line with site requirements. 2.7 Record and report grading outcomes and distribution problems to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Writing skills to	• accurately compile and complete grading reports.
Numeracy skills to:	• accurately identify if length of product meets industry standard for cross section • measure moisture content using a moisture meter • calibrate equipment.

Assessment Requirements for FWPCOT2214 Grade cypress sawn and milled products

Modification History

Release	Comment
1	Replaces equivalent unit FWPCOT2214B Grade cypress sawn and milled products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare for and grade cypress sawn and milled products in readiness for storage or processing
- follow work order for grading cypress sawn and milled products
- work safely and communicate effectively with others at work site
- identify characteristics and defects in cypress sawn and milled products and mark for sorting
- follow organisational policies and procedures, standards and codes of practice for grading cypress sawn and milled products
- record and report grading activity.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for grading cypress sawn and milled products
- organisational and site standards, policies and procedures for grading cypress sawn and milled products
- environmental risks and hazards associated with grading timber
- criteria for recycling re-using or redirecting sub-standard material to other uses

© Commonwealth of Australia, 2025 Skills Insight

- methods of visual estimation, grading, colour identification and tagging
- sorting, marking and distribution processes
- industry standard cross sections and lengths
- storage systems and labelling procedures:
  - storage racks
  - storage bays
  - bins
  - stacks
  - pallet boxes
  - modularised storage components
  - temporary stacking bays (stand, frame or ground)

and divided into one or more of the following:

  - standard product classification
  - product designation
  - size
  - dimension
  - stack number
  - weight
  - grade
  - shelf life
  - stock rotation position
- characteristics of cypress sawn and milled products:
  - warp
  - wane
  - curvature
  - shakes
  - insect defects
  - knots
  - resin pockets
- established communication channels and protocols
- problem identification and resolution strategies, and common fault finding techniques
- typical tools and equipment used for grading timber, along with their safe operation and maintenance
- procedures for recording and reporting workplace information.
-

Assessment Conditions

The following resources must be made available:

- cypress sawn and milled products for grading

© Commonwealth of Australia, 2025 Skills Insight

- measuring equipment
- moisture meters
- lifting equipment for the movement of sawn and milled products
- work order, workplace requirements and site standards for cypress sawn and milled products
- personal protective equipment suitable for grading cypress sawn and milled products
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2243 Tail out timber product and waste material

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to safely clear timber product and waste material as they emerge from a sawing or machining operation.

The unit applies to individuals who carry out tailing out functions in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for timber sawing or machining operation	1.1 Review work order and identify required finished timber sizes and quantities with the operator 1.2 Check sequence of cuts or machining passes with operator and work order when multiple cuts are required

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.4 Identify, assess and take actions to mitigate risks and hazards associated with tailing out timber products and waste material 1.5 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency
2. Maintain the process workflow	2.1 Clear timber product to maintain the process workflow according to sawing or machining speed, workplace safety requirements and production plans 2.2 Clear sawn waste regularly according to workplace procedures and environmental requirements 2.3 Assess timber product against product standards and, when necessary, return to the operator for further processing 2.4 Identify and report problems in workflow or processing of timber product to the operator for resolution 2.5 Dispose of faulty or defective timber product according to workplace procedures and environmental requirements
3. Sort finished timber product and complete work records	3.1 Assess finished timber product for standard sizes according to workplace procedures 3.2 Sort and stack finished timber product according to workplace procedures and specific operational requirements 3.3 Segregate and store, or direct, recoverable timber product and waste for further processing according to workplace procedures 3.4 Record and report production and timber product quality information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Reads workplace health and safety and environment policies to identify procedures for clearing sawn waste from work area
Writing	• Completes basic written production reports and tally sheets
Oral communication	• Responds to oral questions on routine matters related to output quality
Numeracy	• Uses basic arithmetic skills to determine quantity and dimensions of tail out materials • Uses standard units of measure to determine dimensions of finished product • Interprets charts and graphical information to gather data on stress-grading and standard timber profiles and cross-sections
Interact with others	• Participates in conversations to inform maintenance staff about equipment faults
Get the work done	• Identifies and responds to routine problems

Assessment Requirements for FWPCOT2243 Tail out timber product and waste material

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- safely cleared sawn or machined timber product and waste from a saw or machine while maintaining process flow
- in doing the above job, the individual has:
  - identified work requirements in conjunction with the machine operator
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - checked, sorted and stacked the finished product
  - disposed of waste material
  - completed production reports.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety procedures for tailing out timber products:
  - standard operating procedure
  - personal protective equipment (PPE) requirements
  - procedures for safely disposing of waste material in an environmentally sustainable manner
- methods of controlling timber product:
  - timber product movement
  - position of the timber product being sawn or dressed
  - avoiding contact with saw or cutter
  - removing waste

© Commonwealth of Australia, 2025 Skills Insight

- common work area and environmental hazards, risks and control techniques
- tailing out terminology, processes and procedures
- criteria for recycling and reusing material with faults or defects
- industry standard cross-section and length dimensions and tolerances
- communication channels and protocols used to ensure safety and productivity
- flow or control problems:
  - speed of production
  - flow of product
  - sharpness of blades or cutters
  - quality of materials
  - communication
  - housekeeping
  - burn marks
  - rough finish
  - tear out
  - machine marks
  - irregular size of the finished product
- mathematical procedures used to calculate timber size and dimension
- procedures for recording and reporting quality and production requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
  - timber cutting or machining equipment used in a timber processing or manufacturing facility
  - PPE suitable for tailing out timber product and waste material
  - one or more of the following types of sawn or machined timber product for tailing out: flitches, cants, timber boards, other timber products
- specifications:
  - access to template documents for recording production outcomes
  - access to work order detailing required finished timber product sizes and production timelines
  - access to written workplace procedures for tailing out.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2244 Operate and maintain a thicknesser

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to operate and maintain a thicknesser to dress timber.

The unit applies to individuals who operate timber dressing equipment in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for dressing process	1.1 Review work order and seek clarification from appropriate personnel as required 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with operating a thicknesser 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Check input timber to ensure supply and quality meets specification 1.6 Prepare timber supplies for dressing operation to sustain production requirements 1.7 Plan sequence of machining operations that suit multiple passes according to work order
2. Operate thicknesser to dress timber	2.1 Identify defective timber before dressing, and dispose of or recycle according to environmental protection practices 2.2 Select cutting sequence 2.3 Follow lock-out procedures and set guides, conveyors, speeds and feeds to suit required dimensions, cutting sequence, feed rates and finish 2.4 Operate thicknesser according to workplace safety procedures, manufacturer instructions and environmental protection practices 2.5 Maintain feed rate appropriate to timber condition and board size 2.6 Regularly tally dressed timber against work orders 2.7 Clear work area regularly according to workplace safety procedures
3. Assess dressing conditions and maintain optimum dressing processes	3.1 Assess dressing conditions regularly to ensure continuity of supply and processing 3.2 Adjust conditions to optimise feed rate and maintain finished dimensions according to work order 3.3 Evaluate finish regularly and adjust equipment to ensure product quality 3.4 Measure and record dressed board dimensions regularly according to workplace procedures 3.5 Identify and respond to routine processing and equipment faults according to workplace procedures 3.6 Record and report production outcomes according to workplace

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	procedures
4. Complete operator maintenance	4.1 Lock out equipment according to manufacturer instructions and workplace safety procedures 4.2 Check cutters for bluntness or damage 4.3 Remove and replace cutters according to manufacturer instructions 4.4 Dispose of used cutters according to the workplace and environmental protection procedures 4.5 Complete basic routine maintenance of equipment according to manufacturer instructions and workplace requirements 4.6 Record and report equipment faults and maintenance according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Responds to oral questions on routine matters related to output quality
Numeracy	• Performs routine arithmetic calculations to establish material quantities required for production • Identifies standard measurement units for speed and dimension used in manufacturer specifications • Recognises standard measures used in describing feed rate
Interact with others	• Participates in conversations to inform maintenance staff about equipment faults
Get the work done	• Identifies and responds to routine problems • Plans and organises own work activities and resources

Assessment Requirements for FWPCOT2244 Operate and maintain a thicknesser

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- set up, adjusted and operated a thicknesser to dress timber according to required dimensions, cutting sequence, feed rates and finish
- in doing the above job, the individual has:
  - reviewed work order to determine job requirements
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - selected equipment and materials according to job requirements
  - planned the sequence of machine operations
  - identified and disposed of defective timber before processing
  - complied with workplace health and safety procedures relevant to dressing timber
  - assessed dressing conditions
  - adjusted conditions to optimise feed rate and maintain finished dimensions
  - completed basic routine equipment maintenance
  - completed production and maintenance reports.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- typical timber defects and potential impact on the quality of dressed timber product:
  - warp
  - wane
  - cupping
  - shakes

© Commonwealth of Australia, 2025 Skills Insight

    - insect defects
    - knots
    - resin pockets
- typical dressing problems triggering adjustment of process to ensure product quality:
    - blunt or damaged cutters
    - burn marks
    - extra cuts
    - excessive cutter marks
    - dimensional errors
- industry standards and terminology for timber profiles, lengths, cross-sections and tolerances
- types, purpose, features, operational procedures, components and basic maintenance requirements of thicknessers
- problems that can occur when dressing timber:
    - equipment faults and malfunctions
    - quality of product and machine settings
    - efficient rejection of defective timber before dressing
    - transfer and flow of material
    - dressing problems
    - feed rate
    - product finish
- methods for assessing cutters condition
- types of risk and hazards and mitigation measures associated with dressing timber
- workplace procedures specific to dressing timber:
    - workplace health and safety requirements, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
    - selection, use and maintenance of equipment
    - communication reporting lines
    - recording and reporting production outcomes and equipment faults
- environmental protection practices for timber processing or manufacturing facilities:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing timber.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately reflects workplace conditions
- resources, equipment and materials:

© Commonwealth of Australia, 2025 Skills Insight

  - thicknesser
  - maintenance tools and equipment
  - consumable components of thicknesser
  - PPE suitable for dressing timber
  - a diverse, comprehensive and commercial range of timber
- specifications:
  - template documents for recording production outcomes and equipment faults
  - manufacturer specifications and instructions for thicknesser
  - work order detailing material to be dressed, special client requirements and production timelines
  - written workplace procedures for operating and maintaining thicknesser.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2245 Operate and maintain a table saw

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to use a table saw to produce sawn timber by re-sawing larger timber. This activity includes assessing sawing conditions and adjusting feed rate and sawing equipment to maximise product quality.

The unit applies to individuals who re-saw timber in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for operation	1.1 Review work order and cutting pattern and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
maintenance	procedures 4.2 Check saw blades for bluntness or damage 4.3 Remove and replace blades according to manufacturer recommendations 4.4 Dispose of used blades according to workplace procedures and environmental protection practices 4.5 Complete basic non-specialist maintenance of equipment 4.6 Record and report equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identifies quantities of required material within work orders, and counts raw materials • Calculates the feed rate to optimise the quality and quantity of production output • Accurately measures cross-section dimensions of sawn timber against standard sizes and tolerances • Completes routine production records involving dimensions and quantities tallied against orders
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT2245 Operate and maintain a table saw

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- operated a table saw to re-saw timber
- in doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - assessed sawing conditions to determine optimal feed rate and finish
  - adjusted sawing feed rate to achieve finished dimensions according to work order
  - evaluated finish and made adjustments to the sawing process to maximise product quality
  - measured cross-section dimensions of sawn timber against standard sizes and tolerances, and adjusted sawing process
  - completed basic non-specialist maintenance tasks
  - completed production and quality records for the job.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- range of industry standard lengths for sawn timber, cross-sections and tolerances and applicable terminology
- typical cutting patterns
- types, purpose, features, operation and basic non-specialist repair and maintenance of table saws
- methods for assessing saw blade condition
- problems that may occur during sawing operations, including:
  - equipment faults and malfunctions

© Commonwealth of Australia, 2025 Skills Insight

  - quality of product and machine settings
  - transfer and flow of material
  - routine sawing problems
  - feed rate and product finish
  - infeed and outfeed systems
  - damage to sawn board
  - damage to saw blade
  - timber positioning
- types of risk and hazards and mitigation measures associated with operating and maintaining table saws
- workplace procedures specific to operating and maintaining table saws:
  - workplace health and safety, with particular emphasis on equipment lock-out, the use of personal protective equipment and safe manual handling techniques
  - use and maintenance of equipment
  - communication reporting lines
- recording and reporting of production outcomes and equipment faults
- environmental protection practices for forest products factory settings:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - table saw
  - tools and equipment for operator maintenance of saws
  - consumable components
  - PPE suitable for operating and maintaining a table saw
  - a diverse, comprehensive and commercial product range of timber
- specifications:
  - template documents for recording production outcomes and equipment faults
  - manufacturer instructions for use, repair and maintenance of table saw
  - work order with specific details of material to be re-sawn and production timeline
  - workplace procedures for operating and maintaining table saws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2246 Appearance grade hardwood sawn and milled products

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to visually assess hardwood sawn and milled products for classification into various appearance grades.

The unit applies to individuals who grade hardwood sawn and milled products in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPCOT2247 Appearance grade softwood sawn and milled products

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- appearance graded softwood sawn products
- appearance graded softwood milled products.

For each of the above jobs, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- visually assessed and evaluated the characteristics of the product against industry standards for grading softwood sawn and milled products
- measured and evaluated moisture content against standards and seasoning requirements
- marked, sorted and labelled product according to the correct grade classification
- recorded and reported grading activity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry standards and safe practices for grading softwood sawn and milled products
- risks and hazards associated with timber grading
- workplace procedures for grading softwood sawn and milled products:
  - health and safety, with particular emphasis on equipment lock-out and the use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting grading outcomes
- criteria for recycling and reusing sub-standard material
- methods of visual estimation, grading, colour identification and tagging

© Commonwealth of Australia, 2025 Skills Insight

- industry softwood visual grading standards
- visual grading rules for appearance
- visual grading rules for strength
- timber characteristics to be checked
- sorting, marking and distribution processes
- industry standard for cross-sections and lengths
- storage systems, locations and labelling procedures
- problem identification and resolution strategies, and common fault-finding techniques
- types, safe operation and maintenance of tools and equipment used for grading operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - softwood sawn and milled products for grading
  - measuring equipment
  - moisture meters
  - PPE suitable for grading softwood sawn and milled products
  - lifting equipment for the movement of sawn and milled products
- specifications:
  - templates for recording timber grading activities
  - work order detailing materials to be graded
  - workplace standards for grading softwood sawn and milled products.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Responds to verbal questions on matters related to grading decisions and reuse or recycling of rejected materials
Numeracy	• Compares length of product with industry standard for cross-section • Measures moisture content using a moisture meter • Calibrates measuring equipment
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Conducts conversations relevant to the role by explaining and responding to questions • Uses non-verbal modes of communication to convey information related to grading operations
Get the work done	• Uses problem-solving skills to analyse product and process faults and decide on appropriate action

Assessment Requirements for FWPCOT2248 Appearance grade cypress sawn and milled products

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- appearance graded cypress sawn products
- appearance graded cypress milled products.

For each of the above jobs, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- identified characteristics and defects in cypress sawn and milled products and marked for sorting
- followed workplace procedures, standards and codes of practice for grading cypress sawn and milled products.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, standards, policies and procedures for grading cypress sawn and milled products, including:
  - health and safety, with particular emphasis on equipment lock-out and the use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- risks and hazards associated with grading timber
- criteria for recycling reusing or redirecting sub-standard material to other uses
- methods of visual estimation, grading, colour identification and tagging
- sorting, marking and distribution processes

© Commonwealth of Australia, 2025 Skills Insight

- industry standard cross-sections and lengths
- storage systems and labelling procedures
- storage classifications
- timber characteristics and defects of cypress sawn and milled products to be checked:
  - warp
  - wane
  - curvature
  - shakes
  - insect defects
  - knots
  - resin pockets
- communication channels and protocols
- problem identification and resolution strategies, and common fault-finding techniques
- typical tools and equipment used for grading timber, along with their safe operation and maintenance
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - cypress sawn and milled products for grading
  - measuring equipment
  - moisture meters
  - lifting equipment for the movement of sawn and milled products
  - PPE suitable for grading cypress sawn and milled products
- specifications:
  - templates for recording timber grading activities
  - work order detailing materials to be graded
  - workplace standards for grading cypress sawn and milled products.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2249 Visually stress grade hardwood

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to visually stress grade hardwood for strength against set classifications detailed in Australian Standard AS2082 as a minimum standard.

The unit applies to those who visually stress grade hardwood in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for stress-grading	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has visually stress graded hardwood and has:

- prepared for visual stress-grading of hardwood
- evaluated and visually stress graded hardwood in readiness for processing or storage
- followed work order and relevant workplace health and safety and environmental protection procedures
- accurately identified characteristics and defects in hardwood
- accurately interpreted grading standards and specifications
- communicated effectively with others at workplace
- followed workplace procedures, standards and codes of practice for visually stress-grading hardwood
- recorded and reported grading activity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, standards, codes of practice and established safe practices for visually stress-grading hardwood
- workplace standards, policies and procedures for visually stress-grading hardwood
- risks and hazards associated with grading timber
- criteria for recycling and reusing sub-standard material
- visual stress-grading techniques and methods
- grading markings and standards
- characteristics and properties of hardwood
- structural grade of hardwood

Assessment Requirements for FWPCOT2251 Visually stress grade cypress

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has visually stress graded cypress, and has:

- prepared for visually stress-grading cypress
- followed work order and relevant workplace health and safety and environmental protection procedures
- evaluated and visually stress graded cypress in readiness for processing or storage
- accurately identified characteristics and defects in cypress
- accurately interpreted grading standards and specifications
- worked safely and communicated effectively with others at the work site
- followed workplace policies and procedures, standards and codes of practice for visually stress-grading cypress
- recorded and reported grading activity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, standards, codes of practice and established safe practices for visually stress-grading cypress, including Australian Standard AS2858
- workplace standards, policies and procedures for visually stress-grading cypress
- risks and hazards associated with grading timber
- grading markings and standards
- characteristics and properties of cypress
- visual stress-grading techniques and methods
- structural grade: structural conformity of the timber, consistency of the structural quality, and defects that may weaken strength, including knots, shakes and short grain

© Commonwealth of Australia, 2025 Skills Insight

- appearance of contamination, surface characteristics and grain pattern
- criteria for recycling and reusing sub-standard material
- recycling timber with inappropriate defects or contamination
- reusing timber with inappropriate defects or contamination
- redirecting timber with inappropriate defects or contamination for energy recovery
- storage systems and labelling procedures
- workplace communication channels and protocols
- procedures for recording and reporting workplace information
- strategies for identifying and resolving problems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - cypress for visual stress-grading
  - work order, workplace requirements and site standards for visually stress-grading cypress
  - vernier callipers
  - moisture meters (resistance and/or capacitance)
  - tapes
  - marking implements
  - personal protective equipment required for visually stress-grading cypress
- specifications:
  - work order with specific instructions for visually stress-grading cypress
  - workplace procedures for visually stress-grading cypress
  - regulations, standards, codes of practice and established safe practices, including Australian Standard AS2858.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2252 Band edges of panels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and maintain edge banding machines that use automated processes to apply and finish edge treatments.

The unit applies to individuals who operate equipment and apply edge banding to timber panels in a forest and forest product factory setting.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for edge banding	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	associated with banding edges of panels 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Identify type and quantity of panels to be edge-banded, and obtain panels 1.6 Select appropriate tools and equipment, and check for operational effectiveness according to manufacturer recommendations 1.7 Select edge banding process according to work order
2. Set up edge banding equipment	2.1 Follow lock-out procedures, set machine to suit material to be edged and adjust as required 2.2 Use equipment according to workplace safety procedures, manufacturer instructions and environmental protection practices 2.3 Conduct test runs to check machine operation, accuracy and quality of finished work and make adjustments to machine settings 2.4 Use suitable tested materials for processing, or reject and dispose of according to environmental protection practices
3. Apply edging	3.1 Feed panels into machine according to manufacturer instructions and safety procedures 3.2 Monitor machine operations to ensure product quality and output 3.3 Minimise waste by checking trim distances for cut off on each panel 3.4 Assess condition of panels and repair, recycle, reuse or dispose of sub-standard panels according to environmental protection practices 3.5 Identify routine processing and equipment faults, and resolve or report to appropriate personnel 3.6 Complete production and quality records and report according to procedures
4. Complete operator maintenance	4.1 Follow workplace safety procedures to lock out equipment 4.2 Check edging mechanisms for bluntness and build-up of glue, and rectify 4.3 Check and reload edge treatments according to manufacturer recommendations 4.4 Clear dust and debris from machine area

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.5 Record and report equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts key information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Identifies quantities of required material within work orders, and counts raw materials • Reads basic numerical machine settings, and chooses according to panel dimensions • Performs basic calculations to determine trim distances for panels • Completes routine production records involving dimensions and quantities tallied against orders
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT2252 Band edges of panels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, operated equipment that applies edge banding to timber panels, and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- selected the appropriate machine settings for:
  - panel size
  - squareness
  - profile
  - edge treatment width
  - alignment of the edge treatment
  - speed of the application
  - trim allowances
  - glue application rates (if not glue-backed)
- applied edging to the timber panels in line with the work orders using one or more materials from the following list:
  - laminated veneer
  - chipboard
  - fibreboard
  - medium density fibreboard
- completed routine operator maintenance on equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- key features of panel products and purpose of edging
- edge banding techniques:
  - checking the trim distances for cut off on each panel
- appropriate machine settings for:
  - panel size
  - squareness
  - profile
  - edge treatment width
  - alignment of the edge treatment
  - speed of the application
  - trim allowances
  - glue application rates (if not glue-backed)
- types, purpose, features, operation and basic non-specialist repair and maintenance of tools and equipment used for banding edges of panels:
  - automated edge banding machines
  - mechanical edge banding machines
  - glue-backed veneer edge strip role
  - timber edging strips
  - laminate edge stripping (glue-backed or glued, on a roll or in strips)
- methods for assessing condition of edging mechanisms
- workplace procedures specific to banding edges of panels:
  - workplace health and safety, with particular emphasis on equipment lock-out
  - use and maintenance of equipment
  - communication reporting lines.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - automated edge banding machines or mechanical edge banding machines
  - glue-backed veneer edge strip roll
  - timber edging strips
  - laminate edge stripping (glue-backed or glued, on a roll or in strips)

FWPCOT3271 Hand sharpen knives and blades for commercial and domestic cutting services

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to hand sharpen knives and blades using files and grinders for a range of commercial and domestic services that use hand drill bits, hand chainsaw, scissors, wood chisels, garden tools and other cutting tools.

The unit applies to individuals who sharpen machine knives and blades in a saw technician workshop or sawmill facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for sharpening	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with hand sharpening knives and blades 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Remove and replace knives or blades to be sharpened from designated machinery 1.6 Select sharpening equipment appropriate to the type of knife or blade and work requirements, and check for operational effectiveness
2. Assess knife or blade condition and set up for sharpening	2.1 Identify defects and assess the cutting performance of knife or blade for sharpening requirements 2.2 Clean knife or blade holders to workplace standards 2.3 Assess condition of knife or blade holder, and correct defects 2.4 Select jig setting for knife or blade assembly 2.5 Separate and re-assemble knife or blade assembly according to manufacturer recommendations
3. Sharpen knives or blades	3.1 Clean excess build-up from knives or blades and inspect for defects, replacing those unable to be repaired by sharpening 3.2 Select geometry for knives or blades from manufacturer instructions 3.3 Select manual sharpening equipment and suitable attachment for holding the knife or blade 3.4 Feed sharpening equipment across knife or blade, into cutting edge, to obtain clean cutting edge that conforms with geometric requirements without defects and burns 3.5 Inspect knife or blade after sharpening for accuracy, and hone remaining burrs to obtain a sharp cutting edge 3.6 Identify, record and report sharpening and equipment faults to the appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria

Skill	Description
Numeracy	• Identifies the pitch and angle that a knife or blade is sharpened at
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status

Assessment Requirements for FWPCOT3271 Hand sharpen knives and blades for commercial and domestic cutting services

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- prepared for hand sharpening of knives or blades
- safely and effectively hand sharpened knives or blades using powered and manual sharpening equipment
- removed and replaced knives or blades from designated machinery
- recorded and reported workplace activity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, standards, codes of practice and established safe practices for hand sharpening knives and blades
- geometry of knives and blades, including the pitch and angle that a knife or blade is sharpened at, allowing for the device that the knife or blade is in and the material to be cut
- defects in the cutting edges of knives and blades:
  - burrs
  - burns
  - chips
  - splits
  - dents
- characteristics of different types of metal knives and blades:
  - drill bits
  - hand chainsaw

© Commonwealth of Australia, 2025 Skills Insight

    - clipper blades
    - gardening tools
    - scissors
    - wood chisels
    - mincer blades
    - shears
    - other cutting equipment types with knives or blades
- sharpening methods and geometry:
    - pitch
    - depth of cut
    - speed the knife or blade is sharpened at to obtain a sharp edge
- basic knowledge of physics of knives or blades, including:
    - blade material and properties
    - impact of material-to-be-cut properties on knives or blades
    - direction of cut
    - forces on a knife or blade
    - heat removal when relevant
    - knife or blade configuration
- types, safe use and maintenance of manual sharpening equipment:
    - power-driven sharpening equipment with procedures for safe use and lock-out
    - files (round, triangular, square and flat)
    - honing tools
    - saw sets
- risks and hazards associated with hand sharpening knives and blades
- workplace procedures for hand sharpening knives and blades:
    - workplace health and safety with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
    - recording and reporting production outcomes and equipment faults
    - communication channels and protocols
- environmental protection requirements, including the safe disposal of waste material and the cleaning of plant, tools and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a saw technician workshop, a sawmill facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - PPE suitable for hand sharpening knives and blades

© Commonwealth of Australia, 2025 Skills Insight

  - equipment from which knives and blades are to be removed for inspection and sharpening
  - knives and blades to be hand sharpened
  - power-driven sharpening equipment with procedures for safe use and lock-out
  - files (round, triangular, square and flat)
  - honing tools
  - saw sets
- specifications:
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for hand sharpening knives and blades
  - workplace procedures for sharpening knives and blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3272 Set up and run multi-head moulder/planer to produce simple profiles

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up and run a computer numerically controlled (CNC) or semi-automated multi-head moulder/planer to produce timber with simple profiles such as DAR (dressed all round) boards, either with a square edge or pencil round edge, or skip-dressed boards.

The unit applies to individuals who set up and run multi-head moulders/planers in a timber processing or manufacturing facility to produce timber with simple profiles.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

	and processing 5.3 Adjust conditions to optimise feed rate and maintain finished dimensions according to work order requirements 5.4 Regularly evaluate finish and measure dressed board dimensions, and make adjustments to ensure product quality and required dimensions 5.5 Dispose of incorrect cuts, off-cuts and defective material according to environmental protection practices
6. Monitor multi-head moulder/planer	6.1 Monitor in-feed and out-feed of timber to prevent degrading of the output product 6.2 Monitor quality of output product and make adjustments to correct identified quality issues according to workplace procedures 6.3 Monitor and maintain supplies of timber to ensure consistent operation of the moulder/planer
7. Maintain multi-head moulder/planer	7.1 Follow workplace safety procedures to lock out equipment 7.2 Check, remove and replace blunt and damaged cutters according to manufacturer recommendations 7.3 Dispose of used cutters according to environmental protection practices 7.4 Monitor dust extraction system during operation to ensure compliance with workplace health and safety requirements 7.5 Keep machine area clear of dust and debris according to workplace health and safety procedures 7.6 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Extracts essential information from workplace documents on the operation of multi-head moulders/planers
Writing	• Prepares routine written reports that inform others about the outcomes of work activities
Oral communication	• Employs active listening and questioning to clarify information on process flow in sawmills
Numeracy	• Measures finished dimensions against specifications and allowable tolerances
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- set up and run a multi-head moulder/planer to produce timber with any of the following simple profiles:
  - dressed all round (DAR) boards, either with a square edge or pencil round edge
  - skip-dressed boards
- in doing the above job:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - selected and fitted cutter heads for a profile specified in a work order
  - calibrated the moulder/planer to ensure output timber conforms to the required profile
  - run the moulder/planer
  - completed workplace reports on set-up, calibration and production activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features, operating parameters, components and operation of multi-head moulders/planers
- equipment used in setting up and running multi-head moulders/planers
- types of cutters used to produce simple profiles
- types and applications of simple profiles:
  - DAR timber boards, either with a square edge or pencil round edge
  - skip-dressed timber boards
- cutter head damage and defects:

FWPCOT3273 Set up and run multi-head moulder to produce complex profiles

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up and run a computer numerically controlled (CNC) or semi-automated multi-head moulder in a sawmill to produce timber with complex profiles such as tongue and groove flooring, lining board, shiplap, joinery profiles and other detailed mouldings.

The unit applies to individuals who set up and run multi-head moulders in a sawmill to produce timber with complex profiles.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3273 Set up and run multi-head moulder to produce complex profiles

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- set up and run a multi-head moulder to produce timber with any of the following complex profiles according to work order:
  - tongue and groove flooring
  - lining board
  - shiplap
  - joinery profiles
  - other detailed mouldings
- in doing the above job:
  - worked safely, including following workplace health and safety and environmental procedures
  - selected and fitted cutter heads for a profile specified in a work order
  - calibrated the moulder to ensure output timber conforms to the required profile
  - run the moulder
  - completed workplace reports on set-up and calibration activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features, operating parameters, components and operation of multi-head moulders
- equipment used in setting up and running multi-head moulders
- types of cutters used to produce complex profiles
- types and applications of complex profiles:

FWPCOT3274 Cut timber products using high-speed optimiser

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to prepare and cut timber products to differing lengths and angles using computer numerical control (CNC) optimising docking and trimming saws.

The unit applies to individuals who cut timber products using a high-speed optimiser in a timber processing or timber product manufacturing plant.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify the content of work orders
Numeracy	• Interprets graphical information presented in electronic and print formats • Sets numerical data on computer optimising program according to length and angle specifications • Measures finished dimensions for specified length and angle and allowable tolerances
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding

Assessment Requirements for FWPCOT3274 Cut timber products using high-speed optimiser

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- cut three or more of the following timber products using a high-speed optimiser, according to work order:
  - laminated veneer timber
  - plywood
  - chipboard
  - medium density fibreboard
  - dressed timber
  - preservative treated timber
  - finger jointed timber
- in doing the above job, the individual has:
  - read and clarified work order
  - followed relevant workplace health and safety and environmental protection procedures
  - prepared computer numerical control (CNC) optimising saw for cutting timber product at a specified length and angle
  - identified cutting pattern
  - set optimising software program
  - operated machine and equipment according to manufacturer procedures
  - monitored production output and quality
  - performed operator maintenance.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features, programming and operation of CNC optimising docking and trimming saws
- range of cutting patterns used with CNC optimising saws to achieve maximum output of timber product
- range of industry standard lengths, cross-sections and tolerances for relevant timber products and applicable terminology
- methods for assessing saw blade condition
- methods of monitoring production output and quality
- types of risk and hazards and mitigation measures associated with cutting timber products using high-speed optimisers
- workplace procedures specific to cutting timber products using high-speed optimisers:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for timber processing or wood product manufacturing plants:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing plant, a wood product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - CNC optimising docking and trimming saws
  - a computer program for optimising saws
  - maintenance tools and equipment for optimising saws
  - consumable saw blades
  - PPE suitable for cutting timber using high-speed optimisers
  - three or more of the following types of timber products: laminated veneer timber, plywood, chipboard, medium density fibreboard, dressed timber, preservative treated timber, finger jointed timber
- specifications:

© Commonwealth of Australia, 2025 Skills Insight

- template documents for recording production outcomes, equipment faults and maintenance requirements
- manufacturer instructions for use and maintenance of equipment
- work order with specific instructions for cutting material using high-speed optimisers
- workplace procedures for cutting material using high-speed optimisers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3275 Set up, operate and maintain end matching machines

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to coordinate operational logistics for end matching activities that include planning schedules for operators, setting up equipment for production runs, resolving processing problems and coordinating equipment shut-down and maintenance.

The unit applies to individuals who set up, operate and maintain end matching operations in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPCOT3275 Set up, operate and maintain end matching machines

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- prepared for end matching operations
- planned and communicated end matching schedule to operators:
  - timber cross-sections to be end matched
  - end matching profiles
  - finished product grades
  - quantities to be produced
  - changeover times
- set up end matching machine and equipment
- monitored end matching operation
- completed production records
- coordinated shut-down and maintenance of end matching machine and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operational capacity of end matching machine and equipment
- typical workflow processes for end matching operations
- methods of determining end matching schedules to maximise equipment, labour and material use
- format, content and use of end matching schedules
- monitoring processes for end matching machines and overall production process
- typical processing and equipment faults and solutions for minimal production disruption

© Commonwealth of Australia, 2025 Skills Insight

- range of industry standard cross-sections for end matched timber products, their strength, tolerances and applicable terminology
- purpose, features, operation and maintenance requirements of equipment used to produce end matched products, including:
  - guides
  - cutters
  - conveyors
- types of risk and hazards and mitigation measures associated with end matching operations
- workplace procedures specific to coordinating end matching operations:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
  - use of end matching machine and equipment
  - communication reporting lines for operator team members and self
  - documenting and communicating end matching schedules
  - recording and reporting production outcomes and maintenance schedules
- environmental protection practices for timber processing or manufacturing facilities:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - end matching equipment and associated repair and maintenance tools
  - computers, keyboards, printers and software to prepare end matching schedules and maintenance documents
  - PPE suitable for end matching operations
  - a diverse range of commercial timber
- specifications:
  - template documents for end matching schedules, production reports and maintenance reports
  - production orders with specific information about grades, quantities and cross-sections for specified end matched timber products
  - maintenance schedule for end matching equipment
  - workplace procedures for coordinating end matching operations.

FWPCOT3276 Sharpen cutters using a straight knife grinder

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to sharpen cutters using a straight knife grinder.

The unit applies to individuals who sharpen cutters on a straight knife grinder for use on a moulder/planer to produce timber with simple profiles such as DAR (dressed all round) boards, either with a square edge or pencil round edge, or skip-dressed boards. Straight cutters are also used on veneer cutting machines and chippers.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

FWPCOT3277 Sharpen cutters in head using a profile knife grinder

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to sharpen cutters in head using a profile knife grinder.

The unit applies to individuals who sharpen cutters in head on a profile knife grinder for use on a moulder in a timber processing facility to produce timber with complex profiles such as tongue and groove flooring, lining board, shiplap, joinery profiles and other detailed mouldings.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3277 Sharpen cutters in head using a profile knife grinder

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has sharpened cutters in head using a profile knife grinder and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- selected template that met profile requirements
- cleaned and checked cutters and cutter head before sharpening
- prepared the grinder
- mounted and adjusted cutter head and template in the grinder
- stored cutter head after sharpening
- completed workplace reports.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features, operating parameters, components and operation of profile knife grinders used to sharpen cutters in head
- equipment used in setting up and running profile knife grinders
- purpose of template and specifications
- components of cutter head
- types of cutters used to produce complex profiles
- types, effects and remedial action for dealing with cutter and cutter head faults:

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.5 Adjust clearance between grinding wheel and cutters according to manufacturer specifications 4.6 Check and top up coolant level according to manufacturer specifications
5. Sharpen cutters in head	5.1 Check operation of grinder for problems after the first pass according to workplace procedures 5.2 Maintain coolant flow rate and cleanliness during wet grinding according to workplace procedures 5.3 Ground cutters until the specified edge and clearance angles are obtained across all cutters 5.4 Ground cutter edges to a constant straight line 5.5 Sharpen cutter to specified angle, within permitted tolerances for concentricity and weight, and check that cutter is free from defects 5.6 Hone cutters and remove burrs according to workplace procedures 5.7 Clean grinder after sharpening according to workplace procedures
6. Store cutter head	6.1 Drain cutter head, if applicable 6.2 Store cutter head according to workplace procedures 6.3 Record and report work outcomes, equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Measures finished dimensions against specifications and allowable tolerances
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3278 Sharpen cutters in head using a straight knife grinder

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has sharpened cutters in head using a straight knife grinder and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- cleaned and checked cutter head prior to sharpening
- prepared the grinder
- mounted and adjusted cutter head in grinder
- stored cutter head after sharpening
- completed workplace reports.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features, operating parameters, components and operation of straight knife grinders used to sharpen cutters in head
- equipment used in setting up and running straight knife grinders
- components of cutter head
- types of cutters used to produce simple profiles
- types, effects and remedial action for dealing with cutter and cutter head faults:
  - warp
  - cracks
  - chips
  - burns
  - delamination
  - raised spots

© Commonwealth of Australia, 2025 Skills Insight

- types, effects and remedial action for dealing with grinding wheel faults:
  - cracks
  - clogging
- effects of incorrect set-up of coolant flow, traversing stops, traversing speed, wheel advance, grinding angle
- problems associated with operation of grinder:
  - burning
  - incorrect grinding angle
  - incorrect cutter set-up
- defects in cutter edges after sharpening:
  - burning
  - chipping
  - grinding marks
- procedures for:
  - cleaning cutter head
  - preparing grinder
  - mounting and adjusting cutter head in grinder
  - grinding and honing cutters in-head
  - storing cutter head
- tolerances for concentricity and weight
- types and applications of simple profiles:
  - dressed all round (DAR) boards, either with a square edge or pencil round edge
  - skip-dressed boards
- types and effects of hazards and control measures associated with using grinders:
  - grinding wheel disintegration
  - loose grinding wheel
  - exposure to grinding coolant
- workplace procedures specific to using straight knife grinders:
  - workplace health and safety, with particular emphasis on equipment lock-out, isolation procedures, machine guarding and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
  - environmental protection legislation relating to sawmill operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions

© Commonwealth of Australia, 2025 Skills Insight

- resources, equipment and materials:
  - straight knife grinder
  - cutters in head for simple profiles
  - tools for setting up straight knife grinder
  - PPE for sharpening cutters in head using a straight knife grinder
  - cutters
  - lubricant
  - coolant
- specifications:
  - template documents for recording work outcomes, equipment faults and maintenance requirements
  - manufacturer instructions for sharpening cutters in head using a straight knife grinder
  - work order with specific instructions for sharpening cutters in head using a straight knife grinder
  - workplace procedures for sharpening cutters in head using a straight knife grinder.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3279 Assess and maintain saw technology tools

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess and maintain straight edges, hammers, measuring equipment, back gauges and tension gauges.

The unit applies to individuals who maintain saw technology tools in a timber products manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for maintenance	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with maintaining saw technology tools 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Select appropriate repair and maintenance tools and equipment, and check for operational effectiveness 1.6 Plan maintenance process according to work order
2. Maintain straight edge	2.1 Assess straight edge damage and wear and select appropriate maintenance method 2.2 Determine correct work angle for resurfacing or removal of wear 2.3 Clamp straight edge at correct angle to prevent movement, vibration and slippage during the resurfacing process 2.4 Inspect abrasive wheel or cutting tool, clean or change as required to suit work material removal, tolerance and surface texture requirements 2.5 Grind, machine or file straight edge to remove distortions and maintain edge straightness and flatness without overheating or causing distortion 2.6 Remove all signs of wear or damage from reference surfaces 2.7 Clean straight edge and de-bur edges 2.8 Dispose of distorted straight edge according to environmental protection practices 2.9 Record and report maintenance activities to appropriate personnel
3. Maintain tension gauges	3.1 Select grinder or other safe and appropriate method for maintaining tension gauges according to workplace procedures 3.2 Set grinder to produce required radius or circle diameter for the tension gauge 3.3 Position tension gauge and clamp in grinder securely, ensuring cord height is central to gauge length and arc is ground square to plane of the gauge body 3.4 Inspect grinding wheel and dress and change to suit work, material and required tolerance 3.5 Grind gauge to required accuracy and profile until all visible edge

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	and face wear is removed 3.6 Select and monitor grinding speed and feed rates to avoid overheating, distortion and burn marks 3.7 Dispose of tension gauges distorted during the process according to environmental protection practices 3.8 Record and report maintenance activities to appropriate personnel
4. Maintain measuring equipment	4.1 Access information required for maintenance or measuring equipment from manufacturer manuals 4.2 Check and calibrate measuring equipment against manufacturer specifications 4.3 Tag and remove from service faulty measuring equipment according to workplace procedures 4.4 Clean and store measuring equipment according to workplace and equipment manufacturer specifications 4.5 Record and report maintenance activities to appropriate personnel
5. Maintain hammers	5.1 Clean hammers according to manufacturer instructions 5.2 Assess condition of hammers according to workplace and manufacturer procedures 5.3 Grind and resurface worn hammers 5.4 Remove unserviceable hammers from service, and replace according to workplace procedures 5.5 Record and report maintenance activities to appropriate personnel
6. Maintain back gauges	6.1 Maintain back gauges according to manufacturer instructions 6.2 Tag and remove from service damaged or worn back gauges 6.3 Clean and store back gauges according to workplace procedures 6.4 Record and report maintenance activities to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Extracts key information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Reads basic numeric setting on grinding wheels • Estimates speeds to suit straight edge and tension gauge requirements • Uses standard units of measurement for speed • Interprets tension gauge markings
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3279 Assess and maintain saw technology tools

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- assessed the condition of and maintained each of the following saw technology tools:
  - straight edges
  - hammers
  - measuring equipment
  - back gauges
  - tension gauges
- in doing the above job:
  - read and clarified a work order for assessing the condition and maintaining saw technology tools
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - prepared for maintenance activities
  - maintained a straight edge
  - maintained a tension gauge
  - ground and resurfaced a hammer
  - maintained measuring equipment
  - maintained back gauge
  - completed workplace reports on maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- purpose, features and operation of tools and equipment used to maintain saw technology tools:
  - grinding machines
  - grinding machine attachments
  - abrasive grinding wheels
- types, purpose, features and use of:
  - straight edges
  - hammers including doghead, twist face, cross face, combination
  - measuring equipment including micrometers, vernier callipers, feeler gauge, pressure gauge, setting gauge
  - back gauges
  - tension gauges
- methods for:
  - assessing condition of straight edges and tension gauges
  - selecting appropriate grinding wheels
  - selecting and preparing appropriate straight edge/tension gauge material
  - maintaining straight edges, back gauges and tension gauges to specified requirements
  - maintaining measuring equipment
  - grinding and resurfacing hammers
- angles at which straight edges and tension gauges are ground
- range of speeds at which abrasive wheels can be operated without damaging materials being processed
- types of risk and hazards and mitigation measures associated with maintaining saw technology tools
- workplace procedures specific to maintaining saw technology tools:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
  - communication reporting lines
  - recording and reporting processing problems and equipment faults
- environmental protection practices for repairing and maintaining saw technology tools:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a saw technician workshop, a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:

© Commonwealth of Australia, 2025 Skills Insight

  - grinding machines
  - grinding machine attachments
  - abrasive grinding wheels with suitable characteristics
  - hand files
  - oil stones
  - straight edges, back gauges, hammers, measuring equipment and tension gauges
  - PPE suitable for repairing and maintaining saw technology tools
- specifications:
  - template documents for recording maintenance activities
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for maintaining saw technology tools
  - organisational procedures for maintaining saw technology tools.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3280 Replace saw blades, knives and guides

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to remove blunt or damaged saw blades, knives and guides from circular saws, band saws, chippers and canters, and install reconditioned cutting components.

The unit applies to individuals who replace saw blades, knives and guides in saws, chippers and canters in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPCOT3280 Replace saw blades, knives and guides

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- safely removed and replaced saw blades, knives and guides in one or more of the following types of saws and cutting machines:
  - circular saws
  - narrow or wide band saws
  - chippers
  - canters
- safely disposed of obsolete saw blades, knives and guides.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of tools and equipment used to remove and replace saw blades, knives and guides in saws, chippers and canters:
  - spanners
  - wrenches and sockets
- mechanical lifting aids, including:
  - block and chain
  - pedestrian operated crane
  - pulley system
- methods for:
  - isolation of machine and equipment

© Commonwealth of Australia, 2025 Skills Insight

  - removing mechanical and safety components without damaging these
  - removing saw blades, knives and guides from saws, chippers and canters
  - installing and checking replacement saw blades, knives and guides for correct alignment and free operation
  - re-inserting guides to carriers within allowable tolerances and adjusting clearances
- features and names of different parts of saw blades, knives and guides for:
  - circular saws
  - chippers
  - canters
  - narrow and wide band saws
- mechanical and safety equipment components and their positioning and tolerance specifications in relation to other components, including:
  - electrical motors
  - riving knives
  - access covers
  - saw guards
  - extraction equipment
- environmental protection practices in timber processing and manufacturing facilities
- types of risk and hazards and mitigation measures associated with replacing saw blades, knives and guides
- workplace procedures specific to replacing saw blades, knives and guides:
  - workplace health and safety, with particular emphasis on equipment lock-out, the use of personal protective equipment (PPE) and safe manual handling techniques
  - communication reporting lines
  - recording and reporting of processing problems and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - one or more of the following types of saws and cutting machines for which saw blades, knives and guides are to be replaced: circular saws, chippers, canters, narrow and wide band saws
  - new or reconditioned saw blades, knives and guides for those machines
  - mechanical lifting aids
  - spanners, wrenches and sockets
  - PPE suitable for replacing saw blades, knives and guides
- specifications:

© Commonwealth of Australia, 2025 Skills Insight

- template documents for recording processing problems and equipment faults
- manufacturer instructions for use, repair and maintenance of equipment
- work order with specific instructions for replacing saw blades, knives and guides in specified machine
- workplace procedures for replacing saw blades, knives and guides in saws, chippers and canters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3281 Manufacture profile cutters

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to manufacture profile cutters by selecting appropriate material and machining blanks to specified profiles. Profile cutters are used in moulders and planers to produce profiled timber.

The unit applies to individuals who manufacture profile cutters in a saw technician workshop or sawmill facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3281 Manufacture profile cutters

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has manufactured at least three cutters with different profiles, and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- prepared to manufacture profile cutter
- machined blank to specification
- machined specified profiles
- checked profile surface finish and dimensions against specifications
- recorded and reported production output, processing problems and equipment faults.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
  - saw blade material and properties
  - impact of timber properties on saw blades
  - direction of cut
  - forces on a blade
  - heat removal
  - sawtooth configuration
- features and operation of tools and equipment used to machine and profile blanks for profile cutters
- importance of manufacturing profile cutters to match requirements for:
  - characteristics of various materials sawn

© Commonwealth of Australia, 2025 Skills Insight

    - speed of the cutting process
    - direction of the cutting process
    - cutting angle
    - profile cutter specifications
- methods for:
    - calculating profile cutter dimensions
    - machining and profiling blanks to the required profile
    - assessing surface finish and measuring the dimensions of the finished profile cutter against specifications and tolerances
- industry standard and organisational tolerances
- types of risk and hazards and mitigation measures associated with manufacturing profile cutters
- workplace procedures specific to manufacturing profile cutters:
    - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
    - communication reporting lines
    - recording and reporting of processing problems and equipment faults
- environmental protection practices for timber processing and manufacturing facilities:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a saw technician workshop, a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - tools and equipment used to machine and profile blanks for profile cutters
    - measuring equipment including vernier callipers, micrometers and rules
    - blank stock for profile cutters
    - PPE suitable for manufacturing profile cutters
- specifications:
    - template documents for recording processing problems and equipment faults
    - manufacturer instructions for use, repair and maintenance of equipment
    - work order for machining activities with specific instructions for manufacturing profile cutters
    - workplace procedures for manufacturing profile cutters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3282 Assess and maintain saw blade and sawing machine performance

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess and maintain the cutting performance of sawing blades or knives and sawing machines, including circular saws, band saws, chippers, canters and reducers.

The unit applies to individuals who assess and maintain the cutting performance of sawing machines and blades or knives in a timber sawmill environment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Review and implement workplace health and safety requirements, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with assessing and maintaining the cutting performance of sawing blades or knives 1.4 Identify and implement workplace procedures for minimising and disposing of material and maximising energy efficiency
2. Monitor and inspect sawing blades or knives and machine	2.1 Obtain information relating to current and past performance problems and review to assess process problems 2.2 Observe sawing machine and in-feed and out-feed equipment under operating conditions to determine the extent of problems 2.3 Monitor condition and performance of sawing blades or knives to identify cutting problems according to workplace procedures 2.4 Examine timber fed through sawing in-feed and out-feed equipment to determine potential causes of the cutting problem 2.5 Apply problem-solving techniques to identify the causes of cutting problems and poor saw performance 2.6 Lock out the machine and inspect parts to identify worn, broken and loose components
3. Assess technical performance of sawing operation	3.1 Compare technical performance of sawing operation against other comparable machine and blades 3.2 Assess technical performance of sawing operation to identify future improvements and feasibility of options for new components 3.3 Communicate the outcomes of technical assessment to appropriate personnel
4. Rectify cutting problems	4.1 Identify characteristics of cutting problems, and diagnose possible causes 4.2 Refer to other trades and operations personnel to validate assessed causes 4.3 Prepare solution responses, and discuss with relevant personnel to identify and agree on a preferred option 4.4 Implement selected course of action, review cutting results and communicate to appropriate personnel 4.5 Record and report causes of cutting problems and action taken

	according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	**Description**
Reading	• Sources and extracts information from machine records, service history and log books to determine potential causes of cutting problems
Numeracy	• Locates and interprets routine numerical data involving angles, dimensions and speeds from cutting performance records • Uses formulae to calculate sawing efficiency
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3282 Assess and maintain saw blade and sawing machine performance

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on least one occasion, assessed cutting performance of one or more of the following sawing machines and associated sawing blades or knives:

- band saw
- circular saw
- chipper
- canter
- reducer.

In doing the above, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- monitored sawing operation and inspected sawing machine, in-feed and out-feed equipment and associated sawing blades or knives for identifying the types and the root cause of cutting problems
- assessed technical performance of sawing operation
- identified a safe course of action for rectifying the cutting problem
- reported on the cutting problem, fault diagnosis process and rectification outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of sawing machines and associated blades or knives, including one or more of the following:
  - band saws and band saw blades
  - circular saws and circular saw blades

© Commonwealth of Australia, 2025 Skills Insight

    - chippers, canters, reducers and associated blades or knives
- typical sawing problems, causes and solutions:
    - cuts not straight or clean
    - excess heat
    - pitch marks in the job
    - diamond shapes and roughness in the cut
    - saw blades changed too regularly
- typical causes of damage and poor saw performance:
    - forcing timber through the in-feed equipment
    - hydraulic and electrical system not performing well
    - damage from foreign matter
    - incorrect operating speeds
    - oversized material removal
    - incorrect setting of in-feed and out-feed equipment
    - poor sharpening or setting of sawing blades or knives
- methods for:
    - assessing condition and performance of sawing blades or knives and machine
    - diagnosing causes of damage and poor performance
    - rectifying problems and improving cutting performance
- types of risk and hazards and mitigation measures associated with assessing and maintaining cutting performance
- workplace procedures specific to assessing and maintaining cutting performance:
    - workplace health and safety, with particular emphasis on machine lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
    - communication reporting lines
    - recording and reporting cutting problems, the fault diagnosis process and rectification outcomes
    - disposal of material and other waste.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - one or more of the following sawing machines and associated blades and knives: band saws, circular saws, chippers, canters, reducers
    - PPE suitable for assessing and maintaining saw performance
- specifications:
    - records of equipment fault and cutting performance

© Commonwealth of Australia, 2025 Skills Insight

- template documents for recording and reporting cutting problems, the fault diagnosis process and rectification outcomes
- workplace procedures for assessing and maintaining sawing machine performance
- manufacturer instructions for use, repair and maintenance of sawing machine, including in-feed and out-feed equipment
- work order with specific instructions for assessing cutting performance of sawing machine and blades or knives.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3283 Sharpen and position blades or knives in chipper, canter and reducer

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up, sharpen and use either Babbitt or set screw processes for positioning straight and angled blades or knives in disc chippers, chipping heads, canters and reducers to process logs.

The unit applies to individuals who work as saw technicians to sharpen and position blades and knives in a timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with sharpening and setting up blades and knives for chipper, canter or reducer 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Select appropriate grinding and Babbitt or set screw equipment and check for operational effectiveness
2. Assess condition and set up the blade or knife assembly	2.1 Set up chipper, canter or reducer blade or knife assembly according to workplace safety procedures and manufacturer recommendations 2.2 Remove and replace blade or knife for sharpening from chipper, canter or reducer 2.3 Assess cutting performance of blade or knife to determine sharpening requirements 2.4 Assess condition of knife holder, jig and chuck, and correct defects 2.5 Clean and secure knife holder to chuck according to workplace procedures 2.6 Select jig type and setting for the required blade or knife set-up
3. Set up grinding equipment	3.1 Clean blades or knives of excess build-up, inspect Babbitts for defects and replace where unserviceable 3.2 Set up grinding equipment for sharpening blades or knives according to workplace safety procedures and manufacturer recommendations 3.3 Select angle for sharpening blade or knife to suit its use in the machine 3.4 Set up the grinder with suitable ancillary equipment for holding knife or blade, and examine and dress grinding wheel 3.5 Select grinding wheel speed and feeds to suit blade or knife, grinding wheel material and configuration
4. Operate grinder to sharpen blades or knives	4.1 Operate grinder according to workplace safety procedures and manufacturer recommendations

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.2 Feed grinding wheel across and into cutting edge to sharpen blade or knife to geometric requirements without defects or burns 4.3 Monitor grinder for operational effectiveness and apply coolant as required 4.4 Inspect blade or knife after sharpening for accuracy, and hone remaining burrs to obtain sharp cutting edge 4.5 Dispose of unserviceable and damaged blades or knives according to workplace procedures and environmental protection practices
5. Apply Babbitt to blades or knives	5.1 Apply Babbitt to blades or knives for chipper, canter or reducer according to workplace safety procedures 5.2 Inspect Babbitt to assess reconditioning requirements 5.3 Heat Babbitt material to required pouring temperature 5.4 Set up blade or knife in pouring jig to required dimensions 5.5 Pour Babbitt to minimise material waste and avoid cavities and shrinkage 5.6 Cool assembly and remove excess material to allow correct positioning in the machine
6. Adjust set screws on blades or knives	6.1 Inspect set screws and replace bent or broken screws 6.2 Adjust set screws to position knife or blade at the correct depth, and lock into position to avoid knife or blade movement 6.3 Record and report processing problems and equipment faults to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Reads basic grinding wheel settings
Numeracy	• Completes precise calculations involving measurement of angles • Interprets machine scale to set grinding wheel down-feed for

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
	appropriate stock removal rate
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3283 Sharpen and position blades or knives in chipper, canter and reducer

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has sharpened and set up blades or knives for one or more of the following timber sawing machines:

- chipper
- canter
- reducer.

In doing the above, the individual has:

- read and clarified work order to determine job requirements
- applied workplace health and safety requirements, including the use of personal protective equipment (PPE), equipment lock-out and safe manual handling techniques
- removed and replaced blade or knife for sharpening from the designated machine
- assessed blade or knife condition
- set up and operated grinder to sharpen blades or knives
- applied Babbitt process and set screw process for positioning blades or knives in the designated machine
- recorded and reported processing problems and equipment faults to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of one of the following sawing machines for which blades and knives are sharpened:
  - chipper
  - canter
  - reducer

© Commonwealth of Australia, 2025 Skills Insight

- fundamental blade or knife properties:
  - metal from which blades and knives are made
  - geometry
- features of a typical blade or knife defect:
  - burrs
  - burns
  - chips
  - splits
  - dents
- basic knowledge of physics of timber sawing:
  - blade or knife material and properties
  - impact of timber properties on blades or knives
  - direction of cut
  - forces on a blade or knife
  - heat removal
- purpose, features and operation of equipment used to sharpen and set up blades or knives:
  - grinding machines
  - grinding machine attachments
  - abrasive grinding wheels
  - Babbitt making equipment
  - set-screw equipment
- methods for:
  - removing blades or knives from machine
  - assessing blade or knife condition
  - selecting appropriate grinding wheels, diameter and material
  - cleaning blades or knives
  - sharpening blades or knives to specified requirements
  - reconditioning Babbitts and set screws
  - setting up blades or knives to specified requirements
- angles at which blades or knives are sharpened
- range of speeds at which abrasive wheels can be operated without damaging blades or knives
- coolants used in sharpening process, and impact on efficient sharpening
- types of risk and hazards and mitigation measures associated with sharpening and setting up blades and knives
- workplace procedures specific to sharpening and setting up blades and knives:
  - workplace health and safety, with particular emphasis on machine lock-out, the use of PPE and safe manual handling techniques
  - communication reporting lines
  - recording and reporting of processing problems and equipment faults

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection practices applicable to timber processing or manufacturing facilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - grinding machines and ancillary equipment
  - abrasive grinding wheels in a variety of diameters and types
  - Babbitt making equipment
  - one or more of the following machines for which blades and knives are to be sharpened: chipper, canter, reducer
  - suitable blades or knives for sharpening
  - consumable coolant and set screws
  - PPE suitable for sharpening and aligning blades and knives
- specifications:
  - template documents for recording production output, processing problems and equipment faults
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for sharpening and aligning blades and knives in specified machines
  - workplace procedures for sharpening and aligning blades and knives.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3284 Grade, sort and mark timber materials

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to visually evaluate timber product for classification into various strength or appearance grades, including sorting and marking product into grade classes and distributing product to storage or processing locations.

The unit applies to individuals who grade and sort materials in the forest and forest products industry.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3284 Grade, sort and mark timber materials

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- graded, sorted and marked three or more of the following timber products:
  - timber from native species
  - timber from imported species
  - dressed timber
  - in-the-rough timber
  - stress and non-stress graded timber
  - preservative treated timber
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - plywood
  - fibreboard
  - other engineered wood products
  - coated and/or treated timber products
  - debarked logs
- during the grading, sorting and marking operation:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - safely and efficiently graded, sorted and marked materials according to workplace procedures
  - identified materials defects
  - safely used workplace equipment for lifting and moving materials
  - coordinated movement of graded material to storage or processing operations

© Commonwealth of Australia, 2025 Skills Insight

- recorded and reported grading outcomes to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety procedures, with particular emphasis on the use of personal protective equipment (PPE) and safe manual handling techniques
- types of risk and hazards and mitigation measures associated with grading and sorting activities
- equipment used for lifting and moving timber products
- types of timber products for grading and sorting
- industry standards for cross-sections and lengths for different types of timber products
- methods of visual estimation, grading, colour identification and tagging of different types of timber products
- grade classifications for different types of timber products
- procedures for sorting, marking, distribution and storage of different types of timber products
- methods of assessing timber products for number and frequency of defects
- methods for determining and recording moisture content of timber products
- timber defects, including:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - loose or missing knots
  - resin pockets
  - dents
  - loose surface
  - lifting coatings
  - thin or missing coatings
  - chipped edges
  - splits
  - voids
  - splintered or missing edges
  - pin holes
- criteria for disposal, recycling and reuse of sub-standard timber product
- methods for safe disposal of waste preservative treated timber.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing plant, a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - moving equipment
  - PPE suitable for grading, sorting and marking timber products
  - labelling materials
  - three or more of the following timber products for grading and sorting: timber from native species, timber from imported species, dressed timber, in-the-rough timber, stress and non-stress graded timber, preservative treated timber, medium density fibreboard, laminated veneer, chipboard, plywood, fibreboard and other manufactured board products, coated and/or treated timber products, and debarked logs
  - storage locations for graded and sorted timber products
- specifications:
  - template documents for recording outcomes of grading activities
  - work order with specific instructions for grading and sorting timber products
  - workplace procedures for grading and sorting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3286 Identify levelling and tensioning requirements for saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to identify the levelling and tensioning requirements for circular, narrow and wide band saw blades that have been removed from the sawing machine.

The unit applies to individuals who identify levelling and tensioning requirements for saw blades used in sawmilling operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to identify levelling and tensioning	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
requirements	1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with handling and inspecting saw blades 1.4 Identify and implement workplace procedures for minimising waste material and maximising energy efficiency
2. Inspect blade	2.1 Handle saw blade to avoid damaging teeth 2.2 Clear foreign material from saw blade surfaces for inspection 2.3 Inspect saw blade and use correct terminology to identify defects 2.4 Declare saw unserviceable where hazardous defects are found 2.5 Segregate and dispose of unserviceable saws according to workplace procedures and environmental protection practices
3. Determine levelling and tensioning requirements	3.1 Identify levelling and tensioning requirements for the saw blade 3.2 Identify method and tools and equipment required for levelling and tensioning saw blade 3.3 Verify requirements and appropriate methods for levelling and tensioning with supervisor as required 3.4 Record inspection results according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from standard reference manuals on levelling and tensioning saw blades
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs speaking, active listening and questioning skills to verify own recommendations related to levelling and tensioning requirements with supervisor

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Numeracy	• Uses numerical values to describe saw blade dimensions
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3286 Identify levelling and tensioning requirements for saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- inspected and determined the levelling and tensioning requirements for one or more of the following types of saw blades according to the work order:
  - circular
  - narrow band
  - wide band.
- In doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - identified, assessed and taken actions to mitigate risks and hazards associated with inspecting saw blades
  - used personal protective equipment (PPE) throughout the work
  - recorded inspection outcomes according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- characteristics of circular, narrow and wide band saw blades
- purpose of levelling and tensioning saw blades
- consequences of incorrect levelling and tensioning of saw blades
- frequency and timing of levelling and tensioning saw blades
- terminology related to levelling and tensioning saw blades:
  - lump
  - ridge

© Commonwealth of Australia, 2025 Skills Insight

    - twist
    - dished
    - loose
    - fast
    - tight/stiff
    - tension
- saw blade tools and equipment used in levelling and tensioning saw blades
- importance of levelling blades, setting tension and applying curvature to match requirements for:
    - characteristics of various materials sawn
    - speed of the sawing process
    - direction of the sawing process
    - cutting angle for sawing
    - saw blade specifications
- methods for:
    - removing saw blades from circular saws
    - assessing saw blade condition
    - levelling and tensioning blades to specified requirements
    - applying curvature
    - checking saw blades after levelling and tensioning
- characteristics of metal used in circular saw blades, and range of force that can be applied without damaging blades
- saw blade defects:
    - lumps, ridges, and twists
    - areas of excessive tension
    - areas of insufficient tension
    - compressive and tensile stresses
- types of risk and hazards and mitigation measures associated with inspecting, levelling and tensioning saw blades
- workplace policies and procedures specific to levelling and tensioning circular saw blades:
    - workplace health and safety, with particular emphasis on equipment lock-out and use of PPE
    - communication reporting lines
    - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - circular and band saw blades for inspection to determine levelling and tensioning requirements
  - PPE for inspecting, levelling and tensioning saw blades
- specifications:
  - template documents for recording levelling and tensioning requirements for saw blades
  - manufacturer instructions for levelling and tensioning saw blades
  - work order with specific instructions for inspecting and identifying the levelling and tensioning requirements of saw blades
  - workplace procedures for assessing the dimensional accuracy and surface quality of sawn timber products and determining the levelling and tensioning requirements of saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3287 Operate CNC equipment for grinding, tensioning and levelling saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up and operate computer numerical control (CNC) equipment for grinding, tensioning and levelling saw blades.

The unit applies to individuals who operate CNC equipment for grinding, levelling and tensioning saw blades in a saw technician workshop or sawmill for sawmilling operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3287 Operate CNC equipment for grinding, tensioning and levelling saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- operated computer numerical control (CNC) equipment to grind, tension and level saw blades.

In doing the above job, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- identified, assessed and taken actions to mitigate risks and hazards associated with operating CNC equipment
- set, adjusted and tested CNC equipment
- performed routine maintenance of CNC equipment
- recorded and reported production outcomes, equipment faults and maintenance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, components, uses and limitations of CNC equipment used for grinding, tensioning and levelling saw blades
- reasons for using CNC equipment
- elements of a basic CNC program
- function of elements in controlling the operation of a CNC machine
- machining operations
- methods for setting CNC program
- workflow processes

© Commonwealth of Australia, 2025 Skills Insight

- reasons for testing and proving the CNC program
- procedures for editing the CNC program via the machine controller
- effects of editing on the operation of the CNC equipment and the part or product to be produced
- measuring equipment/techniques used to check for conformance to specification
- types of risk and hazards and mitigation measures associated with CNC machines
- maintenance and housekeeping requirements of CNC machines
- safe work practices and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a saw technician workshop or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - CNC equipment for grinding, tensioning and levelling saw blades
  - hand tools, equipment and measuring devices required for use when using CNC equipment for grinding, tensioning and levelling saw blades
  - saw blades
  - personal protective equipment (PPE) for operating CNC equipment
- specifications:
  - template documents for recording production outcomes
  - manufacturer instructions for CNC equipment
  - work order with specific instructions for grinding, tensioning and levelling saw blades
  - workplace procedures for using CNC equipment to grind, tension and level saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3288 Set up, operate and maintain finger jointing machines

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to coordinate finger jointing operations, including planning schedules for operators, setting up equipment for production runs, resolving processing problems and coordinating equipment shut-down and maintenance.

The unit applies to individuals who coordinate the production of finger jointed timber in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- set up finger jointing machine and equipment, trialled equipment settings and tested trialled material for strength and appearance
- coordinated the start-up of finger jointing machine and equipment
- monitored finger jointing operation during a production run
- coordinated the shut-down of finger jointing equipment
- in doing the above job, the individual has:
  - followed workplace health and safety requirements during the finger jointing operation
  - developed and documented a finger jointing schedule
  - communicated the finger jointing schedule to operators
  - identified and responded to processing and equipment faults
  - completed production reports
  - carried out routine maintenance of finger jointing equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operational capacity of finger jointing machine and equipment
- workflow processes for finger jointing operations
- methods of determining finger jointing schedules to maximise equipment, labour and material use
- format, content and use of finger jointing schedules
- monitoring processes for jointing machines and overall production process
- typical processing and equipment faults and solutions for minimal production disruption

FWPCOT3289 Load and prove operating program for CNC machine

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to load and prove a program for a computer numerical control (CNC) machine. This includes preparing for work, locating the CNC program file, checking the program for currency, loading the program correctly into the machine controller, checking for and dealing with fault/error messages, following proving/editing procedures and saving edited programs.

The unit applies to individuals who load and prove programs for CNC machines in a timber processing and manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3289 Load and prove operating program for CNC machine

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has loaded and proved the operating program for a computer numerical control (CNC) machine and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- selected the correct CNC program file for the job
- loaded the operating program
- proved the operating program
- checked that all safety mechanisms are in place and that the machine is set correctly for the required operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features, operating parameters, components and operation CNC machines
- benefits of CNC machines
- type of products produced using CNC machines
- operational program software
- computing coding language used in the CNC programs being used
- function keys and operating system of the machine computer control system being operated
- procedures for accessing computer-controlled programs installed in the machine controller, including:
  - posting appropriate program to the machine
  - selecting tool specified by the program and for the material to be machined
  - selecting appropriate speeds and feeds

© Commonwealth of Australia, 2025 Skills Insight

- hazards associated with loading and proving programs for CNC machines
- safety precautions to be taken when loading and proving operating programs for CNC machines
- methods for:
  - starting and stopping the machine in normal and emergency situations
  - handling and storing program files
  - loading, executing, editing and exiting operating programs
  - setting machine datums for each machine axis being used
  - identifying and dealing with error messages and faults on program or computer-controlled machine
  - placing the machine into correct operating mode and accessing program edit facility, in order to enter tooling data such as tool datums, positions, lengths, offsets and radius compensation
  - using tool posts, magazines and carousels and identifying the tools in relationship to the operating program
  - conducting trial runs, using single block run, dry run and feed and speed override controls
  - interpreting first and third angle drawings, metric measurements, workpiece reference points and system of tolerancing
  - checking before machine is operated in full program run mode
  - expressing machine tool and workpiece movements in terms of Cartesian coordinates
- purpose of tool compensation, including tool diameter, wear, nose radius, tool length
- industry standard profiles, lengths, cross-sections and tolerances and applicable terminology.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - CNC machine
  - CNC operating program
  - personal protective equipment (PPE) for loading and proving operating programs for CNC machines
  - template documents for recording outcomes of setting up and calibration activities
- specifications:
  - manufacturer instructions for loading and proving program for CNC machine
  - work order with specific instructions for loading and proving program for CNC machine
  - workplace procedures for loading and proving program for CNC machine.

FWPCOT3290 Apply knowledge of timber properties, sawmill operations and sawmilling equipment

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to apply knowledge to identify the products, work processes and equipment in an operational sawmill. This includes identifying timber properties and defects and how these impact on sawing operations, timber volume and value recovery, process flow through a sawmill, quality requirements, the types, functions and capabilities of sawing machines and the regulatory arrangements that apply to sawmill operations.

The unit applies to individuals who work in various areas of sawmilling operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts key information from workplace documents on timber properties
Writing	• Prepares sample quality reports using required format, language and structure
Numeracy	• Reads graphical and statistical data used to monitor quality
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3290 Apply knowledge of timber properties, sawmill operations and sawmilling equipment

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, identified the types and properties of timber, sawmilling products and processes and sawmilling equipment used in a sawmill and has:

- identified types, defects and properties of timber and their impact on sawing, timber volume and value recovery
- identified sawmill products and processes
- described types, functions and capabilities of sawing machines
- described key features of quality requirements
- identified the regulatory framework impacting on sawmilling operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- processes involved in conversion:
  - debarking
  - primary breakdown
  - secondary sawing
  - crosscutting
  - stacking
  - seasoning
  - residue removal
  - storage
- timber value and volume recovery:
  - definition

© Commonwealth of Australia, 2025 Skills Insight

    - ways of measuring
- species, grades and relative value of logs
- methods used for measurement of logs
- timber features and properties and potential impact on sawing, timber volume and value recovery
- timber defects and potential impact on sawing, timber volume and value recovery
- processes involved in converting sawlogs to timber
- process flow through sawmill
- location of main processes in sawmill
- type, grade, finish and value of sawn products and by-products
- type, function and capability of sawing machines
- production (volume) sawing
- grade (value) sawing
- types and functions of saw blades
- designed capability of sawing machines
- defects in timber due to conversion processes in sawmill
- types, purpose and process for recording quality data
- quality control processes
- workplace health and safety legislation relating to sawmill operations, including the use of personal protective equipment
- environmental protection legislation relating to sawmill operations
- industry codes of practice relating to sawmill operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - workplace documents that provide basic information on work practices, procedures, processes or equipment
    - workplace documents that provide basic information on quality control processes, workplace health and safety and environment protection procedures
    - reference materials on timber properties and defects and regulatory framework impacting on sawmilling operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3291 Apply principles of timber and process optimisation in sawmill operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to apply optimisation principles in sawmilling operations to increase timber value and volume recovery. It includes identifying the drivers for optimisation, assessing opportunities for timber and workflow optimisation, identifying optimisation opportunities in own work area and participating in and evaluating optimisation initiatives.

The unit applies to individuals who are involved in timber and process optimisation in sawmilling operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify opportunities for optimisation in sawmilling operations	1.1 Identify drivers for optimisation in sawmilling operations 1.2 Identify potential impact of timber and material flow optimisation on timber value and volume recovery in sawmill operations 1.3 Assess opportunities for timber optimisation in sawmilling operations 1.4 Assess opportunities for material flow optimisation in sawmilling operations 1.5 Identify the technologies and work practices that are applied to enhance timber and workflow optimisation in sawmill operations
2. Identify optimisation opportunities in own work area	2.1 Compare current work practices, procedures, processes or equipment performance in own work area with requirements or performance indicators in relation to timber value and volume recovery 2.2 Recognise variances that indicate sub-optimal performance 2.3 Identify causes of sub-optimal performance and recommend corrective actions to relevant personnel
3. Participate in optimisation initiative	3.1 Participate in an approved optimisation initiative and monitor performance 3.2 Assess results of optimisation initiative 3.3 Record outcomes of actions and communicate to relevant personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts key information from workplace documents on optimisation initiatives
Writing	• Prepares routine written reports using required format, language and structure

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Interprets graphical and statistical data used to describe and show timber production, equipment performance and value recovery
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3291 Apply principles of timber and process optimisation in sawmill operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, identified opportunities for timber and workflow optimisation in own work area and has:

- identified the drivers for optimisation
- distinguished between timber and workflow optimisation
- made recommendations to correct sub-optimal performance in own work area
- participated in one optimisation initiative.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- timber value and volume recovery:
  - definition
  - ways of measuring
- drivers for optimisation in sawmilling operations:
  - efficiency
  - productivity
  - quality
  - competitiveness
- distinction between timber and material flow optimisation
- measures to improve timber and material flow optimisation
- impact of timber and material flow optimisation on timber value and volume recovery in sawmill operations
- opportunities for timber optimisation in sawmilling operations in one or more of the following areas:

© Commonwealth of Australia, 2025 Skills Insight

  - log sorting
  - sawing in the green mill
  - dry mill processing
  - grading
  - timber treatment
- opportunities for material flow optimisation in sawmilling operations
- technologies applied to enhance timber and workflow optimisation in sawmill operations:
  - 3D, X-ray and acoustic scanning devices
  - automated transfer systems
  - computer-assisted machine centres for sawing and re-sawing
- work practices applied to enhance timber and workflow optimisation in sawmill operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - workplace documents that provide basic information on work practices, procedures, processes or equipment performance in own work area
  - workplace documents that provide basic information on requirements or performance indicators in relation to timber value and volume recovery
  - access to and opportunity to participate in a real or simulated optimisation initiative relevant to sawmilling operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3292 Calibrate and maintain scanning equipment used in sawmilling operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to calibrate, adjust and test different forms of scanning equipment used in sawmilling operations, including optical (1–3 dimension), X-ray, microwave, multispectral and acoustic scanning equipment. It includes working safely, identifying the capability of scanning equipment in detecting timber characteristics and defects, following calibration procedures, and reporting on calibration outcomes.

The unit applies to individuals who calibrate different forms of scanning equipment used in sawmilling operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to calibrate scanning equipment	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with working with scanning equipment 1.4 Identify and implement workplace procedures for minimising waste material and maximising energy efficiency 1.5 Obtain tools, equipment and testing devices needed for the work, and check for correct operation and safety
2. Calibrate scanning equipment	2.1 Identify capability and resolution of scanning equipment in detecting timber characteristics and defects 2.2 Identify calibration procedures and calibration points for scanning equipment 2.3 Identify and take into account factors that may impact on the accuracy of scanning equipment during the calibration process 2.4 Test and adjust scanning equipment as necessary to ensure equipment meets calibration requirements 2.5 Carry out calibration of scanning equipment efficiently without waste of materials or damage to apparatus, the surrounding environment or services, and using sustainable energy principles
3. Verify calibration outcome	3.1 Conduct a test for a benchmark object (the standard) to confirm accuracy and desired outcome from the process 3.2 Repeat calibration procedure if accuracy is not achieved 3.3 Record all calibration data accurately according to workplace and manufacturer requirements
4. Complete calibration activities	4.1 Document calibration status and report out-of-calibration scanning equipment 4.2 Lock out calibration scanning equipment according to workplace and safety requirements 4.3 Perform routine maintenance of scanning equipment according to workplace and manufacturer instructions 4.4 Clean work area according to workplace and safety requirements

Assessment Requirements for FWPCOT3292 Calibrate and maintain scanning equipment used in sawmilling operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, accurately calibrated scanning equipment used in sawmilling operations and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- reviewed work order to determine job requirements
- used personal protective equipment (PPE), lock-out procedures and safe manual handling techniques
- identified, assessed and taken actions to mitigate risks and hazards associated with working with scanning equipment
- calibrated one or more of the following types of scanning equipment:
  - optical (1–3 dimension)
  - X-ray
  - microwave
  - multispectral
  - acoustic
- tested the calibration accuracy
- performed routine maintenance of scanning equipment
- recorded all calibration data accurately according to workplace and manufacturer requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of risk and hazards and mitigation measures associated with operating and calibrating scanning equipment

© Commonwealth of Australia, 2025 Skills Insight

- types of scanning equipment:
  - optical (1–3 dimension)
  - X-ray
  - microwave
  - multispectral
  - acoustic
- methods for determining capability and resolution of different scanning equipment in detecting timber characteristics and defects, including:
  - thickness
  - shape
  - wane
  - knots
  - decay
  - foreign objects
  - heartwood
  - log stiffness
  - grain angle
  - colour check
  - stain
- calibration procedures and calibration points for scanning equipment
- function of key components of scanning equipment, operating principles, details of the pre-use, calibration and safety checks, and operating procedures for the items used
- factors that may impact on the accuracy of scanning equipment and their control
- role and importance of regular calibration checks and maintenance of equipment
- methods for testing calibration using a benchmark object (the standard)
- methods and frequency used to perform the checks and calibrations
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety requirements specific to the work task
- procedures for quarantining out-of-calibration equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - scanning equipment used in sawmill operations including one or more of the following: optical (1–3 dimension), X-ray, microwave, multispectral, acoustic scanning equipment
  - tools, equipment and testing devices used in calibrating scanning equipment

© Commonwealth of Australia, 2025 Skills Insight

  - PPE for operating and calibrating scanning equipment
- specifications:
  - template documents for recording calibration outcomes
  - manufacturer instructions for calibration of scanning equipment
  - work order with specific instructions for calibration of scanning equipment
  - workplace procedures for calibration of scanning equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3294 Swage and shape saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to widen and press into shape through a cold forming process the cutting points of saw teeth to create a block that has the required hook, back, tangential and radial clearance angles for efficient saw operation.

The unit applies to individuals who swage and shape saw blades in a saw technician workshop or sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3294 Swage and shape saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- safely swaged and shaped saw blades for circular and band saws
- in doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - set up equipment
  - recorded and reported production outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of circular and band saws for which saw blades are shaped and swaged
- features and names of different parts of circular and band saw blades
- purpose, features and operation of tools and equipment used to shape and swage blades:
  - swagers
  - swage clamps or vices
  - dies
  - measuring equipment
- importance of swaging and shaping saw blades to match requirements for:
  - characteristics of various materials sawn
  - speed of the sawing process
  - direction of the sawing process
  - cutting angle for sawing

FWPCOT3295 Assess and maintain cutter performance

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess and maintain cutter performance in timber moulding and planing operations. This activity includes inspecting dressed timber, diagnosing cutter performance and rectifying problems with cutters or knives.

The unit applies to individuals who assess and maintain cutter performance in a timber processing or manufacturing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work	1.1 Review workplace health and safety requirements, including use of personal protective equipment, equipment lock-out and safe manual handling techniques

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Identify, assess and take actions to mitigate risks and hazards associated with assessing and maintaining the cutter and assembly components for moulding and planing machines 1.3 Identify and implement environmental protection procedures for minimising and disposing of material, and maximising energy efficiency
2. Inspect timber cutters and assembly components	2.1 Obtain information relating to current and past performance problems and review to assess process problems 2.2 Observe cutter, cutter block, spindles and associated assembly components under operating conditions to determine extent of problems 2.3 Examine timber fed through the machine to determine potential causes of cutting problem 2.4 Lock out machine and inspect cutters and assembly components to identify worn, broken and loose components
3. Rectify problems with cutters and assembly components	3.1 Diagnose possible causes with input from other personnel where required 3.2 Discuss solutions with relevant personnel to identify and agree on preferred option 3.3 Implement selected course of action, review dressing operation and results and communicate to appropriate personnel 3.4 Record and report causes of problems and action taken according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Sources and extracts information from machine records, service history and log books to determine potential causes of cutting problems

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Locates and interprets routine numerical data involving angles, dimensions, and speeds in cutting performance records
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Unit Mapping Information

Assessment Requirements for FWPCOT3295 Assess and maintain cutter performance

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has successfully assessed and diagnosed three different problems related to cutter and cutter blocks performance for moulders or planers.

In doing the above, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed performance of cutter and assembly components
- inspected timber and cutter and assembly components
- identified safe course of action for rectifying problem
- reported on problem, fault diagnosis process and rectification outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of cutter, cutter block and assembly components on moulders and planers
- typical causes of damage and poor cutter performance:
  - forcing timber through the machine
  - damage from foreign matter
  - incorrect operating speeds
  - oversized material removal
  - incorrect setting of machine
  - poor sharpening or setting of cutters or knives
  - worn or damaged components
- methods for:

© Commonwealth of Australia, 2025 Skills Insight

  - assessing condition of cutters and assembly components
  - diagnosing causes of damage and poor performance
  - rectifying problems and improving cutter performance
- types of risk and hazards and mitigation measures associated with assessing and maintaining cutter performance
- workplace procedures specific to assessing and maintaining cutter performance:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting cutting problems
  - diagnosis process and rectification outcomes
  - disposing of material.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - one or more of the following machines and associated cutters: moulder, planer
  - hand tools to carry out the work
  - PPE suitable for assessing and maintaining performance of cutters
- specifications:
  - records of equipment fault and cutting performance
  - template documents for recording and reporting cutting problems, the fault diagnosis process and rectification outcomes
  - workplace procedures for assessing and maintaining performance of cutters and associated equipment
  - manufacturer instructions for use, repair and maintenance of cutters and associated equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3296 Mechanically stress grade timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to stress grade timber with mechanical stress-grading machines or high-speed mechanical graders to test the product for strength and durability against set grades.

The unit applies to individuals who mechanically stress grade timber in the timber and wood products industry.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3296 Mechanically stress grade timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, mechanically stress graded timber, and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- operated a mechanical stress-grading machine or high-speed stress-grading machine according to work orders to grade one or more of the following types of timber products:
  - timber from native species
  - timber from imported species
  - dressed timber
  - in-the-rough timber
  - preservative treated timber
- completed operator maintenance on the mechanical stress-grading equipment
- recorded and reported production outcomes, equipment faults and maintenance requirements to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- typical flow of material supply in and out of the grading area
- typical workflow processes and techniques used to stress grade timber mechanically
- range of industry standard strength grades and thresholds and applicable terminology
- markings used on timber boards to identify grades
- reasons for independent testing of boards
- processes for sampling and preparing boards for testing
- purpose, features and operation of equipment used to stress grade timber mechanically:

© Commonwealth of Australia, 2025 Skills Insight

  - mechanical stress graders or high-speed mechanical graders
  - spray guns
  - branding rolls
  - verification boards
- methods used to:
  - calibrate equipment to grades using verification timber boards
  - clean and maintain mechanical stress-grading equipment
- workplace procedures specific to mechanically stress-grading timber:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), safe manual handling techniques and handling hazardous substances
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for timber processing plants:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of hazardous substances.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - mechanical stress graders or high-speed mechanical graders
  - spray guns
  - branding rolls
  - verification boards
  - PPE suitable for mechanically stress-grading timber
  - timber boards suitable for mechanically stress-grading and sufficient quantities for the grading operation
- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - work order with specific instructions for types and quantities of timber to be graded
  - template documents for recording production outcomes, equipment faults and maintenance requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3297 Operate automated stacking equipment

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to use automatic or semi-automatic stacking equipment to build, monitor, strap and record packs of timber products in preparation for despatch.

The unit applies to individuals who operate automatic timber stacking equipment in the forest and wood products industry.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has operated automatic or semi-automatic stacking equipment and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- stacked and built packs of timber using an automatic or semi-automatic stacking machine according to an individual work order prescribing different types, dimensions and numbers of timber products to be packed
- completed the following tasks for each pack:
  - applied protective strips to packs
  - applied wrapping to packs to prevent water penetration during storage and transportation
  - strapped packs
  - labelled packs ready for storage or transportation
- completed operator maintenance on the automatic or semi-automatic stacking machine
- recorded and reported production outcomes and equipment faults to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of risk and hazards and mitigation measures associated with operating stacking equipment
- range of industry standard lengths, cross-sections, appearance grades, markings and applicable terminology for relevant timber products
- purpose, features and operation of automatic or semi-automatic stacking machines
- typical workflow processes used to build, wrap and strap packs automatically

© Commonwealth of Australia, 2025 Skills Insight

- methods for labelling timber products and packs for identification
- quality requirements for packs
- workplace procedures specific to operating automatic stacking machines:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), and safe manual handling

Assessment Requirements for FWPCOT3298 Produce templates

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- produced templates according to the work order and product requirements
- in doing the above job, the individual has:
  - read and clarified work order for producing templates
  - applied workplace health and safety requirements, including use of personal protective equipment (PPE) and safe manual handling techniques, throughout the work
  - planned production of template
  - recorded and reported production outcomes and equipment faults to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key features of patterns and templates and their purpose
- types and key features of equipment that are assisted by templates
- types and key features of shaped, tapered or moulded products produced with the assistance of templates
- characteristics of materials used for templates and how these affect template use:
  - strength
  - direction of grain
  - hardness
  - flexibility
- typical assembly sequences and range of techniques used to produce templates
- purpose, features and operation of equipment used to assemble templates
- purpose, features and use of assembly componentry
- types of risk and hazards and mitigation measures associated with producing templates

© Commonwealth of Australia, 2025 Skills Insight

- workplace procedures specific to producing templates:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of PPE and safe manual handling techniques
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
- environmental protection practices for producing templates:
  - reducing water and energy use
  - disposing of, recycling and reusing timber and other waste.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - measuring equipment
  - patterns
  - assembly equipment
  - PPE suitable for use in producing templates
  - consumable metal and ply suitable for pattern preparation
  - consumable materials suitable for templates
  - consumable nails, screws and adhesives
- specifications:
  - template documents for recording production outcomes and equipment faults
  - manufacturer instructions for equipment use
  - work order, drawings and specifications for template production
  - workplace procedures for producing templates.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3299 Cut timber or engineered wood product to profile

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to use profiling equipment for cutting timber or engineered wood products to a profile to produce moulded products in a manufacturing facility.

The unit applies to individuals who work as benchman, machine operators, timber products technicians, production technicians and press operators.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	manufacturer specifications 4.3 Remove and replace cutting blades according to manufacturer recommendations 4.4 Keep machine area clear of dust and debris according to workplace health and safety procedures 4.5 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identifies quantities of required material within work orders, and counts numbers of panels to be profiled • Completes basic calculations of required depth of cut or profile to determine equipment set-up • Measures finished dimensions against specifications and allowable tolerances
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPCOT3299 Cut timber or engineered wood product to profile

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria of this unit.

There must be evidence that, on at least one occasion, the individual has:

- cut one or more of the following timber or engineered wood products to profile according to work order and prescribed workplace specifications:
  - dressed timber
  - in-the-rough timber
  - stress and non-stress graded timber
  - preservative treated timber
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard
  - coated and/or treated timber products
  - glued laminated timber (glulam)
  - cross-laminated timber (CLT)

In doing the above job, the individual has:

- followed relevant workplace health and safety and environmental protection procedures to complete the work order
- conducted operator maintenance on profiling equipment
- stacked batches of cut timber or engineered wood product safely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- health and safety hazards or risks related to operating profiling equipment for timber or engineered wood products as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to cutting timber or engineered wood product to profile:
  - health and safety, with particular emphasis on equipment lock-out and the use of personal protective equipment (PPE)
  - use of timber profiling equipment
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for timber manufacturing facilities:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
  - reducing water and energy use
- characteristics of timber or relevant engineered wood product
- storage systems and labelling procedures, including:
  - storage racks
  - storage bays
  - bins
  - stacks
  - pallet boxes
  - modularised storage components
  - temporary stacking bays
- storage layout and categories for:
  - raw materials
  - stacking finished timber products
- typical timber or engineered wood product defects and how they affect the ability to produce quality profiled product:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- range of common profiles and applicable terminology, including:
  - quad
  - beading
  - mouldings
  - shaped beams
  - architraves

© Commonwealth of Australia, 2025 Skills Insight

  - skirting boards
  - scotia
- common cutting patterns used to achieve common profiles
- range of feed rates and how they affect production output and quality of the finished product
- purpose, features and operation of equipment used to cut timber or engineered wood product to profile:
  - measuring equipment
  - multi-head planing machines (four siders)
  - spindle moulders
  - routing machines
  - shaping machines
  - machine guides
- methods for assessing cutting blade condition.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - measuring equipment
  - profiling equipment including one or more of the following: multi-head planing machines (four siders), spindle moulders, routing machines, shaping machines
  - machine guides
  - maintenance tools and equipment for removing and replacing cutting blades
  - consumable profile cutting blades in various shapes and sizes
  - PPE suitable for cutting material to profile
  - timber or engineered wood product suitable for profiling operations
- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - work order with specific instructions for cutting timber or engineered wood product to profile
  - workplace policies and procedures for cutting timber or engineered wood product to profile, including health and safety and emergency procedures and environmental protection procedures
  - template documents for recording production outcomes, equipment faults and maintenance requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR2203 Hook up felled logs using cables (choker)

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to fasten choker cables around logs for yarding from the cutting area to the landing, and to assist with line shifts. Work is completed in a forest or forest farm setting.

The unit applies to choker setters in a forest or forest farm environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting and Haulage

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for choker setter operations	1.1 Review work order and, where required, check with appropriate personnel 1.2 Identify type and quantity of logs to be extracted and assess area for safety and environmental protection practices

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Select appropriate personal protective and other equipment and check for operational effectiveness 1.4 Plan choker setter and cable operations in line with work order
2. Hook up logs	2.1 Identify audible or visual signal system to be used 2.2 Select specific logs for next return prior to return of rigging in line with planned operations 2.3 Assess position of logs to be extracted in line with haul line, hook up point and likely movement 2.4 Monitor stability of logs to be extracted and take precautions against movement in line with logging code of practice 2.5 Direct and control positioning of rigging using signals and strawlines to facilitate planned hook ups 2.6 Pull out slack for chokers and grapple ropes to allow safe hook up. 2.7 Set chokers or grapples close to end of logs 2.8 Vacate to a safe area prior to signalling extraction 2.9 Record and report hook up process and equipment faults to rigging slinger
3. Assist with line shifts	3.1 Clear all logs to be hauled with existing line position before line shift is initiated 3.2 Notch stumps in line with code requirements and rigging method to be used 3.3 Pull slack on all lines prior to release of existing rigging 3.4 Dismantle rigging components on existing line, check and set up on new line 3.5 Move obstructions which may cause binding or damage during hauling 3.6 Assist climber to rig spars, tail trees and intermediate supports

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description

Reading	• Interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders

Writing	• Complete accurate basic records for hook-up process and equipment faults
Oral communication	• Ask questions and actively listen to clarify contents of work orders • Provide clear, unambiguous verbal and non-verbal haul signals
Numeracy	• Complete routine calculations to determine lift capacity for rigging
Get the work done	• Efficiently and logically sequence the stages of preparation for and extraction of logs using work order to guide activities

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- safely and efficiently hooked up felled logs in line with work orders for recovery operations
- hooked up logs in varied weather conditions
- operated one or more of the following cable systems for felled logs:
  - high lead (no skyline)
  - standing skyline
  - running skyline
- assisted in shifting lines in line with the rigging slinger s instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- content and application of applicable state or territory code of practice relevant to log recovery activities
- environmental protection practices for forest and forest farm settings:
  - safe disposal of waste material
  - cleaning of plant, tools and equipment
- key features of varying site conditions and effects on log recovery, including:
  - fallen trees
  - general forest lean
  - ground growth

© Commonwealth of Australia, 2025 Skills Insight

    - ground hazards and obstacles
    - ground slope
    - density of trees
- key features of varying weather conditions and effects on log recovery, including:
    - dry, wet and adverse weather conditions
    - low and moderate wind speed and direction
- characteristics of trees and logs can impact on hooking up felled logs with cables
- techniques used by choker setters in the log recovery process, including:
    - log hook-up methods
    - cable logging techniques
    - rigging techniques
- key features of varying signal systems used for log recovery activities, including:
    - talk-e-tooter signals
    - two-way radio
    - visual signals
    - whistle signals
- typical industry chain of command for communication of log extraction signals
- purpose, features and operation of cable logging system components:
    - rigging components
    - cable systems: high lead (no skyline), standing skyline, running skyline
- organisational procedures specific to log recovery activities:
    - workplace health and safety with particular emphasis on use of equipment
    - communication reporting lines
    - recording and reporting hook-up process and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
    - cable systems including one or more of the following: high lead (no skyline), standing skyline, running skyline
    - yarder and anchors
    - rigging equipment for log recovery: blocks, bridling, rigging, chokers and grapple ropes, , lines, , pins, ropes, shackles, sheaves, , straps, strawlines, tail rope
    - signal system equipment
    - personal protective equipment suitable for log recovery activities
- specifications:
    - work order with specific instructions for log recovery activities

	check for operational effectiveness 1.4 Plan chaser and cable operations in line with work order
2. Land and unhook logs	2.1 Identify audible or visual signal system to be used 2.2 Monitor logs entering landing area and assist yarder to place them using signals in line with cable logging code of practice 2.3 Check that logs have at least two thirds of their length on the landing before release 2.4 Check stability of logs and adjust when chokers or grapple ropes are slackened 2.5 Remove chokers or grapples, coil strawlines and check and adjust rigging in line with directions from yarder operator 2.6 Maintain landing area to enable safe and clear log, equipment and personnel movement 2.7 Record and report chaser process and equipment faults to yarder
3. Assist with line shifts	3.1 Clear all logs to be hauled with existing line position before line shift is initiated 3.2 Notch stumps in line with code requirements and rigging method to be used 3.3 Pull slack on all lines prior to release of existing rigging 3.4 Dismantle rigging components on existing line, check and set up on new line 3.5 Move obstructions which may cause binding or damage during hauling 3.6 Assist climber to rig spars, tail trees and intermediate supports

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identify quantities of logs within work plans and complete basic

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
	calculations of time required to complete activities • Complete routine calculations to determine lift capacity for rigging • Complete routine calculations to plan extraction pattern for number and size of logs to be hauled
Oral communication	• Ask questions and actively listen to clarify contents of work plans • Provide clear, unambiguous verbal and non-verbal haul signals

Reading	• Interpret:
	  • workplace health and safety procedures
	  • work plans

Writing	• Complete accurate reports on breakout process and equipment faults
Interact with others	• Monitor harvest team activities and provide directions to ensure efficient and safe log recovery
Get the work done	• Identify operational, environmental and equipment problems and implement appropriate responses • Select, set up, use and dismantle appropriate rigging equipment for log recovery

FWPHAR2207 Trim and cut harvested trees

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to trim and cut harvested (felled) trees with a chainsaw for commercial production. Work is completed in a forest or forest farm setting and includes operator maintenance.

The unit applies to Forestry Worker, Chainsaw Operator, Arboriculture Technician, Farm Forestry Worker, Plantation Forest Officer.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for trimming and cutting	1.1 Identify site environmental protection measures and adhere to in line with relevant legislation and regulations 1.2 Review work order and where required check with appropriate

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.3 Check chain for bluntness or damage 5.4 Remove, sharpen, adjust and replace chain and other components in line with manufacturer's recommendations 5.5 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Estimate felled tree dimensions, including length, diameter and volume • Plan time efficient cutting patterns and sequences • Complete routine calculations and report on size, length, diameter and grade of cut trees
Oral communication	• Ask open, probing and closed questions and actively listen to clarify contents of work plans

Reading	• Interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers maintenance recommendations

Writing skills	• Complete accurate basic records for tree trimming and cutting processes, equipment faults and maintenance requirements
Get the work done	• Efficiently and logically sequence the stages of preparation for and cutting of trees using work order to guide activities

Assessment Requirements for FWPHAR2207 Trim and cut harvested trees

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed organisational policies and procedures relevant to trimming and cutting harvested trees
- effectively communicated and worked safely
- safely and efficiently used a chainsaw to complete the following activities:
  - trim and cut hardwood or softwood trees
  - delimb trees
  - trim branches
  - trim burls and other small growths
- used the following cutting techniques:
  - bridging cuts
  - swinging cuts
  - side bind cuts
  - boring
  - wedge cut
- used wedges
- trimmed and cut trees in varied weather conditions
- completed maintenance on a chainsaw.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- purpose, features, operation and basic non-specialist repair and maintenance of chainsaws, including:
  - pre-start up checks
  - inspection, identification and replacement of bar, chain and drive sprockets
  - chain sharpening
  - bar oil checks and top-up
  - air filter, check, clean and replacement
  - refuelling
- range of chainsaw cutting techniques, including:
  - bridging cuts
  - swinging cuts
  - side bind cuts
  - delimbing
  - boring
  - wedge cut
- use of wedges
- cutting patterns used to optimise time and recovery of product from trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- key features of , varying site conditions and effects on tree cutting and trimming activities, including:
  - general forest lean
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - gullies
  - presence and density of seed and habitat trees
  - water courses
- key features of varying weather conditions and effects on tree cutting and trimming activities, including:
  - dry, wet and adverse weather conditions
  - low and moderate wind speed and direction
- typical tree defects and how these affect tree cutting activities and quality of finished product, including:
  - shakes
  - insect defects
  - knots and resin pockets
  - pipe
  - lumps
  - bumps
  - drysides
- range of industry standard:

© Commonwealth of Australia, 2025 Skills Insight

  - lengths and tolerances and applicable terminology
  - grades for log and applicable terminology
- methods for assessing chain condition
- organisational policies and procedures specific to tree trimming and cutting activities, including:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for forest and farm forest settings, including:
  - soil and water protection
  - action to limit the impact to ground growth, canopy, density of trees
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
  - chainsaws
  - chainsaw fuel and oil containers
  - hardwood or softwood trees for cutting
  - hammer
  - axe
  - wedges
  - cant hook or breaking bar
  - tool belt
  - loggers tape
  - maintenance tools and equipment for chainsaws
  - personal protective equipment suitable for cutting trees and maintaining chainsaws
- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - work order with specific instructions for tree cutting activities
  - template reports for recording tree cutting outcomes, equipment faults and maintenance requirements
  - organisational policies and procedures for tree trimming and cutting activities.

FWPHAR3201 Monitor log recovery (rigging slinger)

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to plan for and navigate the extraction or breakout of logs to the landing in a forest or forest farm setting. It requires the ability to direct choker setters, transmit signals to the yarder operator and assist with line shifts for cable logging operations.

The unit applies to job roles for monitoring log recovery including Rigging Slinger.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting and Haulage

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for rigging slinger operations	1.1 Review work plan and check where required with appropriate personnel 1.2 Identify type and quantity of logs to be extracted and assess for safety and environmental protection practices

	1.3 Select appropriate equipment and check for operational effectiveness in line with manufacturer's recommendations 1.4 Plan cable operation activities in line with work order
2. Plan breakout	2.1 Plan and complete breakout operations in line with environmental conditions and workplace health and safety (WHS) procedures 2.2 Identify audible or visual signal system to be used 2.3 Assess site, rigged cable system and landing for slope, haul line, backline, lift capacity and landing chute 2.4 Identify obstacles to extraction operations and develop avoidance plan 2.5 Identify logs to be recovered with current and future haul lines 2.6 Assess information to plan extraction pattern for typical number and size of logs to be hauled 2.7 Plan line shifts during hauling; establish and prepare future rigging points and rigging
3. Direct hook up of logs	3.1 Select specific logs for next turn prior to return of rigging in line with planned operation 3.2 Assess stability of logs to be extracted and take precautions against movement in line with code of practice 3.3 Direct choker setters to prepare and hook up logs ready for extraction 3.4 Give haul signals, in line with code of practice, when all persons are clear from logs, bight of ropes and in a safe area 3.5 Monitor log movement and stop for corrective action when difficulties occur 3.6 Maintain control of movement using signalling systems until payload is in clear sight of yarder operator 3.7 Record and report breakout process and equipment faults in line with site procedures
4. Assist with line shifts	4.1. Clear all logs to be hauled with existing line position before line shift is initiated 4.2. Notch stumps in line with code requirements for the rigging method to be used 4.3. Pull slack on all lines prior to release of existing rigging

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4. Dismantle rigging components from the existing line, check and set up on new line 4.5. Move obstructions which may cause binding or damage during hauling 4.6. Rig spars, tail trees and intermediate supports in line with site procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Reading	• Interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders

Writing	• Complete accurate reports on breakout process and equipment faults
Oral communication	• Ask questions and actively listen to clarify contents of work plans • provide clear, unambiguous verbal and non-verbal haul signals
Numeracy	• Identify quantities of logs within work plans and complete basic calculations of time required to complete activities • Complete routine calculations to determine lift capacity for rigging • Complete routine calculations to plan extraction pattern for number and size of logs to be hauled
Interact with others	• Monitor harvest team activities and provide directions to ensure efficient and safe log recovery
Get the work done	• Identify operational, environmental and equipment problems and implement appropriate responses • Select, set up, use and dismantle appropriate rigging equipment for log recovery

Assessment Requirements for FWPHAR3201 Monitor log recovery (rigging slinger)

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- safely and efficiently monitored log recovery

In doing the above job, the individual has:

- performed rigging slinger operations to recover felled logs in line with a work order and within prescribed organisational tolerances
- planed the breakout process in line with site conditions
- monitored log recovery using one or more of the following cable systems:
  - high lead (no skyline)
  - standing skyline
  - running skyline
- assisted in shifting lines in line with the hook tender's instructions.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- content and application of applicable state or territory code of practice relevant to log recovery activities
- key features of varying site conditions and effects on log recovery, including:
  - fallen trees
  - general forest lean
  - ground growth
  - ground hazards and obstacles

© Commonwealth of Australia, 2025 Skills Insight

    - ground slope
    - density of trees
    - wet and adverse weather conditions
    - wind speed and direction
- environmental protection practices for forest and forest farm settings, including:
    - safe disposal of waste material
    - cleaning of plant, tools and equipment
- characteristics of trees
- industry standard lengths for logs
- techniques used by rigging slingers in the log recovery process, including:
    - log extraction methods
    - cable logging techniques
    - rigging techniques
- key features of varying signal systems used for log recovery activities, including:
    - talk-e-tooter signals
    - two-way radio
    - visual signals
    - whistle signals
- typical industry chain of command for communication of information and instruction
- purpose, features and operation of cable logging system components, including:
    - rigging components
    - cable systems: high lead (no skyline), standing skyline, running skyline
- organisational procedures specific to log recovery activities
- workplace health and safety with particular emphasis on use of equipment, including:
    - communication reporting lines
    - recording and reporting breakout process and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
    - cable systems
    - yarder and anchors
    - rigging equipment for log recovery
    - signal system equipment
    - personal protective equipment suitable for log recovery activities
- specifications:

© Commonwealth of Australia, 2025 Skills Insight

- organisational policies and procedures relevant to monitoring log recovery
- work plan for log recovery activities with specific instructions for the work site
- applicable state or territory code of practice
- template reports for recording breakout process and equipment faults

- relationships:
  - a team of choker setters and yarder operators with whom the individual can interact.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR3222 Use on-board computer systems for forwarder

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to use on-board computer technology and software for forwarders to optimise loading processes after processing and extraction in a commercial forest harvesting environment.

The unit applies to individuals who work as forwarder operators. Operators generally work under broad direction to complete routine activities related to harvesting operations and take responsibility for their work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting (HAR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Start up and shut down the on-board computer	1.1 Start up the on-board computer and respond to display prompts by pressing the appropriate buttons 1.2 Edit settings in work mode display to update information about

© Commonwealth of Australia, 2025 Skills Insight

	operator and the start and end of the shift 1.3 Check that a connection exists between the weight scale and the Bluetooth modem where fitted 1.4 Use mouse buttons and keyboard to shut down the computer
2. Create an active site file	2.1 Use menus and fields to create a new site, select, disable or add tree assortments to the new site and press button to complete file set up 2.2 Use work mode feature and icons to view basic information about machine, engine and auxiliary functions 2.3 Use quick adjustment menu and/or the setting mode to select and adjust parameter values for machine movements 2.4 Return to work mode display and select option to start new load
3. Register load / production information	3.1 Identify on screen that GPS system is active to ensure it runs correctly and report faults to appropriate personnel in line with workplace procedures 3.2 Start loading operations and use registration button and software functions to register and edit load or production parameters according to machine configuration and equipment profile 3.3 Use the weight menu to set-up or edit the weight factors and default volumes of a maximum full load for specific tree assortments 3.4 Use work mode display and system messages to view information about loading and standard machine operation according to load parameters and machine configuration
4. Calibrate machine weight scale where fitted	4.1 Use calibration menu and methods to conduct regular reference calibration of Active Load Space pressure sensors to ensure accuracy of weighing measurements 4.2 Use calibration menu and methods to conduct regular dynamic and static reference calibration of the boom weight scale to ensure accuracy of weighing measurements 4.3 Regularly check and reset grapple to the ‘zero point’, by using reset button on the keyboard panel 4.4 Check the static calibration factor for possible changes in weight calibrations 4.5 Identify and report faults and errors related to the on-board computer system
5. Store, access and retrieve production data	5.1 Use software menu, sub-menus and display prompts to end production site file and save on a data storage device 5.2 Transfer files between computers or via mobile devices and

	applications

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• read user manual for machine's on-board computer system
Oral Communication	• interact verbally and non-verbally with technical personnel using communication means to remediate computer errors or resolve matters about electronic files and data • use appropriate vocabulary including technical language directly relevant to role
Numeracy	• interpret file variables including weight factors and volumes of load
Navigate the world of work	• understand main tasks, responsibilities and boundaries of own role
Interact with others	• use modes of communication suitable to purpose to confirm and clarify understanding • communicate and report operational task and safety information to relevant personnel • participate in conversations relevant to role by responding and explaining as required
Get the work done	• recognise and respond to routine problems • plan and organise own work activities and resources

Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- created an active site file for loading operation
- registered load and production information at start of loading operation
- set-up and/or edited the weight factors and default volume settings
- used software settings and calibration methods to conduct accurate calibrations of the weight scale and sensors where fitted
- edited parameter values for machine movements
- ended production and saved and transferred file for the production site by using a data storage system or email or mobile devices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- components of wireless weighing system and its mode of operation where fitted
- software and files used with on-board computers including basic features and applications
- navigating on-board computer menus, sub-menus and fields
- fields and data inputs required to start the loading operation
- setting-up and editing the weight factors and default volumes of a maximum load for a variety of tree assortments
- settings and methods for editing parameter values for machine movements
- methods to calibrate the weighing system and improve accuracy of measurements
- factors that affect accuracy of the weighing measurement
- ending production and saving and transferring files using a data storage system or mobile app

© Commonwealth of Australia, 2025 Skills Insight

- methods to identify faults related to the on-board computer system and global positioning system (GPS).

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a logging site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - forwarder equipped with on-board computer and weighing system
  - data storage system or mobile system/app for the purpose of saving and transferring production files
  - personal protective equipment required in harvesting operations
- specifications:
  - access to user manual for the on-board computer system

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW2211 Round softwood logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to shape debarked logs into round poles to a set diameter for further downstream processing using a machine that shapes the debarked log into a round pole.

The unit applies to individuals who round softwood logs in a timber processing plant.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for rounding logs	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review environmental protection procedures and workplace health and safety requirements, including use of personal protective

	equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with rounding operations 1.4 Identify and implement workplace procedures for minimising waste material and maximising energy efficiency 1.5 Assess logs to be rounded for diameter, species, faults and moisture content
2. Round logs	2.1 Use equipment according to workplace safety procedures, manufacturer instructions and environmental protection practices 2.2 Complete pre-start-up checks to ensure operational effectiveness 2.3 Feed material into the machine at feed rate according to workplace procedures 2.4 Maintain rounding process and adjust to maximise feed rate 2.5 Check rounding process and conveyors regularly, adjusting to maintain desired quality and output 2.6 Reject and dispose of sub-standard logs according to environmental protection practices 2.7 Direct rounded logs to the designated area according to work order 2.8 Identify routine processing faults, and resolve or report to appropriate personnel
3. Complete operator maintenance	3.1 Lock out equipment according to workplace safety procedures 3.2 Check cutters for bluntness or damage 3.3 Remove and replace cutters according to manufacturer recommendations 3.4 Dispose of used cutters according to environmental protection practices 3.5 Complete basic non-specialist equipment maintenance, including greasing and lubricating moving parts and inspecting for wear or damage 3.6 Keep machine clear of dust and debris according to workplace safety procedures 3.7 Record and report equipment faults and maintenance requirements to appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Complete handover	4.1 Complete production and quality records 4.2 Brief and hand over documentation to changeover operator

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts key information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Identifies quantities of required material within work orders, and counts number of logs to be rounded • Performs routine calculations to determine log diameters • Calculates the feed rate to optimise quality and quantity of production output
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW2211 Round softwood logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least on one occasion, rounded softwood logs using a machine that shapes the debarked log into a round pole, and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- identified, assessed and taken actions to mitigate risks and hazards associated with rounding activities
- rounded softwood logs following workplace policies and procedures
- stored poles according to workplace requirements
- completed each of the following basic non-specialist maintenance activities on at least one occasion:
  - checked the operation of emergency stop buttons and lock-out systems
  - cleaned the machine of wood chips and sawdust
  - replaced blunt cutters
  - inspected machine parts for wear or damage, including guards
  - greased and lubricated moving parts
- completed handover functions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of equipment used to round softwood logs:
  - measuring equipment
  - rounding plant
  - scanners that calibrate dimension sizes
  - back-up computer device

© Commonwealth of Australia, 2025 Skills Insight

  - automated conveyor system to transport logs to and from the rounding plant
  - maintenance tools and equipment for cutters
- methods used to assess logs for:
  - diameter
  - curvature
  - faults
  - species
  - moisture content
- typical work flow processes for rounding logs
- typical flow of log supply in and out of the production area
- range of feed rates and how they affect production output and finished quality of rounded logs
- methods for assessing and rectifying typical scanner problems:
  - tangles
  - sorting pockets
  - monitor failure
- methods for assessing cutter condition
- log rounding systems, processes, feed rates and finish
- characteristics of timber
- storage systems and labelling
- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- typical log defects and how they affect ability to produce quality rounded softwood logs:
  - warp
  - wane
  - curvature
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- workplace procedures specific to rounding logs:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting processing problems and equipment faults.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - measuring equipment
  - moisture probes
  - rounding plant
  - automated conveyor system to transport logs to and from the rounding plant
  - maintenance tools and equipment for cutters
  - consumable cutters
  - PPE suitable for producing sawing and moving flitches and cants
  - a selection of logs
- specifications:
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for rounding logs and despatch to downstream processing
  - template documents for recording equipment faults and maintenance requirements
  - workplace procedures for rounding logs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3230 Perform primary log breakdown

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to operate an automatic, manual or semi-automated log breakdown system, namely a headrig saw centre and accompanying conveying systems, to convert logs into flitches or cants.

The unit applies to individuals who operate breakdown equipment to convert logs into flitches or cants for re-sawing in a timber processing plant.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria

Assessment Requirements for FWPSAW3230 Perform primary log breakdown

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- broken down logs to produce flitches or cants according to a work order
- monitored the performance of breakdown equipment
- implemented routine maintenance procedures for breakdown equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of risk and hazards and mitigation measures associated with breaking down logs
- workplace procedures specific to breaking down logs:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting of processing problems and equipment faults
- environmental protection practices specific to timber processing plants:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber

FWPSAW3231 Perform secondary log breakdown

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to perform secondary log breakdown by sawing flitches and cants to produce edged (cut lengthwise) and trimmed (cut widthwise) boards.

The unit applies to individuals who saw flitches and cants to produce edged boards in a timber processing plant.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Implement routine maintenance procedures for sawing equipment	4.1 Carry out preventative maintenance and cleaning schedule for sawing equipment according to workplace procedures 4.2 Coordinate saw changes with other staff and make adjustments to breakdown equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts information from manufacturer procedures to verify safe lock-out procedures when performing routine equipment maintenance • Determines work specifications by identifying information in work orders
Writing	• Completes basic written reports for maintenance staff on observed equipment faults • Completes hazard identification forms
Oral communication	• Asks open and closed questions to clarify work instructions • Responds to questions on routine matters related to output quality from quality control personnel
Numeracy	• Counts number of cants and flitches to be sawn • Performs basic calculations to determine feed rate to optimise quality and quantity of production output
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Participates in conversations with team members relevant to the implementation of maintenance procedures
Get the work done	• Identifies and responds to routine problems • Plans and organises own work activities and resources

Assessment Requirements for FWPSAW3231 Perform secondary log breakdown

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- operated sawing equipment to break down flitches and cants to produce edged (cut lengthwise) and trimmed (cut widthwise) boards
- monitored the performance of sawing equipment
- implemented routine maintenance procedures for sawing equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of risk, hazards and mitigation measures associated with secondary log breakdown operations
- workplace procedures specific to breaking down logs:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting of processing problems and equipment faults
- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- distinction between primary and secondary log breakdown
- basic operations that transform logs into sawn boards:
  - sawing

© Commonwealth of Australia, 2025 Skills Insight

  - edging
  - trimming
- impact of secondary log breakdown on recovery
- purpose, operating components and operation of sawing equipment
- operating parameters and capability of sawing equipment
- safety features of sawing equipment:
  - isolation procedures
  - stop button
  - lock-out switch or system
  - hold cards
  - guards
- processing constraints and potential solutions:
  - markets
  - flitch and cant supply
  - timber defects
  - product mix
  - downstream processing options
- typical workflow processes for secondary log breakdown
- hazards associated with the operation of sawing equipment:
  - moving equipment
  - dust
  - mobile plant
  - noise
- typical flow of log supply in and out of the sawing area
- range of cutting patterns used on logs to achieve maximum output of edged (cut lengthwise) and trimmed (cut widthwise) boards
- range of feed rates and how they affect production output and finished quality of boards
- characteristics of timber
- breakdown processes, feed rates and finish
- methods for assessing saw blade condition
- types of storage and labelling systems
- typical log defects and the impact on production of quality flitches and cants:
  - warp
  - wane
  - curvature
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets

© Commonwealth of Australia, 2025 Skills Insight

- types of and processes for implementing routine operator maintenance activities associated with sawing operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - automatic, manual or semi-automated sawing equipment for use in secondary log breakdown
  - PPE for the secondary log breakdown
  - a selection of cants and flitches
- specifications:
  - manufacturer instructions for equipment operation and maintenance
  - work order with specific instructions for secondary log breakdown and despatching to downstream processing
  - template documents for recording equipment faults and maintenance requirements
  - workplace policies and procedures for secondary log breakdown.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3232 Sharpen band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess the condition of narrow and wide band saw blades, set up the sharpening machine and sharpen saw blades with a grinder.

The unit applies to individuals who sharpen band saws in a saw technician workshop or sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for sharpening	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review environmental protection procedures and workplace health and safety requirements, including the use of personal protective

	equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with sharpening operations 1.4 Identify and implement workplace procedures for minimising waste material and maximising energy efficiency
2. Assess band saw blade condition	2.1 Assess condition of blade teeth and cutting performance of blade to determine the need to replace or sharpen 2.2 Measure the kerf of the teeth before sharpening to ensure compliance with workplace standards 2.3 Assess condition of prior repairs, blade teeth, set and tension
3. Set up sharpening machine	3.1 Select sharpening machine and perform pre-operational check to determine operational effectiveness of the machine 3.2 Change or dress grinding wheel as required 3.3 Adjust sharpening machine settings to suit required blade geometry, taking into account material to be sawn, speed and direction of sawing process and cutting angle for sawing 3.4 Prepare grinding coolant system according to manufacturer instructions
4. Sharpen band saw blade	4.1 Set saw blade in the sharpening machine to manufacturer recommendations 4.2 Align saw blade tooth with the machine feed mechanism 4.3 Conduct tests to ensure teeth and machine feed mechanism are aligned 4.4 Establish depth of machine cut and in-feed from blade condition 4.5 Monitor machine sharpening process to ensure correct grinding conditions and geometry 4.6 Finalise process and check the blade for sharpness, correct cutting angle and profile 4.7 Identify damaged and exhausted saw blades and dispose of these according to environmental protection practices 4.8 Package band saw for protection during return to service 4.9 Identify routine processing and equipment faults, and resolve or report to appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from operational manuals to determine safe operating procedures for sharpening machine
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Performs basic mathematical calculations to determine correct machine settings in relation to speed, pitch and angle • Performs basic mathematical calculations to measure kerf and blade gauge to calculate side clearance
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3232 Sharpen band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- sharpened one or more of the following types of saw blades:
  - narrow band saw blade
  - wide band saw blade
- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed the cutting performance of the blade, taking into account:
  - saw performance balanced against achievement of required production time
  - degree of deviation in the range of sawn products
- assessed the condition of blade teeth for:
  - sharpness of each tooth
  - damage to teeth
  - straightness of teeth
  - kerf width
- set up the sharpening machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
  - saw blade material and properties
  - impact of timber properties on saw blades
  - direction of cut
  - forces on a blade

  - heat removal
  - sawtooth configuration
- purpose, features and operation of band saws for which blades are sharpened
- features and names of different parts of band saw blades
- purpose, features and operation of tools and equipment used to sharpen band saw blades:
  - sharpening machines
  - grinding wheels
- importance of sharpening and setting teeth and tension to match requirements for:
  - characteristics of various materials sawn
  - speed of the sawing process
  - direction of the sawing process
  - hook/rake angles for sawing
  - saw blade specifications
- methods for:
  - assessing saw blade condition
  - sharpening blades to specified requirements
  - grinding teeth to a specified profile
  - tensioning blades to specified requirements
  - aligning saw teeth
- tooth pitch and tooth angles at which blades are sharpened (blade geometry)
- range of speeds at which abrasive wheels can be operated without damaging blades
- coolants used in the sharpening process, and impact on efficient sharpening
- types of risk and hazards, and mitigation measures associated with sharpening band saw blades
- workplace policies and procedures specific to sharpening band saw blades:
  - workplace health and safety, with particular emphasis on use of personal protective equipment (PPE) and safe manual handling techniques
  - communication reporting lines
  - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in sawmills:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a saw technician workshop, a sawmill or an environment that accurately represents workplace conditions

© Commonwealth of Australia, 2025 Skills Insight

- resources, equipment and materials:
  - sharpening machines
  - grinding wheels
  - grinding coolant where applicable
  - band saws for which blades are to be sharpened
  - one or more of the following types of band saw blades to be sharpened: wide band saw blades used for processing timber products, narrow band saw blades used for cutting both ferrous and non-ferrous materials
  - PPE suitable for sharpening band saw blades
- specifications:
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for sharpening band saw blades
  - template documents for recording equipment faults and maintenance requirements
  - workplace procedures for sharpening band saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSAW3233 Sharpen circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- set up and operated a manually controlled grinder to sharpen one or both of the following types of circular saw blades:
  - circular crosscut blades
  - rip saw blades.

In doing the above job, the individual has:

- reviewed work order to determine job requirements
- followed relevant workplace health and safety and environmental protection procedures
- removed and replaced circular saw blades from the sawing equipment
- assessed cutting performance and determined need to replace or sharpen blades
- assessed condition of blade teeth, including:
  - sharpness of tooth cutting edges
  - angles within the tooth profile
  - tooth strength
  - damage to teeth
  - pitch
  - gullet depth
- sharpened circular saw blades according to workplace procedures
- cleaned work area and equipment
- identified routine processing and equipment faults, and resolved or reported to appropriate personnel.

FWPSAW3234 File and set saw blades for hand saws and circular saws

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to file and set saw blades for hand saws and circular saws. This activity includes removing and replacing saw blades, positioning blades in jigs, stands or vices, producing bevels along the back clearance angles of teeth, checking blade clearance requirements and setting teeth to workplace requirements.

The unit applies to individuals who file and set saw blades in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPSAW3234 File and set saw blades for hand saws and circular saws

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- removed and replaced saw blades from a hand saw, circular saw or both
- assessed saw blade condition through checking for each of the following:
  - cracks
  - altered state of tension in a blade from excessive heat during cutting
  - weaknesses or damage caused through the stress of bending teeth
- bevelled teeth and assessed bevel lengths, widths, angles and surface texture according to workplace procedures and production requirements
- set teeth and assessed conditions in line with standard operating procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of saws for which blades are filed and set:
  - hand saws
  - circular saws
- features and names of different parts of saw blades
- purpose, features and operation of tools and equipment used to file and set saw blades:
  - jigs
  - vices
  - setting instruments
  - levers and gauges

© Commonwealth of Australia, 2025 Skills Insight

  - automatic or hand-held grinders
  - bevel files
- importance of setting teeth to match requirements for:
  - characteristics of various materials sawn
  - speed of the sawing process
  - direction of the sawing process
  - cutting angle for sawing
  - saw blade specifications
- methods for:
  - removing saw blades from saws
  - assessing saw blade condition
  - setting teeth to a specified profile
  - grinding and bevelling teeth to required shape, tolerance and pitch
  - compensating for the effects of spring back
- back clearance and face angles at which blades are bevelled (blade geometry)
- characteristics of metal used in saw blades
- causes and consequences of spring back
- types of risk and hazards and mitigation measures associated with filing and setting saw blades
- workplace policies and procedures specific to filing and setting saw blades:
  - workplace health and safety, with particular emphasis on equipment lock-out, the use of personal protective equipment (PPE) and safe manual handling techniques
  - communication reporting lines
  - recording and reporting of processing and equipment faults
- environmental protection practices applicable to saw technician workshops or timber processing facilities:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a saw technician workshop, a timber processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - tools and equipment used to file and set saw blades: jigs, vices, setting instruments, levers and gauges, automatic or hand-held grinders, hand files
  - one or more of the following types of saws for which the saw blade is to be filed and set: hand saws, circular saws

FWPSAW3235 Recondition saw guides

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to review, adjust, grind or machine and replace guides in band saws to assure smooth and straight running.

The unit applies to individuals who recondition guides in a sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for reconditioning	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Identify, assess and take actions to mitigate risks and hazards associated with reconditioning saw guides 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Select appropriate repair and maintenance equipment, and check for operational effectiveness according to manufacturer recommendations 1.6 Plan reconditioning process according to work order
2. Recondition guides	2.1 Review condition of saw guides to assess wear 2.2 Select and position guides in guide holding attachment ready for reconditioning 2.3 Examine, dress, replace or sharpen tooling according to safety procedures 2.4 Set up reconditioning equipment 2.5 Remove scored material from the guide by grinding or machining 2.6 Select grinding or machining speeds and feeds to avoid burn marks on guides 2.7 Recondition guides to meet geometric and lubrication requirements of sawing equipment
3. Safely store guides ready for use	3.1 Segregate and dispose of unserviceable guides according to environmental protection practices 3.2 Identify and report low stock and shortages of new guides according to workplace procedures 3.3 Identify routine processing and equipment faults, and resolve or report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Extracts essential information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Completes precise calculations to determine the required tolerance for positioning guides and to reface guides to the correct size and angle • Applies standard units of measurement in describing correct pitch and angle of guides • Uses basic estimation skills to determine grinding wheel speed
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3235 Recondition saw guides

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed condition of the saw guide
- machined saw guide
- adjusted saw guide
- safely stored guides for use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of band saws for which guides are reconditioned
- features and names of different parts of guides and carriers
- purpose, features and operation of tools and equipment used to recondition guides and spacers:
  - grinding equipment
  - metal lathes
  - milling machines
  - router and jig
- importance of reconditioning worn guides and spacers to the specified profile for continued straight and smooth running of saw blades
- methods for:
  - assessing the condition of guides
  - grinding guide surface to restore it to a smooth flat surface using grinding equipment

© Commonwealth of Australia, 2025 Skills Insight

    - machining guide surface to restore it to a smooth flat surface using metal lathes or milling machines
- basic knowledge of physics of sawing:
    - saw blade material and properties
    - impact of timber properties on saw blades
    - direction of cut
    - forces on a blade
    - heat removal
- angles at which guides are ground or are machined (geometry)
- range of speeds at which grinders and machines can be operated without damaging guides and spacers
- types of risk and hazards and mitigation measures associated with reconditioning guides
- workplace policies and procedures specific to reconditioning guides:
    - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
    - communication reporting lines
    - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in sawmills:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - one or more of the following tools and equipment used to recondition guides: grinding equipment, metal lathe, milling machines and router and jig
    - band saws with guides to be reconditioned
    - replacement guides
    - PPE suitable for reconditioning guides
- specifications:
    - template documents for recording processing and equipment faults
    - manufacturer instructions for use, repair and maintenance of equipment
    - work order with specific instructions for reconditioning guides in specified equipment
    - workplace procedures for reconditioning guides.

FWPSAW3236 Sharpen tipped circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess the tipped circular saw blade condition, set up for sharpening, and sharpen saw blades with an automated grinder.

The unit applies to individuals who sharpen tipped circular saws in a saw technician workshop or sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for sharpening	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

FWPSAW3237 Level and tension circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to level and tension circular saw blades for circular saws and hot saws. This activity includes inspecting saws, repairing defects such as dished blades, damaged teeth and cracks, levelling ridges and lumps, and tensioning the saw.

The unit applies to individuals who level and tension circular saw blades in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPSAW3237 Level and tension circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- levelled and tensioned circular saw blades for one or both of the following types of saws:
  - circular saw
  - hot saw
- in doing the above job:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - removed and replaced circular saw blades from the saw
  - assessed circular saw blade conditions in line with standard operating procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
  - saw blade material and properties
  - impact of timber properties on saw blades
  - direction of cut
  - forces on a blade
  - heat removal
  - sawtooth configuration
- purpose, features and operation of saws for which blades are levelled and tensioned:

FWPSAW3238 Replace Stellite tips

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to remove worn Stellite tips from saw blades and to weld, anneal, clean and prepare replacement tips for grinding and return to service.

The unit applies to individuals who replace Stellite tips in a saw technician workshop or sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

FWPSAW3239 Assess and maintain wide band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to level, tension, back gauge, weld and replace teeth on wide band saw blades that are over 70mm in width.

The unit applies to individuals who maintain wide band saw blades in a forest and forest product factory setting.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with maintaining wide band saw blades 1.4 Identify and implement workplace procedures for minimising waste material and maximising energy efficiency 1.5 Select appropriate tools and equipment, and check for operational effectiveness according to manufacturer recommendations 1.6 Plan maintenance process according to work order and workplace requirements
2. Assess saw blade condition	2.1 Remove wide band saw blade from machinery 2.2 Handle saw blade to avoid damaging teeth 2.3 Clean foreign material from blade surfaces 2.4 Inspect saw blade to assess the condition of teeth, tips and saw blade 2.5 Check and mark teeth or tips requiring repair or replacement 2.6 Declare saw blades unserviceable where hazardous defects are found, or blade has become too narrow for use 2.7 Segregate and dispose of unserviceable saw blades according to workplace procedures and environmental protection practices
3. Level, tension and back gauge saw blade	3.1 Use a straight edge to identify lumps and ridges across and along saw blade on both sides of the blade 3.2 Remove ridges or lumps progressively by levelling the saw blade with hammers, levelling attachments or stretcher rolls 3.3 Control rolling patterns to induce the correct amount of tension into the saw blade 3.4 Use a tension gauge of appropriate curvature to verify the saw blade has sufficient tension, and tension is correctly positioned across the blade and is evenly distributed along the length of the blade 3.5 Use an accurate back-gauge to check back length, and roll nonconforming areas to adjust back length to workplace tolerance
4. Repair teeth and blade cracks	4.1 Place saw blade in welding jig for heat application and welding activities 4.2 Check amount of damaged tooth to be removed or crack to be repaired and mark weld line

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.3 Remove metal to proposed line, prepare the edge for welding and clean burn marks 4.4 Apply heat and pressure to prepare worn, broken or ground surface for metal build-up or replacement 4.5 Build up or replace teeth or cracked area using material and processes that ensure specified metal penetration and density 4.6 Use weld run-off tabs to limit stress and hollows at edges of the saw blade 4.7 Grind or file teeth or cracks to required shape, tolerance and pitch 4.8 Dispose of saws with irreparable teeth, tips or blades according to workplace procedures and environmental protection practices 4.9 Identify routine processing and equipment faults, and resolve or report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Uses a gauge to measure results of hammering and/or rolling the blade
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3239 Assess and maintain wide band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- removed and replaced saws from equipment
- assessed saw condition
- levelled, tensioned and measured the back-crown of the saw blade
- repaired teeth and blade cracks
- used welding processes and materials to produce:
  - weld beads that provide full penetration fusing together adjacent metal parts
  - welds free from any faults that would have the potential to weaken the strength and endurance capability of the weld deposit and weld zone.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of wide band saw blade for which repairs are completed
- features and names of different parts of wide band saw blades
- purpose, features and operation of tools and equipment used to repair and maintain wide band saw blades:
  - hammers
  - stretcher or tension rolls
  - levelling rolls
  - tension gauges and straight edges, back-gauges
  - welding equipment and welding materials

© Commonwealth of Australia, 2025 Skills Insight

- importance of levelling and tensioning blades and applying curvature to match workplace requirements for:
  - characteristics of various materials sawn
  - speed of the sawing process
  - direction of the sawing process
  - saw blade specifications
- methods for:
  - removing saw blades from band saws
  - assessing saw blade condition
  - levelling and tensioning blades to specified requirements
  - assessing curvature
  - welding to build up and replace teeth
  - grinding and filing rebuilt or replaced teeth to required shape, tolerance and pitch
- basic knowledge of physics of sawing:
  - saw blade material and properties
  - impact of timber properties on saw blades
  - direction of cut
  - forces on a blade
  - heat removal
  - sawtooth configuration
- characteristics of metal used in wide band saw blades, and range of forces which can be applied without damaging blades
- types of risk and hazards and mitigation measures associated with maintaining wide band saw blades
- workplace procedures specific to maintaining wide band saw blades:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
  - communication reporting lines
  - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in sawmills:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions

© Commonwealth of Australia, 2025 Skills Insight

- resources, equipment and materials:
  - hammers
  - stretcher or tension rolls
  - levelling rolls and attachments
  - tension gauges and straight edges, back-gauges
  - welding equipment
  - heating and annealing equipment
  - welding jigs
  - run-on and run-off tabs
  - punches
  - engineers' hammers
  - angle grinders
  - sanders
  - hand files
  - abrasive paper or cloth
  - welding material
  - wide band saw blades to be maintained
  - PPE suitable for repairing and maintaining wide band saw blades
- specifications:
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for repairing wide band saw blades
  - documents, spreadsheets and proformas for recording processing and equipment faults
  - workplace procedures for maintaining wide band saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3240 Assess and maintain band saw wheels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to fit special wheel dressing equipment to band mill wheels, resurface the wheel profiles and re-assemble the band mill in readiness for production.

The unit applies to individuals who recondition band saw wheels in forest and forest product factory settings.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders

Numeracy	• Uses measuring equipment to take wheel measurements accurately
	• Performs precise calculations to determine wheel alignment, alignment of saw guides to wheel faces and wheel thickness
	• Uses standards units of measurement for speed and dimension
	• Uses basic mathematical skills to:
	  • calculate the position of a crown given wheel face width
	  • calculate the position of a crown given maximum and minimum saw blade widths
	  • calculate crown height given wheel diameter or circumference

Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3240 Assess and maintain band saw wheels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed condition of the band saw wheels
- resurfaced the faces of the band saw wheels to the specified requirements
- re-assembled the band saw components
- set up a band saw blade on the saw to the specific alignment
- tested operational effectiveness of the band saw.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of the band saw wheels
- features and names of different parts of band saws
- purpose, features and operation of tools and equipment used to recondition band saw wheels:
  - resurfacing equipment
  - measuring equipment
- importance of aligning band saw wheels for continued accuracy during band saw operation
- methods for:
  - assessing the condition of band saw wheels
  - resurfacing the faces of the band saw wheels to specified requirements
  - re-assembling band saw components
  - setting up band saw blades on the saw to a specific alignment

© Commonwealth of Australia, 2025 Skills Insight

    - testing operational effectiveness of band saws
- wheel profiles and appropriate tolerances
- range of speeds at which resurfacers can be operated without damaging band saw wheels
- types of risk and hazards and mitigation measures associated with resurfacing band saw wheels
- workplace procedures specific to resurfacing band saw wheels:
    - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
    - communication reporting lines
    - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining equipment in sawmills:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - resurfacing or wheel grinding equipment
    - measuring equipment
    - band saws, including the entire mechanical structure and componentry that make up the machine
    - band wheels to be resurfaced
    - PPE suitable for reconditioning band saw wheels
- specifications:
    - manufacturer instructions for use, repair and maintenance of equipment
    - work order with specific instructions for resurfacing band saw wheels in specified equipment
    - template documents for recording processing and equipment faults
    - workplace procedures for reconditioning band saw wheels.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSAW3241 Set up and operate production saws used in sawmill operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- set up, aligned, and maintained one or more of the following types of sawing machines according to a specific work order:
  - circular saw
  - band saw.
- In doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - identified, assessed and taken actions to mitigate risks and hazards associated with working with sawing machines
  - used personal protective equipment (PPE), lock-out procedures and safe manual handling techniques throughout the work
  - performed routine maintenance of sawing machine
  - recorded production outcomes and equipment faults or malfunctions and took corrective actions according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, characteristics, uses and limitations of the following sawing machines used in sawmill operations:
  - circular saw
  - band saw
- sawing processes and techniques
- characteristics of materials and uses of products produced

© Commonwealth of Australia, 2025 Skills Insight

- methods for:
  - setting up sawing machines
  - aligning sawing machines
  - maintaining sawing machines
  - operating sawing machines
- conditions related to saw blades and accuracy of cuts that indicate that sawing machine is out of alignment
- identification of alignment factors that will impact on the performance of the machine centre
- procedures for reporting machinery faults and material defects
- types of risk and hazards and mitigation measures associated with the work task
- legal, ethical and work health and safety requirements specific to the work task
- awareness of environmental sustainability issues as they relate to the work task.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - sawing machines used in sawmilling operations, including circular saws and band saws
  - tools, equipment and testing devices used in setting up, aligning, operating and maintaining sawing machines
  - PPE for setting up and operating sawing machines in sawmill operations
- specifications:
  - template documents for recording production outcomes
  - manufacturer instructions for setting up, aligning, operating and maintaining sawing machines
  - work order with specific instructions for setting up, aligning, operating and maintaining sawing machines
  - workplace procedures for setting up, aligning, operating and maintaining sawing machines.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3242 Treat timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to chemically treat timber, including planning for chemically treating timber, safely handling and storing chemicals, operating treatment equipment, and undertaking basic maintenance of treatment equipment.

The unit applies to individuals who treat timber in a timber treatment plant or sawmill. Specific job roles can include treatment plant operator, kiln operator or timber products technician.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication and may differ according to jurisdiction.

In Victoria, to comply with licence/permit requirements, organisations must ensure that employees working with copper chrome arsenate (CCA) demonstrate competence in this unit (FWPSAW3242 Treat timber), or that persons working with CCA do so under the direct supervision (sight and sound) of a trained and authorised person.

For regulatory information and details in other states and territories, refer to the relevant state or territory licensing body.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for treating timber	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with treating timber 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Obtain chemicals and type and quantity of timber for treatment from storage 1.6 Plan treating cycles according to work order
2. Use equipment to treat timber	2.1 Complete pre-start-up equipment checks to ensure operational effectiveness 2.2 Identify water requirements and check to ensure treatment process requirements are met 2.3 Test moisture content of timber according to workplace procedures 2.4 Check, adjust and maintain strength and volume of preservative solution at specified strength and volume 2.5 Bring treating plant to full operating condition, and regularly check operating parameters to ensure optimum output 2.6 Load timber into treatment vessel and complete treatment cycles 2.7 Brand treated timber in line with organisational procedures 2.8 Safely handle treated timber and transfer to the storage area 2.9 Record outcomes of timber treatment process, and report to appropriate personnel
3. Complete operator maintenance	3.1 Lock out equipment according to workplace safety procedures 3.2 Conduct basic routine checks and maintenance of treatment equipment according to manufacturer specifications 3.3 Store chemicals according to workplace safety procedures, and report on stock levels 3.4 Record faults or incidents related to treatment equipment and chemical use and storage, and report to appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from safety data sheets, or equivalent plain English information on safe use, handling, transport and disposal of timber treatment chemicals
Writing	• Accurately completes basic workplace forms and records for chemical stock levels, processes and equipment faults
Oral communication	• Employs active listening and questioning to clarify the content of work orders
Numeracy	• Performs basic mathematical calculations to determine routine solution strengths and retention rates for preservative solutions • Completes basic measurements of moisture content in timber • Identifies quantities of required timber within work orders, and counts numbers for treatment
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3242 Treat timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least on one occasion, the individual has:

- completed the chemical treatment process according to an individual work order for one of the following timber types:
  - timber from native species
  - timber from imported species
  - dressed timber
  - stress and non-stress graded timber
  - in-the-rough timber
  - sleepers
  - logs, rounded poles
  - beams, laminated beams
- during the treatment process, checked, adjusted and maintained the strength and volume for one of the following types of preservative solutions:
  - water-borne solutions
  - oil-based solutions
  - solvent-based solutions
- during the treatment process, complied with:
  - workplace health and safety requirements for chemically treating timber
  - environmental protection procedures for chemically treating timber
- at the completion of the treatment process, completed each of the following three tasks:
  - conducted routine operator equipment maintenance
  - safely stored chemicals
  - reported on stock levels.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of treating timber
- characteristics of timber types, effects of the treatment process and appropriate range of temperatures
- properties, at a basic level of understanding, of the following water-borne, oil-based and solvent-based chemicals used to treat timber, and their purpose:
  - creosote and modified creosote-based
  - copper chrome arsenate (CCA) salts
  - compounds of boron and fluoride salts
  - alkaline copper quaternary (ACQ)
  - light organic solvent-borne preservative (LOSP)
  - micronised copper azole (MCA or Tanalith E)
- risks and hazards associated with handling and using chemicals, and methods used to minimise these
- safety sign and symbols related to chemical use in the workplace
- typical workflow processes and techniques for chemically treating timber:
  - full cell
  - modified cell
  - empty cell
  - immersion
  - rueping
  - double vacuum
  - dip diffusion
  - vat and sprays
- methods used to brand treated timber and range of industry and organisation markings:
  - burning
  - hammer impressions
  - ink
  - tags
- purpose, features and operation of equipment used to treat timber chemically:
  - treatment cylinders
  - working tanks
  - mix tanks
  - concentrate storage tanks
  - effluent tanks
  - vacuum pump and seals
- storage layout and categories for:
  - raw materials

© Commonwealth of Australia, 2025 Skills Insight

  - storing finished timber
  - chemicals and preservative solutions
- environmental protection practices for chemically treating timber:
  - disposing of hazardous substances
  - reducing water and energy use
  - water management strategies
  - cleaning plant, tools and equipment
- workplace procedures for chemically treating timber:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), safety data sheets, handling, transporting and storing chemicals and hazardous substances, and responding to chemical-related incidents
  - communication reporting lines
  - recording and reporting chemical stock levels, processes and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber treatment plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - one or more of the following types of equipment used to treat timber chemically: treatment cylinders, working tanks, mix tanks, concentrate storage tanks, effluent tanks
  - branding equipment and consumables
  - PPE suitable for chemically treating timber
  - timber to be chemically treated
  - one or more of the following types of preservative solution: water-borne solutions, oil-based solutions or solvent-based solutions
- specifications:
  - manufacturer safety data sheets or equivalent plain English information for chemicals and preservative solutions
  - work order with specific instructions for the chemical treatment of timber
  - template documents for recording chemical stock levels, processes and equipment faults
  - workplace procedures for chemically treating timber.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. A suitably licensed person must be present to monitor and supervise the handling of CCA during assessment.

FWPSAW3243 Produce sawn green boards

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to re-saw green timber boards to width and on the cant with sawing machinery to optimise its conversion and usability.

The unit applies to individuals who saw green boards in a timber processing plant.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for re-sawing green timber boards	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with sawing operations 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material and cleaning tools and equipment, and maximising energy efficiency 1.5 Plan timber conversion and saw set-up in line with work order 1.6 Acquire the type, quantity and quality of material to be cut from the storage location
2. Produce green timber boards	2.1 Set up saw, carriage and feeding system according to workplace safety procedures, manufacturer instructions and environmental protection practices 2.2 Check the operational capability of saw and equipment and adjust regularly to suit conversion plan and product sizes and tolerances according to work order 2.3 Monitor timber quantity to ensure a constant supply to the saw 2.4 Operate saw and equipment while maintaining feed rate to optimise production without damaging timber or saw blade 2.5 Reuse, recycle or dispose of incorrect cuts, off-cuts and sub-standard timber according to workplace and environmental protection practices 2.6 Stack timber safely according to work order 2.7 Identify routine processing problems, and resolve or report to appropriate personnel 2.8 Record and report production output
3. Complete operator maintenance	3.1 Lock out equipment according to workplace safety procedures 3.2 Check saw blades for bluntness or damage 3.3 Remove and replace saw blades according to manufacturer recommendations 3.4 Dispose of used blades according to workplace and environmental protection practices 3.5 Complete basic non-specialist maintenance for equipment 3.6 Keep machine clear of dust and debris according to workplace safety procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.7 Record and report equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify the content of work orders
Numeracy	• Uses standard units of measure when using measuring equipment, determining order sizes and setting up saws to achieve correct depth, width and thickness of the cut • Performs basic arithmetic calculations to count numbers of flitches or cants to be sawn, and calculates feed rate
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3243 Produce sawn green boards

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed relevant workplace health and safety and environmental protection procedures
- identified, assessed and taken actions to mitigate risks and hazards associated with re-sawing timber
- set up and operated sawing equipment to produce sawn green timber boards
- produced sawn green boards for one or more of the following types of timber according to an individual work order prescribing different lengths, tolerances and a number of boards for each job:
  - hardwood
  - softwood
  - native timber species
  - imported timber species
- used one or more of the following types of saws:
  - power operated, automatic feed controlled ripping saws
  - saws with adjustable cant (sloping table)
  - saws with one blade
  - rip saws
  - table saws
  - bench saws
- stacked batches of cut timber in storage location according to common size, length, width and cant
- completed the following basic non-specialist operator maintenance activities:
  - cleaned the machine of wood chips and sawdust
  - replaced blunt saw blades, if required
  - inspected machine parts for wear or damage, including guards

© Commonwealth of Australia, 2025 Skills Insight

- greased and lubricated moving parts
- checked the operation of emergency stop buttons and lock-out systems
- recorded and reported production output, equipment faults and maintenance requirements to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- typical timber defects and the impact on production of quality sawn timber:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- typical workflow processes for sawing green timber boards
- typical flow of flitch and cant supply into the sawing area
- range of cutting patterns used on green flitches and cants to achieve maximum output of green timber boards
- range of industry standard lengths, cross-sections and tolerances, and applicable terminology for green timber
- range of feed rates and impact on production output and finished quality of green timber boards
- storage layout and categories for stacking finished green timber boards
- purpose, features and operation of measuring equipment used in the production of sawn green timber boards
- purpose, features and operation of saws:
  - power operated, automatic feed controlled ripping saws
  - saws with adjustable cant (sloping table)
  - saws with one blade
  - rip saws
  - table saws
  - bench saws
- purpose, features and operation of maintenance tools and equipment for saws
- methods for assessing saw blade condition
- manual handling techniques
- environmental protection practices for sawing operations:
  - cleaning plant, tools and equipment
  - criteria and processes for disposing of, recycling and reusing timber
  - minimising waste material and maximising energy efficiency

© Commonwealth of Australia, 2025 Skills Insight

- processes for implementing routine operator maintenance activities associated with sawing operations
- workplace procedures specific to producing sawn green timber boards:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and manual handling
  - communication reporting lines
  - recording and reporting production output, processing problems and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - measuring equipment
  - saws, including one or more of the following: power operated, automatic feed controlled ripping saw, saw with adjustable cant (sloping table), saw with one blade, rip saw, table saw, bench saw
  - maintenance tools and equipment for saws
  - manual handling equipment
  - consumable saw blades
  - PPE suitable for producing sawn green boards
  - a diverse, comprehensive and commercial range of green flitches and cants
- specifications:
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for cutting green timber boards
  - template documents for recording equipment faults and maintenance requirements
  - workplace procedures for producing sawn green boards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3244 Align sawing production systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to align chipper heads and circular or band sawing machines, including the feeding system, and prepare machines for return to production.

The unit applies to individuals who align sawing production systems in a sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety requirements, including the use of personal protective equipment, equipment lock-out and safe

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with aligning sawing production systems 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Select appropriate tools and equipment for the work task and check for safety and operational effectiveness according to manufacturer specifications 1.6 Access and interpret machine records and manufacturer manuals, and assess machine performance
2. Conduct shutdown	2.1 Implement equipment lock-out procedures according to workplace safety procedures and manufacturer instructions 2.2 Remove, replace and temporarily store mechanical components to provide access to alignment parts 2.3 Remove, replace and temporarily locate guides 2.4 Keep the work area clear of dust, off-cuts and debris according to workplace safety procedures
3. Align chipper heads	3.1 Align chipper head and feed system components according to manufacturer instructions 3.2 Check chipper head for free operation according to manufacturer instructions 3.3 Replace blades and knives and prepare machine for return to production 3.4 Record and report corrective actions that are taken to realign chipper heads
4. Align sawing machines	4.1 Identify conditions related to saw blades and accuracy of cuts that indicate that sawing machine is out of alignment 4.2 Check alignment of the sawing machine according to manufacturer and workplace procedures 4.3 Establish current alignment of sawing machine, identifying corrective actions required 4.4 Align machine to infeed and outfeed system according to manufacturer instructions

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.5 Align feed systems components to the line of feed according to manufacturer instructions 4.6 Align guiding system to the line of feed according to manufacturer instructions 4.7 Align saw blades to the line of feed according to manufacturer instructions 4.8 Replace all tools and machine components and re-assemble machine for return to production 4.9 Record and report corrective actions that are taken to realign sawing machine

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts essential information from complex technical documents and manuals to determine safe alignment procedures
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of equipment history records
Numeracy	• Performs precise mathematical calculations to determine the correct alignment of key parts of the sawing system according to specified settings • Uses basic mathematical symbols and conventions in completing workplace reports related to alignment activities
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3244 Align sawing production systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- aligned the following types of sawing production systems:
  - chipper head
  - circular and band sawing machines and feed systems including line bars and carriages
- in doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - implemented equipment shutdown procedures
  - assessed the performance of sawing machine and system
  - re-assembled sawing production systems and tested for operational effectiveness
  - identified routine processing and equipment faults and resolved or reported to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of:
  - chipper heads
  - sawing machines and feed systems including line bars and carriages
- purpose, features and operation of tools and equipment used to align sawing production systems
- advantages and disadvantages of using laser or surveying equipment to conduct major alignments
- conditions related to saw blades and accuracy of cuts that indicate that sawing machine is out of alignment

© Commonwealth of Australia, 2025 Skills Insight

- reasons for aligning various parts of sawing systems:
  - reducing sawing deviation, vibration, and downtime
  - increasing production rates
  - improving quality of sawn finish
- identification of alignment factors that will impact on the performance of the sawing production systems
- methods for:
  - assessing machine and system performance against recovery percentages, product sizing and/or standard deviation
  - dismantling mechanical components of production machines
  - aliging chipper heads
  - aligning sawing machines
  - re-assembling production machines and testing operational effectiveness
- tools and equipment used to align sawing production systems:
  - tools for removing and adjusting mechanical parts
  - jigs
  - precision measuring equipment
  - portable electrical lighting
  - feeler gauges
  - engineers' rules
  - vernier callipers
  - micrometers
  - plumb lines
  - piano wire or string lines
  - pointer
  - markers
- types of risks and hazards and mitigation strategies associated with aligning saw production systems
- workplace policies and procedures specific to aligning sawing production systems:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
  - communication reporting lines
  - recording and reporting of processing and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:

© Commonwealth of Australia, 2025 Skills Insight

  - tools and equipment for aligning sawing production systems
  - wood chipping equipment
  - sawing machines and feed systems, including line bars and carriages
  - PPE suitable for aligning sawing production systems
- specifications:
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for aligning sawing production systems in specified equipment
  - equipment history records
  - template documents for recording operational problems and equipment faults
  - workplace procedures for aligning sawing production systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, at least on one occasion, the individual has:

- joined the following types of band saw blades:
  - narrow band
  - wide band
- in doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - welded and annealed blades to specified requirements
  - grinded surplus weld material
  - removed all distortions from the blade surface
  - tensioned the welded zone
  - adjusted back length of the blade
  - cleaned welded zone.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, types, features and operation of band saws
- features and names of different parts of band saw blades
- purpose, features and operation of tools and equipment used to join and anneal band saw blades:
  - band saw welding equipment
  - grinding and finishing equipment
  - hand or power operated tools

© Commonwealth of Australia, 2025 Skills Insight

- importance of joining and annealing blades to suit machine design requirements
- weld defects and effects on blade operation
- methods for:
  - welding and annealing blades to specified requirements
  - grinding surplus weld material
  - removing all distortions from the blade surface
  - tensioning the welded zone
- types of risk and hazards and mitigation measures associated with joining band saw blades
- workplace procedures specific to joining band saw blades:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, hard faced saw teeth, and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- hard faced saw teeth according to work order and workplace requirements
- removed and replaced saw blade from equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of saws for which teeth blades are hard faced:
  - band saws
  - circular saws
  - gang saws
- features and names of different parts of saw blades
- purpose, features and operation of tools and equipment used to hard face saw teeth:
  - resistance welding equipment
  - plasma transfer equipment
- methods for:
  - assessing saw blade condition
  - cohering the face to the existing face of saw blade teeth
  - assessing completed facings against specifications
- variable settings for machine operations and effects on material cohesion:
  - pressure
  - temperature

© Commonwealth of Australia, 2025 Skills Insight

    - current
    - voltage
    - weld time
    - vacuum
- workplace procedures specific to hard facing saw teeth:
    - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
    - communication reporting lines
    - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - resistance welding equipment
    - plasma transfer equipment
    - blade saws to be hard faced: band saws, circular saws, gang saws
    - hard compound metal used to hard face saw teeth
    - PPE suitable for hard facing saw teeth
- specifications:
    - manufacturer instructions for use, repair and maintenance of equipment
    - work order for repair and maintenance activities, with specific instructions for hard facing saw teeth in specified equipment
    - documents, spreadsheets and proformas for recording processing and equipment faults
    - organisational policies and procedures for hard facing saw teeth.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to remove worn or damaged tungsten tips from circular saw blades, and braze, clean and prepare replacement tips for grinding and return to service.

The unit applies to individuals who replace tungsten tips in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for replacement	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with replacing tungsten tips 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Select appropriate tools and equipment, and check for operational effectiveness according to manufacturer recommendations
2. Remove worn, damaged or broken tips	2.1 Remove and replace saw blade according to manufacturer instructions 2.2 Assess saw blade condition 2.3 Clean foreign matter from saw and check for defects 2.4 Identify and mark broken tips 2.5 Remove broken tips, minimising damage to the tooth seat, and dispose of according to environmental protection practices 2.6 Repair tooth seats to specified tolerance and dimensions
3. Replace tips	3.1 Set up saw in brazing jig according to manufacturer instructions 3.2 Select brazing material and suitable technique for application and heat control 3.3 Select appropriate replacement tip and braze into position 3.4 Trial braze one tip, check tip is correctly positioned and the silver alloy has flowed evenly to both sides of the tip 3.5 Inspect and verify tip position, side clearance, and joint quality objectives have been achieved 3.6 Set manual or automatic feeds according to number of tips to be brazed 3.7 Identify routine processing and equipment faults, and resolve or report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Uses standard units of measurement and symbols for temperature and volume • Uses basic arithmetic skills to determine amount of brazing material required when replacing tips
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3247 Replace tungsten tips

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- removed worn tungsten tips from circular saw blades
- replaced tungsten tips for circular saw blades
- assessed condition of tungsten tips in line with workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
  - saw blade material and properties
  - impact of timber properties on saw blades
  - direction of cut
  - forces on a blade
  - heat removal
  - saw tooth configuration
- purpose, features and operation of saws for which tungsten tips are replaced:
  - circular saws
- features and names of different parts of saw blades
- purpose, features and operation of tools and equipment used to replace tungsten tips:
  - brazing equipment and brazing material
  - brazing jigs
- methods for:

© Commonwealth of Australia, 2025 Skills Insight

    - removing saw blades from saws
    - assessing saw blade condition
    - removing tungsten tips from saw blades
    - cleaning excess braze alloy and carbide fragments from tip seats
    - lengthening or deepening tip seats to match replacement tip requirements
    - selecting size and type of replacement tip
    - pre-tinning new tips
    - brazing new tungsten tips onto the tooth face or tooth seat
- appropriate tolerances for brazing alloy joint thickness, replacement tip sizes and side clearance objectives
- characteristics of metal used in saw blades, and effects of brazing
- types of risk and hazards and mitigation measures associated with replacing tungsten tips
- workplace procedures specific to replacing tungsten tips:
    - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
    - communication reporting lines
    - recording and reporting processing and equipment faults
- environmental protection practices applicable to saw technician workshops or timber processing facilities:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a saw technician workshop, timber processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - brazing equipment
    - brazing jigs
    - circular saws
    - tungsten tips
    - brazing material: silver alloy, flux in the form of a liquid or paste
    - side clearance dial indicator: Kafer Gauge
    - PPE suitable for replacing tungsten tips
- specifications:
    - documents, spreadsheets and templates for recording operation and equipment faults
    - manufacturer instructions for use, repair and maintenance of equipment
    - work order with specific instructions for replacing tungsten tips for circular saws

© Commonwealth of Australia, 2025 Skills Insight

- workplace procedures for replacing tungsten tips.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Select appropriate tools and equipment, and check for operational effectiveness according to manufacturer recommendations 1.6 Plan profiling process in line with work order and workplace requirements
2. Profile blanks	2.1 Calculate key saw blade dimensions 2.2 Obtain calculated blank length or cut from ribbon stock 2.3 Set up press with punches to suit saw dimensions 2.4 Punch first tooth in blank to align other teeth 2.5 Punch remaining teeth to required pitch and tooth profile 2.6 Assess performance of profiling equipment 2.7 Dispose of irreparable saw blanks according to environmental protection practices 2.8 Identify routine processing and equipment faults, and resolve or report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Extracts key information from operational manuals to determine safe operating procedures for equipment
Writing	• Prepares routine written reports using required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Performs precise calculations to profile blade saws in terms of length, width, pitch, gullet depth, and hook and back clearance angles

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
	• Uses standard units of measurement for angles, length, width and depth
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3248 Profile saw blanks

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, profiled saw blanks, and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- operated equipment to profile saw blanks
- set up punch and die kits or other equipment used for profiling saw teeth
- calculated the following saw blade dimensions according to manufacturer specifications and timber processing requirements:
  - width
  - length
  - pitch
  - gullet depth
  - hook and back clearance angles
  - number of teeth
- assessed the performance of profiling equipment and completed basic written records for:
  - edge finish
  - wear rates
  - production rates
  - distortion.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of band, wide band and gang saws for which saw blanks are profiled
- features and names of different parts of band saw blades

© Commonwealth of Australia, 2025 Skills Insight

- purpose, features and operation of tools and equipment used to profile saw blanks:
  - power fly presses
  - punch systems
- importance of profiling saw blanks to match requirements for:
  - characteristics of various materials sawn
  - speed of the sawing process
  - direction of the sawing process
  - cutting angle for sawing
  - saw blade specifications
- methods for:
  - calculating key saw dimensions
  - profiling, pressing and punching saw blanks to required pitch and tooth profile
  - aligning saw teeth
- assessing performance of profiling equipment for:
  - edge finish
  - wear rates
  - production rates
  - distortion
- workplace procedures specific to profiling saw blanks:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest product factory setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - one or more of the following types of tools and equipment used to profile saw blanks: power fly presses or punch systems
  - ribbon stock for large heavy duty band, wide band and gang saw blades
  - PPE suitable for profiling saw blanks
  - documents, spreadsheets and proformas for recording processing and equipment faults

© Commonwealth of Australia, 2025 Skills Insight

- specifications:
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order for repair and maintenance activities, with specific instructions for profiling saw blanks for specified equipment
  - workplace procedures for profiling saw blanks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3249 Saw logs using CNC optimising systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up and operate computer numerical control (CNC) optimising systems and saws to maximise timber output from every log.

The unit applies to individuals who saw logs using CNC optimising systems in forest and forest product factory settings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Assessment Requirements for FWPSAW3249 Saw logs using CNC optimising systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- sawn logs using computer numerical control (CNC) optimising systems in line with work order and within prescribed organisational tolerances
- set computer programs for the CNC optimising system to follow
- completed the following basic non-specialist maintenance activities:
  - cleaning the machine of wood chips and sawdust
  - replacing blunt saw blades
  - inspecting machine parts for wear or damage, including guards
  - greasing and lubricating moving parts
  - checking the operation of emergency stop buttons and lock-out systems.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection practices for forest products factory settings:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
  - reducing water and energy use
- typical log defects and how they affect ability to produce quality flitches and cants:
  - warp
  - wane
  - curvature

© Commonwealth of Australia, 2025 Skills Insight

    - cupping
    - shakes
    - insect defects
    - knots
    - resin pockets
- typical workflow processes for sawing flitches and cants with CNC optimising saws
- typical flow of log supply in and out of the sawing area
- range of cutting patterns used on logs to achieve maximum output of flitches and cants
- range of feed rates and how they affect production output and finished quality of flitches and cants
- purpose, features and operation of CNC optimising and other equipment used to saw flitches and cants:
    - CNC optimising saws
    - CNC computer program
    - mechanical feed
    - conveyor system to transport logs to and from the sawing area
    - maintenance tools and equipment for saws
- methods for assessing saw blade condition
- organisational procedures specific to operating CNC optimising saws:
    - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
    - communication reporting lines
    - recording and reporting of processing problems and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - CNC optimising saws
    - CNC computer program
    - maintenance tools and equipment for saws
    - consumable saw blades
    - PPE suitable for operating CNC optimising saws
    - a diverse, comprehensive and commercial range of logs
- specifications:
    - manufacturer instructions for use, repair and maintenance of equipment
    - work order with specific instructions for sawing logs and despatch to downstream processing

© Commonwealth of Australia, 2025 Skills Insight

- template documents for recording equipment faults and maintenance requirements
- workplace procedures for operating CNC optimising saws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3250 Select and saw logs in multi-species operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to select and saw (break down) logs from multiple timber species into flitches or cants, and maintain production flow while allowing for changes in species.

The unit applies to individuals who select and saw logs from multiple species in a timber processing plant.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for sawing and select logs	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

Assessment Requirements for FWPSAW3250 Select and saw logs in multi-species operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- selected logs according to production requirements and log utilisation that included assessment of at least one of the following:
  - diameter range
  - curvature
  - faults
  - softwood species of various types
  - moisture content
- sawn logs in multi-species operations to produce flitches in line with a work order and workplace specifications
- adjusted break down process regularly to allow for changes in species
- completed at least one of the following types of basic non-specialist maintenance of equipment tasks:
  - cleaning the machine of wood chips and sawdust
  - replacing blunt saw blades
  - inspecting machine parts for wear or damage, including guards
  - greasing and lubricating moving parts
  - checking the operation of emergency stop buttons and lock-out systems.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- types of risk and hazards and mitigation measures associated with selecting and sawing logs in multi-species operations
- workplace procedures specific to selecting and sawing logs in multi-species operations:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting processing problems and equipment faults
- environmental protection practices for timber processing operations:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- purpose, features and operation of equipment used to saw flitches and cants:
  - carriages, including standard three-headed dog carriages and flat top carriages with head rigs
  - saws, including circular saws, bench saws and overhead frame saws or band saws
- operation of the mechanical feed
- operation of the conveyor system to transport logs to and from the sawing area
- types and uses of maintenance tools and equipment for saws
- typical range of industry and organisation specific species types:
  - visual characteristics of logs
  - recovery characteristics
- typical workflow processes for sawing flitches and cants
- methods of adjusting workflow and sawing schedule during operation to account for differences in species
- range of cutting patterns used on logs to achieve maximum output of flitches and cants
- different cutting patterns required for different species of trees
- assessment of logs for:
  - diameter range
  - curvature
  - faults
  - softwood species of various types
  - moisture content
- range of feed rates and how they impact on the production output and finished quality of flitches and cants
- typical flow of log supply in and out of the sawing area
- methods for assessing saw blade condition
- species and recovery characteristics of timber and timber defects
- cutting pattern requirements, feed rates and finish
- flow control systems and marking requirements
- typical log defects and how they impact on the ability to produce quality flitches and cants:
  - warp

© Commonwealth of Australia, 2025 Skills Insight

- wane
- curvature
- cupping
- shakes
- insect defects
- knots
- resin pockets.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - one or more of the following types of carriages: standard three-headed dog carriages and flat top carriages with head rigs
  - one or more of the following types of saws: circular saws, bench saws and overhead frame saws or band saws
  - mechanical feed
  - conveyor system to transport logs to and from the sawing area
  - maintenance tools and equipment for saws
  - consumable saw blades
  - PPE suitable for selecting and sawing logs
  - a selection of logs from different species of trees
- specifications:
  - template documents for recording equipment faults and maintenance requirements
  - manufacturer instructions for use, repair and maintenance of equipment
  - work order with specific instructions for selecting and sawing logs from multiple species, and despatch to downstream processing
  - workplace procedures for selecting and sawing logs in multi-species operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3251 Apply principles of blade design to sawing procedures

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to select blades for various sawing operations and apply principles of blade design in the selection to maintain quality production output.

The unit applies to individuals who maintain the quality of saw blades in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with selecting and sawing logs in multi-species operations 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency
2. Maintain quality output	2.1 Follow quality system procedures for the use and care of blades 2.2 Assess blades visually for defects before processing products and completing work
3. Apply blade design principles	3.1 Classify blades according to type and style suitable for different saws and production requirements 3.2 Identify and evaluate blade characteristics, properties and design capacities according to manufacturer specifications and production requirements 3.3 Select blades to suit material being cut and production requirements 3.4 Plan sawing to minimise blade damage and wear, and to optimise blade lifespan
4. Assess the blade condition	4.1 Identify and resolve during daily operations machinery and equipment issues that can cause product waste and adversely affect blade lifespan 4.2 Assess saw blade condition and recognise the need to rectify blade wear and damage 4.3 Record and report blade faults to appropriate personnel according to blade design specifications

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Numeracy	• Measures blade characteristics for different blade types
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW3251 Apply principles of blade design to sawing procedures

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- selected blades for sawing procedures according to workplace procedures
- identified and evaluated blade characteristics, properties and design capacities for at least three of the following types of blades:
  - circular saw blades
  - band saw blades
  - wide saw blades
  - standard steel
  - tungsten tipped
  - Stellite tipped
- assessed saw blade condition and completed basic records of faults for at least three types of blade
- selected appropriate blades to suit material being cut and production requirements for three separate work orders.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of risk and hazards and mitigation measures associated with applying principles of blade design to sawing procedures
- workplace procedures specific to applying principles of blade design to sawing procedures:

© Commonwealth of Australia, 2025 Skills Insight

    - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
    - communication reporting lines
    - recording and reporting of processing problems and equipment faults
- environmental protection practices for timber processing operations:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing timber
- purpose, features and operation of blades:
    - circular saw blades
    - band saw blades
    - gang saw blades
    - wide saw blades
    - standard steel
    - tungsten tipped
    - Stellite tipped
- properties of blades used in the timber processing and manufacturing industry:
    - metal from which blades are made
    - geometry and concentricity
- characteristics of blades and names and purpose of blade parts:
    - tooth pitch
    - kerf
    - gullet
    - tooth face
    - set
    - straightness
    - tooth profile
    - tooth and side clearance angles
    - gullet depth/tooth height
    - tension ring
    - application (crosscutting or ripping)
- methods to optimise the use of saw blades
- effects of different types of materials on saw blade wear
- typical machinery and equipment issues that can cause product waste and adversely affect blade lifespan
- methods for assessing saw blade condition
- workplace quality system procedures for the use and care of blades.

Assessment Conditions

Assessment of skills must take place under the following conditions:

© Commonwealth of Australia, 2025 Skills Insight

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - blades for at least three of the following types of saws: circular saws, narrow band saws and wide band saws
  - different styles of blade: solid tooth, tungsten tipped and Stellite tipped
  - maintenance tools and equipment for blades
  - personal protective equipment suitable for handling blades
- specifications:
  - template documents for recording blade faults
  - manufacturer specifications for blade use and recommendations for repairing and maintaining blades
  - work orders with specific information on materials to be cut and production requirements
  - workplace quality system procedures for the use and care of blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW4206 Monitor output timber for optimum volume and value recovery

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to monitor timber production to optimise volume and value of sawn timber. This includes working safely, monitoring timber production for volume, grade and size, and reporting on production outcomes and compliance with optimisation objectives.

The unit applies to individuals who monitor output timber for optimum volume and value recovery in timber sawmills.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

	required, seek clarification from appropriate personnel 1.2 Identify and apply workplace health and safety requirements, including use of personal protective equipment and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with sawing operations 1.4 Identify and implement workplace procedures for minimising waste material and maximising energy efficiency
2. Monitor timber production	2.1 Confirm cutting pattern, product mix and optimisation objectives in relation to timber volume and value recovery 2.2 Identify and monitor output data for timber volume, grade and size, noting any anomalies and taking corrective action as required to optimise volume and value of timber according to workplace procedures 2.3 Monitor output timber for grade and size, noting any anomalies and taking corrective action as required to optimise the volume and value of timber according to workplace procedures 2.4 Monitor equipment operation, recording faults and malfunctions and taking corrective action as necessary to optimise volume and value of timber according to workplace procedures
3. Report on optimisation	3.1 Record optimisation data according to workplace procedures 3.2 Compare production data with optimisation objectives 3.3 Report production outcomes and compliance with optimisation objectives to an appropriate person 3.4 Make recommendations based on evidence to improve production and optimisation outcomes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Extracts essential information from visual display units and printouts to confirm optimisation objectives
Writing	• Prepares routine written reports using the required format, language and structure
Oral communication	• Employs active listening and questioning to clarify content of work orders
Numeracy	• Interprets graphical and statistical data to compare production output against optimisation objectives • Identifies and interprets trends and anomalies in statistical data
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPSAW4206 Monitor output timber for optimum volume and value recovery

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- monitored output timber for optimum volume and value recovery
- in doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - identified, assessed and taken actions to mitigate risks and hazards associated with sawing operations
  - recorded and reported on production outcomes and their compliance with optimisation objectives
  - made recommendations based on evidence to improve production and optimisation outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- optimisation principles
- cutting patterns
- output data:
  - sources of output data
  - types of output data
  - methods of interpreting output data
  - common anomalies in output data
  - ways of validating accuracy of output data
  - corrective actions in response to common anomalies in output data

Assessment Requirements for FWPSAW4207 Optimise timber production for volume and value recovery

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- established and implemented a plan for optimising the volume and value recovery of timber production
- in doing the above job, the individual has:
  - followed work order and relevant workplace health and safety and environmental protection procedures
  - identified, assessed and taken actions to mitigate risks and hazards associated with sawing operations
  - recorded and reported on production outcomes and their compliance with optimisation objectives.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- optimisation principles
- cutting patterns
- timber processing constraints:
  - markets
  - timber supply
  - preferred products
  - downstream processing options
- determinants of product mix:
  - timber characteristics
  - machine capability

© Commonwealth of Australia, 2025 Skills Insight

    - product demand
- optimisation software
- influences on timber volume and value recovery
- methods for reusing, recycling or disposing of items that do not meet quality requirements
- timber defects:
    - types
    - impact on volume and value of recovered timber
    - inspection methods
- risks and hazards associated with sawing operations
- safe work practices and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - optimisation software package and associated computing hardware
    - tools, equipment and timber needed for the work
    - personal protective equipment for sawmill operations
- specifications:
    - template documents for recording production outcomes
    - manufacturer instructions for optimisation software
    - work order with specific instructions for optimising timber production for volume and value recovery
    - workplace procedures for optimising timber production for volume and value recovery.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM2202 Machine material

Modification History

Release	Comment
1	Replaces equivalent unit FPITMM2202B Machine material, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate basic static machines used for sawing, planing, sanding and drilling and complete non-specialist maintenance. Work is completed in a forest and wood products factory setting.

The unit applies to job roles including saw operator, timber manufacturing worker, timber products worker, customer service/sales assistant (timber merchandising), woodmachinist.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for machining	1.1 Review work order and check with appropriate personnel. 1.2 Obtain type and quantity of material to be machined from storage location. 1.3 Select appropriate equipment and check for operational

© Commonwealth of Australia, 2025 Skills Insight

	effectiveness in line with manufacturer's recommendations. 1.4 Plan material machining process in line with work order.
2. Set up machines	2.1 Check safety equipment, including emergency stops, gauges, guards and controls. 2.2 Complete machine settings and adjustments in line with job requirements and manufacturer's instructions. 2.3 Complete trial runs to check machine operation, accuracy and quality of finished work. 2.4 Accept or reject trialled material and dispose of in line with environmental protection practices. 2.5 Adjust machine setting as necessary.
3. Operate machines	3.1 Complete equipment pre start-up checks in line with organisational procedures. 3.2 Operate machine in line with manufacturer's instructions, safe operating procedures and environmental protection practices. 3.3 Monitor machine operation to ensure product quality and output. 3.4 Repair sub-quality items to minimise waste and recycle or discard others in line with environmental protection practices. 3.5 Stack material safely in designated location in line with work order requirements.
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock-out equipment. 4.2 Remove and replace fixed cutter heads in line with organisational procedures. 4.3 Joint straight cutters in line with organisational procedures. 4.4 Record and report machining outcomes, equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work plans and count raw materials.
Oral communication skills to:	• ask questions and actively listen to clarify contents of work orders • make accurate verbal reports on processing and equipment

© Commonwealth of Australia, 2025 Skills Insight

	faults.

Reading skills to:	• interpret:
	  • WHS and other organisational procedures
	  • work orders
	  • manufacturers' instructions and maintenance recommendations.

Writing skills to:	• complete accurate basic reports on machining outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.
Problem-solving skills to:	• identify sub-quality materials through trial and inspection; make machine adjustments, repair or discard • recognise faulty equipment and resolve by reporting or rectifying.
Technology skills to:	• select, use and maintain appropriate machinery, tools and personal protective equipment used for machining activities.

Range of Conditions

Not Applicable

Assessment Requirements for FWPTMM2202 Machine material

Modification History

Release	Comment
1	Replaces equivalent unit FPITMM2202B Machine material, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- perform sawing, planing, drilling and sanding operations on timbers and boards from the following list, each in line with an individual work order:
  - native timber species
  - imported timber species
  - dressed timber
  - in-the-rough timber
  - stress and non-stress graded timber
  - preservative treated timber
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard and other manufactured board products
  - coated and/or treated timber products
  - beams or laminated beams
- complete operator maintenance on at least one occasion for each of these types of equipment:
  - sawing equipment
  - planing equipment
  - drilling equipment

© Commonwealth of Australia, 2025 Skills Insight

- sanding equipment

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning of plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- storage layout and categories for:
  - raw materials
  - stacking finished materials
- machining characteristics of timber and timber defects
- cutting patterns and sequences
- industry standard cross-sections and lengths
- types of machining tools and equipment; their purpose, features, operation and basic non-specialist repair and maintenance:
  - measuring equipment
  - docking saws
  - bench saws
  - panel saws
  - bandsaws
  - panel planers
  - surface planers
  - drill presses
  - boring machines
  - edge sanders
  - profile sanders
  - panel sanders
  - stroke sanders
- methods for assessing saw blade, knife, drill and sanding belt condition
- organisational procedures specific to machining activities:
  - workplace health and safety with particular emphasis on equipment lock out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting cutting process and equipment faults.

Assessment Conditions

The following resources must be made available:

- machining tools and equipment:

© Commonwealth of Australia, 2025 Skills Insight

  - measuring equipment
  - docking saws
  - bench saws
  - panel saws
  - bandsaws
  - panel planers
  - surface planers
  - drill presses
  - boring machines
  - edge sanders
  - profile sanders
  - panel sanders
  - stroke sanders
- maintenance tools and equipment
- consumable components for replacement during operator maintenance
- personal protective equipment suitable for machining activities
- commercially available timbers and boards
- manufacturers' instructions for use and maintenance of equipment
- work order for machining activities with specific instructions for the machining and storage of timber and timber products
- relevant personnel for the purposes of communicating information
- template reports for recording processing and equipment faults
- organisational procedures for machining activities.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4 Inform appropriate personnel of need to replace saw blade, knife, drill or sanding belt according to workplace and manufacturer procedures 4.5 Record and report machining outcomes, equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interprets key requirements in workplace health and safety and environmental procedures for clearing sawn waste from work area
Writing	• Completes basic written production reports and tally sheets
Oral communication	• Responds to oral questions on routine matters related to output quality
Numeracy	• Uses basic arithmetic skills to identify quantities of required material within work plans, and counts raw materials
Navigate the world of work	• Follows workplace policies and procedures relevant to work role
Interact with others	• Participates in conversations to inform maintenance staff about equipment faults
Get the work done	• Identifies and responds to routine problems

Assessment Requirements for FWPTMM2204 Machine material

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, safely set up and operated basic static machines for each of the following operations: sawing, planing, sanding and drilling; and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- set up machine
- performed sawing, planing, drilling and sanding operations on timbers and boards from one or more of the following in line with an individual work order:
  - native timber species
  - imported timber species
  - dressed timber
  - in-the-rough timber
  - stress and non-stress graded timber
  - preservative treated timber
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard and other manufactured board products
  - coated and/or treated timber products
  - beams or laminated beams
- completed operator maintenance on at least one occasion for each of the following types of machines:
  - sawing machine
  - planing machine
  - drilling machine
  - sanding machine.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- storage layout and categories for:
  - raw materials
  - stacking finished materials
- machining characteristics of timber and timber defects
- cutting patterns and sequences
- industry standard cross-sections and lengths
- types, purpose, features, set-up, operation and non-specialist repair and maintenance of basic static machines:
  - measuring equipment
  - docking saws
  - bench saws
  - panel saws
  - band saws
  - panel planers
  - surface planers
  - drill presses
  - boring machines
  - edge sanders
  - profile sanders
  - panel sanders
  - stroke sanders
- reasons, methods and timing of inspection of condition of saw blade, knife, drill and sanding belt
- workplace procedures specific to machining activities:
  - workplace health and safety, with particular emphasis on equipment lock-out
  - use and maintenance of equipment
  - communication reporting lines
  - recording and reporting cutting process and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

© Commonwealth of Australia, 2025 Skills Insight

    - skills must be demonstrated in a forest and forest products factory setting or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
    - machining tools: docking saws, bench saws, panel saws, band saws, panel planers, surface planers, drill presses, boring machines, edge sanders, profile sanders, panel sanders, stroke sanders
    - measuring equipment
    - maintenance tools and equipment
    - consumable components for replacement during operator maintenance
    - personal protective equipment suitable for machining activities
    - commercially available timbers and boards
    - template reports for recording processing and equipment faults
- specifications:
    - manufacturer instructions for use and maintenance of equipment
    - access to work order for machining activities, with specific instructions for the machining and storage of timber and timber products
    - access to written workplace procedures for machining activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3203 Estimate and cost job

Modification History

Release	Comment
1	Replaces equivalent unit FPITMM3203B Estimate and cost job, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to estimate resource requirements for the manufacture of products for a customer.

The unit applies to timber manufactured products' technician and customer service operators who calculate costs including labor, materials and time requirements and provide quotations to customers for an individual customer job.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Source information for quotations	1.1 Obtain information on customer requirements and where required discuss with relevant personnel and customer. 1.2 Assess product information for suitability to customer requirements.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Determine delivery point and methods of transportation in line with organisational procedures. 1.4 Source, select and interpret product costing information. 1.5 Record all details in line with organisational procedures.
2. Estimate materials, time and labour	2.1 Estimate types and quantities of materials required for product manufacture. 2.2 Estimate labour and other resource requirements to manufacture product and to provide required services. 2.3 Document estimate for manufacture and service provision and check against customer requirements.
3. Calculate and document customer cost	3.1 Calculate costs for total materials, labour and overheads in line with organisational procedures. 3.2 Calculate costs for services, transportation and fees. 3.3 Apply mark-up, in line with organisational procedures, and determine total cost to customer. 3.4 Document details of calculations and customer cost in line with organisational formats.
4. Check costing details and prepare quotation	4.1 Check costs and calculations against product and service components and customer requirements. 4.2 Prepare and provide quotation to customer in line with organisational procedures and formats. 4.3 Complete and maintain accurate records of quotations in line with organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret routine product and costing information and calculate routine customer supply costs • interpret and calculate organisational mark-up rates • calculate the final customer cost and present accurate figures in quotations.
Oral communication skills to:	• ask questions and actively listen to clarify customer requirements.

© Commonwealth of Australia, 2025 Skills Insight

Reading skills to:	• interpret organisational procedures for WHS and quotation preparation
	• interpret the content of sometimes unfamiliar and detailed product information documents, including:
	  • in-house price lists, product description sheets or manuals
	  • supplier price lists, product description sheets or manuals
	• interpret pre-existing customer records:
	  • sales notes
	  • product requirements and special requests.

Writing skills to:	• develop, document and present complex quotations in a clear format • provide clear and unambiguous information about: • product and service options, inclusions and costs • quotation conditions and limitations.
Planning and organising skills to:	• prepare quotations in logical sequence and manage own timing and productivity to complete quotations within deadlines.
Problem-solving skills to:	• identify and resolve mistakes in calculations.
Technology skills to:	• use a computer, keyboard and software to prepare and provide quotations.

Range of Conditions

Not Applicable

Assessment Requirements for FWPTMM3203 Estimate and cost job

Modification History

Release	Comment
	Replaces equivalent unit FPITMM3203B Estimate and cost job, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare and present quotations for custom made products chosen from the following list:
  - stairs
  - doors
  - windows
  - frames
  - beams
  - roof trusses
  - floor systems
  - wall frames
- sample quotations must include calculations for:
  - labor
  - materials
  - overheads
  - delivery and transportation
  - installation

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- primary components of consumer protection laws that relate to the provision of quotations and organisational responsibility for:
  - nominating and charging cancellation fees
  - providing information on potential price increases
  - providing refunds
  - supplying products as described or substituting suitable products when unable
- industry and specific organisational:
  - quotation systems
  - sources of costs for materials and labor to manufacture and install
  - sources of information on overheads and how overheads are applied to individual quotes
  - delivery types and costs
  - types of fees charged and sources of fee amounts
  - mark-up rates and procedures
  - formats for and inclusions of quotations presented to customers
  - procedures for documenting calculations, communicating quotations to customers and maintaining records.

Assessment Conditions

The following resources must be made available:

- computers, keyboards and printers
- industry current software programs used to prepare and provide quotations
- customer briefs on which to quote, including product requirements and special requests
- product and other organisational information, either electronic or hard copy:
  - in-house price lists, product description sheets or manuals
  - costs for materials and labor to manufacture and install
  - schedule of overhead costs
  - delivery types and costs
  - schedule of fees
- template:
  - customer files
  - quotations
- organisational procedures for:
  - applying mark-ups
  - charging fees
  - preparing and presenting quotations

© Commonwealth of Australia, 2025 Skills Insight

    - documenting calculations, communicating quotations to customers and maintaining records
- relevant personnel for the purposes of communicating information
- current plain English regulatory documents distributed by government regulators for consumer protection law.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPTMM3210 Convert timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to prepare and re-saw material to specified width and thickness with a power driven saw to optimise timber conversion and usability. This includes identifying requirements in a work order, following workplace health and safety procedures, planning timber conversion, producing sawn boards and performing routine machine maintenance.

The unit applies to individuals who use sawing machines to convert timber in a timber processing or manufacturing facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for conversion	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with converting timber 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Obtain type and quantity of material to be converted from storage location 1.6 Select appropriate equipment, and check for operational effectiveness in line with manufacturer recommendations 1.7 Plan timber conversion and saw set-up according to work order
2. Produce boards	2.1 Set and regularly check saw, carriage and feed, and adjust to suit conversion plan, ordered sizes and tolerances 2.2 Use equipment and machinery according to workplace procedures, safety requirements, manufacturer instructions and environmental protection practices 2.3 Monitor timber supply to ensure quality of finished product and constant supply to saw 2.4 Maintain feed rate and operate saw bench to produce boards without damage to boards or saw blade 2.5 Dispose of incorrect cuts, off-cuts and material with defects according to environmental protection practices 2.6 Stack material safely in designated location according to work order 2.7 Report processing and equipment faults to appropriate personnel
3. Complete operator maintenance	3.1 Follow workplace safety procedures to lock out equipment 3.2 Check saw blades for bluntness or damage 3.3 Remove and replace saw blades according to manufacturer recommendations 3.4 Dispose of used blades according to workplace procedures and environmental protection practices 3.5 Keep saw area clear of dust, off-cuts and debris according to safety and site requirements

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interprets key requirements in workplace health and safety and environmental procedures for clearing sawn waste from work area
Writing	• Completes basic written production reports and tally sheets
Oral communication	• Responds to oral questions on routine matters related to output quality
Numeracy	• Uses basic arithmetic skills to identify quantities of required material within work plans, and counts raw materials • Uses standard units of measure to identify order sizes and set up the saw to achieve correct depth, width and thickness of cut • Interprets graphical information in charts to identify the feed rate to optimise quality and quantity of production output
Navigate the world of work	• Follows workplace policies and procedures relevant to work role
Interact with others	• Participates in conversations to inform maintenance staff about equipment faults
Get the work done	• Identifies and responds to routine problems

Assessment Requirements for FWPTMM3210 Convert timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, safely set up, operated and maintained sawing machines to cut timber to width and thickness, and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- followed workplace policies and practices relevant to converting timber of at least one of the following materials:
  - native timber species
  - imported timber species
  - dressed timber
  - in-the-rough timber
  - green timber
  - stress and non-stress graded timber
  - preservative treated timber
  - coated and/or treated timber products
  - beams or laminated beams
- cut material to width and thickness according to work order and within prescribed workplace tolerances
- conducted operator maintenance on a power driven saw
- stacked batches of cut material according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- timber conversion processes:
  - re-sawing in-the-rough boards to optimise single boards through cutting away waste edges

© Commonwealth of Australia, 2025 Skills Insight

    - cutting boards into two or more boards, thereby maximising the amount of product in line with the work order
    - saw set-up, including setting depth, width and thickness of cut measured from the fence in line with product order and allowing for kerf (width of saw cut)
- storage layout and categories for raw materials and stacking finished materials, including:
    - preparing for transport
    - categorising in common size, length, width and thickness
    - marking lots in line with work order and site requirements
    - locating so as not to block access or passage
- characteristics of timber and timber defects, including:
    - warp
    - wane
    - cupping
    - shakes
    - insect defects
    - knots
    - resin pockets
- cutting patterns and sequences
- tolerances
- saw feed rates
- industry standard cross-sections and lengths
- types of conversion tools and equipment; their purpose, features, operation and basic non-specialist repair and maintenance:
    - measuring equipment
    - automatic feed controlled ripping saws
    - saws with adjustable thickness (sloping table)
    - saws with one blade
    - rip saws
    - table saws
    - bench saws
- methods for assessing saw blade condition
- environmental protection practices for forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing timber and other waste
- workplace procedures specific to conversion activities:
    - workplace health and safety, with particular emphasis on personal protective equipment (PPE) and equipment lock-out
    - use and maintenance of equipment
    - communication reporting lines
    - recording and reporting cutting process and equipment faults.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest and forest products factory setting or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
  - one or more of the following items of conversion equipment: automatic feed controlled ripping saws, saws with adjustable thickness (sloping table), saws with one blade, rip saws, table saws, bench saws
  - measuring equipment
  - maintenance tools and equipment for saws
  - consumable components, saw blades
  - a diverse, comprehensive and commercial product range of timber
  - PPE suitable for conversion activities
  - template reports for recording of processing and equipment faults
- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - access to work order for conversion activities, with specific instructions for the cutting and storage of timber and timber products
  - access to written workplace procedures for conversion activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3211 Manufacture using joinery machines

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to operate mortise and tenon machines, borers and routers to cut and drill machined joints in timber. This includes identifying work requirements, setting up and operating joinery machines, and completing routine equipment maintenance.

The unit applies to individuals who operate joinery machines in a timber processing or manufacturing facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for profiling	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with using joinery machines 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Obtain type and quantity of material to be machined from storage location 1.6 Select appropriate equipment, including cutting blades or drills, and check for operational effectiveness according to manufacturer recommendations 1.7 Plan manufacturing sequence
2. Set up profile	2.1 Complete equipment pre-start-up checks according to workplace and manufacturer procedures 2.2 Select machine guides and attach to machinery 2.3 Install cutting blades or drills into selected machinery 2.4 Set depth and width of cut or hole according to required process and to minimise waste 2.5 Position material stack in close proximity to maximise ease of machine feeding 2.6 Test equipment set-up for depth and width through trial run on timber, and adjust as required
3. Operate machine	3.1 Feed material into machine at feed rate according to workplace requirements 3.2 Use equipment and machinery according to workplace procedures, manufacturer instructions and environmental protection practices 3.3 Follow, maintain and adjust manufacturing sequence to produce required quantity and maximise feed rate 3.4 Check manufacturing process regularly and adjust to maintain desired depth and width of cut or hole 3.5 Reject material with defects, and reuse, recycle or dispose of according to environmental protection practices 3.6 Stack material safely in designated location according to work order requirements

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.7 Report equipment faults to appropriate personnel 3.8 Complete and maintain accurate records and reports of machining outcomes according to workplace procedures
4. Complete operator maintenance	4.1 Follow workplace safety procedures to lock out equipment 4.2 Check cutting blades and drills for bluntness or damage 4.3 Remove and replace cutting blades and drills according to manufacturer recommendations 4.4 Dispose of used blades and drills according to workplace procedures and environmental protection practices 4.5 Keep machine area clear of dust and debris according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interprets key requirements in workplace health and safety and environmental procedures for clearing sawn waste from work area
Writing	• Completes basic written production reports and tally sheets
Oral communication	• Responds to oral questions on routine matters related to output quality
Numeracy	• Uses basic arithmetic skills to determine quantity and dimensions of joinery materials • Uses standard units of measure to determine dimensions of finished material • Interprets graphical information in charts to identify the feed rate to optimise quality and quantity of production output
Navigate the world of work	• Follows workplace policies and procedures relevant to work role
Interact with others	• Participates in conversations to inform maintenance staff about equipment faults

Assessment Requirements for FWPTMM3211 Manufacture using joinery machines

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, safely set up, calibrated, operated and maintained one or more of the following joinery machines:

- mortise and tenon
- borers
- routers.

In doing the above job, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- set up profile
- operated machine according to workplace procedures and work order requirements
- safely cleared sawn or machined materials and waste from the joinery machine
- checked, sorted and stacked the finished product
- disposed of waste material
- completed production reports.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features and uses of these types of machined joints:
  - grooves
  - rebates
  - bevels
  - trenches
  - mortises

© Commonwealth of Australia, 2025 Skills Insight

    - tenons
    - holes
- cutting and drilling techniques and processes, including feed rates and finish
- types, purpose, features, operation and basic non-specialist repair and maintenance of cutting and drilling tools and equipment:
    - measuring equipment
    - saws
    - routing machines
    - single or double end tenoners
    - mortisers
    - borers
    - multi-borers
    - drill presses
    - mortising chisels
    - tenoning saws or chains
- environmental protection practices for forest products factory settings:
    - reducing water and energy use
    - cleaning plant, tools and equipment
    - disposing of, recycling and reusing timber and other waste
- workplace procedures specific to production activities using joinery machines:
    - workplace health and safety, with particular emphasis on personal protective equipment (PPE) and equipment lock-out
    - use and maintenance of equipment
    - communication reporting lines
    - recording and reporting cutting process and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a forest and forest products factory setting or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
    - cutting and drilling tools and equipment: measuring equipment, saws, routing machines, single or double end tenoners, mortisers, borers, multi-borers, drill presses
    - cutting blades and drills: square and angular router cutting bits, drills in varying sizes, mortising chisels, tenoning saws and chains, trenching heads
    - maintenance tools and equipment for cutting and drilling tools
    - consumable components: cutting blades and drills
    - PPE suitable for cutting and drilling activities
    - a diverse, comprehensive and commercial product range of timber

© Commonwealth of Australia, 2025 Skills Insight

- manufacturer instructions for use and maintenance of equipment
- template reports for recording processing and equipment faults

- specifications:
  - access to work order for production activities, with specific instructions for the cutting, drilling and storage of timber and timber products
  - access to written workplace procedures for production activities using joinery machines.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3212 Estimate and cost job

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to estimate resource requirements, cost and price for the manufacture of a custom made timber product. This includes determining customer requirements, sourcing information, estimating the cost and price of the product and preparing and presenting the quotation.

The unit applies to individuals who calculate the cost and provide customer quotations for custom made timber products.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

	transportation according to workplace procedures 1.4 Source, select and interpret product costing information 1.5 Record all details according to workplace procedures
2. Estimate materials, time and labour	2.1 Estimate types and quantities of materials required for product manufacture 2.2 Estimate labour and other resource requirements to manufacture and/or install product and other required services 2.3 Document estimate for manufacture, installation and other service provision, and check against customer requirements
3. Calculate cost and price	3.1 Calculate costs for total materials, labour and overheads according to workplace procedures 3.2 Calculate total manufacture and/or installation costs 3.3 Apply mark-up according to workplace procedures, and determine total price to customer 3.4 Document details of calculations and price to customer according to workplace procedures and consumer protection legislation
4. Prepare and present quotation	4.1 Check price and calculations against product and service components and customer requirements 4.2 Prepare and provide quotation to customer according to workplace procedures and consumer protection legislation 4.3 Inform customer of their rights and obligations according to workplace procedures and consumer protection legislation 4.4 Complete and maintain accurate records of quotations according to workplace procedures and consumer protection legislation

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interprets the content of sometimes unfamiliar and detailed product information documents, including: in-house price lists, product description sheets or manuals, supplier price lists, product description sheets or manuals
Writing	• Develops, documents and presents complex quotations in a prescribed time period according to workplace procedures and formats
Oral communication	• Responds to oral questions on routine and non-routine matters related to customer requirements, costing of products and price of product to customer
Numeracy	• Identifies routine product and costing information, and calculates routine customer supply costs • Calculates mark-up rates and discounts for finished products • Prepares accurate quotations indicating number of products to be delivered, timeframe for delivery and total costs to customer
Navigate the world of work	• Follows workplace policies and procedures relevant to work role
Interact with others	• Participates in conversations to inform customers about price of products
Get the work done	• Identifies and responds to routine customer problems

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- prepared and presented quotations for a custom made timber product chosen from the following list:
- stairs
- doors
- windows
- frames
- beams
- roof trusses
- floor systems
- wall frames
- calculated the cost of the following components of the custom made timber product:
  - labour
  - materials
  - specialist skills and advice
  - delivery and transportation
  - installation
  - contingencies
- calculated the price of the custom made product including:
  - mark-up
  - discount
  - overheads.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- procedures for determining and negotiating customer requirements in order to prepare a quotation
- procedures for planning and estimating the costs of a custom made timber product, including:
  - methods of determining labour rates and job time length
  - methods of determining job processes and material requirements
  - methods of planning for contingencies
- cost minimisation and waste avoidance procedures and practices
- workplace quotation flow chart
- methods for determining cost and price of custom made timber products
- components of cost of custom made timber products
- primary components of consumer protection laws that relate to the provision of quotations and workplace responsibility for:
  - nominating and charging cancellation fees
  - providing information on potential price increases
  - providing refunds
  - supplying products as described or substituting suitable products when unable
  - guarantees
- industry and workplace practices in relation to:
  - quotation systems
  - sources of information on costs for materials and labour to manufacture and install
  - sources of information on overheads and how overheads are applied to individual quotes
  - delivery types and costs
  - types of fees charged and sources of fee amounts
  - mark-up rates and procedures
  - formats for and inclusions of quotations presented to customers
  - procedures for documenting calculations, communicating quotations to customers and maintaining records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a forest and forest products factory setting or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
  - computers, keyboards and printers

© Commonwealth of Australia, 2025 Skills Insight

    - industry current software programs used to prepare quotations
    - customer briefs on which to quote, including product requirements and special requests
    - product and other workplace information, either electronic or hard copy: in-house price lists, product description sheets or manuals, cost schedules for materials and labour to manufacture and install, schedule of overhead costs, delivery types and costs and schedule of fees
    - workplace template for quotations
- specifications:
    - access to written workplace procedures for preparing and presenting quotations
    - current consumer protection law in relation to preparation and presentation of quotations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPWPP2212 Cut panels to profile

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to cut panels to a profile using shaping equipment to produce moulded timber products.

The unit applies to production workers who cut panels to profile in a timber processing or manufacturing facility, and includes operator maintenance.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products (WPP)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for profiling	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with cutting panels to profile 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Obtain type and quantity of panels for profiling from storage location 1.6 Identify profile to be cut, and select cutting blades
2. Set up profiling equipment	2.1 Use equipment according to workplace procedures and manufacturer instructions 2.2 Follow lock-out procedures, select and attach machine guides and install cutting blades 2.3 Set depth of cut or profile in line with required shape and to minimise waste 2.4 Stack panels in close proximity to maximise ease of machine feeding 2.5 Test equipment set-up for correct alignment through trial run, and adjust as required
3. Cut material to profile	3.1 Feed panels into machine at feed rate prescribed by work order and according to manufacturer recommendations 3.2 Follow, maintain and adjust cutting sequence to produce required quantity and maximise feed rate 3.3 Check profiling process regularly, and adjust to maintain desired depth and profile 3.4 Dispose of incorrect cuts, off-cuts and defective material in line with environmental protection practices 3.5 Stack panels safely in designated location in line with work order
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment 4.2 Check cutting blades for bluntness or damage 4.3 Remove and replace cutting blades in line with manufacturer recommendations 4.4 Keep machine clear of dust and debris in line with organisational safety procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.5 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identifies quantities of required material within work orders, and counts numbers of panels to be profiled • Completes basic calculations of required depth of cut or profile • Measures finished dimensions against specifications and appropriate tolerances
Navigate the world of work	• Understands main tasks, responsibilities and boundaries of own role
Interact with others	• Uses modes of communication suitable to confirm and clarify understanding
Get the work done	• Recognises and responds to routine problems

Assessment Requirements for FWPWPP2212 Cut panels to profile

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed a work order and relevant workplace health and safety and environmental protection procedures
- produced profiled panels for one or more of the following types of material in line with individual work orders that prescribe different profiles and number of panels for each job:
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard
- completed profiling of product chosen from the following list:
  - quad
  - beading
  - mouldings
  - shaped beams
  - architraves
  - skirting boards
  - scotia
- stacked batches of profiled panels in storage location according to common profile type and dimension
- completed operator maintenance on the profiling equipment used.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- storage layout and categories for:
  - raw materials
  - stacking finished panels
- typical timber panel defects and how they affect ability to produce quality profiled product:
  - warp
  - wane
  - cupping
  - holes
  - breakages
  - lifting veneer
  - bonding problems
- common profiles and applicable terminology
- common cutting patterns, sequences and appropriate feed rates used to achieve common profiles
- purpose, features and operation of equipment used to cut panels to profile:
  - measuring equipment
  - multi-head planing machines (four siders)
  - spindle moulders
  - routing machines
  - shaping machines
  - machine guides
- methods for assessing cutting blade condition, and completing basic non-specialist repair and maintenance for profiling equipment
- organisational procedures specific to cutting panels to profile:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions

© Commonwealth of Australia, 2025 Skills Insight

- resources, equipment and materials:
  - measuring equipment
  - profiling equipment that includes one or more of the following: multi-head planing machines (four siders); spindle moulders; routing machines; shaping machines
  - machine guides
  - maintenance tools and equipment
  - consumable profile cutting blades in various shapes and sizes
  - PPE suitable for cutting panels to profile
  - commercial timber that includes one or more of the following: medium density fibreboard; laminated veneer; chipboard; fibreboard
- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - work order for cutting activities with specific instructions for cutting and storing panels
  - template documents for recording production outcomes, equipment faults and maintenance requirements
  - organisational procedures for cutting panels to profile.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate motorised stump grinding machines to remove tree stumps from the ground.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures, in accordance with manufacturers recommendations and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards

Pre-requisite Unit

AHCARB210 Work effectively in the arboriculture industry

Element	**Performance criteria**
essential outcomes.	achievement of the element.
1. Prepare for stump removal operations	1.1 Determine site location and details and clarify with supervisor 1.2 Determine the depth below ground of stump grinding works 1.3 Determine and confirm location and depth of above-and-below-ground services 1.4 Unload stump grinder machine 1.5 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk
2. Carry out pre-operational and safety checks	2.1 Check maintenance log is complete and up to date 2.2 Check belts are appropriately tensioned and in good order 2.3 Check teeth are sharp 2.4 Check no teeth are missing or loose 2.5 Check tyre pressure is correct or tracks are appropriately tensioned 2.6 Check levels of oils and fluids 2.7 Check hoses 2.8 Check brakes are operational 2.9 Check cutter head rotates freely and is not obstructed
3. Check stump grinder safety features	3.1 Check guards for belt, power take-off (PTO) and grinder head are in place 3.2 Check kill switch clearly identifiable and working 3.3 Check that dead-man is working if fitted 3.4 Check debris curtain present and in good order 3.5 Check dust suppression system is working if fitted
4. Complete preparations for work	4.1 Select and use appropriate personal protective equipment 4.2 Confirm first aid and emergency personnel, equipment and procedures 4.3 Expose stump surrounds manually and check for and remove foreign bodies 4.4 Moisten surrounds as required 4.5 Record and implement work health, safety, site, environmental and traffic control measures
5. Position stump grinder	5.1 Determine exclusion zone for work operations 5.2 Isolate exclusion zone with barriers and signs 5.3 Position machine level within recommended ranges to avoid rollover 5.4 Avoid holes with machine wheels 5.5 Position machine to minimise impact from flying debris

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	5.6 Position operator in low risk position 5.7 Position operator to provide a clear view of the stump 5.8 Locate safety screens as required
6. Undertake removal operations	6.1 Communicate with work team during operations using voice, hand and whistle signals 6.1 Confirm work zone cleared prior to starting cutter head 6.3 Plan to complete a series of grinds across the stump 6.4 Start cutter head 6.5 Stop work if exclusion zone is breached and disengage cutter head if required 6.6 Position cutter head over stump 6.7 Engage cutter head into stump surface 6.8 Maintain engine speed in revolutions-per-minute (RPM) 6.9 Ensure grinding process is accurate, smooth and ergonomic 6.10 Grind stump to recommended depth of cut on each cutting pass 6.11 Ensure the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall 6.12 Grind stump to predetermined spread and depth 6.13 Operate equipment without damaging underground services and surrounding areas
7. Remove grindings	7.1 Reposition machine away from ground stump 7.2 Disengage cutter head 7.3 Wait and remain clear of cutter head until cutter head stops moving 7.4 Remove build-up of grindings
8. Perform ongoing grinding operations	8.1 Make check in calls at prearranged times 8.2 Inspect grinder as required between stumps and when refuelling 8.3 Shutdown immediately if abnormal vibration or noise develops 8.4 Stop the engine before refuelling and allow engine to cool as required 8.5 Follow Safe Work Method Statement instructions for refuelling 8.6 Replace and secure fuel cap before restarting 8.7 Disengage cutter head and ensure a complete stop before moving to a new stump
9. Complete stump removal operation	9.1 Back-fill stump hole to original ground level 9.2 Maintain clean and safe work area throughout work and upon completion 9.3 Collect waste material and dispose of or recycle in a manner

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	causing minimal environmental damage 9.4 Clean, maintain and store tools and equipment 9.5 Perform basic maintenance, including sharpening grinder and replacing teeth as required 9.6 Load grinder in accordance with Safe Work Method Statement 9.7 Secure grinder for transport 9.8 Update records of operator usage in log record 9.9 Update records of maintenance and replacement items

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed removing stumps using a motorised stump grinder using low-risk work procedures. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining site location and details and clarifying with supervisor
- determining the depth below ground of stump grinding works
- determining and confirm location and depth of above-and-below-ground services
- unload stump grinder machine
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- checking maintenance log complete and up to date
- checking belts appropriately tensioned and in good order
- checking teeth are sharp
- checking no teeth are missing or loose
- checking tyre pressure is correct or tracks are appropriately tensioned
- checking levels of oils and fluids
- checking hoses
- checking brakes are operational
- checking cutter head rotates freely and is not obstructed
- checking guards for belt, power take-off (PTO) and grinder head are in place
- checking kill switch clearly identifiable and working
- checking that dead-man is working if fitted
- checking debris curtain present and in good order
- checking dust suppression system is working if fitted
- selecting and use appropriate personal protective equipment
- confirming first aid and emergency personnel, equipment and procedures
- exposing stump surrounds manually and check for and remove foreign bodies
- moistening surrounds as required

© Commonwealth of Australia, 2025 Skills Insight

- recording and implementing work health, safety, site, environmental and traffic control measures
- determining exclusion zone for work operations
- isolating exclusion zone with barriers and signs
- positioning machine level within recommended ranges to avoid rollover
- avoiding holes with machine wheels
- positioning machine to minimise impact from flying debris
- positioning operator in low risk position
- positioning operator to provide a clear view of the stump
- locating safety screens as required
- communicating with work team during operations using voice, hand and whistle signals
- confirming work zone cleared prior to starting cutter head
- planning to complete a series of passes across the stump
- starting cutter head
- stopping work if exclusion zone is breached and disengage cutter head if required
- positioning cutter head over stump
- engaging cutter head into stump surface
- maintaining engine speed in revolutions-per-minute (rpm)
- ensuring grinding process is accurate, smooth and ergonomic
- grinding stump to recommended depth of cut on each cutting pass
- ensuring the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall
- grinding stump to predetermined spread and depth
- operating equipment without damaging underground services and surrounding areas
- repositioning machine away from ground stump
- disengaging cutter head if risk of making unwanted contact
- waiting and remaining clear of cutter head until cutter head stops moving
- removing build-up of grindings
- making check in calls at prearranged times
- inspecting grinder as required between stumps and when refueling
- shutting down immediately if abnormal vibration and/or noise develops
- stopping the engine before refueling and allow engine to cool as required
- following safe work method statement instructions for refueling
- replacing and securing fuel cap before restarting
- disengaging cutter head and ensure a complete stop before moving to a new stump
- back-filling stump hole to original ground level
- maintaining clean and safe work area throughout work and upon completion
- collecting waste material and dispose of or recycle in a manner causing minimal environmental damage
- cleaning, maintaining and storing tools and equipment
- performing basic maintenance, including sharpening grinder and replacing teeth as required
- loading grinder in accordance with safe work method statement

© Commonwealth of Australia, 2025 Skills Insight

- securing grinder for transport
- updating records of operator usage in log record
- updating records of maintenance and replacement items.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site hazard identification methods
- site risk assessment systems
- control measures for work health, safety, site, environmental and traffic control
- personal protective equipment
- communication systems using voice, hand and whistle signals
- first aid
- emergency procedures
- methods of locating services
- pre-operational checks of stump grinders including:
  - logs
  - belts
  - teeth
  - tyre pressure
  - oils and fluids
  - hoses
  - brakes
  - cutter head
  - guards
- safety checks of stump grinders including:
  - guards for belt, power take-off (PTO) and grinder head
  - kill switch
  - dead man
  - debris curtain
  - dust suppression
- exclusion zones
- operation of stump grinders
- cutter head engagement and disengagement
- positioning of stump grinders and operator
- work zone
- methods of determining spread and depth of cut
- recommended depths of cut
- cutting plan
- engine speed (rpm)
- abnormal vibration

© Commonwealth of Australia, 2025 Skills Insight

- methods of back-filling
- environmental implications of removal activities
- appropriate methods of collecting waste material and disposal or recycling methods
- basic maintenance of stump grinders
- methods of sharpening stump grinders
- methods of teeth replacement of stump grinders
- records of operator usage in log record
- methods of maintaining records for basic maintenance and replacement items.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes a log record, verifying ten (10) hours of operating a stump grinder, and five (5) hours of unloading and loading, setup and pre-operational and safety checks, preparatory work, backfilling and cleaning up, sharpening and basic maintenance, performed by the candidate.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
  - stump grinder
  - sharpening equipment
  - refuelling kit
  - spill kit
  - emergency communication system
  - personal protective equipment (PPE)
  - first aid and emergency kit
  - traffic management kit
  - signage – work zone
  - tree stumps
- materials:
  - stump grinder operations form
  - hazard identification and risk control form
  - pre-operational and safety check form
  - emergency preparation form

© Commonwealth of Australia, 2025 Skills Insight

- work communications form
- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes, harnesses and specialist equipment using advanced techniques for the purpose of mobility around the required sections of trees for work positioning.

This unit applies to individuals who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. The work requires the application of extensive arboricultural knowledge. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB312 Use standard climbing techniques to access trees*

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use static and dynamic rope as required 2.6 Select and use triple locking carabiners 2.7 Determine limits, relative advantages and disadvantages of friction hitches
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line safe approach distances and vegetation clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Prepare climbing spurs and gaffs for dismantling operations	4.1 Prepare climbing spurs and gaffs for dismantling operations 4.2 Check all components of climbing spurs for defects and wear 4.3 Check gaff tip profile for correct dimensions using gaff gauge 4.4 Sharpen gaff tip cutting edge with file at defined angle using gaff gauge

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	4.5 Adjust climbing spurs to provide correct operator fit 4.6 Access and perform dismantling work using climbing spurs 4.7 Maintain separation of spurs 4.8 Maintain clearance distance between spurs and ropes
5. Access and ascend tree	5.1 Access and ascend tree using low risk access route with harness and lanyard 5.2 Ascend using single rope, double rope and selected friction hitch as required 5.3 Ascend using uni-ascenders, foot and hand ascenders, and other ascension devices as required 5.4 Use micrograbs, grigris and micro-pulleys as required for mobility and work positioning 5.5 Demonstrate ability to carry out change-overs as required 5.6 Set up redirects and belays using slings and anchors as required 5.7 Select multiple lines to climb trees and tree parts as required 5.8 Select multiple lines to perform tree operations as required
6. Descend from tree	6.1 Descend tree in a controlled manner 6.2 Remove all access equipment in a controlled manner 6.3 Check, clean and store access equipment 6.4 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB307A Undertake complex tree climbing.

Assessment Requirements for AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed ascending and descending trees using advanced tree climbing practices.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts. The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using static and dynamic rope as required
- selecting and using triple locking carabiners

© Commonwealth of Australia, 2025 Skills Insight

- determine limits, relative advantages and disadvantages of friction hitches including: Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line safe approach distances and vegetation clearances
- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using single rope, double rope and selected friction hitch as required
- ascending using uni-ascenders and foot ascenders as required
- using micrograbs, grigris and micro-pulleys as required for access and tree operations
- demonstrating ability to carry out change-overs
- setting up redirects and belays using slings and anchors
- selecting multiple lines to access trees and tree parts
- selecting multiple lines to perform tree operations
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment

- climbing equipment
- triple action carabiners
- friction hitches including:
  - Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height
- estimation of load
- safe working limits
- tree access techniques and equipment
- strength and suitability requirements
- single and double rope techniques
- uni-ascenders and foot ascenders
- micrograbs, grigris, micro-pulleys
- use of climbing spikes of various lengths
- change-overs
- redirects and belays using slings and anchors
- use of multiple lines to access trees and tree parts
- advanced climbing techniques
- low risk anchor points
- maintenance of awareness of power lines
- power line safe approach distances and vegetation clearances
- controlled descent operations
- controlled removal of access equipment
- cleaning of equipment
- storage of equipment.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of advanced climbing.

© Commonwealth of Australia, 2025 Skills Insight

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit. Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
  - single rope technique (SRT) climbing kit
  - harness
  - chaps
  - climbing friction hitches
  - high decibel whistle
  - personal protective equipment (PPE)
  - first aid and emergency kit
  - rescue kit
  - traffic management kit
  - trees
- materials:
  - climbing techniques form - advanced
  - climbing log record – advanced
  - tree inspection form
  - hazard identification and risk control form
  - equipment and PPE check form
  - knot identification form
  - work communications form
  - rescue form - aerial

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes and harnesses using standard techniques for the purpose of accessing required sections of trees.

This unit applies to workers who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use dynamic rope 2.6 Select and use triple locking carabiners
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Access and ascend tree	4.1 Access and ascend tree using low risk access route with harness and lanyard 4.2 Ascend using double rope with prussik technique 4.3 Ascend using trunk walking technique and foot ascenders as required
5. Descend from tree	5.1 Descend tree in a controlled manner 5.2 Remove all access equipment in a controlled manner 5.3 Clean and store access equipment 5.4 Clean and store personal protective equipment

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB204A Undertake standard climbing techniques.

Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed climbing trees using standard climbing techniques in a safe manner. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using dynamic rope
- selecting and using triple locking carabiners
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line clearances

© Commonwealth of Australia, 2025 Skills Insight

- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using double rope with prussik technique
- ascending using trunk walking technique and foot ascenders as required
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- personal protective equipment
- types of climbing ropes
- dynamic ropes
- rope characteristics
- uses of climbing ropes
- safe working limits of ropes
- safe working limits of equipment
- defects in ropes, tools and equipment
- climbing harnesses and lanyards
- climbing equipment
- triple locking carabiners
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height

© Commonwealth of Australia, 2025 Skills Insight

- estimation of load
- safe working limits
- tree access techniques and equipment
- strength and suitability requirements
- double rope with prussik technique
- trunk walking and foot ascenders
- standard climbing technique
- low risk anchor points
- maintenance of awareness of power lines
- power line clearances
- controlled descent operations
- controlled removal of access equipment
- cleaning of equipment
- storage of equipment
- work health and safety measures relating to own work.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of standard climbing.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
  - standard climbing kit
  - harness
  - high decibel whistle
  - personal protective equipment (PPE)
  - first aid and emergency kit
  - rescue kit
  - traffic management kit
  - trees

© Commonwealth of Australia, 2025 Skills Insight

- materials:
  - climbing techniques form- standard
  - climbing log record - standard
  - hazard identification and risk control form
  - equipment and PPE check form
  - emergency preparation form
  - work communications form
  - knot identification form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCBUS502 Market products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to market products and services.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Analyse market	1.1 Identify, research and analyse existing or new markets for

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
information	existing or new products or services using techniques to ensure reliable data 1.2 Analyse past trends and developments to determine market variability and associated risks 1.3 Develop gross margin budgets to account for market variability 1.4 Identify and evaluate competing products to determine strengths and weaknesses of own products 1.5 Monitor market environment to ensure information is current and reliable 1.6 Identify the legal, ethical and environmental constraints of the markets and their effect on the enterprise 1.7 Identify product specifications that suit market requirements and price advantage at the time 1.8 Present clear and concise information to the enterprise management team
2. Identify and evaluate factors to include in a marketing plan	2.1 Identify and evaluate production processes to ensure required product specifications are met 2.2 Identify and assess alternative selling strategies and techniques to identify marketing targets and methods 2.3 Identify and assess distribution channels and their role in your marketing strategies 2.4 Ensure the data used is reliable and the market environment and trends are substantiated 2.5 Evaluate the role of marketing professionals in providing advice
3. Develop a marketing plan for your products and services	3.1 Establish marketing objectives based on current and potential product specifications 3.2 Select appropriate production processes to ensure product specifications are met 3.3 Select selling strategies to ensure required prices are achieved 3.4 Select appropriate distribution channel options to ensure access to target markets is achieved efficiently and appropriately 3.5 Establish time-frames for production, distribution and selling activities 3.6 Develop a gross margin budget to demonstrate the cost effectiveness of the marketing plan 3.7 Develop partial gross margin budgets to account for market variability
4. Determine promotional strategies	4.1 Prepare and record detailed plans for promotional activities 4.2 Outline objectives, level of exposure and available markets 4.3 Ensure strategies take account of time management and

Assessment Requirements for AHCBUS502 Market products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect, analyse and present data in the internal and external business environment
- identify the marketable features of the product and potential markets
- assess alternative marketing strategies and techniques to meet business plan objectives
- evaluate performance targets and recommend modifications or improvements
- plan, implement and evaluate a marketing strategy
- plan to manage promotional activities
- develop and manage budgets
- monitor product, pricing and distribution policies to improve market performance.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- financial management and budgeting
- price risk management
- performance evaluation measures
- competitors strengths and weaknesses
- business planning process
- customer relations policies
- market conditions and forces
- enterprise goals, objectives and directions
- markets and market analysis
- communication and promotion skills
- sales and marketing principles and practices

© Commonwealth of Australia, 2025 Skills Insight

- principles of trend analysis
- legal issues that affect marketing activities (trade practices, Fair Trading Acts, Sales of Goods Acts)
- industry and marketing knowledge including sales networks and distribution systems, and customer trends and preferences
- demographic studies and their application in the development of a marketing plan.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM201 Apply chemicals under supervision

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply chemicals using workplace specific application equipment under supervision.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes.

This unit applies to individuals who undertake defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well known parameters and identify and seek help with simple problems.

The skills and knowledge described in this unit underpin a broad range of activities applicable to various job roles at various levels.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Assessment Requirements for AHCCHM201 Apply chemicals under supervision

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and adopt safe work practices
- follow directions on chemical labels and relevant Safety Data Sheets SDS
- carry out pre-operational checks of application equipment
- measure, mix and load chemical mixes
- safely apply chemical under supervision
- report spillages, accidents or deficiencies in procedures and practices to supervisor
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage
- follow enterprise work health and safety procedures
- safely dispose of chemicals
- record relevant information, including amount of chemical applied as per commonwealth, state and territory chemical legislation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant commonwealth, state and territory legislation
- various transport and handling techniques and requirements
- layout and information contained in chemical labels and SDS
- features and functions of a range of application equipment relevant to the role
- risk factors to be taken into account such as human and animal health, spillage and environmental

© Commonwealth of Australia, 2025 Skills Insight

- different broad chemical types such as insecticides, herbicides and fungicides and their mode of action symbols on the label
- paths of entry of poisons into the body and the methods of limiting exposure
- how to assess if weather conditions increase risks and when it becomes unsuitable for application to continue
- relevant applied principles of Integrated Pest and Resistance Management
- relevant parts of the workplace spray plan

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM303 Prepare and apply chemicals

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conversation and Land Management Training Package Version 2.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare and apply chemicals for the control of pests across a range of industry sectors.

This unit covers the use of general application equipment used across a variety of industries including; boom sprays, orchard air-blast sprayers, handheld spray equipment, wipers, dry chemical applicators, dips, pour-on, spot-on, vaccination and drenching equipment.

All work must be carried out to comply with workplace procedures, work hand safety and pesticide legislation and codes.

All work must be carried out to comply with chemical label instructions, Safety Data Sheets (SDS's), the organisation's application plan and relevant legislation.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Assessment Requirements for AHCCHM303 Prepare and apply chemicals

Modification History

Release	Comments
Release 3	This version released with AHC Agriculure, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the need for chemical application
- develop an application/spray plan
- identify hazards and implement risk control procedures to ensure a safe workplace
- interpret and apply chemical label requirements included in the application or spray plan
- identify weather conditions that impact on spray drift risk and implement control measures
- conduct pre-operational checks of application equipment
- calibrate handheld and/or powered application equipment relevant to the industry sector
- mix and load chemicals in accordance with label requirements
- measure and record weather conditions before and during and after application
- apply chemicals safely in compliance with labels, legislation and codes of practice
- dispose of surplus chemicals and empty containers
- record relevant information including amount of chemical applied
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate knowledge of:

- options for pest control based on the Integrated Pest and Resistance Management Plan
- pest and/or disease resistance management
- various chemical labels and SDS formats
- impact of meteorological factors on the safe and effective application of chemicals
- factors that determine spray drift risk including droplet size, wind speed, temperature and temperature inversions and approaches to controlling spray drift risk
- risk factors including human and animal health, weather prior to, during and after application, spillage, residues in plants and animals consumed as food and environmental
- how to mix chemicals including mixing order, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- how to select, operate and use a variety of application equipment including boom sprays
- features, functions and calibration techniques for a range of powered and hand held application equipment relevant to the industry sector
- spray nozzle identification, selection, operation and use
- pests, weeds and/or diseases relevant to the industry sector
- legislation, regulations and licensing requirements in relation to chemical use
- APVMA policy on spray drift management.

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

The candidate must be assessed at least once calibrating application equipment.

Assessors must satisfy current standards for RTOs.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to transport and handle chemicals	1.1 Identify hazards, assess risks and implement control measures 1.2 Confirm contact phone numbers of emergency services are carried in vehicle in case of accident, spill or fire 1.3 Confirm chemicals will be transported in a vehicle that is compliant with the relevant legislation. 1.4 Confirm containers are secured in the tray, protected from the weather and in a sound condition to transport 1.5 Confirm appropriate first aid kit is carried in the vehicle in case of accident, spill or fire 1.6 Confirm transport arrangements meet legislative and regulatory requirements for the transport of hazardous substances and dangerous goods. 1.7 Obtain current Safety Data Sheets (SDS) from reseller or manufacturer for all chemicals to be transported
2. Transport and handle chemicals	2.1 Follow instructions from chemical SDS, to comply with transport requirements 2.2 Follow instructions from chemical label and SDS in the event of a spill or accident 2.3 Report transport incidents as required
3. Store chemicals in the workplace	3.1 Select and use appropriate personal protective equipment and ensure correct fit 3.2 Use appropriate storage methods as per label and Safety Data Sheet requirements and work health and safety standards 3.3 Maintain storage area according to legislative and regulatory requirements, including work health and safety and environmental protection. 3.4 Retain products in original containers with labels intact 3.5 Utilise storage methods to prevent contact with people or animals and contamination of produce or the environment 3.6 Apply correct disposal procedures for used chemical drums and storage containers as per the label and industry programs 3.7 Dispose of unwanted and out-of-date chemicals in the appropriate manner according to legislative and regulatory requirements and industry programs
4. Record storage details	4.1 Maintain chemical storage inventory and records according to legislative requirements

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	4.2 Report storage incidents according to legislative requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCHM304A Transport, handle and store chemicals.

Assessment Requirements for AHCCHM304 Transport and store chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow legislative requirements for the safe transport of chemicals
- follow emergency procedures for chemical spillage
- handle, transport and store chemical safely
- maintain a chemical storage area and chemical manifest, including copies of SDS for each product
- follow chemical label directions and SDS requirements for handling, transporting and storage
- maintain storage records
- follow enterprise work health and safety policies
- follow enterprise environmental protection policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to read a chemical label and SDS and translate that information into actions
- appropriate legislation and regulations that apply to transporting and storing chemicals
- risk factors including human and animal health and environmental associated with transporting, handling and storing chemicals
- requirements for disposal of excess, unwanted and out-of-date chemicals and used chemical containers
- processes to clear spillages and clean up
- types of placarding required for storage of hazardous chemicals and dangerous goods
- types of emergency information that must be carried in the vehicle when transporting dangerous goods

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely prepare and apply chemicals for the control of pests, weeds and diseases, using general application equipment.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine the need for chemical use and prepare an application plan	1.1 Identify the pest, weed or disease, and assess the need for control 1.2 Assess the requirement for chemical use 1.3 Assess health and safety hazard, risks and controls for different chemicals

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Confirm requirement for chemical application according to workplace procedures 1.5 Assess off target risk of each application method 1.6 Assess the environmental risk for application method 1.7 Notify stakeholders of intended chemical application according to workplace procedures and legislative and regulatory requirements 1.8 Prepare application plan according to workplace procedures
2. Prepare chemical mixes	2.1 Identify and select chemical required for target according to application plan 2.2 Calculate the volume, rate or dose according to chemical label instructions 2.3 Identify and select application equipment and set-up requirements according to application plan and operator instructions 2.4 Identify hazards, assess risks and implement control measures for application method according to chemical label and health and safety in the workplace procedures 2.5 Identify, select, fit and use personal protective equipment (PPE) according to workplace procedures 2.6 Select appropriate mixing equipment and suitable location to prepare and load chemicals according to workplace procedures 2.7 Prepare chemicals according to chemical label instructions 2.8 Return unused chemical to store and clean preparation equipment and work site of residues and spillage according to chemical label instructions and workplace procedures
3. Calibrate application equipment	3.1 Select application equipment for chemical according to application plan, off target risks and workplace procedures 3.2 Conduct pre-operational checks of application equipment according to operator and maintenance manual 3.3 Calibrate equipment according to operating instructions and application plan 3.4 Load equipment with chemical according to operating instructions and workplace safety procedures
4. Apply chemicals	4.1 Monitor and assess weather conditions and forecasts to ensure effective chemical application according to application plan

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.2 Select, ensure serviceability, fit and use PPE according to chemical label instructions and workplace procedures 4.3 Apply chemical according to label directions and application plan relating to the control of the pest, weed or disease 4.4 Monitor application equipment for correct performance and ensure effective chemicals application according to operating instructions 4.5 Identify health and safety in the workplace hazards and risks and implement controls 4.6 Clean up spills during application according to chemical label instructions and workplace procedures
5. Clean up equipment and complete records	5.1 Clean and decontaminate application equipment according to operator instructions, safety data sheets (SDS) and legislative requirements 5.2 Dispose of chemicals and used containers according to chemical label instructions, SDS and legislative requirements 5.3 Clean and store PPE according to workplace procedures 5.4 Record and report safety and environmental incidents according to workplace procedures and regulatory requirements 5.5 Record details of chemical application according to workplace procedures and legislative requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Read and interpret SDS, chemical labels, operating instruction and other documentation and consolidates information to determine chemical application actions and activity
Writing	• Accurately record and complete organisational records using clear language and terminology
Numeracy	• Perform mathematical calculations to determine rates of application chemical mixtures and calibration of equipment

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Navigate the world of work	• Take responsibility for following policies, procedures and regulations • Identify and implement chemical label requirements
Get the work done	• Take responsibility for planning, sequencing and prioritising tasks required for chemical application activities

Unit Mapping Information

Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely prepare and apply chemicals ensuring they have:

- determined and confirmed the need for chemical application by assessing the infestation, off target risk, and environmental risks
- developed an application plan for chemical application
- identified health and safety hazards, risk and implemented control procedures according to chemical label
- notified stakeholders of planned chemical application
- used personal protective equipment (PPE) according to workplace procedures
- interpreted chemical labels and applied chemical according to safety data sheets (SDS) and application plan
- identified and selected the chemical required for the target and calculated the amount and rates required according to chemical label
- identified and selected application equipment and suitable location, and determined the set up parameters according to application plan and operator instructions
- monitored and assessed weather conditions and equipment performance to ensure effective chemical application
- selected, conducted pre-operational checks according to operator and maintenance manual
- completed at least one calibration activity for application equipment
- prepared and loaded chemicals and returned unused chemicals to store in accordance with label, application plan and workplace procedures
- applied chemicals safely according to chemical labels, regulations and workplace procedures
- complied with chemical labels, SDS, regulations, maintenance manual, environmental procedures, operator instructions and application plan
- cleaned equipment and spills, and disposed of waste according to workplace and environmental procedures

© Commonwealth of Australia, 2025 Skills Insight

- maintained records and reported incidents according to workplace procedures and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control options when selecting chemicals for pests, diseases and weeds infestations, including:
  - chemical
  - mechanical
  - cultural
  - biological
  - integrated pest management including resistance management principles
- types of pest, diseases and weed their treatment and resistance
- legal implications and requirements of chemical labels and SDS
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- impact of weather factors on the safe and effective application of chemicals
- characteristics of chemicals, their mode of action and relevance to chemical selection and use, including:
  - translocated/systemic
  - contact
  - ingested poison
  - protectant
  - eradicant
  - knock-down
  - residual
  - selective/non selective
- factors that contribute to off target damage, including:
  - physical movement of chemicals (e.g. animals moving baits or soil movement)
  - chemical formulation
  - wind speed and direction
  - temperature and relative humidity
  - temperature inversions
  - controlling off target damage
  - rainfall
  - buffer zones and barriers
- hazards of chemical application, including:
  - human and animal health
  - environmental contamination

© Commonwealth of Australia, 2025 Skills Insight

  - residues in environment, plants and animals
  - withholding/re-entry periods
- safety requirements when applying chemicals, including:
  - procedures
  - PPE
  - signage
- safe handling, transporting and storage of chemicals
- preparing chemicals including preparation, compatibility, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- selecting and operating suitable application equipment
- features, functions and calibration techniques for powered and hand held application equipment, including:
  - pressure and volume of chemical
  - travel speed
  - nozzle identification, selection, operation
- legislation, regulations and licensing requirements in relation to chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - chemicals
  - PPE
  - application equipment
  - chemical measuring and mixing equipment
- specifications:
  - specific workplace documents, including work instructions and procedures for chemical application
  - chemical labels and SDS
  - regulations about use of chemicals
  - manufacturers' operation and maintenance instructions for equipment
  - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM401 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assess and mitigate risks associated with the use of chemicals across a range of industry sectors.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes,

This unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems. Work is carried out to industry standards.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit. Competency in this unit may be deemed to have a time limit when used as part of an accreditation or licence process.

Pre-requisite Unit

AHCCHM303 Prepare and apply chemicals

AHCCHM304 Transport and store chemicals

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify hazards and risks	1.1 Identify and source Codes of Practice, legislation, regulations and industry requirements relating to chemical use 1.2 Identify hazards involved in chemical handling and application
2. Assess risks and develop control procedures	2.1 Assess risks associated with chemicals used 2.2 Develop risk control measures and emergency action plans 2.3 Develop control procedures for transport, handling, storage, application, decontamination and disposal of chemicals 2.4 Develop a continuous improvement strategy to minimise risk
3. Monitor and assess adherence to chemical risk procedures	3.1 Provide appropriate personal protective equipment for employees using chemicals 3.2 Assess staff selection of application equipment according to procedures 3.3 Assess the ability of staff to follow restrictions on chemical use, application, decontamination and disposal 3.4 Assess how risk control procedures are followed in the workplace
4. Evaluate risk control measures and maintain records	4.1 Develop procedures for evaluating the effectiveness of risk control measures 4.2 Identify shortfalls during evaluation and subsequently rectify 4.3 Maintain risk assessment records according to industry, label, legislative and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCCHM401 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate implementation of procedures
- identify hazards, assess risks and implement and monitor control measures
- develop risk control procedures
- develop a continuous improvement strategy to minimise risk
- interact with staff members and provide feedback
- implement, monitor and evaluate a chemical risk control strategy maintain records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- where to source Codes of Practice, legislation and industry requirements relating to chemical use
- hazard identification and risk assessment strategies
- risk factors including human and animal health, product integrity, weather, spray drift, spillage and environmental
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy current standards for RTOs.

AHCCHM402A Plan and implement a chemical use program

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the planning and implementation of a chemical use program and defines the standard required to: plan and implement a program for chemical use; supervise others in chemical use; apply and monitor risk control procedures; select and manage chemical application equipment and processes.

Application of the Unit

Application of the unit	This unit applies those whose job role includes the development and implementation a chemical use program for pesticides use. This unit may be deemed to have a time limit when used as part of an accreditation or licence process.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and document an application/spray plan	1.1. Assess risks associated with proposed control strategy. 1.2. Select preferred control procedures. 1.3. Document preferred control procedures as application/spray plan.
2. Identify requirements for chemical use	2.1. Identify and interpret guidelines, legislation and regulations and industry requirements relating to chemical use. 2.2. Assess the need for chemical use as an option within an integrated pest management and/or animal health strategy. 2.3. Ensure that personnel are adequately trained in chemical use.
3. Ensure that risk control measures are followed	3.1. Provide appropriate Personal Protective Equipment for people in the workplace using chemicals. 3.2. Monitor the implementation of safe practice in the workplace including preparation and application of chemicals. 3.3. Monitor implementation of procedures for transport, handling, storage, decontamination and disposal. 3.4. Monitor implementation of procedures to mitigate residues in produce and the environment.
4. Plan and implement a maintenance program for chemical use equipment	4.1. Develop and implement a maintenance strategy for application equipment and personal protective equipment. 4.2. Monitor implementation of maintenance procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.3. Ensure that faulty or damaged equipment is repaired or replaced.
5. Ensure the correct selection and application of chemicals	5.1. Ensure that the correct chemicals and equipment is selected in accordance with the application/spray plan. 5.2. Ensure that pre-operational checks of application equipment are carried out. 5.3. Check to ensure that calibration conforms to the requirement of the application/spray plan. 5.4. Ensure that meteorological conditions are monitored and assessed during application where relevant. 5.5. Monitor the application procedures in the event of a chemical spill.
6. Ensure work activities are finalised in accordance with procedure	6.1. Ensure that excess chemical are disposed of in accordance with label and Material Safety Data Sheet requirements. 6.2. Ensure incident reports are completed as required in accordance with legislative and/or regulatory requirements. 6.3. Ensure all required records are completed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• develop strategies to monitor the implementation of procedures • evaluate conformance with procedures • identify hazards and oversee the safety of the working environment • develop and document an application/spray plan • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• sources of information relating to chemical use including: • guidelines • legislation and regulations • industry requirements • hazard identification and risk assessment strategies • methodologies for the development of procedures • risk factors including human and animal health, weather, spray drift, spillage, residue, product integrity and environmental • transport, handling and storage for chemicals • requirements for disposal of excess chemicals, clearing spillages and equipment clean up • OHS, environmental and pesticides legislation, codes of practice and enterprise procedures. • chemical application equipment capabilities and limitations.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • plan and implement a program for chemical use • supervise others in chemical use • apply and monitor risk control procedures • select and manage chemical application equipment

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	and processes.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Agricultural chemicals include:	• insecticides • fungicides • herbicides • bactericides • algaecides • biologicals • nematacides • rodenticides • antimicrobial agents • anthelmintics • fumigants • hormone growth promotants • a range of veterinary chemicals used to treat animals for disease. It does not cover the development of general chemical use procedures.

AHCFIR201 Assist with prescribed burning

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to assist with prescribed burning for agricultural or natural resource management purposes.

This unit applies to personnel participating in lighting and conducting prescribed burns under direct supervision.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- prepare machinery and equipment to enterprise requirements before burning
- continually monitor weather conditions throughout the burn
- use personal protective equipment as required and check, clean and store on completion of the burn
- identify appropriate safe escape routes throughout the burn
- maintain communication with supervisor and other staff at all times throughout the burn
- carry out clean up operations according to supervisor instructions to enterprise standards
- apply work health and safety procedures throughout the burn.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- fire behaviour
- extinguishing media and equipment
- communication equipment and procedures
- burning tactics and techniques
- assets that need protecting throughout the burn
- fire hazards, safety techniques
- organisation’s operating procedures for prescribed burn
- contingency plans and emergency procedures for the burn

AHCILM201 Maintain cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain Indigenous cultural places according to Community guidelines and cultural protocols.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. This includes undertaking defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess maintenance work required	1.1 Identify works required under the management plan and enterprise procedures 1.2 Identify machine, equipment and materials necessary to carry out maintenance works 1.3 Estimate materials required for maintenance work

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
2. Prepare for maintenance	2.1 Organise machine, equipment and materials to carry out maintenance works 2.2 Prepare and assemble safety equipment and materials
3. Maintain condition of place	3.1 Undertake maintenance work according to work programs and work health and safety policies and procedures 3.2 Report presence of threats 3.3 Report evidence of deterioration and wear 3.4 Clean up site on completion of maintenance works
4. Protect cultural place	4.1 Report any evidence of damage to place to supervisor 4.2 Report any breach of legislation or enterprise regulations to supervisor 4.3 Maintain protective barriers and signs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCILM201 Maintain cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the level of work required to maintain the cultural place
- prepare for and carry out maintenance activities in accordance with organisational, cultural and environmental requirements
- report deterioration or damage to place to supervisor
- report incidents of breaches of legislation including vandalism
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential threats to area
- techniques of site maintenance and protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM201A Maintain cultural places

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of maintaining cultural places as instructed by supervisors and defines the standard required to: assess the level of work required to maintain the cultural place; carry out maintenance activities in accordance with organisational and cultural requirements; report deterioration or damage to place; report incidents of breaches of legislation including vandalism.

Application of the Unit

Application of the unit	This unit applies to working under routine supervision and may involve operating in a team environment with deference to elders. Note: For Indigenous cultural places, the delivery and assessment against this standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess maintenance work required	1.1. Works required under the plan of management and enterprise procedures are identified. 1.2. Machine, equipment and materials to carry out maintenance works are identified. 1.3. Type and amount of materials required for maintenance work are estimated.
2. Prepare for maintenance	2.1. Machine, equipment and materials to carry out maintenance works are organised. 2.2. Safety equipment and materials are prepared and assembled according to enterprise Occupational Health and Safety (OHS) policy.
3. Maintain condition of place	3.1. Maintenance work is undertaken according to work programs and according supervisor's instructions. 3.2. Presence of threats is reported to supervisor. 3.3. Evidence of deterioration and wear is reported to supervisor. 3.4. Site is made good on completion of maintenance works according to supervisor's instructions enterprise guidelines.
4. Protect cultural place	4.1. Any evidence of damage to place is reported to supervisor. 4.2. Any breach of legislation or enterprise regulations is reported to supervisor.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.3. Protective barriers and signs are maintained according to enterprise procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• identify hazards an adopt safe work practices • assess maintenance work required • maintain condition of place • protect cultural places • prepare for maintenance • use literacy skills to follow sequenced written instructions and record information accurately and legibly • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.
Required knowledge
• OHS responsibilities • common pests and diseases • techniques of site protection • range of maintenance works undertaken on cultural sites • enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents • site recording systems used by the enterprise or community • relevant archaeological practices and procedures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • assess the level of work required to maintain the cultural place • carry out maintenance activities in accordance with organisational and cultural requirements • report deterioration or damage to place • report incidents of breaches of legislation including vandalism.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Cultural places may include:	• areas of non-indigenous activity • buildings and other structures • natural areas of indigenous cultural significance, historical events and monuments • areas of indigenous activity such as burial, occupation and contact sites, engravings, grinding grooves, sacred trees, rock pictures, fish traps, middens and mounds.

Unit Descriptor

Unit descriptor	This unit covers the protection of places of cultural significance and defines the standard required to: develop working relationships with stakeholders in cultural sites; canvass views in determining the heritage value and preservation issues of a cultural site; plan for the protection of a cultural site including resources required and submissions to be completed; observe cultural protocols in dealing with stakeholders and land managers; identify threats and develop action and emergency plans to mitigate and manage the risk of damaging incidents or loss of heritage value; document the submissions to implement conservation and restoration activities and support the incident management activities.

Application of the Unit

Application of the unit	This unit applies to those whose work includes protecting indigenous peoples' places of culture in co-operation with stakeholders and protecting places of cultural significance with reference to indigenous communities and/or line management. A high level of cultural awareness and the need to observe cultural protocols are important in parts of the process. Note: for indigenous cultural places, the delivery and assessment against this standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Communicate with stakeholders	1.1. Working relationships are developed with stakeholders that assist in the management of culturally significant places. 1.2. Communication approaches are developed that accommodate cultural views. 1.3. Views are regularly obtained on the way in which the cultural significance and resource can be conserved and used. 1.4. Views obtained are conveyed into enterprise and park/reserve planning process.
2. Conserve significance	2.1. Enterprise conservation policies and plans are used with stakeholder views to plan ongoing conservation actions. 2.2. Operational activities are developed and implemented to implement the conservation strategies and plans in a culturally sensitive manner. 2.3. Staff are organised to implement conservation

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	actions that minimise deterioration and damage. 2.4. Staff are supervised during restoration projects. 2.5. Resources are obtained for conservation and restoration activities. 2.6. Submissions are made to the enterprise budget process for funds to implement the conservation and restoration activities.
3. Manage incident	3.1. Operational plans are developed to manage incidents consistent with plan of management and risk management analysis. 3.2. Staff responsibilities are assigned to manage types of incidents. 3.3. Equipment and supplies are obtained and maintained to enable effective response to incidents. 3.4. Staff are trained in the management of the types of incidents for which they have an involvement. 3.5. Submissions are made to the enterprise budget process for funds to support the incident management activities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• consult with indigenous communities • observe cultural protocols • plan ongoing conservation actions • conserve significance of place of culture • manage incidents and threats • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• enterprise policies and procedures for conservation of places of cultural significance • indigenous protocols, consultation processes and networks • non-indigenous cultural groups • budgetary and financial approval processes.

AHCINF202 Install, maintain and repair farm fencing

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to install, maintain and repair farm fencing.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- select the appropriate materials and tools
- assess the fencing site for environmental impacts of the fence
- install fence posts and stays erect fences, tension fencing wire and netting, install gates and components
- undertake repairs
- record work activities
- clean up the fencing site and remove and dispose of, or recycle, waste
- use hand tools and powered fencing machinery in a safe, efficient and controlled manner.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- designs and purpose of a range of conventional fencing
- wire types, knots, tensions applications and limitations
- common hazards involved in fencing installation, maintenance and repair
- uses and types of fencing tools and equipment
- fencing materials manufacturers specifications and guidelines
- relevant work health and safety and environmental legislation, codes of practice and enterprise procedures.

Assessment Requirements for AHCINF203 Maintain properties and structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed and repairing properties and structures, in a situation that does not require the specialist skills of another trade.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- interpret and apply task instructions
- communicate with work team and supervisor
- select, prepare and safely use of a broad range of tools
- carry out routine maintenance to infrastructure, structures and facilities
- store or dispose of unused or waste materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics, capabilities and limitations of materials, equipment and tools
- operation of water taps and reticulation systems
- types of building cladding and finishes, purpose and use
- identification of defects and appropriate repair methods
- appropriate selection of repair materials
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice and procedures with regard to protection of the environment

Assessment Requirements for AHCINF303 Plan and construct conventional fencing

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- site the fence line according to property or land management plan
- estimate, cost and source fencing materials and arrange delivery
- identify hazards and implement safe work practices
- carry out fencing operations safely and efficiently
- construct a fence that meets specifications in plan or contract and is within tolerances for materials
- construct gate assemblies and swing gates
- string and strain wires to manufacturer's recommended tension
- use and maintain fencing machinery and equipment
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues affecting property fence planning and construction
- procedures for planning fencing in relation to the whole property plan
- range of fencing designs, construction methods and materials
- types of fencing construction tools and equipment
- fencing materials and costings
- common fencing hazards and safety precautions
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice with regard to the protection of the environment
- hazard identification, assessment and control

Element	Performance criteria
1. Interpret a low volume irrigation maintenance program	1.1 Determine the scope of maintenance 1.2 Determine the frequency of maintenance works 1.3 Establish irrigation maintenance standards 1.4 Plan and prepare maintenance works 1.5 Identify work health and safety hazards, assess risks and implement suitable controls 1.6 Identify environmental considerations of irrigation maintenance activities 1.7 Select and use suitable personal protective equipment
2. Inspect an irrigation system	2.1 Create an inspection checklist and inspect the system regularly 2.2 Identify remedial action required and undertake repairs to restore system to full effectiveness 2.3 Undertake servicing of mechanical equipment 2.4 Assess the results of maintenance works and record to ensure repairs or maintenance standards have been achieved
3. Carry out periodic system maintenance	3.1 Record damage and blockages with contaminants by damage type, location and the section of the system affected 3.2 Record and report damaged or faulty components and computer control systems and take action to effect repairs 3.3 Implement end of season maintenance procedures 3.4 Implement routine and preventative maintenance procedures
4. Record and report maintenance activities	4.1 Restore site and clear materials and equipment from the site on completion of maintenance works 4.2 Complete maintenance and servicing records 4.3 Record parts removed or replaced 4.4 Record or report faults and breakages

Assessment Requirements for AHCIRG333 Maintain pressurised irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check connections and controllers
- check sprinkler/emitter output and function
- confirm operational pressures
- ensure proper operation of automatic flush valves
- interpret and apply maintenance procedures
- remove, service and replace valves and filters
- test irrigation equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system maintenance
- characteristics and operation of pipes, joints, valves, emitters
- common operational and maintenance problems
- components of an irrigation system
- operation of pumps and water flow rates
- sprinkler/low volume irrigation system components

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG406A Plan on-site irrigation system installation and construction work

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers planning on-site irrigation system installations and construction work and defines the standard required to: identify operational requirements from contract documentation; develop strategies and plan procedures for installation and construction; develop a project plan with tasks, responsibilities, timelines and costs.

Application of the Unit

Application of the unit	This unit applies to irrigation installers who plan on-site irrigation system installation and construction work.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Appraise contract documentation and translate into operational requirements	1.1. Copy of building approval and conditions is obtained as required. 1.2. Contract documentation is reviewed for any unusual aspects of construction, use of materials and penalties. 1.3. Availability of sub-contractors is ascertained and selected to suit job requirements. 1.4. Availability of materials is checked with suppliers. 1.5. Site access limitations are assessed. 1.6. Relevant authorities controlling construction work advised of commencement date for project as required.
2. Develop strategies for implementing the construction operations	2.1. Procedures for controlling and recording site deliveries are established. 2.2. Procedures for recording the hire of plant and equipment are determined. 2.3. Occupational Health and Safety (OHS) procedures are established, including hazard/risk management. 2.4. Procedures are established for dealing with environmental issues associated with irrigation construction work. 2.5. Procedures required for the control of multiple projects are determined.
3. Prepare project schedule for irrigation installation and construction	3.1. Construction operations are prepared in sequence. 3.2. Operations are entered into a manually prepared schedule or computer based software package. 3.3. 'Critical path' is identified and schedule revised with

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	new activities/projects, as needed, and documented. 3.4. Timeframe is adjusted to take account of anticipated delays.
4. Determine all the required resources for project	4.1. Temporary services and site accommodation is determined as required. 4.2. Plant requirements and dates are selected and accessed. 4.3. On site labour requirements are determined.
5. Prepare dilapidation report	5.1. Records are made of the condition of existing building(s) to be retained and structures on the adjacent site boundaries. 5.2. Copies of reports are submitted to adjacent building owners prior to commencing construction.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• analyse contract conditions • develop strategies • schedule projects • determine resources • identify adverse environmental impacts of irrigation activities and appropriate remedial/preventative action • incorporate legislative and enterprise OHS and environmental procedures into planning • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
abilities.
Required knowledge
• installation and construction processes for on-site irrigation systems • logical construction sequence for the system • analysis of the required project resources • environmental impacts of irrigation using water from any ground or underground source • relevant enterprise OHS and environmental procedures • relevant Australian Standards (e.g. AS3500) • effect of main soil types on approach to excavation work and installation of irrigation components.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • identify operational requirements from contract documentation • develop strategies and plan procedures for installation and construction • develop a project plan with tasks, responsibilities, timelines and costs.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Planning may include:	• the planning of installation and construction work for both gravity fed and pressurised irrigation systems.

AHCIRG503 Design irrigation, drainage and water treatment systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design irrigation, draining and water treatment systems.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine design requirements	1.1 Analyse water quantity and quality needs for a particular crop or situation so that an estimation can be made for sufficiency and timeliness

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.2 Evaluate water transfer, recharge, reuse and harvesting systems 1.3 Determine water collecting and storing processes that do not degrade the water quality 1.4 Determine construction specifications that satisfy organisational and regulatory requirements 1.5 Identify and protect environmentally sensitive areas as required by local, State and National legislation 1.6 Investigate regional geology and geography so that a prediction can be made on the sustainability of irrigation, drainage, storage and treatment system 1.7 Conduct a site investigation to assess type of soil, depth of soil, depth of ground water, water salinity, and structural or chemical impediments and to determine the most cost effective irrigation, drainage, treatment and storage systems 1.8 Document design calculations and decisions
2. Define pumping and power systems	2.1 Identify pumps that can deliver water efficiently when needed, from the water storage at the flow and at the pressure required to operate the distribution system to the design specifications 2.2 Select pump motor combinations that are efficient, reliable, functional, serviceable and flexible for the intended application 2.3 Determine energy requirements and layout of electricity lines and check with local authorities 2.4 Optimise the relationship between capital and operational costs including a comparison of energy sources 2.5 Document performance indicators, design calculations and decisions 2.6 Design construction specifications that define work required to make suitable pumping and power systems available
3. Design an irrigation distribution system	3.1 Investigate regional geology and geography so that a prediction can be made on the sustainability of irrigation 3.2 Evaluate distribution systems and design with respect to a range of key variables 3.3 Size pipes, valves and fittings according to design system specifications so that capital cost is balanced against operation costs over the anticipated system life 3.4 Calculate and document flows, water levels and pressures so that they are within the acceptable tolerances for optimum performance 3.5 Include mechanisms for controlling and adjusting pressure and confirm isolation valves to direct water to areas with different irrigation schedules 3.6 Design distribution and monitoring systems to meet industry

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	recommendations and calculate distribution system flow and velocity 3.7 Design construction plans and specifications that define the work required to achieve the required standards of uniformity and efficiency of water application
4. Design a drainage, storage and treatment system	4.1 Document predictions of leaching fractions and salt movements and develop soil amelioration and drainage management plans 4.2 Determine the need for leachate interception and dewatering system, and if required, prepare construction specifications for interception and collection, water treatment, disposal and reuse or recycle 4.3 Design drainage, storage and treatment systems to meet industry recommendations and calculate distribution system flow and velocity 4.4 Produce construction plans and specifications that define the work required to achieve standards of uniformity and efficiency of the drainage, storage and treatment systems 4.5 Determine if drains and structures are capable of carrying the design water volumes and intensities 4.6 Minimise damage from drainage, storage and treatment system issues 4.7 Use hydrological calculations to predict volumes and rates of surface run-off
5. Determine capital expense budget	5.1 Document design calculations and decisions and communicate relevant information through plans, specifications and manuals 5.2 Determine and document materials requirements from plans and specifications 5.3 Estimate labour requirements based upon documented work schedule with reasonable allowance for variances in work schedules 5.4 Base costing attributed to each component on quoted information from suppliers, or sound analysis of individual elements 5.5 Confirm budget output by checking with an appropriately experienced and qualified person
6. Determine operating expense budget	6.1 Determine an operating expense budget that includes all expenses applicable to the completed irrigation, drainage, storage and treatment systems

Assessment Requirements for AHCIRG503 Design irrigation, drainage and water treatment systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and analyse information
- compare costings
- develop budgets
- develop system specifications
- document outcomes
- identify adverse environmental impacts of irrigation, drainage, water treatment and storage activities and take appropriate remedial action
- identify system design requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- contractual development and obligations
- control and monitoring systems
- cost/benefit analysis
- design processes
- developments in irrigation, drainage, storage and treatment technology
- environmental impacts of irrigation, drainage and water treatment
- soil types and their impact on the systems
- work health and safety and environmental protection legislation and regulations, codes of practice and enterprise policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC302 Construct landscape features using concrete

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct concrete structures and features as a component of landscape project works.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Interpret plans and specifications 1.2 Check the quantity and quality of materials 1.3 Select tools and equipment and check for serviceability 1.4 Identify hazards, assess risks and implement controls

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.5 Select and use personal protective equipment (PPE) 1.6 Identify and ameliorate environmental impacts of proposed concrete works
2. Set out and prepare the site	2.1 Determine and locate services 2.2 Mark out the position of the structure or feature according to plans 2.3 Establish profiles to conform to the nominated tolerances 2.4 Prepare subsoil by removing all debris, vegetable matter and topsoil to provide a solid foundation for concrete 2.5 Install drainage systems according to plans and specifications 2.6 Install form work to the site in a manner that will ensure it remains rigid during concrete pouring operations 2.7 Place and compact sub-base material to the required finished levels 2.8 Complete preparation of the site according to the type of structure or feature to be constructed 2.9 Place reinforcement as designated in plans and specifications
3. Mix and pour concrete	3.1 Determine proportions for concrete mix according to the strength requirements of the project 3.2 Determine the volume of dry materials necessary to produce final concrete mix 3.3 Mix together all dry ingredients and required additives to ensure a thorough blending of all materials is achieved 3.4 Introduce sufficient water to produce a concrete mix to the required consistency 3.5 Pour concrete to designated levels in a manner to avoid segregation of materials 3.6 Consolidate concrete using an approved vibration method
4. Finish concrete	4.1 Screed concrete to the desired finished level 4.2 Trowel surface to desired finish 4.3 Finish concrete off according to plans and specifications
5. Check quality of work and clean-up site	5.1 Inspect the quality of finished works to ensure the required standard has been achieved 5.2 Remove and clean form work to allow reuse 5.3 Ensure all clean-up works minimise impact to the environment 5.4 Clean, maintain and store tools and equipment

Assessment Requirements for AHCLSC302 Construct landscape features using concrete

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and specifications
- set out and prepare a site for concrete
- measure and construct profiles
- establish levels using levelling equipment
- place reinforcement
- pour, consolidate and finish concrete

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of constructing concrete landscape features
- industry standards in relation to reinforcing and consolidating concrete
- MPA testing theory and what affects MPA specifications in a concrete mix
- sub-base and sub-grade materials and preparation
- the comparative environmental implications associated with soil removal and the placement of concrete

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSC304 Erect timber structures and features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- mark out a site for timber structures and features according to design drawings and specifications
- apply a variety of surface finishes
- establish levels and prepare footings where required
- estimate quantities
- use levelling equipment
- excavate footings
- fix, join or assemble timbers using a variety of recognised methods
- use a power tools efficiently and safely

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for erecting timber structures
- common timber joins
- levelling principles and techniques
- footings for timber structures and their construction methods
- timber fixing methods and products
- timber properties and characteristics

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCMOM207 Conduct front-end loader operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and shut down front-end loader operations in an agricultural environment.

The unit applies to individuals who conduct front-end loader operations to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for front-end loader operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	practices to manage risks 1.2 Source and interpret front-end loader operation and maintenance manual and manufacturer instructions 1.3 Assess the work-site and confirm suitability of the machinery and equipment for the task 1.4 Select and maintain personal protective equipment according to workplace safety requirements 1.5 Fit and use personal protective equipment and confirm safety equipment applicable to the task being undertaken 1.6 Conduct front-end loader routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor for repair 1.7 Observe safety rules and regulations, including site rules and legislation and site specific instructions
2. Operate front-end loader	2.1 Carry out pre-start, and start up procedures according to health and safety in the workplace guidelines 2.2 Drive and operate front-end loader, and modify operating technique to meet changing work conditions 2.3 Select loading technique and modify where required to meet changing work conditions 2.4 Use attachments according to manufacturer instructions and site requirements 2.5 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.6 Identify environmental and biosecurity implications associated with front-end loader operation and minimise impact 2.7 Complete work task according to the agreed plan and within the operating capacity of the equipment and operator
3. Complete front-end loader operation	3.1 Park front-end loader and conduct shut down procedures 3.2 Perform routine operational servicing and minor maintenance according to front-end loader operation and maintenance manual 3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor 3.4 Clean, secure and store front-end loader

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.5 Remove and store keys in the required location 3.6 Maintain front-end loader use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	• Document front-end loader use
Oral communication	• Use clear language to report malfunctions, faults, irregular performance or damage • Participate in verbal exchanges to respond to questions and clarify information
Numeracy	• Calculate quantities of vehicle fluids including fuel • Identify correct tyre pressure or track tension
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	• maintenance interval schedule daily check • machine damage and serviceability • checking for missing parts • fluid leaks and levels

© Commonwealth of Australia, 2025 Skills Insight

	• fuel level • brakes and clutch operation • condition of tyres or tracks • machine controls.
Attachments must include at least one of the following:	• bale fork • bucket • bull blades • log fork • pallet fork • S Houle rock bucket • silage fork.
Biosecurity implications must include:	• control of cross-site contamination.

Assessment Requirements for AHCMOM207 Conduct front-end loader operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down front-end loader operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for front-end loader operations
- carried out front-end loader pre-operational checks for safe front-end loader operations
- driven and operated a front-end loader safely and modified operating technique to meet changing work conditions
- operated front-end loader features and attachments consistent with operation and maintenance manual and manufacturer specifications
- carried out front-end loader shut down procedures including securing and safe storage of front-end loader
- minimised environmental impacts associated with front-end loader operation
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the front-end loader
- followed industry and workplace biosecurity procedures
- completed required documentation for front-end loader use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with front-end loader operations
- front-end loader site safety requirements
- front-end loader components, controls, features, technical capabilities and limitations

© Commonwealth of Australia, 2025 Skills Insight

- front-end loader operation and maintenance manual
- duty of care to self, others and the environment when operating a front-end loader
- relevant legislation with regard to front-end loader operation and licensing requirements
- environmental impacts relevant to the operation of front-end loaders
- workplace procedures applicable to health and safety in the workplace requirements to operate a front-end loader safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
  - front-end loaders
  - attachments
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - front-end loader operation and maintenance manuals
  - industry and workplace biosecurity procedures applicable to front-end loader operation
  - legislation relevant to front-end loader operation and licensing requirements
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Element	Performance criteria
1. Prepare for maintenance and repair work	1.1 Clarify requirements of the work responsibilities with the supervisor 1.2 Identify equipment and material resource requirements according to the scope of the coordination work and the supervisor's instructions 1.3 Identify, document and present the priorities for maintenance and repair activities and time allocation to the supervisor for verification 1.4 Identify the environmental implications of the proposed maintenance and repair work and assess and report the likely outcomes to the supervisor 1.5 Identify work health and safety hazards, assess risks and implement risk controls 1.6 Select, use and maintain personal protective equipment according to enterprise procedures
2. Maintain and repair machinery and equipment	2.1 Maintain and repair equipment and machinery 2.2 Purchase, store and use materials to assist in maintenance and repair work 2.3 Organise delivery of materials to the site 2.4 Organise machinery and equipment to be on-site in good order when they are required 2.5 Identify and organise maintenance and repairs requiring specialist attention
3. Coordinate and report on maintenance and repair activities	3.1 Coordinate resources to suit the maintenance and repair activities and priority of work 3.2 Inform operators of their responsibilities in respect to operational maintenance requirements of machinery and equipment 3.3 Monitor and document personnel, activities, timelines and materials usage 3.4 Recognise and report contingency situations to the supervisor and take corrective actions 3.5 Report to management the maintenance and repair activities undertaken and completed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- perform a work health and safety risk assessment and implement safe work procedures and ensure a safe workplace
- read and interpret documentation associated with work site activities
- seek technical advice on the scale of repairs required where necessary
- establish priorities for work to be carried out
- calculate material and resource requirements
- co-ordinate a team to achieve optimum performance
- respond to contingencies and taking corrective actions where necessary
- document activities, timelines and material usage

Knowledge Evidence

The candidate must demonstrate knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery that may be required for the project
- environmental awareness associated with undertaking maintenance and repair work on machinery and equipment to ensure the impact on the environment is minimal
- relevant work health and safety issues, legislative requirements and codes of practice

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise maintenance of property, machinery and equipment.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, implement risk control strategies and oversee safe work practices
- plan, cost and schedule maintenance requirements
- order materials and allocating resources
- deal with contingencies and reschedule maintenance where necessary
- establish and monitor performance targets for maintenance team
- monitor and report on performance of maintenance activities
- dispose of waste products appropriately
- communicate effectively with work team, contractors and management
- implement enterprise work health and safety and environmental policies
- provide on job training /mentoring

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of maintenance requirements with regard to property, machinery and equipment
- maintenance and servicing cycles for property, machinery and equipment
- relevant State or Territory legislation, regulations and Codes of Practice with regard to work health and safety, environmental protection requirements, and the use and control of hazardous substances
- principles of hazard identification and risk management in the work place
- principles of on the job training and mentoring

AHCMOM402A Supervise maintenance of property machinery and equipment

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers supervising maintenance of property machinery and equipment and defines the standard required to: schedule and cost the maintenance requirements of machinery; order materials, allocate resources and schedule maintenance; carry out maintenance with regard to timelines, costs and safety; deal with contingencies and reschedule maintenance where necessary; dispose of waste products according to environmental legislation and enterprise procedures.

Application of the Unit

Application of the unit	This unit applies to those whose job role includes supervising the maintenance of property, machinery and equipment.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare maintenance plan	1.1. Maintenance requirements for property, machinery and equipment are identified form relevant information sources. 1.2. Maintenance costs are identified and quantified. 1.3. Maintenance requirements are checked against warranty, insurance agreements and indemnity provisions. 1.4. Maintenance plan is develop to promote and sustain performance and production systems in line with enterprise requirements. 1.5. Effective workplace communication strategies are established with regard to maintenance plan, environmental and Occupational Health and Safety (OHS) policies, and enterprise requirements.
2. Implement maintenance plan	2.1. Resource and supply requirements are identified, secured and included in enterprise budgets and operational considerations. 2.2. Prepared maintenance schedules and procedures are effectively communicated to staff, contractors and suppliers to minimise negative impacts on production and costs. 2.3. Maintenance plan is implemented and scheduled to minimise disruption to enterprise operations. 2.4. Potential risks are assessed with regard to staff and supply problems, and contingency plans prepared accordingly.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.5. Tasks required are aligned to staff capability, and training is provided where required. 2.6. Machinery and equipment are operated to manufacturer's specifications, OHS and enterprise requirements.
3. Monitor maintenance plan	3.1. Maintenance activities and performance are monitored against maintenance plan for efficiency and effectiveness. 3.2. Workplace hazards and environmental implications associated with maintenance procedures are monitored and controlled in line with OHS and enterprise requirements. 3.3. Costs are monitored and controlled within enterprise budget requirements. 3.4. Relevant information with regard to the maintenance plan is documented in accordance with enterprise requirements. 3.5. Property, machinery and equipment are maintained in clean and safe operational conditions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• identify hazards and oversee safe work practices • plan, cost and schedule maintenance requirements • establish and monitor performance targets for maintenance team • monitor and access performance of maintenance activities • observe the emergence and supervise the removal of workplace hazards and risks • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• types of maintenance requirements with regard to property, machinery and equipment • maintenance and servicing cycles for property, machinery and equipment • relevant State/Territory legislation, regulations and Codes of Practice with regard to workplace OHS and environmental protection requirements, and the use and control of hazardous substances • hazards and risks and respective control measures • training and instruction techniques for directing the learning of staff.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • schedule and cost the maintenance requirements of machinery • order materials, allocate resources and schedule maintenance • carry out maintenance with regard to timelines, costs and safety • deal with contingencies and reschedule maintenance where necessary • dispose of waste products according to environmental legislation and enterprise procedures.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Supervision may include:	• the range of maintenance programs performed in agriculture horticulture industry enterprises.

AHCNAR303 Implement revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement revegetation works in natural restoration areas.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for revegetation works	1.1 Identify appropriate timing and method of planting required 1.2 Select tools and materials required for the task and check functionality and cleanliness 1.3 Identify, obtain and store plant materials 1.4 Determine and organise labour and machinery requirements

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.5 Prepare a works schedule and provide to management or client 1.6 Conduct a safety risk assessment and apply work health and safety procedures
2. Prepare the revegetation site	2.1 Identify site hazards, assess risks and implement risk controls 2.2 Undertake site preparation according to planting plan or supervisor's instructions 2.3 Use soil nutrients and ameliorants, if required by plan specifications 2.4 Mark out revegetation site according to supervisor instructions or plan, applying knowledge of ecosystems and habitat requirements 2.5 Treat all diseased and competing plants, debris and pollutants according to the plan and implement risk controls 2.6 Select and apply treatments according to the risk controls selected 2.7 Install protective structures where indicated by the risk controls implemented
3. Undertake revegetation works	3.1 Carry out revegetation works in accordance with work health and safety policies and procedures and wear appropriate personal protective equipment 3.2 Inspect plant materials before revegetation works and discard defective materials 3.3 Treat plant materials with required nutrients according to documented guidelines 3.4 Plant revegetation stock according to planting program 3.5 Apply appropriate techniques for protecting, securing or anchoring new plants 3.6 Apply appropriate biosecurity and environmentally sustainable practices 3.7 Ensure all of the revegetation program requirements have been implemented 3.8 Identify and report potential threats to revegetation works
4. Maintain revegetated site	4.1 Monitor growth of plants 4.2 Maintain site according to the planting program requirements 4.3 Undertake remedial action and plant protection according to the needs of the species 4.4 Clean, maintain and store tools and equipment

Assessment Requirements for AHCNAR303 Implement revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out all revegetation works according to the planting plan or supervisor instructions
- prepare the site for revegetation works
- conduct a site hazard identification and risk control assessment
- recognise and treat plant diseases on a revegetation site
- treat weeds and competing plants
- clean and maintain the revegetated site
- use, clean, maintain and store machinery and equipment according to manufacturer instructions
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- revegetation techniques
- ecosystems, provenance and habitat requirements
- factors affecting the timing and method of planting
- identification of pests and diseases of trees
- principles and methods relating to the prevention and control of pests and diseases
- safety requirements when handling and using hazardous goods
- nutrient requirements of a range of plant species and cultivars
- physiology of plant growth

© Commonwealth of Australia, 2025 Skills Insight

- techniques for protecting and securing or anchoring trees and shrubs
- soils, nutrients and ameliorants applicable to revegetation program

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR402A Plan the implementation of revegetation works

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers planning the implementation of revegetation works and defines the standard required to: establish the purpose and client preferences for the site to be revegetated; carry out a site visit and confirm any planning requirements; develop a plan for the site, detailing the resources required and the program of works; develop timelines for the establishment and maintenance phases of the project; document the staged implementation plan.

Application of the Unit

Application of the unit	This unit applies to supervisors of revegetation programs who plan the implementation of revegetation works.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Carry out preliminary planning activities for revegetation works	1.1. Client preferences and contract requirements including the scope of the work for the revegetation project are confirmed and verified. 1.2. Specific statutory obligations and site responsibilities that may affect the implementation of works are identified. 1.3. An initial site visit is conducted to verify the biophysical and other factors of the project area including environmental considerations and historical modifications. 1.4. Occupational Health and Safety (OHS) obligations associated with the revegetation works are identified, OHS hazards are assessed and controls developed, costed and documented in the implementation plan according to enterprise guidelines. 1.5. The availability, quantity and costs of plants and other materials listed in the project schedules are verified.
2. Prepare a staged plan of work	2.1. Resources, tools and equipment required for revegetation procedures and ongoing maintenance of the site are identified, costed and availability confirmed with suppliers, contractors and appropriate personnel. 2.2. Site access and establishment issues are investigated to consider and plan for the environmental impacts of site work practices, avoid safety hazards to workers or the public, and minimise disruption to site works during the construction period.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.3. A program of works is prepared to provide a sequential allocation of resources and work tasks to meet the project contract timelines. 2.4. Timelines are developed for site establishment, the establishment period and maintenance of works. 2.5. Seasonal factors and impacts are incorporated in the staging strategy to allow for planting supply and care, wet day access, machinery use, fire hazards and establishment period. 2.6. Where required, special project works related to habitat resource development and enhancement are included in the staged implementation plan. 2.7. Document the staged implementation plan.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- assess a site for opportunities and constraints associated with implementation of revegetation works
- prepare schedules for implementation of revegetation works
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- awareness of the role of revegetation works in the restoration of the environment
- practical understanding of the environmental issues associated with undertaking revegetation works, and the need to comply with legislation and ensure that the

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
impact on the environment is minimal • principles of ecology including specific native plant and animal relationships and habitat requirements • identification, propagation and establishment techniques of specific native plant species • site evaluation techniques including methods of analysing soils, waterways and their condition • practical understanding of the advantages and disadvantages of a range of revegetation procedures • chemical, cultural and biological weed and feral animal control techniques • soil conservation and enhancement techniques and their advantages and disadvantages in reference to specific sites and habitats • soil erosion control and stormwater management techniques • maintenance requirements and practices for native plants prior to and after initial establishment • growth habits and cultural requirements of specific native plants under a range of soil and environmental conditions • OHS hazards associated with undertaking revegetation works and the controls necessary to remove or minimise risks associated with them • contract documents including specifications, plans of landscape works, services, supplies and surveyors documents.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • establish the purpose and client preferences for the site to be revegetated • carry out a site visit and confirm any planning

Assessment Requirements for AHCNSY201 Pot up plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare tools, equipment, media and plants
- measure media components
- disinfect work areas
- operate potting machinery (if required)
- pot up propagated plants
- handle plants with care
- treat common problems of plants
- use and maintain tools

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of potting up plants
  - appropriate use of personal protective equipment
  - basic plant physiology
  - common problems in a controlled environment
  - enterprise plants and their characteristics
  - hygiene and quality control
  - methods of disposing of waste
  - properties of relevant potting media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY203 Undertake propagation activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for plant propagation according to instructions
- collect propagation material as appropriate to species
- apply pre-treatments
- apply water and nutrients
- carry out a variety of propagation techniques
- collect propagation material
- maintain environmental parameters and temperature controls
- minimise damage to and maximise viability of propagated material
- maintain records of activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of propagation
  - botany and plant physiology as it applies to propagation
  - common problems that occur while performing propagation activities
  - enterprise hygiene requirements
  - enterprise requirements for handling and disposal of nursery wastes
  - maintenance requirements of tools and equipment used for propagation
  - plant nutrition
  - propagation methods required for a range of plant species
  - quality specifications/characteristics of a range of parent plants and propagation materials

© Commonwealth of Australia, 2025 Skills Insight

- record keeping relevant to the work function

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY301 Maintain nursery plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and care for nursery plants.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Select and use appropriate materials, tools and equipment 1.2 Identify work health and safety hazards, assess risks and implement suitable controls 1.3 Select, use and maintain suitable safety and personal protective equipment (PPE)

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
2. Monitor and maintain the nursery environment	2.1 Monitor environmental parameters against the needs of the plants 2.2 Alter environmental parameters, as required, to meet the needs of nursery plants and market requirements 2.3 Service irrigation system components for basic operational use and repair or replace basic user serviceable parts
3. Determine daily water requirements	3.1 Determine water requirements according to the needs of the plant and environmental parameters 3.2 Apply water to meet the needs of the plant group 3.3 Monitor water requirements of the plant
4. Promote plant growth by intervention	4.1 Test potting media in production areas to ensure quality specifications are met 4.2 Monitor the health of the plant 4.3 Undertake plant interventions as required 4.4 Dispose of waste with full consideration of the environmental implications
5. Complete work	5.1 Clean and store equipment, tools and equipment 5.2 Maintain records on all maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCNSY301 Maintain nursery plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for nursery plant maintenance activities
- calculate daily water needs
- implement a range of plant maintenance activities
- monitor plant health
- operate irrigation systems
- recognise stages of plant growth
- record workplace information
- repair or replace user serviceable irrigation components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of nursery plant maintenance
  - botany and plant physiology as it applies to plant maintenance
  - characteristics of various types of potting media
  - common problems that occur with nursery plants and their treatment
  - effect of different pruning and intervention methods
  - effects of environmental parameters on plant growth
  - factors affecting the growth of nursery plants
  - methods of calculating daily water needs
  - optimum growing conditions for a range of plants in a nursery
  - principles and operations of a range of irrigation systems used in nurseries

© Commonwealth of Australia, 2025 Skills Insight

- processes for modifying environmental parameters
- relationship between plant water needs and environmental parameters
- symptoms of unhealthy plants
- treatments required by plants at different stages and environmental parameters

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY306 Implement a propagation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare the growing environment to suit species and propagation method
- recognise and rectify problems and anomalies with parent plants, propagation material, propagation media, equipment and materials
- select appropriate propagation material
- handle potting mixes and propagation materials in a safe manner
- apply propagation techniques as appropriate to plants being propagated
- Provide aftercare to suit media conditions, plant requirements and propagation techniques

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for implementing a propagation plan
  - aftercare requirements for a range of propagated plants
  - problems that may occur performing propagation activities and preventative action
  - enterprise hygiene standards required for propagation activities
  - preferred types of propagation media for different species
  - propagation techniques required for a range of plants
  - quality specifications for parent plants and propagation materials
  - testing methods applied to propagation media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY401 Plan a growing-on program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and assess factors that could impact the growing-on program
- Identify labour, materials and activities involved in the growing-on program
- conduct research about production requirements, growth conditions and marketing implications of a growing-on program
- negotiate, budget and document plans
- communicate plans and schedules to staff
- oversee and monitor the growing-on program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of planning a growing on program
  - application techniques for chemical and non-chemical intervention or treatments
  - chemical, cultural and biological pest, weed and disease control techniques
  - common problems of growing-on and preventative actions that may apply
  - enterprise hygiene standards required for growing-on activities
  - enterprise quality standards of nursery plant production
  - optimal growing requirements of nursery plants
  - preferred types of propagation media for different species
  - processes and techniques for preparing, costing and documenting plans for and scheduling growing-on activities
  - testing methods applied to propagation media

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Carry out preliminary planning activities for a plant propagation program	1.1. Management and marketing requirements are confirmed and understood. 1.2. Space requirements for propagation program are evaluated. 1.3. Propagation techniques are determined according to species and sound horticultural practice. 1.4. Environmental parameters that impact on propagation are determined. 1.5. Budget for the propagation program is negotiated with management. 1.6. Occupational Health and Safety (OHS) hazards associated with the propagation program are identified, risks assessed and controls implemented.
2. Develop the propagation plan	2.1. Labour, materials, equipment and machinery needs are identified. 2.2. Propagation media requirements are determined according to the propagation method and needs of the plant. 2.3. Strategies to modify environmental conditions are determined according to the type of plant and propagation method used. 2.4. Selection criteria for the propagation material are determined according to the type of plant and propagation method. 2.5. Hygiene requirements for propagation activities are determined. 2.6. Propagation plan is documented and schedule of

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	activities are communicated clearly to staff.
3. Monitor success of propagation activities	3.1. Variances from plan and scheduled activities are identified and recorded. 3.2. Propagated plants are assessed for health, quality and viability according to enterprise quality standards. 3.3. Remedial procedures are planned to meet marketing objectives and business imperatives.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- plan a propagation program applies to the
- conduct literature and consultative research to obtain information about propagation requirements, growth conditions, and marketing implications
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- OHS hazards associated with undertaking propagation activities, and the controls necessary to remove or minimise risks associated with them
- practical understanding of the OHS and environmental issues associated with use and disposal of propagation media
- enterprise and industry hygiene standards required for propagation activities, including relevant quarantine regulations
- industry and enterprise quality specifications for parent plants and propagation materials
- common problems that may occur while performing propagation activities in a

REQUIRED SKILLS AND KNOWLEDGE
controlled environment, and preventative/corrective action that may apply • processes and techniques for preparing, costing and documenting plans for and scheduling propagation activities • identification, propagation and establishment techniques required for a range of plant varieties and cultivars • monitoring staff performance • Plant Breeders Rights (PBR) and related legislation • aftercare requirements for a range of propagated plant varieties and cultivars • testing methods applied to propagation media • preferred types of propagation media for different species • chemical, cultural and biological pest, weed and disease control techniques • application techniques for chemical and non-chemical intervention or treatments.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • determine propagation techniques and resources required • select propagation materials and media and determine optimal environmental conditions • determine plant hygiene requirements • review propagation plan by monitoring strike rate and health and quality of propagated plants • negotiate and document plans.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

EVIDENCE GUIDE	
	enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Propagation techniques may include:	• seed • cuttings • layering • growing on tissue cultured plants • division or splitting • budding • grafting • spores • cloning.

Assessment Requirements for AHCPGD402 Plan a plant establishment program

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- plan a plant establishment program
- consult with clients
- document plans, specifications and work procedures
- comply with legislative requirements
- write plans and reports that staff, clients and contractors can understand
- calculate the cost and spatial and logistical requirements of components of the plant establishment program.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- identification, propagation and establishment techniques of specific plant species and cultivars
- the advantages and disadvantages of a range of plant establishment procedures
- maintenance requirements and practices for specific plant species and cultivars, prior to and after initial establishment
- processes and techniques for preparing, costing and documenting plans for and scheduling plant establishment activities
- processes and techniques for scheduling plant establishment activities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT503 Manage a controlled growing environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage controlled growing environments.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify crop requirements	1.1 Determine crop growth and production requirements according to a documented production plan 1.2 Research environmental parameters for optimal growing

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	conditions for the specific crop, using available information resources 1.3 Identify and record controlled growing environment factors
2. Determine requirements for controlled growing environment	2.1 Identify, cost and confirm availability of structures, machinery, equipment and resources required to control environmental conditions 2.2 Identify detrimental environmental impacts associated with the controlled growing environment system
3. Prepare a management plan for controlled growing environment	3.1 Determine management objectives for controlled growing environment consistent with production plan and market requirements for crop quantity and quality 3.2 Develop a schedule of environmental control procedures according to controlled environment management objectives 3.3 Evaluate and report staff training needs with regard to operation and maintenance of environmental control systems 3.4 Document a budget supporting the controlled environment management plan and seek approval 3.5 Communicate the schedule of environmental control procedures clearly to staff
4. Manage controlled growing environment	4.1 Identify controlled environment indicators and thresholds for remedial action for monitoring 4.2 Develop monitoring frequency and schedule according to the requirements of the production plan and communicate to staff 4.3 Record, analyse and apply all monitoring data to ensure optimal plant development 4.4 Document and report remedial action undertaken 4.5 Monitor costs of the controlled growing environment system against budget 4.6 Record and report budget adjustments 4.7 Evaluate recorded information, budget data and production outputs and document operational achievements towards management objectives in a report

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPHT503 Manage a controlled growing environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a management plan to cover staff training, budgets, operating procedures and remedial actions
- develop environmental monitoring procedures
- evaluate and document the achievements towards management objectives
- identify the growing requirements of the crop
- prepare specifications for controlled growing infrastructure

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing controlled growing environments
  - controlled environmental conditions in regard to crop plant physiology, growth stages, and product quality and quantity
  - legislation and regulations relating to the controlled environment systems
  - market requirements for crop quantity and quality
  - monitoring, analysis and recording systems
  - plant physiology and biochemistry
  - quality production methods and techniques for a range of controlled environment plants
  - staff training requirements
  - techniques and methods of implementing optimal growing conditions for a range of horticultural crops

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG201 Treat weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise significant weed species and apply a range of weed treatment control options.

This unit applies to supervised workers treating weeds in commercial crops, nurseries, parks and gardens, turf, and natural areas and is carried out following strict work instructions and under supervision.

Supervisors are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to treat weeds	1.1 Recognise target weeds by common name 1.2 Record details of the weed occurrence and discuss with supervisor

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.3 Identify appropriate control technique with supervisor 1.4 If spraying is necessary, calculate application rates required and confirm calculations with supervisor 1.5 Select and prepare equipment for use according to enterprise guidelines, supervisor's direction and manufacturer's specifications 1.6 Place caution or warning signs as required by work instructions or standard operating procedures 1.7 Identify work health and safety and environmental hazards and report safety concerns to the supervisor
2. Treat weeds	2.1 Wear personal protective equipment according to manufacturer's specifications 2.2 Prepare treatments according to supervisor's instructions, manufacturer guidelines, label directions and safety data sheets 2.3 Apply treatments to minimise damage to non-target species according to work health and safety and regulatory requirements
3. Carry out post treatment operation	3.1 Clean and store personal protective equipment and application equipment 3.2 Dispose of treatment waste in a way that causes minimal environmental damage 3.3 Maintain records according to enterprise guidelines and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMG201 Treat weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow supervisor instructions to prepare and apply treatments to weeds
- identify and report safety and environmental hazards according to workplace requirements
- shut down and clean and store personal protective equipment and application equipment in a way that minimises environmental impacts
- dispose of treatment waste according to workplace procedures and without causing environmental damage
- maintain records according to workplace and legislative requirements
- use standard industry terminology for plants, weeds and chemicals
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of information on weeds and treatments
- environmental considerations when using chemicals for treating weeds
- equipment required to complete the task
- equipment capabilities and limitations
- personal protective equipment required for treating weeds
- weeds and dispersal methodologies common to work area
- a range of treatment methods
- caution or hazard signs and signals
- purpose of chemical labels and safety data sheets
- where to access safety data sheets

AHCPMG301 Control weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to plan and coordinate weed control activities.

This unit applies to workers in agriculture, horticulture or land management-based enterprises who are required to carry out the control of weed infestations using cultural, biological and chemical methods to provide effective, economical control of weeds while minimising damage to the environment.

The unit applies to workers who demonstrate autonomy and judgement and take limited responsibility in known contexts.

Individuals operating in this field who use chemicals for weed control are required to hold current chemical handling certification. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess weed infestation	1.1 Record details of weeds and potential for weeds in target area 1.2 Identify the scope, stage and size of the weed infestation that adversely impacts on the landscape or production 1.3 Determine if plant health or growth or production requirements are compromised by level of infestation 1.4 Identify tolerable levels of infestation according to client, legislation, market, environmental and Integrated Pest Management requirements 1.5 Seek professional advice or conduct research on possible approaches to control of the weed infestation 1.6 Identify non-target plant and animal species present in the area 1.7 Assess the site for access, suitability of control measures, work health and safety and environmental risk
2. Plan control measures	2.1 Determine suitable control options according to Integrated Pest Management principles, legislative requirements and industry practice 2.2 Identify, assess, and control risks to all stakeholders and the environment, including risks to self, the public, non-target plant and animal species 2.3 Identify appropriate tools, equipment machinery and resources for the planned control measure 2.4 Select appropriate personal protective equipment in accordance with work health and safety requirements 2.5 Prepare or select an integrated plan for the control measures or strategies according to Integrated Pest Management principles and environmental sustainability practices 2.6 Prepare documentation for control measures, including work health and safety, safety data sheets, and chemical use according to workplace and legislative requirements
3. Implement weed control	3.1 Assess if conditions are appropriate for control plan to proceed and make any necessary adjustments to the plan 3.2 Implement control measures in accordance with Integrated Pest Management plan and standard industry practice 3.3 Ensure that control measures minimise non-target species and environmental damage 3.4 Maintain records and documentation of the control measures

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	applied
4. Monitor control measures	4.1 Monitor control measures to identify signs of adverse impact on humans, animals, non-target plants or environment 4.2 Assess effectiveness of control measures in accordance with Integrated Pest Management guidelines and available industry standards 4.3 Report assessment of control measures to client or organisation

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMG301 Control weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify range of weeds and beneficial organisms in the work area
- plan and coordinate weed control activities
- identify threshold levels or tolerance of weeds
- identify target weeds at different growth stages
- conduct a site hazard identification and risk control assessment for weed control
- prepare, maintain and calibrate equipment
- select and apply weed management methods appropriate to the context
- maintain records of weed management activities
- monitor, record and report the effectiveness of methods
- minimise damage to non-target species and the environment
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- suitable weed control measures and timing of weed control activities based on:
  - the lifecycle and ecology of a range of relevant weeds in the area
  - the cyclical nature of weeds and control programs
  - how weeds grow and spread and methods of weed dispersal
  - weed characteristics
  - beneficial organisms in the area

© Commonwealth of Australia, 2025 Skills Insight

  - new and emerging weed species present in the area
  - how plant health or growth requirements can be compromised by infestation levels
  - economic, aesthetic, health, fire hazard and environmental thresholds for a range of weeds, common to the area
  - weed control methods and when they should be selected, including prevention strategies
  - non-target plants common to the area, especially plants with morphological features similar to the target pest plant
  - key concepts of Integrated Pest Management
  - risk factors including human, animal health and environmental associated with control measures
- factors that affect the efficacy of weed management
- how to conduct activities in a manner that avoids or minimises disturbance to other plant or animal species
- signs of adverse impact on humans, animals, non-target plants and the environment due to implemented control measures and ways of minimising these adverse effects
- a range of site-monitoring techniques that may be used to implement the weed control plan
- hazard identification and risk assessment methodologies
- types of equipment including personal protective equipment appropriate to the control measure
- work health and safety requirements pertaining to the use of cultural, biological and chemical agents
- relevant parts of the organisation's pest management plan and survey strategy
- legislative requirements relevant to weed control.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG302 Control plant pests, diseases and disorders

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to control plant pests, diseases and disorders, taking into consideration Integrated Pest Management options. The unit describes the skills and knowledge required to identify a range of pests, diseases and disorders and beneficial organisms, assess damage or threat to plants and select and apply pest and disease controls and timing of operations. It includes preparing and calibrating equipment, monitoring the effectiveness of controls and keeping records.

This unit applies to workers in plant-based enterprises or activities working under limited supervision from others with checking only related to overall progress. Workers may require limited organisation and have limited responsibility for the work of others.

Individuals operating in this field are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Assessment Requirements for AHCPMG302 Control plant pests, diseases and disorders

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can:

- identify pests, diseases and disorders, beneficial organisms and host plants in target area
- assess damage or threat to plants
- select and apply pest and disease management options and determine timing of operations according to pest management plans, to maximise impact on target species and minimise risks to non-target plant and animal species in the area
- prepare and calibrate equipment
- monitor the effectiveness of pest and disease management methods
- keep records of pest and disease management activities to regulatory and enterprise standards
- follow of work health and safety procedures when carrying out pest and disease management activities
- apply appropriate environmental sustainability practices when planning and carrying out work.
-

Knowledge Evidence

The candidate must explain:

- pest, disease and disorder and symptom recognition of host stress
- economic, aesthetic or environmental thresholds for a range of plant pests, diseases and disorders

© Commonwealth of Australia, 2025 Skills Insight

- chemical, biological and cultural methods and treatments available to the enterprise within the parameters of an Integrated Pest Management program
- range and use of tools, equipment and machinery available to the enterprise for implementing the management measures
- range of site monitoring and analysis techniques that may be used to implement an Integrated Pest Management program
- implications of choice of plant pest and disease control methods with site limitations, environmental implications, end market and production or environmental objectives for the site
- basic principles of Integrated Pest Management standards or industry Code of Practice
- work health and safety responsibilities for employees and employers
- correct use, maintenance and storage of personal protective equipment
- work health and safety and environmental legislative requirements including hazardous substances regulations.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG402A Develop a pest management action plan within a local area

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers developing a pest management action plan within a local area and defines the standard required to: determine the lifecycle, distribution and loss of production caused by the pest; document the economic losses and environmental risks and impacts of the pest; develop control measures based on a combination of strategies to control the pest at its most vulnerable stage with minimal environmental impact; establish the costs and benefits of implementing the selected control strategies; select management options to eradicate or manage the pest across a local region; negotiate an action plan to implement the management options across an area or region.

Application of the Unit

Application of the unit	This unit applies to regional pest management officers and is likely to be undertaken independently, with reference to specialist advice.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Determine land management/production objectives	1.1. Land users and other stakeholders are consulted regarding local objectives. 1.2. Objectives address major land uses and production activities in the local area affected by the impacts of the target pests. 1.3. Objectives relate to the problem definition and the reduction in the pest impacts and associated losses. 1.4. Objectives comply with national, state and regional legislation and regulations. 1.5. Objectives support strategies for land and pest management.
2. Estimate costs and advantages for management units	2.1. The diversity of land management and production values that the target pests affect within the local area is defined. 2.2. The likely costs of preferred options for control of pest populations and/or changes to land management or production activities associated with each value are estimated. 2.3. The likely costs are compared with the impacts and losses caused by the target pests.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. The management units most affected, both actually and potentially, by the target pests are defined and prioritised.
3. Define the performance level for each land management/production objective	3.1. Performance levels are defined in accordance with sustainable land use principles to address target pests population levels, economic impacts and environmental impacts. 3.2. Performance levels are realistic and measurable.
4. Select management options for the target pests	4.1. Options for controlling pest populations and/or changing land management or production practices are assessed in terms of economic factors, technical difficulty, practical feasibility, social and/or environmental acceptability. 4.2. A range of management options are assessed in terms of current and future financial support, when control activities are to be implemented, level of target pests population reduction required, and the most suitable control methods and techniques. 4.3. A management option is selected in accordance with sustainable land use principles, economic feasibility, environmental acceptability, Integrated Pest Management (IPM) principles, and statutory requirements for pest control.
5. Negotiate possible actions with relevant stakeholder	5.1. The action is based on the definition of the problem using data from measurement of abundance and impacts. 5.2. The action clearly documents the pest problem, the objectives, the stakeholders, the prioritised management units, the performance criteria, and the most suitable management options.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• estimate costs and advantages for areas affected by the target pest/s • define performance levels for pest management for each land use • select management control options for the target pest/s • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• relevant local, regional, state and national strategies for pest management including those for individual species • motivational effects of stakeholder involvement • community facilitation processes • local land management process • relevant legislative and regulatory requirements including statutory requirements for pest control • environmental protection legislation • principles of IPM • pest control methods and techniques • defining local land management and production values • determining cost benefit analysis of management options • sustainable land use principles • Occupational Health and Safety (OHS), environmental and pesticides legislation, codes of practice and enterprise procedures.

Evidence Guide

EVIDENCE GUIDE
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • determine the lifecycle, distribution and loss of production caused by the pest • document the economic losses and environmental risks and impacts of the pest • develop control measures based on a combination of strategies to control the pest at its most vulnerable stage with minimal environmental impact • establish the costs and benefits of implementing the selected control strategies • select management options to eradicate or manage the pest across a local region • negotiate an action plan to implement the management options across an area or region.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Action plans may include:	• those relating to a range of weeds and vertebrate and invertebrate pests.

AHCPMG507 Develop a regional pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a pest management plan that applies to a large or regional level. It also describes the skills and knowledge required to gain agreement and commitment from stakeholders to implement the plan.

Pest management plans are used by land managers who practice sustainable land management principles and require a collaborative approach with neighbouring landholders.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in specific technical areas, are able to analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine goals of the plan	1.1 Determine scope of the plan 1.2 Determine the need for, and establish a steering committee, where necessary 1.3 Determine consultation requirements 1.4 Conduct and document consultation with stakeholders to determine goals 1.5 Assess and document options for controlling pest populations, changing land management or production practices, in terms of economic factors, technical difficulty, practical feasibility, and social and environmental acceptability
2. Set specific objectives for the pest management plan	2.1 Define and document objectives to be achieved in consultation with stakeholders 2.2 Define roles and responsibilities of stakeholders in delivering objectives
3. Identify activities required to achieve specific objectives	3.1 Determine and document activities required to achieve objectives in consultation with stakeholders 3.2 Prioritise activities and seek commitment from relevant stakeholders, where relevant 3.3 Conduct risk management for community, environment, work health and safety and production 3.4 Ensure activities align with pest management plan, environmental sustainability policies and biosecurity plans or legislation 3.5 Determine monitoring, evaluation and reporting methods
4. Determine performance criteria for objectives	4.1 Determine measurable performance criteria in terms of target pest population levels, economic impacts and environmental impacts
5. Publish the plan	5.1 Check the plan meets all biosecurity, legislative and national and State or Territory strategic policies 5.2 Submit draft plan to stakeholders for review 5.3 Finalise plan and seek endorsement by key stakeholders 5.4 Publish and distribute plan according to organisational requirements

Assessment Requirements for AHCPMG507 Develop a regional pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a pest management plan that contains objectives and management options which comply with relevant legislation and best practice principles of pest management
- consult with stakeholders to reach agreed upon outcomes from identified objectives
- scope geographical area, landscape and land uses within area and with stakeholders
- develop pest management plan according to defined pest problem
- align pest management plan to biosecurity plans or legislation
- develop pest management plan in accordance with sustainable land use principles, economic feasibility, environmental acceptability and statutory requirements for pest control
- develop, evaluate and document all management options to control, eradicate or prevent pest populations
- achieve approval of the plan by key stakeholders
- conduct risk assessments and cost-benefit analyses of the range of management options available in order to select the best option for the specific context
- apply work health and safety policies and procedures in the context of own work
- include appropriate animal welfare Code of Practice and Standard Operating Procedures in the plan
- apply appropriate sustainability practices in the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- planning techniques

© Commonwealth of Australia, 2025 Skills Insight

- concepts of the strategic approach to pest management, the importance of monitoring and the effectiveness of management evaluation
- relevant local, regional, State/Territory and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- principles of integrated pest management
- types of monitoring technology available
- land use processes, ecological systems and production systems
- pest management options and strategies
- techniques used to validate target pest population and distribution data supplied by stakeholders, and methods of obtaining other relevant data
- how to measure or estimate economic losses and environmental impacts from pest presence
- Federal and State or Territory legislation and regulations relating to property, stock and duty of care
- target pest biology and lifecycles
- potential diseases or toxicity risks
- pest population dynamics and economic and environmental thresholds
- wildlife issues and how to minimise risks to non-target species as well as deal with pest behaviour
- environmental protection legislation
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW201 Conduct erosion and sediment control activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to control erosion and sediment using earthworks construction and other land forming activities.

Construction is often carried out using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work, they undertake defined routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Read work instructions relating to the activity and clarify purpose

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	and issues with the supervisor 1.2 Prepare tools and equipment and use as instructed by supervisor 1.3 Identify manual handling and other work health and safety hazards, tell supervisor and apply safe work practices to minimise risks 1.4 Select personal protective equipment and clothing and ensure correct fit
2. Conduct erosion and sediment control activities	2.1 Identify erosion and sediment risks at a site and confirm with supervisor 2.2 Assemble structures to prevent erosion and control sediment at site 2.3 Carry out sediment control and maintenance activities 2.4 Operate tools, machinery and equipment as instructed
3. Complete work	3.1 Dispose of or recycle soil and waste material from the site to minimise damage to the environment 3.2 Clean, store and maintain all tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCSAW201 Conduct erosion and sediment control activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct erosion and sediment control activities as instructed by a supervisor
- identify hazards and follow safe operating procedures
- identify erosion and sediment control structures, measures and practices
- carry out routine work with control measures and structures
- identify areas at risk of erosion
- operate or use machinery tools and equipment required for the tasks involved safely and efficiently

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the need for erosion and sediment control, including:
- the cost of erosion and sedimentation to the community
- the effect of loss of habitat
- how water quality is affected
- how soil erosion can cause loss of production, assets and amenities
- re-occurring maintenance, repair and monitoring requirements for controls
- agents and processes of erosion and sedimentation and ways to control them
- types of erosion and sediment control structures and techniques for constructing them
- role of vegetation in erosion control
- basic catchment issues
- characteristics of soils with an emphasis on erodible soils

Assessment Requirements for AHCSAW302 Implement erosion and sediment control measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- construct, install and maintain a range of erosion and sediment control measures
- identify hazards and implement safe work procedures
- prepare for implementation and construction
- read and follow plans to carry out implementation and construction
- identify survey pegs and site indicators on site and on the plans
- carry out repairs and maintenance procedures to enterprise standards
- select equipment and materials appropriate for the task
- operate equipment and machinery according to safe work practices and manufacturer instructions
- clean and store equipment, machinery and tools according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- materials cartage pollution control
- sequence of working and timing/duration
- work health and safety issues relating to the equipment and the site
- equipment used
- materials suitable for constructing erosion and sediment control measures and where to source them on site
- limitations of structures including timing of maintenance, structure life cycle, specifications and standards

Unit Descriptor

Unit descriptor	This unit covers the construction/installation and maintenance of a range of measures specified on erosion and sediment control plans and defines the standard required to: select and prepare equipment; confirm the details of work; identify survey pegs and site indicators; construct earthworks in line with the plan; install erosion and sediment control products and materials; carry out repairs and maintenance procedures.

Application of the Unit

Application of the unit	This unit applies to workers who are required to carry out the actions specified on erosion and sediment control plans.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for implementation and construction	1.1. Erosion and sediment control plan and schedule of works match site conditions. 1.2. Survey pegs and site indicators are identified on site. 1.3. Equipment and tools are matched to program works and terrain on site. 1.4. Work readiness of selected equipment and tools are verified in line with contractor policy. 1.5. Materials are selected to complete proposed works in line with construction schedule.
2. Carry out implementation and construction	2.1. Earthworks are constructed in accordance with details specified in the plan and to industry standards. 2.2. Erosion and sediment control products and materials are installed in accordance with manufacturer's recommendation and industry guidelines and plans.
3. Carry out repairs and maintenance procedures	3.1. Site works maintenance inspection schedule is applied to reinstate operating effectiveness of erosion and sediment control measures on site.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• identify hazards and implement safe work procedures • prepare for implementation and construction • carry out implementation and construction • carry out repairs and maintenance procedures • use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• materials cartage pollution control • sequence of working and timing/duration • Occupational Health and Safety (OHS) issues relating to the equipment and the site • equipment used • construct, install and maintain includes materials, quantity and where to source them on site • construction/installation techniques for all measures on the plan • limitations of structures including timing of maintenance, structure life cycle, specifications and standards • environmental impacts and procedures for erosion and sediment control.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment

Assessment Requirements for AHCWRK201 Observe and report on weather

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor physical signs of weather in the context of available information
- relate forecasts to impact on current operations and activities
- communicate information on weather and situations that may be impacted
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of wind and rain on wind chill
- effects of wind shear and wind chill exposure
- enterprise and industry policies for monitoring weather and climate conditions, and recording and reporting weather and climate conditions
- weather and climate conditions impact upon farming and grazing activities
- effects of wind chill on metabolism of animals
- effects of prolonged dry periods on pastures and animal production, and natural resources
- effects of extreme heat on animals, including during birthing, and effects of heat stress on neonates
- work health and safety requirements and practices, especially as they relate to weather and climate monitoring and preparations for hazardous weather
- sustainability practices in the context of own work.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for operating in remote environments
- prepare for emergency situations
- source and interpret maps of the area
- operate in remote environments
- implement workplace procedures to notify location, activities and travel
- prepare provisions to cover essential and emergency needs
- preparing communication equipment
- use bushcraft skills to modify the living environment and reduce the risk of mishap
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- map reading and navigation skills including direction finding (including GPS, use of compass, stars or watch)
- local topography, nearby inhabitants and locations within that area
- survival techniques and human needs relating to survival situations
- clothing requirements for sun or heat protection
- first aid procedures for common injuries
- bush craft including making a fire, cooking and wild food gathering
- water supplies, sources and generation methods
- emergency vehicle and mechanical equipment repair

© Commonwealth of Australia, 2025 Skills Insight

- the operation of communication equipment (including field communications by two-way, satellite telephony or HF radio), and distress signalling including use of signalling mirrors
- weather patterns and indicators
- work health and safety in the context of work in isolated and remote situations
- environmental impacts of work in isolated and remote situations
- rope skills including useful knots including: reef, clove hitch, truckie's hitch, and bowline; simple lashings and tying down of loads.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK302 Monitor weather conditions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and interpret weather and climate conditions and assess the likely impact.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret weather and climate information	1.1 Monitor weather and climate information and warnings regularly to determine likely conditions 1.2 Anticipate and assess potential variations in weather and climate conditions according to warnings, weather patterns and historical experience 1.3 Identify the possible impacts of weather and climate on crops,

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	livestock and work tasks to determine appropriate preventative action 1.4 Review suitable preventative actions to ensure availability of appropriate resources and responses
2. Carry out preventative action	2.1 Disseminate information and advice to relevant personnel 2.2 Determine preventative action according to the known effects on livestock, crops and work tasks 2.3 Implement actions to minimise loss and damage 2.4 Adjust and revise livestock or crop management program and work schedules according to climatic changes
3. Monitor weather and climate	3.1 Access regular updates to determine the ongoing suitability of current programs 3.2 Review the viability of livestock and crop management practices and scheduling of work tasks to ensure suitability within meteorological conditions 3.3 Undertake research on forecasting techniques to maintain currency of information 3.4 Record relevant information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK302 Monitor weather conditions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and interpret weather and climate information
- communicate warnings and concerns
- implement actions to minimise loss and damage
- relate forecasts to impact on current operations and activities
- relate weather and climate conditions and changes to decision-making and prevention of loss and damage
- monitor physical signs in the context of available information.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- weather and climate conditions and its impact upon farming and grazing activities
- effects of wind and rain on wind chill
- enterprise and industry policies for monitoring weather and climate conditions and recording and reporting weather and climate conditions
- effects of shearing and parturition and wind chill exposure if applicable
- effects of prolonged dry periods on pastures and animal production and natural resources if applicable.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWRK304 Respond to rescue incidents

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate the circumstances and logistics for the emergency
- carry out preparation and move to the rescue site
- assess the situation and establish communication with additional or specialist help
- carry out the required rescue or response to emergency
- implement post incident responses
- use industry standard terminology
- apply workplace health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- local environmental conditions
- search and rescue methods
- operation and characteristics of rescue equipment, tools and vehicles
- environmental, public health and safety issues
- types of hazards and how they should be handled
- enterprise procedures, legislative and work health and safety requirements
- first aid, life preservation.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Identify and source relevant maps 1.5 Conduct a risk assessment for possible health, safety and environmental hazards for remote location
2. Prepare for operating in remote environments	2.1 Prepare personal needs for remote situation according to plan 2.2 Prepare transportation and equipment required for prescribed work according to workplace procedures 2.3 Obtain and review relevant maps prior to departure to orient and plan route 2.4 Record planned activities and itinerary prior to departure according to workplace procedures 2.5 Identify weather conditions and assess effect on travel and operating outcomes
3. Prepare for emergency situations	3.1 Ensure that provisioning complies with expected operational and emergency requirements 3.2 Monitor available provisions and resources to ensure appropriate usage according to operating plan 3.3 Identify personal gaps in remote area survival skills and arrange training prior to departure 3.4 Ensure emergency management operational plans are applied according to workplace policies
4. Operate in remote environment	4.1 Complete activities according to instructions within time schedules according to work instructions 4.2 Use appropriate skills to modify the living environment according to prevailing conditions 4.3 Carry out activities in remote situations according to prescribed plans and procedures 4.4 Use appropriate technologies to maintain communication according to workplace procedures 4.5 Handle emergency situations according to prescribed plans and procedures 4.6 Comply with workplace reporting procedures on return to base

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Reads and interprets symbols and features on maps to determine special awareness
Oral Communication	• Uses clear language and concepts, and tone and pace appropriate for discussions with supervisor when planning and reporting
Learning	• Demonstrates awareness of learning strengths and areas of need and applies a limited range of learning strategies to developing remote area survival skills
Navigate the world of work	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters • Complies with explicit policies and procedures
Interact with others	• Selects and uses appropriate conventions and protocols when communicating with co-workers
Get the work done	• Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration, seeks assistance in setting priorities • Responds to predictable routine problems and implements standard solutions

Assessment Requirements for AHCWRK312 Operate in isolated and remote situations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have operated in an isolated and remote environment, including:

- planned and prepared for operating in remote environments in conjunction with supervisor
- conducted a risk assessment for health, safety and environmental hazards for remote location
- prepared and implemented procedures for emergency situations
- sourced and interpreted maps of the remote area
- conducted work activities safely in a remote environment
- implemented workplace communication procedures to notify location, activities and travel to appropriate personnel
- prepared and monitored provisions and resources for essential and emergency needs
- used bushcraft skills to modify the living environment and reduced risks
- maintained records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- planning and preparations required for working in isolated environments
- map reading and navigation skills, including:
  - direction finding; GPS, compass, astronavigation
  - local topography
  - habitation
  - geographic indicator
- basic survival and bushcraft skills to maintain human needs in survival situations, including:
  - making a fire

© Commonwealth of Australia, 2025 Skills Insight

  - cooking
  - distress signalling
  - basic rope skills and useful knots
- personal protective clothing requirements for adverse weather conditions
- basic first aid procedures for common injuries
- emergency vehicle and mechanical equipment repair
- communication procedures and operation and maintenance of communications equipment, including:
  - field communications by two-way radio
  - satellite telephony
  - HF radio
- work health and safety in the context of work in isolated and remote situations
- environmental impacts of work in isolated and remote situations including weather patterns and indicators.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an isolated environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - provisions and resources required for an isolated worksite
  - tools and equipment for work activities
  - personal protective equipment for use in isolated working environments
- specifications:
  - workplace documents including policies, procedures, processes, instructions and job specifications
  - manufacturers' operating instructions for specific communications and navigational equipment
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK505 Manage trial and research material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a trial and research material as part of a designated research project.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify scope and extent of work	1.1 Identify trial and research hypothesis and parameters as required by researchers 1.2 Plan the trial or research to meet research objectives 1.3 Assess the data relevant to managing trial or research materials according to research parameters

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.4 Assess data relevant to managing trial or research materials 1.5 Identify work health and safety, assess risks and develop controls and cost and document in the survey design 1.6 Identify and cost tools, equipment and machinery required for managing trial or research materials and confirm availability with suppliers, contractors and appropriate personnel 1.7 Determine research design according to the trial or research plan
2. Oversee management of trial/research materials	2.1 Prepare, maintain and monitor trial or research in line with project parameters 2.2 Conduct field work to verify and collect data as required by the trial or research design and research parameters 2.3 Monitor work activities for accuracy, validity and compliance to the parameters of the trial or research design 2.4 Undertake staged data collection as required by the trial or research design, scheduling and access requirements 2.5 Record monitoring and data
3. Prepare reports on work complete	3.1 Record collected data 3.2 Analyse data statistically to determine significance of research results 3.3 Accept or reject hypothesis based on data collected 3.4 Produce reports which conform to the structure and content required by the researcher

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK505 Manage trial and research material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define the purpose of the trial
- identify scope and extent of work
- collate data
- oversee management of trial and research materials
- comply with legislative and enterprise requirements
- draw conclusions and apply findings of trials and research
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- scheduling and programming work within timelines
- ecological principles and terminology
- data collection and reporting
- research procedures and best practice techniques
- enterprise work team management guidelines
- data analysis techniques
- research planning and design
- research methodologies.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AURTGA001 Drive and manoeuvre trailers

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to drive and manoeuvre a trailer while it is attached to a driving vehicle. It involves inspecting the trailer before use, connecting the trailer to a vehicle, driving the trailer, and disconnecting the trailer from the vehicle.

It applies to those working in the automotive service and repair industry. The trailers may have non-pivoting axles or pivoting front axles.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Mechanical Miscellaneous

Unit Sector

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Carry out trailer safety inspection	1.1 ***Pre-operational inspections and checks*** of trailer are carried out according to manufacturer specifications and workplace procedures 1.2 Trailer load is inspected and secured according to manufacturer

© Commonwealth of Australia, 2025 Skills Insight

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	specifications and workplace procedures 1.3 Safe condition of towing vehicle is determined according to manufacturer specifications and workplace procedures
2. Connect trailer to vehicle	2.1 Trailer and vehicle are aligned and trailer is coupled to vehicle according to manufacturer specifications, workplace procedures and ***safety requirements*** 2.2 Ancillary devices are connected between vehicle and trailer according to manufacturer specifications and workplace procedures 2.3 Trailer and vehicle connections are tested according to manufacturer specifications and workplace procedures 2.4 Faults are identified and action is taken to report them according to workplace procedures
3. Drive and manoeuvre trailer	3.1 Brake lock-out devices are set according to manufacturer procedures 3.2 Trailer is safely manoeuvred by vehicle in forward and reverse directions and parked according to road safety regulations, and without causing damage to trailer, towing vehicle, other vehicles or surrounding environment
4. Disconnect trailer from vehicle	4.1 Parking devices of trailer and vehicle are applied as appropriate according to manufacturer procedures 4.2 Ancillary devices are disconnected and trailer is decoupled from vehicle according to manufacturer specifications, workplace procedures and safety requirements 4.3 Trailer or vehicle is placed in appropriate parking area according to road safety regulations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	**Description**
Learning skills to:	• locate appropriate sources of information efficiently.

© Commonwealth of Australia, 2025 Skills Insight

Skills	Description
Reading skills to:	• interpret state and territory regulations for towing trailers and road signs.
Writing skills to:	• legibly and accurately fill out workplace documentation when reporting inspection findings and trailer faults.
Oral communication skills to:	• report inspection findings and trailer faults to workplace supervisor and customers.
Numeracy skills to:	• use basic mathematical processes, including addition and subtraction, to calculate trailer load and perform simple measurements of trailer dimensions • interpret numerical information on trailers, such as aggregate trailer mass and gross trailer mass.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Pre-operational inspections and checks must include:	• braking systems • suspension and axles • electrical systems • wheels and tyres.
Safety requirements must include:	• work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for manually manoeuvring trailers.

Unit Mapping Information

Assessment Requirements for AURTGA001 Drive and manoeuvre trailers

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- drive and manoeuvre two different trailers on a road with curves.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to driving and manoeuvring trailers, including procedures for manually manoeuvring trailers
- key features of relevant state and territory regulations relating to trailers, including those relating to:
  - couplings
  - safe towing weights
  - towing speeds
  - braking
- application, purpose and operation of trailers, including:
  - pivot and non-pivot trailers
  - definition of aggregate trailer mass and gross trailer mass
- trailer coupling systems, including:
  - tow ball
  - lunette ring
  - weight distributing hitch
- inspection procedures for trailers, including:
  - coupling system

© Commonwealth of Australia, 2025 Skills Insight

  - electrical system
  - braking system
  - wheel assembly and bearings
  - suspension system
- loading procedures for trailers, including:
  - centre of mass location
  - tongue weight
  - methods for determining maximum towing capacity of vehicle
  - methods for determining load capacity of towbar
- driving and manoeuvring techniques, including:
  - effects of trailer on overall turning circle
  - effects of trailer on acceleration, steering and braking
  - methods of avoiding and controlling vehicle and trailer sway
  - methods of reversing a trailer.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the trailers that they have driven and manoeuvred, e.g. trailer log book.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- road with curves suitable for trailer forward and reverse driving, manoeuvring and parking
- trailer specifications and relevant state and territory regulations for towing trailers
- two different trailers and towing vehicles with suitable trailer couplings.

BSBADM311 Maintain business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine, administer and maintain resources and equipment to complete a variety of tasks.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of business resources and their basic maintenance to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Advise on resource requirements	1.1 Calculate estimates of future and present business resource needs in accordance with organisational requirements 1.2 Ensure advice is clear, concise and relevant to achieve organisational requirements 1.3 Provide information on the most economical and effective choice of equipment, materials and suppliers

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify resource shortages and possible impact on operations
2 Monitor resource usage and maintenance	2.1 Ensure resource handling is in accordance with established organisational requirements including occupational health and safety requirements 2.2 Use business technology to monitor and identify the effective use of resources 2.3 Use consultation with individuals and teams to facilitate effective decision-making on the appropriate allocation of resources 2.4 Identify and adhere to relevant policies regarding resource use in the performance of operational tasks 2.5 Routinely monitor and compare resource usage with estimated requirements in budget plans
3 Acquire resources	3.1 Ensure acquisition and storage of resources is in accordance with organisational requirements, is cost effective, and consistent with organisational timelines 3.2 Acquire resources within available timelines to meet identified requirements 3.3 Review resource acquisition processes to identify improvements in future resource acquisitions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.4, 2.5, 3.3	• Identifies and interprets information from a range of sources, including organisational policies and procedures
Writing	1.1, 1.3, 2.2, 2.5, 3.3	• Uses clear and succinct language and appropriate layout to provide information, advice and support materials
Oral Communication	1.2, 1.3, 2.3	• Presents information or advice choosing language appropriate to the context and needs of the audience • Uses active listening and questioning to confirm

© Commonwealth of Australia, 2025 Skills Insight

		understanding
Numeracy	1.1, 1.3, 1.4, 2.2, 2.4, 2.5, 3.1-3.3	• Selects and uses appropriate tools to aid with estimation and other resource assessment requirements • Uses a combination of mainly informal and some formal written mathematical equations to represent the outcomes of the resource allocation process
Navigate the world of work	1.1, 1.2, 2.1, 2.4, 3.1, 3.2	• Takes some personal responsibility for adherence to organisational procedures and protocols
Interact with others	2.3	• Uses collaborative techniques to engage personnel in consultations and negotiations
Get the work done	1.1, 1.3, 1.4, 2.2, 2.5, 3.3	• Plans a range of routine tasks and required resources, accepting goals and aiming to achieve them within allocated timeframes • Recognises and takes responsibility for addressing predictable problems in familiar work contexts • Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role • Understands the purpose and some specific functions of some common digital tools used in work contexts • Evaluates effectiveness of decisions in terms of how well they met stated goals

Assessment Requirements for BSBADM311 Maintain business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- collect and record data on resource use
- observe resource use over defined and operational timeframes
- perform routine resource maintenance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list the key provisions of relevant legislation
- identify the organisational resource acquisition policies, plans and procedures
- identify the organisational procedures for record keeping/filing systems, security and safe recording practices.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to initiate and organise a quality audit with an auditee. It covers assessing the scope and objectives of a quality audit; communicating with the auditee regarding the proposed quality audit; identifying resources required to conduct the audit; and developing and submitting a quality audit plan. The types of audits may include external or internal systems audits or process or product/service audits.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised, quality auditing and managerial techniques to plan, carry out and evaluate a quality audit. Individuals also supervise and monitor the processes and outcomes of others working in a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assess quality audit scope and objectives	1.1 Determine and discuss audit objectives with the auditee, client and all other relevant parties 1.2 Determine and discuss scope of the quality audit with the auditee, client and all other relevant parties

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify relevant standards that impact the environment in which the audit operates 1.4 Determine scope commensurate with identified risks
2 Communicate with auditee regarding proposed quality audit	2.1 Determine audit history, organisational structure and culture through consultation with the auditee 2.2 Negotiate and ensure agreement with auditee, the proposed audit methods and techniques to be applied 2.3 Outline audit processes to establish sequence of audit activities, and the roles of the auditors and auditees in the process
3 Identify resources required to conduct quality audit	3.1 Identify resources required to perform the quality audit efficiently and effectively 3.2 Select audit team members on the basis of relevant expertise 3.3 Confirm availability of resources required to conduct the audit with auditee 3.4 Assign roles and responsibilities to audit team members
4 Develop and submit quality audit plan	4.1 Develop quality audit plan according to established scope and objectives 4.2 Assign timing, schedules and responsibilities for implementation of the audit plan 4.3 Develop audit priorities and ensure agreement with auditees and audit team members 4.4 Document and submit audit plan to auditee
5 Prepare audit team	5.1 Inform audit team members of their responsibilities, audit objectives and scope 5.2 Communicate audit plan and schedules to all audit team members 5.3 Discuss and clarify audit methods and techniques with audit team members
6 Review auditee documentation	6.1 Review auditee’s previous audits to establish possible impact on the conduct of the current audit 6.2 Review and check relevant organisational documents for accuracy 6.3 Resolve arising problems with auditee and relevant parties
7 Identify and prepare checklists and audit	7.1 Develop checklists to reflect audit scope and objectives

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
related documentation	7.2 Develop or obtain documentation required for the audit 7.3 Prepare agenda for entry meeting 7.4 Include value-adding activities in audit related documentation where required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 6.1, 6.2, 7.1	• Interprets and analyses information from organisational documentation
Writing	4.1-4.4, 6.2, 7.1-7.4	• Develops a range of documents using structure, tone and vocabulary appropriate to audience, context and purpose • Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.1, 1.2, 2.1-2.3, 4.3, 5.1-5.3, 6.3	• Participates in spoken exchanges using structure and language to suit the audience • Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	• Uses mathematical calculations for project scheduling
Navigate the world of work	1.3	• Monitors adherence to organisational policies and relevant standards and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 2.1, 2.2, 3.4, 4.4, 5.1, 5.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Recognises the importance of building rapport and building effective working relationships • Collaborates with others to negotiate acceptable outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.1, 3.2, 4.1,	• Organises, plans and sequences own workload and schedules work activities of others • Uses analytical processes to decide on a course of

© Commonwealth of Australia, 2025 Skills Insight

	4.2, 4.3, 6.1, 6.3	action, establishing criteria for deciding between options and seeking advice from others before taking action when necessary • Addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the expertise of others

Assessment Requirements for BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documented audit plans for auditees across a variety of contexts including:
  - the scope and objectives of the audit
  - proposed audit methods and techniques to be used
  - required resources and schedules
  - allocation of individual audit team member responsibilities for conducting the proposed audit.
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the relevant auditing codes of practice or ethics
- describe auditing methods and techniques
- outline the requirements of auditing regulations and standards
- identify current audit practices
- outline quality auditing principles, techniques and systems
- describe the requirements of house or other style manual protocols for written communications
- identify software applications relevant to quality auditing activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

© Commonwealth of Australia, 2025 Skills Insight

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare a presentation	1.1 Plan and document presentation approach and intended outcomes 1.2 Choose presentation strategies, format and delivery methods that match the characteristics of the target audience, location, resources and personnel needed 1.3 Select presentation aids, materials and techniques that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Brief others involved in the presentation on their roles/responsibilities within the presentation 1.5 Select techniques to evaluate presentation effectiveness
2 Deliver a presentation	2.1 Explain and discuss desired outcomes of the presentation with the target audience 2.2 Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas 2.3 Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes 2.4 Use persuasive communication techniques to secure audience interest 2.5 Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences 2.6 Summarise key concepts and ideas at strategic points to facilitate participant understanding
3 Review the presentation	3.1 Implement techniques to review the effectiveness of the presentation 3.2 Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation 3.3 Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2	• Reviews and analyses documents to identify information relevant to a specific presentation
Writing	1.1, 3.3	• Develops material to convey ideas and information to target audience in an engaging way
Oral	1.4, 2.1, 2.2, 2.3,	• Presents information using words and non-verbal features appropriate to the audience and context

© Commonwealth of Australia, 2025 Skills Insight

Communication	2.4, 2.5, 2.6, 3.2	• Uses listening and questioning techniques to gather information required to develop or modify presentations • Interprets audience reactions and changes words or non-verbal features accordingly
Interact with others	1.4, 2.1, 2.2, 2.4, 2.5, 2.6, 3.2	• Selects and uses appropriate conventions and protocols to encourage interaction or to present information • Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals • Recognises the need to alter personal communication style in response to the needs or expectations of others
Get the work done	1.1-1.5, 2.2, 2.5, 3.1-3.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes • Uses feedback from others, analytical and lateral thinking to review current practices and develop new ideas • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and deliver presentations related to occupation or area of interest which demonstrate the use of:
  - effective presentation strategies and communication principles
  - aids and materials to support the presentation
- select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information collection methods that will support review and feedback of presentations
- identify regulatory and organisational obligations and requirements relevant to presentations
- describe the principles of effective communication
- describe the range of presentation aids and materials available to support presentations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- equipment, materials and business software packages for making a presentation
- business technology
- interaction with others.

BSBCMM402 Implement effective communication strategies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select and use communication strategies required to respond to an enquiry.

It applies to individuals who analyse information and then either respond personally or refer the enquiry to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – interpersonal communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Receive enquiry	1.1 Establish nature of enquiry 1.2 Ensure interactions with person making enquiry are in accordance with organisation's standards and procedures and meet the person’s needs and expectations 1.3 Clearly outline legal and other limits of own responsibility to person making the enquiry 1.4 Record person's details and issues
2 Identify and apply	2.1 Use communication strategies that reflect organisational

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
appropriate communication techniques	standards and procedures 2.2 Use effective communication techniques during the enquiry 2.3 Ensure confidentiality of the enquiry is respected
3 Determine action to be taken	3.1 Identify personal limitations in taking action and seek appropriate assistance from designated individuals 3.2 Respond in an appropriate manner 3.3 Involve other parties in action if appropriate 3.4 Manage expectations of person making enquiry
4 Review outcomes of communication	4.1 Follow up with person making enquiry to ensure action was effected 4.2 Seek feedback about the communication strategies 4.3 Undertake appropriate record keeping and reporting

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1	• Interprets textual information from a range of sources to determine organisational standards and procedures
Writing	1.4, 2.1, 3.1, 3.2, 4.1, 4.3	• Accurately records information and completes documentation using required format, terminology and conventions • Prepares reports according to organisational requirements
Oral Communication	1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3, 4.1, 4.2	• Uses listening and questioning techniques to gather information required to respond to queries • Presents information using words and non-verbal features appropriate to the audience and context
Navigate the world of work	1.2, 1.3, 2.1, 3.1	• Recognises and applies organisational policies and procedures and meets expectations associated with own work

© Commonwealth of Australia, 2025 Skills Insight

Interact with others	1.2, 2.1, 2.2, 3.1, 3.2, 3.3	• Uses appropriate communication practices showing awareness of the need to adjust personal communication style when handling enquiries of a sensitive nature
Get the work done	1.1, 1.4, 3.1, 3.3, 3.4, 4.1-4.3	• Plans a range of routine and non-routine tasks and implements actions in accordance with plan to meet desired outcomes • Uses problem solving skills to analyse enquiries and propose possible solutions, seeking input from others as required • Evaluates outcomes of decisions to identify opportunities for improvement

BSBCRT402 Collaborate in a creative process

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to collaborate in a creative process that is underpinned by a commitment to trust and ethics.

It applies to individuals who are involved in what is traditionally considered a creative endeavour but is also very important in broader business and community activities where creative team effort is highly valued.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Creative Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Enter into a collaborative creative process	1.1 Adopt a personal philosophy of trustworthy and ethical behaviour 1.2 Maximise the possibilities of sustaining creative partnerships through trustworthy and ethical behaviour 1.3 Use professional discretion and judgement in dealing with others 1.4 Acknowledge and respect the different ways that different

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	people may contribute to the creative process 1.5 Acknowledge and work within the legal framework that applies to creative content as part of individual commitment to an ethical approach 1.6 Respect collaborative efforts by relinquishing individual ownership of ideas
2 Engage in a collaborative creative process	2.1 Maintain a belief in personal ideas, combined with a willingness to move on as ideas are discarded and others evolve 2.2 Be prepared to let go of own vanity and ego to allow new ideas to emerge 2.3 Use language and adopt a demeanour that demonstrates respect and trust for others 2.4 Listen to, value, respect and trust the contributions of others as material to work with rather than positions to argue against 2.5 Challenge, test and share ideas in a supportive way as part of the creative process 2.6 Move on from initial positions and preconceptions to accept and embrace new and unpredictable ideas as they emerge during the creative process 2.7 Play a role that encourages the movement and shift of ideas within the group towards a well-conceived solution
3 Reflect on own role in the collaborative creative process	3.1 Reflect on own level of participation, relationships with others and personal behaviour in the collaborative process 3.2 Identify ways to do better next time and follow up on any issues that need to be resolved 3.3 Identify and seek opportunities to refine and expand own skills and knowledge, including learning from failing

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.2, 3.3	• Reflects on own performance and seeks opportunities

Assessment Requirements for BSBCRT402 Collaborate in a creative process

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- make a positive contribution to a collaborative creative process that generates, expands and develops ideas into a well-conceived solution
- reflect on and evaluate own role in the collaborative process
- identify and act on ways to enhance own ability to contribute effectively to a collaborative creative process.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal framework that applies to the creative process
- describe the concepts of trust and ethical behaviour in the context of creative endeavour
- identify different roles people may play in a collaborative creative process and how these roles contribute to the overall effort
- describe how the potential for creativity can be maximised within a team
- explain barriers to creativity in a group environment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation – critical thinking field of work and include access to a team of people in a collaborative creative process.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCUE305 Process credit applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply organisational credit procedures to determine customer capacity to pay
- discuss and explain non-approval to customers
- negotiate credit terms and payment arrangements with customers.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline credit and debt-recovery principles and techniques
- identify financial delegations and limits applied, within organisation and specific to role
- identify legislative, regulatory and industry code requirements for credit approval processes
- identify organisational credit management policies and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- organisational credit management policies and standard operating procedures
- relevant information on legislation, regulations, standards codes of practice
- workplace information and data.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUE306 Process complex accounts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to handle difficult engagements relating to customer billing and customer accounting, primarily where the customer is defaulting.

It applies to individuals who apply a broad range of competencies in a varied work context, using some discretion and judgment and relevant theoretical knowledge, and who may provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Engagement

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Receive and review a customer default enquiry or case	1.1 Receive and review customer enquiry to identify details of case 1.2 Obtain additional information to assist in resolving case 1.3 Review options to resolve case with other staff members, where appropriate 1.4 Obtain specialist and team member advice, and escalate where necessary 1.5 Consider eligibility for hardship program

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.6 Observe relevant legislation, codes, regulations and standards 1.7 Develop initial advice to be given to customer
2 Negotiate payment with defaulting customers	2.1 Consult with customer on suggested course of action and options 2.2 Assess customer response to consultation 2.3 Develop realistic settlement options giving consideration to policy, customer response and payment history 2.4 Offer and agree on a payment option with customer according to organisational policy 2.5 Record revised payment options as agreed with customer and according to organisational procedures
3 Advise defaulting customers of cancellation	3.1 Advise defaulting customers of service or product cancellation 3.2 Negotiate successful product return with customer where appropriate 3.3 Explain debt-recovery process to customer 3.4 Initiate debt-recovery process
4 Manage default actions	4.1 Follow up payment, debt recovery or product return to ensure completion of case 4.2 Amend customer records according to organisational procedures 4.3 Follow organisational default and credit-management procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Recognises and interprets textual information from relevant sources to determine customer requirements and position
Writing	1.7, 2.5, 4.2	• Prepares specific information which conveys an understanding of alternatives and outcomes

© Commonwealth of Australia, 2025 Skills Insight

		• Records details and amends workplace documentation
Oral Communication	1.2-1.4, 2.1, 2.4, 3.1-3.3	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and uses listening and questioning to confirm understanding
Numeracy	1.1, 1.5, 2.4	• Interprets numerical information to determine financial position of customer • Uses basic calculation methods to determine payment amount and frequency
Navigate the world of work	1.6, 2.4, 2.5, 4.2, 4.3	• Takes personal responsibility for adherence to legislative and organisational requirements relevant to processing default accounts
Interact with others	1.3, 1.4, 2.1-2.4, 3.1-3.4	• Selects and uses appropriate conventions and protocols when discussing debt recovery and default matters with colleagues and customers • Assesses customer response to options and outcomes to avoid misunderstanding and negotiates mutual agreement
Get the work done	1.5, 1.7, 2.2, 2.3, 2.5, 3.4, 4.1, 4.3	• Organises workload logically and systematically to undertake clearly defined tasks of varying complexity in cooperation with colleagues and customers • Uses systematic, analytical processes to make decisions about customer default positions; setting goals, gathering relevant information, and identifying and evaluating options against criteria • Uses familiar digital systems and tools to access, organise, analyse and display information relevant to payment options and customer records

BSBCUS301 Deliver and monitor a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

It applies to individuals who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over short or long term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify customer needs	1.1 Use appropriate interpersonal skills to accurately identify and clarify customer needs and expectations 1.2 Assess customer needs for urgency to determine priorities for service delivery according to organisational and legislative requirements 1.3 Use effective communication to inform customers about available choices for meeting their needs and assist in the selection

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	of preferred options 1.4 Identify limitations in addressing customer needs and seek appropriate assistance from designated individuals
2 Deliver a service to customers	2.1 Provide prompt service to customers to meet identified needs in accordance with organisational and legislative requirements 2.2 Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery 2.3 Sensitively and courteously handle customer complaints in accordance with organisational and legislative requirements 2.4 Provide assistance or respond to customers with specific needs according to organisational and legislative requirements 2.5 Identify and use available opportunities to promote and enhance services and products to customers
3 Monitor and report on service delivery	3.1 Regularly review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements 3.2 Identify opportunities to enhance the quality of service and products, and pursue within organisational and legislative requirements 3.3 Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements 3.4 Regularly seek customer feedback and use to improve the provision of products and services 3.5 Ensure reports are clear, detailed and contain recommendations focused on critical aspects of service delivery

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2 2.1, 2.3, 2.4, 3.1, 3.5	• Comprehends textual information to determine customer service requirements • Proofreads texts for clarity of meaning and accuracy of grammar and punctuation

© Commonwealth of Australia, 2025 Skills Insight

Writing	2.3, 3.5	• Completes responses to customer complaints in required format • Prepares reports using sequencing, format and words to communicate recommendations clearly and effectively
Oral Communication	1.1, 1.3, 1.4, 2.2, 2.3, 2.4	• Provides information or advice using structure and language to suit the audience • Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.2, 2.1-2.4, 3.1, 3.2	• Recognises, understands and applies organisational policies and procedures relevant to role
Interact with others	1.1, 1.3, 1.4, 2.2, 2.3, 2.4, 3.4	• Selects and uses appropriate communication conventions to establish connections, build rapport, seek information and develop professional working relationships • Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	1.2, 2.3, 2.5, 3.1-3.5	• Plans and implements systems to gather and organise information • Monitor actions and progress against goals and implements adjustments as appropriate • Uses problem-solving skills to analyse and respond to customer complaints or enquiries • Identifies and follows up on opportunities to improve work practices and outcomes

BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2 Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3 Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with organisational procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.3, 2.4, 3.2, 3.3, 3.4, 3.5	• Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements
Writing	1.1, 3.1, 3.2, 3.3, 3.4, 3.5	• Prepares written reports, up-to-date procedures and other workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 1.2, 1.3, 2.1,	• Clearly articulates customer's needs using language suitable to diverse audiences and employs listening

© Commonwealth of Australia, 2025 Skills Insight

Communication	2.2, 3.1, 3.2	and questioning techniques to confirm understanding
Navigate the world of work	3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1-1.3, 2.1, 2.2, 3.1, 3.2	• Selects and uses appropriate communication techniques to establish and maintain positive working relationships • Establishes connections and shares information with others who can contribute to effective work outcomes
Get the work done	2.3, 2.4, 3.3-3.5	• Develops and implements plans for routine and non-routine tasks recognising the importance of aligning goals and expectations to achieve outcomes • Recognises and takes responsibility for addressing predictable and non-predictable problems in own work context • Uses digital systems to organise and store information relevant to own work

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

© Commonwealth of Australia, 2025 Skills Insight

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality
  - problem identification and resolution
  - quality customer service delivery
  - record keeping and management methods
  - strategies for monitoring, managing and introducing ways to improve customer service relationships
  - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBFIA301 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling debtors' and creditors' systems, preparing and maintaining a general ledger and trial balance and includes activities associated with monitoring cash control for accounting purposes.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts and may exercise discretion and judgement using appropriate theoretical knowledge of financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Maintain daily financial records	1.1 Correctly maintain daily financial records in accordance with organisational and legislative requirements for accounting purposes 1.2 Identify and rectify or refer discrepancies or errors in documentation or transactions to designated persons in accordance with organisational and legislative requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Accurately credit and debit transactions and promptly enter into journals in accordance with organisational and legislative requirements
2 Maintain general ledger	2.1 Maintain general ledger in accordance with organisational and legislative requirements 2.2 Post transactions into general ledger in accordance with organisational and legislative reporting requirements 2.3 Reconcile systems for accounts payable and receivable with general ledger 2.4 Accurately prepare trial balance from general ledger in accordance with organisational and legislative requirements
3 Monitor cash control	3.1 Ensure cash flow is accurately accounted for in accordance with organisational and legislative requirements 3.2 Make and receive payments in accordance with organisational and legislative requirements 3.3 Collect or follow up outstanding accounts within designated timelines 3.4 Check payment documentation for accuracy of information and despatch to creditors within designated timeline

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.4	• Recognises and interprets numerical and textual information to determine and complete required activities
Writing	1.3, 2.1-2.4, 3.1-3.4	• Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material • Prepares clear and detailed information and instructions using format, structure and tone suitable to audience
Oral	1.2, 3.2, 3.3	• Explains financial issues and requirements clearly, using facts and examples, and uses listening and

© Commonwealth of Australia, 2025 Skills Insight

Communication		questioning techniques to obtain sequenced instructions
Numeracy	1.1-1.3, 2.1-2.4, 3.1-3.4	• Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals and arrange/compare numerical information
Navigate the world of work	1.1-1.3, 2.1-2.4, 3.1-3.3	• Recognises, understands and monitors adherence to legislative and organisational requirements in undertaking own work
Interact with others	3.3, 3.4	• Understands the importance of using appropriate practices and protocols when handling confidential information
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4	• Takes responsibility for own workload and monitors adherence to specified goals and timelines • Uses digital technologies to access, record, store, organise and compile data as required

BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan financial management approaches	1.1 Access budget/financial plans for the work team 1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3 Negotiate any changes required to be made to budget/financial

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	plans with relevant personnel within the organisation 1.4 Prepare contingency plans in the event that initial plans need to be varied
2 Implement financial management approaches	2.1 Disseminate relevant details of the agreed budget/financial plans to team members 2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances 2.3 Determine and access resources and systems to manage financial management processes within the work team
3 Monitor and control finances	3.1 Implement processes to monitor actual expenditure and to control costs across the work team 3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4 Report on budget and expenditure in accordance with organisational protocols
4 Review and evaluate financial management processes	4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team 4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3	• Interprets and analyses information to determine activities required

© Commonwealth of Australia, 2025 Skills Insight

Writing	1.1, 1.4, 4.1-4.3	• Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures
Oral Communication	1.2, 1.3, 2.1-2.3	• Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to clarify information and to confirm understanding
Numeracy	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Navigate the world of work	2.2, 3.3, 3.4, 4.3	• Recognises, understands and adheres to organisational requirements in undertaking own work
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3	• Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Get the work done	1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3	• Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines • Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Skills Insight

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM801 Manage financial resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage financial resources in a complex environment for a substantial business unit or organisation.

Leaders are typically required to forecast future financial resource needs, analyse current asset performance and capacity to a standard expected in a commercial environment, and to set business targets. There is a requirement to manage compliance mechanisms, to manage financial risk within agreed plans and mechanisms, and to monitor compliance with financial projections.

It applies to the management of financial resources relating to complex and diverse operations or projects and is an important aspect of work for managers or leaders.

It may relate equally to small-scale activities within a small to medium-sized organisation or a significant activity in a large organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
1 Forecast future financial resource needs	1.1 Establish and report on the capacity of existing financial systems 1.2 Forecast financial data and business system requirements 1.3 Analyse forecasted requirements 1.4 Prepare and plan budget forecasts according to organisational and statutory requirements 1.5 Prepare and present recommendations for budget expenditure or for modification of existing projections
2 Analyse current asset performance and capacity	2.1 Analyse the costs of, and returns from, assets and liabilities using standard accounting techniques to identify extent of debt and equity financing 2.2 Establish management responsibilities and legal requirements for reporting, in consultation with relevant organisational staff 2.3 Analyse and interpret financial reports and key information 2.4 Analyse and evaluate the effects of financial decisions on the ability of the organisation to meet planned outcomes
3 Set business targets and compliance mechanisms	3.1 Collect comparative and trend information and confirm needs for future budget and associated resources 3.2 Complete negotiations to secure resources in accordance with relevant short-term and long-term needs 3.3 Allocate resources against the budget to maximise organisation’s performance 3.4 Maintain accurate and up-to-date records of resource allocation and usage according to organisational and legislative requirements 3.5 Develop and review management systems which enable timely collection, management and processing of information 3.6 Complete and accurately report records of budget performance and expenditure according to organisational procedures and statutory requirements 3.7 Evaluate and improve budget audit mechanisms and compliance requirements as required
4 Manage financial risk	4.1 Identify and analyse financial risk factors 4.2 Document and manage financial risks according to organisational policies and procedures 4.3 Implement procedures to regularly review financial risk management activities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
5 Monitor compliance with financial projections	5.1 Identify deviations from budgets that generate an adverse effect on budget objectives 5.2 Promptly develop action plans to remedy significant deviations from budget objectives and projections 5.3 Monitor and review financial documentation against organisational objectives 5.4 Revise and renew budget priorities to meet operational contingencies and risk management 5.5 Manage costs to targets set in the budget

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 3.1, 3.4-3.7, 4.1-4.3, 5.1-5.3	• Identifies, analyses and evaluates complex text from a variety of sources to determine business requirements
Writing	1.1, 1.2, 1.4, 1.5, 2.2, 3.1, 3.4-3.6, 4.2, 5.2-5.4	• Records data accurately using relevant format, style and language suited to context and audience • Prepares specific information which clearly conveys an understanding of outcomes and uses terminology appropriate to present to relevant personnel
Oral Communication	1.5, 2.2, 3.2	• Articulates information concisely using appropriate terminology, tone and style • Uses questioning and listening techniques to exchange and clarify information
Numeracy	1.1-1.5, 2.1, 2.3, 2.4, 3.1, 3.3, 3.4, 3.6, 3.7, 4.1, 5.1, 5.3, 5.5	• Collects, records, analyses and adjusts numerical data using appropriate methods
Navigate the world of work	1.4, 2.2, 3.4, 3.6, 5.3, 5.4	• Recognises, understands and applies applicable legislation, industry standards and organisational policies and procedures in the conduct of own work
Interact with others	1.5, 2.2, 3.2, 3.6	• Tailors communication to achieve its purpose, demonstrating an understanding of the needs, interests,

© Commonwealth of Australia, 2025 Skills Insight

		issues and priorities of each audience • Collaborates and negotiates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1-1.4, 2.1, 2.4, 3.1, 3.3, 3.5, 3.7, 4.1, 4.3, 5.1, 5.3, 5.4	• Uses logical processes in planning, implementing and evaluating complex tasks to achieve stated goals • Identifies problems, establishes the causes and applies analytical processes to formulate a course of action and criteria in addressing issues • Takes responsibility for high impact decisions in complex situations involving many variables and constraints • Defines benefits, costs, risks and feasibility from a broad range of perspectives and may think laterally to redesign aspects to address potential issues

Assessment Requirements for BSBFLM303 Contribute to effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.
- communicate ideas and information to diverse audiences
- develop networks and build team relationships.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships and the cultural and social environment can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team
- identify relevant legislation from all levels of government that affects business operation

© Commonwealth of Australia, 2025 Skills Insight

- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods
- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant legislation and regulations
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM305 Support operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide support for operational practices and procedures within the organisation's productivity and profitability plans. This includes contributing to the operational plan, assisting in recruiting employees and acquiring resources, and monitoring and adjusting operational performance.

It applies to individuals who use planning and analytical skills to achieve the measurable, stated objectives of the team and the organisation. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non-routine activities that require some discretion and judgement.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Contribute to implementation of operational plan	1.1 Collect and record details of resource requirements and report to relevant personnel 1.2 Ensure the operational plan contributes to the achievement of the organisation's performance and business plan 1.3 Identify key performance indicators to measure own and work

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	team's performance 1.4 Undertake contingency planning as required 1.5 Support the development and presentation of proposals for resource requirements as necessary
2 Assist in recruiting employees and acquiring resources	2.1 Assist with employee recruitment and/or induction as required, within the organisation's policies, practices and procedures 2.2 Acquire physical resources and services according to the organisation's policies, practices and procedures, and in consultation with relevant personnel
3 Support operations	3.1 Identify and utilise performance systems and processes to assess team progress in achieving plans and targets 3.2 Compare actual productivity and performance with identified short-term budgets, targets and performance results 3.3 Identify and report unsatisfactory performance to relevant personnel, to enable action to be taken to rectify situation 3.4 Provide coaching to support individuals and teams to use resources effectively, economically and safely 3.5 Support consultation processes for development and/or variation of the operational plan as required 3.6 Present recommendations for variation to operational plans to relevant personnel 3.7 Follow performance systems, procedures and recording processes in accordance with organisation requirements

Assessment Requirements for BSBFLM305 Support operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assist in planning resource acquisition and usage including human resources, risk management and contingency planning
- share information and support members of the work team to achieve plans and targets
- monitor, analyse and report individual and team performance against identified targets.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the processes used to plan and acquire resources
- summarise organisational recruitment and induction processes
- explain the relationship between key performance indicators and achievement of the operational plan
- explain the role of contingency planning in supporting the operational plan
- identify systems and processes for monitoring and reporting performance
- identify alternative approaches to improving resource usage and eliminating resource inefficiencies and waste
- identify relevant legislation, regulations, standards or codes of practice that may affect the operational plan
- identify the organisational policies, practices and procedures relevant to implementation of the operational plan.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant legislation and regulations
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Contribute to team outcomes	1.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2 Support team members to meet expected outcomes

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Support team cohesion	2.1 Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility 2.2 Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward team members' efforts and contributions 2.4 Identify and address issues, concerns and problems identified by team members, or refer to relevant persons as required
3 Participate in work team	3.1 Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions 3.2 Support the team to identify and resolve problems which impede its performance 3.3 Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers
4 Communicate with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues to line manager/management and follow up to ensure action is taken in response to these matters

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.3, 2.4, 4.2, 4.3	• Uses appropriate vocabulary, grammatical structures and conventions to communicate information, matching style to purpose and audience
Oral	1.1, 1.2, 2.1-2.4, 3.1,	• Presents ideas and seeks feedback from others using vocabulary and non-verbal features appropriate to the

Assessment Requirements for BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
  - provides direction and leadership
  - assists individuals to achieve goals
  - motivates and builds team cohesion
  - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
  - group dynamics and processes
  - motivation

© Commonwealth of Australia, 2025 Skills Insight

  - negotiation
- explain why considering individual behaviour and differences is important to a manager.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to collect, process and store, and maintain workplace information and systems. It also includes the maintenance of filing and records systems.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Collect information	1.1 Collect information in a timely manner and ensure it is relevant to organisational needs 1.2 Use business equipment/technology available in the work area to effectively obtain information 1.3 Apply organisational requirements relating to security and confidentiality in handling information

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Process workplace information	2.1 Use business equipment/technology to process information in accordance with organisational requirements 2.2 Process information in accordance with defined timeframes, guidelines and procedures 2.3 Update, modify and file information in accordance with organisational requirements 2.4 Collate and despatch information in accordance with specified timeframes and organisational requirements
3 Maintain information systems	3.1 Maintain information and filing systems in accordance with organisational requirements 3.2 Identify, remove and/or relocate inactive or dead files in accordance with organisational requirements 3.3 Establish and assemble new files in accordance with organisational requirements 3.4 Update reference and index systems in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.4	• Recognises and interprets textual information to complete tasks according to organisational requirements
Writing	1.3, 2.1-2.4, 3.4	• Records simple and routine content using an established format to organise information
Oral Communication	1.1, 1.2	• Uses listening and questioning skills to clarify and adhere to requirements
Numeracy	2.2, 2.4, 3.4	• Comprehends basic mathematical measurements relating to times and number sequences
Navigate the world of work	1.3, 2.1, 2.3, 2.4, 3.1-3.4	• Recognises organisational procedures and understands relevance of legislative requirements
Get the work	1.1-1.3, 2.1, 2.2, 2.4,	• Follows clearly defined instructions and monitors own

BSBINM401 Implement workplace information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and review the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information which plays a significant part in the organisation's effectiveness.

It applies to individuals whose work will normally be carried out within routine and non-routine methods and procedures which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify and source information needs	1.1 Determine and locate information required by teams 1.2 Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to organisational policies
2 Collect, analyse and report information	2.1 Collect information, which is adequate and relevant to the needs of teams, in a timely manner

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.2 Ensure information is in a format suitable for analysis, interpretation and dissemination 2.3 Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired
3 Implement information systems	3.1 Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes 3.2 Use technology available in the work area to manage information effectively 3.3 Submit recommendations for improving the information system to designated persons and/or groups
4 Prepare for information system changes	4.1 Collect information about information system future needs in consultation with colleagues, including those who have a specialist role in resource management 4.2 Ensure estimates of information system future needs reflect the organisation's business plans, and customer and supplier requirements 4.3 Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes 4.4 Prepare team members to work with new technology and information system changes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3, 4.4	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.2, 2.1, 2.3, 3.1, 3.3, 4.1, 4.2, 4.3, 4.4	• Develops material for a specific audience using clear and detailed language in order to convey explicit information, requirements and recommendations
Oral	1.1, 3.3, 4.1, 4.3, 4.4	• Uses active listening and questioning and reading of verbal and non-verbal signals to convey and clarify

© Commonwealth of Australia, 2025 Skills Insight

Communication		information and to confirm understanding
Numeracy	4.1-4.3	• Selects from and uses a variety of developing mathematical and problem solving strategies to ensure estimates of information reflect the business plan and staff requirements
Navigate the world of work	1.2	• Takes responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation
Interact with others	1.1, 3.3, 4.1, 4.3, 4.4	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Get the work done	1.1, 1.2, 2.1, 2.3, 3.1, 3.2, 4.1, 4.2	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Contributes to continuous improvement of current work practices by applying basic principles of analytical thinking • Uses familiar digital technologies and systems to access, enter, present and communicate data and information

Assessment Requirements for BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify learning needs and plan and implement learning activities to enable personnel to use information or knowledge management system including
  - providing human, financial and physical resources as required
  - use of coaching, mentoring, information sessions, workshops, training programs and e-learning as appropriate
- monitor performance and address issues and contingencies as they arise including
  - accessing technical specialists as required
  - correct application of policies and procedures for the information or knowledge management system
  - alignment and effectiveness of the policies and procedures
  - effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, codes of practice and national standards relevant to privacy, freedom of information and knowledge management
- explain organisational policies and procedures including:
  - records management
  - information management
  - customer service
  - commercial confidentiality

© Commonwealth of Australia, 2025 Skills Insight

- describe the organisational operations and existing data and information systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace systems, documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN201 Contribute to workplace innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to make a pro-active and positive contribution to workplace innovation.

It applies to individuals working in any industry or community context, in both small and large organisations who take a pro-active approach to identifying, suggesting and developing ideas about better ways of doing things at a practical operational level in a specific area of activity. While the individual's overall work is undertaken with some supervision and guidance, they apply discretion, judgement and effective interpersonal skills in order to contribute to workplace innovation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify opportunities to do things better	1.1 Be aware of own role in workplace innovation 1.2 Proactively identify opportunities for improvement in own area of work 1.3 Gather and review information which may be relevant to ideas and which might assist in gaining support for ideas

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Discuss and develop ideas with others	2.1 Identify people who could provide input into ideas for improvements 2.2 Select the best way of approaching people to begin sharing ideas 2.3 Seek feedback on improvement of ideas, and discuss and develop options and possible variations 2.4 Review and select ideas for follow up based on feedback and further review
3 Address the practicalities of change	3.1 Take action to implement routine changes in consultation with others and within scope of own responsibility 3.2 Identify and articulate issues and practical processes for implementing proposed ideas 3.3 Present ideas and practical suggestions to the appropriate people about how improvements could be made

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.4, 3.2	• Categorises, interprets and reviews information from a range of sources to generate ideas relevant to the workplace
Writing	3.2, 3.3	• Communicates information using clear language and formats appropriate for the audience
Oral Communication	2.3, 3.1, 3.2, 3.3	• Actively participates in verbal exchanges of ideas and elicits the view and opinions of others by listening and questioning • Uses clear and relevant language to clarify workplace issues and promote ideas
Numeracy	1.3, 3.2	• Performs basic mathematical calculations to estimate time and cost in relation to implementation of ideas
Navigate the world of work	1.1, 1.2, 3.1	• Understands responsibilities of own role
Interact with	2.3, 3.1-3.3	• Follows accepted communication practices and protocols when discussing or presenting ideas to others

© Commonwealth of Australia, 2025 Skills Insight

others		• Seeks and takes into account perspectives and opinions of others
Get the work done	1.2, 1.3, 2.1, 2.2, 2.4, 3.1-3.3	• Plans and implements routine tasks making limited decisions and seeking assistance, when necessary • Uses analytical or lateral thinking processes to identify improvements or new ways of approaching tasks • Identifies and anticipates operational problems and develops possible solutions

Assessment Requirements for BSBINN201 Contribute to workplace innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify ideas for improvements and use information from a range of sources including other people to review and select ideas to put forward for implementation
- communicate the ideas and seek input from others in order to identify how the ideas could be implemented
- implement routine changes within scope of responsibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the role of individuals in suggesting and making improvements and the importance of pro-active involvement
- list the positive impacts and the challenges of change and innovation
- provide examples of the types of changes that can occur as a result of effective individual participation within own scope of responsibility
- give examples of the types of changes that are within and outside own scope of responsibility
- list typical reasons why suggested improvements or innovations may not be implemented, including operational and management constraints
- explain how to prepare and communicate ideas for improvement to maximise likelihood of support.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN501 Establish systems that support innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conceptualise and establish new systems that support and encourage innovation in the workplace.

It applies to individuals including managers, senior operational personnel and/or internal/external specialists who are responsible for the development of new systems in small and large organisations in any community or industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research context for new system development	1.1 Explore and analyse the impact of systems in the overall context of innovation 1.2 Explore and gain clarity around system objectives, particularly in relation to innovation 1.3 Analyse current organisational systems to identify gaps or barriers to innovation 1.4 Research and analyse current and emerging information about

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	systems in other organisations and contexts 1.5 Evaluate the resources and other commitment required to foster innovation 1.6 Identify key stakeholders who can play a role in conceptualising or supporting new system ideas
2 Generate system concepts and options	2.1 Create system concepts that will foster innovation using individual and group techniques 2.2 Evaluate and discuss a range of ideas with relevant stakeholders 2.3 Clearly articulate the ways in which innovation is better supported by system ideas and options 2.4 Clearly articulate how the system itself is innovative 2.5 Expose ideas and options to ongoing testing, exploration and challenge 2.6 Select and refine system ideas that meet the workplace requirements and which are both feasible and innovative
3 Develop a plan for the system	3.1 Determine the need for specialised assistance and integrate into system planning 3.2 Analyse the potential impact of the new system on people, resources and other organisational practices 3.3 Consult with all stakeholders who will be involved with, or affected by, the new system 3.4 Develop an operational plan for the system, with budget, timelines and responsibilities 3.5 Develop a communication strategy to support the introduction of the new system 3.6 Evaluate the coaching and training needs of those who will use the system and plan a learning and development strategy
4 Trial the system	4.1 Present and consult on system proposals with relevant stakeholders 4.2 Analyse and integrate feedback into the system development process 4.3 Determine appropriate context and parameters for the trial process 4.4 Initiate the trial, taking account of all required consultative, coaching and technical issues 4.5 Monitor and review the trial in relation to its goals for fostering

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	innovation 4.6 Open the improvement process to ongoing collaborative input and challenge 4.7 Adjust system to reflect evaluation feedback

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4	• Researches, analyses and evaluates textual information, from a wide range of sources, to identify information relevant to systems that support innovation
Writing	2.3, 2.4, 2.5, 3.3, 3.4, 3.5, 3.6, 4.1, 4.2	• Develops complex plans and strategies using language and format appropriate to the audience and purpose
Oral Communication	2.1, 2.2, 2.3, 2.4, 3.3, 4.1, 4.6	• Presents ideas and concepts to a range of audiences varying vocabulary and non-verbal features to suit the audience • Uses active listening and questioning to discuss and clarify information and to confirm understanding
Numeracy	3.4	• Interprets, analyses and presents numeric or financial information in complex documents
Navigate the world of work	1.1-1.4	• Takes responsibility for researching and evaluating systems to achieve organisational outcomes in innovation according to role requirements
Interact with others	2.1, 2.2, 2.5, 4.1, 4.4, 4.6	• Identifies and uses appropriate conventions and protocols when communicating with stakeholders from diverse backgrounds • Uses inclusive and collaborative techniques to negotiate, influence and elicit the views and opinions of a wide range of stakeholders
Get the work done	1.1-1.6, 2.1, 2.6, 3.1, 3.2, 3.4-3.6, 4.2-4.7	• Accepts responsibility for planning and implementing systems and strategies to achieve organisational goals, negotiating key aspects with others • Develops new and innovative ideas through exploration, analysis and critical thinking

© Commonwealth of Australia, 2025 Skills Insight

		• Uses digital tools or systems to access, organise, integrate and share information

Assessment Requirements for BSBINN501 Establish systems that support innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of ability to:

- design a new system for the organisation that clearly support s innovation, is innovative and is based on:
  - analysis of the organisation's objectives, current systems, resources and barriers in relation to innovation
  - individual and group techniques with stakeholders to generate, test and evaluate several concepts and options for the new system
- consult with and analyse and integrate feedback from relevant stakeholders to develop a plan for the new system that addresses:
  - the need for external assistance
  - the impact of the new system on people, resources and other organisational practices
  - budget, timelines, responsibilities
  - a communication strategy
  - a learning and development strategy
- trial the new system including taking account of all consultative, coaching and technical issues and review it in relation to its goals for fostering innovation
- open the improvement process to ongoing collaborative input and challenge
- adjust system to reflect evaluation feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how the new system supports innovation in the organisation

© Commonwealth of Australia, 2025 Skills Insight

- explain the concepts and theories of change management including ways of introducing change in different organisational contexts and change management communication strategies
- explain the concepts and theories of innovation and how these link to innovation in practice
- explain techniques for generating, testing and evaluating concepts and options for new systems
- analyse the technical context in which the system is being developed
- outline the typical ways in which systems may present barriers to innovation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents and
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others
- current industry technology used in the development of systems.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create an environment that enables and supports the application of innovative practice focusing on a holistic approach to the integration of innovation across all areas of work practice.

It applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals. The work group could be permanent or temporary in nature.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Lead innovation by example	1.1 Make innovation an integral part of leadership and management activities 1.2 Demonstrate positive reception of ideas from others and provide constructive advice 1.3 Establish and maintain relationships based on mutual respect and trust

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Take considered risks to open up opportunities for innovation 1.5 Regularly evaluate own approaches for consistency with the wider organisational or project context
2 Establish work practices that support innovation	2.1 Consult on and establish working conditions that reflect and encourage innovative practice 2.2 Introduce and maintain workplace procedures that foster innovation and allow for rigorous evaluation of innovative ideas 2.3 Facilitate and participate in collaborative work arrangements to foster innovation 2.4 Build and lead teams to work in ways that maximise opportunities for innovation
3 Promote innovation	3.1 Acknowledge suggestions, improvements and innovations from all colleagues 3.2 Find appropriate ways of celebrating and promoting innovation 3.3 Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project 3.4 Promote and support the evaluation of innovative ideas within the wider organisational or project context
4 Create a physical environment which supports innovation	4.1 Evaluate the impact of the physical environment in relation to innovation 4.2 Collaborate with colleagues about ideas for enhancing the physical work environment before taking action 4.3 Consider potential for supporting innovation when selecting physical resources and equipment 4.4 Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships
5 Provide learning opportunities	5.1 Pro-actively share relevant information, knowledge and skills with colleagues 5.2 Provide or encourage formal and informal learning opportunities to help develop the skills needed for innovation 5.3 Create opportunities in which individuals can learn from the experience of others

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.2, 4.1, 5.1	• Interprets and evaluates information that may deal with complex ideas related to issues both within and outside a given workplace context
Writing	3.3, 3.4, 5.1	• Develops information for others using language to suit the context and audience
Oral Communication	1.2, 2.1, 2.3, 3.1, 3.3, 3.4, 5.1	• Presents ideas and concepts to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to discuss and clarify information and to confirm understanding
Navigate the world of work	1.1, 1.5, 2.1, 2.2, 3.3, 5.1, 5.2	• Takes responsibility for implementing practices and procedures to achieve organisational objectives in innovation according to role requirements • Stays up to date with professional development options to provide relevant information to staff
Interact with others	1.2, 1.3, 2.3, 2.4, 3.1-3.4, 4.2, 5.1, 5.3	• Uses appropriate communication techniques to build rapport and foster strong relationships with co-workers in a range of work contexts • Uses inclusive and collaborative techniques to share, promote and convey complex information about new ideas and systems within the workplace
Get the work done	1.1, 1.4, 1.5, 2.1, 3.2, 3.3, 4.1, 4.3, 4.4, 5.2, 5.3	• Accepts responsibility for planning and implementing tasks and practices to achieve organisational goals, negotiating key aspects with others and taking into account current capabilities and needs • Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking • Facilitates a climate where people feel comfortable suggesting and discussing improvements or new ideas • Uses problem solving processes to identify, assess and respond to challenges and risks around innovation

Assessment Requirements for BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to maximise opportunities for innovation by:

- establishing procedures and practices that foster innovation including:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas
  - celebration and promotion of innovation
  - consultation
  - respectful communications and sharing of ideas and feedback
- reinforcing the value of innovation to the vision and objectives of the organisation,
- model ling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation
- evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces
- making changes to a workspace that will encourage innovation in at least one of
  - design
  - fit-out
  - decoration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts and theories of innovation and how these link to innovation in practice
- explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- research the legislative framework that impacts on operations in the relevant workplace context
- explain how different approaches to management and leadership can support or hinder innovation
- discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies.

It applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area.

The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and innovation – innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify change requirements and opportunities	1.1 Identify strategic change needs through an analysis of organisational objectives 1.2 Review existing policies and practices against strategic objectives to identify where changes are required

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Monitor the external environment to identify events or trends that impact on the achievement of organisational objectives 1.4 Identify major operational change requirements due to performance gaps, business opportunities or threats, or management decisions 1.5 Review and prioritise change requirements or opportunities with relevant managers 1.6 Consult stakeholders, specialists and experts to assist in the identification of major change requirements and opportunities
2 Develop change management strategy	2.1 Undertake cost-benefit analysis for high priority change requirements and opportunities 2.2 Undertake risk analysis and apply problem solving and innovation skills to identify barriers to change and agree and record mitigation strategies 2.3 Develop change management project plan 2.4 Obtain approvals from relevant authorities to confirm the change management process 2.5 Assign resources to the project and agree reporting protocols with relevant managers
3 Implement change management strategy	3.1 Develop communication or education plan, in consultation with relevant groups and individuals, to promote the benefits of the change to the organisation and to minimise loss 3.2 Arrange and manage activities to deliver the communication or education plans to relevant groups and individuals 3.3 Consult with relevant groups and individuals for input into the change process 3.4 Identify and respond to barriers to the change according to risk management plans 3.5 Action interventions and activities set out in project plan according to project timetable 3.6 Activate strategies for embedding the change 3.7 Conduct regular evaluation and review and modify project plan where appropriate to achieve change program objectives

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2	• Interprets detailed information that may deal with complex ideas related to issues both within and outside the workplace context
Writing	2.1, 2.2, 2.3, 2.4, 3.1	• Uses clear and precise language to develop information about objectives, requirements, activities and recommendations • Develops complex plans and strategies in appropriate format for the audience and purpose
Oral Communication	1.6, 2.2, 2.4, 2.5, 3.3	• Discusses and seeks information using appropriate structure and language for the particular audience • Uses questioning and active listening to clarify or confirm understanding
Numeracy	2.1, 2.3, 2.3	• Interprets, analyses and presents numeric/financial information in complex documents
Navigate the world of work	1.1-1.6, 2.4, 2.5, 3.1, 3.2	• Takes a lead role in the development of organisational strategic goals and associated roles and responsibilities
Interact with others	1.5, 1.6, 2.4, 2.5, 3.1-3.3	• Uses a variety of communication tools and strategies to build and maintain effective working relationships • Uses inclusive and collaborative techniques to seek feedback, negotiate and consult with a range of stakeholders
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2, 3.4-3.7	• Plans, organises and implements activities required to achieve strategic priorities and outcomes, including consulting with others and sequencing events to minimise uncertainty for staff • Uses problem-solving skills to identify and analyse issues or barriers, and develop responses • Develops new and innovative ideas through exploration and lateral thinking

Assessment Requirements for BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and interpret information about the organisation's internal and external environment and consult with stakeholders to identify requirements and opportunities for changes that support organisational objectives
- prioritise opportunities for changes with input from managers
- develop a change management project plan for the priority changes incorporating resource requirements, risk management and timelines
- develop strategies to communicate or educate the changes and embed them
- obtain approvals and agree reporting protocols with relevant managers and implement the plan including addressing barriers to change
- review and evaluate the change management project plan and modify as needed to achieve objectives.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the change management process or cycle and strategies for communicating and embedding change
- explain how organisational behaviour and the external environment can impact on change strategies
- describe the components of a change management project plan
- list potential barriers to change and explain possible strategies to address barriers.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documentation and resources
- office equipment, materials and software packages
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITS401 Maintain business technology

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain the effectiveness of business technology in the workplace. It includes maintaining existing technology and planning for future technology requirements.

It applies to individuals with a broad knowledge of business technology who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Maintain performance of hardware and software	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Use operating system, drive and disk structure, reports and files to identify performance problems 1.3 Maintain disk drives and peripherals according to manufacturers' and organisational requirements 1.4 Replace consumables in accordance with manufacturers' and organisational requirements
2. Provide basic system administration	2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements 2.2 Install and operate software applications in accordance with developers' and organisational requirements 2.3 Maintain and update security access procedures in line with organisational requirements 2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements 2.5 Regularly maintain and update virus programs in accordance with organisational requirements
3. Identify future technology requirements	3.1 Maintain knowledge of current and new technology by regularly accessing sources of information 3.2 Identify and develop improved technology systems using feedback from clients and colleagues 3.3 Assess existing technology against newly available technology to determine future needs and priorities 3.4 Identify and select new technologies to achieve and maintain continuous organisational development 3.5 Obtain management and budget approval for new selected technologies

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1-3.4	• Gathers, analyses and interprets a range of textual information from a variety of sources and identifies

© Commonwealth of Australia, 2025 Skills Insight

		relevant information
Writing	2.3, 2.4, 3.5	• Produces texts of varying complexity using appropriate language and logical structure to record and convey information
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.5	• Complies with organisational policies and legal responsibilities related to own work
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.5	• Plans, implements and monitors tasks required to achieve required outcomes • Takes responsibility for the outcomes of routine decisions directly related to own role • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete routine tasks • Identifies innovations by monitoring trends from other contexts

Assessment Requirements for BSBITS401 Maintain business technology

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install software and hardware and maintain performance according to manufacturers' and organisational requirements
- organise and access software, materials and consumables
- maintain and update technology and security systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the costs and benefits of technology maintenance
- describe the general features and capabilities of current industry-accepted hardware and software products
- explain the importance of:
  - back-up and security procedures
  - maintenance and diagnostic procedures
  - licensing, installation and purchasing procedures.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT support field of work and include access to:

- case studies and, where possible, real situations
- office equipment and resources
- examples of technology maintenance and security procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITS411 Maintain and implement digital technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to maintain the effectiveness of digital technology in the workplace. It includes maintaining existing technology, planning for future technology requirements, and identifying opportunities to improve workplace effectiveness and efficiency by introducing new digital technologies.

It applies to individuals with a broad knowledge of digital business technologies who may be required to contribute well-developed skills in creating solutions to maintenance and upgrade issues with existing digital technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Maintain performance of existing digital technologies	1.1 Monitor and evaluate system effectiveness to ensure it meets organisational and system requirements 1.2 Use operating system, available software, web-based tools, and relevant applications to identify performance problems

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Maintain digital technologies according to organisational requirements by troubleshooting solutions to diagnose issues
2. Maintain security and functionality of data and digital technologies	2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements 2.2 Install and operate software and other digital applications in accordance with developers' and organisational requirements 2.3 Identify sources of risk to digital security in line with organisational policies and requirements 2.3 Maintain and update digital security access procedures in line with organisational requirements 2.4 Ensure that licences for use of software are used, checked and recorded in accordance with organisational requirements
3. Identify future technology requirements and opportunities	3.1 Identify available and upcoming digital technology solutions by accessing relevant sources of information 3.2 Assess existing digital technologies against newly available and upcoming digital technology solutions to determine future needs, opportunities, and priorities 3.3 Identify and select new digital technologies to achieve and maintain continuous organisational development in line with organisational strategies 3.4 Develop and implement improved digital technology systems based on feedback from clients and colleagues, in line with organisational policies and requirements 3.5 Obtain management and budget approval for new selected technologies

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Gathers, analyses and interprets a range of textual information from a variety of sources and identifies relevant information
Writing	• Produces texts of varying complexity using appropriate language and logical structure to record and convey information
Navigate the	• Complies with organisational policies and legal responsibilities

© Commonwealth of Australia, 2025 Skills Insight

world of work	related to own work
Get the work done	• Plans, implements and monitors tasks required to achieve required outcomes • Takes responsibility for the outcomes of routine decisions directly related to own role • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete routine tasks • Identifies innovations by monitoring trends from other contexts

Assessment Requirements for BSBITS411 Maintain and implement digital technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- identify and resolve system issues using a range of digital diagnostic tools
- perform routine system maintenance, including carrying out back-up procedures and software/application installation
- identify a range of risks to digital security and steps required to minimise/eliminate such risk
- develop and implement improved digital technology systems, drawing on research of available and upcoming digital technology solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features, capabilities, and limitations of current industry-accepted digital technology solutions
- Key features and limitations of existing organisational digital technologies, including software licences
- Key features of organisational policies and requirements related to digital security
- Key features of organisational commercial strategy relevant to digital technology
-

BSBITU201 Produce simple word processed documents

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to correctly operate word processing applications in production of workplace documents.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of word processing and software in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce documents	1.1 Use safe work practices to ensure ergonomic, work organisation, energy and resource conservation requirements are met

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Identify document purpose, audience and presentation requirements, and clarify with relevant personnel as required 1.3 Identify organisational and task requirements for document layout and design
2. Produce documents	2.1 Format document using appropriate software functions to adjust page layout to meet information requirements, in accordance with organisational style and presentation requirements 2.2 Use system features to identify and manipulate screen display options and controls 2.3 Use manuals, user documentation and online help to overcome problems with document presentation and production
3. Finalise documents	3.1 Ensure final document is previewed, checked, adjusted and printed in accordance with organisational and task requirements 3.2 Ensure document is prepared within designated timelines and organisational requirements 3.3 Name and store document in accordance with organisational requirements and exit application without information loss/damage

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 2.3, 3.1, 3.3	• Recognises textual information within organisational and task requirements to determine work requirements
Writing	3.1, 3.3	• Records numerical and textual information in accordance with requirements of task
Oral Communication	1.2	• Participates in a variety of spoken exchanges with relevant personnel in an effort to clarify document purpose, audience and presentation requirements
Navigate the world of work	1.1-1.3, 2.1, 3.1-3.3	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.2	• May seek guidance from more experienced work colleagues

© Commonwealth of Australia, 2025 Skills Insight

Get the work done	2.1-2.3, 3.1-3.3	• Understands functions and features of specific computer software and uses these to perform work tasks

Assessment Requirements for BSBITU201 Produce simple word processed documents

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documents following correct ergonomic, conservation requirements and organisational policies and procedures
- adhere to organisational style manual when formatting documents
- refer to help function and user documentation to rectify document problems
- use system features
- follow designated timelines when preparing documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify basic formatting styles and their effect on formatting, readability and appearance of documents
- describe purpose, use and function of word processing software
- outline organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- describe what is contained in an organisational style guide.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources including a style guide and user manuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and prepare resources	1.1 Select and use appropriate technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1 Identify, open and generate files and records according to task and organisational requirements 2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information 2.3 Use a range of functions to ensure consistency of design and layout 2.4 Operate input devices within designated requirements
3. Produce document	3.1 Complete document production within designated timelines according to organisational requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document to avoid loss of data 3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Make any modifications to document to meet requirements 4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage 4.4 Print and present document according to requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 3.2, 3.4, 4.1	• Recognises and interprets textual information from a range of sources to determine and adhere to requirements • Applies strategies to self-correct and verify clarity and conformity of information

© Commonwealth of Australia, 2025 Skills Insight

Writing	2.2, 2.3, 3.1, 4.2, 4.3	• Develops documents using required format, accurate spelling and grammar and terminology specific to requirements • Organises content to support purposes and audience of material, using clear and logical language
Oral Communication	1.4	• Confirms requirements with relevant personnel using specific terminology and listening and questioning techniques
Navigate the world of work	1.2, 1.3, 2.1, 2.4, 3.1, 3.2, 4.2-4.4	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.4	• Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4, 4.1-4.4	• Uses basic features and functions within applications to access, store, organise data and perform routine work tasks

Assessment Requirements for BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
  - selecting layout and style
  - opening and generating files
  - producing documents within designated timelines
  - naming and storing documents
  - printing and presenting documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements

© Commonwealth of Australia, 2025 Skills Insight

- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

This unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context.

At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning and evaluation and leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect, analyse and communicate information and ideas	1.1 Collect relevant information from appropriate sources and analyse and share with the work team to improve work performance 1.2 Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the

Assessment Requirements for BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships, and the cultural and social environment, can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team including interpersonal styles, communications, consultation, cultural and social sensitivity, networking
- explain the impact of legislation and organisational policies on workplace relationships
- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods

© Commonwealth of Australia, 2025 Skills Insight

- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

© Commonwealth of Australia, 2025 Skills Insight

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR803 Develop and cultivate collaborative partnerships and relationships

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish collaborative partnerships and relationships with business and industry stakeholders.

This unit covers communicating to influence others, cultivating new and existing partnerships, establishing positive collaborative relationships, leading the establishment of a partnership program and establishing reporting mechanisms.

It applies to people who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate to influence relevant individuals and stakeholders	1.1 Generate trust, confidence and support from relevant stakeholders by demonstrating a high standard of personal performance and conduct 1.2 Implement communication strategies to represent the organisation positively to media, local community and stakeholders 1.3 Make decisions in consultation with relevant stakeholders and relevant individuals where appropriate 1.4 Use a range of influencing strategies to increase commitment from staff and stakeholders to achieve organisational requirements and to contribute to desired culture 1.5 Undertake selected community and/or professional engagements that project a positive image of the organisation to the broader community and stakeholders
2. Cultivate new and existing partnerships with stakeholders	2.1 Establish outcomes to be achieved from the partnership 2.2 Analyse and apply models for effective consultation and collaboration within partnerships 2.3 Cultivate collaborative communities and partnerships through application of a range of communication solutions 2.4 Forge relationships, collaborative communities or partnerships between organisations
3. Establish positive collaborative relationships	3.1 Establish processes that contribute to the creation and maintenance of a positive culture that embraces collaboration 3.2 Establish processes to resolve conflict in a fair, equitable and collaborative manner 3.3 Organise and allocate work activities in a cost effective and equitable manner with clear, quantifiable and agreed performance standards 3.4 Encourage staff to undertake activities that develop their personal competence and performance 3.5 Empower individuals to develop their own ways of working within agreed boundaries of competence, cultural, diversity and organisational and legal requirements 3.6 Establish indicators and feedback processes that can be used to evaluate the health of the work environment
4. Lead establishment of a	4.1 Identify and address relevant organisational policies and

BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine development needs	1.1 Systematically identify and implement learning and development needs in line with organisational requirements 1.2 Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	implemented 1.3 Encourage individuals to self-evaluate performance and identify areas for improvement 1.4 Collect feedback on performance of team members from relevant sources and compare with established team learning needs
2. Develop individuals and teams	2.1 Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry 2.2 Ensure that learning delivery methods are appropriate to the learning goals, the learning style of participants, and availability of equipment and resources 2.3 Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate individual and team achievement of competencies 2.4 Create development opportunities that incorporate a range of activities and support materials appropriate to the achievement of identified competencies 2.5 Identify and approve resources and time lines required for learning activities in accordance with organisational requirements
3. Monitor and evaluate workplace learning	3.1 Use feedback from individuals or teams to identify and implement improvements in future learning arrangements 3.2 Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support 3.3 Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning 3.4 Document and maintain records and reports of competency according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Learning	1.1-1.4, 2.1-2.4, 3.1, 3.3	• Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1-3.4	• Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	1.1, 1.2, 1.4, 2.1, 2.5, 3.1-3.4	• Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3	• Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives
Navigate the world of work	1.1, 2.5, 3.4	• Recognises and responds to explicit and implicit organisational procedures and protocols Understands how own role meshes with others and contributes to broader goals
Interact with others	1.2, 1.3, 1.4, 2.2, 2.3, 3.1, 3.3	• Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve joint/agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.4	• Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

BSBLED501 Develop a workplace learning environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to encourage and support the development of a learning environment in which work and learning come together. Particular emphasis is on the development of strategies to facilitate and promote learning and to monitor and improve learning performance.

It applies to individuals who have a prominent role in encouraging, supporting and facilitating the development of a learning environment in which work and learning come together.

At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Create learning opportunities	1.1 Identify potential formal and informal learning opportunities 1.2 Identify learning needs of individuals in relation to the needs of

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	• Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	• Identifies, interprets, analyses and reviews textual information related to the operational plan and

© Commonwealth of Australia, 2025 Skills Insight

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	• Communicates relationships between ideas and information, matching style of writing to purpose and audience • Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	• Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 3.6	• Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they met stated goals • Recognises and addresses an increasing range of familiar problems by implementing contingency plans

Assessment Requirements for BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

ELEMENT	PERFORMANCE CRITERIA
processes	making processes, assume responsibility and exercise initiative 1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback 1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes
2. Monitor and review performance	2.1 Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved 2.2 Improve customer service through continuous improvement techniques and processes 2.3 Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation
3. Provide opportunities for further improvement	3.1 Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan 3.2 Document work performance to aid the identification of further opportunities for improvement 3.3 Manage records, reports and recommendations for improvement within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.2, 3.3	• Evaluates and integrates facts and ideas to construct meaning from a range of text types in an effort to implement continuous improvement systems and processes
Writing	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	• Selects vocabulary, grammatical structures and conventions appropriate to text • Researches, plans and prepares continuous improvement documentation for relevant stakeholders
Oral	1.2, 1.3, 2.3	• Participates in a variety of spoken exchanges with a range of audiences using structure and language to suit

© Commonwealth of Australia, 2025 Skills Insight

Communication		the audience
Navigate the world of work	2.1	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact the work of others	1.2, 1.3, 2.3, 3.1	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to seek or share information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3	• Takes responsibility for planning and organising own workload to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals • Uses digital applications to access and filter data, extract, organise, integrate and share relevant information • Recognises the potential of new approaches to enhance work practices and outcomes

Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Develop work plans in accordance with operational plans 1.3 Allocate work in a way that is efficient, cost effective and outcome focussed 1.4 Confirm performance standards, Code of Conduct and work outputs with relevant teams and individuals 1.5 Develop and agree performance indicators with relevant staff prior to commencement of work 1.6 Conduct risk analysis in accordance with the organisational risk management plan and legal requirements
2. Assess performance	2.1 Design performance management and review processes to ensure consistency with organisational objectives and policies 2.2 Train participants in the performance management and review process 2.3 Conduct performance management in accordance with organisational protocols and time lines 2.4 Monitor and evaluate performance on a continuous basis
3. Provide feedback	3.1 Provide informal feedback to staff on a regular basis 3.2 Advise relevant people where there is poor performance and take necessary actions 3.3 Provide on-the-job coaching when necessary to improve performance and to confirm excellence in performance 3.4 Document performance in accordance with the organisational performance management system 3.5 Conduct formal structured feedback sessions as necessary and in accordance with organisational policy
4. Manage follow up	4.1 Write and agree on performance improvement and development plans in accordance with organisational policies 4.2 Seek assistance from human resources specialists, where appropriate 4.3 Reinforce excellence in performance through recognition and continuous feedback 4.4 Monitor and coach individuals with poor performance 4.5 Provide support services where necessary 4.6 Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary 4.7 Terminate staff in accordance with legal and organisational

BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives.

At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Lead continuous improvement systems and processes	1.1 Develop strategies to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative as

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	appropriate 1.2 Establish systems to ensure that the organisation's continuous improvement processes are communicated to stakeholders 1.3 Ensure that change and improvement processes meet sustainability requirements 1.4 Develop effective mentoring and coaching processes to ensure that individuals and teams are able to implement and support the organisation's continuous improvement processes 1.5 Ensure that insights and experiences from business activities are captured and accessible through knowledge management systems
2. Monitor and adjust performance strategies	2.1 Develop strategies to ensure that systems and processes are used to monitor operational progress and to identify ways in which planning and operations could be improved 2.2 Adjust and communicate strategies to stakeholders according to organisational procedures
3. Manage opportunities for further improvement	3.1 Establish processes to ensure that team members are informed of outcomes of continuous improvement efforts 3.2 Ensure processes include recording of work team performance to assist in identifying further opportunities for improvement 3.3 Consider areas identified for further improvement when undertaking future planning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.3	• Identifies and extracts relevant information from a range of complex texts • Locates, interprets and analyses workplace documentation to gather information relating to continuous improvement
Writing	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1-3.3	• Develops complex texts related to continuous improvement processes according to organisational requirements

© Commonwealth of Australia, 2025 Skills Insight

		• Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.4, 2.2	• Presents information to a range of audiences using appropriate structure and language • Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders • Confirms understanding through questioning and active listening
Navigate the world of work	1.1-1.3, 2.1, 2.2	• Develops strategies to enable compliance with legislative requirements and achievement of the organisation's goals • Monitors adherence to organisational policies, procedures and protocols and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 1.4, 2.2	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 3.1, 3.2, 3.3	• Takes responsibility for developing, implementing and monitoring systems and processes to achieve organisational outcomes • Uses analytical and lateral thinking to review current practices and develop ideas for improvement • Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals

Assessment Requirements for BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to establish systems and processes for continuous improvement that:

- facilitate effective contributions to and communications about continuous improvement processes and outcomes
- address sustainability requirements
- incorporate mentoring, coaching and other support to enable people to participate effectively in continuous improvement processes
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how systems and procedures can support effective continuous improvement
- explain how continuous improvement systems and processes relate to other business systems and requirements including, knowledge management, quality, performance management and sustainability.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessment Requirements for BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
  - resource requirements
  - key performance indicators
  - monitoring processes
  - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
  - recruiting, inducting and developing personnel
  - acquiring physical resources and services
  - protecting intellectual property
  - making variations to the plan
  - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

© Commonwealth of Australia, 2025 Skills Insight

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT616 Develop and implement strategic plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish the strategic direction of the organisation, sustain competitive advantage and enhance competitiveness. It covers analysis and interpretation of relevant markets, capability assessment of the organisation and analysis of the organisation's existing and potential competitors and allies. It also covers implementation of the strategic plan and developing specific actions and initiatives that will be undertaken by people working in various roles.

It applies to individuals working in senior roles in the organisation who have responsibility for ensuring that the organisation is positioned to ensure its long-term viability and success.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm organisational vision and mission	1.1 Check with stakeholders that organisational vision and mission are still held to be current and are supported 1.2 Make any changes or refinements to vision or mission statement as required 1.3 Review or develop organisational values to support the vision

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	and mission statement 1.4 Gain support for strategic planning process from all relevant stakeholders
2. Analyse the internal and external environment	2.1 Determine information requirements and undertake or commission research to deliver relevant information 2.2 Analyse political, economic, social, and technological developments in a global context 2.3 Seek advice from appropriate experts wherever necessary 2.4 Identify and consider strengths and weaknesses of existing and potential competitors and allies 2.5 Analyse organisation's strengths, weaknesses, opportunities and threats 2.6 Consider cooperative ventures that are supported by risk and cost benefit analyses, are consistent with the organisational vision, mission and values and provide for due diligence 2.7 Check that analysis of internal and external environment is consistent with the perspectives of other informed people
3. Write strategic plan	3.1 Document relevant research and background for inclusion in the strategic plan 3.2 Formulate strategic objectives and strategies needed for the future 3.3 Detail each strategy with an assigned priority, a timeframe, responsible parties and measurable performance indicators 3.4 Circulate strategic plan for comment, support and endorsement
4. Implement strategic plan	4.1 Communicate strategic plan to all relevant parties 4.2 Brief people with a specific role in relation to strategies 4.3 Use performance indicators to monitor progress in implementing plan 4.4 Make necessary refinements to plan 4.5 Evaluate achievement of objectives at agreed milestones 4.6 Review effectiveness of plan and consider methods for improving strategic planning processes

Performance Evidence

Evidence of the ability to:

- consult and communicate effectively with relevant stakeholders to:
  - confirm or revise the organisation's mission, vision and values
  - validate findings of research and analysis
  - get input to and endorsement of strategic plans
  - brief relevant parties about the plan
- analyse organisation's internal and external environment to formulate strategic plans including:
  - background and research relevant to the plan
  - legislation, regulations and codes of practice, including for intellectual property
  - objectives, strategies and priorities
  - roles and responsibilities
  - performance indicators
  - timeframes
  - consideration of co-operative ventures
  - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Skills Insight

- outline the legislation, regulations and codes of practice relevant to the organisation's strategic plan.
- give examples of risks and risk management strategies relevant to strategic planning including:
  - intellectual property rights and responsibilities
  - other risks
- outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
- identify internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
- outline techniques for developing organisational values.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG501 Identify and evaluate marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify, evaluate and take advantage of marketing opportunities by analysing market data, distinguishing characteristics of possible markets and assessing viability of changes to operations.

It applies to individuals working in a supervisory or management marketing or advertising role within a marketing or advertising team or media organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify marketing opportunities	1.1 Analyse information on market and business needs to identify marketing opportunities 1.2 Research potential new markets and assess opportunities to enter, shape or influence each market, and the likely contribution to the business 1.3 Explore entrepreneurial, innovative approaches and creative ideas for their potential business application, and develop into potential marketing opportunities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Investigate marketing opportunities	2.1 Identify and analyse opportunities in terms of their likely fit with organisational goals and capabilities 2.2 Evaluate each opportunity to determine its impact on current business and customer base 2.3 Use an assessment of external factors, costs, benefits, risks and opportunities to determine the financial viability of each marketing opportunity 2.4 Determine probable return on investment and potential competitors 2.5 Describe and rank marketing opportunities on their viability, and likely contribution to the business
3. Evaluate required changes to current operations	3.1 Identify and document changes needed to current operations to take advantage of viable marketing opportunities 3.2 Ensure organisational changes to service an increased or different customer base including provision for continued quality of service to existing customers 3.3 Estimate resource requirements for changed operations 3.4 Determine and communicate viability of making changes to current operations to key stakeholders 3.5 Document newly identified marketing opportunities and required changes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1	• Evaluates and comprehends textual information from a range of sources and draws own conclusions
Writing	1.1-1.3, 2.5, 3.1, 3.4, 3.5	• Integrates information from a number of sources to develop material that supports purposes of documentation using suitable grammatical structure and clear, logical language
Oral Communication	2.5, 3.4	• Presents opinions, ideas and organisational requirements clearly and creatively using language and presentation techniques appropriate to audience and

© Commonwealth of Australia, 2025 Skills Insight

		environment • Elicits views and opinions of others by listening and questioning
Numeracy	2.3, 2.4, 3.3	• Evaluates financial and marketing data using whole numbers, decimals and percentages to make accurate calculations
Navigate the world of work	2.1	• Recognises and follows explicit and implicit organisational protocols and meets expectations associated with own role
Interact with others	2.5, 3.4	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.2, 3.3, 3.4	• Develops plans to manage relatively complex tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes decisions by systematically analysing information, identifying and evaluating options against set criteria, and choosing most appropriate option • Evaluates outcomes of decisions to identify opportunities for improvement • Develops new and innovative ideas through exploration, analysis and critical thinking

Assessment Requirements for BSBMKG501 Identify and evaluate marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and evaluate marketing opportunities to determine whether they can meet organisational objectives
- document how current business operations need to be modified, and list resources required, to take advantage of newly identified and evaluated opportunities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of relevant legislation, codes of practice and national standards affecting marketing operations
- describe organisational marketing plan, structure, products and services
- explain principles of marketing and marketing mix
- describe statistical methods and techniques to evaluate marketing opportunities, including forecasting techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- organisational strategic and marketing plans
- case studies and, where possible, real situations.

BSBPMG415 Apply project risk management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with aspects of risk management in a project. It specifically involves planning for, controlling and reviewing risks associated with the project, and assisting in this process where required.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with risk analysis and planning	1.1 Contribute to identifying and prioritising potential risks throughout the project life cycle, using established risk-analysis methods, techniques and tools 1.2 Contribute to developing risk management strategies and risk management plans according to established guidelines 1.3 Contribute to developing and implementing risk-reporting mechanisms
2. Perform risk-control	2.1 Monitor risks according to agreed project and risk management

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
activities	plans and advise project manager of changing circumstances 2.2 Regularly review current and proposed activities to identify potential and actual risks and opportunities 2.3 Contribute to implementing agreed risk management approaches and amending plans to reflect the changing environment 2.4 Contribute to corrective action on risks according to risk management plan and delegated authority 2.5 Contribute to review of contingency plans on an ongoing basis and, where required, ensure tasks allocated to individuals and/or team are clarified with the project manager before implementation 2.6 Apply and monitor risk-contingency measures according to risk management plan 2.7 Identify and report opportunities in the same way as risks
3. Contribute to assessing risk management outcomes	3.1 Contribute to ongoing review of project outcomes to determine effectiveness of risk management activities by accessing project risk records and other available information 3.2 Report risk management issues and responses to others for lessons learned or application to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.4, 2.6, 3.1	• Applies appropriate strategies to construct meaning from complex texts
Writing	1.1, 1.2, 1.3, 2.7, 3.2	• Documents results of analyses using required organisational formats • Develops project documentations using structure and vocabulary appropriate to audience, context and purpose
Oral communication	1.1, 1.2, 1.3, 2.1, 2.5, 2.7, 3.2	• Participates in a range of verbal exchanges using clear language and non-verbal features to provide relevant information • Uses active listening and questioning techniques to

© Commonwealth of Australia, 2025 Skills Insight

		elicit views and opinions of others
Navigate the world of work	2.4	• Understands responsibilities of own role in terms of its contribution to broader goals of work environment
Interact with others	1.1, 1.2, 1.3, 2.1, 2.5, 2.7, 3.2	• Selects appropriate communication protocols in a range of work contexts • Collaborates and cooperates with others to achieve shared goals
Get the work done	2.1-2.6, 3.1	• Sequences and schedules required tasks and activities and manages relevant communication • Reflects on outcomes to identify opportunities for future improvement • Identifies key concepts and principles that may be adaptable to future situations

Assessment Requirements for BSBPMG415 Apply project risk management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assist others in identifying and prioritising potential risks and developing risk-management strategies, plans and reporting mechanisms
- apply, monitor and review risk-control measures, including contingency measures to mitigate risks
- evaluate, review and report on risk-management processes and make recommendations for future improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify tools to help determine potential risks for a specific project
- explain strategies for managing project risks and their application in different situations
- explain the importance of risk-contingency measures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project management documentation for risk management
- case studies and, where possible, real situations
- interaction with others.

BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project.

It applies to individuals who are project practitioners working in a project support role. The individual may be operating in a large or small organisation, and applying skills in the context of enterprise projects.

The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale, self-directed team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with procurement planning	1.1 Contribute to establishing procurement requirements to achieve project objectives 1.2 Act under delegated authority to contribute to development of

Assessment Requirements for BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe procurement-management policy, processes and procedures
- explain the procurement documentation requirements
- describe the components of contractual documentation and the legal obligations of all parties
- explain the process used to select preferred contractors
- identify and describe project procurement-management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

© Commonwealth of Australia, 2025 Skills Insight

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	project and project parameters 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop project plan in line with the project parameters 2.2 Identify and access appropriate project management tools 2.3 Formulate risk management plan for project, including Work Health and Safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain required recordkeeping systems throughout the project 3.4 Implement and monitor plans for managing project finances, resources and quality 3.5 Complete and forward project reports as required to stakeholders 3.6 Undertake risk management as required to ensure project outcomes are met 3.7 Achieve project deliverables
4. Finalise project	4.1 Complete financial recordkeeping associated with project and check for accuracy 4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles 4.3 Complete project documentation and obtain necessary sign-offs for concluding project
5. Review project	5.1 Review project outcomes and processes against the project scope and plan

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	1.6, 2.4, 3.4, 4.1	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information
Oral communication	2.5, 5.2	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Navigate the world of work	1.3, 1.4, 2.3, 3.1, 4.3	• Recognises and responds to organisational and legislative/regulatory requirements
Interact with others	2.5, 3.1, 3.2, 4.2, 5.2	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Get the work done	1.2, 1.5, 1.6, 2.1, 2.2, 2.3, 2.6, 3.1-3.7, 4.1, 4.2, 4.3, 5.1, 5.3	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify

Assessment Requirements for BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Skills Insight

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality of the information, and preparing and producing reports.

It applies to individuals who are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of unpredictable problems

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather and organise information	1.1 Gather and organise information in a format suitable for analysis, interpretation and dissemination in accordance with organisational requirements 1.2 Access information held by the organisation ensuring accuracy and relevance in line with established organisational requirements 1.3 Ensure that methods of collecting information are reliable and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	make efficient use of resources in accordance with organisational requirements 1.4 Identify research requirements for combining online research with non-electronic sources of information 1.5 Use business technology to access, organise and monitor information in accordance with organisational requirements 1.6 Update, modify, maintain and store information, in accordance with organisational requirements
2. Research and analyse information	2.1 Clearly define objectives of research ensuring consistency with organisational requirements 2.2 Ensure that data and research strategies used are valid and relevant to the requirements of the research and make efficient use of available resources 2.3 Identify key words and phrases for use as part of any online search strategy, including the use of Boolean operators and other search tools 2.4 Use reliable methods of data analysis that are suitable to research purposes 2.5 Ensure that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives
3. Present information	3.1 Present recommendations and issues in an appropriate format, style and structure using suitable business technology 3.2 Structure and format reports in a clear manner that conforms to organisational requirements 3.3 Report and distribute research findings in accordance with organisational requirements 3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 1.2, 1.4, 2.1-2.5, 3.4	• Analyses and evaluates textual information to develop research strategies, integrate facts and ideas and meet organisational requirements
Writing	1.1, 1.5, 1.6, 2.1, 3.1, 3.2, 3.3	• Gathers, evaluates and integrates information from a range of sources • Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience.
Oral Communication	3.3, 3.4	• Presents recommendations and issues using language appropriate to audience and according to organisational requirements
Numeracy	1.1, 1.2, 1.3, 2.2, 2.4, 3.3	• Extracts and evaluates meaning from data and interprets numerical information to apply within the context of requirements
Navigate the world of work	1.2, 1.3, 1.5, 1.6, 2.1, 2.5, 3.2, 3.3, 3.4	• Recognises and follows organisational policies and procedures and meets expectations associated with own role
Interact with others	3.3, 3.4	• Selects and uses appropriate communication practices when seeking or sharing information
Get the work done	1.1, 1.4, 1.5, 2.2, 2.3, 2.4, 3.1	• Plans, organises and implements tasks to meet organisational requirements • Takes responsibility for the outcomes of routine decisions related directly to own role • Uses the main features and functions of digital technologies and tools to complete work tasks • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify or confirm research requirements and objectives
- gather, organise and present workplace information and data
- update, modify, maintain and store information
- maintain and handle data and documents systematically and securely
- prepare and produce reports including:
  - recommendations based on the analysis of information
  - clear and justified assumptions and conclusions
  - use of efficient, valid and reliable methods
- use Boolean operators and other search tools
- analyse, evaluate and interpret data to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational systems for recordkeeping/filing, including security procedures
- identify organisational policies and procedures and legal and ethical obligations relating to workplace information
- explain concepts related to research and analysis including reliability and validity
- give examples of techniques for data analysis and how they are applied
- explain research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES411 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems and sources. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality and reliability of the information, and preparing and producing reports.

It applies to individuals in roles in which they are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify reliable sources of research information	1.1 Identify potential sources for research information relevant to the organisation requirements 1.2 Assess reliability of potential sources, considering accuracy, authority, audience, relevance and likelihood of bias 1.3 Access research information and extract in a format suitable for analysis, interpretation and dissemination in accordance with

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements 1.4 Store research information, in accordance with organisational requirements
2. Analyse and synthesise research information	2.1 Clearly define objectives of research ensuring consistency with organisational requirements 2.2 Ensure that information research strategies are relevant to the requirements of the research and aligned to organisational objectives 2.3 Apply information research strategy to obtain relevant information, identifying themes and drawing conclusions in line with established objectives of research 2.4 Demonstrate that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives
3. Present research information	3.1 Identify appropriate methods of reporting, considering the intended audience and relevant organisational requirements 3.2 Report on findings in an appropriate format, style and structure within a pre-determined timeframe 3.3 Report and distribute research findings in accordance with organisational requirements 3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Analyses and evaluates textual information to develop information research strategies, integrate facts and ideas and meet organisational requirements
Writing	• Gathers, evaluates and integrates information from a range of sources • Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience
Oral	• Presents recommendations and issues using language appropriate to

© Commonwealth of Australia, 2025 Skills Insight

Communication	audience and according to organisational requirements
Navigate the world of work	• Recognises and follows organisational policies and procedures and meets expectations associated with own role
Interact with others	• Selects and uses appropriate communication practices when seeking or sharing information
Get the work done	• Plans, organises and implements tasks to meet organisational requirements • Takes responsibility for the outcomes of routine decisions related directly to own role • Uses the main features and functions of digital technologies and tools to complete work tasks • Recognises and takes responsibility for addressing foreseeable problems in familiar work contexts

Assessment Requirements for BSBRES411 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- identify research requirements and objectives
- gather, organise and present research information
- communicate effectively with research stakeholders to clarify requirements
- maintain and handle information and documents systematically and securely
- preparing reports on research findings including:
  - recommendations based on the analysis of research information
  - clear and justified assumptions and conclusions
  - use of efficient and reliable research methods
- analyse, evaluate and interpret research information to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of organisational policies and procedures relating to:
  - the access of digital information
  - the storage/transmission of information
  - legal and ethical obligations relating to workplace information
- key concepts related to research and analysis including reliability and validity
- key features of research processes and strategies to identify new sources (online and print) of information and efficient and effective use.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Construct an applied research strategy	1.1 Clarify and confirm applied research purpose and needs of the target group 1.2 Determine policies and procedures in relation to conducting applied research 1.3 Establish mechanisms for collecting and maintaining data in a

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	systematic manner 1.4 Analyse factors affecting the reliability and validity of data 1.5 Review relevant research ethics and codes of conduct 1.6 Prepare applied research strategy and hypothesis 1.7 Frame a research strategy in consideration of available tools and resources
2. Use a range of applied research techniques	2.1 Review and evaluate a range of applied research methods, theories and data collection techniques 2.2 Select appropriate methods to gather and analyse data 2.3 Use suitable technology and technology services to support data collection and analysis 2.4 Access appropriate sources of information and contributors relevant to the research 2.5 Optimise relevance of the research through integrity of the data collected and analysis tools used
3. Analyse and present findings	3.1 Evaluate how research findings such as trends and changes will impact on learning strategy 3.2 Review data and research findings for accuracy of details and adherence to any legal requirements 3.3 Collate and analyse data for relevance against the original applied research strategy 3.4 Document and present research findings in a clear and logical manner consistent with audience needs 3.5 Identify the need for and an appropriate approach to, further research

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.5	• Evaluates and reflects on the need for further research to contribute to ongoing organisational improvement

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 1.2, 1.5, 2.4, 3.1, 3.2	• Collects, analyses, compares and evaluates textual information from a range of resources to inform research strategies
Writing	1.6, 3.3, 3.4	• Develops texts dealing with complex ideas and concepts • Uses specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal, ethical and organisational requirements
Oral Communication	1.1, 3.4	• Uses specialised vocabulary appropriate to context and audience to discuss and confirm research requirements • Applies listening and questioning techniques to check or confirm understanding
Numeracy	3.2, 3.3	• Applies knowledge of mathematical information to statistically analyse data and identify possible trends and confirm reliability
Navigate the world of work	1.2, 1.5, 3.2	• Is highly autonomous, taking responsibility for determining applicable organisational policies and procedures and considering legal and ethical obligations • Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others
Interact with others	3.4	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals
Get the work done	1.1, 1.2, 1.3, 1.7, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3	• Develops plans for complex activities, regularly reviewing priorities and performance during implementation, identifying and addressing issues as they arise • Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks • Uses formal analytical thinking to make informed decisions about research strategies and techniques, seeking input, advice and feedback as required

Assessment Requirements for BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
  - specific research questions or hypotheses
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - full description of the data collection methods
  - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques

© Commonwealth of Australia, 2025 Skills Insight

- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations .

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify risks	1.1 Identify the context for risk management 1.2 Identify risks using tools, ensuring all reasonable steps have

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	been taken to identify all risks 1.3 Document identified risks in accordance with relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse and document risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes
3. Treat risks	3.1 Determine appropriate control measures for risks and assess for strengths and weaknesses 3.2 Identify control measures for all risks 3.3 Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures 3.4 Choose and implement control measures for own area of operation and/or responsibilities 3.5 Prepare and implement treatment plans
4. Monitor and review effectiveness of risk treatment/s	4.1 Regularly review implemented treatment/s against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Provide assistance to auditing risk in own area of operation 4.4 Monitor and review management of risk in own area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	• Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	1.3, 2.1, 2.3, 3.5	• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes

© Commonwealth of Australia, 2025 Skills Insight

Oral communication	2.1	• Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	1.2, 4.1	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 1.3, 3.3	• Complies with organisational and legislative requirements • Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Interact with others	2.1	• Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.3, 4.4	• Determines job sequence and works logically and systematically to undertake defined tasks • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions • Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

© Commonwealth of Australia, 2025 Skills Insight

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	• Comprehends a variety of relatively complex texts • Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	1.6, 1.8, 2.1, 2.3, 4.3	• Develops textual material and organises content in a manner that effectively documents

© Commonwealth of Australia, 2025 Skills Insight

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	• Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	2.2	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 2.1, 4.3	• Refers to organisational processes, procedures and requirements when making decisions about risk management
Interact with others	1.8, 2.1, 2.3, 4.3	• Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management • Consults and negotiates with stakeholders about risk management processes and outcomes
Get the work done	1.2, 1.3, 1.5, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 4.6	• Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication • Systematically analyses information to decide on appropriate risk management treatments • Uses digital technologies and systems to access information, document plans and communicate with others

Assessment Requirements for BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify the scope and context of the risk management process including:
  - stakeholder analysis
  - political, economic, social, legal, technological and policy context
  - current arrangements
  - objectives and critical success factors for the area included in scope
  - risks that may apply to scope
- consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes
- develop and implement an action plan to treat risks
- monitor and evaluate the action plan and risk management process
- maintain documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- outline organisational policies, procedures and processes for risk management.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSMB404 Undertake small business planning

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research and develop an integrated business plan for achieving business goals and objectives.

It applies to individuals who operate a small business that operates independently, or as part of a larger organisation. Individuals in this role interpret business information and numerical data competently.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify elements of the business plan	1.1 Identify purpose of the business plan 1.2 Identify and review essential components of the business plan 1.3 Identify and document business goals and objectives as a basis for measuring business performance

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Develop a business plan	2.1 Research resources, legal and compliance requirements, specifically in relation to work health and safety (WHS), in accordance with business goals and objectives 2.2 Research market needs, and market size and potential 2.3 Identify sources and costs of finance, from financial plan, to provide required liquidity and profitability for the business 2.4 Identify methods, from marketing strategies, to promote market exposure of the business 2.5 Identify methods or means of production or operation from production or operations plan to conform with business goals and objectives 2.6 Identify staffing requirements to effectively produce or deliver products and services 2.7 Identify, assess and prioritise internal and external risks 2.8 Identify specialist services and sources of advice, where required, and cost in accordance with available resources
3. Develop strategies for minimising risks	3.1 Identify specific interests and objectives of relevant people and seek and confirm their support of planned business direction 3.2 Identify and develop risk management strategies according to business goals and objectives, and relevant legal requirements 3.3 Develop a contingency plan to address possible areas of non-conformance with the plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.7, 3.1, 3.2	• Identifies, analyses and evaluates complex workplace documentation during planning process
Writing	1.3, 2.3-2.7, 3.1-3.3	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 3.1	• Articulates ideas and requirements clearly and

© Commonwealth of Australia, 2025 Skills Insight

Communication		creatively based on techniques appropriate to assess business performance
Numeracy	2.2, 2.3, 2.5-2.7	• Interprets numerical information to determine prospective markets, resource allocations and business profits/losses
Navigate the world of work	2.1, 3.2	• Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	3.1	• Looks for strengths in others, finding ways of working with and building on these and sharing own knowledge and experience freely
Get the work done	1.1, 1.2, 2.1-2.7, 3.2, 3.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and to evaluate alternative strategies • Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Identifies concepts, principles and features of approaches in use in other contexts, and redesigns these to suit own situation • Uses formal and informal processes to monitor implementation of solutions and reflect on outcomes

Assessment Requirements for BSBSMB404 Undertake small business planning

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a business plan which provides for finance, marketing and provision of products or services to facilitate all business goals and objectives
- identify and plan all work health and safety (WHS) and duty of care responsibilities
- identify and assess internal and external risks to the business
- develop risk management strategies including a contingency plan for non-conformance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to business operation, especially in regard to WHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- explain methods of evaluation
- summarise WHS responsibilities and procedures for identifying hazards relevant to the business
- outline planning processes
- describe preparation of a business plan
- identify principles of risk management relevant to small business planning
- outline common risks particular to the small business type or industry
- explain reasons for, and benefits of, business planning

© Commonwealth of Australia, 2025 Skills Insight

- clarify relevant industry codes of practice
- outline setting goals and objectives
- explain types of business planning – feasibility studies; strategic, operational, financial and marketing planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB421 Manage small business finances

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to implement and review financial management strategies on a regular basis, including by using new and emerging digital technologies.

It applies to individuals who operate a small business that stands alone, or that is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement financial strategy	1.1 Identify financial information requirements and obtain specialist services, as required, to profitably operate the business 1.2 Produce financial budgets or projections, including cash flow estimates, as required for each forward period, and distribute to relevant people in accordance with legal requirements 1.3 Negotiate, secure and manage business capital to best enable implementation of the business plan

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements 1.5 Develop, monitor and maintain client credit policies, including contingencies for debtors in default, to maximise cash flow 1.6 Select key performance indicators to enable ongoing monitoring of financial performance in line with the business plan 1.7 Record and communicate financial procedures to relevant personnel to facilitate implementation of the business plan
2. Monitor financial performance	2.1 Use available digital technologies to regularly monitor and report on financial performance targets, and analyse data to establish extent to which the financial goals have been met 2.2 Monitor marketing and operational strategies for their effects on the financial goals 2.3 Calculate and evaluate financial ratios according to own or industry benchmarks 2.4 Assess financial plan to determine whether variations or alternative plans are needed, and change as required 2.5 Undertake research regularly to identify opportunities to implement new and emerging technologies to boost business profitability in accordance with the business plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding • Participates in verbal negotiations using tone and language suitable to audience
Numeracy	• Interprets numerical information to calculate all relevant financial information

© Commonwealth of Australia, 2025 Skills Insight

Navigate the world of work	• Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes

Assessment Requirements for BSBSMB421 Manage small business finances

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- manage the business according to financial goals, including:
  - adhering to legal requirements
  - produce relevant financial projections, including cash flow estimates
  - secure and manage business capital
  - defining strategies for debt collection and contingencies for debtors
  - managing cash flow
  - defining key performance indicators
  - communicating with relevant people
  - seeking specialist services where required
- monitor the business against financial plan and make changes as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of benchmarking
- Key features of financial decision-making relevant to the business
- Key features of significant financial indicators
- Key purposes of financial reports
- Key features of balance sheet preparation and interpretation

© Commonwealth of Australia, 2025 Skills Insight

- Key features of debt collection procedures or strategies
- Key features of profit and loss statement preparation and interpretation
- Key features of stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources, including business technology
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and implement a workplace sustainability policy and to modify the policy to suit changed circumstances.

It applies to individuals with managerial responsibilities who undertake work developing approaches to create, monitor and improve strategies and policies within workplaces and engage with a range of relevant stakeholders and specialists.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop workplace sustainability policy	1.1 Define scope of sustainability policy 1.2 Gather information from a range of sources to plan and develop policy 1.3 Identify and consult stakeholders as a key component of the policy development process 1.4 Include appropriate strategies in policy at all stages of work for

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	minimising resource use, reducing toxic material and hazardous chemical use and employing life cycle management approaches 1.5 Make recommendations for policy options based on likely effectiveness, timeframes and cost 1.6 Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 1.7 Agree to appropriate methods of implementation, outcomes and performance indicators
2. Communicate workplace sustainability policy	2.1 Promote workplace sustainability policy, including its expected outcome, to key stakeholders 2.2 Inform those involved in implementing the policy about expected outcomes, activities to be undertaken and assigned responsibilities
3. Implement workplace sustainability policy	3.1 Develop and communicate procedures to help implement workplace sustainability policy 3.2 Implement strategies for continuous improvement in resource efficiency 3.3 Establish and assign responsibility for recording systems to track continuous improvements in sustainability approaches
4. Review workplace sustainability policy implementation	4.1 Document outcomes and provide feedback to key personnel and stakeholders 4.2 Investigate successes or otherwise of policy 4.3 Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance 4.4 Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 1.2, 4.2, 4.3	• Identifies, analyses and evaluates complex textual information to determine legislative and regulatory requirements, trends and outcomes
Writing	1.2-1.7, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3, 4.4	• Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience
Oral Communication	1.2, 1.3, 2.1, 2.2, 3.1, 4.1	• Presents information and seeks advice using language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 4.3	• Interprets and uses mathematical equations to calculate numerical information relating to time durations and costs
Navigate the world of work	1.1-1.6, 3.1, 4.4	• Develops, monitors and modifies organisational policies and procedures in accordance with legislative requirements and organisation goals
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Plays a lead role in consulting and negotiating positive outcomes with a range of stakeholders
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	• Plans, organises and implements work activities of self and others that ensure compliance with organisational policies and procedures, and legislative requirements • Sequences and schedules complex activities, monitors implementation, and manages relevant communication • Uses systematic, analytical processes in relatively complex, situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum:
  - minimising resource use
  - resource efficiency
  - reducing toxic material and hazardous chemical use
  - employing life cycle management approaches
  - continuous improvement
- plan and implement sustainability policy and procedures including:
  - agreed outcomes
  - performance indicators
  - activities to be undertaken
  - assigned responsibilities
  - record keeping, review and improvement processes
- consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement
- review and improve sustainability policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy

© Commonwealth of Australia, 2025 Skills Insight

- explain policy development processes and practices
- outline organisational systems and procedures that relate to sustainability
- outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS503 Contribute to the systematic management of WHS risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the systematic management of work health and safety (WHS) risk.

It applies to individuals who provide specialised knowledge, systematic approaches and guidance to a range of personnel.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Access information and data to contribute to the	1.1 Identify sources of information and data 1.2 Obtain information and data to determine the purposes,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
systematic management of WHS risk	objectives, principles and framework of a systematic approach to managing WHS risk
2 Contribute to effective consultation and participation during all stages of risk management	2.1 Identify individuals and parties who need to participate and be consulted 2.2 Apply knowledge of effective consultation and participation to contribute to ensuring effective consultation and participation processes occur
3 Contribute to establishing the context for risk management	3.1 Apply knowledge of WHS legislation to identify duty holders and legislative requirements for WHS risk management 3.2 Identify individuals and parties impacting on risk management 3.3 Apply knowledge of organisation to identify factors that will impact on risk control 3.4 Contribute to establishing the context of the risk management process 3.5 Contribute to defining risk criteria
4 Contribute to risk assessment	4.1 Apply knowledge of workplace hazards and risks to contribute to risk identification 4.2 Apply knowledge of WHS legislation, risk assessment and workplace WHS information and data to contribute to risk analysis and evaluation
5 Contribute to risk treatment	5.1 Apply knowledge of WHS hazard and risk control, and WHS legislation to contribute to the selection of risk treatment options 5.2 Apply knowledge of the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to prepare and implement risk treatment/s
6 Contribute to monitoring, reviewing and recording risk management process	6.1 Apply knowledge of the organisation's WHSMS to contribute to monitoring and reviewing risk management processes 6.2 Apply knowledge of the organisation's WHSIS to contribute to recording risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1,	• Organises, evaluates and integrates information from a range of sources to determine requirements
Writing	2.2, 3.4, 3.5, 4.2, 5.2, 6.2	• Records results of investigations using clear and comprehensible language and layout • Creates a range of formal texts using industry language appropriate to audience and environment
Oral Communication	2.2, 3.4, 3.5, 4.2	• Uses listening and questioning techniques to clarify understanding and elicit the views of others • Presents information varying level of technical vocabulary to suit audience
Numeracy	1.1, 4.1, 4.2, 6.1, 6.2	• Collates, interprets and compares numerical and statistical information relevant to requirements
Navigate the world of work	3.1, 4.2, 5.1, 5.2, 6.1, 6.2	• Considers legal and regulatory responsibilities when implementing, monitoring or reviewing risk management processes
Interact with others	2.2, 3.4, 3.5, 4.2	• Identifies and uses appropriate conventions and protocols when communicating with others • Plays a lead role in situations requiring effective collaboration skills demonstrating the ability to guide discussions and negotiate outcomes
Get the work done	1.1, 1.2, 2.1, 3.1-3.3, 4.1, 4.2, 5.1, 5.2, 6.1, 6.2	• Develops plans or processes to manage relatively complex risk management tasks, with an awareness of how they contribute to operational and strategic goals • Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Applies problem solving processes to determine solutions to risk management issues • Uses analytical and lateral thinking to review practices and suggest improvements • Uses a range of digitally based technology and applications to access, organise and share relevant information in effective ways

Assessment Requirements for BSBWHS503 Contribute to the systematic management of WHS risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify, interpret and apply information from a range of sources to contribute to the development, implementation, monitoring and evaluation of a systematic approach to work health and safety (WHS) risk management
- apply WHS Acts, regulations codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks
- identify duty holders
- explain the differences between a hazard and a risk and identify hazards and risks in the organisation
- prepare an action plan to implement a systematic approach to WHS risk management
- prepare positive performance indicators for evaluation of a systematic approach to WHS risk management
- consult effectively with relevant stakeholders.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formal and informal communication and consultation processes, and key personnel related to communication, including duty holders
- explain how the characteristics and composition of the workforce impact on WHS risk and the management of WHS with reference to:
  - communication skills
  - cultural background/diversity
  - gender
  - labour market changes

© Commonwealth of Australia, 2025 Skills Insight

  - language, literacy and numeracy
  - structure and organisation of the workforce, for example part time, casual and contract workers, shift rosters, geographical location
  - workers with specific needs and limitations
  - workplace culture towards alcohol and other drug use
- describe internal and external sources of WHS information and data, and explain how to access these sources
- outline the limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- describe the nature of workplace processes including work flow, planning and control and hazards relevant to the workplace
- describe organisational behaviour and culture as it impacts on WHS, change and the work team
- describe the key features of organisational WHS policies, procedures, processes and systems
- identify other functional areas in the organisation that impact on the management of WHS
- outline the key features of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material
- describe the key principles and/or practices of:
  - a systematic approach to managing WHS
  - duty of care including concepts of causation, foreseeability and prevention
  - incident causation and injury processes
- describe risk analysis and assessment techniques and tools, and their application and limitations
- explain risk, as the effect of uncertainty, on objectives
- explain the duty of persons conducting businesses or undertakings (PCBUs) in regard to risk management under WHS legislation
- describe the sources of occupational disease and their prevention
- describe standard industry controls for hazards
- describe techniques, tools and processes for identifying and controlling health and safety hazards and risks including :
  - hazard and risk checklists
  - hazard hunts
  - job safety analysis
  - manifests and registers including dangerous goods, hazardous chemicals and plant
  - safe work method statements
  - surveys using questionnaires, interviews and other survey techniques
  - workplace inspections and walk throughs
- describe the key features of the toxicology of hazardous chemicals and potential health effects in the workplace.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant WHS legislation, standards, codes of practice and guidelines
- workplace policies and procedures and documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select and use computer software and organise electronic information and data.

It applies to individuals who apply a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and use technology	1.1 Select appropriate technology and software applications to achieve requirements of the task 1.2 Adjust workspace, furniture and equipment to suit user's ergonomic requirements 1.3 Use technology according to organisational requirements and in a way that promotes a safe work environment
2. Process and organise	2.1 Identify, open, generate or amend files and records according

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
data	to task and organisational requirements 2.2 Operate input devices according to organisational requirements 2.3 Store data appropriately and exit applications without damage to or loss of, data 2.4 Use manuals, training booklets and/or online help or helpdesks to overcome basic difficulties with applications
3. Maintain technology	3.1 Identify and replace used technology consumables in accordance with manufacturer's instructions and organisational requirements 3.2 Carry out and/or arrange routine maintenance to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements 3.3 Identify equipment faults accurately and take action in accordance with manufacturer's instructions or report fault to designated person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.1, 2.2, 2.4, 3.1-3.3	• Recognises and interprets information from familiar sources to determine job role and task requirements
Writing	2.1, 2.3, 3.2, 3.3	• Produces and amends files to meet task and organisational requirements • Completes required documentation using organisational formats
Oral Communication	3.3	• Uses specific and relevant language to refer faults to others
Navigate the world of work	1.2, 1.3, 2.1, 2.2, 3.1-3.3	• Recognises and follows legislative requirements and organisational policies and procedures associated with own role
Get the work done	1.1, 1.3, 2.1-2.4, 3.1-3.3	• Uses business technologies and systems safely, when gathering, storing, accessing and sharing information • Understands purposes, specific functions and key

Assessment Requirements for BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select and use technology safely and according to organisational requirements
- access, retrieve and store required data
- demonstrate basic maintenance on a range of equipment using manuals or help-files
- identify and address faults according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisation's work health and safety requirements
- outline the organisation's requirements for file naming and storage
- explain why regular back-ups of data are done
- list 'routine maintenance' tasks
- summarise the procedure for addressing equipment faults.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- electronic files and data
- workplace documentation and equipment manuals
- case studies and, where possible, real situations

BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

This unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise and complete own work schedule	1.1 Ensure that work goals, objectives or Key Performance Indicators (KPIs) are understood, negotiated and agreed in accordance with organisational requirements 1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes 1.3 Identify factors affecting the achievement of work objectives and incorporate contingencies into work plans 1.4 Use business technology efficiently and effectively to manage

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	and monitor scheduling and completion of tasks
2. Monitor own work performance	2.1 Accurately monitor and adjust personal work performance through self assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs 2.2 Ensure that feedback on performance is actively sought and evaluated from colleagues and clients in the context of individual and group requirements 2.3 Routinely identify and report on variations in the quality of and products and services according to organisational requirements 2.4 Identify signs of stress and effects on personal wellbeing 2.5 Identify sources of stress and access appropriate supports and resolution strategies
3. Co-ordinate personal skill development and learning	3.1 Identify personal learning and professional development needs and skill gaps using self assessment and advice from colleagues and clients in relation to role and organisational requirements 3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel 3.3 Access, complete and record professional development opportunities to facilitate continuous learning and career development 3.4 Incorporate formal and informal feedback into review of further learning needs

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1-3.4	• Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences
Reading	1.1, 1.2, 2.1	• Interprets textual information to determine organisation's procedures, own work performance and objectives

© Commonwealth of Australia, 2025 Skills Insight

Writing	1.3, 1.4, 2.3, 3.1, 3.2, 3.3	• Prepares written reports and workplace documents that communicate information clearly and effectively
Oral Communication	2.2, 2.3, 3.1, 3.2	• Clearly gives and receives feedback using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.3	• Understands responsibilities and scope of role and complies with organisational policies, procedures and protocols
Interact with others	1.1, 2.2, 2.3, 3.1, 3.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Fosters and nurtures a culture of constructive and respectful feedback • Proactively collaborates with others to achieve specific goals
Get the work done	1.2, 1.3, 1.4, 2.4, 2.5, 3.2	• Plans and organises work commitments to ensure deadlines and objectives are met • Uses formal analytical thinking techniques to recognise and respond to routine problems • Uses digital systems and tools to enter, store and monitor information

Assessment Requirements for BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives 2.2 Use technology efficiently and effectively to manage work priorities and commitments 2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to
3. Develop and maintain professional competence	3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans 3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence 3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence 3.4 Participate in networks to enhance personal knowledge, skills and work relationships 3.5 Identify and develop new skills to achieve and maintain a competitive edge

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	• Investigates and uses a range of strategies to develop personal competence
Reading	1.2, 3.1, 3.2	• Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning
Writing	3.2	• Uses feedback to prepare reports that summarise ways to improve competence
Oral Communication	3.2	• Uses active listening and questioning to seek and receive feedback
Navigate the world of work	1.2, 2.1	• Understands how own role contributes to broader organisational goals • Considers organisational protocols when planning own career development

© Commonwealth of Australia, 2025 Skills Insight

Interact with others	1.1, 3.2, 3.4	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to establish and build positive working relationships with others
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1	• Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare • Identifies and uses appropriate technology to improve work efficiency

Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - a personal development plan
  - personal goal setting
  - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation’s policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish team performance plan	1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives 1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team 2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2 Support the team in identifying and resolving work performance problems 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders
4. Liaise with stakeholders	4.1 Establish and maintain open communication processes with all stakeholders 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 4.4	• Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.1, 2.3, 3.1, 4.1, 4.2, 4.3	• Engages in discussions or provides information using appropriate vocabulary and non-verbal features • Uses listening and questioning techniques to confirm understanding and to engage the audience
Navigate the world of work	1.1, 2.1, 2.2, 3.3	• Understands how own role contributes to broader organisational goals • Modifies or develops policies and procedures to achieve organisational goals
Interact with others	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2, 4.3	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to gain trust and confidence of team and provides feedback to others in forms that they can understand and use • Adapts personal communication style to build positive working relationships and to show respect for the opinions, values and particular needs of others • Plays a lead role in situations requiring effective collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others
Get the work done	1.2, 2.1, 2.2, 2.4, 3.2, 4.1, 4.3, 4.4	• Develops, implements and monitors plans and processes to ensure team effectiveness • Monitors and actively supports processes and development activities to ensure the team is focused on work outcomes • Plans for unexpected outcomes and implements creative responses to overcome challenges

Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
  - encouraging and fostering shared understanding of purpose, roles and responsibilities
  - identifying and resolving problems
  - providing feedback to encourage, value and reward others
  - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

© Commonwealth of Australia, 2025 Skills Insight

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWRK506A Coordinate research and analysis

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to coordinate and undertake major research projects on behalf of the union. It covers planning research, coordinating and undertaking the research process, managing information systems, compiling reports and evaluating the research process. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals with a well established, sound theoretical knowledge base in unionism and industrial relations who provide leadership to members and staff in the union workplace. They carry high levels of responsibility and work at a senior level in the organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and implement a project plan to undertake research activities	1.1. Define and agree ***research project*** objectives and timeframes 1.2. Plan research process and implement in accordance with union policies and procedures 1.3. Ensure agreed project phases, approval and review points are implemented to accommodate all project management function requirements 1.4. Evaluate research process and report in relation to established project baselines to provide appropriate measures of performance
2. Coordinate and undertake the research process	2.1. Define information needs based on work objectives and organisational requirements 2.2. Identify and allocate appropriate resources 2.3. Allocate tasks to identified staff and gain support for the project 2.4. Develop ***strategies*** to acquire required information 2.5. Communicate the methods and aims of the research clearly 2.6. Research information in a timely and thorough way and within resource allocation 2.7. Monitor progress of research project and adjust to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	respond to internal and external factors
3. Analyse information and apply the results of analysis	3.1. Ensure ***specialist data and information*** is collected, consolidated and analysed to recommend outcomes and to advise trends to senior staff 3.2. Develop appropriate analytical techniques and processes, and apply to information in order to achieve defined objectives and meet requirements 3.3. Analyse information to identify facts, issues, patterns, interrelationships and trends 3.4. Undertake all work in a timely manner and meet defined standards of the union
4. Manage information systems	4.1. Maintain ***information systems*** so that data and system integrity is guaranteed 4.2. Maintain a range of standard and complex information systems and applications in accordance with organisational standards 4.3. Integrate information in a timely and coherent manner
5. Compile reports from information analysis	5.1. Use the findings from the analysis to provide advice and to develop policies and solutions which meet organisational requirements 5.2. Ensure reporting of results from analysis of information includes predictions, assumptions and constraints 5.3. Ensure reporting of results and analysis of information is logically sequenced, concise and clear
6. Evaluate the research process	6.1. Identify and communicate criteria for evaluating the effectiveness of research project and phases 6.2. Implement and monitor key measurements to evaluate the effectiveness of research processes 6.3. Debrief all staff involved in research project on progress and outcomes 6.4. Use appropriate strategies to ensure project outcomes are used effectively

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• high level research and analytical skills • project management skills • technology skills to store data and to manage information • well developed writing skills.
Required knowledge
• regional, national and international legislation and regulations relating to industrial relations, occupational health and safety (OHS), vocational education and training, equal opportunity and discrimination, trade practices • industry knowledge • union policies and procedures.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • documented research project plan, with research objectives, and the outcomes of the research project which meet the stated objectives • examples of how information and data in the union is effectively gathered and managed • knowledge of the industry/s involved in the research.
Context of and specific resources for assessment	Assessment must ensure: • access to a range of research documentation • access to systems for gathering and storing data and information.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of agreedresearch project objectives and timeframes • oral or written questioning to assess knowledge of union policies and procedures • assessment of written reports • review of strategies developed to acquire required information • evaluation of how the methods and aims of the research were communicated.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other workplace relations units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Research projects could involve:	• analysis of industry specific trends, statistics and issues • comparative national and international developments • information and analysis needed to develop a campaign, strategic plan, industry or sector plan and strategy, or to bargain effectively with employers • information and analysis to conduct a strategic comprehensive corporate or community campaign
Strategies could include:	• commissioned research • computer- or web-based research

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• establishing expert or pre-eminent opinions • joint/collaborative work with academics, economists, social researchers, political parties, international agencies and industry groups • use of focus groups, polls and surveys
Specialist data and information could include:	• information for a specific cultural or gender perspective • information, research and data in relation to corporations and inter-related bodies and connections within an industry and the economy • labour market, industry and employment statistics and related research • OHS statistics and related research • political and community polling around specific policy issues • vocational education and training statistics and related research
Information systems may involve:	• databases and the use of spreadsheets, graphs, trend and time series, and mathematical equations

BSBWRT401 Write complex documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan documents, draft text, prepare final text and produce documents of some complexity.

It applies to individuals who work in a range of business environments and are skilled in the creation of reports, information and general promotion documents that are more complex than basic correspondence, memos or forms and that require review and analysis of a range of information sources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Writing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan documents	1.1 Determine the purposes of documents 1.2 Choose appropriate formats for documents 1.3 Establish means of communication 1.4 Determine requirements of documents 1.5 Determine categories and logical sequences of data, information and knowledge to achieve document objectives

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.6 Develop overview of structure and content of documents
2 Draft text	2.1 Review and organise available data, information and knowledge according to proposed structure and content 2.2 Ensure data, information and knowledge is aggregated, interpreted and summarised to prepare text that satisfies document purposes and objectives 2.3 Include graphics as appropriate 2.4 Identify gaps in required data and information, and collect additional material from relevant enterprise personnel 2.5 Draft text according to document requirements and genre 2.6 Use language appropriate to the audience
3 Prepare final text	3.1 Review draft text to ensure document objectives are achieved and requirements are met 3.2 Check grammar, spelling and style for accuracy and punctuation 3.3 Ensure draft text is approved by relevant enterprise personnel 3.4 Incorporate revisions in final copy
4 Produce document	4.1 Choose basic design elements for documents appropriate to audience and purpose 4.2 Use word processing software to apply basic design elements to text 4.3 Check documents to ensure all requirements are met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.4, 3.1, 3.2, 4.3	• Interprets information to identify requirements and prepares material suitable to target audience and environment • Proofreads texts for accuracy
Writing	1.6, 2.2, 2.3, 2.5,	• Creates documents for a specific audience using cohesive and well-structured language to convey

© Commonwealth of Australia, 2025 Skills Insight

	2.6, 3.2, 3.4, 4.1	detailed and accurate information • Ensures vocabulary, layout and grammatical arrangement achieves meaning and intent of document
Oral Communication	1.1, 1.4, 2.4, 3.3	• Obtains information or clarifies requirements by asking questions and listening
Navigate the world of work	1.4, 4.3	• Adheres to organisational policies and procedures related to document production
Interact with others	1.1, 1.4, 1.5, 2.4, 3.3	• Follows accepted communication practices and protocols when seeking advice about documents from colleagues, supervisors and managers
Get the work done	1.1-1.6, 2.1-2.5, 3.3, 4.1-4.2	• Plans, organises and implements tasks required to produce documents • Makes decisions based on standard procedures, using more formal decision making processes where required • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBWRT401 Write complex documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, draft and finalise complex documents that require review and analysis of a range of information sources
- use business technology to apply formatting, and incorporate graphics
- edit the draft text to ensure accuracy and clarity of information, obtain feedback on the draft and revise the draft
- apply the enterprise style guide/house style.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the enterprise style guide/house style
- outline formatting styles and their impact on formatting, readability and appearance of documents
- explain rules and conventions for written English, as defined by general and specialist sources.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources
- organisational policies and procedures
- organisational style guides.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy NVR/AQTF assessor requirements.

CPCCBC4001A Apply building codes and standards to the construction process for low rise building projects

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to access, interpret and apply relevant building codes and standards applicable to the construction processes of residential and low rise commercial buildings (low rise' licensing classification with reference to Class 1 and 10 construction and Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

To successfully construct low rise buildings requires a thorough knowledge of the purpose and content of the Building Code of Australia (BCA), coupled with the ability to interpret other codes and standards related to a specific building.

Application of the Unit

Application of the unit

This unit of competency supports builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards in the residential and commercial construction industry.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and interpret relevant code and standard requirements.	1.1. Relevant performance requirements from the BCA that apply to individual projects (described as ***low rise***) are identified. 1.2. Requirements of relevant BCA deemed-to-satisfy (DTS) provisions are determined. 1.3. Requirements of relevant Australian standards referenced in the BCA are accessed and interpreted accordingly.
2. Classify buildings.	2.1. Nature of a building is determined according to its use and arrangement. 2.2. BCA criteria to determine the defined classification are applied. 2.3. BCA requirements for multiple classification are identified and interpreted.
3. Analyse and apply a range of solutions to a construction problem for compliance with the	3.1. Range of criteria that will ensure that construction methods comply with BCA performance requirements is determined. 3.2. Alternative solutions to a design or construction problem that will comply with BCA requirements are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
BCA.	discussed and proposed in accordance with company policies and procedures. 3.3. Performance-based solutions are identified and documented in accordance with BCA requirements. 3.4. ***Assessment methods*** referenced in the BCA to determine whether a building solution complies with ***performance requirements*** or DTS provision of the BCA are analysed and applied. 3.5. Relevant documentation is identified and completed in accordance with BCA requirements.
4. Apply fire protection requirements.	4.1. Passive and active fire control elements for low rise building required by the BCA and other legislation are identified and applied. 4.2. Level of fire resistance required for the construction of various low rise buildings is determined. 4.3. Check of existing buildings for compliance with passive and active fire protection requirements is carried out in accordance with BCA requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- analysis and interpretation skills relating to documentation from a wide range of sources, including BCA and referenced documents
- application of design concepts and principles in accordance with BCA, namely:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction
- attention to detail in applying building codes and standards
- communication skills to:
  - discuss and propose alternative solutions
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- read and interpret:
  - documentation from a variety of sources, including BCA and referenced documents
  - drawings and specifications
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- written skills to complete documentation in accordance with BCA requirements
- numeracy skills to interpret and apply mathematical information included in building codes and standards.

Required knowledge

Required knowledge for this unit is:

- basic design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- BCA performance hierarchy
- definitions and common technical terms or usage specified under general provisions of BCA
- general nature of materials and the effects of performance
- relevant Australian standards
- relevant legislative and OHS requirements, codes and practices
- types of working drawings and specifications
- understanding of the BCA relating to:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by the application of design principles and solutions specified in BCA performance requirements or DTS provisions applicable to a building project. This unit of competency can be assessed in the

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with organisational quality procedures and processes • apply and interpret relevant documentation and codes • accurately apply BCA performance requirements relating to the design and construction of a building • understand assessment methods available to determine compliance with the BCA • identify faults and problems and proposed action to rectify.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • access to BCA and relevant documents referenced in the BCA • access to relevant legislation • project documentation, including design brief, design drawings, specifications, construction schedules and other supporting documents • research resources, including product information and data • relevant computer software package and suitable hardware. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Low rise is described as falling within the BCA classes:	• Class 1 and 10 • Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.
Assessment methods include:	• comparison with BCA DTS provisions • evidence of suitability as described in the BCA • expert judgement as defined in the BCA • verification method as defined in the BCA.
Performance requirements include:	• performance requirements contained within other legislation applicable to a specific project • performance requirements of the BCA determined to be relevant to a specific project • performance-based contractual requirements that must be fulfilled by any party.

CPCCBC4004A Identify and produce estimated costs for building and construction projects

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to establish the estimated costs associated with the acquisition of materials and labour on building and construction sites, together with the application of relevant overhead costs and margins. Knowledge of physical resource and supplier identification, assessment of the availability of and requirements for skilled labour and application of appropriate codes, regulations and approvals gaining processes is essential.

Application of the Unit

Application of the unit This unit of competency supports the needs of estimators, builders, managers and trade contractors within the construction industry responsible for producing estimated costs for labour, materials, overheads and on-costs on various residential and commercial construction projects within their scope of work as a trade contractor or builder.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Read and interpret plans and specifications.	1.1. Appropriate plans and drawings are correctly identified. 1.2. Project ***plans and specifications*** are read and understood. 1.3. Levels, heights, gradients and other measurements are interpreted. 1.4. Measurements are made and quantities identified from plans and specifications that conform to standard industry practice.
2. Identify and calculate labour costs.	2.1. Types and numbers of appropriate on-site personnel are identified and the time required on site is estimated. 2.2. Labour hours for non-contract elements of on-site work are calculated. 2.3. Costs or rates for required on-site work are calculated.
3. Identify and establish physical resource requirements.	3.1. Physical resource requirements are identified. 3.2. Lists of materials are produced and quantities calculated. 3.3. Quantities are established against project or standard construction contracts. 3.4. Supplier prices for materials and consumables are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	obtained. 3.5. Plant or equipment requirements are identified and costed.
4. Develop estimated project costs.	4.1. Appropriate labour rates and material costs are selected and applied. 4.2. Estimates of ***unit costs*** are determined and applied as appropriate. 4.3. Costs to the project of WorkCover, Environmental Protection Agency (EPA) requirements, seeking approvals, waste management site fees and other statutory or additional costs are identified and applied. 4.4. Company overhead recovery and margins are applied. 4.5. Completed estimated ***project costs*** are calculated for inclusion in a tender or bill.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret drawings and specifications
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- contractual arrangement problem solving
- estimate labour and materials costs from written information
- numeracy skills to calculate labour hours and costs, material quantities and costs
- use appropriate costing software programs.

Required knowledge

Required knowledge for this unit is:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- how to access and interpret:
  - national codes, including Building Code of Australia (BCA) and the Plumbing Code of Australia
  - Australian standards relevant to the industry sector
- includes state or territory and local government building and construction codes, standards and government regulations relevant to the form of building or construction being undertaken (e.g. WorkCover and EPA)
- types of building and construction drawings and specifications
- types, scope and usage of labour through the employee and subcontractor systems
- operation and structure of the organisation's costing and contracting system.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by the preparation of a detailed estimate of labour, materials and other project costs as part of the preparation of a tender or bill for a residential or commercial construction project relevant to the specific trade or sector. This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify materials required for a project • gather information about material supply • interpret measurements and calculate quantities and costs

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	• plan and allocate human resources • identify and cost other related costs, such as those required to meet statutory and planning approval processes • produce documentation that meets the timeframes and quality standards established by the organisation • communicate effectively, both verbally and in writing.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • documentation that should normally be available in either a building or construction office • relevant codes, standards and government regulations • office equipment, including calculators, photocopiers and telephone systems • computers with appropriate software to view 2-D CAD drawings, run costing programs and print copies • a technical reference library with current publications on measurement, design, building construction and manufacturers' product literature • a suitable work area appropriate to the construction process. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Plans and specifications include:

- building codes
- materials lists and quantity schedules
- materials specifications
- sketches or drawings
- statements of requirements.

Plant or equipment requirements include:

- communications equipment
- conveyors
- heavy equipment, such as wheeled and tracked earthmoving equipment, trucks and articulated vehicles
- hoists
- mobile and tower cranes
- on-site equipment, such as:
  - compressors
  - pumps
  - generators
  - portable lighting
  - lifting equipment
  - portable compaction equipment.

Unit costs may include the cost of:

- construction cost per square metre
- installation of pipes per metre
- installation of sanitary ware per unit
- laying of foundation per metre
- laying of slabs per square metre
- laying of steel tray roofing per square metre
- masonry walls per square metre
- painting per square metre
- tiling per square metre.

Project costs include:

- building or construction materials
- communications costs
- cost of meeting statutory requirements, e.g. EPA

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

- fuels, lubricants and consumables
- organisational and subcontract labour hours
- overheads
- project administration costs
- site facilities, such as:
  - offices
  - toilets
  - lunch rooms
- waste removal fees.

standard costs.	into site files. 5.2. Changes to standard plans, specifications and cost files are included in site files.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - communicate information effectively within the organisation and to external agencies and the client
  - read and interpret:
    - contracts
    - drawings and specifications
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - written skills to:
    - prepare and maintain site files
    - produce schedules and orders
- identify and analyse relevant information
- numeracy skills to apply calculations.

Required knowledge

Required knowledge for this unit is:

- operation and structure of the organisation's costing and contracting system
- state or territory building and construction codes, standards and regulations relevant to the form of building or construction being undertaken
- types of building or construction drawings and specifications commonly used in the industry
- types, scope and usage of labour through the employee and contractor systems.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by the preparation of schedules for materials and labour for a building project.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- identify materials required for the project and gather supply information effectively
- plan and allocate human and physical resources
- produce documentation that meets the timeframes and quality standards established by the organisation
- communicate information effectively within the organisation and to external agencies and the client, as required.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in a building or construction office

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- relevant codes, standards and regulations
- office equipment, including calculators, photocopiers and telephone systems
- computers with appropriate software to view 2-D CAD drawings, run costing programs and print copies
- a technical reference library with current publications on measurement, design, building construction and manufacturers' product literature
- a suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - communicate by telephone
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - research and evaluate information and circumstances surrounding a business dispute
  - read and interpret relevant legislation
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
  - written skills to:
    - complete checklists
    - send emails and faxes
    - write memos and reports
- negotiation relevant to dispute resolution situations
- problem solving in the context of dispute resolution
- research and evaluate information and circumstances surrounding a business dispute.

Required knowledge

Required knowledge for this unit is:

- contractual and business frameworks underpinning the building and construction industry
- mores, values and attitudes of various groups in the community that should be accounted for in discussions
- possible reactions from persons under pressure, such as anger and withdrawal.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by developing a set of dispute resolution procedures and demonstrating how these would apply to a selection of disputes.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- identify the nature of the dispute and the identity of the parties to the dispute
- document the details of the dispute in sufficient terms for an unambiguous evaluation of the issues to occur
- identify and follow established dispute resolution procedures
- develop and implement dispute resolution procedures, where there are none established.
- understand need to remain completely impartial in any involvement in a dispute.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in either a building, construction or civil contracting office

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- relevant codes, standards and government regulations
- suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Dispute resolution procedures include:

- arbitrated decisions
- common law outcomes
- litigated decisions
- mutual resolution
- on-site negotiations
- reference to contractual obligations.

Cause of business disputes includes:

- contract payment issues
- different opinions about design, structural layout or dimensions
- dissatisfaction with project progress
- structural finish, quality, materials or construction methodology.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions and operational details are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation*** purposes. 1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies. 1.3. Signage and barricade requirements are identified and implemented. 1.4. ***Tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. 1.5. Material quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***. 1.6. ***Materials*** appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use. 1.7. ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2. Manually handle, sort and stack carpentry materials and components.	2.1. Carpentry materials for ***handling*** are moved to specified location, applying safe manual handling techniques. 2.2. Carpentry materials and components are sorted to suit material type and size, stacked for ease of identification and retrieval and for task sequence and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	job location in accordance with job specifications. 2.3. Carpentry materials and components are ***protected*** against physical and water damage and stored clear of access ways, and for ease of identification, retrieval and distribution.
3. Prepare for mechanical handling of materials.	3.1. Carpentry materials and components are stacked/banded for mechanical handling in accordance with the type of material and plant or equipment to be used. 3.2. Carpentry materials and components are loaded, unloaded, moved or located at specified location.
4. Clean up.	4.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification. 4.2. ***Hazardous materials*** are identified for separate handling. 4.3. ***Non-toxic materials*** are removed using correct procedures. 4.4. ***Dust suppression*** procedures are used to minimise health risk to work personnel and others. 4.5. Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

    - documentation from a variety of sources
    - plans, specifications and drawings
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos characteristics and reporting requirements
- carpentry material handling techniques
- construction terminology
- hazardous materials found in construction work sites
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- material sizes
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements and types of carpentry materials
- types, characteristics, uses and limitations of tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and procedures, including quality requirements • safely and effectively use tools and equipment • communicate and work effectively and safely with others • safely handle, sort and stack varying lengths of timber, providing quick access and use • safely move and stack a given quantity of sheet material • safely handle carpentry components for one carpentry project.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured

EVIDENCE GUIDE

	learning experience must include a combination of direct, indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to handling carpentry materials
- relevant Australian standards
- safe work procedures related to handling carpentry materials
- signage
- verbal or written and graphical instructions

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• work bulletins • work schedules.
Planning and preparation include:	• work site inspection • equipment defect identification • assessment of conditions and hazards • determination of work requirements.

Safety (***OHS***) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:	• emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
	• handling of materials
	• hazard control
	• hazardous materials and substances
	• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
	  • earth leakage boxes
	  • lighting
	  • personnel
	  • power cables, including overhead service trays, cables and conduits
	  • restricted access barriers
	  • surrounding structures
	  • traffic control
	  • trip hazards
	  • work site visitors and the public
	  • working at heights
	  • working in confined spaces
	  • working with dangerous materials
	• organisational first aid
	• personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
	• use of firefighting equipment
	• use of tools and equipment
	• workplace environment and safety.

Tools and equipment include:	• banders • hammers • pallets • pinch bars • tin snips

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• wheelbarrows.
Quality requirements include relevant regulations, including:	• Australian standards • internal company quality policy and standards • manufacturer specifications, where specified • workplace operations and procedures.
Materials include:	• bricks and concrete masonry units • concrete components • glass • insulation • joinery units • metal sheeting • paints and sealants • plaster or fibre cement sheeting • reconstituted timber products • reinforcement materials • scaffolding components • structural steel sections and components • timber.
Environmental requirements include:	• clean-up protection • noise and dust • waste management.
Statutory and regulatory authorities include:	• federal, state and local authorities administering applicable Acts, regulations and codes of practice.
Handling includes:	• handling activities may require assistance of others where size or weight is a factor • manual handling, which includes using pallets, carrying materials using correct lifting techniques and control of waste • preparing for mechanical handling, which includes forklifts, pallet jacks and trucks • procedures such as MSDS, calculating quantities, and stacking and storing of materials.
Protected includes:	• correct handling and stacking techniques without damaging the material • protecting with covers.
Hazardous materials include:	• coatings • glues • inflammable materials • solvents.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Non-toxic materials include:	• general carpentry materials with appropriate labelling.
Dust suppression includes:	• keeping dust in the air to a minimum.

CPCCCA3006B Erect roof trusses

Modification History

Change to performance criterion

Equivalent to CPCCCA3006A

Added range item: solar panels

Unit Descriptor

This unit of competency specifies the outcomes required to select, set out, erect and brace roof trusses to accommodate roof coverings for waterproofing purposes. It includes gable, hip and valley, and hip roofing types.

Application of the Unit

This unit of competency supports achievement of skills to safely and efficiently erect pre-built roof trusses for gable, hip and valley, hip and flat roof construction projects, which includes working with others and as a member of a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1	Plan and prepare.	1.1	Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation*** purposes.
		1.2	***Safety (OHS)*** requirements are followed in accordance w**i**th safety plans and policies.
		1.3	Signage and barricade requirements are identified and implemented.
		1.4	Plant, ***tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.
		1.5	Material quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***.
		1.6	***Materials*** appropriate to the work application are identified, obtained, checked to ensure fitness for purpose, prepared, safely handled and located ready for use according to Australian standards.
		1.7	***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2	Erect roof trusses.	2.1	Location of ***roof trusses*** for ***hip and valley roofs*** are set out on wall top plates to plan layout and specifications.
		2.2	Steel frames are temporarily earthed during erection and are connected to permanent earthing system upon completion.
		2.3	Roof trusses are erected and fixed, including temporary bracing, to set out positions in correct sequence to line at apex and plumb.

© Commonwealth of Australia, 2025 Skills Insight

		2.4	Top chord is installed above wall plate to be constant height above wall plate.
		2.5	Ceiling trimming and creeper rafter members are fixed to specifications.
		2.6	Bottom chord of truss is used to provide lateral support for internal walls.
		2.7	***Roof bracing*** is provided through hip construction, valley construction, diagonal metal tension or timber bracing or a combination of these, and fixed to specification.
		2.8	Lateral restraints to truss chords are fixed in position to manufacturer specifications.
3	Clean up.	3.1	Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
		3.2	Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - plans, specifications and drawings
  - report faults

© Commonwealth of Australia, 2025 Skills Insight

  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- plant, tools and equipment types, characteristics, uses and limitation
- processes for the calculation of material requirements
- quality requirements for roof trusses
- roof bevels
- roof calculations for lengths, quantities and pitch
- roof load transfer
- roof shape and geometry
- roof truss erection and construction techniques
- roof truss materials and installation, including fire control and separation materials required by the National Construction Code (NCC) and other legislation
- roof types and truss components
- roofing regulations
- techniques for lifting and positioning of trusses
- temporary and permanent bracing
- timber types, structural properties and uses, including engineered timber products
- truss set out
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- set out and erect a roof comprising a minimum of one hip end, a valley and enough standard trusses to incorporate bracing for a full size roof in timber and metal.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity

© Commonwealth of Australia, 2025 Skills Insight

- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the

competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to erecting roof trusses
- relevant Australian standards
- safe work procedures related to erecting roof trusses
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Planning and preparation include:

- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.

© Commonwealth of Australia, 2025 Skills Insight

Safety (OHS) is to be in accordance with state or territory legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Tools and equipment include:

- air compressors and hoses
- clamps
- hammers
- marking equipment
- measuring tapes and rules
- nail bags
- nail guns
- power drills
- power leads
- power saws

© Commonwealth of Australia, 2025 Skills Insight

- saw stools
- scaffolding
- screwdrivers
- spanners
- spirit levels
- squares (combination/tri)
- string lines
- welding equipment.

Quality requirements include relevant regulations, including:

- Australian standards
- internal company quality policy and standards
- manufacturer specifications, where specified
- workplace operations and procedures.

Materials include:

- bolts
- bracing material
- nails
- patented fasteners
- screws
- slotted brackets for truss movement
- timber and metal trusses.

Environmental requirements include:

- clean-up protection
- noise and dust
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Roof trusses can be:

- timber or metal
- fixed to timber or steel wall plates.

Hip and valley roofs:

- include scotch valleys and hip ends
- may include Dutch gables.

Roof bracing includes:

- elementary bracing principles for various shaped roofs.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions are confirmed and applied using relevant ***information***. 1.2. ***Safety*** (***OHS***) requirements are obtained from site safety plan, other regulatory specifications or legal obligations, and are applied. 1.3. Measuring and calculating ***equipment*** selected to carry out tasks is consistent with job requirements, is checked for serviceability, and any faults are rectified or reported.
2. Obtain measurements.	2.1. Method of obtaining the measurement is selected and applied. 2.2. ***Measurements*** are obtained using a rule or tape accurate to 1mm. 2.3. Measurements, including ***areas and volumes***, are confirmed and recorded.
3. Perform calculations.	3.1. Appropriate ***calculation factors*** are determined and correct method is selected for achieving required result. 3.2. ***Material quantities*** for the project are correctly calculated using appropriate factors. 3.3. Results are confirmed and recorded.
4. Estimate approximate quantities.	4.1. Calculations for determining material requirements are taken. 4.2. Appropriate formulas for calculating quantities are selected. 4.3. Quantities are estimated from the calculations taken. 4.4. Material quantities for the project are calculated,

ELEMENT	PERFORMANCE CRITERIA
	confirmed and recorded within enterprise tolerances.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to record measurements, calculations and quantities
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements, calculations and geometry
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- basic calculators
- communication devices

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- company procedures
- construction terminology
- job safety analysis (JSA) and safe work method statements
- measuring, calculating, geometry and determination of quantities
- processes for care of measuring equipment
- project quality requirements
- site and equipment safety (OHS) requirements
- tolerances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information • comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations • comply with organisational policies and procedures, including quality requirements • safely and effectively use tools and equipment • communicate and work effectively and safely with others • complete measurements, calculations and determination of quantities for different projects of varying complexity in a range of contexts or occasions over time

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	• calculate each of the following using a realistic construction task or example:
	  • length
	  • perimeter
	  • circumference
	  • area
	  • volume
	  • number
	  • ratio
	  • percentage
	  • conversion of metres to millimetres and millimetres to metres
	  • measure using a rule or tape measure five separate tasks within 1mm accuracy.

Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:	• diagrams or sketches • instructions issued by authorised organisational or external personnel • manufacturer specifications and instructions • maps • material safety data sheets (MSDS) • memos • organisation's work specifications and requirements • plans and specifications • regulatory and legislative requirements • relevant Australian standards • safe work procedures or equivalent • signage • verbal or written and graphical instructions • work bulletins • work schedules.
Safety (***OHS***) is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan and may include:	• clothing and equipment • handling of materials • hazard control • hazardous materials and substances • organisational first aid • use of firefighting equipment • use of tools and equipment • workplace environment and safety.
Equipment includes:	• calculators and laser equipment • rulers • tape measures • trundle wheels.
Measurements are to:	• be in metric scale • cover all necessary calculations.
Areas and volumes include:	• calculating regular and irregular shapes, such as rectangles, squares, circles, triangles,

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	trapeziums, cubes, cones, pyramids and cylinders that represent calculations taken in a construction environment.
Calculation factors:	• include length, area, weight, height, width, depth, volume, mass, scales, ratios, perimeters, quantities, numbers, grade, percentages, addition, subtraction, multiplication and division • are to be performed manually and with the aid of a calculator.
Material quantities are to be:	• calculated in either packed, bulk, loose or compacted states • converted to volumes in the other states.

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

Application of the Unit

Application of the unit

This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. ***Site information*** is obtained and related to the task. 1.2. ***Hazard*** s and potential hazards associated with the slinging and directing of loads are identified. 1.3. ***Hazard control measures*** consistent with ***appropriate standards*** are identified to ensure the safety of personnel and equipment. 1.4. The weight, dimensions and centre of gravity of the load are identified and assessed. 1.5. Suitable lifting/slinging points on the load are identified. 1.6. Appropriate ***lifting equipment*** needs are assessed. 1.7. Appropriate ***communication methods*** are assessed with ***crane***/ operators and other ***appropriate personnel***. 1.8. Manufacturer's specifications/information is obtained for special loads where necessary.
2. Select and inspect equipment.	2.1. Lifting equipment appropriate to the task is selected. 2.2. Lifting equipment is inspected for serviceability. 2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected. 2.5. Appropriate ***communication equipment*** is selected and its serviceability is checked. 2.6. Appropriate ***personal protective equipment*** (PPE) is selected and checked.
3. Prepare site and equipment.	3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment. 3.2. Appropriate slinging method is selected. 3.3. Lifting equipment is prepared and assembled where appropriate. 3.4. Load destination is prepared.
4. Perform task.	4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques. 4.2. Lifting hook is positioned over the load centre of gravity. 4.3. Lifting equipment is attached and secured to the load in an appropriate manner. 4.4. Tag line is attached and secured where appropriate. 4.5. Test lift is conducted to ensure security of load. 4.6. Load is moved maintaining stability and control at all times. 4.7. Appropriate communication methods and ***communication signals*** are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator. 4.8. The load is landed to ensure that it is stable and secure from movement. 4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.	5.1. Unserviceable lifting equipment inspected and rejected. 5.2. ***Defective equipment*** is isolated and tagged. 5.3. Lifting equipment is stored in accordance with procedures and appropriate standards. 5.4. Hazard prevention/control measures are removed where appropriate. 5.5. Excess materials from the work area are removed (where applicable).

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations. • communicate and work safely with others in the work area. • apply Hazard prevention and control measures consistent with appropriate standards. • apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/ operator, moving four loads of varying shapes, sizes and weights. • use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend. • conduct pre and post operational checks of the lifting equipment.
Context of and specific resources for assessment	• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument • Assessment of performance must be

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	undertaken either in the workplace or in a realistically simulated workplace setting
	• Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities
	• Applicants must have access to:
	  • personal protective equipment (PPE) for the purpose of the performance assessment.
	  • four different loads as prescribed in the endorsed assessment instrument
	  • lifting and associated equipment
	  • suitable slewing crane
	  • communication equipment (eg. fixed channel, two-way radios) as applicable.

Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment. Assessment may be in conjunction with the assessment of other units of competency. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site informationmay include but not be limited to	• local conditions such as access and egress • work method statements.
Hazards may include but not limited to:	• ground stability (eg. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes, trees, buildings, etc) • insufficient lighting • traffic (e.g. pedestrians, vehicles, plant) • weather (e.g. wind, lightning, storms) • other specific hazards (e.g. trip hazards, heights, radio interference, etc).
Hazard prevention/control measures	The systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of controls, including: 1. elimination. 2. substitution. 3. isolation. 4. engineered control measures. 5. safe work practices. 6. personal protective equipment.
Appropriate standard s may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Lifting Equipment may include but not limited to:	• fibre ropes • wire ropes • chain • wire and synthetic slings • shackles • eyebolts • beam clamps • plate clamps • spreader beams • lifting beams • pallet forks and cages • concrete kibbles • personnel boxes.
Communication Methods may include but are not limited to:	• written instructions • signage, • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol.
Cranes may include but not limited to:	• tower cranes (including self erecting) • portal boom cranes • vehicle loading cranes • slewing mobile cranes • non-slewing cranes • derrick cranes.
Appropriate personnel may include but are not limited to:	• supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.
Communication Equipment may include but not limited to:	• fixed channel two-way radios • whistles • bells.
Personal protective equipment (PPE) may include but not limited to:	• hard hat • safety boots • gloves • high visibility clothing • reflective vest • relevant breathing, hearing, sight, skin and sun protection.
Load destination may include but	• ground

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

not limited to:	• loading platforms • suspended floors • vehicles.
Communication signals may include but not limited to:	• stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle • telescope out - hand • telescope out - whistle • telescope in - hand • telescope in - whistle • slew left - hand • slew left - whistle • slew right - hand • slew right - whistle.
Defective Equipment may include but not limited to:	• excessive wear • damage • stretched • broken wires • cut/damaged fibres.

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and assess risks.	1.1. ***Hazards*** in the work area are identified, assessed and reported to ***designated personnel***. 1.2. Safety risks in the work area are identified, assessed and reported to designated personnel. 1.3. ***Safe work practices***, ***duty of care*** requirements and safe work instructions are followed for controlling risks. 1.4. OHS, hazard, accident or ***incident*** reports are contributed to according to workplace procedures and ***Australian government and state or territory OHS legislation*** and relevant ***information***.
2. Identify hazardous materials and other	2.1. ***Hazardous materials*** on a work site are correctly identified and, if appropriate, handled and used

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
hazards on work sites.	according to company and legislated procedures. 2.2. ***Measures for controlling risks*** and construction hazards are applied effectively and immediately. 2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate ***signs and symbols***. 2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.
3. Plan and prepare for safe work practices.	3.1. Correct ***personal protective equipment*** and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures. 3.2. Selection of ***tools***, ***equipment*** and ***materials***, and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures. 3.3. Required barricades and signage are determined and erected at the appropriate site location. 3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.
4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. ***Prohibited tools and equipment*** in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet ***environmental requirements***.
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	various ***types of fire*** and other emergencies are followed, including identification or use, if appropriate, of ***fire equipment*** within scope of responsibilities. 5.3. ***Emergency response and evacuation procedures*** are known, practised and carried out effectively when required. 5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
  - determine and report hazards and risks
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - MSDS, JSA and safe work method statements
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• working at heights.
Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:	• designated safety officers, determined by the enterprise, who have undertaken specific safety response training • managers or other senior personnel • personnel competent and/or licensed in the safe handling of asbestos • supervisors.

Safe work practices:	• include:
	  • day to day observation of OHS policies and procedures
	  • emergency procedures
	  • risk assessment
	  • use of basic firefighting equipment
	• relate to:
	  • access to site amenities, such as drinking water and toilets
	  • general requirements for safe use of plant and equipment
	  • general requirements for use of personal protective equipment and clothing
	  • housekeeping to ensure a clean, tidy and safer work area
	  • no drugs and alcohol at work
	  • preventing bullying and harassment
	  • smoking in designated areas
	  • storage and removal of debris.

Duty of care requirements:	• relate to:
	  • legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
	  • relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
	• may relate to:
	  • own responsibilities to comply with safe work practices, including activities that

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	require licences, tickets or certificates of competency.

Incidents include:	• accidents resulting in personal injury or damage to property
	• near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
	  • breathing apparatus malfunctioning to the extent that the user's health is in danger
	  • collapse of the floor, wall or ceiling of a building being used as a workplace
	  • collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
	  • collapse or partial collapse of a building or structure
	  • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
	  • damage to or malfunction of any other major plant
	  • electric shock
	  • electrical short circuit, malfunction or explosion
	  • uncontrolled explosion, fire or escape of gas, hazardous substance or steam
	  • any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:	• Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • JSA and safe work method statements • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Information includes:	• OHS and welfare Acts and regulations • safety codes of practice. • diagrams or sketches • emergency situation contacts • evacuation plans • instructions issued by authorised organisational or external personnel • labels • manufacturer specifications and instructions • memos • MSDS • organisation work specifications and requirements • plans and specifications • regulatory and legislative requirements, such as Acts, regulations and codes of practice • relevant Australian standards • reports of near misses or accidents • safe work procedures or equivalent documentation • safety meeting minutes • signage • verbal or written and graphical instructions • work bulletins • work schedules.
Hazardous materials include:	• ACM • cleaning chemicals, including those in pressurised containers • glues • insulation materials • solvents • treated timber products.
Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:	• elimination • substitution • isolation • engineering control • administrative control • personal protective equipment.
Signs and symbols include:	• emergency information signs (exits, equipment, first aid) • fire signs (location of fire alarms and

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	firefighting equipment) • hazard identification, facility or location signs • regulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning) • safety tags and lockout (danger tags, out of service tags) • site safety, directional, traffic and warning signs and symbols.
Asbestos-containing materials are identified:	• includes recognising common types of ACM that may be found in construction materials and buildings • covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.
Asbestos-containing materials are ***reported*** to:	• person in control of the workplace as set out in the relevant Asbestos Management Code.
Personal protective equipment is to include:	• aprons • arm guards • caps • dust mask/respirators • ear muffs/plugs • gloves • hard hats • high visibility retro reflective vests • jackets • overalls • safety glasses/goggles • steel capped boots • UV protective clothing and sunscreen.
Tools and equipment include:	• firefighting equipment • first aid kit • ladders and work platforms • personal protective equipment.
Materials include:	• first aid materials suitable for emergency first aid treatment of minor injuries.
Prohibited tools and equipment that cannot be used near identified	• high-speed abrasive power and pneumatic tolls, high pressure water cleaners, compressed

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

ACM include:	air or abrasive blasting • any vacuum cleaning equipment not specifically designed for safe work with asbestos.
Environmental requirements are to cover workplace quality management and include:	• clean-up protection • stormwater protection • waste management.
Types of fire includes:	• electrical, chemical, gas, mechanical, paper, wood or natural fire.
Fire equipment includes:	• breathing apparatus • fire extinguishers • fire hydrant and hoses • fire reel • fire truck • manual firefighting instruments, such as fire blankets.
Emergency response and evacuation procedures include:	• emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel • extinguishing fires, organisational first aid requirements and evacuation.

ELEMENT	PERFORMANCE CRITERIA
individuals and groups.	legislation through ***presentation of information***. 3.3. Information is provided to affected parties at an appropriate time and place and in ***an appropriate way***. 3.4. Interaction is undertaken in an orderly manner to ensure all viewpoints are canvassed.
4. Record, analyse and report results.	4.1. Responses are assessed and checked against the project brief. 4.2. Appropriate suggestions for improvement are incorporated into the project brief. 4.3. Accurate report is prepared, including recommendations for approval. 4.4. Overall effectiveness of the interaction is reviewed and evaluated, with action taken where required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to prepare information in alternative formats and to provide access to consultations for diverse groups through interpreters, etc.
- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
  - consult with the community, including provision of information about legislation
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret:
    - regulations
    - legislation
    - other relevant documentation
  - use and interpret non-verbal communication

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- written skills to:
  - record and report results of interaction with the community
  - prepare information
- innovation skills to identify and implement appropriate and diverse strategies for interacting with diverse communities
- organisational and time management skills to prepare information for meetings and to arrange and conduct meetings to timelines
- problem solving skills to review feedback and select appropriate suggestions for improvement for inclusion in report
- technological skills to:
  - complete documentation, including information materials and reports
  - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- effects and psychological theories relevant to working with clients in a regulated environment, such as:
  - social stratification
  - social change
  - technological change
- local factors affecting communities and individuals
- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- strategies for consultation
- urbanisation.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with OHS regulations applicable to workplace operations • apply organisational management policies and procedures, including quality assurance requirements where applicable • perform a management role in the identification and implementation of at least one client negotiation and consultation process or equivalent • provide reports to appropriate body/individual as determined by the project brief.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments. Validity and sufficiency of evidence requires that: • competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace • where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge • all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated

EVIDENCE GUIDE

	documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Interested and affected individuals and parties include:	• existing community groups • government agencies • individuals and special interest groups • private sector businesses • social groups and emergency services.
Interaction strategies include:	• client meetings • home and site visits • meetings of relevant stakeholders • surveys.
Relevant information and social theory include:	• awareness of diverse cultures • collective behaviour • deviance • economic order • inequality • political order social change and interaction • stratification • technology and the environment • the family • urbanisation.
Demographics include:	• age • ethnicity • gender • individual and group profiles • social stratification.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Appropriate to the needs of the parties involved involves:	• providing material in alternative formats, such as:
	  • large print
	  • other languages.

Presentation of information includes:	• computer simulations • display plans • graphics • handouts • models • software presentations • videos.
An appropriate way includes:	• taking into account access issues, such as parking or building access and cultural requirements or protocols • using assistive technology, for example telecommunication device for the deaf (such as TTY) or video captioning • using interpreters, including sign language interpreters.

CPCCSV5011A Apply building codes and standards to residential buildings

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to ensure that the building process complies with the Building Code of Australia (BCA) and relevant Australian standards.

The unit applies to residential buildings and includes the evaluation and interpretation of building requirements, classification of buildings according to the BCA criteria and strategies for compliance.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the understanding and skills to apply building codes and standards to residential buildings within the context of relevant legislation, the BCA and Australian standards.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the purpose and basic intent of the BCA.	1.1. Objectives of the BCA and the purpose of its respective components in relation to ***construction in residential buildings*** and ***building categories*** are evaluated and documented. 1.2. Deemed-to-satisfy (DTS) concept for construction to meet BCA requirements is evaluated and documented.
2. Locate and interpret code and standard requirements applicable to particular projects.	2.1. Clauses from the BCA that apply to particular ***residential building projects requiring review of compliance issues*** are identified and documented. 2.2. Prescriptive requirements of relevant BCA clauses and ***standard specifications*** are determined. 2.3. Requirements of Australian standards referenced in the BCA are identified and documented. 2.4. Special requirements that may be applicable to specific areas of ***building surveying procedures*** are identified and documented.
3. Classify buildings.	3.1. Nature of a building is determined in regard to its proposed use and site arrangement. 3.2. BCA criteria are applied to determine the defined classification.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.3. BCA requirements are interpreted for multiple classifications.
4. Apply solutions to construction problems for compliance with the BCA.	4.1. Criteria to ensure construction methods comply with the intent of the BCA are determined. 4.2. Alternative approaches to construction problems that comply with the requirements of the BCA are reported. 4.3. Assessment methods used to determine whether a building solution complies with performance requirements or DTS provisions of BCA are analysed and applied. 4.4. Assessment methods are confirmed and identified as appropriate to meet the DTS provisions of BCA.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - read and interpret:
    - Australian standards
    - BCA
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - written skills to:
    - document building requirements
    - report alternative approaches to construction problem
- innovation skills to develop compliant alternative solutions to construction

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

problems
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
  - complete documentation and calculations
  - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- BCA and primary referenced Australian standards
- criteria for Class 1 and 10 buildings
- design, construction and structural principles of buildings
- DTS provisions
- processes for the administration and preparation of documentation
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this	A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

EVIDENCE GUIDE

unit	• comply with OHS regulations applicable to workplace operations • apply organisational management policies and procedures, including quality assurance requirements where appropriate • classify construction in residential buildings through the evaluation and interpretation of compliance with the BCA and associated reporting of data, findings, recommendations and strategies for at least one residential building project or equivalent in compliance with relevant legislation • provide reports to appropriate body/individual as determined by the project brief.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

EVIDENCE GUIDE

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Construction in residential buildings includes:	• compliance with relevant legislation • design specifications • evaluation, interpretation and adherence to legislative requirements for BCA Class 1 and 10 buildings • maintenance specifications • relevant Australian standards.
Building categories include:	• low-rise residential buildings • single storey buildings.
Residential building projects requiring review of compliance issues include:	• calculation and processing of application or inspection fees • project milestones • provision of site access/facilities • work schedules.
Standard specifications include:	• developed or detailed specifications addressing specific components, such as structural or other requirements • industry standard specifications • preliminary and outline specifications.
Building surveying procedures include:	• mechanical, structural, electrical and other services.
