FWPWPP3216 Press material using the daylight process

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3216B Press material using the daylight process, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate a heat driven press system to compress chips, flakes or fibre using the daylight process.

The unit applies to production operators and technicians who press material using the daylight process in a forest and wood products factory setting and includes shutting down and cleaning equipment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for pressing	1.1 Review work order and where required check with appropriate personnel. 1.2 Select personal protective equipment and check for operational effectiveness. 1.3 Obtain type and quantity of chips, flakes or fibre for pressing.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Select pressing process in line with organisational procedures.
2. Press material	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Complete pre start-up equipment checks to ensure operational effectiveness. 2.3 Set press cycle times, pressures, temperatures and product parameters for production requirements. 2.4 Monitor pressed material and adjust position, feed rate, mat and press conditions accordingly. 2.5 Complete unload and reload cycles in line with organisational procedures. 2.6 Assess pressed material and thickness changes regularly and adjust former and press set-up to produce quality formed materials. 2.7 Check pressed material production regularly to ensure conformity with size requirements and work order.
3. Unload material	3.1 Open press in line with organisational safety procedures. 3.2 Separate material and forming equipment and remove from press using unloading equipment. 3.3 Load material into cooling receiver, trim check and unload. 3.4 Test material samples to confirm compliance with industry standards and check for defects. 3.5 Dispose of sub-standard material in line with environmental protection practices. 3.6 Transfer finished material for further processing in line with organisational procedures.
4. Shut down and clean equipment	4.1 Coordinate shutdown with other line operators in line with organisational safety procedures. 4.2 Strip and clean blending, press and handling equipment in line with manufacturer's instructions and environmental protection practices. 4.3 Check and clean press bars or stops, plates and screens. 4.4 Keep machine clear of dust and debris in line with organisational safety procedures. 4.5 Record and report production outcomes and equipment faults to appropriate personnel.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• identify quantities of required material within work orders and count amounts • read basic numerical machine settings to set temperature, pressure and cycle times • complete routine calculations to determine thickness of pressed materials and trim to specified dimension.
Oral communication skills to:	• ask questions and actively listen to clarify contents of work orders.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • work orders
	  • manufacturers' instructions.

Writing skills to:	• complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	• efficiently and logically sequence the stages of preparation and production using work order to guide activities.

Assessment Requirements for FWPWPP3216 Press material using the daylight process

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3216B Press material using the daylight process, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- compress material using the daylight process in line with individual work orders that prescribe different quantities; types of materials for compression include:
  - chips
  - fibre
  - flakes
- assess formed material for moisture content, weight, thickness, density and defects and adjust forming cycle times, pressures and temperatures to produce quality outputs
- after each of the above jobs, complete operator maintenance to clean equipment.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- typical flow of material supply in and out of the pressing area
- typical work flow processes and processing techniques used to compress material using formers and a heat driven press system

© Commonwealth of Australia, 2025 Skills Insight

- purpose, features and operation of equipment used to press material using the daylight process:
  - daylight process presses driven by steam pressure, including pneumatic or hydraulic loading and unloading equipment
  - pre-presses
  - formers
  - forming equipment:
- mats
- screens
- trays
- plates
  - press bars or stops
  - cooling receivers
  - blending equipment
  - trimming equipment
- appropriate cycle times, pressures and temperatures for the materials that can be compressed:
  - chips
  - fibre
  - flakes
- methods used to assess formed material for moisture content, weight, thickness, density and defects
- features of typical defects in formed materials:
  - surface blemishes
  - discolouration
  - natural timber defects
  - forming deformities
- methods used to strip and clean equipment
- organisational procedures specific to pressing material using the daylight process:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults.

Assessment Conditions

The following resources must be made available:

- tools and equipment for pressing material using the daylight process which must include at least one of the following:
  - daylight process presses driven by steam pressure
  - pre-presses

© Commonwealth of Australia, 2025 Skills Insight

  - formers
  - forming equipment which must include at least one of the following:
- mats
- screens
- trays
- plates
  - press bars or stops
  - cooling receivers
  - blending equipment
  - trimming equipment
- personal protective equipment suitable for pressing material using the daylight process
- commercial material to be compressed which must include at least one of the following:
  - chips
  - fibre
  - flakes
- manufacturers' instructions for use and cleaning of equipment
- work order with specific instructions for pressing material using the daylight process
- template documents for recording production outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for pressing material using the daylight process

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3217 Process production effluent

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3217B Process production effluent, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate the effluent plant and distribute waste water to pasture.

The unit applies to production operators and technicians who process production effluent in a forest and wood products factory setting and includes draining and cleaning equipment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare effluent plant	1.1 Select appropriate personal protective equipment and check for operational effectiveness. 1.2 Use equipment in line with organisational safety procedures, manufacturer’s instructions and environmental protection practices. 1.3 Set up pumping lines and check for operational effectiveness. 1.4 Pump treatment solution from mixing tank to effluent line, settling

© Commonwealth of Australia, 2025 Skills Insight

	pits and clarifier. 1.5 Run sludge from clarifier and drain water from sludge beds in line with organisational procedures and environmental protection practices.
2. Distribute water to pasture	2.1 Set flow rate and pump water to pasture area. 2.2 Check absorption and pH levels; monitor and adjust flow rate for optimal distribution.
3. Complete operator maintenance	3.1 Follow organisational safety procedures to lock out equipment. 3.2 Drain settling pits and clean to collection point. 3.3 Clean solids from discharge drain and dispose of in line with environmental protection practices. 3.4 Recirculate water from catchment area to irrigation. 3.5 Monitor dam banks for weed and vermin. 3.6 Keep effluent plant area clear of foreign bodies and debris in line with organisational safety procedures. 3.7 Record and report effluent processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure correct amount of treatment solution required for settling pits and clarifier • complete routine calculations to determine optimal flow rate for water distribution and pH levels.

Reading skills to:	• interpret:
	  • workplace health and safety and other organisational procedures
	  • safety data sheets
	  • manufacturers' instructions.

Writing skills to:	• complete accurate basic records for effluent processing and equipment faults.
Planning and organising skills to:	• efficiently and logically sequence the stages of effluent treatment and water distribution.
Problem-solving skills to:	• identify and dispose of foreign material • recognise faulty equipment and resolve by reporting or

© Commonwealth of Australia, 2025 Skills Insight

	rectifying.
Technology skills to:	• select and use appropriate personal protective equipment for processing production effluent • efficiently and safely operate and monitor mechanical pumps used for processing effluent.

Assessment Requirements for FWPWPP3217 Process production effluent

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3217B Process production effluent, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- process production effluent over two four hour shifts
- across those two shifts complete these activities:
  - treat production effluent
  - distribute treated water to pasture
  - drain and clean equipment and dispose of solids
  - complete basic written records of process outcomes and equipment faults.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable commonwealth, state, territory or local government regulations relevant to effluent discharge
- environmental protection practices for processing production effluent:
  - reducing energy use
  - distributing treated water with appropriate levels of acidity and alkalinity
  - monitoring presence of weeds and vermin
  - disposing of solids and hazardous substances
- purpose of treating effluent and distributing water to pasture
- typical work flow processes and effluent treatment techniques

© Commonwealth of Australia, 2025 Skills Insight

- properties, at a basic level of understanding, of treatment solutions used in effluent treatment
- range of acceptable levels of acidity and alkalinity in processed effluent to minimise environmental impacts on the local area
- purpose, features and operation of equipment used to process production effluent:
  - pumping lines
  - mixing tanks
  - effluent line settling pits
  - clarifiers
  - sludge beds
- methods used to:
  - safely handle chemicals used in the treatment process
  - drain and clean equipment
- organisational procedures specific to processing production effluent:
  - workplace health and safety with particular emphasis on equipment lock out, use of personal protective equipment and handling hazardous substances
  - communication reporting lines
  - recording and reporting process outcomes and equipment faults.

Assessment Conditions

The following resources must be made available:

- effluent processing and water distribution plant including:
  - pumping lines
  - mixing tanks
  - effluent line settling pits
  - clarifiers
  - sludge beds
- personal protective equipment suitable for processing production effluent
- treatment solution
- manufacturers':
  - safety data sheets
  - instructions for equipment use
  - recommendations for draining and cleaning equipment
- template documents for recording process outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for processing production effluent.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

FWPWPP3218 Plan and coordinate machining of panels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3218B Plan and coordinate machining of panels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to manage operational logistics for panel machining activities which includes planning cutting patterns and schedules for operators.

The unit applies to production operators and technicians who plan and coordinate machining of panels in a forest and wood products factory and also involves monitoring and evaluating processes and problems to determine and recommend improvements.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan machining operations	1.1 Interpret production orders and plan production of panel types and sizes. 1.2 Develop panel machining schedules to ensure optimum production outcomes.

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Plan and document cutting patterns to maximise output and minimise wastage. 1.4 Communicate all information to operators in line with organisational procedures
2. Coordinate panel cutting operations	2.1 Identify and record variations in panel condition and report to operators. 2.2 Assist operators to resolve machining problems. 2.3 Monitor panel cutting processes; assess effectiveness of cutting pattern and ability to maintain schedule. 2.4 Modify cutting patterns and schedules to ensure optimum performance and communicate changes to operators. 2.5 Ensure machined panels are directed to designated area for storage or transferred for further processing. 2.6 Direct processes for rejecting and disposing of sub-standard machined panels and off-cuts in line with organisational safety procedures and environmental protection practices. 2.7 Complete and maintain operating logs and cutting records in line with organisational procedures. 2.8 Investigate and record major processing and equipment faults and resolve or report to appropriate personnel.
3. Evaluate machining performance	3.1 Monitor and evaluate panel cutting operations and output to determine process improvements. 3.2 Analyse systematic problems with equipment and panel quality for potential to improve machining processes. 3.3 Document recommended process improvements and communicate to appropriate personnel in line with organisational procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• complete calculations to determine:
	  • panel amounts required to satisfy production orders
	  • optimum volume return from panels
	  • machining schedules considering human and equipment resource capacity.
	• complete routine production records involving dimensions, panel

© Commonwealth of Australia, 2025 Skills Insight

	profiles and quantities tallied against work orders. • analyse machining process data to measure performance of cutting operations.

Oral communication skills to:	• provide clear and unambiguous information to operators about:
	  • initial and changing cutting patterns and schedules
	  • requirements to dispose of sub-standard panels and off-cuts.

Reading skills to:	• interpret production orders.

Writing skills to:	• develop documents in a style and format easily understood by others:
	  • cutting patterns and schedules
	  • reports on systematic issues with machining processes, potential process improvements including rationale for recommendations
	• complete accurate basic records of cutting output and equipment faults.

Planning and organising skills to:	• source, collect and organise data to inform cutting schedules and process improvement reports • efficiently and logically manage operational logistics for machining activities.
Problem-solving skills to:	• assess machining processes during operation and take quick action to modify schedules to resolve output problems • investigate equipment faults, consider systematic issues and resolve • analyse production problems, consider various solutions and determine process improvements.
Teamwork skills to:	• take responsibility for coordinating a team of operators for effective machining operations.
Technology skills to:	• monitor and evaluate the operational effectiveness of machining equipment • use a computer, keyboard and software to prepare cutting patterns, machining schedules, and reports.

Assessment Requirements for FWPWPP3218 Plan and coordinate machining of panels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3218B Plan and coordinate machining of panels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan and coordinate panel machining operations for production jobs in line with different production orders for each job
- determine, document and communicate cutting patterns and schedules for each of the above jobs
- assess panel output during machining operations for:
  - size
  - volume recovery
  - quality finish
  - dimensional consistency
- monitor, assess and modify schedules in response to changing circumstances within each of the above production jobs
- complete operating logs and cutting records for each of the above production jobs
- complete a detailed report about systematic issues arising across the jobs covering problems with processes, equipment and panels including recommendations for process improvements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for machining panels:

© Commonwealth of Australia, 2025 Skills Insight

  - reducing water and energy use
  - disposing of, recycling and reusing timber and other waste
- operational capacity of panel machining equipment
- stages of the panel machining process
- typical flow of panel supply in and out of the machining area
- range of cutting patterns used on panels to achieve maximum output
- methods of determining cutting schedules to maximise:
  - equipment and labour use
  - volume return from panels
  - efficient handling of panels to be machined
- typical timber panel defects and how they affect ability to produce quality machined panels:
  - warp
  - wane
  - cupping
  - shakes
  - insect defects
  - knots
  - resin pockets
- methods used to:
  - assess panel cutting processes for quality of outcomes
  - diagnose and analyse systematic problems with equipment and panels
- format, content and use of:
  - cutting pattern documents
  - cutting schedules
  - operating logs and cutting records
  - process improvement reports
- organisational procedures specific to planning and coordinating panel machining operations:
  - communication reporting lines for operator team members and self
  - documenting cutting patterns, schedules and reports
  - recording and reporting systematic equipment faults.
  -

Assessment Conditions

The following resources must be made available:

- computers, keyboards, printers and software used to prepare planning and production documents
- machining production line with a continuous conveyor belt system
- saws which must include at least one of the following:

© Commonwealth of Australia, 2025 Skills Insight

  - manually controlled docking and trimming saws
  - band saws
  - bench saws
  - panel saws
  - saws with adjustable angle
  - saws with one or multiple blades
  - table saws
- personal protective equipment suitable for coordinating machining production lines
- panels of various dimensions which must include one or more of the following:
  - laminated
  - veneered
  - plywood
  - chipboard
  - fibreboard
  - medium density fibreboard
- templates for:
  - cutting pattern documents
  - cutting schedules
  - operating logs and cutting records
  - process improvement reports
  - records for equipment faults
- production order for panels with specific instructions for sizes, shapes or profiles
- organisational procedures for planning and coordinating panel machining operations
- a team of operators with whom the individual can interact.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting. Machining operations must be present in order that the individual can monitor, assess and modify schedules in response to changing circumstances.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3219 Blend and test binding mixes

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPIWPP3219B Blend and test binding mixes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the skills and knowledge required to blend and test binding mixes used in the production of engineered wood panels.

The unit applies to individuals who work as production operators and technicians in an engineered wood panel facility. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for blending binding mix	1.1 Review work order, workplace health and safety requirements, environmental protection practices and emergency procedures for blending binding mix and, where required, check with appropriate personnel 1.2 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislation to maintain safe work practices 1.3 Obtain the type and quantity of binding mix for blending from storage 1.4 Select and plan blending process according to work order
2. Set up equipment and blend binding mix	2.1 Use equipment according to workplace health and safety procedures, manufacturer instructions and environmental protection practices 2.2 Set blend cycles according to work order 2.3 Measure ingredients and additives and blend to ensure minimum wastage 2.4 Transfer blend to appropriate storage location or production equipment through transfer lines without contamination 2.5 Monitor rate of including additives and, where required, adjust pumps
3. Test binding mix results	3.1 Test blend samples regularly, checking tack and adhesion properties 3.2 Interpret test results and, where required, adjust blend to achieve desired properties 3.3 Reject and dispose of incorrect blend according to environmental protection practices
4. Maintain and clean equipment	4.1 Clean blending, storage and transfer equipment according to workplace health and safety procedures 4.2 Turn off pumps and flush equipment according to manufacturer instructions 4.3 Dispose of excess blended material and additives according to environmental protection practices 4.4 Store equipment and ingredients according to workplace health and safety procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.5 Record and report production outcomes and equipment faults to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret safety data sheets
Numeracy	• Identify the quantity of ingredients to meet work order production requirements, and counts amounts • Calculate routine mixing ratios for blends • Interpret numerical data from binding mix test samples
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Assessment Requirements for FWPWPP3219 Blend and test binding mixes

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version replaces equivalent unit FPIWPP3219B Blend and test binding mixes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for blending binding mix used in the production of engineered wood panels
- prepared binding mixes for one or more of the following types of materials according to individual work orders that prescribe varying quantities of ingredients:
  - chips
  - flakes
  - fibre
- demonstrated use of water- and resin-based glues
- taken samples and test mix for types of properties that include:
  - mix quantities
  - viscosity
  - colour
  - spread
  - tack
  - cured bond strength
  - setting speed
  - how weather conditions may be affecting the process.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to blending binding mix for the production of engineered wood products as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to blending and testing mixes:
  - health and safety, with particular emphasis on equipment lockout, emergency procedures, use of personal protective equipment (PPE) and handling hazardous substances according to safety data sheets
  - use of equipment for blending binding mix
  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
- environmental protection practices for blending and testing binding mixes:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of hazardous substances
- storage layout and categories for:
  - raw materials
  - finished mixes
- typical flow of material supply in and out of the mixing area
- typical workflow processes for blending and testing binding mixes
- properties, at a basic level of understanding, of ingredients and their uses:
  - rubber-based adhesives
  - polyvinyl acetate
  - epoxy resins and formaldehydes
  - chips
  - flakes or fibre
  - hardeners
  - softeners
  - accelerants
  - decelerators
  - dyes
- effects of weather conditions on blending processes
- methods used to:
  - blend binding mix
  - test samples of the mix
  - safely store glue and additives
- purpose, features, operation and basic non-specialist maintenance of mixing systems used to blend binding mix:

© Commonwealth of Australia, 2025 Skills Insight

- mixers with manually controlled feed
- mixers with pre-programmed mix quantities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - blending system with transfer pumps
  - personal protective equipment suitable for blending and testing mixes
  - ingredients for binding mix including chips, flakes or fibre
- specifications:
  - recipes for mixing ingredients
  - manufacturer safety data sheets, instructions for equipment use and recommendations for maintaining equipment
  - work order with specific instructions for blending binding mixes
  - template documents for recording production outcomes and equipment faults
  - workplace procedures for blending and testing mixes, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPWPP3220 Plan and coordinate panel painting

Modification History

Release	Comment
1	Replaces equivalent FPIWPP3220B Plan and coordinate panel painting, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to manage operational logistics for the roller coating, curtain coating and spray painting lines.

The unit applies to production operators and technicians who plan and coordinate panel painting in a forest and wood products setting and also involves monitoring and evaluating processes and problems to determine improvements.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan painting operations	1.1 Review and interpret work orders to determine production requirements. 1.2 Develop painting schedules and communicate to operators in line with organisational procedures. 1.3 Plan and schedule equipment settings and operations. 1.4 Plan and prescribe control measures to minimise waste of paint and

© Commonwealth of Australia, 2025 Skills Insight

	additives. 1.5 Identify, monitor and assess variations in paint mixtures.
2. Coordinate painting operations	2.1 Direct operators to load and unload painting equipment. 2.2 Coordinate paint application and curing processes and monitor for quality finish and completion rates. 2.3 Check paint line performance and interpret data to ensure accuracy and intended coverage. 2.4 Modify schedules to ensure optimum and cost effective production outcomes and communicate changes to operators. 2.5 Coordinate the disposal of excess paint in line with environmental protection practices. 2.6 Direct correct processes for cleaning painting equipment to ensure compliance with organisational safety procedures and environmental protection practices. 2.7 Investigate, record and report major processing and equipment faults and resolve or report to appropriate personnel
3. Evaluate and modify painting processes.	3.1 Monitor and evaluate painting operations and output to determine process improvements. 3.2 Analyse systematic problems with plant, equipment, paints and panels for potential to improve painting processes. 3.3 Document recommended process improvements, communicate to appropriate personnel and seek approval. 3.4 Trial new processes, document outcomes and introduce appropriate system changes.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• complete calculations to determine:
	  • paint amounts required to satisfy work orders
	  • optimum volume return from paint
	  • painting schedules considering human and equipment resource capacity.
	• analyse painting process data to measure paint line performance.

Oral communication	• provide clear and unambiguous information to operators about:

© Commonwealth of Australia, 2025 Skills Insight

skills to:	• initial and changing painting schedules • requirements to dispose of excess paint and clean equipment.
Reading skills to:	• interpret work orders.

Writing skills to:	• develop comprehensive documents in a style and format easily understood by others:
	  • painting schedules
	  • reports on systematic issues with painting processes, potential process improvements including rationale for recommendations
	• complete accurate basic records of equipment faults.

Planning and organising skills to:	• source, collect and organise data to inform painting schedules and process improvement reports • efficiently and logically manage operational logistics for painting activities.
Problem-solving skills to:	• assess painting processes during operation and take quick action to modify schedules to resolve output problems • investigate major equipment faults, consider systematic issues and resolve • analyse production problems, consider various solutions and determine process improvements.
Teamwork skills to:	• take responsibility for coordinating a team of operators for effective painting operations.
Technology skills to:	• monitor and evaluate the operational effectiveness of painting equipment • use a computer, keyboard and software to prepare painting schedules, and reports.

Assessment Requirements for FWPWPP3220 Plan and coordinate panel painting

Modification History

Release	Comment
1	Replaces equivalent FPIWPP3220B Plan and coordinate panel painting, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan and coordinate panel painting operations for production jobs in line with different work orders for each job
- determine, document and communicate painting schedules for each of the above jobs
- monitor, assess and modify schedules in response to changing circumstances within each of the above production jobs
- complete a detailed report about systematic issues arising across the jobs covering problems with processes, plant, equipment, paints and panels including recommendations for process improvements.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for painting panels:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of hazardous substances
- operational capacity of and cleaning requirements for painting production lines:
  - roller coating lines
  - spray booths

© Commonwealth of Australia, 2025 Skills Insight

    - curtain coating lines
- stages in the painting production line process
- methods of determining painting schedules to maximise:
    - equipment and labour use
    - volume return from paint
    - efficient handling of panels to be painted
- control measures to minimise waste of paint and additives
- methods used to:
    - assess painting processes for quality of outcomes
    - diagnose and analyse systematic problems with plant, equipment, paints and panels
- format, content and use of:
    - painting schedules
    - process improvement reports
- organisational procedures specific to planning and coordinating panel painting operations:
    - communication reporting lines for paint operator team members and self
    - documenting painting schedules and reports
    - recording and reporting systematic equipment faults.
    -

Assessment Conditions

The following resources must be made available:

- computers, keyboards, printers and software used to prepare planning and production documents
- painting production lines
- personal protective equipment suitable for coordinating painting lines
- panels which must include at least one of the following:
    - medium density fibreboard
    - chipboard
    - fibreboard
    - plywood
- paint which must include at least one of the following:
    - water based
    - oil based
    - solvent based
- template:
    - painting schedules
    - process improvement reports
    - records for equipment faults
- work order with specific instructions for painting panels
- organisational procedures for planning and coordinating panel painting operations

© Commonwealth of Australia, 2025 Skills Insight

- a team of operators with whom the individual can interact
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting. Painting operations must be present in order that the individual can monitor, assess and modify schedules in response to changing circumstances.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPWPP3222 Press laminated ply

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3222B Press laminated ply, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to set up, operate and shut down hot and cold presses as well as their combined operation used to press laminated ply.

The unit applies to production technicians and operators who press laminated ply in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for pressing.	1.1 Review and check work order with appropriate personnel. 1.2 Identify hazards and control risk in the work area. 1.3 Acquire type and quantity of ply to be pressed from the assembly process. 1.4 Conduct pre-start checks on equipment in line with manufacturer's recommendations and site requirements.

© Commonwealth of Australia, 2025 Skills Insight

	1.5 Select pressing process in line with site procedures. 1.6 Communicate with relevant personnel as required, to ensure safety and production requirements are met.
2. Operate, monitor and report pressing process.	2.1 Set and adjust press cycle times, pressures, temperatures and product parameters to meet production requirements. 2.2 Assess assembled ply and check tack level before loading with defective assemblies returned for reworking. 2.3 Operate and monitor hot or cold press to press boards in line with site requirements. 2.4 Perform unload and reload cycles. 2.5 Regularly assess pressed and finished ply and action necessary changes to assembly and pressing processes. 2.6 Dispose of sub-standard pressed ply in line with site procedures and environmental requirements. 2.7 Record and report pressing process and equipment faults to appropriate personnel.
3. Unload, maintain and load press.	3.1 Open press in line with operating procedures. 3.2 Separate and remove ply and plates. 3.3 Load ply into transport or storage racks for cooling. 3.4 Monitor plate condition during unloading, clean and spray with release agent and remove defective plates for repair. 3.5 Stack assembled ply, plates and overlay panels in press to specified height or number and squareness. 3.6 Transfer finished ply for further processing in line with site requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret instruments, gauges and data recording equipment.
Reading skills to:	• interpret safety data sheets (SDS) • monitor process information displayed on screens
Writing skills to:	• maintain documentation (log activity) • record quality outcomes.

Assessment Requirements for FWPWPP3222 Press laminated ply

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3222B Press laminated ply, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify hazards and control risks in the work area
- operate hot and cold pressing equipment to produce laminated ply according to safe work procedure:
  - set parameters
  - load press
  - unload press
  - restart press cycle
- monitor quality of pressed and finished ply and adjust pressing process
- dispose of sub-standard ply according to site and environmental protection requirements
- inspect plates for faults and remove defective plates for repair
- record and report pressing process according to workplace procedure
- redistribute material on site using designated equipment according to workplace procedures.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedure for pressing ply
- environmental protection requirements relevant to safe disposal or re-use of waste material
- procedures for identifying and controlling hazards and risks associated with pressing ply

© Commonwealth of Australia, 2025 Skills Insight

- laminated ply characteristics
- hot, cold and combination pressing methods
- storage areas for cooling ply
- procedures for identifying and rectifying faults during the pressing process
- procedures for identifying signs of defective pressing plates
- procedures for equipment lock-out
- procedures for recording and reporting pressing process and faults
- procedures for transferring finished ply
- procedures for removing and cleaning press plates.
-

Assessment Conditions

The following resources must be made available:

- work order
- hot or cold press
- release agent
- ply
- overlay panels
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3223 Immunise veneer

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3223B Immunise veneer, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan and prepare a veneer immunisation process, treat veneer for protection against insects, pack veneer and report information.

The unit applies to production technicians and operators who immunise veneer in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for veneer immunisation.	1.1 Work order is reviewed and checked with appropriate personnel 1.2 Identify hazards and control risk according to site procedures. 1.3 Retrieve from storage location and assess type and quantity

© Commonwealth of Australia, 2025 Skills Insight

	of veneer to be immunised. 1.4 Check equipment for operational effectiveness in line with manufacturer's recommendations. 1.5 Plan immunising process in line with site procedures. 1.6 Communicate plan with relevant personnel in line with site requirements.
2. Prepare chemicals and perform veneer immunisation process.	2.1 Access and prepare type and quantity of chemicals and solutions to be used. 2.2 Operate ancillary equipment used to add chemical solutions in line with operating procedures. 2.3 Regularly test samples of solution in line with standard operating procedures. 2.4 Plan load and unload cycles to provide selected treatment and drainage time for veneer. 2.5 Load and unload veneer from solution tanks in line with standard operating procedures. 2.6 Operate transfer equipment to shift veneer and visually assess treated veneer to establish modifications required to treatment process. 2.7 Monitor drainage of treated veneer to ensure even drying.
3. Reject or pack and label veneer panels and report information.	3.1 Reject and dispose of, recycle or re-use veneer panels with a failed immunisation process, in line with site procedures and environmental requirements. 3.2 Pack and label dried veneer panels in line with standard operating procedures. 3.3 Record and report veneer immunising process and equipment faults to appropriate personnel.
4. Clean up and store chemicals.	4.1 Perform veneer immunisation clean up in line with safe work procedures. 4.2 Check condition of treating mechanisms and rectify if required. 4.3 Clear treatment area of dust, shavings and debris in line with site requirements. 4.4 Store chemicals in line with statutory requirements.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• measure chemical quantities • set numerical data
Reading skills to:	• interpret safety data sheets (SDS) • monitor process information displayed on screens
Writing skills to:	• log veneer process information • complete shift change-over reports

Assessment Requirements for FWPWPP3223 Immunise veneer

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3223B Immunise veneer, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare the work area for the veneer immunisation process according to work health and safety (WHS) requirements and site requirements
- prepare chemicals and immunise veneer according to standard operating procedure
- load and unload at least three cycles of veneer
- visually assess immunised veneer for faults and dispose of according to standard operating procedure and environmental requirements
- record veneer immunisation process and faults according to workplace procedures
- store chemicals according to statutory requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- procedures for environmental protection requirements, including the safe disposal of waste material, the safe use and storage of chemicals and safe cleaning of plant and work area
- safe work procedures for immunising veneer
- hazards and risks associated with immunising veneer and how to control them according to hierarchy of risk control
- veneer immunising techniques
- procedures for fault finding during visual inspection of veneer to determine suitability for packing

© Commonwealth of Australia, 2025 Skills Insight

- safety data sheets relevant to chemicals used to immunise veneer
- characteristics of veneer (quarter sawn, back sawn, radial/rotary sawn)
- storage locations and stock rotation positions
- procedures for packing and labelling dried veneer panels
- procedures for checking condition of treating mechanisms
- procedures for recording and reporting veneer immunisation process and faults using manual or electronic recording systems
- procedures for equipment lock-out
- statutory requirements for the safe storage and handling of chemicals.

Assessment Conditions

The following resources must be made available:

- work order
- chemicals or chemical solutions used to immunise veneer which must include one or more of the following:
  - insecticides
  - solvents
  - preservative oils
  - waterborne preservatives
- types of veneers including quarter sawn, back sawn or radial/rotary sawn
- equipment used to immunise veneer: chemical solution tanks, chemical mixing and transfer equipment, veneer transfer equipment
- documents, spreadsheets and commonly used proforma documents
- relevant personnel for the purposes of communicating information
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3224 Profile sand products

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3224B Profile sand products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to profile sand surfaces of curved or shaped products to achieve a smooth surface.

The unit applies to production technicians and operators that profile sanding products in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Timber Manufactured Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Plan and prepare for sanding.	1.1 Review and check work order with relevant personnel. 1.2 Identify hazards and control risk according to site procedures. 1.3 Retrieve type and quantity of profiles to be sanded from the production process. 1.4 Check equipment for operational effectiveness in line with

© Commonwealth of Australia, 2025 Skills Insight

	manufacturer's recommendations, using an inspection checklist. 1.5 Plan sanding process in line with site procedures. 1.6 Communicate plan with relevant personnel according to site procedures.
2. Sand profiles and report faults.	2.1 Set sanding profile and feed rate for optimal smoothing of product and adjust to suit varying products. 2.2 Perform profile sanding in line with site requirements. 2.3 Regularly check and clean dust extraction equipment to avoid blockages. 2.4 Visually assess product quality to ensure specified outcome has been achieved. 2.5 Remove and replace worn sanding medium as required. 2.6 Reject and dispose of products with sanding defects in line with site procedures and environmental requirements. 2.7 Record and report sanding process and equipment faults to appropriate personnel.
3. Grade and distribute products and clean up.	3.1 Grade products in line with site requirements and industry standards. 3.2 Move material to storage or processing operations in line with site requirements. 3.3 Clean work area in line with site requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• set and adjust parameters on equipment • use grading codes

Assessment Requirements for FWPWPP3224 Profile sand products

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3224B Profile sand products, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- control risk in the work environment
- safely and efficiently profile sand products in line with workplace requirements using profile sanding machinery
- set profile sanding parameters for different products
- clean dust extraction equipment
- remove and replace sanding mediums
- visually assess product quality and dispose of defective products
- grade products in preparation for distribution
- distribute products on-site using designated equipment.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- site standards, workplace requirements and safe work procedures for profile sanding products
- hazards and risks associated with the profile sanding process, and how to control them
- different sanding techniques suited to different products with varying characteristics and profile types
- characteristics of timber and panels
- procedures for visually inspecting product quality and identifying defects

© Commonwealth of Australia, 2025 Skills Insight

- procedures for disposal of defective products according to environmental guidelines
- distribution procedures following profile sanding operations
- established communication channels and protocols
- procedures for the use, operation and maintenance of tools and equipment used to profile sand products
- procedures for recording and reporting sanding process and equipment faults
- procedures for cleaning the work area.

Assessment Conditions

The following resources must be made available:

- work order
- profile sanding machine
- sanding medium: sandpaper, emery cloth, sanding belt
- transferral equipment
- timber products which must include one or more of the following:
  - solid timber/moulded panel strips
  - building components
  - furniture components
  - bench tops
  - shaped panels
  - articles with moulded or shaped edges/surfaces
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3225 Produce profile sanding shoes and wheels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3225B Produce profile sanding shoes and wheels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to produce profile sanding shoes and wheels that match the product profile to be sanded.

The unit applies to production technicians and operators that produce profile sanding shoes and wheels in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Timber Manufactured Products

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for production.	1.1 Review and check work order with appropriate personnel. 1.2 Identify hazards and control risk in the work area according to work health and safety (WHS) requirements. 1.3 Retrieve from stock, type and quantity of blanks for shoes and

© Commonwealth of Australia, 2025 Skills Insight

	wheels to be produced. 1.4 Conduct pre-start checks on equipment in line with manufacturer's recommendations and site requirements. 1.5 Plan production process in line with site procedures. 1.6 Communicate plan with others as required, to ensure safety and production requirements are met, in line with site procedures.
2. Produce shoes and wheels.	2.1 Produce template from tin or other metal plate to match profile. 2.2 Position shoe or wheel in machine and shape in line with template, stopping regularly to check shaping with template. 2.3 Label wheels or shoes to follow profile. 2.4 Install wheels or shoes into profile sander in preparation for profile sanding operations. 2.5 Reject and dispose of templates with defects in line with site procedures and environmental requirements. 2.6 Record and report production process and equipment faults to appropriate personnel.
3. Conduct operator maintenance.	3.1 Follow equipment lock-out procedures in line with site procedures. 3.2 Check and maintain condition of shoe or wheel shaping equipment. 3.3 Check shaper cutters for blunt or damaged condition and sharpen as required. 3.4 Clean tool room and clear of waste in line with site procedures.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• set and adjust parameters on profile sanding equipment.
Reading skills to:	• read manual or computer-based information: production, quality, maintenance information.
Writing skills to:	• record equipment inspection and maintenance information (checklists, fault reports) • complete log book requirements (manual or electronic).

Assessment Requirements for FWPWPP3225 Produce profile sanding shoes and wheels

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3225B Produce profile sanding shoes and wheels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- produce profile sanding shoes and wheels in line with safe work procedure
- insert profile sanding shoes and wheels in a profile sanding machine to match given profiles
- mount a wheel in a metal lathe
- form the shape of a profile with the aid of a template
- visually assess templates to identify defects and dispose of defective materials according to site and environmental protection requirements
- lock-out equipment, visually inspect condition of components and sharpen or replace worn components
- record production, quality and maintenance information using manual or computer-based data entry system (log book or computer).

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures for producing profile sanding shoes and wheels
- procedures for set-up of profile sanding equipment procedures for hazard identification and risk control relevant to own work role
- procedures for recycling or re-using defective templates and disposing of waste material according to environmental protection requirements

© Commonwealth of Australia, 2025 Skills Insight

- profiling techniques
- wheel and shoe production methods
- established communication channels and protocols used to interact with workplace personnel
- procedures for fault finding to determine product quality
- procedures for use, operation and maintenance of shaping equipment and components, including equipment lock-out procedures
- procedures for recording and reporting production, quality and maintenance information.

Assessment Conditions

The following resources must be made available:

- work order
- pre-start checklist
- shoe and wheel shaping equipment
- profile sander, sanding shoes and wheels
- template material
- manual or computer-based recording system to record production, quality and maintenance information
- relevant personnel for the purposes of communicating information
- personal protective equipment:
  - safety glasses
  - protective footwear
  - high visibility clothing

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3227 Vacuum paint

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3227B Vacuum paint, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to paint articles using a vacuum painting line with drying ovens and de-nibbing machines.

The unit applies to production technicians and operators who vacuum paint in a forest products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for vacuum painting process.	1.1 Work order is reviewed and checked with appropriate personnel. 1.2 Identify and follow safe work procedure for vacuum painting. 1.3 Acquire type and quantity of articles to be vacuum painted from storage location. 1.4 Check equipment for operational effectiveness in line with

© Commonwealth of Australia, 2025 Skills Insight

	manufacturer's recommendations and site requirements. 1.5 Plan and select vacuum painting process, feed rates and paint in line with site procedures. 1.6 Load paint products in equipment in line with manufacturer's specifications and safe work procedure. 1.7 Manufacture and fit paint templates according to manufacturer's specifications and safe work procedure. 1.8 Communicate with relevant personnel as required, to ensure safety and production requirements are met.
2. Vacuum paint.	2.1 Operate vacuum paint coater in line with recipes and manufacturer's recommendations. 2.2 Apply paint and continuously monitor and adjust flow rates and viscosity in line with site requirements. 2.3 Continuously monitor paint operations and wet film thickness, clearing blockages and filters to maintain paint coverage to specifications. 2.4 Regularly check products for surface quality and contamination in line with site requirements and take corrective action. 2.5 Remove sub-standard painted items from painting process and review for further action. 2.6 Calibrate test equipment and regularly test samples of paint.
3. Operate drying oven.	3.1 Start ovens and bring to operating temperature in line with manufacturer's specifications. 3.2 Monitor oven drying processes in line with standard operating procedures. 3.3 Reject and dispose of products with oven drying defects in line with site procedures and environmental requirements. 3.4 Adjust drying operations in response to paint adhesion test results.
4. Operate de-nibber.	4.1 Set up and start de-nibbing machine in line with manufacturer's recommendations. 4.2 Select and install profile flap brushes. 4.3 Process and assess sample strips. 4.4 Reject and dispose of products with de-nibber defects in line with site procedures and environmental requirements. 4.5 Adjust de-nibbing process in line with sample results. 4.6 Operate and monitor de-nibbing machine in line with standard operating procedures.

© Commonwealth of Australia, 2025 Skills Insight

	4.7 Investigate and resolve routine de-nibbing problems.
5. Shut down and clean equipment and record information.	5.1 Shut down equipment in coordination with other line operators and site procedures. 5.2 Turn off vacuum coater, dryer and de-nibber and flush equipment in line with standard operating procedures. 5.3 Dispose of excess paint and flushing liquid in line with statutory requirements and environmental regulations. 5.4 Store equipment and paint in line with statutory requirements and environmental regulations. 5.5 Record and report processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• enter numerical data when setting machinery • measure paint quantities • measure paint template dimensions • calculate paint flow rates and viscosity • set and adjust oven temperatures
Reading skills to:	• monitor dials and gauges • read log sheet information
Writing skills to:	• complete log sheet information (manually or electronically) • record pre-start inspection information
Problem solving skills to:	• respond to faults and problems throughout the vacuum paint process.

Range of Conditions

Not Applicable

Assessment Requirements for FWPWPP3227 Vacuum paint

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3227B Vacuum paint, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- identify hazards and control risk in the work area
- set up vacuum painting process
- set parameters on equipment
- load paint products
- manufacture and fit paint templates
- operate vacuum paint coater and maintain paint coverage according to work order specifications
- adjust paint flow rates and viscosity
- clear vacuum paint blockages and filters
- calibrate test equipment and test samples of paint throughout the vacuum paint process
- operate, monitor and adjust drying oven according to standard operating procedure
- set up and operate de-nibbing machine
- install profile flap brushes in de-nibbing machine
- identify, remove and dispose of defective products during the vacuum painting, oven drying and de-nibbing process
- shut down and clean vacuum paint coater, drying oven and de-nibbing machine according to standard operating procedure
- shut-down and flush equipment
- store materials and equipment and dispose of waste according to statutory and environmental protection requirements.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures relevant to the set-up, operation, shut-down and cleaning of vacuum painting, oven drying and de-nibbing equipment
- procedures for hazard identification and risk control during the entire vacuum painting process including:
- paints, their viscosity, film thickness, film wetness and feed rates
- procedures for the safe handling, use and storage of paints including their safety data sheets (SDS)
- procedures for clearing blockages and cleaning filters during the vacuum paint process
- procedures for safe disposal of waste materials according to environmental protection requirements
- workplace storage and labelling systems used to support the vacuum painting process
- workplace communication channels and protocols used to communicate with relevant personnel
- procedures for sample testing and calibration of sample testing equipment
- paint recipes and how they are applied in the vacuum paint process
- procedures for identifying product contamination and defects including:
- dust, water spots, oil spots from equipment or oily finger prints
- orange peel effect
- incomplete cover
- solvent boil
- procedures for equipment lock-out
- procedures for identifying, recording and reporting vacuum painting process and equipment fault information
- procedures for emergency response (accident, fire, serious equipment fault).

Assessment Conditions

The following resources must be made available:

- work order
- articles to be vacuum painted
- storage location
- personal protective equipment required to vacuum paint
- vacuum painting chamber
- drying oven
- de-nibber together with continuous roller conveyors
- paint suitable for vacuum coating
- paint templates
- vacuum paint recipes
- relevant personnel for the purposes of communicating information
- established recording and reporting mechanisms (manual or computer-based log book)

© Commonwealth of Australia, 2025 Skills Insight

- sample safe work procedures for:
  - vacuum painting, drying and de-nibbing process
  - testing samples
  - cleaning machinery
  - manufacturer's equipment guidebook

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3228 Dry Wood Flakes

Modification History

Release	Comment
1	Replaces superseded equivalent FPIWPP3228B Dry wood flakes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to dry wood flakes for downstream use in board production and to operate dryers and other ancillary equipment.

The unit applies to production technicians and operators who dry wood flakes in a forest and wood products factory setting.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare to dry wood flakes.	1.1 Review work order and check with appropriate personnel. 1.2 Identify hazards and control risk in the work environment. 1.3 Acquire type and quantity of flakes to be dried from production process, and assess. 1.4 Select equipment appropriate to work requirements and conduct pre-start checks in line with manufacturer's recommendations and

© Commonwealth of Australia, 2025 Skills Insight

	site procedures. 1.5 Plan drying process in line with site procedures. 1.6 Establish and maintain communication with relevant personnel in line with work health and safety (WHS) requirements.
2. Dry wood flakes and monitor quality.	2.1 Start dryer and hot oil system and monitor continuously in line with operational procedures. 2.2 Set drying temperature, humidity and feed rate for optimal recovery of product. 2.3 Position flakes and feed at a rate appropriate to machine speed, capacity, flakes moisture content, thickness and condition. 2.4 Visually assess flakes and measure moisture levels to ensure specified outcome has been achieved. 2.5 Coordinate out-feed to ensure efficient recovery of dried flakes. 2.6 Reject and dispose of sub-standard flakes in line with site procedures and environmental requirements.
3. Grade and redistribute wood flakes.	3.1 Grade flakes in line with site requirements and industry standards. 3.2 Move flakes to storage or processing operations in line with site requirements. 3.3 Reject and dispose of sub-standard material in line with site requirements.
4. Clean up, maintain equipment and record information.	4.1 Clean work area in line with site requirements. 4.2 Follow equipment lock-out procedures in line with site procedures. 4.3 Check drying mechanism for effective condition. 4.4 Check and maintain oil levels, air filters, conveyors and chains. 4.5 Clear dust, shavings and debris from drying area in line with workplace requirements. 4.6 Record and report drying process and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Numeracy skills to:	• interpret gauges, dials and screens displaying numerical information (levels, capacity, speed) • estimate flakes size, quantity and thickness • use grading codes.
Reading skills to:	• monitor drying process information.
Writing skills to:	• enter data • record production, quality and maintenance information.
Problem solving skills to:	• identify irregularities in temperature and levels and make appropriate adjustments.

Assessment Requirements for FWPWPP3228 Dry Wood Flakes

Modification History

Release	Comment
1	Replaces superseded equivalent FPIWPP3228B Dry wood flakes, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- operate drying equipment and hot oil systems to dry wood flakes in line with work order and safe work procedures in readiness for storage and/or processing
- monitor and adjust equipment parameters to ensure production requirements are met
- visually assess dried wood flakes to identify faults and determine quality for grading
- grade and redistribute flakes on-site using designated equipment
- identify hazards and control risk throughout the drying wood flakes process
- perform emergency shut-down procedure in response to fire
- perform operator maintenance on drying equipment:
  - perform equipment lock-out procedure
  - check and maintain oil levels, air filters, conveyers, chains
- clean up work area and clear drying area of waste
- appropriately dispose of waste
- record production, quality and fault information using designated workplace recording systems.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedures relevant to operating drying equipment and hot oil systems to dry wood flakes

© Commonwealth of Australia, 2025 Skills Insight

- procedures for the safe disposal of waste materials according to environmental protection guidelines
- wood flakes drying techniques (using pre-dryers, dryers, cooling sections, steam, gas, heated air)
- procedures for visually assessing wood flakes to determine characteristics, faults, finish and quality
- procedures for grading and redistributing wood flakes
- established communication channels and protocols used to communicate with relevant personnel
- procedures for identifying irregularities and faults with machinery and ancillary equipment, and appropriate resolution strategies
- procedures for the operation and maintenance of drying equipment
- procedures for recording and reporting production, quality and fault information
- procedures for setting, monitoring and adjusting feed rate and moisture content
- storage systems appropriate for the storage of wood flakes:
  - storage racks
  - storage bays
  - bins, stacks
  - pallet boxes
  - modularised storage compartments
  - temporary stacking bays
- workplace specific dryers and ancillary equipment used to dry wood flakes
- waste minimisation, disposal, recycling and re-use guidelines
- emergency procedures in response to fire, accident, and serious equipment fault.

Assessment Conditions

The following resources must be made available:

- work order
- manual or computer-based recording and reporting systems for:
  - production records
  - quality records
  - maintenance records
  - tally sheets
- wood flakes
- storage area
- wood flakes transfer equipment
- drying equipment
- relevant personnel for the purposes of communicating information
- personal protective equipment required for drying wood flakes.

FWPWPP3229 Classify flake

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3229B Classify flake, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate specialist equipment to classify flake in readiness for downstream production of panel products, while monitoring and maintaining the flow of operation. The unit includes operator maintenance.

The unit applies to those classifying flake in a forest and wood products factory setting. The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Prepare to classify flake.	1.1 Check and review work order with appropriate personnel. 1.2 Identify, clarify and follow safe work procedure for classifying flake. 1.3 Identify hazards and control risk in the work area.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Conduct pre-start checks on equipment in line with manufacturer's recommendations and site procedures. 1.5 Acquire and assess from stockpile type and quantity of flake to be classified. 1.6 Plan flake classifying process in line with site procedures.
2. Operate equipment and classify flake.	2.1 Adjust screens and feed systems to separate flake into required sizes and operate equipment in line with site requirements. 2.2 Monitor flake flow, usage and silo levels and take action to ensure optimal production and availability of sufficient storage space. 2.3 Direct output to designated silos and immediately clear blockages to ensure smooth transfer. 2.4 Reject and dispose of flake unsuitable for classification in line with site procedures and environmental requirements.
3. Maintain equipment, clean up and maintain record keeping procedure.	3.1 Lock out equipment in line with workplace requirements and site procedures. 3.2 Check grinding elements for faulty, blunt or damaged condition, and remove and replace as required, in line with manufacturer's recommendations. 3.3 Clear machine and surrounding area of foreign matter and debris in line with workplace requirements. 3.4 Record and report processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• estimate storage capacity, flake quantities and flow rates.
Reading skills to:	• monitor information on screens.
Writing skills to:	• enter log sheet data • complete pre-start checklist.
Problem solving skills to:	• detect faults and take immediate action to rectify problems including blockages requiring emergency shut-down and immediate rectification.

Assessment Requirements for FWPWPP3229 Classify flake

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3229B Classify flake, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- operate equipment to classify flake according to work order and safe work procedures
- respond to a blockage requiring emergency shutdown
- visually assess flake to determine it classification characteristics
- identify and appropriately dispose of unsuitable flake
- conduct operator maintenance on flake classifying equipment
- store flake in line with workplace requirements
- record and report production, quality and maintenance information using designated workplace recording systems (manual or computer-based).

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- safe work procedure relevant to classifying flake
- hazards and risk controls relevant to the classifying flake process
- process faults that require emergency shut-down and immediate resolution
- emergency response procedures relevant to fire, accident, serious equipment or process fault
- environmental protection requirements: waste minimisation and disposal, recycling and reuse guidelines
- organisational and site standards, requirements, policies and procedures for classifying flake

© Commonwealth of Australia, 2025 Skills Insight

- flake classification process
- flake characteristics:
  - size categories
  - species
  - core fraction
  - surface fraction
  - overs and dust
  - moisture content
- storage systems and labelling requirements
- established communication channels and protocols
- procedures for identifying and resolving problems and faults during the classify flake process
- procedures for the operation and maintenance of equipment
- procedures for recording and reporting faults, processing and equipment maintenance information (production, quality, maintenance and tally sheets).

Assessment Conditions

The following resources must be made available:

- personal protective equipment required for classifying flake
  - flake (any of the following):
    - wood flake, planer shavings, sawdust, shredded board
- classifiers
- flake towers
- screens and silos
- sifters
- mechanised feed systems (conveyors, transfer cars or chutes)
- transfer equipment (regular feed systems, blow lines or drag chains)
- relevant personnel for the purposes of communicating information
- site documents: work order, safe work procedure, equipment lock-out procedure, log book or computer-based equivalent.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3230 Produce decorative veneers

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3230B Produce decorative veneers, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to produce decorative veneers in readiness for application to chipboard, medium density fibreboard, plywood or other board products following customer order specifications.

The unit applies to production operators and technicians who produce decorative veneers in a forest and wood products factory setting

Licensing, legislative, regulatory or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for production of veneer.	1.1 Review work order and check with appropriate personnel. 1.2 Identify and follow safe work procedure for producing decorative veneers. 1.3 Identify hazards and control risk in the work area. 1.4 Acquire type and quantity of decorative veneer to be

© Commonwealth of Australia, 2025 Skills Insight

	produced, from veneer production process. 1.5 Select equipment and conduct pre-start check in line with manufacturer's recommendations and site requirements. 1.6 Select veneer production process in line with site procedures. 1.7 Establish and maintain communication with relevant personnel as required, to ensure safety and production requirements are met.
2. Produce decorative veneer and dispose of sub-standard material	2.1 Visually inspect veneer for decorative qualities, layout design, defects and select for use. 2.2 Select joining points and cut veneer in line with layout design. 2.3 Prepare decorative veneers for joining and bonding to panel product. 2.4 Check completed veneers for conformity to work order and repair any imperfections. 2.5 Mark completed veneers for designated joining sequence in line with layout design. 2.6 Reject and dispose of sub-standard decorative veneers in line with site procedures and environmental requirements.
3. Regrade and redistribute veneer, clean up and maintain records.	3.1 Assess joins and regrade veneer in line with site requirements and industry standards. 3.2 Direct and move material to storage or processing operations in line with site requirements. 3.3 Reject and dispose of sub-standard material in line with site requirements. 3.4 Clean work area in line with safe work procedure and site requirements. 3.5 Record and report decorative veneer process and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• use measuring equipment • lay out design in patterns that best accentuate the decorative veneer.

© Commonwealth of Australia, 2025 Skills Insight

Reading skills to:	• interpret work orders.
Writing skills to:	• record pre-start check information • set parameters for veneer production process.
Problem solving skills to:	• control risk throughout the veneer production process • maintain production flow by responding appropriately to production faults.

Assessment Requirements for FWPWPP3230 Produce decorative veneers

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3230B Produce decorative veneers, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- set up the work area in preparation for producing decorative veneers
- produce decorative veneers in line with safe work procedure and while controlling risk in the work area
- visually inspect veneers for defects and characteristics to determine grading status
- regrade, label and redistribute veneers on-site using designated equipment
- clean equipment according to safe work procedure (includes performing lock-out procedure)
- dispose of production and cleaning waste according to site procedures and environment requirements
- record production, quality and fault information using workplace record keeping procedure.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- site standards, industry standards, workplace requirements, policies and safe work procedures relevant to the production of decorative veneers
- emergency response procedures (fire, accident and serious equipment malfunction) relevant to own role and responsibility

© Commonwealth of Australia, 2025 Skills Insight

- environmental management requirements, including guidelines for waste minimisation, recycling, re-use and the safe disposal of waste material from production and cleaning
- hazards and risks associated with the production of decorative veneers and appropriate risk controls as referred to the in the range of conditions
- procedures for visually assessing and selecting decorative veneer based on the following characteristics: species, colour, type, width, length, thickness and defects (warp, wane, cupping, shakes, insect defects, knots, resin pockets)
- types of decorative veneers: growth ring, ray, ribbon, wavy, curly, fiddle-back, crotch, swirl, birds eye, burl, burr, butt or stump
- types of production techniques: book matching, end matching, four piece butt matching, diamond matching, herring-bone matching, segmental matching, slip drawn matching
- types of panel products including medium density fibreboard, chipboard, fibreboard, plywood.
- veneer matching and joining techniques
- product distribution procedures
- workplace specific storage systems and product grading and labelling procedures
- established communication channels and protocols
- procedures for monitoring production and identifying and resolving problems during the decorative veneer production process, to maintain production flow
- procedures for the safe operation and cleaning of equipment
- procedures for recording and reporting production, quality and fault information (manual or computer-based).

Assessment Conditions

The following resources must be made available:

- work order
- safe work procedure for producing decorative veneers
- personal protective equipment required to produce decorative veneers
- first aid equipment
- decorative veneers
- production equipment
- conveyor belt system, track system
- lifting equipment
- relevant personnel for the purposes of communicating information
- site records for recording production, quality and equipment faults.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and

© Commonwealth of Australia, 2025 Skills Insight

- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3231 Produce veneer from prepared flitches

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3231B Produce veneers from prepared flitches, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate a vertical or horizontal slicing machine to produce leaves of timber veneers from prepared flitches. The unit includes operator maintenance.

The unit applies to production officers and technicians who produce veneers from prepared flitches in a forest and wood products factory setting.

Licensing, legislative, regulatory or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Wood Panel Products.

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare to slice veneers.	1.1 Review work order and check with appropriate personnel. 1.2 Identify and follow safe work procedure for producing veneers from prepared flitches. 1.3 Identify hazards and control risk in the work area.

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Acquire type and quantity of timber species to be sliced from storage location. 1.5 Select equipment and conduct pre-start check in line with manufacturer's recommendations and site requirements. 1.6 Plan veneer slicing process and thickness in line with site procedures. 1.7 Establish and maintain communication with relevant personnel as required, to ensure safety and production requirements are met.
2. Load flitches, slice veneers and dispose of waste.	2.1 Check size and condition of prepared flitches and load acceptable flitches into slicer. 2.2 Position flitches to maximise available veneer and remove waste product. 2.3 Set and operate veneer slicing process to optimise veneer recovery in line with site procedures. 2.4 Constantly adjust machine speed and control of veneer cut to suit flitch characteristics in line with site procedures. 2.5 Dispose of defective material and rejected flitch and backing-board in line with site procedures and environmental requirements.
3. Maintain equipment, clean up and follow record keeping procedure.	3.1 Lock out equipment according to standard operating procedure. 3.2 Check cutting blades for blunt or damaged condition in line with manufacturer’s recommendations and site procedures, and remove and replace as required. 3.3 Clear dust, off-cuts and debris from machine area and dispose of in line with in line with safe work procedure and environmental requirements. 3.4 Record and report processing and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• monitor and adjust machine speed to suit production requirements • calculate slicing rates according to flitch characteristics and

	required veneer thickness • use numerical data to interpret work order and set equipment parameters.
Reading skills to:	• monitor control panels.
Writing skills to:	• record production, quality and faults information.
Problem solving skills to:	• identify and resolve routine problems during the production process, to maintain production flow.

Assessment Requirements for FWPWPP3231 Produce veneer from prepared flitches

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP3231B Produce veneers from prepared flitches, which was first released with FPI05 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- slice timber veneers from prepared flitches in line with work order and safe work procedure, using a slicing machine
- identify hazards and control risk to self, others and plant throughout the veneer production process
- visually inspect prepared flitches to determine suitability for loading into slicer
- identify defective materials throughout the production process and dispose of appropriately
- perform lock-out, blade inspection, replacement and cleaning procedure on slicer
- record and report production, quality and fault information using workplace record keeping procedure and systems.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- site standards, industry standards, workplace requirements, policies and safe work procedures relevant to producing veneers from prepared flitches
- emergency response procedures (fire, accident and serious equipment malfunction) relevant to own role and responsibility

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection requirements, including guidelines for waste minimisation, recycling, re-use and the safe disposal of waste material created by production and cleaning
- hazards and risks associated with production of veneers from prepared flitches and appropriate risk controls as referred to the in the range of conditions
- veneer types: quarter sawn, back sawn, radial (or rotary) sawn
- characteristics of timber veneers: type, width, length, thickness
- characteristics of flitch and timber defects: warp, wane, cupping, shakes, insect defects, knots, resin pockets
- slicing processes using vertical or horizontal slicing equipment
- established communication channels and protocols for communicating with relevant personnel as part of the production process
- problem identification and resolution strategies and common fault finding techniques
- procedures for the safe operation of slicing machine and visual inspection, removal and replacement of cutting blades
- procedures for the lock-out and cleaning of equipment
- procedures for recording and reporting production, quality, maintenance and faults information (manual or computer-based).

Assessment Conditions

The following resources must be made available:

- work order
- safe work procedure for producing veneer from prepared flitches
- personal protective equipment required to produce veneer from prepared flitches
- first aid equipment
- vertical or horizontal slicing machine
- prepared flitches
- relevant personnel for the purposes of communicating information
- manual or computer-based information recording systems for recording production, quality and fault information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP3232 Operate a heat roll bonding machine to laminate or veneer engineered wood panel surfaces

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to operate heat roll bonding machines and ancillary equipment to apply laminate or veneer to engineered wood panel surfaces in a manufacturing facility.

The unit applies to individuals who work as production operators and technicians in an engineered wood panel facility. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPWPP3232 Operate a heat roll bonding machine to laminate or veneer engineered wood panel surfaces

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for laminating engineered wood panels
- laminated one or more of the following engineered wood panels according to individual work orders prescribing different laminating thicknesses and quantities of panels:
  - medium density fibreboard
  - chipboard
  - fibreboard
  - plywood
- applied one or more of the following types of laminating material:
  - laminate
  - veneer
- stripped and cleaned the heat roll bonding machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to using heat roll bonding machines and ancillary equipment for laminating engineered wood panels, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to laminating engineered wood panel surfaces:
  - health and safety, with particular emphasis on equipment lockout, emergency procedures, use of personal protective equipment (PPE) and handling hazardous substances according to safety data sheets for glue

© Commonwealth of Australia, 2025 Skills Insight

  - use of laminating equipment
  - communication reporting lines
  - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for engineered wood panel facilities:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing boards
  - disposing of hazardous substances
- typical flow of material supply in and out of the engineered wood panel laminating area
- properties, at a basic level of understanding, of laminating materials and their uses for different types of engineered wood panels:
  - laminate
  - veneer
- characteristics of engineered wood products types and the effects of lamination:
  - medium density fibreboard
  - chipboard
  - fibreboard
  - plywood
- typical workflow processes and techniques used to laminate and veneer engineered wood panels:
  - applying laminating material and veneer
  - spreading glue
  - heat rolling material to boards
- purpose, features and operation of equipment used to laminate or veneer engineered wood panel surfaces:
  - laminate bonding machines
  - glue spreading stations
  - heat rollers
- methods used to strip and clean laminate and veneer bonding machines.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or a productive environment that accurately reflects performance in a workplace
- resources, equipment and materials:
  - heat roll bonding machine and ancillary equipment for laminating engineered wood panels
  - maintenance tools and equipment

© Commonwealth of Australia, 2025 Skills Insight

- PPE suitable for laminating and veneering engineered wood panel surfaces
- engineered wood panels suitable for lamination operations
- laminating material
- glue

- specifications:
  - manufacturer instructions for use and cleaning of equipment
  - work order with specific instructions for laminating and veneering engineered wood panel surfaces
  - template documents for recording production outcomes, equipment faults and maintenance requirements
  - workplace procedures for laminating and veneering engineered wood panel surfaces, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPWPP3234 Operate a continuous press for the production of engineered wood panels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for forming and pressing engineered wood panels
- operated blending and continuous press equipment to bond and produce engineered wood panel according to production requirements
- identified defective engineered wood panels using visual assessment and by testing sample panels
- disposed of defective engineered wood panels
- redistributed finished engineered wood panels onsite using designated equipment
- performed lockout procedure and cleaned press equipment according to workplace health and safety procedure
- recorded and reported forming and pressing process information (production, quality, faults) using workplace specific recording and reporting channels and protocols (manual or computer-based log, communication with relevant personnel).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and operational safety hazards or risks related to forming and pressing engineered wood panels, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to forming and pressing engineered wood panels:
  - health and safety, with particular emphasis on equipment lockout, emergency procedures, use of personal protective equipment (PPE) and handling hazardous substances
  - use and maintenance of forming and pressing equipment

© Commonwealth of Australia, 2025 Skills Insight

  - communication reporting lines
  - recording and reporting production outcomes and equipment faults
- environmental protection practices for forming and pressing engineered wood panels:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - identifying and disposing of engineered wood panels and waste materials
- engineered wood panel defects: surface blemishes, discolouration, natural timber defects, deformities and clean scalping from 'pendistors'
- ingredients and blending methods used in the engineered wood panels pressing process
- chip, flake and fibre characteristics
- procedures for testing engineered wood panel samples to check conformance with industry standard
- adjustment of feed rates to meet production requirements
- common pressed engineered wood panel types: medium density fibreboard, chipboard, fibreboard.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE required for operating a continuous press
  - continuous press with continuous forming line
  - forming equipment
  - chips, flakes or fibre, binding ingredients and hardening agents suitable for the production of engineered wood panels
  - transfer equipment
  - manual or computer-based log to record production, quality and fault information
- specifications:
  - work order
  - pre-start checklist
  - template documents for recording production outcomes, equipment faults and maintenance requirements
  - workplace procedures for forming and pressing engineered wood panels, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPWPP3235 Trim new engineered wood panels to size

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to trim new engineered wood panels to size with automated trimming saws as they progress along the production line.

The unit applies individuals who work as production operators and technicians in an engineered wood panel facility. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identify quantities of required material within work orders, and count numbers of panels to be trimmed

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
	• Complete basic calculations of the required length to determine saw set-up • Measure finished dimensions against specifications and appropriate tolerances
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Use modes of communication suitable for the purpose to confirm and clarify understanding
Get the work done	• Recognise and respond to routine problems

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
FWPWPP3235 Trim new engineered wood panels to size	FWPWPP3221 Trim new panels to size	Updated industry terminology, workplace health and safety requirements and foundation skills; clarified intent of the unit and assessment requirements; changed unit title and code for compliance and consistency with the updates. Assessment Requirements for FWPWPP3235 Trim new engineered wood panels to size

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- followed workplace health and safety requirements and environmental protection procedures for trimming new engineered wood products
- produced one or more of the following types of trimmed engineered wood panels according to individual work orders prescribing different lengths and tolerances and number of panels:
  - medium density fibreboard
  - laminated veneer
  - chipboard
  - fibreboard
  - plywood
  - continuous ply
- completed cutting patterns and sequences for single straight cuts and angles requiring one cutting pass set for multiple cuts of the same size
- stacked batches of cut panels in storage location according to a common length
- completed operator maintenance on the automated trimming saw used.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to trimming engineered wood panels with automated trimming saws, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures specific to trimming new engineered wood panels to size:

© Commonwealth of Australia, 2025 Skills Insight

    - health and safety, with particular emphasis on equipment lockout, emergency procedures and use of personal protective equipment (PPE)
    - use of automated trimming saw
    - communication reporting lines
    - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for engineered wood panel facilities:
    - reducing water and energy use
    - cleaning of plant, tools and equipment
    - disposing of, recycling and reusing timber and other waste
- typical engineered wood panel defects and how they affect the ability to produce quality trimmed panels:
    - warp
    - wane
    - cupping
    - shakes
    - insect defects
    - knots
    - resin pockets
- cutting patterns and sequences for single straight cuts and angles requiring one cutting pass
- range of industry standard lengths, cross-sections and tolerances and applicable terminology
- typical flow of material supply in and out of the trimming area
- storage layout and categories for stacking finished engineered wood panels
- purpose, features and operation of equipment used to trim new engineered wood panels to size:
    - automated trimming saws
    - conveyor belt systems
- methods for assessing saw blade condition and completing and basic non-specialist repair and maintenance for saws.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - automated trimming saws
    - maintenance tools and equipment for saws
    - consumable saw blades

© Commonwealth of Australia, 2025 Skills Insight

- PPE suitable for trimming engineered wood panels to size
- engineered wood panels suitable for trimming operations

- specifications:
  - manufacturer instructions for use and maintenance of equipment
  - work order with specific instructions for trimming and storing engineered wood panels
  - template documents for recording production outcomes, equipment faults and maintenance requirements
  - workplace procedures for trimming panels to size, including health and safety and emergency procedures and environmental protection procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPWPP4202 Perform laboratory testing

Modification History

Release	Comment
1	Replaces equivalent unit FPIWPP4202B Perform laboratory testing, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to test blends, glues, additives, materials, products and any other entities produced by the enterprise, to ascertain causes of a problem or to improve techniques.

The unit applies to those performing laboratory testing in a forest and wood products factory setting.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing

Timber Manufactured Products

Wood Panel Products

Timber Truss and Frame Design and Manufacture

Elements and Performance Criteria

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare for testing.	1.1 Review work order and check with appropriate personnel. 1.2 Identify, clarify and follow safe work procedures for performing

© Commonwealth of Australia, 2025 Skills Insight

	laboratory testing. 1.3 Identify hazards and control risk in the work environment relevant to own role and responsibility. 1.4 Obtain type and quantity of items for testing. 1.5 Select and calibrate equipment and check for operational effectiveness in line with manufacturer's recommendations. 1.6 Plan testing process in line with site procedures.
2. Test samples.	2.1 Interpret and analyse problem or improvement requirement. 2.2 Prepare samples and identify manufacturing dates, times and batches from production records. 2.3 Establish, review and interpret test data. 2.4 Conduct test in line with industry standards. 2.5 Check results by further sampling and testing.
3. Evaluate and report test outcomes.	3.1 Evaluate test results for implications and impacts on production process. 3.2 Take action to rectify or improve upon test results achieved. 3.3 Communicate test results to production personnel to facilitate process control or changes. 3.4 Provide results to external authorities in line with registration systems. 3.5 Record and report testing process and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	• interpret numerical data • use measuring instruments • estimate quantities when choosing samples for testing.
Reading skills to:	• follow written instructions.
Writing skills to:	• write reports of test results.

Assessment Requirements for FWPWPP4202 Perform laboratory testing

Modification History

Release	Comment
1	Replaces equivalent unit FWPWPP4202B Perform laboratory testing, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and efficiently perform laboratory testing in line with work order and safe work procedure
- follow relevant legislative and regulatory requirements, codes of practice and workplace policies and procedures relevant to performing laboratory testing
- control risk to self, others and equipment
- set up and calibrate testing equipment
- evaluate impact of test outcomes on production outcomes
- record and report test results following workplace specific record keeping procedure.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- legislation, regulations, standards, codes of practice, site standards, policies and safe work procedures relevant to performing laboratory testing
- hazards and risks involved with performing laboratory testing, and how to control them
- environmental protection requirements, including the safe disposal of waste material
- safety data sheets relevant to ingredients and additives used in the laboratory testing process
- workplace specific sampling and testing techniques
- laboratory testing conditions and facilities

© Commonwealth of Australia, 2025 Skills Insight

- storage systems and labelling conventions relevant to items used in the laboratory testing process
- established communication channels and protocols for communicating with relevant personnel
- procedures for use and maintenance of laboratory testing equipment
- emergency procedures (fire, accident, serious equipment fault) relevant to own role and responsibility
- recording and reporting requirements and procedures including protocols for reporting results to external agencies (environmental agencies, local authorities or government bodies).

Assessment Conditions

The following resources must be made available:

- work order
- personal protective equipment
- safe work procedures
- safety data sheets (if relevant)
- first aid equipment
- laboratory testing equipment
- gauges
- hand tools used for laboratory testing
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- workplace specific samples to be used in the laboratory testing process.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPWPP4203 Plan and coordinate engineered wood panel production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0

Application

This unit of competency describes the skills and knowledge required to plan, coordinate and monitor production of engineered wood panels.

The unit applies to individuals who work as production supervisors in an engineered wood panel manufacturing facility. They generally demonstrate autonomy, judgement and limited responsibility in known or changing contexts and within established parameters.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

panel production	health and safety requirements, environmental protection practices and emergency procedures, and confirm requirements with relevant personnel 1.2 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislation to maintain safe work practices 1.3 Inspect engineered wood panel characteristics and record and report variations to operators 1.4 Plan, schedule and communicate engineered wood panel type, sizes and production methods to operators 1.5 Maintain communication with operators as required, to ensure health and safety and production requirements are met
2. Monitor engineered wood panel production outcomes and record information	2.1 Monitor engineered wood panel production for effective forming, laminating or veneering outcomes and panel condition 2.2 Assist operators to evaluate engineered wood panels, identify faults and rectify production problems 2.3 Develop processes for rejecting and disposing of sub-standard engineered wood panels produced according to site procedures and environmental requirements 2.4 Monitor engineered wood panel production and output management and record possible process improvements
3. Coordinate engineered wood panel production and record information	3.1 Modify production methods or schedules as required, to ensure optimum performance 3.2 Communicate to operators and record production improvement modifications according to site procedures 3.3 Direct produced engineered wood panels to storage or transfer for further processing 3.4 Record and report engineered wood panel production data, output data, quality data and equipment faults according to record keeping procedure and site requirements

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	• Complete operating logs and cutting records
Numeracy	• Interpret numerical data displayed on screens
Navigate the world of work	• Source, collect and organise data to inform product assembly schedules and process improvement
Interact with others	• Take responsibility for coordinating a team of operators for effective assembly operations
Get the work done	• Take responsibility for planning and organising own workload • Identify and rectify faults during the engineered wood panel production process • Consider how to schedule different production jobs

Unit Mapping Information

Assessment Requirements for FWPWPP4203 Plan and coordinate engineered wood panel production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned and coordinated engineered wood panel production according to workplace health and safety requirements and environmental procedures
- monitored engineered wood panel production outcomes and identified and rectified production and equipment problems and faults
- recorded and reported production information including output, quality and faults
- modified production methods and schedules for engineered wood panel production
- communicated effectively and coordinated personnel to follow the planning, communications and scheduling required for the engineered wood panel production.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety procedures, including personal protective equipment (PPE), site procedures, policies and site standards relevant to planning and coordinating engineered wood panel production
- environmental protection requirements, including the safe disposal of waste material
- hazards and risks associated with the engineered wood panel production process, and risk control strategies as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- types of engineered wood panels, including laminated, veneered, plywood, chipboard, fibreboard, medium density fibreboard; and characteristics, including panel type, size, surface treatment, thickness and grade
- engineered wood panel production methods, including:
  - mat-forming
  - daylight press process

© Commonwealth of Australia, 2025 Skills Insight

  - board laminating
  - pressing laminated ply
  - applying laminates or veneers
- establishing communication channels and protocols used to communicate with relevant operators
- problem identification and resolution strategies and common fault-finding techniques
- procedures for recording and reporting production, quality and fault information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - computers, keyboards, printers and software used to prepare planning and production documents
  - PPE required for planning and coordinating engineered wood panel production
- specifications:
  - engineered wood panel production schedule
  - process improvement reports
  - record for equipment faults
  - workplace health and safety and emergency procedure for engineered wood panel production
  - environmental protection procedures
  - manual or computer-based information recording systems for recording production, quality and fault information
- relationships:
  - relevant personnel for the purposes of communicating information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FSKLRG011 Use routine strategies for work-related learning

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify own learning goals and needs and develop a formal learning plan to participate in a vocational or workplace learning environment.

An individual performing these tasks works independently and uses familiar support resources as needed.

This unit applies to individuals who use, or are preparing to use, learning skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

This unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) learning core skill indicators .01 and .02 at level 3 in the workplace and employment domain of communication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for learning	1.1 Identify work-related learning goals 1.2 Investigate and select a range of formal and informal learning

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance Criteria
	pathways 1.3 Investigate a range of approaches to achieve goals, identifying strengths and limitations of approaches 1.4 Anticipate potential barriers to learning
2. Use strategies for learning	2.1 Identify and select work-related goal 2.2 Identify a preferred approach to achieving work-related learning goal 2.3 Identify and implement strategies to address barriers to achieving learning goal 2.4 Propose routine learning strategies to achieve learning goal 2.5 Identify and access a range of reliable support resources 2.6 Create and use a formal learning plan to implement strategies
3. Review own learning progress	3.1 Monitor progress against plan and reflect on actions and outcomes, identifying options for improvement 3.2 Seek feedback on learning progression 3.3 Identify areas for further learning and training

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Mapping Information

Supersedes and is equivalent to FSKLRG11 Use routine strategies for work-related learning.

Assessment Requirements for FSKLRG011 Use routine strategies for work-related learning

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least one formal learning plan to support the achievement of identified work-related learning goal and learning pathway
- check and review progress against plan on at least one occasion.
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- work related tasks requiring learning
- common barriers to learning and solutions to address barriers
- routine strategies to support learning goals
- own learning goals
- relevant education and training requirements for selected learning pathway options
- relevant support resources for personal learning goals and techniques to assess validity of source
- typical features of a formal learning plan
- approaches to check and respond to progress of learning plans.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Skills must be demonstrated using routine texts or tasks that reflect those typically found in a workplace.

The following resources are to be made available:

© Commonwealth of Australia, 2025 Skills Insight

- own familiar support resources.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, learning, and
- have completed the following or equivalent:
  - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
  - a higher level education qualification, such as:
    - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
    - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.

HLTAID003 Provide first aid

Modification History

Release	Comments
Release 6	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and manage immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer’s instructions 2.7 Monitor the casualty’s condition and respond in accordance with first aid principles
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Evaluate the incident and own performance	4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents 4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Skills Insight

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

© Commonwealth of Australia, 2025 Skills Insight

  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

© Commonwealth of Australia, 2025 Skills Insight

  - unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid equipment according to manufacturers' instructions. 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

© Commonwealth of Australia, 2025 Skills Insight

3. Communicate details of the incident.	3.1. Accurately convey incident details to emergency services. 3.2. Report details of incident in line with appropriate workplace or site procedures. 3.3. Complete applicable workplace or site documentation, including incident report form. 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.	4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed
  - shock

© Commonwealth of Australia, 2025 Skills Insight

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally

© Commonwealth of Australia, 2025 Skills Insight

  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening and life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

© Commonwealth of Australia, 2025 Skills Insight

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in a remote or isolated site over an extended period of time until medical assistance is provided, or evacuation occurs.

This unit applies to any site where medical assistance is likely to be delayed.

First aid is to be provided in line with guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare equipment for first aid response in remote or isolated site.	1.1. Evaluate information about remote or isolated site and identify potential injuries and illnesses requiring extended management. 1.2. Select first aid equipment and resources to manage a range of potential incidents, according to organisational emergency response and first aid procedures. 1.3. Select communication equipment to facilitate emergency response in remote or isolated site. 1.4. Complete pre-departure safety and serviceability checks on equipment.
2. Assess the situation.	2.1. Recognise and assess an emergency situation. 2.2. Ensure safety for self, bystanders and casualty. 2.3. Assess casualty to determine extent of first aid response. 2.4. Identify need for medical assistance and relay initial and

© Commonwealth of Australia, 2025 Skills Insight

	concise information. 2.5. Triage when multiple casualties are involved.
3. Apply appropriate first aid procedures.	3.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers. 3.2. Provide first aid in accordance with established first aid principles. 3.3. Display respectful behaviour towards casualty. 3.4. Obtain consent from casualty where possible. 3.5. Use available resources and equipment to make the casualty as comfortable as possible. 3.6. Operate first aid equipment according to manufacturers' instructions. 3.7. Monitor the casualty's condition and respond in accordance with first aid principles. 3.8. Assess need to evacuate casualty, ability to transport to medical assistance or need for external assistance. 3.9. Administer medication as required according to medical instructions.
4. Communicate details of the incident.	4.1. Accurately convey incident details to emergency services. 4.2. Report details of incident in line with appropriate workplace or site procedures. 4.3. Complete applicable workplace or site documentation, including incident report form. 4.4. Maintain privacy and confidentiality of records and information in line with applicable statutory or organisational policies.
5. Coordinate evacuation and first aid activities until assistance arrives.	5.1. Determine need, in consultation with external services, to evacuate casualty. 5.2. Provide accurate information about location of incident, number of casualties, their condition and their position to enable deployment of appropriate resources. 5.3. Continue to provide treatment using available resources until help arrives. 5.4. Prepare site for evacuation of patient. 5.5. On approach, assist emergency services to locate the site of the incident. 5.6. Follow instructions and provide assistance to emergency services personnel during evacuation.
6. Review the incident.	6.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 6.2. Contribute to a review of the first aid response as required.

Assessment Requirements for HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) guidelines and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performing at least 2 minutes of ventilation and at least 2 minutes of compressions during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - responding appropriately in the event of regurgitation or vomiting
  - demonstrating a rotation of operators with minimal interruptions to compressions
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - minor wound cleaning and dressing
  - nosebleed
  - shock
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques for remote situations and appropriate equipment improvisations

© Commonwealth of Australia, 2025 Skills Insight

  - head, neck and spinal injuries
  - hypothermia and hyperthermia
  - life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - conducting a secondary survey assessment
  - assessing vital signs respirations, pulse, temperature
  - level of consciousness
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident
- conducted a basic triage for a multiple casualty incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies including those relevant to remote or isolated sites
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of medication

© Commonwealth of Australia, 2025 Skills Insight

  - legal requirements
  - the five rights
  - the responsibilities of the first aider
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally
  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions or injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, sprains and strains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia

  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke
  - life threatening bleeding including use of tourniquets and haemostatic dressings

© Commonwealth of Australia, 2025 Skills Insight

- considerations when providing first aid including:
  - assessment, interpretation and documentation of vital signs, including normal clinical values for respirations, temperature, pulse and level of consciousness
  - how to conduct a secondary assessment of a casualty
  - basic triage processes
  - ongoing care requirements of casualty beyond initial treatment
- remote considerations in the provision of first aid, including:
  - the nature of remote or isolated sites and how this may impact on first aid management
  - key features, functions and limitations of different types of emergency communication equipment used in remote or isolated sites, and factors that affect choice:
    - radio equipment
    - mobile phones
    - satellite phones
    - alerting and tracking devices including personal locator beacons (PLBs)
  - management options relating to transporting casualty, including aero-medical evacuation
  - specific considerations contextualised to alpine, desert, marine, rural or remote settings and tropical environments
  - methods used to assist emergency services to locate incident sites and the key features, functions and limitations of resources used to assist:
    - verbal directions
    - flags
    - flares or smoke
    - fires
  - use of man-made and natural resources to supplement first aid equipment
  - content of remote area first aid kits
  - content of remote area medication boxes
- psychological impacts of first aid incidents on rescuers and how to seek help.
-

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Scenarios must concentrate on the significance of remote or isolated site circumstances.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

© Commonwealth of Australia, 2025 Skills Insight

- adult and infant resuscitation manikin following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training devices
- placebo bronchodilator and spacer device
- haemostatic dressings
- haemostatic wound packing trainer
- thermometers
- tourniquets
- tourniquet trainer
- different types of wound dressings and bandages
- blankets and items to manage a casualty for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other appropriate workplace or site incident report form, which includes space for recording vital signs of casualties
- remote first aid kits
- immobilisation devices.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID014 Provide Advanced First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide an advanced first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide an advanced first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1.Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Deploy resources to appropriate locations as required in line with appropriate workplace or site procedures. 1.5. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid and ancillary equipment according to manufacturers' instructions.

© Commonwealth of Australia, 2025 Skills Insight

	2.7. Monitor the casualty's condition and respond in accordance with first aid principles.
3. Coordinate first aid activities until arrival of medical assistance.	3.1. Identify available resources required and establish communication links with appropriate personnel, emergency services or medical assistance as appropriate. 3.2. Deploy required resources to appropriate locations in an efficient and effective manner to ensure timely treatment of casualties. 3.3. Monitor the condition of casualties in accordance with first aid principles and workplace or site procedures. 3.4. Coordinate evacuation of casualties according to relevant evacuation procedures.
4. Communicate details of the incident.	4.1. Accurately convey incident details to emergency services. 4.2. Report details of incident in line with appropriate workplace or site procedures. 4.3. Complete applicable workplace or site documentation, including incident report form. 4.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
5. Review the incident.	5.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 5.2. Arrange support services for personnel involved in the incident in accordance with relevant procedures. 5.3. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

  - shock
  - life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least two simulated first aid incidents, one medical and one trauma contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - conducting a secondary survey assessment
  - assessing vital signs respirations, pulse, temperature
  - level of consciousness
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post-incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident
- coordinated a team of people to respond to a multiple casualty incident, including:
  - conducting a basic triage
  - demonstrating effective use of resources
  - demonstrating effective planning techniques
  - moving casualties using suitable extraction method and device and safe manual handling techniques.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices

HLTAID016 Manage first aid services and resources

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to establish, maintain and facilitate the provision of appropriate first aid in the workplace.

The unit applies to workers in nominated occupational first aid or management roles.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine workplace first aid requirements.	1.1. Identify workplace hazards and assess associated risks as a basis for determining first aid resource requirements. 1.2. Identify first aid equipment, resources and personnel required to address workplace requirements. 1.3. Develop first aid action plans in consultation with relevant parties. 1.4. Provide information to minimise risk and enable access to first aid facilities.
2. Establish and maintain workplace first aid facilities.	2.1. Monitor and maintain availability of first aid equipment and personnel to support workplace first aid response. 2.2. Conduct inspections of first aid stock and equipment to ensure currency and operational readiness in line with workplace requirements. 2.3. Ensure equipment is recovered and reprocessed and that waste is disposed of safely according to legislative and workplace procedures. 2.4. Ensure equipment and resources are stored and maintained in line with relevant legislation and manufacturers' or suppliers' instructions. 2.5. Deploy appropriate equipment and personnel to ensure

© Commonwealth of Australia, 2025 Skills Insight

	timely and effective first aid response in line with workplace requirements.
3. Maintain workplace first aid records.	3.1. Ensure documentation is completed in line with legislation and workplace procedures. 3.2. Maintain first aid records in line with legislative requirements and workplace security practices. 3.3. Send relevant documents to appropriate bodies in line with workplace and legislative requirements. 3.4. Maintain privacy and confidentiality of records and information in line with privacy legislation and organisational policies.
4. Review the provision of first aid in the workplace.	4.1. Participate in incident debriefing or evaluation to improve future operations and address individual needs. 4.2. Evaluate management of workplace first aid incidents in relation to required equipment, personnel, current organisational procedures and individual first aid action plans. 4.3. Contribute to the review of workplace policies and procedures in accordance with risk assessment and evaluation of first aid provision.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to HLTAID008 Manage first aid services and resources

Assessment Requirements for HLTAID016 Manage first aid services and resources

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with State or Territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- conducted a workplace risk assessment and evaluation of first aid provisions
- developed a first aid action plan including strategies for management of incidents and individuals needs in accordance with workplace policies and procedures
- used a first aid checklist to service a workplace first aid kit for supplies' replacement and equipment maintenance
- maintained first aid equipment and resources according to manufacturers' instructions
- used and maintained documentation required by the workplace and regulatory authorities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- state/territory regulations, first aid codes of practice and workplace procedures including:
  - workplace requirements for first aid provision in line with the relevant state/territory Work Health and Safety requirements
  - duty of care in relation to first aid provision
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions based on incident
  - requirements for currency of skill and knowledge
- legal, workplace or community issues relating to the provision of first aid including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - consent
  - capabilities of emergency management services
  - privacy and confidentiality requirements

© Commonwealth of Australia, 2025 Skills Insight

- importance of debriefing.

Assessment Conditions

Skills must be demonstrated in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Assessment must ensure access to:

- first aid kit and contents checklist
- workplace injury, trauma and/or illness record, or other applicable workplace or site incident report form
- relevant State or Territory Work Health and Safety First Aid Code of Practice.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment, including workplace resources required by the relevant state/territory Work Health and Safety Regulatory Authority.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

ICTSUS804 Use ICT to improve sustainability outcomes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use ICT tools and technologies to improve sustainability outcomes for a range of industries through monitoring and reporting on greenhouse gas emissions.

It applies to individuals with a high level of autonomy who are excellent communicators with telecommunications and systems skills and management abilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Design and manage a sustainability audit	1.1 Use audit tool that reflects criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirements 1.2 Define scope, objectives and benchmarks for audit in consultation with relevant stakeholders 1.3 Document requirements for audit resources, timing, schedule and responsibilities consistent with industry best practice and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	relevant standards 1.4 Ensure collection strategies are objective and systematic, and that information and data is valid and reliable 1.5 Report outcomes clearly and concisely, including benefits to be achieved by adoption of audit recommendations
2. Monitor energy consumption and emissions	2.1 Analyse requirements of National Greenhouse and Energy Reporting System (NGERS) and other relevant legislation and industry standards in relation to a range of industries and needs of specific organisations 2.2 Identify links with functional areas and environmental management systems to ensure comprehensive information and data collection 2.3 Determine hardware and software required for collecting, collating, analysing and reporting emissions-related information and data 2.4 Factor requirement for an external audit into the monitoring proposal 2.5 Critically evaluate energy consumption and emissions data 2.6 Develop improvement strategies based on review of data 2.7 Use industry best practice as quality benchmark
3. Develop ICT solutions to improve sustainability outcomes	3.1 Research and analyse mitigation and adaptation strategies appropriate for a range of industries 3.2 Benchmark and document performance expectations in consultation with relevant stakeholders 3.3 Develop and document technical specifications including hardware, software, networking, interface and security and hazard management requirements 3.4 Determine timelines, resources and costs for implementation and ongoing monitoring and maintenance 3.5 Analyse impact of ICT solution in relation to performance benchmarks 3.6 Analyse opportunities and develop recommendations to improve sustainability of enterprise products, services and processes 3.7 Present report for client sign-off

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 2.5-2.7, 3.3	• Identifies, analyses and evaluates complex textual information to inform sustainability solutions
Writing	1.2, 1.3, 1.5, 2.4, 2.6, 3.2, 3.3, 3.6, 3.7	• Produces detailed reports and related documentation and develops recommendations using precise language and specialised terminology to convey understanding of outcomes
Oral Communication	1.2, 1.5, 3.2, 3.7	• Articulates clearly using specific language suitable to client and stakeholder audiences to convey requirements, and uses listening and questioning techniques to confirm understanding
Numeracy	1.1, 2.5, 3.4	• Uses mathematical formulae to plan budgetary requirements and evaluate timelines for solution implementation and ongoing monitoring requirements • Interprets complex energy consumption and emissions data to identify workplace improvements
Navigate the world of work	1.1, 1.3, 2.1	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Get the work done	1.1-1.4, 2.2, 2.3	• Develops flexible plans for complex, high impact activities with strategic implications involving diverse stakeholders with potentially competing demands • Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with those of the work group • Systematically gathers and analyses all relevant information and evaluates options to make high-impact and informed decisions • Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and reduce risks

Assessment Requirements for ICTSUS804 Use ICT to improve sustainability outcomes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- audit and critically analyse patterns of energy use
- develop monitoring and reporting systems that comply with regulatory requirements
- develop a workable implementation strategy
- formulate solutions to improve sustainability outcomes
- develop benchmarks for reviewing and improving performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain auditing sustainability processes and practices
- discuss corporate social responsibility
- describe development processes and practices
- clarify hazard identification and control
- explain industry standards
- discuss the legislative framework underpinning sustainability
- summarise principles, practices and available tools and techniques of sustainability management relevant to a range of industries
- outline relevant international business and organisational standards
- discuss sustainability from a local, national and international perspective
- summarise sustainability including ecological, economic and social issues
- discuss technical performance measurements.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Sustainability industry and include access to:

- relevant reports, legislation, regulations and standards
- suitable hardware, software, resources and equipment
- internet connection with suitable bandwidth
- relevant documentation including manufacturers' technical specifications.

Assessors must satisfy NVR/AQTF assessor requirements.

LGACOM401A Administer contracts

Modification History

LGACOM401A Release 2: Layout adjusted.

LGACOM401A Release 1: Primary release.

Unit Descriptor

This unit covers the administration, monitoring and transition of contracts.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish administration procedures	1.1 Administrative processes for contracts are implemented according to council quality improvement 1.2 Contract requirements are confirmed with relevant contract personnel. 1.3 Complaint system is established according to council policy and procedures. 1.4 Consistent and accurate records of contract progress are maintained.
2 Monitor contract time frame and specifications	2.1 Regular inspections of contract services are undertaken to ensure compliance with specifications and program for completion. 2.2 Regular planned progress meetings are held and documented between all contract personnel to ensure problems are identified and resolved early. 2.3 Variations between the specified scope of services and the contract are identified and documented, and relevant personnel are notified without delay. 2.4 Testing of services in progress is carried out as required by the contract and in accordance with legislation, regulations and council policy.
3 Monitor costs	3.1 Contract costs are monitored on a regular basis to ensure that the service is carried out in accordance with financial and contractual requirements. 3.2 Payments for contract services are authorised in accordance with the conditions of contract and delegation of officer. 3.3 Transaction costs are monitored through an established system.
4 Resolve contractual disputes	4.1 Disagreements are investigated to identify cause and validity. 4.2 Terms of resolution are negotiated and agreed. 4.3 Contract provisions for dispute resolution are followed. 4.4 Legal and management advice is sought at an early stage of any dispute to ensure that the contractor has a clear understanding of the council's legal position and that the council is not exposed to undue legal risk. 4.5 Appropriate legal advice is sought at any stage in order to clarify any technical aspects of a dispute.
5 Implement contract transition	5.1 Contract conditions and responsibilities are reviewed with relevant personnel to ensure satisfactory completion of contract.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	5.2 Contract completion is authorised in writing to confirm completed services have been undertaken according to contract objectives and specifications.
	5.3 Final statement is reconciled.
	5.4 Contractor performance and level of service are evaluated against agreed benchmark.
	5.5 End-of-service or renewed contracts are coordinated to meet council requirements.
	5.6 Quality of contract documentation is assessed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- negotiation and liaison across a range of internal and external customers
- contingency management
- contract interpretation
- project management
- conflict resolution
- client interaction
- financial and time management

Required Knowledge

- relevant legislation, regulations, codes of practice and policies applicable to the industry and the council, including those relating to environmental/sustainable practice and OHS
- relevant systems and procedures to aid in the achievement of sustainable practice
- contract procedures
- contract law
- knowledge of the contract service
- performance standards and analysis
- complaint procedures
- costing processes

Evidence Guide

Overview of assessment A person who demonstrates competency in this unit will be

© Commonwealth of Australia, 2025 Skills Insight

requirements	able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	• Maintenance of files relating to records of meetings, payments, progress reports, file notes and discussions. • Effective communication with the contractor. • Monitoring of industry changes. • Making recommendations covering a range of contracts. • Maintenance of WorkCover, OHS and audit processes and up-to-date insurance files. • Monitoring relevant laws, by laws and regulations or best practice on environmental performance and sustainability
Context of assessment	On the job or in a simulated work environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to a workplace or simulated case study that provides such resources as: • a range of council contract documentation and records • relevant commercial law texts on contracts • relevant council policies and procedures documents.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different

work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Administrative processes for contracts may include:	• supervision • management • monitoring • overseeing
Records of contract progress may include:	• photographs • data • progress reports • customer surveys • minutes of meetings
Services may include:	• product • maintenance • supply • cleaning • waste • research • environmental initiatives • civil • child care • other council services
Testing may include:	• samples • routine checks • audits • observations • meetings • laboratory
Payments may include:	• progressive • lump sum
Conditions of contract may include:	• tender documentation • maintenance plan • compliance with sustainable practice guidelines • defects liability
Contractor performance is evaluated in terms of:	• adherence to timelines and estimated costs • progress towards objectives • adherence to quality standards, environmental and sustainability standards and OHS and EEO practices

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the extent and nature of services to be contracted	1.1. Scope of the ***services*** is confirmed and reviewed to ensure ***parameters*** meet current requirements. 1.2. Statutory and council requirements are identified to determine available options. 1.3. Detailed parameters are specified to enable a complete brief to be prepared. 1.4. The extent of the contract package is determined.
2. Select appropriate method for tender	2.1. Area to be contracted is examined. 2.2. Contract options are identified and analysed. 2.3. Benefits, costs and opportunities of each option are identified. 2.4. Appropriate contract option is selected.
3. Prepare tender specifications according to council and Australian standards	3.1. Complete and detailed service specifications are prepared consistent with council policy and Australian standards and based on service profile and review. 3.2. ***Legislative***, environmental, sustainability practices, occupational health and safety and risk management requirements are applied. 3.3. Quality assurance methods are applied to the preparation of service specifications. 3.4. Service specifications are prepared in consultation with relevant staff that complement required outcomes. 3.5. Details on methods, standards, materials, products, contractors and performance period are provided by quality service specifications, as applicable.
4. Prepare evaluation criteria	4.1. A tender review panel or team is selected from appropriate personnel. 4.2. Criteria are established based on the specifications, product and service required. 4.3. Criteria are written clearly to enable bids to be compared. 4.4. Criteria are ranked against council procedures.
5. Prepare tender document	5.1. ***Tender documents*** are ***prepared*** clearly and concisely. 5.2. Tender documents are prepared that enable competitive pricing of products. 5.3. Tender documents are designed to enable valid ***comparisons*** between tenders received.
6. Invite tenders	6.1. Invitations are prepared based on the type of tendering method used.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	6.2. Source list is prepared according to council procedures.
	6.3. ***Advertisement*** is prepared and placed according to the tender method.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- report and specification writing
- qualitative and quantitative research
- analytical
- consultation with relevant personnel
- specification interpretation
- negotiation with relevant internal and external people
- observation of protocol and probity policies

Required Knowledge

- relevant council policies, procedures and codes of conduct
- sustainability practices
- quality assurance systems
- relevant Australian and industry standards
- statutory and council tender requirements
- contractual processes
- industrial agreements
- statutory council requirements
- tendering codes of practice
- national competition policy

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also

© Commonwealth of Australia, 2025 Skills Insight

	required to be demonstrated.
Critical aspects of evidence to be considered	• Contract authorisation process is undertaken • Appropriate advertisement is placed • Required specifications are produced • Conditions of contract are produced • Industry standard conditions of contract are applied • Confidentiality and probity are observed for both in-house bids and/or external tenders
Context of assessment	On the job or in a simulated work environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to a workplace or simulated case study that provides the following resources: • relevant council policies and procedures • national competition policy information

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Services may include:	• works • function • provision • community expectations
Parameters may include:	• budget range

© Commonwealth of Australia, 2025 Skills Insight

	• council resources • level of risk • council policies, such as 'buy local'
Tendering methodology may include:	• lump sum • unit rate • partnership • services process
Tendering method may include:	• expression of interest • public tender • invitation • verbal • written • in-house bid • select tender
Advertisement may include:	• newspaper • in-house • trade magazines • according to council policy
Legislative requirements may include:	• WorkCover • risk management • occupational health and safety • sustainability • equal employment opportunity • sexual harassment • public liability • professional indemnity • evidence of insurance cover • quality assurance
Tender documents may include:	• general conditions • special clauses • technical conditions • standard specifications • code of tendering • statutory declaration • evaluation criteria • drawings • implementation plan • legislative amendments • legal endorsement
Comparative statement may include:	• matrix • data

© Commonwealth of Australia, 2025 Skills Insight

	• criteria • compliance • score
Formalisation may include:	• contract signing procedure • preliminary deposits
Evaluation may include:	• previous projects • verification of quality accreditation • capacity • capability • risk • security • service

LGACOM502B Devise and conduct community consultations

Modification History

LGACOM502B Release 2: Layout adjusted. Range statement edited.

LGACOM502B Release 1: Primary release.

Unit Descriptor

This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

© Commonwealth of Australia, 2025 Skills Insight

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise consultation strategies	1.1. A range of consultation strategies is identified and assessed for suitability. 1.2. ***Interested and affected parties*** are identified. 1.3. ***Resources*** required to conduct consultation are assessed. 1.4. ***Consultation strategies*** are chosen that ***enable and encourage relevant groups*** or individuals to be involved. 1.5. ***Legislative*** and council requirements are reviewed to ensure strategies meet all criteria.
2. Conduct consultations	2.1. ***Information*** is prepared that is clear, accurate and appropriate to the needs of all parties. 2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved. 2.3. ***Information is presented*** to affected parties at an appropriate time and place. 2.4. ***Access and equity*** requirements are implemented in the consultations. 2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame. 2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.
3. Record, analyse and report on results	3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed. 3.2. Appropriate suggestions for improvement are incorporated into design parameters. 3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised. 3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern. 3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to devise and conduct community consultations where: • consultation ensures council's image or reputation is maintained or enhanced • community consultation produces valid and useful information

© Commonwealth of Australia, 2025 Skills Insight

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including: • public and community meetings and forums • surveys and door knocks • appropriate communications equipment and aids such as overhead projectors and computer-based presentations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Interested and affected parties may include:	• community groups • other authorities • individuals • emergency authorities (police, fire and ambulance) • private sector business interests • special interest groups • experts
Resources may include:	• human

© Commonwealth of Australia, 2025 Skills Insight

	• financial • locations
Consultation strategies may include:	• public meetings • phone-ins • questionnaires • informal gatherings • door knocks • council meetings
Enabling and encouraging relevant groups to be involved may include:	• physical accessibility • diverse language needs • culture, including Indigenous, youth and non-English speaking background • physical environment • number of people
Legislation may include:	• local government • anti-discrimination • planning
Information may include:	• written and oral records • anecdotes • reports • instructions • directions from supervisor or management • interviews • formal and informal team meetings •
Access and equity may include:	• subject matter • manner in which consultations are conducted • physical accessibility • community profile • •
Presentation of information may include:	• graphics • models • computer animations • video displays • overhead transparencies • handouts • display plans • interpreter service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 **Identify presentation requirements**	1.1 Presentation requirements are determined in consultation with end user. 1.2 Extent, content and intended use of output are considered in recommending presentation format and medium.
2 **Format and present data**	2.1 Relevant data elements are assembled. 2.2 Procedures are designed for formatting data into compatible format. 2.3 ***Data formats*** are selected to meet customer requirements. 2.4 Information is presented to meet user requirements using suitable media in an attractive, informative and useable manner. 2.5 Information is presented in line with appropriate Australian standards.
3 **Ensure customer satisfaction**	3.1 Work is completed in line with council ***quality requirements*** **.** 3.2 Feedback is sought from customer regarding satisfaction with information and presentation. 3.3 Any areas of dissatisfaction are resolved in line with council policies and procedures. 3.4 Customer feedback is analysed and used as a quality improvement tool.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- layout and design
- attention to detail
- consultation and negotiation with customers

Required Knowledge

- display principles including colour, composition, layout, text and line style, appropriate scale, media, font types and sizes, legends and projectives
- use of software and hardware such as GIS, CAD, desktop publishing, desktop mapping,

For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	Customer requirements are met. Presentation is in line with Australian standards.
Context of assessment	On the job or in a simulated work environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation third-party reports from experienced practitioners completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to a workplace or simulated case study that provides resources, including: • relevant software and hardware such as GIS, CAD, desktop publishing, desktop mapping, spreadsheets, word processing, multimedia, graphic animation, plotters, printers and terminals

LGAPLEM612B Protect heritage and cultural assets

Modification History

LGAPLEM612B Release 2: Layout adjusted.

LGAPLEM612B Release 1: Primary release.

Unit Descriptor

This unit covers establishing an inventory, assessing opportunities and threats and developing strategies for heritage and cultural assets.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 **Prepare inventory of heritage and cultural assets**	1.1 ***Heritage*** and cultural assets within the community, and council expectations and requirements relating to them, are identified. 1.2 The ***significance*** of each heritage and cultural asset is assessed according to established criteria and community expectations. 1.3 An adequate ***information*** base of significant places is obtained through comprehensive field investigation and research. 1.4 ***Data*** is collected accurately and objectively on heritage and cultural assets. 1.5 A comprehensive inventory of heritage and cultural assets is prepared with full and detailed descriptions of history and significance.
2 **Assess threats and opportunities for the protection of heritage and cultural assets**	2.1 ***Threats*** and opportunities are identified to ensure all factors are fully assessed. 2.2 Based on input from council and the community, criteria are established to enable threats and opportunities to be prioritised.
3 **Identify and develop strategies for the protection of heritage and cultural assets**	3.1 ***Criteria*** are established to identify priorities. 3.2 Consultation with the community and property owners is undertaken to seek views on the conservation action required to protect the significant attributes of the area. 3.3 A framework for the legal protection of heritage and cultural assets is established through existing legislation. 3.4 Practical and appropriate strategies to conserve heritage and cultural assets are determined. 3.5 The effectiveness of strategies is assessed through a comparison with methods used elsewhere. 3.6 The policy elements of the proposed heritage program are determined. 3.7 Innovative approaches are developed to protect heritage and cultural assets in response to the local community need.
4 **Implement strategies for the protection of heritage and cultural assets**	4.1 The study and program are adopted by the local authority. 4.2 Consultation is undertaken with the community and property owners about the study and proposed heritage program. 4.3 Financial resources are identified and procured within budget cycles to support the achievement of required

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	outcomes. 4.4 Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met. 4.5 Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes. 4.6 Community education and ***information*** materials are prepared and distributed to ensure ongoing support for the strategy. 4.7 The strategy is incorporated into council policies and procedures and relevant legislation. 4.8 A timetable for implementation is established and priorities are set.
5 **Monitor and review the effectiveness of strategies to protect heritage and cultural assets**	5.1 Further research is undertaken on ***places*** listed as being of local significance in the study. 5.2 Additional plans of significance are identified and reviewed. 5.3 An annual heritage report is prepared if required. 5.4 Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- research
- collation of information from local, national and international sources
- evaluation methodologies
- consultation with a range of community and government agencies
- strategic planning
- budgeting and lifecycle costings
- community education strategies
- project management

Required Knowledge

- heritage assets
- cultural assets
- asset classification

© Commonwealth of Australia, 2025 Skills Insight

- council structures and services
- town planning
- community needs and expectations
- regulations, standards and policies
- community information

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: • identify and protect heritage and cultural assets • identify and implement strategies to protect heritage and cultural assets • put in place monitoring processes
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.

© Commonwealth of Australia, 2025 Skills Insight

Resource implications	Access to a workplace or simulated case study that provides the following resources: • relevant data such as survey information • historical research • existing reports • studies and texts • financial and budget information • real or simulated consultation process • copies of relevant regulations, standards and policies

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Heritage may include:	• cultural and environmental issues • national and local area significance • danger component of heritage element or structure
Significance may be:	• aesthetic, historical, scientific and social aspects • community expectations. • national • state • regional • local • contributory
Data includes:	• survey information • historical research • existing reports • studies and texts
Information may include:	• written and oral records • reports • instructions • directions from supervisor and management • formal and informal interviews • team meetings • reports from other services, agencies, specialists and experts • media
Threats may include:	• political emphasis

© Commonwealth of Australia, 2025 Skills Insight

- reductions in maintenance
- lack of planning
- other authorities' planning
- competing interests
- community attitudes

Criteria may include:

- community preferences
- budget constraints
- legislative provisions
- resources
- time frames
- age
- outstanding craftsmanship
- architectural style
- construction technology
- an association with important events or figures
- building type
- rarity
- technical or creative achievement
- representing a way of life
- artistic
- religious or cultural associations

Places of significance may include:

- buildings
- structures
- plantings
- subsurface remains

LGAWORK212A Perform field support duties in a roadwork environment

Modification History

LGAWORK212A Release 2: Layout adjusted.

LGAWORK212A Release 1: Primary release.

Unit Descriptor

This unit covers the competencies required to undertake relevant field support duties in the construction and maintenance of roads within Council areas. The unit looks at establishing the facilities required for road works, the preparation of surfaces and materials necessary for road construction and maintenance and the use of appropriate signage at the work site.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations that provide the boundaries for the operation of councils is essential. The ability to use appropriate materials, construction methods and processes and adhere to relevant standards must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the

Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 **Establish site facilities for road maintenance and construction**	1.1 Work is planned and programmed to be undertaken in accordance with drawings, specifications and other documentation. 1.2 Work site is prepared and maintained in a safe condition in accordance with OHS requirements and regulations of other accredited authorities. 1.3 Traffic control is planned at job site and signed in accordance with relevant Australian Standards. 1.4 Underground and overhead obstructions and other utility services are identified. 1.5 Appropriate ***signage*** is selected, established and maintained at work site.
2 **Construct appropriate pits and manholes**	2.1 Plant, equipment, tools and materials to construct manholes and pits are selected. 2.2 Pits and manholes are constructed according to council requirements.
3 **Construct roads and pavements**	3.1 Site is set out, cleared and prepared 3.2 ***Earthworks*** are undertaken and the sub-grade prepared. 3.3 Construction materials are spread and compacted using appropriate ***plant, equipment , materials*** and construction. 3.4 Pavement surface for construction of wearing ***surface*** using either a bitumen seal or asphalt surface. 3.5 Pavement markings are applied and signs, safety rails and markers are erected as specified.
4 **Maintain roads and pavements**	4.1 Surface is set out and prepared for resealing/patching or other maintenance activities. 4.2 Levelling tasks are carried out where necessary using appropriate plant and equipment. 4.3 Materials used to maintain the pavement are prepared correctly using appropriate tools and equipment. 4.4 Repairs on road pavement, kerb and channel, potholes, sealing and asphalt overlays are made using appropriate tools, plant and equipment. 4.5 Subsurface and surface open drains are maintained,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	repaired and cleared where necessary. 4.6 Trees and shrubs are trimmed or removed and weeds are controlled according to council requirements. 4.7 Verges are mown by tractor signs in relation to their meaning, positioning and material.
5 **Maintain records for road construction and maintenance**	5.1 Information is recorded in accordance with council and legislative requirements. 5.2 Details are recorded clearly, accurately and legibly. 5.3 ***Records*** are secured, accessible and up-to-date.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- written and verbal communication skills
- reading and interpreting plans and specifications, plant and equipment capabilities and estimation of plant output
- civil works construction techniques and methods
- calculation of quantities
- trade specific skills related to work undertaken
- material testing

Required Knowledge

- OH&S requirements
- construction and maintenance practices
- materials technology associate with roads construction and maintenance
- work scheduling, inspection, testing and monitoring
- work site traffic management
- monitoring and testing methods and procedures

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example,

© Commonwealth of Australia, 2025 Skills Insight

	the knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	Demonstrated ability to use appropriate materials, construction methods and processes for the construction and maintenance of roads. Demonstrated ability to adhere to plans and specifications. Demonstrated ability to adhere to relevant occupational health and safety practices on site. Demonstrated ability to adhere to Australian standards, codes of practice and advisory standards.
Context of assessment	Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined in the Range Statement. Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package. Assessment of the performance requirements in this unit should be undertaken in an actual workplace or simulated environment. Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the Key Competency levels at the end of this unit.
Relationship to other units(prerequisite or co-requisite units)	To enable holistic assessment this unit may be assessed with other units that form part of the job role.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completing workplace documentation • third party reports from experienced practitioner • completion of self-paced learning materials including personal reflection and feedback from trainer/coach/supervisor
Evidence required for demonstration of	Evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and

© Commonwealth of Australia, 2025 Skills Insight

consistent performance	variety of situations.
Resource implications	The learner and the trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Signage includes:	• statutory • directional and information • road lines/road markings • reflectors • centrelines • directional lines • shoulder lines
Earthworks may include:	• clearing • grading • levelling • excavating • trenching
Plant and equipment may include:	• bulldozers • excavators • trucks • graders • compactors • loaders • skid steers • pumps
Types of construction materials may include:	• soils (clay, sand, gravel, silt) • crushed rock • soil aggregates • concrete aggregates • filter sands and aggregates • bitumen • cutback bitumen • bitumen emulsion
Types of surfaces may include:	• bitumen and emulsion seal • unsealed

© Commonwealth of Australia, 2025 Skills Insight

- gravel
- concrete
- segmental pavers
- asphalt
- pre-mix
- primer seal

Types of records may include:

- test reports
- job diaries
- instructions
- correspondence
- time-sheets
- accident reports
- costing sheets

MEM05006 Perform brazing and/or silver soldering

Modification History

Release 1. Supersedes and is equivalent to MEM05006C Perform brazing and/or silver soldering

Application

This unit of competency defines the skills and knowledge required to perform brazing (including braze welding) and/or silver soldering and includes the preparation of materials and equipment and the inspection of the completed work.

It applies to silver soldering and brazing using all grades of silver solder and braze.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required see unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, sketches, job sheets or work instructions
2	**Prepare heating equipment**	2.1	Select the correct process to meet the job specifications
		2.2	Ensure heating equipment is in safe working condition
		2.3	Assemble heating equipment and set up according to SOPs
		2.4	Determine and set gas pressures
3	**Prepare materials**	3.1	Select and prepare consumables
		3.2	Prepare materials using appropriate tools and techniques
		3.3	Assemble/align materials to meet specifications
		3.4	Identify distortion prevention measures and take appropriate action
		3.5	Undertake test run and verify
4	**Braze and/or silver solder**	4.1	Preheat materials as required
		4.2	Apply consumables using appropriate techniques

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	4.3	Apply jointing material in appropriate quantities
	4.4	Anneal material where required
5 **Inspect joints**	5.1	Remove excess jointing materials
	5.2	Inspect joints and report/record inspection results according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Materials include one (1) or more of the following:
- ferrous
- non-ferrous

Fuel gases include one (1) or more of the following:
- acetylene
- liquefied petroleum gas (LPG)
- hydrogen

Heating equipment includes the following:
- gas cylinders
- hoses
- blowpipes
- tips and nozzles
- regulators

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

	• flashback arrestors
Consumables include one (1) or more of the following:	• fluxes (resin or powder) • all types of silver solder • brazing grades
Process includes one (1) or more of the following:	• brazing • braze welding • silver soldering

Assessment Requirements for MEM05006 Perform brazing and/or silver soldering

Modification History

Release 1. Supersedes and is equivalent to MEM05006C Perform brazing and/or silver soldering

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- checking condition of equipment
- setting up:
  - gas cylinders
  - hoses
  - blowpipes
  - tips and nozzles
  - regulators
  - flashback arrestors
- preparing to braze and/or silver solder by assembling/aligning materials in an appropriate manner and applying distortion prevention methods to meet specifications
- applying consumables and brazing and/or silver soldering ferrous and non-ferrous materials
- annealing material using appropriate techniques
- inspecting joints and removing excess jointing materials and recording the results.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- potential equipment faults
- reasons for selecting specific methods of assembly/alignment
- procedures for minimising distortion of the materials being brazed/braze welded/silver soldered
- procedures for assembling and setting up the specific heating equipment and reasons for selection
- reasons for selecting specific consumables

© Commonwealth of Australia, 2025 Skills Insight

- procedures for preheating the materials to be joined and precautions to be observed
- conducting test runs
- procedures for normalising the temperature of jointed materials and the consequences of inappropriate techniques
- typical applications of brazing/braze welding and silver soldering processes
- procedures for removing excess jointing material
- effects of the use of inappropriate techniques and quantities of jointing material on the performance of the jointed materials
- procedures for inspecting brazed/braze welded/silver soldered joints.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing brazing and or silver soldering at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05049 Perform routine gas tungsten arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Application

This unit of competency defines the skills and knowledge required to prepare the materials and carry out routine gas tungsten arc welding (GTAW) and applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements Unit MEM05019 Weld using gas tungsten arc welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for MEM05049 Perform routine gas tungsten arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas tungsten arc welding (GTAW)
- cleaning and preparing materials for welding to specifications
- setting up welding equipment, including selecting settings and consumables to suit application
- consistently welding materials to specifications
- cleaning welds in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- preparatory requirements
- equipment and equipment settings
- shielding gas properties and applications
- weld characteristics.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing routine GTAW process at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

Assessment Requirements for MEM05050 Perform routine gas metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures and safe work practices
- identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas metal arc welding (GMAW)
- cleaning and preparing materials for welding to specifications
- setting up welding equipment, including selecting settings and consumables to suit application
- consistently welding materials to specifications
- cleaning welds in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- shielding gas properties and applications
- post-welding treatments
- weld characteristics.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing routine GMAW process at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2025 Skills Insight

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM09002 Interpret technical drawing

Modification History

Release 1. Supersedes and is equivalent to MEM09002B Interpret technical drawing

Application

This unit of competency defines the skills and knowledge required to interpret technical drawings.

Technical drawings may utilise perspective, exploded views or hidden view techniques and may include symbol glossaries. Drawings are provided to AS 1100 Technical drawing or AS 1102 Graphical symbols and their equivalents from the full range of engineering disciplines.

Where any technical drawing, sketch, chart, diagram is only used as a technique for communication, then this unit does not apply: unit MEM12023 Perform engineering measurements or unit MEM16006 Organise and communicate information should be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **4**

Pre-requisite Unit

MEM12023	Perform engineering measurements
MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Drawing, drafting and design

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1.	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times
		1.3 Identify job requirements from specifications, job sheets or associated work instructions
2.	**Interpret technical drawing**	2.1 Check drawing and version and validate against job requirements
		2.2 Recognise components and assemblies or objects
		2.3 Identify dimensions, instructions and material requirements
		2.4 Recognise symbols used in the drawing
		2.5 Compile list of required materials

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Drawing interpretation includes recognising the following:	• relationship between the views contained in the drawing • objects • units of measurement

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- dimensions of the key features
- symbols

Assessment Requirements for MEM09002 Interpret technical drawing

Modification History

Release 1. Supersedes and is equivalent to MEM09002B Interpret technical drawing

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting, checking and validating technical drawing against job requirements or equipment
- interpreting technical drawing through recognition of components, assemblies, objects and symbols
- identifying dimensions
- applying drawing conventions appropriate to engineering discipline
- compiling a materials list.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- application of AS 1100 Technical drawing or AS 1102 Graphical symbols
- conventions used in technical drawings
- correct interpretation of instructions contained in drawings
- materials from which drawing object(s) are made and their features and manufacturing and assembly requirements.

Assessment Conditions

- Assessors must:
  - have vocational competency in interpreting technical drawings at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Application

This unit of competency defines the skills and knowledge required to lift and move materials manually and/or using basic manual handling equipment in a wide range of environments.

Maximum manual lifting weight is limited to Safe Work Australia recommendations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **2**

Pre-requisite Unit

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Materials handling

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, job sheets or work instructions
2	**Lift materials manually**	2.1	Determine material weight correctly utilising most appropriate technique, and assess risks associated with lifting
		2.2	Undertake lifting techniques to Safe Work Australia recommended procedures and having regard to types of movement, methods, storage, height and position
3	**Move/shift materials manually**	3.1	Select appropriate equipment, as required
		3.2	Place material safely and securely on moving equipment
		3.3	Relocate material ensuring safety of personnel and security of material
		3.4	Unload material and place in a safe and secure manner

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Material weight includes	• determined using scales

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

one (1) or more of the following:	• interpreting signage
Lifting techniques include one (1) or more of the following:	• individual • team lifting • use of appropriate lifting equipment
Appropriate equipment includes one (1) or more of the following:	• hand trolleys • wheelbarrows • motorised/hand pallet trucks (not sit on) • hand carts • dedicated production or process lifting equipment • baskets, spreader bars, cradles or the like attached to lifting equipment

Assessment Requirements for MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- assessing the risks associated with lifting materials manually and determining the most appropriate technique
- selecting and using the appropriate equipment to move/shift materials ensuring safety of personnel and security of material.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- manual handling techniques, including individual or team lifting
- appropriate equipment associated with move/shift materials
- hazards of incorrect procedures
- Safe Work Australia standards for manual handling.

Assessment Conditions

- Assessors must:
  - have vocational competency in undertaking manual handling at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

MEM12023 Perform engineering measurements

Modification History

Release 1. Supersedes and is equivalent to MEM12023A Perform engineering measurements

Application

This unit of competency defines the skills and knowledge required to perform measurements requiring straightforward use of mechanical measuring devices which incorporate visual inspections representing units of measurement and associated calculations in a range of manufacturing, engineering and related environments. Measurements may be expressed in metric or imperial units.

Electrical/electronic devices used are those not requiring the connection or disconnection of circuitry.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **5**

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Identify job requirements from specifications, sketches, job sheets or work instructions
2	**Select appropriate device or equipment**	2.1	Determine measurement requirements from specifications
		2.2	Select appropriate device or equipment to achieve required outcome according to SOPs
3	**Obtain measurements using a range of measuring devices**	3.1	Use correct and appropriate measuring technique
		3.2	Obtain measurements accurately in a safe and effective manner
		3.3	Determine or verify dimensions using calculations, as required
4	**Maintain measuring devices**	4.1	Undertake routine care and storage of devices to manufacturers' specifications or SOPs
		4.2	Make routine adjustments to devices to maintain device accuracy
5	**Communicate measurements as required**	5.1	Record measurements accurately, as required
		5.2	Prepare freehand sketch which depicts required information, as required

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Specifications include one (1) or more of the following:	• drawings • sketches • job instructions • schematics • diagrams • reference manuals
Measuring devices include one (1) or more of the following:	• protractors • combination squares • set squares • dial indicators • thermometers • tapes • rules • micrometres • vernier-scaled measuring equipment
Calculations include one (1) or more of the following:	• addition • subtraction • multiplication • division • fractions • decimals **Note:** Calculations may be made using a calculator
Routine adjustments	• validating the device using simple zeroing or scale adjustment

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

include the following:

Measurements include one (1) or more of the following:	• length • squareness • flatness • angle • roundness • clearances • any other measurements that can be read off analogue, digital or other measuring device
Information includes one (1) or more of the following:	• dimensions • instructions • base line • datum points

Assessment Requirements for MEM12023 Perform engineering measurements

Modification History

Release 1. Supersedes and is equivalent to MEM12023A Perform engineering measurements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting measurement requirements from specifications
- selecting appropriate measuring device or equipment to achieve the required outcome
- obtaining measurements in a safe and effective manner and recording measurements, including preparing a freehand sketch which depicts required information, as required
- performing calculations to determine or verify dimensions
- storing and maintaining measuring devices including routine adjustments according to manufacturer's specifications or SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- calculations, including addition, subtraction, multiplication, division, fractions and decimals
- manufacturer's or SOPs for handling and storing a range of measuring devices
- appropriate procedures for adjusting and zeroing a range of measuring devices, including scale adjustment
- appropriate methods of communicating measurements by drawings.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing engineering measurements at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2025 Skills Insight

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Application

This unit of competency defines the skills and knowledge required to estimate approximate answers to arithmetical problems, carry out calculations involving percentages and proportions, and determine simple ratios and averages.

It also covers producing and interpreting simple charts and graphs in manufacturing, engineering or related environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **3**

Pre-requisite Unit

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Measurement

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.		
			requirements at all times
		1.3	Identify job requirements from specifications, sketches, job sheets or work instructions
		1.4	Establish required calculation outcomes from job instructions
		1.5	Determine required calculation method to suit the application, including selection of relevant arithmetic operations and/or formulae
		1.6	Estimate expected results, including rounding off, as appropriate
2	**Perform calculations**	2.1	Apply calculation method
		2.2	Obtain answer and check against estimation to ensure it is correct
3	**Produce charts and graphs from given information**	3.1	Transpose data to produce charts or graphs
		3.2	Ensure charts or graphs reflect data on which they are based to meet specifications

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Assessment Requirements for MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting data from job instructions and relevant sources to establish required outcomes
- determining the appropriate calculation method to suit the application
- performing calculations and confirming answer/s
- producing and interpreting simple charts and graphs from given data.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- formulae applicable to the determination of perimeter, area and volume of simple geometric shapes and the reasons for using dimensions with the same units
- techniques and procedures for rounding off figures when estimating approximate answers
- features and use of mixed numbers, decimals, fractions and whole numbers
- procedures for carrying out calculations involving fractions and using each of the four basic rules of addition, subtraction, multiplication and division
- concept of percentage and procedures to be followed in converting a decimal and fraction to a percentage
- concepts and calculations of ratio and proportion
- scales applicable to the axes of the graphs or charts
- types of charts and/or graphs used in the individual's field of work
- upper and lower limits of acceptability applicable to data entered on a graph or chart
- trends indicated by the slope or gradient of a graph
- action to be taken when given trends occur or set limits are approached on graphs or charts
- procedures for drawing 'lines of best fit'
- trends indicated by the graphs or charts drawn.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

- Assessors must:
  - have vocational competency in performing computations at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM13003 Work safely with industrial chemicals and materials

Modification History

Release 1. Supersedes and is equivalent to MEM13003B Work safely with industrial chemicals and materials

Application

This unit of competency defines the skills and knowledge required to work safely with industrial chemicals and materials subject to codes and regulations that are stored and used in a workplace, for example, chemicals, solvents, dangerous materials, acids and noxious waste products in a manufacturing and/or engineering environment.

This unit describes the competencies which are beyond those safety requirements normally applied in the workplace as described in unit MEM13015 Work safely and effectively in manufacturing and engineering, or specifically described in individual units, such as welding.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Evidence of competency is to encompass the satisfactory application of current state/territory work health and safety (WHS) legislation, standards and codes of practice, and the hierarchy of hazard control measures.

Band: **A**

Unit Weight: **2**

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

© Commonwealth of Australia, 2025 Skills Insight

Competency Field

Work health and safety

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Identify job requirements from specifications, job sheets or work instructions
2	**Use personal protective equipment**	2.1	Select correct and appropriate personal protective equipment (PPE) and use correctly based on information in relevant safety data sheet (SDS)
3	**Adhere to emergency procedures**	3.1	Locate emergency equipment and use in accordance with workplace policies and SOPs
		3.2	Demonstrate responses to emergency procedures as detailed in approved safety procedures and instructions
4	**Observe safe working practices**	4.1	Identify hazardous areas and materials and understand and identify special handling procedures and obtain permits to work, if necessary
		4.2	Use all equipment and hazardous materials in accordance with relevant WHS legislation, manufacturers' instructions and SOPs
		4.3	Identify and understand all site-specific safety policies, safety signs, symbols and labels
		4.4	Interpret and apply SDS
		4.5	Use safe manual handling procedures, including equipment

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.6 Ensure decanted chemicals and storage is to state/territory dangerous goods, WHS legislation and requirements
	4.7 Update chemical manifest following SOPs
	4.8 Perform housekeeping duties to maintain a safe working environment according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hierarchy of control measures include the following:	The application of the hierarchy of control follows the six-step preference of control measures to manage and control risk: **1**. elimination **2.** substitution **3.** isolation **4.** engineering control measures **5.** using safe work practices **6.** personal protective equipment (PPE)
PPE includes one (1) or more of the following:	• goggles/face shields • respirators • air supplied or self-contained helmets • safety boots • gloves and appropriate clothes/garments

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Safe working practices include one (1) or more of the following:	• environment is inspected • hazards (and chemical reactive hazards) are assessed and controlled using hierarchy of hazard control • properly maintained PPE is available • emergency management plan is documented/understood • work to be undertaken in safe 'thermal' environments and all possible ignition sources are to be identified and controlled
Storage includes the following:	• only using containers, which includes minor quantities and those in consumer packages, that are suitable for chemical exposure • labelling and/or placarding containers • updating chemical manifests
State or territory legislative requirements include one (1) or more of the following:	• appropriate WHS • dangerous goods acts and regulations • Australian Standards • Australian Code for the Transport of Dangerous Goods by Road and Rail (ADGC) • Safe Work Australia codes of practice

Release 1. Supersedes and is equivalent to MEM13003B Work safely with industrial chemicals and materials

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting appropriate PPE based on data obtained in relevant safety data sheets (DS)
- observing safe working practices including undertaking a risk assessment
- following approved safety procedures and instructions in demonstrating responses to real or simulated emergencies
- performing proper manual handling techniques when shifting and moving industrial chemicals and materials
- ensuring all decanted chemicals are stored in storage containers that are suitable for chemical exposure and are properly labelled and/or placarded
- updating chemical manifests following SOPs
- complying with appropriate state or territory legislative requirements at all times.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- dangerous goods classification and labelling/placarding
- testing and maintenance of PPE
- inherent hazardous properties of the chemicals to be used
- interpretation of the relevant safety data sheets (SDS)
- basic fire-fighting procedures
- site-specific emergency plan procedures
- chemical spill confinement procedures
- dangerous occurrence (near miss) reporting procedures
- hierarchy of controls.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

- Assessors must:
  - have vocational competency in working safely with industrial chemicals and materials at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivelant to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Application

This unit of competency defines the skills and knowledge required to work effectively in manufacturing and engineering work situations, including planning routine work and participating in and following work health and safety (WHS) procedures. The unit applies to working either individually or in a team situation and includes contributing to work-related group activities in a manufacturing or engineering workplace.

This unit covers WHS skills associated with carrying out routine operational activities safely and in compliance with legislative and regulatory requirements.

The unit covers the skills associated with participation in quality systems, communication and cooperation with others. The unit applies to workplaces with informal or formal quality management and improvement systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **2**

Pre-requisite Unit

Nil.

Competency Field

Work health and safety

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Identify goals, objectives and task requirements and clarify with appropriate persons, where required
		1.2	Prioritise task requirements
2	**Review and modify plan**	2.1	Adjust timelines, priorities and other planning components to respond to contingencies, as necessary
		2.2	Re-examine results of work activity against the plan and identify possible improvements to future performance of work tasks
3	**Work effectively with others in the workplace**	3.1	Identify own role and responsibilities and relationship to other employees, including employees performing related/interdependent activities
		3.2	Identify supervisors and other sources of advice and assistance for own work
		3.3	Apply effective interpersonal skills to interact with others and contribute to activities and objectives
		3.4	Review and modify own work progress to complement the work of others
		3.5	Report own work progress to supervisors and where required to fellow employees using standard operating procedures (SOPs)
4	**Follow safe work practices**	4.1	Check for and identify hazards in the work area before and during work
		4.2	Follow procedures for avoiding or controlling hazards already identified in instructions, signage or other workplace communication
		4.3	Identify and report risks and hazards not covered by procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
		4.4 Select, use and maintain relevant personal protective equipment (PPE) by procedures, as required
		4.5 Recognise emergency situations and take appropriate initial emergency action
		4.6 Follow procedures for responding to emergencies
		4.7 Report incidents, injuries and other WHS non-conformances according to procedures
5	**Work within a quality system**	5.1 Follow instructions and procedures and perform duties in accordance with standard operating procedures or quality system requirements
		5.2 Ensure conformance of product and process to specifications
		5.3 Report defects and non-conformance to specifications according to procedures
		5.4 Participate in process improvement procedures, where required
6	**Participate in workplace health and safety procedures**	6.1 Identify workplace health and safety policies and procedures relevant to own work and work area
		6.2 Identify relevant WHS managers and representatives for own work area
		6.3 Provide input to minimise hazards in work area in line with organisation WHS procedures and participative arrangements

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Quality systems include one (1) or more of the following	• quality planning • quality assurance • quality control • quality improvement procedures and processes
Task requirements include one (1) or more of the following:	• timeframe • quality requirements • outcome and performance requirements • job history • checks • reporting requirements • tools and equipment • materials and parts • supporting documents
Specifications include one (1) or more of the following:	• task lists • instructions • manufacturer manuals • diagrams and schematics • sketches • parts lists • SOPs
Planning includes one (1) or more of the following:	• preparing a plan to complete the task • organising task into manageable steps including appropriate order and timing • monitoring the progress of processes related to own responsibilities • applying relevant WHS instructions • collecting, sorting, recording results of work • seeking advice and guidance on setting priorities and timeframes

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- seeking feedback from supervisor, trainer or mentor

Unit Mapping Information

Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivelant to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and avoiding or controlling hazards
- reporting hazards, incidents, injuries and other work health and safety (WHS) non-conformances following SOPs
- recognising and responding to emergencies following SOPs
- identifying and obtaining, instructions and information on job requirements, including one or more of the following:
  - verbal or written job instructions
  - specifications
  - SOPs
  - charts
  - lists
- identifying and responding to contingencies, including:
  - equipment breakdowns
  - non-conforming components
  - safety hazards
- recording information into proforma workplace documents, including:
  - production tally forms
  - quality control forms
  - safety incident forms
- performing assigned tasks and checking outcome of own work for conformance to specifications
- identifying own responsibilities within the workplace quality system
- giving and receiving feedback on own and group work
- seeking assistance from supervisors and mentors.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use and application of personal protective equipment
- basic quality system terminology and concept, including:
  - quality assurance
  - quality control
  - quality improvement
- procedures to be followed in performing own work
- objectives, requirements and specifications to which the individual's work is to comply
- costs and consequences of poor quality
- effective interpersonal skills:
  - effective listening
  - basic speaking skills
  - use of workplace terminology and jargon
  - giving and receiving feedback
  - checking and clarifying task-related information
  - verbal, visual and written instructions
  - appropriate modes and methods of communication
- barriers to effective communication
- sources of technical expertise/assistance
- hazards and control measures associated with workplace activities.

Assessment Conditions

- Assessors must:
  - have vocational competency in working safely and effectively in manufacturing and engineering at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

© Commonwealth of Australia, 2025 Skills Insight

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM14006 Plan work activities

Modification History

Release 1. Supersedes and is equivalent to MEM14005A Plan a complete activity

Application

This unit of competency covers the skills and knowledge required to plan familiar work activities, whilst following established procedures and work health and safety (WHS) policies and procedures of the organisation.

Planning is undertaken by the individual performing the work. Individual plan components may require modification and prioritising to meet job requirements or to respond to unforeseen circumstances.

Where computations are required to be performed unit MEM12024 Perform computations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Identify outcomes and objectives and clarify with appropriate persons
		1.3	Obtain and clarify relevant specifications and procedures
		1.4	Identify and prioritise individual components of the plan
		1.5	Select and use planning tools and techniques according to the requirements of the work
		1.6	Check the plan for accuracy and relevancy to job requirements
2	**Modify plan components**	2.1	Modify the plan components, as necessary, to respond to unforeseen developments
		2.2	Review the outcome of the work activity and, where necessary, identify future improvements to the plan
3	**Follow WHS requirements**	3.1	Comply with WHS requirements at all times
		3.2	Identify WHS hazards and risks and implement appropriate risk control measures in accordance with SOPs
		3.3	Select, use and maintain appropriate personal protective equipment (PPE) in accordance with SOPs
		3.4	Raise WHS issues with designated personnel in accordance with SOPs
		3.5	Report WHS related actions and incidents according to SOPs

Assessment Requirements for MEM14006 Plan work activities

Modification History

Release 1. Supersedes and is equivalent to MEM14005A Plan a complete activity

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- planning a work activity using appropriate planning tools and techniques whilst following established procedures, including work health and safety (WHS) requirements
- checking the plan to ensure accuracy and conformance and modifying the plan components, as necessary, to overcome any unforeseen difficulties or developments
- identifying hazards and implementing appropriate risk control measures and procedures
- selecting, using and maintaining relevant personal protective equipment (PPE)
- evaluating the effectiveness of risk controls measures
- providing proforma WHS reports in accordance with SOPs, as required.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of PPE
- relevant specifications
- sources of advice relating to the objectives, requirements and specifications
- timeframe for activity completion
- quality requirements of the product or service
- techniques and reasons for prioritising of each step in a plan
- modifications that can be made to the plan to respond to unforeseen developments
- risk control measures
- reporting requirements for accidents, incidents and other non-conformances with WHS procedures.

Assessment Conditions

- Assessors must:
  - have vocational competency in planning work activities in a manufacturing and engineering environment at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2025 Skills Insight

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Application

This unit of competency covers the skills and knowledge required to access, organise and communicate information related to production, maintenance or associated processes or tasks that apply in manufacturing, engineering or related environments.

For accessing and recording of data requiring system knowledge and judgement, Unit MEM16008 Interact with computing technology should be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **2**

Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

Competency Field

Communication

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Access information**	1.1	Determine information requirements of tasks and access relevant information from a range of sources
		1.2	Recognise and use workplace terminology correctly

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
2	**Organise and analyse information**	2.1 Interpret information and organise in accordance with work requirements 2.2 Determine relevance and implications for immediate work requirements
3	**Communicate organised information using established workplace methods**	3.1 Identify purpose of communication and appropriate communication method 3.2 Communicate information using established workplace methods

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range of sources include using one (1) or more of the following:

- job instructions
- specifications
- standard operating procedures (SOPs)
- charts
- lists
- documents
- computer data
- drawings
- sketches
- tables

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- technical manuals and/or charts
- other applicable reference material

Determining relevance of information includes one (1) or more of the following:

- checking relevance of information to own work
- selecting task relevant information from a larger document or from a diagram
- preparing an opinion based on analysis of simple facts
- expressing an opinion on the cause of faults

Workplace terminology refers to one (1) or more of the following:

- equipment
- processes
- workplace areas
- staff
- procedures

Established workplace methods include using one (1) or more of the following:

- proforma reports
- data entry
- verbal
- drawings

Purpose of communication includes one (1) or more of the following:

- simple incident/non-conformance report
- maintenance request
- production records
- material usage records
- work records
- other standard workplace records

Assessment Requirements for MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- accessing and recording relevant information from a range of sources
- recognising and using workplace appropriate terminology
- reading, interpreting and following information in workplace documentation
- checking and clarifying information
- organising, categorising and sequencing information
- communicating using appropriate methods and procedures for a variety of situations.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- types of information relevant to the workplace and required tasks
- terminology used in the workplace relevant to own work
- available sources of information
- information analysis techniques appropriate to tasks and position
- methods of categorising and organising information including correct sequencing of information
- methods of recording and communicating information.

Assessment Conditions

- Assessors must:
  - have vocational competency in organising and communicating information at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2025 Skills Insight

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Application

This unit of competency defines the skills and knowledge required to use a range of hand tools for a variety of general engineering applications.

This unit should not be selected if the hand tool is dedicated to a single operation or machine or when a machine-specific/customised tool is used.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Use hand tools for general engineering applications**	2.1	Select hand tools appropriate to the task requirements
		2.2	Use hand tools to produce outcomes that meet job specifications
		2.3	Identify unsafe or faulty tools and mark for repair according to designated procedures before, during and after use
		2.4	Undertake routine maintenance of tools using engineering principles, tools, equipment and procedures
		2.5	Store hand tools safely in appropriate location according to procedures and manufacturers' recommendations

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hand tools include one (1) or more of the following:	• hacksaws • hammers • punches • screwdrivers • sockets • wrenches • scrapers • chisels • gouges • wood planes • files of all cross-sectional shapes and types • hand held taps and dies
Applications include one (1) or more of the following:	• adjusting • dismantling • assembling and finishing of items or components • finishing, cutting, scraping of metallic and non-metallic material to size and shape • tapping/retapping and threading/rethreading new/damaged threads
Drawings include one (1) or more of the following:	• drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents • work specifications that include graphic representations that do not require interpretation
Job specifications include one (1) or more of the following:	• finish • tension • size • shape
Routine maintenance includes one (1) or more of the following:	• cleaning • lubricating • tightening • simple tool repairs • adjustments

Assessment Requirements for MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using hand tools to produce the desired outcome to job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine maintenance and cleaning of hand tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and applications of different hand tools used in a general engineering context, including hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and sizes
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools, including lubricating, tightening, simple tool repairs and adjustments using engineering principles and relevant equipment
- storage location and procedures for a range of hand tools.

Assessment Conditions

- Assessors must:
  - have vocational competency in using hand tools at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

© Commonwealth of Australia, 2025 Skills Insight

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Application

This unit of competency defines the skills and knowledge required to use a range of hand held power tools and fixed power tools for hand held operations used in a variety of general engineering applications.

This unit should not be selected if the power tools used are dedicated to an operation or machine, e.g. nut-runner, air drill and power driver.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use hand tools is required unit MEM18001 Use hand tools should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Use power tools for general engineering applications**	2.1	Select power tools appropriate to the task requirements
		2.2	Use power tools for a determined sequence of operations to produce desired outcomes to job specifications
		2.3	Identify unsafe or faulty tools and mark for repair before, during and after use according to SOPs
		2.4	Undertake operational maintenance of tools according to principles, techniques and SOPs
		2.5	Store power tools safely in appropriate location according to manufacturers' recommendations and SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Power tools include one (1) or more of the following:	• electric or pneumatic/hydraulic drills • grinders • jigsaws • nibblers • cutting saws • sanders • planers • routers • pedestal drills • pedestal grinders
Power tool operations include one (1) or more of the following:	• clamping • alignments • adjustments
Applications include one (1) or more of the following:	• loosening and fastening items or components • shaping, finishing, cutting, grinding of metallic and non-metallic materials and/or tool bits to size and shape
Drawings include one (1) or more of the following:	• drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents • work specifications that include graphic representations that do not require interpretation
Clamping includes one (1) or more of the following:	• multigrips • vices • jigs and fixtures • clamps
Job specifications include one (1) or more of the following:	• finish • size • shape
Operational maintenance includes one (1) or more of the following:	• cleaning • lubricating • tightening

Assessment Requirements for MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using a range of hand held and fixed power tools for a variety of general engineering applications
- following designated procedures for dealing with unsafe or faulty power tools
- undertaking routine maintenance and cleaning of power tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements and cleaning of a range of power tools
- storage location and procedures of a range of power tools.

Assessment Conditions

- Assessors must:
  - have vocational competency in using power tools/hand held operations at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

© Commonwealth of Australia, 2025 Skills Insight

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18003 Use tools for precision work

Modification History

Release 1. Supersedes and is equivalent to MEM18003C Use tools for precision work

Application

This unit of competency defines the skills and knowledge required to use tools to manually produce work to precise dimensions and/or finishes.

It covers performing precision tasks on a range of metallic and non-metallic materials using a variety of tools, instruments and power equipment.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where precision measurement is required unit MEM12003 Perform precision mechanical measurement should also be selected.

Where precision marking out is required unit MEM12006 Mark off/out (general engineering) should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare tools and tooling to produce precision outcome**	2.1	Select processes/techniques appropriate to the precision work to be undertaken, material and specifications
		2.2	Select tools, accessories and consumables appropriate to task, specifications and material
		2.3	Prepare tools/tooling and adjust, as required
3	**Use tools to produce work to precise specifications**	3.1	Prepare the work piece and secure using appropriate method for selected operation
		3.2	Use tools to produce specified outcome to the required accuracy in accordance with SOPs
		3.3	Inspect tools and equipment for safe and proper working order before, during and after use
		3.4	Identify unserviceable tools, repair where appropriate, or mark for repair or disposal, according to prescribed procedure

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	3.5 Undertake inspection and maintenance of tools and equipment according to standard workplace procedures, principles and techniques
	3.6 Store and maintain tools to ensure serviceability

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Techniques include one (1) or more of the following:	• cutting out • drilling • fitting • filing • reaming • lapping • broaching • burnishing • scraping • polishing • hand held grinding • chiselling

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Precision work includes one (1) or more of the following:	• scraping machine beds to precise tolerances • broaching a keyway • hand reaming the bore of a spigot or bush to a positive transition fit with shaft • core drilling (finishing) a blind hole to receive a mating pin • lapping a mechanical seal to fine finish • filing complex angles and mating edges • precision grinding using a flexible drive shaft attachment
Precision outcomes include one (1) or more of the following:	• specified tolerances • allowances • fits • finishes • alignments
Tools or equipment required to achieve precision outcomes include one (1) or more of the following:	• reamers • files • chisels • polishing buffs • lapping plate • broaches • flat, half round and bore scrapers
Tool adjustment includes one (1) or more of the following:	• tool shape • rake angle • clearance angles
Inspection and preventative maintenance include one (1) or more of the following:	• visual checking of leads and connections • sharpening of cutting equipment • repair of associated tools

Assessment Requirements for MEM18003 Use tools for precision work

Modification History

Release 1. Supersedes and is equivalent to MEM18003C Use tools for precision work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- preparing tools for precision outcomes, including selecting processes and engineering techniques, methods and procedures appropriate to the task
- determining and making tool adjustments to produce required outcome, where applicable
- selecting and using precision tools and equipment to produce the desired outcome to meet job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine repair/operational maintenance of tools and equipment and storing in accordance with procedures.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- work to be undertaken and specifications to be achieved
- appropriate tools, processes and equipment required to carry out the work to the required specifications and reasons and procedures for using the selected tools
- engineering principles to be applied during the use of the tools
- manufacturers' specifications of the tools and equipment selected
- procedures for checking tools and equipment for correct and safe operation
- common faults and/or defects in tools and equipment used/selected
- procedures for marking unsafe or faulty tools and equipment for repair
- repairs/operational maintenance that can be made to the tools and equipment used/selected
- procedures for repairing/maintaining the tools and equipment used/selected
- procedures for checking/storing tools and equipment used/selected prior to storage and storage location.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

- Assessors must:
  - have vocational competency in using tools for precision work at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. MEM18006 Perform precision fitting of engineering components

Modification History

Release 1. Supersedes and is equivalent to MEM18006C Repair and fit engineering components

Application

This unit of competency has been developed for Engineering Tradesperson - Mechanical apprenticeship training and the recognition of trade-level skills in precision fitting and mechanical repair.

It defines the trade-level fitting skills and knowledge associated with manufacturing of new parts/components and fitting mechanical engineering components into assemblies or sub-assemblies to specifications and specified tolerances.

The skills and knowledge described by this unit are applied in occupational and work situations associated with fitting, mechanical trade and maintenance work.

Where the knowledge and skills associated with machining or welding are required, the appropriate units should also be selected.

Where additional or higher marking out skills are required unit MEM12006 Mark off/out (general engineering) should also be selected.

Where the knowledge and skills associated with the installation, removal, repair or replacement of mechanical seals is required unit MEM18012 Perform installation and removal of mechanical seals should also be selected.

Where the knowledge and skills associated with high pressure fluid power seals is required unit MEM18020 Maintain hydraulic system components should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

			equipment
		2.5	Determine repair/replacement strategy
3	**Manufacture and/or repair and/or replace faulty components**	3.1	Obtain parts, component and or materials from appropriate sources
		3.2	Source, repair or produce components to meet specifications
		3.3	Inspect components for compliance with specifications
4	**Fit engineering components into assemblies or sub-assemblies**	4.1	Determine the correct fitting requirements and sequence of assembly
		4.2	Prepare and assemble component parts using fastening equipment and methods which ensures conformance to specifications, operational performance, quality and safety
		4.3	Determine lubrication requirements by appropriate means and lubricate, where applicable
		4.4	Perform final adjustments on component assembly to meet operational specifications
5	**Check operation of repaired components/unit**	5.1	Check all components/unit under operational conditions for compliance to specifications
		5.2	Approve any out-of-specification modification/alterations through an appropriate authority and record
		5.3	Perform final modifications/alterations on assembly to meet operational specifications
		5.4	Commission the final assembly and return to service

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Engineering principles and fitting techniques include one (1) or more of the following:

- limits of tolerance
- allowances and clearances
- effects of wear, stress and temperature
- types of fits:
  - clearance
  - transition
  - interference
- press fitting methods
- force fits
- shrink and freeze (expansion) fits
- keyed fits
- taper fits
- lateral and radial forces
- datum and centrelines
- broaching
- drilling
- scraping
- filing
- reaming
- tapping
- threading
- simple gland top-ups in non-critical applications
- routine gland maintenance
- jointing
- gaskets

Assessment Requirements for MEM18006 Perform precision fitting of engineering components

Modification History

Release 1. Supersedes and is equivalent to MEM18006C Repair and fit engineering components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- assessing engineering components visually and dimensionally with appropriate testing and measuring equipment techniques for compliance to specifications
- repairing or replacing faulty components using appropriate tools, equipment and techniques
- assembling components using appropriate fitting techniques and principles
- recording approved modifications/alterations
- inspecting final assembly to check compliance to specifications
- returning the final assembly to service in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- tools and equipment used to dismantle, repair, assemble and fit engineering components
- consequences of having non-compliant components
- types of modifications/adjustments to components being repaired/fitted
- repair methods
- sources of replacement parts
- techniques for the production of engineering components
- assembly and fitting techniques
- machine backlash/recoil
- measuring equipment
- engineering components - shafts, single and multi-throw crankshafts, cams and journals, bearings and bearing surfaces, and keys
- squareness, roundness, concentricity, flatness, straightness, surface finish and angular correctness

© Commonwealth of Australia, 2025 Skills Insight

- purpose, selection criteria and use of gland packing, jointing or gasket materials
- types and application of lubricants
- approval processes for documenting out-of-specification modifications
- commissioning and return to service procedures.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing precision fitting of engineering components at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Assessment must include evidence of 240 hours of workplace practice associated with the skills of this unit in a functioning workplace.
- All aspects of competent application of the unit must be addressed including prerequisite competency units and associated workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge assessment may be either verbal or written but must adequately reflect the knowledge requirements of the unit and its prerequisites in a functioning workplace.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18011 Shut down and isolate machines/equipment

Modification History

Release 1. Supersedes and is equivalent to MEM18011C Shut down and isolate machines/equipment

Application

This unit of competency defines the skills and knowledge required to isolate and shut down machines and equipment and applies to situations that require extensive system knowledge that exclude the straightforward starting/stopping of machinery/equipment through the use of simple switching, including use of emergency switches.

All shutdown and isolation must comply with relevant regulations, Australian Standards and legislative requirements governing isolation and shutdown.

Where interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band:

This unit has dual status and is to be regarded as both a specialisation Band A unit and Specialisation Band B unit for progression to C7 (AQF level IV).

Unit Weight: **2**

Assessment Requirements for MEM18011 Shut down and isolate machines/equipment

Modification History

Release 1. Supersedes and is equivalent to MEM18011C Shut down and isolate machines/equipment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications, charts, lists and other applicable reference documents to shut down and isolate machines and equipment
- shutting down machines/equipment ensuring machine/equipment is depressurised/emptied/de-energised/bled according to procedures
- isolating machines/equipment safely in accordance with SOPs, relevant regulations, Australian Standards and legislative requirements governing isolation and shutdown and verifying safe isolation
- installing safety/security lock-off devices and signage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- operational function of the machine/equipment
- shutdown sequence
- procedures and safety precautions for shutting down and isolating the machine/equipment
- procedures for purging/de-energising the machine/equipment and reasons for doing so
- procedures for verifying machine/equipment shutdown and isolation and reasons for verifying
- relevant regulations, Australian Standards and legislative requirements governing isolation and shutdown
- safety/security lock-off devices and signage to be installed
- reasons and procedures for installing lock-off devices and signage
- reasons for ensuring the machine/equipment is left in a clean safe state.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

- Assessors must:
  - have vocational competency in shutting down and isolating machines/equipment at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. MEM18018 Maintain pneumatic system components

Modification History

Release 1. Supersedes and is equivalent to MEM18018C Maintain pneumatic system components

Application

This unit of competency defines the skills and knowledge required to check pneumatic system components, identify and repair or replace faulty components.

Pneumatic system components are identified and inspected and assessed using fluid power principles to predetermined specifications interpreted from data sheets and circuits diagrams.

Where straightforward removal/replacement of components from a pneumatic system is required unit MEM18055 Dismantle, replace and assemble engineering components and unit MEM18071 Connect and disconnect fluid conveying system components, should be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pneumatic system components include one (1) or more of the following:	• static and dynamic seals • linear and semi-rotary actuators • pressure control valves • directional control valves • flow control valves • normally open and closed timers • counters • pneumatic motors • fluid conductors • other associated equipment

Assessment Requirements for MEM18018 Maintain pneumatic system components

Modification History

Release 1. Supersedes and is equivalent to MEM18018C Maintain pneumatic system components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications, charts, lists, drawings and other applicable reference documents to maintain pneumatic system components
- inspecting and testing pneumatic system components to predetermined specifications using fluid power principles
- checking component parts visually and dimensionally for compliance to specification and, where appropriate, marking faulty parts for repair, replacement or adjustment
- dismantling and repairing faulty system components, including selecting replacement parts from manufacturers'/suppliers' catalogues to site or manufacturers' specifications
- assembling and testing pneumatic components for correct operation and compliance to specifications
- checking the operation of the pneumatic system for compliance to specifications
- completing service reports in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- full range of pneumatic system components and characteristics/operational function of each component
- procedures and equipment for inspecting and testing pneumatic system components
- specifications of each pneumatic system component
- faulty system components and causes of faulty components
- individual components within the pneumatic system
- procedures for repairing pneumatic system components
- procedures for checking pneumatic system operation
- follow-up procedures with respect to repaired/replaced pneumatic system components

© Commonwealth of Australia, 2025 Skills Insight

- reporting/recording procedures.

Assessment Conditions

- Assessors must:
  - have vocational competency in maintaining pneumatic system components at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Assessment must include evidence of 160 hours of workplace practice associated with the skills of this unit in a functioning workplace.
- All aspects of competent application of the unit must be addressed including prerequisite competency units and associated workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge assessment may be either verbal or written but must adequately reflect the knowledge requirements of the unit and its prerequisites in a functioning workplace.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18019 Maintain pneumatic systems

Modification History

Release 1. Supersedes and is equivalent to MEM18019B Maintain pneumatic systems

Application

This unit of competency defines the skills and knowledge required to undertake preventive maintenance checks/adjustments on pneumatic systems, and fault-find, replace, repair or overhaul and recommission pneumatic systems.

It applies to pneumatic systems in industrial and mobile plant and equipment used in manufacturing, agricultural, forestry, mining and transport industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: B

Unit Weight: **4**

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements
MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering
MEM14006	Plan work activities
MEM16006	Organise and communicate information
MEM18001	Use hand tools
MEM18002	Use power tools/hand held operations
MEM18003	Use tools for precision work

© Commonwealth of Australia, 2025 Skills Insight

MEM18006	Perform precision fitting of engineering components
MEM18018	Maintain pneumatic system components
MEM18055	Dismantle, replace and assemble engineering components

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Undertake preventative maintenance checks/adjustments on pneumatic systems**	2.1	Identify system components, assemblies or sub-assemblies and prepare for inspection/preventative maintenance
		2.2	Carry out visual inspection and testing with appropriate test equipment according to fluid power principles, procedures and safety requirements
		2.3	Perform scheduled preventative maintenance tasks, including obvious repairs and adjustments, according to manufacturers' specification using fluid power techniques/practices
3	**Undertake fault-finding on pneumatic**	3.1	Identify designated pneumatic system components and carry out visual inspection of the system for the collection of fault-finding data

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	systems	3.2	Consult system operator and collect additional data, where appropriate
		3.3	Check maintenance reports and preventative maintenance schedules and review for additional fault-finding data
		3.4	Undertake checks and tests
		3.5	Identify and verify faults and malfunctions
		3.6	Document or report faults and malfunctions to designated personnel using appropriate procedures
4	**Repair and/or overhaul pneumatic power system**	4.1	Isolate system or sub-assembly and discharge residue pressure safely in accordance with prescribed procedures or check for correct isolation
		4.2	Tag isolated system or sub-assembly according to SOPs
		4.3	Remove component or sub-assembly from system
		4.4	Dismantle components or sub-assemblies, examine and verify for replacement, repair or overhaul
		4.5	Select replacement items from appropriate sources
		4.6	Rectify faulty items
		4.7	Refit component or sub-assembly items to equipment and test for compliance against specifications
5	**Recommission pneumatic system**	5.1	Re-commission system or sub-assembly according to prescribed procedures and specifications
		5.2	Verify correct operation of the system using fluid power principles and system application techniques
		5.3	Instigate appropriate follow-up procedures
		5.4	Update maintenance records/service reports

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pneumatic systems include one (1) or more of the following:	• pneumatic assemblies/sub-assemblies • stationary/mobile equipment • pneumatic power tools
Test equipment includes one (1) or more of the following:	• leak testers • escape rate gauges • hand held pressure testers • other appropriate equipment
Rectify includes one (1) or more of the following:	• replacement • repair and/or reuse of components

Assessment Requirements for MEM18019 Maintain pneumatic systems

Modification History

Release 1. Supersedes and is equivalent to MEM18019B Maintain pneumatic systems

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting maintenance reports and preventative maintenance schedules
- inspecting and testing pneumatic system components, assemblies or sub-assemblies and carrying out preventative maintenance tasks to predetermined specifications using fluid power principles, tools and equipment
- checking component parts visually and dimensionally for compliance to specification and, where appropriate, marking faulty parts for repair, replacement or adjustment
- consulting with system operator and carrying out visual inspection of pneumatic system and components with respect to the fault being investigated and other anomalies
- undertaking fault-finding and verifying and confirming faults/malfunctions
- isolating and depressurising system or sub-assembly, confirming and using appropriate tagging system according to SOPs
- removing, dismantling and repairing/overhauling faulty system components or sub-assembly, including selecting replacement parts from manufacturers'/suppliers' catalogues, to site or manufacturers' specifications
- assembling pneumatic components or sub-assembly for compliance to specifications, refitting items to equipment and testing for correct operation
- recommissioning pneumatic system/sub-assembly to specifications and verifying correct operation and initiating any follow-up procedures
- updating and completing maintenance records and/or service reports.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- pneumatic principles
- manufacturers' specifications and structure of common pneumatic system components and their constituent parts
- pneumatic system/component faults that can be determined by visual inspection

© Commonwealth of Australia, 2025 Skills Insight

- application of common pneumatic system/component test equipment
- scheduled preventative maintenance tasks
- common pneumatic system and component faults and any previous faults
- any previous maintenance carried out on the pneumatic system/components
- typical checks/tests that can be carried out on pneumatic systems/components and their application
- pneumatic system/component tests and testing techniques
- apparent faults/malfunctions
- documentation/reporting requirements with respect to verified faults/malfunctions
- procedures for initiating repair and/or overhaul of the pneumatic system
- procedures for isolating and depressurising pneumatic systems
- tagging requirements for isolated systems
- appropriate repair/overhaul procedures of pneumatic components
- pneumatic system operational specifications and system recommissioning procedures
- any appropriate follow-up maintenance or operational checks
- maintenance recording/reporting requirements and consequences of inaccurate or incomplete recording/reporting of maintenance/service activities.

Assessment Conditions

- Assessors must:
  - have vocational competency in maintaining pneumatic systems at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Assessment must include evidence of 160 hours of workplace practice associated with the skills of this unit in a functioning workplace.
- All aspects of competent application of the unit must be addressed including prerequisite competency units and associated workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge assessment may be either verbal or written but must adequately reflect the knowledge requirements of the unit and its prerequisites in a functioning workplace.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18020 Maintain hydraulic system components

Modification History

Release 1. Supersedes and is equivalent to MEM18020B Maintain hydraulic system components

Application

This unit of competency defines the skills and knowledge required to check hydraulic system components, identify, and repair or replace faulty components.

Hydraulic system components are identified and inspected and assessed using fluid power principles to predetermined specifications interpreted from data sheets and circuits diagrams.

Where straightforward removals/replacement of components from a hydraulic system is required unit MEM18055 Dismantle, replace and assemble engineering components and unit MEM18071 Connect and disconnect fluid conveying system components, should be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **4**

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements
MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering

MEM18055 Dismantle, replace and assemble engineering components

Modification History

Release 1. Supersedes and is equivalent to MEM18055B Dismantle, replace and assemble engineering components

Application

This unit of competency defines the skills and knowledge required to dismantle, identify faulty components, select replacements and assemble engineering components into assemblies or sub-assemblies in accordance with standard operating procedures (SOPs).

It also applies to the straightforward removal and replacement of pre-manufactured bearings and seals.

Where precision mechanical measurement is required unit MEM12003 Perform precision mechanical measurement should also be selected.

Where fitting techniques and principles are required to assess component condition, and/or modify components to achieve precision fits unit MEM18006 Perform precision fitting of engineering components should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **3**

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Engineering components include one (1) or more of the following:	• couplings • universal joints • pumps employing shafts • pre-manufactured bearings and seals • lubricants • fasteners • gaskets

© Commonwealth of Australia, 2025 Skills Insight

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Appropriate tools and equipment include one (1) or more of the following:	• a range of hand and power tools • bearing pullers • special purpose dismantling and assembly tools

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM18055B Dismantle, replace and assemble engineering components

Assessment Requirements for MEM18055 Dismantle, replace and assemble engineering components

Modification History

Release 1. Supersedes and is equivalent to MEM18055B Dismantle, replace and assemble engineering components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications, charts, lists, drawings and other applicable reference documents to dismantle, replace and assemble engineering components
- dismantling components using appropriate techniques, tools and equipment and marking component parts for reassembly purposes
- checking component parts visually and dimensionally for compliance to specification and marking faulty parts for repair, replacement or adjustment
- selecting replacement parts using manufacturers' catalogues and data
- assembling components using appropriate techniques and principles
- inspecting final assembly for compliance to specifications
- returning the final assembly to service in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- tasks to be performed in accordance with SOPs
- tools and equipment associated with dismantling the components
- procedures for:
  - checking components for conformance to specification and equipment required
  - assembling components and requirements of the assembly in terms of specifications, operational performance, quality and safety
  - lubricating the assembly
  - returning components/assemblies into use and checks to be undertaken during inspection of the final assembly
- specifications of the components to be replaced, including features and/or dimensions
- process of identifying replacement parts from catalogues

© Commonwealth of Australia, 2025 Skills Insight

- packing and sealing materials.

Assessment Conditions

- Assessors must:
  - have vocational competency in dismantling, replacing and assembling engineering components at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18071 Connect and disconnect fluid conveying system components

Modification History

Release 1. Supersedes and is equivalent to MEM18071B Connect/disconnect fluid conveying system components

Application

This unit of competency defines the skills and knowledge required to safely remove and replace a range of fluid conveying components and assemblies, and inspect/test fluid conveying assemblies.

It applies to repairs and replacement to pressure and suction systems on fixed and mobile plant/equipment, including marine, heavy plant and manufacturing plant applications with system pressures range of 10.5 MPa to 35 MPa, ranging up to 70 MPa.

Where interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

This unit should not be selected when unit MEM18055 Dismantle, replace and assemble engineering components or unit MEM27017 Maintain, fault find and rectify hydraulic systems for mobile plant has already been selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **2**

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13003	Work safely with industrial chemicals and materials

© Commonwealth of Australia, 2025 Skills Insight

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information
MEM18001	Use hand tools

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, job sheets or work instructions
2	**Disconnect fluid conveying components and assemblies**	2.1	Carry out safety/risk assessment, identify potentially hazardous situations/conditions and position safety devices
		2.2	Note, record and label lay out of fluid conveying conductor
		2.3	Identify faulty component/assembly using specific troubleshooting procedures, reference documents and fluid power principles
		2.4	Disconnect and remove fluid conveying components and assemblies using appropriate tools, equipment, procedures and techniques
		2.5	Seal open system adequately with standard or special purpose sealing materials

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
3	**Obtain replacement parts**	3.1	Select replacement parts from manufacturer catalogues and other relevant reference sources according to international standards and specifications
4	**Test and store components**	4.1	Pressure test fluid conveying assemblies and individual components according to industry and manufacturer standards and using fluid power principles
		4.2	Assess and note condition
		4.3	Clean, seal and store components/assemblies according to industry and manufacturer standards
5	**Connect fluid conveying components and assemblies**	5.1	Check connections and prepare for reconnection
		5.2	Connect components and assemblies to equipment to specifications using appropriate techniques
		5.3	Remove tagged out equipment, signage and safety blocking devices according to SOPs
		5.4	Check equipment and fluid conveying systems and functional test, including in-situ and high pressure test rigs for correct operation according to manufacturer and industry standards
6	**Report results**	6.1	Follow reporting and certification procedures
		6.2	Complete all relevant information

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Fluid conveying applications include one (1) or more of the following:	• hydraulic • pneumatic • water • gas • acids/corrosives/alkalines • abrasives • petroleum • other dry/wet media
Potentially hazardous situations/ conditions include one (1) or more of the following:	• accumulated pressure • contamination • fluid handling
Components and assemblies include one (1) or more of the following:	• high pressure seals • seats • hoses • tubes • pipes • fittings • connectors • adaptors and anchors • other associated attachments

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM18071B Connect/disconnect fluid conveying system components

Assessment Requirements for MEM18071 Connect and disconnect fluid conveying system components

Modification History

Release 1. Supersedes and is equivalent to MEM18071B Connect/disconnect fluid conveying system components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications and obtaining relevant data with respect to connecting and disconnecting fluid conveying system components
- identifying potential hazardous situations and carrying out a risk assessment and isolating, tagging, locking off and displaying signage using appropriate procedures
- locating faulty component, neutralising pressures and disconnecting and removing fluid conveying components and assemblies using appropriate techniques, tools and equipment and sealing open system with appropriate sealing materials
- selecting replacement components from manufacturer catalogues and other reference sources
- performing pressure testing on fluid conveying assemblies and individual components using fluid power principles and undertaking condition and serviceability assessment and storing components/assemblies according to industry standards
- connecting components and assemblies to equipment, removing tagged out equipment, signage and safety blocking devices
- testing equipment and fluid conveying systems using appropriate test equipment and rigs for compliance to manufacturer and industry standards
- completing routine reports and certification procedures.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- different sources of stored energy and their applications
- work health and safety (WHS) responsibilities of customer and self
- safety/security lock-off devices and signage and procedures and reasons for installing lock-off devices and signage
- basic functions of fluid power systems, including:

© Commonwealth of Australia, 2025 Skills Insight

  - effects of heat and contamination
  - pressures
  - flow rates and temperatures
  - hose strength and size
  - effect of media on hoses
  - test
  - operational and burst pressures
- techniques and safety practices for pressure testing
- tools, techniques and procedures for removal of components
- troubleshooting techniques
- standard and specific sealing materials and techniques
- different fluid conveying parts and their function
- techniques and safety practices for pressure testing
- criteria for assessment
- methods of cleaning, sealing and storage
- techniques and criteria for connection and confirming connection
- techniques, procedures and safety practices. including neutralisation of pressures.

Assessment Conditions

- Assessors must:
  - have vocational competency in connecting and disconnecting fluid conveying system components at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM30021A Prepare a simple production schedule

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers preparing a simple production schedule in manufacturing. For skills associated with determining steps in manufacturing process see Unit MEM30018A (Undertake basic process planning).

Application of the Unit

Application of the unit	This unit applies to all manufacturing and engineering workplace environments. It covers the scheduling of production that involves several interconnected manufacturing processes. All work is carried out under supervision. **Band**: **0** **Unit Weight**: **0**

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify production requirements	1.1. The production processes to be used are identified from instructions and specifications provided. 1.2. Customer requirements in terms of volume, delivery time and arrangements and quality are obtained from supervisor or other appropriate sources. 1.3. Customer and process requirements are analysed to determine production requirements.
2. Develop an activity plan production requirements	2.1. Production requirements are divided into activity elements. 2.2. A network diagram is constructed. 2.3. The critical path is determined. 2.4. The latest start/earliest finish and slack time are determined for activity elements to meet requirements. 2.5. Assistance and approval from supervisor is obtained.
3. Prepare the production schedule	3.1. A production schedule is prepared which lists: 3.1.1. customer requirements 3.1.2. time constraints 3.1.3. production requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.1.4. machine availability and capability 3.1.5. inventory requirements 3.1.6. procurements 3.1.7. supply capacities 3.1.8. contingency analysis. 3.2. A simple bill of materials required is prepared to assist in control of materials. 3.3. Schedule is depicted using a Gantt chart or similar graphical display. 3.4. Schedule allows for future changes to improve performance. 3.5. Assistance and approval from supervisor is obtained.
4. File and issue the schedule	4.1. The schedule is reviewed and tested with appropriate personnel. 4.2. The schedule is referred to appropriate personnel for implementation. 4.3. All supporting documents are provided for implementation. 4.4. The schedule is filed/issued according to workplace procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • prioritising • communicating • managing time • organising • documenting • using project management tools • analysing • calculating

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents • planning and sequencing operations • checking and clarifying task-related information
Required knowledge

Look for evidence that confirms knowledge of:
• basic knowledge of:
  • types of production
  • jobbing production
  • batch production
  • process production
  • Just in Time procedures
  • cellular manufacture
  • scheduling
  • interpreting customer requirements
  • machine capability and selection
  • Gant charts
  • contingency plans
  • introduction to project planning techniques
  • introduction to PERT/CPM diagrams
  • introduction to critical path networks
• hazards and control measures associated with preparing a simple production schedule, including housekeeping
• safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare a simple production schedule.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and to be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with preparing a simple production schedule, or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Simple production schedule	• Applies to the preparation of a schedule for the manufacture of a single component or single assembly function; or to operations for a single small production work unit or production cell • The schedule will involve only a small number of constraints or variables

MSFFM3012 Set up, operate and maintain sawing machines

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers setting up, operating and maintaining sawing machines using their full technical potential and capacities. It encompasses and builds on the machines and tasks covered in unit *MSFFM2010 Set up, operate and maintain basic static machines*.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture Making

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	Prepare for work	1.1 Work instructions are used to determine job requirements, including design, quality, materials, equipment and quantities
		1.2 Cutting list and job specifications are read and interpreted
		1.3 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
		1.4 Material for machining is selected and inspected for quality
		1.5 Sawing machines, cutting tools and jigs are identified and checked for safe and effective operation

© Commonwealth of Australia, 2025 Skills Insight

		1.6	Procedures are determined for minimising waste material
		1.7	Procedures are identified for maximising energy efficiency while completing the job
2	Set up machines	2.1	Safety equipment, including emergency stops, gauges, guards and controls are checked
		2.2	Saw settings and adjustments are made in accordance with job requirements and machine and tool manufacturer instructions
		2.3	Trial runs are conducted to check saw operation, accuracy and quality of finished work
		2.4	Necessary adjustments are made to saw settings
3	Operate machines	3.1	Saw start-up procedure is carried out in accordance with manufacturer instructions
		3.2	Material to be sawed is positioned in accordance with manufacturer instructions, tooling requirements, safe handling procedures and standard workplace operating procedures
		3.3	Saw is operated in accordance with its designed capacity and purpose, and to manufacturer recommendations
		3.4	Saw operation is monitored to ensure product quality and output
		3.5	Waste quantities are checked and minimised
		3.6	Items that do not meet quality requirements are recycled or discarded according to workplace procedures
		3.7	Problems with the required work and/or the operation of the saw are identified and reported to appropriate persons
4	Finalise operation and maintain equipment	4.1	Work area is cleaned, hand and/or power tools and equipment are cleaned, maintained and stored in accordance with workplace procedures
		4.2	Machinery is cleaned and left in a safe mode
		4.3	Faulty and/or defective equipment is tagged and reported in accordance with workplace practices
		4.4	Unused hardware is collected and stored for re-use or

© Commonwealth of Australia, 2025 Skills Insight

	disposal following workplace procedures
4.5	Waste and scrap materials are dealt with following workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Sawing machines include:	• cross-cut saws • circular rip saws • sliding table panel saws and scroll-band saws • numerically controlled (NC) beam saws • wall saws • band re-saws and straight line edgers
Materials to be machined include:	• solid timber • manufactured board • laminates • plastics • acrylics • synthetic solids
Unit scope includes:	• reading and interpreting plans • deep ripping • cutting angles and compound angles • trenching flat panel components • shaping components • using jigs and fixtures • breaking down boards • maintaining machine parts and saw blades

© Commonwealth of Australia, 2025 Skills Insight

Unit context includes:	• WHS requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods code, and local safe operating procedures • work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements • work requires individuals to demonstrate some discretion, judgement and problem solving in the set up and operation of machines • competency may be demonstrated in workplaces involved in the manufacture of solid timber furniture, domestic furniture, commercial furniture, kitchen and bathroom cabinets and/or furniture components
Tools and equipment include:	• machine-specific tolls • screwdrivers • hammers • spanners • jigs and fixtures
Materials include:	• sawing machine consumables • oils and lubricants and trial materials
Personal protective equipment includes:	• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	• workplace procedures relating to the use of tools and equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFM3020B Set up, operate and maintain sawing machines.

Assessment Requirements for MSFFM3012 Set up, operate and maintain sawing machines

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Read and interpret cutting lists and job specifications to prepare for work
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify, set up, operate and maintain at least four (4) different types of saws, using safety cut-outs and guards
- Conduct operator maintenance on the machines and related equipment
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Types, characteristics, uses and limitations of sawing machines
- Sawing processes and techniques
- Characteristics of materials and uses of products produced
- Workplace guidelines regarding acceptable tolerance levels
- Workplace safety policies and procedures
- Procedures for reporting machinery faults and material defects

Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2025 Skills Insight

  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to sawing machinery, standard operating procedures and unprocessed materials.

disposal following workplace procedures

4.5 Waste and scrap materials are dealt with following workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Routing and shaping machines include:

- spindle moulding machine
- overhead or inverted pin routing machine

Material to be routed and shaped include:

- solid timber
- manufactured board
- plastics and laminates

Unit scope includes:

- setting up fences and guides
- maintaining cutters
- selecting feed and spindle speeds
- the use of feed unit
- safety pressure devices/guards
- linear, convex and concave shaping
- rebating
- moulding and grooving material
- using jigs and fixtures

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods code, and local safe operating procedures
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation

- Read and interpret cutting lists and job specifications to prepare for work
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage and wastage of goods, equipment and products
  - maintain required production output and product quality
- Identify, set up and operate to their full capabilities, at least two (2) different types of routing and shaping machines, including the use of safety cut-outs and guards
- Conduct operator maintenance on the machines and related equipment
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Types, characteristics, uses and limitations of routing and shaping machines
- Routing and shaping processes and techniques
- Characteristics of materials and uses of products produced
- Workplace guidelines regarding acceptable tolerance levels
- Workplace safety policies and procedures
- Procedures for reporting machinery faults and material defects

Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2025 Skills Insight

  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to routing and shaping machinery, standard operating procedures, and unprocessed materials.

MSFGG2011 Glaze and reglaze residential windows and doors

Modification History

Release 1. Supersedes and is equivalent to MSFGG2008 Glaze and re-glaze residential windows and doors.

Application

This unit describes the skills and knowledge required to install glass to metal or timber doors, windows and other frames. It includes residential glazing and reglazing confined to simple windows such as fixed, sliding, casement, awning and double hung or louvres and doors such as sliding, hinged, pivot and bi-fold. Work may involve removal and installation of designed glass panels.

This unit applies to glaziers working in accordance with pre-determine work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

N/A

Unit Sector

Glass and Glazing

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify work requirements	1.1 Identify requirements for glass type and fixing method from review of documentation and communication with the customer 1.2 Identify and follow work health and safety requirements 1.3 Plan a logical work sequence suited to the job and workplace procedures
2. Prepare for work	2.1 Take accurate site measurements and establish clearance and wedge requirements

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	2.2 Select glass and frames, and check for type, size and imperfections against job requirements 2.3 Select glass type and fixing method in accordance with Australian Standards and advise customer if requirements impact on glass ordered 2.4 Select and check tools and equipment for suitability, serviceability and safety prior to use 2.5 Prepare fixing and sealing materials by mixing or cutting to length, in accordance with job requirements
3. Identify site conditions and constraints	3.1 Recognise on-site hazards and constraints and take corrective action in accordance with regulations and workplace requirements 3.2 Apply covering material to protect existing fixtures and fittings in accordance with workplace procedures 3.3 Identify characteristics of the window or door which may affect the finished job and take corrective action
4. Perform glazing	4.1 Safely remove and dispose of glass from existing frame in accordance with workplace procedures 4.2 Prepare frame to receive glass through check of size against specifications, removal of sealant remains, and surface preparation 4.3 Cut glass to size in accordance with work requirements 4.4 Fix glass to the frame using the selected method and in accordance with established industry procedures and Australian Standards 4.5 Use solvents and sealants in accordance with manufacturer recommendations and Australian Standards 4.6 Remove excess sealing material and clean glass and frame with suitable cleaning agents after fixing
5. Complete work	5.1 Check completed installation for compliance with specifications and rectify any deficiencies 5.2 Clean and store tools, equipment and materials in accordance with workplace procedures 5.3 Clean work area and leave in a safe condition, and dispose of or recycle waste in accordance with workplace protocols 5.4 Accurately complete required workplace documentation

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to MSFGG2008 Glaze and re-glaze residential windows and doors.

Assessment Requirements for MSFGG2011 Glaze and reglaze residential windows and doors

Modification History

Release 1. Supersedes and is equivalent to MSFGG2008 Glaze and re-glaze residential windows and doors.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed each of the following tasks at least once:
  - cut glass in accordance with Australian Standard AS1288
  - calculated glazing clearance and cutting size
  - hacked out and/or removed beads and glass safely from timber windows and doors
  - prepared glazing rebates and channels prior to installation
  - removed and disassembled aluminium window sashes and doors and removed glass safely
  - installed and/or adjusted unique, spiral or spring balances on double hung windows
  - taken template and glazed irregular shaped openings
- glazed or reglazed each of the following at least once in accordance with AS1288:
  - timber putty faced window sashes or door panel
  - timber beaded:
    - sidelight
    - fixed panel
    - pivot or hinged or bi-fold doors
  - aluminium framed channel glazed door or window
  - aluminium framed beaded door or window with wedge rubbers
  - louvre blades.
  -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant Australian Standards, their purpose and key provisions:
  - AS 1288: Glass in buildings - Selection and installation
  - AS/NZS 2208: Safety glazing materials in buildings
  - AS/NZS 4667: Quality requirements for cut-to-size and processed glass
- organisational customer communication standards and protocols

© Commonwealth of Australia, 2025 Skills Insight

- workplace safety system requirements related to the glazing of window and doorframes
- work flow requirements in relation to fitting glass
- qualities and characteristics of glass, including hazards and handling requirements for:
  - annealed glass
  - coated glass and insulated glass units
  - laminated glass patterned glass
  - tinted and heat reflective glass
  - toughened glass
  - wired glass
- qualities and characteristics of different frame types and how this impacts the glazing process, including:
  - plastic
  - aluminium
  - steel
  - solid timber
- factors that affect the fixing of glass and how this impacts on work, including:
  - compliance
  - specification
  - type of glass and frame
  - security requirements for specific locations
  - sealing methods
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials, including:
  - glass handling and lifting equipment
  - hack-out knives
  - nail punches
  - pop rivet guns
  - pry bars
  - putty knives
  - rubber mallets
  - sealant guns
  - spiral balancer
  - sprig and/or diamond guns
  - tape measures
  - tungsten wheel glass cutters
  - vinyl cutters and rollers
- types, characteristics, safe use and limitations of other materials, including:
  - adhesives
  - gaskets
  - glazing tapes

© Commonwealth of Australia, 2025 Skills Insight

  - sealants
  - setting blocks
- factors for consideration for products that include sash cords
- glazing techniques for window and door frames, the types of problems that may occur and how to avoid and respond, including:
  - channel glazing
  - beaded glazing
  - double glazing
  - heal and toe glazing
- quality indicators for glazed windows and doors
- documentation requirements for completed glazing work.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations and/or frames requiring glazing and reglazing
  - frames and glass as specified in the Performance Evidence
  - equipment, tools and materials to perform tasks specified in Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMENV672 Develop workplace policy and procedures for environmental sustainability

Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Application

This unit of competency covers the skills and knowledge required to develop and implement a workplace sustainability policy, including the modification of the policy to suit changed circumstances.

This unit of competency applies to team leaders/supervisors/managers who are required to develop approaches to environmental sustainability within workplaces, including the development and implementation of policy.

It includes communicating with relevant stakeholders, developing and monitoring sustainability policies and reviewing and improving sustainability policies.

This unit of competency applies to all sectors of the manufacturing industry. It may also be applied to all sections of an organisation, including the office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Develop workplace sustainability policy	1.1	Define the scope of sustainability policy
		1.2	Identify and consult with stakeholders during the policy development process
		1.3	Review the environmental sustainability strategies relevant to all stages of work covered by the policy
		1.4	Make recommendations for policy options based on likely effectiveness, timeframes and cost
		1.5	Develop policy that reflects the organisation's commitment to sustainability as an integral part of the business planning, and as a business opportunity
		1.6	Agree upon appropriate methods of implementation
2	Communicate the policy	2.1	Promote the policy, including its expected outcome to key stakeholders
		2.2	Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned
3	Implement the policy	3.1	Develop and communicate procedures to help implement the policy
		3.2	Employ strategies for implementation of policy in resource efficiency
		3.3	Establish recording systems for tracking changes in sustainability approaches and assign responsibilities
4	Review policy	4.1	Record outcomes and provide feedback to key personnel

© Commonwealth of Australia, 2025 Skills Insight

implementation		and stakeholders
	4.2	Investigate success or otherwise of policy
	4.3	Monitor records to identify trends that may require remedial action to implemented policy and procedures
	4.4	Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)

© Commonwealth of Australia, 2025 Skills Insight

- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027

Assessment Requirements for MSMENV672 Develop workplace policy and procedures for environmental sustainability

Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- scope and develop an integrated sustainability policy and procedure within an enterprise
- raise awareness among stakeholders and those involved in implementing the policy of expected outcomes
- develop a workable implementation strategy
- ensure policy implementation is monitored, reviewed and modified where

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant policy development and implementation processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMPCI102 Apply effective work practices

Modification History

Release 1. Supersedes and is equivalent to MSAPCI102A Apply effective work practices

Application

This unit of competency covers the knowledge and skills needed to apply effective work practices in an industry. It includes planning, organising and completing work, communicating effectively, working with others, solving problems and adapting to change.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

This unit has application in qualifications for all occupations in the manufacturing industry and it should be regarded as an integrating unit. When delivered/assessed as part of a qualification, this unit must be customised to ensure its relevance to real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Plan, organise and complete daily work	1.1	Identify and interpret work instructions and priorities in consultation with supervisor
		1.2	Determine and map out an appropriate work plan or daily routine
		1.3	Determine, collect and organise materials, resources and information needed to complete work, including work health and safety (WHS) requirements
		1.4	Complete work tasks within designated timelines, quality standards and instructions
2	Communicate effectively	2.1	Identify appropriate lines of communication with supervisors, colleagues and customers
		2.2	Use effective communication skills and numeracy skills to gather and convey information
		2.3	Demonstrate appropriate non-verbal behaviour and communication
3	Work with others	3.1	Identify work roles of self and others in the workplace
		3.2	Undertake individual responsibilities and duties in a positive manner and in a range of situations to promote cooperation and good relationships
		3.3	Respect customers and colleagues who have diverse backgrounds
4	Use workplace technology	4.1	Select appropriate workplace technology and use according to workplace and manufacturer guidelines and instructions

© Commonwealth of Australia, 2025 Skills Insight

		4.2	Inspect workplace technology is to ensure it is not damaged and is working properly and take precautions to reduce risks
		4.3	Take appropriate action when problems with workplace technology occur
		4.4	Care for workplace technology according to workplace and manufacturer guidelines and instructions
5	Solve work problems	5.1	scope of individual responsibility to rectify them
		5.2	Ask for assistance from key personnel when appropriate
		5.3	Report workplace problems, as required, using appropriate workplace procedures
6	Adapt to change	6.1	Identify, clarify and adapted to new work requirements or situations
		6.2	Consider and apply possible practical or creative options to deal with workplace challenges
		6.3	Demonstrate a willingness to be open to and trial new ideas and techniques

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Work instructions Work instructions include one or more of the following:

© Commonwealth of Australia, 2025 Skills Insight

- job sheets
- patterns
- plans
- drawings
- designs
- verbal directions
- customer orders

Effective communication skills

Effective communication skills include one or more of the following:

- listening and understanding
- speaking clearly and directly
- reading independently
- writing to audience needs
- group interaction
- the chain of command in which to report
- questioning to obtain information and/or clarify information and understanding
- routine oral reporting
- routine written reporting
- participation in routine meetings in the workplace
- basic recording of discussions

Numeracy skills

Numeracy skills are those which related to the job or specific task and involve the operations of multiplication, division, addition, subtraction, percentages and/or fractions, and include those related to one or more of the following:

- estimates of the quantities of materials and resources required to complete a work task
- money (e.g. cost, invoices and change)
- volume
- weight
- time
- length and distance
- speed
- area
- perimeter

Diverse backgrounds

Diverse backgrounds include, but are not limited to, one or more of the following:

© Commonwealth of Australia, 2025 Skills Insight

- ages
- genders
- culture
- personal values or beliefs
- race
- religion
- political persuasion

Workplace technology

Workplace technology includes one or more of the following:

- business equipment, such as fax machines, telephones, photo copiers, cutting machines, cameras and voice recorders
- computer technology, such as laptops, PCs, digital cameras, zip drives, modems, scanners and printers
- other technology, such as machinery, hand tools, lifts and security systems

Workplace technology p**recautions**

Workplace technology precautions include, one or more of the following:

- routine checking of equipment
- regular back-ups of data
- keeping a log book of detected faults
- checking that repairs have been carried out
- using appropriate clothing

Appropriate actions

Appropriate actions include one or more of the following:

- contacting a supervisor, manager
- contacting the manufacturer
- contacting a service provider
- reporting and documenting the problem

Key **personnel**

Key personnel include one or more of the following:

- supervisor
- manager
- fellow colleagues
- team members

Workplace

Workplace procedures include, but are not limited to, one or more of

© Commonwealth of Australia, 2025 Skills Insight

procedures the following:

- organisational policies and guidelines
- common organisational practice
- performance plans
- WHS policies, procedures and programs
- relevant legislative requirements in areas such as WHS, privacy, anti-discrimination, environmental protection and trade practices
- relevant licence requirements and related regulations

Work instructions Work instructions include one or more of the following:

- job sheets
- patterns
- plans
- drawings
- designs
- verbal directions
- customer orders

Assessment Requirements for MSMPCI102 Apply effective work practices

Modification History

Release 1. Supersedes and is equivalent to MSAPCI102A Apply effective work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- plan a daily routine to complete required workplace tasks
- follow workplace work health and safety (WHS) and environmental protection procedures and responsibilities
- apply relevant workplace procedures, policies, instructions and regulations
- identify and correctly use equipment, tools and other technology required to complete workplace tasks
- complete work systematically with required time management and attention to detail without damage to goods, equipment or personnel
- complete work activities in collaboration with others in accordance with instructions, procedures and applicable regulations
- work cooperatively and collaboratively with others to complete tasks
- apply relevant ethical practices and codes of practice in the course of work activities
- recognise limitations, ask for help and seek clarification or information about work requirements and procedures
- take prompt action to report and/or rectify any workplace problems in accordance with workplace procedures
- recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions among staff and others
- use literacy skills in regard to written and verbal communication in the workplace
- use basic interpersonal and communication skills, including listening and questioning and receiving feedback
- adapt and modify activities depending on differing workplace contexts and environment
- carry out calculations that are required when completing work tasks, including the four basic mathematical operations
- keep required records of workplace activities
- apply relevant industrial or other legislative requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures, policies and instructions

© Commonwealth of Australia, 2025 Skills Insight

- workplace structures and the roles and responsibilities of individuals and team/group members
- typical problems in the workplace and appropriate action and solutions
- systems and equipment used in the workplace and the instructions, processes and precautions for their use
- basic principles of teamwork in the workplace.

Assessment Conditions

- Assessment must occur in a simulated environment or a workplace.
- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function. Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time and for a range of manufacturing contexts.
- Assessors must:
  - as a minimum, satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

MSMSUP200 Achieve work outcomes

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP200A Achieve work outcomes

Application

This unit of competency covers the skills and knowledge required to identify and implement actions to achieve workplace targets and to suggest ways to improve processes.

This unit of competency applies to personnel who are required to achieve quality standards and productivity targets within the scope of own job.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other team members and supervisors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	**Identify key** aspects **of the process**	1.1	Outline the properties of materials/components used in the process
		1.2	Describe the process relevant to own work area

© Commonwealth of Australia, 2025 Skills Insight

		1.3	Identify the safety and environmental requirements relevant to this process
		1.4	State aspects of this process which require careful monitoring
2	**Implement actions to achieve targets**	2.1	Identify production targets for own work area and work role
		2.2	Describe techniques used to measure performance against workplace targets/standards
		2.3	Identify factors impacting on achieving targets
		2.4	Identify potential inefficiencies in the process
		2.5	Achieve work outcomes
3	**Participate in an improvement activity in accordance with organisation procedures**	3.1	Investigate a problem
		3.2	Identify likely causes of problem
		3.3	Suggest options for improvement
		3.4	Discuss a proposed improvement with appropriate people

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

© Commonwealth of Australia, 2025 Skills Insight

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents

Known solutions are drawn from one or more of:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Assessment Requirements for MSMSUP200 Achieve work outcomes

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP200A Achieve work outcomes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify workplace targets and performance measures
- identify and minimise inefficiencies
- identify and control hazards
- work to achieve targets
- apply known solutions to routine problems
- participate in process improvement teams/activities.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including relevant standard operating procedures (SOPs)
- potential sources of wastage/production inefficiencies
- process, normal operating parameters and product quality to recognise non-standard situations
- criteria for evaluating and selecting improvements, including:
  - benefits
  - costs
  - safety implications
  - limitations of equipment, process and materials.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include participation in an improvement activity which provides sufficient evidence of the requirements of all the elements and performance criteria
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Application

This unit describes the skills and knowledge required to use structured process improvement tools to solve process and other problems. It describes the broad application of in-depth and rigorous structured problem-solving techniques to identify opportunities for improvement.

This unit applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit and/or equipment.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify the problem	1.1 Identify variances from desired operating and/or output parameters and quality 1.2 Define the extent, cause and nature of the problem by observation

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	and investigation 1.3 State and specify the problem clearly
2. Determine fundamental cause of problem	2.1 Select problem-solving tool appropriate to the problem and the context 2.2 Identify possible causes based on experience and the use of problem-solving tools and analytical techniques 2.3 Develop possible cause statements 2.4 Determine fundamental cause
3. Determine corrective action	3.1 Determine all possible options for resolution of the problem 3.2 Identify strengths and weaknesses of possible options 3.3 Determine corrective action to remove the problem and possible future causes 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures 3.5 Develop recommendations for ongoing monitoring and testing
4. Communicate recommendations	4.1 Prepare report on recommendations 4.2 Present recommendations to appropriate personnel 4.3 Follow up recommendations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
  - specific, measurable, achievable, relevant, timed (SMART) objectives
  - resource requirements
  - methods for reaching objectives
  - timelines
  - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS015002A Develop strategies for more sustainable use of resources

Modification History

Not applicable.

Unit Descriptor

This unit of competency covers identifying strategies for more sustainable uses of resources. The unit includes the identification of waste as defined in lean manufacturing (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

Application of the Unit

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations.

The unit assumes that a decision to attempt to achieve more sustainable use of resources has already been made. The unit covers the skills needed for developing a strategic approach to resource use at the organisation or value chain level.

The unit does not cover the technical skills required to implement specific initiatives that may be identified as part of the strategic plan. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation's processes. Where required, appropriate mathematics and statistics units should be selected from the MEM05 Metal and Engineering Training Package or other appropriate Training Package.

Where the carbon footprint (or water footprint or similar) of an enterprise or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint.

It would typically be undertaken by a manager or technical specialist who had a major responsibility for sustainability as part of a broader work role, or sustainability may be their primary work responsibility.

For specific techniques covering the auditing of water, energy, emissions and transport, refer to relevant sustainability audit units.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

1 Quantify resource consumption	1.1 Identify all significant resources used by process
	1.2 Identify consumption measurements available for each resource
	1.3 Determine consumption for each resource
2 Quantify resource loss	2.1 Determine theoretical consumption of each resource
	2.2 Compare theoretical consumption with actual consumption
	2.3 Determine loss (emission) for each resource
3 Recommend strategies for reducing waste	3.1 Short-list high emission process steps
	3.2 Analyse process to identify emission steps or locations
	3.3 Determine root cause of emission
	3.4 Investigate methods for reducing emission
	3.5 Develop strategies and recommendations for improvement
4 Prepare resources use audit report	4.1 Identify purpose of report and key stakeholders
	4.2 Compile data, implications and recommendations
	4.3 Consult with stakeholders as appropriate
	4.4 Draft and present report

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

Required knowledge includes:

- the concept of muda. Muda is usually summarised under the headings of the 'seven wastes' which include:
  - overproduction
  - delay/waiting
  - transportation
  - over processing
  - excess inventory
  - unnecessary motion
  - defects and rework
- methods of material balancing
- methods of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping manufacturing processes and resources consumed
- methods of measuring actual resource usage
- concept of muda and muda categories
- muda reduction methods and strategies
- AS/NZS ISO 14000 Environmental Management Standards

Required skills include:

- calculating, manipulating and interpreting numerical data, including establishing series, means and averages, absolute and proportional material and energy usage per product or process, correlations and rates of change
- analysing and conducting root cause analysis
- calculating theoretical consumption of resources as the minimum amount of resources per product or process step as defined by the customer multiplied by the rate of production or process
- calculating actual consumption of resources per unit (e.g. per product, operation, site or value chain)
- writing technical reports
- consulting with technical experts and internal and external stakeholders

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

Overview of assessment	A person who demonstrates competency in this unit must be able to identify and quantify resources and waste in a process, recommend strategies to reduce waste and prepare a report with recommendations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include: • quantifying significant resource consumption and emission using materials balancing • identifying and consulting with stakeholders • developing strategies for reducing emissions • preparing and presenting a resources use report.
Context of and specific resources for assessment	• This unit of competency is to be assessed in the workplace or a simulated workplace environment. • Assessment should emphasise a workplace context and procedures found in the candidate's workplace. • This unit of competency may be assessed with other relevant units addressing sustainability at the enterprise level or other units requiring the exercise of the skills and knowledge covered by this unit. • The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.
Method of assessment	• In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. • Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. • The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work-like environment.
Guidance information for assessment	

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

Waste	Waste in this unit is used in the broader sense of 'muda' as used in lean manufacturing and the competitive manufacturing units of competency developed by Manufacturing Skills Australia (MSA)

Emissions	Emissions means all materials which enter the process/site but which do not leave as part of the product and so includes:
	• known or able to be physically measured emissions of:
	  • gases, vapours and fumes
	  • liquids
	  • solids
	• assumed emissions through material balancing
	• assumed emissions through energy loss, including heat, friction and other energy conversion yield losses

Theoretical consumption	Theoretical consumption of resources is the minimum amount of resources per product as defined by the customer multiplied by the rate of production
Actual consumption	Actual consumption is the amount of a resource entering the value chain
Significant resources	Significant resources includes resources which are deemed to be significant because they are: • high volume • high value • high environmental significance • important to the product or process • covered by legislation or regulation • important to the enterprise It need not include resources which are incidental to the activity and which are not otherwise significant

MSS015011 Conduct a sustainability energy audit

Modification History

Release 1. Supersedes and is equivalent to MSS015011A Conduct a sustainability energy audit.

Application

This unit of competency covers conducting an audit for the specific resource of energy in an organisation or part or all of its value chain and to prepare recommendations for a reduction of, and more efficient use of, energy.

This unit applies inside organisations and their value chains. The unit has been developed with manufacturing operations as a focus. However, because of the range of organisations in a typical manufacturing value chain it may also be applied to other types of organisations (e.g. supplier of goods or services or a customer).

The energy audit may be conducted to assist in regulatory compliance or as part of a strategy to improve the sustainability of manufacturing operations. The emphasis in the unit is on informing decision making in regards to energy use in a value chain or site.

A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this, or sustainability may be their primary work responsibility. The manager or technical specialist may undertake this alone or as part of a team.

The technical measurement of operational performance or measurement of emissions or other environmental impact is not covered by this unit. However, there is a requirement to present and organise data. The complexity of this requirement will vary according to the type and scale of the organisation’s processes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify all sources and uses of energy in process**	1.1	Identify all sources of energy external to the site.
		1.2	Identify all sources of energy within the site.
		1.3	Identify all uses of energy by process unit.
		1.4	Identify energy type and intensity required by each process unit.
2	**Calculate theoretical use of energy**	2.1	Calculate theoretical net use of energy by type and intensity for each process unit.
		2.2	Calculate overall energy balance for process/site.
		2.3	Evaluate the need for energy consumption by process and units within the process compared to alternative processes/units.
3	**Measure actual use of energy**	3.1	Determine actual net energy use for overall process/site.
		3.2	Determine actual net energy use for each process unit.
		3.3	Calculate difference between theoretical and actual energy use by unit and overall.
		3.4	Identify actual energy type used by each process unit.
4	**Develop strategies for**	4.1	Rank units by difference between theoretical and actual energy use.

© Commonwealth of Australia, 2025 Skills Insight

	reducing the use of energy	4.2	Rank units by actual energy use.
		4.3	Identify units using higher intensity energy than required.
		4.4	Develop strategies to reduce energy consumption and/or use lower intensity energy.
5	**Prepare a recommendation for an energy use reduction strategy**	5.1	Consult with key stakeholders.
		5.2	Identify strategies required to meet regulatory or similar requirements.
		5.3	Rank strategies by benefit/cost ratio.
		5.4	Short-list preferred energy reduction strategies.
		5.5	Prepare recommendation for improving energy usage.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Energy/energy type includes one or more of	• operational heating and cooling • motive energy • lighting • waste energy.
Energy intensity includes one or more	• temperature • power

Assessment Requirements for MSS015011 Conduct a sustainability energy audit

Modification History

Release 1. Supersedes and is equivalent to MSS015011A Conduct a sustainability energy audit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one or more processes, to:

- define appropriate boundaries for the sustainability energy audit
- conduct energy balance analyses for a site, value chain or process
- identify high energy use/waste units/areas
- undertake benefit/cost ratio analyses
- ensure improvement strategies proposed reflect stakeholder needs and regulatory environment.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to audit energy usage including knowledge of:

- nature of energy wastage
- energy balancing techniques for process and process steps (sometimes known as heat balancing)
- methods of measuring actual process amount/flows
- waste reduction/energy efficiency strategies and methods along with costs, effectiveness and alternative strategies (e.g. efficient lighting, efficient window glass and efficient motors)
- cost-benefit analysis
- relevant legislation, regulation and protocols.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
    - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

© Commonwealth of Australia, 2025 Skills Insight

  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where a sustainability energy audit is conducted for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS015022 Develop strategies for more sustainable use of resources

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to identify strategies for more sustainable uses of resources. The unit includes the identification of waste (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability.

Where the carbon footprint (or water footprint or similar) of an organisation or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint. A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this, or sustainability may be their primary work responsibility.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Assessment Requirements for MSS015022 Develop strategies for more sustainable use of resources

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- quantified significant resource consumption and emission using materials balancing for at least 1 organisation or value chain, including developing strategies for reducing emissions and preparing and presenting a resources use audit report.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the concept of muda (waste) and muda categories
- muda reduction methods and strategies
- methods and uses of material balancing
- methods and uses of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping processes and resources consumed
- methods of measuring actual resource usage
- AS/NZS ISO 14001 Environmental Management Systems or its authorised replacement.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS402001 Apply competitive systems and practices

Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Application

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Customers include one or more of:

- internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable
- final customers used as the basis for the identification of value and waste.

Suppliers include one or more of:

- internal suppliers
- external suppliers sufficiently close to the individual's work as to be easily identifiable.

Procedures (written, verbal, visual, computer based, etc.) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions

© Commonwealth of Australia, 2025 Skills Insight

- any similar instructions provided for the smooth running of the plant.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Assessment Requirements for MSS402001 Apply competitive systems and practices

Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to always apply competitive systems and practices to their own job to:

- identify own place in the value chain relevant to their job
- use competitive systems and practices tools and thinking
- recommend improvements in product and/or process.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- customer requirements and their role in fulfilling them
- the value chain for products they make and their place in it
- identification of muda (waste) and its reduction.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of competitive systems and practice in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402040 Apply 5S procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Duplicated performance Criteria removed. Equivalent outcome.

Application

This unit of competency covers the skills and knowledge required by an individual to apply 5S procedures to their own job and work area. The unit assumes the individual has a particular job and an allocated work area and that processes in the work area are known by the individual.

This unit applies to an individual in an organisation who works in an operational position as part of production, maintenance, logistics, etc. The unit can also apply to individuals in other organisations who have a discrete role and responsibility for individually managed processes.

This unit applies where an organisation has decided to embark on a competitive systems and practices strategy and as part of this has adopted the philosophy of 5S as one of the tools to improve performance. The employee needs to apply 5S to their job and work area and maintain the housekeeping and other standards set by 5S.

This unit requires the application of skills associated with planning and organising, problem solving and self-management, in order to identify and implement 5S housekeeping practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Sort needed items from unneeded**	1.1	Identify all items in the work area.
		1.2	Sort items to achieve deliverables and value expected by downstream and final customers.
		1.3	Sort items required for regulatory or other required purposes.
		1.4	Place any non-essential item in an appropriate place other than the workplace.
		1.5	Regularly check that only essential items are in the work area.
2	**Set the workplace in order**	2.1	Identify the best location for each essential item.
		2.2	Place each essential item in its assigned location.
		2.3	After use immediately return each essential item to its assigned location.
		2.4	Regularly check that each essential item is in its assigned location.
3	**Shine the work area**	3.1	Keep the work area clean and tidy at all times.
		3.2	Conduct regular housekeeping activities during shift.
		3.3	Ensure the work area is neat, clean and tidy at both beginning and end of shift.
4	**Standardise activities**	4.1	Follow procedures.
		4.2	Follow checklists for activities, where available.
		4.3	Keep the work area to specified standard.
5	**Sustain the 5S system**	5.1	Clean up after completion of job and before commencing next job or end of shift.
		5.2	Identify situations where compliance to standards is unlikely and take actions specified in procedures.

© Commonwealth of Australia, 2025 Skills Insight

5.3 Inspect work area regularly for compliance to specified standard.

5.4 Recommend improvements to lift the level of compliance in the workplace.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

5S includes all of:

- sort

© Commonwealth of Australia, 2025 Skills Insight

- set in order
- shine
- standardise
- sustain.

Sort includes all of:

- separating necessary from unnecessary items (equipment and supplies)
- keeping only what is absolutely necessary for the work processes that comprise the job
- disposing of (or relocating) all other items.

Set in order includes all of:

- assigning required equipment and materials appropriate locations in the work area
- consideration of frequency of use, ergonomics and work health and safety (WHS)
- provision of facilities to maintain the locations.

Shine includes one or more of:

- keeping the work area clean at all times which should be carried out to a regular daily schedule against allowed time, usually at the end of the day or of a particular process
- keeping work area organised
- noting any signs of wear, damage, leakage, safety risks or other issues that require immediate attention.

Best location includes one or more of:

- changes to the layout of furniture
- arrangement of equipment
- provision of services
- location of personnel.

Standardising includes one or more of:

- activities that help maintain the order and the housekeeping standards
- using procedures and checklists developed from a procedure.

Sustain includes one or more of:

- making sure that daily activities are completed every day regardless of circumstance
- cleaning up after a job
- undertaking inspections, including:
- informal inspections carried out often, at least weekly
- formal inspections carried out at least monthly

© Commonwealth of Australia, 2025 Skills Insight

- generating continuous improvement actions from daily activities
- following up specific actions to generate continuous improvement.

Items in work area include one or more of:	• tools • jigs/fixtures • materials/components • plant and equipment • manuals • personal items (e.g. bags, lunch boxes and posters) • safety equipment and personal protective equipment (PPE) • other items which happen to be in the work area.
Procedures (written, verbal, visual, computer based, etc.) include one or more of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Equivalent to MSS402040 Apply 5S procedures Release 1.

Assessment Requirements for MSS402040 Apply 5S procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Duplicated performance Criteria removed. Equivalent outcome.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, in one (1) or more allocated areas, to:

- implement and sustain 5S in own workplace
- identify own tasks and responsibilities
- contribute suggestions for improvement.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- purpose of 5S in the workplace
- meaning and application of 5S steps to own workplace and job
- principles of efficient workplace organisation
- identifying waste (muda)
- procedures for recommending improvements.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of 5S procedures in a work area where 5S has not previously been undertaken, or, demonstration of sustaining 5S principles in a work area that has already undergone prior 5S procedures
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402083 Use planning software systems in operations

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to access planning software (often known as Enterprise Resource Planning (ERP), Materials Resource Planning (MRP and MRPII), and often by a proprietary name, to make routine business decisions required of the person as a regular part of their job.

This unit applies to an individual in an organisation using a planning software system and who must interface with that system. The unit applies to both accessing information from the planning software system and using it as an aid to decision making. This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Use interface**	1.1	Identify terminals relevant to own workstation and functions
		1.2	Use peripherals to access system

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
		1.3	Navigate through system and screens to find program menu and data relevant to own work
		1.4	Identify and input information on own work processes at required frequency and to required detail
		1.5	Access message section and read and acknowledge messages
		1.6	Identify problems and make suggestions for improvements to relevance of planning software to own work
2	**Access information**	2.1	Identify work processes that require information from planning software system
		2.2	Obtain data and information on current operations from the planning software system
		2.3	Identify the status of items in the value stream
		2.4	Access and read historical data and information
		2.5	Read and interpret information and identify and prioritise actions required in response to information
3	**Take action in accordance with procedures**	3.1	Take action in response to information obtained from planning software
		3.2	Follow up to ensure anticipated results have occurred
		3.3	Record adjustments and variations
		3.4	Identify any learning needs to use planning software and seek support

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS402083 Use planning software systems in operations

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit and:

- used planning software systems for at least 3 different purposes, utilising outcomes to aid decision making.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- planning software system and operation, including:
  - terminal locations and types
  - security and access arrangements
  - information held in planning software relevant to own work
  - data collection methods for operations in work area
  - assistance arrangements for users of planning software
  - business activities exercised with the planning software system
- procedures for recommending improvements
- data and information sources.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
  - planning software systems.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403001 Review competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403001A Implement competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by an individual to review competitive systems and practices in their own work in a way that integrates with others in the team or work area who are also implementing competitive systems and practices. The unit focuses on the holistic application of competitive systems and practices to achieve improved performance in own work and in activities with others in the team or work area that contribute to improving customer benefit. Depending on the operations or processes in the team or work area the unit may also include interaction with other teams and work areas.

The unit is suitable for individuals who have formal responsibility for the work of others, such as team leaders. It is also suitable for individuals, such as technicians and tradespeople, who must integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation.

The unit applies to the areas of cost, quality, delivery, safety/environment, and employee capability, including continuous reviewing of performance against these five areas in liaison with other relevant people. Improvement initiatives in these five areas are usually developed and implemented with the support of technical support staff. Whereas other units may emphasise the competence to use one or more competitive practices, this unit emphasises the ability to advance on all five key areas over a moderate time period.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to identify opportunities to make improvements and maximise performance. Communication, the ability to work in a team and planning and organising skills are required to implement improvements and address any conflicts that arise. This unit also requires an ability to identify appropriate technology, and to consider and integrate feedback on how personal performance can be improved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Contribute to the improvement of the operations system in team or work area**	1.1	Identify key performance indicators (KPIs) for area of operations.
		1.2	Review competitive systems and practices to improve health, safety and environment (HSE) performance of self and others.
		1.3	Review competitive systems and practices to maximise quality consistency.
		1.4	Review competitive systems and practices and identify any skill and training issues that need to be addressed to improve capability of self and others.
		1.5	Review competitive systems and practices to maximise customer benefit/cost ratio.
		1.6	Review competitive systems and practices to reduce lead time to delivery within the scope of authority and responsibility.
		1.7	Work with relevant stakeholders to resolve conflicts which arise from implementation of competitive systems and practices.
		1.8	Select improvements which will deliver the greatest overall benefit for the resources required/available without reducing current performance on individual factors.
2	**Implement improvements**	2.1	Implement the chosen improvement/s.
		2.2	Check the selected improvements improve the system as

Assessment Requirements for MSS403001 Review competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403001A Implement competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to contribute to and implement improvements on one (1) or more occasions and to improve performance in:

- cost
- quality
- delivery
- safety/environment
- employee capability.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- techniques for monitoring cost, quality, delivery, safety/ environment and employee capability
- muda (waste)
- kaizen (continuous improvement)
- key performance indicators (KPIs), their use and problems
- cost components of products (goods or services)
- techniques for identifying and improving employee capability.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403010 Facilitate change in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by individuals responsible for facilitating change processes in an organisation implementing competitive operational practices.

This unit applies to individuals who facilitate the change process resulting from implementing one or more competitive systems or practices. This implementation may also be associated with other changes, such as the introduction of new products, processes or equipment. The unit will usually apply to individuals whose responsibility is at the team, area or section level rather than the whole organisation. The responsibility may be formally designated or be informal, as in mentoring and assisting fellow employees.

This unit assumes that consultation and agreement on the implementation of the competitive systems and practices and other associated changes has already occurred and the nature and extent of the change has been agreed.

This unit does not cover the negotiation of change in a formal industrial relations sense but does cover the skills needed to identify real or potential change implementation issues, including those that may need to be referred to formal consultation and/or dispute settlement procedures.

This unit has a strong emphasis on planning, encouraging and facilitating in a changing environment within the organisation, including using appropriate communication, teamwork, problem solving, initiative and self-management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Define nature and impact of change for designated area and processes**	1.1	Identify the organisation's aims and objectives for the competitive systems and practices techniques related to the change process.
		1.2	Identify opportunities for implementation of change within work area.
		1.3	Determine impacts of change for work area, including potential benefits and impacts on own work and work of fellow employees.
2	**Identify key performance indicators (KPIs)**	2.1	Liaise, where required, with managers, engineers and other staff responsible for designing and/or implementing change.
		2.2	Identify KPIs for own work responsibility and that of the work area.
		2.3	Communicate KPIs to fellow employees.
		2.4	Check that data collection and processing are appropriate for KPIs.
		2.5	Raise and resolve issues related to KPIs with relevant personnel.
3	**Liaise with key stakeholders**	3.1	Identify key stakeholders impacted by the change.
		3.2	Communicate with key stakeholders within scope of authority.

© Commonwealth of Australia, 2025 Skills Insight

		3.3	Identify and address issues and concerns of each stakeholder if within scope of authority.
		3.4	Develop and/or locate information required to address key concerns.
		3.5	Refer issues and concerns outside of scope of authority to appropriate personnel.
4	**Develop a strategy to help implement change**	4.1	Identify or develop a work plan for implementing change.
		4.2	Make information required to support change available to team members.
		4.3	Communicate/circulate draft work plan to other employees in work area, supervisors, technical experts and other appropriate personnel for comment.
		4.4	Assess suggested changes and incorporate into work plan, where appropriate.
5	**Implement change**	5.1	Obtain authorisation to commence change implementation in accordance with organisation procedures.
		5.2	Implement change in accordance with work plan and organisational work health and safety (WHS) and consultation procedures.
6	**Monitor implementation of change**	6.1	Maintain open communication channels with all stakeholders during implementation.
		6.2	Monitor KPIs during implementation.
		6.3	Encourage and facilitate improvement suggestions of team members.
		6.4	Identify areas requiring improvement in change implementation.
		6.5	Make improvements to implementation according to organisation procedures.

Assessment Requirements for MSS403010 Facilitate change in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more changes, to:

- identify competitive systems and practices in own workplace
- identify changes to own work and work area flowing from implementation of relevant competitive systems and practices
- consult with stakeholders regarding changes and issues
- develop a strategy to implement required changes
- make suggestions for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- features of competitive operational practices in own work area
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation procedures
- planning and implementation strategies
- employee assistance mechanisms within organisation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency

© Commonwealth of Australia, 2025 Skills Insight

  - must include facilitating change in relation to the implementation of competitive operational practices in own work area
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS404054 Apply statistics to operational processes

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

Application

This unit describes the skills and knowledge required to gather and analyse process data to support the control of processes and operations. It includes interpretation of sampling procedures, frequency distributions, random and non- random variations in data/control charts; use of control limits to determine whether monitored processes are in control; and communicating this information to others.

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Collect process data	1.1	Read and interpret sampling scheme
	1.2	Obtain measurements in accordance with standard sampling procedures

© Commonwealth of Australia, 2025 Skills Insight

	1.3	Handle data in accordance with procedures
2. Interpret data	2.1	Plot data on control chart
	2.2	Identify random and non-random patterns of results
	2.3	Identify results outside the control limits
	2.4	Identify situations requiring action
	2.5	Take action in accordance with procedures
	2.6	Calculate cost of non-conformance
3. Calculate control limits	3.1	Consult stakeholders to determine appropriate limits
	3.2	Calculate and revise control limits
	3.3	Plot limits on control chart and complete all records in accordance with procedures
	3.4	Explain impact of limit to stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

Assessment Requirements for MSS404054 Apply statistics to operational processes

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- gathered, analysed and interpreted process data to monitor and control at least 2 operational processes.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose of sampling and measurement
- sampling methods to be used
- methods of calculating mean and standard deviation and their purpose in statistical control
- concept of limits, including 1, 2, 3 and 6 sigma limits
- types of control charts and their applications to different types of process and product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process causes of variation
- stable and unstable processes
- causes of stability and instability in the process
- calculation of control limits and process capability and the applications of different control limits
- standard distribution curve and confidence limits.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS404060 Facilitate the use of planning software systems in a work area or team

Modification History

Release 1. Supersedes and is equivalent to MSS404060A Facilitate the use of planning software systems in a work area or team

Application

This unit of competency covers the skills and knowledge required to facilitate the use of planning software in an organisation in an individual's work area or team. These systems are known by various generic names, such as Enterprise Resource Planning (ERP), Materials Resource Planning (MRPII, MRP III etc.) or by proprietary names.

This unit applies to an individual who will access the planning software system for their own work, but will also need to provide support and organise skill development programs for their team or work group members. The individual will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to facilitate the use of the planning software system. The planning software system will be used routinely in the work of the team or work group.

This unit primarily requires the application of skills associated with using communication technology and supporting team use of planning software. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that planning software is used efficiently. This requires aspects of learning and self-management to ensure own performance and that of the team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify scope of planning software**	1.1	Identify categories of information held by planning software.
		1.2	Identify information categories relevant to team and area processes.
		1.3	Identify range of information able to be provided to planning software by team or work group.
		1.4	Identify range of information able to be provided to team or work group by planning software.
2	**Communicate using the planning software system**	2.1	Send and receive information using planning software.
		2.2	Send and receive messages using planning software.
3	**Make decisions using planning software**	3.1	Interrogate the planning software system to find required current, historical or predicted information.
		3.2	Take actions appropriate to the information in accordance with procedures.
4	**Monitor the use of planning software**	4.1	Routinely monitor planning software information.
		4.2	Review performance and use of planning software with team.
5	**Support others to use planning software**	5.1	Regularly communicate with team or other work group members, both using planning software and face to face.
		5.2	Identify improvements required.
		5.3	Take action to implement improvements in accordance with procedures.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Planning software integrates a range of business information including one or	• sales/order taking • finance/accounting • logistics • maintenance • human resources

© Commonwealth of Australia, 2025 Skills Insight

more of:	• production.
Information and message categories include one or more of:	• orders • production/operations processes • scheduling (e.g. daily/weekly) • finance and accounting • human resources (e.g. rosters, reserves, training completed and scheduled) • quality requirements • customers • suppliers.
Stages where value stream actions occur include one or more of:	• sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support.

Assessment Requirements for MSS404060 Facilitate the use of planning software systems in a work area or team

Modification History

Release 1. Supersedes and is equivalent to MSS404060A Facilitate the use of planning software systems in a work area or team

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, to facilitate and/or provide support on three (3) or more occasions, to:

- identify team or work group area information requirements and relate to planning software categories
- lead and motivate others in using planning software
- ensure information sent to planning software is accurate and appropriate
- obtain regular and one-off information from planning software
- make decisions using planning software generated information.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- hierarchy of planning software system and operation
- information available from/through the planning software system
- query facilities and information analysis capabilities offered by planning software
- support/training/skill development mechanisms available for access by team members.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include facilitating and/or support for teams or work groups using planning software systems in own workplace

© Commonwealth of Australia, 2025 Skills Insight

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
    - relevant VET or other qualification/Statement of Attainment AND/OR
    - relevant workplace experience
- Currency can be demonstrated through:
    - performing the competency being assessed as part of current employment OR
    - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405001 Develop competitive systems and practices for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405001A Develop competitive systems and practices for an organisation

Application

This unit of competency covers the skills and knowledge required to develop new strategies for competitive systems and practices or make improvements to existing systems and practices.

This unit applies to a manager, technical specialist or similar in an organisation implementing competitive systems and practices, or in an organisation wishing to embark on the competitive systems and practices path. The person needs to be able to analyse the needs of the organisation and develop strategies and systems for effective implementation and continuous improvement of competitive systems and practices in the organisation. They may be developing competitive systems and practices for the first time for this organisation, or may be developing/improving existing systems and practices.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to determine effective competitive systems and practices strategies for the organisation. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine appropriate analytical techniques**	1.1	Liaise with key stakeholders to determine objectives of operations strategy.
		1.2	Examine current operations to determine major areas requiring improvement
		1.3	Compare possible strategies, techniques and tools against organisation needs.
		1.4	Select possible strategies, techniques and tools.
		1.5	Consult with key stakeholders to confirm selected strategies, techniques and tools.
2	**Develop competitive systems and practices strategies**	2.1	Estimate benefit/cost ratio for major stakeholders and the value stream overall.
		2.2	Determine preferred operations strategy.
		2.3	Examine and adapt strategy to organisation needs and priorities.
		2.4	Examine and adapt competitive systems and practices techniques and tools required to implement strategy.
		2.5	Negotiate with key stakeholders to develop an implementation plan.
		2.6	Determine key information and performance indicators required.
3	**Implement strategy**	3.1	Determine data collection required.
		3.2	Identify and evaluate methods of collecting and processing required data.

© Commonwealth of Australia, 2025 Skills Insight

		3.3	Determine hardware and other resources required.
		3.4	Evaluate skill needs required.
		3.5	Ensure all resources/training are available and completed.
		3.6	Implement strategy.
4	**Monitor implementation of strategy**	4.1	Compare information/performance indicators with desired levels.
		4.2	Liaise with key stakeholders regarding strategy issues.
		4.3	Identify areas requiring adjustment.
		4.4	Make required adjustments.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring

Assessment Requirements for MSS405001 Develop competitive systems and practices for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405001A Develop competitive systems and practices for an organisation

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop the competitive systems and practices of an entire organisation, department or equivalent and to:

- determine analytical techniques which are currently appropriate for the organisation
- develop/improve the strategies used
- implement and monitor the new/improved strategy.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop the organisation's competitive systems and practices, including knowledge of:

- competitive systems and practices tools which may be relevant
- kaizen and kaizen blitz techniques
- muda identification and minimisation
- benefit/cost determination and application
- matching and prioritising strategies to organisation goals.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project aimed at developing an organisation's competitive systems and practices for an operational workplace.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405004 Develop business plans in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Application

This unit of competency covers the skills and knowledge required to develop business plans in an organisation implementing competitive systems and practices. This unit applies to an individual in an organisation implementing competitive systems and practices (e.g. a production/plant manager, purchasing/technical officer or similar) who is required to develop a section business plan to meet the requirements of the overall strategic plan of the organisation. The plan includes the impact on the value stream and other critical competitive systems and practices factors. Due to competitive pressures this may be a reasonably frequent activity and can occur at any time over the business cycle. The plan may be in response to a specific change, or it may be a plan for the next period.

This unit assumes that up-to-date information about the organisation's role in the value stream is available.

This unit primarily requires the application of skills associated with gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to develop an effective and measurable business plan. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine purpose of plan**	1.1	Confirm reason for developing plan and expected outcomes from plan.
		1.2	Confirm purpose of plan with all relevant stakeholders.
		1.3	Check expected outcomes from plan with overall strategic plan for organisation.
		1.4	Identify any potential areas for conflict between proposed plan and strategic directions.
		1.5	Negotiate with relevant stakeholders to resolve issues.
2	**Develop objectives and strategies**	2.1	Draft objectives for business plan.
		2.2	Draft strategies to achieve these objectives.
		2.3	Determine implications for value stream.
		2.4	Determine capital or workplace layout/organisation implications for objectives and strategies.
3	**Develop plans to meet objectives and strategies**	3.1	Negotiate with relevant stakeholders over implications for objectives and strategies.
		3.2	Liaise with relevant stakeholders to develop plans to meet objectives.
		3.3	Determine relevant key performance indicators (KPIs) for plan.
		3.4	Check KPIs are appropriate for purpose of plan.
		3.5	Check plan will deliver planned purpose.
		3.6	Map plan to changed value stream.

© Commonwealth of Australia, 2025 Skills Insight

		3.7	Adjust plan to optimise value stream.
		3.8	Validate plan with relevant stakeholders.
4	**Monitor the implementation of the plan**	4.1	Release plan for implementation.
		4.2	Check the key progress points against the key stages of the plan.
		4.3	Note any discrepancies.
		4.4	Take action to ensure correct implementation of plan.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Objectives include performance in one or more of:

- sales
- profit
- quality
- work health and safety (WHS)
- environment
- competitive systems and practices
- human, physical, financial and environmental/resource use.

Strategies to meet objectives include one or more areas:

- human and industrial relations practice
- material/component and resources use
- sustainable environmental practices
- sales and marketing
- financial
- regulatory compliance.

Relevant stakeholders include one or more of:

- other team members
- other workers
- management
- technical specialists
- other members of the value stream.

Customer requirement stages where value stream actions may occur include one or more of:

- sales outlet/representative
- information gathering, data analysis and research
- product design
- raw material sourcing
- intermediate processing
- final assembler/ collation/preparation
- support services (e.g. accounting, finance and legal)
- storage and delivery to customer
- after market support.

Assessment Requirements for MSS405004 Develop business plans in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop one (1) or more business plans covering an organisation, department or section (or similar) and to:

- determine the purpose of the plan
- draft objectives of the plan and strategies for achieving them
- develop a plan which uses the strategies to deliver the objectives and optimise the value stream
- monitor the implementation of the plan and make changes as needed.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop and modify a business plan, including knowledge of:

- techniques and purposes of developing business plans
- parameters for business plans, including scope, period and risk
- relationship between business plans and competitive systems and practices
- impacts of alternatives on the value stream
- key performance indicators (KPIs) and the characteristics of good (optimises the whole) and poor KPIs
- risk mitigation, including business, quality, sustainability and other risks.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real business plan development for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405086 Develop sustainable energy practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required by an individual to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. This includes efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of organisations.

The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and muda (waste) with the muda being further categorised into necessary muda and unnecessary muda. Strategies for eliminating or minimising energy muda are covered with cost benefit analyses being required for strategies.

This unit applies to a manager, technical specialist or similar who is required to use problem solving, initiative, planning and organising skills to develop plans for efficient energy use.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse energy**	1.1	Identify all energy consuming processes

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	use	1.2	Determine quantity and nature of energy consumed
		1.3	Analyse energy consumed and generated in different parts of the process
		1.4	Determine source of energy consumed in process
2	**Develop energy conservation plans**	2.1	Determine the efficiency of use of energy by all energy consuming processes
		2.2	Determine causes of low efficiency of use
		2.3	Develop plans for increasing the efficiency of energy use
		2.4	Calculate cost benefit of plans
3	**Develop energy trading plans**	3.1	Compare energy generating activities with energy consuming activities
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities
		3.3	Develop plans for energy trading
		3.4	Calculate cost benefit of plans
4	**Investigate alternative sources of energy**	4.1	Write a specification for energy required
		4.2	Identify sources for that energy
		4.3	Calculate cost benefit for alternative energy sources
5	**Develop plans for more efficient energy use**	5.1	Compare cost benefit for different alternatives developed
		5.2	Rank proposals based on cost benefit compared to limited resources

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	5.3	Check proposals meet regulatory requirements
	5.4	Recommend proposals for improving energy efficiency
6 **Implement selected plans**	6.1	Liaise with relevant people to implement energy efficiency plans
	6.2	Follow through to ensure implementation occurs
	6.3	Monitor implementation and adjust
	6.4	Check new energy usage to ensure improvements have occurred

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS405070 Develop sustainable energy practices.

Assessment Requirements for MSS405086 Develop sustainable energy practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed sustainable energy practices for at least 1 organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of data and required calculations
- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- sustainability regulatory and legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy
- muda (waste) including: necessary and unnecessary

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405088 Plan, implement and monitor energy management

Modification History

Release 1. Supersedes but is not equivalent to MSS405086 - Develop sustainable energy practices.

Application

This unit describes the skills and knowledge required to review energy use, and develop objectives, strategies and action plans for improved energy management in an organisation. It includes implementation and permanent monitoring as well as consultation and collaboration with key stakeholders throughout the process.

This unit applies to operational and technical specialists, managers or similar who combine detailed knowledge of energy management with critical thinking, communication, and planning and organisational skills to develop and implement plans for improved energy management. Energy management responsibilities may be part of a broader work role or a primary job role. In some cases, the individual may work as an external advisor.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Sustainable Operations

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review energy use	1.1 Identify current energy sources used in different business areas and processes 1.2 Identify and analyse areas of significant energy consumption from operational data 1.3 Identify and analyse the internal and external factors that

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	significantly affect energy use and consumption in the organisation 1.4 Identify energy generating activities and their potential for use in the organisation 1.5 Investigate and compare costs and benefits of current and potential energy sources for the organisation 1.6 Identify, prioritise and record opportunities for improving energy performance based on analysis
2. Engage with stakeholders	2.1 Identify key stakeholders and their role in influencing or improving energy management 2.2 Develop approaches to engage with stakeholders based on their business perspectives 2.3 Use and adapt technical information about energy and its management to meet stakeholder needs 2.4 Identify and use opportunities to consult and collaborate with stakeholders about current and potential energy performance
3. Establish energy performance objectives and indicators	3.1 Establish and articulate energy objectives based on analysis and consultation 3.2 Align energy management objectives with broader organisation objectives and priorities 3.3 Develop energy management performance indicators that support objectives
4. Develop energy management strategies and action plans	4.1 Identify and develop strategies that support energy management objectives 4.2 Align strategies with broader organisation goals and priorities 4.3 Complete an initial feasibility review from existing operational and financial data 4.4 Identify and document proposed operating and administrative framework that clearly defines actions, responsibilities, timelines and evaluation methods
5. Implement strategies and action plans	5.1 Identify priority areas for action and seek further business case information to support implementation 5.2 Set up systems and procedures that support strategies and action plans in consultation with relevant stakeholders 5.3 Establish communication channels and provide information to key

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	stakeholders to support implementation 5.4 Support implementation activities in accordance with agreed plans
6. Monitor and report on strategies and action plans	6.1 Monitor activities and identify progress and shortfalls against energy performance objectives and indicators 6.2 Determine and act on the need for adjustments based on progress made 6.3 Obtain performance monitoring data and report on energy management in accordance with agreed plans

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Reading skills to interpret varied types of operational information
- Writing skills to develop planning, administrative and operational documentation
- Oral communication skills to engage with others about potentially complex and interrelated business issues
- Numeracy skills to analyse energy costs and consumption; interpret business financial information
- Teamwork skills to develop and implement collaborative approaches to energy management
- Technology skills to create and format planning, administrative and operational documentation

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes but is not equivalent to MSS405086 - Develop sustainable energy practices.

Assessment Requirements for MSS405088 Plan, implement and monitor energy management

Modification History

Release 1. Supersedes but is not equivalent to MSS405086 - Develop sustainable energy practices.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned, implemented and monitored energy management strategies for 1 organisation, area of operation or process that include consideration of:
  - alternative sources
  - efficiency and reduction of carbon emissions
  - waste management.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types and sources of internal and external information for energy management planning:
  - current and potential energy sources
  - production data
  - current usage levels
  - process needs
  - regulatory environment
  - business goals
- methods for identifying improvement opportunities
- key stakeholders and engagement strategies
- potential objectives for energy management
- how to develop energy management performance indicators
- how to align energy management objectives with broader organisation priorities
- links between energy and other aspects of sustainability
- methods of analysing energy efficiency for different types of energy
- ways of categorising energy use
- key principles and features of different energy management strategies
  - alternative sources
  - conservation
  - efficiency and reduction of carbon emissions
  - trading schemes

© Commonwealth of Australia, 2025 Skills Insight

  - waste management – necessary and unnecessary *muda*
- types of potential improvements, including those related to:
  - capital purchases
  - equipment adaptation
  - production/process
  - maintenance
  - transport
- key aspects of the energy management planning, implementation, monitoring and reporting framework, including requirements of ISO 50001 Energy Management Systems
- concept of permanent monitoring versus temporary monitoring.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
- information about organisation operations, including financial data
- current and relevant information technology.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN062 Collect statistical data

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV521A Collect statistical data. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop a data collection plan and then collect new data. It includes preparing for data collection, defining data requirements, preparing data collection tools for direct collection, conducting data collection using direct collection, conducting data collection from existing source/s and collating and organising information/data.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously consulting others as required, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for data collection	1.1 Study the project or survey question and clarify where necessary. 1.2 Define expected data outputs. 1.3 Familiarise yourself with proposed technology and customise where necessary. 1.4 Confirm the population for the source of data. 1.5 Assess the survey design for suitability.
2. Define data requirements	2.1 Determine the accuracy requirements (precision) of the data to be collected. 2.2 Define the requirements of proposed information management system with regard to storage and processing of data. 2.3 Define and communicate information requirements to all staff involved in data collection. 2.4 Identify and assess data sources for accessibility and reliability. 2.5 Define the type and extent of data required. 2.6 Apply classification standards to the proposed data.
3. Prepare data collection tools for direct collection	3.1 Define data collection methods and techniques clearly relative to data requirements. 3.2 Identify the optimum method for gathering the proposed data after research of alternatives has occurred. 3.3 Design the survey vehicle or questionnaire in conjunction with a suitably qualified person. 3.4 Test and evaluate the survey vehicle.
4. Conduct data collection using direct collection	4.1 Identify and/or construct the proposed sampling frame. 4.2 Select a sample and implement a pilot study. 4.3 Re-evaluate the proposed survey design based on the results of the pilot study. 4.4 Conduct the main survey according to accepted professional standards. 4.5 Take opportunities to establish and maintain contacts with those who may provide useful information, with due consideration of respondent burden.
5. Conduct data collection from existing source/s	5.1 Source data for the project. 5.2 Identify a range of statistics necessary for the project in conjunction with a suitably qualified person.

© Commonwealth of Australia, 2025 Skills Insight

	5.3 Review sources of information regularly for usefulness, reliability and cost. 5.4 Use channels and sources of information effectively.
6. Collate and organise information/data	6.1 Identify statistics to support the project question. 6.2 Collate data electronically. 6.3 Evaluate the accuracy and appropriateness of data. 6.4 Record data in the desired format.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV521A Collect statistical data.

Assessment Requirements for PSPGEN062 Collect statistical data

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to statistical data collection
- deciding which survey method to use
- designing questionnaires
- using communication methods including consultation, establishing and maintaining contacts
- reading information and data requirements
- writing survey questions that are unambiguous and reflect intended meaning

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to statistical data collection, privacy and confidentiality
- the advantages and disadvantages of different data sources
- the differences between census and survey data
- the importance of identifying a good frame
- the quality of the statistics and for what purpose the data can be used
- the limitations of the statistics used
- different data collection methodologies and how they affect results
- data collection and sampling methodologies
- the effects of non-response on survey estimates

© Commonwealth of Australia, 2025 Skills Insight

- the impact of types of errors
- national and international classification standards
- information management systems

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCY010 Manage policy implementation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPOL603A Manage policy implementation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to interpret policy and manage policy implementation process. It includes interpreting and communicating the requirements of policy, and policy implementation.

This unit applies to those working as public sector staff required to manage policy implementation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, with staff supervision responsibilities, while performing complex tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Policy

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret and communicate requirements of policy	1.1 Identify the expected outcomes of policy implementation and communicate to staff. 1.2 Interpret policy relative to workplace responsibilities and accountabilities. 1.3 Communicate the impact on work activities of policy implementation to staff and other stakeholders. 1.4 Assist staff with the interpretation of policy and its application to their work.
2. Implement policy	2.1 Identify potential or impending policy changes and prepare strategies to accommodate and communicate those changes. 2.2 Prepare work plans consultation with staff and management to ensure that policy is implemented as intended. 2.3 Monitor staff performance to ensure that it complies with policy. 2.4 Assist staff in adjusting to changes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPOL603A Manage policy implementation.

Assessment Requirements for PSPPCY010 Manage policy implementation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting complex and formal documents
- providing leadership to the workgroup in the interpretation and implementation of policy
- managing policy implementation on 2 or more occasions or in 2 or more contexts

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- range and type of policies relating to the public sector
- public sector code/s of ethics and code/s of conduct
- organisation and government procedures

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPREG029 Manage and lead inspection and monitoring programs

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPREG603A Manage and lead inspection and monitoring programs. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage and lead inspection and monitoring activities in accordance with relevant Acts and regulations. It includes determining inspection and monitoring program requirements, managing and leading inspection and monitoring programs and managing reporting systems, information and training.

This unit applies to those working in regulatory roles within the public sector involving inspection and monitoring.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for PSPREG029 Manage and lead inspection and monitoring programs

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating leadership and performance management in the context of inspection and monitoring
- undertaking risk management and problem-solving
- communicating with a diverse range of clients and staff
- writing reports, submissions and Ministerial correspondence, requiring discretion and judgment to determine content and style audience approach
- dealing with referrals from other staff on matters that are more difficult, or of potential interest to external parties including the media, public or political parties
- using computers for word processing and records management

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- interpretation, application, evaluation and review of enabling legislation and regulations
- performance and procedural assessment strategies
- performance indicators
- organisational policy and procedures
- inspection procedures
- monitoring procedures
- responses to complex/serious non compliance

© Commonwealth of Australia, 2025 Skills Insight

- elements of an offence
- rules of evidence
- workplace and industry environment
- public sector legislation, including WHS, environment, privacy

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUACOM012 Liaise with media at a local level

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to liaise with media at an incident and for providing information about local events. It includes determining media requirements for providing information to publicise an event.

The unit is applicable to personnel of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Communication

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine media requirements	**1.1** Organisational procedures are followed when liaising with the media
	1.2 Media's potential interest is assessed and arrangements are made to meet their needs

© Commonwealth of Australia, 2025 Skills Insight

	1.3	Operational responsibilities are balanced against provision of information to the media
2 Provide information to media	**2.1**	A positive image of the organisation is maintained when liaising with the media
	2.2	Every opportunity is used to promote the organisation, its services and personnel, in accordance with organisational requirements
	2.3	Information is supplied to the media when operational situation permits
3 Publicise an event	**3.1**	Relationship is established with media contacts, in accordance with organisational requirements
	3.2	Event details and support materials are gathered and presented in a logical and concise manner to the media
	3.3	Information provided to media is recorded and maintained, in accordance with organisational requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUACOM012B Liaise with media at a local level.

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- communicating facts
- determining media requirements
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- liaising with media and other organisations
- maintaining positive image of the organisation to the media
- prioritising between operational responsibilities and provision of information to media
- providing information to the media
- publicising an event

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication techniques and skills
- media relationships
- media requirements
- operational responsibilities
- opportunities for media interest and events
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and procedures relating to media liaison
- presentation of information in a newsworthy and informative manner
- provision of relevant and succinct information
- requirements of different media
- role of media in disseminating information

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, regulations, codes of practice and operation manuals.

PUAEQU001 Prepare, maintain and test response equipment

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to inspect, maintain and test a range of equipment. It includes inspecting response equipment, testing response equipment and cleaning, maintaining and restowing equipment

The unit applies to personnel who have either a primary role in the maintenance of equipment or are required to test and maintain equipment as part of an operational role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Inspect response equipment**	**1.1**	Equipment is inspected, in accordance with organisational procedures
		1.2	Missing parts are identified and reported, in accordance with organisational procedures
		1.3	Faulty or damaged equipment is reported and recorded, in accordance with organisational procedures
2	**Test response equipment**	**2.1**	Equipment is tested, in accordance with organisational procedures and standards and is identified as fit for purpose
		2.2	Test results are recorded, in accordance with regulatory requirements and organisational procedures
		2.3	Defective equipment and substandard performance is reported and recorded, in accordance with organisational procedures
3	**Clean, maintain and restow equipment**	**3.1**	Equipment is cleaned, maintained, assembled and stowed, in accordance with organisational procedures
		3.2	Equipment records are updated, in accordance with organisational procedures
		3.3	Equipment is recovered, restowed and made ready for future use

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEQU001B Prepare, maintain and test response equipment.

Assessment Requirements for PUAEQU001 Prepare, maintain and test response equipment

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and risk mitigation
- cleaning, maintaining and restowing response equipment
- communicating information in accordance with organisational procedures
- complying with safety data sheets
- inspection, testing and servicing of response equipment
- safely using cleaning agents and chemicals

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication techniques
- environmental legislation relating to waste water runoff and pollution
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and risk mitigation
- procedures for using, testing, cleaning and servicing response equipment
- response equipment used by the organisation
- safe working practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to a wildfire, work as a safe and situationally aware member of a crew to attack and extinguish a fire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to firefighting personnel who work as a member of a team. It includes preparing to respond to fire; proceeding to fire; obtaining and using firefighting equipment and extinguishing media; combating wildfire; observing and reacting to wildfire and weather conditions; participating in mop up and patrol activities; supporting operations and recovering and storing equipment. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to respond to fire	**1.1** Information received about the location and type of wildfire is confirmed
	1.2 Most effective route to the fire is identified and navigated safely
	1.3 Appropriate personal protective clothing and equipment is donned, in accordance with organisational procedures
2 Proceed to fire	**2.1** Location of the fire and type of fuel is confirmed on approach
	2.2 Life is protected and damage to property and the environment is minimised, in accordance with organisational procedures
	2.3 Evidence relevant to fire cause is noted and reported utilising the organisations chain of command, in accordance with organisational procedures
	2.4 Indicators of fire behaviour are observed and reported
3 Obtain and use firefighting equipment and extinguishing media	**3.1** Nominated extinguishing media and/or firefighting equipment are located and obtained
	3.2 Extinguishing media and equipment are used, in accordance with manufacturers' specifications and organisational procedures
4 Combat wildfire	**4.1** Instructions are received, firefighting strategies and tactics are confirmed and implemented
	4.2 Suppression techniques, equipment and extinguishing media appropriate to wildfire conditions are used
	4.3 Control lines are prepared as directed
	4.4 Equipment is positioned, made ready for use and protected from damage
	4.5 Fire is attacked taking into account wildfire hazards as directed

© Commonwealth of Australia, 2025 Skills Insight

	4.6	Evidence of fire cause and area of fire origin are protected
	4.7	Communication is maintained at all times with all personnel
5 Observe and react to wildfire and weather conditions	**5.1**	Changing conditions at the fire are observed and their effects on fire behaviour are noted and reported
	5.2	Weather conditions and changes to fire behaviour are observed and reported
	5.3	Variations in topography, fuel features and fuel arrangements are observed and reported
	5.4	Escape routes and safety zones are confirmed and maintained throughout the incident
	5.5	Communication is maintained with other firefighting personnel throughout operational activities
6 Participate in mop up and patrol activities and support operations	**6.1**	Mopping up activities are carried out, as directed
	6.2	Patrol of the perimeter or sector of the fire is maintained, as directed
	6.3	Activities to support firefighting operations are carried out, as directed
7 Recover and store equipment	**7.1**	Equipment and consumables are recovered, as directed
	7.2	Firefighting equipment is collected and stored at the incident
	7.3	Cleaning and maintenance are carried out in accordance with organisational procedures
	7.4	Damaged or lost equipment is identified and reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

extinguishing media must include two of the following	• class A foam • retardants • soil • water • wetting agents
personal protective clothing and equipment must include	• eye and head protection • turnout uniform and gloves
types of wildfire must include	• surface
types of fuel must include one of the following	• forest • grass • scrub
firefighting equipment must include	• hand tools • hose and small gear • pump • tanker
firefighting tactics must include	• control line construction • mopping up • patrol • use of extinguishing media
suppression techniques must include	• dry and wet firefighting

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR204B Respond to wildfire.

Assessment Requirements for PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- combating wildfires
- communicating on the fire ground using a range of tools
- detecting hot spots, hazardous trees, unsecured wildfire perimeter
- maintaining situational awareness
- maintaining health and safety of self and others in work area
- observing and reacting to wildfire and weather conditions
- obtaining and using firefighting equipment and extinguishing media
- participating in mop ups, patrol activities and support operations
- participating in entrapment safety procedures
- preparing to respond to a fire
- proceeding to a fire
- reacting to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- recovering, reinstating and storing equipment
- undertaking dry and wet wildfire attack
- undertaking operational activities safely, in accordance with organisational procedures
- using extinguishing media in wildfire control
- using wildfire control tools and equipment
- working with firefighting equipment
- working as a member of a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication on the fire ground using radio and telephone

© Commonwealth of Australia, 2025 Skills Insight

- consumables including flagging tape, fuel, rubbish and signs
- extinguishing media, water, foam and suppressants
- escape routes including prepared tracks, roads, trails and waterways
- earth moving equipment such as bulldozers, graders and tractors with blades
- equipment for firefighting including chainsaw, ropes and lines, drip torch and knap sack
- evidence related to fire cause including fresh vehicles tracks, items or objects at scene, nature and behaviour of fire at the scene upon arrival, nature and colour of smoke and number of columns, people and vehicles leaving the scene and whether gates on access routes to the fire were closed, opened or locked
- fire behaviour
- fuel features including arrangement and distribution, moisture content, quantity, size and type
- indicators of fire behaviour including flame height and length, noise, rate of spread, smoke colour and density, spotting and extreme fire behaviour
- organisational documentation, policies and operating procedures
- safety zones including bare ground, burnt areas, clearings, rivers and site of recent wildfire or prescribed burn, static water bodies and defendable space
- support operations including providing and transporting food, water and equipment
- tactics for firefighting including backburning, burning out and patrol
- types of wildfire including crown and ground
- types of fuel including crop, heath, peat, coal, combustible soils and plantation
- strategies for firefighting including defensive, direct and indirect attack, offensive and parallel attack
- variations in topography including aspect, elevation, landscape features and slope
- weather conditions including atmospheric stability, relative humidity, temperature and variations to wind speed and direction
- wildfire control tactics and techniques
- wildfire hazards
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including health and fitness requirements, hygiene and wellbeing, safe work practices, safety assessments and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply safe work practices when operating in or around aircraft at an airbase. It includes working safely near aircraft and facilitating safe ground support and it applies to personnel working in the public safety sector who work around aircraft.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Work safely in and around aircraft	**1.1** Personal protective clothing and equipment is used, in accordance with operational procedures
	1.2 Precautions and clearances are obtained and followed

© Commonwealth of Australia, 2025 Skills Insight

		when operating on or near aircraft movement areas
	1.3	Any approach to an operating aircraft is made, in accordance with organisational aircraft approach procedures, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew
	1.4	Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes
	1.5	Typical manoeuvring patterns of aircraft are anticipated through activities
	1.6	Instructions or signals from pilots or staff controlling aircraft are complied with, in accordance with organisational procedures
	1.7	Site hazards are identified and risks are assessed and control measures are implemented
2 Facilitate safe ground support	**2.1**	Appropriate precautions are observed when positioning vehicles or equipment close to aircraft
	2.2	Aircraft design features are taken into account whilst boarding, loading or handling aircraft
	2.3	Instructions from pilots and staff coordinating aircraft operations, organisational procedures and placards are followed during ground support operations
	2.4	Aircraft loading is conducted under pilot or flight crew member supervision and appropriate weight, balance and loading system are complied with
	2.5	Areas are designated and separated, in accordance with site features and specific operations being conducted
	2.6	Fitting of equipment to an aircraft is conducted under pilot supervision, in accordance with appropriate regulatory approvals
	2.7	Aircraft fuels, oils, and supplies are stored and handled, in accordance with regulatory requirements and organisational procedures
	2.8	Aircraft or equipment defects or hazards are reported to pilot and/or appropriate supervisor
	2.9	Appropriate aerodrome regulations are complied with

Assessment Requirements for PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- complying with regulatory requirements and organisational procedures
- delivering briefings in appropriate locations including an area that is free of distractions including movement and noise, is safe and convenient to subsequent deployment needs and has the necessary facilities and equipment
- ensuring safety and quality procedures are applied
- identifying hazards and risks and acting to minimise, mitigate, control or eliminate
- implementing precautions and working safely whilst around aircraft
- using personal protective clothing and equipment and specialist aviation support equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aerodrome layout, facilities and services including working zones and lighting facilities
- aerodrome legislation, industry standards, regulations and security procedures
- aircraft features and movement characteristics
- aircraft performance, operation, loading and refuelling precautions
- assessment and risk mitigation processes
- organisational documentation, policies and procedures
- participation in briefings including Situation, Mission, Execution, Administration, Command/control, Safety (SMEACS) and questions
- personal protective clothing and equipment including fire extinguisher, first aid kit, high visibility protective overalls and vests, respiratory protection, signalling devices, lighting or beacons and head, hand, eye, ear and foot protection
- roles and responsibilities of personnel supervising, managing and supporting aircraft operations
- site hazards

© Commonwealth of Australia, 2025 Skills Insight

- suitable locations for conducting briefings and debriefings
- types of aircraft including aeroplanes, helicopters, remotely piloted aircraft and airborne vehicles
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safe work practices around aircraft

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to identify and avoid workplace hazards and risks, to maintain personal safety and to report identified issues to supervisors and team members.

It is designed as an introduction to safe work practices and is specifically relevant to a workplace requiring personnel to be involved in incidents, prescribed burns and/or operational aspects of emergency management. It includes identifying, implementing and monitoring effectiveness of workplace hazards and risk control procedures.

The unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for PUAFIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying safe work practices in accordance with organisational Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) policies and procedures
- identifying hazards and using risk control measures
- identifying workplace hazards and risks and advising others
- implementing hazard and risk control procedures
- monitoring effectiveness of hazard and risk control procedures
- selecting equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- working with organisational procedures including the selection and use of personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- basic principles of a dynamic risk assessment and safe person approach
- hazards, including heat illness, fire, structural, aerial operations, hazardous materials and vehicles
- methods of hazard identification, risk control reporting and debriefing
- organisational documentation, policies and procedures for hazard and risk management
- personal protective clothing and equipment requirements
- risks to life, community, property and the environment
- situational awareness actions that support safety in the work place
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including occupational hazards and risks encountered in the workplace, safety assessments, risk mitigation processes and risk control measures such as eliminate, isolate and substitute

PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work as a member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to personnel who work as a member of a crew or team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

outcomes.	demonstrate achievement of the element.
1 Receive and report details of wildfire	**1.1** Details of the wildfire including location, type, behaviour and developments are received and recorded
	1.2 Fire details are reported, in accordance with organisational requirements
2 Prepare to respond to fire	**2.1** Location of wildfire is confirmed and safest access route is determined
	2.2 Personal protective clothing and equipment, apparel, food and water are obtained before departure, in accordance with organisational requirements
	2.3 Most appropriate appliance or vehicle is selected and used
3 Proceed to fire	**3.1** Location of wildfire is confirmed by observation or from instructions while on approach
	3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or environmentally sensitive areas
	3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of appropriate authorities
	3.4 Navigational aids are used for planning and operational purposes
	3.5 Notification of arrival and appropriate report is provided
4 Protect people and assets	**4.1** As far as conditions allow the number, location and safety of people and assets in the threatened area is determined and assessed
	4.2 Appropriate protective procedures are implemented, under direction, to protect persons in the path of a wildfire
	4.3 Access by the public and personnel to hazardous locations is controlled, as directed, in accordance with organisational procedures
	4.4 Defensibility of property and assets is considered and, if appropriate, assistance is provided to help occupiers
	4.5 Safety of people and assets in the threatened area is

© Commonwealth of Australia, 2025 Skills Insight

		monitored
	4.6	Safety of people and security of assets in the area is checked and reported after the fire
5 Combat wildfire	**5.1**	Briefing is received including area of operations, strategies and tactics to be employed
	5.2	Escape routes and safety zones are confirmed and communicated to personnel
	5.3	Firefighting media and equipment are selected and used in accordance with organisational procedures
	5.4	Fire hazards are identified and action is taken to minimise the risks of injury to the public, personnel and self
	5.5	Firefighting strategies and tactics are implemented to achieve objectives and to minimise overall damage and impact on asserts and the environment
	5.6	Fuel, weather and topographical factors are observed and potential fire behaviour is anticipated and acted upon to ensure safety
	5.7	Communication is maintained with supervisor through the chain of command and with other firefighters in the work area
	5.8	Fire control activities are undertaken to minimise overall damage and impact on assets and the environment
	5.9	Potential fire behaviour is considered and acted upon to ensure safety and achievement of objectives
	5.10	Fire reports are provided to supervisor, as required
	5.11	Area of origin and evidence of fire cause are protected and brought to the attention of supervisor or relevant authority, in accordance with organisational procedures
6 Conduct mop up and patrol activities	**6.1**	Mop up activities are carried out, in accordance with organisational procedures
	6.2	Patrol of the fire is maintained
7 Recover and maintain equipment	**7.1**	Equipment is made ready for operational use, in accordance with organisational procedures

© Commonwealth of Australia, 2025 Skills Insight

7.2 Damaged or missing equipment is replaced, recorded and/or reported, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- anticipating and reacting to changing wildfire behaviour
- applying Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing risk to life, property and the environment
- contributing to the implementation of firefighting strategies
- combating wildfires, performing firefighting tactics, and using firefighting equipment and extinguishing media
- communicating and working with team members
- conducting mop ups and patrol activities
- detecting hot spots and hazardous trees
- implementing and monitoring firefighting strategies and tactics
- interpreting fire weather, fuels and terrain and predicting likely impact on fire behaviour
- maintaining safety and health of self, other workers and people in a wildfire area
- participating in briefings and confirming instructions
- preparing to respond to wildfires, using navigation equipment
- proceeding to wildfires
- receiving, recording and reporting information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- crew protective procedures
- access to wildfires
- recognition of environmentally sensitive areas and actions to minimise damage
- escape routes including prepared tracks, roads, trails and waterways
- fire behaviour and its response to different fuels, topography and weather conditions
- fire cause

© Commonwealth of Australia, 2025 Skills Insight

- fireground hazards
- fire report requirements
- fuel types and factors that impact fire development
- media and equipment for firefighting
- means of transport to fire ground
- navigational aids including aerial photographs, compass, global positioning systems and maps
- organisational documentation, policies and procedures
- potential fire behaviour including fire development, flame height and intensity, fuel load and arrangement, rate of speed, spotting, change due to terrain, topography, changes due to weather conditions, winds and fire winds.
- protective procedures including alerts and warnings, insitu protection and relocation
- safety zones including bare ground, burnt areas, clearings, rivers, site of recent wildfire or prescribed burns and static water bodies
- strategies for firefighting including offensive strategies including direct attack, indirect attack, parallel attack and combined attack and defensive strategies including community and asset protection
- tactics for firefighting including back burning and burning out, control line construction - hand and machine and direct suppression and extinguishment
- tasks for firefighting including application of firefighting media, control line construction, mopping up and patrol
- topographical factors that affect fire development
- types of fires including crown, ground and surface
- types of assets that require protection
- weather factors that influence fire development
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safety near vehicles and machines

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

© Commonwealth of Australia, 2025 Skills Insight

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - access to wildfire or prescribed burns and/or approved field based environment
  - firefighting equipment and extinguishing media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR309 Operate pumps

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to operate a portable pump and/or appliance mounted pump at an incident.

The unit is applicable to personnel who are responsible for operating centrifugal appliance mounted pumps, portable pumps and foam systems at an incident. Typically, this work requires the application of basic principles hydraulics and involves working as a member of a team under limited supervision.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAEQU001 Prepare, maintain and test response equipment

One of the following:

PUAFIR203 Respond to urban fire

PUAFIR220 Respond to isolated structure fire

PUAFIR204 Respond to wildfire

PUAFIR205 Respond to aviation incident

Competency Field

Fire

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare pump to deliver water	**1.1** Type of pump and hose selected is appropriate to the operation and/or incident
	1.2 Suitability of water supply for operational purposes is determined
	1.3 Pump is sited and positioned to receive and deliver water supply, in accordance with organisational procedures and requirements
	1.4 Pump and primer are engaged, in accordance with organisational procedures and manufacturers' guidelines
	1.5 Appropriate agents and equipment are prepared for production of foam at an incident, as required
2 Operate pump	**2.1** Pump components and ancillary equipment are utilised to draught water, to boost water from a reticulated supply or to deliver and relay water from an appliance tank, in accordance with organisational procedures and requirements of incident
	2.2 Pump operation is in accordance with organisational procedures, manufacturers' specifications, and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines
	2.3 Pump settings are determined, in accordance with organisational procedures and requirements of the incident
	2.4 Pumps are operated and observed to ensure that pressure and flow of water meets operational requirements and that safety to personnel is maintained
	2.5 Pump performance is monitored and maintained to ensure maximum efficiency of operation, to detect and correct pumping and safety problems and to take appropriate action, in accordance with organisational procedures
	2.6 Pump operations are carried out avoiding injury to

© Commonwealth of Australia, 2025 Skills Insight

		personnel and damage to equipment and facilities
	2.7	Mechanical malfunctions are reported, in accordance with organisational procedures
3 Conclude pump operations	**3.1**	Pump operations are concluded, in accordance with organisational procedures
	3.2	Ancillary equipment is collected, reinstated and stowed, in accordance with organisational procedures
	3.3	Maintenance procedures and checks are undertaken to ensure pump and ancillary equipment is serviceable, in accordance with organisational requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

type of pump must include	• appliance mounted pump • portable pump
suitability of water supply must include	• capacity • pressure
foam agents must include	• Class A foams or • Class B foams
foam equipment must include	• Class A foams or Class B foams and systems
water supply must include	• reticulated supply • static supply
principles of hydraulics must include three or more of the following	• discharge and flow rates • friction loss • head pressure calculations • jet reaction • required branch and nozzle pressures
observed must include three or more of the following	• branch operator activities checking water supply levels

© Commonwealth of Australia, 2025 Skills Insight

- monitoring of gauges and warning lights
- pump operators working on other units when relay pumping
- use of pressure relief valves and transfer valves
- use of pump performance charts or tables illustrating information such as optimum nozzle pressure and friction loss

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR309B Operate pumps.

Assessment Requirements for PUAFIR309 Operate pumps

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- accessing static and reticulated water supplies
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- concluding pump operations
- implementing organisational procedures
- maintaining appropriate levels of pressure
- monitoring levels of water in appliance tank to ensure minimum levels for crew protection
- monitoring supply of foam concentrate
- observing personnel and pumping throughout incident
- operating a pump including using gauges and controls, positioning and priming
- preparing pump to deliver water
- providing and maintaining water supply to branch operators
- pumping without injury to personnel or damage to equipment
- responding to changing circumstances
- supplying or delivering correct proportion of foam and water
- supplying water to a location by use of a relay pump
- using ancillary equipment to support pump operations

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- ancillary equipment used to support delivery of foam and/or water
- determination of water supply capacity and suitability
- discharge and flow rates
- jet reaction
- organisational documentation, policies and procedures
- power train for pump

© Commonwealth of Australia, 2025 Skills Insight

- principles of hydraulics
- principles of hydraulic flow and pressure, priming and operating pumps, pump components and their operation and pump gauges and/or controls
- pump positioning
- relay pumping including when to use and how it is done
- static and reticulated water supply and their use in pumping operations
- types of primer and their use in pumping operations
- types of foam concentrate, pumps and primers and foam agents and equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, conduct and evaluate simple prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for preparing, conducting and evaluating a simple prescribed burn on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to burn	**1.1** Burn operations for a simple prescribed burn are identified and undertaken, in accordance with approved prescribed burn plan, burn plan objectives, organisational procedures and legislative and regulatory requirements
	1.2 Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
	1.3 Burn notifications and plans are issued to persons or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
	1.4 Control lines, including secondary control lines, are specified and prepared, in accordance with organisational procedures
	1.5 Prescribed burn plan operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works are completed
	1.6 Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
	1.7 Fuel conditions are monitored, in accordance with organisational procedures and prescribed burn plan
	1.8 Resource requirements are confirmed with reference to burn plan
2 Conduct burn	**2.1** Prescribed burn notifications are issued, in accordance with organisational procedures
	2.2 Pre-burn checks are conducted, in accordance with organisational procedures
	2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
	2.4 Resources are gathered and personnel are briefed, in accordance with prescribed burn plan and contingency

© Commonwealth of Australia, 2025 Skills Insight

		arrangements
	2.5	Burn ignition strategies, including lighting techniques patterns and sequences are implemented, in accordance with organisational procedures and prescribed burn plan
	2.6	Burning is monitored, patrol activities are conducted and operational changes made, as required
	2.7	Contingencies are implemented, in accordance with prescribed burn plan, as required
	2.8	Burn documentation is kept, in accordance with organisational procedures
	2.9	Burn operations are concluded and burn security is implemented, in accordance with organisational procedures
	2.10	Crews are debriefed and resources released from the burn
	2.11	Incidents are reported and investigated, in accordance with organisational procedures
3 Conduct post burn activities	**3.1**	Outcomes of the burn are assessed against burn objectives, in accordance with organisational procedures
	3.2	Variations from the burn plan are reported, in accordance with organisational procedures
	3.3	Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
	3.4	Prescribed burn records are submitted, in accordance with the organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Skills Insight

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include	• approval of plan for the conduct of prescribed burning • map identifying area to be burned • specifications and conditions under which operation is to be conducted
burn objectives must include one or more of the following	• asset protection • biodiversity protection • community protection • habitat management • hazard reduction • management of cultural sites and activities • protection of fire sensitive ecological communities • vegetation management

personnel or organisation must include one or more of the following	• personnel or organisations who
	  • have an interest in adjacent land to which a burn could spread
	  • have an interest in managing the consequences of a burn
	  • have an interest in specific assets
	  • have an interest in the area to be burned
	  • may be concerned by evidence of a burn

resources must include one or more of the following	• contingency resources • crews for control, suppression and ground ignition • equipment and supplies • logistical support • other vehicles • tankers
burn ignition strategies and tactics must include	• contingency arrangements • fire behaviour to be achieved • ignition methods, lighting patterns, sequencing and timing of ignition
lighting techniques must include one or more of the following	• hand held • vehicle mounted propelled incendiaries • wind and waterproof matches
lighting techniques and patterns must include	• contour lighting • echelon • grid • line

© Commonwealth of Australia, 2025 Skills Insight

lighting sequence must include one or more of the following	• multi-line
	• spot
	• lighting sequences that considers
	  • fuel arrangement
	  • fuel moisture
	  • slope
	  • time of day
	  • wind direction

monitoring burn must include one or more of the following	• fire shape and spread • flame height • fuel moisture content • predictions • rate of spread • recording • safety considerations • smoke development • weather observation • wind speed and direction
concluding operations and burn security must include one or more of the following	• mitigating hazards for public safety • mopping up and black out • patrolling burn area • reopening roads • transfer of responsibility, as per organisational procedures
outcomes of the burn must include one or more of the following	• achievement of burn objectives • escapes • external impacts • levels of scorch • percentage of area burnt • reporting and storage of burn documentation

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR412 Conduct simple prescribed burns.

Assessment Requirements for PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazards, risk mitigation and safety of personnel
- checking burn and crew activities
- completing burn notifications
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings, safe burns utilising resources and post burn activities including operations and security
- confirming resources, location, construction and suitability of control lines for prescribed burns
- identifying and implementing restoration and rehabilitation activities
- implementing contingency arrangements
- interpreting and implementing simple prescribed burn plans
- interpreting simple prescribed burn plans and objectives, fire behaviour conditions and existing and forecast weather conditions
- monitoring equipment
- planning for contingencies
- preparing for a simple prescribed burn
- recording actions taken
- using fire prediction tools and resources

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- briefing and debriefing content and processes
- burn notification including verbal and written notification
- characteristics of a simple prescribed burn including completed in one shift, involves

© Commonwealth of Australia, 2025 Skills Insight

minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
- conclusion of simple prescribed burns including operations and security
- contingency arrangements including command structure, safety considerations such as escape routes and safety zones, actions to take in the event of unexpected fire behaviour changes, resolution of escapes, special resources and secondary control lines, resource requirements, resolution of resource breakdowns, injury on fire line and burn targets not met
- contingency plans
- fire prediction tools
- ground ignition patterns and techniques
- impact of conditions at simple prescribed burns on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative and organisational authorisations required
- organisational documentation, policies and procedures
- outcomes of simple prescribed burn
- personnel and organisations involved in simple prescribed burn activities
- required permits
- resource requirements
- restoration and rehabilitation
- seasonal restrictions on simple prescribed burns
- simple prescribed burn and securing burn monitoring
- techniques, patterns and sequencing for lighting
- types of property and assets
- types of simple prescribed burns, prescribed burn plans and objectives
- weather conditions including: temperature, relative humidity, weather changes, atmospheric stability, drought index, fire danger index, weather forecasts, actual or anticipated changes in conditions and progress targets not met
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

© Commonwealth of Australia, 2025 Skills Insight

Competency should be demonstrated in a range of actual and/or field based workplace environments with evidence collected from undertaking a simple prescribed burn being required.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - fire management and contingency plans
  - lighting and suppression crews
  - lighting and suppression equipment
  - simple prescribed burn plans
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop simple prescribed burn plans for specified burn areas and to prepare the plans to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for the development of simple prescribed burn plans.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify burn areas and burn objectives	**1.1** Areas requiring simple prescribed burning are identified, in accordance with organisational procedures
	1.2 Burn objectives are identified, in accordance with organisational procedures
	1.3 Target groups are identified and consultation process is undertaken, in accordance with organisational procedures
	1.4 Legislative and regulatory requirements are identified and complied with throughout planning process
2 Prepare prescribed burn plan for simple burn	**2.1** Key features of the burn area are identified including variations in terrain, fuel types and quantities control lines and weather
	2.2 Risks from proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environment and ecological risks
	2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures
	2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined
	2.5 Burn ignition strategies and tactics required for fire behaviour, intensity and that are suitable for location are determined, in accordance with organisational procedures
	2.6 Lighting techniques and lighting patterns are identified
	2.7 Hazard and risk mitigation are determined and asset protection works are identified
	2.8 Strategies for mitigating hazards and risks are identified and required preparatory works are identified
	2.9 Strategies and tactics for controlling prescribed burn are identified

© Commonwealth of Australia, 2025 Skills Insight

	2.10	Type and quantity of resources required are identified
	2.11	Prescriptions for implementation of burn plan strategies and tactics are documented, in accordance with organisational procedures
	2.12	Contingencies are outlined in the prescribed burn plan
	2.13	Prescribed burn plan is prepared, in accordance with organisational procedures
3 Gain approval of prescribed burn plan	**3.1**	Prescribed burn plan is submitted for approval, in accordance with organisational procedures and legislative requirements
	3.2	Modifications and amendments to prescribed burn plan are made based on feedback received
	3.3	Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

simple prescribed burn plan must include	• an approved plan for conduct of simple prescribed burn • map identifying area to be burned • specifications and conditions under which operation is to be conducted
simple prescribed burn objectives must include one or more of the following	• asset protection • biodiversity protection • community protection • habitat management • hazard reduction • management of cultural sites and activities • management of cultural sites and activities • protection of fire sensitive ecological communities

© Commonwealth of Australia, 2025 Skills Insight

target consultation groups must include one or more of the following	• vegetation management • adjacent land owners or managers • commercial operations within impact zone • community groups with specific interests • government organisations including local, state and federal • groups or individuals that may be adversely affected • other groups and people within prescribing organisation
lighting techniques must include	• hand held • wind and/or waterproof matches
lighting patterns include one or more of the following	• contour lighting • echelon • grid • line • multi-line • spot
operational hazards must include two or more of the following	• adverse terrain or weather conditions • crew size • falling trees and limbs • hazardous material • high fuel loads • ignition methods • plant • powerlines • road traffic • vegetation type
safety of people must include two or more of the following	• impact of smoke on vulnerable communities near burn area • safety of any people permanently or temporarily in burn area • safety of people involved with burn implementation • safety of people on areas adjacent to burn area
property and assets must include two or more of the following that are near the burn area	• camps or recreational areas • commercial land use such as crops or industry • cultural sites or historical buildings • other property and assets • plantations

© Commonwealth of Australia, 2025 Skills Insight

	• research plots and reference areas • stock • urban areas • utilities - power and telephone lines, water supply structures and communications towers

environmental and ecological risks must include	• impact on
	  • native flora and fauna including rare and endangered species
	  • smoke
	  • soil
	  • use of chemical fire suppressants
	  • water quality or supply

resources must include one or more of the following	• crews for ground ignition and suppression • equipment backup • ignition and suppression equipment and supplies • logistical support • other vehicles • tankers

Assessment Requirements for PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- assessing fuel types and quantities in burn area
- determining actions to minimise impacts of simple prescribed burn
- developing contingency arrangements
- developing pre-burn work schedule
- gaining simple prescribed burn approval
- identifying and working with resources
- identifying burn areas including developing timelines for planning and conduct of simple prescribed burn, simple prescribed burn objectives, strategies and tactics to meet simple prescribed burn objectives, ignition strategies and lighting techniques and patterns for ignition
- identifying resources
- identifying, assessing and mitigating operational hazards and risks
- identifying, assessing and mitigating risks to people, property and assets, ecological and environmental risks
- implementing legislation and regulations
- interpreting map of area and identifying key features
- predicting anticipated fire behaviour and intensity in burn area
- preparing plans and map for simple prescribed burning
- targeting consultation groups are identified, liaised with and consulted

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

© Commonwealth of Australia, 2025 Skills Insight

- accumulated fuels
- characteristics of simple prescribed burns including completed in one shift, involves minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
- contingencies
- effects of fire on vegetation, fauna, people, property, assets, ecology and the environment
- fire behaviour for fuel type being prescribed
- fire prediction tools
- ignition strategies and tactics
- legislative, regulatory, organisational and permit requirements for simple prescribed fires
- notification requirements
- organisational documentation, policies and procedures
- planned burn hazards and risks
- resource requirements and capabilities
- simple prescribed burn plans
- simple prescribed burning ignition and suppression strategies
- smoke management
- target groups and community
- traffic management plan requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in a range of actual and/or field based workplace environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - area requiring application of fire under prescribed conditions

© Commonwealth of Australia, 2025 Skills Insight

  - existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR501B Conduct fire investigation and analysis activities

Modification History

Release	TP Version	Comments
2	PUA12 V2	Application of the Unit added Unit revised to reflect current work requirements Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to respond to an incident and to undertake a preliminary fire investigation prior to the arrival of a specialist fire investigator.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel required to conduct a fire investigation at a fire or related incident.

This unit is not intended to replace the role of the specialist fire investigator; the role of the specialist fire investigator is encompassed within the PUA60912 Advanced Diploma of Public Safety (Fire Investigation).

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUALAW001B Protect and preserve incident scene

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan fire/incident investigation and analysis activities	1.1 Roles and responsibilities of government and non-government organisations involved at a fire/incident investigation are identified. 1.2 Procedures and ***protocols for the cooperation and coordination of relevant organisations*** involved in the fire/incident investigation are identified, agreed and implemented. 1.3 Strategies required to conduct a fire/incident investigation and analysis are identified and implemented in accordance with organisational procedures. 1.4 Preliminary and background ***sources of information*** concerning the context of the fire/incident investigation is prepared. 1.5 Relevant legislative requirements that impact on the collection and recording of ***evidence*** are identified. 1.6 Evidence and information gathering process at the incident site is planned in accordance with organisational and legislative requirements, environmental conditions and resource availability. 1.7 Required fire investigation equipment and resources for the incident are identified and assembled.
2. Collect, collate and preserve evidence	2.1 ***Methods and techniques of evidence and information collection*** appropriate to the investigation are applied. accordance with legislative requirements 2.2 Various types of evidence and information pertinent

© Commonwealth of Australia, 2025 Skills Insight

	to the investigation are recorded and/or collected in accordance with organisational and legislative procedures.
	2.3 Procedures for continuity and ***preservation of evidence*** are followed in accordance with legislative requirements.
	2.4 Appropriate ***packaging*** and identification techniques for the transportation of evidence for the purpose of laboratory testing are followed in accordance with organisational and legislative requirements.
3. Determine origin and cause of fire at incident	3.1 Procedures required to determine the origin and ***cause of fire*** are followed.
	3.2 ***Specialist personnel*** are liaised with to support determination of cause of fire.
	3.3 Assistance is rendered to laboratory personnel and specialist organisations as required, in accordance with organisational procedures.
	3.4 Physical evidence that can lead to the determination of the origin and cause of fire is identified and examined.
	3.5 Preliminary findings are documented and validated in accordance with organisational procedures.
	3.6 Origin and cause of fire are determined.
	3.7 Findings, methodologies, support data and briefing notes are documented in accordance with organisational and legislative procedures.
4. Conduct analysis of incident	4.1 Information relating to incident is gathered in accordance with organisational policies and procedures.
	4.2 Information relating to incident is evaluated in accordance with organisational procedures.
5. Record and report information collected	5.1 Information for a fire/incident investigation is recorded in accordance with the Rules of Evidence and legislative requirements.
	5.2 Information collected for a fire/incident investigation is prepared and documented in a report in accordance with organisational requirements.
	5.3 Report is submitted to supervisor in accordance with organisational requirements.
6. Prepare personnel for proceedings	6.1 Briefings are participated in with counsel as required.
	6.2 Other personnel involved in the proceedings are briefed as required.
	6.3 Additional information and/or clarification of

© Commonwealth of Australia, 2025 Skills Insight

	fire/incident investigation procedures/findings are provided as required. 6.4 ***Protocols for giving of evidence*** at a coronial/civil/criminal proceeding are followed.
7. Review and evaluate fire/incident investigation	7.1 Outcomes of proceedings are reviewed to ensure knowledge of investigations, trends and precedents is current. 7.2 Changes to organisational policy and procedures arising from rulings and decisions are formulated and reported. 7.3 Fire/incident cause determination/documentation/ recommendations are forwarded in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively verbally and in writing
- conduct briefings
- cooperate with other organisations and community groups
- display evidence gathering techniques
- display evidence packaging techniques
- handle dangerous goods and hazardous substances
- record incident and investigation details

Required Knowledge

- collection of physical evidence
- determining point of origin by deductive evidence
- differences between fire conditions
- differing fire behaviour such as flashover, backdraught
- distinguishing between fires that are accidentally, negligently and deliberately or naturally lit
- examination of the fire scene
- factors affecting fire behaviour
- fatality and criminal involvement procedures
- identification of fire scene hazards
- legal implications of evidence collection and legislative requirements
- motives of the fire setter
- security of the scene, scene contamination and preservation
- use of personal protective clothing and equipment

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- secure the scene and preserve the evidence
- determine the point of origin and cause of fire
- distinguish between fires that are caused deliberately or accidentally, negligently and naturally lit
- collect evidence in accordance with legislative requirements
- record incident and investigation details in accordance with organisational procedures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or via simulations or exercises.

Specific resources for assessment

Access is required to:

- relevant fire investigation equipment and resources
- real or simulated test fire sites (forest/rural)
- training building with appropriate fire investigation training rooms
- fire crews and pumpers
- thermal detection equipment
- appropriate protective clothing and equipment
- classrooms equipped with computers and appropriate training aids, text and reference materials
- appropriate role play scripts for the appropriate personnel (police, witnesses, barristers, solicitors, forensic scientist, insurance adjustors and investigators).

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training

© Commonwealth of Australia, 2025 Skills Insight

environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Protocols for the cooperation and coordination of relevant organisations may include:	• advising and cooperating with other agencies • canvassing witnesses • collecting and securing physical evidence • collecting, collating and analysing information • conducting examinations • conducting interviews • making sketches and maps • prepairing reports • producing information • taking notes
Sources of information may include:	• correspondence • databases • incidence mapping • internet • inter-organisational activities • intra-organisational activities • journals

© Commonwealth of Australia, 2025 Skills Insight

Evidence must include:	• debris • documents • drawings • electrical appliance/equipment • gas appliance/equipment • manifests • maps • personal notes • physical evidence • plans • sketches • soil
and may also include:	• audio tapes • video tapes
Methods and techniques of evidence and information collection must include:	• advising and cooperating with other agencies • canvassing witnesses • collecting and securing physical evidence • collecting, collating and analysing information • conducting examinations • conducting interviews • making sketches and maps • preparing reports • producing information • taking notes
Preservation of evidence must include:	• maintaining chain of evidence • maintaining log of events • tagging secure encasements
Packaging may include:	• glass receptacles • non-leaching bags • non-lined tins • rigid and non-rigid receptacles
Causes of fire must include:	• accidental • chemical • deliberate • electrical origin • environmental or natural occurrences • flammable liquids • gas • gas explosion • lightning • matches and lighters

© Commonwealth of Australia, 2025 Skills Insight

	• mechanical defect • motor vehicles • smoking • spontaneous combustion
Specialist personnel may include:	• arson squad • crime scene police • forensic specialist • insurance investigators • laboratory technicians • lawyers • medical examiners • other relevant authorities
Protocols for giving evidence must include:	• court practices • court procedures • pre-court briefings • rules of evidence

Unit Sector(s)

Not applicable.

PUAFIR506 Conduct complex prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare and conduct complex prescribed burns, in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. A burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. A prescribed burn may require several separate ignitions (ground and/or aerial) possibly over several days. It may have several high value assets requiring complex protection actions.

The unit applies to personnel responsible for preparing, conducting and evaluating complex prescribed burns on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to burn	**1.1** Complex prescribed burn operations are identified and undertaken, in accordance with approved prescribed burn plan, burn objectives, organisational procedures, and legislative and regulatory requirements
	1.2 Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
	1.3 Burn notifications and plans are issued to personnel or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
	1.4 Control lines, including secondary control lines are specified and prepared, in accordance with organisational procedures
	1.5 Prescribed burn plan, operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works completed
	1.6 Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
	1.7 Fuel conditions are monitored, in accordance with organisational procedures
	1.8 Resource requirements are confirmed with reference to burn plan and anticipated conditions
	1.9 Forecast weather conditions are monitored throughout prescribed complex burn
2 Conduct burn	**2.1** Burn notifications are issued, in accordance with organisational procedures
	2.2 Pre-burn checks are conducted, in accordance with

© Commonwealth of Australia, 2025 Skills Insight

		organisational procedures
	2.3	Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
	2.4	Resources are gathered and personnel briefed, in accordance with prescribed burn plan and contingency arrangements
	2.5	Burn ignition strategies and tactics are implemented, in accordance with prescribed burn plan and organisational procedures including lighting techniques for ground and aerial ignition, as relevant to the specific burn, lighting patterns and lighting sequence
	2.6	Burning is monitored, patrol activities are conducted and operational changes made, as required
	2.7	Contingencies are implemented, as required, in accordance with prescribed burn plan
	2.8	Burn documentation is kept, in accordance with organisational procedures
	2.9	Burn operations are concluded and burn security is implemented in accordance with organisational requirements
	2.10	Crews are debriefed and resources released from the burn
	2.11	Incidents are reported and investigated in accordance with organisational procedures
3 Conduct post burn activities	**3.1**	Outcomes of burn are assessed and reported against burn objectives, in accordance with organisational procedures
	3.2	Variations from burn plan are reported, in accordance with organisational procedures
	3.3	Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
	3.4	Complex prescribed burn records are submitted, in accordance with organisational procedures

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include	• an approved plan for conduct of prescribed burning • map identifying the area to be burned • specifications and conditions under which operation is to be conducted
burn objectives must include one or more of the following	• asset protection • biodiversity protection • community protection • habitat management • hazard reduction • management of cultural sites and activities • protection of fire sensitive ecological communities • vegetation management
operational hazards must include one or more of the following	• adverse terrain or weather conditions • crew size • falling trees and limbs • hazardous materials • ignition methods • plant • road traffic • vegetation
environmental and ecological risks must include three or more of the following	• impact of smoke • impact of use of any chemical fire suppressants • impact on native flora and fauna, including rare and endangered species • impact on soil • impact on water quality or supply
contingency arrangements must include	• actions to take in the event of unexpected weather • command structure

© Commonwealth of Australia, 2025 Skills Insight

	• dealing with escapes • resource breakdowns • resource requirements • safety considerations including escape routes and safety zones • special resources and/or secondary control lines • wind changes

personnel or organisations must include one or more of the following	• personnel or organisations who
	  • have an interest in managing the consequences of a burn
	  • have an interest in preventing health impacts from smoke e.g. nursing homes, health departments
	  • have an interest in specific assets
	  • have an interest in the area to be burned
	  • may be adversely affected by the burn
	  • may be concerned by evidence of a burn
	  • may have adjacent land to which a burn could spread

resource requirements must include one or more of the following	• contingency resources
	• crews for
	  • aircraft ground support
	  • control and suppression
	  • ground ignition
	• equipment and supplies
	• logistical support
	• tankers and other vehicles

burn ignition strategies and tactics must include:	• contingency arrangements • fire behaviour to be achieved • ignition methods, lighting patterns, sequencing and timing of ignition
lighting techniques for ground and aerial ignition must include	• aerial drip torch • aerial incendiaries • hand held of vehicle mounted propelled incendiaries • wind and/or waterproof matches
lighting patterns must include	• contour lighting • echelon • grid • line • multi-line

© Commonwealth of Australia, 2025 Skills Insight

lighting sequence must include	• spot • fuel arrangement • fuel moisture • slope • time of day • wind direction
monitoring complex prescribed burn must include	• fire development, shape and spread • flame height • fuel moisture content • predictions • rate of spread • recording • safety considerations • smoke development • weather observations
conclusion and complex prescribed burn security activities must include	• mitigating hazards for public safety • mopping up and blacking out • patrolling burn area • reopening roads • transfer of responsibility procedures
outcomes of the complex prescribed burn must include	• achievement of burn objectives • escapes • external impacts • levels of scorch • percentage of area burnt • reporting and storage of burn documentation
safety of people must include	• all those involved with burn implementation • any in areas adjacent to burn area • any permanently or temporarily in burn area • impact of smoke on vulnerable communities near burn area

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR511 Conduct complex prescribed burns.

Assessment Requirements for PUAFIR506 Conduct complex prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings
- conducting post burn activities
- conducting safe complex prescribed burn operations by utilising appropriate resources (ground and air)
- confirming location, construction and suitability of control lines for prescribed burns
- confirming resources required
- evaluating outcomes against objectives
- identifying and protecting assets
- implementing complex prescribed burn plans for designated area
- implementing contingency arrangements
- interpreting and implementing complex prescribed burn plans
- interpreting existing and forecast weather conditions and fire behaviour conditions
- issuing verbal and written burn notifications
- monitoring burn and patrol activities
- preparing to burn
- recording actions taken
- responding to changing conditions
- restoring and rehabilitating sites
- using fire prediction tools
- using monitoring equipment
- utilising lighting techniques and sequencing
- working with ignition patterns and techniques

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- characteristics of complex prescribed burns including involvement of a variety of fuels and terrain, medium to large areas, moderate to high risk, range of fire intensity and significant potential impact on assets
- contingency plans
- evaluation of burn outcomes against objectives
- fire prediction tools and their use
- fuel sampling techniques
- ground and aerial ignition patterns and techniques
- impact of conditions of a complex prescribed burn on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative, regulatory and organisational authorisations
- organisational documentation, policies and procedures
- permit requirements
- prescribed burns monitoring and securing
- procedures for monitoring, concluding and securing burn
- resource requirements and capabilities
- restoration and rehabilitation activities including site stabilisation and recording and reporting future restoration and rehabilitation requirement
- seasonal restrictions on prescribed complex burns
- smoke modelling and smoke impacts
- techniques, patterns and sequencing for lighting
- traffic management plans
- types of prescribed complex burns
- types of property and assets within or near burn area including urban areas, commercial land use such as crops or industry, any cultural sites or historical buildings, other property and assets, stock, utilities such as power and telephone lines, water supply, structures and communications towers, camps or recreational areas, plantations and research plots and reference areas
- verbal and written burn notifications
- weather conditions including temperature, relative humidity, wind, atmospheric stability, drought index, fire danger index, weather forecasts and actual or anticipated changes in conditions
- weather monitoring techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include

© Commonwealth of Australia, 2025 Skills Insight

requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in an operational environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - an area for proposed complex prescribed burn
  - authorisation to light burn
  - fire management plans
  - lighting and suppression crews
  - lighting equipment
  - prescribed burn plans including plan for proposed assessment burn
- suppression equipment applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse needs
- communicate effectively verbally and in writing
- negotiate
- resolve conflicts

Required Knowledge

- emergency management concepts and principles
- legislative requirements relevant to emergency management
- organisational policies and procedures
- organisational documentation (emergency/disaster management plans, standard operating procedures, policies, procedures and guidelines)
- problem solving and decision making techniques
- relevant legislation, regulations and codes of practice
- source of risk (commercial and legal relationships, economic, human behaviour, individual activities, management activities and controls, natural events, political circumstances, technology/technical issues)
- techniques for the prioritisation and evaluation of public safety risk management systems

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- Effectively implement the selected public safety risk prevention strategy.
- Review the effectiveness of these strategies and provide feedback
- Ensure risk prevention strategies implemented by personnel are consistent with the organisation’s community safety policy and approved arrangements.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

© Commonwealth of Australia, 2025 Skills Insight

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on-the-job or in a simulated workplace environment. **Specific resources for assessment** Access is required to: • complex scenarios sufficient to allow evidence to be gathered from a variety of sources and stakeholders on more than one occasion and over an extended period.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Public safety risk prevention strategies may include:	• all aspects of comprehensive emergency management evolved from considering prevention/mitigation • building codes • community restoration • critical incident stress management • emergency management planning • financial support

© Commonwealth of Australia, 2025 Skills Insight

	• implementing plans • land use management • legislation and regulation • mobilising resources • mutual aid agreements • preparedness • prescribed burning • public education • response and recovery including safety standards • restoration and reconstruction • training and exercises • warning systems
Assessment of public safety risk prevention strategies may include:	• costs and benefits • deficiencies and limitations • determination of advantages • disadvantages
Organisational criteria may include:	• administrative efficiency • compatibility with other strategies • continuity of effects • effects on economy • effects on environment • effects on individual freedom • equity • jurisdictional authority • leverage for further vulnerability-reducing action, cost effectiveness • possibility of vulnerability creation • public and pressure group reaction • timing • vulnerability reduction potential
Local forums may include:	• community groups • local councils • local emergency management committees • schools
Organisational policy and procedures may include:	• legislation relevant to the organisation • legislation relevant to the public safety risk prevention strategies • operational, corporate and strategic plans • operational performance standards • organisational personnel practices and guidelines • organisational quality standards

© Commonwealth of Australia, 2025 Skills Insight

	• standard operating procedures
Communication may include:	• electronic transmission of information • letters • meetings • small group or individual verbal communication
Relevant authorities and other responsible organisations may include:	• community service organisations • contractors • equipment suppliers • federal, state/territory and local government authorities • land management agencies • medical organisations • operative and support organisations • other emergency organisations • water, gas and power agencies • welfare and counselling organisations
Stakeholders may include:	• career and volunteer personnel • client groups • community groups • industry groups • members of parliament • members of the public • non-government organisations • public and private sector organisations • staff
Documentation may include:	• emergency procedures • evacuation procedures • organisational and workplace operating procedures and policies • relevant Australian or international disaster/ emergency management documentation • risk and hazard analysis • standard operating procedures • work health and safety procedures

PUAFIR515 Develop complex prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop complex prescribed burn plans for specified burn areas to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area at a time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. The burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. It may require several separate ignitions, ground and/or aerial, possibly over several days and it may include a number of high value assets requiring complex protection actions.

The unit is applicable to personnel responsible for developing complex prescribed burn prescriptions.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify burn area and burn objectives	**1.1** Areas requiring complex prescribed burn plans are identified, in accordance with organisational and permit procedures and legislative and regulatory requirements
	1.2 Burn objectives are identified and consultation process is undertaken, in accordance with organisational procedures
	1.3 Target consultation groups are identified, and consultation process is initiated, in accordance with organisational procedures
	1.4 Legislative and regulatory requirements are identified and complied with throughout planning process
2 Prepare prescribed burn plan for a complex burn	**2.1** Key features of burn area are identified including variations in terrain, fuel types and quantities, control lines and weather
	2.2 Risks from the proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environmental and ecological risks
	2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures
	2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined
	2.5 Burn ignition strategies and tactics suited to location that provide required fire behaviour and intensity are determined, in accordance with organisational procedures
	2.6 Lighting techniques and patterns for both ground based and aerial ignition for specific burn are identified

© Commonwealth of Australia, 2025 Skills Insight

	2.7	Strategies for mitigating hazards and risks are identified and preparatory works are implemented
	2.8	Strategies and tactics for controlling prescribed burn are identified
	2.9	Type and quantity of resources required are identified
	2.10	Conditions for implementation of burn ignition strategies and tactics are specified, in accordance with organisational procedures
	2.11	Prescribed burn plan is prepared, in accordance with organisational procedures
	2.12	Contingencies are outlined in prescribed burn plan
3 Gain prescribed burn plan approval	**3.1**	Prescribed burn plan is submitted for approval, in accordance with legislative and organisational requirements
	3.2	Modifications and amendments to prescribed burn plan are made, based on feedback received
	3.3	Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

complex prescribed burn plans must include	• approved plan for conduct of prescribed burning • map identifying area to be burned • specifications and conditions under which operation is to be conducted
burn objectives must include one or more of the following	• asset, biodiversity and community protection • habitat management • hazard reduction

© Commonwealth of Australia, 2025 Skills Insight

	• management of cultural sites and activities • protection of fire sensitive ecological communities • vegetation management
target consultation groups must include one or more of the following	• adjacent land owners or managers • commercial operations within impact zone • community groups with specific interests • government organisations including local, state and federal • other groups and people within the prescribing organisation • people that may be affected by burn
burn ignition strategies and tactics must include	• contingency planning • fire behaviour to be achieved • ignition methods, sequencing and timing of ignition
lighting techniques for ground and aerial ignition must include	• aerial drip torch • aerial incendiaries • hand held and vehicle mounted propelled incendiaries • wind and/or waterproof matches
lighting patterns must include one or more of the following	• contour lighting • echelon • grid • line • multi-line • spot
operational hazards must include two or more of the following	• adjoining land use and proximity to urban areas • adverse terrain or weather conditions • crew size • falling trees and limbs • hazardous materials • high fuel loads • ignition method • plant • powerlines • road traffic • vegetation type
safety of people must include two or more of the following	• impact of smoke on vulnerable communities near the burn area • safety of any people permanently or

© Commonwealth of Australia, 2025 Skills Insight

	temporarily in burn area • safety of people involved with burn implementation • safety of people on areas adjacent to burn area

property and assets must include two or more of the following	• any of the following that are in or near the burn area
	  • camps or recreational areas
	  • commercial land use such as crops or industry
	  • cultural sites or historical buildings
	  • other property and assets
	  • plantations
	  • research plots and reference areas
	  • stock
	  • urban areas
	  • utilities - power and telephone lines, water supply structures and communications towers

environmental and ecological risks must include	• impact of native flora and fauna including rare and endangered species • impact of smoke • impact of soil • impact of use of chemical fire suppressants • impact on water quality or supply
resources required must include one or more of the following	• aircraft and crews including incendiary operations supervisors and machine operators for aerial ignition • aircraft ground support • control line standards • crews and supervisors for ground ignition, control and patrol work • equipment and supplies including fuel and incendiaries • planning and logistical support • pre-burn work schedule • tankers, other ignition and suppression vehicles, equipment and fuel

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR513 Develop complex prescribed burn plans.

Assessment Requirements for PUAFIR515 Develop complex prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risks mitigation and safe work practices
- assessing characteristics of multiple fuel types, terrain and weather
- consulting with target groups
- developing a pre-burn work schedule
- developing contingency arrangements
- documenting complex prescribed burn plans including objectives
- gaining complex prescribed burn approval
- identifying actions to minimise impacts of complex prescribed burn preparation
- identifying resources
- identifying, assessing and mitigating operational hazards and risks including to people, property, assets, ecology and environment
- identifying, liaising and consulting with target consultation groups
- interpreting maps of area and identifying key features
- predicting fire behaviour and intensity in burn area
- preparing maps for complex burn operational use
- preparing plans for complex prescribed burns including developing lighting techniques and patterns for ground and aerial ignition, tactics involving multiple fuel types, ignition strategies, burn objectives, strategies and tactics to meet objectives and timelines for planning and conduct of burn
- recommending actions and communicating them
- responding to feedback and adjusting plans for approval

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes

© Commonwealth of Australia, 2025 Skills Insight

knowledge of

- accumulated fuels
- burn feasibility
- characteristics of a simple prescribed burn including completed in one shift, involves minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
- characteristics of complex prescribed burn including medium to large areas, moderate to high risk, range of fire intensity, significant potential impact on assets and variety of fuels and terrain
- complex prescribed burning ignition and suppression strategies including ignition patterns and sequences for ground and aerial
- contingency arrangements including command structure, safety considerations including escape routes and safety zones, actions in event of unexpected weather, resolution to escapes, special resources and/or secondary control lines, additional resource requirements and resolution to resource breakdowns
- control line suitability
- effects of fire on people, property, assets, ecology and environment
- fire prediction tools
- fuel sampling techniques
- legislative, regulatory, organisational and permit requirements
- organisational documentation, policies and procedures including pre-burn procedures
- planned burn hazards and risks
- resource capabilities
- smoke modelling
- traffic management
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- written and verbal notification requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

© Commonwealth of Australia, 2025 Skills Insight

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - area requiring application of fire under prescribed conditions
  - existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to conduct an initial assessment on receipt of a call, when enroute and/or at the incident and to then take action to maintain public safety, preserve scene and record details and information on arrival at the scene of an accident or incident.

The unit is applicable personnel who are the first to arrive at the scene of an accident or incident. It applies to public safety personnel at an incident who need to understand the importance of maintaining the legal integrity of a scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Secure and preserve scene	**1.1** Participation in initial assessment when enroute and at

Assessment Requirements for PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying questioning skills to gain accurate information
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information and liaising with all stakeholders
- conducting assessment enroute and at the incident scene
- implementing organisational policies and procedures
- observing scene and surrounding environment
- recording and reporting details of incident scene in accordance with organisational requirements
- securing and preserving scene, evidence and area or origin
- securing scene including removing non-emergency personnel from scene, isolating scene and erecting barriers
- taking notes accurately

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- factors impacting on public safety and scene preservation including those that could impact on safety of investigators, response team, security and/or preservation of actual site, security and preservation of situational evidence and traffic
- factors that may impact security of scene including topography, climatic conditions, human interference, animal interference, preservation of life/property, structural integrity and availability of personnel
- methods of securing scene
- organisational and legislative requirements
- organisational documentation, policies and procedures
- organisational procedures relative to scene preservation, collecting information and taking

© Commonwealth of Australia, 2025 Skills Insight

witness details
- tactical factors affecting quality of investigation including environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services and boundaries
- types of incident scenes
- witness details including name, contact details and other details are recorded, in accordance with organisational policies, procedures and legislative requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUALAW001B Protect and preserve incident scene

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application reviewed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required, on arrival at the scene of an accident or incident, to conduct initial assessment, take action to maintain public safety and preserve the scene, and note and record details and information.

The unit is particularly applicable in cases where organisation personnel are the first to arrive at the scene of an accident or incident.

Application of the Unit

This unit applies to all public safety workers at an incident who need to understand the importance of maintaining the legal integrity of the scene. It is not a specialist Crime Scene Investigation unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Secure and preserve scene	1.1 Initial ***assessment*** is participated in to identify ***factors which will impact*** on public safety and scene preservation. 1.2 ***Incident/accident scene*** is effectively secured to ***preserve the scene*** and maintain public safety in line with legislative requirements.
2. Record and report details of incident scene	2.1 ***Details of the scene*** are noted, ***recorded and reported*** according to organisation's policies and procedures. 2.2 ***Witness details*** and information volunteered are recorded in accordance with ***organisational and legislative requirements.*** 2.3 Information is communicated to ***relevant personnel*** in line with organisation's procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- listening
- note taking
- observation
- questioning
- reporting

Required Knowledge

- legislative and organisation requirements relating to scene preservation

© Commonwealth of Australia, 2025 Skills Insight

- methods of securing scene
- organisation requirements for taking witness details and information
- regulatory requirements for taking witness details and information
- techniques for estimating distance
- techniques for removing public from scene
- types of information which may assist in investigations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation's policies and procedures. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident scene may include:

- urban fire
- wild fire
- vehicle fire
- crime scene
- search for missing persons or evidence
- vehicle accident
- natural disaster
- industrial/mining accident
- incident involving death or injury to person or

© Commonwealth of Australia, 2025 Skills Insight

	damage to property • urban scene • rural scene • indoor scene • outdoor scene • animal incident • marine • aircraft • train • explosions • hazardous materials
Assessment of scene may be conducted:	• at scene • en route to and from scene
Factors impacting may include:	• public safety risk factors including factors that could impact on the safety of investigators • response team • the security/preservation of the actual site • the security and preservation of situational evidence • traffic • tactical factors affecting the quality of the investigation including environmental circumstances • chronology of events • access to scene • number of persons at scene • availability of support services • boundaries
Persons at scene may include:	• incident scene specialists • forensic experts • potential witnesses • victims • other bystanders • personnel from other organisations • media • coroners • pathologists • medical practitioners • undertakers • forensic accountants • information technology consultants • legal officers • owners and/or occupiers

© Commonwealth of Australia, 2025 Skills Insight

Security of scene may be affected by:	• topography • climatic conditions • human interference • animal interference • preservation of life/property • structural integrity • availability of personnel
Securing scene may include:	• removing non-emergency personnel from scene • isolating scene • erecting barriers
Details of scene may include:	• date • time • location • damage • persons present • property involved • possible causes • items of evidence • injuries • status of utilities services such as broken water pipes • animal species present • flora • fauna • size and construction of building • occupancy • insurance details
Witness details may include:	• name • contact details • other details in accordance with organisation's policies and procedures
Relevant personnel may include:	• supervisor • team leader • police • investigating officer • other organisation's personnel
Communication may include:	• verbal • completing standard forms • written
Recording and reporting may include:	• taking notes • completing standard forms • making sketches

© Commonwealth of Australia, 2025 Skills Insight

	• taking photographs • taping • electronic videoing
Preserving scene may include:	• preserving evidence and the area of origin
Organisational and legislative requirements may vary between sectors and organisations and may include:	• legislation relevant to the operation/incident/response • legislation relevant to the organisation • operational • corporate and strategic plans • operational procedures • operational performance standards • organisation's personnel practices and guidelines • organisation's quality standards

Unit Sector(s)

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

PUALAW002 Conduct initial investigation at incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to gather and collate information including obvious and accessible physical evidence from the scene of an incident and identifying potential witnesses. It does not cover the specialist skills required to interpret the evidence gathered or the specialist skills required to gather specific evidence.

The unit applies to non-specialist personnel who have been tasked with the collection of information and evidence that is obvious at an incident scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Fire

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Conduct initial assessment of scene	**1.1** Scene is assessed with regards to Work, Health and Safety (WHS)/Occupational Health and Safety (OHS)

© Commonwealth of Australia, 2025 Skills Insight

		and all actions are undertaken, in accordance with organisation policies, procedures, guidelines and duty of care requirements
	1.2	Communication is established with the senior investigating officer and liaison is maintained throughout the investigation
	1.3	Circumstances surrounding the scene are ascertained from visual assessment and reports from other personnel
	1.4	Scene boundary is defined or redefined, as required, to preserve physical evidence for collection
	1.5	Obvious and accessible physical evidence is located and, where appropriate, protected from possible contamination
2 Control integrity of scene	**2.1**	Appropriate arrangements for scene access and egress are established and maintained
	2.2	Non-essential persons are removed from the scene and details are recorded accurately, in accordance with organisation and regulatory procedures
	2.3	Additional resources are identified and accessed to secure incident scene
	2.4	Health and safety needs of personnel and public involved in incident are identified and attended to
3 Examine scene	**3.1**	Appropriate search pattern is instigated, in accordance with organisational procedures, and instructions from senior investigating officer to ensure all evidence is located and preserved
	3.2	Details of the scene are recorded comprehensively and accurately, in accordance with organisational operating procedures
	3.3	Evidence is located, collected, packaged, labelled and stored, in accordance with organisational procedures, to ensure preservation for further post scene examination
	3.4	An accurate log of all evidence is maintained, in accordance with organisational procedures
	3.5	Scenes are assessed for future investigative requirements and appropriate personnel are notified

© Commonwealth of Australia, 2025 Skills Insight

4 Identify potential witnesses and initial statements recorded	**4.1** Bystanders are canvassed to identify potential witnesses
	4.2 Details of potential witnesses are recorded, in accordance with organisational procedures
	4.3 Recording practices are used, in accordance with legislative and regulatory requirements and organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

incident scene must include at least two of the following	• accident or incident involving death or injury to person or damage to property • crime scene • industrial or mining accidents and incidents • natural disaster • structural fire • vehicle accident • vehicle fire • wildfire

Unit Mapping Information

This unit replaces and is equivalent to PUALAW002B Conduct initial investigation at incident scene.

Assessment Requirements for PUALAW002 Conduct initial investigation at incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information and liaising with stakeholders
- conducting initial assessment of scene and identifying and mitigating onsite hazards
- controlling integrity of scene and evidence
- examining scene thoroughly
- gathering physical evidence
- identifying potential witnesses and recording initial statements
- implementing legislative requirements and organisational policies and procedures
- implementing methodical and systematic approach
- making arrangements to protect integrity of evidence
- reassuring bystanders including listening and questioning them
- recording and compiling interviews and statements accurately
- recording and reporting details of incident scene in accordance with organisational requirements
- taking notes accurately
- working with a variety of professionals

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- additional resources to support initial investigation
- arrangements for protecting integrity of evidence
- circumstance initiating need for specialised investigations
- circumstances surrounding scene including sequence of events, possible causes, people and property involved, victims, suspects and witnesses, damage, injury, organisational personnel,

© Commonwealth of Australia, 2025 Skills Insight

other organisations and agencies, status of investigation and action taken to date
- details that may be relevant to the investigation
- factors impacting incident scene including prevailing weather, additional resources to preserve and protect incident scene, environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services, boundaries and other organisations and/or agencies
- factors impacting security of an incident scene
- features and use of a variety of specialised equipment
- functions and roles of other professionals and experts
- identification, collection and recording of evidence
- incident scene protection and preservation
- indicators of emotional distress
- methods of evidence collection
- methods of packaging
- organisational documentation policies and procedures
- public safety risk factors including factors at incident scene that could impact on safety of investigators and security or preservation of actual site and security and preservation of situational evidence
- scene access and egress
- types of physical evidence including shoe impressions, tyre prints, skid marks, fingerprints, containers, fibres, flammable and combustible liquids, tool marks, bloodstains, identifying numbers, bodily fluids and burn patterns
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and duty of care at incident scene

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed either indoors or outdoors in a rural or urban environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and

© Commonwealth of Australia, 2025 Skills Insight

equipment used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOPE007B Command agency personnel within a multi-agency emergency response

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competence to command an organisation's personnel within a multi-agency emergency response environment.

Command is the internal direction of the members and resources of an organisation in the performance of the organisation's roles and tasks by agreement or in accordance with relevant legislation. Command operates vertically within an organisation.

Application of the Unit

This unit applies to Public Safety personnel who have a command role within their own organisation and are required to administer that command in a multi-agency response environment. It does not include the requirement to administer command of personnel from other agencies in a multi-agency response.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAOPE021A Control a Level 1 incident

PUAOPE015A Conduct briefings and debriefings (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take command	1.1 Command is exercised in accordance with organisation authority and guidelines. 1.2 The identity, location and contact details of the commander are communicated to internal personnel and to relevant external authorities/organisations/individuals pertinent to the emergency/incident.
2. Establish a command facility	2.1 An appropriate ***command facility*** is established and operated in accordance with organisational guidelines. 2.2 Details of the facility are communicated to internal personnel and to relevant external authorities/organisations/individuals as required.
3. Establish a command structure	3.1 A command structure is established appropriate to the nature and complexity of the task (s) undertaken by the organisation. 3.2 The command structure is expanded, contracted or modified in response to changes within the emergency environment.
4. Establish procedures to permit command to be exercised	4.1 Command structure is communicated to internal personnel and external authorities/individuals whom may have a regulatory interest applicable to the emergency/incident. 4.2 Command ***information management system*** is implemented. 4.3 Communication mechanisms and procedures are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	implemented between levels of command in accordance with organisational guidelines.
	4.4 Liaison is established and maintained to meet control and command requirements.
	4.5 A public information system is established in accordance with control plan requirements.
5. Determine operational command plan	5.1 Tasks are received and/or determined in accordance with the control requirements.
	5.2 Operational command plan to implement strategies is developed and modified as required in accordance with organisational guidelines.
	5.3 Appropriate tactics to effectively manage the emergency/incident are identified in accordance with the operational command plan.
6. Manage resources under organisation command	6.1 ***Resources*** are deployed to ensure that the operational command plan is implemented in accordance with organisational guidelines.
	6.2 Human and physical resources are effectively managed to achieve command plan outcomes.
7. Manage operation(s)	7.1 Operations are conducted in accordance with the operational command plan.
	7.2 Significant changes in status and actions taken are reported consistent with organisational policy and procedures.
	7.3 Operations are redirected as required to meet changes in the conditions which affect the emergency/incident situation.
8. Conclude operation(s)	8.1 Physical, human and capital resources are accounted for in accordance with organisational guidelines.
	8.2 ***Debriefing*** requirements are met in accordance with organisational guidelines.
	8.3 Operational documentation is completed to organisation standards.
	8.4 Reports are produced as required.
9. Review operations	9.1 Plans and guidelines are evaluated and reviewed.
	9.2 Effectiveness of command and interaction with control is evaluated and documented.
	9.3 Reports are produced and communicated in accordance with established protocols.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility, other organisations' personnel and external authorities
- analyse emergency situations both functionally and strategically
- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
  - operative and non-operative personnel
  - materials
  - equipment and consumables
- effective deployment, monitoring and communication of organisation allocated task(s)
- identification and correct use of equipment
- implement response in accordance with organisational procedures and within bounds of authority
- incorporate risk management and contingency processes
- liaise effectively with emergency controller
- operation of work systems and equipment
- processes and procedures
- secure emergency/operations site
- select, prioritise, implement and evaluate appropriate strategies
- strategically react to changes within the emergency environment
- using a range of information technology devices including:
  - computers
  - radio frequency devices
  - electronic data exchange systems etc
- using tools and techniques to solve problems

Required Knowledge

- applications of relevant agreements
- code of practice or other legislative requirements
- emergency site layout
- identification and correct use of equipment
- knowledge of current principles and practices to conduct an activity which exercises elements of public safety management
- organisational command structure
- processes and procedures
- security and confidentiality of material

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- Effective deployment, monitoring and communication of organisation allocated task(s)
- analysis of emergency situations both functionally and strategically
- selection, prioritisation, implementation and evaluation of appropriate strategies
- implementation of response in accordance with organisational procedures and within bounds of authority
- securing emergency/operations site
- strategic reaction to changes within the emergency environment,
- incorporation of risk management and contingency processes
- effective liaison with emergency controller and
- logging and recording all actions and decisions

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment.

Specific resources for assessment

Resources should involve access to or simulation of emergency situations in a multi-organisation response environment. This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2025 Skills Insight

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of emergencies (imminent or actual) may include:	• natural events • drought • fire (forest • range • urban) • avalanche snow/ice/hail • tsunami • windstorm/tropical storm • hurricane/typhoon • biological • extreme heat/cold • flood/wind driven water • earthquakes/land shifts • volcanic eruption • tornado/cyclone • landslide/mudslide • dust/sand storms • lightning storm • search and rescue • fauna rescues e.g. marine life rescue
Technological/industrial events may include:	• radiological accidents • dam/levee failure • fuel/resource shortages • hazardous material releases • explosions/fire • transportation accidents • building/structure collapse • power/utility failure • extreme air pollution • strikes • business interruption • financial collapse
Civil/political events may include:	• economic • general strike • terrorism • sabotage • hostage situation(s) • civil unrest • eco-terrorism

© Commonwealth of Australia, 2025 Skills Insight

Considerations in the determination of the nature, extent and potential of an emergency may include:	• enemy attack • risk to life • risk to property • risk to environment • scope and scale of incident including likely duration of incident • resource availability • potential for changes in situation • topography • weather • speed of onset • hazard agent location • demography
Resources may include:	• human-operations personnel • volunteers • support personnel • local • state/territory and federal governments • physical-equipment • machinery • vehicles • technology devices • communication devices • aviation and marine vessels
Information management system may include:	• data receival • recording • storage and dispatch modes • procedures and protocols • types of technology – electronic data exchange devices • audio and visual recording mechanisms • public/media information dissemination • security and authorisation assignment • recording and documenting of incident
Personnel support activities may include supply of:	• catering • sanitation • shelter • rest/relief counselling services • stress management services
Command facility establishment procedures and principles may include	• proximity to emergency/incident • size and type of structure • special incident requirements

© Commonwealth of Australia, 2025 Skills Insight

consideration of:	• communication modes • logistical operations • site access and exit requirements • security requirements • equipment characteristics • support services • amenities • parking • topography • environment • climatic conditions • logistical operations
Communication processes and systems may include:	• designation of appropriate modes and channels of communication • communication responsibilities of personnel • radio communications • inter organisation liaison • data transfer • telecommunications • interpersonal communications
Internal and external personnel and authorities may include:	• operational personnel • emergency organisations • ancillary organisations • higher authorities • public • media • clients • government and semi government authorities and departments • witnesses • victims • occupational health and safety specialists • emergency management specialists • service providers • other analysts and stakeholders
Support services may include:	• emergency agencies • water • gas and power agencies • welfare and counselling organisations • medical organisations • equipment suppliers • contractors

- community service organisations
- land management agencies
- transport

Debriefing may include:

- critical incident stress debriefing
- performance evaluations
- operational analysis

Agreed reporting mechanisms will involve:

- authorisation
- distribution and development of reports in accordance with regulatory and organisational requirements and may include:
  - media reports
  - ministerial reports
  - coronial reports
  - situation reports-within emergency for external distribution-status reports
  - performance evaluations
  - legal reports
  - final reports
  - briefing papers

Activities controlled include:

- operations
- planning
- logistics
- communications

Sources of information/ documents may include:

- emergency procedures
- standard operating procedures
- maps
- field reports
- relevant Australian or international documentation in disaster/emergency management
- organisational and workplace operating procedures and policies
- client requirements
- communications technology equipment
- oral
- aural or signed communications
- personal and work area work procedures and practices
- evacuation procedures
- occupational health and safety procedures
- applicable state, territory, commonwealth legislation and regulations which relate to:
  - public safety

PUAOPE013 Operate communications systems and equipment

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

The unit is applicable to personnel who are required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This may occur either in the field or from a facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Use communications systems and equipment	**1.1** Communications equipment and techniques, including verbal transmissions and voice procedures, are selected to best meet the task, context and needs of the situation
	1.2 Equipment is operated safely to support communications

© Commonwealth of Australia, 2025 Skills Insight

		consistent with organisational policies and procedures
	1.3	Communications system is correctly utilised to facilitate transmission and reception
2 Transmit and receive communications	**2.1**	Information is transmitted concisely and clearly to facilitate accurate reception of the message, in accordance with organisational policies and procedures
	2.2	Contact is acknowledged, communication is confirmed, and action is initiated
	2.3	Communication faults and deficiencies are reported, in accordance with organisational policies and procedures
	2.4	Alternative communications strategies are employed, in accordance with organisational procedures, to address identified faults and deficiencies in communication
	2.5	Communication is processed and recorded, in accordance with organisational policies and procedures
3 Maintain communications equipment	**3.1**	Communications equipment is inspected to ensure operational readiness
	3.2	Fault finding techniques are applied and basic maintenance is conducted, in accordance with organisational policies and procedures
	3.3	Faulty equipment is identified and noted for repair and documentation is completed, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

organisation's communications equipment must include	• radio • telephone

Assessment Requirements for PUAOPE013 Operate communications systems and equipment

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- following organisational protocols, policies and procedures
- maintaining communications equipment
- making verbal transmissions
- operating a range of different communications equipment
- reporting communication faults and deficiencies
- transmitting and receiving communications using the organisation's communications systems and equipment
- using communications systems and equipment under non-operational and operational conditions
- using verbal communication procedures
- using voice techniques

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- organisational documentation, policies and procedures
- range of communications equipment available
- types of and use of communications systems including organisational networks and hardware
- verbal transmission procedures
- voice techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - communications systems and equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOPE016A Manage a multi-team sector

Modification History

Release	TP version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V1	Layout adjusted. Fire specific prerequisites removed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to manage a multi-team response to incidents which may be time critical and/or potentially threatening to life, property or the environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit typically applies to Sector/Division Commanders and Level 1 Operations Officer who are responsible for:

- implementing their portion of the Incident Action Plan (IAP)
- allocating resources within their sector
- reporting on incident situation, the progress of operations, emerging risks and the status of resources within the sector
- maintaining situational awareness

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct an assessment of the incident	1.1 Initial briefing is obtained 1.2 ***Risk assessment*** of all factors relevant to the sector is conducted 1.3 ***Resources*** required to deal with the ***incident*** are identified 1.4 ***Constraints*** which may impede the response are identified 1.5 ***Initial response options*** are identified and assessed
2. Take command of the sector	2.1 Command of all sector personnel is assumed and maintained in accordance with ***organisational policies and procedures*** 2.2 ***Communications systems*** are used in accordance with organisational policies and procedures 2.3 Reporting processes are activated in accordance with organisational policies and procedures to provide continuous monitoring and evaluation of incident
3. Implement operations portion of the IAP	3.1 ***IAP*** is communicated to teams in accordance with organisational guidelines 3.2 Resources are deployed to ensure operations portion of the IAP is implemented in accordance with organisational guidelines 3.3 Operations are conducted and ***monitored*** in accordance with IAP

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.4 Operational reports are issued in accordance with organisational policies and procedures
	3.5 Operations are modified as required by the situation
4. Manage and monitor sector operations	4.1 Sector is managed is accordance with agency workplace policies
	4.2 Safe work practices, health and welfare arrangements are implemented and monitored
	4.3 Strategies are implemented and tactics are determined in accordance with IAP
	4.4 Team leaders are briefed and tasked in accordance with the IAP
	4.5 Specific tasks are reviewed and modified as required
	4.6 Regular exchange of information is maintained with Operations Officer on incident situation, progress, achievement of incident, objectives and emerging risks
	4.7 All unexpected situations that require a quick and decisive response are recognised and responded to in accordance with operational requirements and procedures
	4.8 Reports are provided to Operations Officer on required modification to the IAP, additional resources required, surplus resources and hazards present
	4.9 Need for additional resources and logistical support is identified and communicated to Operations Officer
	4.10 Activities are coordinated with adjacent sectors
5. Manage post incident operations	5.1 Resources are accounted for and demobilised in accordance with organisational policies and procedures
	5.2 Post operational ***documentation*** is completed to organisational requirements
	5.3 Sector debrief is conducted in accordance with organisational guidelines
	5.4 Recommendations are made for changes in policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

Required Skills:

- access information and support from the control facility
- brief and debrief personnel
- develop and maintain incident situational awareness
- effectively and efficiently deploy human and physical resources
- identify and correctly use equipment
- lead teams
- make decisions, negotiate and resolve conflict
- manage resources

Required Knowledge:

- agency procedures for managing operations
- Australasian Inter-service Incident Management System (AIIMS) structure
- codes of practice and legislation
- emergency site layout
- equipment and personnel capabilities for incident type
- focus of operation of work systems and equipment
- IAP (objectives, strategies and tactics) and development of appropriate tactics
- industrial awards and agreements, and agency personnel practices and guidelines
- organisational command structure
- post operational procedures
- processes for implementing, monitoring, amending and reviewing tactics
- reporting and recording requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • assess effectiveness of strategies and tactics on sector • implement relevant part of the IAP for the sector • adapt tactics, where required • provide reports to operational supervisor. • Consistency in performance • Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	Context of assessment Competency should be assessed in an operational environment or in an industry-approved simulated workplace environment.

© Commonwealth of Australia, 2025 Skills Insight

	Specific resources for assessment Access is required to: • emergency situations or simulation of emergency situations, in a multi-team response environment • equipment, personnel, facilities etc. appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

Risk assessment may include:	• Adequacy of allocated equipment • Capability of assigned personnel • Forecasts • Hazards • Information gathered from existing plans/databases • Meteorological profiles • Property and environment • Risk to life • Type of incident
Resources may include:	• Aircraft • Amenities • Communication devices • Equipment characteristics

© Commonwealth of Australia, 2025 Skills Insight

	• Human:
	  • operations personnel
	  • specialised personnel such as aviation authorities
	  • support personnel/services
	  • volunteers
	• Local, federal and state/territory governments
	• Parking
	• Physical:
	  • aircraft
	  • equipment
	  • machinery
	  • material
	  • safety equipment
	  • vehicles
	• Technology devices

Incidents may include:	• Life threatening situations
	• Protection of property and the environment
	• Risks to life and property such as:
	  • biological agents
	  • fauna rescue
	  • fire
	  • flood
	  • hazardous materials
	  • landslip
	  • severe storm

Constraints may include:	• Aboriginal and Torres Strait Islander sacred sites • Constraints on road closure • Existing emergency management plans • Financial • Hazardous areas • Legislative • Military areas • Other areas requiring permission and/or authorisation to enter • Other areas of environmental and cultural significance • Prevailing weather • Redirection of water course • Resources • Restrictions on duration of work or the conditions under which personnel may be employed

© Commonwealth of Australia, 2025 Skills Insight

	• Seasonal factors • Time • Wilderness areas
Initial response options will be determined by:	• Availability of resources and estimated outcome • Legislative requirements • Organisational guidelines • Regulatory authorities
Organisational policies and procedures may include:	• Civil Aviation Orders • Corporate and strategic plans • Legislation relevant to the operation/incident/response • Legislation relevant to the organisation • Operational performance standards • Operational procedures • Organisational performance standards • Organisational personnel practices and guidelines • Organisational quality standards • Organisation's approach to environmental management and sustainability • Procedures/action • Search and rescue time procedures and action
Communications systems may include:	• Computer • Facsimile • Mobile data terminal • Pager • Radio • Satellite • Signage • Signalling • Telephone • Warnings
IAP may include:	• Area or region • Aims and objectives of the response/incident/operation • Consideration or aircraft type • Contingencies and alternatives • Coverage of one or more places • Document (formal or informal) • Flight plans • Limitations • Monitoring and evaluative procedures • Part of an overall plan

© Commonwealth of Australia, 2025 Skills Insight

	• Performance and suitability • Possible strategies to achieve objectives • Possible tactics to implement strategies • Pre-plans • Reporting requirements • Resources required including their availability
Monitoring of operations may include:	• Progress against plan • Utilisation of resources and potential of incident • Welfare of personnel
Documentation may include:	• Assessment of safety procedures utilised • Completion of logs • Financial statements • Input to debriefs • Journal records • Post-operational report • Situational reports

Assessment Requirements for PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attending and working in a variety of team situations
- completing organisational documentation
- contributing to organisational goals and team activities, team meetings and the achievement of tasks consistent with goals
- displaying interpersonal skills and encouraging team members
- following instructions
- following organisational policies and procedures
- giving and receiving support to and from team members
- identifying work conditions and types of activities to be undertaken
- listening and using a variety of communication skills
- providing appropriate suggestions, feedback and information to team members
- reporting information
- requesting assistance from appropriate personnel
- sharing knowledge and information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- composition of teams including roles and responsibilities of members
- nonoperational and operational communication processes
- organisational documentation, policies and procedures
- organisational goals and activities
- potential work task conditions
- techniques for assisting and supporting others
- techniques for giving and receiving feedback in a constructive manner
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge

- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals. **Consistency in performance** Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated workplace environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Skills Insight

Teams comprise	• two or more people working towards a shared purpose
Appropriate situation to request assistance may include:	• difficulty meeting timelines • to comply with occupational health and safety requirements • unsure of best method to complete task • to maximise efficiency
Assisting other team members may include:	• own tasks completed • to comply with occupational health and safety requirements • assistance requested • actions of others do not comply with requirements • other team member appears to be having difficulty completing task
Contribute to workplace goals may include:	• completion of task • achievement of new competencies • development of new skills • attainment of new knowledge • personal development
Activities may include:	• working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies • civil/political emergencies and non emergency operations including community events • public relations – activities • sporting events • parades • festivals
Conditions under which this competency may be required include	• hazardous conditions eg adverse weather • after dark operations • difficult terrain • time pressure • varying time frames from immediate/short term to long term response operations • varying access to equipment/resources necessitating the use of improvised techniques • single or multi organisation responses • dealing with human behaviours that result from emergency situations • non-emergency operations and events eg training and community education
Appropriate feedback on	• acknowledging initiative

© Commonwealth of Australia, 2025 Skills Insight

performance may include:	• aptitude • ideas • performance and assistance • providing constructive criticism
Organisation's policy and procedures may vary between sectors and organisations and may include:	• legislation relevant to the operation/incident/response • legislation relevant to the organisation • operational • corporate and strategic plans • operational procedures • operational performance standards • organisation's personnel practices • policy and procedures • organisation's quality standards • organisation's approach to environmental management and sustainability
Communication processes may include:	• established organisation's procedures for recording and reporting • the use of logs • notebooks • pagers • radios and telephones • team members may be geographically dispersed and require communication systems and technology to remain in contact

PUATEA002 Work autonomously

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work as a member of a team, or as an individual for periods of time without direct supervision, and to mentor and coach either in an operational or nonoperational environment.

The unit applies to personnel working in public safety but is particularly pertinent to new staff seeking to understand and apply organisational expectations and limits with regards to decision making.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

outcomes.	demonstrate achievement of the element.
1 Undertake work activities	**1.1** Work requirements are identified, and activities are undertaken, in accordance with organisational procedures
	1.2 Instructions and directions are identified and implemented
	1.3 Communication is maintained with team leader or supervisor advising of progress of task activity
	1.4 Personal safety and the safety of others is maintained, in accordance with organisational procedures
	1.5 Legal requirements and/or the ramifications of work activities are communicated to the team leader or supervisor
	1.6 Work area is determined or selected, in accordance with organisational procedures
	1.7 Equipment is operated, in accordance with manufacturers' specifications
	1.8 Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and organisational policies and procedures are applied
2 Accept responsibilities	**2.1** Responsibilities are accepted, in accordance with organisational policies and procedures
	2.2 Team leader is appraised of the outcome of work task activity
	2.3 Any activity that exceeds the scope of the defined task is referred to the team leader or supervisor
3 Set performance requirements	**3.1** Performance requirements are based on organisational objectives and goals and agreed to with the team leader or supervisor
	3.2 Performance requirements are reviewed with the team leader or supervisor
4 Maintain team performance	**4.1** Individual performance is monitored against organisational performance requirements and appropriate action is taken to maintain performance, as required

© Commonwealth of Australia, 2025 Skills Insight

	4.2	Performance of others is monitored, in accordance with organisational procedures and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met
	4.3	Feedback and constructive advice is provided to the supervisor or team leader
	4.4	Issues which cannot be rectified or addressed are referred to the supervisor or team leader for action, in accordance with organisational policies and procedures
	4.5	Supervisor or team leader is advised of any changes in work priorities or tasks
	4.6	Documentation relevant to team and individual performance is completed, in accordance with organisational procedures
5 Act as a team leader	**5.1**	Responsibility for the performance of the team is accepted
	5.2	Work goals are set, tasks are identified and are presented to team members
	5.3	Instructions and directions are communicated to team members clearly and unambiguously
	5.4	Team members' concerns and queries are recognised, discussed and dealt with
	5.5	Legal requirements or ramifications of work activities are communicated to team members
	5.6	Duties, rosters and responsibilities are allocated to team members having regard to the competency required to undertake assignments or tasks, in accordance with organisational policies and procedures
	5.7	Feedback on own performance is sought
	5.8	Level of authority is recognised and adhered to when acting as a team leader
	5.9	Operational debriefing is conducted, in accordance with the organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUATEA002B Work autonomously.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf

Assessment Requirements for PUATEA002 Work autonomously

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accepting work task or activity responsibilities
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing the impact of legal requirements on activities
- carrying out team leader responsibilities including coaching and mentoring team members
- communicating performance expectations including providing feedback
- completing a range of organisational documentation
- conducting debriefings
- conveying work activity or task instructions and directions
- encouraging and monitoring team members' performance
- following organisational policies and procedures
- identifying and undertaking work activities
- identifying conditions and working area impacts
- implementing team building activities
- maintaining team performance
- offering informal performance counselling
- performing operational and nonoperational activities
- representing and reporting issues to management
- scoping of allocated tasks
- setting goals, identifying tasks, allocating duties, rosters and responsibilities
- setting performance requirements

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- impact of performance issues
- legal requirements and ramifications of team activities
- methods of setting performance expectations and monitoring performance
- organisational documentation, policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

- possible work areas and conditions
- requirements for documenting team performance and work activities or tasks
- scope of operational and nonoperational activities
- team dynamics
- team members' duties and responsibilities including team leader responsibilities
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including personal safety, safety of others, duty of care responsibilities and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAWHS002 Maintain safety at an incident scene

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to recognise potential health and safety risks and to then act to eliminate or control those risks at incident scenes and to prevent injury to self, other personnel or members of the public.

The unit is applicable to public safety personnel attending an incident scene and links to the individual's duty of care responsibility to maintain personal safety and to be aware of how actions affect the safety of others including team members, other agency/organisational personnel and the public.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

outcomes.	demonstrate achievement of the element.
1 Determine hazards at incident site	**1.1** Site hazards affecting the safety of self or other personnel are identified, risks are assessed and are communicated with others at the scene
	1.2 Operational safety procedures are implemented, in accordance with organisational policies and procedures
	1.3 Duties are undertaken, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
2 Implement hazard controls at incident scene	**2.1** Hazards are identified, and mitigation procedures are selected, in accordance with organisational procedures
	2.2 Control measures are applied, reported and recorded, in accordance with organisational policies and procedures
	2.3 Changes in incident situation or conditions are reported immediately to designated personnel
	2.4 Hazard controls are monitored and communicated to relevant personnel to ensure continuing effectiveness
	2.5 Hazard control and risk mitigation measures are implemented with minimum damage to the environment, whilst maintaining safety of self and others
	2.6 Incident and/or accident scene is secured to preserve the scene and maintain public safety, in accordance with organisational policies and procedures
3 Maintain personal safety	**3.1** Personal protective clothing and equipment is selected and checked, in accordance with organisational procedures, to ensure it is operational prior to entry into incident situation
	3.2 Personal protective clothing and equipment appropriate to dealing with the hazard is worn and used, in accordance with organisational procedures and manufacturers' guidelines
	3.3 Water and food intake, rest breaks and shelter requirements are maintained
	3.4 Survival techniques and/or strategies are implemented, in accordance with organisational policies, procedures

Assessment Requirements for PUAWHS002 Maintain safety at an incident scene

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating using non-verbal and verbal techniques
- determining hazards and assessing risks at incident site
- following organisational policies and procedures
- implementing hazard controls at incident scene
- maintaining safety at an incident scene including personal safety and contributing to the safety of other group members
- recording information, updating records and completing documentation
- using communication equipment
- using personal protective clothing and equipment
- working with others in a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- awareness of incident hazards and hazard control equipment
- commonly encountered hazards and safety precautions to prevent injury
- concept of risk
- duty of care responsibilities and obligations
- factors that may affect safety at an incident which must require monitoring
- legislation and regulations
- means of relaying warnings to other personnel
- methods of hazard control
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- requirements for reporting
- roles and responsibilities at an incident scene

© Commonwealth of Australia, 2025 Skills Insight

- safety procedures and hazard equipment to prevent injury
- survival techniques and strategies at an incident
- work environments including incidents and response situations
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
  - that demonstrate competency in maintaining personal safety and the safety of others
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

RIIHAN308F Load and unload plant

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to load and unload plant.

This unit applies to those working in site-based roles.

Prior to performing this activity, skills and knowledge should be developed for the individual plant. This can be achieved through completing the equivalent operator unit or being assisted by someone who has this knowledge. Refer to the Implementation Guide for further details.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

Unit Sector

Coal mining

Extractive

Drilling

Metalliferous mining

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to load and unload plant	1.1 Access, interpret and apply load handling documentation to ensure work activity is compliant 1.2 Obtain, interpret, clarify and confirm work requirements 1.3 Identify hazards and environmental issues, assess the risks and

Assessment Requirements for RIIHAN308F Load and unload plant

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loading and unloading plant that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- displaying signage and erecting barriers to isolate work site
- calculating volume and weight of loads
- placing and securing loading and unloading aids
- moving plant onto and off trailer or float, halting at designated position
- securing plant to trailer or float
- slackening securing devices and removing in a safe sequence
- stowing loading aids

In the course of the above work, the candidate must also:

- select, check and use required loading tools and equipment
- select and wear personal protective equipment required for work activities
- apply safe work practices and identify and report potential hazards and environmental issues, and assess risks
- apply fault finding techniques
- locate and apply required documentation, policies and procedures
- meet written and verbal reporting requirements and procedures associated with loading and unloading plant
- apply operational safety
- maintain equipment records

Knowledge Evidence

The candidate must demonstrate knowledge of the following when loading and unloading plant:

© Commonwealth of Australia, 2025 Skills Insight

Key policies, procedures and relevant standards for loading and unloading plant, including those relating to:

- National Standard for high risk work
- site and equipment safety
- techniques and processes for preparing plant for transportation
- environmental requirements
- work health safety
- chain of responsibility for loading and unloading of equipment

Key site information, including:

- understanding of required hand signals
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet

Key factors affecting work activities described in performance evidence above, including

- basic motion and restraint theory related to heavy plant on floats or trailers
- basic centre of gravity and balance theory related to heavy plant on floats or trailers
- types, operation, uses and limitations of load securing equipment

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - plant to load and unload
  - trailer or float
  - signage and barriers
  - loading aids and securing devices
  - personal protective equipment
- be conducted in a safe environment
- be assessed in context of this sector's work environment
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

© Commonwealth of Australia, 2025 Skills Insight

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislation and regulation relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided, and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit) and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed.

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant	

© Commonwealth of Australia, 2025 Skills Insight

	regulation.

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO315E Conduct tractor operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to operate tractors and use attachments.

This unit applies to those working in site- based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for tractor operations	1.1 Access, interpret and apply tractor operations documentation 1.2 Obtain, interpret, clarify and confirm work instructions 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work activities 1.5 Identify, obtain and implement traffic management signage requirements according to standard operating procedures and safe work practices 1.6 Select required tractor equipment and/or attachments for work activities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.7 Obtain and interpret emergency procedures for tractors, and be prepared for fires, accidents and emergencies 1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity
2. Operate tractor in line with established requirements to complete work activity	2.1 Carry out prestart and start-up checks in line with workplace procedures 2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures 2.3 Drive and operate tractor using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures 2.4 Monitor and manage equipment performance using indicators and alarms 2.5 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment 2.6 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
3. Select, remove, fit and use attachments for a tractor	3.1 Select attachment for the task 3.2 Fit attachment in line with workplace procedures 3.3 Test attachment to ensure correct fitting and operation 3.4 Use attachment within design limits and in accordance with workplace procedures 3.5 Remove, clean and store attachments in designated location in line with workplace procedures
4. Relocate tractor	4.1 Prepare tractor for relocation 4.2 Move tractor safely between worksites, observing relevant codes and traffic management requirement
5. Conduct housekeeping activities	5.1 Clear work area and dispose or recycle materials according to workplace procedures 5.2 Manage and/or report hazards to maintain a safe working environment 5.3 Complete and file or distribute documentation in a manner that complies with workplace practices

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skill	Description
Reading	• Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Numeracy	• Uses equipment operating capacity schedule to confirm safe weight load limits

Unit Mapping Information

Assessment Requirements for RIIMPO315E Conduct tractor operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of tractor operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to site conditions
- completing a variety of tractor operations during the two occasions, selected from the following:
  - post hole digging
  - spraying of herbicides/fertilisers
  - mowing/slashing
  - lifting
  - sweeping
  - blade based functions
- fitting, using and removing at least two different attachments (i.e. minimum of one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
  - a front blade
  - forklift
  - slasher
  - mower
  - auger
  - drag broom
  - power broom
  - loading platform

© Commonwealth of Australia, 2025 Skills Insight

  - rotary hoe
  - concrete mixer
  - spraying equipment
  - disc plough
- parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply tractor and attachment operating techniques
- clean and store attachments
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for tractor operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- civil construction terminology
- traffic control responsibilities and authorities
- project quality requirements
- apply operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

© Commonwealth of Australia, 2025 Skills Insight

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
-

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - a tractor
  - attachments
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

© Commonwealth of Australia, 2025 Skills Insight

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO317F Conduct roller operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.

Application

This unit describes the skills and knowledge required to operate a roller to compact material.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

Assessment Requirements for RIIMPO317F Conduct roller operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of roller operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations using at least two different material types and include the mandatory tasks of:
  - compacting materials to pattern and density
  - sealing and finishing
  - adjusting at least two of the following:
    - interchangeable drums
    - spray bars
    - scraper bars
    - wheel/drum brooms
    - drag brooms
    - blades
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable

© Commonwealth of Australia, 2025 Skills Insight

- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply operating techniques for levelling and compacting
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for roller operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- operational, maintenance and basic diagnostics
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - roller
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

© Commonwealth of Australia, 2025 Skills Insight

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO318F Conduct civil construction skid steer loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Application

This unit describes the skills and knowledge required operate a skid steer loader to load, haul and distribute materials.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for skid steer loader operations	1.1 Access, interpret and apply skid steer loader operations documentation 1.2 Obtain, interpret, clarify and confirm work requirements 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work activities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.5 Obtain, identify and implement traffic signage requirements according to standard operating procedures and safe work practices 1.6 Select required skid steer equipment and confirm suitability for work activities 1.7 Obtain and interpret emergency procedures for skid steers, and be prepared for fires, accidents and emergencies 1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity
2. Operate skid steer loader in line with established requirements	2.1 Carry out prestart and start-up checks in line with workplace procedures 2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures 2.3 Drive and operate loader using techniques suited to equipment capabilities and site work conditions, and according to workplace procedures 2.4 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment 2.5 Monitor and manage equipment performance using indicators and alarms
3. Load, carry and place materials to complete work activity	3.1 Establish weight of load and ensure it is within safe operational limits of the machine 3.2 Position machinery to ensure stable and effective shift of materials according to work requirements 3.3 Shift materials safely and effectively, using hand audible and communication signals, in line with workplace procedures 3.4 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
4. Select, remove, fit and use attachments for a skid steer loader	4.1 Select appropriate attachment and required equipment for the task, and in accordance with safe working load requirements 4.2 Fit attachment in line with workplace procedures 4.3 Test attachment and ensure correct fitting and operation 4.4 Use attachment within design limits and in accordance with workplace procedures 4.5 Remove, clean and store attachments in designated location in line

Assessment Requirements for RIIMPO318F Conduct civil construction skid steer loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types (i.e. one different material per occasion) including:
  - stripping/spreading materials
  - backfilling
  - excavations
  - mixing materials
- selecting, fitting, testing, using and removing attachments on at least two occasions (i.e. one attachment per occasion), the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
  - multipurpose bucket
  - forks
  - dozer blade
  - backhoe
  - auger
  - chain digger
  - power broom
  - profiler
  - tiller/mixer
  - rotary hoe

© Commonwealth of Australia, 2025 Skills Insight

  - hammer
  - asphalt cutter/saw
  - concrete cutter/saw
  - rake
- assisting with loading and unloading skid steer loader from float/trailer
- safely parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operations, including those relating to:

- isolation requirements for skid steer loader
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics

- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - a skid steer loader
  - materials to be shifted
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes

© Commonwealth of Australia, 2025 Skills Insight

- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

Assessment Requirements for RIIMPO319E Conduct backhoe/loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loader/backhoe operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types (i.e. one different material type per occasion) including:
  - mixing materials
  - stripping/spreading materials
  - trench excavation
  - backfilling
  - lifting and carry materials
  - loading dump trucks, wagons, hoppers, chutes, and cutting/boxing
- selecting, fitting, testing, using and removing at least two attachments (i.e. one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
  - extending devices
  - tilt bucket
  - buckets
  - compaction wheel
  - ripper
  - plate compactor
  - rock breaker
  - auger

© Commonwealth of Australia, 2025 Skills Insight

  - broom
  - mower/slasher
  - forklift
  - 4 in 1 bucket and free/rock grab
- parking and securing of equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- work safely around other machines and personnel
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for backhoe/loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

RIIMPO320F Conduct civil construction excavator operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial corrections to performance evidence.

Application

This unit describes the skills and knowledge required to operate excavator operations to lift carry and place materials.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for excavator operations	1.1 Access, interpret and apply excavator operations documentation 1.2 Obtain, interpret, clarify and confirm work requirements 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	activities 1.5 Obtain, identify and implement traffic management signage requirements according to standard operating procedures and safe work practices 1.6 Select required excavator equipment and/or attachments and confirm suitability for work activities 1.7 Obtain and interpret emergency procedures for excavators, and be prepared for fires, accidents and emergencies 1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity
2. Operate excavator in line with established requirements	2.1 Carry out prestart and start-up checks in line with workplace procedures 2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures 2.3 Drive and operate excavator using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures 2.4 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment 2.5 Monitor and manage equipment performance using indicators and alarms in line with manufacturers' specifications
3. Lift, carry and place materials to complete work activity	3.1 Establish weight of load and ensure it is within safe operational limits of the machine 3.2 Use lifting gear within safe working load requirements and in line with workplace requirements 3.3 Position machinery and ensure stable and effective shift of materials according to work requirements 3.4 Shift load safely and effectively, using hand, audible and communication signal, in line with workplace procedures 3.5 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
4. Select, remove, fit and use attachments for a excavator	4.1 Select attachment for the task 4.2 Fit attachment in line with workplace procedures 4.3 Test attachment and ensure correct fitting and operation

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4 Use attachment within design limits and in accordance with workplace procedures 4.5 Remove, clean and store attachments in designated location in line with workplace procedures
5. Prepare to relocate the excavator	5.1 Prepare excavator for relocation 5.2 Move excavator safely within and/or between work areas, observing relevant codes and traffic management requirements 5.3 Assist loading and unloading machine from float/trailer in line with workplace procedures
6. Conduct housekeeping activities	6.1 Clear work area and dispose of or recycle materials according to workplace procedures 6.2 Manage and/or report hazards to maintain a safe working environment 6.3 Complete and file or distribute documentation in a manner that complies with workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skill	Description
Reading	• Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Numeracy	• Uses equipment operating capacity schedule to confirm safe weight load limits

Assessment Requirements for RIIMPO320F Conduct civil construction excavator operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial corrections to performance evidence.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of excavator operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to site conditions
- completing operations to specification using at least two different material types and activities including:
  - loading, cutting/boxing
  - stripping/spreading
  - lifting and carry materials
  - bulk excavation
  - mixing/backfilling
  - trench excavation
  - stockpiling
  - battering
  - benching
  - site clean up
- selecting, fitting, testing, using and removing at least three attachments, the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
  - tilt bucket

© Commonwealth of Australia, 2025 Skills Insight

  - buckets
  - lifting device
  - vibrating compaction wheel
  - ripper/tyne
  - compaction plate
  - compaction wheel
  - rock breaker
  - auger
  - ground engaging tools
- assisting with loading and unloading plant type from float/trailer
- parking and securing equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- select and use the required tools and equipment
- apply methods of changing machine attachments
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for excavator operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities

© Commonwealth of Australia, 2025 Skills Insight

- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - excavator
  - attachments
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Skills Insight

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being	

© Commonwealth of Australia, 2025 Skills Insight

	assessed and, where no industry standard is specified, should comply with any relevant regulation.

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO321F Conduct civil construction wheeled front end loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.

Application

This unit describes the skills and knowledge required to conduct wheeled front end loader operations.

This unit applies to those working in site- based roles.

Where equipment being assessed requires the fitting and removal of attachments to be demonstrated an integrated tool carrier unit should be used.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Assessment Requirements for RIIMPO322E Conduct civil construction tracked front end loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of tracked front end loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types including:
  - mixing materials
  - stripping/spreading materials
  - loading
  - cutting/boxing
  - backfilling
  - lifting and carry materials
  - site clean-up
- select and wear personal protective equipment required for work activities
- parking and securing of equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment

© Commonwealth of Australia, 2025 Skills Insight

- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- apply levelling techniques
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for tracked front end loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

© Commonwealth of Australia, 2025 Skills Insight

- include access to:
  - tracked front end loader
  - materials to be shifted
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

© Commonwealth of Australia, 2025 Skills Insight

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO323E Conduct civil construction dozer operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial corrections to performance evidence.

Application

This unit describes the skills and knowledge required to conduct dozer operations.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for dozer operations	1.1 Access, interpret and apply dozer operations documentation 1.2 Obtain, interpret, clarify and confirm work instructions 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	activities 1.5 Identify, obtain and implement traffic management signage requirements 1.6 Select required dozer tools, equipment and/or attachments and confirm suitability for work activities 1.7 Obtain and interpret emergency procedures for dozers, and be prepared for fires, accidents and emergencies 1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity
2. Operate dozer in line with established requirements to complete work plan	2.1 Carry out prestart and start-up checks in line with workplace procedures 2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures 2.3 Drive and operate dozer using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures 2.4 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment 2.5 Perform work activity within the operating capacity of the equipment 2.6 Monitor and manage equipment performance using indicators and alarms 2.7 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
3. Select, remove, fit and use attachments for a dozer	3.1 Select attachment for the task 3.2 Fit attachment in line with workplace procedures 3.3 Test attachment and ensure correct fitting and operation 3.4 Use attachment within design limits and in accordance with workplace procedures 3.5 Remove, clean and store attachments in designated location in line with workplace procedures
4. Relocate the dozer	4.1 Prepare dozer for relocation 4.2 Move dozer safely between worksites, observing relevant codes and traffic management requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.3 Assist loading and unloading of machine from float/trailer in line with workplace procedures
5. Conduct housekeeping activities	5.1 Clear work area and dispose of or recycle materials according to workplace procedures 5.2 Manage and/or report hazards to maintain a safe working environment 5.3 Complete and file or distribute documentation in a manner that complies with workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skill	Description
Reading	• Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Numeracy	• Uses equipment operating capacity schedule to confirm safe weight load limits

Unit Mapping Information

Assessment Requirements for RIIMPO323E Conduct civil construction dozer operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial corrections to performance evidence.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of dozer operations that safely, effectively and efficiently follows workplace procedures to carry out work activity, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification in at least two different material types on at least three occasions including:
  - stripping/spreading materials
  - cut and fill
  - battering
  - stockpiling
  - bulk excavation
  - cutting drains
  - benching
  - backfilling
  - site clean-up on
- selecting, fitting, testing, using and removing a minimum of two attachments, which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
  - stick rakes
  - root rakes
  - push blade

© Commonwealth of Australia, 2025 Skills Insight

  - angle blade
  - bull blade
  - power angle tilt blade
  - rippers, winch
  - tree pusher
  - cable plough
  - stump plough
  - power control unit
  - cable drum
  - ground engaging tools
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- select and use the required tools and equipment
- establish weight of load
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for dozer operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities

© Commonwealth of Australia, 2025 Skills Insight

- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - dozer
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Skills Insight

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being	

© Commonwealth of Australia, 2025 Skills Insight

	assessed and where no industry standard is specified should comply with any relevant regulation.

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Assessment Requirements for RIIMPO324F Conduct civil construction grader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Minor change to performance evidence.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of grader operations that safely, effectively and efficiently follows workplace procedures to meet carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types including:
  - cutting and maintaining drains
  - forming/upgrading/maintaining roads
  - mixing/ spreading materials
  - scarifying and ripping
  - cutting and trimming of batters
  - trimming of road sub-grades and pavements
  - site clean-up
  - form and carry a windrow
- selecting, fitting, testing, using and removing at least two attachments, the attachment must be certified and approved in line with workplace procedures
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- establish weight of load
- apply levelling techniques
- apply cut and fill techniques
- conduct towing of equipment/plant where required
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for grader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems and laser levelling equipment

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

© Commonwealth of Australia, 2025 Skills Insight

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - unit plant type
  - materials to be shifted
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

© Commonwealth of Australia, 2025 Skills Insight

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

RIIVEH304E Conduct tip truck operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to conduct tip truck operations in the resources and infrastructure industries.

It applies to those working in supervisory and technical specialist roles. They generally work under minimal supervision to undertake a broad range of skilled applications in varied work contexts, using some discretion and judgement in selecting equipment, services or contingency measures.

Licensing, legislative and certification requirements may apply to this unit and can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for tip truck operations	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to conduct tip truck operations 1.3 Identify, obtain and implement signage requirements according to the project traffic management plan 1.4 Select vehicle, tools and equipment required for the work activities 1.5 Check tools and equipment for serviceability and rectify or report faults to relevant personnel 1.6 Identify, confirm and apply environmental protection requirements from the project environmental management plan
2. Conduct tip truck pre-operational checks	2.1 Carry out prestart, start-up, park and shutdown according to workplace procedures 2.2 Check tip truck controls and functions, and ensure any faults are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	rectified or reported to relevant personnel
3. Operate tip truck	3.1 Identify and manage site operating hazards and risks and apply safe operating techniques according to workplace procedures 3.2 Manage engine power, ensure efficiency of truck movements, and minimise strain on the engine, drive line and gears according to manufacturer specifications 3.3 Coordinate engine power with gear selection, ensure smooth transition and operation within torque range according to manufacturer specifications 3.4 Operate tip truck to work instructions according to workplace procedures 3.5 Monitor road and traffic conditions, consider road conditions, traffic flow, distance and load, ensure safety of people, property, equipment, loads and facilities 3.6 Halt vehicle smoothly, using the engine retarder, gears and brakes according to manufacturer specifications
4. Load, transport and tip materials	4.1 Position tip truck at load and discharge points with a minimum of manoeuvre 4.2 Carry out smooth and controlled tip truck movements including the raising and lowering of the tray according to manufacturer specifications 4.3 Ensure weight and distribution of load is assessed for type of material and size of vehicle within vehicle capacity according to manufacturer specifications 4.4 Maintain safety and security of load, including load cover requirements, from loading site to discharge site according to manufacturer specifications 4.5 Discharge load on slope and/or over face at fill site 4.6 Dump and spread material evenly according to workplace procedures 4.7 Clear, lower and secure tray before resuming travel
5. Carry out operator maintenance	5.1 Ensure tip truck is safely parked and prepared for operator maintenance and shutdown 5.2 Conduct visual and physical inspection and fault finding according to workplace procedures 5.3 Remove and replace defective parts according to manufacturer specifications 5.4 Carry out scheduled maintenance according to workplace procedures 5.5 Process written maintenance records according to workplace procedures
6. Clean up	6.1 Clear work area and dispose of materials according to workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	6.2 Clean, check, maintain and store vehicle, tools and equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	• Identifies and interprets information from workplace procedures, documentation and regulations
Self-management	• Monitors and minimises own exposure to worksite risks and hazards during activities

Unit Mapping Information

Supersedes and is equivalent to RIIVEH304D Conduct tip truck operations.

Links

Assessment Requirements for RIIVEH304E Conduct tip truck operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- conduct tip truck operations on at least two occasions, including:
  - organising work activities to comply with site standards
  - obtaining and applying signage requirements
  - carrying out log-on, prestart, start-up, park-up and shutdown procedures
  - operating, steering, manoeuvring and positioning tip truck
  - raising and lowering tray smoothly
  - applying load cover
  - discharging load on slope and/or over face
  - dumping and spreading materials
  - halting and parking tip truck
  - carrying out inspections and identifying faults
  - processing written records and reports.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for conducting tip truck operations
- work effectively with others to conduct tip truck operations in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to conduct tip truck operations
- key policies, procedures and documentation required to conduct tip truck operations, including:
  - record, report and handover procedures
  - start up and shutdown procedures
  - safety requirements
  - operational, maintenance and basic diagnostic procedures
  - site isolation and traffic control responsibilities and authorities
  - safety data sheet and materials handling methods
  - vehicle manufacturer specifications and limitations
- tip truck types, characteristics, technical capabilities and limitations
- techniques for reporting faults in vehicles and ancillary equipment
- load quantity calculation techniques
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - personal protective equipment
  - equipment related to conducting tip truck operations
  - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

© Commonwealth of Australia, 2025 Skills Insight

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

© Commonwealth of Australia, 2025 Skills Insight

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWHS205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWHS205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Application

This unit describes the skills and knowledge required to control vehicle and pedestrian traffic using stop-slow bats, hand signals and approved communication devices in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work in teams in live traffic environments under some degree of supervision.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented registered training organisations are advised to contextualise the unit of competency by referring to the existing state/territory OHS legislative requirements

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to control traffic	1.1 Select and wear personal protective equipment required for work activities 1.2 Access, interpret and confirm work instructions and plan work 1.3 Access, interpret and apply required workplace policies, procedures, jurisdictional safety and environmental protection requirements 1.4 Obtain and interpret site emergency procedures and prepare for accidents and emergencies 1.5 Select tools and equipment, check for serviceability, and rectify faults and report according to workplace policies and procedures
2. Control traffic and operate	2.1 Adjust approved communication devices according to site

© Commonwealth of Australia, 2025 Skills Insight

communication devices	requirements 2.2 Direct traffic using hand held stop-slow bat and visibly clear and unobstructed hand signals as required 2.3 Monitor traffic, make adjustments for changing traffic conditions and position waiting vehicles as required 2.4 Communicate messages to other personnel, confirm recipient understanding and clarify as required 2.5 Check and perform maintenance on approved communication devices according to requirements 2.6 Check communications contact after nominated period of non-contact 2.7 Report traffic offenders according to workplace policies and procedures
3. Conduct housekeeping activities	3.1 Confirm and remove signs and devices in line with job requirements and cover as required 3.2 Clean, check and store tools and equipment 3.3 Report environmental damage and potential for future damage as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Numeracy	• Applies basic mathematical problem solving processes, including simple addition, subtraction, multiplication and division
Oral communication	• Listens to short, explicit instructions for work procedures and asks questions to clarify and confirm
Reading	• Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Technology	• Identifies purposes, specific functions and key features of common digital systems and tools and operates them as required
Writing	• Produces and completes workplace reports using appropriate vocabulary, grammatical structures and conventions

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

Supersedes and is equivalent to RIIWHS205D Control traffic with stop-slow bat.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272

Assessment Requirements for RIIWHS205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWHS205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Control traffic with a stop-slow bat according to traffic guidance schemes in a manner that is safe and follows workplace policies and procedures on at least two occassions, including:
  - directing pedestrian traffic, including at least one of the following:
    ~ pedestrians with mobility issues
    ~ pedestrians with prams
    ~ cyclists
  - using approved communication devices to transmit message and report traffic offenders, including the use of at least one of the following devices:
    ~ hand held radios
    ~ telephones.

During the above, the candidate must:

- coordinate operations with pilot vehicle in a shuttle flow work arrangement
- participate in risk assessment and management processes
- identify the type and scope of hazards and their impact and recommend risk control measures
- identify key environmental protection issues and describe required solutions
- locate and complete at least one incident report
- complete housekeeping requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- risk assessment processes and hierarchy of control
- work instructions and procedures for planning work
- jurisdictional safety requirements relevant to temporary traffic management

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection requirements
- site emergency procedures
- site and equipment safety requirements
- traffic control requirements and procedures for directing the following predestrian traffic groups:
  - pedestrians with mobility issues
  - pedestrians with prams
  - cyclists
- traffic guidance scheme and traffic management plan compliance
- communication device operations, including:
  - hand held radios
  - telephones
- traffic control equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities
- the effects of travel speed and vehicle mass on stopping distances.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - stop-slow bat
  - personal protective equipment
  - hand held radio or telephone
- be conducted in a safe environment; and
- be assessed in context of this sector's work environment on a real live road setting under supervision; and
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Skills Insight

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	**AQF indicator level*** **	**Required assessor or industry subject matter expert experience**
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 year
	2	2 years
Drilling, Coal Mining and Extractive (Quarrying), Metalliferous Mining and Civil Construction	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any	

© Commonwealth of Australia, 2025 Skills Insight

	relevant regulation.

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain stock handling and storage	1.1.Maintain cleanliness of stock handling and storage areas. 1.2.Ensure correct environmental conditions for storage of

© Commonwealth of Australia, 2025 Skills Insight

areas.	perishable and other stock to prevent loss or damage as required. 1.3. Remove and dispose of waste to minimise safety risks and environmental impacts. 1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.	2.1. Check incoming stock quantities against order documentation. 2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel. 2.3. Record stock delivery, and report discrepancies with orders as required. 2.4. Unpack and handle stock according to manufacturer instructions and safe manual handing techniques to avoid personal health risk and stock damage. 2.5. Store or display stock promptly in designated location.
3. Replenish stock levels.	3.1. Rotate, replenish and present stock according to organisational requirements for stock levels. 3.2. Record stock waste or shrinkage according to organisational procedures. 3.3. Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to:	• interpret:
	  • plain English documents that outline organisational policies and procedures for stock control
	  • basic order and delivery documentation and stock labels.

Numeracy skills to:	• calculate stock levels.
Planning and organising skills to:	• complete stock control activities in a logical and time efficient sequence.
Technology skills to:	• use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
  - receive and process incoming stock
  - store retail stock
  - maintain retail stock levels
  - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
  - stock quality is poor
  - stock quantity errors
  - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
  - rotation and replenishment
  - product life cycle
- organisational stock control policies and procedures for:
  - receiving stock from suppliers
  - recording incoming stock
  - recording and reporting stock discrepancies and quality issues
  - recording stock waste and shrinkage
  - stock quality standards
  - unpacking, storage and display of stock
  - damaged or missing stock

© Commonwealth of Australia, 2025 Skills Insight

- key features of retail products that relate to handling and storage:
  - handling techniques to minimise damage
  - general care
  - optimum storage conditions
  - features of damaged or spoiled stock
  - correct disposal methods
- safe manual handing techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
  - delivery dockets
  - orders
  - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor stock receipt and dispatch.	1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock. 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

© Commonwealth of Australia, 2025 Skills Insight

	correctly. 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards. 1.4. Act on variations to quantity and quality of delivered stock. 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.	2.1. Monitor stock and maintain stock at required levels. 2.2. Maintain, monitor and adjust stock reorder cycles as required. 2.3. Provide clear information to team members about individual stock recording responsibilities. 2.4. Maintain stock storage and movement records. 2.5. Record and report stock discrepancies. 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.	3.1. Process and raise stock orders according to organisational procedures. 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met. 3.3. Liaise with suppliers to ensure continuity of supply. 3.4. Resolve routine supply problems or refer to appropriate personnel for action. 3.5. Distribute stock within the organisation according to required allocations. 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.	4.1. Regularly check storage of stock and ensure its protection. 4.2. Identify, record and report stock losses. 4.3. Identify avoidable losses and establish reasons for them. 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.	5.1. Explain procedures for stocktake and cyclical counts to team members. 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task. 5.3. Provide team members with clear directions for performance of each task. 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.

Numeracy skills to:	• calculate:
	  • supplier costs and complex order costs
	  • complex details of stock on hand and stock losses and produce complex numerically-based reports
	• reconcile incoming stock and invoices against purchase orders.

Technology skills to:	• use business technology for inventory management.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)

© Commonwealth of Australia, 2025 Skills Insight

  - manual handling
  - licensing for mechanical movement of stock
- principles of stock control:
  - rotation and replenishment
  - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to coordinate store visual merchandising activities and ensure adherence to organisational standards, policies and procedures for the display of merchandise.

It applies to individuals working in frontline roles in a diverse range of retail industry sectors and business contexts that display retail products for sale. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
  - an existing merchandise range
  - a new merchandise range
  - a seasonal merchandise range
  - a promotional event
  - discounted merchandise
- for each of the above visual merchandising activities:
  - communicate requirements with team members
  - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - merchandise labelling and pricing
  - required stock levels
  - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
  - Australian Consumer Law
  - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
  - types of displays and their impact

© Commonwealth of Australia, 2025 Skills Insight

    - display location
    - display lighting
    - display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
    - customer complaints
    - profitability
- safe work practices for displaying merchandise with particular emphasis on:
    - safe use of equipment
    - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
    - price
    - features
    - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
    - organisational visual merchandise display guidelines
    - organisational policies and procedures for:
        - merchandise labelling and pricing
        - required stock levels
        - merchandise rotation and replenishment
    - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
        - Australian Consumer Law
        - Work Health and Safety (WHS)
- team members; these can be:
    - individuals in an industry workplace, or

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
  - balance a register or terminal on three occasions with complete accuracy
  - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
  - identify and resolve three different types of balancing discrepancies
  - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
  - opening and closing
  - balancing
  - clearance of terminal and transference of tender
  - recording takings
  - consumables required by system
  - security
- cash handling procedures:
  - counting cash
  - handling cash floats
  - change required, denominations of change and tendering change
  - security
- organisational policies and procedures for non-cash transactions:
  - credit cards
  - EFTPOS

© Commonwealth of Australia, 2025 Skills Insight

  - vouchers
- organisational policies and procedures for:
  - exchanges
  - refunds
  - lay-by
  - cash handling
  - cash float
  - operation of point-of-sale equipment
  - register or terminal balance
  - security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Follow data processing procedures.	1.1. Source and report product and service data using features of business technology and systems. 1.2. Store, retrieve and relay data according to business technology and information management systems. 1.3. Process product and service data according to organisational

© Commonwealth of Australia, 2025 Skills Insight

	policies and procedures for confidentiality, security and systems access.
2. Monitor customer sales.	2.1. Monitor product mix for each customer and identify potential add-on sales. 2.2. Access and interpret customer sales figures and identify success of current sales and supply targets. 2.3. Obtain and enter information affecting future forecasts into database in an accurate and timely manner. 2.4. Use organisational technologies to gather data from the field to expedite sales and provide real time feedback to customers.
3. Maintain product database.	3.1. Maintain accurate and current details of products and services in product database. 3.2. Collect and correctly process latest data. 3.3. Follow security procedures for access to database. 3.4. Build and maintain data records. 3.5. Identify and resolve data discrepancies and refer complex issues to relevant personnel. 3.6. Collect product or service information for reporting purposes, using appropriate technology. 3.7. Generate accurate and complete reports in line with business requirements.
4. Determine customer needs from data.	4.1. Establish volume of products purchased by individual customers and use data to anticipate future requirements and preferences. 4.2. Provide timely and accurate reports to customers that can enhance decision-making on provision of products and services.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRWSLS001 Process product and service data

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- use business technology and systems according to organisational policies and procedures to:
  - establish and report on the sales activity and potential future needs of three different business customers
  - accurately update three different types of information in the business system or product database
  - generate three different types of reports from the business system.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - data processing – input and retrieval
  - data security, storage and privacy
  - databased maintenance
  - sales monitoring
  - system reporting
  - evaluation of product and service performance
  - reporting mechanisms
  - supply and distribution of products or services
  - use and maintenance of customer and sales data
- work health and safety (WHS) requirements for use of office equipment
- different types of product and service data
- different types of customers, and product and services offered
- factors determining customer preferences
- purpose, range and use of sales system reports.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Skills must be demonstrated in a wholesale environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a computerised business sales system and associated documentation, product information and customer records
- organisational policies and procedures for sales system administration.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Engage customers.	1.1. Greet customers in a polite and friendly manner within designated response times and make them a priority over other workplace duties.

© Commonwealth of Australia, 2025 Skills Insight

	1.2. Clearly communicate with customers using appropriate verbal and non-verbal communication.
	1.3. Adapt communication style to appropriately communicate with customers from diverse backgrounds.
2. Assist customers.	2.1. Identify and act on opportunities to assist customers and be available to assist customers when needed.
	2.2. Question and actively listen to customers to determine their needs.
	2.3. Resolve routine customer problems according to individual responsibility level and organisational policies and procedures.
	2.4. Address general customer enquiries and provide accurate information in a clear and courteous manner.
3. Contribute to a service culture.	3.1. Act in line with organisational service standards to ensure quality customer service.
	3.2. Show interest in customer's needs and maintain a welcoming customer environment free of complacency.
	3.3. Seek assistance from relevant personnel when customer's needs are beyond scope of own responsibility.
	3.4. Identify and take opportunities to improve customer service standards.
	3.5. Refer customer service issues and feedback to relevant personnel for action.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
  - customers from diverse backgrounds
  - resolution of two routine customer problems
  - provision of accurate information to address two general customer enquiries
  - referral of unresolved customer enquiry
  - use of effective communication techniques and positive body language.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
  - designated customer service response times
  - interacting with customers
  - solving routine customer problems
  - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
  - open and closed questioning
  - paraphrasing
  - effective listening
  - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
  - positive customer service
  - poor customer service

© Commonwealth of Australia, 2025 Skills Insight

- organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational service standards and procedures for:
    - designated customer service response times
    - interacting with customers
    - solving routine customer problems
    - providing information to customers
- customers from a diverse range of backgrounds; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for SIRXCEG005 Maintain business to business relationships

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- build sustainable relationships with two business customers, and for each customer:
  - identify specific needs
  - determine options to meet needs
  - select and use communication strategies suited to the customer
  - confirm trading terms according to organisational policies and procedures.
  - develop and document activities for improved customer outcomes and relationship.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - building relationships with business customers
  - pricing
- factors that impact business to business relationships
- interpersonal communication techniques that facilitate:
  - building sustainable relationships with business customers
  - consultation on needs
  - negotiation
  - presentation
- sources of information on:
  - product and supply arrangements for customers
  - current and future trends
- different types of promotional activities and their features in a business to business context
- factors that impact trading terms:
  - continuous improvement
  - due diligence requirements
  - infrastructure and capital outlay requirements
  - intellectual property and technology rights

© Commonwealth of Australia, 2025 Skills Insight

  - market position
  - organisational systems integration and compatibility
  - planning cycles and timing
  - risk sharing
  - supply chain management
  - agreed terms and conditions
- key aspects of legislation that impact sales work in a business-to-business context including Australian Consumer Law.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- sources of product information
- organisational policies and procedures for:
  - building relationships with business customers
  - pricing
- forecasts for current and future market trends
- business customers with different requirements; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Interpret the need for innovation.	1.1. Observe the need for ***innovation*** within workplace context. 1.2. Challenge assumptions about products and processes to identify opportunities for innovation. 1.3. Project possible future contexts and environments for the innovation. 1.4. Define ***end user requirements***. 1.5. Identify ***resources and constraints***. 1.6. Research ***factors and ethical considerations*** that may impact on the idea. 1.7. Access relevant ***organisational knowledge***.
2. Generate ideas.	2.1. Conceptualise ideas using a range of ***creative thinking techniques***. 2.2. Apply relevant knowledge to explore a range of approaches. 2.3. Seek ***stimulation from alternative sources***. 2.4. Test ideas against brief and other factors. 2.5. Select preferred option.
3. Collaborate with others.	3.1. Develop ideas in conjunction with ***relevant people***. 3.2. Seek and accept ***feedback*** from relevant people in an appropriate fashion. 3.3. Modify ideas according to feedback. 3.4. Maintain and utilise a ***network of peers*** to discuss ideas.
4. Analyse and reflect on ideas.	4.1. Analyse ideas from different perspectives. 4.2. Use appropriate strategies to capture ***reflections***. 4.3. Examine ideas to ensure they meet context requirements, best practice and future needs. 4.4. Allow time for the development and analysis of ideas.
5. Represent ideas.	5.1. Select an appropriate ***communication technique*** for the target ***audience***. 5.2. Develop the ***presentation of the idea*** with the audience in mind. 5.3. Present the idea to educate and inform the client.

© Commonwealth of Australia, 2025 Skills Insight

	5.4. Modify the idea according to client feedback.
6. Evaluate ideas.	6.1. ***Review*** ideas using appropriate ***evaluation methods*** to ensure they meet required needs.
	6.2. Modify ideas as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - collaborate with others and represent ideas through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - work within teams
- analytical and lateral thinking skills to examine self and external factors

Required knowledge

- relevant technical knowledge
- broad industry and market knowledge
- organisational culture
- social, environmental and work culture impacts
- principles of innovation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets the need for innovation in the workplace
- identifies resources and constraints and researches affecting factors when generating innovative ideas
- generates ideas using creative thinking techniques
- tests ideas against brief and other relevant factors
- presents and discusses ideas with relevant people
- seeks feedback and modifies ideas accordingly

© Commonwealth of Australia, 2025 Skills Insight

	• analyses and reflects on ideas to ensure they meet end user requirements • presents ideas using appropriate communication methods • reviews and modifies idea using appropriate evaluation methods.
Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated work environment • relevant documentation, such as store policy and procedures manuals • a range of communication equipment.
Methods of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • third-party reports from a supervisor • a detailed case study • written or verbal questioning to assess knowledge and understanding • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Innovation may include:	• generating new ideas or solutions • developing new uses for old ideas and making them useful or a means of improvement.
End user requirements may refer to:	• who will be using the end product • why the product or process is needed • how will it be used • advantages will it provide • where it will be used.
Resources and constraints may	• time required

© Commonwealth of Australia, 2025 Skills Insight

include:	• costs • equipment • human resources • work culture • management practice • technology needed.
Factors and ethical considerations may include:	• aesthetic requirements • functionality • information available • WHS • environmental considerations.
Organisational knowledge may include:	• technical knowledge • information gained from books and audiovisual resources • knowledge from different work areas • informatin from work colleagues • work processes • product • materials • systems • tools • working conditions.
Feedback may be:	• formal or informal • verbal • in writing • in groups • individual.
Creative thinking techniques may include:	• brainstorming • visualising • making associations • building on associations • telling stories • creative writing • lateral thinking games • mind mapping, drawings • six thinking hats • using prompts.
Stimulation from alternative sources may include:	• reading books and industry journals • talking with colleagues and friends

© Commonwealth of Australia, 2025 Skills Insight

	• visiting art galleries and museums • going to industry workshops • networks.
Relevant people may include:	• colleagues • team members • supervisors • managers • the client.
Maintaining a ***network of peers*** may include:	• participating in forums • participating in industry training • attending workshops • becoming a member of a network.
Capture of ***reflections*** may include:	• mind mapping • assessing alternatives • drawing comparisons • imagining possible outcomes • imagining best and worst case scenarios.
Communication techniques may include:	• writing a proposal • building a model • showing a film • presenting a talk • preparing a report • drawing a diagram.
The ***audience*** may include:	• external contacts • internal contacts, such as management and other team members • groups or individuals • people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.
Presentation of ideas may include:	• helping the client visualise and understand the idea • actively listening • asking questions • accepting others opinions • explaining the proposal • clarifying details.
Formal review of the idea may involve:	• checking that the idea can be implemented • that it meets the client and end user needs • best practice

© Commonwealth of Australia, 2025 Skills Insight

- financial requirements
- resource requirements.

Evaluation methods may include:

- developing checklists
- discussing the process with colleagues or supervisors
- writing a report of the outcomes.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish customer needs.	1.1. Connect with the customer within designated response times and establish rapport. 1.2. Use questioning and active listening to facilitate effective two-way communication.

© Commonwealth of Australia, 2025 Skills Insight

	1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues. 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.	2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable. 2.2. Clearly explain and promote product and service features and benefits where relevant. 2.3. Advise on promotional events where relevant. 2.4. Provide additional information to address customer questions and objections. 2.5. Offer comparisons to competitor product or service range as required. 2.6. Collaborate with the customer to determine product or service option most suited to their needs. 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.	3.1. Select and use appropriate techniques to close sale. 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures. 3.3. Farewell customer on leaving, and invite to return. 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to:	• interpret:
	  • detailed in-house and supplier product information documents
	  • plain English documents that outline organisational customer service policy and procedures.

Numeracy skills to:	• interpret basic fee information from in-house documents and complete basic pricing calculations.
Problem-solving skills to:	• respond to customer objections and provide appropriate solutions to satisfy customer needs.
Technology skills to:	• use technologies equipped with search functionality and information systems to source product and service information.

Assessment Requirements for SIRXSLS001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
  - appropriate communication
  - establishment and clarification of customer needs, wants and expectations
  - product and/or service knowledge
  - appropriate sales approach to sell benefits and features of products and/or services
  - overcome objections and close sales
  - upsell and/or cross sell additional products and/or services that complement the sale
  - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
  - cultural diversity
  - special needs
- sales techniques:
  - opening techniques
  - recognising buying signals
  - strategies to focus customer on specific products and services
  - selling add-ons and complementary products
  - overcoming customer objections
  - closing techniques

© Commonwealth of Australia, 2025 Skills Insight

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
  - professional service standards and protocols for retail industry personnel
  - attitudes and attributes expected by the retail industry to work with customers
  - different customer service needs and expectations
- for the particular retail organisation:
  - product and service knowledge:
    - product and service range offering
    - product specifications, features and benefits
  - designated response times for providing customer service
  - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for:
    - customer service
    - sale of products and services
    - resolving customer complaints
    - collection and storage of customer details
  - organisational product information and price lists
  - supplier brochures, information sheets and price lists
  - promotional activity information
  - current plain English regulatory documents distributed by government regulators for:
    - consumer protection law
    - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

© Commonwealth of Australia, 2025 Skills Insight

- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSLS003 Achieve sales results

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to drive the sales of products and services, and create a sales environment, to meet sales targets.

It applies to individuals working in frontline management roles in a diverse range of industry sectors and business contexts. They operate independently with some responsibility for others and decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify sales targets.	1.1. Access and review sales targets. 1.2. Ensure sales targets are achievable and allow customer service standards to be maintained. 1.3. Review internal and external factors that may affect sales achievement and take measures to reduce impact.

© Commonwealth of Australia, 2025 Skills Insight

	1.4. Review past sales performance to inform achievement of sales targets. 1.5. Determine sales strategies for achieving sales targets.
2. Create a sales environment.	2.1. Set and communicate team and individual sales targets. 2.2. Ensure availability of adequate resources to achieve sales targets. 2.3. Support team to achieve sales targets and provide feedback on performance. 2.4. Resolve or limit operational issues that hinder sales target achievement.
3. Review sales targets.	3.1. Monitor achievement of sales targets, and provide feedback to team for ongoing improvement. 3.2. Take corrective action when sales targets are not met. 3.3. Report on sales target achievement in line with organisational reporting procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXSLS003 Achieve sales results

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- monitor sales performance against sales targets over a designated organisational sales period by:
  - reviewing sales targets and determining strategies for achievement
  - communicating sales targets to team members
  - responding to the following situations:
    - sales targets consistently not achieved
    - sales targets achieved
    - internal factors impacting on sales
    - external factors impacting on sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - customer service
  - sales process
- internal factors impacting on sales:
  - lack of resources
  - stock issues
  - team lacking sales skills
- external factors impacting on sales:
  - competitor activity
  - operating environmental impacts
- strategies for:
  - interpreting sales targets
  - achieving sales targets
  - corrective action for response to poor performance
- sales processes and how they are used to achieve sales targets
- required action to improve sales when the following problems occur:

© Commonwealth of Australia, 2025 Skills Insight

- operational issues
- lack of resources
- stock issues
- competitor activity.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for sales process and customer service standards
  - sales targets
  - records of previous sales
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITTPPD002 Develop interpretive activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives for an activity; develop operational aspects; and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE005 Prepare and present tour commentaries or activities.

The unit applies to many industry sectors and has particular relevance in tourism, sport and recreation, and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and developing interpretive activities may be for a series of activities in a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish need for activities.	1.1. Identify need for interpretive activities, based on customer, organisation and community needs. 1.2. Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues.
2. Create activities.	2.1. Identify and evaluate a range of potential information and resources, including other specialists as required. 2.2. Develop interpretive framework for activities. 2.3. Generate and select ideas for potential messages, themes and storylines. 2.4. Identify relationships between themes, storylines and the site. 2.5. Incorporate interpretive media that matches the site. 2.6. Conduct a risk assessment and incorporate controls into activity development. 2.7. Evaluate and integrate legal, ethical and sustainability considerations. 2.8. Develop resources to support activities. 2.9. Develop activity within budget to meet agreed objectives.
3. Evaluate activities.	3.1. Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities. 3.2. Modify activities according to feedback received. 3.3. Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• evaluate wide ranging information and tease out creative themes and messages for activities • analyse and interpret complex information and communicate it creatively to customers.
Oral communication	• consult with colleagues about development issues for interpretive

Assessment Requirements for SITTPPD002 Develop interpretive activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and develop one single interpretive activity and one series comprising at least three interpretive activities combined into an overall program, for at least two of the following:
  - attractions
  - guided activities or walks
  - sporting activities
  - theme parks
  - virtual activities
- plan and develop the above interpretive activities using at least two of the following themes:
  - cultural
  - heritage
  - historical
  - nature
- ensure above interpretive activities include key messages that reflect subject matter knowledge and meet the needs of different customer groups and commercial and operational constraints
- identify review mechanisms for above interpretive activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- subject matter around which activities are developed
- influential principles and theories of interpretation
- physical and digital interpretive media
- resource considerations for the development of interpretive activities:
  - apps and other digital content
  - costumes
  - guest speakers
  - handouts

© Commonwealth of Australia, 2025 Skills Insight

    - information and communications technology
    - natural resources
    - props
    - professional organisations
    - special interest organisations
    - specialists:
        - actors and performers
        - creative designers
        - cultural advisers
        - designers
        - environmental educators
        - heritage specialists
        - historians
        - interpretation consultants
        - marketers
        - subject matter experts
        - technical experts
- practical processes that support activity development:
    - budgeting
    - evaluation
    - needs analysis
    - resource development
    - scheduling
- creative communication techniques for interpretive activities:
    - games
    - illustrated talks
    - role-playing
    - sensory awareness exercises
    - storytelling
    - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes:
    - determining overall risk level
    - determining exposure to the risk
    - estimating probability of negative impacts
    - identifying consequences that could result from the identified risk
- legal, ethical and sustainability considerations for activity development:
    - cultural appropriateness
    - duty of care
    - minimal impact

© Commonwealth of Australia, 2025 Skills Insight

- minimising waste and conserving resources.

Assessment Conditions

Skills must be demonstrated in an operational tourism environment. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- a real or simulated environment for which interpretive activities can be planned and developed
- information sources on subject matter of interpretive activities, resources and other specialists
- current technology for use in activity development
- customers sufficient in number to reflect different customer, organisational or community needs and locations for interpretive activities; these can be:
  - customers in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITXCCS008 Develop and manage quality customer service practices

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop, monitor and adjust customer service practices. It requires the ability to consult with colleagues and customers, develop policies and procedures for quality service provision, and manage the delivery of customer service.

The unit applies to senior managers who operate independently, have responsibility for others and are responsible for making a range of operational and strategic decisions.

This includes individuals working in a range of tourism, travel, hospitality and event contexts and to any small, medium or large organisation.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

essential outcomes.	demonstrate achievement of the element.
1. Develop quality customer service practices.	1.1. Obtain information on customer needs, expectations and satisfaction levels using both formal and informal research. 1.2. Provide opportunities for customers and staff to give feedback on products and services. 1.3. Review changes in internal and external environments and integrate findings into planning for quality service. 1.4. Provide opportunities for staff to participate in development of customer service practices. 1.5. Develop policies and procedures for quality service provision.
2. Manage delivery of quality service.	2.1. Communicate policies, procedures and expectations to staff. 2.2. Make policies readily available to customers and staff. 2.3. Monitor customer service in the workplace to ensure standards are met. 2.4. Initiate staff training to enhance customer service. 2.5. Take responsibility for service outcomes and dispute resolution. 2.6. Act as a positive role model for professional standards expected of service industry personnel.
3. Monitor and adjust customer service.	3.1. Seek ongoing feedback from staff and customers to improve performance. 3.2. Assess effectiveness of customer service practices. 3.3. Identify systemic customer service problems and adjust policies and procedures to improve service quality. 3.4. Develop, document and communicate new approaches to customer service to staff involved in service delivery.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret customer service surveys and unfamiliar complex documents on current industry trends and changes that affect service delivery • research customer service requirements.
Writing skills to:	• produce comprehensive yet easily accessible policies and procedures that provide service expectations.

© Commonwealth of Australia, 2025 Skills Insight

Oral communication skills to:	• discuss customer service needs with staff and customers.
Numeracy skills to:	• calculate and interpret customer satisfaction statistics and business performance data.
Learning skills to:	• contribute to change management in workplace customer service.
Problem-solving skills to:	• allow for a rational and logical evaluation of the characteristics and needs of the organisation in order to design tailored customer service practices.
Planning and organising skills to:	• plan for, establish and regularly monitor all components of the customer service system.
Self-management skills to:	• take responsibility for customer service outcomes.
Technology skills to:	• use software to analyse customer satisfaction data.

Assessment Requirements for SITXCCS008 Develop and manage quality customer service practices

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- research and develop customer service policies and procedures for at least three different areas of the business that meet industry standards
- implement and monitor practices for quality customer service in line with above policies and procedures over four service periods
- evaluate practices for quality service provision and identify any failings
- review policies and procedures, adjust as necessary, and communicate any new practices to staff.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- principles of quality customer service
- specific industry sector:
  - professional service standards for service industry personnel
  - attitudes and attributes expected by the service industries to work with customers
- roles and responsibilities of management, supervisors and operational personnel in providing quality service
- sources of information on current service trends and changes that affect service delivery
- internal and external environmental changes and their effect on planning for quality customer service:
  - changes in the competitive environment
  - economic climate
  - introduction of new technologies or equipment
  - management changes and organisational restructures
  - recruitment practices
  - trends in customer service preferences
- methods of formal and informal customer research:
  - analysis of competitive environment and industry service trends
  - customer service surveys

© Commonwealth of Australia, 2025 Skills Insight

  - customer focus groups
  - qualitative or quantitative research
  - seeking feedback from service delivery colleagues
  - questioning customers
- methods of implementing quality service provision:
  - developing, implementing and monitoring customer service policies and procedures
  - involving staff in the development of customer service practices
  - evaluating staff and customer feedback
- methods of assessing the effectiveness of customer service practices:
  - examining overall business performance
  - monitoring the ongoing effectiveness of:
    - staff in meeting customer service standards
    - policies and procedures in explaining practices
  - reviewing numbers and nature of:
    - complaints
    - disputes
    - responses of customers
  - reviewing customer satisfaction survey statistics
- methods of obtaining feedback from customers:
  - customer service discussions with employees during the course of each business day
  - discussions with customers
  - formal customer interviews
  - regular staff meetings that involve service discussions
  - seeking staff suggestions for content of customer service policies and procedures
  - surveys of internal customers, external customers and staff
  - improvements suggested by:
    - customers involved in complaints or disputes
    - suppliers
    - staff, supervisors and managers
- industry schemes, accreditation schemes and codes of conduct aimed at improving customer service
- areas where organisational policies and procedures assist in ensuring quality customer service:
  - acknowledging and greeting customers
  - complaint and dispute management
  - authority for different level personnel to resolve complaints, disputes, service issues and customer compensation
  - loyalty programs
  - presentation standards for customer environment and customer service personnel
  - pricing and service guarantees

© Commonwealth of Australia, 2025 Skills Insight

  - product quality
  - refunds and cancellation fees
  - response times
  - staff training for:
    - customer service
    - technical skills
- objectives, components and comprehensive details of consumer protection laws that relate to customer service, and the business' responsibility for:
  - nominating and charging cancellation fees
  - providing information on potential price increases
  - providing refunds
  - supplying products as described or substituting suitable products when unable
  - formats for and content of policies and procedures.

Assessment Conditions

Skills must be demonstrated in an operational business environment for which tailored customer service practices are required. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government consumer protection regulators
- codes of practice and standards for customer service issued by industry groups
- sources of information on customer needs, complaints and feedback
- customer surveys and feedback collection tools and templates
- team members with whom the individual can interact; these can be:
  - staff in an industry workplace during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions

following organisational arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards

© Commonwealth of Australia, 2025 Skills Insight

- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency
- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to implement an assessment plan, and gather quality evidence to assess the competence of a candidate using compliant assessment tools.

It applies to teachers, trainers and assessors in enterprises and registered training organisations (RTOs) and those providing assessment advisory services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for the assessment	1.1 Interpret assessment planning documentation and applicable organisational, legal and ethical requirements for conducting the assessment and confirm with the relevant people 1.2 Access and interpret units of competency that are to be used as

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	benchmarks for assessment, and the nominated assessment tools, to confirm the requirements for the evidence to be collected 1.3 Determine opportunities for integrated assessment activities and document any changes to the assessment instruments, where required 1.4 Determine opportunities for evidence-gathering in actual or simulated activities, through consultation with the candidate and relevant personnel 1.5 Conduct a candidate briefing and explain, discuss and agree on the details of the planned assessment 1.6 Arrange identified material and physical resource requirements 1.7 Identify any specialist support requirements for the assessment, and organise if necessary
2. Gather quality evidence	2.1 Use agreed assessment methods and tools to gather, organise and document evidence in a format suitable for determining competence 2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence
3. Support the candidate	3.1 Discuss and guide candidates in gathering their own evidence to support the recognition of prior learning (RPL) 3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to individual differences and enables two-way feedback 3.3 Make decisions on reasonable adjustments with the candidate, based on the candidate's needs and characteristics 3.4 Access specialist support, if required, in accordance with the assessment plan 3.5 Address any workplace health and safety (WHS) risk to a person or equipment immediately
4. Make the assessment decision	4.1 Assess the collected evidence, and to evaluate whether it reflects the evidence required to demonstrate competence 4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence 4.3 Make the assessment decision in line with agreed assessment procedures and according to the agreed assessment plan 4.4 Provide clear and constructive feedback to the candidate regarding the assessment decision, and clearly document

Assessment Requirements for TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements

reviewing the assessment process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- competency-based assessment, including:
  - VET as a competency-based system
  - how competency based assessment differs from other types of assessment
  - competency standards as the basis of qualifications
  - structure and application of competency standards
  - the principles of assessment and how they are applied
  - the distinction between assessment tools and assessment instruments
  - the rules of evidence and how they are applied
  - the range of assessment purposes and assessment contexts, including RPL
  - different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
  - reasonable adjustments and when they are applicable
  - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
  - the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations in assessment activities
- current legislative requirements relevant to the assessor and the assessment process
- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for the use of relevant personal protective equipment
  - the safe use and maintenance of relevant equipment
  - sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS403 Participate in assessment validation

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor updates to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0*

Application

This unit describes the skills and knowledge required to participate in an assessment validation process.

It applies to assessors and workplace supervisors with assessment validation responsibilities participating in, but not necessarily leading, the process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for validation	1.1 Discuss and confirm the purpose, context and scope of the validation process within relevant assessment system policies and procedures 1.2 Arrange materials for validation activities

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Check all documents used in the validation process for accuracy and version control 1.4 Analyse relevant units of competency and agree on the evidence needed to demonstrate competence
2. Participate in the validation of assessment tools	2.1 Demonstrate active and appropriate participation in validation sessions and activities using agreed communication methods and modes 2.2 Apply principles of assessment and rules of evidence during validation sessions and activities 2.3 Check that context and conditions of assessment include clear instructions for assessor and candidate and relate directly to the assessment conditions of the relevant unit 2.4 Check that tasks to be administered to the candidate include clear and concise instructions and an outline of evidence requirements 2.5 Check that assessment decision-making rules and benchmarks, are clear and enable consistent outcomes 2.6 Check that recording mechanisms are clear and allow for sufficient information to be recorded 2.7 Review and use assessment maps to assist in determining validity of assessment instruments
3. Contribute to validation outcomes	3.1 Discuss validation findings to support improvements in the quality of assessment in a collective environment 3.2 Discuss, agree and record recommendations to improve assessment practice

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.3, 2.4, 2.5, 2.6, 2.7	• Analyses and interprets relevant policies and procedures, benchmarks and validation materials
Writing	1.1, 3.2	• Records key information from the validation process accurately to meet requirements
Oral Communication	1.1, 1.4, 2.1, 2.2, 3.1, 3.2	• Communicates with others to confirm approaches, exchange ideas and information, articulate opinions, and reach agreement with others, using suitable tone, style and language
Navigate the world of work	1.1	• Identifies, confirms and takes responsibility for adherence to policies and procedures
Interact with others	1.1, 2.1, 2.2, 3.1, 3.2	• Collaborates with others and contributes to activities requiring joint responsibility and accountability
Get the work done	1.1, 1.2, 1.3, 1.4, 2.3, 2.4, 2.5, 2.6, 2.7, 3.2	• Organises and prioritises work commitments with a sense of what is achievable within the timeframe • Uses analytical processes in non-routine situations gathering information, and identifying and evaluating options against agreed criteria

Assessment Requirements for TAEASS403 Participate in assessment validation

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Updates to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- actively participating in a minimum of three validation sessions that address the critical aspects of validation
- clearly identifying the purpose for each validation, and the legal and ethical responsibilities of assessors
- collating and presenting documentation for each validation in a logical manner
- communicating and liaising with relevant people
- providing feedback and interpreting documentation in validation sessions
- recording their contribution to validation findings.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to determine the evidence needed to demonstrate competence in a competency-based environment
- the reasons for carrying out validation and different approaches to validation that may be appropriate before, during and after an assessment
- the components of assessment tools
- critical aspects of validation, including validation of assessment processes, methods and products
- how principles of assessment are addressed in validation

© Commonwealth of Australia, 2025 Skills Insight

- how rules of evidence are addressed in validation
- work health and safety legislation, codes of practice, standards and guidelines that impact on assessment
- obligations of an assessor under applicable legislation and/or standards, particularly in relation to validation activities.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- the texts and tasks usually found in the workplace
- units of competency and other materials used in validation sessions.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	materials for suitability and relevance, and seek assistance to interpret the contextual application 1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2 Follow the learning program and/or delivery plan to cover all learning objectives 2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training 2.4 Use delivery techniques to structure, pace and enhance learning 2.5 Apply coaching techniques to assist learning 2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7 Provide opportunities for practice during instruction and through work activities 2.8 Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge 3.2 Monitor learner progress and outcomes in consultation with the learner 3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs
4. Review personal training performance	4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2 Maintain, store and secure learner records, according to organisational and legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Learning	4.1	• Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	• Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	• Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	• Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	• Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes • Asks questions in order to clarify understanding, and to provide and seek feedback • Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	• Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to plan, organise and deliver training for individuals within a group.

It applies to a person working as an entry-level trainer, teacher or facilitator structuring a learning program developed by others in, or with, a training and assessment organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret learning environment and delivery requirements	1.1 Access, read, and interpret learning program documentation to determine delivery requirements 1.2 Use available information and documentation to identify group and individual learner needs, and learner characteristics 1.3 Identify and assess constraints, and risks to delivery

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm personal role and responsibilities in planning, and delivering training, with relevant personnel
2. Prepare session plans	2.1 Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2 Develop session plans and document these plans for each segment of the learning program 2.3 Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1 Contextualise learning materials to meet the needs of the specific learner group 3.2 Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3 Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1 Conduct each session according to the session plan, modified where appropriate to meet learner needs 4.2 Use the diversity of the group as another resource to support learning 4.3 Employ a range of delivery methods to optimise learner experiences 4.4 Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1 Monitor, and document, learner progress to ensure outcomes are being achieved, and individual learner needs are being met 5.2 Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3 Manage inappropriate behaviour to ensure that learning can take place 5.4 Maintain and store learner records according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.1, 5.1	• Access, read and interpret documentation relevant to the learning context, including program documents, learning materials, policies and procedures relevant to the context
Writing	2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 5.1, 5.2, 5.4	• Develops and maintains workplace documentation accurately and in response to required needs
Oral Communication	1.2, 1.3, 4.1, 4.3, 4.4	• Uses communication techniques to build rapport and explore requirements • Facilitates training in an appropriate style for both individuals and groups
Navigate the world of work	1.4, 5.4	• Recognises and follows organisational protocols, policies and procedures relevant to own role
Interact with others	1.4, 3.3, 4.4, 5.3	• Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm that outcomes meet requirements • Recognises inappropriate behaviours and the potential for conflict, and implements strategies to maintain an appropriate learning environment
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.4, 5.1-5.4	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to problems and opportunities for improvement and considers options for different approaches • Uses information and communications technology (ICT) based tools to access, organise, analyse and display information relevant to role

Assessment Requirements for TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete the tasks outlined in the elements and performance criteria of this unit, including:

- facilitating group-based learning by preparing and delivering at least three training sessions, including:
  - at least two consecutive sessions of at least 40 minutes duration, that follow one of the learning program designs, to a learner group of at least eight individuals
  - at least one session delivered to a learner group of at least eight individuals, with evidence of how the characteristics and needs of this group were addressed
- identifying and responding to individual needs
- accessing and using documented resources, and any support personnel required to guide inclusive practices.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learning theories and principles
- resources available to identify different learner styles
- the relevant industry area and subject matter of the delivery
- the learner group profile, including characteristics and needs of individual learners in the group
- the requirements of the learning program and/or delivery plan, and the content purpose
- different delivery methods and techniques appropriate to face-to-face group delivery

© Commonwealth of Australia, 2025 Skills Insight

- different techniques for the recognition and resolution of inappropriate behaviours
- behaviours that may indicate learner difficulties, and the methods used to address these difficulties
- the purpose of organisational record-management systems and reporting requirements
- evaluation and revision techniques used to improve session plans
- specific resources, equipment and support services available for learners with special needs
- assessment and risk control measures relating to the facilitation of group-based learning
- policies and procedures relevant to the learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to learning program designs in use in the learning environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish effective work environment for learning	1.1 Establish, and agree upon, the objectives and scope of the work-based learning 1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning
2. Develop a work-based learning pathway	2.1 Address contractual requirements and responsibilities for learning at work 2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway 2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1 Identify the context for learning and the individual's learning style 3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner 3.3 Develop, document and discuss an individualised learning plan with the learner 3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment 3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement the work-based learning pathway	4.1 Explain the objectives of work-based learning, and the processes involved, to the learner 4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.3 Encourage learner to take responsibility for learning and to self-reflect 4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge
5. Maintain and develop the learning-facilitation relationship	5.1 Prepare for each session 5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum 5.4 Practise ethical behaviour at all times 5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
6. Close and evaluate the learning-facilitation relationship	6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship 6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 6.4 Recommend improvements to work-based practice in light of the review process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 3.1, 3.4, 3.5, 6.3	• Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace, in the context of consultation and continuous improvement, to apply relevance to requirements
Writing	1.1, 2.3, 3.3, 4.1, 6.3	• Develops and maintains documentation relevant to workplace learning, including learning plans and evaluations, in accordance with organisational and workplace requirements
Oral Communication	2.2, 3.3, 4.2, 5.5, 6.1	• Uses oral communication techniques to identify needs, build rapport, agree on learning plans, facilitate effective learning and monitor practice • Selects appropriate vocabulary adjusting language, tone and pace to maintain effective interactions, and to build and maintain engagement with individuals or groups
Navigate the world of work	1.3, 2.1, 5.4	• Follows organisational protocols, policies and procedures in the management of records • Recognises and responds to contractual and ethical requirements associated with own role
Interact with others	1.1, 2.3, 3.5, 4.3, 6.2	• Asks questions to clarify understanding, and seeks feedback and further information • Cooperates and collaborates with others as part of

© Commonwealth of Australia, 2025 Skills Insight

		routine activities to achieve team results, and to confirm outcomes meet requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.3, 5.5, 6.1-6.3	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs • Identifies and responds to problems and opportunities for improvement, considering options for different approaches • Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks

Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
  - with at least two individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes, or techniques, identified.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways

© Commonwealth of Australia, 2025 Skills Insight

- workplace health and safety (WHS) relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of WHS information.
  -

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES401 Design and develop learning programs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine its design, outline the content, and review its effectiveness.

It applies to trainers or facilitators who work under limited supervision to design, or develop, learning programs that are discrete, and provide a planned learning approach that relates to specific learning and training needs, or part of the learning design for a qualification.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define the parameters	1.1 Clarify the purpose and type of learning program with key

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
of the learning program	stakeholders 1.2 Access and confirm the competency standards, and other training specifications, on which to base the learning program 1.3 Identify language, literacy and numeracy requirements of the program 1.4 Identify and consider characteristics of the target learner group
2. Work within the VET policy framework	2.1 Access relevant vocational education and training (VET) policies and frameworks, and apply to work practices 2.2 Identify changes to training packages and accredited courses, and apply these to program development 2.3 Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1 Research, develop and document specific subject matter content, according to agreed design options 3.2 Evaluate existing learning resources for content relevance and quality 3.3 Specify assessment requirements of the learning program
4. Design the structure of the learning program	4.1 Break the learning content into manageable segments, and document the timeframe for each segment 4.2 Determine and confirm delivery strategies, required assessment methods and tools 4.3 Document the complete learning program in line with organisational requirements 4.4 Review the complete program with key stakeholders, and adjust as required 4.5 Ensure a safe learning progression by analysing risks in the learning environment, and including a risk control plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.2, 4.4, 4.5	• Interprets specific information and instructions from a range of sources, to identify relevance to requirements
Writing	1.1, 3.1, 3.3, 4.1, 4.2, 4.3, 4.4, 4.5	• Develops documents and content using the required format, accurate spelling, and grammar and terminology specific to the purpose and audience
Oral Communication	1.4	• Uses appropriate language, questioning and listening techniques to provide and elicit information, confirm understanding and explore others' views.
Numeracy	4.1	• Interprets familiar measurements relating to timeframes and compares against requirements
Navigate the world of work	4.3	• Follows organisational protocols, policies and procedures regarding program documentation
Interact with others	1.1, 1.2, 4.2, 4.4	• Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.5	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to potential risks, considering options for different approaches • Uses information and communications technology (ICT) based tools to conduct research, design work processes, and to complete work tasks

Assessment Requirements for TAEDES401 Design and develop learning programs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- designing, developing and reviewing learning programs within the vocational education and training (VET) context
- preparing and developing a minimum of two learning programs:
- that contain differentiated learning program designs to reflect particular needs, contexts and timelines

at least one of which must be based on competency standards or accredited courses, and must cover at least one entire unit of competency or accredited course module.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- the distinction and relationship between a training package/accredited course, learning strategy and learning program
- the different purposes and focus of learning programs

© Commonwealth of Australia, 2025 Skills Insight

- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials, and pre-developed learning activities
- methodologies relating to developing and documenting new learning activities, and related learning materials
- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation, that may affect training and assessment in the VET sector
- describe relevant workplace health and safety (WHS) knowledge relating to the work role, and WHS considerations that need to be included in the learning program.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to competency standards or accredited courses relevant to the learning programs.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES402 Use training packages and accredited courses to meet client needs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to use training packages and accredited courses as tools to support industry, organisation and individual competency development needs.

It applies to individuals who are working in or with training and/or assessment organisations as an entry-level trainer, teacher, facilitator or assessor using a pre-defined training product, such as a training package or accredited course.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select appropriate training package or	1.1 Confirm the training and/or assessment needs of the client 1.2 Identify and source training packages, qualifications and/or

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
accredited course	accredited courses that could satisfy client needs 1.3 Use training products in line with vocational education and training (VET) sector requirements, and the training and assessment organisation's quality assurance policies and procedures
2. Analyse and interpret the qualifications framework	2.1 Read and interpret the qualification framework, and packaging rules of the identified qualification 2.2 Review and determine applicable licensing requirements and prerequisites 2.3 Determine suitable electives that meet client needs and job roles
3. Analyse and interpret units of competency and accredited modules	3.1 Select skill set, individual unit or accredited module to meet client needs and document reasons for selection 3.2 Read, analyse and interpret all parts of each selected unit, or accredited module, for application to client needs 3.3 Analyse links between the units, and/or accredited modules, to develop effective applications for the client
4. Contextualise units and modules for client applications	4.1 Use information from the client to contextualise units, or accredited modules, to meet client needs 4.2 Use advice on contextualisation produced by the training package developer or course developer to meet client needs
5. Analyse and interpret assessment information	5.1 Read and analyse the assessment information of the relevant training package or accredited course 5.2 Provide appropriate advice to the client about assessment requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.2,	• Sources, analyses and interprets information, to identify relevance to client needs

© Commonwealth of Australia, 2025 Skills Insight

	3.3, 4.2, 5.1, 5.1	
Writing	3.3, 3.4, 4.1, 4.2, 5.1, 5.2	• Prepares information that incorporates the interpretation and analysis of information, using appropriate language in a format and style suited to the audience and context
Oral Communication	1.1, 4.1, 5.2	• Uses appropriate communication techniques to provide and elicit information, confirm understanding and communicate conclusions
Navigate the world of work	1.3	• Follows organisational protocols, policies and procedures regarding quality assurance
Interact with others	1.1	• Recognises the importance of consultation and negotiation to confirm client needs
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1, 4.2, 5.1, 5.2	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to problems and opportunities for improvement and innovation, and considers options for different approaches • Uses information and communications technology (ICT) based tools to conduct research, design work processes, and to complete work tasks

Assessment Requirements for TAEDES402 Use training packages and accredited courses to meet client needs

Modification History

Release	Comments
Release 2	This version first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- analysing a training package and/or accredited course, to examine its component parts, identify relevant qualifications and units of competency or modules, and contextualise those to meets the specific needs of one client
- demonstrate a minimum of two examples of analysing training specifications, including at least one training package; the other may be another training package or an accredited course that meets a specific client need.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of the:

- Australian Qualifications Framework (AQF) guidelines, including characteristics of AQF qualification types
- functions and responsibilities of training package developers, and course accreditation agencies, and their roles as key vocational education and training (VET) organisations
- dimensions of competency
- format and structure of accredited courses
- format and structure of units of competency, and assessment requirements
- function of training packages and accredited curriculum as benchmarks in a competency-based VET training and assessment system

© Commonwealth of Australia, 2025 Skills Insight

- methodology relating to analysing and using competency standards for a range of applications and purposes, to meet the needs of a diverse range of VET clients
- terminology used in training packages and accredited courses
- parts of training packages that can be contextualised and parts that cannot
- Standards for Training Packages, including the role and purpose of each endorsed component
- non-endorsed components of training packages
- sources of training package information.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- training package components developed to meet the Standards for Training Packages, and those developed to meet the requirements of the Training Package Development Handbook.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA0004 Complete receival and despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete receival and despatch documentation in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Analyse order to identify work requirements to fill order	**1.1** Order request documentation is interpreted

© Commonwealth of Australia, 2025 Skills Insight

	1.2	Ordered goods are noted and workplace locations identified
	1.3	Workplace and goods information is used to organise documentation
	1.4	Required schedules for order movement are identified and communicated with relevant personnel
	1.5	Special aspects of order are identified and information on required documentation procedures and relevant regulatory requirements are identified, accessed and interpreted
2 Follow workplace order documentation processes	**2.1**	Workplace procedures for order receival and despatch documentation are identified
	2.2	Complete receival and despatch documentation in accordance with workplace procedures and regulatory requirements
3 Finalise documentation	**3.1**	Order is checked against schedule and order form
	3.2	Workplace records are completed and labels and appropriate documentation are attached in accordance with workplace procedures and regulatory requirements
	3.3	Special transportation requirements are identified and conveyed to appropriate personnel
	3.4	Required documentation for dangerous goods and hazardous materials is completed in accordance with regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit replaces and is equivalent to TLIA3015 Complete receival/despatch documentation.

Assessment Requirements for TLIA0004 Complete receival and despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- applying work health and safety (WHS)/occupational health and safety (OHS) procedures
- communicating effectively with others
- completing receival and despatch documentation
- estimating size, shape and special requirements of goods and loads
- identifying containers and goods coding markings and emergency information panels
- interpreting and following operational instructions, procedures and information
- monitoring work activities in terms of planned schedule
- selecting and using relevant systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation requirements for receiving and despatching goods
- focus of operation of work systems, equipment, management and site operating systems for receiving and despatching goods
- housekeeping standards and procedures
- national and international standards, codes and regulations relevant to completing receival and despatch documentation including:
    - bond requirements
    - dangerous goods codes
    - legislative requirements
    - quarantine requirements
- receival and despatch documentation anticipated problems and appropriate actions for resolution
- requirements of loads with special conditions including:
    - controlled substances

© Commonwealth of Australia, 2025 Skills Insight

    - dangerous goods
    - hazardous materials
    - security requirements
    - temperature-controlled goods
- site layout and obstacles
- specifications and standards for checking and inspecting received and despatched goods
- WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for completing receival and despatch documentation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0015 Organise receival and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise receival and despatch operations in accordance with regulations, codes of practice and workplace requirements in the transport and logistics industry.

It includes planning and organising receival operations, storing received stock, despatching ordered stock and completing documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan and organise receival and despatch operations	**1.1** Product characteristics and workplace procedures are applied to stock analysis
	1.2 Resources are identified to match product characteristics

© Commonwealth of Australia, 2025 Skills Insight

		1.3	Timeframes are scheduled to enable receival or despatch of stock according to workplace procedures
		1.4	Work processes are planned to meet specified timeframes
2	**Organise the storage and despatch of stock**	**2.1**	Employees, equipment and storage areas are allocated and supervised
		2.2	Individuals are informed of work requirements and deadlines
		2.3	Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
		2.4	Discrepancies in stocks are noted and reported in accordance with workplace procedures
3	**Complete documentation**	**3.1**	Documentation and records regarding receival and despatch operations are confirmed
		3.2	Documentation and records are completed and proofread
		3.3	Documentation and records are processed in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIA3018 Organise despatch operations and TLIA3019 Organise receival operations.

TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to pick and process orders in accordance with relevant codes, regulations and workplace requirements within the transport and logistics industry.

It includes identifying workplace order picking processes, policies and procedures; picking and despatching orders; and recording stock levels.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify workplace order picking processes, policies	1.1 Workplace procedures for order picking and related workplace documentation are interpreted
	1.2 Stock allocation and location systems are identified and

© Commonwealth of Australia, 2025 Skills Insight

	and procedures		located
		1.3	Appropriate manual handling equipment is selected in accordance with work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
2	**Pick and despatch an order**	2.1	Work requirements are planned and appropriate equipment and documentation is assembled
		2.2	Warehouse zones where required products are stored, are identified and located
		2.3	Pick path is established
		2.4	Appropriate pallet/s for orders are selected and stacked to minimise stock damage and to maximise stability, as required
		2.5	Products are selected and consolidated
		2.6	Products/pallets are located in despatch areas
		2.7	Products are assembled to meet workplace schedules
		2.8	Orders are consolidated, secured, arranged and placed in storage zones in accordance with schedules
3	**Record stock levels**	3.1	Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures
		3.2	Workplace records are completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit replaces and is equivalent to TLIA2012A Pick and process orders.

Assessment Requirements for TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when picking and processing orders
- completing documentation related to picking and processing orders
- estimating the size, shape and special requirements of goods/loads
- identifying relevant stock and goods coding and labelling, including Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting, and following instructions, procedures, signs and labels relevant to picking and processing orders
- selecting and using relevant equipment and communications technology when picking and processing orders
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- documentation and record requirements when picking and processing an order
- equipment used during picking and processing operations and the precautions and procedures to be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for picking and processing orders
- problems that may occur when picking and processing an order and appropriate action that can be taken to resolve these problems
- regulations relevant to picking and processing orders, including relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for picking and processing orders.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2020 Replenish stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to replenish stock in accordance with workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes applying product knowledge to participate in stock rotation activities, interpreting and filling replenishment requests, and completing all required stock replenishment tasks.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Participate in stock rotation activities	1.1 Stock levels are counted against appropriate documentation
	1.2 Stock levels are recorded and reported
	1.3 Stocks are replenished, adjusted or rotated in accordance with

© Commonwealth of Australia, 2025 Skills Insight

	workplace procedures
	1.4 Stock re-ordering processes are activated when appropriate
	1.5 Routine and non-routine problems with products or storage systems are reported in accordance with workplace procedures
2 Interpret and fill replenishment request	2.1 Order request documentation is interpreted
	2.2 Product/s in order are noted and workplace location/s are identified
	2.3 Workplace and product knowledge is used to plan sequence of work
	2.4 Appropriate materials handling equipment is selected in accordance with workplace procedures and timeframes, and work health and safety (WHS)/occupational health and safety (OHS) regulations
	2.5 Required schedules for order movement and despatch or storage are identified
3 Complete stock replenishment	3.1 Products are sorted, assembled and consolidated in the appropriate storage areas
	3.2 Work is checked in accordance with company procedures
	3.3 Documentation and records are completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit replaces and is equivalent to TLIA2020A Replenish stock.

Assessment Requirements for TLIA2020 Replenish stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others when replenishing stock
- completing documentation related to replenishing stock
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in stock and equipment in accordance with standard operating procedures
- reading, interpreting and following instructions, procedures and labels relevant to replenishing stock
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment when replenishing stock
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations relevant to replenishing stock
- computer records and documentation requirements for replenishing stock
- focus of operation of work systems, equipment, management and site operating systems for replenishing stock
- housekeeping standards and procedures

© Commonwealth of Australia, 2025 Skills Insight

- principles of operation and functions of stock control systems
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for replenishing stock.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2021 Despatch stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to despatch stock in accordance with codes/regulations and workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes analysing orders to identify work requirements, following workplace order picking processes to prepare goods for despatch, and completing despatch tasks in accordance with workplace procedures and schedules.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Analyse order to identify	1.1 Order request and consignment note documentation is

work requirements	interpreted
	1.2 Required schedules for despatch are identified
	1.3 Product(s) in order are identified
	1.4 Workplace and product knowledge is used to plan sequence of work
	1.5 Appropriate materials handling equipment is selected within required work health and safety (WHS)/occupational health and safety (OHS) regulations and timeframe for the despatch
2 Follow workplace order picking processes to prepare goods for despatch	2.1 Goods for despatch are selected and checked against product knowledge, labels and other identification systems
	2.2 Products are sorted, assembled and consolidated
	2.3 Orders are secured and placed in storage/despatch zones, in accordance with schedule
	2.4 Order is checked against despatch schedule and order form
3 Complete despatch following workplace procedures and schedules	3.1 Workplace records are completed, and labels and appropriate documentation are attached
	3.2 Load labels and documentation are checked and loading is organised in accordance with workplace procedures and Australian Dangerous Goods (ADG) Code as required
	3.3 Final check of load labels and documentation is completed in accordance with requirements
	3.4 Transportation requirements are communicated to driver as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIA2021 Despatch stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when organising despatch operations
- completing documentation related to organising despatch operations
- estimating size, shape and special requirements of goods and loads
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in goods and equipment in accordance with standard operating procedures
- reading, interpreting and following instructions, procedures and labels relevant to organising despatch operations
- selecting and using relevant equipment and communications technology when organising despatch operations
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- documentation and record requirements for despatch operations
- equipment used during despatch operations and the precautions and procedures that should be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for despatching goods
- problems that may occur when despatching goods and appropriate action that can be taken to resolve these problems
- regulations relevant to despatch operations, including the Australian Dangerous Goods (ADG) Code and relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for organising despatch operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIC2002 Drive light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

It includes systematic and efficient control of all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial light rigid vehicle across a variety of driving contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Assessment Requirements for TLIC2002 Drive light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- carrying out pre-operational checks on vehicle
- completing relevant documentation
- demonstrating low-risk driving behaviours
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating traffic hazards and taking appropriate action
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related actions that can be taken
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term fatigue management
- light rigid vehicle controls, instruments and indicators and their use
- light rigid vehicle handling procedures
- map reading and road navigation techniques including using a global positioning system

© Commonwealth of Australia, 2025 Skills Insight

(GPS) device, as required
- pre-operational checks carried out on vehicle and related actions
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant state/territory road and traffic authority road rules, regulations, permits and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace driving and operational instructions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory road and traffic authority.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIC3003 Drive medium rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a medium rigid vehicle safely in accordance with the licence requirements and regulations of the relevant state/territory road and traffic authority pertaining to medium rigid vehicles.

It includes systematically and efficiently controlling vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of vehicles include all medium rigid vehicles, for example, any 2-axle rigid vehicle, including trucks and buses greater than 8 tonnes gross vehicle mass (GVM).

Driving is performed with limited or minimum supervision, within duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Drive medium rigid vehicle	**1.1** Medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions
	1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
	1.3 Engine operation is maintained within manufacturer specified torque range and temperature through effective transmission use
	1.4 Braking system of medium rigid vehicle is managed and operated to ensure effective control of vehicle under all conditions
	1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.6 Medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
	1.7 Medium rigid vehicle is parked, shut down and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
	1.8 Appropriate procedures are followed in a driving emergency
2 Monitor traffic and road conditions	**2.1** Most efficient travel route is taken through monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
3 Monitor and maintain vehicle performance	**3.1** Vehicle performance is maintained through pre-operational vehicle inspections and checks
	3.2 Performance and efficiency of vehicle operation are monitored during use
	3.3 Defective or irregular performance or malfunctions are

Assessment Requirements for TLIC3003 Drive medium rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- carrying out pre-operational checks
- checking and replenishing fluids and carrying out lubrication processes
- completing relevant documentation
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring equipment performance
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related actions that can be taken by a driver
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term management of fatigue
- map reading and road navigation techniques including the use of a global positioning system

(GPS) device
- medium rigid vehicle controls, instruments and indicators, and their use
- medium rigid vehicle handling procedures
- pre-operational checks carried out on vehicle and related actions
- principles of operation of air brakes and procedures for their use
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permits and licence requirements
- workplace driving and operational instructions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory road traffic authority.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

Assessment Requirements for TLIC3004 Drive heavy rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- carrying out pre-operational checks
- completing relevant documentation
- demonstrating low-risk driving behaviours
- monitoring and anticipating traffic hazards and taking appropriate actions
- monitoring performance of vehicle and its equipment, and taking appropriate action, as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related actions that can be taken
- fatigue management strategies and on-road techniques
- heavy rigid vehicle controls, instruments and indicators, and their use
- heavy rigid vehicle handling procedures
- lifestyles that promote effective long-term fatigue management

		route deviations
	2.2	Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment loads and facilities
3 Monitor and maintain vehicle performance	**3.1**	Vehicle performance is maintained through pre-operational inspections and vehicle checks
	3.2	Prime mover and trailer are aligned and coupled in accordance with manufacturer instructions and workplace procedures
	3.3	Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm it is fully operational
	3.4	Performance and efficiency of vehicle operation is monitored during use
	3.5	Defective or irregular performance or malfunctions are reported to appropriate authority
	3.6	Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3005A Drive heavy combination vehicle.

Assessment Requirements for TLIC3005 Drive heavy combination vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying map reading and road navigation techniques
- applying precautions and required actions to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes
- completing relevant documentation
- demonstrating low-risk driving behaviours
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle, trailers and equipment, and taking appropriate action as required
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related actions that can be taken
- fatigue management strategies including on-road techniques
- heavy combination vehicle controls, instruments and indicators, and their use

© Commonwealth of Australia, 2025 Skills Insight

- heavy combination vehicle handling procedures
- lifestyles that promote effective long-term fatigue management
- map reading and navigation of vehicle and related action
- pre-operational checks carried out on heavy combination vehicle and related actions
- principles of operation of air brakes and procedures for their use
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant state/territory road and traffic authority road rules, regulations, permits and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace driving and operational instructions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted, by or under the authority of, the relevant state/territory road and traffic authority.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIC3063 Operate vehicle carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to safely operate a vehicle carrying a special load in accordance with road and traffic authority and other relevant government regulations and company policies, and to effectively manage hazardous situations.

It involves carrying out pre-operational checks, driving a vehicle carrying special loads, and applying routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Driving must be carried out in accordance with relevant state/territory road and traffic authority licence and permit requirements and regulations and specific regulatory and permit requirements for the special load being carried.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Carry out pre-operational checks	**1.1** Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Pre-operational checks for special purpose vehicle and associated ancillary equipment are carried out in accordance with manufacturer requirements, government regulations, and workplace policies and procedures
	1.3 Faults and defects identified during checks are repaired or reported in accordance with workplace procedures
2 Drive a vehicle carrying special loads	**2.1** Vehicle is manoeuvred in accordance with regulations/permit requirements for vehicle class involved and load being carried
	2.2 Vehicles carrying explosives or dangerous goods (DG) are driven along designated routes in accordance with relevant codes, government regulations and workplace policies
	2.3 Load is transported and vehicle is manoeuvred in accordance with required precautions relating to load unusual/special characteristics and/or relevant government regulations for special load, including the current Australian Dangerous Goods (ADG) Code and the current Australian Code for the Transport of Explosives by Road and Rail
	2.4 Signs, placards or indicators are fixed to vehicle, as required
	2.5 Appropriate procedures are followed for load concerned in a driving emergency
	2.6 Documentation is completed and proofread in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

© Commonwealth of Australia, 2025 Skills Insight

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3063A Operate vehicle carrying special loads.

Assessment Requirements for TLIC3063 Operate vehicle carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating traffic hazards and taking appropriate actions
- monitoring performance of vehicle, its equipment and load, and taking appropriate actions, as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- servicing vehicle and its equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques

© Commonwealth of Australia, 2025 Skills Insight

- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related actions that can be taken by a driver
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term fatigue management
- map reading and road navigation techniques
- pre-operational checks carried out on vehicle and related actions
- procedures to be followed in a driving emergency
- relevant Australian regulations and codes of practice for handling and transporting dangerous goods (DG) and hazardous substances, including the current Australian Dangerous Goods (ADG) Code and the current Australian Code for the Transport of Explosives by Road and Rail
- relevant state/territory road and traffic authority road rules, regulations, permits and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- vehicle controls, instruments and indicators, and their use
- workplace driving and operational instructions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Practical assessment must be in vehicles designed to carry special loads, for example, concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier or recovery vehicle.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals.

TLIC4006 Drive multi-combination vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a multi-combination vehicle safely, including maintaining systematic and efficient control of all vehicle functions, coupling and uncoupling dollies, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Driving must be carried out in accordance with relevant state/territory road and traffic authority licence requirements and regulations for multi-combination vehicles.

Driving is performed with limited supervision, and duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Drive multi-combination vehicle**	**1.1** Multi-combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions
		1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage
		1.3 Multi-combination vehicle braking system is managed and operated to ensure effective control of vehicle under all conditions
		1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
		1.5 Multi-combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
		1.6 Multi-combination vehicle is parked, shut down, uncoupled and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
		1.7 Appropriate signage and lights are checked for operational effectiveness and for conformity to prescribed traffic regulations
		1.8 Appropriate procedures are followed in a driving emergency
2	**Monitor traffic and road conditions**	**2.1** Most efficient and permissible route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
		2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
3	**Monitor and maintain vehicle performance**	**3.1** Vehicle performance is maintained through pre-operational inspections and vehicle checks
		3.2 Prime mover, dollies and trailer are aligned and coupled in proper sequence in accordance with manufacturer instructions and workplace procedures
		3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm it is fully operational

© Commonwealth of Australia, 2025 Skills Insight

3.4 Performance and efficiency of vehicle operation is monitored during use

3.5 Defective or irregular performance or malfunctions are reported to appropriate authority

3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIC4006A Drive multi-combination vehicle.

TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads, in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific code, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Load and unload vehicle	**1.1** Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
	1.2 Hazardous and specialised cargo including powders,

© Commonwealth of Australia, 2025 Skills Insight

			raw grain product and controlled waste are identified and handled in accordance with required workplace procedures, work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and regulated requirements
		1.3	Vehicle is loaded in consultation with relevant documentation and personnel in accordance with vehicle loading regulations and workplace safety requirements
		1.4	Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.5	Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.6	Ancillary equipment is operated in accordance with workplace procedures and manufacturer instructions during loading and unloading operations
2	**Secure and protect vehicle and load**	**2.1**	Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions
		2.2	Load is protected in accordance with legal and workplace safety requirements
		2.3	Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity
		2.4	Loaded vehicle is inspected and checked for security to travel
3	**Complete documentation**	**3.1**	Documentation is completed and proofread in accordance with workplace procedures
		3.2	All required cargo transportation documentation is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3014 Load and unload vehicles carrying special loads.

Assessment Requirements for TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating and working collaboratively effectively with others when loading and unloading special loads
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and correctly using load handling equipment when loading and unloading hazardous cargo and specialised cargo including:
  - powders
  - raw grain product
  - controlled waste
- identifying and interpreting containers and goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of relevant documentation
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment and conforming to industry and work health safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) standards
- using manual handling techniques safely

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

© Commonwealth of Australia, 2025 Skills Insight

the requirements of the elements and performance criteria and include knowledge of:

- characteristics of special loads including:
  - powders
  - raw grain product
  - controlled waste
- containers and goods coding, IMDG Code markings and emergency information panels, including their meaning and implications for loading and unloading processes
- housekeeping standards and procedures
- methods for securing special loads
- national Load Restraint Guide (LRG)
- relevant state/territory mass and loading regulations for special loads, including current Australian Dangerous Goods (ADG) Code and Australian Code for the Transport of Explosives by Road and Rail
- risks and hazards when loading and unloading special loads, and related precautions to control the risk
- site layout considerations and obstacles to unloading operations
- WHS/OHS/OSH procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national LRG, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment.

It includes selecting appropriate automated mechanical moving equipment, moving materials in accordance with operational requirements, checking condition of materials and completing required records.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations related to automated mechanical equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Identify task and select automated equipment**	**1.1**	Automated equipment is selected in accordance with workplace procedures, manufacturer specifications and loads characteristics
		1.2	Pre-operational checks are completed and safe working load is determined in accordance with workplace procedures and manufacturer specifications
		1.3	Automated equipment faults are identified and appropriate action taken in accordance with workplace procedures
		1.4	Dangerous goods (DG) and hazardous materials are identified and handled in accordance with workplace procedures
2	**Move materials with automated equipment**	**2.1**	Planned route is determined and work area deemed safe
		2.2	Hazards are identified, risks are assessed and control measures are implemented
		2.3	Materials are moved using automated equipment in accordance with manufacturer specifications and workplace procedures
		2.4	Materials are monitored in accordance with workplace procedures
3	**Complete material move and records**	**3.1**	Materials are inspected in accordance with workplace procedures
		3.2	Records are updated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

Assessment Requirements for TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures when using automated equipment
- following relevant instructions, workplace procedures and signs
- monitoring performance of automated equipment and taking action in accordance with workplace procedures
- reporting automated equipment faults in accordance with workplace procedures
- undertaking operational checks of automated equipment
- using personal protective equipment (PPE) according to workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics, capabilities and limitations of automated equipment
- hazards when using automated equipment and related risk control measures
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- workplace policies and procedures for using automated equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

TLID0007 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with codes of practice, permits, workplace requirements and relevant regulatory requirements as part of work undertaken in the stevedoring, transport, warehousing and logistics industries.

It includes planning work for current working conditions; using controls and equipment operating systems to manage moving the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare work for current working conditions	**1.1** Hazards are identified, risks assessed and control measures implemented

© Commonwealth of Australia, 2025 Skills Insight

	1.2	Traffic flow and work area conditions are assessed and adjusted to ensure safe operation
	1.3	Load characteristics are taken into account to ensure appropriate attachments/gear are used to move load in accordance with lift plan
	1.4	Working load limit (WLL) is calculated
	1.5	Occurrences in work area that may impact on safety and efficiency of operations are reported to relevant personnel in accordance with workplace procedures
2 Operate specialised loading equipment	**2.1**	Equipment is inspected and configured in accordance with manufacturer specifications, prepared and appropriate attachments are fitted
	2.2	Gear and operational levers are checked to ensure they are in neutral position prior to inserting ignition key and starting engine
	2.3	Engine is started in accordance with manufacturer guidelines to bring engine up to speed
	2.4	Instruments and gauges are monitored to ensure operation is within manufacturer specifications and workplace procedures
	2.5	Engine power is managed to ensure efficiency of equipment movement and economy of equipment operations
	2.6	Equipment operations are conducted in accordance with manufacturer specified torque range
	2.7	Faults or damage to equipment are immediately reported to relevant personnel in accordance with workplace procedures
3 Locate load and identify load characteristics	**3.1**	Load is located and identified in accordance with workplace procedures
	3.2	Loading and unloading plans are followed to ensure efficiency and safety of operations
	3.3	Load characteristics are taken into account to ensure appropriate loading and unloading workplace procedures are followed

© Commonwealth of Australia, 2025 Skills Insight

		3.4 Hazardous goods are identified and relevant procedures are taken into account when planning and conducting work
		3.5 Load characteristics, weight and dimensions are checked to ensure lifting capacity is not exceeded
4	**Move materials and loads**	**4.1** Equipment is manoeuvred and positioned using smooth and controlled movements
		4.2 Movements are made within equipment limits and in accordance with manufacturer specifications
		4.3 Materials are moved ensuring no injury to personnel or damage to equipment or goods
5	**Monitor and operate controls**	**5.1** Equipment controls are operated and monitored in accordance with manufacturer operating instructions
		5.2 Control systems are interpreted and acted on in accordance with manufacturer guidelines and workplace procedures
		5.3 Control faults are identified and reported in accordance with workplace procedures
6	**Shut down and secure equipment**	**6.1** Equipment is brought to a controlled halt in accordance with manufacturer guidelines
		6.2 Equipment is shut down without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures
		6.3 Equipment is secured on a flat, even surface, clear of doorways, aisles, access ways or blind corners in accordance with securing procedures for appropriate equipment
		6.4 Problems, faults or malfunctions are reported and/or rectified in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID2012 Operate specialised load shifting equipment.

Assessment Requirements for TLID0007 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of specialised load shifting equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- planning own working, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- selecting and using relevant gear and accessories
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- conveyed material potential for toxicity, reactiveness, material grade, type and purpose, including information from relevant safety data sheets (SDS)/material safety data sheets (MSDS) and current Australian Dangerous Goods (ADG) Code documentation
- documentation, record requirements and housekeeping standards, including:
  - relevant permit and licence requirements
  - site layout and obstacles

© Commonwealth of Australia, 2025 Skills Insight

- operational safety requirements and precautions for specialised load shifting equipment concerned
- operational work systems, equipment, management and site operating systems for operating specialised load shifting equipment
- problems that may occur and appropriate actions that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of specialised load shifting equipment
- relevant regulations for operating specialised load shifting equipment, including current ADG Code and relevant approved storage facilities, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for operating specialised load shifting equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0008 Shift loads using bridge or gantry crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads using bridge or gantry crane in accordance with relevant regulations and workplace requirements as part of work activities in the transport and logistics industry.

It includes planning work for the prevailing working conditions, using controls and operating systems to manage the operation of equipment, and locating and identifying load characteristics. It also includes safely moving the load; monitoring controls and stopping, shutting down and securing equipment after the completion of operations.

Work is performed under some supervision generally within a team environment.

Where the load shifting equipment operated is considered to be high risk work, the operator must hold a high-risk work licence.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare work for the prevailing working	**1.1** Traffic flow, weather and work area conditions are constantly assessed and adjusted to allow for safe

© Commonwealth of Australia, 2025 Skills Insight

	conditions		operations
		1.2	Hazards are identified, risks are assessed and control measures are implemented
		1.3	Load characteristics are taken into account to ensure appropriate attachments/gear are used to move the load in accordance with lift plan
		1.4	Occurrences in the work area that may affect the safety and efficiency of operations are reported to relevant personnel in accordance with workplace procedures
		1.5	Bridge or gantry crane and equipment are inspected and configured in accordance with manufacturer specifications, prepared and appropriate attachments fitted
		1.6	Crane pre-operational checks are conducted in accordance with manufacturer specifications and workplace procedures
2	**Operate bridge or gantry crane**	**2.1**	Bridge or gantry crane is started and operated in accordance with manufacturer specifications
		2.2	Instruments and gauges are monitored to ensure operation is within manufacturer specifications and workplace procedures
		2.3	Faults or damage to bridge or gantry equipment are immediately reported to relevant personnel in accordance with workplace procedures
3	**Locate load and identify load characteristics**	**3.1**	Load is located and identified
		3.2	Working load limit (WLL) of bridge or gantry crane and equipment are identified and communicated to relevant personnel
		3.3	Load characteristics, weight and dimensions are checked to ensure gantry lifting capacity is not exceeded
		3.4	Loading and unloading plans are followed to ensure efficiency and safety of operations
		3.5	Load and environmental conditions are assessed to ensure appropriate loading and unloading procedures are followed

© Commonwealth of Australia, 2025 Skills Insight

		3.6	Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting work
4	**Operate bridge or gantry crane to safely move load**	**4.1**	Bridge or gantry crane is operated and positioned using smooth and controlled movements
		4.2	Movements are within equipment limits and in line with manufacturer specifications
		4.3	Load is moved in accordance with workplace procedures and to ensure safe operation
		4.4	Communication is maintained with relevant personnel
		4.5	Bridge or gantry crane is immediately stopped, and workplace procedures are followed, in the event of an incident or emergency
		4.6	Bridge or gantry crane controls are operated and monitored in accordance with manufacturer specifications
		4.7	Bridge or gantry crane control faults are identified and reported in accordance with workplace procedures
5	**Shut down and secure crane**	**5.1**	Bridge or gantry crane is shut down in accordance with manufacturer specifications and workplace procedures
		5.2	Equipment is secured in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID3043 Shift loads using gantry equipment.

Assessment Requirements for TLID0008 Shift loads using bridge or gantry crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and implementing risk control measures
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- interpreting relevant instructions, procedures and signs
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring bridge or gantry crane and equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace procedures
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- using personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

© Commonwealth of Australia, 2025 Skills Insight

the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes, regulations and licence/permit requirements relevant for using bridge or gantry crane and equipment to shift loads
- cargo marking and numbering systems
- high-risk work licence requirements for bridge and gantry crane and associated equipment
- operational work systems, equipment, management and site operating systems for using bridge or gantry equipment to shift loads
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant safety codes of practice and emergency response procedures
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- requirements for working load limit (WLL) of bridge or gantry crane and equipment
- types of bridge or gantry crane and equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for using bridge or gantry crane and equipment to shift loads.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Assess risks associated with	1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

© Commonwealth of Australia, 2025 Skills Insight

relocating load	1.2	Storage locations are determined and potential routes to be followed are identified
	1.3	Effect of load relocation on original load base is predicted
	1.4	Points of balance are estimated
	1.5	Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
	1.6	Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
	1.7	Risks in potential routes are considered
	1.8	Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
	1.9	Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
	1.10	Team lifting processes are considered when moving loads
	1.11	Appropriate personal protective equipment is determined
	1.12	Size to weight ratio of items to be manually handled are identified
2 Plan load relocation	2.1	Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
	2.2	Process for relocating load is proposed including predicting and planning for potential difficulties
	2.3	Proposed process is checked for compliance with code of practice and workplace procedures
3 Relocate load	3.1	Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
	3.2	Applications appropriate for team relocation of load are identified
	3.3	Team lifting tasks are coordinated
	3.4	Planned process and route are followed

© Commonwealth of Australia, 2025 Skills Insight

3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability

3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
- controlled actions on a movement during lifting
- distance over which load is to be shifted
- frequency of shifting operations
- load on the spine during lifting
- postures and positions during lifting
- rotation and side movement of the spine during lifting
- time allowed for shifting the load
- type, weight and position of the load
- work layout
- site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Load and unload goods/cargo**	1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
		1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
		1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
		1.4 Load is packed/unpacked to make safe and effective use of available spaces
		1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
		1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
		1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
2	**Secure and protect load**	2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
		2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
		2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
		2.4 Load is protected in accordance with legal and workplace safety requirements
3	**Complete**	3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

© Commonwealth of Australia, 2025 Skills Insight

documentation		and current ADG Code, as required
	3.2	All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by driver
	1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures
3 Operate forklift to handle loads	3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
	3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures
4 Monitor site conditions	4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
	4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

© Commonwealth of Australia, 2025 Skills Insight

5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use
	5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
	5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLID2047 Prepare cargo for transfer with slings

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare cargo for the transfer with slings in accordance with workplace requirements and relevant regulatory requirements, within the transport and logistics industry.

It includes preparing for cargo transfer, calculating safe working load (SWL) or working load limit (WLL) of slings and loads, slinging and unslinging cargo, and strapping and unstrapping goods.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated high risk work licence requirements and to comply with relevant codes of practice and/or guidelines.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare cargo transfer	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Working area is prepared and maintained in accordance with national standards, safety codes and site operating procedures
	1.3 Unsafe work practices and/or faulty equipment is reported in accordance with enterprise procedures
	1.4 Correct protective equipment is identified and worn/used
2 Calculate safe working load or working load limit of slings and loads	2.1 SWL or WLL is calculated using standardised formulae for different types of lifting cables
	2.2 Lifting equipment is checked to determine SWL
	2.3 Slinging gear is checked for conformity with safety equipment
3 Sling and unsling cargo	3.1 Cargo is slung/unslung in accordance with national standards, safety codes and site operating procedures
	3.2 Correct securing devices are identified and used
	3.3 Load is steadied by tag lines as required
	3.4 Damaged cargo is identified and reported in accordance with enterprise procedures
	3.5 Slinging attachments are released from load ensuring no injury to personnel or damage to machinery or cargo
4 Strap and unstrap goods	4.1 Cargo is strapped and unstrapped in accordance with national standards, safety codes and site operating procedures
	4.2 Mechanical strapping equipment is used in accordance with manufacturer instructions
	4.3 Damaged cargo is identified and reported in accordance with enterprise reporting procedures
	4.4 Strapping arrangements are secured/released to/from load ensuring no injury to personnel or damage to machinery or

Assessment Requirements for TLID2047 Prepare cargo for transfer with slings

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant high risk work legislation and workplace procedures
- calculating safe working load (SWL) and working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- inspecting equipment prior to use
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant gear and equipment when preparing cargo for transfer with slings
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using balance points and estimating weights in setting up loads to be shifted
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- cargo potential for toxicity, reactiveness, material grade, type and purpose including information from relevant safety data sheets (SDSs)/material safety data sheets (MSDSs) and current Australian Dangerous Goods (ADG) Code documentation
- documentation and record requirements
- gear and equipment used when transferring cargo with slings, and precautions and procedures that should be followed in their use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating procedures for transferring cargo with slings
- problems that may occur when preparing cargo for transfer with slings and appropriate action that can be taken to resolve these problems
- relevant regulations for transferring cargo with slings, including current ADG Code and bond, quarantine and other high risk work legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- requirements for SWL and WLL
- slings, dogging and rigging licence to perform high risk work requirements
- site layout and obstacles
- workplace procedures and policies for transferring cargo with slings.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and

TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, in accordance with relevant state/territory high risk work licence requirements and regulations, in a variety of operational contexts.

It includes checking attachments and worksite for suitability, selecting type of forklift and accessories for required workplace task, shifting load and completing work in accordance with operational requirements.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift

A person who operates a forklift must hold a high risk work licence.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Check attachments and worksite for suitability**	1.1 Suitable work area is selected for operations
		1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
		1.3 Work area is checked for overhead obstructions and proximity to service delivery lines
		1.4 Barriers or warning signs are erected in areas subject to passing traffic
		1.5 Attachments and platforms are securely fixed to carriage or tines
		1.6 Personnel support platforms are inspected to ensure accordance with relevant Australian Standard/s
2	**Select type of forklift and accessories for required workplace task**	2.1 Special equipment, accessories or attachments are identified to match load characteristics and work requirements
		2.2 Appropriate specialised equipment is selected
		2.3 Existing attachments are removed and stored in accordance with workplace procedures
		2.4 Specialised equipment is fitted in accordance with manufacturer instructions and workplace procedures
		2.5 Designated staff are notified about specialist operations
3	**Shift load and complete work**	3.1 Equipment is operated within safe working limits and to maximise efficiency of operations
		3.2 Load is lifted, carried and set down in accordance with workplace and manufacturer procedures, and regulatory requirements
		3.3 Documentation is completed damage or faults to goods or equipment are reported to appropriate personnel
		3.4 Specialist equipment and forklift are returned to appropriate storage/parking area

Assessment Requirements for TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes during work activities
- checking forklift compliance plate for safe weight limits
- communicating effectively with others
- completing relevant documentation
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- handling procedures for forklifts involved in specialised operations
- high risk work licence workplace requirements
- operating hazards, and related defensive driving and hazard control techniques
- pre-operational checks carried out on forklift and accessories, and related action
- procedures to be followed in an operational emergency
- relevant duty of care requirements for specialised operation of a forklift
- relevant WHS/OHS and environmental procedures and regulations
- safe weight limits
- site layout and obstacles
- types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID3033 Operate a vehicle-mounted loading crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a vehicle-mounted loading crane to shift loads with a capacity of less than 10 metre tonnes.

It includes positioning and stabilising a vehicle-mounted crane, operating a vehicle-mounted crane, monitoring lift conditions, packing up a vehicle-mounted crane after operations, and completing all required job records.

Work must be carried out in accordance with the relevant state/territory authority licence/permit requirements and regulations pertaining to vehicle-mounted loading cranes.

Work is performed under general supervision. It involves the application of routine principles and procedures when operating a vehicle-mounted loading crane in a variety of operational contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Position and stabilise vehicle-mounted crane	1.1 Crane is driven to position as specified in job plan to ensure safe operation in accordance with applicable Australian standards, codes of practice, manufacturer specifications, and relevant regulatory and local government requirements
	1.2 Barriers, fencing, temporary boundaries and signage are used as required to isolate working area in accordance with safe working practice and lift requirements
	1.3 Ground is checked to ensure it is firm enough to bear load to be taken
	1.4 Appropriate plates or packing are correctly used to adequately distribute load
	1.5 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturer instructions, appropriate Australian standard and other relevant statutory regulations or local authority requirements
	1.6 Outrigger packing is checked for adequacy prior to and after load is taken
2 Operate vehicle-mounted crane	2.1 Planned hazard control strategies are implemented
	2.2 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
	2.3 Load mass is assessed and correlated with crane lifting capacity throughout proposed radii of operation
	2.4 Appropriate lifting gear is selected and load is secured
	2.5 Load is hoisted and lowered into position using crane movements in accordance with appropriate Australian standard
	2.6 Crane controls are operated smoothly
	2.7 Crane is shut down and secured during periods of non-operation in accordance with manufacturer specifications and workplace procedures
3 Monitor lift conditions	3.1 Load is constantly monitored to ensure load and structural stability

© Commonwealth of Australia, 2025 Skills Insight

	3.2 Conditions that may affect continuing stability of crane are identified and monitored
	3.3 Unplanned situations are responded to in accordance with workplace procedures in a manner that minimises risk to personnel and equipment
	3.4 Advice is sought from supervisor where there is doubt about correct response to unanticipated conditions or conflict with customer request
	3.5 Supervisor/allocator is advised of concerns about completing job within timeframe
	3.6 Shut-down procedures are implemented in an emergency in accordance with manufacturer instructions
	3.7 Relevant motion locks and brakes are applied
	3.8 Crane is shut down using correct sequence of procedures in accordance with manufacturer specifications and workplace procedures
	3.9 Routine post-operational equipment checks are carried out in accordance with manufacturer specifications
4 Pack up vehicle-mounted crane	4.1 All lifting equipment and crane components are checked for any signs of deterioration or damage in accordance with the appropriate Australian standard
	4.2 Damaged or worn equipment is segregated and reported to an authorised person for testing/repair/destruction
	4.3 Crane equipment is correctly stowed and secured in accordance with manufacturer instructions and the appropriate Australian standard
	4.4 Crane is immobilised and secured for travel in accordance with manufacturer instructions, workplace guidelines and regulatory requirements
5 Complete job records	5.1 Customer feedback is sought regarding satisfaction with completed job and areas of concern are reported in accordance with workplace procedures
	5.2 Customer signature is obtained on job completion documentation
	5.3 Required workplace records are updated accurately and promptly, and processed in accordance with workplace

- application of relevant agreements, codes of practice and other legislative requirements
- hazard management that is consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- high risk work licence requirements
- mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- operational procedures for crane crews
- operational work procedures concerning setting up and rigging a mobile crane at a worksite
- operational work systems and equipment
- prioritising and multi-tasking work
- problems that may arise when operating a vehicle-mounted loading crane and actions that should be taken to prevent or solve these problems
- relevant WHS/OHS and environmental procedures and regulations
- relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID3035 Operate a boom type elevating work platform

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a boom type elevating work platform less than 11 metres boom length, in accordance with relevant state/territory licence/permit requirements and regulations, in a variety of operational contexts.

It includes inspecting and testing elevating work platform, assessing job and work requirements, planning work and setting up for lift, and carrying out elevation. It also includes implementing planned hazard controls and strategies, and packing up work platform after operations.

Work is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

essential outcomes.	demonstrate achievement of the element.
1 Inspect and test elevating work platform	1.1 Work platform is visually inspected prior to operation for evidence of damage, structural weakness or interference in accordance with pre-operational safety check procedures
	1.2 Routine pre-operational equipment checks are carried out in accordance with available checklists
	1.3 Work platform logbook is checked, service requirements are noted and maintenance personnel are advised of requirements
	1.4 Elevating work platform is started in accordance with manufacturer guidelines and start-up procedures for operations, and abnormal noise or movement is reported to authorised person for corrective action
	1.5 Start-up checks are conducted in accordance with manufacturer specifications and company procedures to ensure work platform and equipment are operating correctly
	1.6 Faults are corrected or reported to authorised person for corrective action in accordance with company procedures
	1.7 Operating and emergency controls are checked for correct operation in accordance with manufacturer specifications, including use of emergency decent device
	1.8 Boom is lowered under simulated emergency conditions to check for operational effectiveness
	1.9 Gear and accessories are checked and damaged or worn gear is segregated and reported to authorised person for testing/repair/destruction
	1.10 Results of inspections are recorded and reported in accordance with company procedures
2 Assess job requirements and work	2.1 Briefing, handover details, authorisations and clearances are received, interpreted and clarified in accordance with company and site procedures, and legislative requirements
	2.2 Work area is inspected, potential hazards are identified and appropriate elimination or control measures are selected
	2.3 Weight of load including personnel and equipment, is correctly estimated to ensure job is within limits of work platform capacity

© Commonwealth of Australia, 2025 Skills Insight

3	**Plan work and set up for lift**	3.1 Work plan is developed and agreed with relevant workplace personnel, including hazard prevention/control measures, and safety and emergency procedures in line with applicable Australian Standards
		3.2 Suitable firm and level standing is chosen and prepared for location of elevating work platform
		3.3 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturer instructions and appropriate Australian Standards
		3.4 Appropriate plates or packing are correctly used under footplates as required to adequately distribute loading
		3.5 Ground is checked before and after packing is installed to ensure it is firm enough to bear load
		3.6 Job plan is developed including hazard prevention/control measures and safety procedures in accordance with applicable Australian Standards and equipment manufacturer specifications
		3.7 Work platform load chart is located and information on permissible loads, radii and heights is taken into account in planning job
		3.8 Job requirements, and workplace rules and procedures are taken into account in job plan
		3.9 Job plan is discussed and confirmed with relevant personnel
		3.10 Work gear and tools are properly stowed in elevating work platform in accordance with Australian Standards, company procedures and guides
4	**Carry out elevation**	4.1 Configuration and operation of elevating work platform are checked as required to ensure safe lift
		4.2 Operation of work platform is carried out in accordance with job plan, appropriate Australian Standard and manufacturer specifications
5	**Implement planned hazard control strategies**	5.1 Load is constantly monitored to ensure safety of personnel, load and structural stability
		5.2 Unplanned situations are responded to in accordance with company procedures, in a manner that minimises risk to personnel and equipment

© Commonwealth of Australia, 2025 Skills Insight

	5.3	Required signals are correctly given, interpreted and followed in accordance with appropriate Australian Standards
6 Pack up work platform	6.1	Elevating work platform is shut down using correct sequence of procedures in accordance with manufacturer instructions
	6.2	Routine post-operational equipment checks are carried out in accordance with manufacturer instructions and available checklists, and defects are recorded and reported in accordance with company procedures
	6.3	Elevating work platform is dismantled in accordance with job plan, manufacturer instructions and relevant statutory regulations
	6.4	Outriggers and stabilisers are secured and stowed in accordance with manufacturer instructions
	6.5	Elevating work platform is correctly stowed and secured in accordance with manufacturer instructions and company procedures

TLID3036 Lift and move load using a mobile crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to lift and move a load using a non-slewing mobile crane or a slewing mobile crane, in a variety of operational contexts.

It includes operating mobile crane to complete job requirements, monitoring lift conditions, implementing shut-down procedures, packing up crane after operations and completing all required job records.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated high risk work licence requirements and to comply with relevant codes of practice and/or guidelines for mobile crane operations.

Work is performed with limited supervision and duty of care responsibility for self and others, in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Operate mobile crane	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 In ascent and descent to/from crane, correct use is made of means provided, in accordance with relevant codes of practice and workplace procedures
	1.3 Required signals are correctly given, interpreted and followed in accordance with appropriate workplace procedures
	1.4 Boom is positioned to ensure load to be lifted is plumbed under hook
	1.5 Load is hoisted and lowered into position using crane movements, in accordance with appropriate workplace procedures
	1.6 Crane controls are operated smoothly
	1.7 Crane is shut down and secured during periods of non-operation, in accordance with manufacturer specifications and workplace procedures
2 Monitor lift conditions	2.1 Load is constantly monitored to ensure load and structural stability
	2.2 Conditions that may affect continuing stability of crane are identified and monitored
	2.3 Unplanned situations are responded to in accordance with workplace procedures in a manner that minimises risk to personnel and equipment
	2.4 Dogger is advised of new information that affects lift
	2.5 Necessary changes to job plan are discussed and confirmed with rest of crew
	2.6 Advice is sought from supervisor where there is doubt about correct response to unanticipated conditions, or conflict with customer request

© Commonwealth of Australia, 2025 Skills Insight

	2.7	Supervisor/allocator is advised of concerns about completing job within timeframe
3 Implement shut-down procedures	3.1	Relevant motion locks and brakes are applied
	3.2	Crane is shut down using correct sequence of procedures in accordance with manufacturer specifications and workplace procedures
	3.3	Routine post-operational equipment checks are carried out in accordance with manufacturer specifications
4 Pack up crane	4.1	Crane is de-rigged with other crane personnel in accordance with manufacturer instructions
	4.2	All lifting equipment and crane components are checked in consultation with crane personnel for signs of deterioration or damage in accordance with appropriate Australian Standard
	4.3	Damaged or worn equipment is segregated and reported to authorised person for testing/repair/destruction
	4.4	Crane and equipment are correctly stowed and secured in accordance with manufacturer instructions and appropriate Australian Standard
5 Complete job records	5.1	Customer feedback is sought about satisfaction with completed job, and areas of concern are reported in accordance with workplace procedures
	5.2	Customer signature on job completion documentation is obtained
	5.3	Required workplace records are updated accurately and promptly, and processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3036A Lift and move load using a mobile crane.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851

Assessment Requirements for TLID3036 Lift and move load using a mobile crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant high risk work legislation and workplace procedures
- applying risk assessment and management procedures
- calculating safe working load (SWL) and working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- effectively completing pre-operational checks, positioning, stabilising, set-up, post-operational checks of mobile crane
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of equipment
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- operating crane, including all functions to their maximum extension, in lifting and moving a load
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing equipment in terms of maintenance schedule and standard operating procedures
- using load charts to determine crane limitations and/or required crane set-up
- using mathematical procedures to determine load weight and lifting equipment required for lift.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communications systems used during a lift
- hazard management, using the principle of hierarchy of control
- high risk work licence requirements
- mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- operational work systems and equipment
- problems that may occur during a lift, and associated action that can be taken to address these problems
- relevant road rules, regulations, permit and licence requirements for mobile crane operation
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- risks and hazards involved in mobile crane operations, and associated action that can be taken to eliminate or minimise the risk
- workplace procedures for operating a mobile crane at a worksite.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- mobile crane, of the type currently used in industry
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID4032 Plan and conduct specialised lift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to plan and conduct specialised lift by a mobile crane (excluding demolition work).

It involves a lift that may be specialised in terms of job and equipment requirements, load qualities, or critical aspects of lift location/s.

It includes inspecting site, planning lift, setting up lift, working effectively in a team, lifting and moving load, and following up on a job.

Work must be carried out in accordance with high risk work licence/permit requirements and relevant state/territory authority regulations for specialised mobile crane operations.

Work is performed under general supervision. It involves the application of some judgement and routine principles and procedures for planning and conducting of specialised lifts in a variety of operational contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Inspect site	1.1 Site is inspected as required with other relevant personnel, to assess job requirements
	1.2 All necessary parameters are measured to ensure accuracy of calculations
	1.3 Hazards are identified through inspection of site and load, and required action is taken to minimise, control or eliminate identified hazards
	1.4 Additional information about load and possible hazards is sought from customer and expert personnel, as required
	1.5 Special site requirements are identified
2 Plan lift	2.1 Operation plan is developed in consultation with other relevant personnel, including hazard prevention/control measures in accordance with workplace procedures, applicable Australian Standards and codes of practice
	2.2 Approval to carry out lift is obtained from appropriate statutory authority, as required
	2.3 Multiple crane lifts are planned, as required, to encompass determination of types of cranes suitable for use and an assessment of load share to be carried by each crane
	2.4 Crane load chart is interpreted and information on permissible loads, radii, weights, boom and jib are taken into account in planning job
	2.5 Safe working load (SWL) or working load limit (WLL) is calculated
	2.6 Appropriate drawings and simulations are created to check feasibility of planned operations
	2.7 Information from previous lifts is used in developing operational plan
	2.8 Range of alternatives is considered to ensure effective and safe lift

© Commonwealth of Australia, 2025 Skills Insight

		2.9	Unsolicited, irrelevant information is disregarded to focus on task at hand
		2.10	Need for additional/specialised equipment is ascertained and arrangements are made for collection/delivery to site
		2.11	Communications system is determined and all team members are briefed on its use when conducting lift
3	**Set up lift**	3.1	Site measurements and SWL/WLL are checked to verify accuracy
		3.2	Operating and emergency controls are checked to ensure crane is in safe working order
		3.3	Appropriate personal protective equipment is selected and worn in accordance with manufacturer specifications and site requirements
		3.4	Site is isolated as required and assistance is sought to ensure public safety as required
		3.5	Other personnel on site are directed, as required to ensure risks to personnel and equipment are minimised
		3.6	Variables that affect operation predictability are eliminated wherever possible
4	**Work effectively in a team**	4.1	Consultation with all team members is sought in developing operational plan
		4.2	Ideas are discussed and evaluated with team members to determine viability and to reach consensus on an effective plan
		4.3	Individual roles and responsibilities are clarified and agreed
		4.4	Other team members are assisted as required, to ensure operation can be completed safety and efficiently
5	**Lift and move load**	5.1	Nominated authorised person is recognised as being in control and instructions are followed
		5.2	Test runs are conducted as required to ensure a safe lift
		5.3	Load is hoisted and lowered into position using crane movements in accordance with the appropriate Australian Standard

© Commonwealth of Australia, 2025 Skills Insight

	5.4	Danger is anticipated by monitoring crane and load, and instruction to stop operation is given, when there are concerns lift is not proceeding as planned
	5.5	Potential impact of change in one area of operation on lift as a whole, is recognised
	5.6	In unanticipated situations, contribution is made to developing alternative operational plan
6 Follow up on job	6.1	Specialised equipment is checked and re-stored in accordance with workplace procedures
	6.2	Operation is reviewed in consultation with relevant personnel and contribution is made to recommendations for review of procedures as required
	6.3	Need for further after-job debriefing or counselling is recognised and appropriate action is taken
	6.4	Records are completed promptly in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID4032A Plan and conduct specialised lift.

Assessment Requirements for TLID4032 Plan and conduct specialised lift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- calculating safe working load (SWL) or working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- developing contingency plans
- ensuring use of required personal protective equipment conforms to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapt to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- prioritising and multi-tasking work
- providing leadership and working collaboratively with others
- reading and interpreting relevant instructions, procedures, information, technical data, manuals and signs
- reporting and/or rectifying problems promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- calculations for SWL or WLL
- focus of operation of work systems and equipment
- mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- hazard management, consistent with the principle of hierarchy of control
- high risk work licence requirements
- problems that may arise when planning and supervising a specialised lift using a mobile crane and actions that should be taken to prevent or solve these problems
- relevant agreements, codes of practice or other legislative requirements
- relevant road rules, regulations, permit and licence requirements for mobile crane operation
- relevant WHS/OHS and environmental procedures and regulations
- safe work method statement
- workplace procedures for crane crews
- workplace procedures for setting up and rigging a mobile crane at a worksite.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- mobile crane, of the type currently used in industry
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1 Estimate loads for transport or storage	1.1 Order forms/work orders are read and requirements are noted
	1.2 Shape, balance characteristics, dimensions and mass of load/s are identified
	1.3 Area/volume required for storage is estimated
	1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
2 Estimate load limits of transport and/or storage	2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
	2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated
3 Organise load	3.1 Load/s is restricted to allowable range
	3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
	3.3 Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002A Estimate/calculate mass, area and quantify dimensions.

Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

© Commonwealth of Australia, 2025 Skills Insight

- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE4006 Collect, analyse and present workplace data and information

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to collect, analyse and present workplace data and information as part of workplace operations.

It includes identifying required information, analysing and preparing information for use, explaining information and presenting workplace information to others.

Work is performed under general or limited supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Collect required data	1.1 Purpose of data and information collection is confirmed

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to ensure the safety of transport activities.

It includes identifying features and applying chain of responsibility obligation in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations. It also includes identifying and reporting chain of responsibility risks.

Transport activities as defined by the HVNL or applicable state/territory law and regulations.

Work is performed under close direction, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify chain of responsibility features in the HVNL or applicable	**1.1** Transport activities and parties in the chain of responsibility are identified

© Commonwealth of Australia, 2025 Skills Insight

	state/territory law and regulations		
		1.2	Principle of shared responsibility obligations within chain of responsibility in the HVNL or applicable state/territory law and regulations are identified
		1.3	Primary duty of each party in the chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
		1.4	So far as reasonably practicable or reasonable steps, compliance with chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
		1.5	Breaches and penalties for failure to comply with chain of responsibility as identified in the HVNL or applicable state/territory law and regulations are explained
2	**Apply chain of responsibility obligations in the HVNL or applicable state/territory law and regulations**	**2.1**	Workplace policies, procedures and other documents relevant to transport activities as they apply to own job function are identified and explained
		2.2	Methods and requirements to facilitate and ensure management of speed and fatigue are explained in accordance with job function and workplace procedures
		2.3	Methods to assess vehicle dimension and mass limits are explained in accordance with job function
		2.4	Methods to ensure loads are secured are explained in accordance with workplace procedures
		2.5	Heavy vehicles safety standards are identified in accordance with job function and workplace procedures
		2.6	Transport activities risks are identified, assessed and risk control measures implemented in accordance with workplace procedures
		2.7	Workplace procedures and industry practices for reporting transport activities risks are identified and followed
		2.8	Workplace documents relating to chain of responsibility are completed and processed to workplace requirements

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIF0001 Apply chain of responsibility legislation, regulations and workplace procedures.

Links

Assessment Requirements for TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- applying applicable state/territory law and regulations
- assessing the likelihood and consequences of harm relating to own job function on a minimum of three occasions
- completing safety documentation of identified transport activities of a heavy vehicle risk on a minimum of three occasions, each about a different type of risk
- identifying risks associated with transport activities of a heavy vehicle of own job function and at least two other job functions directly related to own job function
- implementing relevant risk control measures and report actions taken to relevant person in accordance with workplace procedures on a minimum of three occasions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action required when possible risks of the transport activities are identified
- consideration of external factors in managing speed and fatigue
- function of driver and how they relate to transport activities, including level of influence and control
- methods, industry standards and requirements to ensure management of fatigue, speed, load restraint, mass, dimension and heavy vehicle maintenance and how they relate to transport activities job functions
- parties in the chain of responsibility and the concept of level of influence and control
- potential consequences of non-compliance with the applicable heavy vehicle state/territory law and regulations
- principle of shared responsibility
- transport activities as defined by the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations
- what constitutes an unreasonable request
- where to locate current information relating to heavy vehicle transport activities including:
  - codes of practices

© Commonwealth of Australia, 2025 Skills Insight

  - heavy vehicle standards
  - securing loads, load placement and load restraint
  - vehicle dimension and mass limits
- workplace policies and procedures for own job function.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIF0012 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate accident and emergency procedures in accordance with relevant regulations and workplace procedures.

It includes responding to the incident, coordinating on-site activities and completing follow-up actions.

Work is performed under some supervision generally within a team environment. It involves the application of basic emergency response principles when implementing accident and emergency response procedures and includes providing assistance ranging from simple injuries to applying life support systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Respond to incident	**1.1** Details of incidents, accidents and emergencies are

© Commonwealth of Australia, 2025 Skills Insight

		received, analysed and confirmed
	1.2	Hazards are identified, risks assessed and control measures implemented
	1.3	Immediate coordination requirements are identified and actioned in accordance with organisation procedures
	1.4	Travel to incident site is undertaken by the shortest, fastest, legal means and routes
2 Coordinate on-site activities	**2.1**	Control of site activities is assumed on arrival, and operator and other authorities present are informed of this action
	2.2	Assistance is provided to clients and operators within limitations of duty of care and organisational requirements
	2.3	Details of personnel, including names and nature of injuries, are notified to relevant personnel, in accordance with organisational policies and procedures
	2.4	Assistance is provided to relevant authorities within legal and policy limitations
3 Complete follow-up actions	**3.1**	Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with organisational policies and procedures
	3.2	Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and coordinating accident and emergency response procedures
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, procedures, information and signs
- working collaboratively with others when implementing and coordinating accident and emergency procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- means to control and organise an accident scene, provide practical assistance and cooperate with others at the scene
- relevant work health safety (WHS)/occupational health and safety (OHS) and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- risks and hazards in the workplace and related precautions to control risk
- workplace procedures and policies for responding to accidents and emergencies.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

© Commonwealth of Australia, 2025 Skills Insight

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIF1002 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct housekeeping activities in the workplace.

It includes identifying housekeeping requirements, procedures and resources of different areas of the workplace; monitoring and maintaining cleanliness and tidiness in the workplace; and completing assigned housekeeping tasks.

Work is performed under some supervision generally in a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F - Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine housekeeping requirements for different workplace areas	1.1 Workplace housekeeping procedures are identified
	1.2 Equipment and consumables are selected in accordance with work area requirements

© Commonwealth of Australia, 2025 Skills Insight

	1.3 Specific procedures and resources for housekeeping activities in different parts of the work area are identified and followed
2 Monitor and maintain cleanliness and tidiness in the workplace	2.1 Initiative is used to continuously monitor worksite cleanliness and tidiness
	2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures
	2.3 Housekeeping equipment is operated in accordance with manufacturer instructions and workplace policy
	2.4 Housekeeping equipment and supplies are maintained and stored
3 Complete assigned housekeeping duties	3.1 Assigned housekeeping duties are conducted in accordance with workplace procedures and ensuring that waste is removed
	3.2 Maintenance requirements of any damaged items are notified to appropriate personnel
	3.3 Schedules and records for housekeeping duties are maintained
	3.4 Work areas are checked and required workplace standards are met
	3.5 Work is carried out following enterprise practices and safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit replaces and is equivalent to TLIF1002B Conduct housekeeping activities.

Links

Assessment Requirements for TLIF1002 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- communicating and working effectively with others when carrying out housekeeping activities
- identifying workplace housekeeping requirements and undertaking housekeeping in the workplace
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring condition and performance of housekeeping tools and equipment and servicing, in terms of servicing schedule and standard operating procedures
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reporting and rectifying within limits of own role, problems, faults and malfunctions identified when carrying out housekeeping activities, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards
- purpose of housekeeping within the workplace

© Commonwealth of Australia, 2025 Skills Insight

- relevant enterprise practices and safeworking procedures for own job role
- risks when carrying out housekeeping tasks and related precautions to control them
- servicing procedures for housekeeping equipment
- site layout and obstacles
- workplace procedures and policies for carrying out housekeeping activities in the workplace.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIF2010 Apply fatigue management strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry. Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify and act on signs of fatigue	1.1 Potential causes of fatigue are identified and action is taken to minimise their effects in accordance with company procedures

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Personal warning signs of fatigue are recognised and necessary steps are taken in accordance with workplace procedures, to ensure that effective work capability and alertness are maintained
2 Implement strategies to minimise fatigue	2.1 Workplace procedures are assessed to minimise fatigue
	2.2 Factors that increase the risk of fatigue-related accidents and incidents are minimised
	2.3 Fatigue management strategies are implemented in accordance with workplace policy
	2.4 Lifestyle choices are made that promote the effective long-term management of fatigue
	2.5 Effective practices in combating fatigue are adopted and applied
	2.6 Personal fatigue management strategies are communicated to relevant people
	2.7 Appropriate counter measures are planned to combat fatigue

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2010A Apply fatigue management strategies.

Assessment Requirements for TLIF2010 Apply fatigue management strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required action to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate action in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance

© Commonwealth of Australia, 2025 Skills Insight

- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to interpret road maps and to navigate routes as part of transport operations.

It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements.

Work is performed under general or limited supervision. It involves the application of map reading principles and procedures when interpreting street directories and road maps, and following pre-determined routes.

Work must be carried out in accordance with relevant state/territory roads and traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify and determine pre-planned route	1.1 Pre-determined route documentation is accessed and interpreted
	1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed
	1.3 Street directory, GPS and road map symbols are recognised and interpreted
	1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate map
	1.5 Pre-determined route directions are interpreted and route is traced using a street directory, GPS and road map
	1.6 Key intersections and other landmarks along route are identified for use in following planned route
	1.7 Alternative contingency routes are identified for emergencies or traffic delays
	1.8 Pre-determined route is correctly followed
2 Complete necessary documentation	2.1 Required route documentation is completed in accordance with purpose of transportation and workplace requirements
	2.2 Required route documentation is filed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing documentation related to route navigation
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment in accordance with workplace protocols
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job role
- reading and interpreting relevant instructions, procedures, information and signs
- using global positioning system (GPS) devices to navigate pre-determined routes as required
- using maps and other route documentation to correctly identify and interpret:
  - map symbols
  - roads and intersections
  - town and suburb locations
- working collaboratively with others as required (such as fleet managers, sales team)
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on a particular route
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations/rest stops as required
- operational procedures for interpreting road maps, using GPS devices and navigating routes
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards and issues
- traffic conditions at various times of the day/night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate action that should be taken
- workplace requirements for recording and documenting route information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIJ3002 Apply quality systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply quality systems in workplace operations in accordance with relevant regulations and workplace quality standards within the transport and logistics industry.

It includes working within a quality improvement system and using quality improvement systems, tools and techniques in accordance with enterprise procedures.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

J – Quality

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Work within a quality improvement system	1.1 Instructions are followed and duties are performed either individually or as a member of a work team within a quality improvement system

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Work is completed either individually or as a member of a work team in accordance with standards as defined in workplace policies and procedures
2 Use quality improvement systems, tools and techniques	2.1 Variations from required standards in the quality of services and/or products are detected and reported in accordance with workplace procedures
	2.2 Quality of operations/service is monitored and adjusted as required to ensure internal and external customer satisfaction
	2.3 Quality improvement tools and techniques are used individually and as part of a work team to systematically improve the quality of work, services and/or products

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIJ3002 Apply quality systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others when applying and implementing quality systems
- completing relevant documentation
- identifying and using equipment, processes and procedures required within the context of the job concerned
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in relation to quality system standards and processes
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, procedures and information
- reporting and/or rectifying identified problems, in accordance with regulatory requirements and workplace procedures
- selecting and using quality improvement tools and methods
- working collaboratively with others when applying and implementing quality systems
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

TLILIC0002 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor changes and re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit unit specifies the skills and knowledge required to safely operate a vehicle loading crane with a Maximum Rated Capacity (MRC) of 10 metre tonnes or more. Competence in this unit, does not in itself result in a High Risk Work Licence (HRWL) to operate this plant.

Vehicle loading crane means a crane mounted on a vehicle for loading and unloading the vehicle.

A person undertaking this unit must hold:

- a current National HRWL to perform dogging or a current certification for a specific VET course for HRWL to perform dogging that has been issued by, or on behalf of a WHS Regulator.

A person performing this work is required to hold a vehicle loading crane HRWL.

This unit requires a person operating a slewing vehicle loading crane with an MRC of 10 metre tonnes or more to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work/task	**1.1** Task requirements are identified from work orders or equivalent and a lift plan is confirmed with associated personnel and a site inspection is conducted in accordance with workplace procedures
	1.2 Work area operating surface is confirmed to determine the quality of ground suitability for operational use of vehicle loading crane in accordance with workplace procedures
	1.3 Vehicle loading crane rated capacity (RC) and the lifting gear Working Load Limit (WLL) are established for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
	1.4 Appropriate paths for operating the vehicle loading crane and moving and placing load/s in work area are assessed and determined in accordance with workplace procedures
	1.5 Relevant hazard identification and risk elimination/control measures are applied and advised to associated personnel in accordance with workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

	1.6	Traffic management plan implementation is confirmed and followed in accordance with workplace procedures
	1.7	Appropriate communication procedures are identified and tested with associated personnel in accordance with workplace procedures
	1.8	All tasks are confirmed to ensure requirements for the relevant work area in accordance with workplace procedures
Prepare for work/task 2	**2.1**	Consultation with workplace personnel is established and maintained to ensure all crane and lifting operations are clear and consistent with site requirements in accordance with a lift plan and workplace procedures
	2.2	Risk control measures for hazards identified are checked for implementation in accordance with the lift plan and safe work procedures
	2.3	Vehicle loading crane controls are accessed safely in accordance with manufacturer requirements and safe work procedures
	2.4	Pre-start vehicle loading crane checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements
	2.5	Vehicle loading crane is set up correctly with any lifting gear as per the lift plan in accordance with relevant manufacturer requirements including load chart/s and safe work procedures
	2.6	Boom/jib and lifting gear are set up as required in accordance with specific manufacturer requirements and safe work procedures
	2.7	Vehicle loading crane is stabilised appropriately in accordance with the lift plan, relevant manufacturer requirements and safe work procedures
	2.8	Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures

© Commonwealth of Australia, 2025 Skills Insight

	2.9	Vehicle loading crane logbook is inspected and is correct for the crane type, is completed and signed and required rectifications have been signed off in accordance with manufacturer requirements and safe work procedures
	2.10	Weather and work environment conditions are assessed to determine any impact on vehicle loading crane operations in accordance with manufacturer requirements and safe work procedures
Perform work/task 3	**3.1**	Lifts are determined within the RC of the vehicle loading crane in accordance with the load chart/s and lift plan
	3.2	Boom/jib and hook block are safely positioned over the load following directions from associated personnel in accordance with the lift plan and safe work procedures
	3.3	Lifting gear is connected to the load and used safely in accordance with the lift plan, safe work procedures and manufacturer requirements
	3.4	Test lift is carried out in accordance with dogging and safe work procedures
	3.5	Loads are transferred using relevant crane movements and tag lines as required, in accordance with lift plan and safe work procedures
	3.6	Load and crane movement is monitored constantly and crane is operated safely in accordance with lift plan and safe work procedures
	3.7	All required communication signals are correctly interpreted and followed whilst crane is operated in accordance with the lift plan and safe work procedures
	3.8	Load is lowered and landed safely in accordance with lift plan and safe work procedures
	3.9	Lifting gear is disconnected from load and crane is positioned safely and efficiently for next task in accordance with lift plan and safe work procedures

© Commonwealth of Australia, 2025 Skills Insight

4	**Pack up**	**4.1** Crane boom/jib, lifting gear and associated equipment is stowed and secured as required in accordance with manufacturer requirements and safe work procedures
		4.2 Relevant motion locks and brakes are applied as required in accordance with manufacturer requirements and safe work procedures
		4.3 Stabilisers are stowed and secured in accordance with manufacturer requirements and safe work procedures
		4.4 Crane is shut down and secured to prevent unauthorised access/use in accordance with safe work procedures
		4.5 Plates or packing are stowed and secured in accordance with safe work procedures
		4.6 Shut down crane checks are carried out in accordance with safe work procedures and manufacturer requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non -essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC0012 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)

Assessment Requirements for TLILIC0002 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor changes and re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant communication signals from associated personnel
- applying relevant crane movements including:
  - boom/jib up and down (luffing)
  - catching load swing appropriately
  - positioning and using main hook and lifting gear to connect to load safely
  - raise and lower hoist
  - slew boom/jib
  - telescope in and out
- applying relevant mathematical calculations in conjunction with lift plan and load chart to determine radius requirements and relevant lifting gear to perform work/task to enable crane to be configured for load including:
  - boom
  - Stabiliser positioning
  - type of hook
- carrying out operational checks ensuring:
  - all controls are located, identified and tested for functionality
  - all hydraulic functions are operated
  - lifting gear movements and control functions are smooth and comply with lift plan
  - hazard warning systems, safety, audible and visual warning devices are checked for to ensure they are functional including:
    - reversing beepers

© Commonwealth of Australia, 2025 Skills Insight

    - lights
    - horns
  - start-up is in accordance with manufacturer requirements and safe work procedures
  - there are no unusual noises
  - crane control functions comply with operating requirements
- communicating with other associated personnel through using appropriate worksite procedures which including:
  - 2-way radio
  - active listening
  - demonstrating and interpreting hand signals
  - questioning to confirm understanding
  - signage
  - whistles
  - written instructions
- completing the pre-start check including:
  - engine / mechanical fluid level checks as required by manufacturer requirements
  - presence of correct logbook
  - evidence of damage
  - fluid leaks
  - lights work effectively
  - locating, identifying and confirming all controls
  - fire extinguisher
  - safety equipment checks
  - signage and labels to ensure they are visible and legible
  - checking for signs of paint separation and stressed welds indicating potential structural weakness
  - tyres and wheels for damage/wear and correct inflation
  - updating records as required
  - visual damage or equipment faults
- complying with Commonwealth, state and territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation
- conducting and applying risk and hazard assessment strategies including:
  - confirming work area operating surface suitability based on crane and task requirements
  - dynamic loads
  - ground conditions including condition of surface and slopes
  - load swing
  - overloading
  - lifting and placing load
  - tyre pressures and tyre condition

© Commonwealth of Australia, 2025 Skills Insight

  - asymmetric loads
  - overhead hazards including electric lines and service pipes
  - restricted and poorly ventilated areas
  - risk of collision with people, moving plant and fixed structures
  - adequate lighting
  - traffic including pedestrians, vehicles and other plant
  - weather conditions
- confirming and following traffic management plan procedures relevant to their role in the work area
- determining any defects or faults with operation of crane and reporting to relevant person/s
- ensuring risk control measures within the work area are effective as per workplace procedures
- identifying, isolating, and tagging out defective lifting equipment and reporting to authorised person/s
- interpreting and confirming relevant documentation for the work task and relevant area
- maintaining three points of contact whilst accessing load surface area of vehicle loading crane and ensure rungs / steps are free of hazards
- monitoring load disconnection from hook is safe and ensuring no movement of controls
- operating a vehicle loading crane configured to its rated capacity (RC) of 10 metre tonnes or more to lift and move four different loads using the main hook through an obstacle course using all crane operational controls while the load is in full view of the crane operator. Loads must consist of:
  - a load of >50% of the Rated Capacity (RC) of the crane with a boom length of >75%, and
  - a round load with a minimum diameter of 300 mm and minimum length of 3 m that requires a dogger to sling, and
  - an asymmetrical load that requires a dogger to sling, and
  - stillage containing at least ten scaffolding standards or containing a load of steel pipes of equivalent weight that requires a dogger to sling
- positioning the vehicle loading crane for safe operation for:
  - application of the task
  - manoeuvring in the workplace
  - stability of the vehicle loading crane and the load
- positioning vehicle loading crane in relevant area for next task
- recording and maintaining accurate information relating to crane operations
- reporting to relevant person/s on site risk control measures that are not in place or deficient
- setting up and validating an exclusion zone
- shutting down a vehicle loading crane in accordance with manufacturer requirements and safe work procedures
- stabilising a vehicle loading crane for operation by:
  - correctly positioning plates or packing
  - deploying stabilisers
  - establishing correct size plates or packing in accordance with lift plan

© Commonwealth of Australia, 2025 Skills Insight

    - levels are checked
- test-lifting load just clear of lifting plane to allow for checks to be safely made in consultation with associated personnel (dogger or rigger) to ensure:
    - slinging is correct
    - all crane equipment is functioning properly
    - load centre of gravity is correct
    - loads of unusual shape or weight distribution are correctly slung
- using communications signals including:
    - hoist down - hand and whistle and radio
    - hoist up - hand and whistle and radio
    - luff boom down - hand and whistle and radio
    - luff boom up - hand and whistle and radio
    - slew left - hand and whistle and radio
    - slew right - hand and whistle and radio
    - stop - hand and whistle and radio
    - telescope in - hand and whistle and 2-way radio (where manufacturer requirements allow)
    - telescope out - hand and whistle and 2-way radio (where manufacturer requirements allow).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate worksite communication procedures including:
    - listening
    - hand signals
    - questioning techniques
    - signage
    - two-way radios
    - written instructions
    - whistles
- characteristics and impact of factors affecting vehicle loading crane stability whilst moving loads including:
    - overloading
    - poor load placement
    - asymmetric loads
    - tyre deflation/condition
- crane, lifting gear load chart/s and manufacturer requirements
- hazards including:
    - pack up and crane stability, crane tipping and demolition sites

© Commonwealth of Australia, 2025 Skills Insight

    - ground stability including ground condition, recently filled trenches and slopes
    - insufficient lighting
    - obstacles or obstruction
    - other specific hazards and dangerous materials
    - overhead hazards including:
        - electric lines
        - service pipes
        - fixed structures
        - vegetation (trees)
    - traffic including pedestrians, vehicles and other plant
    - operations on unusual, uneven or difficult terrains
- lift impacting factors including:
    - centre of gravity
    - dynamic nature of load
    - flex/deflexion of load
    - length
    - radius of lift
    - weight
- manufacturer requirements on stabiliser procedures
- manufacturer requirements and instructions on shutting down and packing up crane
- mathematical calculations to:
    - estimate loads
    - radius requirements
    - relevant lifting gear to perform work/task
- prestart and operational checks required for a vehicle loading crane
- problems and appropriate response procedures to unplanned and/or unsafe situations and environmental conditions
- relevant documentation requirements and procedures for recording, reporting and maintaining workplace records and information
- relevant workplace instructions, safety information, emergency procedures
- risk assessment management and mitigation strategies including hierarchy of control:
    - elimination
    - substitution
    - isolation
    - engineering controls
    - administrative controls
    - personal protective equipment (PPE)
- roles and responsibilities of duty holders as per legislative obligations of Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) requirements and safe work / workplace procedures
- stability of load and avoidance of hazards using best crane practice including:

© Commonwealth of Australia, 2025 Skills Insight

  - allowing for boom deflection
  - boom/jib as low as possible
  - crane stability
  - gently accelerating and braking on slew/boom to minimise load swing
  - lowering load safely onto appropriate dunnage taking into consideration swing and restrictions of area
  - minimum boom/jib length
  - minimum speed
  - using handheld taglines as required
  - identification of incorrect sling of load
- starting procedure of crane as per manufacturer requirements
- set up of:
  - jib
  - fly jib (where fitted)
- vehicle loading crane characteristics and capabilities to allow crane configuration to suit a range of loads
- weather bureau forecasts and environmental conditions that could impact operation including:
  - lightning
  - wind
  - water impacted ground
  - Ultra Violet (UV) exposure
- work area suitability based on relevant ground reports including:
  - backfilled ground
  - bitumen
  - concrete
  - hard compacted soil
  - pre-contaminated soils
  - rock
  - rough uneven ground
  - soft soils
- workplace standards, requirements, policies and procedures for conducting operations for the vehicle loading crane.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

© Commonwealth of Australia, 2025 Skills Insight

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment that must include access to:

- vehicle loading crane with a RC of 10 metre tonnes or more in safe/serviceable working order in accordance with manufacturers specifications
- appropriate loads as outlined in the performance evidence requirements
- appropriate personnel to sling and direct loads including:
- dogger or rigger
- communications equipment including:
- two-way radios
- whistles
- relevant personal protective equipment (PPE)
- relevant documentation for operating a vehicle loading crane with an RC of 10 metre tonnes or more including:
  - approved codes of practice and relevant guidance material
  - relevant Australian technical standards
  - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable).

TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work/task	**1.1** Task requirements are identified from work orders or equivalent and confirmed with relevant people and site inspection is conducted in accordance with workplace procedures
	1.2 Work area operating surface is assessed to determine suitability for operational use of forklift truck in accordance with workplace procedures
	1.3 Suitability of forklift truck and attachment working load limit (WLL) is determined for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
	1.4 Working area is inspected and appropriate paths for operating the forklift truck and moving and placing load/s in work area are assessed and managed in accordance with workplace procedures
	1.5 Hazard and risk control measures are identified and reported to relevant person/s in accordance with workplace procedures
	1.6 Traffic management plan implementation is confirmed in accordance with workplace procedures
	1.7 Appropriate communication procedures are identified with relevant people in accordance with workplace procedures
	1.8 All work is confirmed to ensure coverage of work/task requirements for the relevant work area is in accordance with workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

2 Prepare for work/task	**2.1**	Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures
	2.2	Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures
	2.3	Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures
	2.4	Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures
	2.5	Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures
	2.6	Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements
	2.7	Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures
	2.8	Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures
	2.9	Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures
3 Perform work/task	**3.1**	Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures

© Commonwealth of Australia, 2025 Skills Insight

	3.2	Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures
	3.3	Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures
	3.4	Unplanned and unsafe situations are responded to in accordance with safe work procedures
	3.5	Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures
	3.6	Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures
4 Pack Up	**4.1**	Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures
	4.2	Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2001 Licence to operate a forklift truck

© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
  - maintaining safe operating speed
  - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
  - battery charge as required by manufacturer requirements
  - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
  - checking for signs of paint separation and stressed welds indicating potential structural weakness
  - document evidence of damage
  - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
  - ensuring availability of correct forklift truck logbook and updating records as required
  - ensuring forklift truck tynes or other attachment/s are securely fitted
  - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
  - fluid leaks
  - lights are working effectively
  - safety equipment checks
  - signage and labels to ensure they are visible and legible
  - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
  - insufficient lighting
  - other specific hazards including dangerous goods
  - overhead hazards and fixed structures, roof beams and doorways
  - restricted and poorly ventilated areas

© Commonwealth of Australia, 2025 Skills Insight

  - surface suitability based on forklift truck and task requirements
  - the risk of collision with people, moving plant and fixed structures
  - weather conditions
- complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
- conducting operational checks, which must ensure:
  - all controls are located, identified and tested for functionality
  - all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
  - hazard warning systems (e.g. reversing beepers, lights and horns) are functional
  - recording and maintaining accurate information relating to forklift truck operations
  - safety devices as fitted
  - start-up is in accordance with manufacturer requirements
  - steering, transmission and brake functions comply with operating requirements
  - there are no unusual noises
- confirming and following traffic management plan procedures relevant to their role in the work area
- conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
- determining relevant lifting attachment to perform work/task
- determining lift requirements including:
  - positioning of unusually balanced/shaped loads
  - centre of gravity
  - dynamic nature of load
  - tyne/attachment positioning
  - weight
- ensuring risk control measures within the work area are effective as per workplace procedures
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various environmental conditions
- maintaining communication with other workplace personnel through using worksite procedures including:
  - audible and visual warning devices
  - signage
  - two-way radio
  - verbal instructions
  - written instructions
- maintaining three points of contact whilst accessing and egressing forklift truck and ensuring

© Commonwealth of Australia, 2025 Skills Insight

rungs / steps are free of hazards
- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
  - aligning tynes/attachment to load
  - carrying out a lift to 75% of the maximum height
  - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
  - correctly using horns and mirrors in workplace
  - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
  - driving applicable to conditions and moving loads safely
  - driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
    - an 'S' bend with a minimum 90 degrees left and right turn
    - ensuring load/s remains stable through pick up, transport and placement
    - forklift truck speed is appropriate to load and surroundings
    - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
  - tilting mast (or forks if applicable) to ensure balance of load
  - using gluts/dunnage appropriately and lowering load safely
  - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
- reporting to relevant person/s on site risk control measures that are not in place or are deficient
- setting up an exclusion zone
- securely parking forklift truck and isolating in appropriate position including:
  - minimising possible access by unauthorised person/s
  - tynes/attachment lowered to required position in accordance with manufacturer requirements
  - park brake applied
  - switching off, isolating fuel/power source and removing key according to workplace procedures
- shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
- communication procedures including:
  - audible and visual warning devices
  - hand signals
  - questioning techniques
  - signage
  - traffic warning systems
  - two-way radio
  - written instructions
- forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
- impact of the following on the operation of the forklift truck including:
  - failure/loss of control including brakes and steering
  - failure of equipment during forklift truck operations
  - forklift truck instability causes including:
    - deterioration of ground condition
    - overloading
    - pick up and placement of load
    - irregular loads
  - operating on ramps and uneven surfaces and in restricted spaces
  - use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
    - labels on the actual load
    - markings on the actual load
    - paperwork such as consignment notes, running sheets and weighbridge dockets
    - weighing a carton and calculating load
- manufacturer requirements, instructions and operator's manual
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
  - wind
  - lightning
  - water/ice impacted surface/ground
  - rain
  - extreme heat
  - Ultra violet (UV) exposure
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
  - lock out and tag out procedures
- relevant procedures for refuelling and recharging forklift truck using appropriate PPE

© Commonwealth of Australia, 2025 Skills Insight

including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling

- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
  - bale clamps
  - carpet spike for carpet rolls
  - drum carrier
  - jib attachment
  - paper roll clamps
  - personnel work platforms
  - rotators
  - slippers/fork extensions on tynes
- suitability and lifting capability of the attachment to be used
- shut down procedures for a forklift truck in accordance with manufacturer requirements
- traffic management plan procedures and requirements
- typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
- workplace procedures including work plan which may be verbal, documented/written, or electronically generated
- work area operating surface suitability including issues with:
  - backfilled ground
  - bitumen (damaged, cracked)
  - concrete (damaged, cracked)
  - hard compacted soil
  - potholes
  - railway tracks
  - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
  - soft soils
  - trench covers
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety

and Health (OSH) requirements, safe work and workplace procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
  - approved codes of practice and relevant guidance material
  - relevant Australian technical standards
  - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

TLILIC2014 Licence to drive a light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to obtain a licence to drive a light rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of light rigid vehicles include:

- a rigid truck above 4.5 tonnes GVM but less than or equal to 8 tonnes GVM or
- a rigid bus with less than or equal to 8 tonnes GVM or seats more than 12 adults, including the driver.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

This unit applies to driving that is carried out in accordance with relevant state/territory driver licensing authority licence requirements and regulations for light rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and to operate a light rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Light Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Light Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm other eligibility requirements before undertaking training and/or assessment.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Drive a light rigid vehicle	1.1 Light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations, manufacturer instructions and relevant vehicle handling procedures
	1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage
	1.3 Braking system of light rigid vehicle is managed and operated efficiently to ensure effective control of vehicle under all conditions
	1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.5 Light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
	1.6 Light rigid vehicle is parked, shutdown and safely secured in accordance with traffic regulations
	1.7 Load is safely and effectively restrained
2 Monitor traffic and road conditions	2.1 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
	2.2 Interaction with other road users is conducted courteously in accordance with road rules to ensure safe and efficient traffic flow
3 Monitor and	3.1 Vehicle performance is maintained through pre-operational

© Commonwealth of Australia, 2025 Skills Insight

maintain vehicle performance		inspections and vehicle checks
	3.2	Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2014B Licence to drive a light rigid vehicle.

Assessment Requirements for TLILIC2014 Licence to drive a light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- anticipating and monitoring traffic hazards and taking appropriate action
- applying precautions and required action to eliminate, minimise or control identified hazards
- applying relevant procedures that reflect legislative requirements
- carrying out pre-operational vehicle checks including:
  - checking and topping up fluid levels
  - checking:
    - brakes
    - operation of vehicle lights and indicators
    - tyre pressures
  - visually checking vehicle
- communicating effectively with others
- handling vehicle including:
  - accelerating and braking
  - managing engine performance
  - operating vehicle controls, instruments and indicators
  - positioning and stopping a vehicle
  - reversing a vehicle
  - starting a vehicle
  - steering and manoeuvring a vehicle
  - using defensive driving techniques
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
- reading and interpreting relevant instructions, procedures, information and signs.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- light rigid vehicle controls, instruments and indicators, and their use
- light rigid vehicle handling procedures
- pre-operational checks carried out on vehicle and related action
- relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit, in accordance with licensing authority requirements

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Assessment must occur in the following traffic and road conditions:

- on open and/or private roads with moderate inclines and declines
- typical weather conditions.

and may also include traffic and road conditions at a depot, base or warehouse.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- appropriate range of relevant on-road operational or workplace situations
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLILIC2015 Licence to drive a medium rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to obtain a licence to drive a medium rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of medium rigid vehicles include:

- two axle rigid trucks, not being a prime mover, above 8 tonnes GVM or
- a two axle bus above 8 tonnes GVM.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

This unit applies to driving that is carried out in accordance with relevant state/territory driver licensing authority licence requirements and regulations for medium rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and to operate a medium rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Medium Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Medium Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm other eligibility requirements before undertaking training and/or assessment.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Drive a medium rigid vehicle	1.1 Medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations, manufacturer instructions and relevant vehicle handling procedures
	1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage
	1.3 Braking system of medium rigid vehicle is managed and operated efficiently to ensure effective control of vehicle under all conditions
	1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.5 Medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
	1.6 Medium rigid vehicle is parked, shutdown and safely secured according to traffic regulations
	1.7 Load is safely and effectively restrained
2 Monitor traffic and road conditions	2.1 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
	2.2 Interaction with other road users is conducted courteously in accordance with road rules to ensure safe and efficient traffic flow
3 Monitor and	3.1 Vehicle performance is maintained through pre-operational

© Commonwealth of Australia, 2025 Skills Insight

maintain vehicle performance		inspections and vehicle checks
	3.2	Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2015B Licence to drive a medium rigid vehicle.

Assessment Requirements for TLILIC2015 Licence to drive a medium rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- anticipating and monitoring traffic hazards and taking appropriate action
- applying precautions and required action to eliminate, minimise or control identified hazards
- applying relevant procedures that reflect legislative requirements
- carrying out pre-operational vehicle checks including:
  - checking and topping up fluid levels
  - checking:
    - brakes
    - operation of vehicle lights and indicators
    - tyre pressures
  - visually checking vehicle
- communicating effectively with others
- handling vehicle including:
  - accelerating and braking
  - managing engine performance
  - operating vehicle controls, instruments and indicators
  - positioning and stopping a vehicle
  - reversing a vehicle
  - starting a vehicle
  - steering and manoeuvring a vehicle
  - using defensive driving techniques
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
- reading and interpreting relevant instructions, procedures, information and signs.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- medium rigid vehicle controls, instruments and indicators, and their use
- medium rigid vehicle handling procedures
- pre-operational checks carried out on vehicle and related action
- relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit, in accordance with licensing authority requirements.

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Assessment must occur in the following traffic and road conditions:

- on open and/or private roads with moderate inclines and declines
- typical weather conditions.

and may also include traffic and road conditions at a depot, base or warehouse.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- appropriate range of relevant on-road operational or workplace situations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Analyse supply requirements	1.1 Purpose and specifications of required goods/services are identified
	1.2 Criteria to evaluate potential or existing contractor performance is established
	1.3 Quantities of required goods/services are determined
	1.4 Frequency of ordering/requesting of goods/services is identified
2 Evaluate potential contractors	2.1 Contractors of requested goods/materials/services are identified
	2.2 Comparative costings for goods/materials/services are obtained
	2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed
	2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures
	2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service
	2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors
	2.7 Information and data generated during selection process is filed and maintained in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

© Commonwealth of Australia, 2025 Skills Insight

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services, and evaluating potential supply contractors.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to administer inventory systems. It includes identifying inventory systems, tracking inventory, planning and administering inventory systems and completing inventory audits and reports.

Inventory is defined as the quantity of goods owned and stored by an organisation that is intended either for resale or is raw materials and components used in producing goods that are then sold.

Inventory systems provide visibility and integration in the supply chain and they are used to record transactions associated with receiving, reducing or writing inventory off. An inventory system can include desktop software, barcode scanners, barcode labels, mobile devices and applications.

The unit is applicable to those with responsibilities for inventory systems within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing and managing stock quality including analysing discrepancies, out of specification and redirection opportunities
- categorising and labelling stock
- checking inventory specifications
- ensuring handling, sorting, disposal and recycling of stock is performed
- following organisational inventory policies and procedures
- identifying inventory characteristics
- maintaining and managing optimum stock levels
- meeting inventory system documentation requirements
- monitoring stock security
- reading and interpreting information and data related to inventory systems
- recording and maintaining inventory information
- undertaking quality control
- using the inventory system including inventory software and applications
- utilising Vendor Managed Inventory (VMI) systems
- validating third party inventory control operations.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- features of inventory systems
- financial implications of inventory management
- inventory documentation and reporting requirements including those for discrepancies, out of specification and redirection opportunities
- inventory loss and damage control
- inventory policies and procedures
- inventory tracking and security
- layout of inventory storage areas

© Commonwealth of Australia, 2025 Skills Insight

- maintenance and monitoring of stock quality and levels
- methods for categorising and labelling inventory
- principles of inventory management
- principles of quality control
- reorder cycles
- storage conditions for the maintenance of inventory including product life cycles, maximising use, rotation and replenishment requirements
- third party inventory control operations
- types of inventory systems
- valuation methods for different inventory items
- Vendor Managed Inventory (VMI) systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
  - inventory systems and stock control equipment and tools
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to maintain stock control and receivals. It includes establishing supply arrangements, monitoring and maintaining stock, processing receivals and storing stock, determining stock wastage and discrepancies and performing stock audits and reporting.

Stock control involves the monitoring and managing of an organisation's stock. It applies to all stock at every stage of the production process from purchasing and delivery to using and reordering stock.

Receivals is the function of checking items delivered as new stock or supplies. It requires the inspection of goods and materials for quality, condition and quantity and the allocating of space in the storage facility or warehouse.

The unit is applicable to those with responsibilities for stock control and/or receivals within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing stock loss, wastage, excesses and discrepancies
- completing stock orders and receivals within established timelines
- disposing of stock safely including hazardous substances
- forecasting stock and receivals using approved methods and tools
- identifying supply sources for different types of products
- identifying third party inventory control operations
- implementing cost effective stock purchasing and control systems
- maintaining stock and receival data and records
- monitoring optimal safety stock placement and service level optimisation
- monitoring stock control systems, stock quality and cost effectiveness of supplies
- performing stock audits
- producing stock control reports
- receiving, storing, monitoring and maintaining stock levels over life cycle periods
- undertaking supplier and customer relationship management
- utilising stock handling, receivals and data collection technologies
- working with continuity plan and stock control and receival policies and procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- continuity plans
- contractual and preferred supplier arrangements
- disposal methods for stock and waste including hazardous substances
- stock control and receivals policies and procedures
- principles of stock control including:
    - approaches to calculating stock levels and replenishment requirements
    - factors that may influence purchase specifications

© Commonwealth of Australia, 2025 Skills Insight

    - forecasting methods for calculating inventory consumption
- methods and tools for calculating cost effective stock quantities including
    - methods of stock control including FIFO (First In, First Out) and LIFO (Last In, First Out)
    - standard measures and formulas for yield testing
    - stock control systems including bin card system, imprest system, integrated point of sale system and ledger systems
- product life and storage requirements for specific stock
- real time information using stock data technologies
- report requirements on stock loss, wastage, excesses and discrepancies
- safe manual handling techniques
- safe stock placement and service level optimisation
- security measures for stock including storage and tracking
- stock control audits
- stock ordering and delivery processes
- stock quality control
- stock reorder cycles for standard business periods, peak seasons and special events
- supplier and customer relationship management
- supply sources for different types of products
- types of computerised stock control systems, their functions and features.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
    - access to suppliers with whom the learner can interact, commercial purchase specifications, stock control procedures and reports and costs and contractual documentation used for the purchase of stock
    - stock control software systems and applications
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

FWPSS00001 Skill set for forest and wood product innovation for leaders

Modification History

FWP R1

Generic unit BSBINN801A Lead innovative thinking and practice replaced by equivalent forest industry-specific unit in new standard format. Skill set code change from FPI to FWP.

FPI11 V2

Primary release with FPI11 Training Package V2.

Description

This skill set provides the skills and knowledge required by leaders to drive innovative practice and thinking to build a culture within the industry that enables new and emerging business opportunities.

Pathways Information

Pathway	These units provide credit towards FWP60116 Advanced Diploma of Forest Industry Sustainability

Licensing/Regulatory Information

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Skill Set Requirements

Units	FWPCOT5207 Implement sustainability in the workplace
	FWPCOT8101 Lead forest and wood products industry innovative thinking and practice
	BSBINN501 Establish systems that support innovation
	BSBINN502 Build and sustain an innovative work environment

FWPSS00002 Skill set for forest and wood product innovation for managers

Modification History

FWP R1

Generic unit BSBMGT608C Manage innovation and continuous improvement replaced by forest industry-specific units in new standard format

Skill set code change from FPI to FWP

FPI11 V2

Primary release with FPI11 Training Package V2.

Description

This skill set provides the skills and knowledge required to develop and implement strategic initiatives and foster continuous improvement within an organisation.

Pathways Information

Pathway	These units provide credit towards FWP60116 Advanced Diploma of Forest Industry Sustainability

Licensing/Regulatory Information

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Skill Set Requirements

Units	FWPCOT5207 Implement sustainability in the workplace
	FWPCOT6208 Manage innovative thinking and practice in the forest and wood products industry
	BSBMGT616 Develop and implement strategic plans

© Commonwealth of Australia, 2025 Skills Insight

Target Group

Target group	The skill set is targeted at managers responsible for the implementation of strategic initiatives within enterprises.

Suggested words for Statement of Attainment

FWPSS00014 Skill set for a heavy production mobile chipper operator

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2.3 to FWP Release 2.0.

FPI11 V2.3

Superseded unit updated:

- HLTAID003 replaces HLTFA311A

FPI11 V2

Superseded units updated:

- HLTFA311A replaces HLTFA301C
- FPIHAR3215C replaces FPIHAR3215B

Pathway qualification code updated to reflect changes made in FPI11 V2.

FPI11 V1

Skill set code updated to FPI11 to reflect Training Package update from FPI05 V3 to FPI11 V1.

Description

This skill set is for people wishing to work as a heavy production mobile chipper operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Pathways Information

These units provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

In a number of jurisdictions some of these units are required for the issuing of a timber harvesting operator's licence as a heavy production mobile chipper operator.

© Commonwealth of Australia, 2025 Skills Insight

Skill Set Requirements

FWPCOR2203 Follow environmental care procedures

FWPCOR2205 Follow WHS policies and procedures

HLTAID003 Provide first aid

FWPHAR3215 Operate a heavy production mobile chipper

Target Group

This skill set is for people wishing to work as a heavy production mobile chipper operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

FWPSS00016 Skill set for a mechanical processor operator

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0. It supersedes and is equivalent to FWPSS00016 Skill set for a mechanical processor operator (Release 1). It was updated to reflect one revised unit of competency: FWPHAR3210
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Description

This skill set is designed to meet industry requirements for activities related to mechanical processor operations in a commercial forest harvesting environment or the harvesting and haulage sector of the forest and wood products industry.

^ From 1 July 2022 the unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

These units of competency provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3210 Operate mechanical processor operations
- HLTAID003 Provide first aid

© Commonwealth of Australia, 2025 Skills Insight

- **^ HLTAID011 Provide First Aid (must be delivered from 1 July 2022)**

Target Group

This skill set is for people wishing to work as a mechanical processor operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a mechanical processor in a commercial forest harvesting environment.

FWPSS00025 Skill set for carbon accounting

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2 to FWP Release 2.0.

FPI11 V2

Primary release with FPI11 Training Package V2

Description

This skill set provides the specialised skills and knowledge required to design plantations, develop a tree inventory, and undertake carbon storage sampling.

Pathways Information

These units provide credit towards a number of qualifications, including FWP60114 Advanced Diploma of Forest Industry Sustainability

Licensing/Regulatory Information

To be registered as an auditor, candidates need to meet the requirements of the National Greenhouse and Energy Reporting (NGER) guidelines as set out in the National Greenhouse and Energy Reporting Act 2007.

Further information is available at www.cleanenergyregulator.gov.au

Skill Set Requirements

FWPGM4203 Design plantations

FWPGM5219 Undertake carbon stock sampling of forests and plantations

FWPGM6203 Manage sustainable tree inventory

Target Group

The skill set is targeted at enterprises and individuals who are providing services to landowners undertaking, or wishing to undertake, farm forestry projects.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements to design plantations, develop a tree inventory, and undertake carbon stock sampling.

FWPSS00026 Skill set for a forestry log truck driver

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2 to FWP Release 2.0.

FPI11 V2

Primary release with FPI11 Training Package V2

Description

Not applicable.

Pathways Information

This skill set provides credit towards a number of qualifications, including FWP30216 Certificate III in Harvesting and Haulage, which allows for specialisation for the role of log truck driver.

Licensing/Regulatory Information

This skill set provides credit towards a number of qualifications, including FWP30216 Certificate III in Harvesting and Haulage, which allows for specialisation for the role of log truck driver.

Skill Set Requirements

FWPCOR2203 Follow environmental care procedures

FWPCOR2205 Follow WHS policies and procedures

FWPCOT3261 Transport forestry logs using trucks

Target Group

This skill set is for people wishing to work as a log truck driver in commercial forest operations in the harvesting and haulage sector of the forest and wood products industry.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for driving a log truck, as well as knowing the workplace procedures for loading and unloading log trucks. They may meet state and territory licensing requirements for driving heavy vehicles that transport forestry logs, depending on individual state requirements.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00027 Skill set for a forestry produce truck driver

Modification History

FWP Release 2.0

Skill set code and unit requirements updated to reflect Training Package update from FPI11 V2 to FWP Release 2.0.

FPI11 V2

Primary release with FPI11 Training Package V2

Description

Not applicable.

Pathways Information

This skill set provides credit towards a number of qualifications, including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

In a number of jurisdictions, some of the units in this skill set are required for the issuing of licences to drive heavy vehicles, which include vehicles required to transport forestry produce from a forestry harvesting site.

Skill Set Requirements

FWPCOR2203 Follow environmental care procedures

FWPCOR2205 Follow WHS policies and procedures

FWPCOT3262 Transport forestry produce using trucks

Target Group

This skill set is for people wishing to work as a truck driver transporting forestry produce (apart from forestry logs) in commercial forest operations in the harvesting and haulage sector of the forest and wood products industry.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for driving a heavy vehicle used for the transport of forestry produce. They may meet state and territory licensing requirements for driving heavy vehicles that transport forestry produce, depending on individual state requirements.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00028 Skill set for a finger jointing plant operator

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Description

This skill set reflects the role of a finger jointing plant operator.

Pathways Information

These units of competency provide credit towards a number of qualifications, including:

- FWP30316 Certificate III in Sawmilling and Processing
- FWP30516 Certificate III in Timber Manufactured Products
- FWP31119 Certificate III in Wood Machining

Licensing/Regulatory Information

General workplace legislative and regulatory requirements apply to the units in this skill set; however there are no specific licensing or certification requirements at the time of publication.

Skill Set Requirements

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details. All prerequisite units are included in the skill set.

- FWPCOT2209 Produce finger jointed timber
- FWPCOT3280 Replace saw blades, knives and guides
- FWPCOT3294 Set up, operate and maintain finger jointing machines
- MEM13015 Work safely and effectively in manufacturing and engineering
- MEM16006* Organise and communicate information
- MEM18011* Shut down and isolate machines/equipment

© Commonwealth of Australia, 2025 Skills Insight

Prerequisite requirements

Unit of competency	Prerequisite requirement
MEM16006 Organise and communicate information	MEM13015 Work safely and effectively in manufacturing and engineering
MEM18011* Shut down and isolate machines/equipment	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information

Target Group

This skill set is for people who set up, operate and maintain finger jointing operations in a forest and wood products factory setting. Their job role will involve planning production parameters, maintaining and replacing equipment, resolving problems, shutting down and isolating equipment as required to produce finger jointed timber to required specifications.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products and MEM Metal and Engineering Training Packages* meet the industry requirements for setting up, operating and maintaining finger jointing operations to produce finger jointed timber according to established production parameters.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00029 Skill set for a finger jointing moulder operator

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0. Updated codes and titles.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0. Updated units of competency.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Description

This skill set reflects the job role of wood machinists who dress, profile, finger joint and assess timber against specifications in a sawmill environment.

Pathways Information

These units of competency provide credit towards a number of qualifications including:

- FWP30316 Certificate III in Sawmilling and Processing
- FWP30516 Certificate III in Timber Manufactured Products
- FWP31119 Certificate III in Wood Machining

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR3204 Visually assess materials
- FWPCOT3272 Set up and run multi-head moulder/planer to produce simple profiles
- FWPCOT3273 Set up and run multi-head moulder to produce complex profiles
- FWPCOT3295 Assess and maintain cutter performance

Target Group

This skill set is for people who assess and maintain cutter performance and run multi-headed machines in a timber manufacturing facility that produces finger jointed timber.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package* meet the industry requirements for planning and evaluating dressing conditions and processes to set, adjust and maintain cutters and equipment for finger jointed timber. The competencies also meet industry requirements to inspect and test moulding and planing machines and other associated equipment for moulder operators producing finger jointed timber.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00030 Skill set for a finger jointing grader operator

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 6.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 5.0. Updated codes and titles.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Description

This skill set reflects the role to grade, sort and mark timber materials in a finger-jointing operation.

Pathways Information

These units of competency provide credit towards a number of qualifications, including:

- FWP30316 Certificate III in Sawmilling and Processing
- FWP30516 Certificate III in Timber Manufactured Products

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR3204 Visually assess materials
- FWPCOT2260 Tally material
- FWPCOT3284 Grade, sort and mark timber materials

Target Group

This skill set is for people who grade, sort and mark timber materials in a forest and wood products factory setting that produces finger jointed timber.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package* meet the industry requirements to visually evaluate material characteristics and features for classification into various strength or appearance grades suitable for the production of finger jointed timber.

© Commonwealth of Australia, 2025 Skills Insight

Description

Not applicable.

Pathways Information

These units provide credit towards a number of qualifications including:

FWP30316 Certificate III in Sawmilling and Processing

FWP30516 Certificate III in Timber Manufactured Products

Licensing/Regulatory Information

General workplace legislative and regulatory requirements apply to the units in this skill set; however there are no specific licensing or certification requirements at the time of publication.

Skill Set Requirements

FWPCOR3202 Conduct quality and product care procedures

FWPCOR3204 Visually assess materials

FWPCOT3208 Test strength of joints

Target Group

This skill set is for people who conduct quality and product care procedures and test strength of joints for finger jointed timber in a forest and wood products factory setting.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

This skill set is for people who conduct quality and product care procedures and test strength of joints for finger jointed timber in a forest and wood products factory setting.

FWPSS00032 Skill set for a crawler tractor operator

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0. It supersedes and is not equivalent to FWPSS00011 - Skill set for a crawler/dozer operator (Release 1). It was updated to include one improved unit of competency: FWPHAR3224 replaces FWPHAR3216

Description

This skill set is designed to meet industry requirements for activities related to crawler tractor operations in a commercial forest harvesting environment or the harvesting and haulage sector of the forest and wood products industry.

^ From 1 July 2022 the unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

These units of competency provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3224 Operate crawler tractor
- HLTAID003 Provide first aid
- **^ HLTAID011 Provide First Aid (must be delivered from 1 July 2022)**

© Commonwealth of Australia, 2025 Skills Insight

Target Group

This skill set is for people wishing to work as a crawler tractor operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a crawler tractor in a commercial forest harvesting environment.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00033 Skill set for a feller buncher operator

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0. It supersedes and is not equivalent to FWPSS00012 Skill set for a feller buncher operator (Release 1). It was updated to include one improved unit of competency: FWPHAR3226 replaces FWPHAR3207

Description

This skill set is designed to meet industry requirements for activities related to feller buncher operations in a commercial forest harvesting environment or the harvesting and haulage sector of the forest and wood products industry.

^ From 1 July 2022 the unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

These units of competency provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3226 Operate feller buncher

© Commonwealth of Australia, 2025 Skills Insight

- HLTAID003 Provide first aid
- **^ HLTAID011 Provide First Aid (must be delivered from 1 July 2022)**

Target Group

This skill set is for people wishing to work as a feller buncher operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a feller buncher in a commercial forest harvesting environment.

FWPSS00034 Skill set for a forwarder operator

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0. It supersedes and is not equivalent to FWPSS00013 Skill set for a forwarder operator (Release 1). It was updated to include one improved unit of competency: FWPHAR3227 replaces FWPHAR3206

Description

This skill set is designed to meet industry requirements for activities related to forwarder operations in a commercial forest harvesting environment or the harvesting and haulage sector of the forest and wood products industry.

^ From 1 July 2022 the unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

These units of competency provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3227 Operate forwarder
- HLTAID003 Provide first aid
- **^ HLTAID011 Provide First Aid (must be delivered from 1 July 2022)**

© Commonwealth of Australia, 2025 Skills Insight

Target Group

This skill set is for people wishing to work as a forwarder operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a forwarder in a commercial forest harvesting environment.

FWPSS00035 Skill set for a loader operator

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0. It supersedes and is not equivalent to FWPSS00015 Skill set for a loader operator (Release 1). It was updated to include one improved unit of competency: FWPHAR3228 replaces FWPHAR3218

Description

This skill set is designed to meet industry requirements for activities related to loader operations in a commercial forest harvesting environment or the harvesting and haulage sector of the forest and wood products industry.

^ From 1 July 2022 the unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

These units of competency provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3228 Operate loader
- HLTAID003 Provide first aid
- **^ HLTAID011 Provide First Aid (must be delivered from 1 July 2022)**

© Commonwealth of Australia, 2025 Skills Insight

Target Group

This skill set is for people wishing to work as a loader operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a loader in a commercial forest harvesting environment.

FWPSS00036 Skill set for a single grip harvester operator

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0. It supersedes and is not equivalent to FWPSS00019 Skill set for a single grip harvester operator (Release 1). It was updated to include one improved unit of competency: FWPHAR3229 replaces FWPHAR3214

Description

This skill set is designed to meet industry requirements for activities related to single grip harvester operations in a commercial forest harvesting environment or the harvesting and haulage sector of the forest and wood products industry.

^ From 1 July 2022 the unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

These units of competency provide credit towards a number of qualifications including FWP30216 Certificate III in Harvesting and Haulage.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3229 Operate single grip harvester
- HLTAID003 Provide first aid
- **^ HLTAID011 Provide First Aid (must be delivered from 1 July 2022)**

© Commonwealth of Australia, 2025 Skills Insight

Target Group

This skill set is for people wishing to work as a single gip harvester operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a single grip harvester in a commercial forest harvesting environment.

FWPSS00039 Skill Set for Hydraulic Maintenance of Saw Technology

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Description

This skill set reflects the roles of Saw Technicians to inspect, test, maintain and troubleshoot advanced hydraulic systems and components on sawing machine centres.

Pathways Information

These units of competency may provide credit towards FWP31019 Certificate III in Saw Technology. They may also provide pathways to higher level technical qualifications or opportunities to transition into related manufacturing and engineering areas.

Licensing/Regulatory Information

No licensing or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details. All prerequisite units are included in the skill set.

- MEM09002* Interpret technical drawing
- MEM11011* Undertake manual handling
- MEM12023* Perform engineering measurements
- MEM12024* Perform computations
- MEM13003* Work safely with industrial chemicals and materials
- MEM13015 Work safely and effectively in manufacturing and engineering
- MEM14006* Plan work activities
- MEM16006* Organise and communicate information
- MEM18001* Use hand tools
- MEM18002* Use power tools/hand held operations

© Commonwealth of Australia, 2025 Skills Insight

- MEM18003* Use tools for precision work
- MEM18006* Perform precision fitting of engineering components
- MEM18020* Maintain hydraulic system components
- MEM18021* Maintain hydraulic systems
- MEM18055* Dismantle, replace and assemble engineering components
- MEM18071* Connect and disconnect fluid conveying system components

Prerequisite requirements

Unit of competency	Prerequisite requirement
MEM09002 Interpret technical drawing	MEM12023 Perform engineering measurements MEM12024 Perform computations MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information

FWPSS00041 Cutting Timber to Length and Angle Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to cut timber to specified lengths and angles for use in the fabrication of timber wall frames and/or floor or roof trusses. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT3226 Assess timber for manufacturing potential
- FWPCOT3234 Cut material using CNC sizing machines
- FWPTMM2205 Cut material to length and angles
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for entry level fabricators working in the timber frame and truss manufacturing industry.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package* and the *TLI Transport and Logistics Training Package* meet the industry requirements for cutting timber for the fabrication of timber frames and trusses.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00042 Timber Wall Frame Manufacture Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to assemble timber wall frames. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment, assess timber and apply information from fabrication plans to the assembly of timber wall frames.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- CPCCOM1015 Carry out measurements and calculations
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2257 Use hand-held tools
- FWPCOT3226 Assess timber for manufacturing potential
- FWPCOT3308 Assemble timber wall frames
- FWPTMM3213 Read and interpret timber truss or wall frame fabrication plans
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who assemble timber wall frames.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package, TLI Transport and Logistics Training Package* **and** *the CPC Construction, Plumbing and Services Training Package* meet the industry requirements for assembling timber wall frames.

© Commonwealth of Australia, 2025 Skills Insight

FWPSS00043 Timber Roof Truss Manufacture Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to assemble timber roof trusses. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment, assess timber and apply information from fabrication plans to the assembly of timber roof trusses.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- CPCCOM1015 Carry out measurements and calculations
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2257 Use hand-held tools
- FWPCOT3226 Assess timber for manufacturing potential
- FWPCOT3309 Assemble timber roof trusses
- FWPTMM3213 Read and interpret timber truss or wall frame fabrication plans
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who assemble timber roof trusses.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package, TLI Transport and Logistics Training Package* and *the CPC Construction, Plumbing and Services Training Package* meet the industry requirements for assembling timber roof trusses.

FWPSS00044 Timber Floor Truss Manufacture Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to assemble timber floor trusses. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment, assess timber and apply information from fabrication plans to the assembly of timber floor trusses.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Truss or Frame Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- CPCCOM1015 Carry out measurements and calculations
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2257 Use hand-held tools
- FWPCOT3226 Assess timber for manufacturing potential
- FWPTMM3213 Read and interpret timber truss or wall frame fabrication plans
- FWPTMM3214 Assemble timber floor trusses
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who assemble timber floor trusses.

© Commonwealth of Australia, 2025 Skills Insight

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package, TLI Transport and Logistics Training Package* and *the CPC Construction, Plumbing and Services Training Package* meet the industry requirements for assembling timber floor trusses.

FWPSS00045 Stacking and Storing Timber Frames and Trusses Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to stack and store assembled timber wall frames and/or roof or floor trusses. It also includes applying knowledge and skills to work and handle materials safely in a manufacturing environment.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2206 Stack and bind material
- FWPCOT2255 Store materials
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who stack and store assembled frames and trusses for dispatch.
