Assessment Requirements for FWPSAW3232 Sharpen band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- sharpened one or more of the following types of saw blades:
 - narrow band saw blade
 - wide band saw blade
- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed the cutting performance of the blade, taking into account:
 - saw performance balanced against achievement of required production time
 - degree of deviation in the range of sawn products
- assessed the condition of blade teeth for:
 - sharpness of each tooth
 - damage to teeth
 - straightness of teeth
 - kerf width
- set up the sharpening machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade

- heat removal
- sawtooth configuration
- purpose, features and operation of band saws for which blades are sharpened
- features and names of different parts of band saw blades
- purpose, features and operation of tools and equipment used to sharpen band saw blades:
 - sharpening machines
 - grinding wheels
- importance of sharpening and setting teeth and tension to match requirements for:
 - characteristics of various materials sawn
 - speed of the sawing process
 - direction of the sawing process
 - hook/rake angles for sawing
 - saw blade specifications
- methods for:
 - assessing saw blade condition
 - sharpening blades to specified requirements
 - grinding teeth to a specified profile
 - tensioning blades to specified requirements
 - aligning saw teeth
- tooth pitch and tooth angles at which blades are sharpened (blade geometry)
- range of speeds at which abrasive wheels can be operated without damaging blades
- coolants used in the sharpening process, and impact on efficient sharpening
- types of risk and hazards, and mitigation measures associated with sharpening band saw blades
- workplace policies and procedures specific to sharpening band saw blades:
 - workplace health and safety, with particular emphasis on use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in sawmills:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, a sawmill or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - sharpening machines
 - grinding wheels
 - grinding coolant where applicable
 - band saws for which blades are to be sharpened
 - one or more of the following types of band saw blades to be sharpened: wide band saw blades used for processing timber products, narrow band saw blades used for cutting both ferrous and non-ferrous materials
 - PPE suitable for sharpening band saw blades
- specifications:
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for sharpening band saw blades
 - template documents for recording equipment faults and maintenance requirements
 - workplace procedures for sharpening band saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3233 Sharpen circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess and sharpen circular saw blades with an automatic or manually controlled grinder.

The unit applies to individuals who sharpen circular saw blades used in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	<p>1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel</p> <p>1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>handling techniques</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with sharpening circular saw blades</p> <p>1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency</p> <p>1.5 Select appropriate equipment for grinding, and check for safety and operational effectiveness according to manufacturer specifications</p>
2. Assess saw blade condition and set up the grinder	<p>2.1 Remove and replace saw blades from sawing equipment</p> <p>2.2 Assess cutting performance of the blade and determine the need to replace or sharpen</p> <p>2.3 Assess prior repairs and condition of teeth, set and straightness of blade</p> <p>2.4 Select grinding machine with suitable wheel characteristics, diameter and thickness and dress and profile wheel to match saw blade profile requirements</p> <p>2.5 Adjust grinding machine settings to suit required tooth profile geometry, blade set or kerf, blade thickness and diameter to manufacturer recommendations</p> <p>2.6 Set up saw blade in the grinder with appropriate attachments for tooth pitch</p>
3. Sharpen circular saw blade	<p>3.1 Grind saw blade body before sharpening the tooth to maintain clearance</p> <p>3.2 Grind tooth profiles to achieve required sharpness, surface finish and back clearance angle</p> <p>3.3 Maintain tooth profile to industry standards</p> <p>3.4 Keep variations in tooth height within industry or manufacturer tolerances for concentricity</p> <p>3.5 Control wheel and saw hand feeds to minimise wear, avoid burn marks and maintain smooth surface finish</p> <p>3.6 Identify damaged and exhausted circular saw blades and dispose of these according to workplace procedures and environmental protection practices</p> <p>3.7 Clean the work area and equipment</p> <p>3.8 Identify and record routine processing and equipment faults, and</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	resolve or report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Performs precise mathematical calculations to determine correct specifications for grinding teeth to angle, pitch, tooth height and gullet depth Uses basic mathematical symbols and conventions in completing routine workplace reports

Assessment Requirements for FWPSAW3233 Sharpen circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- set up and operated a manually controlled grinder to sharpen one or both of the following types of circular saw blades:
 - circular crosscut blades
 - rip saw blades.

In doing the above job, the individual has:

- reviewed work order to determine job requirements
- followed relevant workplace health and safety and environmental protection procedures
- removed and replaced circular saw blades from the sawing equipment
- assessed cutting performance and determined need to replace or sharpen blades
- assessed condition of blade teeth, including:
 - sharpness of tooth cutting edges
 - angles within the tooth profile
 - tooth strength
 - damage to teeth
 - pitch
 - gullet depth
- sharpened circular saw blades according to workplace procedures
- cleaned work area and equipment
- identified routine processing and equipment faults, and resolved or reported to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade
 - heat removal
 - sawtooth configuration
- purpose, features and operation of saws for which circular saw blades are sharpened
- features and names of different parts of circular saw blades
- purpose, features and operation of tools and equipment used to sharpen circular saw blades:
 - gulleting and grinding machines
 - machine attachments
 - abrasive wheels
 - hand-held tools
- importance of sharpening and setting teeth and tension to match requirements for:
 - characteristics of various materials sawn
 - speed of the sawing process
 - direction of the sawing process
 - cutting angle for sawing
 - saw blade specifications
- methods for:
 - removing saw blades from equipment
 - assessing saw blade condition
 - maintaining clearance between the body and the tooth of a saw blade
 - sharpening blades to specified requirements
 - grinding teeth to a specified profile
 - maintaining concentricity of teeth
- tooth pitch and tooth angles at which blades are sharpened (blade geometry)
- range of speeds at which abrasive wheels can be operated without damaging saw blades
- risks and hazards and mitigation measures associated with sharpening circular saw blades
- procedures specific to sharpening circular saw blades:
 - workplace health and safety, with particular emphasis on equipment lock-out, the use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults

- environmental protection practices applied to saw technician workshops and timber processing facilities:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, a timber processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment used to sharpen circular saw blades: gulleting and grinding machines, machine attachments, hand-held tools and abrasive wheels
 - saws for which circular saw blades are to be sharpened
 - one or more of the following types of circular saw blades to be sharpened: circular crosscut blades, rip saw blades
 - PPE suitable for sharpening circular saw blades
- specifications:
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for sharpening circular saw blades
 - template documents for recording operational problems and equipment faults
 - workplace procedures for sharpening circular saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3234 File and set saw blades for hand saws and circular saws

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to file and set saw blades for hand saws and circular saws. This activity includes removing and replacing saw blades, positioning blades in jigs, stands or vices, producing bevels along the back clearance angles of teeth, checking blade clearance requirements and setting teeth to workplace requirements.

The unit applies to individuals who file and set saw blades in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for FWPSAW3234 File and set saw blades for hand saws and circular saws

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- removed and replaced saw blades from a hand saw, circular saw or both
- assessed saw blade condition through checking for each of the following:
 - cracks
 - altered state of tension in a blade from excessive heat during cutting
 - weaknesses or damage caused through the stress of bending teeth
- bevelled teeth and assessed bevel lengths, widths, angles and surface texture according to workplace procedures and production requirements
- set teeth and assessed conditions in line with standard operating procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of saws for which blades are filed and set:
 - hand saws
 - circular saws
- features and names of different parts of saw blades
- purpose, features and operation of tools and equipment used to file and set saw blades:
 - jigs
 - vices
 - setting instruments
 - levers and gauges

- automatic or hand-held grinders
- bevel files
- importance of setting teeth to match requirements for:
 - characteristics of various materials sawn
 - speed of the sawing process
 - direction of the sawing process
 - cutting angle for sawing
 - saw blade specifications
- methods for:
 - removing saw blades from saws
 - assessing saw blade condition
 - setting teeth to a specified profile
 - grinding and bevelling teeth to required shape, tolerance and pitch
 - compensating for the effects of spring back
- back clearance and face angles at which blades are bevelled (blade geometry)
- characteristics of metal used in saw blades
- causes and consequences of spring back
- types of risk and hazards and mitigation measures associated with filing and setting saw blades
- workplace policies and procedures specific to filing and setting saw blades:
 - workplace health and safety, with particular emphasis on equipment lock-out, the use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices applicable to saw technician workshops or timber processing facilities:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, a timber processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment used to file and set saw blades: jigs, vices, setting instruments, levers and gauges, automatic or hand-held grinders, hand files
 - one or more of the following types of saws for which the saw blade is to be filed and set: hand saws, circular saws

- PPE suitable for filing and setting saw blades
- specifications:
 - template documents for recording processing and equipment faults
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for filing and setting saw blades in specified sawing equipment
 - workplace policies and procedures for filing and setting saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3235 Recondition saw guides

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to review, adjust, grind or machine and replace guides in band saws to assure smooth and straight running.

The unit applies to individuals who recondition guides in a sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPSAW3235 Recondition saw guides

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed condition of the saw guide
- machined saw guide
- adjusted saw guide
- safely stored guides for use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of band saws for which guides are reconditioned
- features and names of different parts of guides and carriers
- purpose, features and operation of tools and equipment used to recondition guides and spacers:
 - grinding equipment
 - metal lathes
 - milling machines
 - router and jig
- importance of reconditioning worn guides and spacers to the specified profile for continued straight and smooth running of saw blades
- methods for:
 - assessing the condition of guides
 - grinding guide surface to restore it to a smooth flat surface using grinding equipment

- machining guide surface to restore it to a smooth flat surface using metal lathes or milling machines
- basic knowledge of physics of sawing:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade
 - heat removal
- angles at which guides are ground or are machined (geometry)
- range of speeds at which grinders and machines can be operated without damaging guides and spacers
- types of risk and hazards and mitigation measures associated with reconditioning guides
- workplace policies and procedures specific to reconditioning guides:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in sawmills:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - one or more of the following tools and equipment used to recondition guides: grinding equipment, metal lathe, milling machines and router and jig
 - band saws with guides to be reconditioned
 - replacement guides
 - PPE suitable for reconditioning guides
- specifications:
 - template documents for recording processing and equipment faults
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for reconditioning guides in specified equipment
 - workplace procedures for reconditioning guides.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3236 Sharpen tipped circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess the tipped circular saw blade condition, set up for sharpening, and sharpen saw blades with an automated grinder.

The unit applies to individuals who sharpen tipped circular saws in a saw technician workshop or sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPSAW3236 Sharpen tipped circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed the condition of blade teeth for:
 - sharpness of each tooth
 - damage to teeth
 - pitch
 - kerf width
- set up the sharpening machine
- sharpened tipped circular saw blades according to a work order and workplace requirements
- removed tipped circular saw blades from sharpening equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade
 - heat removal
 - sawtooth configuration
- purpose, features and operation of circular saws for which tipped blades are sharpened:

- circular saws for timber processing
- cold saws for ferrous and non-ferrous alloys
- features and names of different parts of circular saw blades
- purpose, features and operation of tools and equipment used to sharpen tipped circular saw blades:
 - automated grinding machine with manual or automatic adjustment
 - abrasive wheels
- coolants used in the sharpening process, and impact on efficient sharpening
- importance of sharpening and tension to match requirements for:
 - characteristics of various materials sawn
 - speed of the sawing process
 - direction of the sawing process
 - cutting angle for sawing
 - saw blade specifications
- methods for:
 - assessing saw blade condition
 - sharpening blades to specified requirements
 - setting teeth to a specified kerf
 - maintaining concentricity of teeth
- tooth pitch and tooth angles at which blades are sharpened (blade geometry)
- range of speeds at which abrasive wheels can be operated without damaging blades
- types of risk and hazards and mitigation measures associated with sharpening tipped circular saw blades
- workplace procedures specific to sharpening tipped circular saw blades:
 - workplace health and safety, with particular emphasis on safe manual handling and use of personal protective equipment (PPE)
 - communication reporting lines
 - recording and reporting processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in sawmills:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- tools and equipment used to sharpen tipped circular saw blades, including manually or automatically adjustable grinding machines, abrasive wheels and measuring equipment
- circular saws for which blades are to be sharpened, including circular saws and cold saws
- tipped circular saw blades for sharpening
- PPE suitable for sharpening tipped circular saw blades
- specifications:
 - template documents for recording processing and equipment faults
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for sharpening tipped circular saw blades
 - workplace procedures for sharpening tipped circular saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3237 Level and tension circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to level and tension circular saw blades for circular saws and hot saws. This activity includes inspecting saws, repairing defects such as dished blades, damaged teeth and cracks, levelling ridges and lumps, and tensioning the saw.

The unit applies to individuals who level and tension circular saw blades in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPSAW3237 Level and tension circular saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- levelled and tensioned circular saw blades for one or both of the following types of saws:
 - circular saw
 - hot saw
- in doing the above job:
 - followed work order and relevant workplace health and safety and environmental protection procedures
 - removed and replaced circular saw blades from the saw
 - assessed circular saw blade conditions in line with standard operating procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade
 - heat removal
 - sawtooth configuration
- purpose, features and operation of saws for which blades are levelled and tensioned:
 - circular saws
 - hot saws
- features and names of different parts of different types of circular saw blades:

- circular crosscut blades
- rip saw blades
- purpose, features and operation of tools and equipment used to level and tension circular saw blades:
 - hammers
 - stretcher rolls
 - levelling rolls
 - heat tensioning instruments
 - gauges and straight edges
- importance of levelling and tensioning circular saw blades to match requirements for:
 - characteristics of various materials sawn
 - speed of the sawing process
 - direction of the sawing process
 - saw blade rim speed
 - saw blade specifications
- methods for:
 - removing saw blades from circular saws
 - assessing saw blade condition
 - levelling and tensioning blades to specified requirements
 - applying curvature
- characteristics of metal used in the circular saw blades, and range of force that can be applied without damaging blades
- workplace procedures specific to levelling and tensioning circular saw blades:
 - workplace health and safety, with particular emphasis on equipment lock-out, the use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices applied to saw technician workshops and timber processing facilities:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, a timber processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- tools and equipment used to level and tension circular saw blades: hammers, stretcher rolls, levelling rolls, tensioning instruments, gauges and straight edges
- one or both of the following types of circular saws to be repaired or maintained: circular saws, hot saws
- circular saw blades for cutting timber products to be levelled and tensioned: circular crosscut blades, rip saw blades
- PPE suitable for levelling and tensioning circular saw blades
- specifications:
 - document, spreadsheets and proformas for recording processing and equipment faults
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for levelling and tensioning circular saw blades for specified sawing equipment
 - workplace procedures for levelling and tensioning circular saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3238 Replace Stellite tips

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to remove worn Stellite tips from saw blades and to weld, anneal, clean and prepare replacement tips for grinding and return to service.

The unit applies to individuals who replace Stellite tips in a saw technician workshop or sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPSAW3238 Replace Stellite tips

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed condition of Stellite tips
- prepared tips for replacement
- removed and replaced Stellite tips, including:
 - brazed or welded new Stellite tips onto the tooth face or tooth seat
 - replaced tips that are broken, missing or worn out
 - rebuilt broken or damaged tips.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade
 - heat removal
 - sawtooth configuration
- purpose, features and operation of saw blades that use Stellite tips:
 - band saw blades
 - circular saw blades
- features and names of different parts of saw blades
- purpose, features and operation of tools and equipment used to replace Stellite tips:

- automatic or semi-automatic tipping machines
- brazing equipment and brazing material
- brazing jigs
- methods for:
 - removing saw blades from sawing equipment
 - assessing saw blade condition
 - removing Stellite tips from saw blades
 - brazing and welding new Stellite tipped teeth onto the tooth face or gullet
- annealing processes and temperatures for Stellite tips and saw blades
- appropriate tolerances for weld deposits and replacement tip sizes
- characteristics of metal used in saw blades, and effects of brazing and welding on saw steel
- types of risk and hazards and mitigation measures associated with replacing Stellite tips
- workplace procedures specific to replacing Stellite tips:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining saw blades:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - one or more of the following types of tools and equipment used to replace Stellite tips: automatic or semi-automatic tipping machines, brazing equipment, brazing jigs
 - one or more of the following types of saw blades to be repaired and maintained: band saw blades, circular saw blades
 - Stellite tips
 - brazing material including silver alloy, special shock absorbing shim, flux in the form of a liquid or paste
 - PPE suitable for replacing Stellite tips
- specifications:
 - documents, spreadsheets and proformas for recording processing and equipment faults
 - manufacturer instructions for use, repair and maintenance of equipment

- work order for repair and maintenance activities, with specific instructions for replacing Stellite tips in specified equipment
- workplace procedures for replacing Stellite tips.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3239 Assess and maintain wide band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to level, tension, back gauge, weld and replace teeth on wide band saw blades that are over 70mm in width.

The unit applies to individuals who maintain wide band saw blades in a forest and forest product factory setting.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for maintenance	<p>1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel</p> <p>1.2 Review environmental protection procedures and workplace health and safety requirements, including the use of personal protective</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>equipment, equipment lock-out and safe manual handling techniques</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with maintaining wide band saw blades</p> <p>1.4 Identify and implement workplace procedures for minimising waste material and maximising energy efficiency</p> <p>1.5 Select appropriate tools and equipment, and check for operational effectiveness according to manufacturer recommendations</p> <p>1.6 Plan maintenance process according to work order and workplace requirements</p>
2. Assess saw blade condition	<p>2.1 Remove wide band saw blade from machinery</p> <p>2.2 Handle saw blade to avoid damaging teeth</p> <p>2.3 Clean foreign material from blade surfaces</p> <p>2.4 Inspect saw blade to assess the condition of teeth, tips and saw blade</p> <p>2.5 Check and mark teeth or tips requiring repair or replacement</p> <p>2.6 Declare saw blades unserviceable where hazardous defects are found, or blade has become too narrow for use</p> <p>2.7 Segregate and dispose of unserviceable saw blades according to workplace procedures and environmental protection practices</p>
3. Level, tension and back gauge saw blade	<p>3.1 Use a straight edge to identify lumps and ridges across and along saw blade on both sides of the blade</p> <p>3.2 Remove ridges or lumps progressively by levelling the saw blade with hammers, levelling attachments or stretcher rolls</p> <p>3.3 Control rolling patterns to induce the correct amount of tension into the saw blade</p> <p>3.4 Use a tension gauge of appropriate curvature to verify the saw blade has sufficient tension, and tension is correctly positioned across the blade and is evenly distributed along the length of the blade</p> <p>3.5 Use an accurate back-gauge to check back length, and roll nonconforming areas to adjust back length to workplace tolerance</p>
4. Repair teeth and blade cracks	<p>4.1 Place saw blade in welding jig for heat application and welding activities</p> <p>4.2 Check amount of damaged tooth to be removed or crack to be repaired and mark weld line</p>

Assessment Requirements for FWPSAW3239 Assess and maintain wide band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- removed and replaced saws from equipment
- assessed saw condition
- levelled, tensioned and measured the back-crown of the saw blade
- repaired teeth and blade cracks
- used welding processes and materials to produce:
 - weld beads that provide full penetration fusing together adjacent metal parts
 - welds free from any faults that would have the potential to weaken the strength and endurance capability of the weld deposit and weld zone.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of wide band saw blade for which repairs are completed
- features and names of different parts of wide band saw blades
- purpose, features and operation of tools and equipment used to repair and maintain wide band saw blades:
 - hammers
 - stretcher or tension rolls
 - levelling rolls
 - tension gauges and straight edges, back-gauges
 - welding equipment and welding materials

- importance of levelling and tensioning blades and applying curvature to match workplace requirements for:
 - characteristics of various materials sawn
 - speed of the sawing process
 - direction of the sawing process
 - saw blade specifications
- methods for:
 - removing saw blades from band saws
 - assessing saw blade condition
 - levelling and tensioning blades to specified requirements
 - assessing curvature
 - welding to build up and replace teeth
 - grinding and filing rebuilt or replaced teeth to required shape, tolerance and pitch
- basic knowledge of physics of sawing:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade
 - heat removal
 - sawtooth configuration
- characteristics of metal used in wide band saw blades, and range of forces which can be applied without damaging blades
- types of risk and hazards and mitigation measures associated with maintaining wide band saw blades
- workplace procedures specific to maintaining wide band saw blades:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in sawmills:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - hammers
 - stretcher or tension rolls
 - levelling rolls and attachments
 - tension gauges and straight edges, back-gauges
 - welding equipment
 - heating and annealing equipment
 - welding jigs
 - run-on and run-off tabs
 - punches
 - engineers' hammers
 - angle grinders
 - sanders
 - hand files
 - abrasive paper or cloth
 - welding material
 - wide band saw blades to be maintained
 - PPE suitable for repairing and maintaining wide band saw blades
- specifications:
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for repairing wide band saw blades
 - documents, spreadsheets and proformas for recording processing and equipment faults
 - workplace procedures for maintaining wide band saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3240 Assess and maintain band saw wheels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to fit special wheel dressing equipment to band mill wheels, resurface the wheel profiles and re-assemble the band mill in readiness for production.

The unit applies to individuals who recondition band saw wheels in forest and forest product factory settings.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPSAW3240 Assess and maintain band saw wheels

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- assessed condition of the band saw wheels
- resurfaced the faces of the band saw wheels to the specified requirements
- re-assembled the band saw components
- set up a band saw blade on the saw to the specific alignment
- tested operational effectiveness of the band saw.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of the band saw wheels
- features and names of different parts of band saws
- purpose, features and operation of tools and equipment used to recondition band saw wheels:
 - resurfacing equipment
 - measuring equipment
- importance of aligning band saw wheels for continued accuracy during band saw operation
- methods for:
 - assessing the condition of band saw wheels
 - resurfacing the faces of the band saw wheels to specified requirements
 - re-assembling band saw components
 - setting up band saw blades on the saw to a specific alignment

- testing operational effectiveness of band saws
- wheel profiles and appropriate tolerances
- range of speeds at which resurfacers can be operated without damaging band saw wheels
- types of risk and hazards and mitigation measures associated with resurfacing band saw wheels
- workplace procedures specific to resurfacing band saw wheels:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling techniques
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining equipment in sawmills:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - resurfacing or wheel grinding equipment
 - measuring equipment
 - band saws, including the entire mechanical structure and componentry that make up the machine
 - band wheels to be resurfaced
 - PPE suitable for reconditioning band saw wheels
- specifications:
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for resurfacing band saw wheels in specified equipment
 - template documents for recording processing and equipment faults
 - workplace procedures for reconditioning band saw wheels.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3242 Treat timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to chemically treat timber, including planning for chemically treating timber, safely handling and storing chemicals, operating treatment equipment, and undertaking basic maintenance of treatment equipment.

The unit applies to individuals who treat timber in a timber treatment plant or sawmill. Specific job roles can include treatment plant operator, kiln operator or timber products technician.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication and may differ according to jurisdiction.

In Victoria, to comply with licence/permit requirements, organisations must ensure that employees working with copper chrome arsenate (CCA) demonstrate competence in this unit (FWPSAW3242 Treat timber), or that persons working with CCA do so under the direct supervision (sight and sound) of a trained and authorised person.

For regulatory information and details in other states and territories, refer to the relevant state or territory licensing body.

Pre-requisite Unit

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for treating timber	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques 1.3 Identify, assess and take actions to mitigate risks and hazards associated with treating timber 1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency 1.5 Obtain chemicals and type and quantity of timber for treatment from storage 1.6 Plan treating cycles according to work order
2. Use equipment to treat timber	2.1 Complete pre-start-up equipment checks to ensure operational effectiveness 2.2 Identify water requirements and check to ensure treatment process requirements are met 2.3 Test moisture content of timber according to workplace procedures 2.4 Check, adjust and maintain strength and volume of preservative solution at specified strength and volume 2.5 Bring treating plant to full operating condition, and regularly check operating parameters to ensure optimum output 2.6 Load timber into treatment vessel and complete treatment cycles 2.7 Brand treated timber in line with organisational procedures 2.8 Safely handle treated timber and transfer to the storage area 2.9 Record outcomes of timber treatment process, and report to appropriate personnel
3. Complete operator maintenance	3.1 Lock out equipment according to workplace safety procedures 3.2 Conduct basic routine checks and maintenance of treatment equipment according to manufacturer specifications 3.3 Store chemicals according to workplace safety procedures, and report on stock levels 3.4 Record faults or incidents related to treatment equipment and chemical use and storage, and report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Extracts essential information from safety data sheets, or equivalent plain English information on safe use, handling, transport and disposal of timber treatment chemicals
Writing	<ul style="list-style-type: none"> Accurately completes basic workplace forms and records for chemical stock levels, processes and equipment faults
Oral communication	<ul style="list-style-type: none"> Employs active listening and questioning to clarify the content of work orders
Numeracy	<ul style="list-style-type: none"> Performs basic mathematical calculations to determine routine solution strengths and retention rates for preservative solutions Completes basic measurements of moisture content in timber Identifies quantities of required timber within work orders, and counts numbers for treatment
Navigate the world of work	<ul style="list-style-type: none"> Understands main tasks, responsibilities and boundaries of own role
Interact with others	<ul style="list-style-type: none"> Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	<ul style="list-style-type: none"> Recognises and responds to routine problems

Assessment Requirements for FWPSAW3242 Treat timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least on one occasion, the individual has:

- completed the chemical treatment process according to an individual work order for one of the following timber types:
 - timber from native species
 - timber from imported species
 - dressed timber
 - stress and non-stress graded timber
 - in-the-rough timber
 - sleepers
 - logs, rounded poles
 - beams, laminated beams
- during the treatment process, checked, adjusted and maintained the strength and volume for one of the following types of preservative solutions:
 - water-borne solutions
 - oil-based solutions
 - solvent-based solutions
- during the treatment process, complied with:
 - workplace health and safety requirements for chemically treating timber
 - environmental protection procedures for chemically treating timber
- at the completion of the treatment process, completed each of the following three tasks:
 - conducted routine operator equipment maintenance
 - safely stored chemicals
 - reported on stock levels.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of treating timber
- characteristics of timber types, effects of the treatment process and appropriate range of temperatures
- properties, at a basic level of understanding, of the following water-borne, oil-based and solvent-based chemicals used to treat timber, and their purpose:
 - creosote and modified creosote-based
 - copper chrome arsenate (CCA) salts
 - compounds of boron and fluoride salts
 - alkaline copper quaternary (ACQ)
 - light organic solvent-borne preservative (LOSP)
 - micronised copper azole (MCA or Tanalith E)
- risks and hazards associated with handling and using chemicals, and methods used to minimise these
- safety sign and symbols related to chemical use in the workplace
- typical workflow processes and techniques for chemically treating timber:
 - full cell
 - modified cell
 - empty cell
 - immersion
 - rueping
 - double vacuum
 - dip diffusion
 - vat and sprays
- methods used to brand treated timber and range of industry and organisation markings:
 - burning
 - hammer impressions
 - ink
 - tags
- purpose, features and operation of equipment used to treat timber chemically:
 - treatment cylinders
 - working tanks
 - mix tanks
 - concentrate storage tanks
 - effluent tanks
 - vacuum pump and seals
- storage layout and categories for:
 - raw materials

- storing finished timber
- chemicals and preservative solutions
- environmental protection practices for chemically treating timber:
 - disposing of hazardous substances
 - reducing water and energy use
 - water management strategies
 - cleaning plant, tools and equipment
- workplace procedures for chemically treating timber:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), safety data sheets, handling, transporting and storing chemicals and hazardous substances, and responding to chemical-related incidents
 - communication reporting lines
 - recording and reporting chemical stock levels, processes and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber treatment plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - one or more of the following types of equipment used to treat timber chemically: treatment cylinders, working tanks, mix tanks, concentrate storage tanks, effluent tanks
 - branding equipment and consumables
 - PPE suitable for chemically treating timber
 - timber to be chemically treated
 - one or more of the following types of preservative solution: water-borne solutions, oil-based solutions or solvent-based solutions
- specifications:
 - manufacturer safety data sheets or equivalent plain English information for chemicals and preservative solutions
 - work order with specific instructions for the chemical treatment of timber
 - template documents for recording chemical stock levels, processes and equipment faults
 - workplace procedures for chemically treating timber.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. A suitably licensed person must be present to monitor and supervise the handling of CCA during assessment.

FWPSAW3244 Align sawing production systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to align chipper heads and circular or band sawing machines, including the feeding system, and prepare machines for return to production.

The unit applies to individuals who align sawing production systems in a sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Assessment Requirements for FWPSAW3244 Align sawing production systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- aligned the following types of sawing production systems:
 - chipper head
 - circular and band sawing machines and feed systems including line bars and carriages
- in doing the above job, the individual has:
 - followed work order and relevant workplace health and safety and environmental protection procedures
 - implemented equipment shutdown procedures
 - assessed the performance of sawing machine and system
 - re-assembled sawing production systems and tested for operational effectiveness
 - identified routine processing and equipment faults and resolved or reported to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and operation of:
 - chipper heads
 - sawing machines and feed systems including line bars and carriages
- purpose, features and operation of tools and equipment used to align sawing production systems
- advantages and disadvantages of using laser or surveying equipment to conduct major alignments
- conditions related to saw blades and accuracy of cuts that indicate that sawing machine is out of alignment

- reasons for aligning various parts of sawing systems:
 - reducing sawing deviation, vibration, and downtime
 - increasing production rates
 - improving quality of sawn finish
- identification of alignment factors that will impact on the performance of the sawing production systems
- methods for:
 - assessing machine and system performance against recovery percentages, product sizing and/or standard deviation
 - dismantling mechanical components of production machines
 - aligning chipper heads
 - aligning sawing machines
 - re-assembling production machines and testing operational effectiveness
- tools and equipment used to align sawing production systems:
 - tools for removing and adjusting mechanical parts
 - jigs
 - precision measuring equipment
 - portable electrical lighting
 - feeler gauges
 - engineers' rules
 - vernier callipers
 - micrometers
 - plumb lines
 - piano wire or string lines
 - pointer
 - markers
- types of risks and hazards and mitigation strategies associated with aligning saw production systems
- workplace policies and procedures specific to aligning sawing production systems:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
 - communication reporting lines
 - recording and reporting of processing and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- tools and equipment for aligning sawing production systems
- wood chipping equipment
- sawing machines and feed systems, including line bars and carriages
- PPE suitable for aligning sawing production systems
- specifications:
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for aligning sawing production systems in specified equipment
 - equipment history records
 - template documents for recording operational problems and equipment faults
 - workplace procedures for aligning sawing production systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3245 Join band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to assess the condition of band saw blades, prepare and weld meeting ends and finish the welded surface ready for operation.

The unit applies to individuals who join band saw blades in a saw technician workshop or sawmill.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPSAW3245 Join band saw blades

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, at least on one occasion, the individual has:

- joined the following types of band saw blades:
 - narrow band
 - wide band
- in doing the above job, the individual has:
 - followed work order and relevant workplace health and safety and environmental protection procedures
 - welded and annealed blades to specified requirements
 - grinded surplus weld material
 - removed all distortions from the blade surface
 - tensioned the welded zone
 - adjusted back length of the blade
 - cleaned welded zone.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, types, features and operation of band saws
- features and names of different parts of band saw blades
- purpose, features and operation of tools and equipment used to join and anneal band saw blades:
 - band saw welding equipment
 - grinding and finishing equipment
 - hand or power operated tools

- importance of joining and annealing blades to suit machine design requirements
- weld defects and effects on blade operation
- methods for:
 - welding and annealing blades to specified requirements
 - grinding surplus weld material
 - removing all distortions from the blade surface
 - tensioning the welded zone
- types of risk and hazards and mitigation measures associated with joining band saw blades
- workplace procedures specific to joining band saw blades:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
 - communication reporting lines
 - recording and reporting of processing and equipment faults
- environmental protection practices for repairing and maintaining tools and equipment in forest products factory settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - band saw welding equipment including one or more of the following: gas metal arc welding (GMAW), gas tungsten arc welding (GTAW), flash butt welders, butt welders
 - grinding and finishing equipment
 - hand or power operated tools
 - saw blades, including narrow and wide band saw blades that cut both ferrous and non-ferrous material
 - PPE suitable for joining band saw blades
- specifications:
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order for repair and maintenance activities with specific instructions for joining band saw blades for specified equipment
 - documents, spreadsheets and proformas for recording processing and equipment faults
 - workplace procedures for joining band saw blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3247 Replace tungsten tips

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to remove worn or damaged tungsten tips from circular saw blades, and braze, clean and prepare replacement tips for grinding and return to service.

The unit applies to individuals who replace tungsten tips in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for replacement	<p>1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel</p> <p>1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>handling techniques</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with replacing tungsten tips</p> <p>1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency</p> <p>1.5 Select appropriate tools and equipment, and check for operational effectiveness according to manufacturer recommendations</p>
2. Remove worn, damaged or broken tips	<p>2.1 Remove and replace saw blade according to manufacturer instructions</p> <p>2.2 Assess saw blade condition</p> <p>2.3 Clean foreign matter from saw and check for defects</p> <p>2.4 Identify and mark broken tips</p> <p>2.5 Remove broken tips, minimising damage to the tooth seat, and dispose of according to environmental protection practices</p> <p>2.6 Repair tooth seats to specified tolerance and dimensions</p>
3. Replace tips	<p>3.1 Set up saw in brazing jig according to manufacturer instructions</p> <p>3.2 Select brazing material and suitable technique for application and heat control</p> <p>3.3 Select appropriate replacement tip and braze into position</p> <p>3.4 Trial braze one tip, check tip is correctly positioned and the silver alloy has flowed evenly to both sides of the tip</p> <p>3.5 Inspect and verify tip position, side clearance, and joint quality objectives have been achieved</p> <p>3.6 Set manual or automatic feeds according to number of tips to be brazed</p> <p>3.7 Identify routine processing and equipment faults, and resolve or report to appropriate personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> • Uses standard units of measurement and symbols for temperature and volume • Uses basic arithmetic skills to determine amount of brazing material required when replacing tips
Navigate the world of work	<ul style="list-style-type: none"> • Understands main tasks, responsibilities and boundaries of own role
Interact with others	<ul style="list-style-type: none"> • Uses modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	<ul style="list-style-type: none"> • Recognises and responds to routine problems

Assessment Requirements for FWPSAW3247 Replace tungsten tips

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- removed worn tungsten tips from circular saw blades
- replaced tungsten tips for circular saw blades
- assessed condition of tungsten tips in line with workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic knowledge of physics of sawing, including:
 - saw blade material and properties
 - impact of timber properties on saw blades
 - direction of cut
 - forces on a blade
 - heat removal
 - saw tooth configuration
- purpose, features and operation of saws for which tungsten tips are replaced:
 - circular saws
- features and names of different parts of saw blades
- purpose, features and operation of tools and equipment used to replace tungsten tips:
 - brazing equipment and brazing material
 - brazing jigs
- methods for:

- removing saw blades from saws
- assessing saw blade condition
- removing tungsten tips from saw blades
- cleaning excess braze alloy and carbide fragments from tip seats
- lengthening or deepening tip seats to match replacement tip requirements
- selecting size and type of replacement tip
- pre-tinning new tips
- brazing new tungsten tips onto the tooth face or tooth seat
- appropriate tolerances for brazing alloy joint thickness, replacement tip sizes and side clearance objectives
- characteristics of metal used in saw blades, and effects of brazing
- types of risk and hazards and mitigation measures associated with replacing tungsten tips
- workplace procedures specific to replacing tungsten tips:
 - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
 - communication reporting lines
 - recording and reporting processing and equipment faults
- environmental protection practices applicable to saw technician workshops or timber processing facilities:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a saw technician workshop, timber processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - brazing equipment
 - brazing jigs
 - circular saws
 - tungsten tips
 - brazing material: silver alloy, flux in the form of a liquid or paste
 - side clearance dial indicator: Kafer Gauge
 - PPE suitable for replacing tungsten tips
- specifications:
 - documents, spreadsheets and templates for recording operation and equipment faults
 - manufacturer instructions for use, repair and maintenance of equipment
 - work order with specific instructions for replacing tungsten tips for circular saws

- workplace procedures for replacing tungsten tips.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3251 Apply principles of blade design to sawing procedures

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to select blades for various sawing operations and apply principles of blade design in the selection to maintain quality production output.

The unit applies to individuals who maintain the quality of saw blades in a saw technician workshop or timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
<i>1. Prepare for work</i>	1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual handling techniques</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with selecting and sawing logs in multi-species operations</p> <p>1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency</p>
2. Maintain quality output	<p>2.1 Follow quality system procedures for the use and care of blades</p> <p>2.2 Assess blades visually for defects before processing products and completing work</p>
3. Apply blade design principles	<p>3.1 Classify blades according to type and style suitable for different saws and production requirements</p> <p>3.2 Identify and evaluate blade characteristics, properties and design capacities according to manufacturer specifications and production requirements</p> <p>3.3 Select blades to suit material being cut and production requirements</p> <p>3.4 Plan sawing to minimise blade damage and wear, and to optimise blade lifespan</p>
4. Assess the blade condition	<p>4.1 Identify and resolve during daily operations machinery and equipment issues that can cause product waste and adversely affect blade lifespan</p> <p>4.2 Assess saw blade condition and recognise the need to rectify blade wear and damage</p> <p>4.3 Record and report blade faults to appropriate personnel according to blade design specifications</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Measures blade characteristics for different blade types

Assessment Requirements for FWPSAW3251 Apply principles of blade design to sawing procedures

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- selected blades for sawing procedures according to workplace procedures
- identified and evaluated blade characteristics, properties and design capacities for at least three of the following types of blades:
 - circular saw blades
 - band saw blades
 - wide saw blades
 - standard steel
 - tungsten tipped
 - Stellite tipped
- assessed saw blade condition and completed basic records of faults for at least three types of blade
- selected appropriate blades to suit material being cut and production requirements for three separate work orders.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of risk and hazards and mitigation measures associated with applying principles of blade design to sawing procedures
- workplace procedures specific to applying principles of blade design to sawing procedures:

- workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
- communication reporting lines
- recording and reporting of processing problems and equipment faults
- environmental protection practices for timber processing operations:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber
- purpose, features and operation of blades:
 - circular saw blades
 - band saw blades
 - gang saw blades
 - wide saw blades
 - standard steel
 - tungsten tipped
 - Stellite tipped
- properties of blades used in the timber processing and manufacturing industry:
 - metal from which blades are made
 - geometry and concentricity
- characteristics of blades and names and purpose of blade parts:
 - tooth pitch
 - kerf
 - gullet
 - tooth face
 - set
 - straightness
 - tooth profile
 - tooth and side clearance angles
 - gullet depth/tooth height
 - tension ring
 - application (crosscutting or ripping)
- methods to optimise the use of saw blades
- effects of different types of materials on saw blade wear
- typical machinery and equipment issues that can cause product waste and adversely affect blade lifespan
- methods for assessing saw blade condition
- workplace quality system procedures for the use and care of blades.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing or manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - blades for at least three of the following types of saws: circular saws, narrow band saws and wide band saws
 - different styles of blade: solid tooth, tungsten tipped and Stellite tipped
 - maintenance tools and equipment for blades
 - personal protective equipment suitable for handling blades
- specifications:
 - template documents for recording blade faults
 - manufacturer specifications for blade use and recommendations for repairing and maintaining blades
 - work orders with specific information on materials to be cut and production requirements
 - workplace quality system procedures for the use and care of blades.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3252 Assemble, operate and dismantle a portable sawmill

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to assemble, operate and dismantle a portable sawmill.

The unit applies to individuals who assemble, operate and dismantle portable sawmills.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assemble portable sawmill	<p>1.1 Determine job requirements from work order or instructions and, where required, confirm with appropriate personnel</p> <p>1.2 Confirm workplace health and safety and environmental protection practices and/or procedures for task, including use of personal</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>protective equipment, equipment lock-out and safe manual handling</p> <p>1.3 Identify and assess hazards and take actions to mitigate risks related to assembling, operating and dismantling portable sawmills</p> <p>1.4 Inspect suitability of proposed worksite and identify potential workflow interferences</p> <p>1.5 Identify safe location for equipment, logs, stacking of sawn timber and waste</p> <p>1.6 Assemble portable sawmill on site according to manufacturer instructions</p> <p>1.7 Complete pre-operational checks on portable sawmill</p> <p>1.8 Conduct test run of portable sawmill and resolve or report processing and equipment faults</p>
2. Saw logs using portable sawmill	<p>2.1 Use cant hooks, winches or log rollers to position logs to be sawn and stabilise with chock logs or pre-notched runners</p> <p>2.2 Determine sawn timber dimensions from customer order or work order</p> <p>2.3 Identify log characteristics and estimate number of timber boards and sequence of cuts from an individual log</p> <p>2.4 Adjust saw, carriage and mill to suit dimensions of boards to be cut</p> <p>2.5 Operate portable sawmill, ensuring that sawn edges are controlled</p> <p>2.6 Remove logs with defects, reject boards and off-cuts to waste or sawn recovery</p> <p>2.7 Record and report process and equipment faults</p>
3. Conduct operator maintenance	<p>3.1 Lock out and isolate portable sawmill according to workplace health and safety procedures</p> <p>3.2 Check saw and saw blades for bluntness or damage, and repair or replace according to manufacturer instructions</p>
4. Dismantle portable sawmill	<p>4.1 Dismantle portable sawmill according to manufacturer instructions</p> <p>4.2 Load and secure dismantled sawmill equipment for transportation</p> <p>4.3 Restore work site according to workplace environmental protection practices and/or procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret routine workplace documents relevant to portable sawmilling operations
Writing	<ul style="list-style-type: none"> Complete routine workplace records used in sawmilling operations
Oral communication	<ul style="list-style-type: none"> Ask open and closed questions and actively listen to clarify contents of work orders
Numeracy	<ul style="list-style-type: none"> Interpret routine numerical information in work orders Perform routine calculations or estimations of number and dimension relevant to sawmilling operations

Assessment Requirements for FWPSAW3252 Assemble, operate and dismantle a portable sawmill

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- selected an appropriate site and assembled one portable sawmill following workplace procedures
- selected logs and operated one portable sawmill for one production period to produce green timber boards according to a work order
- performed routine operator maintenance on one portable sawmill at the completion of a production period
- disassembled and prepared one portable sawmill for transportation.

In performing each of these tasks, the individual has:

- followed workplace operating and health and safety procedures, including use of personal protective equipment (PPE), equipment lock-out and safe manual handling
- identified and controlled hazards associated with the work task
- followed workplace environmental protection practices and/or procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features and safe use of portable sawmills and other equipment, including:
 - cant hooks
 - winches
 - log rollers
 - mechanical lifting equipment
- appropriate locations for portable sawmills to optimise efficient and safe workflow

- pre-start-up checks for portable sawmills, including:
 - ensuring that saw has been set up correctly
 - ensuring that blades are installed accurately
 - ensuring that machinery is operating to optimum performance
- optimisation of log sawing, including:
 - planning the cutting of a log to achieve the most from it (most and widest boards possible)
 - ensuring environmental protection requirements and practices are central to this planning process
- characteristics of logs for sawing, including:
 - diameter range
 - curvature
 - faults
 - species
 - moisture content
- log sawing processes, feed rates and finish
- blade condition assessment
- log defects, including:
 - defects arising from a change in moisture content
 - warp
 - wane
 - curvature
 - shakes
 - insect defects
 - knots and resin pockets
 - sweep
 - taper
 - end splits
 - shape
- non-specialist maintenance for portable sawmills, including:
 - cleaning machine of wood chips and sawdust
 - replacing blunt and damaged saw blades
 - inspecting machine parts for wear or damage, including guards
 - greasing and lubricating moving parts
 - checking operation of emergency stop buttons and lock-out systems
- workplace procedures for assembling, operating and disassembling a portable sawmill, including:
 - health and safety, including use of PPE, equipment lock-out and safe manual handling
 - portable sawmill operation
 - communication reporting lines

- recording and reporting processing and equipment faults
- hazards and associated risks with assembling, operating and dismantling a portable sawmill
- workplace environmental protection requirements and procedures for safe disposal of waste material and cleaning of plant, tools and equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or timber processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - portable sawmill
 - tools and equipment required for assembling, operating and dismantling a portable sawmill
 - PPE suitable for assembling, operating and dismantling a portable sawmill
 - quantities of logs
- specifications:
 - work order or instruction detailing activities to be carried out
 - workplace health and safety and environmental protection policies and/or procedures applicable to assembling, operating and dismantling a portable sawmill
 - workplace procedures for assembling, operating and dismantling a portable sawmill.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3253 Re-saw green timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to re-saw green timber, including flitches, cants and rough sawn timber, using sawing machinery to maximise the amount of product and usability.

The unit applies to individuals who saw green boards in a timber processing plant.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for re-sawing green timber boards	1.1 Determine job requirements from work order or instructions and, where required, seek clarification from appropriate personnel 1.2 Confirm workplace health and safety procedures for task, including use of personal protective equipment, equipment lock-out

Elements	Performance Criteria

Assessment Requirements for FWPSAW3253 Re-saw green timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has re-sawn, according to an individual work order, one type of green hardwood, softwood, native or imported species timber product selected from:

- flitches
- cants
- rough sawn timber.

In performing this task, the individual has:

- used one of the following items of equipment:
 - power operated, automatic feed controlled ripping saws
 - saws with adjustable cant (sloping table)
 - saws with one blade
 - rip saws
 - table saws
 - bench saws.
- followed workplace procedures for cutting operation
- selected, fitted and used personal protective equipment (PPE)
- cut products to length or dimensions according to prescribed workplace tolerance
- stacked finished product in designated storage location according to common size, length and width
- completed operator maintenance on the saw used.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- typical timber defects and the impact on production of quality sawn timber product, including:
 - warp
 - wane
 - cupping
 - shakes
 - insect defects
 - knots
 - resin pockets
- typical workflow processes for re-sawing green timber
- typical flow of green sawn timber supply into the sawing area
- range of cutting patterns used on green sawn timber to maximise the amount of product and usability
- range of industry standard lengths, cross-sections and tolerances, and applicable terminology for green timber product
- range of feed rates and impact on production output and finished quality of green timber product
- storage layout and categories for stacking finished green timber product
- purpose, features and operation of measuring equipment used in re-sawing green timber
- purpose, features and operation of saws used in workplace for re-sawing green timber
- purpose, features and operation of maintenance tools and equipment for saws
- methods for assessing saw blade condition
- workplace environmental protection requirements and practices for sawing operations, including:
 - cleaning plant, tools and equipment
 - criteria and processes for disposing of, recycling and reusing timber
 - minimising waste material and maximising energy efficiency
- processes for implementing routine operator maintenance activities associated with sawing operations
- workplace procedures specific to re-sawing green timber, including:
 - health and safety, with particular emphasis on equipment lock-out, use of PPE and manual handling
 - communication reporting lines
 - recording and reporting production output, processing problems and equipment faults.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing plant, a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - measuring equipment
 - saw to re-saw green timber
 - maintenance tools and equipment for saws
 - manual handling equipment
 - consumable saw blades
 - PPE suitable for re-sawing green timber
 - a commercial range of green timber for re-sawing
- specifications:
 - work order with specific instructions for re-sawing green timber
 - template documents for recording equipment faults and maintenance requirements
 - workplace health and safety and environmental protection policies and/or procedures applicable to re-sawing green timber
 - workplace procedures for re-sawing green timber.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3254 Control and monitor automated green mill saw line

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to control and monitor a fully automated saw line from control room to cut logs into green sawn timber.

The unit applies to individuals who operate automated green mill saw lines in a sawmill or timber processing work environment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to control and monitor green mill automated saw line	1.1 Determine job requirements from work order or instructions and, where required, check with appropriate personnel 1.2 Review workplace health and safety and environmental protection

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>procedures for work activity</p> <p>1.3 Identify and assess hazards and take actions to mitigate risks related to saw line operations</p> <p>1.4 Confirm emergency procedures and actions to be taken in the event of an emergency situation</p>
2. Configure green mill automated saw line optimising program	<p>2.1 Set optimising program to job specifications</p> <p>2.2 Conduct trial runs to check system operation, accuracy and quality of finished work</p> <p>2.3 Complete final adjustments to optimising program</p>
3. Control and monitor green mill automated saw line	<p>3.1 Start up and log onto control and data acquisition system to operate saw line</p> <p>3.2 Feed logs into saw line</p> <p>3.3 Monitor sawing operation through control and data acquisition system and make system adjustments to meet production output, product quality and maximum recovery</p> <p>3.4 Identify and correct minor deviations to normal operating parameters of saw line</p> <p>3.5 Report non-routine processing and equipment problems to relevant personnel</p>
4. Maintain process control and data acquisition system for green mill automated saw line	<p>4.1 Conduct routine planned inspections of control and data acquisition system according to manufacturer requirements</p> <p>4.2 Report faults and maintenance requirements to relevant personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Prepare routine written reports using required format, language and structure

Skill	Description
Oral communication	<ul style="list-style-type: none"> Employ active listening and questioning on routine matters related to output quality and equipment history records
Numeracy	<ul style="list-style-type: none"> Perform precise mathematical calculations to determine correct alignment of key parts of sawing system according to specified settings Use basic mathematical symbols and conventions in completing workplace reports related to alignment activities

Assessment Requirements for FWPSAW3254 Control and monitor automated green mill saw line

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has run, monitored and controlled a fully automated green mill saw line from control room for one production cycle.

In performing this task, the individual has:

- followed workplace health and safety and operating procedures
- checked system operation for compliance with job-specific operational and optimisation requirements
- monitored control and data acquisition system and optimising program and adjusted the system to meet production parameters and requirements
- conducted routine scheduled checks of the control and data collection systems and communicated any deficiencies or maintenance requirements to relevant personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace procedures specific to control and monitoring of fully automated green mill saw line, including:
 - health and safety, including use of personal protective equipment (PPE) and equipment lock-out
 - communication procedures
 - recording and reporting of processing problems and equipment faults
 - emergency procedures
- workplace environmental protection requirements and practices specific to timber processing plants, including:
 - reducing water and energy use
 - cleaning plant, tools and equipment

- disposing of, recycling and reusing timber
- features and components of fully automated green mill saw line
- features and operation of control and data acquisition system for automated green mill saw line
- basic components and functions of mechatronic systems for automated green mill saw line, including:
 - sensors
 - actuators
 - controllers
- workflow processes for automated green mill saw line
- typical flow of log supply in and out of sawing area in green mill
- range of cutting patterns used on logs to achieve maximum output of flitches and cants
- range of feed rates and how they affect production output and finished quality of flitches and cants
- purpose, features and configuration of optimisation program for automated green mill saw line
- typical log defects and how they affect ability to produce quality flitches and cants, including:
 - warp
 - wane
 - curvature
 - cupping
 - shakes
 - insect defects
 - knots
 - resin pockets.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fully automated green mill saw line
 - PPE suitable for green mill saw line operations
 - logs for processing
- specifications:
 - workplace procedures for control and monitoring automated green mill saw line
 - workplace emergency procedures relevant to green mill saw line operations
 - template documents for recording equipment faults and maintenance requirements

- workplace health and safety and environmental protection policies and/or procedures applicable to saw line operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3255 Operate conventional log breakdown saw line

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to operate a conventional breakdown saw line to saw logs as part of primary and secondary processing or green mill operations in a sawmill.

The unit applies to individuals who saw logs using conventional log breakdown saw lines in a sawmill or timber processing work environment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Assessment Requirements for FWPSAW3255 Operate conventional log breakdown saw line

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has run and monitored a conventional log breakdown saw line for one production cycle in an equipment configuration specific to one of the following sawmill operations:

- primary processing operations
- secondary processing operations.

In performing this task, the individual has:

- followed workplace health and safety and operating procedures
- checked equipment, production input and process readiness to ensure operational effectiveness
- selected and adhered to a cutting schedule during breakdown operation to optimise grade, size and recovery
- verified output quality and identified two real or hypothetical reasons for quality variations and corrective actions
- performed routine equipment maintenance and cleaning operations
- produced routine reports containing information on production, maintenance and quality.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of hazards, associated risks and mitigation measures associated with breaking down logs
- workplace procedures specific to breaking down logs, including:
 - health and safety, including use of personal protective equipment (PPE) and equipment lock-out

- communication reporting lines
- recording and reporting of processing problems and equipment faults
- emergency procedures
- workplace environmental protection requirements and practices specific to timber processing plants, including:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber
- log breakdown equipment in workplace environment, including:
 - configuration
 - purpose
 - components
 - operating parameters
 - capability
 - operation
- safety features of breakdown equipment, including:
 - isolation procedures
 - stop button
 - lock-out switch or system
 - hold cards
 - guards
- log breakdown process
- distinction between primary and secondary log breakdown
- typical workflow for breaking down logs
- downstream processing options for log breakdown operations
- range of cutting patterns used on logs to optimise for maximum recovery and maximum value
- range of feed rates and how they affect production output and finished quality
- factors that impact on output quality in log breakdown operations, including:
 - log or timber characteristics and defects
 - variations in size
 - blunt and damaged saws
- log breakdown equipment faults, including methods for assessing saw blade condition
- routine operator maintenance activities associated with sawing operations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - conventional log breakdown equipment
 - PPE suitable for log breakdown operations
 - logs for processing
- specifications:
 - workplace procedures for log breakdown operations
 - workplace emergency procedures relevant to log breakdown operations
 - workplace health and safety and environmental protection policies and/or procedures applicable to log breakdown operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3256 Select and saw logs in multi-species operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to segregate and saw logs into flitches or cants and maintain the production flow, allowing for changes in species. Work includes operator maintenance.

The unit applies to individuals who select and saw logs in multi-species operations in a timber processing facility.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for sawing in multi-species operation	1.1 Determine job requirements from work order or instructions and, where required, seek clarification from appropriate personnel 1.2 Review workplace health and safety and environmental protection practices and/or procedures for work activity, including emergency

Assessment Requirements for FWPSAW3256 Select and saw logs in multi-species operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has sawn logs in a multi-species operation for one production cycle to produce fitches or cants according to job requirements.

In performing this task, the individual has:

- followed workplace safety and operational procedures
- selected logs based on production requirements, log utilisation and at least one of the following characteristics:
 - diameter range
 - curvature
 - faults
 - species
 - moisture content
- secured, aligned and fed logs into saw at an optimal feed rate, modifying sawing sequence or procedure to meet production output and quality requirements in response to log defects and species variations
- completed basic non-specialist maintenance on equipment used
- produced routine reports containing information on production, maintenance and quality.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of risk and hazards and mitigation measures associated with selecting and sawing logs in multi-species operations
- workplace procedures specific to selecting and sawing logs in multi-species operations, including:

- workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
- communication reporting lines
- recording and reporting processing problems and equipment faults
- workplace environmental protection requirements and practices for timber processing operations, including:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber
- purpose, features and operation of equipment used to saw flitches and cants, including:
 - carriages, including standard three-headed dog carriages and flat top carriages with head rigs
 - saws, including circular saws, bench saws and overhead frame saws or band saws
- operation of mechanical feed
- operation of conveyor system to transport logs to and from the sawing area
- types and uses of maintenance tools and equipment for saws
- typical range of industry and organisation specific species types, including:
 - visual characteristics of logs
 - recovery characteristics
- typical workflow processes for sawing flitches and cants
- methods of adjusting workflow and sawing schedule during operation to account for differences in species
- cutting patterns required for logs of different tree species to achieve maximum output of flitches and cants
- assessment of logs for:
 - diameter range
 - curvature
 - faults
 - species of various types
 - moisture content
- range of feed rates and how they impact on the production output and finished quality of flitches and cants
- typical flow of log supply in and out of the sawing area
- methods for assessing saw blade condition
- species and recovery characteristics of timber and timber defects
- flow control systems and marking requirements
- typical log defects and how they impact on the ability to produce quality flitches and cants, including:
 - warp
 - wane
 - curvature
 - cupping

- shakes
- insect defects
- knots
- resin pockets.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - log sawing equipment
 - PPE suitable for selecting and sawing logs
 - logs from different species of trees
- specifications:
 - workplace procedures for sawing logs in a multi-species operation
 - workplace emergency procedures relevant to log sawing operations
 - workplace health and safety and environmental protection policies and procedures applicable to sawing logs in a multi-species operation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW3257 Operate timber drying kiln

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to dry softwood or hardwood timber in conventional kilns, including batch and continuous drying kilns, or solar assisted kilns, to appropriate moisture contents and stress levels.

The unit applies to individuals who work in timber drying operations in a wood products work environment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for drying timber operations	1.1 Determine job requirements from work order or specifications and, where required, seek clarification from appropriate personnel 1.2 Confirm workplace health and safety requirements for task, including use of personal protective equipment, emergency procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>and kiln operation</p> <p>1.3 Confirm legislation, standards and codes of practice relevant to kiln operations</p> <p>1.4 Identify and assess hazards and take actions to mitigate risks related to kiln operations</p> <p>1.5 Obtain timber racks to be dried and assess racks visually for consistent drying characteristics</p> <p>1.6 Conduct pre-start checks on drying kiln according to manufacturer instructions</p>
2. Load, operate and control kiln conditions	<p>2.1 Load kiln with timber racks selected for drying</p> <p>2.2 Position baffles and/or blankets as required or according to manufacturer instructions and workplace procedures to optimise air flows in kiln</p> <p>2.3 Apply drying and final conditioning schedules by adjusting kiln control settings to optimise kiln drying rate, turnaround time and timber quality</p> <p>2.4 Report kiln charge data to appropriate personnel or enter it into kiln management system</p> <p>2.5 Follow emergency shutdown procedures in the case of alarm being triggered</p>
3. Monitor kiln conditions	<p>3.1 Check characteristics of kiln charge or use kiln output data periodically to determine the end point of drying</p> <p>3.2 Adjust kiln control settings in response to kiln charge characteristics to ensure drying schedules are met</p> <p>3.3 Identify human and equipment faults that may affect timber drying, and take corrective action or report to relevant personnel</p>
4. Check timber quality on completion of drying	<p>4.1 Check characteristics of kiln charge against end product specifications according to workplace procedures</p> <p>4.2 Assess need for reconditioning or high humidity treatment</p>
5. Complete kiln operations and move or store timber	<p>5.1 Observe cooling down period before baffles and/or blankets are removed from timber according to workplace procedure, if required</p> <p>5.2 Identify sub-standard timber and direct for re-use according to workplace procedures</p> <p>5.3 Direct dried timber to storage or processing operations and check</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	that packs are labelled according to workplace procedures 5.4 Clean work area according to workplace procedures 5.5 Complete records and forward to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret timber drying schedule Use a psychrometric chart to convert temperature and humidity readings to dry/wet bulb temperatures and equilibrium moisture content
Writing	<ul style="list-style-type: none"> Complete routine workplace documents related to timber drying operations
Oral communication	<ul style="list-style-type: none"> Use appropriate vocabulary to communicate with supervisors and team members engaged in timber drying operations
Numeracy	<ul style="list-style-type: none"> Perform routine calculations related to quantity, temperature, relative humidity, oven dry moisture content and drying times

Assessment Requirements for FWPSAW3257 Operate timber drying kiln

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted one softwood or hardwood timber drying operation using one of the following timber drying kilns:

- batch drying kiln
- continuous drying kiln
- solar assisted kiln.

In performing this task, the individual has:

- followed workplace procedures to safely and efficiently dry timber
- complied with legislation, standards and codes of practice relevant to kiln operations
- dried timber to appropriate moisture contents and stress levels
- operated and monitored a kiln, and made necessary adjustments in the course of the drying process
- measured the amount of moisture content of timber or timber products during and after kiln drying
- kept degrade to a minimum when drying timber
- managed the safe movement of timber throughout all stages of the drying process
- produced accurate reports and records of the drying process.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety procedures relevant to timber drying operations, including personal protective equipment, emergency procedures and kiln operation
- legislation, standards and codes of practice relevant to kiln operations

- hazards and associated risks with timber drying, and risk control strategies as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- components, equipment, controls, energy systems and sources and operating principles of timber drying kilns from workplace environment
- methods for pre-start inspection and maintenance of timber drying kiln components
- methods for assessing consistent drying characteristics of racks, including:
 - size
 - age
 - condition
 - species
- reasons for drying timber
- timber drying stages
- wood-water relationships in the drying process
- timber moisture content, including fibre saturation point and equilibrium moisture content
- methods for monitoring and measuring characteristics of kiln charge during and after kiln drying, including:
 - moisture content
 - drying degrade
 - moisture gradient and stress
- influence of temperature, relative humidity and rate of air circulation on the drying rate
- kiln drying schedules for optimal drying rate, turnaround time and target moisture content without causing timber degrade
- timber drying defects, including surface checks, internal checks, end splits, collapse, excessive distortion, bow, spring, twist, cup and case hardening, reasons and control measures
- workplace procedures for drying timber, including:
 - quality assurance processes
 - storage systems and labelling
 - communication and reporting on drying process outcomes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing plant, a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - timber drying kiln
 - timber for drying

- personal protective equipment required for timber drying operations
- specifications:
 - templates for reporting on timber drying outcomes
 - timber drying schedule
 - workplace procedures for timber drying
 - workplace health and safety procedures applicable to timber drying.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW4206 Monitor output timber for optimum volume and value recovery

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to monitor timber production to optimise volume and value of sawn timber. This includes working safely, monitoring timber production for volume, grade and size, and reporting on production outcomes and compliance with optimisation objectives.

The unit applies to individuals who monitor output timber for optimum volume and value recovery in timber sawmills.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Assessment Requirements for FWPSAW4206 Monitor output timber for optimum volume and value recovery

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- monitored output timber for optimum volume and value recovery
- in doing the above job, the individual has:
 - followed work order and relevant workplace health and safety and environmental protection procedures
 - identified, assessed and taken actions to mitigate risks and hazards associated with sawing operations
 - recorded and reported on production outcomes and their compliance with optimisation objectives
 - made recommendations based on evidence to improve production and optimisation outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- optimisation principles
- cutting patterns
- output data:
 - sources of output data
 - types of output data
 - methods of interpreting output data
 - common anomalies in output data
 - ways of validating accuracy of output data
 - corrective actions in response to common anomalies in output data

- timber processing constraints:
 - markets
 - timber supply
 - preferred products
 - downstream processing options
- types of equipment faults and appropriate corrective actions:
 - mechanical
 - hydraulic
 - pneumatic
 - electrical
 - data
 - electronic
- corrective action:
 - communication to management
 - communication to the on-site technical support person
 - communication to the off-site technical support person
 - cleaning
 - communication with maintenance staff
 - recalibration
 - changes made to the operating system according to workplace procedures
- determinants of product mix:
 - timber characteristics
 - machine capability
 - product demand
- influences on timber volume and value recovery
- methods for reusing, recycling or disposing of items that do not meet quality requirements
- risks and hazards associated with sawing operations
- safe work practices and procedures, including use of personal protective equipment (PPE) and safe manual handling techniques.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a sawmill or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - equipment and timber needed for the work
 - output data for monitoring timber volume, grade and size
 - PPE for sawmill operations

- specifications:
 - template documents for recording production outcomes
 - work order with specific instructions for optimising timber production for volume and value recovery
 - workplace procedures for optimising timber production for volume and value recovery.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSAW4208 Plan for and coordinate timber kiln drying operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated and evaluated two timber drying operations.

In performing these tasks, the individual has:

- communicated and coordinated personnel effectively to follow workplace procedures, workplace health and safety and environmental protection practices and/or procedures, and planning and scheduling required for timber drying operation
- complied with legislation, standards and codes of practice relevant to timber drying operations
- monitored timber drying operations and output against confirmed production targets, specifications and performance indicators, and identified production and equipment problems and faults
- resolved one real or hypothetical problem in the timber drying operation
- recorded and reported production information including output, quality and faults
- evaluated timber drying operation and suggested one process improvement
- maintained inventory levels and coordinated equipment maintenance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and associated risks with timber drying, and risk control strategies as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- key requirements of legislation, standards and codes of practice relevant to timber drying operations
- workplace procedures, policies and standards relevant to planning and coordinating timber drying regarding:

- health and safety, including the use of personal protective equipment (PPE)
- environmental protection, including safe disposal of waste material and efficient use of energy
- quality assurance, including chain of custody requirements
- communication channels and protocols to communicate with team members
- recording and reporting information on output, quality, workplace health and safety and equipment faults
- types, uses, operation, capability, capacity and components of timber drying kilns from workplace environment
- timber characteristics in relation to drying ease and susceptibility to drying degrade
- principles and purpose of timber drying process and its effect on wood end-use
- advantages and limitations of timber drying processes
- timber drying methods
- types of biological attack, their impact on visual appearance and their degrading effect on wood, including:
 - decay
 - mould
 - fungi
- effect of surface mould and sapstain fungi on drying
- factors for consideration when scheduling kiln charges to optimise production throughputs
- timber drying kiln plant control and product testing equipment
- timber moisture content, including fibre saturation point and equilibrium moisture content
- impact of moisture content and moisture gradient on the end-use effectiveness of timber
- timber drying defects, reasons and control measures
- influence of temperature, relative humidity and rate of air circulation on drying rate
- target moisture content for major product groups according to relevant Australian Standards
- kiln drying schedules for drying timber at optimal rate and target moisture content without causing unacceptable degrade
- methods for problem identification, including equipment failures at process stages, bottlenecks in production process and product variations, and resolution strategies
- process improvement for timber drying, including:
 - data
 - methods
 - participative approaches
 - communication.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a timber processing plant, a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - timber drying equipment
 - timber for drying
 - PPE required for coordinating timber kiln drying operations
 - computers, keyboards, printers and software used to prepare planning and production documents
- specifications:
 - templates for documenting relevant information on timber kiln drying
 - production schedule for timber kiln drying
 - workplace procedures for timber kiln drying
 - workplace health and safety and environmental protection policies and/or procedures applicable to timber kiln drying
- relationships:
 - work team to communicate requirements related to timber kiln drying operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW4209 Plan for and supervise log processing operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to plan and supervise log processing operations in sawn product, veneer or wood chip production.

The unit applies to individuals who are engaged in the planning and supervision of log processing operations in a timber processing work environment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Assessment Requirements for FWPSAW4209 Plan for and supervise log processing operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and supervised the log processing operations for two production cycles for one of the following:

- sawn product production
- veneer production
- wood chip production.

In performing this task, the individual has:

- communicated and coordinated personnel effectively to follow planning, workplace health and safety, environmental protection and quality practices and/or procedures and scheduling requirements
- complied with legislation, standards and codes of practice relevant to log processing operations
- monitored the log processing operation against production schedule, targets, specifications and performance indicators, and identified and rectified operational and equipment problems and faults
- monitored implementation of quality processes and chain of custody requirements
- directed processed material to storage or transfer for further processing
- recorded and reported production information including output, quality, faults and safety data
- evaluated the log processing operation and suggested one process improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace procedures specific to planning and supervising log processing operations, including:
 - health and safety, including the use of personal protective equipment (PPE)
 - environmental protection, including the safe disposal of waste material
 - quality assurance and chain of custody requirements
 - communication channels and protocols to communicate with team members
 - recording and reporting information on output, quality, workplace health and safety and equipment faults
- hazards and associated risks with log processing operations, and risk control strategies as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- stages in log processing operations to produce sawn products, veneer or wood chips
- key requirements of legislation, standards and codes of practice relevant to log processing operations
- types, operation and capacities of log processing equipment and systems
- methods used to assess logs and identify and resolve potential processing problems
- log cutting patterns for maximising output and minimising waste
- workflow in log processing operations
- veneer/sawn timber product processing, including:
 - finished goods
 - processing quality
 - processing techniques
 - use of waste
- inventory management for planning and coordinating log processing, including:
 - avoid log degradation
 - identify out-of-specification logs
 - confirm log grades against quality requirements
 - maintain inventory levels
 - manage processes for reuse, recycling or disposal of sub-standard logs
- methods for problem identification, including equipment failures at process stages, bottlenecks in production process and product variations, and resolution strategies
- process improvement for log processing operations, including:
 - data
 - methods
 - participative approaches
 - communication.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a timber processing plant, a timber product manufacturing or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - log processing equipment
 - computers, keyboards, printers and software used to prepare planning and production documents
 - PPE relevant to log processing operations
- specifications:
 - production requirements for log processing
 - templates for documenting relevant information on log processing production and operations
 - workplace procedures for log processing operations
 - workplace health and safety and environmental protection policies and/or procedures applicable to log processing operations
- relationships:
 - work team to communicate requirements related to log processing operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSAW4210 Plan for and supervise timber dry mill operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to plan, supervise and evaluate the dry mill operations of a timber processing facility.

The unit applies to personnel responsible for planning and supervising dry mill operations in a timber processing work environment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sawmilling and Processing (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for timber dry mill production	1.1 Review production schedule and confirm production targets, production specifications and performance indicators 1.2 Confirm workplace health and safety, quality and environmental protection practices and/or procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Confirm legislation, standards and codes of practice relevant to timber dry mill operations</p> <p>1.4 Identify hazards and associated risks, and implement corrective actions according to workplace procedures</p> <p>1.5 Inspect raw materials, identify possible production and quality implications and communicate variations to production methods to team members</p> <p>1.6 Communicate production schedule, production targets, product specifications and performance indicators, to team members</p> <p>1.7 Maintain communication with team members to ensure production schedule and workplace health and safety, environmental protection and quality practices and/or procedures are met</p>
2. Supervise timber dry mill production	<p>2.1 Monitor workflow and production, and check that targets, performance indicators and product specifications are met</p> <p>2.2 Monitor all stages of production process in timber dry mill operations</p> <p>2.3 Monitor operation of plant and equipment used in timber dry mill operations</p> <p>2.4 Assist team members to evaluate timber defects, identify faults and rectify or report production problems</p> <p>2.5 Monitor implementation of quality processes and chain of custody requirements</p> <p>2.6 Evaluate effectiveness of production processes at key points</p> <p>2.7 Modify production processes or schedules, as required, to ensure optimum performance</p> <p>2.8 Monitor implementation of processes for reuse, recycling or disposal of sub-standard material</p> <p>2.9 Respond to breakdowns, disruptions to production and unplanned events, including equipment failures at process stages, bottlenecks in production process and product variations, according to workplace procedures</p> <p>2.10 Direct processed timber to storage or transfer for further processing</p> <p>2.11 Investigate, record and report information on output, quality, workplace health and safety and equipment faults, and resolve or report to appropriate personnel</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
3. Oversee timber dry mill maintenance and inventory management requirements	3.1 Monitor implementation of routine and preventative maintenance and cleaning requirements 3.2 Maintain product and material inventory levels to meet production and contingency requirements
4. Evaluate timber dry mill production	4.1 Analyse data and observations on production, operations, faults and output to identify opportunities for process improvement 4.2 Report on production, health and safety, environmental protection and quality metrics to appropriate personnel according to workplace procedures 4.3 Seek comments and feedback from team members to identify opportunities for process improvement 4.4 Analyse feasibility of potential process improvements 4.5 Document process improvements and communicate to appropriate personnel according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret/analyse technical documents and workplace policies and procedures relevant to timber dry mill operations
Writing	<ul style="list-style-type: none"> Complete workplace documents on routine and non-routine matters for a variety of audiences relevant to timber dry mill operations
Oral communication	<ul style="list-style-type: none"> Use appropriate vocabulary to communicate on technical and work team performance matters related to timber dry mill operations
Numeracy	<ul style="list-style-type: none"> Analyse statistical data on production, quality, health and safety and environmental protection relevant to timber dry mill operations

Assessment Requirements for FWPSAW4210 Plan for and supervise timber dry mill operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and supervised two production cycles for one softwood or hardwood dry mill.

In performing this task, the individual has:

- communicated and coordinated personnel to follow planning, workplace health and safety, quality and environmental protection practices and/or procedures and scheduling requirements
- complied with legislation, standards and codes of practice relevant to dry mill operations
- monitored dry mill operations and identified and rectified production and equipment problems and faults
- monitored implementation of quality processes and chain of custody requirements
- directed timber products to storage or transfer for further processing
- analysed, recorded and reported production information, including output, quality, faults and safety data
- evaluated dry mill operation and suggested one process improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to timber dry mill operations as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- key requirements of legislation, standards and codes of practice relevant to timber dry mill operations
- workplace procedures specific to planning and supervising timber dry mill operations, including:

- health and safety, including use of personal protective equipment (PPE)
- environmental protection, including disposing, recycling and reusing timber
- quality assurance and chain of custody requirements and practices
- communication channels and protocols to communicate with team members
- recording and reporting information on output, quality, workplace health and safety and equipment faults
- purpose, features and operation of plant and equipment used in timber dry mill operations
- type, procedures, common faults and equipment used in production processes in timber dry mill operations, including:
 - unloading
 - drying
 - planing
 - scanning
 - cutting
 - end matching
 - grading
 - sorting
 - packaging
 - despatch
- methods for problem identification, including equipment failures at process stages, bottlenecks in production process and product variations, and resolution strategies
- process improvement for timber dry mill operations, including:
 - data
 - methods
 - participative approaches
 - communication.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing plant, a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - timber dry mill
 - timber supplies
 - computers, keyboards, printers and software used to prepare planning and production documents
 - PPE suitable for timber dry mill operations

- specifications:
 - production requirements, quality and output data for timber dry mill operations
 - templates for documenting relevant information on timber dry mill production and operations
 - workplace procedures for timber dry mill operations
 - workplace health and safety and environmental protection policies and/or procedures applicable to timber dry mill operations
- relationships:
 - relevant personnel for the purposes of communicating requirements related to timber dry mill operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSIL2001 Select and mark trees for tending operations

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to select and mark trees for tending treatments including thinning, pruning and treating for pests and other tending treatments used to provide a healthy environment for tree and forest growth.

The unit applies to individuals who select and mark trees as part of forestry operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Silviculture (SIL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for tree selection and marking operations	1.1 Determine job requirements from work order or instruction, and where required seek clarification from appropriate personnel 1.2 Confirm safety and environmental requirements, including use of personal protective equipment, for the task according to workplace

Elements	Performance Criteria

Assessment Requirements for FWPSIL2001 Select and mark trees for tending operations

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence the individual has used one of the following methods to identify, select and mark trees for tending treatments as specified in one work order:

- selecting a predetermined number of trees in a given area
- counting and selecting trees at regular intervals
- selecting trees with particular characteristics
- selecting trees for particular treatment.

In undertaking this activity, then individual has:

- identified the tree selection method and planned tree selection and marking operation
- followed workplace safety and environmental requirements, including use of PPE
- marked or remarked trees for particular tending treatments including thinning, pruning, treatment for pests and other tending treatments
- completed workplace records of tree selection and marking operations including recommendations for further tree selection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- use and care of tools and materials used to select trees for tending operations:
 - tags
 - tape
 - paint
 - tools for blaze marking
- typical workplace hazards present during tree selection activities, and methods of minimising risks:

- slope
- water
- rock
- undergrowth
- slash
- depressions and holes
- falling or fallen branches
- key types of tending treatments and their purpose:
 - thinning
 - pruning
 - disease treatment
 - cleaning
 - seed collection
- characteristics of trees and distribution relevant to tending treatments:
 - dominance and vigour
 - leader defects
 - straightness
 - lean
 - size
 - angle
 - number of branches
 - spacing and overall tree health
 - stocking
 - green crowns
 - insect infestation
- common methods used to select trees for tending operations:
 - selecting predetermined number of trees in a given area
 - counting and selecting trees at regular intervals
 - selecting trees with particular characteristics
 - selecting trees for particular treatment
- workplace procedures specific to selecting and marking trees for tending:
 - workplace health and safety, with particular emphasis on risk control and use of PPE
 - communication reporting lines.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - trees to be selected for tending treatments
 - materials and equipment relevant for selecting and marking trees for tending treatments, including tags, tape, paint, tools for blaze marking
 - PPE suitable for selecting and marking trees for tending treatments
- specifications:
 - work order or instruction for selecting and marking trees for tending treatments
 - workplace health, safety and environmental policies and procedures applicable to selecting and marking trees for tending treatments
 - workplace procedures for selecting and marking trees for tending.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSIL2002 Plant trees by hand

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to select suitable tree stock, assess planting site and plant trees by hand as part of forestry operations.

The unit applies to individuals who plant trees by hand as part of forestry operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPSIL2002 Plant trees by hand

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has selected suitable tree stock, prepared the planting site and planted trees by hand in one sample plot of an area to be reforested.

In undertaking this activity, the individual has:

- evaluated the planting site, determined the species and quantity of trees to be planted and selected the appropriate work method taking into account site characteristics and tree stock
- complied with environmental and safety standards, including use of personal protective equipment (PPE)
- planted tree stock manually according to workplace procedures
- followed environmental protection practices in disposing of unsuitable tree stock
- maintained and stored equipment and remaining tree stock
- identified and solved one of the following problems when planting tree stock:
 - site issue
 - equipment issue
 - environmental hazard
 - safety issue
 - unsuitable planting stock
 - pests.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- typical environmental hazards present in forest planting situations, and methods of minimising risks:
 - slope
 - water

- rock
- undergrowth
- slash
- depressions and holes
- falling or fallen branches
- typical causes of stock defects:
 - pests
 - diseases
 - nutritional deficiencies
- visual characteristics of stock defects:
 - defective form, including double leaders
 - malformed or insufficient root systems
 - discoloured leaves or needles
 - root compaction in container grown stock
 - relationship between height and root collar diameter
- factors to consider for planting trees and how these affect quality and characteristics of grown trees:
 - straight positioning of seedlings
 - planting depth
 - spacing and row positioning of seedlings
 - root placement
 - soil compaction
- types of tools and equipment used to plant trees manually, and procedures for their safe use and maintenance:
 - spades
 - planting frames
 - planting tools
 - harnesses
 - augers
- workplace procedures specific to planting trees by hand:
 - workplace health and safety, with particular emphasis on risk control and use of PPE
 - communication reporting lines
- environmental protection practices for forest settings:
 - cleaning plant, tools and equipment
 - disposing of and recycling waste
 - returning the environment to its original or near to original condition on completion of activity
- safe manual handling techniques for operating in forest settings, specifically those for:
 - shifting
 - lifting

- carrying tree stock.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tree stock for planting
 - tools, equipment and materials used in manual tree planting
 - PPE suitable for manual tree planting
- specifications:
 - work order or instruction with specific instructions for types and quantities of trees to be planted
 - access to workplace health, safety and environmental policies and procedures applicable to manual tree planting
 - workplace procedures for manual tree planting.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL2003 Prune trees

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has completed two work orders each prescribing different quantities and species of trees to be pruned.

In undertaking this activity, the individual has:

- utilised appropriate equipment for pruning task selected from:
 - pruners
 - jack saw
 - pouch
 - steps
 - epicormic remover
 - pole saw
 - ladder
 - climbing gear
 - elevated work platform according to site requirements
- implemented workplace practices for assessing pruning quality and rectifying incorrect pruning to ensure quality of grown trees
- followed environmental protection practices for disposing of pruned materials
- complied with workplace health and safety standards, including use of personal protective equipment (PPE)
- completed workplace reports on pruning operations and equipment maintenance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- typical workplace hazards associated with pruning trees, and methods of minimising risks:
 - slope and uneven ground

- falling or fallen branches
- ladder instability
- climbing ladders
- loss of balance
- damp conditions
- reasons for pruning trees and using particular pruning techniques
- best seasonal timing for pruning of tree species relevant to the organisation
- criteria for selecting trees for pruning:
 - prescribed defects
 - green crowns
 - dominance
 - vigour
 - straightness
 - lean
 - size
 - angle
 - number of branches
 - overall tree health
 - stocking
 - spacing and quality requirements
- purpose, features and safe operation of tree pruning tools and equipment:
 - pruners
 - jack saw
 - pouch
 - steps
 - epicormic remover
 - pole saw
 - ladder
 - climbing gear
 - elevated work platform according to site requirements
- environmental protection practices for disposing of pruned materials:
 - recycling pruned material where appropriate
 - sending pruned material to landfill only where it cannot be recycled
 - redirecting pruned material for energy recovery
- workplace procedures specific to pruning trees:
 - workplace health and safety, with particular emphasis on risk control and use of PPE
 - communication reporting lines
 - recording and reporting pruning processes and equipment faults.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - trees to prune
 - tools, machinery, equipment and materials used to prune trees
 - PPE suitable for tree pruning operations
- specifications:
 - work order or instruction with specific instructions for types and quantities of trees to be pruned
 - access to workplace health, safety and environmental policies and procedures applicable to tree pruning
 - workplace procedures for tree pruning.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- completed one forest data or sample collection task as described in a work order that sets out the sampling area, the purpose for data or sample collection, the type of data or samples to be collected and the data or sample collection method.
- the data or sample collected must relate to one or more of the following materials:
 - foliage
 - wood
 - soil
 - seeds
 - pollen
 - weeds
 - insects
- complied with environmental and safety standards, including use of personal protective equipment (PPE)
- recorded the results of the forest data or sample collection in a format suitable for assessment or analysis.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common purposes for collecting forest data or samples:
 - calculating volume of timber and residue
 - inventory control
 - stock count

- assisting with trials
- environmental assessment
- conducting pest and disease surveys
- documenting site factors
- cultural heritage
- methods used to identify boundaries and corners and for marking sample areas:
 - pegging
 - placing flags
 - placing balloons
 - spraying
- types of samples commonly collected, and techniques to collect and label:
 - foliage
 - wood
 - soil
 - seeds
 - pollen
 - weeds
 - insects
- typical stock defects and visual characteristics from the effects of:
 - pests
 - diseases
 - nutritional deficiencies
- typical hazards present in forest environments, and methods of minimising risks and moving through the environment safely:
 - slope
 - water
 - rock
 - undergrowth
 - slash
 - depressions and holes
 - falling or fallen branches
- format, content and use of documents used to record forest data and sample collection and methods used to record information for analysis
- purpose, features and safe operation of forest data and sample collection equipment:
 - measuring tape
 - callipers
 - measuring poles
 - paint
 - purpose-specific balloons
 - flags

- pegs
- mallet
- pruning shears
- sample containers
- digital equipment
- lasers
- Global Positioning System (GPS)
- drones
- workplace procedures specific to collecting data and samples:
 - workplace health and safety, with particular emphasis on use of PPE
 - communication reporting lines
 - recording and reporting data and sample collection.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site for forest data or sample collection
 - tools, equipment and materials for forest data or sample collection
 - PPE suitable for forest data or sample collection
- specifications:
 - work order or instruction with specific instructions for forest data or sample collection
 - workplace health, safety and environmental policies and procedures applicable to forest data or sample collection
 - workplace procedures for forest data or sample collection.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has measured, identified any abnormalities and recorded data on tree measurements, characteristics and abnormalities for five trees selected from one of the following types of trees:

- native trees
- plantation trees.

In undertaking this activity, the individual has:

- carried out the following tree measurements on five native or five plantation trees without causing damage to tree, environment, equipment or personnel:
 - stand height
 - log volume and length
 - diameter and girth (over or under bark at breast height or ground level)
- classified the stem form or crown class of five native or five plantation trees
- identified tree abnormalities in five native or five plantation trees, including:
 - butt swell
 - double leaders
 - heavy branching
 - ramicorns
- used and maintained appropriate measuring tools, including:
 - diameter tapes
 - length tapes
 - optical wedges
 - clinometers
 - digital measuring equipment
- recorded data on tree measurements, characteristics and abnormalities for five native or five plantation trees

- complied with environmental and safety standards, including use of personal protective equipment (PPE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of measuring trees
- units of measurements used in tree measurements
- tree measuring techniques, including relevant mathematical calculations and basic trigonometry, including:
 - tolerances, allowances, calibration requirements and special procedures
 - tree diameter and girth (over or under bark at breast height or ground level)
 - tree height
 - log volume and length
- workplace procedures for measuring trees
- environmental risks and hazards associated with tree measurement
- species and characteristics of vegetation to be measured, including plantation and native forest trees
- tree abnormalities, including:
 - butt swell
 - double leaders
 - heavy branching
 - ramiforms
- types of measuring tools, and procedures for their safe use and maintenance, including:
 - diameter tapes
 - length tapes
 - optical wedges
 - clinometers
 - digital measuring equipment
- established communication channels and protocols
- procedures for recording and reporting tree measurements and abnormalities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - forest or plot area

- tools, equipment and materials used to measure trees
- PPE used in measuring trees
- specifications:
 - map or plan containing trees to be measured
 - workplace health, safety and environmental policies and procedures applicable to measuring trees
 - workplace procedures for measuring trees.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSIL3001 Apply sustainable silviculture treatments

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to assess tree condition and select and apply sustainable silviculture treatments to meet environmental and production requirements in plantation and native forest settings.

The unit applies to individuals who are involved in applying sustainable silviculture treatments as part of forestry operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPSIL3001 Apply sustainable silviculture treatments

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assessed tree condition and selected, applied, monitored and reported on the use of one silviculture treatment in one sample plot in one of the following types of forested areas:

- plantation
- native forest.

In undertaking this activity, the individual has:

- assessed tree condition in one sample plot
- selected and applied one of the following sustainable silviculture treatments in the sample plot to meet production and environmental requirements:
 - slash or harvesting residue burning
 - scarification
 - enhancement planting or supplementary planting
 - fertilisation
 - thinning
 - pruning
 - waste thinning and non-commercial thinning
 - commercial thinning
 - harvesting
 - gapping
- monitored the implementation of the selected sustainable silviculture treatment
- reported on the effectiveness of the selected sustainable silviculture treatment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of sustainable forestry:
 - conservation of biological diversity
 - maintenance of productive capacity of forest ecosystems
 - maintenance of ecosystem health and vitality
 - conservation and maintenance of soil and water resources
 - maintenance of forest contribution to global carbon cycles
 - maintenance and enhancement of long-term multiple socioeconomic benefits
 - legal, institutional and economic framework for forest conservation and sustainable management
- legislative and regulatory requirements relevant to silviculture operations in plantation and native forest settings
- environmental protection requirements relevant to silviculture operations
- sustainable silviculture treatments:
 - slash or harvesting residue burning
 - scarification
 - enhancement planting or supplementary planting
 - fertilisation
 - thinning
 - pruning
 - waste thinning and non-commercial thinning
 - commercial thinning
 - harvesting
 - gapping
- growth habits of specific species under varying soil and environmental conditions
- tree retention
- stocking criteria
- regeneration requirements of different plantation and native tree species
- soil conservation and erosion mitigation techniques and their advantages and disadvantages for specific sites and habitats
- changes in forest or plantation conditions that may require adjustments to silviculture work practices to protect environment:
 - recently declared or potentially rare and endangered species identified
 - unexpected flora or fauna encountered
 - new or potential habitat
 - ecology or ecosystem changes
 - undergrowth and ground cover
 - canopy

- environmental features
- operational conditions
- ground conditions
- weather conditions
- wind
- dust
- smoke
- fire
- cultural sensitivity
- forest type
- land tenure
- quality of roads and tracks
- neighbouring stakeholders
- effective communication procedures and protocols
- procedures for recording and reporting workplace activity.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - native forest or plantation
 - materials and equipment required for applying different silviculture treatments
 - personal protective equipment
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to the use of sustainable silviculture treatments
 - workplace procedures for sustainable silviculture treatments.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL3002 Plant trees mechanically

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has selected suitable tree stock, prepared the planting site and planted trees mechanically in one sample plot of an area to be reforested.

In undertaking this activity, the individual has:

- evaluated the planting site, determined the species and quantity of trees to be planted and selected the appropriate work method taking into account site characteristics, machine type and tree stock
- complied with environmental and safety standards, including use of personal protective equipment (PPE)
- safely set up and operated a planting machine to plant forest trees taking into account production target, machine capacity, manufacturer instructions and workplace procedures
- followed environmental protection practices in disposing of unsuitable tree stock
- maintained and stored planting machine and remaining tree stock
- identified and resolved one problem associated with mechanically planting tree stock selected from:
 - mechanical equipment fault or malfunction
 - environmental hazard
 - safety hazard
 - site characteristic
 - unsuitable planting stock
 - pest or disease.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- typical hazards present in mechanised forest tree planting situations:

- slope
- water
- rock
- undergrowth
- slash
- depressions and holes
- falling or fallen branches
- equipment hazards
- fuel
- manual handling
- typical tree stock defects and visual characteristics:
 - pests
 - diseases
 - nutritional deficiencies
- factors to consider for planting trees, and how these affect quality and characteristics of grown trees:
 - planting depth
 - spacing and row positioning of seedlings
 - root placement
- purpose, features, operation and maintenance of tree planting machines
- workplace procedures specific to planting trees mechanically:
 - workplace health and safety, with particular emphasis on equipment lock-out, risk control and use of PPE
 - communication reporting lines
- environmental protection practices for forest settings:
 - cleaning plant, tools and equipment
 - disposing of and recycling waste
 - returning the environment to its original or near to original condition on completion of activity
- safe manual handling techniques for operating in forest settings, specifically those for:
 - shifting
 - lifting
 - carrying tree stock.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - tree stock for planting
 - planting machine, tools, equipment and materials used in mechanical tree planting
 - PPE suitable for mechanical tree planting
- specifications:
 - work order or instruction with specific instructions for types and quantities of trees to be planted
 - workplace health, safety and environmental policies and procedures applicable to mechanical tree planting
 - workplace procedures for mechanical tree planting.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSIL3003 Use mechanised equipment for forestry site preparation

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to perform forestry site preparation activities using mechanised equipment.

Individuals seeking to undertake this unit should have prior experience or competency in *operating a bulldozer, excavator, skidder or tractor*.

The unit applies to individuals who use forestry machines for forestry site preparation operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPSIL3003 Use mechanised equipment for forestry site preparation

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared one forestry site using one item of mechanised equipment and relevant ground engaging attachments selected from:

- bulldozer
- excavator
- skidder
- tractor.

In undertaking this activity, the individual has:

- used two of the following forestry site preparation methods:
 - mounding
 - scaling
 - scarification
 - disc trenching
 - shearing
 - piling
 - bedding
 - ploughing
 - raking
 - ripping
 - drum chopping
 - disking
 - scalping
 - mulching
- conducted the forestry site preparation activities on one of the following terrain types:

- flat terrain
- steep slopes
- carried out routine maintenance on the selected mechanical equipment and attachments
- complied with environmental and safety standards, including use of personal protective equipment (PPE)

recorded and reported production outcomes, equipment faults and operator machine maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements in production, site safety and environmental management plans relevant to forest site preparation operations
- industry standards, codes of practice and guidelines for forest site preparation operations, and their requirements as outlined in site safety and environmental management plans
- safe work procedures and safe working zones in forest site preparation operations
- hazards and risks related to operating mechanised equipment for forestry site preparation, and factors that can change or introduce new hazards
- types and correct positioning of warning signs, vehicle-to-vehicle communication systems and procedures to maintain communication and workplace safety during forestry site preparation operations
- firefighting and emergency response procedures
- potential environmental impacts of forestry site preparation activities on:
 - cultural heritage
 - flora
 - fauna
 - ground compaction
 - water contamination
 - soil erosion
- forestry site preparation activities:
 - mounding
 - scaling
 - scarification
 - disc trenching
 - shearing
 - piling
 - bedding
 - ploughing
 - raking
 - ripping

- drum chopping
- disking
- scalping
- mulching
- environmental protection procedures relevant to forest site preparation operations
- types and uses of ground-engaging attachments
- effects of slope and terrain conditions on equipment setup, operation and stability
- machine specifications, restrictions and safe operating procedures, stability and operation in different terrain conditions and slopes, and methods to shut down the machine as outlined in workplace procedures or operator manual
- methods to conduct machine pre-operational checks and detect faults as outlined in workplace procedures or operator manual
- machine maintenance and servicing requirements as outlined in operator manuals
- reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, and equipment maintenance
- features, components, capacity and uses of mechanised equipment used in forestry site preparation
- reasons and procedures for maintenance of mechanised equipment and ground-engaging attachments.
-

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forestry environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - mechanised equipment and ground-engaging attachments used in forestry site preparation
 - forestry site for site preparation activities
 - PPE required in site preparation operations
 - vehicle-to-vehicle communication system
- specifications:
 - work order or instruction detailing forestry site preparation activities to be carried out by operator
 - workplace safety and environmental protection policies and procedures applicable to forestry site preparation activities operations
 - production plan
 - site emergency procedure
 - workplace safe operating procedures for mechanised equipment used in forestry site preparation

- user manual for vehicle-to-vehicle communication system.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSIL4001 Plan for and coordinate forest site preparation operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan for and coordinate forest site preparation activities to create favourable growing areas for seedlings and good germination spots for seeds.

The unit applies to individuals involved in planning and supervising site preparation activities as part of forestry operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Silviculture (SIL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for site preparation	1.1 Confirm site location and site preparation requirements according to site preparation plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Confirm local authority coverage, forest establishment boundaries and forest design plan</p> <p>1.3 Confirm site environmental protection measures to minimise detrimental or excessive soil disturbance and other adverse environmental impacts</p> <p>1.4 Confirm fire prevention measures to minimise risk of fire in ground vegetation and logging debris</p> <p>1.5 Review site characteristics and confirm site preparation methods and equipment to be used according to site preparation plan</p> <p>1.6 Schedule personnel, site preparation activities, materials and equipment</p> <p>1.7 Determine cost of site preparation operations</p>
2. Coordinate site preparation	<p>2.1 Direct personnel undertaking site preparation activities</p> <p>2.2 Schedule implementation of site preparation activities according to site preparation plan</p> <p>2.3 Review and adjust planned site preparation activities, taking into account actual site conditions</p> <p>2.4 Select treatment pattern, taking into account time restraints, site characteristics, planter access and aspect according to site preparation plan</p> <p>2.5 Communicate with forestry management company personnel and operational staff, including fire management personnel, to ensure that work is coordinated effectively on site</p> <p>2.6 Coordinate implementation of fire prevention and control measures according to workplace procedures</p>
3. Monitor site preparation	<p>3.1 Coordinate implementation of sampling techniques to monitor site preparation operations according to workplace procedures and contract requirements</p> <p>3.2 Communicate with operational staff to collect and collate data from sample plots</p> <p>3.3 Review data from sample plots and coordinate remedial action as required</p> <p>3.4 Report on site preparation operations to appropriate personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret familiar and detailed organisational policies and procedures and complex documents such as forest site preparation plans
Writing	<ul style="list-style-type: none"> Produce detailed reports on the outcomes of forest site preparation activities
Oral communication	<ul style="list-style-type: none"> Ask open and closed questions and use active listening techniques to gather information related to forest establishment activities
Numeracy	<ul style="list-style-type: none"> Use mathematical skills to estimate and calculate costs associated with site preparation operations

Assessment Requirements for FWPSIL4001 Plan for and coordinate forest site preparation operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated and monitored one site preparation operation in one of the following types of forested areas:

- native forest
- plantation.

In undertaking this activity, the individual has:

- reviewed the site preparation plan and confirmed the site location, preparation requirements, local authority coverage, forest establishment boundaries, forest design plan, fire prevention and site environmental protection measures
- confirmed site characteristics, site preparation methods and personnel, equipment and materials requirements
- determined the cost of site preparation operations
- coordinated and monitored site preparation activities
- reviewed sampling data and reported on site preparation operations according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- soil profile:
 - vegetation
 - humus
 - mineral soil
- purpose of site preparation:
 - quick development of the root system (good establishment)

- high survival
- good growth
- ways in which site preparation improves growing conditions:
 - temperature in root zone increased
 - available oxygen in soil increased
 - risk of frost damage decreased
 - moisture problems can be overcome
 - competing vegetation reduced
 - nutrient availability increased
 - risk of insect attack decreased
 - planting can be easier
- consequences of use of incorrect site preparation methods
- environmental impact of site preparation:
 - soil compaction and displacement
 - sedimentation of waterways
 - habitat loss
- characteristics of sites not suitable for mechanised site preparation:
 - dry nutrient-poor soils
 - naturally regenerated sites
 - small wet pockets
- procedure for site preparation planning, including determination of cost of site preparation operations
- equipment and site preparation methods:
 - mounding
 - scaling
 - scarification
 - disc trenching
 - shearing
 - piling
 - bedding
 - ploughing
 - raking
 - ripping
 - drum chopping
 - disking
 - scalping
 - mulching
- criteria for choosing site preparation method
- methods for matching the site preparation method to the actual site, taking into account:
 - soil texture

- slash and obstacles
- humus layer
- slope
- treatment patterns:
 - concentric pattern
 - back and forth pattern
- monitoring site preparation:
 - sampling methods used for different soil preparation methods
 - remediation treatments.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - a site preparation plan
 - a section of native forest or plantation where site preparation operations are to be implemented
 - required equipment and materials for planned site preparation operations
 - personnel to undertake forest site preparation operations
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to forestry operations
 - workplace policies and procedures relevant to forest site preparation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL4002 Plan for and coordinate thinning operations in a native forest or plantation

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated and monitored the implementation of one thinning operation in one of the following types of forested areas:

- native forest
- plantation.

In undertaking this activity, the individual has:

- planned and coordinated the implementation of a thinning operation to achieve one or more of the following:
 - maintain stand health
 - improve productivity and long-term sustainability
 - provide for end product mix requirements
 - manage notifiable weeds
- determined and scheduled personnel, equipment and materials required for thinning operation
- communicated with and supervised operational personnel involved in thinning activities
- monitored thinning operations to ensure compliance with production, quality, safety and environmental requirements
- reviewed and reported on outcomes of thinning operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of thinning operations:
 - maintain the health of the stand
 - improve productivity and long-term sustainability

- provide for end product mix requirements
- manage notifiable weeds
- reduce fire risk and disease
- regulate growth rate
- reduce competition in root and crown
- workplace procedures for planning and implementing thinning operations
- environmental protection requirements relevant to planning and implementing thinning operations
- methods and products used for thinning operations, including:
 - mechanical
 - chemical
- measurements relevant to thinning operations:
 - height
 - girth
 - number
 - spread
- processes for managing risks and hazards associated with thinning operations
- safe handling, use, transport and storage of chemicals
- relevant biology and stand dynamics for the species
- common diseases, pests and nutritional deficiencies for the species being thinned
- common weed and herbicide interactions
- monitoring points:
 - time based
 - frequency based
 - stream monitoring
 - mechanical damage to trees
- types, safe use and maintenance of tools and equipment used for thinning operations
- authorisations and approvals processes, including:
 - permits
 - approvals
 - licenses relating to neighbouring sites or properties
 - hours of operation
 - use and application of chemicals
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - forest or plantation stand to be thinned
 - personnel to undertake thinning operations
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to thinning operations
 - workplace procedures for thinning operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL4003 Plan for and coordinate stem improvement operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated and monitored stem improvement activities for one sample forested area using one of the following methods:

- pruning using mechanical or hand tools
- using chemicals or biological agents.

In undertaking this activity, the individual has:

- planned and coordinated a safe and effective stem improvement operation
- ensured personnel involved in stem improvement operations complied with workplace health, safety and environmental policies and procedures including:
 - recycling pruned material
 - disposing of pruned material that cannot be recycled due to chemicals or biological agents used
- identified and recommended methods and strategies to manage stem quality and growth
- determined and documented measurable performance indicators, specifications and targets for work
- supervised staff involved in carrying out stem improvement activities
- monitored stem improvement operation for efficiency and effectiveness
- reviewed and reported on outcomes of stem improvement activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of stem improvement:
 - encourage tree growth to suit marketing requirements
 - increase yield

- reduce tree defects
- regulations, standards, codes of practice and safe practices for coordinating stem improvement
- environmental protection requirements, including the safe disposal of waste material and chemicals
- stem improvement methods:
 - pruning using mechanical or hand tools
 - using chemicals or biological agents
- pruning techniques for target species
- tools and equipment used for stem improvement operations, and their safe use and maintenance, including:
 - pruners
 - jack saw
 - pouch
 - steps
 - epicormic remover
 - pole saw
 - ladder
 - climbing gear
- procedures for working safely at heights
- safe handling, use, storage and transport of chemicals
- procedures for recycling pruned material
- procedures for disposing of pruned material that cannot be recycled due to chemicals or biological agents used
- recognition and identification of species and plant identification sources
- approvals and documentation required for the use of chemical or biological agents
- hazards that may apply to stem improvement activities, including:
 - adverse weather conditions
 - adverse terrain conditions
 - use of machinery
 - use of chemicals or biological agents
 - procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- site that requires stem improvement operations
- tools, machinery, equipment and materials for stem improvement activities
- personal protective equipment suitable for stem improvement activities
- personnel to undertake stem improvement activities
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to stem improvement activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL4004 Plan for and coordinate forest establishment operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and coordinated forestry operations for establishing or re-establishing one section of a native forest or plantation in one of the following environments:

- monoculture environment
- multiple-use environment.

In undertaking this activity, the individual has:

- reviewed the forest establishment plan, and confirmed the method of forest establishment, planting strategy and personnel, equipment and materials requirements
- coordinated and scheduled the implementation of forest establishment activities
- identified ways of improving future forest establishment or re-establishment operations
- ensured personnel engaged in establishment activities complied with establishment plan, safety, environmental, legislative and workplace requirements
- reviewed and reported on the outcomes of forest establishment operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection requirements for the establishment of a forest, including the following:
 - ground growth
 - canopy
 - general forest lean
 - wind speed and direction
 - fallen trees

- density of trees
- ground slope
- soil and water protection
- ground hazards
- obstacles
- drainage
- workplace policies and procedures for implementing a forest establishment plan
- forest establishment and planning procedures, including:
 - forest design and map details
 - site preparation
 - access considerations
- planting for forest or streamside:
 - buffers
 - filter strips
 - contours
 - gullies
 - crossing points
- environmental considerations for protection of:
 - habitat
 - rainforest
 - flora and fauna
 - landscape
 - excluded areas
 - rubbish removal
- procedures and environmental considerations for preparation of:
 - permanent roads
 - temporary roads
 - landings
 - dumps
 - snig tracks
 - forwarding tracks
 - adjoining land
 - wet weather restrictions
 - fire protection requirements
- forest design and planting strategies
- regeneration principles and methods
- topography, including:
 - terrain levels
 - soil types
 - contours

- elevations
- slopes
- gullies
- adjoining land parcels
- land use zoning and relevant approvals and permits, including:
 - private zoning
 - government zoning
- resources, tools and equipment used for the implementation of a forest plan, and procedures for their safe use and maintenance.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - a forest establishment plan
 - a section of native forest or plantation that may be either a monoculture or multiple-use environment
- specifications:
 - workplace safety and environmental policies and procedures applicable to forestry operations
 - workplace policies and procedures relevant to forest establishment activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPSIL4005 Plan for and coordinate a stand health and nutrition program

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan and monitor the health and nutrition of a stand of trees.

The unit applies to individuals whose work involves managing the health and nutrition of trees in a forest.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Silviculture (SIL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan stand health and nutrition program	1.1 Review stand health and nutrition requirements and site environmental protection measures and regulations 1.2 Obtain and analyse information that will impact on stand health

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>and nutrition planning</p> <p>1.3 Select methods of ensuring stand health and maintaining the appropriate level of stand nutrition</p> <p>1.4 Develop and document performance indicators and targets for stand health and nutrition</p> <p>1.5 Obtain required approvals from relevant authorities</p> <p>1.6 Document and communicate stand health and nutrition program to appropriate personnel</p>
2. Implement and monitor stand health and nutrition program	<p>2.1 Communicate stand health and nutrition program to operational staff</p> <p>2.2 Coordinate resources required for implementation of the stand health and nutrition program</p> <p>2.3 Monitor the implementation of the stand health and nutrition program and make necessary adjustments</p> <p>2.4 Identify problems with stand health and nutrition, including nutritional deficiencies in target species, and recommend suitable remedial strategies</p> <p>2.5 Ensure compliance with workplace procedures and safety and environment protection requirements</p> <p>2.6 Identify and control potential and existing risks and hazards in the work area</p> <p>2.7 Respond to matters that impact or are likely to impact on stand health and nutrition</p>
3. Review outcomes of stand health and nutrition program	<p>3.1 Collect data on stand health and nutrition, and review effectiveness of activities</p> <p>3.2 Analyse budgets and cost-effectiveness of stand health and nutrition program</p> <p>3.3 Document outcomes of the stand health and nutrition program against established performance indicators, and report to relevant personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret familiar and detailed workplace policies and procedures and complex documents
Writing	<ul style="list-style-type: none"> Produce detailed reports on the outcomes of activities directed at improving stand health and nutrition
Oral communication	<ul style="list-style-type: none"> Ask open and closed questions and use active listening techniques to gather information related to the monitoring of stand health and nutrition
Numeracy	<ul style="list-style-type: none"> Interpret complex numerical data relating to stand health and nutrition

Assessment Requirements for FWPSIL4005 Plan for and coordinate a stand health and nutrition program

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated the implementation and reviewed and reported on the outcomes of one stand health and nutrition program.

In undertaking this activity, the individual has:

- developed and implemented a stand health and nutrition program that includes:
 - relevant policies and procedures
 - budgets
 - timelines
 - resources (people, materials, equipment)
 - activities and tasks
 - performance indicators
- followed workplace policies and procedures for managing the health and nutrition of one stand of trees
- monitored the implementation of the stand health and nutrition program
- identified problems with stand health and nutrition, including nutritional deficiencies in target species, and recommended suitable remedial strategies
- ensured compliance with workplace procedures and safety and environment protection requirements
- reviewed and reported on the outcomes of the stand health and nutrition program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- stand health and nutrition requirements, indicators and treatment of the target species, including:
 - stress problems

- pests and diseases, including insects, fungal, bacterial, viral, birds and animals
- structural
- storm damage
- root damage
- gassing
- compaction
- incineration
- nutritional deficiencies in target species, and remedial strategies
- chemical
- competition
- poor draining
- vandalism
- salt
- drought
- procedures for identifying and evaluating structural defects in trees
- methods to identify pests, diseases and physiological damage to trees
- methods to manage tree pests and diseases
- methods of collecting and storing specimens for identification
- methods to improve stand health, including:
 - application of fertilisers
 - application of pesticides and herbicides
 - pruning techniques
 - competition management techniques
 - browsing control techniques
- environmental protection requirements for the site or setting
- relevant approvals, including where:
 - the use of chemicals or biological agents is intended
 - browsing control techniques may impact on neighbouring properties
 - consideration of environmental sustainability issues apply
- workplace health and safety policies and procedures
- budgets and planning tools.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - a forest area to implement stand health and nutrition program

- specifications:
 - workplace safety and environmental policies and procedures applicable to forestry operations
 - workplace policies and procedures relevant to planning and coordinating stand health and nutrition.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL4006 Plan for and coordinate a pests and diseases assessment

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated the implementation and reported on the outcomes of one pest or disease assessment in one of the following types of forested areas:

- native forest
- plantation.

In undertaking this activity, the individual has:

- followed workplace policies and procedures and biosecurity strategies relevant to conducting a pest or disease assessment
- identified the physical, biological and environmental indicators of the presence of pests or diseases in a forested area
- accurately and safely determined the level and presence of pests or diseases in a sample area
- coordinated people, resources and equipment for a pest or disease assessment
- communicated with contractors and operational staff to facilitate the implementation of the pest or disease assessment
- accurately interpreted data collected through the pest or disease assessment
- identified ways of improving future pest or disease assessments
- recorded and reported on the outcomes of the pest or disease assessment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices for conducting pests and diseases assessment

- environmental protection requirements and biosecurity strategies relevant to conducting a pests and diseases assessment
- workplace policies and procedures for conducting pests and diseases assessment
- types of pests and diseases, including:
 - fauna, including avian fauna, rodents, feral cats, wild dogs and insects
 - flora, including weeds and invasive plants and diseases that affect plants
- methods and techniques to assess animal populations, diseases, pests and weeds
- methods for measuring and collecting data on pests and diseases
- safe use and application of tools and equipment used to conduct a pests and diseases assessment
- procedures to obtain a permit or licence to conduct a pests and diseases assessment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - forest site suitable to conduct a pests and diseases assessment
- specifications:
 - workplace safety and environmental policies and procedures applicable to forestry operations
 - workplace policies and procedures relevant to pests and diseases assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL4007 Plan for and coordinate a regeneration rate assessment

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated the implementation and monitoring and reported on the outcomes of one regeneration rate assessment within a forestry area.

In undertaking this activity, the individual has:

- followed workplace policies and procedures relevant to scheduling and implementing the regeneration rate assessment
- coordinated people, materials and equipment required for the regeneration assessment
- coordinated regeneration monitoring in a sample area
- accurately interpreted regeneration data
- ensured personnel and contractors engaged in implementation and monitoring activities complied with environmental, legislative and workplace requirements
- identified ways of improving future regeneration rate assessments
- recorded and reported the outcomes of the regeneration rate assessment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace and site standards, requirements, policies and procedures for monitoring regeneration rates
- risks and hazards in a forest setting
- environmental and legislative requirements associated with regeneration rate assessments
- types and rates of regeneration of the following:
 - seeding
 - seedlings
 - coppice

- standard sprouts
- assessment techniques for regeneration rates, including:
 - monitoring germination and survival rates
 - observing the effects of browsing, the distribution of new growth in square metres and regeneration rates
 - calculating basal areas
- types of tools and equipment used for measuring regeneration in a forest and procedures for their safe use and maintenance.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - a forest area that is undergoing regeneration
- specifications:
 - workplace safety and environmental policies and procedures applicable to forestry operations
 - workplace policies and procedures relevant to monitoring regeneration activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated and reported on the outcomes of one forest site assessment.

In undertaking this activity, the individual has:

- followed workplace policies and procedures relevant to assessing a forest site
- calculated and analysed data on the soils, terrain, slope, rainfall and environmental specifications of a forest site in a sample area
- coordinated people, resources and equipment for the efficient assessment of a forest site
- ensured compliance with safety, quality, environmental protection and workplace procedures by personnel engaged in the forest site assessment
- identified and reported ways of improving forest site assessment process
- recorded and reported on the outcomes of the forest site assessment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace policies and procedures for conducting a forest site assessment
- risks and hazards associated with assessing a forest site
- environmental and legislative requirements related to forest site assessment
- site factors and how they affect different species
- forest site characteristics, including:
 - soil
 - aspect
 - terrain
 - slope

- rainfall
- temperature
- water courses
- wind speed and direction
- vegetation
- ground hazards and obstacles
- environmental specifications
- techniques and methods for assessing a forest site
- types of tools and equipment for conducting a forest site assessment, and procedures for their safe use and maintenance.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - a forest area for site assessment
 - plant, tools and equipment used in a forest site assessment
- specifications:
 - workplace safety and environmental policies and procedures applicable to forestry operations
 - workplace policies and procedures relevant to conducting a forest site assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPSIL4009 Plan for and coordinate tending operations in a native forest or plantation

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, coordinated monitored and reported on one tending operation in one of the following types of forested area:

- native forest
- plantation.

In undertaking this activity, the individual has:

- reviewed forest plan and objectives of tending operations
- confirmed environmental protection and workplace health and safety requirements for the tending operation
- consulted with stakeholders and prepared a tending plan that addresses quality and performance targets
- operationalised, monitored and reported on the tending operation according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection requirements, including:
 - soil disturbance measures
 - retention tree damage
 - fungal hygiene measures
 - identification of habitat trees
 - chemical handling and application procedures
- workplace policies and procedures for managing tending operations that relate to:

- health and safety
- organisational, legislative and environmental regulations, procedures, practices and precautions
- adherence to site environmental imperatives
- specifications
- quality
- performance targets
- tending operations, including the following aspects:
 - the health of the stand
 - productivity and long term sustainability
 - end product mix requirements
 - the management of notifiable weeds
- impact of tending operations on forest productivity
- authorisations relevant to tending operations:
 - permits
 - approvals
 - licensing
- biology of relevant forest health problems
- tree growth and development
- weed species and herbicide interactions
- hydrology and hydrological principles
- plant identification and plant classification
- ecology and ecological interactions
- soil types and structure
- hazards related to managing tending operations:
 - use of chemicals
 - off-site effects
 - tools and equipment
 - dangers to the public
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - a forested area for tending operation
 - computing equipment for documenting plans and reports on tending operations

- specifications:
 - maps, plans and data required for preparation of tending plan
 - workplace safety and environmental policies and procedures applicable to tending operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM2204 Machine material

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up and operate basic static machines used for sawing, planing, sanding and drilling. This includes identifying requirements in a work order, following workplace health and safety procedures, planning machining processes, setting up and operating static machines and performing routine machine maintenance.

The unit applies to individuals who operate basic static machines in a timber processing or manufacturing facility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for machining	1.1 Review work order and check with appropriate personnel 1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>handling techniques</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with machining material</p> <p>1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency</p> <p>1.5 Obtain type and quantity of material to be machined from storage location</p> <p>1.6 Select appropriate equipment, and check for operational effectiveness according to manufacturer recommendations</p> <p>1.7 Plan material machining process according to work order</p>
2. Set up machines	<p>2.1 Check safety equipment, including emergency stops, gauges, guards and controls</p> <p>2.2 Complete machine settings and adjustments according to job requirements and manufacturer instructions</p> <p>2.3 Complete trial runs to check machine operation and accuracy and quality of finished work</p> <p>2.4 Accept or reject trialled material, and reuse, recycle or dispose of according to workplace and environmental protection practices</p> <p>2.5 Adjust machine setting as necessary</p>
3. Operate machines	<p>3.1 Complete equipment pre-start-up checks according to workplace procedures</p> <p>3.2 Operate machine according to manufacturer instructions, safe operating procedures and environmental protection practices</p> <p>3.3 Monitor machine operation to ensure product quality and output</p> <p>3.4 Repair sub-quality items to minimise waste, and recycle or discard others according to workplace and environmental protection practices</p> <p>3.5 Stack material safely in designated location according to work order requirements</p>
4. Complete operator maintenance	<p>4.1 Follow workplace safety procedures to lock out equipment</p> <p>4.2 Keep machine area clear of dust, off-cuts and debris according to safety and site requirements</p> <p>4.3 Inspect saw blade, knife, drill or sanding belt condition according to workplace and manufacturer guidelines</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.4 Inform appropriate personnel of need to replace saw blade, knife, drill or sanding belt according to workplace and manufacturer procedures</p> <p>4.5 Record and report machining outcomes, equipment faults and maintenance requirements to appropriate personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets key requirements in workplace health and safety and environmental procedures for clearing sawn waste from work area
Writing	<ul style="list-style-type: none"> Completes basic written production reports and tally sheets
Oral communication	<ul style="list-style-type: none"> Responds to oral questions on routine matters related to output quality
Numeracy	<ul style="list-style-type: none"> Uses basic arithmetic skills to identify quantities of required material within work plans, and counts raw materials
Navigate the world of work	<ul style="list-style-type: none"> Follows workplace policies and procedures relevant to work role
Interact with others	<ul style="list-style-type: none"> Participates in conversations to inform maintenance staff about equipment faults
Get the work done	<ul style="list-style-type: none"> Identifies and responds to routine problems

Assessment Requirements for FWPTMM2204 Machine material

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, safely set up and operated basic static machines for each of the following operations: sawing, planing, sanding and drilling; and has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- set up machine
- performed sawing, planing, drilling and sanding operations on timbers and boards from one or more of the following in line with an individual work order:
 - native timber species
 - imported timber species
 - dressed timber
 - in-the-rough timber
 - stress and non-stress graded timber
 - preservative treated timber
 - medium density fibreboard
 - laminated veneer
 - chipboard
 - fibreboard and other manufactured board products
 - coated and/or treated timber products
 - beams or laminated beams
- completed operator maintenance on at least one occasion for each of the following types of machines:
 - sawing machine
 - planing machine
 - drilling machine
 - sanding machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection practices for forest products factory settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- storage layout and categories for:
 - raw materials
 - stacking finished materials
- machining characteristics of timber and timber defects
- cutting patterns and sequences
- industry standard cross-sections and lengths
- types, purpose, features, set-up, operation and non-specialist repair and maintenance of basic static machines:
 - measuring equipment
 - docking saws
 - bench saws
 - panel saws
 - band saws
 - panel planers
 - surface planers
 - drill presses
 - boring machines
 - edge sanders
 - profile sanders
 - panel sanders
 - stroke sanders
- reasons, methods and timing of inspection of condition of saw blade, knife, drill and sanding belt
- workplace procedures specific to machining activities:
 - workplace health and safety, with particular emphasis on equipment lock-out
 - use and maintenance of equipment
 - communication reporting lines
 - recording and reporting cutting process and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a forest and forest products factory setting or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
 - machining tools: docking saws, bench saws, panel saws, band saws, panel planers, surface planers, drill presses, boring machines, edge sanders, profile sanders, panel sanders, stroke sanders
 - measuring equipment
 - maintenance tools and equipment
 - consumable components for replacement during operator maintenance
 - personal protective equipment suitable for machining activities
 - commercially available timbers and boards
 - template reports for recording processing and equipment faults
- specifications:
 - manufacturer instructions for use and maintenance of equipment
 - access to work order for machining activities, with specific instructions for the machining and storage of timber and timber products
 - access to written workplace procedures for machining activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM2205 Cut material to length and angles

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare and cut material to length and angle with a power driven saw. It includes non-specialist saw maintenance on completion of operation.

The unit applies to machine operators, timber product workers and manufacturing assistants who undertake specified activities under the direction of more experienced workers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products (TMM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for cutting	1.1 Determine information for cutting materials to length and angles from work order and confirm with appropriate person 1.2 Determine type and quantity of material to be cut 1.3 Plan material cutting patterns and saw set-up sequences according to work order and cutting list 1.4 Confirm safety requirements for cutting materials according to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace safety procedures 1.5 Select, fit and use appropriate personal protective equipment (PPE) 1.6 Select appropriate equipment and carry out a pre-start check according to manufacturer instructions
2. Cut material to length and angle	2.1 Mark up material and set stops in preparation for cutting 2.2 Select and set up appropriate saw for cutting materials 2.3 Operate machinery according to manufacturer instructions and workplace safety requirements 2.4 Produce required quantity of material according to cutting sequence and patterns 2.5 Check cuts for length and angle within allowable tolerance 2.6 Dispose of incorrect cuts, off-cuts and material with defects according to workplace safety and environmental requirements 2.7 Stack material safely according to work order in designated location 2.8 Check product quality and quantity and record against work order 2.9 Report processing faults to appropriate person
3. Complete operator maintenance	3.1 Follow workplace safety procedures to lock-out equipment 3.2 Check saw blades for bluntness or damage 3.3 Remove and replace saw blades according to manufacturer instructions 3.4 Dispose of used blades according to workplace safety and environmental requirements 3.5 Clean and maintain saw and equipment, and check for and report faults or damage 3.6 Clean work area and dispose of sawdust, off-cuts and debris according to workplace safety and environmental requirements 3.7 Report equipment faults or damage to appropriate person

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Enter routine production information into report documentation/forms, legibly and using industry terminology
Oral communication	<ul style="list-style-type: none"> Ask questions and actively listen to clarify contents of work orders Make accurate verbal reports on processing and equipment faults

Assessment Requirements for FWPTMM2205 Cut material to length and angles

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- cut a minimum of 25 different lengths of timber material, which include:
 - different timber grades, species and sectional sizes
 - various lengths and sectional sizes of hardwood and softwood engineered wood products (EWP)
 - at least five varying angles
- cut a minimum of five different timber board products into lengths

In performing this work, there must be evidence that the individual has:

- used and maintained a semi-automated saw
- stacked cut timber products into specified stacks.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace policies and procedures relating to cutting activities
- workplace and environmental requirements for safe disposal of waste
- characteristics, properties and limitations and defects of timber products:
 - hardwood
 - softwood
 - EWP
- processes and techniques of:
 - cutting patterns and sequences for single and compound angles
 - assessing saw blade condition
 - using and maintaining machinery and equipment

- stacking finished materials
- recording and reporting cutting process incidents and equipment faults
- cleaning of plant, tools and equipment
- disposing of, recycling and reusing timber and other waste
- industry standard cross-sections and lengths
- functional and operational features of tools, equipment and machinery:
 - semi-automated saws
 - bench saws
 - radial arm saws
 - saws with adjustable angle
 - saws with automatic feed
 - saws with one blade
 - table saws
- workplace safety requirements relevant to cutting materials:
 - personal protective equipment (PPE)
 - electrical hazards – use of residual current devices (RCD)
 - hazardous manual tasks
 - equipment lock-out
 - exposure to dust
 - exposure to excessive noise.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - appropriate machinery and equipment to cut timber products to length and angles
 - materials to cut to length and angles
- specifications:
 - access to work orders, safe work practices and environmental requirements to cut materials to length
 - access to policies and procedures and manufacturer instructions applicable to cutting materials to length

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3211 Manufacture using joinery machines

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to operate mortise and tenon machines, borers and routers to cut and drill machined joints in timber. This includes identifying work requirements, setting up and operating joinery machines, and completing routine equipment maintenance.

The unit applies to individuals who operate joinery machines in a timber processing or manufacturing facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for profiling	<p>1.1 Review work order to determine job requirements and, where required, seek clarification from appropriate personnel</p> <p>1.2 Review workplace health and safety procedures, including the use of personal protective equipment, equipment lock-out and safe manual</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>handling techniques</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with using joinery machines</p> <p>1.4 Identify workplace environmental protection procedures for minimising and disposing of waste material, cleaning tools and equipment, and maximising energy efficiency</p> <p>1.5 Obtain type and quantity of material to be machined from storage location</p> <p>1.6 Select appropriate equipment, including cutting blades or drills, and check for operational effectiveness according to manufacturer recommendations</p> <p>1.7 Plan manufacturing sequence</p>
2. Set up profile	<p>2.1 Complete equipment pre-start-up checks according to workplace and manufacturer procedures</p> <p>2.2 Select machine guides and attach to machinery</p> <p>2.3 Install cutting blades or drills into selected machinery</p> <p>2.4 Set depth and width of cut or hole according to required process and to minimise waste</p> <p>2.5 Position material stack in close proximity to maximise ease of machine feeding</p> <p>2.6 Test equipment set-up for depth and width through trial run on timber, and adjust as required</p>
3. Operate machine	<p>3.1 Feed material into machine at feed rate according to workplace requirements</p> <p>3.2 Use equipment and machinery according to workplace procedures, manufacturer instructions and environmental protection practices</p> <p>3.3 Follow, maintain and adjust manufacturing sequence to produce required quantity and maximise feed rate</p> <p>3.4 Check manufacturing process regularly and adjust to maintain desired depth and width of cut or hole</p> <p>3.5 Reject material with defects, and reuse, recycle or dispose of according to environmental protection practices</p> <p>3.6 Stack material safely in designated location according to work order requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Report equipment faults to appropriate personnel 3.8 Complete and maintain accurate records and reports of machining outcomes according to workplace procedures
4. Complete operator maintenance	4.1 Follow workplace safety procedures to lock out equipment 4.2 Check cutting blades and drills for bluntness or damage 4.3 Remove and replace cutting blades and drills according to manufacturer recommendations 4.4 Dispose of used blades and drills according to workplace procedures and environmental protection practices 4.5 Keep machine area clear of dust and debris according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for FWPTMM3211 Manufacture using joinery machines

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, safely set up, calibrated, operated and maintained one or more of the following joinery machines:

- mortise and tenon
- borers
- routers.

In doing the above job, the individual has:

- followed work order and relevant workplace health and safety and environmental protection procedures
- set up profile
- operated machine according to workplace procedures and work order requirements
- safely cleared sawn or machined materials and waste from the joinery machine
- checked, sorted and stacked the finished product
- disposed of waste material
- completed production reports.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features and uses of these types of machined joints:
 - grooves
 - rebates
 - bevels
 - trenches
 - mortises

- tenons
- holes
- cutting and drilling techniques and processes, including feed rates and finish
- types, purpose, features, operation and basic non-specialist repair and maintenance of cutting and drilling tools and equipment:
 - measuring equipment
 - saws
 - routing machines
 - single or double end tenoners
 - mortisers
 - borers
 - multi-borers
 - drill presses
 - mortising chisels
 - tenoning saws or chains
- environmental protection practices for forest products factory settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- workplace procedures specific to production activities using joinery machines:
 - workplace health and safety, with particular emphasis on personal protective equipment (PPE) and equipment lock-out
 - use and maintenance of equipment
 - communication reporting lines
 - recording and reporting cutting process and equipment faults.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest and forest products factory setting or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
 - cutting and drilling tools and equipment: measuring equipment, saws, routing machines, single or double end tenoners, mortisers, borers, multi-borers, drill presses
 - cutting blades and drills: square and angular router cutting bits, drills in varying sizes, mortising chisels, tenoning saws and chains, trenching heads
 - maintenance tools and equipment for cutting and drilling tools
 - consumable components: cutting blades and drills
 - PPE suitable for cutting and drilling activities
 - a diverse, comprehensive and commercial product range of timber

- manufacturer instructions for use and maintenance of equipment
- template reports for recording processing and equipment faults
- specifications:
 - access to work order for production activities, with specific instructions for the cutting, drilling and storage of timber and timber products
 - access to written workplace procedures for production activities using joinery machines.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3212 Estimate and cost job

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to estimate resource requirements, cost and price for the manufacture of a custom made timber product. This includes determining customer requirements, sourcing information, estimating the cost and price of the product and preparing and presenting the quotation.

The unit applies to individuals who calculate the cost and provide customer quotations for custom made timber products.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Timber Merchandising

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Source information for quotations	1.1 Identify, negotiate and confirm customer requirements 1.2 Assess product information for suitability to customer requirements 1.3 Determine delivery point, delivery date and time and method of

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	transportation according to workplace procedures 1.4 Source, select and interpret product costing information 1.5 Record all details according to workplace procedures
2. Estimate materials, time and labour	2.1 Estimate types and quantities of materials required for product manufacture 2.2 Estimate labour and other resource requirements to manufacture and/or install product and other required services 2.3 Document estimate for manufacture, installation and other service provision, and check against customer requirements
3. Calculate cost and price	3.1 Calculate costs for total materials, labour and overheads according to workplace procedures 3.2 Calculate total manufacture and/or installation costs 3.3 Apply mark-up according to workplace procedures, and determine total price to customer 3.4 Document details of calculations and price to customer according to workplace procedures and consumer protection legislation
4. Prepare and present quotation	4.1 Check price and calculations against product and service components and customer requirements 4.2 Prepare and provide quotation to customer according to workplace procedures and consumer protection legislation 4.3 Inform customer of their rights and obligations according to workplace procedures and consumer protection legislation 4.4 Complete and maintain accurate records of quotations according to workplace procedures and consumer protection legislation

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets the content of sometimes unfamiliar and detailed product information documents, including: in-house price lists, product description sheets or manuals, supplier price lists, product description sheets or manuals
Writing	<ul style="list-style-type: none"> Develops, documents and presents complex quotations in a prescribed time period according to workplace procedures and formats
Oral communication	<ul style="list-style-type: none"> Responds to oral questions on routine and non-routine matters related to customer requirements, costing of products and price of product to customer
Numeracy	<ul style="list-style-type: none"> Identifies routine product and costing information, and calculates routine customer supply costs Calculates mark-up rates and discounts for finished products Prepares accurate quotations indicating number of products to be delivered, timeframe for delivery and total costs to customer
Navigate the world of work	<ul style="list-style-type: none"> Follows workplace policies and procedures relevant to work role
Interact with others	<ul style="list-style-type: none"> Participates in conversations to inform customers about price of products

Assessment Requirements for FWPTMM3212 Estimate and cost job

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- prepared and presented quotations for a custom made timber product chosen from the following list:
 - stairs
 - doors
 - windows
 - frames
 - beams
 - roof trusses
 - floor systems
 - wall frames
- calculated the cost of the following components of the custom made timber product:
 - labour
 - materials
 - specialist skills and advice
 - delivery and transportation
 - installation
 - contingencies
- calculated the price of the custom made product including:
 - mark-up
 - discount
 - overheads.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- procedures for determining and negotiating customer requirements in order to prepare a quotation
- procedures for planning and estimating the costs of a custom made timber product, including:
 - methods of determining labour rates and job time length
 - methods of determining job processes and material requirements
 - methods of planning for contingencies
- cost minimisation and waste avoidance procedures and practices
- workplace quotation flow chart
- methods for determining cost and price of custom made timber products
- components of cost of custom made timber products
- primary components of consumer protection laws that relate to the provision of quotations and workplace responsibility for:
 - nominating and charging cancellation fees
 - providing information on potential price increases
 - providing refunds
 - supplying products as described or substituting suitable products when unable
 - guarantees
- industry and workplace practices in relation to:
 - quotation systems
 - sources of information on costs for materials and labour to manufacture and install
 - sources of information on overheads and how overheads are applied to individual quotes
 - delivery types and costs
 - types of fees charged and sources of fee amounts
 - mark-up rates and procedures
 - formats for and inclusions of quotations presented to customers
 - procedures for documenting calculations, communicating quotations to customers and maintaining records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest and forest products factory setting or an environment that accurately reflects workplace conditions
- resources, equipment and materials:
 - computers, keyboards and printers

- industry current software programs used to prepare quotations
- customer briefs on which to quote, including product requirements and special requests
- product and other workplace information, either electronic or hard copy: in-house price lists, product description sheets or manuals, cost schedules for materials and labour to manufacture and install, schedule of overhead costs, delivery types and costs and schedule of fees
- workplace template for quotations
- specifications:
 - access to written workplace procedures for preparing and presenting quotations
 - current consumer protection law in relation to preparation and presentation of quotations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3213 Read and interpret timber truss or wall frame fabrication plans

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to read and interpret timber floor truss or timber wall frame or timber roof truss fabrication plans. It includes identifying assembly components and fabrication details.

The unit applies to timber manufactured products technicians, timber frame and truss fabricators and machine operators who take responsibility for organising and completing tasks assigned to them without close supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has interpreted fabrication information for one of the following and developed a project specification:

- a timber floor truss project, including:
 - span, spacing and position of joists
 - joist type and component sectional sizes
 - bearer and joist type
 - load-bearing requirements
 - cutting requirements
 - specified tie down and bracing requirements
 - metal nail/connector plates
 - special specified requirements
- a timber wall frame project, including:
 - type of construction and number of storeys
 - frame components and spacing, opening sizes and bracing details
 - wind bracing details
 - component types and component cutting list
 - load-bearing requirements
 - requirements for ribbon plates
 - specified tie down, bracing and connection details
- a timber roof truss project, including:
 - type of roof construction
 - floor plan dimensions and wall locations and truss spans
 - truss type and component sectional sizes
 - specified tie down and bracing requirements

- metal nail/connector plates
- special specified requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key features of truss or frame fabrication plans:
 - fabrication plans conventions
 - abbreviations, hatching and symbols
 - scale, dimension lines and line types
- terminology used in timber fabrication plans
- truss and frame timber components, metal connections and tie down materials
- units of measurement and allowable component tolerances
- types and features of timber floor and roof trusses and timber wall frames.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber fabrication facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fabrication plans and cutting lists
- relationships:
 - person to confirm details of fabrication plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3214 Assemble timber floor trusses

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to plan, set up and assemble timber floor trusses using a purpose-built jig or computer-operated truss table. It includes the operation and control of a truss press.

The unit applies to machine operators and product technicians in a timber and wood products production environment at either a truss/frame fabrication facility or timber merchant's facility who take responsibility for organising and completing tasks assigned to them without close supervision.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPTMM3214 Assemble timber floor trusses

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assembled timber floor trusses on at least two occasions.

In performing this assembly work, there must be evidence that the individual has:

- assembled pre-cut timber truss members and nail plate components with allowable tolerances and to job specifications
- set up and operated a truss press
- prepared timber truss products for despatch according to job design and specifications.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace quality requirements relevant to assembling timber floor trusses
- workplace environmental policy and procedure for disposing of, recycling and reusing waste materials
- workplace safety requirements relevant to assembling timber floor trusses:
 - safe operation of machinery and equipment
 - exposure to excessive noise
 - hazardous manual tasks
 - use of personal protective equipment (PPE)
 - exposure to dust
 - hazard identification and controls
- processes, procedures and techniques for:
 - flow of material supply in and out of the floor truss assembly area
 - assembly sequences and jig and press operation

- stacking and storing materials
- labelling products for identification and transportation
- stacking, binding and protecting finished products ready for despatch
- workplace communication and reporting lines
- recording and reporting assembly outcomes and equipment faults
- functional and operational features of tools, equipment and machinery for floor truss assembly:
 - measuring and marking equipment
 - electric circular saws
 - docking saws
 - drills
 - assembly jigs
 - assembly table
 - nail plate presses
 - staple and nail guns
 - compressor or compressed air supply
 - strapping equipment
- characteristics, properties and limitations of timber products and components:
 - hardwood, softwood and manufactured timber product
 - various metal connector plates
- timber defects and impact on finished product:
 - warp
 - wane
 - cupping
 - shakes
 - insect defects
 - knots
 - resin pockets
- industry terminology related to floor truss assembly.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber manufacturing or processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - timber products and connector plates
 - assembly tables or jigs and press equipment to produce timber floor trusses

- specifications:
 - access to workplace policies and procedures, job design specifications and work orders applicable to assembling timber floor trusses
 - access to workplace safety and environmental requirements applicable to assembling timber floor trusses
- relationships:
 - supervisor or team member.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3215 Work effectively in the timber systems design industry

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to work effectively with a broad range of individuals and teams within the timber manufacturing products sector. It includes a sound understanding of the organisations' operations work practices and processes of timber systems design.

The unit applies to individuals who contribute to and provide quality product service to clients in a timber production or design setting. They use their own judgment to deal with predictable and unpredictable problems and decide on solutions to a range of problems during the timber design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPTMM3215 Work effectively in the timber systems design industry

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has completed a minimum of five different timber systems design specific job tasks and has:

- followed relevant workplace policies and procedures relating to the job role as a timber systems designer
- sourced and shared timber system design information with stakeholders or work team
- used timber system design technology.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- building industry regulations, codes and standards relevant to timber systems design:
 - National Construction Code (NCC)
 - Timber Framing Code
- organisational risks of non-conforming design
- construction terminology relevant to timber systems design
- key features of plans, drawings and specifications used in timber systems design:
 - types and applications of plans and drawings
 - drawing conventions
- computers and appropriate software and processes to:
 - research information
 - communicate with internal and external stakeholders
 - input and amend design factors and other data
 - produce drawings, plans and documents
 - save and retrieve documents

- types, functions, capabilities and limitations of drawing software
- application, characteristics and limitations of materials and components used for:
 - wall frames
 - flooring systems
 - roofing systems
- communication techniques and methods to maintain stakeholder and workplace relationships
- key stakeholders in timber systems design industry:
 - architects
 - engineers
 - suppliers
 - builders
 - building regulators
 - industry associations
 - government bodies
- project life cycle:
 - initial planning
 - contract endorsement
 - project planning
 - timber systems design and manufacture
 - construction progress from commencement to completion
- factors that impact timber design:
 - location and type of building
 - material availability
 - cost and quality of materials and components
 - effect of floor members position on overlaying frame and roof truss member position
- certifying timber systems design layouts
- relevant work health and safety and environmental requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber systems design workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computers, internet access and software programs
 - access to timber systems design software
- specifications:

- access to workplace policies, procedures and documentation applicable to timber systems design work
- access to workplace safety and environmental policies and procedures applicable to timber systems design
- access to design specifications and building plans
- relationships:
 - stakeholders and/or workplace personnel to discuss timber system designs with.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3216 Plane and sand engineered wood product

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to plane and sand the surfaces of engineered wood products in a timber manufacturing facility, optimising product thickness while retaining its integrity.

The unit applies to individuals who operate planing and sanding equipment used in the production of engineered wood products.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPTMM3216 Plane and sand engineered wood product

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planed and sanded the surfaces of any engineered wood product type for one production run, according to work instructions, using one of the following items of equipment:

- planer or thicknesser
- surface planer or buzzer
- drum sander
- sander
- veneer sander
- stroke sander
- other workplace planing or sanding equipment for engineered wood products.

In performing this task, the individual has:

- followed workplace health and safety, environmental protection and operating procedures
- selected and used personal protective equipment (PPE)
- performed pre-operational equipment checks
- set planing and sanding thickness and feed rate to equipment for optimal product recovery
- assessed product thickness, finish quality and faults visually throughout the process
- graded and directed finished product to storage or further processing
- disposed of sub-standard product
- conducted operator maintenance on planing and sanding equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to operating equipment for planing and sanding engineered wood products, as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace policies and procedures specific to planing and sanding engineered wood products, including:
 - health and safety, with particular emphasis on equipment lock-out, dust suppression and use of PPE
 - use of timber planing and sanding equipment
 - communication reporting lines
 - recording and reporting production outcomes, equipment faults and maintenance requirements
- workplace environmental protection requirements and practices for engineered wood product operations, including:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- techniques for planing and sanding engineered wood product
- methods of visual inspection of engineered wood product for thickness, finish quality and faults
- characteristics of relevant engineered wood product
- typical flow of material supply in and out of the planing and sanding area in engineered wood products manufacturing setting
- typical workflow processes and sanding techniques for optimising thickness, finish and quality of engineered wood product
- typical engineered wood product defects and how they affect the ability to produce quality finished product, including:
 - warp
 - wane
 - cupping
 - shakes
 - insect defects
 - knots
 - resin pockets
 - lifting veneer
 - bonding problems
- key features of, and applicable terminology for, industry standard grades for re-classifying quality and use of planed and sanded engineered wood products
- purpose, features and operation of equipment used to plane and sand engineered wood product in workplace environment
- methods for assessing condition of planer blades and sanding belts.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - planing and sanding equipment
 - dust extraction equipment
 - maintenance tools and equipment for planers and sanders
 - planer blades and sanding belts
 - PPE suitable for planing and sanding engineered wood products
 - engineered wood products suitable for planing and sanding operations
- specifications:
 - manufacturer instructions for use and maintenance of equipment
 - work order or instructions with specific instructions for planing and sanding engineered wood product
 - workplace health and safety, emergency and environmental protection policies and/or procedures for planing and sanding engineered wood product.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3217 Develop knowledge of plywood or laminated veneer lumber production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to develop a current understanding of the application and production processes of plywood or laminated veneer lumber (LVL) and identify adhesives and adhesive application systems used in plywood or LVL production.

The unit applies to individuals who are engaged in a range of operational work roles in plywood or LVL production.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPTMM3217 Develop knowledge of plywood or laminated veneer lumber production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has researched either plywood or laminated veneer lumber (LVL) production and documented:

- legislation, standards and codes of practice relevant to plywood or LVL production
- timber species and characteristics of logs used in plywood or LVL production
- two different end applications of either plywood or LVL products
- workflow in plywood or LVL production
- production processes for either plywood or LVL production
- one factor that may impact on quality and workflow in plywood or LVL production
- properties and one potential hazard of one adhesive product used in plywood or LVL production
- one type of adhesive application system used in plywood or LVL production.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and uses of plywood or LVL, including:
 - structural plywood
 - concrete formwork plywood
 - marine plywood
 - non-structural interior and exterior plywood
- key requirements of legislation, standards and codes of practice relevant to plywood or LVL production
- timber species used in plywood or LVL production, including:
 - softwood – radiata pine, hoop pine, slash pine
 - hardwood – eucalypt

- physical and mechanical properties of LVL or plywood, including:
 - cross lamination
 - dimensional stability
 - thermal properties
 - acoustic properties
 - electrical properties
 - chemical resistance
 - workability and bending ratio
 - plywood density
- end applications of plywood or LVL in building and construction, including:
 - plywood – panel product
 - LVL – framing member
- characteristics of logs from suitable timber species selected for use in plywood or LVL production, including:
 - size
 - straightness
 - nature and quantity of defects
- plywood or LVL production process, including:
 - log storage
 - log debarking and bucking
 - conditioning
 - peeling
 - drying
 - grading
 - layup and bonding
 - pressing
 - sanding, trimming and branding
- main differences in the manufacturing process for plywood and LVL, including:
 - grading stage
 - lay-up stage
 - pressing stage
- quality checks conducted during plywood or LVL production
- factors impacting on quality and workflow in plywood or LVL production, including:
 - availability of suitable timber species and quality
 - veneer quality
 - adhesives
 - bonding
 - operational, supervisory and management skills
 - access to and maintenance of plant and equipment
- safety and environmental hazards associated with plywood or LVL production

- types, properties, uses and hazards of adhesives specified in Australian Standards for plywood or LVL production, including:
 - Type A bonds – produced from phenol formaldehyde (PF) resin
 - Type B bonds – produced from melamine fortified urea formaldehyde resin (MUF)
 - Type C and D bonds – produced from urea formaldehyde resin (UF)
- factors that impact on the bonding of wood with adhesives used in plywood or LVL production
- types and uses of adhesive application systems, including:
 - hard rolls
 - air curtain
 - spray
 - extrusion.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- resources, equipment and materials:
 - reference materials on plywood or LVL production processes and adhesives and adhesive application systems used in plywood or LVL production
 - internet access and computer software and hardware for accessing technical information on plywood or LVL production
- specifications:
 - Australian Standards relevant to plywood or LVL production.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3218 Develop knowledge of veneer preparation in plywood or laminated veneer lumber production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to develop a current understanding of the application and production processes involved in constructional veneer production for plywood or laminated veneer lumber (LVL) manufacture.

The unit applies to individuals who are engaged in a range of operational roles in plywood and LVL production.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Timber Manufactured Products (TMM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine criteria for selecting peeler logs and end uses of rotary peeled	1.1 Identify different categories of veneer products 1.2 Identify timber species and characteristics of peeler logs used in

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
veneers	constructional veneer production 1.3 Identify criteria used to assign a value to peeler logs 1.4 Assess advantages of veneer-based products compared to solid wood products 1.5 Identify uses of rotary peeled veneers
2. Research constructional veneer production process	2.1 Identify the workflow in constructional veneer production 2.2 Identify legislation, standards and codes of practice relevant to veneer preparation in plywood or LVL production 2.3 Investigate processes involved in constructional veneer production 2.4 Identify quality checks conducted during constructional veneer production 2.5 Assess factors that impact on quality and workflow in constructional veneer production 2.6 Assess safety and environmental hazards associated with constructional veneer production
3. Investigate log preparation and conditioning processes used in constructional veneer manufacturing	3.1 Identify impact of wood and log characteristics on veneer production 3.2 Identify adverse effects of log storage on veneer production, and remedial actions that can be implemented 3.3 Assess log characteristics that impact on debarking 3.4 Assess billet properties that impact on lathe yield 3.5 Identify causes of high roughness, short veneer and distortion in veneer that relate to billet properties 3.6 Investigate log conditioning process and advantages and disadvantages of log conditioning 3.7 Identify actions to prevent the adverse effects of log conditioning on veneer manufacture
4. Investigate rotary peeling process in constructional veneer production	4.1 Identify types, features, operating principles and safety requirements for lathes used in rotary peeling 4.2 Identify impact of nose bar set-up and adjustment on veneer quality 4.3 Identify common problems in the rotary spinning process, and appropriate corrective actions

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.4 Identify the cause of veneer peeling defects 4.5 Assess effects of wood properties on veneer quality
5. Research green veneer processing in constructional veneer production	5.1 Identify characteristics of green veneer 5.2 Identify factors that impact on clipper speed and clipped veneer quality 5.3 Investigate stages in green veneer processing 5.4 Assess common problems in scarfing process, and appropriate corrective actions 5.5 Assess common composer quality problems and appropriate corrective actions
6. Research constructional veneer drying process	6.1 Identify purpose of veneer drying 6.2 Investigate stages in veneer drying 6.3 Assess moisture gradients and their impacts on veneer quality 6.4 Assess common defects resulting from veneer drying, and methods to reduce or eliminate these defects 6.5 Assess common operational problems in veneer drying, and appropriate corrective actions
7. Assess constructional veneer grading processes	7.1 Identify reasons for grading veneer sheets 7.2 Research grading criteria and grade classes for veneer in Australian Standards 7.3 Distinguish between visual grading and automatic grading 7.4 Assess common defects affecting veneer grade 7.5 Assess operating principles of automatic veneer strength, moisture and appearance grading systems

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Assessment Requirements for FWPTMM3218 Develop knowledge of veneer preparation in plywood or laminated veneer lumber production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has researched veneer production in plywood or laminated veneer lumber (LVL) production and documented:

- two categories of veneer products
- legislation, standards and codes of practice relevant to veneer preparation in plywood or LVL production
- timber species and characteristics of peeler logs used in constructional veneer production
- two end applications of constructional veneer
- workflow in constructional veneer production
- one factor that may impact on quality and workflow in constructional veneer production
- stages involved in two of the following processes in constructional veneer preparation for plywood and LVL manufacture:
 - log preparation and conditioning processes
 - rotary peeling process
 - green veneer processing
 - veneer drying process
 - visual or automatic veneer grading processes
- one common problem and one relevant corrective action in one of the following processes in constructional veneer preparation for LVL or plywood manufacture:
 - log preparation and conditioning processes
 - rotary peeling process
 - green veneer processing
 - veneer drying process
 - visual or automatic veneer grading processes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of legislation, standards and codes of practice relevant to veneer preparation in plywood or LVL production, including key requirements in Australian Standards relevant to constructional veneer preparation in LVL or plywood production
- categories of veneer products, including:
 - constructional – veneers for plywood and LVL production
 - decorative – veneers for aesthetic surface appeal
- characteristics of peeler logs from suitable timber species selected for use in veneer production, including:
 - age
 - growth rate
 - stem form
 - size
 - straightness
 - nature and quantity of defects
- criteria used to assign a value to peeler logs, including:
 - species
 - available volume
 - grade
- advantages of veneer-based products compared to solid wood products, including:
 - versatility and suitability for diverse applications
 - greater control over the wood property variability and gradients within the final product
 - ability to span wide supports
 - improved shear strength and impact resistance
- uses of rotary peeled veneers, including:
 - plywood panels
 - LVL
 - multilaminar wood
 - veneer based mass panels
- veneer production process, including:
 - log debarking and bucking
 - conditioning
 - peeling
 - clipping
 - drying
 - joint or veneer repair
 - crossbands

- grading – plywood grading and LVL grading
- quality checks conducted during veneer production
- factors impacting on quality and workflow in veneer production, including:
 - availability of suitable timber species and quality
 - veneer quality
 - operational, supervisory and management skills
 - access to and maintenance of plant and equipment
- types, features, operating principles and safety requirements for lathes used in rotary peeling, including:
 - spindled
 - hybrid
 - spindleless
- causes and remedies for common problems in rotary spinning process, including:
 - thermal distortion of the knife
 - knife condition and set-up
 - spin-out
 - barrelling
 - cotton reeling
 - mixing wet and dry veneer
 - mis-tracking
- veneer peeling defects
- effects of wood properties on veneer quality
- characteristics of green veneer, including:
 - not dried
 - high moisture content
- green veneer processing, including:
 - scarfing
 - composing
 - welding
 - jointing
- common problems in the scarfing process, and appropriate corrective actions
- common composer quality problems and appropriate corrective actions
- purpose of veneer drying
- stages in veneer drying
- moisture gradients and their impacts on veneer quality
- common defects resulting from veneer drying, and methods to reduce or eliminate these defects
- common operational problems in veneer drying, and appropriate corrective actions
- safety and environmental hazards associated with veneer production
- reasons for grading veneer sheets
- grading criteria and grade classes for veneer in Australian Standards

- uses and features of visual grading and automatic grading
- common defects affecting veneer grade, including:
 - sound knot
 - loose knot
 - pin knot
 - hole
 - split
 - gum pocket
 - gum vein
 - insect attack
 - discoloration
 - grain tear out
 - knife mark
 - fungal decay
 - waviness
 - rough
 - scratch
 - joint
 - bark pocket
- operating principles of automatic veneer strength, moisture and appearance grading systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- resources, equipment and materials:
 - reference materials on constructional veneer preparation in LVL or plywood production
 - internet access and computer software and hardware for accessing technical information on constructional veneer preparation in LVL or plywood production
- specifications:
 - Australian Standards relevant to constructional veneer preparation in LVL or plywood production.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3219 Develop knowledge of reconstituted wood panel production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to develop a current understanding of the processes involved in the production of a reconstituted wood panel product, selected from chipboard, hardboard, medium and high-density fibre board (MDF), oriented strand board (OSB) or particle board. It includes types and characteristics of the selected reconstituted wood panel product, stages in the production of the reconstituted wood panel product, adhesives and adhesive systems used in the production of reconstituted wood panel product, and quality control in the production of reconstituted wood panel product.

The unit applies to individuals who are engaged in a range of operational work roles in the production of reconstituted wood panel products.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has researched one reconstituted wood panel product selected from the following:

- chipboard
- hardboard
- medium or high-density fibre board (MDF)
- oriented strand board (OSB)
- particle board

In the performing this task, the individual has identified:

- legislation, standards and codes of practice relevant to reconstituted wood panel production
- two mechanical and physical properties of the reconstituted wood panel product
- one application of reconstituted wood panel product in the building and construction industry
- one advantage and one disadvantage of using reconstituted wood panel product in building and construction
- production workflow for reconstituted wood panel product and two factors that may affect workflow performance
- one type of adhesive and one type of adhesive system used in the production of reconstituted wood panel product
- properties and one potential hazard of one adhesive product used in production of reconstituted wood panel product
- three examples of quality control check points in production of reconstituted wood panel product
- three factors that may affect adhesion quality in production of reconstituted wood panel product.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- mechanical and physical properties of reconstituted wood panel product, including:
 - Australian Standard specification for dimensions
 - moisture properties
 - absorption and swelling
 - dimensional changes
 - thermal properties
 - acoustic properties
 - bio-deterioration
- key requirements of legislation, standards and codes of practice, including National Construction Code, relevant to reconstituted wood panel production
- application of reconstituted wood panel product in building and construction, including:
 - uses of product
 - advantages of use in building and construction:
 - disadvantages of use in building and construction
- stages involved in production of reconstituted wood panel product, including:
 - raw material procurement or generation
 - particle preparation
 - drying
 - blending with adhesive and sometimes wax
 - forming
 - pressing
 - finishing
- factors impacting on workflow in production of reconstituted wood panel product, including:
 - availability of raw materials
 - operational, supervisory and management skills
 - access to and maintenance of plant and equipment
- types, properties and hazards of adhesives used in production of reconstituted wood panel product
- types and applications of adhesive systems used in production of reconstituted wood panel product
- quality control check points in production process for reconstituted wood panel product
- quality parameters and process data collected and monitored during production process
- defects in reconstituted wood panel product
- factors that may affect adhesion quality in production of reconstituted wood panel product
- safety and environmental hazards associated with production of reconstituted wood panel product.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- resources, equipment and materials:
 - reference materials on production process for reconstituted wood panel product and adhesives and adhesive systems used in production of reconstituted wood product
 - internet access and computer software and hardware for accessing technical information on production of reconstituted wood panel product
- specifications:
 - sections of National Construction Code related to application of reconstituted wood panel product in building and construction.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3220 Develop knowledge of glue laminated timber or cross laminated timber production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to develop a current understanding of the application and production processes of glue laminated timber (GLT) or cross laminated timber (CLT), identify gluing systems and curing procedures used in GLT or CLT production, and examine the testing and quality control procedures used in GLT or CLT production.

The unit applies to individuals who are engaged in a range of operational work roles in GLT or CLT production.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPTMM3220 Develop knowledge of glue laminated timber or cross laminated timber production

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has researched either glue laminated timber (GLT) or cross laminated timber (CLT) production and documented:

- legislation, standards and codes of practice relevant to GLT or CLT production
- two examples of GLT or CLT product appearance and structural grades for building and construction applications
- two examples of GLT or CLT product applications in the building and construction industry
- two advantages and two disadvantages of GLT or CLT building and construction material
- production workflow for either GLT or CLT, and two factors that may affect workflow performance
- one type of gluing system used in either GLT or CLT production
- properties and one potential hazard of two glue products used in either GLT or CLT production
- three timber characteristics required in the lamination process in GLT or CLT production to ensure joint and bond quality
- three examples of quality control check points in GLT or CLT production
- three factors that may affect lamination quality in GLT or CLT production.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of legislation, standards and codes of practice, including National Construction Code, relevant to GLT or CLT production
- properties of GLT or CLT, including:
 - appearance grades

- structural grades
- advantages of using GLT or CLT in building and construction, including:
 - fire and seismic performance
 - insulation
 - strength to weight ratio
 - dimensional stability
 - sustainable material
 - prefabrication
 - durability
 - carbon reduction
- disadvantages of using GLT or CLT in building and construction, including:
 - cost
 - resistance to humidity
 - airtightness
- applications of GLT or CLT in building and construction, including:
 - GLT – beams, column, roof trusses
 - CLT – floors, walls, roofs, stairs
- characteristics of timber used in GLT or CLT production, including:
 - moisture content
 - visual appearance
 - structural properties
- stages involved in GLT or CLT production, including:
 - lamella production stage – pre-planing, timber grading, optimising – removal of defects, finger jointing lamellas, planing and cross-cutting
 - forming of layers and glue application stage
 - pressing stage
 - final processing stage – calibrating and cutting either lengthwise or framing
- factors impacting on workflow in GLT or CLT production, including:
 - availability of timber
 - operational, supervisory and management skills
 - access to and maintenance of GLT or CLT plant and equipment
- types, properties and hazards of glues used in GLT or CLT production, including:
 - polyurethane adhesives
 - phenol resorcinol formaldehyde adhesive
- types and applications of gluing systems
- quality control check points in GLT or CLT production process
- defects in GLT or CLT products, including:
 - delamination defects
 - non-delamination defects – stepping, incorrect finger-joint placements, incorrect lay-up

- factors that may affect lamination quality of GLT or CLT products, including:
 - moisture content
 - timber grade
 - straight and square edges and faces
 - consistent thickness
 - surface finish
 - glues and adhesives
 - curing temperature
 - pressing time
 - post-cure time
- bond strength and durability tests used in GLT or CLT production process, including how to read test data and use results
- safety and environmental hazards associated with GLT or CLT production.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- resources, equipment and materials:
 - reference materials on GLT or CLT production processes and glue and gluing systems used in GLT or CLT production processes
 - internet access and computer software and hardware for accessing technical information on GLT or CLT production
- specifications:
 - sections of National Construction Code relevant to GLT or CLT applications in building and construction.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM4209 Interpret details of timber roof trusses to inform design of plans and production documents

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to interpret and apply a broad range of information into the design of timber roof trusses. It includes applying detailed information for the preparation of timber roof truss drawings, production documents and installation instructions using custom software for timber systems design.

The unit applies to timber systems designers and fabricators who use their own judgment to deal with predictable and unpredictable problems and decide on solutions to a range of complex problems during the documentation preparation process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed layout plans and developed production and installation documentation using timber systems design software for each of the following:

- a hip and valley roof with a minimum area of 100 square metres that includes a dutch gable and a gable end
- a complex hip end
- a sloping ridge.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- building industry regulations, codes and standards relevant to design of timber roof trusses:
 - National Construction Code (NCC)
- risks of non-conforming design
 - responsibilities and limits of authority with regard to certifying and non-conforming design
- types of roofs:
 - bell
 - bowstring
 - dual pitch
 - gabled
 - hipped

- mansard
- skillion
- types of timber roof trusses:
 - A type
 - truncated
 - girder
 - jack
 - rafter
 - gable
 - saddle
 - raking
- interaction between roof truss types
- factors that contribute to roof truss design:
 - climate zones
 - wind forces
 - timber grading
 - tie down requirements
 - roof lining materials
- key features of plans, drawings and specifications:
 - types and applications of plans and drawings
 - relating specified information with plan and drawing details
- appropriate software, including custom software for timber systems design to:
 - research information
 - communicate with internal and external stakeholders
 - input and amend design factors and other data
 - produce drawings, plans and documents
 - store and retrieve documents
- types, functions, capabilities and limitations of drawing software
- application, characteristics and limitations of materials and components used for roofing systems
- certifying timber roof truss design layouts.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a design or manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computers and software, including timber systems design software

- specifications:
 - access to workplace policies, procedures and processes relevant to designing timber roof trusses and providing design advice
 - access to building regulations, codes and standards relevant to timber roof trusses
 - access to workplace health and safety and environmental policies and procedures applicable to design of timber roof trusses.
- relationships:
 - clients/stakeholders to discuss and confirm timber roof truss design.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM4210 Interpret details of timber floor systems to inform design of plans and production documents

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to interpret and apply a broad range of information into the design of timber floor systems. It includes applying detailed information for the preparation of timber flooring system drawings, production documents and installation instructions using custom software for timber systems design.

The unit applies to timber systems designers and fabricators who use their own judgment to deal with predictable and unpredictable problems and decide on solutions to a range of complex problems during the documentation preparation process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed layout plans and developed production and installation documentation using timber system design software for one on ground flooring system and one first floor wide span flooring system project, each:

- with a minimum of 100 square metres
- including a minimum of one internal load-bearing wall.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- building industry regulations, codes and standards relevant to design of timber floor systems:
 - National Construction Code (NCC)
- risks of non-conforming design:
 - responsibilities and limits of authority with regard to certifying and non-conforming design
- types of timber flooring systems:
 - I-beams
 - laminated beams
 - webbed truss
 - solid timber sections
 - composite systems
- key features of plans, drawings and specifications:
 - types and applications of plans and drawings

- relating specified information to plans and drawing details
- construction terminology
- elements that affect timber floor systems design:
 - types of sub-floor support
 - spans
 - live and dead loads
 - tie down requirements
 - fire separation/protection
 - termite protection
- appropriate software, including custom software for timber systems design to:
 - research information
 - communicate with internal and external clients/stakeholders
 - input and amend design factors and other data
 - produce drawings, plans and documents
 - store and retrieve documents
- types, functions, capabilities and limitations of drawing software
- application, characteristics and limitations of materials and components used for timber flooring systems
- certifying timber floor systems design layouts.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a design or manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computers and software, including timber systems design software
- specifications:
 - access to workplace policies, procedures and processes relevant to designing timber floor systems and providing design advice
 - access to building regulations, codes and standards relevant to timber floor systems
 - access to workplace health and safety and environmental policies and procedures applicable to design of timber floor systems.
- relationships:
 - clients/stakeholders to discuss and confirm timber floor systems design.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed layout plans and developed production and installation documentation using timber systems design software for two projects:

- one standard height timber wall project and one raking timber frame project with a pitch of greater than 5 degrees with one being fire rated.

Each project must include:

- a minimum of ten walls
- internal, external and butting intersections
- a minimum of four openings, two with a minimum span of 2.4 m.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- building industry regulations, codes and standards for timber wall frames:
 - National Construction Code (NCC)
- workplace policies, procedures and processes relating to design of wall frames plans and production documents:
- risks of non-conforming design:
 - responsibilities and limits of authority with regard to certifying and non-conforming design
- construction terminology relating to wall frame design
- factors affecting timber frame design:
 - climate zones

- wind forces
- timber grading
- tie down requirements
- key features of plans, drawings and specifications:
 - types and applications of plans and drawings
 - relating specified information to plans and drawing details
- appropriate software, including custom software for timber systems design to:
 - research information
 - communicate with internal and external stakeholders
 - input and amend design factors and other data
 - produce drawings, plans and documents
 - store and retrieve documents
- types, functions, capabilities and limitations of drawing software
- application, characteristics and limitations of materials and components used for wall frames
- certifying timber wall frame design layouts.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a design or manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computers and software, including timber systems design software
- specifications:
 - access to workplace policies and procedures relevant to designing timber wall frame plans and production documents
 - access to building regulations, codes and standards relating to timber wall frame design and production
- relationships:
 - clients/stakeholders to discuss timber frame design.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM4212 Calculate production costs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to estimate resource requirements for production of a range of timber products. It includes calculating overarching production costs and determining general supply costs.

The unit applies to timber manufacturing and production supervisors in a forest and wood products manufacturing setting, who use their own judgment to deal with predictable and unpredictable problems and decide on solutions to a range of complex problems during the documentation preparation process.

The unit does not cover the preparation of individual quotations for customers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Gather and analyse information	1.1 Obtain and analyse details of materials, production operations and labour costs from work order 1.2 Source and analyse details of logistic support contracts and supply

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	agreements 1.3 Identify cost factors relating to warehousing and physical distribution systems 1.4 Identify all production cost factors for establishing supply cost
2. Estimate materials and labour	2.1 Estimate and record types and quantities of materials required for production 2.2 Estimate and record lead times and time requirements for production activities 2.3 Estimate and record labour requirements for direct production and handling operations
3. Calculate and document production cost	3.1 Determine production components contributing to overhead costs 3.2 Determine type and percentage of overhead costs to be attributed to production procedures 3.3 Calculate total production cost and apply mark-up 3.4 Determine supply cost in conjunction with marketing and sales personnel 3.5 Document details of calculations and supply cost according to workplace formats
4. Check and document details of production and supply costs	4.1 Check costs and calculations against production requirements 4.2 Report calculation processes and organise checking by relevant personnel for final authorisation 4.3 Complete accurate records of production and supply costs according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify implicit and explicit production information for a variety of workplace documentation

Assessment Requirements for FWPTMM4212 Calculate production costs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has calculated production costs for three different work orders for at least one product range from the list below:

- pallets
- crates
- trellises
- stairs
- doors
- windows
- frames
- beams
- treated timber
- structural timber
- flooring
- decking
- laminated timber
- roof truss
- floor truss
- wall frame.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of negotiated cost of supply, contractual arrangements and preferred supplier arrangements
- sources of production costs for:

- materials specific to production operations
- labour unit costs specific to production operations
- methods of construction and production
- complying with environmental protection practices relevant to manufacturing and storage
- warehousing and distribution
- business overheads and how overheads are applied to individual production operations
- desired profit margins and appropriate commercial mark-ups to suit market acceptance
- workplace procedures for documenting calculations, communicating costs to relevant personnel and maintaining records
- industry regulations, standards and codes of practice relevant to calculating production cost.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated a timber manufactured product fabrication or processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace documentation and records containing material and product costing and labour costs
- specifications
 - access to work orders according to the Performance Evidence
- relationships:
 - person to discuss product and supply costs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPTMM4213 Test finger jointed timber

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has tested two samples of finger jointed timber for bond strength and adhesive durability and analysed the test results.

In performing this task, the individual has:

- complied with workplace health and safety and environmental protection practices and/or procedures, including use of personal protective equipment (PPE) and safe disposal of waste materials
- complied with legislation, standards and codes of practice relevant to testing finger jointed timber
- selected and calibrated test equipment for testing operations
- collected, labelled and prepared samples
- conducted the tests
- recorded and reported test results and analysed test results to assist with the identification of production problems
- recommended corrective actions, as required.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of legislation, standards and codes of practice relevant to testing finger jointed timber
- types, purpose and procedure for finger jointed timber tests, including:
 - bond strength
 - adhesive durability
- finger jointing requirements for finger jointed timber product and their justification, including:

- shook requirements – moisture content, straight edges, square freshly cut ends, straight grain at join
- joint appearance
- glue bond durability, including influencing factors – adhesive storage, adhesive mixing, adhesive cure
- equipment for testing finger jointed timber product
- techniques and reasons for calibrating testing equipment for finger jointed timber product
- hazards associated with selection, labelling and physical testing of finger jointed product, including:
 - moving equipment
 - flying debris
 - rotating saw blades
- failures in finger jointed timber characteristics that are determined by test results, including:
 - glue failure
 - shallow wood fibre failure
 - wood fibre failure
 - breaking load (Modulus of Elasticity; Modulus of Rupture)
- problems associated with testing process, including:
 - calibration of test equipment
 - test accuracy
 - sample quality
 - faulty material
 - defects
- workplace procedures specific to sampling and testing finger jointed timber product, including:
 - health and safety, including isolation procedures, lock-outs, emergency stops, machine guarding and wearing of appropriate PPE
 - environmental protection, including disposing, recycling and reusing timber and other waste
 - use of testing equipment
 - sampling and testing processes
 - communication reporting lines
 - recording and reporting on test process and test results.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber product manufacturing plant or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - finger jointed timber
 - test equipment
 - PPE required for testing finger jointed timber
- specifications:
 - workplace health and safety and environmental protection policies and/or procedures applicable to finger jointed timber testing operations
 - workplace procedures for finger jointed timber testing operations
 - workplace procedures for calibration of testing equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPTMM4214 Test laminated wood product

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted two of the following tests on two samples of laminated wood product each:

- glue spread test
- shear test
- durability test.

In performing these tasks, the individual has:

- complied with workplace health and safety and environmental protection practices and/or procedures, including use of personal protective equipment (PPE) and safe disposal of waste materials
- complied with legislation, standards and codes of practice relevant to testing laminated wood product
- selected and calibrated equipment for testing operations
- collected, labelled and prepared samples
- conducted the tests
- recorded and reported test results
- analysed test results to assist with the identification of production problems
- recommended corrective actions, as required.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of legislation, standards and codes of practice relevant to testing laminated wood product
- lamination requirements in the production of laminated timber products, including:

- lamination feedstock requirements – moisture content, dressing tolerance, grade, time since sawing or dressing, surface finish
- laminating requirements – glue storage, glue mix, glue spread, assembly time, clamp (press) time and pressure
- cure requirements – temperature, time, post-cure time
- influences on glue bond durability and strength
- glue spread requirements in laminated timber product processes, including:
 - effects of over and under glue spread on bond strength
 - frequency of glue spread tests
 - processes for conducting glue spread tests
 - glue spread rate is monitored and remedial action is taken
- test procedures and purpose for laminated timber product, including:
 - glue spread test
 - shear test
 - durability test
- failures in laminated timber product characteristics determined by test results, including:
 - glue failure
 - shallow wood fibre failure
 - wood fibre failure
 - sustainable load
 - breaking load – Modulus of Elasticity, Modulus of Rupture
- equipment for testing laminated wood product
- techniques and reasons for calibrating testing equipment for laminated wood product
- Australian Standards relevant to laminated wood products, including requirements for sampling and equipment set-up and calibration
- hazards associated with selection, labelling and physical testing of laminated wood product, including:
 - moving equipment
 - flying debris
 - rotating saw blades
- problems associated with testing process for laminated wood product, including:
 - calibration of test equipment
 - test accuracy
 - sample quality
 - faulty material
 - defects
- workplace procedures specific to sampling and testing laminated wood product, including:
 - health and safety, including isolation procedures, lock-outs, emergency stops, machine guarding and wearing of appropriate PPE
 - environmental protection, including disposing, recycling and reusing timber and other waste

- use of testing equipment
- sampling and testing processes
- communication reporting lines
- recording and reporting on test process and test results.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - laminated wood products
 - test equipment
 - personal protective equipment required for testing laminated wood product
- specifications:
 - workplace health and safety and environmental protection policies and/or procedures applicable to laminated wood product testing operations
 - workplace procedures for laminated wood product testing operations
 - workplace procedures for calibration of testing equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM4215 Plan for and coordinate timber product assembly

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to manage the assembly of timber products. This involves planning assembly schedules, coordinating product assembly, evaluating production processes and identifying process improvements.

The unit applies to individuals who supervise product assembly in a wood products work environment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products (TMM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for implementing timber product assembly operations	1.1 Review production orders, construction plans and workplace health and safety, environmental protection and emergency practices and/or procedures to plan assembly of timber products 1.2 Confirm legislation, standards and codes of practice relevant to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>timber product assembly</p> <p>1.3 Identify and report hazards and use personal protective equipment according to workplace requirements and health and safety legislation to maintain safe work practices</p> <p>1.4 Identify requirements for pre-cut timber components, hardware componentry and jigs, check availability and monitor supply</p> <p>1.5 Plan and document timber product assembly schedules, and communicate to operators according to workplace procedures</p> <p>1.6 Explain construction plans and assembly techniques to operators</p>
2. Coordinate timber product assembly	<p>2.1 Assist operators to evaluate and resolve component and assembly problems</p> <p>2.2 Monitor equipment operation and assembly processes and assess effectiveness and ability to maintain a schedule</p> <p>2.3 Modify assembly process and schedules to ensure optimum performance, and communicate changes to operators</p> <p>2.4 Check completed products and direct to a designated area for storage or despatch and transportation</p> <p>2.5 Direct processes for rejecting and disposing of sub-standard assembled products according to workplace environmental protection practices and/or procedures</p> <p>2.6 Obtain production output details from operators, and complete and maintain operating logs and assembly records according to workplace procedures</p> <p>2.7 Investigate and record major processing problems and equipment faults, and resolve or report to appropriate personnel</p>
3. Evaluate timber product assembly performance	<p>3.1 Monitor assembly operations and output to determine process improvements</p> <p>3.2 Analyse systematic problems with construction plans, componentry and equipment for the potential to improve assembly operations</p> <p>3.3 Document recommended process improvements, and communicate to appropriate personnel according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use appropriate vocabulary to communicate on technical and work team performance matters to ensure effective assembly operations
Numeracy	<ul style="list-style-type: none"> Complete calculations to determine material amounts required to satisfy production orders Interpret statistical data on production and quality Input numerical data into routine production records involving dimensions and quantities tallied against work orders

Assessment Requirements for FWPTMM4215 Plan for and coordinate timber product assembly

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and managed one production run for the assembly of a timber product selected from the following list according to production order, construction plan and workplace health and safety requirements:

- pallets
- crates
- trellises
- trusses
- frames
- stairs
- doors
- windows
- prefabricated timber building systems.

In performing this task, the individual has:

- determined, documented and communicated assembly schedules for the product assembly operation
- complied with legislation, standards and codes of practice relevant to timber product assembly
- assessed production output during the assembly operation for:
 - speed and efficiency of operation
 - quality finish
 - dimensional consistency
- monitored, assessed and modified schedules in response to changing circumstances
- completed operating logs and assembly records

- examined two systematic issues arising during assembly operation regarding processes, construction plans, componentry and/or equipment, and recommended actions for process improvements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards or risks related to assembling timber products as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- key requirements of legislation, standards and codes of practice relevant to timber product assembly
- workplace procedures specific to planning and coordinating timber product assembly, including:
 - health and safety, including the use of personal protective equipment (PPE) and emergency response
 - environmental protection practices for disposing, recycling and reusing timber
 - communication reporting lines for operator team members and self
 - documenting assembly schedules and reports
 - recording and reporting systematic equipment faults
- operational capacity of equipment used to assemble timber products
- typical flow of material supply in and out of the assembly area
- typical assembly sequences and range of techniques used to assemble timber products
- methods of determining timber product assembly schedules to:
 - maximise equipment and labour use
 - meet customer and production orders within deadlines
- methods used to:
 - assess timber product assembly processes in relation to complying with time and product quality parameters
 - diagnose and analyse systematic problems with construction plans, componentry and equipment
- format, content and use of:
 - construction plans
 - assembly schedules
 - operating logs and assembly records
 - process improvement reports.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and assembly hardware used to assemble timber products
 - PPE suitable for coordinating timber assembly production lines
 - pre-cut sections of timber
- specifications:
 - templates for recording timber product assembly issues and recommendations for improvements
 - production order for quantities and types of assembled timber products
 - construction plan with specifications for assembling timber products
 - workplace health and safety, emergency and environmental protection policies and/or procedures for planning and coordinating product assembly
- relationships:
 - work team to undertake product assembly.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM4216 Plan for and supervise engineered wood product operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to plan, coordinate and evaluate the manufacture of engineered wood products, including plywood, laminated veneer lumber (LVL), particleboard, medium-density fibreboard (MDF), cross laminated timber (CLT), finger jointed product and glue laminated timber (GLT) production.

The unit applies to personnel responsible for planning and supervising the manufacturing of engineered wood products including plywood, LVL, particleboard, MDF, CLT and GLT.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPTMM4216 Plan for and supervise engineered wood product operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned for and supervised two production cycles for one engineered wood product selected from:

- plywood
- laminated veneer lumber (LVL)
- particleboard
- medium-density fibreboard (MDF)
- cross laminated timber (CLT)
- glue laminated timber (GLT)
- finer jointed product.

In performing this task, the individual has:

- communicated effectively and coordinated personnel to follow planning, workplace health and safety and environmental protection practices and/or procedures and scheduling for engineered wood product production
- complied with legislation, standards and codes of practice relevant to production of engineered wood products
- monitored engineered wood product production outcomes and identified and rectified production and equipment problems and faults
- modified production methods and schedules for engineered wood product production
- monitored implementation of quality processes and chain of custody requirements
- recorded and reported production information, including output, quality and faults
- evaluated wood-based product production and suggested one process improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of legislation, standards and codes of practice relevant to production of engineered wood products
- hazards and associated risks with engineered wood product production process, and risk control strategies as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides
- workplace procedures, policies and site standards specific to planning and supervising production of engineered wood product, including:
 - health and safety, including personal protective equipment (PPE)
 - environmental protection, including safe disposal of waste material
 - quality assurance, including chain of custody requirements
 - communication channels and protocols to communicate with team members
 - recording and reporting information on production, quality, workplace health and safety and equipment faults
- types, characteristics, grades and uses of engineered wood product relevant to workplace environment
- stages and production processes used for engineered wood product
- types, uses and operation of plant, machinery and equipment used in production of engineered wood product
- methods for problem identification, including equipment failures at process stages, bottlenecks in production process and product variations, and resolution strategies
- process improvement for engineered wood product operations, including:
 - data
 - methods
 - participative approaches
 - communication.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an engineered wood product manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - engineered wood product processing plant and equipment
 - timber supplies
 - computers, keyboards, printers and software used to prepare planning and production documents
 - PPE relevant to engineered wood product operations

- specifications:
 - production schedule, quality and output data for engineered wood product from production facility
 - workplace procedures for engineered wood product production
 - workplace health and safety and environmental protection policies and/or procedures applicable to engineered wood product production
- relationships:
 - work team for communicating requirements related to engineered wood product operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCARB212 Operate and maintain stump grinding machines

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to operate motorised stump grinding machines to safely remove tree stumps.

The unit applies to individuals who operate stump grinders in a broad range of arboriculture contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for stump removal operations	1.1 Confirm work instructions and stumps to be removed with supervisor 1.2 Assess the size and scale of stump grinding works 1.3 Identify and confirm location and depth of above and below ground services with supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Confirm workplace health and safety hazards and controls from job safety analysis (JSA) with supervisor</p> <p>1.5 Confirm availability of first aid and emergency personnel, equipment and procedures</p> <p>1.6 Unload stump grinder from transport vehicle according to workplace and safety procedures</p>
2. Carry out stump grinder pre-operational and safety checks	<p>2.1 Check maintenance log for outstanding performance issues, and report incomplete maintenance to supervisor</p> <p>2.2 Conduct pre-start checks on stump grinder according to manufacturer instructions</p> <p>2.3 Check fluid levels and fill to manufacturer specifications</p> <p>2.4 Check safety guards are secure and in place</p> <p>2.5 Check safety switches are functioning correctly</p> <p>2.6 Check debris curtain is in working order according to manufacturer instructions</p>
3. Complete preparations for work	<p>3.1 Select, check and use personal protective equipment</p> <p>3.2 Assess stump and surrounds for impediments to grinding operations</p> <p>3.3 Implement workplace health, safety, site, environmental and traffic control measures</p>
4. Operate stump grinder	<p>4.1 Plan the grinding operation and position grinder according to site conditions and operator instructions</p> <p>4.2 Implement stump grinder start-up procedure</p> <p>4.3 Operate stump grinder to grind stump according to manufacturer and operator instructions</p> <p>4.4 Monitor cutting operation and adjust cutting rate and depth according to manufacturer and supervisor instructions</p> <p>4.5 Undertake corrective action when stump grinder performance or safe operation has been compromised</p> <p>4.6 Implement shutdown procedures following stump removal</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Complete stump grinding operations	5.1 Dispose of waste according to work instructions and environmental procedures 5.2 Clean stump grinder and equipment according to workplace and biosecurity procedures 5.3 Perform operator maintenance according to manufacturer instructions 5.4 Report and record stump grinder usage, maintenance and repair requirements according to repair and maintenance procedures 5.5 Load and secure stump grinder onto transport vehicle according to workplace and safety procedures, and regulatory requirements 5.6 Maintain records and report stump grinding outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from maintenance logs, operating instructions and policies to identify relevant and key information for preparing and operating machinery safely
Writing	<ul style="list-style-type: none"> Complete stump grinder operation records using clear language and industry terminology to ensure clarity of meaning
Numeracy	<ul style="list-style-type: none"> Perform basic calculations to determine fuel mixtures and machine fluid level and volumes

Assessment Requirements for AHCARB212 Operate and maintain stump grinding machines

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely operated a stump grinding machine to remove at least one stump no less than 60cm in diameter, including:

- unloaded and loaded the grinder on a transport vehicle
- carried out set-up and pre-operational and safety checks
- prepared the site ready for stump grinding work
- cleaned, sharpened and maintained the stump grinder.

There must also be evidence that the individual has:

- confirmed work instructions and stumps to be removed, and assessed the size and scale of the works
- confirmed hazards and controls from job safety analysis (JSA) including:
 - located services
 - selected, checked and used appropriate personal protective equipment
 - confirmed the availability of first aid and emergency equipment, personnel and procedures
 - implemented workplace health, safety, environmental and traffic control measures
- reviewed the maintenance log for outstanding performance issues, and reported inconsistencies
- assessed stump surrounds for impediments to stump grinding operations and planned and positioned stump grinding machine according to site conditions and operating procedures
- implemented start-up procedure and operated stump grinder including monitored ongoing performance and undertook adjustments and corrective action where performance was lacking
- shut down machine according to operator instructions and cleaned stump grinder disposing of waste material according to environmental and biosecurity procedures
- maintained records and reported grinding operations according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- site hazards, risk assessment and documenting controls in JSA, including:
 - control measures for workplace health, safety, site, environmental and traffic control
 - personal protective equipment
 - first aid kits and access
 - emergency procedures
 - methods and purpose for locating above and below ground services
 - exclusion zones, barriers and fencing
- pre-operational checks of stump grinders, including:
 - maintenance logs and their purpose
 - belts and pulleys, wear and replacement
 - cutter head and teeth adjustments and sharpening
 - tyre pressure
 - oil and fluid levels
 - preparing and adding fuel
 - hydraulic hoses
 - brakes
 - engine types and fuels
- safety checks of stump grinders, including:
 - guards for belt, power take-off (PTO) and grinder head
 - kill switch
 - dead man
 - debris curtain
- operation of stump grinders, including:
 - impediments to stump grinding operations
 - cutter head engagement and disengagement
 - positioning of stump grinders and operator
 - methods for determining spread and depth of cut
 - engine speed (rpm)
 - common faults, their signs and symptoms
- environmental implications of stump grinding operations, including methods of collecting waste material and disposal and recycling
- basic maintenance of stump grinding machines, including:
 - sharpening teeth
 - teeth replacement
 - belt replacement
 - records of operator usage in log record

- methods of maintaining records for maintenance and replacement items.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - access to stumps ready for grinding
- resources, equipment and materials:
 - stump grinder
 - tooth sharpening equipment
 - tools and equipment for conducting basic maintenance practices
 - cutter teeth
 - fuel and spill kit
 - personal protective equipment
 - first aid, emergency and traffic management kit
- specifications:
 - workplace procedures for stump grinding
 - manufacturer instructions for safe operation, cleaning and storage of stump grinding equipment
 - arboriculture hygiene and biosecurity standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB318 Undertake aerial rescue

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to perform an aerial rescue where an injured or trapped climber is safely brought to ground from the tree. It is likely to be undertaken in an emergency situation.

The unit applies to individuals who work in arboriculture under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that tree rescue work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- HLTAID011 Provide First Aid
- AHCARB319 Use arborist climbing techniques.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for aerial rescue	1.1 Confirm emergency communication system is working 1.2 Confirm emergency services contact numbers are documented 1.3 Select, prepare and check first aid equipment and rescue kit 1.4 Position rescue and first aid equipment for easy access 1.5 Clarify own role in rescue situations 1.6 Confirm first aid, rescue personnel and equipment with work team prior to undertaking rescue 1.7 Select, check and use personal protective equipment 1.8 Communicate with work team during operations using agreed communication method for the site and activity being undertaken
2. Assess and respond to an aerial emergency situation	2.1 Follow emergency response protocol according to workplace and industry procedures 2.2 Stop all work activity and ensure other workers are aware of the incident 2.3 Attempt communication with casualty 2.4 Activate emergency plan and request assistance from work team and public in accordance with rescue plan 2.5 Obtain emergency assistance according to rescue plan 2.6 Inspect site and tree for hazards associated with rescue, assess risks and implement controls 2.7 Assess if rescue can be conducted safely within work team capability 2.8 Seek assistance from emergency rescue services when safe rescue is not possible
3. Access tree to undertake rescue	3.1 Select low-risk access methods to access tree and undertake rescue 3.2 Maintain inspection of tree for above-ground hazards during ascent and throughout the rescue 3.3 Maintain communication with casualty and ground crew 3.4 Select and install suitable anchor points before reaching casualty 3.5 Install redirects to ensure good rope angle when reaching casualty
4. Assess casualty condition and system integrity	4.1 Ensure rescuer is secure before approaching casualty 4.2 Assess the security of casualty attachment in tree and secure if deemed unstable

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.3 Assess seriousness of condition of casualty according to first aid procedures and risk assessment</p> <p>4.4 Assess integrity of casualty climbing system to determine its suitability for lowering the casualty</p> <p>4.5 Administer first aid above ground according to first aid procedures and risk assessment</p> <p>4.6 Apply first aid protocols for casualties with possible neck or spinal injuries and await expert medical attention</p> <p>4.7 Maintain communications with ground crew</p>
5. Lower casualty to ground	<p>5.1 Inform casualty of lowering procedure</p> <p>5.2 Prepare casualty for descent in accordance with first aid, rescue plan and risk assessments</p> <p>5.3 Select and implement rescue technique relative to rescue and emergency situation and casualty condition</p> <p>5.4 Descend tree safely in a controlled manner</p> <p>5.5 Lower casualty safely to ground with support of ground crew according to emergency conditions</p>
6. Complete rescue operations	<p>6.1 Administer first aid on ground according to casualty condition until emergency services arrive</p> <p>6.2 Transfer responsibility of casualty to emergency services on their arrival</p> <p>6.3 Isolate equipment involved in incident for potential investigation and prevent reuse until checked</p> <p>6.4 Complete incident report and notify affected parties according to organisational procedures and regulatory requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately record and complete incident reports and workplace records
Oral communication	<ul style="list-style-type: none"> Explain detailed information to emergency services and rescue team Communicate effectively with casualty and with other crew members involved in rescue
Get the work done	<ul style="list-style-type: none"> Accept responsibility and ownership for conducting the rescue, and make decisions on rescue parameters and coordination of others

Assessment Requirements for AHCARB318 Undertake aerial rescue

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted an aerial rescue for each of the following scenarios in a tree that is a minimum of 5 metres in height:

- a pole top rescue, where the casualty must be safely lowered to the ground without the assistance of other crew members and:
 - is attached within 0.5 metres of the top of the pole
 - is at least 5 metres from the ground
- a pick-off rescue without the assistance of other crew members in which the casualty must:
 - be lifted out of their compromised or non-functioning climbing system
 - be transferred to be lowered down on the rescuer's system or on another climbing system
 - be at least 8 metres from the ground
 - be lifted at least 1 metre prior to beginning descent
- a rescue where:
 - the casualty is away from the main trunk of the tree, toward the end of a branch or in a different stem from the primary anchor point
 - the rope angle between the casualty and the primary anchor point must be at least 30°
 - the rescuer must either control the movement of the casualty back under the primary anchor point, or redirect the casualty's line to bring the casualty directly to the ground.

There must also be evidence that the individual has:

- confirmed resources for emergency rescue, including:
 - communications for emergency services and work team
 - first aid equipment, personnel, equipment and procedures
 - emergency rescue and first aid equipment, protocols and procedures
- conducted a pre assessment of the rescue including:

- attempted communication with casualty
- assessed the tree and situation for hazards and risks and determined rescue plan
- sought assistance from emergency services where safe rescue could not be performed
- used tree climbing equipment to carry out rescue, including:
 - accessed tree safely
 - selected and installed anchor points
 - installed redirects to achieve safe rope angle according to rescue requirements
 - secured rescuer and casualty
- demonstrated the procedure for securing and assessing a severe casualty situation, including:
 - assessed casualty injuries
 - administered first aid above ground according to casualty condition
 - arranged for emergency services
- demonstrated the procedure for rescuing a casualty, including:
 - informed and prepared casualty descent
 - descended tree safely in a controlled manner
 - applied first aid on ground
- removed equipment used in rescue in a controlled manner and isolated and secured equipment for potential investigation
- cleaned and stored all equipment
- updated and maintained records of aerial rescue according to workplace and regulatory requirements.

Aerial rescue is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for aerial rescue
- emergency procedures for aerial rescues, including:
 - planning for the event of an emergency
 - dealing with emergencies
 - emergency protocol, including stop work, activate rescue plan, inspect site for tree hazards, delegate crew roles, access tree, install anchor points, reach casualty, lower casualty, and transfer to emergency services
 - accessing trees in emergency situations
 - accessing and utilising emergency services
- assessing site-specific safety in emergency situations, including:
 - methods for identifying risks
 - risk control measures

- safety and procedures when conducting a rescue near overhead power lines, including:
 - basics of electrocution
 - power line types and insulation
 - approach distances and safety zones, voltage and arcing
 - tools, equipment, personnel and power line contact
 - personal protective equipment
- administering first aid in an aerial rescue environment, including:
 - first aid procedures
 - contents and use of a first aid kit
 - first aid in an aerial environment
 - assessing neck and back injuries and procedures
 - first aid on the ground following rescue
 - importance of communication and reassurance of casualty
- communications in a rescue situation, including:
 - emergency services communication systems
 - emergency services contact numbers
 - work team communication methods
- tools, equipment and other resources required for aerial rescue, including:
 - appropriate placement of rescue equipment
 - components of and use of rescue kits
 - rescue personnel, equipment and rescue plan procedures
- controlling risk to rescuer, victim and others during an aerial rescue
- climbing and rigging systems for aerial rescue, including:
 - pole top rescue
 - pick-off rescue
 - lifting moving or transferring casualties to alternate climbing systems
 - ropes, knots and equipment for rescue climbing and rigging systems
 - lifting and lowering systems
 - cleaning, storing and maintaining safety kits and equipment
- workplace health and safety reporting procedures for accidents, incidents and rescue operations, including:
 - site and equipment security for investigations
 - mandatory records
 - workplace records
 - legislative responsibilities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - the trees in which the types of rescue required for assessment can be demonstrated as stipulated in the performance evidence
- resources, equipment and materials:
 - full arborist climbing kit
 - emergency communications equipment
 - personal protective equipment
 - first aid and emergency response equipment
- specifications:
 - workplace and manufacturer instructions for safe operation, cleaning and storing of rescue equipment
 - preferred industry practices (as outlined in the Companion Volume) for aerial rescue
- relationships:
 - work team
 - worker or rescue dummy as stipulated in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have: In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB319 Use arborist climbing techniques

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes, harnesses and specialist equipment using climbing techniques for the purpose of mobility in the canopy of trees to acquire a safe work position.

The unit applies to individuals who work in arboriculture under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that all climbing work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Assessment Requirements for AHCARB319 Use arborist climbing techniques

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence the individual has safely and efficiently climbed a tree of at least 18 metres in height and at least 10 metres in canopy spread using rope climbing equipment, without the aid of climbing spurs. The individual must have:

- reached at least five different designated outer extremities of the tree structure
- selected and performed a suitable, safe and efficient access method consistent with the tree structure and the designated working positions
- selected and used suitable, safe and efficient work positioning methods to reach each target, including the use of multiple lines, redirects and advanced climbing methods
- descended the tree safely and retrieved all climbing equipment.

The timeframe allowed to reach the designated targets must meet industry expectations for the size and shape of the tree being climbed.

There must be evidence the individual has safely and efficiently climbed to a height of 15 metres above the ground using climbing spurs in a tree to be removed. The tree must have at least five metres of clear trunk below the lowest branch. The individual must:

- ascend and descend a trunk by spur climbing the trunk without setting a line at the top
- transition around obstacles safely
- perform a self-arrest
- use branch walking techniques to access designated working positions
- descend the tree safely and retrieve all climbing equipment.

The timeframe allowed to reach the designated targets must meet industry expectations for the size and shape of the tree climbed.

There must also be evidence that the individual has:

- installed a throw line in a tree in a predetermined union representing a target of no larger than 600 mm in diameter and at least 20 metres above the throwing position within a timeframe of 15 minutes

- selected, checked and configured climbing equipment components to form safe and functional climbing systems appropriate for climbing tasks
- identified unsafe equipment, climbing system configuration and climbing techniques.

There must also be evidence that the individual has prepared to conduct climbing work, including:

- undertaken a job safety analysis (JSA) for the specific site and work activities and implemented control measures including:
 - confirmed availability of first aid and rescue personnel, equipment and procedures
 - conducted pre-operational and other safety checks, on ropes, harnesses, tools and equipment
 - selected and used personal protective equipment (PPE) and safety equipment
- performed a pre-climb inspection and identified climbing hazards and controlled risks, including:
 - correctly identified tree species
 - assessed tree for stability and tree defects
 - adjusted climbing plan and implemented control measures
- selected, prepared and fitted climbing equipment.

There must also be evidence that the individual has:

- selected an access system and method that is safe, efficient and suitable for the tree structure and work task
- installed climbing and access ropes to suitable tree anchor points within the tree structure, and used throwlines to install:
 - anchor points near the top of the tree
 - a stationary rope technique (SRT) canopy anchor
 - a SRT basal anchor
 - a moving rope technique (MRT) anchor point including the installation of a cambium saver
- safely ascended and descended tree, transitioned between points of attachment and used work positioning methods, including:
 - used MRT and trunk-walking, foot ascenders or footlocking
 - used SRT
 - installed a second point of attachment when in a working position
 - used multiple lines for climbing and tree operations for both MRT and SRT
 - used natural and artificial redirects
 - used climbing spurs for work positioning
- safely retrieving climbing equipment according to industry standards and manufacturer instructions
- tied, dressed, set and finished the following 19 climbing knots and hitches for rigging and climbing applications according to industry standards:
 - scaffold knot
 - double fisherman's bend/prusik loop

- girth hitch
- prusik hitch (English prusik)
- Blake's hitch
- marlinspike hitch
- clove hitch
- double-overhand stopper knot
- sheet bend
- slippery sheet bend
- bowline knot (with a tie-off or stopper knot)
- running bowline knot
- bowline on a bight
- alpine butterfly
- klemheist
- figure-8 loop
- munter hitch
- Flemish bend
- Zeppelin bend
- tied at least one of the following advanced climbing hitches:
 - Distel hitch
 - Valdôtain tresse (French prusik)
 - Schwabisch hitch
 - Knut
- communicated with work team during operations using agreed communication procedures.

All arborist tree climbing work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for arborist tree climbing work
- assessing and selecting methods for climbing trees and methods of tree access, including:
 - selecting a climb plan or work strategy to achieve a scope of works
 - selecting climbing systems that are safe, simple, efficient and ergonomic
 - identifying tree hazards and selecting low-risk work methods
- assessing work health, safety, site, environmental and traffic control measures, including:
 - completing JSAs for site-specific risks
 - purpose of first aid and rescue personnel, equipment and procedures

- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- PPE used when climbing
- arborist climbing equipment, use and maintenance, including:
 - ropes and their materials, construction and characteristics
 - uses of climbing ropes and lanyards
 - types of climbing ropes
 - harnesses
 - triple locking carabiners and other connectors
 - climbing hardware, including ascenders, descenders, mechanical friction devices, false crotches and artificial redirects
 - climbing spurs and gaffs, their preparation and use for climbing trees
 - maintaining separation between spurs, rigging equipment and ropes
- purpose, function, selection, tying, dressing, setting and finishing of arborist knots used for climbing techniques
- safety when climbing trees, including:
 - safe working limits, ropes and equipment
 - defects in ropes, tools and equipment
 - controlled descent operations
 - controlled removal of access equipment
 - forces applied to anchor points during access and work positioning using MRT and SRT
 - forces applied at primary anchor points and at redirects
- hazards to avoid when climbing within the tree canopy, including:
 - power line safe approach distances and vegetation clearances
 - tree structural defects
 - animals or insects
 - hangers or suspended loads
 - deciding on low-risk access routes
- limits, advantages and disadvantages of friction hitches, including:
 - Blake's hitch
 - Prusik hitch (English prusik)
 - klemheist
 - specialised variations, including Distel hitch, Valdôtain tresse (French prusik), Schwabisch hitch, Knut
- selecting appropriate knots suited for rigging or climbing applications and equipment, including:
 - loss of rope strength
 - appropriate knot for application
 - requirements for secondary knots and stopper knots
- arborist knots, including:
 - knot type and tying procedure

- dressing
- setting
- finishing
- communications strategies used in arboriculture, including:
 - voice
 - hand
 - whistle signals
 - electronic communications
- assessing tree access routes, techniques and equipment and evaluating risk, including:
 - moving rope technique (MRT) and stationary rope technique (SRT)
 - use of climbing spikes of various lengths
 - transitions between points of attachment
 - natural and artificial redirects
 - use of multiple lines to access trees and tree parts
 - low-risk anchor points
- inspecting, cleaning, maintaining and storing climbing equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - trees as stipulated in performance evidence
- resources, equipment and materials:
 - full arborists climbing kit
 - climbing spikes
 - communications equipment agreed by work crew
 - PPE
 - first aid and emergency response equipment
- specifications:
 - workplace and manufacturer instructions for safe operation, cleaning and storage of the equipment specified in the assessment conditions
 - preferred industry practices (as outlined in the Companion Volume) for arborist tree climbing work
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed

- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHC BIO204 Follow site biosecurity procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to follow the workplace biosecurity procedures for accessing and leaving a quarantine site to reduce and contain the transfer of diseases or pests.

The unit applies to individuals who work under general supervision and exercise limited autonomy. They undertake defined activities and work in a structured context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to enter biosecurity site	1.1 Confirm biosecurity procedures and protocols with supervisor 1.2 Ensure all vehicles are decontaminated before entering and leaving the biosecurity area according to biosecurity procedures 1.3 Identify and report contact with potential biosecurity risk 1.4 Perform personal decontamination before entering biosecurity area according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Store and isolate personal fomites from biosecurity area according to workplace and biosecurity procedures
2. Prepare to work in biosecurity site	<p>2.1 Identify workplace health and safety hazards and report to supervisor</p> <p>2.2 Select, check and apply personal protective equipment</p> <p>2.3 Apply personal hygiene procedures while working in biosecurity or quarantine area environments according to workplace procedures</p> <p>2.4 Check disinfectant levels and report irregularities to supervisor</p>
3. Work in biosecurity site	<p>3.1 Handle and store chemicals and medications according to workplace procedures</p> <p>3.2 Store and label production materials and products to minimise risk according to biosecurity procedures</p> <p>3.3 Identify and report abnormal conditions of produce/stock to supervisor</p> <p>3.4 Identify and report breaches of biosecurity procedures to supervisor</p> <p>3.5 Dispose of all waste according to workplace biosecurity procedures</p> <p>3.6 Dispose of all contaminated produce according to supervisor instructions</p> <p>3.7 Maintain records for quarantine activities according to workplace procedures</p> <p>3.8 Perform personal decontamination before exiting biosecurity or quarantine area according to workplace procedures</p>
4. Assist in maintaining site biosecurity procedures	<p>4.1 Follow visitor quarantine procedures</p> <p>4.2 Check visitor sign in, sign out and hygiene procedures are observed according to workplace procedures</p> <p>4.3 Ensure quarantine facilities are secured according to workplace security procedures</p> <p>4.4 Maintain security of boundaries and fencing according to supervisor's instructions</p> <p>4.5 Check deliveries to site comply with delivery procedures and biosecurity protocols</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Respond to infringements of site biosecurity procedures	5.1 Report issues and infringements of site quarantine procedures to supervisor 5.2 Secure site where quarantine infringement occurs according to supervisor instructions 5.3 Apply sanitation procedures to affected areas according to workplace procedures and supervisor instructions 5.4 Isolate potentially contaminated produce, stock or materials and monitor for evidence of contamination 5.5 Treat or dispose of all contaminated produce, stock and materials according to workplace quarantine procedures 5.6 Maintain records of quarantine infringements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Update records using familiar text types and simple vocabulary, grammatical structures and conventions

Assessment Requirements for AHC BIO204 Follow site biosecurity procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has followed biosecurity procedures for at least one biosecure site and has:

- met site security entry and exit requirements for vehicles, personal fomites and personal hygiene
- handled and stored production materials and products according to procedures and biosecurity protocols
- identified and reported abnormal conditions and infringements of biosecurity procedures and workplace health and safety hazards to supervisor
- disposed of waste and contaminated produce and products according to biosecurity and quarantine procedures
- maintained records for quarantine activities and infringements
- maintained security of biosecurity or quarantine site and reported infringements
- checked visitors for compliance with workplace biosecurity procedures
- controlled site deliveries according to biosecurity procedures
- applied sanitation procedures on contaminated quarantine sites
- isolated and monitored produce, stock or materials suspected of being contaminated according to supervisor instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- site quarantine procedures and biosecurity protocols for:
 - disposal of waste products, diseased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock or contaminated material
 - directing visitors at the quarantine site

- reporting diseases and pest infestations, workplace health and safety hazards
- handling and storing production materials and products, including chemicals, medications, feed mixes, soil, growing media
- controlling entry of deliveries to a quarantine site
- isolating livestock and monitoring livestock
- cleaning and disinfecting quarantine area
- maintaining security for the quarantine site
- recording information about own work and any quarantine breaches
- personal infection control and decontamination procedures while working in a biosecure site, including:
 - shower in and shower out environments
 - removal of street clothing and replacement with decontaminated work clothing
 - decontaminating hands and exposed skin during work
 - purpose and use of hair nets, coveralls, booties, gloves
 - footbaths and disinfectant levels
- fomites - inanimate objects that can cause infections:
 - clothing, boots and hats
 - cars and trucks
 - utensils and hand tools
 - furniture
 - work machinery
- security procedures for biosecurity:
 - fences and boundaries
 - entrance access locks
 - site visitors checking and communicating their responsibilities
- external deliveries and protocols, including:
 - vehicle decontamination
 - unloading of produce and stock
 - receipt and holding or storage of stock and supplies are followed
- personal protective equipment appropriate to site quarantine procedures and biosecurity protocols
- workplace health and safety hazards and controls
- methods for cleaning and disinfecting quarantine areas
- control area and restricted area
- biosecurity protocols and how they apply to the work site, industry and in the context of a work role.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site subject to quarantine and biosecurity conditions or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - products, stock and materials relevant to the industry sector
 - tools and equipment required to secure biosecurity site
 - personal protective safety equipment
 - sanitation materials and equipment specific to site
- specifications:
 - specific workplace procedures and processes for maintaining a biosecure environment
 - access to safety data sheets for treatments, chemicals and medications
 - workplace instructions
- relationships:
 - visitors
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has applied biosecurity measures, including:

- located and interpreted site biosecurity plans and information to inform control measures
- identified biosecurity hazards and threats for the site and determined control measures
- determined responsibilities for applying control measures
- incorporated and applied biosecurity control measures into work routines according to the biosecurity plan
- maintained records for traceability of input and output data
- monitored control measures for effectiveness
- monitored workplace personnel for compliance with biosecurity control measures
- reported biosecurity issues and concerns according to procedures
- maintained currency in biosecurity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of biosecurity on different sites, including:
 - production agriculture
 - amenity and production horticulture
 - conservations and land management including the natural landscape
- sources of biosecurity information, including:
 - government and industry websites
 - technical and research papers
 - journals
 - training
 - on farm resources, standard operating procedures, mandatory documentation

- biosecurity plans and their function
- biosecurity threats, including:
 - vertebrate pests
 - plants
 - diseases
 - invertebrate pests
- risk assessment principles, standards and regulations for biosecurity
- control measures to minimise the threats entering or spreading into, or from, the site, including:
 - inputs
 - outputs
 - movement of people
 - movement of animals
 - vehicles and equipment
 - production practices
 - feral and wild animals, pests and weeds
- record keeping for traceability, both trace back and trace forward, of inputs and outputs
- processes for monitoring effectiveness of control measures
- process for reporting biosecurity concerns and issues.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site that has exposure to potential biosecurity threats or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and websites to access current biosecurity information
 - tools and equipment required to implement control measures
 - recording system relevant to biosecurity
- specifications:
 - workplace biosecurity plans, procedures, records,
 - workplace instructions, job specifications or work routines
 - regulations, legislation, codes of practice relevant to biosecurity
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM101 Follow basic chemical safety rules

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to follow instructions and direction for safe handling, storage and use of chemicals.

The unit applies to individuals who undertake a range of defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well-known parameters and identify and seek help for simple problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work with chemicals	1.1 Confirm the activity to be undertaken with supervisor 1.2 Confirm tools and equipment to be used with supervisor 1.3 Use appropriate personal protective equipment (PPE) and ensure

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	correct fit as directed by supervisor 1.4 Identify functions of chemicals in the workplace
2. Identify risks associated with chemicals	2.1 Identify and interpret chemical labels, safety signs, symbols and safety data sheets according to supervisors' instructions 2.2 Identify health and safety hazards and risks in the workplace and report to supervisor 2.3 Control risks as directed
3. Follow chemical handling and storage rules	3.1 Identify and locate chemical store 3.2 Interpret and follow safe chemical handling, transport, and storage according to product label and supervisor instructions 3.3 Observe instructions for maintenance and storage of PPE and application equipment 3.4 Follow safety rules when working in areas where chemicals are stored 3.5 Identify emergency procedures to follow in the event of an accident or spillage 3.6 Record information as directed by supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret chemical labels, instructions and information
Oral Communication	<ul style="list-style-type: none"> Use clear language and concepts, tone and pace appropriate when communicating with supervisor
Navigate the world of work	<ul style="list-style-type: none"> Recognises organisational expectations and follows explicit instructions, protocols and procedures when working with chemicals
Get the work done	<ul style="list-style-type: none"> Follow clearly defined instructions and sequencing, and monitors own progress for the task, seeks assistance when necessary

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have followed basic rules relevant to chemical safety, including:

- confirmed work requirements and equipment for chemical use with supervisor
- located and followed information on chemical labels and relevant safety data sheets according to supervisors' instructions
- recognised the use of chemicals and complied with chemical safety signs and symbols in the workplace
- recognised chemical hazards and risks and reported to supervisor and applied risk controls
- used, maintained and stored personal protective equipment (PPE)
- maintained and stored chemical application equipment according to supervisors' instructions
- located chemical store, handled, transported, stored and worked with chemicals according to supervisors' instructions
- followed emergency procedures for accidents or chemical spillage and reported to supervisor
- maintained records according to supervisor instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- rules and instructions for working with and around chemicals
- common types of chemicals used in the workplace
- common types of chemical application equipment to be maintained and stored
- the structure and purpose of chemical labels and safety data sheets

- basics of hazards and risks of chemical use
- safety signage and symbols for chemical use in the workplace
- level of hazard and risks associated with common chemicals used in the workplace and methods of control
- PPE, when and how it should be worn, stored and maintained
- methods of reporting to supervisors' chemical hazards and risks
- safe methods of transporting, handling and storage of chemicals
- types of emergencies and the procedures for accidents and spills of chemicals
- records commonly kept for chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to chemicals and chemical store
- resources, equipment and materials:
 - PPE
- specifications:
 - workplace instructions and procedures
 - chemical safety data sheets
 - common chemical labels
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCCHM201 Apply chemicals under supervision

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated that chemicals have been applied under supervision, ensuring they have:

- identified hazards and risks and adopted safe work practices and used appropriate personal protective equipment (PPE) according to supervisors' instructions
- confirmed activity with supervisor and identified and selected tools and equipment necessary for the application of chemical treatment
- carried out pre-operational checks of application equipment and made it ready for operation
- handled and transported chemicals to be used according to chemical labels and supervisors' instructions
- followed directions on chemical labels and relevant safety data sheets to safely mix and prepare chemicals
- selected appropriate measuring equipment and measured, mixed and loaded application equipment with chemicals safely and correctly
- ensured chemical spills were cleared according to chemical label instruction and supervisor instructions
- checked the application equipment for output against plan and applied chemical safely complying with weather conditions
- monitored and recorded weather and applied chemical appropriate to prevailing conditions
- maintained a healthy and safe condition for the environment and others while applying and following chemical application
- cleaned application equipment and PPE and disposed of waste according to equipment manufacturer instructions, chemical label and supervisor instructions
- complied with equipment manufacturer instructions, chemical label and supervisor instructions

- maintained chemical application records and incident reports according to workplace procedures
- stored protection equipment, application equipment and unused chemicals according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- various handling and transport techniques and requirements for chemicals
- structure and content of chemical labels and safety data sheets and their use and purpose for safe chemical application
- principles and methods of measuring, mixing and applying chemicals
- features and functions of a range of application equipment relevant to the workplace their operations, and maintenance requirements
- risk factors to be taken into account for human and animal health, spillage and environmental impact relevant to chemical use before, during and following chemical application
- basic chemical groupings and types used in the workplace, including:
 - the mode of action
 - the impact on chemical safety
 - application methods
- paths of entry of poisons into the body and the methods of limiting exposure through practices and personal protective clothing
- maintenance practices for chemical application related equipment and PPE and disposal procedures for chemical contaminants and containers
- assessing weather conditions and the impact on safe application of chemicals
- components of a workplace chemical application plan
- chemical related records and reports and their purpose.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to chemical store
- resources, equipment and materials:
 - common chemicals
 - PPE
 - chemical application equipment
 - chemical measuring and mixing equipment
- specifications:

- workplace documents, including work instructions and procedures
- chemical labels and safety data sheets
- chemical application plan and relevant chemical application rates
- manufacturers' operation and maintenance instructions for chemical measuring and application equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have safely transported and stored chemicals, including:

- identified health and safety hazards, assessed risks and implemented controls
- ensured emergency services contact details are available
- ensured transport vehicle meets regulations and that chemicals were loaded, secured and protected according to regulations and procedures
- ensured emergency equipment and procedures were available
- handled, transported and stored chemicals safely
- carried out emergency procedures safely and according to procedures
- maintained a chemical storage manifest and safety data sheets (SDS) according to legislative and regulatory requirements
- complied with chemical label instructions and SDS for transporting and storage of chemicals and legislative and regulatory requirements
- maintained inventory and records according to workplace procedures and legislative and regulatory requirements
- monitored chemical expiration and disposed of chemicals and waste according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- chemical labels and SDS their purpose, use and terminology, including:

- chemical signs, symbols and coding
- basic chemical properties and reactivity related to SDS and labels
- legislation and regulations that apply to transporting and storing chemicals, including:
 - transport vehicle requirements
 - information and documentation
 - dangerous and hazardous chemicals
 - placarding requirements
- risk factors including human and animal health and environmental
- processes and procedures for the disposal of excess, unwanted, expired chemicals and chemical waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- emergency procedures for spills and accidents
- recording and monitoring of chemical stores including, expiration and disposal procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to storage facility for chemicals
 - access to vehicle for transporting chemicals
- resources, equipment and materials:
 - chemicals
 - PPE
 - materials and equipment to handle, secure and protect chemical loads
- specifications:
 - specific workplace documents, including work instructions and procedures for chemical handling, storage and transport
 - chemical labels and safety data
 - legislation and regulations about handling, storage and transport of chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely prepare and apply chemicals for the control of pests, weeds and diseases, using general application equipment.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the need for chemical use and prepare an application plan	1.1 Identify the pest, weed or disease, and assess the need for control 1.2 Assess the requirement for chemical use 1.3 Assess health and safety hazard, risks and controls for different chemicals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Confirm requirement for chemical application according to workplace procedures 1.5 Assess off target risk of each application method 1.6 Assess the environmental risk for application method 1.7 Notify stakeholders of intended chemical application according to workplace procedures and legislative and regulatory requirements 1.8 Prepare application plan according to workplace procedures
2. Prepare chemical mixes	2.1 Identify and select chemical required for target according to application plan 2.2 Calculate the volume, rate or dose according to chemical label instructions 2.3 Identify and select application equipment and set-up requirements according to application plan and operator instructions 2.4 Identify hazards, assess risks and implement control measures for application method according to chemical label and health and safety in the workplace procedures 2.5 Identify, select, fit and use personal protective equipment (PPE) according to workplace procedures 2.6 Select appropriate mixing equipment and suitable location to prepare and load chemicals according to workplace procedures 2.7 Prepare chemicals according to chemical label instructions 2.8 Return unused chemical to store and clean preparation equipment and work site of residues and spillage according to chemical label instructions and workplace procedures
3. Calibrate application equipment	3.1 Select application equipment for chemical according to application plan, off target risks and workplace procedures 3.2 Conduct pre-operational checks of application equipment according to operator and maintenance manual 3.3 Calibrate equipment according to operating instructions and application plan 3.4 Load equipment with chemical according to operating instructions and workplace safety procedures
4. Apply chemicals	4.1 Monitor and assess weather conditions and forecasts to ensure effective chemical application according to application plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Select, ensure serviceability, fit and use PPE according to chemical label instructions and workplace procedures</p> <p>4.3 Apply chemical according to label directions and application plan relating to the control of the pest, weed or disease</p> <p>4.4 Monitor application equipment for correct performance and ensure effective chemicals application according to operating instructions</p> <p>4.5 Identify health and safety in the workplace hazards and risks and implement controls</p> <p>4.6 Clean up spills during application according to chemical label instructions and workplace procedures</p>
5. Clean up equipment and complete records	<p>5.1 Clean and decontaminate application equipment according to operator instructions, safety data sheets (SDS) and legislative requirements</p> <p>5.2 Dispose of chemicals and used containers according to chemical label instructions, SDS and legislative requirements</p> <p>5.3 Clean and store PPE according to workplace procedures</p> <p>5.4 Record and report safety and environmental incidents according to workplace procedures and regulatory requirements</p> <p>5.5 Record details of chemical application according to workplace procedures and legislative requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret SDS, chemical labels, operating instruction and other documentation and consolidates information to determine chemical application actions and activity
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational records using clear language and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine rates of application chemical mixtures and calibration of equipment

Skill	Description
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following policies, procedures and regulations Identify and implement chemical label requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for chemical application activities

Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely prepare and apply chemicals ensuring they have:

- determined and confirmed the need for chemical application by assessing the infestation, off target risk, and environmental risks
- developed an application plan for chemical application
- identified health and safety hazards, risk and implemented control procedures according to chemical label
- notified stakeholders of planned chemical application
- used personal protective equipment (PPE) according to workplace procedures
- interpreted chemical labels and applied chemical according to safety data sheets (SDS) and application plan
- identified and selected the chemical required for the target and calculated the amount and rates required according to chemical label
- identified and selected application equipment and suitable location, and determined the set up parameters according to application plan and operator instructions
- monitored and assessed weather conditions and equipment performance to ensure effective chemical application
- selected, conducted pre-operational checks according to operator and maintenance manual
- completed at least one calibration activity for application equipment
- prepared and loaded chemicals and returned unused chemicals to store in accordance with label, application plan and workplace procedures
- applied chemicals safely according to chemical labels, regulations and workplace procedures
- complied with chemical labels, SDS, regulations, maintenance manual, environmental procedures, operator instructions and application plan
- cleaned equipment and spills, and disposed of waste according to workplace and environmental procedures

- maintained records and reported incidents according to workplace procedures and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control options when selecting chemicals for pests, diseases and weeds infestations, including:
 - chemical
 - mechanical
 - cultural
 - biological
 - integrated pest management including resistance management principles
- types of pest, diseases and weed their treatment and resistance
- legal implications and requirements of chemical labels and SDS
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- impact of weather factors on the safe and effective application of chemicals
- characteristics of chemicals, their mode of action and relevance to chemical selection and use, including:
 - translocated/systemic
 - contact
 - ingested poison
 - protectant
 - eradicant
 - knock-down
 - residual
 - selective/non selective
- factors that contribute to off target damage, including:
 - physical movement of chemicals (e.g. animals moving baits or soil movement)
 - chemical formulation
 - wind speed and direction
 - temperature and relative humidity
 - temperature inversions
 - controlling off target damage
 - rainfall
 - buffer zones and barriers
- hazards of chemical application, including:
 - human and animal health
 - environmental contamination

- residues in environment, plants and animals
- withholding/re-entry periods
- safety requirements when applying chemicals, including:
 - procedures
 - PPE
 - signage
- safe handling, transporting and storage of chemicals
- preparing chemicals including preparation, compatibility, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- selecting and operating suitable application equipment
- features, functions and calibration techniques for powered and hand held application equipment, including:
 - pressure and volume of chemical
 - travel speed
 - nozzle identification, selection, operation
- legislation, regulations and licensing requirements in relation to chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chemicals
 - PPE
 - application equipment
 - chemical measuring and mixing equipment
- specifications:
 - specific workplace documents, including work instructions and procedures for chemical application
 - chemical labels and SDS
 - regulations about use of chemicals
 - manufacturers' operation and maintenance instructions for equipment
 - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM404 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to assess hazards and risks and determine controls and develop procedures to mitigate risks when using chemicals.

The unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify chemical use hazards and risks	1.1 Identify, source and analyse information relating to safe use of chemicals in industry 1.2 Identify steps for the process of using chemicals 1.3 Identify hazards and risks for the process of using chemicals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess risks associated with chemical use and develop control procedures	<p>2.1 Assess risks associated with using chemicals in the workplace</p> <p>2.2 Develop control measures and emergency action plans to mitigate risk according to workplace procedures and industry best practice</p> <p>2.3 Develop procedures for risk control for operational activities using chemicals according to industry best practice</p> <p>2.4 Develop a continuous improvement strategy to address identified deficiencies in risk control procedures</p>
3. Monitor and assess adherence to chemical risk procedures	<p>3.1 Provide personnel with chemical use procedures, instruction and safety equipment, including personal protective equipment, for using chemical control strategies</p> <p>3.2 Monitor and assess personnel performance against procedures for selecting equipment for chemical use</p> <p>3.3 Monitor and assess personnel performance against procedures for operational activities of chemical use</p> <p>3.4 Measure the performance of personnel for following risk control procedures according to industry practice</p>
4. Evaluate risk control measures and maintain records	<p>4.1 Develop procedures for evaluating the effectiveness of risk control measures</p> <p>4.2 Identify shortfalls in procedures and document changes required</p> <p>4.3 Update procedures to reflect required changes according to industry best practice</p> <p>4.4 Develop and maintain record systems for risk assessment according to industry best practice and legislative and regulatory requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critical analysis information and consolidate to determine risks in chemical control procedures

Skill	Description
Writing	<ul style="list-style-type: none"> Develop procedural material using clear and detailed language in order to convey explicit risk control information
Oral Communication	<ul style="list-style-type: none"> Present complex information using clear and convincing language, tone and pace appropriate when briefing personnel on procedures
Navigate the world of work	<ul style="list-style-type: none"> Work independently or with others in making decisions to achieve organisation outcomes Contribute to roles and responsibilities of others Take full responsibility for following policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Implement strategies for a diverse range of colleagues in order to build rapport and foster strong relationships when instructing and monitoring performance Elicit feedback and provide feedback to others in order to improve workgroup behaviours and update procedures
Get the work done	<ul style="list-style-type: none"> Accept responsibility for planning and sequencing complex tasks and workload Monitor progress of procedures and reviews and amends them to meet demands and priorities Apply systematic and analytical decision making processes for complex and non-routine situations

Assessment Requirements for AHCCHM404 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed procedures to minimise risks in the use of chemicals, including:

- sourced information and analysed its content for safe chemical use
- identified steps in the chemical use process and identified hazards and risks
- assessed the risks and developed risk control procedures to mitigate the risk for chemical use
- implemented procedures, monitored and evaluated personnel using procedures
- developed a continuous improvement strategy for risk control procedures
- implemented, monitored and evaluated a chemical risk control procedure
- developed and maintained records for risk assessment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of chemical safety information, including:
 - codes of practice
 - legislation and regulations
 - chemical manufacturer labels
 - safety data sheets (SDS)
- industry best practice requirements relating to chemical use
- strategies for identifying hazards, risks and controls
- risk factors, including:
 - human
 - animal health
 - product integrity

- weather
- residues and maximum residue levels
- spray drift, spillage and environment
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations
- principles and practices of chemical handling, transporting and storage of chemicals and fumigants
- principles and practices of chemical application strategies and equipment including integrated pest management
- operational factors to consider in procedures, including:
 - transport, handling and storage
 - application methods, equipment and personal protective equipment (PPE)
 - cleaning and decontamination
 - disposal of waste
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment required to implement the chemical use procedure
 - PPE
- specifications:
 - specific workplace documents including policies and processes
 - manufacturers' operating instructions for equipment and machinery
 - SDS
 - workplace instructions and job specifications
 - chemical information including legislation, codes of practice, manufacturer instructions
- relationships:
 - team member(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM405 Plan and implement a chemical use program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to assess and control the risks associated with chemical use and to plan and implement a program for chemical use.

The unit applies to individuals who take responsibility for their own work and provide direction to others. All work must be carried out to comply with workplace procedures, in accordance with applicable state/territory health and safety in the workplace, pesticide and environmental legislation and codes of practice.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify requirements for chemical use	1.1 Identify, source and interpret information required for planning and implementing a chemical use program 1.2 Assess the need for chemical use as an option 1.3 Ensure that personnel are adequately trained in chemical use according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess risks and develop control procedures	<p>2.1 Identify hazards, assess risks and develop control measures and emergency action plans for chemical use operational activities</p> <p>2.2 Assess weather conditions and forecasts to determine implications for off target contamination</p> <p>2.3 Assess the sensitivity of target area and impact of chemical on the environment according to chemical label instructions and safety data sheets (SDS)</p> <p>2.4 Assess the risk to human and animal health according to chemical label instructions and SDS</p> <p>2.5 Analyse assessments and document risk control procedures for the chemical application plan according to workplace procedures</p>
3. Develop an operational and maintenance program for chemical use	<p>3.1 Determine chemicals to be used according to workplace pest management strategy</p> <p>3.2 Calculate mixing requirements for chemicals according to chemical label instructions and workplace procedures</p> <p>3.3 Document operational checks and calibration requirements of equipment according to operators instructions and manufacturer specifications</p> <p>3.4 Develop and implement an operational and maintenance strategy for application equipment and personal protective equipment according to health and safety practices</p> <p>3.5 Document operational and maintenance procedures for chemical application plan according to workplace protocols</p>
4. Implement and monitor chemical application plan	<p>4.1 Provide personnel with chemical use procedures, and instruction on safety equipment for chemical application plan</p> <p>4.2 Monitor adherence with safe practice for preparation and application of chemicals according to chemical application plan</p> <p>4.3 Monitor adherence to procedures for handling, transport, storage, decontamination and disposal of chemicals according to chemical application plan</p> <p>4.4 Monitor adherence to maintenance procedures according to chemical application plan</p> <p>4.5 Monitor adherence to residue procedures for product and environment according to chemical application plan</p>
5. Finalise work	5.1 Ensure excess chemicals are disposed of according to waste

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
activities in accordance with chemical application plan	management and environment procedures 5.2 Ensure required records are completed according to operational and workplace, health and safety procedures
6. Evaluate chemical application plan and records for continuous improvement	6.1 Develop procedures for evaluating the effectiveness of chemical application plan 6.2 Identify and document shortfalls in chemical application plan 6.3 Develop a continuous improvement strategy to rectify the chemical application plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyse and consolidate information to determine chemical control procedures and develop chemical application plan
Writing	<ul style="list-style-type: none"> Develop procedural material using clear and detailed language in order to convey explicit risk control information
Oral Communication	<ul style="list-style-type: none"> Present complex information using clear and convincing language, tone and pace appropriate when briefing personnel on chemical application plan
Navigate the world of work	<ul style="list-style-type: none"> Work independently or with others in making decisions to achieve organisation outcomes Contribute to roles and responsibilities of others through implementation of plans Take full responsibility for following policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Implement strategies for a diverse range of colleagues in order to build rapport and foster strong relationships when instructing and monitoring performance Elicit feedback and provides feedback to others in order to improve workgroup behaviours and update plans

Skill	Description

Assessment Requirements for AHCCHM405 Plan and implement a chemical use program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have planned and implemented a chemical use program, including:

- sourced information and analysed its content for chemical application
- assessed the need for chemical use and ensured personnel are adequately trained in chemical use according to workplace procedures
- identified hazards, risks and provided controls, including personal protective equipment (PPE) for chemical application and off target impact
- assessed weather conditions and environmental sensitivity of the site
- documented chemical application and maintenance procedures according to workplace protocols
- determined chemicals required and mixing requirements according to workplace procedures and chemical label instructions
- develop a continuous improvement strategy to minimise risk
- communicated chemical application plan to personnel
- implemented procedures and monitored and evaluated personnel according to chemical application plan
- developed a continuous improvement strategy for chemical application plan
- implemented, monitored and evaluated a chemical application plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- source of information for developing plans, including:
 - legislation and regulations
 - codes of practice
 - chemical labels

- safety data sheets (SDS)
- industry requirements relating to chemical use
- strategies for identifying hazard, risks and controls
- risk factors, including:
 - human
 - animal health
 - product integrity
 - weather
 - residues and maximum residue levels
 - off target damage, spillage and environment
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities, limitations and calibration
- mixing chemicals, including:
 - rates
 - mixing order if more than one chemical
 - adjuvants
 - water quality
- life cycle of a variety of pests and the target stages
- implications of pest resistance to chemicals
- principles and practices of chemical application strategies and equipment including, integrated pest management and animal health strategies
- preparation and documentation of strategic plans and procedures
- signs of pest damage and signs of beneficial organisms
- operational factors to consider in a procedures, including:
 - transport, handling and storage
 - application methods, equipment and PPE
 - cleaning and decontamination
 - disposal of waste
- emergency procedures including first aid
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment required to implement the chemical application program
 - PPE
 - chemicals and relevant weighing and mixing equipment
- specifications:
 - specific workplace documents including policies and processes
 - manufacturers' operating instructions for chemicals, equipment and machinery
 - SDS
 - workplace instructions and job specifications
 - chemical information including legislation, codes of practice, chemical label instructions
- relationships:
 - team member(s) or work crew
- timeframes:
 - schedules and planned completion dates for a chemical application plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCECR502 Conduct biological surveys

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to plan and conduct biological surveys and produce a biological survey report, according to client requirements and biological components to be surveyed.

The unit applies to individuals working as land restoration managers who analyse information and exercise judgement to complete a range of advanced skilled activities demonstrating a deep knowledge in specific technical areas within land management. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Ecological Restoration (ECR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Carry out preliminary design activities for the biological survey	1.1 Identify survey scope, objectives and constraints according to client brief 1.2 Source, collate and evaluate current data relevant to survey requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Develop processes for data collection and processing consistent with the survey scope, objectives and constraints</p> <p>1.4 Design survey plan reflecting client requirements and present to client for approval</p> <p>1.5 Incorporate workplace health and safety and environmental sustainability and biosecurity procedures into plan</p>
2. Determine requirements of the biological survey	<p>2.1 Identify biological survey indicators and evaluate constraints and opportunities for data collection</p> <p>2.2 Identify data collection points that are repeatable and statistically representative</p> <p>2.3 Identify hazards associated with a biological survey, assess risks and develop controls, determine costs, and document in the survey design</p> <p>2.4 Secure permits and approvals required for survey according to ethical standards, workplace procedures and legislative requirements</p> <p>2.5 Determine tools, equipment and machinery required for the survey and confirm availability with suppliers</p> <p>2.6 Schedule survey activities and surveyor access according to the survey design</p> <p>2.7 Document survey procedures and schedules and present to stakeholders and client for approval</p>
3. Conduct the biological survey	<p>3.1 Conduct field visit to verify existing data and update information</p> <p>3.2 Conduct the biological survey according to the survey design</p> <p>3.3 Monitor survey activities for accuracy, compliance to the survey design and legislative and ethical standards</p> <p>3.4 Undertake staged data collection according to the survey design, scheduling and surveyor access requirements</p> <p>3.5 Record all monitoring and survey data according to specifications of the survey design</p>
4. Compile a biological survey report	<p>4.1 Analyse data and draw conclusions based on evidence and reasoned arguments</p> <p>4.2 Prepare a biological survey report according to agreed timeframes and client outcomes and workplace standards</p> <p>4.3 Present report to the client</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Draw on a broad range of strategies to interpret, build and maintain understanding from data sets and reference materials when planning, collating and interpreting survey data
Writing	<ul style="list-style-type: none"> Record outcomes of surveys and incorporate into biological survey reports, expressing ideas and exploring complex issues, and ensuring it is constructed logically, succinctly and accurately
Numeracy	<ul style="list-style-type: none"> Capture, record and analyse survey data and use calculations to help formulate conclusions

Assessment Requirements for AHCECR502 Conduct biological surveys

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and conducted at least one biological survey with at least two of the following biological elements:

- flora
- vertebrate fauna
- fungi
- invertebrate fauna
- microorganisms

The survey must also be conducted in at least one of the following environments:

- terrestrial
- marine or aquatic
- arboreal

There must be evidence that the individual has:

- planned, conducted and reported on biological surveys according to client requirements, workplace policies and industry best practice
- identified scope, objectives and constraints for a biological survey
- assessed current data and determined data collection and processing needs
- identified biological indicators that are repeatable and statistically representative
- developed a survey plan that documents survey methods and indicators
- secured permits and approvals
- scheduled survey activities and established access to the site
- conducted a biological survey with data collection staged and recorded according to the survey plan and health and safety requirements, and that must include:
 - species, identified by biological and vernacular name
 - frequency
 - distribution

- condition
- habitat
- produced a biological survey report with analysis and conclusions, including:
 - survey findings according to the survey scope and objectives
 - identified areas requiring remedial action and improvements
 - detailed recommendations for action
 - description and assessment of the specified biological components
- ensured survey plan and activities complied with animal welfare codes of practice and environmental and biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- biological classification systems
- plant and animal recognition relevant to survey area
- environmental factors that impact on vegetation and animal populations
- survey equipment, machinery and methods for specific environments, including:
 - marine and aquatic
 - terrestrial
 - arboreal
- survey techniques and methods for different biological elements, including:
 - microorganisms
 - fungi
 - micro and macro invertebrates
 - plants
 - animals including fish
 - methods for obtaining statistically representative sample
- requirements for ensuring the legality of biological surveys, including:
 - animal welfare
 - codes of practice
 - legislative requirements
 - ethical standards and approvals
- ecological principles and terminology, including
 - ecosystem structures and habitat
 - interactions between flora and fauna
 - vegetation types and their characteristics
 - energy flows and trophic structures of communities
- assessment, reporting and client liaison procedures and best practice techniques
- workplace team management procedures
- workplace health and safety legislative requirements and codes of practice, including:

- hazard identification, assessment and control measures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field and according to the conditions specified in the Performance Evidence or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - survey equipment relative to the type of survey undertaken
- specifications:
 - specific workplace policies and procedures for conducting surveys and recording results
 - client brief and specifications for survey
 - specific legislation and codes of practice for ethical surveys
- relationships:
 - client
- timeframes:
 - according to time specified in client brief.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCINF206 Install, maintain and repair farm fencing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to install, maintain and repair farm fencing using appropriate tools and techniques.

The unit applies to individuals who install, maintain and repair farm fencing under general supervision with limited autonomy or accountability.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements and manufacturer specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for farm fencing work	1.1 Confirm work instructions with supervisor 1.2 Identify and report workplace health and safety hazards and risks to supervisor 1.3 Prepare and use tools and equipment according to supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>instructions</p> <p>1.4 Carry out routine pre-operational checks of tools</p> <p>1.5 Identify faulty or unsafe tools, and separate for repair or replacement</p> <p>1.6 Select, fit and use personal protective equipment (PPE) applicable to the task</p> <p>1.7 Prepare fencing materials, tools and equipment for transport to worksite</p>
2. Undertake farm fence installation	<p>2.1 Install and secure posts and stays according to work instructions</p> <p>2.2 String and tension wire according to job requirements and wire specifications</p> <p>2.3 Attach wire netting or other fencing materials according to work instructions</p> <p>2.4 Position and attach gates and check their operation according to manufacturer instructions</p>
3. Maintain and repair farm fencing	<p>3.1 Identify faults or structural damage, and carry out necessary repairs</p> <p>3.2 Dismantle fences and recover re-useable materials</p> <p>3.3 Identify and report further maintenance or repair works to supervisor</p> <p>3.4 Pack used fencing material for reuse, or dispose of it</p>
4. Complete farm fencing work	<p>4.1 Clear and tidy work area, and remove or dispose of or recycle rubbish and waste material</p> <p>4.2 Clean, maintain and store tools, materials and equipment</p> <p>4.3 Report work outcomes and malfunctions, faults, wear or damage of tools to supervisor</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace instructions to formulate an understanding of expected requirements and activity
Oral Communication	<ul style="list-style-type: none"> Use clear language and standard industry terminology to report malfunctions, faults, wear or damage of tools Participate in verbal exchanges to respond to questions and clarify instructions with supervisor
Numeracy	<ul style="list-style-type: none"> Determine fencing resources and measurements to construct fencing

Assessment Requirements for AHCINF206 Install, maintain and repair farm fencing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed, maintained and repaired farm fencing on at least one occasion and has:

- confirmed farm fencing requirements and plan with supervisor
- identified workplace health and safety hazards and risks, and reported to supervisor
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, prepared, transported and safely used fencing materials, tools and equipment applicable to installing, maintaining and repairing farm fencing
- conducted pre-operational checks and replaced or separated for repair tools and equipment identified with faults
- installed and repaired fencing components and gates
- dismantled and recovered reusable materials from existing fence
- reported farm fencing installation, maintenance and repair activities and unserviceable tools and equipment
- cleaned and tidied up work area and disposed of or recycled waste.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- designs and purpose of a range of farm fencing
- common hazards involved in fencing installation, maintenance and repair
- workplace requirements applicable to health and safety in the workplace for installing, maintaining and repairing farm fencing, including appropriate use of PPE
- tools and equipment used for fencing and their safe operation, storage and maintenance
- applications and limitations of wire types, knots and tensions

- fencing materials manufacturer specifications and guidelines.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fences, fencing tools, materials and equipment
 - PPE applicable to installing, maintaining and repairing farm fencing
- specifications:
 - workplace health and safety procedures relevant to farm fence installation, maintenance and repair
 - workplace documents, including processes, instructions, job and wire specifications relevant to installing, maintaining and repairing farm fencing
 - manufacturer operating instructions for fencing equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCINF307 Plan and construct conventional fencing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to plan and construct conventional fencing.

The unit applies to individuals who construct conventional fencing under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements and manufacturer specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine fencing requirements	1.1 Access property maps and assess fencing requirements according to workplace objectives 1.2 Calculate fencing material required for the task 1.3 Prepare fencing plan, giving consideration to siting fences in

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	relation to natural features, land class and proposed use
2. Prepare for construction	2.1 Check proposed fencing against property maps and work plan 2.2 Identify services, structures and features that may impact on the fencing work, and incorporate into the fencing plan 2.3 Organise and transport tools and equipment to the work site 2.4 Confirm and arrange labour requirements 2.5 Identify potential hazards and risks, and implement safe working practices to manage risks
3. Construct conventional fence	3.1 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task 3.2 Mark out and check fence lines against work plan and property maps 3.3 Construct fence according to fencing plan specifications and fence design 3.4 Attach and position gates for correct operation and function
4. Complete fencing operations	4.1 Clean and tidy work area and dispose of or recycle rubbish and waste material 4.2 Transport, clean, maintain and store tools, fencing equipment and PPE according to workplace procedures 4.3 Identify and report unserviceable tools and equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCINF307 Plan and construct conventional fencing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and constructed conventional fencing on at least one occasion and has:

- sited fence line according to property or land management plan
- sourced and arranged delivery of fencing materials
- recognised and reported workplace health and safety hazards and used safe work practices
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- constructed a fence that meets specifications in the fencing plan and is within tolerances for materials
- strung and strained wires to manufacturer recommended tension
- used and maintained fencing tools and equipment
- constructed gate assemblies and swing gate
- cleaned and tidied up work area, stored tools and equipment and disposed of waste.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- range of fencing designs, construction methods and materials
- fencing materials and costings
- procedures for planning fencing in relation to the whole property plan
- issues affecting property fence planning and construction
- types of fencing construction tools and equipment
- common fencing hazards and safety precautions
- workplace requirements applicable to health and safety in the workplace for planning and constructing conventional fencing, including appropriate use of PPE

- disposal and recycling of waste material, including identification and disposal of hazardous material associated with conventional fence planning and construction
- workplace procedures relevant to conventional fence planning and construction, and disposing of waste materials.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fences, fencing tools, material and equipment
 - PPE applicable to conventional fence planning and construction
- specifications:
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to conventional fence planning and construction
 - workplace documents, including workplace procedures, processes, instructions and job specifications relevant to conventional fence planning and construction.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCIRG328 Operate irrigation controller and sensor technology

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to operate irrigation controller and sensor technology as part of irrigation installation, construction and operation.

The unit applies to individuals who operate irrigation controller and sensor technology under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	<p>1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks</p> <p>1.2 Select required tools and equipment, and check for safe operation and accuracy</p> <p>1.3 Select, fit and use personal protective equipment applicable to the task</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Operate irrigation controllers	2.1 Link valves to controllers by wiring or radio signals 2.2 Program controllers according to operating procedures 2.3 Operate controller according to site requirements 2.4 Troubleshoot controller and rectify cause of faults
3. Operate irrigation sensors	3.1 Link sensors to controllers by wiring or radio signals 3.2 Program controllers to monitor sensor 3.3 Operate and monitor accuracy and reliability of sensor control equipment, and adjust where necessary 3.4 Collect samples according to sampling techniques 3.5 Record and interpret readings and observations 3.6 Troubleshoot sensors and rectify cause of faults 3.7 Report discrepancies or malfunctions to management

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Complete records of readings and observations legibly and accurately using correct technical terminology
Oral communication	<ul style="list-style-type: none"> Use clear language to report discrepancies or malfunctions
Numeracy	<ul style="list-style-type: none"> Interpret the measurements of sample results Make calculations to check the accuracy of program irrigation controllers and adjust electronic flow equipment
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Controllers must include at least 3 of the following:	<ul style="list-style-type: none"> • stand-alone • Bluetooth • wifi • remote radio controllers • multi-site central controllers.
Sensors must include at least 4 of the following:	<ul style="list-style-type: none"> • water meters • soil moisture and temperature sensors • air temperature sensors • weather stations • pump pressure sensors • rainfall sensors.

Assessment Requirements for AHCIRG328 Operate irrigation controller and sensor technology

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated irrigation controller and sensor technology on at least two occasions, and has:

- applied workplace health and safety requirements
- selected tools and equipment appropriate to the scope of works
- maintained and checked irrigation controller and sensor equipment for accuracy
- operated irrigation controllers and sensors
- checked the accuracy of controller and sensor equipment, and adjusted
- recorded the results of sampling and testing
- recorded observations and data.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for operating irrigation controller and sensor technology, including working with extra low voltage wiring according to Australian Standards
- basic electrical testing procedures and safety practices
- irrigation controller and sensor operating and testing procedures
- environmental procedures for use, storage and recycling of electronic equipment and batteries
- data recording procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - irrigation controller and sensor installation and operating equipment
 - irrigation controllers and sensors
 - personal protective equipment applicable to installing and operating irrigation controller and sensor technology
- specifications:
 - work instructions and workplace procedures applicable to operating irrigation controller and sensor technology
 - workplace requirements applicable to health and safety in the workplace for operating irrigation controller and sensor technology
 - Australian Standards applicable to working with extra low voltage wiring
 - irrigation controller and sensor operating and testing procedures
 - data recording procedures
 - environmental procedures for use, storage and recycling of electronic equipment and batteries
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCIRG346 Operate pressurised irrigation systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated a pressurised irrigation system on at least two occasions and has:

- applied workplace health and safety requirements
- selected tools and equipment appropriate to the scope of works
- read and followed operations manual and procedures
- started the system and carried out operational checks
- monitored system effectiveness, including:
 - application rates
 - depth of irrigation
 - emitter output
 - irrigation times
 - pressure variations and blockages
 - salinity levels and water quality
- carried out measurements for output and distribution
- measured and interpreted flow rates and pressures
- assessed soil moisture levels
- performed shut down procedures
- recorded data.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for operating pressurised irrigation systems
- electrical hazards, including:
 - contact with pumps, motors, other live components

- short circuits
- standing laterals to remove blockages
- water spray onto power lines
- energy efficiency indicators and benchmarks for pressurised irrigation
- pressurised irrigation equipment operation and maintenance manual
- main components of pressurised irrigation systems
- pump types used in irrigation systems and their operation
- general irrigation methods for low volume systems
- principles of irrigation and the water cycle
- critical measures for moisture availability, including:
 - evapotranspiration
 - field capacity
 - infiltration rates
 - readily available water
 - water holding capacity
 - wilting point
- soil characteristics
- soil, plant and water relationships
- water requirements of plants and crops consistent with sound environmental management
- environmental impacts of irrigation using water from any ground or underground source
- shutdown sequence and flushing procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pressurised irrigation system operation and maintenance manual
 - pressurised irrigation system equipment
 - personal protective equipment applicable to operating pressurised irrigation systems
- specifications:
 - work instructions and workplace procedures applicable to operating pressurised irrigation systems
 - pressurised irrigation system tools and equipment and procedures
 - workplace requirements applicable to health and safety in the workplace and operating pressurised irrigation systems
 - recording procedures
- relationships:
 - supervisor
- timeframes:

- according to job requirements.

Assessors of this unit must satisfy the requirements of assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCLSC318 Erect timber structures and features

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to erect timber structures and features as a component of landscape project works, including preparing for work, setting out and preparing site, preparing and cutting timber components, assembling and erecting structure, checking and cleaning up site.

The unit applies to individuals who erect timber structures and features under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Landscape (LSC)

Assessment Requirements for AHCLSC318 Erect timber structures and features

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has erected timber structures and features on at least two occasions and has:

- interpreted site plans, design drawings and specifications
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, used and maintained tools and equipment required for erecting timber structures and features
- set out and prepared site for timber structures and features
- marked out a site for timber structures and features according to site plans, design drawings and specifications
- established levels and prepared footings where required
- used levelling equipment
- excavated footings
- identified and selected timber according to site plans and specifications
- measured and marked out timber
- selected and used hand and power tools relevant to timber structures and features
- selected hardware according to site plans and specifications
- fixed, joined or assembled timbers
- applied protective treatments
- checked quality of work and cleaned up site
- reported unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for erecting timber structures and features, including:
 - Australian standards and codes relevant to timber structures and features
 - industry standard terminology relevant to timber structures and features
 - levelling principles and techniques
 - footings for timber structures and their construction methods
 - timber fixing and joining methods and hardware products
 - timber properties, characteristics and defects
 - use of hand and power tools relevant to timber structures and features
 - protective treatments
- workplace requirements applicable to health and safety in the workplace for erecting timber structures and features, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
 - assessment of this competency can be conducted as part of a team working on a large group project
- resources, equipment and materials:
 - workplace procedures applicable to erecting timber structures and features
 - materials, tools and equipment applicable to erecting timber structures and features
 - PPE applicable to erecting timber structures and features
- specifications:
 - workplace requirements applicable to health and safety in the workplace for erecting timber structures and features
 - site plans, design drawings and specifications applicable to erecting timber structures and features
 - Australian standards and codes relevant to timber structures and features
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM202 Operate tractors

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and complete tractor operations under general supervision in the agriculture, horticulture and land management sectors.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare tractor for operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Source and interpret machinery operation and maintenance manual and manufacturer instructions for tractor operation 1.3 Select and maintain personal protective equipment and safety equipment according to workplace safety requirements 1.4 Fit and use personal protective equipment according to job requirements and task to be undertaken 1.5 Select and attach equipment as directed by supervisor 1.6 Conduct tractor routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor
2. Operate tractor	2.1 Carry out pre-start and start up procedures required for tractor operation 2.2 Drive and operate tractor in a smooth and controlled manner 2.3 Apply workplace environmental and biosecurity procedures associated with tractor operation and minimise impact 2.4 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.5 Complete work according to agreed plan as directed by supervisor 2.6 Report abnormal monitoring system indicators and alarms to supervisor
3. Complete tractor operation	3.1 Park tractor and conduct shut down procedures 3.2 Perform routine operational servicing according to the operation and maintenance manual 3.3 Report malfunctions, faults, irregular performance or damage to supervisor 3.4 Clean, decontaminate, secure and store tractor and attached equipment 3.5 Remove and store keys in the required location 3.6 Maintain tractor and equipment use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document tractor and equipment use
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage Participate in verbal exchanges to respond to questions and clarify instructions
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including fuel Identify correct tyre pressure or track tension
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> maintenance interval schedule daily check machine damage and serviceability guards are in place and undamaged checking for missing parts fluid leaks and levels fuel level brakes and clutch operation condition of tyres or tracks machine controls.

Assessment Requirements for AHCMOM202 Operate tractors

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, safely operated and completed tractor operations under general supervision at least once and has:

- identified and reported hazards and implemented safe operating procedures
- carried out tractor pre-operational checks and reported faults to supervisor
- driven and operated a tractor safely, in a smooth and controlled manner
- operated tractors in even and uneven terrain conditions
- carried out tractor shut down procedures
- maintained tractor use records and reported faults or malfunctions
- minimised environmental impacts associated with tractor operation
- followed workplace health and safety procedures for safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor operation and maintenance manuals
- tractor steering systems and features
- features, operational functions and procedures for attached equipment
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities

- effects of various surface and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of vehicles
- health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - tractors
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - tractor operation and maintenance manual
 - industry and workplace biosecurity procedures applicable to tractor operation
 - legislation relevant to tractor operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>practices to manage risks</p> <p>1.2 Source and interpret front-end loader operation and maintenance manual and manufacturer instructions</p> <p>1.3 Assess the work-site and confirm suitability of the machinery and equipment for the task</p> <p>1.4 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.5 Fit and use personal protective equipment and confirm safety equipment applicable to the task being undertaken</p> <p>1.6 Conduct front-end loader routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor for repair</p> <p>1.7 Observe safety rules and regulations, including site rules and legislation and site specific instructions</p>
2. Operate front-end loader	<p>2.1 Carry out pre-start, and start up procedures according to health and safety in the workplace guidelines</p> <p>2.2 Drive and operate front-end loader, and modify operating technique to meet changing work conditions</p> <p>2.3 Select loading technique and modify where required to meet changing work conditions</p> <p>2.4 Use attachments according to manufacturer instructions and site requirements</p> <p>2.5 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.6 Identify environmental and biosecurity implications associated with front-end loader operation and minimise impact</p> <p>2.7 Complete work task according to the agreed plan and within the operating capacity of the equipment and operator</p>
3. Complete front-end loader operation	<p>3.1 Park front-end loader and conduct shut down procedures</p> <p>3.2 Perform routine operational servicing and minor maintenance according to front-end loader operation and maintenance manual</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.4 Clean, secure and store front-end loader</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.5 Remove and store keys in the required location 3.6 Maintain front-end loader use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document front-end loader use
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including fuel Identify correct tyre pressure or track tension
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> maintenance interval schedule daily check machine damage and serviceability checking for missing parts fluid leaks and levels
--------------------------------------	--

	<ul style="list-style-type: none"> • fuel level • brakes and clutch operation • condition of tyres or tracks • machine controls.
Attachments must include at least one of the following:	<ul style="list-style-type: none"> • bale fork • bucket • bull blades • log fork • pallet fork • S Houle rock bucket • silage fork.
Biosecurity implications must include:	<ul style="list-style-type: none"> • control of cross-site contamination.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down front-end loader operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for front-end loader operations
- carried out front-end loader pre-operational checks for safe front-end loader operations
- driven and operated a front-end loader safely and modified operating technique to meet changing work conditions
- operated front-end loader features and attachments consistent with operation and maintenance manual and manufacturer specifications
- carried out front-end loader shut down procedures including securing and safe storage of front-end loader
- minimised environmental impacts associated with front-end loader operation
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the front-end loader
- followed industry and workplace biosecurity procedures
- completed required documentation for front-end loader use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with front-end loader operations
- front-end loader site safety requirements
- front-end loader components, controls, features, technical capabilities and limitations

- front-end loader operation and maintenance manual
- duty of care to self, others and the environment when operating a front-end loader
- relevant legislation with regard to front-end loader operation and licensing requirements
- environmental impacts relevant to the operation of front-end loaders
- workplace procedures applicable to health and safety in the workplace requirements to operate a front-end loader safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - front-end loaders
 - attachments
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - front-end loader operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to front-end loader operation
 - legislation relevant to front-end loader operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM216 Operate side by side utility vehicles

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a side by side utility vehicle on at least two riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with side by side utility vehicle use
- identified and avoided driving surfaces, terrains and slopes that are dangerous to safe operation of side by side utility vehicles
- selected and worn side by side utility vehicle helmet that is fit for purpose according to operators manual
- selected, fitted and used other personal protective equipment that is required for the task
- maintained personal protective equipment in suitable condition for use
- unloaded the side by side utility vehicle safely and checked it is safe to use
- operated and manoeuvred side by side utility vehicles in different surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a side by side utility vehicle in a controlled manner
- selected appropriate modes of operation and applied side by side utility vehicle driver skills to assist vehicle stability
- parked the side by side utility vehicle safely and checked for any damage, malfunctions or faults
- loaded and secured side by side utility vehicle safely
- minimised environmental impacts associated with side by side utility vehicle operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with side by side utility vehicle areas of operation

- components, controls, modes and features of side by side utility vehicles and their functions
- side by side utility vehicle functional applications, including:
 - occupant hand holds, correct use, importance of reach and keeping body parts inside vehicle
 - roll-over protective structure
 - tyre selection and inflation pressure
 - side nets and doors
- operating principles and operating methods of side by side utility vehicles
- workplace safety plan for operating and maintaining side by side utility vehicles
- side by side utility vehicle operator's manual
- side by side utility vehicle driver skills, including higher level two foot pedal operation skills, for technical applications
- effects of different surfaces and terrain conditions on the operation of side by side utility vehicle
- load limits and attachments specific to side by side utility vehicle capabilities and the effects to dynamic stability of the side by side utility vehicle including:
 - weight distribution
 - load security
 - liquid or shifting loads
 - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
 - tie down devices
 - vehicle ramps
 - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to side by side utility vehicle use
- environmental impacts associated with operating side by side utility vehicles and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - helmets must be worn whilst operating side by side utility vehicles according to operators manual
- resources, equipment and materials:
 - side by side utility vehicle
 - vehicle fuel

- side by side utility vehicle helmet as identified by operator manual
- enclosed toe shoes
- specifications:
 - side by side utility vehicle manufacturer specifications and operator manuals
 - industry and workplace biosecurity procedures applicable to side by side utility vehicle operation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to coordinate the maintenance and repair of machinery and equipment used principally in agriculture, horticulture, and conservation and land management work.

The unit applies to individuals who coordinate machinery and equipment maintenance and repair under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

	<p>to the scope of the coordination work and supervisor instructions</p> <p>1.3 Identify, document and present the priorities for maintenance and repair activities and time allocation to the supervisor for verification</p> <p>1.4 Identify the environmental implications of the proposed maintenance and repair work and assess and report potential impacts to the supervisor</p> <p>1.5 Identify workplace hazards, assess risks and implement risk controls</p> <p>1.6 Select, fit, use and maintain personal protective equipment according to job requirements and task to be undertaken</p>
<p>2. Coordinate maintenance and repair of machinery and equipment</p>	<p>2.1 Purchase, store and use materials to assist in maintenance and repair work</p> <p>2.2 Organise delivery of materials to the site according to maintenance requirements</p> <p>2.3 Organise machinery and equipment required for maintenance and repair to be on site and in good order when they are required</p> <p>2.4 Identify and organise routine maintenance and repairs of machinery and equipment and facilitate repairs that require specialist attention</p>
<p>3. Coordinate and report on maintenance and repair activities</p>	<p>3.1 Coordinate staff and resources to suit the maintenance and repair activities and priority of work</p> <p>3.2 Inform operators of their responsibilities in respect to operational maintenance requirements of machinery and equipment</p> <p>3.3 Monitor personnel and document activities, timelines and materials usage</p> <p>3.4 Recognise and report contingency situations to the supervisor and adjust schedules accordingly</p> <p>3.5 Document and report maintenance and repair activities undertaken and completed to relevant personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Legibly and accurately fill out workplace documentation when recording activities, timelines and materials usage
Oral communication	<ul style="list-style-type: none"> Use clear language to report service or repair requirements
Numeracy	<ul style="list-style-type: none"> Calculate quantities of material and resource requirements, including; fuels, oils, cleaning agents, solvents and chemicals Calculate maintenance and repair time allocation
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Material resource requirements must include at least two of the following:	<ul style="list-style-type: none"> tools fuel oil cleaning agents solvents chemicals.
Personal protective clothing and equipment must include:	<ul style="list-style-type: none"> enclosed toe shoes safety glasses/goggles.
Contingency situations must include at least one of the following:	<ul style="list-style-type: none"> delays in delivery of equipment or machinery machinery or equipment breakdowns poor weather conditions poor quality materials unforeseen problems.

Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has coordinated maintenance and repair of machinery and equipment for a small enterprise and has:

- identified workplace hazards, assessed risks and implemented safe workplace procedures
- interpreted documentation associated with work site activities
- sought specialist advice on repairs requiring specialist attention
- established priorities for repair and maintenance work to be carried out
- co-ordinated staff and resources to achieve work priorities
- minimised environmental impacts of machinery and equipment maintenance and repair activities
- responded to contingencies and taken corrective actions where necessary
- documented activities, timelines and material usage
- applied workplace health and safety procedures when organising and conducting maintenance and repair activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery required for the project
- environmental impacts of machinery and equipment maintenance and repair work and disposal of fuels, oils and other wastes

- workplace procedures applicable to health and safety in the workplace, and machinery and equipment maintenance and repair.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - maintenance tools and equipment
 - material resources
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM306 Ground spread fertiliser and soil ameliorant

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare and undertake activities required to ground spread fertiliser and soil ameliorants.

This unit applies to individuals who apply industry codes of practice and operating principles to ground spread fertiliser and soil ameliorants under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, manufacturer specifications, sustainability and biosecurity practices.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm customer	1.1 Confirm with customer that fertiliser or soil ameliorant products to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	<p>be spread are consistent with customer order</p> <p>1.2 Verify with customer that technical specification of products are acceptable for job</p> <p>1.3 Confirm fertiliser order documentation with customer to enable depot and factory traceability</p> <p>1.4 Document spreading services agreement according to workplace requirements and industry code of practice</p>
2. Identify features of target area	<p>2.1 Identify and agree with customer on the location and boundaries of area to be treated and document according to workplace requirements and industry code of practice</p> <p>2.2 Visually assess soil type and condition or seek advice from customer</p> <p>2.3 Identify environmentally sensitive areas and plan operations to ensure minimum adverse impact and compliance with required buffer zones</p> <p>2.4 Inspect and identify features that present a hazard to the operation, consult with customer and take appropriate action to minimise risks</p> <p>2.5 Identify the location of services and utilities in consultation with customer and adjust proposed spreading operation</p> <p>2.6 Identify local weather and climate conditions and take into account potential impacts when preparing for operation</p>
3. Perform pre-spreading checks	<p>3.1 Determine rate of spreading and calculate buffer zone allowance</p> <p>3.2 Ensure machinery and equipment are clean of soil and/or plant material before it is moved onto site</p> <p>3.3 Prepare, set up, calibrate and confirm serviceability of machinery and equipment according to workplace procedures and manufacturer instructions</p>
4. Spread products	<p>4.1 Select and maintain personal protective equipment to be used by operator and all personnel involved in spreading tasks</p> <p>4.2 Fit and use personal protective equipment according to job requirements and task to be completed</p> <p>4.3 Apply fertiliser or soil ameliorant in a manner that complies with guidelines on buffer zones and minimises run off into waterways and drains</p> <p>4.4 Monitor meteorological conditions before and during application</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>and modify operations as required</p> <p>4.5 Identify environmental and biosecurity implications associated with fertiliser or ameliorant application and minimise impact</p> <p>4.6 Follow any existing site quarantine or biosecurity protocols</p> <p>4.7 Continually monitor workplace hazards and risks, and ensure safety of self, other personnel and equipment</p>
5. Shut down equipment and undertake maintenance requirements	<p>5.1 Conduct shut down procedures required for ground spread of fertiliser and ameliorant equipment</p> <p>5.2 Clean and check serviceability of machinery, equipment and hand tools</p> <p>5.3 Perform basic preventative maintenance</p> <p>5.4 Record faults for remedial action according to workplace procedures</p> <p>5.5 Return machinery, equipment and hand tools to depot or storage area according to workplace procedures</p> <p>5.6 Complete operational records according to workplace procedures and industry code of practice</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information, including maps to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document fertiliser and soil ameliorant order and spreading services agreement Complete operational records
Oral communication	<ul style="list-style-type: none"> Use clear language to confirm with customer fertiliser or soil ameliorant products for spreading prior to use Participate in verbal exchanges to respond to questions and clarify information

Skill	Description
Numeracy	<ul style="list-style-type: none"> Record quantities of fertiliser and soil ameliorant
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Interact with others	<ul style="list-style-type: none"> Use appropriate language and communication skills to disseminate information to operator and personnel involved in spreading tasks about location of spreading services, buffer zones and personal protective equipment for operators and other personnel

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Machinery must include at least one of the following:	<ul style="list-style-type: none"> tractors other drive equipment.
Personal protective clothing and equipment must include:	<ul style="list-style-type: none"> protective clothing respirators protective eyewear unlined rubber or plastic gloves neoprene or nitrile boots.
Biosecurity implications must include:	<ul style="list-style-type: none"> control of cross-site contamination.

Assessment Requirements for AHCMOM306 Ground spread fertiliser and soil ameliorant

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated fertiliser and soil ameliorant spreading equipment and machinery at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- assessed environmental and physical hazards that may be encountered when undertaking ground spreading operations and taken appropriate action to minimise risks
- communicated with clients to ensure a common understanding and agreement of task to be undertaken
- used maps and interpreted written instructions regarding areas to be spread including types of products and application rates
- maintained, calibrated and operated ground spreading equipment according to operation and maintenance manual, manufacturer specifications and in line with industry standards for uniformity of application
- monitored weather conditions during ground spreading operations and adjusted operations to minimise risk to local environment and personnel in the vicinity
- minimised environmental impacts associated with fertiliser and soil ameliorant application including attention to buffer zones and run-off
- applied fertiliser or soil ameliorants at rate agreed by customer to specified land area
- implemented shut down procedures including cleaning, securing, and safe storage of machinery
- completed operational and equipment maintenance records according to workplace procedures
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with fertiliser and soil ameliorant application, and machinery and equipment operation
- fertiliser and soil ameliorant machinery and equipment operating components, controls, features, technical capabilities and limitations
- operational limits of equipment with regard to uniformity of application and potential health and safety implications
- spreading characteristics of different fertiliser and soil ameliorant products
- environmental impacts associated with fertiliser spreading including hazards to waterways
- purpose of buffer zones
- methods of monitoring local weather conditions and the effects of changes on ground spreading activities
- operating principles and operating methods of fertiliser and soil ameliorant machinery and equipment
- procedures for cleaning, securing and storing fertiliser and soil ameliorant machinery, equipment and tools
- workplace procedures applicable to fertiliser and soil ameliorant application
- workplace procedures applicable to health and safety in the workplace and fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating fertiliser and soil ameliorant machinery
- resources, equipment and materials:
 - fertiliser and soil ameliorant machinery, equipment and tools
 - fertiliser or soil ameliorant products
 - protective clothing
 - respirators
 - protective eyewear
 - unlined rubber or plastic gloves
 - neoprene or nitrile boots

- safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - fertiliser and soil ameliorant machinery and equipment operation and maintenance manuals and manufacturer specifications
 - industry code of practice applicable to fertiliser and soil ameliorant application
 - industry and workplace biosecurity procedures applicable to fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to identify, implement and supervise the maintenance requirements of property, machinery and equipment for an enterprise.

The unit applies to individuals who apply specialised skills and knowledge to supervising the maintenance of property, machinery and equipment and have responsibility for the output of others. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has implemented and supervised the range of maintenance programs covering property, machinery and equipment that are required to be performed in an agriculture/horticulture industry enterprise, and has demonstrated the following on at least one occasion:

- identified potential workplace hazards and implemented control measures
- planned, costed and scheduled maintenance requirements
- allocated resources
- monitored and controlled costs within workplace budget requirements
- dealt with contingencies and rescheduled maintenance where necessary
- established and monitored performance targets for maintenance team
- monitored and reported on performance of maintenance activities
- ensured property, machinery and equipment are maintained in clean and safe operational condition
- communicated effectively with work team, contractors and management
- monitored health and safety in the workplace and adherence to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of maintenance requirements with regard to property, machinery and equipment
- maintenance and servicing cycles for property, machinery and equipment
- maintenance planning, scheduling and budgeting
- warranty, insurance agreements and indemnity provisions applicable to property, machinery and equipment maintenance

- workplace procedures applicable to health and safety in the workplace and property, machinery and equipment maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - warranties, insurance agreements, and indemnity provisions
 - property, machinery and equipment maintenance plans and schedules
 - property, machinery and equipment budgets
- specifications:
 - property maintenance schedule
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures applicable to health and safety in the workplace and property, machinery and equipment maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM507 Manipulate and analyse data within geographic information systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to extract, compare and manipulate data within a Geographic Information System (GIS) in response to customer requests.

This unit applies to those who undertake data analysis within a range of geographic information systems for the purpose of managing natural resources. They are likely to undertake a range of specialised skilled activities, exercise autonomy and take responsibility for complex work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop procedures for manipulation and	1.1 Specify desired data format based on job requirements 1.2 Specify parameters for the manipulation of data sets

Element	Performance criteria
analysis of data	1.3 Explain the procedure and rationale for development in new documented procedures
2. Establish models required to provide outcome	2.1 Evaluate applicability of existing tools, models, theories, applications and solutions 2.2 Specify feasible parameters, equations and assumptions 2.3 Establish models required to provide specified outcome
3. Analyse data	3.1 Specify steps to be undertaken and computer operating systems and applications to be used to analyse and manipulate data 3.2 Consider restricting factors when selecting techniques for analysis 3.3 Isolate and retrieve data from its source 3.4 Interrogate data to ensure reliability 3.5 Prepare data for presentation media

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM507A Manipulate and analyse data within geographic information systems.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCNRM507 Manipulate and analyse data within geographic information systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can extract, compare and manipulate data in response to customer requests.

The candidate must provide evidence that they can:

- develop and document suitable procedures for data collection, manipulation and analysis
- use or create appropriate models
- use operating systems and computer applications for data analysis and report writing, according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- database structures
- scripting and commands
- line instructions and programming
- operating systems used by enterprise for data analysis and storage, including:
 - UNIX
 - DOS
 - Windows
 - NT
- range of tools, models, theories, applications and solutions
- data analysis and manipulation techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY207 Undertake propagation activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare for plant propagation, assist with plant propagation and complete propagation activities.

The unit applies to individuals who undertake propagation activities under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for plant propagation	1.1 Confirm propagation activities to be undertaken with supervisor 1.2 Recognise potential hazards and risks and implement safe working practices to minimise risk to self and others 1.3 Fit and use personal protective equipment applicable to the task 1.4 Collect and check appropriate tools, equipment and machinery for the task

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Clean and disinfect work area according to workplace procedures 1.6 Organise propagation material for use as directed and in line with workplace procedures 1.7 Prepare and store propagation material and growing media as directed and in line with workplace procedures
2. Propagate plants	2.1 Assist with applying pre-treatment appropriate to the propagation method 2.2 Undertake propagation techniques and monitoring of equipment processes as instructed 2.3 Handle prepared propagation material in a way that minimises damage and maximises viability 2.4 Insert prepared material in the propagation receptacle according to supervisor instructions 2.5 Apply water and treatments according to supervisor instructions 2.6 Apply labels according to workplace requirements 2.7 Maintain propagated plants according to supervisor instructions
3. Complete propagation activities	3.1 Remove and dispose of waste material according to workplace procedures, and perform cleaning procedures 3.2 Clean, maintain and store tools and equipment 3.3 Identify and report unserviceable tools, equipment and machinery according to workplace procedures 3.4 Record and report propagation activities according to workplace procedures and supervisor instructions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language and accurate industry terminology to record propagation activity and complete plant labels

Assessment Requirements for AHCNSY207 Undertake propagation activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken propagation activities on at least three occasions, including both seed and vegetative techniques and has:

- applied workplace health and safety requirements, including use of PPE
- prepared for plant propagation activities according to workplace instructions and procedures
- cleaned, used and maintained propagation tools, equipment and machinery
- collected propagation material as directed
- assisted with applying pre-treatments
- monitored equipment processes as instructed
- filled trays, containers or prepared media suitable for the propagation method as directed by supervisor
- undertaken propagation techniques as directed by supervisor
- minimised damage to and maximised viability of propagated material
- applied water and treatments according to supervisor instructions
- removed and disposed of waste material
- recorded and reported propagation activities and unserviceable tools, equipment and machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to propagation activities and health and safety in the workplace
- the principles and practices of propagation, including:
 - basic plant knowledge as it applies to propagation

- common problems that occur while performing propagation activities
- workplace hygiene and biosecurity requirements
- workplace requirements for handling and disposal of nursery waste
- maintenance requirements of tools, equipment and machinery used for propagation
- basic plant nutrition as it applies to propagation
- basic seed and vegetative propagation techniques, including use of equipment
- quality specifications and characteristics of a range of parent plants and propagation materials
- record-keeping relevant to the work function.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - propagation tools, containers, equipment and machinery
 - seed and vegetative propagation material, growing media and treatments
 - personal protective equipment applicable to propagation activities
- specifications:
 - workplace requirements applicable to health and safety in the workplace and propagation activities
 - work instructions and workplace procedures applicable to propagation activities
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNSY314 Operate fertigation equipment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare, operate and shut down fertigation equipment, and report fertigation activities, to deliver fertilisers using an irrigation system.

The unit applies to individuals who operate fertigation equipment under broad direction, and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials and equipment for operation	1.1 Determine work requirements from workplace instructions 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks 1.3 Select required tools, equipment and machinery, and check for safe operation 1.4 Select, fit, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>applicable to the task</p> <p>1.5 Identify water quality issues related to fertigation activities</p> <p>1.6 Calibrate and connect injection or fertigation equipment</p> <p>1.7 Calculate fertiliser and chemical concentration, and mix according to compatibility requirements</p> <p>1.8 Prepare equipment to meet fertigation requirements</p>
2. Operate the fertigation process	<p>2.1 Start up fertigation process according to operators manual</p> <p>2.2 Operate and monitor fertigation process to confirm performance is maintained within specification</p> <p>2.3 Monitor water quality and test concentrations at irrigation emitter to ensure calculated concentration is achieved</p> <p>2.4 Identify, rectify and report out-of-specification equipment performance</p> <p>2.5 Apply emergency procedures in the event of a spillage or chemical accident</p>
3. Shut down fertigation equipment	<p>3.1 Carry out fertigation equipment shut-down according to operators' manual</p> <p>3.2 Clean fertigation equipment according to maintenance procedure</p>
4. Record information	<p>4.1 Record and report environmental hazards of fertigation process where applicable</p> <p>4.2 Record and report fertiliser application and storage details according to workplace recording procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret textual information from a range of sources to identify relevant and key information about fertigation equipment operations

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare fertigation activity records
Oral communication	<ul style="list-style-type: none"> Use clear language to report out-of-specification equipment performance
Numeracy	<ul style="list-style-type: none"> Calculate fertiliser dilution rates

Assessment Requirements for AHCNSY314 Operate fertigation equipment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated fertigation equipment on at least two occasions, and has:

- applied workplace health and safety requirements, including use of PPE
- selected, cleaned, used and maintained fertigation tools and equipment, and injection equipment, according to operators manuals, and scope of works
- selected and prepared fertigation and injection materials
- completed relevant calculations
- handled fertilisers and chemicals safely
- monitored and adjusted the delivery of fertilisers and chemicals
- monitored water quality and tested pH and Ec at irrigation emitter for correct application concentration
- reported and recorded corrective action
- taken corrective action in response to out-of-specification results or non-compliance
- implemented routine maintenance and minor repairs of the system
- removed and disposed of waste material
- recorded fertigation activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for operating fertigation equipment, including backflow prevention
- purpose and operation of fertigation equipment and instrumentation components
- basic injection equipment operating principles and process control systems where relevant
- the principles and practices of fertigation operation, including:

- chemical handling techniques for fertiliser, chlorine, acid and cleaning agents
- safety data sheets (SDS) information for fertiliser and chemicals to be injected
- fertiliser solubility and dilution rates
- fertiliser compatibility or incompatibility in mixtures, with crops, and fertigation equipment
- water quality monitoring and pH and Ec testing techniques and procedures
- advantages of delivering fertilisers using an irrigation system
- fertigation and injection equipment operators' manuals
- fertigation and injection equipment monitoring and control points
- common causes of application variation and corrective action required
- fertigation and injection equipment shutdown sequence, including emergency shutdown
- cleaning procedures for fertigation and injection equipment
- workplace fertiliser and chemical application and storage, and fertigation activity recording requirements and procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fertigation and injection equipment operators manuals
 - fertigation and injection tools, equipment and procedures
 - fertilisers, chemicals and cleaning agents
 - personal protective equipment applicable to operating fertigation and injection equipment
- specifications:
 - workplace requirements applicable to health and safety in the workplace and operating fertigation and injection equipment
 - work instructions and workplace procedures applicable to operating fertigation and injection equipment
 - SDS for substances being injected
 - recording procedures
 - environmental procedures for collection, treatment, disposal or recycling of waste
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCOCM201 Maintain cultural sites

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to maintain Aboriginal and/or Torres Strait Islander cultural sites according to local Community guidelines and cultural protocols.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. This includes undertaking defined activities and work in a structured context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

On Country Management (OCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess maintenance work required	1.1 Identify works required under the management plan and organisational procedures and confirm with supervisor 1.2 Identify required machinery and tools to carry out maintenance works and confirm with supervisor 1.3 Estimate materials required for maintenance work and confirm

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	with supervisor
2. Prepare for maintenance	2.1 Organise machinery, tools and materials to carry out maintenance works 2.2 Inspect area for hazards associated with maintenance work, and report to supervisor 2.3 Prepare and assemble safety equipment and materials
3. Maintain condition of cultural site	3.1 Undertake maintenance work according to work programs and work health and safety policies and procedures 3.2 Recognise flora and/or fauna that may pose a threat to the cultural site and report to supervisor 3.3 Report evidence of deterioration and wear 3.4 Clean up cultural site on completion of maintenance works
4. Protect cultural site	4.1 Report any evidence of damage to cultural site to supervisor 4.2 Report any breach of organisation's procedures to supervisor 4.3 Maintain protective barriers and signs according to organisational processes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret operating/instruction manuals for machinery and tools
Oral communication	<ul style="list-style-type: none"> Use culturally appropriate verbal and non-verbal communication
Numeracy	<ul style="list-style-type: none"> Measure, estimate and calculate distance, area, volume and quantity

Assessment Requirements for AHCOCM201 Maintain cultural sites

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has maintained a cultural site on at least one occasion and has:

- identified the level of work required to maintain the cultural site and confirmed with supervisor
- prepared for and carried out maintenance activities according to organisational, cultural and environmental requirements
- erected signage and/or barriers to protect cultural site
- reported evidence of deterioration, vandalism and/or other damage to cultural site to supervisor
- recognised and reported potential threats to cultural site, including:
 - feral animals and/or other pests
 - flora that is not endemic to the cultural site
- applied work health and safety practices in the context of own work.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- potential threats to cultural site, including:
 - vandalism and/or other damage
 - deterioration of the cultural site
 - infestations of feral animals and/or other pests
 - invasive species of flora
- techniques for maintenance and protection of cultural site
- typical maintenance works undertaken on cultural sites, including:
 - operation of machinery and tools

- signs and barriers required to protect a cultural site
- safe removal of damaged materials
- organisational procedures relating to the reporting of deterioration or damage to cultural site or reporting of incidents
- workplace health and safety processes relevant to maintaining a cultural site.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on Country and/or within an Aboriginal and/or Torres Strait Islander Community or an environment that accurately represents workplace conditions
- resources, equipment or materials:
 - personal protective equipment
 - maintenance equipment
 - safety signs and barriers
 - machinery and tools required for site maintenance
- specifications:
 - organisation's policies and procedures relating to maintaining a cultural site
- relationships:
 - local Community Elders and/or Custodians.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In addition, the following specific assessor requirements apply to this unit:

- Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:
 - an Aboriginal and/or Torres Strait Islander Elder and/or Custodian

or:

- accompanied by, and/or in communication with, an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience and knowledge of local cultural protocols.

AHCOCM401 Protect places of cultural significance

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to protect places of cultural significance.

This unit applies to those whose work includes protecting Aboriginal and/or Torres Strait Islander Peoples' places of culture in co-operation with stakeholders and protecting places of cultural significance with reference to local Aboriginal and/or Torres Strait Islander Communities or line management. A high level of cultural awareness and the need to observe cultural protocols are important in the process.

Commonwealth and/or state/territory and Local Community legislation, regulations and codes of practice apply to conservation work on Aboriginal and/or Torres Strait Islander sites. Requirements vary between jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

On Country Management (OCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Communicate with stakeholders	1.1 Develop working relationships with stakeholders that support the management of culturally significant places 1.2 Develop communication approaches that accommodate cultural views and observe cultural protocols

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Obtain and record views on the way in which the cultural significance and resources can be conserved and used</p> <p>1.4 Convey views obtained into an organisational and park planning process</p>
2. Conserve significance	<p>2.1 Consult with stakeholders to plan ongoing conservation and sustainability actions</p> <p>2.2 Develop operational activities to implement the conservation and sustainability strategies and plans in a culturally sensitive manner</p> <p>2.3 Ensure strategies and plans comply with legislation and codes of practice</p> <p>2.4 Make submissions to the organisational budget process to implement conservation and restoration activities</p> <p>2.5 Obtain resources for conservation and restoration activities</p> <p>2.6 Organise staff to implement conservation actions that minimise deterioration and damage</p> <p>2.7 Supervise staff during restoration projects</p>
3. Manage incidents	<p>3.1 Develop operational plans to manage incidents consistent with an emergency plan of management and risk management analysis</p> <p>3.2 Assign staff responsibilities to manage types of incidents</p> <p>3.3 Obtain and maintain equipment and supplies to enable effective response to incidents</p> <p>3.4 Train staff in the appropriate response to incidents, that incorporate related work health and safety and environmental sustainability procedures</p> <p>3.5 Make submissions to the organisational budget process to support incident management activities</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret, analyse and extract information from a range of sources, including legal documents, policies and procedures

Assessment Requirements for AHCOCM401 Protect places of cultural significance

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has protected at least one Aboriginal and/or Torres Strait Islander culturally significant site, including:

- developed working relationships with stakeholders in cultural sites
- canvassed views in a culturally sensitive way to determine the heritage value and preservation issues of a cultural site
- observed local cultural protocols in dealing with stakeholders and land managers
- applied legislation and codes of practice requirements in relation to protecting places of cultural significance
- developed emergency plans to mitigate and manage the risk of damaging incidents or loss of heritage value
- documented submissions to implement conservation and restoration activities and support the incident management activities
- assisted with the development and implementation of a budget for the protection of places of cultural significance
- supervised and trained staff in performing restoration and conservation activities
- included work health and safety procedures in operational plans and training to manage incidents
- planned and documented environmentally sustainable practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Aboriginal and/or Torres Strait Islander protocols, consultation processes and networks
- organisation policies and procedures for conservation of places of cultural significance
- key principles of legislation and codes of practice, including:

- environmental sustainability
- Burra Charter
- work health and safety
- National Parks and Wildlife Service legislation
- operational planning activities engaged for conservation, restoration and risk management
- supervision and training of staff
- organisational policies and procedures, including:
 - budgets and financial approvals
 - preservation and heritage value of cultural sites
 - risk management
 - report submission requirements
- communication methods used to accommodate cultural views and observe cultural protocols, including:
 - verbal and non-verbal cues
 - appropriate questioning
 - eye contact
 - silences.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on Country or a place of cultural significance and/or within an Aboriginal and/or Torres Strait Islander Community or an environment that accurately represents workplace conditions
- specifications:
 - legislation and codes of practice relevant to protecting places of cultural significance
 - workplace documents such as organisation's policies and procedures relevant to protecting places of cultural significance
- relationships:
 - local Community Elders and/or Custodians.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In addition, the following specific assessor requirements apply to this unit:

- Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:
 - an Aboriginal and/or Torres Strait Islander Elder and/or Custodian

or:

- accompanied by, and/or in communication with, an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience and knowledge of local cultural protocols.

Assessment Requirements for AHCPMG201 Treat weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that they have treated weeds using at least two different techniques, including:

- recognised and recorded target weeds and confirmed with supervisor
- discussed and selected control options with supervisor
- prepared control options and treatments following required procedures
- identified health, safety and environmental hazards and risks and applied controls according to workplace procedures
- identified, selected, fitted and used personal protective equipment
- applied treatments safely ensuring off-target species were unaffected
- shut down, cleaned and stored personal protective equipment and application equipment according to environmental procedures
- disposed of waste according to workplace procedures and environmental procedures
- maintained records according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common weeds identification and naming conventions
- weeds and dispersal methods common to work area
- common weed treatment options, including:
 - cultural
 - chemical
 - mechanical
 - biological

- Integrated Pest Management
- basic environmental considerations when using chemicals for treating weeds, including:
 - spray drift and off target damage
 - inversion
 - re-entry period
 - residues
 - chemical handling
- regulatory requirements and responsibilities when applying weed treatments
- weed control equipment, capabilities and limitations
- health and safety in the workplace including personal protective equipment required for controlling weeds
- principles and methods for securing treatment sites including, caution or hazard signs and signals
- purpose and use of chemical labels and safety data sheets (SDS)
- environmental considerations when controlling and disposing of weeds and waste materials
- record keeping methods and requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site with weed infestation or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - weeds to be identified and controlled
 - tools and equipment suitable for control options and treatments
 - personal protective equipment
 - treatment materials
- specifications:
 - workplace documents including treatment and control procedures and processes and forms for recording treatments
 - use of manufacturers' operating instructions for specific equipment, machinery used for weed control
 - SDS for treatment materials
 - specific regulations
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

 - chemical handling
- regulatory requirements and responsibilities when applying control measures
- pests, disease and disorders control equipment, capabilities and limitations
- health and safety in the workplace including personal protective equipment required for treating pests, disease and disorders
- principles and methods for securing treatment sites including, caution or hazard signs and signals
- purpose and use of chemical labels and safety data sheets (SDS)
- environmental considerations when treating pests, diseases and disorders, and disposing of waste materials
- record keeping methods and requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - samples of pests, diseases and disorders to be identified and controlled
 - tools and equipment suitable for control options and treatments
 - personal protective equipment
 - treatment materials
- specifications:
 - workplace documents including instructions, treatment and control procedures and processes and forms for recording treatments
 - manufacturers' operating instructions for specific equipment
 - SDS for treatment materials
 - specific regulations
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG301 Control weeds

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to plan and coordinate weed control activities using appropriate strategies to provide effective, economic control while minimising environmental damage.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess weed infestation	1.1 Identify and record weeds and potential weeds for target area 1.2 Identify the scope, stage and size of the weed infestation impacting on target area 1.3 Assess effect of weed infestation on target area 1.4 Identify tolerable levels of infestation according to workplace requirements 1.5 Investigate approaches to control weed infestation 1.6 Identify non-target plant and animal species present in the area 1.7 Assess the site for suitability of control measures according to health and safety in the workplace and environmental requirements
2. Plan weed control measures	2.1 Determine suitable control options according to workplace requirements and legislative and regulatory requirements 2.2 Identify and assess hazards, risks and controls according to workplace procedures and regulations 2.3 Identify appropriate resources for control options 2.4 Identify, fit and use personal protective equipment in accordance with health and safety in the workplace procedures 2.5 Select and prepare a plan for control measures according to workplace strategy and environmental legislative and regulatory requirements 2.6 Document control measures according to workplace and legislative requirements
3. Implement weed control	3.1 Assess conditions for implementation of control plan and adjust plan according to conditions 3.2 Implement control measures in accordance with workplace pest management plan and industry best practice 3.3 Ensure that control measures minimise effect on non-target species and environmental damage 3.4 Maintain records of the control measure according workplace procedures and regulatory requirements
4. Monitor weed control measures	4.1 Monitor weed control measures and identify adverse impact on non-target entities 4.2 Assess effectiveness of weed control measures in accordance with

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace procedures 4.3 Report results of assessment according to client or workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret plans, regulations, and other documentation and consolidate information to determine control plans and implement control measures
Writing	<ul style="list-style-type: none"> Accurately complete organisational records, plans and reports using clear language and industry terminology
Numeracy	<ul style="list-style-type: none"> Perform calculations for volumes, weights and measures for application rates of chemicals and materials
Oral Communication	<ul style="list-style-type: none"> Effectively participate in verbal exchanges using collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit policies, procedures, codes of practice and legislative requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload Make routine decisions and implements standard procedures for routine tasks, using formal decision making processes

Assessment Requirements for AHCPMG301 Control weeds

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated on at least one occasion that they have controlled weeds, including:

- identified, recorded and assessed weeds and their impact on the target area
- investigated the suitability of weed control approaches and effect on site environment and non-target entities
- planned and coordinate weed control activities
- identified tolerable levels of weed infestation for the target site
- conducted a site hazard, risk assessment and identified controls for weed control
- ensured personal safety by using appropriate personal protective equipment
- selected and applied weed management methods appropriate to the target site
- maintained records of weed management activities
- monitored, recorded and reported the effectiveness of methods
- ensured control measures had minimal effect on non-target species and environment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- weeds and their tolerable levels and impact on target area, including:
 - economic, aesthetic, health, fire hazard and environmental thresholds of common weeds
 - non-target entities common to the area
 - effect of weed infestation on required plant health and growth

- basic weed biology, including:
 - lifecycle and ecology of a range of weeds
 - cyclical nature of weeds and control programs
 - weed characteristics, morphology and dispersal
- weed management strategies and their selection criteria, including:
 - cultural
 - chemical
 - mechanical
 - biological
 - Integrated Pest Management
- risk factors including human, animal health and environmental associated with control measures
- factors that affect the efficacy of weed management strategies, including:
 - prevailing weather and atmospheric conditions
 - impact of off target damage on non-target entities
 - residues and maximum residue levels
- weed control activities and disturbance to other plant or animal species
- signs of adverse impact of control measures and ways to minimise their effect on non-target entities, including:
 - humans
 - animals
 - non-target plants
 - environment
- site-monitoring techniques that may be used to implement the weed control plan
- hazard and risks assessment and control methodologies
- equipment including personal protective equipment appropriate to control measure
- health and safety in the workplace requirements
- pest management planning and survey strategies
- legislative requirements relevant to weed control.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live weeds
 - tools and equipment used for weed control program
 - personal protective equipment
- specifications:

- workplace documents including policies, procedures, processes and forms for record keeping
- manufacturers' operating instructions for specific equipment and machinery
- safety data sheets
- workplace instructions and client briefs
- specific regulations and codes of practice
- relationships:
 - clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that on at least one occasion they can control pests, disease and disorders, including:

- identified and recorded pests, diseases and disorders, beneficial organisms on host plants in target area
- assessed damage, threat and threshold of pests diseases or disorders on host plants according to client, market or environment requirements
- selected and implemented pest, disease and disorder control measures according to workplace, environmental and safe work practices
- identified and selected tools equipment and resources necessary to implement the control measure
- identified and assessed health and safety hazards and risks and incorporate and implemented in controls strategies according to health and safety procedures
- identified, fitted and used personal protective equipment according to workplace procedures
- monitored the effectiveness of pest and disease control
- adjusted control measure on crop and off-target entities where outcomes were below expectation
- maintained records of pest and disease control activities according to regulatory and workplace requirements
- coordinated the control strategy with others according planned outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest, disease and disorder and symptom recognition of host stress
- economic, aesthetic or environmental thresholds for a range of plant pests, diseases and disorders
- control strategies for pests diseases and disorders, including:
 - chemical
 - biological
 - cultural methods
 - treatments available
 - Integrated Pest Management
 - industry best practice
- tools, equipment and machinery for implementing the control strategies and the importance of calibration
- site monitoring and analysis techniques used to implement a control strategy
- implications of control strategies for:
 - target and off-target
 - site limitations
 - environmental implications
 - end market and production
 - environmental objectives
- health and safety in the workplace responsibilities for employees and employers
- correct use, maintenance and storage of personal protective equipment
- health and safety in the workplace and environmental regulatory requirements including hazardous substances regulations
- basic communications skills
- workplace and mandatory record keeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pests, diseases and disorders
 - tools and equipment for control program
 - personal protective equipment
- specifications:

- workplace documents including policies, procedures, processes and forms for record keeping
- manufacturers' operating instructions for specific equipment and machinery
- safety data sheets
- workplace instructions and client briefs
- specific legislation/codes of practice
- relationships:
 - clients
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG304 Use firearms to humanely destroy animals

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to euthanise animals using firearms and techniques appropriate for the type and mobility of the animal.

The unit applies to individuals who hold a valid firearms license and work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions. Destruction of pest animals must comply with state animal cruelty legislation.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for the shooting activity	1.1 Map location and boundaries for the shoot in accordance with the pest management plan and monitoring program 1.2 Confirm location of habitats, habits and range of movement of target animal

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Determine timing of the shoot based on the activity patterns of the target animal and estimate time required to complete the shoot</p> <p>1.4 Identify hazards and risks and apply control measures associated with the shoot according to workplace safety procedures</p> <p>1.5 Identify environmental and personal and public safety risks associated with the shoot</p> <p>1.6 Identify, fit and use suitable personal protective equipment and warning signs required for the activity</p>
2. Prepare for the shooting activity	<p>2.1 Confirm anatomy and physical features identifying location of vulnerable organs of target animal</p> <p>2.2 Take precautions to minimise hazards and environmental risks associated with the shoot</p> <p>2.3 Select vehicles, equipment and materials intended for use and check for serviceability</p> <p>2.4 Ensure firearm licences and permits are current and applicable to purpose</p> <p>2.5 Select firearm and ammunition types to comply with recommendations and workplace procedures for target animal</p> <p>2.6 Ensure firearms, ammunition, and stowage for transportation meets licensing requirements</p> <p>2.7 Check and prepare firearm and ammunition</p> <p>2.8 Zero and test firearm according to workplace procedures</p> <p>2.9 Stow firearm for transport according to legislative and regulatory requirements and workplace procedures</p>
3. Shoot animals	<p>3.1 Carry firearm safely with muzzle pointing in safe direction at all times according to industry best practice and workplace procedures</p> <p>3.2 Load, discharge and unload firearm according to safety procedures</p> <p>3.3 Aim firearm at vulnerable organ on the target animal and discharge firearm to kill using a single shot</p> <p>3.4 Check each target animal to ensure it is dead prior to selecting the next target animal</p> <p>3.5 Euthanise target animals that have not been killed cleanly</p> <p>3.6 Handle carcasses required for research or commercial use to minimise personal health and safety and biosecurity risks</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Dispose of animal carcasses not required for research or other purposes according to enterprise procedures to minimise biosecurity or public safety and health risks
4. Clean and store equipment and material	4.1 Clean and store carcasses for research or commercial use 4.2 Clean and store equipment and materials according to workplace practices 4.3 Clean, maintain and store firearms in line with regulatory standards 4.4 Store ammunition safely 4.5 Report or record activity completion according to workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately completes organisational records and reports using clear language and industry terminology
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for following explicit and implicit licencing requirements, policies, procedures, codes of practice and legislative requirements Be up to date with state or territory and federal legislation related to the use of firearms licensing
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and workload Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes

Assessment Requirements for AHCPMG304 Use firearms to humanely destroy animals

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated the skills to use a firearm to euthanise animals, including:

- planned the shoot within the boundaries and location of the target animal its range and habitat according to the timeframe, pest management plan and monitoring program
- ensured licences and permits were valid and applicable and environmental and public safety risks were mitigated
- identified target animal and its anatomical vulnerabilities for a clean kill
- operated a firearm safely in accordance with statutory requirements
- zeroed and test fired the firearm safely at a range under supervision at a distance that is commensurate with the target animals to be destroyed
- selected and checked serviceability of transport, equipment, firearms and ammunition, and stowed the firearm and ammunition safely for transport
- cleaned, maintained and stored equipment, firearms and ammunition safely and in accordance with statutory requirements
- checked target animal was dead, and euthanised immediately, if signs of life, according to relevant animal welfare codes of practice
- used personal protective equipment (PPE) to handle carcasses to ensure health and safety in the workplace
- identified health and safety in the workplace hazards and risks and applied control measures and used PPE according to health and safety in the workplace procedures
- applied biosecurity measures when handling, transporting or disposing of carcasses
- maintained records and reporting procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest management plan and their purpose
- environmental hazards and risks associated with the use of firearms
- safety hazards and risk management strategies associated with shooting
- checking and preparing a firearm and ammunition
- checking target animal for life after discharging the firearm
- anatomy and physical features and vulnerable organs, or humane points on target animals
- procedures for the safe handling of carcasses required for research or commercial use
- procedures for the safe disposal of animal carcasses not required for other purposes
- reporting and recording procedures required by the pest management plan
- location and boundaries for the shoot
- habitats, habits and range of movement of target animals
- PPE required for the shoot
- firearm's licensing requirements
- firearm and ammunition types recommended for the target animal
- State and territory gun control laws, acts and regulatory requirements including firearms agreements and codes of practice, relating to the use of firearms for euthanising animals
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- prevention of cruelty to animals legislation applicable to destruction of animals
- basic requirements for biosecurity in the context of destruction of animals.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an outdoor field environment with pest animals or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pest animals, carcasses or targets
 - firearms
 - PPE
- specifications:
 - workplace documents including procedures for firearm use
 - operating instructions for firearms
 - licences and permissions to discharge firearms
 - specific legislation and codes of practice for firearm use and animal welfare
- timeframes:
 - checked animal for signs of life after discharge of firearm.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

AHCPMG309 Apply pest animal control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to apply control techniques for pest animals, in compliance with a pest management plan. This includes involving the use of vertebrate pesticides, traps (except leg hold traps), cages, lures and firearms with the animal humanely destroyed according to industry guidelines or protocols.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Assessment Requirements for AHCPMG309 Apply pest animal control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have applied a pest animal control technique, including:

- identified the control techniques and selected equipment and resources required
- Identified hazards and risks and controls measure
- identified target and non-target animals
- obtained permits and licences and notified stakeholders of intended works
- checked vehicles, selected equipment and materials for serviceability and cleaned equipment before and after implementation
- prepared timeline and selected and prepared the site for control activity and restored it on completion
- prepared, installed and checked, safety warning signs, control equipment, materials according to plan
- applied controls according to timelines and control plan
- reconciled controls against plan within specified timeframes
- recorded details of control activities to comply with enterprise and legislative requirements
- reported results of control
- reconciled, cleaned and maintained equipment and disposed of waste according to workplace and environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements for ensuring the welfare of animals described in the relevant Codes of Practice and standard operating procedures
- the purpose and scope of the animal control program
- suitable control techniques and timing of control activities based on:
 - the target animal's range, movement patterns, behaviour and habitats
 - the reproductive cycle of the target animal
 - target animal behaviours and biology relevant to control technique
 - food preferences, both general and local, of target animals
 - scent station and other animal tracks and traces
 - target pests and non-target native animals found in the area
 - the environment and terrain of the target area
- appropriate calibre of firearm required to euthanise animals
- euthanasia procedures, including capture and kill points for animals
- licencing, permissions and notification protocols
- precautions that need to be taken to minimise harm to non-target animals
- health and safety in the workplace procedures that relate to animal control activities including personal protective equipment
- recording and reporting requirements
- procedures for using, recording and reconciling baits and poisons
- relevant legislation for pest animal control activities
- transportation methods for captured animals or carcasses
- land reparation works, waste disposal and the environment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pest animals
 - tools and equipment used for pest animal control program
 - personal protective equipment
- specifications:
 - workplace documents including policies, procedures, processes and forms for record keeping
 - use of manufacturers' operating instructions for specific equipment, machinery
 - safety data sheets
 - workplace instructions and client briefs
 - specific legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit if firearms are used to destroy animals:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

AHCSAW203 Conduct erosion and sediment control activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to control erosion and sediment using earthworks construction and other land forming activities, usually using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector.

The unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work	1.1 Read and interpret work instructions and clarify with supervisor 1.2 Prepare tools and equipment and use according to instructions and biosecurity procedures 1.3 Identify workplace health and safety hazards and report to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	supervisor for instructions on controls 1.4 Select, check and use personal protective equipment
2. Conduct erosion and sediment control activities	2.1 Identify erosion and sediment risks at a site and confirm with supervisor 2.2 Assemble structures to prevent erosion and control sediment 2.3 Carry out sediment control and maintenance activities 2.4 Operate tools, machinery and equipment according to operator instructions
3. Complete work	3.1 Dispose of or recycle soil and waste material from the site according to environmental procedures 3.2 Clean, store and maintain tools and equipment according to workplace and biosecurity procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Interact effectively with supervisor when seeking direction using clear language and appropriate concepts, tone and pace

Assessment Requirements for AHCSAW203 Conduct erosion and sediment control activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed erosion and sediment control on at least two different sites with distinctly different terrain and soil conditions.

There must also be evidence that the individual has:

- conducted erosion and sediment control activities as instructed by a supervisor
- identified hazards and followed safe operating procedures for each site
- identified erosion and sediment control structures, measures and practices
- carried out routine work using control measures and structures
- identified areas at risk of erosion
- operated machinery tools and equipment safely and efficiently
- followed biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- need of erosion and sediment, including:
 - importance of erosion and sedimentation to the community
 - effect on loss of habitat
 - effect on water quality
 - loss of production, assets and amenities
- maintenance, repair and monitoring requirements for erosion and sediment controls
- agents and processes of erosion and sedimentation, and ways to control them
- types of erosion and sediment control structures, and techniques for constructing them
- role of vegetation in erosion control
- basic catchment issues

- basic characteristics of erodible soils
- environmental and biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on at least two different sites with distinctly different terrain and soil characteristics
- resources, equipment and materials:
 - tools, equipment and machinery for installing erosion and sediment controls specific to the site requirements
 - consumables and materials required for erosion controls
 - personal protective equipment
- specifications:
 - manufacturer operating instructions for equipment and machinery
 - workplace instructions and specifications
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSAW304 Implement erosion and sediment control measures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted erosion and sediment control activities on at least one conservation worksite, and has constructed, installed and maintained at least three erosion and sediment control measures.

There must also be evidence that the individual has:

- identified hazards, assessed risk and implemented controls
- read and followed plans for construction work and site construction layout
- implemented site and equipment repairs and maintenance according to workplace procedures
- selected and operated tools and equipment according to safe work practices and manufacturer instructions
- cleaned, maintained and stored equipment, machinery and tools according to workplace and biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- construction and site plan types, reading and interpretation
- erosion and sediment control methods and construction techniques
- materials cartage pollution control
- operational planning skills to sequence and schedule the timing/duration of work
- workplace health and safety issues relating to erosion and sediment control works, including:
 - equipment
 - site-specific risks
 - personal protective equipment

- sun protection
- type and operation of machinery and equipment used for erosion and sediment control, including:
 - safety checks
 - site access and operational restrictions
 - maintenance
 - environmental protection from fuels and oils
 - impact of tools and machinery on biosecurity
- materials suitable for constructing erosion and sediment control measures, and where to source them on site
- limitations of structures, including:
 - timing of maintenance
 - structure life cycle
 - specifications and standards for construction.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a conservation worksite or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and materials for installing specified erosion and sediment controls
 - personal protective equipment
- specifications:
 - workplace policies, procedures and processes for safety, biosecurity and environmental safety
 - manufacturer operating instructions for specific equipment and machinery
 - workplace instructions and plans
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK215 Collect and record production data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to collect and record production data obtained from a variety of sources.

The unit applies to individuals who collect and record production data under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify production data to be collected	1.1 Confirm requirements of data to be collected with supervisor or by reading work instructions 1.2 Select, fit and use personal protective equipment (PPE) applicable to the task 1.3 Prepare and use tools, equipment and materials required for data collection, and calibrate according to supervisor instructions 1.4 Identify difficulties that may be encountered in collecting the data,

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	and seek supervisor advice 1.5 Communicate advice about the proposed data collection to co-workers as required 1.6 Identify and report workplace health and safety hazards and risks to supervisor
2. Collect and record production data	2.1 Collect production data 2.2 Record production data in the correct format and to meet specific requirements
3. Present and store production data	3.1 Present production data in the correct format and to meet specific requirements 3.2 Store production data sheets according to workplace procedures 3.3 Download and enter production data into a computer using specified formats and applications according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace instructions to formulate an understanding of expected requirements and activity
Writing	<ul style="list-style-type: none"> Prepare workplace records accurately using clear language and industry relevant terminology
Oral communication	<ul style="list-style-type: none"> Use clear language and standard industry terminology to clarify instructions and communicate with supervisor Participate in verbal exchanges to share knowledge and information with co-workers
Numeracy	<ul style="list-style-type: none"> Estimate, calculate and record routine workplace data Use basic mathematical processes of addition, subtraction, division, multiplication, percentages, decimal points and ratios

Assessment Requirements for AHCWRK215 Collect and record production data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has collected and recorded production data on at least one occasion and has:

- followed workplace procedures relevant to collecting and recording production data
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- prepared and used tools, equipment and materials required for data collection
- calibrated tools and equipment
- referred to data to complete work activities
- identified workplace health and safety hazards and risks, and reported to supervisor
- collected data as part of the work role or job function
- entered data into specified written and electronic formats
- stored data in the prescribed location and format
- downloaded and entered data on a computer.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purposes for which the recorded data might be used
- workplace procedures relevant to collecting and recording production data, including reporting methods and requirements
- workplace requirements applicable to health and safety in the workplace for collecting and recording production data, including appropriate use of PPE
- tools and equipment calibration methods and purpose
- software programs used for recording or storing data.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - production data
 - computer hardware and software
 - PPE applicable to collecting and recording production data
- specifications:
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to collecting and recording production data
- relationships:
 - co-workers and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK314 Monitor weather conditions

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to monitor and interpret weather and climate conditions and assess the likely impact on work functions and activity.

The unit applies to individuals who monitor weather conditions under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret weather and climate information	1.1 Review weather and climate information and warnings to determine likely conditions 1.2 Anticipate and assess potential variations in weather and climate conditions according to weather information and reports 1.3 Identify the possible impacts of weather and climate on workplace activity 1.4 Identify and review options for appropriate preventative actions

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Carry out preventative actions within the workplace	2.1 Disseminate information and advice according to workplace procedures 2.2 Plan preventative action according to the known effects on workplace activities 2.3 Implement actions to minimise adverse effects on workplace activities 2.4 Adjust and revise workplace activities and schedules according to weather conditions
3. Monitor weather and climate	3.1 Access regular weather updates to determine the ongoing suitability of current programs 3.2 Review the viability and scheduling of work tasks to align with predicted weather conditions 3.3 Record weather information according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret weather reports, warnings and data from a range of sources
Writing	<ul style="list-style-type: none"> Record weather and climate data according to workplace procedures using appropriate language, grammar and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to interpret and compare weather data

Assessment Requirements for AHCWRK314 Monitor weather conditions

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored weather conditions on at least two occasions and has:

- interpreted weather and climate information and considered the impact on work activities and current operations
- interpreted weather and climate conditions to determine preventative actions
- communicated warnings and concerns to others according to workplace procedures
- implemented preventative actions to minimise impact of adverse weather conditions on workplace activities
- monitored ongoing changes to weather conditions, and reviewed prevention actions
- recorded weather information according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- weather and climate conditions and their impact upon agriculture, horticulture and conservation activities, including:
 - humidity
 - temperature
 - sunlight light
 - delta T (ΔT)
 - frosts
 - inversions
 - dew point
 - wind force and direction
 - rainfall precipitation rate and frequency

- methods of monitoring and interpreting weather and climatic conditions, including:
 - bureau of meteorology
 - local weather stations
 - weather meters
- workplace and industry procedures for monitoring weather and climate conditions and recording and reporting
- effect of adverse weather conditions on agriculture, horticulture and conservation activities
- strategies to mitigate effects of adverse weather and climatic conditions on agriculture, horticulture and conservation activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - weather reports, warnings and climate data relevant to workplace
 - computer hardware and software or similar technologies to access weather data
- specifications:
 - workplace procedures, instructions or job specifications relevant to assessing the effects of weather conditions
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK323 Operate in isolated and remote situations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated in an isolated and remote environment on at least one occasion and has:

- planned and prepared for operating in remote environments in conjunction with supervisor
- sourced and interpreted maps of the remote area
- conducted a risk assessment for workplace health and safety, and environmental hazards for remote location
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- maintained records according to workplace procedures
- prepared and implemented procedures for emergency situations
- prepared and monitored provisions and resources for essential and emergency needs
- conducted work activities safely in a remote environment
- used bushcraft skills to modify the living environment and reduced risks
- implemented workplace communication procedures to notify location, activities and travel to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- planning and preparations required for working in isolated environments
- map reading and navigation skills, including:
 - direction finding, including GPS and compass
 - local topography
 - habitation

- geographic indicator
- workplace risk assessment techniques
- clothing requirements for adverse weather conditions
- workplace requirements applicable to health and safety in the workplace for operating in isolated and remote situations, including appropriate use of PPE
- emergency vehicle and mechanical equipment repair
- environmental impacts of work in isolated and remote situations, including weather patterns and indicators
- basic survival and bushcraft skills to maintain human needs in survival situations, including:
 - making a fire
 - cooking
 - distress signalling
 - basic rope skills and useful knots
- communication procedures and operation and maintenance of communications equipment, including:
 - field communications by two-way radio
 - satellite telephony
 - HF or UHF radio
- basic first aid procedures for common injuries.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an isolated and remote environment or an environment that accurately represents working in an isolated and remote environment
- resources, equipment and materials:
 - provisions and resources required for an isolated worksite
 - communications and navigational equipment
 - basic survival tools and equipment
 - tools and equipment for work activities
 - PPE applicable to operating in isolated and remote working environments
- specifications:
 - workplace documents, including policies, procedures, processes, instructions and job specifications
 - manufacturer operating instructions for specific communications and navigational equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK404 Implement quality assurance procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to implement quality assurance procedures.

The unit applies to individuals who apply specialist skills and knowledge to implementing quality assurance procedures. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish quality specifications for product	1.1 Source market requirements for product 1.2 Identify product quality specifications
2. Identify hazards and critical control points in	2.1 Identify hazards and critical control points impacting on product

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
the production of quality product	quality 2.2 Determine the degree of risk for each hazard 2.3 Establish an industry-based systematic approach to quality assurance (QA)
3. Assist in planning of quality assurance procedures	3.1 Develop procedures for each identified control point to meet quality requirements 3.2 Minimise hazards and risks by application of appropriate controls 3.3 Develop QA recordkeeping templates 3.4 Develop processes to monitor the effectiveness of QA procedures 3.5 Establish a document control register
4. Implement quality assurance procedures	4.1 Allocate responsibilities for carrying out QA procedures to staff and contractors 4.2 Prepare QA instructions 4.3 Provide staff and contractors with induction training on the QA policy 4.4 Provide staff and contractors with on-job training relevant to their allocated procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding QA requirements
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to complete QA recordkeeping templates, procedures, processes and instructions
Oral communication	<ul style="list-style-type: none"> Initiate discussions with staff and contractors, using clear language and standard industry terminology to allocate responsibilities and provide training

Assessment Requirements for AHCWRK404 Implement quality assurance procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented quality assurance procedures on at least one occasion and has:

- sourced and identified product market requirements and quality specifications
- identified hazards and critical control points in the production of quality product
- established an industry-based systematic approach to quality assurance (QA)
- assisted in planning of QA procedures
- developed QA recordkeeping templates
- established document control registers
- allocated responsibilities for carrying out QA procedures
- implemented QA procedures
- provided staff and contractor induction and on-job training.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- market requirements for product
- quality specifications for product
- definition of quality
- workplace and industry QA systems, including recordkeeping templates and document control registers
- industry QA principles and techniques, and their application
- strategies for control of hazards to quality
- contingency management
- staff delegation and empowerment
- workplace training strategies.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - products relevant to the industry sector
- specifications:
 - product market requirements and quality specifications
 - codes of practice relevant to quality
- relationships:
 - staff and contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK508 Interpret legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to interpret and apply legislation.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine applicable legal framework	1.1 Identify and access current legislation, regulations, organisational procedures, standards and codes of practice affecting the workplace, industry, occupation or client 1.2 Determine legal accountability obligations in relation to workplace, industry, occupation or client

Element	Performance criteria
	1.3 Identify consequences of non-compliance with legislation, regulations, organisational procedures, standards and codes of practice
2. Research, interpret and apply appropriate legislation	2.1 Monitor sources of information for changes to the legal framework 2.2 Regularly update and communicate information and changes to legal framework components which impact on work activities
3. Promote compliance with relevant legislation	3.1 Access current information about the range of legislation and other legally binding policies and protocols relating to own work 3.2 Clarify compliance requirements to confirm understanding and ensure consistency of interpretation and application 3.3 Obtain advice to assist in applying relevant legislation to own work and identifying compliance requirements 3.4 Identify areas of uncertainty in own work related to compliance requirements and take action to clarify issues 3.5 Identify possible implications of non-compliance and use these to guide own work practices
4. Assess situations which may potentially present legal problems and issues	4.1 Identify and document details of suspected or actual incidences of illegal conduct by self or others in the workplace 4.2 Contribute to ongoing monitoring and compliance with legal framework 4.3 Ensure that work is undertaken in a legally compliant manner 4.4 Recognise limits of own expertise, legal accountability obligations and access appropriate sources of expertise as required 4.5 Assess conduct of self and others in the workplace against specific components of the legal framework applicable to the workplace 4.6 Take appropriate actions to resolve or report illegal conduct, as required by applicable legislation, regulations, organisational procedures, standards and codes of practice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK508A Interpret legislation

Assessment Requirements for AHCWRK508 Interpret legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine legislation and legal framework applicable to task
- research, interpret and apply appropriate legislation
- promote compliance with relevant legislation
- assess situations which may potentially present legal problems and issues
- maintain knowledge of legal frameworks and relevant legislation
- develop and implement strategies to manage compliance with appropriate legislation
- provide advice and documentation regarding applicable legislation, regulations, organisational procedures and codes of practice
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the provisions contained in key relevant legislation and other legally binding legal policies and protocols from all levels of government that affect the relevant industry
- relevant Australian Standards
- organisational policies and procedures relating to legislation in organisation's functional area
- penalties for non-compliance with legislative requirements
- auditing requirements
- work health and safety requirements applicable to own work and functional area
- the scope of legal practitioner and support role and own responsibilities and obligations to provide legal advice, complete or sign off on legal work and appear in court as described by relevant jurisdictions
- how to encourage and support own compliance and that of others in the workplace

- relevant conventions, treaties, agreements, guidelines, declarations, recommendations, laws and rules
- how to apply legal information to the workplace
- techniques to monitor compliance and identify illegal conduct
- where to find appropriate sources of information and specialist personnel when limits of own expertise are reached in determining applicable legislation
- accepted codes of practice relevant to the workplace including those relating to:
 - privacy and confidentiality
 - use of company property
 - duty of care
 - ethical behaviour
 - non-discriminatory practice
 - conflict of interest
 - compliance with reasonable direction
 - relevant general legal terminology.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop and maintain specialist knowledge	1.1 Use research skills regularly to build a comprehensive knowledge and understanding of specialist information from industry and other sources 1.2 Identify characteristics of industry practices, products and services and analyse using available documentation

Element	Performance criteria
	1.3 Document information and maintain in a format consistent with enterprise requirements 1.4 Apply acquired knowledge to improve quality within personal work areas 1.5 Identify legislative, regulatory and industry requirements relating to own work
2. Consult with clients	2.1 Conduct consultation with clients in a professional and courteous manner at all times 2.2 Use appropriate interpersonal skills to facilitate accurate and relevant exchange of information 2.3 Use work practices that reflect sensitivity to client's requirements, specific needs and cultural, family and individual differences
3. Provide a response to client enquiries and need	3.1 Prepare information relevant to client's needs 3.2 Use research skills to find verifiable evidence in support of information and document in the appropriate format 3.3 Structure information to identify clear benefits to clients and the organisation 3.4 Document and present information in a professional format and style to the client for consideration and discussion 3.5 Evaluate client feedback by survey to improve future provision of technical information and professional services

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK509 Provide specialist advice to clients

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and maintain industry wide specialist knowledge
- provide a professional service to client enquiries and needs
- show discretion and judgement in stakeholder interaction
- implement professional practice in stakeholder consultation and report documentation
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- products, treatments services of the industry
- environmental sustainability and land use issues relevant to the industry
- enterprise policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- strategies for planning and monitoring activities
- consultation methods, techniques and protocols
- current enterprise, government and local council policy, legislation and regulations
- mechanisms to obtain and analyse customer feedback.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWRK513 Write and present reports

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has written and presented a separate report on at least two occasions, and has:

- identified and verified the purpose of the report with the client
- conducted research and compiled information
- drawn conclusions from research supported by reasoned argument and supporting information
- produced a correctly formatted report that uses appropriate language and industry standard terminology, is arranged in a logical order, and provides details on information sources and consultation
- made recommendations if required, and referenced to information and conclusions
- delivered a verbal presentation within a specified time using language applicable to the task and audience.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and research sources that may be used to develop reports
- report and presentation structure
- public presentation techniques and approaches.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the development of a report
- relationships:
 - appropriately experienced and qualified person, client and work colleagues
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AVIY0028 Operate remotely piloted aircraft in excluded category sub-2 kg operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit of competency involves the skills and knowledge to operate a Remotely Piloted Aircraft System (RPAS) in excluded sub-2 kg category operations. It includes operating within the relevant regulatory requirements of the Civil Aviation Safety Authority (CASA).

This unit addresses flight planning, pre-flight inspection, operating an RPAS during normal flight, managing an RPAS during abnormal or emergency procedures and landing.

The unit is applicable to personnel who pilot Remotely Piloted Aircraft (RPA) in excluded category sub-2 kg operations in visual line of sight (VLOS). They may work individually or under supervision as part of a team. Authorisation to perform this role is subject to organisational policies and procedures.

Excluded category operators are still required to obtain necessary CASA approvals.

Legislative or certification requirements to fly in this category apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Y - Aircraft Operation and Traffic Management.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Plan flight

1.1 Flight requirements are identified

1.2 Relevant CASA approved apps are consulted

1.3 Permission is obtained from relevant stakeholders prior to operations

1.4 Hazards are identified, risks are assessed and risk controls are implemented

1.5 Awareness of current and forecast weather conditions is maintained

1.6 Effects of wind velocity, adverse environmental conditions and contingency actions are planned for

2 Perform pre-flight inspection

2.1 RPAS hardware and software checks are carried out in accordance with manufacturer's instructions

2.2 Pre-operating inspection is recorded where applicable and in accordance with organisational requirements

3 Take off and climb RPAS

3.1 Take-off is conducted appropriate to RPAS type, with allowance for environmental conditions

3.2 Pre-departure control inputs are verified

3.3 RPAS control is maintained and aligned in the departure direction

3.4 CASA standard operating conditions for operating a RPAS are followed

3.5 RPAS climb is conducted in accordance with operational requirement

3.6 RPAS performance is monitored

3.7 Airspace awareness is consistently maintained

4 Control RPAS in flight

4.1 Power, altitude and configuration are set to achieve stable flight

4.2 Indications of height change are identified and responded to, to appropriately maintain safe operation

4.3 RPAS operating limits are maintained in accordance with manufacturer's instructions

- | | | |
|--|------------|---|
| | 4.4 | Flight path is observed and risks are managed in accordance with operational requirement |
| 5 Manage RPAS during abnormal or emergency situations | 5.1 | Abnormal or emergency situations are identified and communicated to relevant personnel |
| | 5.2 | Appropriate abnormal or emergency action is decided and implemented |
| 6 Descend and land RPAS | 6.1 | Appropriate inputs are made to altitude and power to achieve required descent rate |
| | 6.2 | Flight path is observed during descent and risks managed in accordance with requirements |
| | 6.3 | Landing is conducted appropriate to RPAS type, with allowance for environmental conditions |
| | 6.4 | Control of RPAS is maintained for safe landing |
| | 6.5 | RPAS is powered down according to RPAS type |
| 7 Complete post-flight requirements | 7.1 | Flight time recording requirements are accurately transcribed |
| | 7.2 | After landing checks are performed in accordance with approved checklist or manufacturer's instructions or operational requirements |
| | 7.3 | Post-flight paperwork is completed and submitted as required |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the AVI Aviation Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This is a new unit. No equivalent unit.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: -

Assessment Requirements for AVIY0028 Operate remotely piloted aircraft in excluded category sub-2 kg operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adjusting altitude and power to achieve required Remotely Piloted Aircraft System (RPAS) altitude, configuration to achieve straight and level flight, and descent rate
- assessing risks and implementing risk controls
- completing RPAS climb
- completing pre-departure checks, including one or more of the following:
 - global positioning system (GPS) lock
 - loitering
 - control inputs to hover
 - controls checked, including return to home
- conducting landing appropriate to RPAS type with allowance for environmental conditions
- following Civil Aviation Safety Authority (CASA) standard operating conditions and regulations
- identifying and managing hazards
- identifying and communicating abnormal and/or emergency situations
- implementing appropriate abnormal or emergency actions
- maintaining airspace awareness
- monitoring current and forecast weather conditions
- observing flight path during ascent and descent
- operating a RPAS during normal flight, including launch, maintaining a straight line, turning, descending, landing and responding to indications of height change
- operating the RPAS within CASA regulations for excluded category
- performing post-landing checks
- planning for flight and effects of wind velocity, adverse environmental conditions and contingency actions
- recording pre-operating inspection where applicable
- checking relevant CASA approved apps
- stopping an RPAS within designated area
- transcribing applicable flight time records.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- actions in event of lithium battery fire
- approved CASA apps
- appropriate post-flight documentation, including:
 - incident reporting
 - damage reports
 - flight logs
- environmental considerations, including:
 - noise and wildlife considerations
 - populated and unpopulated areas
- factors affecting directional control of RPAS
- functions and effects of all RPAS controls
- functions and effects of RPAS software control systems
- manufacturers' specifications for operating an RPAS
- pre-launch and after launch checks
- relevant air space classification
- relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders related to sub-2 kg drones for business use - excluded category required flight documentation
- RPAS performance limitations
- relevant CASA regulations for RPAS registration, licensing and certification
- safe transport of lithium batteries on commercial aircraft
- standard operating conditions of operating in the excluded category
- work health and safety (WHS) requirements related to RPAS.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in a simulated workplace operational situation that reflects workplace conditions.

Flight time must include a range of distances, heights and tasks within visual line of sight that allows the student to demonstrate competence.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercise and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

BSBFIN501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to undertake financial management in an organisation or work area. It includes planning and implementing financial management approaches and supporting and evaluating effectiveness of financial management processes.

The unit applies to managers in a wide range of organisations and sectors who have responsibility for the effective use of financial resources within work teams. They are responsible for ensuring that financial resources are managed in line with the financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Financial Literacy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan financial management approaches	1.1 Access budget and financial plans for work team 1.2 Evaluate budget and financial plan outcomes with required organisational personnel 1.3 Negotiate any changes required to be made to budget and financial plans with required organisational personnel 1.4 Prepare contingency plans in the event that initial plans need to be varied
2. Implement and monitor financial	2.1 Communicate details of agreed budget and financial plans to relevant team members

ELEMENT	PERFORMANCE CRITERIA
management plans	<p>2.2 Support team members to access resources and systems to perform required roles</p> <p>2.3 Implement processes to monitor actual expenditure, control costs and modify contingency plans as required according to financial objectives</p> <p>2.4 Report on budget and expenditure according to organisational protocols</p>
3. Review and evaluate financial management plans	<p>3.1 Collect information on effectiveness of financial management processes within work team</p> <p>3.2 Analyse variance between actual and budgeted finances</p> <p>3.3 Identify and recommend improvements to existing financial management processes</p> <p>3.4 Implement agreed improvements according to financial objectives of work team and organisation</p> <p>3.5 Evaluate agreed improvements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> • Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Oral communication	<ul style="list-style-type: none"> • Presents information about financial issues and requirements to a range of audiences using structure and language to suit audience • Uses active listening and questioning to clarify information and to confirm understanding
Reading	<ul style="list-style-type: none"> • Interprets and analyses information to determine activities required
Writing	<ul style="list-style-type: none"> • Records information in correct forms and prepares materials which convey detailed and factual content according to internal procedures
Teamwork	<ul style="list-style-type: none"> • Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Initiative and enterprise	<ul style="list-style-type: none"> • Applies organisational requirements in undertaking own work
Planning and organising	<ul style="list-style-type: none"> • Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies to achieve goals

SKILL	DESCRIPTION
	and timelines
Technology	<ul style="list-style-type: none">• Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Unit Mapping Information

Supersedes and is equivalent to BSBFIM501 Manage budgets and financial plans.

Supersedes but is not equivalent to BSBGOV403 Analyse financial reports and budgets.

Assessment Requirements for BSBFIN501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the budget and financial plan of an organisation for one reporting period.

In the course of the above, the candidate must:

- communicate with relevant people to clarify budget and financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record-keeping requirements for Australian Taxation Office (ATO) and for auditing purposes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- basic accounting principles
- types of budgets and financial plans
- legislation and current ATO requirements, including the Goods and Services Tax (GST)
- key requirements for financial record keeping and auditing
- principles for managing work teams
- principles and techniques involved in managing:
 - budgeting
 - cash flows
 - electronic spreadsheets

- Goods and Services Tax
- ledgers and financial statements
- profit and loss statements
- evaluation of budget and financial plans.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace policies and procedures
- workplace budgets and financial plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBHRM413 Support the learning and development of teams and individuals

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

The unit applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Human Resources

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Contribute to needs development	1.1 Collect information on performance of team members from relevant sources 1.2 Identify individual and team learning and development needs in line with organisational requirements 1.3 Confirm learning plans meet individual and group training and development needs 1.4 Provide opportunities to individuals to self-evaluate performance and identify areas for improvement
2. Support implementation of	2.1 Develop collaborative learning plans to match skill needs of individuals and groups and match the competency standards

ELEMENT	PERFORMANCE CRITERIA
learning and development	<p>relevant to the industry</p> <p>2.2 Ensure learning delivery methods are relevant to the participants</p> <p>2.3 Identify and coordinate workplace learning opportunities to facilitate individual and team achievement of competencies</p> <p>2.4 Identify and manage resources and timelines relevant for learning activities according to organisational requirements</p>
3. Monitor and evaluate workplace learning	<p>3.1 Monitor learning plans to improve the efficiency and effectiveness of learning</p> <p>3.2 Seek feedback from individuals or teams to identify and implement improvements in future learning arrangements</p> <p>3.3 Assess and record outcomes and performance of individuals and teams to determine the effectiveness of development programs and the extent of additional development support</p> <p>3.4 Document and maintain records and reports of competency according to organisational requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> • Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	<ul style="list-style-type: none"> • Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	<ul style="list-style-type: none"> • Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	<ul style="list-style-type: none"> • Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives • Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts

SKILL	DESCRIPTION
Self-management	<ul style="list-style-type: none"> • Recognises and responds to explicit and implicit organisational procedures and protocols • Understands how own role meshes with others and contributes to broader goals
Teamwork	<ul style="list-style-type: none"> • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Problem solving	<ul style="list-style-type: none"> • Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

Unit Mapping Information

Supersedes and is equivalent to BSBLED401 Develop teams and individuals.

Supersedes but is not equivalent to:

- BSBFLM311 Support a workplace learning environment
- BSBLED301 Undertake e-learning.

Assessment Requirements for BSBHRM413 Support the learning and development of teams and individuals

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- contribute to, facilitate and monitor learning and development for at least one team and for at least one individual.

In the course of the above, the candidate must:

- collect data on team and individual and team development needs
- collaboratively develop learning plans to match skill needs of individuals and groups
- coordinate learning opportunities
- give and receive feedback during the implementation of learning plans
- monitor and review workplace learning plan implementation plans.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- facilitation techniques to support team development and improvement
- organisational policies, plans and procedures for developing teams
- career paths and competency standards relevant to the industry
- key sources of information relevant to inform development needs
- key features of learning and development methods.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- learning and development plans, policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to receive, process, and store workplace information and maintain information systems. It also includes the maintenance of records management systems.

The unit applies to individuals who perform a variety of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information	1.1 Confirm task requirements 1.2 Collect physical and digital information items 1.3 Allocate time and date of receipt to relevant information items 1.4 Apply organisational policies and procedures relating to security and confidentiality in handling information
2. Process workplace information	2.1 Enter metadata applying to information items into relevant system according to organisational policies and procedures 2.2 Collate and distribute information according to task requirements

ELEMENT	PERFORMANCE CRITERIA
3. Manage information systems	3.1 Maintain information and relevant classification system according to organisational policies and procedures 3.2 Identify and dispose of inactive unpublished information items or deaccession published information items according to organisational policies and procedures 3.3 Create new files of unpublished information materials according to organisational policies and procedures 3.4 Update registration, accessioning, classification and index systems according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Recognises and interprets textual information to complete tasks according to organisational policies and procedures
Writing	<ul style="list-style-type: none"> Records simple and routine content using an established format to organise information
Oral Communication	<ul style="list-style-type: none"> Uses listening and questioning skills to clarify and adhere to requirements
Numeracy	<ul style="list-style-type: none"> Comprehends basic mathematical measurements relating to times and number sequences
Self-management	<ul style="list-style-type: none"> Follows clearly defined instructions and monitors own progress to achieve timelines
Technology	<ul style="list-style-type: none"> Uses digital technologies regarding data entry and retrieval

Unit Mapping Information

Supersedes and is equivalent to BSBINM201 Process and maintain workplace information.

BSBLDR414 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan team outcomes	1.1 Lead team to identify and establish team objectives and work processes 1.2 Support team to document identified objectives and work processes according to organisational processes 1.3 Encourage team members to incorporate innovation and productivity measures in work plans 1.4 Lead and support team members to meet expected outcomes
2. Promote team cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team

ELEMENT	PERFORMANCE CRITERIA
	2.2 Support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members on their efforts and contributions 2.4 Address or refer issues, concerns and problems identified by team members 2.5 Model expected behaviours and approaches
3. Supervise team performance	3.1 Encourage team members to participate in and take responsibility for team activities and communication processes 3.2 Support team to identify and resolve problems which impede performance 3.3 Ensure own contribution to work team serves as a role model for others
4. Liaise with management	4.1 Establish open communication with line management 4.2 Communicate information from line management to the team 4.3 Communicate unresolved issues, concerns and problems raised by the team to line management to action 4.4 Communicate issues raised by management to the team to action

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none"> Prepares workplace plans that communicate intent and elicits feedback clearly and effectively
Oral communication	<ul style="list-style-type: none"> Engages in discussions or provides information using structure and language appropriate to the audience and situation
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with team members Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others

Planning and organising	<ul style="list-style-type: none">• Develops, implements and monitors plans and processes to ensure team engagement and effectiveness• Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others, as required

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- engage with at least three different customers, by:
 - providing customer service according to organisational standards and guidelines
 - using communication equipment and systems efficiently and effectively
 - adapting communication techniques to suit customer profile and requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- operational environment, including customer base and products and services of the organisation
- organisational performance standards and customer service expectations
- organisational policies, procedures, protocols for customer engagement
- relevant product or service details
- equipment and systems to manage customer engagement
- customer service in different contexts and customer behaviour in different contexts
- sources of information to develop customer service skills including relevant organisational personnel
- follow-up considerations for customer queries, including:
 - engagement escalation policy
 - business rules and practices
 - customer expectations
- principles of customer service
- continuous improvement methods including customer retention strategies
- procedures for the operation of telecommunication equipment and systems, relevant to customer service.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace information and data
- performance management records and data and quality assurance guidelines
- customer engagement policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBOPS304 Deliver and monitor a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

The unit applies to those who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate knowledge of customer service. They provide technical advice and support to customers over short or long-term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify customer needs	1.1 Identify and clarify customer needs and expectations 1.2 Evaluate customer needs and determine priorities for service delivery according to organisational requirements 1.3 Inform customers about available choices for meeting their needs and assist selection of preferred options 1.4 Identify limitations in addressing customer needs and seek assistance from designated individuals, where required
2. Deliver a service to customers	2.1 Provide service to meet identified customer needs according to organisational and legislative requirements 2.2 Establish and maintain rapport with customers

ELEMENT	PERFORMANCE CRITERIA
	2.3 Manage customer complaints according to organisational and legislative requirements 2.4 Provide assistance and respond to customers with specific needs according to organisational and legislative requirements 2.5 Identify and use available opportunities to promote and enhance services and products to customers
3. Evaluate customer service delivery	3.1 Review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements 3.2 Seek and respond to customer feedback according to organisational policies and procedures 3.3 Identify opportunities to enhance the quality of customer service 3.4 Document recommendations for customer service improvements 3.5 Submit recommendations to relevant personnel according to organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Learning	<ul style="list-style-type: none"> Identifies and follows up on opportunities to improve work practices and outcomes
Oral communication	<ul style="list-style-type: none"> Provides information or advice using structure and language to suit the audience Asks questions and listens to gain information or confirm understanding
Reading	<ul style="list-style-type: none"> Evaluates textual information to determine customer service requirements Proofreads texts for clarity of meaning and accuracy of grammar and punctuation
Writing	<ul style="list-style-type: none"> Completes responses to customer complaints in required format Prepares reports using sequencing, format and words to communicate recommendations clearly and effectively
Planning and organising	<ul style="list-style-type: none"> Complies with organisational policies and procedures relevant to role Plans and implements systems to gather and organise information

Skill	Description
Problem-solving	<ul style="list-style-type: none"> • Uses problem solving skills to analyse and respond to customer complaints or enquiries
Teamwork	<ul style="list-style-type: none"> • Selects and uses appropriate communication conventions to establish connections, build rapport, seek information and develop professional working relationships • Adjusts personal communication style in response to the opinions, values and particular needs of others

Unit Mapping Information

Supersedes and is equivalent to BSBCUS301 Deliver and monitor a service to customers.

Supersedes but is not equivalent to:

- BSBCUE309 Develop product and service knowledge for customer engagement operation
- BSBEDU303 Assist with the provision of international education information
- BSBINT303 Organise the importing and exporting of goods
- BSBINT304 Assist in the international transfer of services
- BSBSLS407 Identify and plan sales prospects.

BSBOPS402 Coordinate business operational plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement operational plans by planning and acquiring resources, monitoring and adjusting operational performance and providing reports on performance, as required.

The unit applies to individuals who plan activities to achieve team and organisational objectives. At this level, work will normally be carried out within routine and non-routine methods and involve procedures that require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to implement operational plan	1.1 Consult with stakeholders to identify resource requirements relevant to operational plan 1.2 Collate, analyse and document details of resource requirements 1.3 Develop operational plan and determine implementation method 1.4 Plan for contingencies 1.5 Develop and present proposals for resource requirements
2. Implement operational plan	2.1 Assist in recruiting and onboarding employees required to implement operational plan according to organisational policies

ELEMENT	PERFORMANCE CRITERIA
	<p>and procedures</p> <p>2.2 Acquire physical resources and services according to organisational policies and procedures</p> <p>2.3 Support efficient, cost-effective and safe use of resources</p> <p>2.4 Adjust implementation of the operational plan in consultation with others to manage contingencies</p>
3. Monitor operational performance	<p>3.1 Collate relevant information and determine operational and productivity performance</p> <p>3.2 Identify and use key performance indicators (KPIs) and assess operational performance</p> <p>3.3 Identify unsatisfactory performance and take action to rectify the situation according to organisational policies</p>
4. Review operations based on performance	<p>4.1 Develop recommendations for variation to operational plans</p> <p>4.2 Present recommendations to the designated persons or groups to gain approval</p> <p>4.3 Maintain records related to operational performance according to organisational policies and procedures</p> <p>4.4 Report information on operational performance to management</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies, interprets, analyses and reviews textual information related to the operational plan and monitoring of operational performance
Writing	<ul style="list-style-type: none"> Communicates relationships between ideas and information, matching style of writing to purpose and audience Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral communication	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	<ul style="list-style-type: none"> Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Enterprise and initiative	<ul style="list-style-type: none"> Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment

Skill	Description
Teamwork	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Planning and organising	<ul style="list-style-type: none"> • Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes • Evaluates effectiveness of decisions in terms of how well they met stated goals • Identifies and addresses an increasing range of familiar problems by implementing contingency plans

Assessment Requirements for BSBOPS402 Coordinate business operational plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare, implement and review two operational plans.

In the course of the above, the candidate must:

- interact with a range of people and groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives including facilitating new employee onboarding
- present information and recommendations to support implementation and variation of the operational plan
- monitor operational performance against the performance objectives and budgets and implement improvements to rectify unsatisfactory performance
- vary the operational plan and gain approval to deal with contingencies
- document and provide reports on performance as required by the organisation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- processes to identify resource requirements
- sources of information to identify resource requirements
- methods to manage contingencies including through consultation with relevant stakeholders
- key features of performance monitoring systems and processes
- common methods for problem solving
- methods to support staff including mentoring, coaching and supervision

- implementation methods for operational plan
- budget and other financial information related to the organisation
- organisational objectives including costs, identified shortfalls and surpluses.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- organisational operational plans, policies and procedures relevant to performance evidence
- workplace documentation and resources including budgets
- physical and human resource procurement documentation
- employee onboarding and performance monitoring procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBOPS403 Apply business risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify business risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the work role.

The unit applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or delegate aspects of these tasks to others. Risks applicable to own work responsibilities and area of operation may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify risks	1.1 Identify context for risk management 1.2 Undertake required steps to identify risks 1.3 Document identified risks according to relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes

ELEMENT	PERFORMANCE CRITERIA
3. Treat risks	3.1 Identify control measures for risks 3.2 Assess strengths and weaknesses of control measures 3.3 Refer risks to relevant personnel, where required, according to policies and procedures 3.4 Select and implement control measures for personal area of operation and responsibilities
4. Monitor and review effectiveness of risk treatments	4.1 Review implemented treatments against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Monitor and review management of risk in personal area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Learning	<ul style="list-style-type: none"> • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions
Reading	<ul style="list-style-type: none"> • Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	<ul style="list-style-type: none"> • Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes
Oral communication	<ul style="list-style-type: none"> • Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding

BSBPEF301 Organise personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.2. Release created to amend typographical error in the foundation skills.

Application

This unit describes the skills and knowledge required to organise personal work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

The unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise and complete own work schedule	1.1 Develop work goals and key performance indicators (KPIs) according to task and organisational requirements 1.2 Prioritise workload according to task timeframes 1.3 Identify factors affecting achievement of work objectives 1.4 Develop personal work plans
2. Evaluate own work	2.1 Identify variations between expected and actual work

ELEMENT	PERFORMANCE CRITERIA
performance	<p>performance according to task requirements and KPIs</p> <p>2.2 Report variations to relevant personnel</p> <p>2.3 Seek feedback from relevant personnel for solutions to minimise variations in expected and actual work outputs</p> <p>2.4 Research sources of stress and access appropriate supports according to organisational policies and procedures</p>
3. Coordinate personal skill development and learning	<p>3.1 Identify personal and professional development needs for job role</p> <p>3.2 Identify opportunities to undertake personal skill development activities in consultation with supervisor</p> <p>3.3 Access professional development opportunities</p> <p>3.4 Record professional development undertaken for continuous learning and career development process</p> <p>3.5 Incorporate feedback into review of further learning needs</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences
Reading	<ul style="list-style-type: none"> Interprets textual information to determine organisation's procedures, own work performance and objectives
Writing	<ul style="list-style-type: none"> Prepares written reports and workplace documents that communicate information clearly and effectively
Oral communication	<ul style="list-style-type: none"> Provides and receives feedback using specific and relevant language Uses listening and questioning techniques to confirm understanding
Self-management	<ul style="list-style-type: none"> Complies with organisational policies, procedures and protocols
Teamwork	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Proactively collaborates with others to achieve specific goals
Planning and organising	<ul style="list-style-type: none"> Plans and organises work commitments to ensure deadlines and objectives are met Uses formal analytical thinking techniques to recognise and respond to routine problems

Skill	Description
Technology	<ul style="list-style-type: none"><li data-bbox="464 309 1406 342">• Uses digital systems and tools to enter, store and monitor information

Unit Mapping Information

Supersedes and is equivalent to BSBWOR301 Organise personal work priorities and development.

Assessment Requirements for BSBPEF301 Organise personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.2. Release created to amend typographical error in the foundation skills.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and implement a personal work plan.

In the course of the above, the candidate must:

- prepare a work plan according to organisational requirements and work objectives
- use technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work tasks and address contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from relevant personnel
- identify personal development needs and access, complete and record skill development and learning.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relevant to work tasks
- goals, objectives and key performance indicators for task within scope of job role
- methods to elicit, analyse and interpret feedback when communicating with other people in the workplace
- content of work plans including:
 - timeframes
 - tasks requirements

- risks
- contingencies for identified risks
- types of personal learning and professional development requirements
- principles and techniques of goal setting, measuring performance and time management
- signs and sources of stress and strategies to deal with stress in the workplace
- methods to identify and prioritise personal learning needs.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- challenges and situations to demonstrate application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPEF402 Develop personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to plan and prioritise own work tasks. It also addresses the skills and knowledge to monitor and obtain feedback on personal work performance.

The unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan personal work schedule	1.1 Identify task requirements 1.2 Identify own accountabilities in line with task requirements 1.3 Assess barriers for performance of personal accountabilities 1.4 Develop a personal work schedule
2. Implement personal work schedule	2.1 Communicate personal work schedule to relevant personnel 2.2 Monitor own performance according to personal work schedule 2.3 Document variations between expected and actual work performance according to task requirements and communicate to relevant personnel

ELEMENT	PERFORMANCE CRITERIA
3. Review personal work priorities	3.1 Seek and evaluate feedback from relevant stakeholders on own work performance 3.2 Analyse variations between expected and actual work performance 3.3 Update personal work schedule according to internal and external feedback and changes in circumstances

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Develops strategies to reflect on own performance and obtain feedback
Reading	<ul style="list-style-type: none"> Identifies and applies textual information from relevant sources to understand organisation's policies and practices
Writing	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Numeracy	<ul style="list-style-type: none"> Analyses numerical information related work accountabilities
Enterprise and initiative	<ul style="list-style-type: none"> Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Planning and organising	<ul style="list-style-type: none"> Plans, organises and implements tasks to meet organisational requirements Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

Unit Mapping Information

Supersedes and is equivalent to BSBWOR404 Develop work priorities.

Supersedes but is not equivalent to:

- BSBSMB408 Manage personal, family, cultural and business obligations
- BSBWOR424 Develop a time management plan.

Assessment Requirements for BSBPEF402 Develop personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop, implement and review one personal work schedule.

In the course of the above, the candidate must:

- identify personal responsibilities and barriers to their fulfilment according to task requirements
- prepare a personal work schedule
- communicate work schedule to relevant personnel
- monitor personal work performance to identify variations between expected and actual work performance
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from internal and external stakeholders.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- content of work plans including:
 - resource requirements
 - stakeholder needs
 - workgroup targets
- business technology applications to schedule tasks and plan work
- methods of personal work performance review including:
 - self-assessment
 - feedback from others
- techniques to prepare personal plans and establish priorities
- methods to elicit, analyse and interpret feedback.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG427 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project.

The unit applies to individuals who are project practitioners working in a project support role.

The project assistant may be part of a project team under the direction of a project manager, or may work as part of a smaller scale, self-directed team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assist with procurement planning	1.1 Contribute to establishing procurement requirements according to project objectives 1.2 Contribute to developing procurement-management plan and documentation
2. Contribute to supplier selection process	2.1 Gather and evaluate information on potential suppliers 2.2 Make recommendations and assist in selection of preferred suppliers 2.3 Contribute to establishing agreed terms and conditions with

ELEMENT	PERFORMANCE CRITERIA
	<p>preferred suppliers</p> <p>2.4 Assist relevant personnel in establishing and checking relevant stakeholders perform agreed terms</p> <p>2.5 Assist in developing contractual documentation</p>
3. Conduct procurement activities	<p>3.1 Test and accept supplies and confirm fit for purpose in both quality and suitability</p> <p>3.2 Undertake procurement activities and maintain information according to reporting, confidentiality and audit requirements</p> <p>3.3 Receive, reconcile and register supplies according to established procedures</p> <p>3.4 Monitor and control suppliers and contractual supply documentation</p>
4. Assist in finalising procurement activities	<p>4.1 Assist in finalising procurement activities</p> <p>4.2 Assist in review of project outcomes using available records to determine effectiveness of procurement activities</p> <p>4.3 Contribute to making changes to project procurement procedures based on feedback received</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Applies appropriate strategies to construct meaning from a variety of texts
Writing	<ul style="list-style-type: none"> Contributes to developing project documents using vocabulary and structure appropriate to audience, context and purpose Completes project documentation using required formats and structure
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear language and appropriate non-verbal features to provide and seek information Uses questioning and listening skills to check and confirm understanding
Numeracy	<ul style="list-style-type: none"> Uses basic mathematical formula to calculate whole numbers and decimals to confirm financial accounts match purchased items

Assessment Requirements for BSBPMG427 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- assist application of project procurement processes during at least two different projects.

In the course of the above, the candidate must:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- procurement-management policy, processes and procedures
- procurement documentation requirements
- components of contractual documentation and the legal obligations of all parties
- process used to select preferred contractors
- project procurement-management tools and techniques.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG634 Facilitate stakeholder engagement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to facilitate stakeholder engagement in a program. It includes working with stakeholders through effective communication to achieve desired program benefits.

The unit applies to individuals who are program managers and those managing a suite of projects (a program). They operate within assigned authority levels, are responsible for their own performance, program outcomes, and sometimes the performance of others.

Individuals in this role may be operating within an organisation, a business or working as a consultant.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Communicate with stakeholders	1.1 Identify and document program stakeholders and their communication needs as they apply to the given program of work 1.2 Engage with pertinent stakeholders and agree on communication approaches in accordance with organisational policies and procedures 1.3 Communicate information as planned and address identified variances

ELEMENT	PERFORMANCE CRITERIA
	1.4 Monitor communication interfaces among constituent projects, and align to relevant program objectives
2. Undertake stakeholder commitment	<p>2.1 Investigate and document interests and expectations of key stakeholders for making program decisions</p> <p>2.2 Develop and implement approaches to influence ongoing stakeholder commitment according to organisational policies and procedures</p> <p>2.3 Share evolving stakeholder interests and expectations across the program</p>
3. Assess effectiveness of stakeholder engagement	<p>3.1 Conduct analysis of interactions with key stakeholders and document outcomes to reach desired outcomes</p> <p>3.2 Assess effectiveness of stakeholder interaction according to program objectives and organisational policies and procedures</p> <p>3.3 Develop plan for future stakeholder engagement based on findings of analysis conducted</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Organises, evaluates and critiques ideas and information from complex texts
Writing	<ul style="list-style-type: none"> Develops a range of project related documents using appropriate format, vocabulary and structure
Oral Communication	<ul style="list-style-type: none"> Participates in a range of verbal exchanges using language and features appropriate to audience Uses active listening and questioning techniques to confirm understanding
Teamwork	<ul style="list-style-type: none"> Identifies the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how Builds and maintains effective working relationships within and beyond immediate work context Identifies, creates and utilises linkages to enhance knowledge sharing and commitment
Planning and organising	<ul style="list-style-type: none"> Develops flexible plans for complex, high impact activities with strategic implications that involve a diverse range of stakeholders with potentially competing demands

SKILL	DESCRIPTION
	<ul style="list-style-type: none"><li data-bbox="456 309 1315 376">Identifies issues and uses analytical techniques to generate and evaluate possible solutions and to make decisions

Assessment Requirements for BSBPMG634 Facilitate stakeholder engagement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- facilitate stakeholder engagement on at least one occasion.

In the course of the above, the candidate must:

- provide examples of internal and external stakeholder communications, both formal and informal used in the workplace
- use different communication approaches in different stakeholder contexts
- conduct and document an introspective assessment of stakeholder effectiveness and develop a plan for future stakeholder interactions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- features of engagement models, benefits and applications
- forms and methods of stakeholder engagement
- features of several means, media and methods of communication
- features of various types and roles of program stakeholders
- features of relevant organisation policies and procedures
- program and organisational objectives.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- access to examples of program stakeholder engagement processes and interaction

- feedback from stakeholders, which reflects how stakeholder engagement was managed for a program.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC201 Use business software applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to select and use software and organise electronic information and data.

The unit applies to those who use a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare to use technology	1.1 Identify task purpose, audience, format and presentation requirements, and clarify with relevant personnel, where required 1.2 Select relevant technology and software applications to achieve requirements of the task 1.3 Adjust workspace, furniture and equipment to suit own ergonomic requirements
2. Input and process information or data	2.1 Identify and open application, according to task and organisational requirements 2.2 Enter information or data into application according to organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ensure information or data is checked and amended according to organisational and task requirements 2.4 Format information or data using appropriate application functions according to organisational and task requirements 2.5 Use relevant help functions to overcome simple issues
3. Finalise and store document	3.1 Review and edit final information or data, and prepare for storage in accordance with organisational and task requirements 3.2 Name and store document and exit application

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises and interprets information from familiar sources to determine job role and task requirements
Writing	<ul style="list-style-type: none"> Produces and amends files to meet task and organisational requirements Completes required documentation using organisational formats

Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU211 Produce digital text documents

Assessment Requirements for BSBTWK201 Work effectively with others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- work with a group to achieve an objective on at least two occasions and address at least one identified problem or conflict on each occasion.

In the course of the above, the candidate must:

- distinguish individual responsibilities from workgroup responsibilities
- demonstrate the ability to:
 - support team members
 - communicate according to the cultural and linguistic requirements of the individual
 - act on constructive feedback
 - use communication channels to share information
 - cooperate and contribute to team goals
 - identify improvement opportunities
- identify problems and conflicts and address them according to organisational and ethical policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational and ethical standards, policies and procedures that relate to own work role
- team responsibilities and duties and their relationship to individual responsibilities and duties
- organisational policies and procedures relating to workplace discrimination and bullying
- personal values and beliefs including their importance in the development of relationships
- communication channels used to communicate in work teams including:
 - team meetings

- one-on-one interactions with individual team members
- emails
- instant messaging
- calls
- key problems and conflicts arising in workgroup contexts
- methods of resolving team problems including referral to relevant organisational personnel
- conflict resolution techniques.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace discrimination and bullying legislation
- organisational and ethical standards, policies and procedures for working with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others, and to assist in responding to incidents. It covers following work health and safety (WHS) policies, procedures, instructions and requirements; and participating in WHS consultative processes.

The unit applies to those who require a basic knowledge of WHS to carry out own work in a defined context, under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
----------	----------------------

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Operate safely in own work environment	1.1 Identify organisational WHS policies and procedures that apply to own work setting 1.2 Carry out work tasks according to WHS instructions 1.3 Carry out pre-start systems and equipment checks under supervision and according to organisational policies and procedures 1.4 Participate in responding to incidents according to organisational policies and procedures
2. Operate safely within requirements of own role	2.1 Identify individuals and/or parties to whom queries and concerns about safety in the workplace should be directed 2.2 Identify existing and potential hazards relating to own role, and record and report them according to organisational policies and procedures 2.3 Identify and contribute to implementing WHS instructions and organisational policies and procedures specific to own work area 2.4 Identify and report incidents and injuries to required personnel according to organisational policies and procedures
3. Participate in WHS consultative processes	3.1 Contribute to workplace meetings, inspections, and other WHS consultative activities 3.2 Identify existing and potential WHS hazards and report them to designated persons according to organisational policies and procedures 3.3 Participate in actions to minimise or eliminate workplace hazards and to reduce risks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets short and simple information in relation to WHS and incidents
Writing	<ul style="list-style-type: none"> Uses structure and language appropriate to audience and context when giving factual information

Skill	Description
Oral Communication	<ul style="list-style-type: none"> • Uses language and non-verbal communication appropriate to audience and context in descriptions, opinions and explanations • Extracts meaning and main ideas from verbal descriptions, opinions and explanations
Navigate the world of work	<ul style="list-style-type: none"> • Follows WHS legislative requirements under supervision and with assistance • Follows protocols and procedures relating to own role • Seeks assistance from others when WHS issues are beyond scope of immediate responsibilities
Get the work done	<ul style="list-style-type: none"> • Plans, organises and implements routine tasks in order to optimise health and safety • Selects and implements actions from predetermined procedures

Unit Mapping Information

Supersedes and is equivalent to BSBWHS201 Contribute to health and safety of self and others.

Assessment Requirements for BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- actively participate in two different work activities that contribute to the health and safety of self and others
- identify and report at least one hazard to designated personnel.

During the above, the candidate must follow required procedures and instructions relating to work health and safety (WHS) and incidents.

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- organisational safety policies, procedures, instructions and requirements relating to own work role in relation to:
 - checking systems and equipment
 - conducting routine work operations
 - personal protective equipment (PPE)
 - recording existing and potential WHS issues
 - responding to and reporting incidents and injuries
 - responding to fires and incidents
- meaning of commonly used hazard signs and safety symbols
- duty holder responsibilities, as specified in WHS laws, including:
 - self and co-workers
 - persons conducting a business or undertaking (PCBUs)
 - officers
 - others in the workplace

- distinction between hazards and risks
- WHS hazards that may be present in the workplace, including the harm they can cause and how this harm occurs
- process of hazard identification and risk control.

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures, and work instructions covered in the knowledge evidence
- WHS laws relevant to performance evidence requirements
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS515 Lead initial response to and investigate WHS incidents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to lead the initial response to work health and safety (WHS) incidents. The unit also includes planning, conducting and reporting on investigations of WHS incidents that have resulted in, or have the potential to result in, injury or damage. This may include accessing specialist expertise.

The unit applies to those who work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts. It does not apply to those undertaking an investigation in order to provide legal advice or prepare for legal proceedings.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Lead the initial response to incident	1.1 Identify required initial response to incident according to established organisational response plan 1.2 Implement initial response according to plan, and organisational and legislative requirements 1.3 Confirm sufficiency and suitability of implemented initial response 1.4 Consult individuals and/or parties according to organisational policies and procedures
2. Develop and resource an incident investigation plan	2.1 Identify duty holders according to WHS laws and workplace policies, procedures and systems 2.2 Define scope and purpose of investigation appropriate to nature and scope of incident 2.3 Identify, document and secure required human and other resources appropriate to nature and scope of incident, including expert advice as required 2.4 Ensure participation of, and consultation with, required stakeholders, and determine agreed processes for investigation 2.5 Identify, address and document potential barriers to investigation according to organisational requirements 2.6 Document incident investigation plan according to organisational and WHS legislative requirements
3. Collect incident information and data	3.1 Identify and access relevant and reliable sources of incident information and data according to organisational policies and protocols, suitable causation model and legislative requirements 3.2 Inspect incident site, equipment and other evidence according to investigation plan, organisational procedures and legislative requirements 3.3 Present collected information and data in required format
4. Lead an incident investigation that is not part of providing legal advice or preparing for legal	4.1 Brief investigation team on investigation requirements and incident causation model 4.2 Construct and document timeline of events leading up

ELEMENTS	PERFORMANCE CRITERIA
proceedings	<p>to incident</p> <p>4.3 Coordinate investigation of key events, conditions and/or circumstances that contributed to incident</p> <p>4.4 Develop recommendations, interventions and practical measures for investigation report</p>
5. Record and report WHS incident investigation	<p>5.1 Document investigation evidence and basis for conclusions and recommendations</p> <p>5.2 Prepare investigation report according to organisational procedures and WHS legislative requirements</p> <p>5.3 Implement organisational and WHS legislative recordkeeping protocols and procedures in relation to investigation report</p> <p>5.4 Communicate report to required individuals and/or parties according to organisational policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reviews and interprets WHS legislative texts relating to WHS incidents Analyses reports and other material to determine required course of action
Writing	<ul style="list-style-type: none"> Documents procedures, plans and outcomes using appropriate organisational formats and industry-specific terminology Develops reports using structure, format and language appropriate for report purpose and audience
Oral communication	<ul style="list-style-type: none"> Uses appropriate language and non-verbal features to provide support, give instructions or

Skill	Description
Communication	<ul style="list-style-type: none"> request information Listens closely to extract main ideas and to evaluate initial responses for accuracy and validity
Numeracy	<ul style="list-style-type: none"> Extracts and evaluates the numerate and graphical information embedded in sources of incident information and data Performs calculations in relation to resource requirements, timelines and evaluation measures, and the impact and implications of incidents
Navigate the world of work	<ul style="list-style-type: none"> Develops, implements or modifies workplace procedures applicable to investigation contexts Keeps up to date on changes to WHS laws relevant to own role and responsibilities, and considers their implications when negotiating, planning and undertaking work
Interact with others	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with parties involved in various investigation stages Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction Takes a leadership role in developing team understanding of investigation requirements
Get the work done	<ul style="list-style-type: none"> Uses logical planning processes and understanding of context to: <ul style="list-style-type: none"> identify relevant information and risks identify and evaluate alternative strategies and resources for investigation processes Sequences and schedules complex activities, monitors implementation and manages relevant

Skill	Description

Assessment Requirements for BSBWHS515 Lead initial response to and investigate WHS incidents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- lead the initial response to one work health and safety (WHS) incident that complies with legislative and organisational requirements
- prepare, record and communicate incident investigation report that addresses immediate and underlying causes of incident and recommends practical prevention measures, according to organisational and WHS legislative requirements.

During the above, the candidate must:

- systematically develop and document a plan to investigate the incident
- collect, use and document information and data relevant to incident investigation
- establish key events, conditions and/or circumstances that contributed to the incident
- identify actions required to respond to the incident, including any recommendations for changes to WHS arrangements.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- WHS laws applicable to WHS incidents and their investigation
- organisational WHS policies, procedures, processes, systems, roles and responsibilities relating to responding to and investigating WHS incidents:
 - incident response plan that meets legislative and organisational requirements
 - protocols and procedures for investigation, including preserving incident site as required
 - protocols for maintaining objectivity, confidentiality, privacy and commercial requirements during investigation of WHS incident

- information and data collection procedures that ensure their validity, admissibility and accuracy
- due diligence and duty of care requirements when investigating WHS incidents
- required format for reporting incident investigations
- common industry-accepted causation models, and their use in informing data collection and analysis
- internal and external sources of WHS information and data relevant to WHS incident investigations
- key components of incident investigation plan, including:
 - duty holders, expert advisers and key stakeholders appropriate to incident
 - agreed timelines, objectives, responsibilities, roles, documentation, actions and outcomes
 - levels of accountability
 - protocols for ensuring privacy and sensitivity throughout investigation
- key components of investigation report, including:
 - identified incident root causes
 - recommended actions, interventions and practical measures arising from investigation
 - plans for implementing and evaluating recommendations
- techniques and tools for gathering information relating to incident investigation, including:
 - questioning and active listening
 - information collection
 - accurate note taking
- types and characteristics of WHS incidents and suitable incident response processes.
-

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment and resources
- WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria, and foundation skills of this unit, including evidence of the ability to:

- identify the communication requirements for a work activity and assign roles to others to fulfil those requirements
- select appropriate communication method for relevant audience and according to organisational requirements
- articulate to others their roles in fulfilling the communication requirements and negotiate roles in response to feedback
- present and convey information to others in a way that they can understand and demonstrate that the needs of all recipients, including those from diverse backgrounds have been considered
- demonstrate problem solving techniques to negotiate and resolve communication challenges
- evaluate the communication process and identify areas for improvement, reporting to relevant supervisors as required.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislative requirements relevant to workplace communication
- organisational requirements relevant to workplace communication (including digital form):
 - policies and protocols
 - codes of conduct

- organisational reputation and culture
- techniques to resolve communication challenges
- methods and techniques to participate in workplace discussions, including active listening, questioning and providing feedback
- key principles of cross-cultural communication and communication with individuals with special needs or disabilities
- presentation methods to present and convey workplace information or instructions:
 - formal presentation using visual aids and prompts
 - informal team meeting or instructional briefing
 - written work instruction for a process or procedure
- communication methods suited to audience and workplace requirement:
 - verbal means: telephones, mobiles, video conference
 - written means: emails, SMS, social media
- communication challenges relevant to performance evidence:
 - conflicts with clients or team members
 - potential risks or safety hazards
 - unethical or inappropriate communication
 - use of visual prompts and presentations
 - communication that falls outside of workplace policy
- key relevant features of:
 - different communication styles
 - different communication methods
 - cross cultural communication techniques.

Assessment Conditions

Mandatory conditions for assessment include:

- A safe working or simulated environment

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan team outcomes	1.1 Identify common objectives of workplace team, responsibilities and required outcome(s) 1.2 Use performance plans to establish expected outcomes, goals, and behaviours for individual team members in accordance with team objective and relevant policies

	<p>1.3 Select appropriate strategies to ensure team members are accountable for their roles and responsibilities</p> <p>1.4 Plan for contingencies that could impact the team</p>
2. Coordinate team and individuals	<p>2.1 Communicate common team objectives and responsibilities to team members</p> <p>2.2 Allocate tasks to team members based on staff expertise or development potential and provide appropriate instructions</p> <p>2.3 Facilitate open and respectful communication and collaboration between team members, considering the needs of those from diverse backgrounds</p> <p>2.4 Identify opportunities for cross collaboration amongst external and internal teams and individuals</p>
3. Support team	<p>3.1 Provide coaching to staff to enhance workplace culture</p> <p>3.2 Support individuals according to organisational requirements to work towards common team goals</p> <p>3.3 Facilitate team to identify, brainstorm, report and resolve task related issues and inefficiencies</p> <p>3.4 Use problem solving skills to deal with any team, task or individual challenges</p>
4. Monitor team performance	<p>4.1 Measure team member performance against agreed work plans</p> <p>4.2 Provide timely and constructive performance feedback to team members according to expected organisational standards</p> <p>4.3 Identify specific learning and development opportunities to improve team and individual performance and behaviours</p> <p>4.4 Implement action plans to address individual and team training needs</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Interact with others	<ul style="list-style-type: none"> • Uses appropriate communication practices when communicating with team members and facilitating activities • Establishes and builds relationships and rapport with team members to foster a positive team environment • Recognises the perspectives of team members and diversity of

Skill	Description
	opinion, and manages conflict as required
Navigate the world of work	<ul style="list-style-type: none">• Understands and explains ethical and legal, regulatory and organisational responsibilities to team
Get the work done	<ul style="list-style-type: none">• Plans, organises and implements work activities in line with organisational policies and procedures

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXTW401 Lead and facilitate a team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria, and foundation skills of this unit, including on at least one occasion, evidence of the ability to:

- assign tasks to team members with appropriate instruction and considering any required contingencies
- provide feedback and assistance to team members
- collate feedback on individual and team performance
- identify and implement development opportunities for others
- manage conflicts and challenges according to organisational requirements.
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- organisational requirements relevant to workplace teams:
 - workplace policies
 - codes of conduct
 - organisational reputation and culture
- legislative requirements relevant to the workplace
- facilitation techniques to encourage team cohesion and effectiveness
- mentoring and coaching techniques to support team members
- strategies for conflict resolution and negotiation
- different methods and styles of communication

- key principles of cross-cultural communication and communication with individuals with special needs or disabilities
- professional behaviours to role model as a leader
- typical workplace contingencies that can impact teams:
 - unplanned leave or absence of workers
 - re-allocation of work tasks
 - succession planning for important team roles
- teamwork challenges relevant to performance evidence:
 - difficulties performing tasks
 - conflicts with clients or team members
 - potential risks or safety hazards
 - unethical or inappropriate behaviour.

Assessment Conditions

Mandatory conditions for assessment include:

- A safe working or simulated environment

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

CPCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Typographical error corrected in the Knowledge Evidence. Word 'detects' corrected to read 'defects'.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to access, interpret and apply relevant building codes and standards applicable to the National Construction Code (NCC) Classes 1 and 10 buildings, to a maximum of two storeys. It includes knowledge of the structure of the NCC, as well as the ability to access relevant information from the code as applicable to various building projects.

It applies to builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards related to residential construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Classify building. | 1.1 Determine nature of building, its use and arrangement from construction plans and specifications. |
| | 1.2 Access, read and interpret relevant Australian Standards and codes for residential building and construction projects. |
| | 1.3 Define classification of building from the NCC. |
| | 1.4 Identify and interpret multiple classifications from the NCC. |
| 2 Determine construction compliance requirements. | 2.1 Identify NCC Performance Requirements relevant to Class 1 and 10, up to two storeys, building projects. |
| | 2.2 Determine range of criteria to ensure that construction methods comply with NCC Performance Requirements. |
| | 2.3 Identify and document non-conforming construction methods against NCC Performance Requirements. |
| | 2.4 Propose and discuss Performance Solution with design and building and construction professionals. |
| | 2.5 Analyse and apply Assessment Methods to determine compliance with Performance Solution or Deem-to-Satisfy Solution (DTS). |

- | | | |
|---|-----|--|
| | 2.6 | Meet the evidence of suitability requirements for building materials and products stated in the NCC. |
| | 2.7 | Complete relevant documentation to meet NCC requirements. |
| 3 Determine fire protection requirements. | 3.1 | Identify NCC and other legislative requirements for passive and active fire control elements in buildings. |
| | 3.2 | Determine level of fire resistance required for the construction of various buildings. |
| | 3.3 | Check existing buildings for compliance with passive and active fire protection requirements. |

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- problem-solving skills to:
 - analyse non-conforming construction methods, define key problem and produce appropriate solution
 - seek clarification of appropriate solution to meet construction method compliance
- technology skills to:
 - use digital tools and devices to communicate and collaborate effectively with others
 - use equipment and programs to access, extract information and develop relevant documentation.

Unit Mapping Information

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Links

Assessment Requirements for CPCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Typographical error corrected in the Knowledge Evidence. Word 'detects' corrected to read 'defects'.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying codes and standards to the construction process of one Class 1 or 10 building project, to a maximum of two storeys.

In doing this, the candidate must:

- determine type of construction and use of building from construction plans and specifications and class of building using National Construction Code (NCC) classifications
- identify current building and construction codes and Australian Standards relevant to the building project
- apply NCC Performance Requirements in relation to the design and construction of the building:
 - energy efficiency
 - damp and weatherproofing
 - fire safety
 - health and amenity

- structure
- safe movement and access
- ancillary provisions
- apply Performance Solutions to ensure that construction complies with NCC Performance Requirements
- identify faults and problems and propose actions to rectify
- inspect a building to determine fire protection compliance with NCC and other legislative requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building legislation, codes and standards:
 - the NCC:
 - Performance Requirements and General Requirements
 - Performance Solutions and Assessment Methods
 - Performance Hierarchy
 - evidence of suitability for building materials and products
 - classes of building and types of construction
- organisational policies and procedures, quality systems and best practice approaches
- workplace safety requirements
- properties, characteristics and limitations of specified building materials and components
- processes, procedures and techniques of construction
- basic building design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- causes and implications of building defects related to failure of applying building codes and standards to residential and commercial buildings
- extent of remedial work required for various defects caused by inadequate design and application of building codes and practices
- environmental requirements and sustainability principles and concepts
- project plans, specifications, working drawings and structural details
- construction terminology.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction regulations
- current building and construction codes and standards
- NCC Volume 2
- construction drawings, site plans and specifications
- organisational policies and procedures and other quality documentation to undertake the performance criteria and assessment requirements
- digital technology devices, applications and software to source and document information.

CPCBC4024 Resolve business disputes

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4024A Resolve business disputes.
Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to advise on or resolve business disputes that may arise during activities in residential and commercial contracting projects. It includes the development and implementation of dispute resolution processes and procedures.

This unit of competency applies to builders, site supervisors and related construction industry professionals responsible for resolving business disputes in a positive manner.

This unit of competency is suitable for people with specialised knowledge, completing routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Evaluate dispute information.
 - 1.1 Review and evaluate information to identify the dispute issue, potential causes, circumstances and persons involved.
 - 1.2 Analyse and appraise contractual arrangements and agreements and relevant legislation.
 - 1.3 Identify risks and prepare contingency strategies.
 - 1.4 Obtain advice from senior managers and other professionals to develop a dispute resolution strategy.
 - 1.5 Follow dispute resolution procedure.
 - 1.6 Secure agreement for procedure from all parties.

- 2 Negotiate with parties.
 - 2.1 Interview concerned parties individually to clarify reasons for dispute, issues and desired outcome.
 - 2.2 Conduct an inspection of work in dispute, as required, to determine compliance with the requirements.
 - 2.3 Develop solutions based on interview with parties, inspection of work and compliance with requirements to optimise likelihood of a favourable outcome.
 - 2.4 Offer parties recommended solutions to resolve dispute equitably and advise parties of legal processes should resolution not occur.
 - 2.5 Record and maintain dispute process, information and outcome.

- 3 Identify opportunities for dispute resolution.
 - 3.1 Identify and detail process to consult with external arbitrators or conciliators when disputes cannot be resolved internally.
 - 3.2 Implement procedures to settle dispute promptly following statutory law, professional and organisational requirements.
 - 3.3 Communicate with relevant parties to ensure client satisfaction or follow up actions.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- speaking and listening skills to:
 - actively listen and use observational and questioning techniques to identify different perspectives and confirm, clarify and revise understanding.

Unit Mapping Information

Supersedes and is equivalent to CPCBC4024A Resolve business disputes

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCBC4024 Resolve business disputes

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4024A Resolve business disputes.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria of this unit by resolving one construction project dispute.

In doing this, the candidate must:

- identify the nature of the dispute and identify the parties in the dispute
- document dispute details accurately and in sufficient terms to eliminate any ambiguity
- follow established dispute resolution procedures and develop and implement dispute resolution procedures where none are established
- maintain impartiality throughout the dispute resolution process.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- contractual and business frameworks underpinning the building and construction industry
- legislation and other guidelines:
 - common law
 - consumer law
 - contract law
 - government dispute resolution guidelines
 - privacy
- dispute resolution and conflict theory
- risk assessment and evaluation strategies
- negotiating processes and strategies
- industry dispute resolution guidelines
- organisational policies and procedures
- values and attitudes of various groups in the community that should be accounted for in discussions
- possible reactions and behaviours from persons in a dispute situation

- dispute resolution procedures:
 - mutual resolution
 - on-site negotiations
 - reference to contractual obligations
 - arbitrated decisions
 - common law outcomes
 - litigated decisions
- causes of business disputes:
 - contract payment issues
 - different opinions about design, structural layout or dimensions
 - dissatisfaction with project progress
 - structural finish, quality, materials or construction methodology
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract integrate and compile information.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current building and construction codes and standards
- contracts, construction drawings and specifications
- relevant government legislation and other quality documentation to undertake the performance criteria and assessment requirements
- digital devices, applications and software to receive, record and save dispute information electronically.

CPCCOM1015 Carry out measurements and calculations

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Rectified to reflect endorsed version.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM1015 Carry out measurements and calculations. Updated to reflect current industry terminology, tools and equipment.

Application

This unit of competency specifies the skills and knowledge required to undertake basic measurements and calculations to determine task and material requirements in a construction work environment.

A person working at this level would be expected to complete tasks assigned to them, under supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|-------------------------------|--|
| 1 Obtain measurements. | 1.1 Select most appropriate equipment and method for obtaining the measurement. |
| | 1.2 Use a ruler or tape to obtain linear measurements accurate to 1 mm. |
| 2 Perform basic calculations. | 2.1 Take basic measurements and calculate quantities of materials in a construction environment, using basic formulae for each of: weight, area, volume, perimeter, circumference, ratio and percentage. |
| | 2.2 Convert measurements in metres to millimetres and measurements in millimetres to metres. |
| | 2.3 Check calculations for accuracy and record calculation workings and results. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCM1015 Carry out measurements and calculations.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCOM1015 Carry out measurements and calculations

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Rectified to reflect endorsed version.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM1015 Carry out measurements and calculations. Updated to reflect current industry terminology, tools and equipment.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by:

- taking basic measurements and performing basic calculations to determine quantities of materials for construction work using each of the following:
 - weight
 - area
 - volume
 - perimeter
 - circumference
 - ratio
 - percentage
- demonstrating converting measurements in metres to millimetres and measurements in millimetres to metres.

All work must be performed to the standard required in the workplace.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- types of equipment required for planning and performing basic measurements and calculations and their characteristics, uses and limitations, including:
 - rulers
 - tape measures

- digital measuring and calculating devices
- methods of calculating the area and volume of the following in a construction environment:
 - rectangles
 - squares
 - circles
 - triangles
 - trapeziums
 - cubes
 - cylinders.
 -

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPPCMN4008 Read plans, drawings and specifications for residential buildings

Modification History

Release 1.

Replaces superseded equivalent CPPCMN4008A Read and extract information from plans, drawings and specifications for residential buildings.

This version first released with CPP Property Services Training Package Version 5.

Application

This unit of competency specifies the outcomes required to read and extract information from different types of plans, building drawings and specifications for residential buildings.

The unit supports workers in the property industry who are required to read and extract routine information from a variety of plans and drawings associated with residential buildings. It applies to real estate agents, property managers, strata managers, Nationwide House Energy Rating Scheme (NatHERS) assessors, home sustainability assessors and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Pre-requisite Unit

Nil

Competency Field

Unit Sector

Property services

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify and review plans and drawings.	<p>1.1. Main <i>types of plans and drawings</i> for <i>residential buildings</i> are identified.</p> <p>1.2. Purpose of different types of plans and drawings are identified.</p> <p>1.3. <i>Key features of each type of plan and drawing</i> are identified.</p>
2. Check amendments to plans and drawings.	<p>2.1. Title panel is checked to verify latest amendment to plans and drawings.</p> <p>2.2. Amendments to <i>specifications</i> are checked to ensure currency of information.</p>
3. Identify symbols, terms, abbreviations and shading used in plans and drawings.	<p>3.1. Symbols used in plans and drawings are identified.</p> <p>3.2. Abbreviations used in plans and drawings are identified.</p> <p>3.3. Colouring and shading used in plans and drawings are identified.</p> <p>3.4. Building and construction terms used in plans and drawings are identified.</p>
4. Locate and identify key features on a site plan.	<p>4.1. Site is identified from location drawings.</p> <p>4.2. True north and building orientation are identified from details provided on site plan.</p> <p>4.3. <i>Key features of site plan</i> are identified.</p>
5. Extract data from plans, drawings and specifications.	<p>5.1. Key building features are identified in relevant plans and drawings.</p> <p>5.2. <i>Data on key building features</i> is extracted from relevant plans, drawings and specifications.</p> <p>5.3. Building codes or standards identified in specifications are identified.</p> <p>5.4. Key features of products included in specifications are identified.</p>

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none">maintain current knowledge of types and application of plans, drawings and specifications for residential buildings.
Numeracy skills to:	<ul style="list-style-type: none">convert numerical values and scales shown on plans, drawings and specifications for buildings.
Reading skills to:	<ul style="list-style-type: none">read and interpret information about agency practices, industry conduct standards, and employment conditions.
Writing skills to:	<ul style="list-style-type: none">record information extracted during review.
Technology skills to:	<ul style="list-style-type: none">use computerised databases to locate relevant plans, drawings and specifications for residential buildings.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Types of plans and drawings</i> must include:	<ul style="list-style-type: none">drawings:<ul style="list-style-type: none">detailselevationground planslayout drawingsplans:<ul style="list-style-type: none">heritage and conservation overlayslandscaping and vegetationlocalitylot and common property survey planssitesstrata planssurvey plansservices drawings:<ul style="list-style-type: none">drainage
---	--

- ducts
 - piping
 - vertical section
 - waste disposal
 - wiring
 - sketches.
- Residential buildings** must include:
- any building categorised as Class 1, 2, 4 and 10a of the Building Code of Australia or in accordance with jurisdictional requirements.
- Key features of each type of plan and drawing** must include at least four of the following:
- certification
 - compatibility
 - construction
 - dimensions
 - legend
 - location
 - orientation
 - quantities of materials
 - scale
 - sizes
 - types of products or services.
- Specifications** must include at least two of the following:
- levels and survey information
 - material technical data
 - materials lists
 - performance data
 - schedules of quantities
 - stress, load and bearing calculations.
- Key features of site plan** must include:
- access and egress
 - common property
 - contours and slopes
 - drainage lines
 - easements
 - environmental and heritage overlays
 - existing dwellings, buildings or other structures
 - location and situation
 - major geological and topographical features
 - orientation
 - paving
 - retaining walls
 - scale
 - service connection points
 - set backs

Data on key building features must include:

- stormwater disposal
- trees and other vegetation.
- common property
- dimensions
- location
- materials
- ratings
- standards.

Assessment Requirements for CPPCMN4008 Read plans, drawings and specifications for residential buildings

Modification History

Release 1.

Replaces superseded equivalent CPPCMN4008A Read and extract information from plans, drawings and specifications for residential buildings.

This version first released with CPP Property Services Training Package Version 5.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must read and extract information from different types of plans, building drawings and specifications for four different residential buildings.

The person must also source the plans, building drawings and specifications relating to each of the above buildings, and identify the information needed to respond to three routine workplace requests for information on each building.

In doing the above, the person must:

- identify different types of plans and drawings for residential buildings and their functions
- read and interpret plans, drawings and specifications for each residential building, including identifying key features, levels, contours, sections, service entry points, and site features
- check amendments to plans and drawings for each residential building
- identify symbols, terms and abbreviations used in the plans and drawings.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- building drawings, including:
 - drawing perspectives
 - features
 - scale

- symbols, terms and abbreviations used
- types of building drawings and their respective purposes
- plans relevant to residential buildings:
 - heritage and conservation overlays
 - landscaping and vegetation
 - locality
 - lot and common property survey plan
 - sites
 - strata plan
 - survey plan
- key requirements of federal, state or territory building and construction codes, standards and regulations relating to:
 - residential building materials
 - residential building styles.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - computer system to access online databases of residential building plans and drawings
- specifications:
 - plans, drawings and specifications for different styles of residential buildings
 - relevant codes, standards and regulations relating to the construction of residential buildings.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the *Standards for Registered Training Organisations (RTOs)* current at the time of assessment.

FWPCOT2242 Segregate and sort logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to segregate and sort logs in a commercial forest harvesting environment or a timber processing plant, in line with specified quality characteristics for the best end-usage.

The unit applies to individuals who segregate and sort logs at the roadside, landing area or timber mill. Operators generally work under broad direction and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Core Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to segregate and sort logs	1.1 Review log product specifications for species, product usage and size in reference to the segregation and sorting of logs 1.2 Review the production plan, confirm its targets and assess wood flow requirements to ensure efficient operations and overall productivity 1.3 Confirm, identify and report health, safety, environmental and

Assessment Requirements for FWPCOT2242 Segregate and sort logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- safely and correctly assessed and measured logs for size, species and quality characteristics for specified product usage in line with a production plan
- checked risks associated to the operation and applied standard operating procedures
- used log measuring tools and methods to measure logs and log defects
- applied knowledge of log species, log quality characteristics and defects
- identified and assessed log defects
- assisted positioning and segregation of logs into end-use stacks for ensuring minimal log damage and efficient transportation and identification
- followed log product specifications and production plan requirements for sorting logs.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in log product specifications and a production plan
- health and operational hazards or risks related to log segregation and sorting operations and factors that can change or introduce new hazards
- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for log segregation and sorting operations as outlined in workplace procedures and production plan
- required emergency response procedure, including firefighting resources and emergency response
- industry-accepted warning signs, their correct positioning and procedures to maintain communication and work safety

- industry-accepted environmental control measures, restrictions, legal obligations of current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for log segregation and sorting operations as outlined in workplace procedures and production plan
- log species, quality characteristics and log defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets, values
- maximum log damage or defect allowance and minimum quality allowance particular to a production system
- criteria for recycling and re-using logs with significant defects
- log measuring tools for length and diameter measurements
- methods for calibrating and verifying log measuring tools
- techniques and methods for measuring log diameter and length using standard and digital tools
- causes of manual length and diameter measurement error
- industry-accepted methods for product identification.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - logs for segregation and sorting
 - standard and digital log measuring tools
 - personal protective equipment
- specifications:
 - access to workplace policies and procedure which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedure which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan, site operational plan and log product specifications
 - access to site emergency procedure
 - access to workplace standard operating procedure for log segregation and sorting.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to navigate in untracked, remote areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids.

The unit applies to a Forestry Worker, Plantation Worker, Forest Harvester, Harvesting Technical Forestry Technician, Tree Planter, Mobile Equipment Operator and Arboriculture Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>

1. Prepare for navigation	<p>1.1 Identify and gather information and relevant factors and check with appropriate personnel.</p> <p>1.2 Select suitable maps, equipment and navigation aids and check for accuracy, currency and operational effectiveness.</p> <p>1.3 Detect and correct faults or errors in maps and equipment.</p> <p>1.4 Establish communication with others in line with WHS and organisational requirements</p>
2. Plan the route	<p>2.1 Plan route in line with work instructions and WHS requirements.</p> <p>2.2 Examine maps to identify relevant symbols, information, navigation data and environmental requirements.</p> <p>2.3 Calculate accurate grid and magnetic bearings using maps and equipment in line with assignment instructions.</p> <p>2.4 Plan emergency exit routes and contingencies to combat other risks.</p>
3. Conduct navigation	<p>3.1 Undertake navigation in line with planned route and schedule.</p> <p>3.2 Orientate maps are correctly to surroundings in line with planned route.</p> <p>3.3 Use equipment and navigation aids in line with manufacturer recommendations.</p> <p>3.4 Navigate alternative routes to bypass obstacles and improve efficiency of course.</p> <p>3.5 Minimise impact on the environment as a result of navigation.</p> <p>3.6 Record and report navigation activities.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> • interpret scales, symbols, grid references, distance and data included on maps and navigation equipment • estimate travel time and distances • locate own position on a map.
Planning and organising skills to:	<ul style="list-style-type: none"> • estimate resource and equipment requirements • effectively bypass obstacles.
Problem solving skills to:	<ul style="list-style-type: none"> • identify and solve problems with equipment and navigation route.

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures for navigating in a remote or trackless area
- select, interpret, and use maps and other written and diagrammatic information for navigation
- use maps, compass and navigation aids to plan routes and navigate in remote or trackless area which must be either:
 - standard magnetic compass using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
 - global positioning system (GPS)
 - cadastral maps (maps that show the boundaries and ownership of land parcels)
 - topographic maps
 - general maps
- plan and conduct an efficient navigation, effectively bypassing obstacles within designated timeframes
- maintain navigation tools and equipment
- establish and maintain effective communication with appropriate personnel as required
- record navigation activities.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for navigating in a remote or trackless area

- environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition on completion of activity
- organisational and site standards, requirements, policies and procedures for navigating in remote or trackless areas
- factors that may affect navigation, including:
 - types of terrain and gradient
 - weather conditions
 - obstacles
 - distance
 - estimated travelling time
 - availability of resources, including water, rest stops, camp sites
 - access and exit routes
- use and features of various maps, images and charts including:
 - cadastral and topographic maps
 - charts
 - guide books
 - photographs and other digital imagery
 - sketches
 - diagrams
- representation of topographic features on maps and plans, including:
 - grid lines and numbers
 - contour lines
 - magnetic variation
 - scale
 - map legend
 - local features
 - markers and beacons
 - water depth
- common scales and reference information used on maps and plans
- features and uses of environmental navigation aids:
 - survey markers
 - track markers and beacons
 - signs
 - arrows
 - natural landmarks and reference points
- purpose, features and operation of navigation equipment, and procedures for their safe use and maintenance, including
 - global positioning system (GPS) device
 - magnetic compass, including adjustment for local magnetic variation
 - locator beacons

- personal protective equipment and clothing
- techniques for estimating distance travelled within a particular activity context
- established communication modes, methods and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- site to navigate
- navigation equipment
- work order, workplace requirements and site standards for navigating in remote or trackless areas.
- communication devices.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3219 Produce standard truss or frame plans and details using computers

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to use computerised systems to produce standard truss or frame plans, including layout production, fabrication and installation instructions. Work is completed in a forest products factory setting.

The unit applies to Customer Service/Sales Assistant (retail or wholesale), Customer Service officer, Sales and Merchandising Team leader, Timber Advisor.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common technical

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Select software	1.1 Identify and interpret work order, review and evaluate

	<p>software options.</p> <p>1.2 Select appropriate software program to meet production outcomes.</p>
2. Interpret plans and loading conditions	<p>2.1 Interpret and assess plans, drawing views and notes; identify loading information and design requirements and restrictions.</p> <p>2.2 Obtain additional information and data from appropriate personnel and other sources.</p> <p>2.3 Create functional and pictorial image of structures, trusses and or frames based on design requirements.</p> <p>2.4 Refer design requirements outside software limitations to appropriate personnel for resolution.</p>
3. Test and select design options	<p>3.1 Transfer fixed design details to layout data in line with software requirements.</p> <p>3.2 Specify frame or truss types and select timber type and species in line with material suitability and availability.</p> <p>3.3 Set common industry spacing of frames, trusses and components to defined design structure in line with industry standards.</p> <p>3.4 Fix component sizes to clarify and confirm design options.</p> <p>3.5 Select layouts, spacing and sizing of individual structural members progressively in line with software requirements.</p> <p>3.6 Select, review and revise design details in line with work order.</p>
4. Produce layouts and cutting requirements	<p>4.1 Review design records for integrity, completeness and consistency in line with certifying authority standards.</p> <p>4.2 Produce structural layout drawings and truss or frame assembly drawings using appropriate software.</p> <p>4.3 Produce component cutting detail in line with production requirements and schedules.</p> <p>4.4 Prepare and document production and installation advice in line with organisational procedures and industry standards.</p> <p>4.5 Complete and maintain design records and documentation in line with organisational procedures.</p>

5. Provide advice on design and production issues	<p>5.1 Answer questions about designs and assembly requirements clearly and comprehensively.</p> <p>5.2 Use effective communication techniques to assist and develop production personnel.</p> <p>5.3 Provide alternative materials or sizes for components within design scope and production requirements.</p> <p>5.4 Discuss common site problems and examine and adopt prevention strategies to ensure future practice meets design requirements.</p>
---	---

Foundation Skills

<i>This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.</i>	
Numeracy skills to:	<ul style="list-style-type: none"> interpret numerical data from designs involving height, length, angles, shape, and load input complex numerical data into software systems for layout, spacing and dimensions of structural members.
Oral communication skills to:	<ul style="list-style-type: none"> ask detailed open and closed probe questions and actively listen to clarify contents of designs, plans, drawings and notes provide clear unambiguous information about designs and assembly requirements negotiate solutions to site installation problems.
Reading skills to:	<ul style="list-style-type: none"> interpret detailed and unfamiliar designs and technical notes.
Writing skills to:	<ul style="list-style-type: none"> input clear written text into software systems produce clear and detailed documents to support interpretation of drawings and assist with production and installation.
Planning and organising skills to:	<ul style="list-style-type: none"> plan and organise own work in logical sequence and manage own timing and productivity to complete plans, drawings and documents within deadlines.

Assessment Requirements for FWPCOT3219 Produce standard truss or frame plans and details using computers

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare and document computerised plans and details for manufactured timber products in line with an individual design and set of drawing views and notes
- produce computerised drawings, layouts and cutting requirements
- apply mathematical procedures
- develop and select framing layout options and detail framing design
- prepare a package of production and installation advice documents to support interpretation of plans and drawings.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable building and structural regulations for standard timber wall frames, roof and floor trusses
- common industry terminology for all components of standard timber wall frames, roof and floor trusses
- common industry standard layouts, spacing and sizing dimensions of individual members for standard timber wall frames, roof and floor trusses
- relationship between component loads and supports and spans
- timber species and types that are suitable for the manufacture of standard timber wall frames, roof and floor trusses
- industry software:

- functions and capabilities
- drawing types that can be produced
- design limitations
- methods to input and amend design factors and other data
- methods used to produce structural layout drawings, assembly drawings and component cutting detail
- methods for storing and retrieving drawings and other data
- industry and specific organisational:
 - processes for producing computerised plans and details for standard timber wall frames, roof and floor trusses
 - formats for and inclusions of documents providing production and installation advice
- organisational procedures for preparing and documenting computerised plans and details for standard timber wall frames, roof and floor trusses.

Assessment Conditions

The following resources must be made available:

- computers, keyboards and industry current software programs used to produce plans and details for standard timber wall frames, roof and floor trusses
- designs, plans, drawing views and notes for standard timber wall frames, roof and floor trusses on which to base plan and details
- template documents for developing production and installation advice
- organisational procedures for preparing and documenting computerised plans and details for standard timber wall frames, roof and floor trusses.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3270 Grade and mark logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0

Application

This unit of competency describes the skills and knowledge required to visually assess and measure logs in a commercial forest harvesting environment, to determine the best end-use of individual logs and mark products for identification.

The unit applies to individuals who grade and mark logs at roadside, landing area or timber mill. Operators generally work under broad direction and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Core Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to grade and mark logs	1.1 Review log product specifications for species, product usage and size in reference to the grading and marking of logs 1.2 Review production plan, confirm its targets and assess wood flow requirements to ensure efficient operations and overall productivity 1.3 Confirm, identify and report health, safety, environmental and heritage risks of operation in line with standard operating procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>and site safety and environmental management plan</p> <p>1.4 Apply risk control measures in line with standard operating procedures, site operational plan, legislative requirements and industry standards to eliminate or minimise risks</p> <p>1.5 Identify emergency plan procedures to follow in the event of an emergency</p> <p>1.6 Select appropriate log size measuring tools and calibration methods</p> <p>1.7 Calibrate log measuring tools to ensure accuracy of length and diameter measurements</p>
2. Grade and mark logs	<p>2.1 Visually assess logs for species and quality characteristics to determine their best end-use in line with product specifications</p> <p>2.2 Measure logs and defects for size</p> <p>2.3 Grade logs and determine logs which are to be recovered</p> <p>2.4 Mark graded logs for product identification in line with industry standards</p> <p>2.5 Direct mechanical equipment to conduct log segregation and stacking into product groups</p> <p>2.6 Tag stacks for identification in line with industry standards and production plan requirements for an optimum transport and logistics cycle time</p>
3. Verify grading and marking logs	<p>3.1 Conduct size accuracy checks by using standard or digital measuring tools to verify that graded logs meet length and diameter specifications and remediate errors</p> <p>3.2 Verify that marking and tagging has been conducted correctly and display required information</p> <p>3.2 Mark and report logs that cannot be clearly or safely evaluated for size or quality characteristics</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> read and understand production, safety and environmental management plans, product specifications and industry standards for grading logs
Writing	<ul style="list-style-type: none"> record information about logs
Oral Communication	<ul style="list-style-type: none"> interact verbally with machine operators on site to create log stacks use appropriate vocabulary including technical language directly relevant to role
Numeracy	<ul style="list-style-type: none"> count logs and measure log diameter and length
Navigate the world of work	<ul style="list-style-type: none"> understand main tasks, responsibilities and boundaries of own role calibrate and use log measuring tools according to workplace procedures
Interact with others	<ul style="list-style-type: none"> report log grading and safety information to relevant personnel participate in conversations relevant to role by responding and explaining as required

Assessment Requirements for FWPCOT3270 Grade and mark logs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- safely and correctly assessed, measured, graded and marked logs for segregation into product groups in line with specified product best-usage and production plan
- checked risk associated to the operation and applied standard operating procedures
- used log measuring tools and methods to measure logs and log defects
- applied knowledge of log species, log quality characteristics and defects to grade logs
- identified and assessed log defects
- followed log product specifications and production plan requirements for grading and marking logs.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in log product specifications and a production plan
- health and operational hazards or risks related to log grading and marking operations and factors that can change or introduce new hazards
- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for log grading and marking operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning and procedures to maintain communication and work safety
- required emergency response procedure, including firefighting resources and emergency response

- industry-accepted environmental control measures, restrictions, legal obligations of the current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for log grading and marking operations as outlined in workplace procedures and production plan
- log species, quality characteristics and defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets and values
- maximum log damage or defect allowance and minimum quality allowance particular to a production system
- criteria for recycling and re-using logs with significant defects
- log measuring tools for length and diameter measurements
- methods for calibrating and verifying log measuring tools
- techniques and methods for measuring log diameter, length and defects using standard and digital tools
- causes of manual length and diameter measurement error
- industry-accepted methods for product identification.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - logs for grading and marking
 - standard and digital log measuring tools
 - personal protective equipment required for grading and marking logs
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedure which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to site operational plan, production plan and log product specifications
 - access to site emergency procedure
 - access to workplace standard operating procedure for log segregation and sorting.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT4201 Produce complex truss and frame plans and details using computers

Modification History

Release	Comment
1	Replaces superseded equivalent FPICOT4201B Produce complex truss and frame plans and details using computers, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to use computerised systems to produce complex truss or frame plans, including layout production, fabrication and installation instructions. Work is completed in a forest and wood products office setting.

The unit applies to a designer or developer of truss and frame plans.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>

ELEMENTS	PERFORMANCE CRITERIA
1. Interpret plans and loading conditions	<p>1.1 Interpret and assess plans, drawing views and notes; identify loading information, design requirements and restrictions.</p> <p>1.2 Obtain additional information and data from appropriate personnel or sources.</p> <p>1.3 Create functional and pictorial image of structure, trusses or frames based on design requirements.</p> <p>1.4 Refer design requirements outside software limitations to appropriate personnel for resolution.</p>
2. Test and select design options	<p>2.1 Transfer fixed design details to layout data in line with software requirements.</p> <p>2.2 Specify frame or truss design types, and select timber type and species in line with material suitability and availability.</p> <p>2.3 Set common industry spacing of frames, trusses and their components to defined design structure in line with industry standards.</p> <p>2.4 Fix component sizes to clarify and firm design options.</p> <p>2.5 Select layouts, spacing and sizing of individual structural members progressively in line with software requirements.</p> <p>2.6 Select, review and revise design details in line with work order.</p>
3. Produce layouts and cutting requirements	<p>3.1 Review design records for design integrity, completeness and consistency in line with certifying authority standards.</p> <p>3.2 Produce structure layout drawings and truss or frame assembly drawings using appropriate software.</p> <p>3.3 Produce component cutting detail in line with production requirements and schedules.</p> <p>3.4 Prepare and document production and installation advice in line with organisational procedures and industry standards.</p> <p>3.5 Complete and maintain design records and documentation in line with organisational procedures.</p>
4. Provide advice on design and production issues	<p>4.1 Answer questions about designs and assembly requirements clearly and comprehensively.</p> <p>4.2 Use effective communication techniques to assist and develop production personnel.</p> <p>4.3 Provide alternative materials and sizes for components within design scope and production requirements.</p> <p>4.4 Discuss common site problems and select appropriate prevention</p>

ELEMENTS	PERFORMANCE CRITERIA
	strategies to ensure future practice meets design requirements.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> interpret numerical data from designs involving height, length, angles, shape, and load input complex numerical data into software systems for layout, spacing and dimensions of structural members.
Oral communication skills to:	<ul style="list-style-type: none"> ask detailed open and closed probe questions and actively listen to clarify contents of designs, plans, drawings and notes provide clear unambiguous information about designs and assembly requirements negotiate solutions to site installation problems.
Reading skills to:	<ul style="list-style-type: none"> interpret detailed and unfamiliar designs and technical notes.
Writing skills to:	<ul style="list-style-type: none"> input clear written text into software systems produce clear and detailed documents to support interpretation of drawings and assist with production and installation.
Planning and organising skills to:	<ul style="list-style-type: none"> plan and organise own work in logical sequence and manage own timing and productivity to complete plans, drawings and documents within deadlines.

Assessment Requirements for FWPCOT4201 Produce complex truss and frame plans and details using computers

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT4201B Produce complex truss and frame plans and details using computers, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- prepare and document computerised plans and details of manufactured timber products in line with an individual design and set of drawing views and notes using appropriate software, systems and techniques
- produce component cutting details
- prepare a package of production and installation advice documents to support interpretation of plans and drawings.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- computer software and hardware used to produce complex truss and frame plans and details including:
 - system functions and capabilities
 - available drawings
 - design limitations
 - methods to input and amend design factors and other data

- methods used to produce structural layout drawings, assembly drawings and component cutting detail
- methods to store and retrieve drawings and other data
- building and structural regulations for complex timber wall frames, roof and floor trusses
- common industry terminology for all components of complex timber wall frames, roof and floor trusses
- common industry standard layouts, spacing and sizing dimensions of individual members for complex timber wall frames, roof and floor trusses
- relationship between component loads and supports and spans, including
 - details defining mass loads and externally applied loads (wind, surrounding structures, common or special building usage)
 - dimensions defining geometry and loading of individual structural members
- timber species and types that are suitable for the manufacture of complex timber wall frames, roof and floor trusses
- industry and specific organisational:
- processes for producing computerised plans and details for complex timber wall frames, roof and floor trusses
- formats for and inclusions of documents providing production and installation advice.

Assessment Conditions

The following resources must be made available:

- computers, keyboards and industry current software programs used to produce plans and details for complex trusses and frames
- designs, plans, drawing views and notes for complex timber wall frames, roof and floor trusses on which to base plan and details
- template documents for developing production and installation advice
- organisational procedures for preparing and documenting computerised plans and details for complex timber wall frames, roof and floor trusses.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT6210 Develop engineered wood products to meet energy efficient building design needs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to research and develop engineered wood products to meet the requirements of energy efficient design for residential buildings. It requires high-level understanding of residential building design, building codes and engineered timber design and practice.

The unit applies to individuals who work as designers (manufacturing and engineered wood products) and senior managers in a timber and wood products production environment. They generally demonstrate autonomy, judgement and defined responsibility in known or changing contexts and within broad but established parameters.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Explore commercial opportunities for engineered wood products	1.1 Review National Construction Code guidelines and standards relating to climate zones and energy efficiency measures 1.2 Research and evaluate existing information to inform new product development 1.3 Identify gaps in the current range of engineered wood products for new products or concepts 1.4 Complete a market analysis using appropriate information sources to determine design and production requirements 1.5 Develop preliminary product concept according to research findings 1.6 Consult relevant stakeholders on broad parameters for developing a product that meets the market need
2. Formulate design concept for products	2.1 Generate ideas for product style to complement design concepts and production requirements 2.2 Use appropriate documentation methods to produce preliminary representation or prototyping of product 2.3 Consult with stakeholders to review and critique design concepts according to production requirements 2.4 Review design concepts to ensure energy efficiency is proven to allow project progression 2.5 Develop a business case for realising design including a full cost-benefit analysis 2.6 Obtain required approvals to progress product development according to production requirements
3. Develop the product to an operational level	3.1 Develop and test product according to design concepts 3.2 Align product energy efficiency requirements to market analysis 3.3 Implement certification and compliance processes for engineered product and production system 3.4 Develop detailed implementation specifications and present to relevant stakeholders for approval and funding 3.5 Select and organise production resources according to design specifications 3.6 Design quality assurance system according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Develop and document safe operating procedures for production processes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret complex and sometimes unfamiliar information in building codes, guidelines and standards
Oral communication	<ul style="list-style-type: none"> Hold high-level consultative discussions to present abstract ideas and generate feedback and ideas on design concepts Influence and negotiate desired outcomes with stakeholders
Numeracy	<ul style="list-style-type: none"> Interpret complex energy efficiency ratings in codes, and complete complex calculations for designs Complete complex calculations for cost-benefit analysis
Navigate the world of work	<ul style="list-style-type: none"> Work independently and collectively within broad parameters, with a strong sense of responsibility and ownership of goals, plans, decisions and outcomes
Interact with others	<ul style="list-style-type: none"> Identify the perspectives of others as part of work role
Get the work done	<ul style="list-style-type: none"> Use analytical processes, establishing criteria for deciding between options and seeking input and advice from others before taking action when necessary

Assessment Requirements for FWPCOT6210 Develop engineered wood products to meet energy efficient building design needs

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that the individual has:

- developed two designs for one or more of the following types of engineered wood products, from initial concepts through to operational level, to meet the requirements of energy efficiency performance for residential buildings:
 - laminated beams
 - laminated veneer lumber
 - plywood
 - chipboard
 - hardboard
 - medium density fibreboard
 - oriented strand board
 - laminated or engineered flooring
 - glued laminated timber (glulam)
 - cross-laminated timber (CLT).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and key content of the following codes and standards:
 - National Construction Code guidelines and standards for climate zones and energy efficiency measures
 - AS/NZ Standards associated with engineered wood products and associated design and construction
 - forest certification and Chain of Custody standards
- key components of market analysis, including:

- need
- placement
- financial certainty
- volume
- market issues relevant to engineered wood products and climate zones and applications
- theory underpinning development of R-values
- timber engineering design principles for energy efficient residential constructions
- characteristics of a range of timber species and associated wood-based products, their durability and serviceability
- key features of product development stages relevant to engineered wood products, including:
 - prototyping
 - testing
 - acquiring and commencing certification
 - gaining approval for infrastructure development
 - establishing production methods and procedures
- project management processes and tools for developing engineered wood products, including:
 - quality management systems
 - risk assessment systems
 - cost-benefit analysis tools
 - safe operating procedures for production processes
- purpose, format and common contents of business cases for realising designs, including:
 - capital cost
 - material
 - labour
 - design expenses
 - overheads
 - margin
 - running cost
 - lifecycle analysis
 - market uptake
 - discount and internal rate of return on investment
 - other opportunity cost analysis
- system functions and capabilities of house energy rating software and associated protocols for use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in an environment that accurately reflects workplace conditions
- resources, equipment and materials:
 - computers, keyboards, printers and software used to document business case, design specifications and safe operating procedures
- specifications:
 - documents and proformas commonly used for developing business cases and operating procedures for production processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR3223 Use on-board computer systems for single grip harvester

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to use on-board computer technology and software for single grip harvesters, to achieve maximum value recovery in a commercial forest harvesting environment.

The unit applies to individuals who work as harvester operators. Operators generally work under broad direction to complete routine activities related to harvesting operations and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting (HAR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Start up and shut down the on-board computer	<p>1.1 Start up the on-board computer and respond to display prompts by pressing the appropriate buttons</p> <p>1.2 Edit settings in the setting mode to update information about site identifier (ID) fields, operator and the start and end of a shift</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Use mouse buttons and keyboard to shut down the measurement system and computer</p> <p>1.4 Identify on window screen that Global Positioning System (GPS) is active, to ensure it runs correctly during the operation, and report faults to appropriate personnel in line with workplace procedures</p>
2. Reload or create a felling site file	<p>2.1 Find existing felling site file by using the software menu and sub-menus to reload and activate cutting instruction files</p> <p>2.2 Create a new felling site file when moving machine to a new site by loading a new cutting instruction file from a data storage device or computer hard drive and following display prompts to add site information and turn on settings for quality grade buttons</p> <p>2.3 Assign quality grade to buttons on the joystick keypad</p> <p>2.4 Open and edit cutting instruction file to adjust parameters on length and diameter, when instructed to by the forest management company</p> <p>2.5 Review cutting instruction file and settings and report any identified error</p>
3. Process trees using on-board computer system	<p>3.1 Check that correct cutting instruction file is uploaded at the start of harvesting at an existing or a new felling site</p> <p>3.2 Use appropriate methods to reset the harvesting head length counter to prevent loss of log volume or value</p> <p>3.3 Upload, edit and save harvester settings and parameters for feeding and sawing by using the software's menus, files and fields</p> <p>3.4 Select and use harvester controls and quality buttons and apply knowledge of species and quality characteristics, to process trees into the highest value combination, in line with the log cutting instructions</p> <p>3.5 Override on-board computer settings, as necessary, to produce length results based on actual stem quality and potential or actual damage</p> <p>3.6 Use on-board computer settings to adjust and monitor grapple or delimb arm pressures</p> <p>3.7 Adjust the settings of diameter potentiometer or encoder, by using the software's diagnostic menu</p> <p>3.8 Conduct accurate calibrations of harvesting heads as required by the forest management company to ensure that processed logs are</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	within permissible error limits
4. Conduct quality control audits	<p>4.1 Conduct technical inspections on harvesting heads to check for wear and faults of measuring mechanisms and take corrective measures</p> <p>4.2 Conduct length and diameter accuracy checks in line with the frequency outlined in manufacturers' manual or prescribed by the forest management company and by using standard or electronic equipment to verify processed logs against cutting instructions and remediate errors</p>
5. Store, access and retrieve production and calibration data	<p>5.1 Save production and calibration files on a data storage device by using the software menu, sub-menus and display prompts</p> <p>5.2 Transfer files between computers or via mobile devices and applications in line with workplace procedures and within required timeframes</p> <p>5.3 Discuss and resolve data and file matters with appropriate personnel in line with workplace procedures</p> <p>5.4 Identify and report faults and errors related to the on-board computer system in line with workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> read user manual for machine's on-board computer system
Writing	<ul style="list-style-type: none"> record log length and diameter measurements
Oral Communication	<ul style="list-style-type: none"> interact verbally and non-verbally with technical personnel using communication means to remediate errors or resolve matters about electronic files and data use appropriate vocabulary including technical language directly relevant to role
Numeracy	<ul style="list-style-type: none"> interpret file variables including length, diameter and product

Skill	Description
	quality <ul style="list-style-type: none"> • apply methods to measure log length and diameters • interpret instruments and data recording equipment
Navigate the world of work	<ul style="list-style-type: none"> • understand main tasks, responsibilities and boundaries of own role
Interact with others	<ul style="list-style-type: none"> • communicate and report operational task and safety information to relevant personnel • participate in conversations relevant to role by responding and explaining as required
Get the work done	<ul style="list-style-type: none"> • recognise and respond to routine problems • plan and organise own work activities and resources

Assessment Requirements for FWP HAR3223 Use on-board computer systems for single grip harvester

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- used on-board computer system to process and mark logs safely and effectively in line with the log cutting instructions
- reloaded and/or created a felling site file in the cutting instruction file
- assigned log grades to buttons on the joystick keypad
- reset the harvesting head length counter
- uploaded, edited and saved harvester settings and parameters for feeding and sawing
- adjusted settings and monitored grapple or delimb arm pressures
- edited the diameter potentiometer' settings
- applied knowledge of species and quality characteristics to process trees and overridden the on-board computer settings to process trees into the highest value combination
- conducted accurate calibrations of harvesting heads
- conducted length and diameter accuracy checks of processed logs against cutting instructions
- saved production files on a data storage device and transferred files either manually or via mobile devices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- methods to correctly turn on/off the on-board computer system
- using the on-board computer keyboard and mouse or touchscreen
- navigating on-board computer menus, sub-menus and fields using cutting instructions, calibration and production files
- loading new cutting instruction files and reloading inactive files
- fields and data inputs required to start a processing operation
- editing cutting instruction file and restrictions

- saving production, control measurement and calibration files and transferring files using a data storage system or via mobile app
- fields and information contained in the cutting instruction file including matrix displays, maximum damage and minimum quality allowances for log grades and bark function
- values in the price matrix and how they affect the performance of the cutting instruction file
- computer methods to adjust feed performance, feed ramping, grapple or delimb arm pressures and diameter potentiometer
- harvesting head settings
- settings to program quality grade buttons on the joystick keypad
- using harvester's controls and quality buttons correctly
- methods to override the computer and limitations or restrictions as prescribed by forest management company to prevent issues with the software and the machine
- length and diameter measuring system fitted on harvesting heads
- on-board computer methods to calculate a diameter at a given distance along the stem
- methods for calibrating the measuring system of harvesting head for length and diameter
- signs of wear and faults to harvester head mechanisms
- effects of worn mechanical linkages on the length and diameter measuring mechanisms
- methods to conduct and record length and diameter accuracy checks and frequency of measurements
- methods for calibrating and verifying measuring tools for length and diameter including tapes and callipers
- causes of manual and mechanical length and diameter measurement error
- methods to reset the harvesting head's length counter
- methods to identify faults related to the on-board computer system and GPS.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a logging site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - single grip harvester equipped with on-board computer system and GPS
 - standard and digital measuring tools for calibration
 - data storage system or mobile system/app for the purpose of saving and transferring production files
 - personal protective equipment required in harvesting operations
- specifications:
 - access to user manual for on-board computer system
 - access to sample cutting instruction, calibration and production files

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR3224 Operate crawler tractor

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to operate a crawler tractor for log production and use optimised production processes in a commercial forest harvesting environment. The main job functions are to move stems and/or logs from felling site to roadside or landing area. Other functions include product segregation, stacking, and removal of slash. Activities are to be conducted safely and effectively.

The unit applies to individuals who work as crawler tractor operators in small or larger harvesting crews. Operators generally work under broad direction to complete routine activities related to crawler tractor operations and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWP HAR3224 Operate crawler tractor

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 4.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned, prepared and safely and effectively operated a crawler tractor to move products and/or slash in line with a production plan
- checked risks associated with the operation and applied standard operating procedures
- followed production plan requirements and site safety and environmental management plan
- determined suitability and stability of crawler tractor for operation and safe working load limits by considering machine and equipment specifications, terrain characteristics and type and size of stems and/or logs to be moved
- adjusted machine driving and positioning technique in response to terrain conditions
- applied machine manipulation techniques to move products and/or slash and minimise damage to products, machine and surrounding environment in line with the production plan requirements
- placed and stacked products for efficient extraction in line with the production plan requirements
- communicated effectively with others in the work area
- shut down, de-energised and isolated machine in line with workplace procedures and operator's manual
- carried out routine maintenance on crawler tractor parts.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in a production plan and site safety and environmental management plans

- hazardous or safe working zones in forest harvesting operations
- health and operational hazards or risks related to crawler tractor operations and factors that can change or introduce new hazards
- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations, and requirements of industry standards and/or codes of practice for crawler tractor operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning, vehicle-to-vehicle communication systems and procedures to maintain communication and work safety during crawler tractor operations
- required emergency response procedure including firefighting resources and emergency response
- potential impacts of crawler tractor operations on onsite and offsite environmental values including cultural heritage, flora, fauna, ground compaction, water contamination and soil erosion
- industry-accepted environmental control measures, environmental restrictions, legal obligations of the current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for crawler tractor operations as outlined in workplace procedures and production plan
- landings usage
- typical location of loading and/or landing site
- tree felling patterns
- extraction methods
- wood flow requirements and extraction and production bottlenecks particular to a production system
- techniques particular to a production system to avoid mechanical damage to stems and logs during moving and stacking; position and stack logs for efficient extraction
- effects of weather on ground conditions
- effects of slope and terrain conditions on crawler tractor stability and operation
- machine specifications, restrictions, applications and safe operating procedures, including stability and operation in different terrain conditions, slopes and road types and methods to shut down, de-energise and isolate the machine as outlined in workplace procedures or operator's manual
- using machine cabin controls
- techniques for safe and efficient driving of crawler tractor
- methods to conduct machine pre-operational checks and detect faults as outlined in workplace procedures or operator's manual
- location of machine's major mechanical systems and parts of the machine in which energy is stored as outlined in operator manuals for safe and efficient conduct of the machine operator maintenance tasks
- machine maintenance and servicing requirements as outlined in user and operator manuals
- industry-accepted reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, machine maintenance and block completion.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crawler tractor
 - suitable stems/logs and/or slash to be moved
 - personal protective equipment required in harvesting operations
 - vehicle-to-vehicle communication system
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedures which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan and site safety and environmental management plans
 - access to site emergency procedure
 - access to workplace standard operating procedures for single grip harvester or operator's manual
 - access to user manual for vehicle-to-vehicle communication system

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR3225 Operate excavator with log grapple

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to operate an excavator with log grapple for log production and use optimised production processes in a commercial forest harvesting environment. The main job functions are to load logs on trucks and/or sort log stacks at roadside or landing area for transportation. Other functions include slash removal. Activities are to be conducted safely and efficiently.

The unit applies to individuals who work as excavator with log grapple operators in small or larger harvesting crews. Operators generally work under broad direction to complete routine activities related to crawler tractor operations and take responsibility for their work.

This unit does not apply to excavator operations that undertake dogging, rigging and/or scaffolding work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWP HAR3225 Operate excavator with log grapple

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned, prepared and safely and effectively operated an excavator with log grapple, to load logs/slash on trucks and/or sort and stack logs in line with a production plan
- checked risks associated with the operation and applied standard operating procedure
- followed production plan requirements and site safety and environmental management plan
- determined suitability and stability of the machine for operation by considering machine specifications, terrain characteristics and type and size of logs to be grappled
- adjusted machine positioning technique in response to terrain conditions
- demonstrated knowledge of log species, quality characteristics and defects in line with the production plan requirements
- applied machine techniques to drive, grapple, load and/or stack logs or slash and minimise damage to products, machine and surrounding environment in line with the production plan requirements
- placed, stacked and presented products for efficient transportation and identification in line with the production plan requirements
- communicated effectively with others in the work area
- shut down, de-energised and isolated machine in line with workplace procedures and operator's manual
- carried out routine maintenance on the machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in a production plan and site safety and environmental management plans
- hazardous or safe working zones in forest harvesting operations

- health and operational hazards or risks related to excavator with log grapple and factors that can change or introduce new hazards
- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for excavator with log grapple operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning, vehicle-to-vehicle communication systems and procedures to maintain communication and work safety during operations
- required emergency response procedure, including firefighting resources and emergency response
- potential impact of excavator with log grapple operations on onsite and offsite environmental values including cultural heritage, flora, fauna, ground compaction, water contamination and soil erosion
- industry-accepted environmental control measures, restrictions, legal obligations of the current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for excavator with log grapple operations as outlined in workplace procedures and production plan
- landings usage
- wood flow requirements and extraction and production bottlenecks particular to a production system
- log species, quality characteristics and defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets, and values
- maximum log damage or defect and minimum quality allowances particular to a production system
- techniques particular to a production system to avoid mechanical damage to logs during grappling, loading and stacking; separate and present logs for efficient transportation and identification of the product
- effects of weather on ground conditions
- effects of terrain conditions on machine stability and operation
- machine specifications, restrictions and safe operating procedures, including stability and operation in different terrain conditions, slopes and road types and methods to shut down, de-energise and isolate the machine as outlined in workplace procedures or operator's manual
- using machine cabin controls
- techniques for safe and efficient driving of the machine during operation
- methods to conduct machine pre-operational checks and detect faults as outlined in workplace procedures or operator's manual
- location of machine's major mechanical systems and parts of the machine in which energy is stored as outlined in operator manuals for safe and efficient conduct of the machine operator maintenance tasks
- machine maintenance and servicing requirements, as outlined in workplace procedures or operator's manual

- industry-accepted reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, machine maintenance and block completion.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - excavator with log grapple
 - logs/slash for loading and/or segregation and stacking
 - personal protective equipment required in harvesting operations
 - vehicle-to-vehicle communication system
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedures which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan, site operational plan and safety and environmental management plans
 - access to site emergency procedure
 - access to workplace standard operating procedures for excavator with log grapple or operator's manual
 - access to user manual for vehicle-to-vehicle communication unit

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR3226 Operate feller buncher

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to operate a feller buncher for log production and use optimised production processes in a commercial forest harvesting environment. The main job functions are to fell trees and pre-bunch stems for further processing. Activities are to be conducted safely and to ensure optimal harvesting production.

The unit applies to individuals who work as feller buncher operators in small or larger harvesting crews. Operators generally work under broad direction to complete routine activities related to harvesting operations and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned, prepared and safely and effectively operated a feller buncher to fell trees and pre-bunch stems in line with cutting instructions and/or the production plan and optimum value recovery requirements
- checked risks associated with the operation and applied standard operating procedures
- followed production plan requirements, cutting instructions and site safety and environmental management plan
- planned cutting sequence
- adjusted machine driving and positioning technique in response to tree characteristics and terrain conditions
- applied felling techniques to minimise damage to the stem, standing trees, machine and environment in line with the production plan requirements
- adjusted operating techniques in response to unexpected characteristics, movement or condition of tree
- applied knowledge of tree species, quality characteristics and defects during operation in line with the production plan requirements
- positioned, stacked and presented stems for efficient transportation and identification in line with the production plan requirements
- communicated effectively with others in the work area
- shut down, de-energised and isolated machine in line with workplace procedures and operator's manual
- carried out routine maintenance on feller buncher.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in a production plan, cutting instructions and site safety and environmental management plans
- hazardous or safe working zones in forest harvesting operations
- health and operational hazards or risks related to feller buncher operations and factors that can change or introduce new hazards or risks, including characteristics of difficult trees and risks associated with falling them safely
- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for feller buncher operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning, vehicle-to-vehicle communication systems and procedures to maintain communication and work safety during feller buncher operations
- required emergency response procedure including firefighting resources and emergency response
- potential impacts of feller buncher operations on onsite and offsite environmental values, including cultural heritage, flora, fauna, ground compaction, water contamination and soil erosion
- industry-accepted environmental control measures, environmental restrictions, legal obligations of current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for feller buncher operations as outlined in workplace procedures and production plan
- typical location of loading and/or landing site
- extraction methods
- wood flow requirements and extraction and production bottlenecks particular to a production system
- tree species, quality characteristics, shape and defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets and values
- maximum stump height requirements and methods to achieve maximum stump height in response to unexpected characteristics or condition of the trees and ground level
- maximum stem damage and defect allowance and minimum quality allowance particular to a production system
- techniques particular to a production system to avoid mechanical damage to, or breakage of, stems and standing trees during operation; avoid incorrect or excessive log butting; stack, separate and present logs for efficient transportation and identification of the product
- effects of weather on ground conditions
- effects of slope and terrain conditions on feller buncher stability and operation
- machine specifications, restrictions and safe operating procedures, including stability and operation in different terrain conditions, slopes and road types, chain shot rules, methods to shut down, de-energise and isolate the machine and optimal direction of travel as outlined in workplace procedures or operator's manual
- using machine cabin controls

- techniques for safe and efficient driving of feller buncher
- location of machine's major mechanical systems and parts of the machine in which energy is stored as outlined in operator manuals for safe and efficient conduct of the machine operator maintenance tasks
- method to conduct machine and cutting head attachment pre-operational checks and inspections to detect faults as outlined in workplace procedures or operator's manual
- machine maintenance and servicing requirements as outlined workplace procedures or operator's manual
- industry-accepted reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, machine maintenance and block completion.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - feller buncher
 - suitable trees to fell
 - personal protective equipment required in harvesting operations
 - vehicle-to-vehicle communication system
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupational Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedures which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan, cutting instructions and safety and environmental management plans
 - access to site emergency procedure
 - access to workplace safety procedures for operating single grip harvester or operator's manual
 - access to user manual for vehicle-to-vehicle communication unit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

- followed production plan requirements and site safety and environmental management plan
- determined suitability and stability of forwarder for operation and safe working load limits, by considering capacity and limitation of machine, terrain characteristics and type, size and quantity of logs to be loaded
- adjusted machine driving and positioning techniques in response to terrain conditions
- applied loading, unloading and driving techniques to minimise damage to logs, standing trees, machine and environment in line with the production plan requirements
- placed, stacked and presented logs for efficient transportation and identification in line with the production plan requirements
- communicated effectively with others in the work area
- shut down, de-energised and isolated machine in line with workplace procedures and operator's manual
- carried out routine maintenance on forwarder parts.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in a production plan and site safety and environmental management plans
- hazardous or safe working zones in forest harvesting operations
- health and operational hazards or risks related to forwarder operations and factors that can change or introduce new hazards

- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for single grip harvesting operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning, vehicle-to-vehicle communication systems and procedures to maintain communication and workplace safety during forwarder operations
- required emergency response procedure including firefighting resources and emergency response
- potential impacts of forwarder operations on onsite and offsite environmental values including cultural heritage, flora, fauna, ground compaction, water contamination and soil erosion
- industry-accepted environmental control measures, environmental restrictions, legal obligations of current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for forwarder operations as outlined in workplace procedures and production plan
- landings usage, typical location of loading and/or landing site
- extraction methods for tree felling patterns
- wood flow requirements and extraction and production bottlenecks particular to a production system
- effects of weather on ground conditions
- effects of slope and terrain conditions on forwarder stability and operation
- log species, quality characteristics and defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets and values
- maximum log damage or defects and minimum quality allowances particular to a production system
- techniques particular to a production system to avoid mechanical damage to logs during loading, unloading and stacking; separate and present logs for efficient transportation and identification of the product
- machine specifications, restrictions and safe operating procedures including stability and operation in different terrain conditions, slopes and road types and methods to shut down, de-energise and isolate the machine as outlined in workplace procedures or operator's manual
- using machine cabin controls
- techniques to restrain logs safely
- techniques for safe and efficient driving of forwarder to landing area or the mill
- location of machine's major mechanical systems and parts of the machine in which energy is stored as outlined in operator manuals for safe and efficient conduct of the machine operator maintenance tasks
- methods to conduct machine pre-operational checks and detect faults as outlined in workplace procedures or operator's manual
- machine maintenance and servicing requirements as outlined in workplace procedures or operator's manual

- industry-accepted reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, machine maintenance and block completion.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - forwarder
 - suitable logs to load, unload and stack
 - personal protective equipment required in harvesting operations
 - vehicle-to-vehicle communication systems
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupational Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedures which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan and safety and environmental management plans
 - access to site emergency procedure
 - access to workplace safety procedures for operating single grip harvester or operator's manual
 - access to user manual for vehicle-to-vehicle communication system.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR3228 Operate loader

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to operate an articulated front-end wheel loader for log production and use optimised production processes in a commercial forest harvesting environment. The main job functions are to load log trucks and/or sort log stacks at roadside or landing area for transportation. Other functions include slash removal. Activities are to be conducted safely and efficiently.

The unit applies to individuals who work as loader operators in small or larger harvesting crews. Operators generally work under broad direction to complete routine activities related to crawler tractor operations and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting (HAR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare to operate a loader	1.1 Review production plan, confirm its targets for felling and processing and assess wood flow requirements to ensure efficient machine operation and overall productivity 1.2 Confirm type, size and quantity of logs or slash to be clamped to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>ensure that loads and machine are in line with safe working requirements and industry standards for operations</p> <p>1.3 Confirm, identify and report health, safety, environmental and heritage risks of operation in line with standard operating procedures and site safety and environmental management plans</p> <p>1.4 Apply risk control measures in line with standard operating procedures, site operational plan, legislative requirements and industry standards to eliminate or minimise risks</p> <p>1.5 Identify emergency plan procedures to follow in the event of an emergency</p> <p>1.6 Use production plan to identify layout of landing or roadside area and access to logs for efficient process and minimum interference with other forestry operations</p> <p>1.7 Assess terrain characteristics to establish machine stability</p> <p>1.8 Carry out pre-operational checks on machine in line with workplace procedures or manufacturers' recommendations to ensure optimal production performance and operational effectiveness</p>
2. Operate loader to load log trucks and/or sort log stacks	<p>2.1 Use industry-accepted warning signs, vehicle-to-vehicle communication systems and procedures to maintain communication and workplace safety during operation</p> <p>2.2 Position loader for stability and safe access to logs/slash, by adjusting the technique in response to terrain conditions</p> <p>2.3 Use machine cabin controls to clamp bunches of logs/slash, and load trucks and/or sort stacks, while ensuring that the bunch size is suited to the log clamp capacity and terrain conditions</p> <p>2.4 Systematically load trucks and/or construct log/slash stacks by using handling techniques to avoid log damage in line with the production plan requirements and ensure safety and stability of truck and/or stacks</p> <p>2.5 Use appropriate techniques to maintain log product separation in the truck when multiple product grades are loaded or in line with the production plan requirements</p> <p>2.6 Drive the machine and manoeuvre log clamp safely and efficiently to avoid logs, machine and environment damage in line with the production plan requirements</p> <p>2.7 Ensure all merchantable product and/or slash from the site is loaded or sorted in line with the production plan requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
3. Segregate and stack stems and/or logs	<p>3.1 Visually assess and measure products for size, species and quality characteristics at the felling site and during staking at the roadside or landing bay, to ensure they are placed in the appropriate stack and in line with the production plan requirements</p> <p>3.2 Mark and report logs that cannot be clearly and safely assessed in line with the production plan requirements</p> <p>3.3 Position and construct stacks of stems or logs to avoid product damage, provide stability, restrict height for efficient extraction and facilitate safe access and conduct of other landing and machine operations in line with worksite layout and production plan requirements</p> <p>3.4 Maintain stack separation and identification to ensure products are correctly presented on roadside and/or landing bay for an optimum transport and logistics cycle time in line with industry standards and production plan requirements</p> <p>3.5 Clean area of all debris resulting from loader operation in line with resource management policies</p>
4. Carry out machine operator maintenance	<p>4.1 Park, shut-down, de-energise and isolate loader in line with workplace procedures or manufacturers' recommendations</p> <p>4.2 Clean, check and carry out routine maintenance tasks on loader to maintain optimum operational performance</p> <p>4.3 Identify and report machine faults, malfunctions or problems in line with workplace procedures or manufacturers' recommendations</p> <p>4.4 Clean work area and dispose of or recycle waste materials in line with site environmental management plan</p> <p>4.5 Record loader operations and maintenance activities</p>

Assessment Requirements for FWP HAR3228 Operate loader

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned, prepared and safely and effectively operated loader to load logs/slash on trucks and/or sort and stack logs in line with a production plan
- checked risks associated with the operation and applied standard operating procedures
- followed the production plan requirements and site safety and environmental management plans
- determined suitability and stability of the machine for operation by considering machine specifications, terrain characteristics and type and size of logs to be clamped
- adjusted machine positioning technique in response to terrain conditions
- demonstrated knowledge of log species, quality characteristics and defects in line with the production plan requirements
- applied machine techniques to drive, clamp, load and/or stack logs or slash and minimise damage to products, machine and surrounding environment in line with the production plan requirements
- placed, stacked and presented products for efficient transportation and identification in line with the production plan requirements
- shut down, de-energised and isolated machine in line with workplace procedures and operator's manual
- carried out routine maintenance on the machine.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in a production plan and site safety and environmental management plans
- hazardous or safe working zones in forest harvesting operations
- health and operational hazards or risks related to loader and factors that can change or introduce new hazards

- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for loader operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning, vehicle-to-vehicle communication systems and procedures to maintain communication and work safety during operations
- required emergency response procedure, including firefighting resources and emergency response
- potential impacts of loader operations on onsite and offsite environmental values, including cultural heritage, flora, fauna, ground compaction, water contamination and soil erosion
- industry-accepted environmental control measures, restrictions, legal obligations of the current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for loader operations as outlined in workplace procedures and production plan
- landings usage
- wood flow requirements and extraction and production bottlenecks particular to a production system
- log species, quality characteristics and defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets and values
- maximum log damage or defect and minimum quality allowances particular to a production system
- techniques particular to a production system to avoid mechanical damage to logs during grappling, loading and stacking; separate and present logs for efficient transportation and identification of the product
- effects of weather on ground conditions
- effects of terrain conditions on machine stability and operation
- machine specifications, restrictions and safe operating procedures, including stability and operation in different terrain conditions, slopes and road types and methods to shut down, de-energise and isolate the machine as outlined in workplace procedures or operator's manual
- using machine cabin controls
- techniques for safe and efficient driving of the machine during operation
- methods to conduct machine pre-operational checks and detect faults, as outlined in workplace procedures or operator's manual
- location of machine's major mechanical systems and parts of the machine in which energy is stored, as outlined in operator manuals for safe and efficient conduct of the machine operator maintenance tasks
- machine maintenance and servicing requirements as outlined in workplace procedures or operator's manual
- industry-accepted reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, machine maintenance and block completion.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - loader
 - logs/slash for loading and/or segregation and stacking
 - personal protective equipment required in harvesting operations
 - vehicle-to-vehicle communication system
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedures which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan, operational plan and safety and environmental management plans
 - access to site emergency procedure
 - access to workplace standard operating procedures for loader or operator's manual
 - access to user manual for vehicle-to-vehicle communication system.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR3229 Operate single grip harvester

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to operate a single grip harvester for log production and use optimised production processes in a commercial forest harvesting environment. The main job functions are to fell trees, delimb, cut stems to optimum value and segregate log products. Activities are to be conducted safely and to ensure optimal value recovery and extraction of logs.

The unit applies to individuals who work as single grip harvester operators in small or larger harvesting crews. Operators generally work under broad direction to complete routine activities related to harvesting operations and take responsibility for their work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned, prepared and safely and effectively operated a single grip harvester to cut and produce log products with optimal length, quality and diameter in line with log cutting instructions, quality specifications or production plan
- checked risks associated with the operation and applied standard operating procedures
- followed production plan requirements, log cutting instructions or quality specifications and site safety and environmental management plan
- adjusted machine driving and positioning techniques in response to terrain conditions and unexpected characteristics, movement or condition of tree
- applied felling and processing techniques to minimise damage to the stem, logs, standing trees, machine and surrounding environment in line with the production plan requirements
- applied knowledge of log species, quality characteristics and defects during operation in line with the production plan requirements
- placed, stacked and presented logs for efficient transportation and identification in line with the production plan requirements
- communicated effectively with others in the work area
- shut down, de-energised and isolated machine in line with workplace procedures and operator's manual
- carried out routine maintenance on single grip harvester.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in a production plan, log cutting instructions or product quality specifications and site safety and environmental management plans
- hazardous or safe working zones in forest harvesting operations

- health and operational hazards or risks related to single grip harvesting operations and factors that can change or introduce new hazards or risks including characteristics of difficult trees and risks associated with falling them safely
- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupational Health and Safety Acts and regulations and requirements of industry standards and/or codes of practice for single grip harvesting operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning, vehicle-to-vehicle communication systems and procedures to maintain communication and work safety during single grip harvesting operations
- required emergency response procedure including firefighting resources and emergency response
- potential impacts of single grip harvester operations on onsite and offsite environmental values including cultural heritage, flora, fauna, ground compaction, water contamination and soil erosion
- industry-accepted environmental control measures, restrictions, legal obligations of the current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for single grip harvesting operations as outlined in workplace procedures and production plan
- typical location of loading and/or landing site
- tree felling patterns
- extraction methods
- wood flow requirements and extraction and production bottlenecks particular to a production system
- tree shapes, species, quality characteristics and log defects particular to the site and production system
- regional quality requirements for log products with particular end uses, markets and values
- requirements and methods to achieve maximum stump height in response to unexpected characteristics or condition of the trees and ground level
- maximum log damage and defect and minimum quality allowances particular to a production system
- techniques particular to a production system to avoid mechanical damage to logs during felling, processing and stacking; achieve saw cuts at both ends of the product that meet quality specifications; avoid incorrect or excessive log butting; separate and present logs for efficient transportation and identification of the product
- effects of weather on ground conditions
- effects of slope and terrain conditions on machine stability and operation
- machine specifications, restrictions and safe operating procedures including stability and operation in different terrain conditions, slopes and road types, chain shot rules, methods to shut down, de-energise and isolate the machine and optimal direction of travel as outlined in workplace procedures or operator's manual
- using machine cabin controls
- techniques for safe and efficient driving of single grip harvester

- location of machine's major mechanical systems and parts of the machine in which energy is stored as outlined in operator manuals for safe and efficient conduct of the machine operator maintenance tasks
- methods to conduct machine pre-operational checks and detect faults as outlined in workplace procedures or operator's manual
- machine maintenance and servicing requirements as outlined in workplace procedures or operator's manual
- industry-accepted reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, machine maintenance and block completion.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - single grip harvester
 - suitable trees to fell and process
 - personal protective equipment required in harvesting operations
 - vehicle-to-vehicle communication system
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedures which cover off on current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan, site operational plan, log cutting instructions and safety and environmental management plans
 - access to site emergency procedure
 - access to workplace standard operating procedures for single grip harvester or operator's manual
 - access to user manual for vehicle-to-vehicle communication system.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWP HAR3230 Operate skidder

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria of this unit. There must be evidence that, on at least one occasion, the individual has:

- planned, prepared and safely and effectively operated a skidder to move products and/or slash in line with production plan
- checked risks associated with the operation and applied standard operating procedures
- followed production plan requirements and site safety and environmental management plan
- determined suitability and stability of skidder for operation and safe working load limits by considering machine and equipment specifications, terrain characteristics and type and size of stems and/or logs to be moved
- adjusted machine driving and positioning technique in response to terrain conditions
- applied machine manipulation techniques to move products and/or slash and minimise damage to products, machine and surrounding environment in line with the production plan requirements
- placed and stacked products for efficient extraction in line with the production plan requirements
- communicated effectively with others in the work area
- shut down, de-energised and isolated machine in line with workplace procedures and operator's manual
- carried out routine maintenance on skidder parts.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and requirements contained in a production plan and site safety and environmental management plans
- hazardous or safe working zones in forest harvesting operations
- health and operational hazards or risks related to skidder operations and factors that can change or introduce new hazards

- industry-accepted work health and safety risk control measures, legal obligations of the current Work Health and Safety Acts or Occupation Health and Safety Acts and regulations, and requirements of industry standards and/or codes of practice for skidder operations as outlined in workplace procedures and production plan
- industry-accepted warning signs, their correct positioning, vehicle-to-vehicle communication systems and procedures to maintain communication and workplace safety during skidding operations
- required emergency response procedure including firefighting resources and emergency response
- potential impacts of skidder operations on onsite and offsite environmental values including cultural heritage, flora, fauna, ground compaction, water contamination and soil erosion
- industry-accepted environmental control measures, restrictions, legal obligations of the current Environment Protection Acts and regulations and requirements of industry standards and/or codes of practice for skidder operations, as outlined in workplace procedures and production plan
- landings usage
- typical location of loading and/or landing site
- tree felling patterns
- extraction methods
- wood flow requirements and extraction and production bottlenecks particular to a production system
- techniques particular to a production system to avoid mechanical damage to stems and logs during skidding and stacking; position and stack logs for efficient extraction
- effects of weather on ground conditions
- effects of slope and terrain conditions on skidder stability and operation
- machine specifications, restrictions and safe operating procedures, including stability and operation in different terrain conditions, slopes and road types and methods to shut down, de-energise and isolate the machine as outlined in workplace procedures or operator's manual
- using machine cabin controls
- techniques for safe and efficient driving of skidder
- methods to conduct pre-operational checks on machine and detect faults as outlined in workplace procedures or operator's manual
- location of machine's major mechanical systems and parts of the machine in which energy is stored as outlined in operator manuals for safe and efficient conduct of the machine operator maintenance tasks
- machine maintenance and servicing requirements as outlined in user or operator manuals
- industry-accepted reporting requirements regarding site, incident and hazard, personal reporting, check-in, production, machine maintenance and block completion.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a forest harvesting site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - skidder
 - suitable stems/logs and/or slash to be skidded
 - personal protective equipment required in harvesting operations
 - vehicle-to-vehicle communication systems
- specifications:
 - access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to workplace policies and procedures which cover current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to forest harvesting operations
 - access to production plan and site safety and environmental management plans
 - access to site emergency procedure
 - access to workplace standard operating procedures for skidder or operator's manual
 - access to user manual for vehicle-to-vehicle communication systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3208 Apply critical workplace processes in the manufacture of prefabricated timber building systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to conduct production tasks on an assembly line for panelised or modular prefabricated timber building systems safely and efficiently. Critical workplace processes covered in this unit include workplace health and safety, storage and handling of building materials for major timber building sub-assemblies, quality check at the workstations before and after assembly work and control of waste material for disposal.

The unit applies to individuals who work as operators in a prefabricated timber building systems manufacturing plant. These include wood machinists, carpenters or joiners, supervisors and other trade and multi-skilled operators. Operators generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

In order to undertake this unit, individuals must have a relevant qualification or equivalent.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply workplace health and safety during the assembly operation	<p>1.1 Obtain and review workplace health and safety requirements and emergency procedures for assembly operation and, where required, check with appropriate personnel</p> <p>1.2 Use personal protective equipment and identify and report hazards, accidents, incidents or near misses throughout assembly operation according to workplace requirements and health and safety legislation to maintain safe work practices</p>
2. Store and handle building materials for major sub-assemblies	<p>2.1 Use the storage system provided for tools, equipment and building materials to enhance accessibility, protect material, and replenishment of commonly used resources</p> <p>2.2 Ensure that large sub-assemblies and materials are positioned according to workplace procedures for ease of access and safety, enabling optimal use of floor space and production efficiency</p>
3. Check the quality of building materials before assembly work begins	<p>3.1 Obtain and review task-specific information including design and production documents to ensure that product quality and production schedules and targets are met and that materials used conform to building products</p> <p>3.2 Access building materials from storage, check the suitability for the task, quantity, relevant product certification and quality and assemble as required to meet design specifications, standards, codes, certification and production schedule</p> <p>3.3 Ensure partition walls, floor elements and other regulated components are certified for thermal, acoustic and fire properties according to the design, local codes and standards</p> <p>3.4 Report any incorrect information and unsuitable and non-conforming building materials to appropriate personnel for repairing the defect, resolving its cause and preventing recurrence</p> <p>3.5 Access sub-assemblies from storage and check incoming variations in work processes or in design and equipment specifications</p> <p>3.6 Address or report incoming variations to the appropriate personnel</p> <p>3.7 Follow workplace procedures to ensure that the work is of the required standard and completed on time</p>
4. Check the quality of completed sub-assembly product and process	<p>4.1 Complete and check the quality of the assembly work to ensure it meets design specifications</p> <p>4.2 Identify and rectify safety risks associated with manual handling</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	of completed sub-assembly or prefabricated timber building system before its release to the next workstation or its delivery for on-site installation 4.3 Document and report time, product variations and work processes to identify non-value-added activities, delays and inefficiencies and initiate process improvement
5. Assess waste materials for reuse or disposal	5.1 Sort and store waste materials from assembly work according to health and safety procedures 5.2 Prepare waste materials for reuse or disposal according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read a range of workplace documentation, including workplace health and safety plans, materials certification, design and production documents
Numeracy	<ul style="list-style-type: none"> Calculate quantity, length, volume, area and waste associated with the assembly of prefabricated timber building systems
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for decisions made to meet specifications and workplace requirements
Interact with others	<ul style="list-style-type: none"> Understand what to communicate, with whom and how in routine work situations
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning and organising own workload

Assessment Requirements for FWPTMM3208 Apply critical workplace processes in the manufacture of prefabricated timber building systems

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least three occasions, the individual applied critical workplace processes in the manufacture of prefabricated timber building systems for one or more panelised or modular prefabricated timber building system types, including:

- cross-laminated timber floor and wall systems
- post and beam systems (Glulam, laminated veneer lumber)
- panelised floor cassette systems
- panelised wall systems (including cladding, insulation, windows or doors)
- panelised and pre-finished wall systems (inclining above, electrical, plumbing, mechanical or lining)
- pre-finished and fully finished timber-based modules.

In doing the above, the individual has:

- implemented workplace health and safety procedures and practices at the assembly workstation
- demonstrated safe and efficient work practice for storing and handling building materials and sub-assemblies according to workplace procedures
- reviewed design and production documents and understood assembly work requirements regarding quality, quantity and production schedules and targets
- checked the quality of building materials and sub-assemblies from previous work against design specifications and certification requirements before commencing the assembly work
- checked completed sub-assembly or prefabricated timber building system against specifications and safe manual handling before being released to the next workstation or delivered for on-site installation
- documented and reported time and product variations, defects and work processes efficiently and according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- task-specific information and requirements contained in drawings, design specifications, production schedules, work method statements, risk assessments and manufacturer information
- health and safety hazards or risks related to the assembly activity and as identified through risk assessments, manufacturer technical information, regulations and industry health and safety guides, including:
 - lifting and handling of large building materials and sub-assemblies, including the use of tools and handling equipment
 - methods of work
 - product storage
- workplace health and safety procedures and practices related to the assembly activities, including:
 - emergency response procedure and responsibilities when involved with fires, spillages and injuries relating to occupational activities
 - accident reporting procedures and responsibilities
 - safe use of personal protective equipment (PPE)
- efficient storage of building materials and replenishment systems in the off-site manufacture of prefabricated timber building systems
- methods for efficient handling and positioning of large timber building sub-assemblies and materials at workstations along assembly lines
- aspects of design specifications for a range of prefabricated timber building systems and their final application:
 - types, quantity, quality, sizes, suitability and sustainability of building materials including wood structural components and fixings; choice of materials and properties
 - services components including hydraulics, electrical or heating, ventilation and air conditioning
 - jurisdictional standards, codes and certifications for building materials, services, components and fixings in the location where prefabricated timber building systems are installed
 - regulated components, including partition walls and floor elements, and valid documentation for attesting compliance with thermal, acoustic and fire requirements
 - acceptable tolerances and continuity or discontinuity requirements for materials, insulation systems and services related to a range of prefabricated timber building systems; the importance for on-site installation and in-service life cycle
- workstations or operations associated with a particular production line for prefabricated timber building systems; order of sequence or flow of sub-assembled products and information between process activities
- bottleneck operations and causes for delays or inefficiencies, including product design variations and rework due to damage, material unavailability, poor quality, incorrect positioning in the sub-assembly area, design questions or errors

- methods for and importance of reporting incorrect information, unsuitable building material resources, incoming defects and design variations
- elements associated with manual handling hazards and risks of completed timber building systems, including:
 - cut metal edges
 - exposed screw tips and nails
 - abrasion of insulation materials resting on metal edges
 - pinch points in connections
 - surfaces that can retain rainwater
- methods for sorting and storing waste materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workstation on an assembly line for prefabricated timber building systems or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - specialised tools and material handling equipment for the operational activity
 - building materials and sub-assemblies related to different prefabricated timber building systems
 - PPE used in the off-site manufacture of prefabricated timber building systems
- specifications:
 - access to drawings, design documentation, production schedules and targets, method statements, risk assessments, workplace health and safety procedures, manufacturer information, certification for regulated building material and building regulations
 - access to emergency procedures
 - access to templates for documenting and reporting issues regarding product quality and time and process variations
- timeframes:
 - according to the time specified in the production schedule.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM3209 Install prefabricated timber building systems on-site

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to position and connect panelised or modular prefabricated timber building systems safely and correctly during on-site installation.

The unit applies to individuals who work in the occupational area of installing prefabricated timber building structures. These include construction workers, carpenters or joiners and site supervisors. They generally work under broad or limited direction to complete routine activities related to their own work, and take responsibility for their work.

In order to undertake this unit, individuals must have a relevant trade qualification or equivalent.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply workplace health and safety during on-site installation	<p>1.1 Obtain all workplace health and safety information to ensure that activities are performed safely</p> <p>1.2 Identify workplace and task-specific hazards and report accidents, incidents or near misses during on-site installation according to workplace health and safety requirements to maintain a safe workplace</p> <p>1.3 Identify and use required risk-control and safety measures and equipment according to workplace health and safety requirements</p>
2. Plan and prepare for installation work	<p>2.1 Obtain and review relevant workplace information, including task instructions, drawings, design specifications, schedules and manufacturer information, and seek clarification if necessary</p> <p>2.2 Confirm installation timeframe and sequence with relevant stakeholders or personnel to meet design specifications and on-site work schedules</p> <p>2.3 Review drawings and design specifications to identify the type, location and quantity requirements for fixings, connections and bracing</p> <p>2.4 Check building structure, slab or floor area and report non-conformance as per workplace processes</p> <p>2.5 Select tools, auxiliary materials and equipment for the installation of prefabricated timber building systems as required, and set up equipment to meet safe work requirements</p> <p>2.6 Obtain information needed to ensure that the inspection, use, maintenance and storage of equipment comply with manufacturer directions</p> <p>2.7 Maintain appropriate ongoing communications and briefings with key stakeholders, including feedback and timeline reviews, for the duration of the installation</p>
3. Check prefabricated timber building systems logistics and storage on-site	<p>3.1 Ensure prefabricated timber building systems are delivered on-site in-line with the phase of the construction project and installation</p> <p>3.2 Ensure there is no risk of damage by weather (moisture), traffic or general construction to prefabricated timber building systems and that they are stored as close as practically possible to the construction site when storage is required</p> <p>3.3 Check prefabricated timber building systems, connections and support points for quantity, quality, tolerance compliance and conformance and damage upon delivery, and report issues to the appropriate personnel or according to operational requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Install prefabricated timber building systems	<p>4.1 Use tools and equipment safely and correctly according to operational requirements and manufacturer specifications to measure, mark out, level, finish and secure prefabricated timber building systems according to specifications</p> <p>4.2 Assist crane or dogger operators to lift prefabricated timber building systems in the sequential order and apply accurate placement and connection techniques to the required tolerances and specifications</p> <p>4.3 Check corners and walls to ensure they are accurately levelled, plumbed and squared according to specifications and operational requirements</p> <p>4.4 Check prefabricated timber building systems after installation against critical performance metrics and apply sealants as required to ensure compliance with fire, waterproofing and acoustic requirements and with design specifications</p> <p>4.5 Protect prefabricated timber building systems from damage and adverse weather conditions during the installation work and other worksite activities</p>
5. Complete installation	<p>5.1 Complete installation within the required timeframe and according to on-site work schedules</p> <p>5.2 Maintain and store hand and power tools, equipment and machinery according to operational requirements</p> <p>5.3 Keep work area and access areas free of debris and waste material according to operational requirements</p> <p>5.4 Record any quality checks and changes or variations applied to a prefabricated timber system during the on-site installation work, according to operational requirements and communicate the process</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for FWPTMM3209 Install prefabricated timber building systems on-site

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least three occasions, the individual has installed prefabricated timber building systems on-site, for two or more panelised or modular prefabricated timber building system types, including:

- cross-laminated timber floor and wall systems
- post and beam systems (Glulam, laminated veneer lumber)
- panelised floor cassette systems
- panelised wall systems (including cladding, insulation, windows or doors)
- panelised and pre-finished wall systems (including above, electrical, mechanical, plumbing or lining)
- pre-finished and fully finished timber-based modules.

In doing the above, the individual has:

- complied with health and safety requirements and regulations applicable to workplace operations
- identified design requirements and installation sequence of prefabricated timber building systems
- identified and selected correct fittings, connections, tie-downs and braces for the installation of prefabricated timber building systems
- checked suitability of building structure, slab or floor area for the installation of prefabricated timber building systems
- applied workplace quality procedures and processes in the context of installing prefabricated timber building systems
- selected and used processes, tools and equipment for measuring, marking out, levelling and securing prefabricated timber building systems into place
- placed prefabricated timber building system safely, efficiently and to required tolerances and installed connectors to required specifications
- checked that walls and corners are accurately levelled, plumbed and square
- identified typical faults and problems and rectified faults
- communicated efficiently with others, exchanging feedback and timeline reviews.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant current health and safety legislative obligations and workplace procedures as described in industry health and safety guides and site workplace health and safety plans
- hazards associated with the construction work and as identified through safe work method statements (SWMS), risk assessments, manufacturer technical information, regulations and industry health and safety guides, including but not limited to:
 - building systems and components
 - methods of work
 - waste material
 - risk of fire
 - power lines
 - cabling and plumbing
 - drains covered correctly
 - access and egress
- safety measures and equipment:
 - fire prevention and emergency procedures
 - evacuation procedure
 - signs and barricades
 - personal protective equipment (PPE)
 - fall prevention and fall arrest equipment
 - other methods for reducing the risk from fire and other hazards on a construction site as defined in the National Construction Code and site safety plan
- types of task-specific documents, their source, information included and how they are read and interpreted with reference to:
 - drawings
 - design specifications
 - on-site workflow, schedules and targets
 - method statements
 - risk assessments
 - progress charts and timetables
 - manufacturer information
 - product certifications
 - building regulations
- basic design and offsite manufacture processes for prefabricated timber building systems for recognising problems that arise from missing information, damaged or faulty prefabricated timber building systems and understanding methods to resolve them
- installation design specifications for different prefabricated timber building systems with reference to:

- installation sequence
- lifting equipment, support connections and techniques
- bracing techniques
- technical properties and specific requirements of materials, elements, components, insulations and connections
- mechanical fixings, tie-downs and braces, connection strengths and installation tolerances
- building checks before prefabricated timber building system installation and the importance of checking
- testing and checking of prefabricated timber building systems for quality assurance:
 - required tests for different prefabricated timber building system and methods to undertake them
 - test sampling and frequency of testing within a managed process
- specialised tools and equipment for installation and fixing of different prefabricated timber building systems and methods of operation
- methods for measuring and calculating the quantity, length, area, centre of gravity and mass of different prefabricated timber building systems for lifting and installation operations
- techniques for accurate placement of prefabricated timber building systems before the full installation
- problems or faults related to prefabricated timber systems, including materials, components, connections or insulations that arise from on-site installation and impact on structural, fire and acoustic performance of the system
- critical performance metrics used in the on-site installation operations of prefabricated timber building systems regarding quality, cycle time, productivity and inventory
- methods for reporting:
 - circumstances that affect the work cycle time
 - quality checks
 - product changes or variations during installation
- maintenance and servicing requirements for tools and equipment as outlined in workplace procedures or manufacturer manual
- waste management procedures regarding safe disposal and recycling.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a construction site or environment that accurately represents workplace conditions
- resources, equipment and materials:
 - specialised tools and equipment for installation and fixing of prefabricated timber building systems
 - prefabricated timber building systems, components, sections and fittings

- PPE, signs and barricades, fall prevention and fall arrest equipment used in building construction operations
- specifications:
 - access to workplace health and safety policies, SWMS, emergency procedures, fire safety plans, drawings, design specifications, on-site workflow, schedules and targets, work method statements, risk assessments, manufacturer information and operating instructions for specialised tools and equipment, product certifications and building regulations
- relationships:
 - team member(s) including licenced crane operator and licenced dogger to lift prefabricated timber building systems
- timeframes:
 - according to time specified in job sheet.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>

1. Develop prototype specifications	<p>1.1 Access and interpret design concepts or specifications.</p> <p>1.2 Prepare and document detailed prototype construction plans, specifications and work order for use during trial construction phase.</p> <p>1.3 Specify prototype purpose and outline requirements from design concepts or customer requirements.</p> <p>1.4 Complete a detailed analysis of options for materials and construction in line with organisational procedures and environmental protection practices.</p> <p>1.5 Specify construction materials, requirements and methods based on option selected.</p>
2. Plan and prepare prototype for construction	<p>2.1 Source materials and hardware and other resources in line with site procedures and budgetary limits.</p> <p>2.2 Assess and select suitable resources in line with options for materials detailed in prototype construction plan and specifications.</p> <p>2.3 Source and select appropriate tools and equipment and check for operational effectiveness in line with manufacturer's recommendations.</p> <p>2.4 Plan and document stages of the construction process.</p> <p>2.5 Source, construct or prepare set-up jigs required for construction.</p>
3. Produce the prototype	<p>3.1 Monitor construction process to ensure construction plan is followed.</p> <p>3.2 Ensure problems, issues, modifications and improvements are documented.</p> <p>3.3 Analyse information in reports completed by construction personnel on prototype construction processes, problems, effectiveness of purpose and efficiency of construction methods.</p> <p>3.4 Identify modifications or improvements to design and construction plan arising from construction of the prototype.</p> <p>3.5 Evaluate results of construction process and make recommendations for future construction.</p>
4. Trial and evaluate the prototype	<p>4.1 Develop and document specific trial objectives and processes.</p> <p>4.2 Inform personnel involved in the trial and evaluation of their responsibilities and functions.</p> <p>4.3 Work with construction personnel to prepare and certify trial equipment, tools and materials prior to use.</p> <p>4.4 Complete prototype trials in consultation with construction personnel.</p> <p>4.5 Evaluate trial results, determine and document recommendations</p>

	<p>for future production.</p> <p>4.6 Maintain accurate records of trial and evaluation in line with organisational procedures.</p>
--	--

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Learning skills to:	<ul style="list-style-type: none"> experiment with prototypes and evaluate trial outcomes to inform new production possibilities.
Numeracy skills to:	<ul style="list-style-type: none"> calculate detailed dimension specifications for prototypes and clearly represent in construction plans.
Oral communication skills to:	<ul style="list-style-type: none"> provide clear and unambiguous production instructions to others consult with and seek feedback from other personnel involved in trials.
Reading skills to:	<ul style="list-style-type: none"> interpret detailed and unfamiliar design concepts and reports on construction processes and problems.
Writing skills to:	<ul style="list-style-type: none"> produce unambiguous construction plans, specifications and work orders in a style and format easily understood by construction team clearly and accurately report on evaluations of trial results clearly represent rationale for recommended changes to future production requirements.
Planning and organising skills to:	<ul style="list-style-type: none"> efficiently and logically manage operational logistics for production trials.
Problem-solving skills to:	<ul style="list-style-type: none"> analyse construction problems, consider various solutions and determine recommended changes.
Teamwork skills to:	<ul style="list-style-type: none"> take a lead role in managing a team of construction personnel.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- coordinate the construction and trialling of at least two prototypes/samples from the following sample list:
 - roof, wall and floor frames/trusses
 - staircases
 - door and window frames
 - structural beams
 - specialised pallets or crates
- develop, for each, an individual construction plan and work order to include details of:
 - construction methods and sequence
 - materials to be used and quantities
 - tools and equipment to be used
 - labour requirements
- evaluate trial results, for each prototype, and complete a detailed and accurate report for each, covering:
 - strength
 - durability
 - operational effectiveness against purpose
 - efficiency of construction methods
 - impact of the production process on the environment
 - recommendations for future production processes.
 -

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- prototype trialling and evaluation processes
- features, at an in-depth level of understanding, of timber products subject to trial and evaluation:
 - product purpose
 - options for materials
 - construction componentry and standards
 - construction methods and sequence
 - types of tools and equipment used for construction
- impacts of production process on the environment and environmental protection practices for:
 - reducing water and energy use
 - cleaning of plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- certification requirements for trial equipment, tools and materials used during construction phase
- format, content and use of:
 - construction plans and specifications
 - work orders
 - reports evaluating trial outcomes
- organisational standards, policies and procedures for trialing and evaluating prototypes:
 - communication reporting lines for team involved in trials
 - certifying trial equipment, tools and materials
 - documenting plans and reports.

Assessment Conditions

The following resources must be made available:

- computers, keyboards and industry current software programs used to produce construction plans, work orders and reports evaluating trial outcomes
- comprehensive information about the design concept
- templates for:
 - construction plans and specifications
 - work orders
 - reports evaluating trial outcomes
 - certification documents
- relevant personnel for the purposes of communicating information
- organisational standards, policies and procedures for trialing and evaluating prototypes.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPTMM5209 Determine prefabricated timber building systems designs for compliance, manufacture and installation

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to determine design solutions for panelised and/or modular prefabricated timber building systems to meet structural and safety compliance, off-site manufacture and on-site installation. The main job functions are to facilitate collaborative design and achieve detailed and integrated design solutions for prefabricated timber building systems.

The unit applies to individuals who work as designers in a building design team. These include architects, design engineers, draftspersons, structural engineers, building services engineers, architectural technicians and timber systems designers from manufacturing plants. They demonstrate in-depth knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

In order to undertake this unit, individuals must have a relevant building design qualification or equivalent.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Timber Manufactured Products

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
<p>1. Interact with supply chain stakeholders to design prefabricated timber building systems</p>	<p>1.1 Communicate with the developer during the design process to ensure that prefabricated timber building system is fully fit for purpose and meets client functional requirements</p> <p>1.2 Use Building Information Modelling (BIM) system or similar and conduct further collaborative analysis with the fabricator, builder, component suppliers and regulators to achieve a design configuration that allows for lean processes during all stages of timber building system life cycle, meets regulations and does not complicate other design considerations</p> <p>1.3 Ensure that the design accounts for fabrication capabilities</p> <p>1.4 Implement a continuous improvement process during the design life of prefabricated timber building system to report, record and resolve issues</p>
<p>2. Determine design solutions and specifications for structural compliance</p>	<p>2.1 Identify the National Construction Code (NCC) Performance Requirements for structural robustness, which the prefabricated timber building system and its components need to satisfy</p> <p>2.2 Discuss structural design actions with appropriate stakeholders to ensure that the prefabricated timber building system meets the minimum NCC structural requirements and performs without risks when used as intended through its design life</p> <p>2.3 Obtain experimental and observational data for the strength of materials, structural components, connections or assemblies to determine design values, and consult with appropriate engineers to indicate the actual robustness and reliability of the physical building system</p> <p>2.4 Contribute to the design verification for structural compliance and process documentation according to the NCC, standards and codes to facilitate design certification and approvals</p> <p>2.5 Determine durability requirements for the materials of prefabricated timber building system according to the nominated design life and planned maintenance, and ensure that they are specified in design documentation for prefabricators</p>
<p>3. Determine design solutions and specifications for safety compliance</p>	<p>3.1 Determine early in the design process hazards to health and safety during all stages of prefabricated timber building system life cycle according to the workplace health and safety laws, regulations and the NCC</p> <p>3.2 Determine and apply health and safety design control measures according to standards, codes and technical guides to eliminate or minimise health and safety risks during all stages of prefabricated</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>timber building system life cycle</p> <p>3.3 Verify design documentation and ensure that health and safety provisions are specified for all stages of prefabricated timber building system life cycle according to standards, codes and technical guides</p> <p>3.4 Verify design documentation and ensure that detailed maintenance provisions are specified for all components of the prefabricated timber building system being designed according to its intended functions</p>
4. Determine design solutions and specifications for services	<p>4.1 Identify the NCC Performance Requirements for fire resistance and acoustic and thermal properties, which the prefabricated timber building system and its components need to satisfy</p> <p>4.2 Verify design documentation and ensure that intended materials, separations, insulations, fire warnings and fire-fighting management systems are specified for the required fire, acoustic, thermal and waterproofing performance according to standards, codes and technical guides</p> <p>4.3 Use design control actions to mitigate any possible effects of transportation, handling, on-site installation or maintenance on the integrity of intended connections, insulations or materials</p> <p>4.4 Determine early in the design phase where points of entry are required in the prefabricated timber building system, components and materials for services installation</p> <p>4.5 Verify design documentation and ensure that installation and connections provisions are specified for each service according to standards, codes and technical guides</p> <p>4.6 Ensure that all tolerances for the prefabricated timber building system and its components are specified in the design specifications according to standards to facilitate off-site manufacture and on-site installation</p> <p>4.7 Verify and ensure that approval and compliance certification for installation of services, partitions and floor elements are performed to the appropriate standards for thermal, acoustic and fire performance and according to local requirements before on-site installation</p>
5. Determine design solutions and specifications for transportation and on-site installation	<p>5.1 Determine maximum dimensions and weight for the building system being designed to meet restrictions provided by vehicles, lifting plants, road configuration around the construction site and local regulations</p> <p>5.2 Ensure that lifting requirements are specified for all stages of the prefabricated timber building system life cycle in the design</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>documentation, and they are according to the NCC to facilitate and maintain prefabricated timber building system integrity and adequate performance</p> <p>5.3 Determine the effects of cargo restraints and exposure to acceleration forces on the strength (structural attributes) of prefabricated timber building system during transportation, and use design control actions to allow for the forces applied</p> <p>5.4 Verify the design and ensure that necessary restraint conditions during transport and residual risks to the prefabricated timber building systems resulting from transportation are specified</p> <p>5.5 Ensure that the sequence for the installation of prefabricated timber building systems and components is specified in design documentation</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Communicate information verbally about complex, detailed technical design information
Numeracy	<ul style="list-style-type: none"> Conduct complex structural design calculations
Navigate the world of work	<ul style="list-style-type: none"> Monitor adherence to legal and industry standards and responsibilities
Interact with others	<ul style="list-style-type: none"> Identify the perspectives of others as part of work role Seek specialist input into problem-solving and decision-making
Get the work done	<ul style="list-style-type: none"> Use three-dimensional models, BIM or computer-aided design tools to design, monitor design processes and access and organise complex design data

Assessment Requirements for FWPTMM5209 Determine prefabricated timber building systems designs for compliance, manufacture and installation

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that the individual has assessed complete sets of timber building design documentation for two construction projects relating to different classes of buildings that, as defined in the National Construction Code (NCC), allow the use of one or more panelised or modular prefabricated timber building system types, including:

- cross-laminated timber floor and wall systems
- post and beam systems (Glulam, laminated veneer lumber)
- panelised floor cassette systems
- panelised wall systems (including cladding, insulation, windows or doors)
- panelised and pre-finished wall systems (inclining above, electrical, mechanical, plumbing or lining)
- pre-finished and fully finished timber-based modules

In doing the above, the individual has:

- determined and confirmed with stakeholders whether the design is fit for purpose and meets capabilities within the supply chain regarding prefabrication, storage, transportation and on-site installation
- determined the compliance requirements of physical prefabricated timber building system for:
 - structural robustness
 - durability
 - fire resistance and acoustic and thermal properties
 - health and safety hazards during all stages of the life cycle
 - transportation
- assessed whether the design provides adequate solutions to meet all compliance requirements, determining design actions according to standards to fill the design gaps

- verified design considerations regarding services installation and mitigation of possible effects during transportation, handling, on-site installation or maintenance
- verified the level of provisions in design documentation to demonstrate or specify:
 - structural compliance
 - health and safety information for each stage of prefabricated timber building system life cycle
 - prefabricated timber building system and components maintenance during prefabricated timber building system design life
 - materials, separations, insulations, fire warnings, a fire-fighting management system for required fire, acoustic, thermal and waterproofing performance
 - installation and connections requirements for each service
 - tolerances for prefabricated timber building system and its components
 - lifting requirements for each stage of prefabricated timber building system life cycle
 - restraint conditions during transportation
 - installation sequence for prefabricated timber building systems and components.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic uses of BIM (Building Information Modelling) software or similar for sharing and coordinating information among stakeholders during the prefabricated timber building system life cycle
- principles of collaborative design analysis:
 - Design for Manufacture and Assembly
 - lean processes (off-site manufacture, storage, transportation and on-site installation)
 - Failure Mode and Effects Analysis
- readily available prefabrication technologies for different types of prefabricated timber building systems (two- and three-dimensional) and components including:
 - structural timber
 - cross-laminated timber
 - laminated veneer lumber
 - Glulam
 - I-Joists
 - floor trusses
 - services
 - windows, glazing and plasterboard
- relevant legislation, standards and technical design guides or codes for:
 - structural design of prefabricated timber buildings and systems
 - implementation of safe design principles
 - installation of hydraulic, electrical, mechanical, fire protection and acoustic systems

- transportation restrictions and load restraint requirements
- NCC Performance Requirements for prefabricated timber building systems as classified via their function:
 - structural robustness
 - structural safety
 - fire resistance, thermal performance and acoustic performance
- elements of valid approval and compliance processes with reference to:
 - NCC assessments, calculations and evidence requirements for controlling the risk of structural failure and safety
 - fire, acoustic, thermal resistance and waterproofing of prefabricated timber building systems for complying with standards
- considerations and industry-accepted design solutions for prefabricated timber building systems (including structural and non-structural timber components and connections) as required by NCC, standards and technical design guides for:
 - structural robustness, verification methods and traceability of risks
 - structural durability with reference to environmental and specific conditions affecting durability of timber components and connections, high-risk areas within the building structure (including bathroom and external walls), specific hazards (particularly insect and fungal attack, weathering, moisture exposure and fire) and solutions considering preservative treatments, moisture contents, weatherproofing insulations and cladding
 - fire engineering measures, sound propagation and thermal resistance with reference to structural deflection of fire-rated elements and use of fire, vibrational/acoustical and thermal insulations; relevant design procedure for joint/connections involving timber structures to retain the integrity of insulation, material and system while considering effects of transport, handling and installation processes on connections
 - acceptable tolerances for material quality, off-site manufacture and on-site installation
 - services installation including hydraulic, electrical, mechanical, fire protection and acoustic systems
 - health and safety risks about the off-site manufacture, storage, transportation, on-site installation, use and maintenance of prefabricated timber building system
 - transportation and lifting requirements with reference to different load characteristics and appropriate road trucks and cranes or lifting plants, factors influencing lifting stability, behaviour/fatigue of timber and connections to temporary lifting loads, load restraint methods and friction factors affecting strength resistance and structural response of prefabricated timber building system
- design provisions and technical specifications as required by the Safe Design of Structures Code of Practice, NCC and other standards and technical guides for any person who carries out work activities in relation to a prefabricated timber building system:
 - health and safety provisions
 - connections specifications
 - design tolerances and specifications
 - thermal, acoustic and fire compliance provisions
 - transport and handling modes including lifting and stacking specifications

- installation sequencing provision
- maintenance provision.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- resources, equipment and materials:
 - timber building design documentation for two construction projects relating to different classes of buildings that allow the use of panelised or modular prefabricated timber building systems
 - computer with internet access and BIM software that is currently used in building design practices to view and print three-dimensional models, finite element models, two-dimensional computer-aided design drawings and design documentation
 - access to current legislation, standards, codes and technical design guides relevant to prefabricated timber building systems
- specifications:
 - access to relevant codes, standards and government regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPTMM5210 Verify compliance and conformance of prefabricated timber building systems during manufacture

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to verify physical performance and compliance liability of panelised or modular prefabricated timber building systems and components during off-site manufacturing to ensure that delivered product matches the design specifications and regulatory obligations.

The unit applies to individuals who work as compliance officers, supervisors or managers in a prefabricated timber building systems manufacturing plant. Such individuals demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPTMM5210 Verify compliance and conformance of prefabricated timber building systems during manufacture

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that, on at least three occasions, the individual has verified compliance and conformance of prefabricated timber building systems during manufacture for one or more of the following panelised or modular prefabricated timber building system types:

- cross-laminated timber floor and wall systems
- post and beam systems (Glulam, laminated veneer lumber)
- panelised floor cassette systems
- panelised wall systems (including cladding, insulation, windows or doors)
- panelised and pre-finished wall systems (inclining above, electrical, plumbing, mechanical or lining)
- pre-finished and fully finished timber-based modules

In doing the above, the individual has:

- implemented workplace health and safety procedures and practices during the compliance and conformance verification operation
- prioritised verification work according to production schedules
- verified relevant documentation and conducted audits correctly and efficiently against design specifications, local codes and standards for any of the following:
 - connections, structural components and physical dimensions of timber framing structure regarding grade, thickness, tolerances and choice of materials
 - services equipment including hydraulic, electrical and heating, ventilation, and air conditioning (HVAC) mechanical
 - partition/walls or floor elements of the structure
 - fire-rated walls or fire protection systems
 - variations of material properties or system component from design specifications
 - off-site installation of services
 - completed timber building system

- identified non-conformant or non-compliant components of timber building systems
- recommended appropriate corrective actions
- reported legibly and accurately.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety procedures and practices related to the work activity
- provisions for components including hydraulics, electrical and HVAC mechanical services and plumbing
- verification procedures for product compliance and conformance in the manufacture of prefabricated timber building systems
- elements of valid and efficient manufacturing inspections, verifications and certification processes as outlined in national and international standards
- methods of verifying product quality (actual versus claimed quality) and compliance with the National Construction Code in regards to Performance Requirements
- certification requirements for thermal, acoustic and fire performance of partition and floor elements
- fire rating testing techniques
- certification requirements for hydraulics, electrical and HVAC mechanical services according to standards and manufacturer requirements
- hazards and risks associated with manual handling of prefabricated timber building systems that generally arise from off-site manufacture, including:
 - cut metal edges
 - exposed screw tips and nails
 - abrasion of insulation materials resting on metal edges
 - pinch points in connections
 - surfaces that can retain rainwater
- inspection reports and sign-off procedures as accepted by the industry or established within the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computers, keyboards, printers and software used to produce and maintain compliance system records and reports
- specifications:
 - access to industry-specific compliance standards and design documentation

- access to production schedules
- access to comprehensive real or simulated certificates, test documentation and product/manufacture specifications
- access to template inspection reports
- access to workplace policies and procedures for documenting and signing off inspections of product compliance and conformance.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CPPSSI4038 Prepare and present GIS data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS4038 Prepare and present GIS data.

Application

This unit specifies the skills and knowledge required to prepare and present a range of geographic information system (GIS) data using various media. It includes translating client requirements into appropriate data formats and design and layout. The unit also includes gathering feedback as the basis for implementing quality improvements.

This unit is suitable for entry-level technicians who use a broad range of cognitive, technical and communication skills to select and apply a range of methods, tools, materials and information to complete routine and non-routine activities and provide and transmit solutions to a variety of predictable and sometimes unpredictable problems.

Surveying and spatial information skills are applied in a range of industry contexts, including town planning, civil construction, mining, engineering, health, agriculture and defence.

All work must be carried out to comply with workplace procedures, in accordance with relevant state/territory regulations that govern surveying work, as well as work health and safety (WHS) legislation and regulations that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Surveying and Spatial Information Services

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Plan for GIS data presentation.
 - 1.1 Identify intended use of output and presentation requirements in consultation with appropriate persons.
 - 1.2 Assess format, content and extent of data against task and organisational requirements.
 - 1.3 Access and compile spatial datasets from appropriate sources to meet presentation specifications.
 - 1.4 Comply with administrative and legislative requirements for accessing and displaying spatial data, including data privacy, copyright and licensing.
 - 1.5 Comply with organisational requirements for WHS when using screen-based equipment.

- 2 Prepare GIS data for presentation.
 - 2.1 Interpret metadata statements for compliance with licensing.
 - 2.2 Query spatial data and select data for display to meet presentation requirements.
 - 2.3 Check formatted data and resolve problems of data compatibility and quality according to display specifications.
 - 2.4 Identify display file format to meet task specifications.

- 3 Finalise GIS data presentation.
 - 3.1 Present spatial data according to task, client requirements and organisational requirements.
 - 3.2 Obtain feedback on display from appropriate persons.
 - 3.3 Analyse feedback to identify improvements and adjust display to meet task and organisational requirements.
 - 3.4 Document improvements applied to presentation design.
 - 3.5 Complete documentation in accordance with organisational requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPPSIS4038 Prepare and present GIS data.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSSI4038 Prepare and present GIS data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS4038 Prepare and present GIS data.

Performance Evidence

To demonstrate competency a candidate must meet the elements and performance criteria of this unit by preparing and presenting geographic information system (GIS) data for two different projects.

Each project must incorporate:

- the built or natural environment
- two different data sets
- both vector and raster data
- map with standard symbology, presentation and metadata.

Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- administrative and legislative requirements for accessing and presenting digital and hard copy GIS data, including data privacy, copyright and licensing
- sources of GIS data
- GIS data file formats
- Australia New Zealand Land Information Council (ANZLIC) metadata fields relating to accuracy, currency, extent, availability and datasets
- components of map design principles
- organisational requirements for preparing and displaying GIS data.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- computer and suitable software
- high resolution hardware, including plotter or printer and computer screen.

Links

Companion volumes to this training package are available at the VETNet website -

CPPWMT3002 Conduct waste resource recovery

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3014A Manually sort waste.
- CPPWMT3019A Prepare waste for re-use.
- CPPWMT3046A Conduct resource recovery.

Application

This unit specifies the skills and knowledge required to recover resources from waste streams. It includes sorting waste according to waste pathways, identifying and segregating waste products able to be re-used, collating waste resources using mechanical separation technologies, and storing and monitoring recovered resources to maintain quality and product integrity.

A person who achieves this unit of competency is expected to take responsibility for completing these tasks with a high degree of self-direction.

This unit forms part of the licensing requirements for operating plant and equipment used in waste management. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

Nil.

Unit Sector

Waste management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to recover waste resources.

1.1 Review job schedule to confirm work activities for waste resource recovery and clarify issues with relevant persons.

- 1.2 Review workplace policies and procedures and work health and safety (WHS) requirements for waste recovery and apply to work tasks.
 - 1.3 Select, check and use personal protective equipment appropriate for work activities.
 - 1.4 Identify hazards and risks associated with work activities and implement required controls according to WHS requirements.
 - 1.5 Set up waste sorting areas according to workplace requirements.
 - 1.6 Conduct pre-start and basic maintenance checks, following manufacturer instructions, of plant and equipment required to sort and separate waste.
- 2 Identify and separate resources from waste.
- 2.1 Identify and segregate waste according to waste pathways and identify waste products able to be recovered.
 - 2.2 Operate plant and equipment to sort and collate waste resources according to waste types.
 - 2.3 Place separated waste into fit-for-purpose containers or areas according to workplace requirements.
 - 2.4 Monitor waste containment to ensure adequate available storage.
- 3 Store and monitor waste product and calculate charges.
- 3.1 Store recovered waste products ensuring quality is maintained and contamination prevented.
 - 3.2 Monitor containment to ensure integrity of waste containers.
 - 3.3 Calculate waste product charges according to workplace requirements.
- 4 Finalise resource recovery and complete
- 4.1 Shut down and secure plant and equipment following manufacturer instructions.

- documentation.
- 4.2 Dispose of waste products not claimed within designated holding period according to workplace requirements.
 - 4.3 Complete recovery documentation according to workplace requirements.
 - 4.4 Clean and maintain sorting site, plant and equipment according to workplace requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes but is not equivalent to:

- CPPWMT3014A Manually sort waste.
- CPPWMT3019A Prepare waste for re-use.
- CPPWMT3046A Conduct resource recovery.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPWMT3002 Conduct waste resource recovery

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3014A Manually sort waste.
- CPPWMT3019A Prepare waste for re-use.
- CPPWMT3046A Conduct resource recovery.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting waste resource recovery operations on two separate occasions.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- circular economy and objectives to maximise value from resources in the economy
 - legislative and procedural requirements applicable to waste resource recovery and relevant to the workplace:
 - commonwealth, state and territory legislation and regulations in the state or territory of operation including work health and safety (WHS)
 - environmental protection
- procedures for setting up sorting sites
- resource recovery options
- techniques for collating waste resources using mechanical separation technologies
- types of facilities that process recovered resources:
 - material recovery facilities
 - alternative waste treatment facilities
 - recycling facilities
 - garden organics processing facilities
- types of materials that can be recovered from waste and re-used or processed by recycling, composting and waste-to-energy generation
- types of non-conforming waste relevant to operational requirements of workplace:
 - contaminated waste
 - inferior quality and unacceptable waste streams

- typical hazards encountered when sorting and separating waste
- waste hierarchy and the importance of waste avoidance and resource recovery
- waste types and pathways
- workplace policies and procedures for conducting waste resource recovery:
 - documentation and reporting
 - WHS:
 - hazard identification, risk assessment and control using the hierarchy of control
 - injury, dangerous occurrence and incident reporting
 - personal protective equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, job schedules, documentation, waste, plant and equipment required to achieve the performance evidence.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

CPPWMT4003 Implement waste management plans

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes and is equivalent to CPPWMT4007A Implement waste management plans.

Application

This unit specifies the skills and knowledge required to implement waste management plans. It includes allocating and organising resources to implement waste management objectives and manage hazards and risks, monitoring implementation to ensure compliance against procedures and required activities, and reviewing and updating plans to incorporate improvements.

A person who achieves this unit of competency is able to use specialised knowledge to complete routine and non-routine tasks and deal with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit of competency at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Waste management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | | |
|---|-----|--|
| 1 Organise and allocate resources to implement waste management plan. | 1.1 | Review waste management plan to clarify resource requirements and waste management objectives. |
| | 1.2 | Review workplace policies and procedures, legislation and regulations and apply requirements to waste management objectives. |

- 1.3 Organise equipment and personnel required to implement waste management plan according to workplace requirements.
 - 1.4 Manage waste management hazards and risks according to risk management strategy detailed in waste management plan.
 - 1.5 Plan and schedule specified activities to implement waste management plan.
- 2 **Oversee waste management objectives and activities.**
 - 2.1 Supervise waste management activities to ensure compliance with waste management plan and apply contingency measures to respond to changing circumstances.
 - 2.2 Provide guidance and information to relevant persons to support efficiency and ensure waste management plan activities and objectives are achieved.
 - 2.3 Monitor progress against waste management objectives and take actions required to ensure activities are implemented in line with waste management plan.
- 3 **Monitor implementation of waste management plan.**
 - 3.1 Review effectiveness of waste management plan in meeting waste management objectives.
 - 3.2 Seek feedback from relevant persons on effectiveness of waste management plan and identify improvements.
 - 3.3 Provide recommendations to update waste management plan to relevant persons.

Foundation Skills

Unit Mapping Information

Supersedes and is equivalent to CPPWMT4007A Implement waste management plans.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPWMT4003 Implement waste management plans

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes and is equivalent to CPPWMT4007A Implement waste management plans.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- implementing a waste management plan that achieves waste management objectives involving two of the following:
 - carbon emissions reduction
 - traffic congestion reduction
 - waste avoidance
 - waste minimisation
 - waste recovery and recycling
- monitoring implementation of waste management plan over a defined period and making two recommendations to improve current plan.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- circular economy and objectives to maximise value from resources in the economy
- environmental issues in waste management
- features of waste management plans
- legislative and procedural requirements applicable to implementing waste management plans and relevant to the workplace:
 - commonwealth, state and territory legislation and regulations in the state or territory of operation, including work health and safety (WHS)
 - classifications of dangerous goods and hazardous substances
 - duty of care
 - environmental protection
 - local government by-laws
 - licence requirements
- scheduling techniques

- techniques for monitoring or reviewing waste management plans to identify improvements
- typical hazards and risks associated with waste management operations
- waste hierarchy
- waste types
- workplace policies and procedures for implementing waste management plans:
 - allocating equipment and personnel
 - client service
 - documentation and reporting
 - WHS:
 - hazard identification, risk assessment and control using the hierarchy of control
 - injury, dangerous occurrence and incident response and reporting
 - personal protective equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, waste management plan, operational documentation and resources required to achieve the performance evidence.

CPPWMT4010 Assess and advise on waste avoidance options

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes and is equivalent to CPPWMT4062A Apply waste avoidance techniques.

Application

This unit specifies the skills and knowledge required to assess and advise on waste avoidance options. It includes confirming waste types and drivers for waste generation and identifying and assessing opportunities to avoid waste against the waste hierarchy. It requires analysing the cost-benefits and feasibility of identified waste avoidance options and presenting the findings.

A person who achieves this unit of competency is able to use specialised knowledge to complete routine and non-routine tasks and deal with predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit of competency at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Waste management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Confirm waste avoidance requirements.

- 1.1 Review documentation to clarify waste avoidance objectives and clarify issues with relevant persons.
- 1.2 Interpret legislation, regulations and workplace policies and procedures for advising on waste avoidance options.

- 1.3 Select, check and use personal protective equipment appropriate for work activities.
 - 1.4 Obtain required permissions and access site according to workplace requirements.
 - 1.5 Conduct site and waste inspection according to workplace requirements.
 - 1.6 Confirm and record waste types, drivers and volumes at the site.
- 2 Identify and assess options for avoiding waste.
- 2.1 Consult with relevant persons to discuss identified waste types, drivers and volumes being generated.
 - 2.2 Identify potential alternative processes, products or practices to meet waste avoidance objective.
 - 2.3 Assess alternative processes, products or practices against the waste hierarchy.
 - 2.4 Develop suitable waste avoidance options and confirm compliance with workplace and regulatory requirements.
- 3 Evaluate options and present recommendations.
- 3.1 Prioritise options in order of greatest waste avoidance potential.
 - 3.2 Analyse cost-benefits and feasibility of recommended waste avoidance options.
 - 3.3 Document waste avoidance assessment, cost-benefit and feasibility analysis and recommendations.
 - 3.4 Present waste avoidance recommendations to relevant persons within agreed timeframes.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- oral communication skills to interact with people from diverse socioeconomic and cultural backgrounds.

Unit Mapping Information

Supersedes and is equivalent to CPPWMT4062A Apply waste avoidance techniques.

Links

Companion volumes to this training package are available at the VETNet website -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPWMT4010 Assess and advise on waste avoidance options

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes and is equivalent to CPPWMT4062A Apply waste avoidance techniques.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by assessing and advising on waste avoidance options in two different areas of waste generation.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- impact of waste on the environment and relationship between waste and greenhouse emissions
- legislative and procedural requirements applicable to assessing and advising on waste avoidance options:
 - commonwealth, state and territory legislation and regulations in the state or territory of operation including, work health and safety (WHS)
 - confidentiality and privacy
 - environmental protection
- mathematical methods used to calculate costs and benefits of waste avoidance options
- methods for prioritising waste avoidance options in the order of greatest waste avoidance potential
- types of waste avoidance options and methods for assessing feasibility of options
- waste hierarchy
- waste types, drivers and causes
- workplace policies and procedures for assessing and advising on waste avoidance options:
 - client service
 - documentation and reporting
 - WHS:
 - hazard identification, risk assessment and control using the hierarchy of control
 - injury, dangerous occurrence and incident reporting
 - personal protective equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, documentation, technologies, equipment and waste site required to achieve the performance evidence.

FBPOPR2074 Carry out manual handling tasks

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify manual handling requirements of a work function, use manual handling aids to lift or move items, and identify and assess manual handling risks.

This unit applies to individuals who work under supervision in most situations and exercise limited autonomy.

All work must be carried out to comply with workplace procedures according to state/territory health and safety, environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Participate in processes to identify and assess manual handling	1.1 Identify the manual handling components of a work task 1.2 Identify manual handling risks to self and others within level of responsibility, and inform supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Contribute to manual handling risk minimisation	2.1 Determine approximate weight of item to be handled 2.2 Identify whether manual handling equipment is required and, if so, select appropriate equipment 2.3 Check that manual handling equipment is available and ready for use 2.4 Ensure that personal protective equipment (PPE), including clothing and footwear, is fit for use 2.5 Follow safe work procedures
3. Plan and conduct manual handling	3.1 Identify hazards involved with manual handling task 3.2 Use appropriate PPE and clothing, and ensure correct fit 3.3 Modify workplace layout and environment within area of control to minimise manual handling risk 3.4 Modify work tasks within area of control to minimise the risk of injury 3.5 Use manual handling aids according to workplace procedures 3.6 Use movement and postures to minimise the risk of injury within the limits of the work environment and the demands of the task

Assessment Requirements for FBPOPR2074 Carry out manual handling tasks

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively carried out a minimum of three different manual handling tasks, including:

- identifying the risks (to self and others) associated with each manual handling task
- eliminating risks, including through movement, posture and effectively using equipment provided
- modifying work to eliminate or minimise risk
- applying safe work procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different types of manual handling activities, including lifting, reaching, pushing, pulling, holding, restraining, throwing and carrying
- types of injuries that can result from manual handling
- aspects of manual handling that may be risks (hazard identification), including:
 - repetitive or sustained application of force
 - repetitive or sustained awkward posture
 - repetitive or sustained movement
 - application of high force
- manual handling of unstable or unbalanced loads, such as liquids or animals
- workplace procedures and responsibilities for identifying and reporting manual handling hazards
- factors to be considered when assessing manual handling risks relevant to work role (referring to workplace risk assessment sheets and code of practice advice where available), including:

- postures
- movements
- force required
- duration and frequency of manual handling activity
- environmental conditions, such as hot and cold work environments
- procedures and responsibilities for conducting risk assessments of manual handling tasks
- typical options for eliminating or controlling manual handling risks associated with work functions, including principles of hierarchy of control and the advantages and disadvantages of different options
- types of equipment and/or techniques used to eliminate or reduce manual handling risks in the workplace, including when and how to use each type of technique/equipment relevant to manual handling tasks in work role
- level of authority to address health and safety issues related to manual handling and related workplace arrangements for managing safety issues
- sources of advice on manual handling relevant to work function
- equipment available to assist manual handling, related inspections required to identify faulty equipment, and related reporting procedures
- personal protective equipment (PPE) checks, including checking:
 - correct fit
 - appropriate for task
 - undamaged
- movement and postures that increase the risk of injury, and movements and postures to minimise the force in the body as applied to specific tasks in the workplace.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - personal protective clothing and equipment
 - work procedures, including advice on manual handling requirements and safe work practices
 - manual handling equipment

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Links

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=78b15323-cd38-483e-aad7-1159b570a5c4>

FBPVIT3004 Monitor and maintain nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to monitor and maintain containerised nursery plants.

The unit applies to individuals who carry out workplace procedures in completing tasks associated with maintaining nursery plants.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- FBPVIT2012 Identify and treat nursery plants and disorders

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor environmental parameters	1.1 Confirm job requirements 1.2 Identify potential health and safety hazards and controls according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Select and fit personal protective equipment according to the job requirements 1.4 Monitor environmental parameters against the production plan 1.5 Alter environmental parameters to meet the needs of the plants 1.6 Maintain nursery hygiene to comply with industry and workplace procedures
2. Determine daily water requirements	2.1 Identify plant water requirements to maintain required health and growth according to workplace procedures 2.2 Irrigate plants according to workplace procedures 2.3 Monitor water requirements according to workplace procedures 2.4 Maintain nursery irrigation system to meet plant production plan
3. Implement treatments to promote plant growth	3.1 Test potting media according to workplace procedures 3.2 Monitor overall health of plants according to workplace procedures 3.3 Implement plant treatments according to production plans 3.4 Identify and address non-conformances according to workplace procedures
4. Monitor the dispatch of stock	4.1 Confirm availability of stock and timing of dispatch with customers according to workplace procedures 4.2 Prepare plants for dispatch in line with customer requirements 4.3 Check stock to ensure it meets quality specifications 4.4 Check orders against stock being dispatched to ensure compliance 4.5 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Reading	<ul style="list-style-type: none"> Comprehend information from a variety of workplace documents
Numeracy	<ul style="list-style-type: none"> Calculate numerical information relating to measuring quantities, adjusting equipment controls and stock operations
Navigate the world of work	<ul style="list-style-type: none"> Apply workplace procedures and legislative responsibilities relevant to own role
Interact with others	<ul style="list-style-type: none"> Use required communication mode to report operational information to relevant personnel
Get the work done	<ul style="list-style-type: none"> Respond to routine problems by referring to workplace procedures Plan and organise tasks to achieve job requirements

Unit Mapping Information

Assessment Requirements for FBPVIT3004 Monitor and maintain nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively monitored and maintained three different containerised nursery plants and demonstrated the following:

- identifying and following health and safety in the workplace procedures
- selecting and using personal protective equipment (PPE)
- identifying environmental factors and their effect on plant growth and health
- monitoring and controlling irrigation and treatments to meet production outcomes
- identifying and addressing non-conformances
- confirming available stock levels to meet customer requirements
- preparing stock for dispatch
- dispatching nursery plant stock to meet customer requirements
- completing documentation to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic vine physiology, as it applies to:
 - transpiration
 - water intake
 - nutrient uptake
 - photosynthesis
 - respiration
 - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality:

- buds, nodes and tendrils
- cambium, epidermis, phloem and xylem
- leaf blade, bract and petiole
- bunch, berries and flowers
- key grape varieties and their distinguishing features:
 - berry and bunch characteristics
 - frost and disease resistance
 - flavour and style
- annual grapevine growth stages:
 - budburst
 - flowering
 - on set of ripening
 - maturity
- irrigation systems and methods including:
 - methods of calculating daily water needs
 - methods for monitoring water use
 - relationship between water needs of nursery plants and environmental parameters
- maintenance of irrigation systems:
 - fixing blockages
 - servicing irrigation system components
 - identifying and reporting faults in the irrigation system
 - fixing leaking heads and hoses
 - monitoring water requirements
 - using soil moisture devices
- checking plants for physical signs of water stress or waterlogging
- types of potting media, their characteristics and effect on plant growth
- tests to determine quality of potting media:
 - pH, drainage, aeration
 - salinity
 - nitrate levels
 - water repellence
- maintenance of work area to meet workplace hygiene standards:
 - removing weeds
 - removing dead or diseased plant materials
 - washing work area on transfer of plants
 - disinfecting tools, equipment and work areas
 - using foot baths on entry to different work areas
- procedures for applying treatments to vines:
 - fungicides
 - fertilisers

- insecticides
- hormones
- pruning
- hardening off
- preparing, mixing and using chemicals
- quality parameters for nursery plants
- treatments required by plants at different growth stages
- health and safety hazards and controls in the workplace:
 - selecting, fitting and using appropriate PPE
 - identifying potential and existing hazards in the work area and implementing safe work procedures to minimise hazards
- procedures for monitoring and preparing stock for dispatch:
 - packing, dispatching and handling techniques of nursery plants
 - labelling containers
 - checking orders against stock prepared
 - hydrating stock
- procedures and responsibility for reporting problems and anomalies
- procedures for liaising with customers
- procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - equipment, services and corresponding information
 - nursery stock
 - hygiene procedures, materials and equipment
 - system for recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, plant quality and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FSKLRG011 Use routine strategies for work-related learning

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify own learning goals and needs and develop a formal learning plan to participate in a vocational or workplace learning environment.

An individual performing these tasks works independently and uses familiar support resources as needed.

This unit applies to individuals who use, or are preparing to use, learning skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

This unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) learning core skill indicators .01 and .02 at level 3 in the workplace and employment domain of communication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for learning	1.1 Identify work-related learning goals 1.2 Investigate and select a range of formal and informal learning

Element	Performance Criteria
	pathways 1.3 Investigate a range of approaches to achieve goals, identifying strengths and limitations of approaches 1.4 Anticipate potential barriers to learning
2. Use strategies for learning	2.1 Identify and select work-related goal 2.2 Identify a preferred approach to achieving work-related learning goal 2.3 Identify and implement strategies to address barriers to achieving learning goal 2.4 Propose routine learning strategies to achieve learning goal 2.5 Identify and access a range of reliable support resources 2.6 Create and use a formal learning plan to implement strategies
3. Review own learning progress	3.1 Monitor progress against plan and reflect on actions and outcomes, identifying options for improvement 3.2 Seek feedback on learning progression 3.3 Identify areas for further learning and training

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Mapping Information

Supersedes and is equivalent to FSKLRG11 Use routine strategies for work-related learning.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=f572fe10-a855-4986-9295-3852c771f178>

Assessment Requirements for FSKLRG011 Use routine strategies for work-related learning

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least one formal learning plan to support the achievement of identified work-related learning goal and learning pathway
- check and review progress against plan on at least one occasion.
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- work related tasks requiring learning
- common barriers to learning and solutions to address barriers
- routine strategies to support learning goals
- own learning goals
- relevant education and training requirements for selected learning pathway options
- relevant support resources for personal learning goals and techniques to assess validity of source
- typical features of a formal learning plan
- approaches to check and respond to progress of learning plans.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Skills must be demonstrated using routine texts or tasks that reflect those typically found in a workplace.

The following resources are to be made available:

- own familiar support resources.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, learning, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.

FSKOCM007 Interact effectively with others at work

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to interact effectively with others in the workplace, including external clients and internal staff. Interactions include giving or responding to spoken instructions, responding to customer queries and complaints, explaining a workplace procedure, or taking telephone calls from the general public or internal staff.

An individual performing these tasks works independently and uses familiar support resources as needed.

This unit applies to individuals who use, or are preparing to use, oral communication skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

This unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) oral communication core skill indicators .07 and .08 at level 3 in the workplace and employment domain of communication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Oral Communication

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to interact with others at work	1.1 Identify type of interaction and audience 1.2 Interpret purpose of interaction and the information required for

Element	Performance Criteria
	exchange 1.3 Establish appropriate style, tone and register of communication to meet audience needs 1.4 Identify oral communication strategies required for spoken interaction
2. Participate in interactions with others	2.1 Use oral communication strategies to communicate effectively 2.2 Interact using conventional grammar, every day and some specific vocabulary, and routine pronunciation appropriate to the workplace 2.3 Recognise and use appropriate non-verbal communication strategies
3. Review performance	3.1 Confirm if intended meaning and information has been communicated 3.2 Seek feedback and evaluate effectiveness of own performance 3.3 Identify strategies for improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to FSKOCM007 Interact effectively with others at work.

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=f572fe10-a855-4986-9295-3852c771f178>

Assessment Requirements for FSKOCM007 Interact effectively with others at work

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- participate in at least two different spoken interactions at work appropriate to audience and purpose.

Participation must include speaking and listening.

Knowledge Evidence

During the above spoken exchange the candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- different types of workplace interactions and their typical audiences
- common purposes of workplace interactions
- different registers, styles and tones of workplace interactions and their application to differing audiences
- relevant oral communication strategies that support effective spoken interactions at work
- range of tenses and appropriate use
- intelligible pronunciation of key language
- routine and some specialised vocabulary
- non-verbal feedback strategies and their application.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context. Spoken exchanges must be undertaken with real individuals.

Skills must be demonstrated using routine oral exchanges that reflect those typically undertaken in a workplace.

The following resources are to be made available:

- own familiar support resources
- participants for interactions described in performance evidence.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, oral communication, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.
-

FSKRDG007 Read and respond to simple workplace information

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify, interpret and respond to information in simple and familiar workplace texts in printed or digital formats, such as short messages, notices, instructions, forms, rosters, simple diagrams, tables and charts.

An individual performing these tasks may work with an expert or mentor where support is available if requested.

This unit applies to individuals who use, or are preparing to use, reading skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

This unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) reading core skill indicators .03 and .04 at level 2 in the workplace and employment domain of communication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Reading

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to read simple and familiar workplace text	1.1 Identify purpose for reading and select workplace text relevant to task

Element	Performance Criteria
	1.2 Identify text type 1.3 Identify audience and purpose of text 1.4 Identify text structure and distinguishing text features
2. Identify and interpret information in text	2.1 Navigate text to locate relevant information 2.2 Identify and interpret workplace terminology in text 2.3 Use reading strategies to interpret relevant information and construct meaning 2.4 Interpret and analyse information
3. Check understanding and identify response to text	3.1 Check that information in text has been correctly understood 3.2 Use information to identify appropriate response

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to FSKRDG07 Read and respond to simple workplace information.

Assessment Requirements for FSKRDG007 Read and respond to simple workplace information

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

Evidence of the ability to complete tasks outlined in the elements, performance criteria, and foundation skills of this unit, including on at least one occasion, evidence of the ability to:

- interpret and identify appropriate responses to information in two different simple and familiar workplace texts.
-

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- reasons for reading and engaging with simple workplace texts
- audience, purpose and uses of a limited range of simple workplace texts
- common features of simple workplace texts and how to use these features to identify text type
- high-frequency terminology relevant to workplace in simple workplace texts
- techniques to navigate simple informal texts to locate general and specific information
- reading strategies to support the interpretation of information in simple workplace texts
- techniques to interpret and analyse simple workplace information
- suitable responses to information in simple workplace texts.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Skills must be demonstrated using simple and familiar texts that reflect those typically found in a workplace.

The following resources are to be made available:

- an expert or mentor to provide support to learner if requested
- dictionary or online resource to check word meanings
- own familiar support resources
- simple workplace information.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, reading, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.
 -

FSKWTG006 Write simple workplace information

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to write simple workplace information, which may be in printed or digital formats, such as workplace reports, including incident or accident reports, pro-formas or templates, emails, messages, notes, statements or WHS records.

An individual performing these tasks may work with an expert or mentor where support is available if requested.

This unit applies to individuals who use, or are preparing to use, writing skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

The unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) writing core skill indicators .05 and .06 at level 2 in the workplace and employment domain of communication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Writing

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to write simple workplace text	1.1 Identify and confirm type and purpose of familiar workplace text 1.2 Identify audience for workplace text and appropriate register of

Element	Performance Criteria
	writing 1.3 Identify common text features and select for use 1.4 Identify personal and familiar workplace information required to develop text 1.5 Develop plan with a limited number of steps to write text
2. Draft text	2.1 Develop simple structure for text 2.2 Write text using simple vocabulary, grammatical structures and conventions 2.3 Apply very basic organising principles to sequence information 2.4 Layout and present text to meet workplace purpose
3. Review and finalise text	3.1 Check draft text for completeness, accuracy and suitability to audience and purpose 3.2 Review writing, incorporating feedback 3.3 Finalise text based on re-reading

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to FSKWTG06 Write simple workplace information and FSKWTG04 Write simple informal workplace texts.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=f572fe10-a855-4986-9295-3852c771f178>

Assessment Requirements for FSKWTG006 Write simple workplace information

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- draft, check and revise two of the following different simple workplace texts:
 - workplace report, including incident or accident reports
 - formatted text, pro-formas or templates, for example, internal job application form, shift handover reports, purchase orders, or invoices
 - standard workplace forms, including vehicle log or petty cash claim
 - brief shift note
 - email
 - message or note
 - roster or action plan for other members of a work group
 - list or simple flyer of information for discussion
 - dot point statement about a process or procedure.
 -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- different forms, structures, and uses of simple formal and informal workplace texts
- common features of simple workplace texts and their uses, including formatted and free form texts
- basic differences between informal and formal register of writing
- simple techniques for planning to write workplace texts
- simple grammar and vocabulary relevant to self, workplace and everyday life
- basic punctuation
- simple techniques for organising and sequencing information
- techniques to layout and present informal and formal workplace texts

- relevance and application, with support, of spell checking devices
- techniques to review and revise texts.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Skills must be demonstrated using simple formatted texts and tasks with a clear purpose that reflect those typically found in a workplace.

The following resources are to be made available:

- an expert or mentor to provide support to learner if requested
- functioning computer and keyboard when digital information is being written in the performance evidence
- paper-based or electronic dictionary
- own familiar support resources.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, writing, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.

HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to all persons who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for cardiopulmonary resuscitation (CPR).
- 1.4. Seek assistance from emergency services.

2. Perform CPR procedures.

- 2.1. Perform CPR in accordance with the ARC guidelines.
- 2.2. Display respectful behaviour towards casualty.
- 2.3. Operate an automated external defibrillator (AED) according to manufacturers' instructions.

3. Communicate details of the incident.

- 3.1. Accurately convey incident details to emergency services.
- 3.2. Report details of incident in line with appropriate workplace or site procedures.
- 3.3. Maintain privacy and confidentiality of information in line with statutory or organisational policies.

4. Review the incident.
- 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID001 Perform cardiopulmonary resuscitation

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>

Assessment Requirements for HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
 - handing over to emergency services
 - providing an accurate verbal report of the incident
 - reviewing the incident
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - relevant ARC guidelines to managing the unconscious breathing and non-breathing casualty and provision of CPR
 - potential incident hazards and risk minimisation processes when providing first aid

- infection control procedures, including use of standard precautions and resuscitation barrier devices
- requirements for currency of skill and knowledge
- first aid codes of practice
- appropriate workplace or site procedures relevant to the provision of first aid
- legal, workplace and community considerations, including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- AED training devices
- personal protective equipment (PPE).

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid equipment according to manufacturers' instructions.
- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

3. Communicate details of the incident.
 - 3.1. Accurately convey incident details to emergency services.
 - 3.2. Report details of incident in line with appropriate workplace or site procedures.
 - 3.3. Complete applicable workplace or site documentation, including incident report form.
 - 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.
 - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
 - minor wound cleaning and dressing
 - nosebleed
 - shock

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally

- rate, ratio and depth of compressions and ventilations
- correct hand positioning for compressions
- basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening and life-threatening bleeding
 - burns
 - cardiac conditions, including chest pain
 - choking
 - diabetes
 - drowning
 - envenomation - all current treatments
 - eye injuries
 - fractures, dislocations, strains and sprains
 - head, neck and spinal injuries
 - hypothermia
 - hyperthermia
 - minor wounds
 - nose-bleed
 - poisoning
 - seizures
 - shock
 - sharps injuries
 - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in a remote or isolated site over an extended period of time until medical assistance is provided, or evacuation occurs.

This unit applies to any site where medical assistance is likely to be delayed.

First aid is to be provided in line with guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1. Prepare equipment for first aid response in remote or isolated site. | 1.1. Evaluate information about remote or isolated site and identify potential injuries and illnesses requiring extended management.
1.2. Select first aid equipment and resources to manage a range of potential incidents, according to organisational emergency response and first aid procedures.
1.3. Select communication equipment to facilitate emergency response in remote or isolated site.
1.4. Complete pre-departure safety and serviceability checks on equipment. |
| 2. Assess the situation. | 2.1. Recognise and assess an emergency situation.
2.2. Ensure safety for self, bystanders and casualty.
2.3. Assess casualty to determine extent of first aid response.
2.4. Identify need for medical assistance and relay initial and |

- concise information.
- 2.5. Triage when multiple casualties are involved.
3. Apply appropriate first aid procedures.
- 3.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers.
- 3.2. Provide first aid in accordance with established first aid principles.
- 3.3. Display respectful behaviour towards casualty.
- 3.4. Obtain consent from casualty where possible.
- 3.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 3.6. Operate first aid equipment according to manufacturers' instructions.
- 3.7. Monitor the casualty's condition and respond in accordance with first aid principles.
- 3.8. Assess need to evacuate casualty, ability to transport to medical assistance or need for external assistance.
- 3.9. Administer medication as required according to medical instructions.
4. Communicate details of the incident.
- 4.1. Accurately convey incident details to emergency services.
- 4.2. Report details of incident in line with appropriate workplace or site procedures.
- 4.3. Complete applicable workplace or site documentation, including incident report form.
- 4.4. Maintain privacy and confidentiality of records and information in line with applicable statutory or organisational policies.
5. Coordinate evacuation and first aid activities until assistance arrives.
- 5.1. Determine need, in consultation with external services, to evacuate casualty.
- 5.2. Provide accurate information about location of incident, number of casualties, their condition and their position to enable deployment of appropriate resources.
- 5.3. Continue to provide treatment using available resources until help arrives.
- 5.4. Prepare site for evacuation of patient.
- 5.5. On approach, assist emergency services to locate the site of the incident.
- 5.6. Follow instructions and provide assistance to emergency services personnel during evacuation.
6. Review the incident.
- 6.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
- 6.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID005 Provide first aid in remote situations.

Assessment Requirements for HLT AID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) guidelines and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performing at least 2 minutes of ventilation and at least 2 minutes of compressions during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - responding appropriately in the event of regurgitation or vomiting
 - demonstrating a rotation of operators with minimal interruptions to compressions
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - minor wound cleaning and dressing
 - nosebleed
 - shock
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques for remote situations and appropriate equipment improvisations

- head, neck and spinal injuries
- hypothermia and hyperthermia
- life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - conducting a secondary survey assessment
 - assessing vital signs respirations, pulse, temperature
 - level of consciousness
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident
- conducted a basic triage for a multiple casualty incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies including those relevant to remote or isolated sites
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of medication

- legal requirements
- the five rights
- the responsibilities of the first aider
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions or injuries:
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - burns
 - cardiac conditions, including chest pain
 - choking
 - diabetes
 - drowning
 - envenomation - all current treatments
 - eye injuries
 - fractures, dislocations, sprains and strains
 - head, neck and spinal injuries
 - hypothermia
 - hyperthermia
 - minor wounds
 - nose-bleed
 - poisoning
 - seizures
 - shock
 - sharps injuries
 - stroke
 - life threatening bleeding including use of tourniquets and haemostatic dressings

- considerations when providing first aid including:
 - assessment, interpretation and documentation of vital signs, including normal clinical values for respirations, temperature, pulse and level of consciousness
 - how to conduct a secondary assessment of a casualty
 - basic triage processes
 - ongoing care requirements of casualty beyond initial treatment
- remote considerations in the provision of first aid, including:
 - the nature of remote or isolated sites and how this may impact on first aid management
 - key features, functions and limitations of different types of emergency communication equipment used in remote or isolated sites, and factors that affect choice:
 - radio equipment
 - mobile phones
 - satellite phones
 - alerting and tracking devices including personal locator beacons (PLBs)
 - management options relating to transporting casualty, including aero-medical evacuation
 - specific considerations contextualised to alpine, desert, marine, rural or remote settings and tropical environments
 - methods used to assist emergency services to locate incident sites and the key features, functions and limitations of resources used to assist:
 - verbal directions
 - flags
 - flares or smoke
 - fires
 - use of man-made and natural resources to supplement first aid equipment
 - content of remote area first aid kits
 - content of remote area medication boxes
- psychological impacts of first aid incidents on rescuers and how to seek help.
-

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Scenarios must concentrate on the significance of remote or isolated site circumstances.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikin following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training devices
- placebo bronchodilator and spacer device
- haemostatic dressings
- haemostatic wound packing trainer
- thermometers
- tourniquets
- tourniquet trainer
- different types of wound dressings and bandages
- blankets and items to manage a casualty for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other appropriate workplace or site incident report form, which includes space for recording vital signs of casualties
- remote first aid kits
- immobilisation devices.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID014 Provide Advanced First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide an advanced first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide an advanced first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Deploy resources to appropriate locations as required in line with appropriate workplace or site procedures.
- 1.5. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid and ancillary equipment according to manufacturers' instructions.

- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.
3. Coordinate first aid activities until arrival of medical assistance.
 - 3.1. Identify available resources required and establish communication links with appropriate personnel, emergency services or medical assistance as appropriate.
 - 3.2. Deploy required resources to appropriate locations in an efficient and effective manner to ensure timely treatment of casualties.
 - 3.3. Monitor the condition of casualties in accordance with first aid principles and workplace or site procedures.
 - 3.4. Coordinate evacuation of casualties according to relevant evacuation procedures.
4. Communicate details of the incident.
 - 4.1. Accurately convey incident details to emergency services.
 - 4.2. Report details of incident in line with appropriate workplace or site procedures.
 - 4.3. Complete applicable workplace or site documentation, including incident report form.
 - 4.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
5. Review the incident.
 - 5.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 5.2. Arrange support services for personnel involved in the incident in accordance with relevant procedures.
 - 5.3. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID006 Provide advanced first aid.

Assessment Requirements for HLT AID014 Provide Advanced First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed in line with ARC guidelines, the unconscious, non-breathing adult including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performing at least 2 minutes of ventilation and at least 2 minutes of compression during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - responding appropriately in the event of regurgitation or vomiting
 - demonstrating a rotation of operators with minimal interruptions to compressions
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
 - minor wound cleaning and dressing
 - nosebleed

- shock
- life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least two simulated first aid incidents, one medical and one trauma contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - conducting a secondary survey assessment
 - assessing vital signs respirations, pulse, temperature
 - level of consciousness
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post-incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident
- coordinated a team of people to respond to a multiple casualty incident, including:
 - conducting a basic triage
 - demonstrating effective use of resources
 - demonstrating effective planning techniques
 - moving casualties using suitable extraction method and device and safe manual handling techniques.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements

- awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of medication
 - legal requirements
 - the five rights
 - the responsibilities of the first aider
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- considerations when providing first aid, including:
 - assessment, interpretation and documentation of vital signs, including normal clinical values for respirations, temperature, pulse and level of consciousness
 - how to conduct a secondary assessment of a casualty
 - basic triage processes
 - procedures for dealing with casualties who are aged or infirm
 - procedures for first aid management when dealing with major and minor accidents in the workplace or site
 - procedures when providing first aid to children
 - use of ancillary first aid equipment
 - co-ordination of resources
 - contents of first aid kits
- signs, symptoms and management of the following conditions or injuries:
 - abdominal injuries
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - life-threatening bleeding including use of tourniquets and haemostatic dressings
 - burns
 - cardiac conditions, including chest pain

- childbirth
- choking
- crush injuries
- diabetes
- drowning
- ear injuries and bleeding from the ear
- envenomation - all current treatments
- eye injuries
- fractures, dislocations, strains and sprains
- head, neck and spinal injuries
- hypothermia
- hyperthermia
- minor wounds
- nose-bleed
- poisoning
- seizures
- shock
- sharps injuries
- stroke
- substance misuse, including prescription and illicit drugs and alcohol
- psychological impacts of first aid incidents on rescuers and how to seek help.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training devices
- haemostatic dressings
- haemostatic wound packing trainer
- placebo bronchodilator and spacer device
- thermometers
- tourniquet trainer
- tourniquets

- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form, which includes space for recording vital signs of casualties
- workplace first aid kits
- immobilisation and extrication devices.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID016 Manage first aid services and resources

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to establish, maintain and facilitate the provision of appropriate first aid in the workplace.

The unit applies to workers in nominated occupational first aid or management roles.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1. Determine workplace first aid requirements. | 1.1. Identify workplace hazards and assess associated risks as a basis for determining first aid resource requirements.
1.2. Identify first aid equipment, resources and personnel required to address workplace requirements.
1.3. Develop first aid action plans in consultation with relevant parties.
1.4. Provide information to minimise risk and enable access to first aid facilities. |
| 2. Establish and maintain workplace first aid facilities. | 2.1. Monitor and maintain availability of first aid equipment and personnel to support workplace first aid response.
2.2. Conduct inspections of first aid stock and equipment to ensure currency and operational readiness in line with workplace requirements.
2.3. Ensure equipment is recovered and reprocessed and that waste is disposed of safely according to legislative and workplace procedures.
2.4. Ensure equipment and resources are stored and maintained in line with relevant legislation and manufacturers' or suppliers' instructions.
2.5. Deploy appropriate equipment and personnel to ensure |

- timely and effective first aid response in line with workplace requirements.
3. Maintain workplace first aid records.
 - 3.1. Ensure documentation is completed in line with legislation and workplace procedures.
 - 3.2. Maintain first aid records in line with legislative requirements and workplace security practices.
 - 3.3. Send relevant documents to appropriate bodies in line with workplace and legislative requirements.
 - 3.4. Maintain privacy and confidentiality of records and information in line with privacy legislation and organisational policies.
 4. Review the provision of first aid in the workplace.
 - 4.1. Participate in incident debriefing or evaluation to improve future operations and address individual needs.
 - 4.2. Evaluate management of workplace first aid incidents in relation to required equipment, personnel, current organisational procedures and individual first aid action plans.
 - 4.3. Contribute to the review of workplace policies and procedures in accordance with risk assessment and evaluation of first aid provision.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to HLTAID008 Manage first aid services and resources

Links

Assessment Requirements for HLT AID016 Manage first aid services and resources

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with State or Territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- conducted a workplace risk assessment and evaluation of first aid provisions
- developed a first aid action plan including strategies for management of incidents and individuals needs in accordance with workplace policies and procedures
- used a first aid checklist to service a workplace first aid kit for supplies' replacement and equipment maintenance
- maintained first aid equipment and resources according to manufacturers' instructions
- used and maintained documentation required by the workplace and regulatory authorities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- state/territory regulations, first aid codes of practice and workplace procedures including:
 - workplace requirements for first aid provision in line with the relevant state/territory Work Health and Safety requirements
 - duty of care in relation to first aid provision
 - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
 - infection control principles and procedures, including use of standard precautions based on incident
 - requirements for currency of skill and knowledge
- legal, workplace or community issues relating to the provision of first aid including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - consent
 - capabilities of emergency management services
 - privacy and confidentiality requirements

- importance of debriefing.

Assessment Conditions

Skills must be demonstrated in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Assessment must ensure access to:

- first aid kit and contents checklist
- workplace injury, trauma and/or illness record, or other applicable workplace or site incident report form
- relevant State or Territory Work Health and Safety First Aid Code of Practice.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment, including workplace resources required by the relevant state/territory Work Health and Safety Regulatory Authority.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

MEM05006 Perform brazing and/or silver soldering

Modification History

Release 1. Supersedes and is equivalent to MEM05006C Perform brazing and/or silver soldering

Application

This unit of competency defines the skills and knowledge required to perform brazing (including braze welding) and/or silver soldering and includes the preparation of materials and equipment and the inspection of the completed work.

It applies to silver soldering and brazing using all grades of silver solder and braze.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required see unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, sketches, job sheets or work instructions |
| | | | |
| 2 | Prepare heating equipment | 2.1 | Select the correct process to meet the job specifications |
| | | 2.2 | Ensure heating equipment is in safe working condition |
| | | 2.3 | Assemble heating equipment and set up according to SOPs |
| | | 2.4 | Determine and set gas pressures |
| | | | |
| 3 | Prepare materials | 3.1 | Select and prepare consumables |
| | | 3.2 | Prepare materials using appropriate tools and techniques |
| | | 3.3 | Assemble/align materials to meet specifications |
| | | 3.4 | Identify distortion prevention measures and take appropriate action |
| | | 3.5 | Undertake test run and verify |
| | | | |
| 4 | Braze and/or silver solder | 4.1 | Preheat materials as required |
| | | 4.2 | Apply consumables using appropriate techniques |

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

4.3 Apply jointing material in appropriate quantities

4.4 Anneal material where required

5 Inspect joints

5.1 Remove excess jointing materials

5.2 Inspect joints and report/record inspection results according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Materials include one (1) or more of the following:

- ferrous
- non-ferrous

Fuel gases include one (1) or more of the following:

- acetylene
- liquefied petroleum gas (LPG)
- hydrogen

Heating equipment includes the following:

- gas cylinders
- hoses
- blowpipes
- tips and nozzles
- regulators

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- flashback arrestors

Consumables include one (1) or more of the following:

- fluxes (resin or powder)
- all types of silver solder
- brazing grades

Process includes one (1) or more of the following:

- brazing
- braze welding
- silver soldering

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM05006C Perform brazing and/or silver soldering

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b7050d37-5fd0-4740-8f7d-3b7a49c10bb2>

Assessment Requirements for MEM05006 Perform brazing and/or silver soldering

Modification History

Release 1. Supersedes and is equivalent to MEM05006C Perform brazing and/or silver soldering

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- checking condition of equipment
- setting up:
 - gas cylinders
 - hoses
 - blowpipes
 - tips and nozzles
 - regulators
 - flashback arrestors
- preparing to braze and/or silver solder by assembling/aligning materials in an appropriate manner and applying distortion prevention methods to meet specifications
- applying consumables and brazing and/or silver soldering ferrous and non-ferrous materials
- annealing material using appropriate techniques
- inspecting joints and removing excess jointing materials and recording the results.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- potential equipment faults
- reasons for selecting specific methods of assembly/alignment
- procedures for minimising distortion of the materials being brazed/braze welded/silver soldered
- procedures for assembling and setting up the specific heating equipment and reasons for selection
- reasons for selecting specific consumables

- procedures for preheating the materials to be joined and precautions to be observed
- conducting test runs
- procedures for normalising the temperature of jointed materials and the consequences of inappropriate techniques
- typical applications of brazing/braze welding and silver soldering processes
- procedures for removing excess jointing material
- effects of the use of inappropriate techniques and quantities of jointing material on the performance of the jointed materials
- procedures for inspecting brazed/braze welded/silver soldered joints.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing brazing and or silver soldering at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05049 Perform routine gas tungsten arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Application

This unit of competency defines the skills and knowledge required to prepare the materials and carry out routine gas tungsten arc welding (GTAW) and applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements Unit MEM05019 Weld using gas tungsten arc welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, sketches, job sheets or work instructions
2	Prepare materials and equipment for welding	2.1	Identify location of welds in accordance with procedures and job specifications
		2.2	Clean and prepare materials ready for welding
		2.3	Set up welding equipment to meet work requirement
		2.4	Select settings and consumables to suit application
3	Perform routine welding using GTAW	3.1	Weld materials to job requirements
		3.2	Clean welds according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:

- butt
- fillet

Materials include one (1) or more of the following:

- low carbon/mild steels
- aluminium

Prepared includes one (1) or more of the following:

- pre-heating
- setting up jigs
- fixtures
- clamps
- joint preparation

Welding equipment includes the following:

- hoses
- welding leads and gas shrouds
- electrodes
- gas regulator
- liners
- contact tips

Consumables include the following:

- tungsten electrodes, filler wire and shielding gas

Clean includes the following:

- slag and spatter

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b7050d37-5fd0-4740-8f7d-3b7a49c10bb2>

Assessment Requirements for MEM05049 Perform routine gas tungsten arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas tungsten arc welding (GTAW)
- cleaning and preparing materials for welding to specifications
- setting up welding equipment, including selecting settings and consumables to suit application
- consistently welding materials to specifications
- cleaning welds in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- preparatory requirements
- equipment and equipment settings
- shielding gas properties and applications
- weld characteristics.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing routine GTAW process at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05050 Perform routine gas metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Application

This unit of competency defines the skills and knowledge required to prepare materials and carry out routine gas metal arc welding (GMAW) and applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard or equivalent.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements unit MEM05017 Weld using gas metal arc welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1 Follow standard operating procedures (SOPs) 1.2 Comply with work health and safety (WHS) requirements at all times 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs 1.4 Identify job requirements from specifications, sketches, job sheets or work instructions
2	Prepare materials and equipment for welding	2.1 Identify location of welds in accordance with procedures and job specifications 2.2 Clean and prepare materials ready for welding 2.3 Set up welding equipment to meet work requirement 2.4 Select settings and consumables to suit application
3	Perform routine welding using GMAW	3.1 Weld materials to job requirements 3.2 Clean welds according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:

- butt

MEM09002 Interpret technical drawing

Modification History

Release 1. Supersedes and is equivalent to MEM09002B Interpret technical drawing

Application

This unit of competency defines the skills and knowledge required to interpret technical drawings.

Technical drawings may utilise perspective, exploded views or hidden view techniques and may include symbol glossaries. Drawings are provided to AS 1100 Technical drawing or AS 1102 Graphical symbols and their equivalents from the full range of engineering disciplines.

Where any technical drawing, sketch, chart, diagram is only used as a technique for communication, then this unit does not apply: unit MEM12023 Perform engineering measurements or unit MEM16006 Organise and communicate information should be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 4

Pre-requisite Unit

MEM12023	Perform engineering measurements
MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Drawing, drafting and design

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---------------------------------------|---|
| 1. Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | 1.3 Identify job requirements from specifications, job sheets or associated work instructions |
| 2. Interpret technical drawing | 2.1 Check drawing and version and validate against job requirements |
| | 2.2 Recognise components and assemblies or objects |
| | 2.3 Identify dimensions, instructions and material requirements |
| | 2.4 Recognise symbols used in the drawing |
| | 2.5 Compile list of required materials |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Drawing interpretation includes recognising the following:

- relationship between the views contained in the drawing
- objects
- units of measurement

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- dimensions of the key features
- symbols

Unit Mapping Information

Assessment Requirements for MEM09002 Interpret technical drawing

Modification History

Release 1. Supersedes and is equivalent to MEM09002B Interpret technical drawing

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting, checking and validating technical drawing against job requirements or equipment
- interpreting technical drawing through recognition of components, assemblies, objects and symbols
- identifying dimensions
- applying drawing conventions appropriate to engineering discipline
- compiling a materials list.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- application of AS 1100 Technical drawing or AS 1102 Graphical symbols
- conventions used in technical drawings
- correct interpretation of instructions contained in drawings
- materials from which drawing object(s) are made and their features and manufacturing and assembly requirements.

Assessment Conditions

- Assessors must:
 - have vocational competency in interpreting technical drawings at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Application

This unit of competency defines the skills and knowledge required to lift and move materials manually and/or using basic manual handling equipment in a wide range of environments.

Maximum manual lifting weight is limited to Safe Work Australia recommendations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Materials handling

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, job sheets or work instructions</p>
2 Lift materials manually	<p>2.1 Determine material weight correctly utilising most appropriate technique, and assess risks associated with lifting</p> <p>2.2 Undertake lifting techniques to Safe Work Australia recommended procedures and having regard to types of movement, methods, storage, height and position</p>
3 Move/shift materials manually	<p>3.1 Select appropriate equipment, as required</p> <p>3.2 Place material safely and securely on moving equipment</p> <p>3.3 Relocate material ensuring safety of personnel and security of material</p> <p>3.4 Unload material and place in a safe and secure manner</p>

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Material weight includes

- determined using scales

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

one (1) or more of the following:

- interpreting signage

Lifting techniques include one (1) or more of the following:

- individual
- team lifting
- use of appropriate lifting equipment

Appropriate equipment includes one (1) or more of the following:

- hand trolleys
- wheelbarrows
- motorised/hand pallet trucks (not sit on)
- hand carts
- dedicated production or process lifting equipment
- baskets, spreader bars, cradles or the like attached to lifting equipment

Assessment Requirements for MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- assessing the risks associated with lifting materials manually and determining the most appropriate technique
- selecting and using the appropriate equipment to move/shift materials ensuring safety of personnel and security of material.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- manual handling techniques, including individual or team lifting
- appropriate equipment associated with move/shift materials
- hazards of incorrect procedures
- Safe Work Australia standards for manual handling.

Assessment Conditions

- Assessors must:
 - have vocational competency in undertaking manual handling at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. MEM12023 Perform engineering measurements

Modification History

Release 1. Supersedes and is equivalent to MEM12023A Perform engineering measurements

Application

This unit of competency defines the skills and knowledge required to perform measurements requiring straightforward use of mechanical measuring devices which incorporate visual inspections representing units of measurement and associated calculations in a range of manufacturing, engineering and related environments. Measurements may be expressed in metric or imperial units.

Electrical/electronic devices used are those not requiring the connection or disconnection of circuitry.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 5

Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

Competency Field

Measurement

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Identify job requirements from specifications, sketches, job sheets or work instructions |
| 2 | Select appropriate device or equipment | 2.1 | Determine measurement requirements from specifications |
| | | 2.2 | Select appropriate device or equipment to achieve required outcome according to SOPs |
| 3 | Obtain measurements using a range of measuring devices | 3.1 | Use correct and appropriate measuring technique |
| | | 3.2 | Obtain measurements accurately in a safe and effective manner |
| | | 3.3 | Determine or verify dimensions using calculations, as required |
| 4 | Maintain measuring devices | 4.1 | Undertake routine care and storage of devices to manufacturers' specifications or SOPs |
| | | 4.2 | Make routine adjustments to devices to maintain device accuracy |
| 5 | Communicate measurements as required | 5.1 | Record measurements accurately, as required |
| | | 5.2 | Prepare freehand sketch which depicts required information, as required |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Specifications include one (1) or more of the following:

- drawings
- sketches
- job instructions
- schematics
- diagrams
- reference manuals

Measuring devices include one (1) or more of the following:

- protractors
- combination squares
- set squares
- dial indicators
- thermometers
- tapes
- rules
- micrometres
- vernier-scaled measuring equipment

Calculations include one (1) or more of the following:

- addition
- subtraction
- multiplication
- division
- fractions
- decimals

Note: Calculations may be made using a calculator

Routine adjustments

- validating the device using simple zeroing or scale adjustment

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

include the following:

Measurements include one (1) or more of the following:

- length
- squareness
- flatness
- angle
- roundness
- clearances
- any other measurements that can be read off analogue, digital or other measuring device

Information includes one (1) or more of the following:

- dimensions
- instructions
- base line
- datum points

Assessment Requirements for MEM12023 Perform engineering measurements

Modification History

Release 1. Supersedes and is equivalent to MEM12023A Perform engineering measurements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting measurement requirements from specifications
- selecting appropriate measuring device or equipment to achieve the required outcome
- obtaining measurements in a safe and effective manner and recording measurements, including preparing a freehand sketch which depicts required information, as required
- performing calculations to determine or verify dimensions
- storing and maintaining measuring devices including routine adjustments according to manufacturer's specifications or SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- calculations, including addition, subtraction, multiplication, division, fractions and decimals
- manufacturer's or SOPs for handling and storing a range of measuring devices
- appropriate procedures for adjusting and zeroing a range of measuring devices, including scale adjustment
- appropriate methods of communicating measurements by drawings.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing engineering measurements at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Application

This unit of competency defines the skills and knowledge required to estimate approximate answers to arithmetical problems, carry out calculations involving percentages and proportions, and determine simple ratios and averages.

It also covers producing and interpreting simple charts and graphs in manufacturing, engineering or related environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 3

Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

Competency Field

Measurement

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. requirements at all times
	1.3 Identify job requirements from specifications, sketches, job sheets or work instructions
	1.4 Establish required calculation outcomes from job instructions
	1.5 Determine required calculation method to suit the application, including selection of relevant arithmetic operations and/or formulae
	1.6 Estimate expected results, including rounding off, as appropriate
2 Perform calculations	2.1 Apply calculation method
	2.2 Obtain answer and check against estimation to ensure it is correct
3 Produce charts and graphs from given information	3.1 Transpose data to produce charts or graphs
	3.2 Ensure charts or graphs reflect data on which they are based to meet specifications

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Calculations are performed using one (1) or more of the following:

- pen and paper
- a calculator
- tables
- tablets
- computers

Relevant sources include one (1) or more of the following:

- charts
- graphs
- diagrams
- measurement data
- reference manuals
- specifications

Applications include computations associated with one (1) or more of the following:

- pressure
- volume
- temperature
- heat
- speed
- power
- elasticity
- density
- mass
- force

Arithmetic operations include the following:

- application of subtraction, addition, multiplication and division
- manipulation of decimals, fractions and mixed numbers and whole numbers
- using formulas
- determining percentages
- calculation of proportions and ratios

Charts and graphs include one (1) or more of the following:

- simple histograms
- control charts
- pie charts

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Assessment Requirements for MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting data from job instructions and relevant sources to establish required outcomes
- determining the appropriate calculation method to suit the application
- performing calculations and confirming answer/s
- producing and interpreting simple charts and graphs from given data.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- formulae applicable to the determination of perimeter, area and volume of simple geometric shapes and the reasons for using dimensions with the same units
- techniques and procedures for rounding off figures when estimating approximate answers
- features and use of mixed numbers, decimals, fractions and whole numbers
- procedures for carrying out calculations involving fractions and using each of the four basic rules of addition, subtraction, multiplication and division
- concept of percentage and procedures to be followed in converting a decimal and fraction to a percentage
- concepts and calculations of ratio and proportion
- scales applicable to the axes of the graphs or charts
- types of charts and/or graphs used in the individual's field of work
- upper and lower limits of acceptability applicable to data entered on a graph or chart
- trends indicated by the slope or gradient of a graph
- action to be taken when given trends occur or set limits are approached on graphs or charts
- procedures for drawing 'lines of best fit'
- trends indicated by the graphs or charts drawn.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing computations at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM13003 Work safely with industrial chemicals and materials

Modification History

Release 1. Supersedes and is equivalent to MEM13003B Work safely with industrial chemicals and materials

Application

This unit of competency defines the skills and knowledge required to work safely with industrial chemicals and materials subject to codes and regulations that are stored and used in a workplace, for example, chemicals, solvents, dangerous materials, acids and noxious waste products in a manufacturing and/or engineering environment.

This unit describes the competencies which are beyond those safety requirements normally applied in the workplace as described in unit MEM13015 Work safely and effectively in manufacturing and engineering, or specifically described in individual units, such as welding.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Evidence of competency is to encompass the satisfactory application of current state/territory work health and safety (WHS) legislation, standards and codes of practice, and the hierarchy of hazard control measures.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Work health and safety

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Identify job requirements from specifications, job sheets or work instructions
2	Use personal protective equipment	2.1	Select correct and appropriate personal protective equipment (PPE) and use correctly based on information in relevant safety data sheet (SDS)
3	Adhere to emergency procedures	3.1	Locate emergency equipment and use in accordance with workplace policies and SOPs
		3.2	Demonstrate responses to emergency procedures as detailed in approved safety procedures and instructions
4	Observe safe working practices	4.1	Identify hazardous areas and materials and understand and identify special handling procedures and obtain permits to work, if necessary
		4.2	Use all equipment and hazardous materials in accordance with relevant WHS legislation, manufacturers' instructions and SOPs
		4.3	Identify and understand all site-specific safety policies, safety signs, symbols and labels
		4.4	Interpret and apply SDS
		4.5	Use safe manual handling procedures, including equipment

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 4.6 Ensure decanted chemicals and storage is to state/territory dangerous goods, WHS legislation and requirements
- 4.7 Update chemical manifest following SOPs
- 4.8 Perform housekeeping duties to maintain a safe working environment according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hierarchy of control measures include the following:

The application of the hierarchy of control follows the six-step preference of control measures to manage and control risk:

1. elimination
2. substitution
3. isolation
4. engineering control measures
5. using safe work practices
6. personal protective equipment (PPE)

PPE includes one (1) or more of the following:

- goggles/face shields
- respirators
- air supplied or self-contained helmets
- safety boots
- gloves and appropriate clothes/garments

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Safe working practices include one (1) or more of the following:

- environment is inspected
- hazards (and chemical reactive hazards) are assessed and controlled using hierarchy of hazard control
- properly maintained PPE is available
- emergency management plan is documented/understood
- work to be undertaken in safe 'thermal' environments and all possible ignition sources are to be identified and controlled

Storage includes the following:

- only using containers, which includes minor quantities and those in consumer packages, that are suitable for chemical exposure
- labelling and/or placarding containers
- updating chemical manifests

State or territory legislative requirements include one (1) or more of the following:

- appropriate WHS
- dangerous goods acts and regulations
- Australian Standards
- Australian Code for the Transport of Dangerous Goods by Road and Rail (ADGC)
- Safe Work Australia codes of practice

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM13003B Work safely with industrial chemicals and materials

Links

Assessment Requirements for MEM13003 Work safely with industrial chemicals and materials

Modification History

Release 1. Supersedes and is equivalent to MEM13003B Work safely with industrial chemicals and materials

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting appropriate PPE based on data obtained in relevant safety data sheets (DS)
- observing safe working practices including undertaking a risk assessment
- following approved safety procedures and instructions in demonstrating responses to real or simulated emergencies
- performing proper manual handling techniques when shifting and moving industrial chemicals and materials
- ensuring all decanted chemicals are stored in storage containers that are suitable for chemical exposure and are properly labelled and/or placarded
- updating chemical manifests following SOPs
- complying with appropriate state or territory legislative requirements at all times.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- dangerous goods classification and labelling/placarding
- testing and maintenance of PPE
- inherent hazardous properties of the chemicals to be used
- interpretation of the relevant safety data sheets (SDS)
- basic fire-fighting procedures
- site-specific emergency plan procedures
- chemical spill confinement procedures
- dangerous occurrence (near miss) reporting procedures
- hierarchy of controls.

Assessment Conditions

- Assessors must:
 - have vocational competency in working safely with industrial chemicals and materials at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Application

This unit of competency defines the skills and knowledge required to work effectively in manufacturing and engineering work situations, including planning routine work and participating in and following work health and safety (WHS) procedures. The unit applies to working either individually or in a team situation and includes contributing to work-related group activities in a manufacturing or engineering workplace.

This unit covers WHS skills associated with carrying out routine operational activities safely and in compliance with legislative and regulatory requirements.

The unit covers the skills associated with participation in quality systems, communication and cooperation with others. The unit applies to workplaces with informal or formal quality management and improvement systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

Nil.

Competency Field

Work health and safety

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|--|
| 1 | Determine job requirements | 1.1 | Identify goals, objectives and task requirements and clarify with appropriate persons, where required |
| | | 1.2 | Prioritise task requirements |
| 2 | Review and modify plan | 2.1 | Adjust timelines, priorities and other planning components to respond to contingencies, as necessary |
| | | 2.2 | Re-examine results of work activity against the plan and identify possible improvements to future performance of work tasks |
| 3 | Work effectively with others in the workplace | 3.1 | Identify own role and responsibilities and relationship to other employees, including employees performing related/interdependent activities |
| | | 3.2 | Identify supervisors and other sources of advice and assistance for own work |
| | | 3.3 | Apply effective interpersonal skills to interact with others and contribute to activities and objectives |
| | | 3.4 | Review and modify own work progress to complement the work of others |
| | | 3.5 | Report own work progress to supervisors and where required to fellow employees using standard operating procedures (SOPs) |
| 4 | Follow safe work practices | 4.1 | Check for and identify hazards in the work area before and during work |
| | | 4.2 | Follow procedures for avoiding or controlling hazards already identified in instructions, signage or other workplace communication |
| | | 4.3 | Identify and report risks and hazards not covered by procedures |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>4.4 Select, use and maintain relevant personal protective equipment (PPE) by procedures, as required</p> <p>4.5 Recognise emergency situations and take appropriate initial emergency action</p> <p>4.6 Follow procedures for responding to emergencies</p> <p>4.7 Report incidents, injuries and other WHS non-conformances according to procedures</p>
5 Work within a quality system	<p>5.1 Follow instructions and procedures and perform duties in accordance with standard operating procedures or quality system requirements</p> <p>5.2 Ensure conformance of product and process to specifications</p> <p>5.3 Report defects and non-conformance to specifications according to procedures</p> <p>5.4 Participate in process improvement procedures, where required</p>
6 Participate in workplace health and safety procedures	<p>6.1 Identify workplace health and safety policies and procedures relevant to own work and work area</p> <p>6.2 Identify relevant WHS managers and representatives for own work area</p> <p>6.3 Provide input to minimise hazards in work area in line with organisation WHS procedures and participative arrangements</p>

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Quality systems include one (1) or more of the following

- quality planning
- quality assurance
- quality control
- quality improvement procedures and processes

Task requirements include one (1) or more of the following:

- timeframe
- quality requirements
- outcome and performance requirements
- job history
- checks
- reporting requirements
- tools and equipment
- materials and parts
- supporting documents

Specifications include one (1) or more of the following:

- task lists
- instructions
- manufacturer manuals
- diagrams and schematics
- sketches
- parts lists
- SOPs

Planning includes one (1) or more of the following:

- preparing a plan to complete the task
- organising task into manageable steps including appropriate order and timing
- monitoring the progress of processes related to own responsibilities
- applying relevant WHS instructions
- collecting, sorting, recording results of work
- seeking advice and guidance on setting priorities and timeframes

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- seeking feedback from supervisor, trainer or mentor

Unit Mapping Information

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and avoiding or controlling hazards
- reporting hazards, incidents, injuries and other work health and safety (WHS) non-conformances following SOPs
- recognising and responding to emergencies following SOPs
- identifying and obtaining, instructions and information on job requirements, including one or more of the following:
 - verbal or written job instructions
 - specifications
 - SOPs
 - charts
 - lists
- identifying and responding to contingencies, including:
 - equipment breakdowns
 - non-conforming components
 - safety hazards
- recording information into proforma workplace documents, including:
 - production tally forms
 - quality control forms
 - safety incident forms
- performing assigned tasks and checking outcome of own work for conformance to specifications
- identifying own responsibilities within the workplace quality system
- giving and receiving feedback on own and group work
- seeking assistance from supervisors and mentors.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use and application of personal protective equipment
- basic quality system terminology and concept, including:
 - quality assurance
 - quality control
 - quality improvement
- procedures to be followed in performing own work
- objectives, requirements and specifications to which the individual's work is to comply
- costs and consequences of poor quality
- effective interpersonal skills:
 - effective listening
 - basic speaking skills
 - use of workplace terminology and jargon
 - giving and receiving feedback
 - checking and clarifying task-related information
 - verbal, visual and written instructions
 - appropriate modes and methods of communication
- barriers to effective communication
- sources of technical expertise/assistance
- hazards and control measures associated with workplace activities.

Assessment Conditions

- Assessors must:
 - have vocational competency in working safely and effectively in manufacturing and engineering at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM14006 Plan work activities

Modification History

Release 1. Supersedes and is equivalent to MEM14005A Plan a complete activity

Application

This unit of competency covers the skills and knowledge required to plan familiar work activities, whilst following established procedures and work health and safety (WHS) policies and procedures of the organisation.

Planning is undertaken by the individual performing the work. Individual plan components may require modification and prioritising to meet job requirements or to respond to unforeseen circumstances.

Where computations are required to be performed unit MEM12024 Perform computations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 4

Pre-requisite Unit

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Plan components include one (1) or more of the following:

- resources
- tools and equipment
- materials and parts
- overall timeframe
- job history
- quality requirements
- criteria for acceptable completion
- checks and tests
- outcome and performance requirements
- WHS requirements

Specifications include one (1) or more of the following:

- task lists
- instructions
- manufacturer manuals
- diagrams and schematics
- technical drawings and sketches
- parts lists
- computer records

Planning techniques and tools include one (1) or more of the following:

- scheduling
- time management
- brainstorming
- setting goals and defined outcomes
- prioritising
- review and evaluation strategies

Risk control measures

- eliminate the hazard

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- include one (1) or more of the following:**
- substitute the hazard with a safer alternative
 - isolate the hazard
 - use engineering controls to reduce the risk
 - use training to reduce the risk
 - use PPE

Assessment Requirements for MEM14006 Plan work activities

Modification History

Release 1. Supersedes and is equivalent to MEM14005A Plan a complete activity

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- planning a work activity using appropriate planning tools and techniques whilst following established procedures, including work health and safety (WHS) requirements
- checking the plan to ensure accuracy and conformance and modifying the plan components, as necessary, to overcome any unforeseen difficulties or developments
- identifying hazards and implementing appropriate risk control measures and procedures
- selecting, using and maintaining relevant personal protective equipment (PPE)
- evaluating the effectiveness of risk controls measures
- providing proforma WHS reports in accordance with SOPs, as required.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of PPE
- relevant specifications
- sources of advice relating to the objectives, requirements and specifications
- timeframe for activity completion
- quality requirements of the product or service
- techniques and reasons for prioritising of each step in a plan
- modifications that can be made to the plan to respond to unforeseen developments
- risk control measures
- reporting requirements for accidents, incidents and other non-conformances with WHS procedures.

Assessment Conditions

- Assessors must:
 - have vocational competency in planning work activities in a manufacturing and engineering environment at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Application

This unit of competency covers the skills and knowledge required to access, organise and communicate information related to production, maintenance or associated processes or tasks that apply in manufacturing, engineering or related environments.

For accessing and recording of data requiring system knowledge and judgement, Unit MEM16008 Interact with computing technology should be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

Competency Field

Communication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---------------------------|-----|---|
| 1 | Access information | 1.1 | Determine information requirements of tasks and access relevant information from a range of sources |
| | | 1.2 | Recognise and use workplace terminology correctly |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2 Organise and analyse information	2.1 Interpret information and organise in accordance with work requirements
	2.2 Determine relevance and implications for immediate work requirements
3 Communicate organised information using established workplace methods	3.1 Identify purpose of communication and appropriate communication method
	3.2 Communicate information using established workplace methods

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range of sources include using one (1) or more of the following:	• job instructions
	• specifications
	• standard operating procedures (SOPs)
	• charts
	• lists
	• documents
	• computer data
	• drawings
	• sketches
	• tables

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- technical manuals and/or charts
- other applicable reference material

Determining relevance of information includes one (1) or more of the following:

- checking relevance of information to own work
- selecting task relevant information from a larger document or from a diagram
- preparing an opinion based on analysis of simple facts
- expressing an opinion on the cause of faults

Workplace terminology refers to one (1) or more of the following:

- equipment
- processes
- workplace areas
- staff
- procedures

Established workplace methods include using one (1) or more of the following:

- proforma reports
- data entry
- verbal
- drawings

Purpose of communication includes one (1) or more of the following:

- simple incident/non-conformance report
- maintenance request
- production records
- material usage records
- work records
- other standard workplace records

Assessment Requirements for MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- accessing and recording relevant information from a range of sources
- recognising and using workplace appropriate terminology
- reading, interpreting and following information in workplace documentation
- checking and clarifying information
- organising, categorising and sequencing information
- communicating using appropriate methods and procedures for a variety of situations.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- types of information relevant to the workplace and required tasks
- terminology used in the workplace relevant to own work
- available sources of information
- information analysis techniques appropriate to tasks and position
- methods of categorising and organising information including correct sequencing of information
- methods of recording and communicating information.

Assessment Conditions

- Assessors must:
 - have vocational competency in organising and communicating information at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Application

This unit of competency defines the skills and knowledge required to use a range of hand tools for a variety of general engineering applications.

This unit should not be selected if the hand tool is dedicated to a single operation or machine or when a machine-specific/customised tool is used.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Use hand tools for general engineering applications	2.1	Select hand tools appropriate to the task requirements
		2.2	Use hand tools to produce outcomes that meet job specifications
		2.3	Identify unsafe or faulty tools and mark for repair according to designated procedures before, during and after use
		2.4	Undertake routine maintenance of tools using engineering principles, tools, equipment and procedures
		2.5	Store hand tools safely in appropriate location according to procedures and manufacturers' recommendations

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hand tools include one (1) or more of the following:

- hacksaws
- hammers
- punches
- screwdrivers
- sockets
- wrenches
- scrapers
- chisels
- gouges
- wood planes
- files of all cross-sectional shapes and types
- hand held taps and dies

Applications include one (1) or more of the following:

- adjusting
- dismantling
- assembling and finishing of items or components
- finishing, cutting, scraping of metallic and non-metallic material to size and shape
- tapping/retapping and threading/rethreading new/damaged threads

Drawings include one (1) or more of the following:

- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
- work specifications that include graphic representations that do not require interpretation

Job specifications include one (1) or more of the following:

- finish
- tension
- size
- shape

Routine maintenance includes one (1) or more of the following:

- cleaning
- lubricating
- tightening
- simple tool repairs
- adjustments

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using hand tools to produce the desired outcome to job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine maintenance and cleaning of hand tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and applications of different hand tools used in a general engineering context, including hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and sizes
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools, including lubricating, tightening, simple tool repairs and adjustments using engineering principles and relevant equipment
- storage location and procedures for a range of hand tools.

Assessment Conditions

- Assessors must:
 - have vocational competency in using hand tools at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Application

This unit of competency defines the skills and knowledge required to use a range of hand held power tools and fixed power tools for hand held operations used in a variety of general engineering applications.

This unit should not be selected if the power tools used are dedicated to an operation or machine, e.g. nut-runner, air drill and power driver.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use hand tools is required unit MEM18001 Use hand tools should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011 Undertake manual handling

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Use power tools for general engineering applications	2.1	Select power tools appropriate to the task requirements
		2.2	Use power tools for a determined sequence of operations to produce desired outcomes to job specifications
		2.3	Identify unsafe or faulty tools and mark for repair before, during and after use according to SOPs
		2.4	Undertake operational maintenance of tools according to principles, techniques and SOPs
		2.5	Store power tools safely in appropriate location according to manufacturers' recommendations and SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Power tools include one (1) or more of the following:**
- electric or pneumatic/hydraulic drills
 - grinders
 - jigsaws
 - nibblers
 - cutting saws
 - sanders
 - planers
 - routers
 - pedestal drills
 - pedestal grinders
- Power tool operations include one (1) or more of the following:**
- clamping
 - alignments
 - adjustments
- Applications include one (1) or more of the following:**
- loosening and fastening items or components
 - shaping, finishing, cutting, grinding of metallic and non-metallic materials and/or tool bits to size and shape
- Drawings include one (1) or more of the following:**
- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
 - work specifications that include graphic representations that do not require interpretation
- Clamping includes one (1) or more of the following:**
- multigrips
 - vices
 - jigs and fixtures
 - clamps
- Job specifications include one (1) or more of the following:**
- finish
 - size
 - shape
- Operational maintenance includes one (1) or more of the following:**
- cleaning
 - lubricating
 - tightening

Assessment Requirements for MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using a range of hand held and fixed power tools for a variety of general engineering applications
- following designated procedures for dealing with unsafe or faulty power tools
- undertaking routine maintenance and cleaning of power tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements and cleaning of a range of power tools
- storage location and procedures of a range of power tools.

Assessment Conditions

- Assessors must:
 - have vocational competency in using power tools/hand held operations at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18003 Use tools for precision work

Modification History

Release 1. Supersedes and is equivalent to MEM18003C Use tools for precision work

Application

This unit of competency defines the skills and knowledge required to use tools to manually produce work to precise dimensions and/or finishes.

It covers performing precision tasks on a range of metallic and non-metallic materials using a variety of tools, instruments and power equipment.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where precision measurement is required unit MEM12003 Perform precision mechanical measurement should also be selected.

Where precision marking out is required unit MEM12006 Mark off/out (general engineering) should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 4

Pre-requisite Unit

MEM11011 Undertake manual handling

MEM12023 Perform engineering measurements

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

MEM18001 Use hand tools

MEM18002 Use power tools/hand held operations

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1 Follow standard operating procedures (SOPs) 1.2 Comply with work health and safety (WHS) requirements at all times 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare tools and tooling to produce precision outcome	2.1 Select processes/techniques appropriate to the precision work to be undertaken, material and specifications 2.2 Select tools, accessories and consumables appropriate to task, specifications and material 2.3 Prepare tools/tooling and adjust, as required
3	Use tools to produce work to precise specifications	3.1 Prepare the work piece and secure using appropriate method for selected operation 3.2 Use tools to produce specified outcome to the required accuracy in accordance with SOPs 3.3 Inspect tools and equipment for safe and proper working order before, during and after use 3.4 Identify unserviceable tools, repair where appropriate, or mark for repair or disposal, according to prescribed procedure

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 3.5 Undertake inspection and maintenance of tools and equipment according to standard workplace procedures, principles and techniques
- 3.6 Store and maintain tools to ensure serviceability

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Techniques include one (1) or more of the following:**
- cutting out
 - drilling
 - fitting
 - filing
 - reaming
 - lapping
 - broaching
 - burnishing
 - scraping
 - polishing
 - hand held grinding
 - chiselling

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Precision work includes one (1) or more of the following:

- scraping machine beds to precise tolerances
- broaching a keyway
- hand reaming the bore of a spigot or bush to a positive transition fit with shaft
- core drilling (finishing) a blind hole to receive a mating pin
- lapping a mechanical seal to fine finish
- filing complex angles and mating edges
- precision grinding using a flexible drive shaft attachment

Precision outcomes include one (1) or more of the following:

- specified tolerances
- allowances
- fits
- finishes
- alignments

Tools or equipment required to achieve precision outcomes include one (1) or more of the following:

- reamers
- files
- chisels
- polishing buffs
- lapping plate
- broaches
- flat, half round and bore scrapers

Tool adjustment includes one (1) or more of the following:

- tool shape
- rake angle
- clearance angles

Inspection and preventative maintenance include one (1) or more of the following:

- visual checking of leads and connections
- sharpening of cutting equipment
- repair of associated tools

Unit Mapping Information

Assessment Requirements for MEM18003 Use tools for precision work

Modification History

Release 1. Supersedes and is equivalent to MEM18003C Use tools for precision work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- preparing tools for precision outcomes, including selecting processes and engineering techniques, methods and procedures appropriate to the task
- determining and making tool adjustments to produce required outcome, where applicable
- selecting and using precision tools and equipment to produce the desired outcome to meet job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine repair/operational maintenance of tools and equipment and storing in accordance with procedures.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- work to be undertaken and specifications to be achieved
- appropriate tools, processes and equipment required to carry out the work to the required specifications and reasons and procedures for using the selected tools
- engineering principles to be applied during the use of the tools
- manufacturers' specifications of the tools and equipment selected
- procedures for checking tools and equipment for correct and safe operation
- common faults and/or defects in tools and equipment used/selected
- procedures for marking unsafe or faulty tools and equipment for repair
- repairs/operational maintenance that can be made to the tools and equipment used/selected
- procedures for repairing/maintaining the tools and equipment used/selected
- procedures for checking/storing tools and equipment used/selected prior to storage and storage location.

Assessment Conditions

- Assessors must:
 - have vocational competency in using tools for precision work at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18006 Perform precision fitting of engineering components

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM18006 Perform precision fitting of engineering components (Release 1).

Release 1. Supersedes and is equivalent to MEM18006C Repair and fit engineering components.

Application

This unit of competency has been developed for Engineering Tradesperson - Mechanical apprenticeship training and the recognition of trade-level skills in precision fitting and mechanical repair.

It defines the trade-level fitting skills and knowledge associated with manufacturing of new parts/components and fitting mechanical engineering components into assemblies or sub-assemblies to specifications and specified tolerances.

The skills and knowledge described by this unit are applied in occupational and work situations associated with fitting, mechanical trade and maintenance work.

Where the knowledge and skills associated with machining or welding are required, the appropriate units should also be selected.

Where additional or higher marking out skills are required unit MEM12006 Mark off/out (general engineering) should also be selected.

Where the knowledge and skills associated with the installation, removal, repair or replacement of mechanical seals is required unit MEM18012 Perform installation and removal of mechanical seals should also be selected.

Where the knowledge and skills associated with high pressure fluid power seals is required unit MEM18020 Maintain hydraulic system components should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 6

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements

MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering
MEM14006	Plan work activities
MEM16006	Organise and communicate information
MEM18001	Use hand tools
MEM18002	Use power tools/hand held operations
MEM18003	Use tools for precision work
MEM18055	Dismantle, replace and assemble engineering components

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work, health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Plan and prepare to undertake work	2.1	Assess operation and condition of components against specifications
		2.2	Identify and isolate any faulty or worn components
		2.3	Mark component parts for identification, where required

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>2.4 Determine the cause/s of faults using appropriate engineering principles, techniques, procedures, tools and equipment</p> <p>2.5 Determine repair/replacement strategy</p>
3 Manufacture and/or repair and/or replace faulty components	<p>3.1 Obtain parts, component and or materials from appropriate sources</p> <p>3.2 Source, repair or produce components to meet specifications</p> <p>3.3 Inspect components for compliance with specifications</p>
4 Fit engineering components into assemblies or sub-assemblies	<p>4.1 Determine the correct fitting requirements and sequence of assembly</p> <p>4.2 Prepare and assemble component parts using fastening equipment and methods which ensures conformance to specifications, operational performance, quality and safety</p> <p>4.3 Determine lubrication requirements by appropriate means and lubricate, where applicable</p> <p>4.4 Perform final adjustments on component assembly to meet operational specifications</p>
5 Check operation of repaired components/unit	<p>5.1 Check all components/unit under operational conditions for compliance to specifications</p> <p>5.2 Approve any out-of-specification modification/alterations through an appropriate authority and record</p> <p>5.3 Perform final modifications/alterations on assembly to meet operational specifications</p> <p>5.4 Commission the final assembly and return to service</p>

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Engineering principles and fitting techniques include one (1) or more of the following:

- limits of tolerance
- allowances and clearances
- effects of wear, stress and temperature
- types of fits:
 - clearance
 - transition
 - interference
- press fitting methods
- force fits
- shrink and freeze (expansion) fits
- keyed fits
- taper fits
- lateral and radial forces
- datum and centrelines
- broaching
- drilling
- scraping
- filing
- reaming
- tapping
- threading
- simple gland top-ups in non-critical applications
- routine gland maintenance
- jointing
- gaskets

Unit Mapping Information

Release 2. Supersedes and is equivalent to MEM18006 Perform precision fitting of engineering components (Release 1).

Release 1. Supersedes and is equivalent to MEM18006C Repair and fit engineering components.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MEM18006 Perform precision fitting of engineering components

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM18006 Perform precision fitting of engineering components (Release 1).

Release 1. Supersedes and is equivalent to MEM18006C Repair and fit engineering components.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- assessing engineering components visually and dimensionally with appropriate testing and measuring equipment techniques for compliance to specifications
- repairing or replacing faulty components using appropriate tools, equipment and techniques
- assembling components using appropriate fitting techniques and principles
- recording approved modifications/alterations
- inspecting final assembly to check compliance to specifications
- returning the final assembly to service in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- tools and equipment used to dismantle, repair, assemble and fit engineering components
- consequences of having non-compliant components
- types of modifications/adjustments to components being repaired/fitted
- repair methods
- sources of replacement parts
- techniques for the production of engineering components
- assembly and fitting techniques
- machine backlash/recoil
- measuring equipment
- engineering components - shafts, single and multi-throw crankshafts, cams and journals, bearings and bearing surfaces, and keys

- squareness, roundness, concentricity, flatness, straightness, surface finish and angular correctness
- purpose, selection criteria and use of gland packing, jointing or gasket materials
- types and application of lubricants
- approval processes for documenting out-of-specification modifications
- commissioning and return to service procedures.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing precision fitting of engineering components at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Assessment must occur in a functioning workplace. Where assessment in the workplace would be unsafe, impractical or threatens the environment, assessment must occur in a sufficiently rigorous simulated environment that reflects the circumstances that would be experienced in a functioning workplace. Assessment must cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18018 Maintain pneumatic system components

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM18018 Maintain pneumatic system components (Release 1).

Release 1. Supersedes and is equivalent to MEM18018C Maintain pneumatic system components.

Application

This unit of competency defines the skills and knowledge required to check pneumatic system components, identify and repair or replace faulty components.

Pneumatic system components are identified and inspected and assessed using fluid power principles to predetermined specifications interpreted from data sheets and circuits diagrams.

Where straightforward removal/replacement of components from a pneumatic system is required unit MEM18055 Dismantle, replace and assemble engineering components and unit MEM18071 Connect and disconnect fluid conveying system components, should be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 4

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements
MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering
MEM14006	Plan work activities

MEM16006	Organise and communicate information
MEM18001	Use hand tools
MEM18002	Use power tools/hand held operations
MEM18003	Use tools for precision work
MEM18006	Perform precision fitting of engineering components
MEM18055	Dismantle, replace and assemble engineering components

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Check pneumatic system components	2.1	Identify the characteristics and operational function of each system component
		2.2	Inspect and test the operational function of each component
		2.3	Assess correct operation of each component against specifications
3	Identify, repair	3.1	Localise faulty system components and confirm

Elements describe the essential outcomes.

or replace faulty pneumatic system components

Performance criteria describe the performance needed to demonstrate achievement of the element.

- malfunction by inspection and testing using fluid power principles, procedures and safety requirements
- 3.2 Dismantle faulty system components and repair to manufacturers'/site specifications
 - 3.3 Select replacement parts from appropriate sources
 - 3.4 Reassemble system components and verify for correct operation and test against specifications
 - 3.5 Confirm correct operation of the pneumatic system according to SOPs
 - 3.6 Adopt appropriate follow-up procedures
 - 3.7 Complete service reports

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pneumatic system components include one (1) or more of the following:

- static and dynamic seals
- linear and semi-rotary actuators
- pressure control valves
- directional control valves
- flow control valves
- normally open and closed timers
- counters
- pneumatic motors

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- fluid conductors
- other associated equipment

Assessment Requirements for MEM18018 Maintain pneumatic system components

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM18018 Maintain pneumatic system components (Release 1).

Release 1. Supersedes and is equivalent to MEM18018C Maintain pneumatic system components.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications, charts, lists, drawings and other applicable reference documents to maintain pneumatic system components
- inspecting and testing pneumatic system components to predetermined specifications using fluid power principles
- checking component parts visually and dimensionally for compliance to specification and, where appropriate, marking faulty parts for repair, replacement or adjustment
- dismantling and repairing faulty system components, including selecting replacement parts from manufacturers'/suppliers' catalogues to site or manufacturers' specifications
- assembling and testing pneumatic components for correct operation and compliance to specifications
- checking the operation of the pneumatic system for compliance to specifications
- completing service reports in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- full range of pneumatic system components and characteristics/operational function of each component
- procedures and equipment for inspecting and testing pneumatic system components
- specifications of each pneumatic system component
- faulty system components and causes of faulty components
- individual components within the pneumatic system
- procedures for repairing pneumatic system components

- procedures for checking pneumatic system operation
- follow-up procedures with respect to repaired/replaced pneumatic system components
- reporting/recording procedures.

Assessment Conditions

- Assessors must:
 - have vocational competency in maintaining pneumatic system components at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Assessment must occur in a functioning workplace. Where assessment in the workplace would be unsafe, impractical or threatens the environment, assessment must occur in a sufficiently rigorous simulated environment that reflects the circumstances that would be experienced in a functioning workplace. Assessment must cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18019 Maintain pneumatic systems

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM18019 Maintain pneumatic systems (Release 1).

Release 1. Supersedes and is equivalent to MEM18019B Maintain pneumatic systems.

Application

This unit of competency defines the skills and knowledge required to undertake preventive maintenance checks/adjustments on pneumatic systems, and fault-find, replace, repair or overhaul and recommission pneumatic systems.

It applies to pneumatic systems in industrial and mobile plant and equipment used in manufacturing, agricultural, forestry, mining and transport industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: B

Unit Weight: 4

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements
MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering
MEM14006	Plan work activities
MEM16006	Organise and communicate information
MEM18001	Use hand tools
MEM18002	Use power tools/hand held operations

MEM18003	Use tools for precision work
MEM18006	Perform precision fitting of engineering components
MEM18018	Maintain pneumatic system components
MEM18055	Dismantle, replace and assemble engineering components

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Undertake preventative maintenance checks/adjustments on pneumatic systems	2.1	Identify system components, assemblies or sub-assemblies and prepare for inspection/preventative maintenance
		2.2	Carry out visual inspection and testing with appropriate test equipment according to fluid power principles, procedures and safety requirements
		2.3	Perform scheduled preventative maintenance tasks, including obvious repairs and adjustments, according to manufacturers' specification using fluid power techniques/practices
3	Undertake	3.1	Identify designated pneumatic system components and

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
fault-finding on pneumatic systems		<p>carry out visual inspection of the system for the collection of fault-finding data</p> <p>3.2 Consult system operator and collect additional data, where appropriate</p> <p>3.3 Check maintenance reports and preventative maintenance schedules and review for additional fault-finding data</p> <p>3.4 Undertake checks and tests</p> <p>3.5 Identify and verify faults and malfunctions</p> <p>3.6 Document or report faults and malfunctions to designated personnel using appropriate procedures</p>
4	Repair and/or overhaul pneumatic power system	<p>4.1 Isolate system or sub-assembly and discharge residue pressure safely in accordance with prescribed procedures or check for correct isolation</p> <p>4.2 Tag isolated system or sub-assembly according to SOPs</p> <p>4.3 Remove component or sub-assembly from system</p> <p>4.4 Dismantle components or sub-assemblies, examine and verify for replacement, repair or overhaul</p> <p>4.5 Select replacement items from appropriate sources</p> <p>4.6 Rectify faulty items</p> <p>4.7 Refit component or sub-assembly items to equipment and test for compliance against specifications</p>

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

5.4 Update maintenance records/service reports

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pneumatic systems include one (1) or more of the following:

- pneumatic assemblies/sub-assemblies
- stationary/mobile equipment
- pneumatic power tools

Test equipment includes one (1) or more of the following:

- leak testers
- escape rate gauges
- hand held pressure testers
- other appropriate equipment

Rectify includes one (1) or more of the following:

- replacement
- repair and/or reuse of components

Unit Mapping Information

Release 2. Supersedes and is equivalent to MEM18019 Maintain pneumatic systems (Release 1).

Release 1. Supersedes and is equivalent to MEM18019B Maintain pneumatic systems.

Assessment Requirements for MEM18019 Maintain pneumatic systems

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM18019 Maintain pneumatic systems (Release 1).

Release 1. Supersedes and is equivalent to MEM18019B Maintain pneumatic systems.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting maintenance reports and preventative maintenance schedules
- inspecting and testing pneumatic system components, assemblies or sub-assemblies and carrying out preventative maintenance tasks to predetermined specifications using fluid power principles, tools and equipment
- checking component parts visually and dimensionally for compliance to specification and, where appropriate, marking faulty parts for repair, replacement or adjustment
- consulting with system operator and carrying out visual inspection of pneumatic system and components with respect to the fault being investigated and other anomalies
- undertaking fault-finding and verifying and confirming faults/malfunctions
- isolating and depressurising system or sub-assembly, confirming and using appropriate tagging system according to SOPs
- removing, dismantling and repairing/overhauling faulty system components or sub-assembly, including selecting replacement parts from manufacturers'/suppliers' catalogues, to site or manufacturers' specifications
- assembling pneumatic components or sub-assembly for compliance to specifications, refitting items to equipment and testing for correct operation
- recommissioning pneumatic system/sub-assembly to specifications and verifying correct operation and initiating any follow-up procedures
- updating and completing maintenance records and/or service reports.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- pneumatic principles

- manufacturers' specifications and structure of common pneumatic system components and their constituent parts
- pneumatic system/component faults that can be determined by visual inspection
- application of common pneumatic system/component test equipment
- scheduled preventative maintenance tasks
- common pneumatic system and component faults and any previous faults
- any previous maintenance carried out on the pneumatic system/components
- typical checks/tests that can be carried out on pneumatic systems/components and their application
- pneumatic system/component tests and testing techniques
- apparent faults/malfunctions
- documentation/reporting requirements with respect to verified faults/malfunctions
- procedures for initiating repair and/or overhaul of the pneumatic system
- procedures for isolating and depressurising pneumatic systems
- tagging requirements for isolated systems
- appropriate repair/overhaul procedures of pneumatic components
- pneumatic system operational specifications and system recommissioning procedures
- any appropriate follow-up maintenance or operational checks
- maintenance recording/reporting requirements and consequences of inaccurate or incomplete recording/reporting of maintenance/service activities.

Assessment Conditions

- Assessors must:
 - have vocational competency in maintaining pneumatic systems at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Assessment must occur in a functioning workplace. Where assessment in the workplace would be unsafe, impractical or threatens the environment, assessment must occur in a sufficiently rigorous simulated environment that reflects the circumstances that would be experienced in a functioning workplace. Assessment must cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18020 Maintain hydraulic system components

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM18020 Maintain hydraulic system components (Release 1).

Release 1. Supersedes and is equivalent to MEM18020B Maintain hydraulic system components.

Application

This unit of competency defines the skills and knowledge required to check hydraulic system components, identify, and repair or replace faulty components.

Hydraulic system components are identified and inspected and assessed using fluid power principles to predetermined specifications interpreted from data sheets and circuits diagrams.

Where straightforward removals/replacement of components from a hydraulic system is required unit MEM18055 Dismantle, replace and assemble engineering components and unit MEM18071 Connect and disconnect fluid conveying system components, should be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 4

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements
MEM12024	Perform computations

MEM18006	Perform precision fitting of engineering components
MEM18055	Dismantle, replace and assemble engineering components

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Check hydraulic system components	2.1	Identify the characteristics and operational function of each system component
		2.2	Inspect and test the operational function of each component
		2.3	Assess correct operation of each component against specifications
3	Identify and	3.1	Localise faulty system components and confirm

Elements describe the essential outcomes.

repair or replace faulty hydraulic system components

Performance criteria describe the performance needed to demonstrate achievement of the element.

- malfunction by inspection and testing using fluid power principles, procedures and safety requirements
- 3.2 Dismantle faulty system components and repair to manufacturers'/site specifications
 - 3.3 Select replacement parts from appropriate sources
 - 3.4 Reassemble system components and test for correct operation and assessment against specifications
 - 3.5 Confirm correct operation of the hydraulic system according to SOPs
 - 3.6 Adopt appropriate follow-up procedures
 - 3.7 Complete service reports

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hydraulic system components include one (1) or more of the following:

- static and dynamic seals
- linear and semi-rotary actuators
- fixed and variable displacement pumps
- pressure, directional and flow control valves
- hydraulic motors
- reservoirs
- contamination control components (filtration)

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- fluid conductors/fittings
- other associated equipment

MEM18055 Dismantle, replace and assemble engineering components

Modification History

Release 1. Supersedes and is equivalent to MEM18055B Dismantle, replace and assemble engineering components

Application

This unit of competency defines the skills and knowledge required to dismantle, identify faulty components, select replacements and assemble engineering components into assemblies or sub-assemblies in accordance with standard operating procedures (SOPs).

It also applies to the straightforward removal and replacement of pre-manufactured bearings and seals.

Where precision mechanical measurement is required unit MEM12003 Perform precision mechanical measurement should also be selected.

Where fitting techniques and principles are required to assess component condition, and/or modify components to achieve precision fits unit MEM18006 Perform precision fitting of engineering components should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 3

Pre-requisite Unit

Assessment Requirements for MEM18055 Dismantle, replace and assemble engineering components

Modification History

Release 1. Supersedes and is equivalent to MEM18055B Dismantle, replace and assemble engineering components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications, charts, lists, drawings and other applicable reference documents to dismantle, replace and assemble engineering components
- dismantling components using appropriate techniques, tools and equipment and marking component parts for reassembly purposes
- checking component parts visually and dimensionally for compliance to specification and marking faulty parts for repair, replacement or adjustment
- selecting replacement parts using manufacturers' catalogues and data
- assembling components using appropriate techniques and principles
- inspecting final assembly for compliance to specifications
- returning the final assembly to service in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- tasks to be performed in accordance with SOPs
- tools and equipment associated with dismantling the components
- procedures for:
 - checking components for conformance to specification and equipment required
 - assembling components and requirements of the assembly in terms of specifications, operational performance, quality and safety
 - lubricating the assembly
 - returning components/assemblies into use and checks to be undertaken during inspection of the final assembly
- specifications of the components to be replaced, including features and/or dimensions
- process of identifying replacement parts from catalogues

- packing and sealing materials.

Assessment Conditions

- Assessors must:
 - have vocational competency in dismantling, replacing and assembling engineering components at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18071 Connect and disconnect fluid conveying system components

Modification History

Release 1. Supersedes and is equivalent to MEM18071B Connect/disconnect fluid conveying system components

Application

This unit of competency defines the skills and knowledge required to safely remove and replace a range of fluid conveying components and assemblies, and inspect/test fluid conveying assemblies.

It applies to repairs and replacement to pressure and suction systems on fixed and mobile plant/equipment, including marine, heavy plant and manufacturing plant applications with system pressures range of 10.5 MPa to 35 MPa, ranging up to 70 MPa.

Where interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

This unit should not be selected when unit MEM18055 Dismantle, replace and assemble engineering components or unit MEM27017 Maintain, fault find and rectify hydraulic systems for mobile plant has already been selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011 Undertake manual handling

MEM13003 Work safely with industrial chemicals and materials

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information
MEM18001	Use hand tools

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, job sheets or work instructions
2	Disconnect fluid conveying components and assemblies	2.1	Carry out safety/risk assessment, identify potentially hazardous situations/conditions and position safety devices
		2.2	Note, record and label lay out of fluid conveying conductor
		2.3	Identify faulty component/assembly using specific troubleshooting procedures, reference documents and fluid power principles
		2.4	Disconnect and remove fluid conveying components and assemblies using appropriate tools, equipment, procedures and techniques
		2.5	Seal open system adequately with standard or special purpose sealing materials

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 3 | Obtain replacement parts | 3.1 | Select replacement parts from manufacturer catalogues and other relevant reference sources according to international standards and specifications |
| 4 | Test and store components | 4.1 | Pressure test fluid conveying assemblies and individual components according to industry and manufacturer standards and using fluid power principles |
| | | 4.2 | Assess and note condition |
| | | 4.3 | Clean, seal and store components/assemblies according to industry and manufacturer standards |
| 5 | Connect fluid conveying components and assemblies | 5.1 | Check connections and prepare for reconnection |
| | | 5.2 | Connect components and assemblies to equipment to specifications using appropriate techniques |
| | | 5.3 | Remove tagged out equipment, signage and safety blocking devices according to SOPs |
| | | 5.4 | Check equipment and fluid conveying systems and functional test, including in-situ and high pressure test rigs for correct operation according to manufacturer and industry standards |
| 6 | Report results | 6.1 | Follow reporting and certification procedures |
| | | 6.2 | Complete all relevant information |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Fluid conveying applications include one (1) or more of the following:

- hydraulic
- pneumatic
- water
- gas
- acids/corrosives/alkalines
- abrasives
- petroleum
- other dry/wet media

Potentially hazardous situations/ conditions include one (1) or more of the following:

- accumulated pressure
- contamination
- fluid handling

Components and assemblies include one (1) or more of the following:

- high pressure seals
- seats
- hoses
- tubes
- pipes
- fittings
- connectors
- adaptors and anchors
- other associated attachments

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM18071B Connect/disconnect fluid conveying system components

Assessment Requirements for MEM18071 Connect and disconnect fluid conveying system components

Modification History

Release 1. Supersedes and is equivalent to MEM18071B Connect/disconnect fluid conveying system components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications and obtaining relevant data with respect to connecting and disconnecting fluid conveying system components
- identifying potential hazardous situations and carrying out a risk assessment and isolating, tagging, locking off and displaying signage using appropriate procedures
- locating faulty component, neutralising pressures and disconnecting and removing fluid conveying components and assemblies using appropriate techniques, tools and equipment and sealing open system with appropriate sealing materials
- selecting replacement components from manufacturer catalogues and other reference sources
- performing pressure testing on fluid conveying assemblies and individual components using fluid power principles and undertaking condition and serviceability assessment and storing components/assemblies according to industry standards
- connecting components and assemblies to equipment, removing tagged out equipment, signage and safety blocking devices
- testing equipment and fluid conveying systems using appropriate test equipment and rigs for compliance to manufacturer and industry standards
- completing routine reports and certification procedures.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- different sources of stored energy and their applications
- work health and safety (WHS) responsibilities of customer and self
- safety/security lock-off devices and signage and procedures and reasons for installing lock-off devices and signage
- basic functions of fluid power systems, including:

- effects of heat and contamination
- pressures
- flow rates and temperatures
- hose strength and size
- effect of media on hoses
- test
- operational and burst pressures
- techniques and safety practices for pressure testing
- tools, techniques and procedures for removal of components
- troubleshooting techniques
- standard and specific sealing materials and techniques
- different fluid conveying parts and their function
- techniques and safety practices for pressure testing
- criteria for assessment
- methods of cleaning, sealing and storage
- techniques and criteria for connection and confirming connection
- techniques, procedures and safety practices. including neutralisation of pressures.

Assessment Conditions

- Assessors must:
 - have vocational competency in connecting and disconnecting fluid conveying system components at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM30021 Prepare a simple production schedule

Modification History

Release 1. Supersedes and is equivalent to MEM30021A Prepare a simple production schedule.

Application

This unit of competency defines the skills and knowledge required for the scheduling of production that involves several interconnected manufacturing processes. It relates to the preparation of a schedule for the manufacture of a single component or single assembly function or to operations for a single small production work unit or production cell. The schedule involves only a small number of constraints or variables.

Where skills are required to determine steps in a manufacturing process unit MEM30018 Undertake basic process planning should also be selected.

The unit applies to manufacturing production or related activities and is suitable for people giving technical support in manufacturing or engineering operations and those pursuing technical qualifications and careers at paraprofessional or technician level. All work is carried out under supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Engineering technician

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify production requirements	1.1 Follow standard operating procedures (SOPs) and comply with work health and safety (WHS) requirements at all times 1.2 Identify the production processes to be used from instructions and specifications provided

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Obtain customer requirements in terms of volume, quality, delivery time and arrangements from supervisor or other appropriate sources 1.4 Analyse customer and process requirements to determine production requirements
2. Develop an activity plan	2.1 Divide production requirements into activity elements 2.2 Construct a network diagram that reflects activities 2.3 Determine the critical path 2.4 Determine the latest start, earliest finish and slack time for activity elements to meet requirements 2.5 Obtain assistance and approval from supervisor
3. Prepare the production schedule	3.1 Prepare a production schedule 3.2 Prepare a bill of materials to assist in control of materials 3.3 Depict schedule using a Gantt chart or similar graphical display 3.4 Ensure schedule allows for future changes to improve performance 3.5 Obtain assistance and approval from supervisor
4. File and issue the schedule	4.1 Review and test the schedule with appropriate personnel 4.2 Refer the schedule to appropriate personnel for implementation 4.3 Provide all supporting documents for implementation 4.4 File and issue the schedule in accordance with SOPs

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the

candidate, accessibility of the item, and local industry and regional contexts) are included.	
Production requirements include:	<ul style="list-style-type: none"> • the production processes to be used • machine availability and capability • inventory requirements • procurements • supply capacities • contingency analysis.

Assessment Requirements for MEM30021 Prepare a simple production schedule

Modification History

Release 1. Supersedes and is equivalent to MEM30021A Prepare a simple production schedule.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- identifying production requirements
- developing an activity plan of production requirements on at least two occasions
- preparing the production schedule on at least two occasions
- filing and issuing the schedule.

Note: Where a volume and/or frequency is not specified, demonstration must be provided at least once.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- types of production including:
 - jobbing production
 - batch production
 - process production
- just- in-time (JIT) procedures
- cellular manufacture
- scheduling
- interpreting customer requirements
- machine capability and selection
- Gantt charts
- contingency plans
- project planning techniques at an introductory level
- program evaluation and review technique (PERT) and critical path methods (CPM) diagrams at an introductory level
- critical path networks at an introductory level
- hazards and control measures associated with preparing a simple production schedule, including housekeeping.

Assessment Conditions

- Assessors must:
 - have vocational competency in preparing a simple production schedule at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the Standards for Registered Training Organisations 2015 or its replacement and comply with the National Vocational Education and Training Regulator Act 2011, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Where possible, assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM30032 Produce basic engineering drawings

Modification History

Release 1. Supersedes and is equivalent to MEM30032A Produce basic engineering drawings.

Application

This unit of competency defines the skills and knowledge required to produce drawings or similar graphical representations where the critical dimensions and associated tolerances and design specifications are predetermined.

This unit applies to any engineering discipline. The unit covers application of introductory drafting skills to select and apply drawing protocols. Drawings are completed to Australian Standard (AS) 1100.101 Technical drawing – General principles.

Manual drafting or computer-aided design (CAD) drawing equipment may be used.

When CAD skills are required, unit MEM30031 Operate computer-aided design (CAD) system to produce basic drawing elements should also be selected.

The unit applies to engineering or related activities and is suitable for people giving technical support in manufacturing or engineering operations and those pursuing technical qualifications and careers at paraprofessional or technician level. All work is carried out under supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Drawing, drafting and design

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify drawing	1.1 Follow standard operating procedures (SOPs) and comply with work

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	<p>health and safety (WHS) requirements at all times</p> <p>1.2 Identify information requirements for work and obtain all relevant job requirements and design specifications</p> <p>1.3 Identify, interpret and analyse drawing requirements from specifications</p> <p>1.4 Interpret and apply industry terminology for drawing work</p> <p>1.5 Confirm communication practices required during drawing work</p> <p>1.6 Establish time requirements for completing work</p>
2. Select drawing features	<p>2.1 Set up drawing list or register based on drawing requirements</p> <p>2.2 Determine level of detail and numbers of drawings required for work</p> <p>2.3 Plan presentation and layout, and determine drawing sheets and appropriate scales and text style and size</p> <p>2.4 Identify features and applications of line types and thicknesses and select for drawing work</p> <p>2.5 Establish datums and dimensions</p>
3. Prepare and detail drawings	<p>3.1 Prepare drawings in plane orthogonal, isometric projection or equivalent</p> <p>3.2 Detail drawings in third angle projection, including auxiliary views, sections and assemblies</p> <p>3.3 Draw sections through engineering components incorporating correct use of cutting plane symbols and conventions</p> <p>3.4 Include appropriate symbols for limits and fits, surface texture and geometric tolerances</p> <p>3.5 Resolve problems in consultation with a supervisor</p> <p>3.6 Check drawing compliance with work instructions and specifications</p>
4. Select physical dimensions and produce engineering parts list	<p>4.1 Select components and/or materials from supplier or manufacturer catalogues using predetermined design specifications according to work requirements</p> <p>4.2 Produce an engineering parts list in accordance with SOPs</p>
5. Complete drawing documentation	<p>5.1 Obtain approval for drawings and/or parts list</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.2 Store approved drawings and/or parts lists 5.3 Catalogue and issue drawing and documentation in accordance with SOPs

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.	
Specifications can be obtained from one or more of the following:	<ul style="list-style-type: none"> • design information • customer • sketches • preliminary layouts.
Drawings include one or more of the following:	<ul style="list-style-type: none"> • plans • diagrams • charts.
Consultation includes one or more of the following:	<ul style="list-style-type: none"> • reference to appropriate personnel • including technical supervisors • manufacturers • suppliers • contractors • customers.
Engineering parts list includes one or more of the following:	<ul style="list-style-type: none"> • part name • description of part • material specification or part number • quantities.

Issued drawings include one or more of the following:	<ul style="list-style-type: none">• hard copy• photographic, slide or transparency form, including presentation as a single drawing and/or with other drawings• support documentation as a package.

Assessment Requirements for MEM30032 Produce basic engineering drawings

Modification History

Release 1. Supersedes and is equivalent to MEM30032A Produce basic engineering drawings.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- producing basic engineering drawings to AS 1100.101 Technical drawing – General principles on at least two occasions
- producing drawings in orthogonal and isometric projection to AS 1100.101 Technical drawing - General principles, on at least two occasions
- producing drawings in third angle projection, including auxiliary views, sections and assemblies on at least two occasions including all details, symbols and notations on drawings.

Note: Where a volume and/or frequency is not specified, demonstration must be provided at least once.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- layout conventions
- effective use of blank space, location of notes and symbols
- sectioning
- graphical techniques at an overview level
- assembly and explosion drawings
- schematics/line drawings, graphs and pictorials
- standard engineering drawing symbols, references and terminology
- application of surface finish symbols to drawings
- uses of scales
- uses and types of line weights
- uses and types of drawing sheets
- type of information provided with drawings.

Assessment Conditions

- Assessors must:

- have vocational competency in producing basic engineering drawings at least to the level being assessed with relevant industry knowledge and experience
- satisfy the assessor requirements in the Standards for Registered Training Organisations 2015 or its replacement and comply with the National Vocational Education and Training Regulator Act 2011, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Where possible, assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MSFDN4003 Produce patterns and templates

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers developing patterns and/or templates for production processes by hand, by using appropriate tools and equipment, and by computer-assisted production.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing design

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Prepare for and dimension the task	1.1	Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
		1.2	Customer orders are interpreted to establish required sizes of finished products
		1.3	Size requirements are checked in relation to the production process and finishing capacity of the workplace
2	Plan process	2.1	Material for pattern or template is identified for approximate size and characteristics
		2.2	Required instruments and equipment are identified, located and assembled

- | | | | |
|---|------------------------------|-----|--|
| | | 2.3 | Drawings and related specifications are interpreted |
| | | 2.4 | Procedures for using pattern development instruments and tools are checked and equipment is prepared for use |
| 3 | Plot dimensions | 3.1 | Equipment and tools are used following normal workplace procedures |
| | | 3.2 | Each dimension is measured, exploded and plotted maintaining appropriate angles, arcs and curves |
| | | 3.3 | Visual inspection and measurements are used to compare pattern dimensions and shapes with drawings and specifications |
| 4 | Complete pattern or template | 4.1 | Pattern or template is completed ensuring that the pattern indicates completion date and original drawing details |
| | | 4.2 | Required workplace approval of pattern or template is obtained |
| | | 4.3 | Plans are marked with notations for workplace requirements, including authorship, process or customer requirements, authorisation and any review dates |
| | | 4.4 | Plans are copied and filed, as required, according to workplace policies and procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the

work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate conceptual ability, discretion, judgement and problem-solving skills in the production of patterns or templates
- work is performed with little external assistance and with minimal supervision or direction
- development of patterns and/or templates is undertaken in accordance with established enterprise procedures and practices
- customers may be internal or external

Tools and equipment include:

- computer numeric controlled (CNC) machines
- static woodworking machines
- relevant hand tools

Materials include:

- manufactured board
- solid timbers
- composite materials

Personal protective equipment includes:

- that prescribed under legislation, regulations and enterprise policies and practices

Information and procedures include:

- work organisation procedures and practices relating to the production of patterns and/or templates
- designer/drawer specifications and instructions
- legislation/regulations/codes relevant to the work undertaken
- furniture production techniques and criteria, including ergonomic requirements
- quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFDN4003B Produce patterns and/or templates

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSFDN4003 Produce patterns and templates

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Interpret drawings and extrapolate to physical dimensions
- Select appropriate mediums and materials and produce a minimum of three (3) patterns or templates making use of:
 - manufactured board
 - solid timber
 - composite material
- Suggest improvements to pattern and template production and, where authorised, negotiate changes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Company operating procedures, including procedures for pattern and/or template production
- Types, characteristics uses and limitations of pattern/template materials
- Operation requirements of equipment and work systems in own work area
- Competency requirements of the work activities
- Relevant regulatory requirements, recognised standards and codes, and industry practices

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to drawings, job specifications, information on production/fabrication process, production materials and relevant computer equipment and software.

MSFFM3032 Set up, operate and maintain sawing machines

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Application

This unit describes the skills and knowledge required to safely and efficiently set up, operate and maintain sawing machines using their full technical potential and capacities to complete tasks such as cutting freehand curves and simple and compound angles and undertaking deep, freehand and off-fence ripping. Workers with this competency follow established procedures in timber technology industries using discretion, judgement and problem solving to identify and troubleshoot product and machinery issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Wood machining

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements and cutting specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools, jigs and other required tools and equipment are available, safe and functional 1.5 Identify procedures for waste minimisation and energy efficiency while completing task

2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete saw settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that saw is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Identify and make necessary adjustments to saw settings to meet task quality and efficiency requirements</p>
3 Operate machines	<p>3.1 Follow saw start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be sawn in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate saw in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor saw operation to ensure product quality and output</p> <p>3.5 Check waste quantities and make adjustments to minimise waste</p> <p>3.6 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.7 Recognise problems with product or saw operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3012 Set up, operate and maintain sawing machines.

Assessment Requirements for MSFFM3032 Set up, operate and maintain sawing machines

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate at least 4 of the following types of saw to complete tasks in accordance with workplace procedures and specifications:
 - cross-cut saws
 - circular rip saws
 - sliding table panel saws and scroll-band saws
 - numerically controlled (NC) beam saws
 - wall saws
 - band re-saws and straight line edgers
- complete operator maintenance on each of the 4 machines at least once, including:
 - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
 - servicing machine lubrication points
 - identifying tooling needing sharpening and repair
 - checking that drive belts are undamaged and correctly tensioned
 - cleaning machine at the end of a production run
 - checking that electrical systems are functioning, and identifying issues for referral to qualified electrician
 - completing maintenance documentation
- meet workplace standards for efficiency, including:
 - identifying and resolving routine problems
 - working with others, recognising dependencies and using cooperative approaches to optimise workflow and productivity.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
 - work health and safety

- quality assurance and tolerance levels
- reporting of machinery faults and material defects
- risk control measures, including personal protective equipment (PPE), for the following hazards
 - cutting and crushing hazard
 - objects and particles thrown by machine
 - noise
 - airborne contaminants
 - slips, trips and falls
 - manual handling injuries
- functions of different types of sawing machines, including at least 4 of the following:
 - cross-cut saws
 - circular rip saws
 - sliding table panel saws and scroll-band saws
 - numerically controlled (NC) beam saws
 - wall saws
 - band re-saws and straight line edgers
- sawing processes and techniques including those for cutting simple and compound angles and freehand curves and undertaking deep, freehand and off-fence ripping
- characteristics and response to the machine sawing process of materials commonly used, including at least 4 of the following:
 - solid timber
 - manufactured board
 - laminates
 - plastics
 - acrylics
 - synthetic solids
- function of other tools and materials typically used in the sawing process
 - machine-specific tools
 - jigs and fixtures
 - machine consumables
 - oils and lubricants and trial materials.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - work documentation
 - unprocessed materials for sawing

- sawing machines (4 different types) and other tools and equipment required for performance evidence
- PPE
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSFFM3037 Set up, operate and maintain routing and shaping machines

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Application

This unit describes the skills and knowledge required to safely and efficiently set up, operate and maintain routing and shaping machines using their full potential and capacities to complete tasks such as moulding, grooving, shaping and rebating materials. Workers with this competency follow established procedures in wood technology industries, using discretion, judgement and problem solving to identify and troubleshoot product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Wood machining

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements and routing and shaping specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools, jigs and other required tools and equipment are available, safe and functional 1.5 Identify procedures for waste minimisation and energy efficiency while completing task

2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Identify and make necessary adjustments to machine settings to meet task quality and efficiency requirements</p>
3 Operate machines	<p>3.1 Follow machine start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be machined in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor machine operation to ensure product quality and output</p> <p>3.5 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.6 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3017 Set up, operate and maintain routing and shaping machines.

Assessment Requirements for MSFFM3037 Set up, operate and maintain routing and shaping machines

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate a spindle moulding machine and an overhead or inverted pin routing machine to complete task requirements in accordance with workplace procedures
- complete operator maintenance on each of the 2 machines at least once, to include:
 - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
 - servicing machine lubrication points
 - identifying tooling needing sharpening and repair
 - checking that drive belts are undamaged and correctly tensioned
 - cleaning machine at the end of a production run
 - checking that electrical systems are functioning, and identifying issues for referral to qualified electrician
 - completing maintenance documentation.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
 - work health and safety
 - quality assurance and tolerance levels
 - reporting of machinery faults and material defects
- function and characteristics of routing and shaping machines:
 - spindle moulding machine
 - overhead or inverted pin routing machine
- routing and shaping processes and techniques
- characteristics and response to routing and shaping of materials commonly used:
 - solid timber

- manufactured board
- plastics
- laminates
- risk control measures, including personal protective equipment (PPE), for the following hazards
 - cutting and crushing hazard
 - objects and particles thrown by machine
 - noise
 - airborne contaminants
 - slips, trips and falls
 - manual handling injuries
- function of tools and materials typically used in the routing and shaping process:
 - machine-specific tools
 - jigs and fixtures
 - machine consumables
 - oils and lubricants and trial materials.
 -

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - work documentation
 - routing and shaping machines required for performance evidence
 - PPE
 - unprocessed materials for routing and shaping
 - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSFGN2001 Make measurements and calculations

Modification History

Release 2. Supersedes and is equivalent to MSFGN2001 Make measurements and calculations, (Release 1).

Release 1. New unit of competency

Application

This unit of competency describes the skills and knowledge required to identify the measuring equipment required in work task, and make and record accurate measurements and calculations. It includes identifying and responding to routine and non-routine problems with the process.

The unit applies to any individual taking measurements and making calculations as part of their job role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Unit Sector

Generic

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Identify required measurements and equipment	1.1	Select measuring equipment suited to the task
	1.2	Identify measuring units to be used, and the level of detail required, from work documents
	1.3	Check condition and calibration of measuring equipment and confirm it is fit for purpose
2. Take measurements	2.1	Make justified estimate of range of results that may be

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		obtained
	2.2	Identify and take account of external factors affecting measurement accuracy
	2.3	Take measurements using mathematical techniques suited to task
	2.4	Compare measurements against range of expected results
	2.5	Check accuracy and correctness of numerical information
	2.6	Record results to required level of detail
3. Carry out calculations	3.1	Identify measurement data to be used for calculations from work instructions
	3.2	Determine calculation methods and techniques suited to task
	3.3	Make justified estimate of range of quantities that may be obtained
	3.4	Carry out calculations and check accuracy of results
	3.5	Record results to required level of detail
4. Address routine and non-routine problems	4.1	Identify known faults that can occur during measurement activity
	4.2	Identify and take necessary action on causes of routine faults
	4.3	Log problems according to workplace procedures
	4.4	Identify and report non-routine problems to designated personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Oral communication skills to:	<ul style="list-style-type: none"> • communicate ideas and information, and report problems
Reading skills to:	<ul style="list-style-type: none"> • interpret familiar workplace documentation, including: • work instructions: job sheets, cutting lists, plans, drawings and designs • project plans and briefs • product and material specifications

Assessment Requirements for MSFGN2001 Make measurements and calculations

Modification History

Release 2. Supersedes and is equivalent to MSFGN2001 Make measurements and calculations (Release 1).

Release 1. New unit of competency

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- work from specific project plans or briefs to accurately determine and cost the quantities of materials or products for a minimum of three different projects.

In the course of determining and costing the above projects, the person must:

- record estimation of results that may be obtained
- use measuring, calculating, and recording devices
- check and record results.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose for measuring and calculating in workplace context
- mathematical principles and problem-solving strategies to make basic measurements and calculations
- uses and limitations of the following measuring equipment:
 - calculators
 - calipers
 - computers
 - laser or equivalent technology
 - rulers
 - squares
 - tapes measures
 - weighing scales
- workplace procedures and protocols relating to:
 - handling materials and products while undertaking measurement to minimise damage
 - recording and reporting outcomes of measurement and calculation
 - reporting non-routine problems
 - quality standards

- requirements of working with others in a team

Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- project plans and briefs
- measuring and calculating equipment specified in the knowledge evidence
- recording equipment required to demonstrate the performance evidence
- quality standards and enterprise procedures.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

MSL973022 Conduct laboratory-based acceptance tests for construction materials

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL973010 Conduct laboratory-based acceptance tests for construction materials. Foundation skill information added. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to conduct laboratory tests to confirm the acceptability of raw and/or manufactured construction materials. Personnel will have access to established test methods, workplace procedures and readily available advice. They are expected to obtain reliable test results safely and efficiently. In general, these personnel do not calibrate equipment and make only limited adjustments to the controls. The unit of competency does not cover interpretation or analysis of results or troubleshooting equipment problems.

This unit of competency applies to laboratory personnel working in the geotechnical and construction material testing industry sectors who conduct control and compliance tests in consulting laboratories or laboratories at extractive, manufacturing or construction sites using established test methods. These tests could involve aggregates, concrete, soils, road pavement or other specialised construction materials and products.

The unit of competency could also be relevant to laboratory technicians working in the water/wastewater and trade waste industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Prepare for laboratory-based acceptance tests	<p>1.1 Access relevant job instructions from laboratory information management system (LIMS)</p> <p>1.2 Interpret test request to confirm samples to be tested, the test method and equipment involved</p> <p>1.3 Identify hazards and workplace controls associated with the sample, preparation methods, reagents and/or equipment</p> <p>1.4 Assemble all required equipment and materials</p> <p>1.5 Plan work sequences for optimum efficiency and/or throughput of multiple samples</p>
2	Prepare samples or test pieces	<p>2.1 Retrieve samples and/or test pieces from storage and record their general appearance</p> <p>2.2 Check the accuracy and completeness of accompanying labels and documentation to ensure traceability</p> <p>2.3 Check that the storage/curing conditions of samples and/or test pieces were appropriate</p> <p>2.4 Compare samples and/or test pieces with test specifications, record observations and report discrepancies</p> <p>2.5 Prepare samples and/or test pieces in accordance with appropriate test method</p>
3	Check test equipment before use	<p>3.1 Set up equipment in accordance with test method</p> <p>3.2 Perform pre-use and safety checks in accordance with workplace procedures</p>

- 3.3 Identify faulty or unsafe equipment and report to appropriate personnel
 - 3.4 Check calibration status of instruments and report any out-of-calibration items to appropriate personnel
- 4 **Perform laboratory tests**
 - 4.1 Conduct tests in accordance with test method and workplace procedures
 - 4.2 Record data and observations in accordance with workplace procedures
 - 4.3 Recognise obvious errors or atypical data and take appropriate corrective actions
 - 4.4 Perform calculations as set out in test method
 - 4.5 Compare calculated results with expected values and report atypical results promptly to appropriate personnel
 - 4.6 Complete technical/administrative records and test reports in accordance with workplace procedures
 - 4.7 Seek advice to deal with any situation beyond own technical competence
- 5 **Maintain a safe work environment**
 - 5.1 Use safe work procedures and personal protective equipment (PPE) to ensure personal safety and that of others
 - 5.2 Minimise generation of waste and environmental impacts of testing
 - 5.3 Collect and/or dispose of all waste in accordance with environmental/quarantine requirements and workplace procedures
 - 5.4 Care for and store equipment, used test pieces and back-up samples in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to estimate and accurately calculate simple scientific quantities, such as density and moisture content.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL973010 Conduct laboratory-based acceptance tests for construction materials, Release 1.

Assessment Requirements for MSL973022 Conduct laboratory-based acceptance tests for construction materials

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL973010 Conduct laboratory-based acceptance tests for construction materials. Foundation skill information added. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely prepared at least 3 different laboratory samples or test pieces and conducted laboratory tests on them to confirm their acceptability
- safely conducted laboratory-based acceptance tests in accordance with workplace procedures and test methods to provide reliable data within the required timeframe.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the purpose and principles of construction materials tests performed as part of job role and key preparation/measurement steps in the test methods
- the properties of construction materials under test
- calculation steps to give results in appropriate units and precision
- expected values for sample type and sources of uncertainty (and methods for control) in construction materials tests routinely used in job role
- workplace procedures for:
 - pre-use checks and operating test equipment routinely used in job role
 - recording and reporting test results, calculations, test observations, and unexpected or atypical results and equipment problems
 - ensuring traceability of samples, test pieces, test data and results
 - confidentiality
 - waste minimisation and safe disposal
 - sampling and testing procedures for specific sites, clients and samples
 - workplace safety

- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and workplace requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - sample preparation and test equipment and materials specified in the test method
 - test methods and description of test set-up, data sets and records
 - calculator and/or computer and relevant software or laboratory information system.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMOPS102 Perform tasks to support production

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS102A Perform tasks to support production

Application

This unit of competency covers the skills and knowledge required to perform tasks in support of the production process working under close supervision.

This competency applies to personnel who are not operating equipment but are making products or contributing to the production process through predominantly manual tasks. These tasks might be referred to as 'fetch and carry' type tasks.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate. It might also apply to a more experienced operator working outside their field of expertise and under close supervision.

The competency applies to all sectors of the manufacturing industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Operations

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- | | | |
|---|--|---|
| 1 | Perform general duties and tasks | 1.1 Perform tasks as directed |
| | | 1.2 Ask questions of appropriate person to confirm unusual requirements |
| | | 1.3 Organise relevant equipment and tools and check to confirm good working condition |
| | | 1.4 Identify hazards and follow specified hazard controls |
| | | 1.5 Select and use personal protective equipment (PPE), where needed, in accordance with organisation procedures |
| 2 | Transfer, remove or supply materials/product where required | 2.1 Organise, confirm and record requests and tasks according to specified procedures |
| | | 2.2 Identify and organise appropriate equipment for transferring material where relevant |
| | | 2.3 Load and unload material using suitable aids |
| | | 2.4 Transfer/move material to the correct destination in a safe manner |
| 3 | Perform cleaning duties associated with role | 3.1 Clarify cleaning duties |
| | | 3.2 Determine, prepare and mix appropriate cleaning equipment and chemicals/detergents for specific tasks |
| | | 3.3 Follow procedures for handling and storage of cleaning liquids in accordance with organisation or manufacturer specifications |
| | | 3.4 Clean as required |
| 4 | Complete duties and reporting requirements | 4.1 Identify routine problems and take corrective actions, as required |
| | | 4.2 Complete reporting requirements in accordance with organisation procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Tools and equipment

Tools and equipment include one or more of the following:

- cleaning equipment
- detergents and other chemicals
- simple hand and power tools
- hand trolleys pallet trucks

Note that production equipment and complex equipment, such as forklifts, overhead cranes or front-end loaders, are not covered by this unit.

Loading and unloading aids

Loading and unloading aids include equipment other than regulated load shifting equipment.

Loading and unloading aids must conform to materials handling requirements, safe work practices and manual handling techniques and workplace procedures.

Hazards

Hazards include one or more of the following:

- manual handling injuries
- slip/trip hazards
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Routine problems

Routine problems must be reported and corrective action taken according to relevant procedures.

Routine problems include one or more of the following:

- difficult access to the work area
- awkward work spaces
- tool failures or breakages
- defective equipment
- incorrect or defective materials
- wrong quantities of materials

Corrective actions Corrective actions include one or more of:

- reporting to an appropriate person
- taking action specified in the procedure

Appropriate personnel Appropriate personnel includes one or more of:

- supervisor
- more senior operator
- other designated personnel

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOPS102A Perform tasks to support production

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMOPS102 Perform tasks to support production

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS102A Perform tasks to support production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- follow procedures to work safely, including:
 - selecting and using personal protective equipment (PPE)
 - locating and transporting materials and products
 - selecting and using equipment and tools
 - undertaking basic tasks to meet standards
 - identifying hazards and applying control measures
- clarify and confirm tasks and procedures
- recognise labels and signs
- identify routine problems and take corrective action, where appropriate
- complete forms and documentation.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including:
- safety, emergency and hazard control
- relevant organisation standard operating procedures (SOPs)
- hazards that may arise in the job/work environment, including:
 - their possible causes
 - potential consequences
 - appropriate risk controls
- types and application of PPE relevant to job/work environment
- safe handling of materials relevant to job
- types and application of equipment and criteria for determining good working condition
- routine problems that may arise in the job/work environment and corrective action appropriate to the problem cause
- reporting procedures.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMOPS212 Use organisation computers or data systems

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS212A Use organisation computers or data systems

Application

This unit of competency covers the skills and knowledge required to use organisation computers or data systems in order to work effectively.

The operator will be required to select correct programs, save and retrieve data, and produce documents and spreadsheets relevant to operational or administrative functions within the organisation.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Operations

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- | | | | |
|---|-----------------|-----|---|
| 1 | Identify | 1.1 | Identify data and information available from the system |
|---|-----------------|-----|---|

	applications of computer or data system for work role		and its application to work role
		1.2	Identify data from work role which needs to be entered in the system
2	Use the computer or data system	2.1	Adjust workstation equipment to meet ergonomic requirements and use appropriate posture
		2.2	Log on according to procedures
		2.3	Navigate system
		2.4	Input data or make changes as required
		2.5	Check entered or edited data is correct
		2.6	Access required data/information
		2.7	Output data as required
		2.8	Apply system/security procedures
		2.9	Use 'Help' as needed
3	Save file and exit system	3.1	Identify the need to save data and, if required, save and store data in appropriate directory or folder
		3.2	Close file and/or exit applications programs without loss of data
		3.3	Back-up data if required in accordance with procedures
4	Respond to routine problems with the system	4.1	Recognise routine problems that occur during the operation
		4.2	Identify and take action on causes of routine problems
		4.3	Log problems as required
		4.4	Identify non-routine process and quality problems and take appropriate action

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- privacy and intellectual property (IP)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- organisation procedures relevant to data systems, data security, record keeping, privacy, internet usage and IP
- manufacturers' manuals
- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the organisation

- Computers or data systems** Computers or data systems are used for one or more of the following:
- electronic documents (typically Word, Excel, email and similar)
 - safety, safety data and injury reporting
 - orders, purchasing, stock levels and scheduling
 - stock control, stores, warehousing and logistics
 - materials hazards, labelling, materials identification and material safety data sheets (MSDSs)
 - batch data, schedules, production planning and operations planning
 - product quality, statistical control, production trends and quality control
 - maintenance, maintenance planning, procedures and spare parts

- Equipment** Equipment includes one or more of the following:
- computers and stationary terminals/kiosks (stand alone and/or networked)
 - mobile terminals and handheld devices
 - smartphones and tablets
 - printers
 - mouse and keyboard
 - facsimile equipment
 - onboard terminals
 - scanners
 - bar coders

- Software applications** Software applications include one or more of the following:
- email
 - internet or intranet
 - word processing, database and/or spreadsheet programs
 - company/process-specific software

- Documents** Documents include one or more of the following:
- work orders
 - work instructions/SOPs
 - email
 - faxes
 - memos
 - tables
 - standard letters

- standard reports

Hazards

Hazards include one or more of the following:

- ergonomics and posture
- repetition strain injuries
- glare from monitor screens
- damaged cables or connections
- strains or injuries moving computer equipment
- other hazards that might arise in the job/work environment

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of:

- software problems, such as unable to access file, find correct page, send mail or input data
- loose or disconnected cables
- 'frozen' screens
- faulty monitors
- keyboard problems

Known solutions are drawn from one or more of:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to relevant procedures.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOPS212A Use organisation computers or data systems

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMOPS212 Use organisation computers or data systems

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS212A Use organisation computers or data systems

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- use computers or data systems to locate and access information and/or data to meet job requirements
- edit information and/or input data electronically using one or more of:
 - keyboard
 - mouse
 - stylus
 - touchscreen
- check that edits/data entry are accurate and complete
- locate files (in file directory) or generate reports (within software) relevant to job
- apply procedures, as required, for:
 - log in/log out (and password protection)
 - back-up
 - security (e.g. anti-virus)
 - intellectual property (IP)/security
- apply known solutions to routine problems.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including those covering:
 - data systems and data security
 - record keeping
 - privacy
 - IP
 - use of internet
 - safety, emergency and hazard control
 - relevant organisation standard operating procedures (SOPs)
- ergonomics of using computers and related equipment

- scope and range of available data relevant to work role
- routine problems that may arise and how to identify causes
- types and application of software relevant to work role.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations and provide for demonstration of responding to problems
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of appropriate tools, equipment, data and documentation
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMPCI102 Apply effective work practices

Modification History

Release 1. Supersedes and is equivalent to MSAPCI102A Apply effective work practices

Application

This unit of competency covers the knowledge and skills needed to apply effective work practices in an industry. It includes planning, organising and completing work, communicating effectively, working with others, solving problems and adapting to change.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

This unit has application in qualifications for all occupations in the manufacturing industry and it should be regarded as an integrating unit. When delivered/assessed as part of a qualification, this unit must be customised to ensure its relevance to real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Manufacturing pathways

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Plan, organise and complete daily work	1.1	Identify and interpret work instructions and priorities in consultation with supervisor
		1.2	Determine and map out an appropriate work plan or daily routine
		1.3	Determine, collect and organise materials, resources and information needed to complete work, including work health and safety (WHS) requirements
		1.4	Complete work tasks within designated timelines, quality standards and instructions
2	Communicate effectively	2.1	Identify appropriate lines of communication with supervisors, colleagues and customers
		2.2	Use effective communication skills and numeracy skills to gather and convey information
		2.3	Demonstrate appropriate non-verbal behaviour and communication
3	Work with others	3.1	Identify work roles of self and others in the workplace
		3.2	Undertake individual responsibilities and duties in a positive manner and in a range of situations to promote cooperation and good relationships
		3.3	Respect customers and colleagues who have diverse backgrounds
4	Use workplace technology	4.1	Select appropriate workplace technology and use according to workplace and manufacturer guidelines and instructions

- | | | | |
|---|---------------------|-----|--|
| | | 4.2 | Inspect workplace technology is to ensure it is not damaged and is working properly and take precautions to reduce risks |
| | | 4.3 | Take appropriate action when problems with workplace technology occur |
| | | 4.4 | Care for workplace technology according to workplace and manufacturer guidelines and instructions |
| 5 | Solve work problems | 5.1 | scope of individual responsibility to rectify them |
| | | 5.2 | Ask for assistance from key personnel when appropriate |
| | | 5.3 | Report workplace problems, as required, using appropriate workplace procedures |
| 6 | Adapt to change | 6.1 | Identify, clarify and adapted to new work requirements or situations |
| | | 6.2 | Consider and apply possible practical or creative options to deal with workplace challenges |
| | | 6.3 | Demonstrate a willingness to be open to and trial new ideas and techniques |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Work instructions Work instructions include one or more of the following:

- job sheets
- patterns
- plans
- drawings
- designs
- verbal directions
- customer orders

Effective communication skills

Effective communication skills include one or more of the following:

- listening and understanding
- speaking clearly and directly
- reading independently
- writing to audience needs
- group interaction
- the chain of command in which to report
- questioning to obtain information and/or clarify information and understanding
- routine oral reporting
- routine written reporting
- participation in routine meetings in the workplace
- basic recording of discussions

Numeracy skills

Numeracy skills are those which related to the job or specific task and involve the operations of multiplication, division, addition, subtraction, percentages and/or fractions, and include those related to one or more of the following:

- estimates of the quantities of materials and resources required to complete a work task
- money (e.g. cost, invoices and change)
- volume
- weight
- time
- length and distance
- speed
- area
- perimeter

Diverse backgrounds

Diverse backgrounds include, but are not limited to, one or more of the following:

- ages
- genders
- culture
- personal values or beliefs
- race
- religion
- political persuasion

Workplace technology

Workplace technology includes one or more of the following:

- business equipment, such as fax machines, telephones, photo copiers, cutting machines, cameras and voice recorders
- computer technology, such as laptops, PCs, digital cameras, zip drives, modems, scanners and printers
- other technology, such as machinery, hand tools, lifts and security systems

Workplace technology precautions

Workplace technology precautions include, one or more of the following:

- routine checking of equipment
- regular back-ups of data
- keeping a log book of detected faults
- checking that repairs have been carried out
- using appropriate clothing

Appropriate actions Appropriate actions include one or more of the following:

- contacting a supervisor, manager
- contacting the manufacturer
- contacting a service provider
- reporting and documenting the problem

Key personnel

Key personnel include one or more of the following:

- supervisor
- manager
- fellow colleagues
- team members

Workplace

Workplace procedures include, but are not limited to, one or more of

procedures

the following:

- organisational policies and guidelines
- common organisational practice
- performance plans
- WHS policies, procedures and programs
- relevant legislative requirements in areas such as WHS, privacy, anti-discrimination, environmental protection and trade practices
- relevant licence requirements and related regulations

Work instructions

Work instructions include one or more of the following:

- job sheets
- patterns
- plans
- drawings
- designs
- verbal directions
- customer orders

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPCI102A Apply effective work practices

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMP CI102 Apply effective work practices

Modification History

Release 1. Supersedes and is equivalent to MSAPCI102A Apply effective work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- plan a daily routine to complete required workplace tasks
- follow workplace work health and safety (WHS) and environmental protection procedures and responsibilities
- apply relevant workplace procedures, policies, instructions and regulations
- identify and correctly use equipment, tools and other technology required to complete workplace tasks
- complete work systematically with required time management and attention to detail without damage to goods, equipment or personnel
- complete work activities in collaboration with others in accordance with instructions, procedures and applicable regulations
- work cooperatively and collaboratively with others to complete tasks
- apply relevant ethical practices and codes of practice in the course of work activities
- recognise limitations, ask for help and seek clarification or information about work requirements and procedures
- take prompt action to report and/or rectify any workplace problems in accordance with workplace procedures
- recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions among staff and others
- use literacy skills in regard to written and verbal communication in the workplace
- use basic interpersonal and communication skills, including listening and questioning and receiving feedback
- adapt and modify activities depending on differing workplace contexts and environment
- carry out calculations that are required when completing work tasks, including the four basic mathematical operations
- keep required records of workplace activities
- apply relevant industrial or other legislative requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures, policies and instructions

- workplace structures and the roles and responsibilities of individuals and team/group members
- typical problems in the workplace and appropriate action and solutions
- systems and equipment used in the workplace and the instructions, processes and precautions for their use
- basic principles of teamwork in the workplace.

Assessment Conditions

- Assessment must occur in a simulated environment or a workplace.
- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function. Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time and for a range of manufacturing contexts.
- Assessors must:
 - as a minimum, satisfy the Standards for Registered Training Organisations 2015 assessor requirements
 - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

MSMSUP200 Achieve work outcomes

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP200A Achieve work outcomes

Application

This unit of competency covers the skills and knowledge required to identify and implement actions to achieve workplace targets and to suggest ways to improve processes.

This unit of competency applies to personnel who are required to achieve quality standards and productivity targets within the scope of own job.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other team members and supervisors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify key aspects of the process	1.1	Outline the properties of materials/components used in the process
		1.2	Describe the process relevant to own work area

- | | | | |
|---|--|-----|---|
| | | 1.3 | Identify the safety and environmental requirements relevant to this process |
| | | 1.4 | State aspects of this process which require careful monitoring |
| 2 | Implement actions to achieve targets | 2.1 | Identify production targets for own work area and work role |
| | | 2.2 | Describe techniques used to measure performance against workplace targets/standards |
| | | 2.3 | Identify factors impacting on achieving targets |
| | | 2.4 | Identify potential inefficiencies in the process |
| | | 2.5 | Achieve work outcomes |
| 3 | Participate in an improvement activity in accordance with organisation procedures | 3.1 | Investigate a problem |
| | | 3.2 | Identify likely causes of problem |
| | | 3.3 | Suggest options for improvement |
| | | 3.4 | Discuss a proposed improvement with appropriate people |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures All operations must be performed in accordance with relevant procedures. Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Routine problems Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents

Known solutions are drawn from one or more of:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Assessment Requirements for MSMSUP200 Achieve work outcomes

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP200A Achieve work outcomes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify workplace targets and performance measures
- identify and minimise inefficiencies
- identify and control hazards
- work to achieve targets
- apply known solutions to routine problems
- participate in process improvement teams/activities.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including relevant standard operating procedures (SOPs)
- potential sources of wastage/production inefficiencies
- process, normal operating parameters and product quality to recognise non-standard situations
- criteria for evaluating and selecting improvements, including:
 - benefits
 - costs
 - safety implications
 - limitations of equipment, process and materials.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- must include participation in an improvement activity which provides sufficient evidence of the requirements of all the elements and performance criteria
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP230 Monitor process operations

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP230A Monitor process operations

Application

This unit of competency covers the skills and knowledge required to monitor production processing equipment and take appropriate action.

This unit of competency applies to operators who are required to identify the job requirements, monitor production processing equipment, monitor the job to maintain safety and quality, and identify and take action on problems.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This competency applies to the monitoring of various forms of production equipment in all work environments and sectors within the process manufacturing industry. It includes the monitoring of all ancillary tools and equipment.

Where operation of the equipment is required, the appropriate operational unit from MSM, PMA, PMB or PMC should be used.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify scope of work in accordance with procedures	1.1	Identify own work requirements
		1.2	Check procedures to identify operating parameters and approved adjustments
		1.3	Establish actions to be used in the event of faulty production
		1.4	Identify procedures for obtaining materials for the process
		1.5	Identify hazards and environmental issues relevant to own job
2	Get ready for work/job	2.1	Assemble ancillary tools and equipment
		2.2	Identify inspection procedures
		2.3	Identify any finishing activities
		2.4	Identify and implement hazard controls
		2.5	Establish the location and function of equipment emergency stops and ensure guards are in place
		2.6	Identify and note requirements for checking materials inputs and outputs; ancillary supplies and equipment; and product quality requirements for the relevant process stage
3	Maintain operations in accordance with procedures	3.1	Check process operations, noting product quality, production outputs and waste
		3.2	Check product for conformity to specification, make adjustments to the equipment, where appropriate, and store product

- | | | |
|---|---------------------------------------|--|
| | 3.3 | Collect material which is able to be reprocessed and reused, and deal with waste and scrap |
| | 3.4 | Use the quality control system |
| | 3.5 | Clean up equipment and work area and manage waste. |
| 4 | Identify product quality requirements | 4.1 Monitor process and note conditions which may affect product quality standards |
| | | 4.2 Report process variations within workplace procedures |
| | | 4.3 Note and implement authorised changes in procedures and specifications |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Tools and equipment

Tools and equipment include one or more of the following:

- hand carts and trolleys
- knives and other bag opening equipment
- hoists/lifting equipment not requiring any special permits or licences
- basic hand tools required for opening of material packaging
- relevant personal protective equipment (PPE)

Hazards

Hazards include one or more of the following:

- automated or rotating equipment

- manual handling hazards
- knife hazards
- equipment failures
- industrial (machinery, equipment and product)
- noise, rotational equipment or vibration
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- other hazards that might arise

Routine problems Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- process problems, such as:
 - equipment malfunctions
 - product jamming or sticking
 - power failures
 - air, oil or lubricant difficulties
- product problems, such as:
 - variations in materials
 - contamination of materials
 - malformed or incomplete products

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP230A Monitor process operations

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMSUP230 Monitor process operations

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP230A Monitor process operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- read and interpret product specifications, job sheets, procedures, material labels and safety information to identify:
 - operating procedures
 - equipment controls and adjustment parameters
 - inspection procedures and quality requirements
 - hazard minimisation procedures
 - finishing requirements
 - sourcing of materials
 - action to be taken in response to faulty production from operating procedures
- monitor production outputs and product quality and make adjustments to equipment as required and within parameters
- apply known solutions to routine problems
- report process variations
- identify hazards and apply relevant hazard controls.

Knowledge Evidence

- Evidence must be provided that demonstrates knowledge of:
- organisation procedures, including:
 - safety, emergency and hazard control
 - relevant procedures
 - quality assurance/quality control
- hazards that may arise in the job/work environment, including:
 - their possible causes
 - potential consequences
 - appropriate risk controls
 - types and application of personal protective equipment (PPE) in relation to job/work environment
- work flow sequences and materials demand.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
 - may use industry-based simulation, particularly where safety, lack of opportunity or significant cost is an issue, for part only of the unit, such as using deliberately created product faults for assessing the checking of product for conformity to specification.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP240 Undertake minor maintenance

Modification History

Release 2. Equivalent. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP240A Undertake minor maintenance.

Application

This unit describes the skills and knowledge required to undertake minor maintenance and solve routine problems to procedures. Minor maintenance can include operational maintenance, general cleaning, part removal and part replacement and other activities that do not require a trade qualification.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify maintenance requirements	1.1 Identify equipment variations and/or irregularities using observed data and plant records 1.2 Assess the urgency and priority of the situation 1.3 Identify appropriate corrective action 1.4 Identify correct tools and materials 1.5 Assess the impact of the maintenance activity and communicate to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	appropriate personnel 1.6 Identify hazards and risk controls 1.7 Identify work permit requirements
2. Prepare for maintenance activity	2.1 Ensure equipment is turned off and isolated according to procedures 2.2 Clear the area of obstructions and hazardous materials 2.3 Obtain appropriate tools, parts, materials and procedures 2.4 Obtain the appropriate work permits and adhere to the requirements 2.5 Communicate the impending maintenance activity to the appropriate personnel
3. Perform maintenance activity	3.1 Access all relevant information 3.2 Undertake maintenance activity according to procedures 3.3 Use tools and maintenance techniques correctly 3.4 Restore equipment to normal working condition 3.5 Leave the work area in a clean and safe condition 3.6 Ensure permits are signed-off as appropriate
4. Test equipment	4.1 Test equipment according to procedures 4.2 Return equipment to service 4.3 Ensure equipment meets normal operating requirements
5. Record maintenance activity	5.1 Complete maintenance logs and/or plant history records 5.2 Report maintenance activity to relevant personnel 5.3 Identify and report outstanding maintenance requirements to relevant personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSMSUP240 Undertake minor maintenance

Modification History

Release 2. Equivalent. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP240A Undertake minor maintenance.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken at least 1 minor maintenance activity, including:
 - using available data and records to recognise fault and no-fault conditions in standard and non-standard situations
 - applying operational guidelines and known solutions to correct variations and/or irregularities
 - applying approved hazard control, work permit and safety procedures.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults
- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- factors that may affect product quality or production output and appropriate remedies.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- maintenance documentation, guidelines, procedures and schedules, including data and plant records
- maintenance tools and equipment, including personal protective equipment (PPE).

MSMSUP291 Participate in continuous improvement

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP291A Participate in continuous improvement

Application

This unit of competency covers the skills and knowledge required to identify areas of improvement and work with colleagues to implement the changes.

It applies to operators who are required to contribute to continuous improvement of work processes by applying knowledge of customers and suppliers to identify improvements and to select and implement improvements.

This unit of competency applies to an individual working as part of a team/work group.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Opportunities for improvement

Opportunities for improvement include one or more of the following:

- an unintended occurrence or outcome
- product faults and faulty products
- excessive variation
- trends
- waste (muda)
- improving process capability
- improving process efficiency
- improving health safety and environment (HSE) outcomes
- reducing cost/lifecycle cost

Quality tools and techniques

Quality tools and techniques include one or more of the following:

- controls charts (statistical process control)
- cause-effect diagrams
- check sheets

- histograms/Pareto charts
- scatter diagrams
- stratification
- flow charts

Assessment Requirements for MSMSUP291 Participate in continuous improvement

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP291A Participate in continuous improvement

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- identify relationship of own role to the needs of internal and external customers and suppliers
- identify variations and non-conformances
- follow procedures for reporting and managing variations and non-conformances
- communicate and work with others to:
 - analyse areas of variations and non-conformances to identify causes and develop strategies for improvements
 - implement changes to systems and procedures
 - evaluate whether changes have achieved improvements
- interpret quality data and graphs.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- the use of information in developing improvements
- types and application of analytical problem-solving techniques
- organisation processes and approvals for making changes to systems and procedures
- quality tools and techniques.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations

- will typically include a supervisor/third-party report focusing on consistent performance and opportunity for improvement recognition and resolution. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- must include the use of appropriate quality tools
- may use industry-based simulation for part only of the unit (typically implementation) particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP292 Sample and test materials and product

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP292A Sample and test materials and product

Application

This unit of competency covers the skills and knowledge required to take routine samples and conduct simple tests.

This unit of competency applies to operators who are required to take samples in the workplace, perform a narrow range of simple tests and interpret the results and take specified action based on those results.

It applies to simple, routine tests to procedure which will typically be done in the workplace or in a 'factory laboratory' (or bench) adjacent to or within the factory.

This unit of competency is typically performed by operators working either independently or as part of a work team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

- | | | |
|---|-----------------------------------|--|
| 1 | Take sample | 1.1 Determine type of sample and sampling equipment required |
| | | 1.2 Check sampling equipment is clean and in good order |
| | | 1.3 Take sample of required type, from the required place and at the required time and place in required container |
| | | 1.4 Label sample to procedure |
| | | 1.5 Carry sample to required place |
| 2 | Complete test | 2.1 Check test required from procedures |
| | | 2.2 Check sample identification and integrity |
| | | 2.3 Check test equipment is clean, in good order and within calibration |
| | | 2.4 Complete test required in accordance with standard procedures/instructions |
| 3 | Interpret results and take action | 3.1 Note anything about sample, equipment or the test itself which may have caused it to give a bad result |
| | | 3.2 Compare results to specification |
| | | 3.3 Take action appropriate to the test results and any other observations |
| 4 | Complete sample and test cycle | 4.1 Complete required records |
| | | 4.2 Store and/or dispose of sample as required |
| | | 4.3 Clean all equipment and leave ready for next sample/test |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- test methods
- sampling techniques
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- emergency procedures
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Assessment Requirements for MSMSUP292 Sample and test materials and product

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP292A Sample and test materials and product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- undertake collection and processing of sample
- select and use appropriate procedures
- undertake tests with adequate reproducibility
- check and clean equipment
- recognise suspicious test results caused by sampling/testing faults
- compare results to specifications and take appropriate action as defined in relevant procedures
- complete workplace forms, label samples and record results.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant procedures
- specifications for test results
- types and application of sample techniques and their requirements
- types and application of test methods and critical factors leading to good/poor test results

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems

- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP303 Identify equipment faults

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP303A Identify equipment faults

Application

This unit of competency covers the skills and knowledge required to plan and carry out checks to identify and deal with equipment faults and to determine solutions.

This unit of competency applies to experienced personnel, such as experienced operators, team leaders or supervisors, who are required to apply knowledge of materials, product purpose and processes to identify and deal with routine and non-routine faults in equipment, propose solutions, carry out solutions within scope of authority and competence and complete logs and reports.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade-level skills. It is not intended that this competency would cover maintenance that is carried out in a workshop.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify scope of operational check	<p>1.1 Identify and classify equipment components and operating systems</p> <p>1.2 Match appropriate checks and procedures to the equipment operating systems</p> <p>1.3 Identify special checking procedures and parameters in manufacturer specifications and procedures</p> <p>1.4 Identify sources of information and data relevant to key variables</p> <p>1.5 Identify and control hazards</p> <p>1.6 Observe and undertake checks on the physical condition of equipment in accordance with procedures</p> <p>1.7 Record preliminary observations</p> <p>1.8 Discuss checking procedures with appropriate personnel and obtain necessary permission where required</p>
2	Plan operational checks	<p>2.1 Check specifications and notes from preliminary observations and identify areas to be clarified</p> <p>2.2 Plan sequence for checks, noting areas where results and observations should be recorded</p> <p>2.3 Ensure area is safe for operational check</p> <p>2.4 Make arrangements for any additional resources, including other employees</p>
3	Check unit through full	<p>3.1 Undertake operational checks observing relevant safety and operational requirements</p>

	operational range	3.2	Confirm results and findings
		3.3	Identify faults to be dealt with
4	Identify faults and formulate recommendations	4.1	Identify impact of faults on work schedule
		4.2	Record proposals for equipment repair based on faults found, cost/time implications and workplace approval systems
		4.3	Explain proposals to relevant workplace personnel, including any options and recommendations
		4.4	Take appropriate action to return equipment to full operation in accordance with procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- plant description manuals
- manufacturer instructions and specifications
- service manuals
- machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits
- any similar instructions provided for the smooth running of the plant

Tools and equipment

Tools and equipment include one or more of the following:

- hand tools specific for the task
- product testing equipment (e.g. flowmeter, scales, tape measure, micrometer, calliper and ultrasonic thickness)
- equipment checking equipment (e.g. vibration meter, tachometer, current tester, thermal imaging and temperature gauge)

Hazards

Hazards include one or more of the following:

- rotating and moving machinery
- process materials, solids, fluids and gases under pressure or flowing
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out-of-specification operation
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures

- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Faults

Faults may arise from routine and non-routine causes and must be resolved by applying operational knowledge to apply existing, or develop new solutions, either individually or in collaboration with relevant experts to:

- determine faults needing action
- determine possible fault causes
- develop solutions to faults which do not have a known solution
- follow through items initiated until final resolution has occurred
- report faults outside area of responsibility/expertise to designated person

Non-routine faults are unexpected faults, or variations of previous faults and are associated with one or more of the following:

- out-of-specification product or variations
- response of equipment to materials variations
- new or changed materials
- changed equipment settings (e.g. higher speed or throughput)
- equipment breakdown or in need of maintenance

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information such as journals, engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

Variables Key variables to be monitored include one or more of the following:

- equipment performance (e.g. speed, output and variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired)

Sources of information and data Sources of information and data include one or more of the following:

- plant data
- log sheets
- operational and performance reports
- physical aspects, such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures

Unit Mapping Information

Assessment Requirements for MSMSUP303 Identify equipment faults

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP303A Identify equipment faults

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- check and identify a fault within an item of equipment/plant
- ensure workplace is safe for checking and maintenance of equipment
- communicate effectively with personnel and all levels
- evaluate the impact of fault in terms of work schedule, cost/time and approvals needed and make recommendations for repairs
- apply operational knowledge to non-routine problems
- take appropriate action within scope of authority in accordance with procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
 - work permit systems
 - safety, emergency and hazard control
 - standard operating procedures (SOPs)
- hazards that may arise in the job/work environment, including:
- their possible causes
- potential consequences
- appropriate risk controls/ hierarchy of control
- principles of the operation of the equipment to be maintained:
 - operating principles for mechanical, hydraulic, pneumatic and electrical/electronic systems
 - functions and troubleshooting of internal components and their problems
 - routine and non-routine causes of equipment failures and the service conditions which may increase maintenance
- types and application of testing procedures and equipment.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.

- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Application

This unit describes the skills and knowledge required to use structured process improvement tools to solve process and other problems. It describes the broad application of in-depth and rigorous structured problem-solving techniques to identify opportunities for improvement.

This unit applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit and/or equipment.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	and investigation 1.3 State and specify the problem clearly
2. Determine fundamental cause of problem	2.1 Select problem-solving tool appropriate to the problem and the context 2.2 Identify possible causes based on experience and the use of problem-solving tools and analytical techniques 2.3 Develop possible cause statements 2.4 Determine fundamental cause
3. Determine corrective action	3.1 Determine all possible options for resolution of the problem 3.2 Identify strengths and weaknesses of possible options 3.3 Determine corrective action to remove the problem and possible future causes 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures 3.5 Develop recommendations for ongoing monitoring and testing
4. Communicate recommendations	4.1 Prepare report on recommendations 4.2 Present recommendations to appropriate personnel 4.3 Follow up recommendations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 2. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools

Assessment Requirements for MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
 - specific, measurable, achievable, relevant, timed (SMART) objectives
 - resource requirements
 - methods for reaching objectives
 - timelines
 - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS027014 Apply environmental legislation, codes and standards

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to interpret and apply relevant environmental legislation, codes and standards to activities associated with a work area, site, project or program. Personnel are required to access, review and interpret complex legal and technical documents, develop and revise site or project-specific environmental management procedures, explain the implications of these documents to site personnel, monitor work activities to ensure compliance and prepare reports.

This unit applies to environmental site coordinators, environmental managers and senior environmental officers working in all industry sectors. They may also work under the supervision of an environmental scientist or engineer, site manager or workplace environmental manager.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Management

Unit Sector

Environmental

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Access and interpret relevant legislation, codes	1.1	Read and interpret legislative, regulatory and licensing requirements and approvals that apply to site or project
		1.2	Analyse the broad significance of these requirements for

<p>Elements describe the essential outcomes.</p> <p>and standards</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element.</p> <p>the organisation, key job roles and specific work activities</p>
	<p>1.3 Identify legal accountability, obligations and consequences of non-compliance</p> <p>1.4 Obtain advice from relevant personnel about environmental law matters that impact on work area and are outside own scope of knowledge</p> <p>1.5 Clarify own scope of responsibility and authority for achieving specific environmental outcomes</p>
<p>2 Ensure project or site specific environmental management procedures comply with requirements</p>	<p>2.1 Read and interpret workplace environmental management policies, plans and procedures in conjunction with legislative requirements</p> <p>2.2 Assess the need for project or site-specific environmental management procedures in consultation with manager</p> <p>2.3 Draft new or revised procedures to address any gaps or deficiencies</p> <p>2.4 Provide draft documentation to relevant personnel for review and approval prior to use</p>
<p>3 Promote compliance by site personnel</p>	<p>3.1 Distribute clear information about the environmental management roles and responsibilities of site personnel</p> <p>3.2 Provide clear information about workplace environmental management policies, plans and procedures and work instructions</p> <p>3.3 Explain the implications of non-compliance to all site personnel in work area</p> <p>3.4 Empower site personnel through coaching and mentoring to manage their own environmental responsibilities</p>
<p>4 Ensure that work</p>	<p>4.1 Plan work activities to ensure environmental compliance</p>

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
activities meet compliance requirements	<p>4.2 Recognise when current or planned activities may require changes to existing licences and approvals and notify relevant personnel</p> <p>4.3 Implement environmental management policies, plans and procedures to ensure compliance and achieve environmental objectives and key performance indicators</p> <p>4.4 Collect and collate environmental data to support preparation of required reports and compliance information</p> <p>4.5 Review environmental data for completeness and accuracy and identify opportunities for improving compliance</p> <p>4.6 Complete reporting requirements in accordance with workplace procedures and legislative requirements</p>
5 Maintain knowledge of legislative requirements	<p>5.1 Monitor sources of information for changes to legislation, codes and standards</p> <p>5.2 Regularly update information for site personnel and explain changes to legal requirements that impact on work area</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS027014 Apply environmental legislation, codes and standards

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched, interpreted, applied and promoted environmental legislative requirements, codes and standards for at least 2 sites, projects or program activities.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal terminology, including statute, acts, regulations and ordinances
- sources of environmental legislative information and changes
- responsible bodies at federal and state and territory levels
- major features of federal and state and territory environmental legislation, regulations and local government by-laws, policies and plans that apply to the work area, site, project or program
- organisation's environmental management plans, policies, procedures and work instructions that apply to the work area, site, project or program
- workplace procedures for the development, revision and improvement of environmental management policies, plans, procedures and work instructions
- workplace environmental reporting requirements for the work area, site, project or program and reporting procedures
- types of site personnel.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
 - a standard work space equipped with basic computer equipment and access to organisation's information management system; maps, digital camera; and monitoring and sampling equipment
 - documentation, including site/project history, workplace environmental management policies, plans, actions, procedures and checklists.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS402042 Apply 5S procedures

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS402041 Apply 5S in an office and MSS402040 Apply 5S procedures.

Application

This unit describes the skills and knowledge required to identify and implement 5S practices to make improvements in own job and work area.

This unit applies to workers who have a discrete role, individually manage a process or who have been given authority by a supervisor or manager to make changes to work practices in a work area.

This unit applies to any organisation that is implementing continuous improvement or more formal competitive systems and practices.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for implementation of 5S	1.1 Identify own functions in target work area in terms of internal and/or external customer requirements 1.2 Identify how own and team tasks contribute to work area functions 1.3 Identify key steps in work tasks 1.4 Confirm arrangements for assistance and reporting for 5S implementation

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Sort needed items from unneeded	2.1 Identify all items in target work area 2.2 Distinguish between essential items for achieving work area functions and non-essential items 2.3 Place any non-essential item in an appropriate location other than work area/space 2.4 Regularly check that only essential items are in work area 2.5 Seek input from supervisor and any team members to confirm non-essential items and what to do with them
3. Set the workplace in order	3.1 Identify best location, state or condition for each essential item to minimise waste (muda) 3.2 Set each essential item in its assigned location, state or condition 3.3 After use, immediately return each essential item to its assigned location, state or condition 3.4 Regularly check that each essential item is in its assigned location, state or condition
4. Shine the work area	4.1 Keep work area clean and organised before, during and after shift 4.2 Identify cleaning and maintenance routines within own area of responsibility in work area 4.3 Apply cleaning and maintenance routines according to schedules. 4.4 Check work area and essential items for signs of wear, malfunction, damage and/or safety risks that require immediate attention and report according to workplace procedures
5. Standardise activities	5.1 Identify and apply procedures or activities to maintain clean and organised work area 5.2 Apply standardised approach to procedures or activities using a simple checklist, schedule or reminder system 5.3 Keep work area to specified standard
6. Sustain the 5S system	6.1 Clean and organise work area after completion of job and before commencing next job 6.2 Identify situations where conformance to standards is unlikely and take actions specified in procedures 6.3 Inspect work area regularly for conformance to specified standard 6.4 Recommend improvements to lift the level of conformance in the

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	workplace

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to complete familiar workplace documentation
- Oral communication skills to report issues and recommendations and participate in discussions
- Numeracy skills to perform simple arithmetic with whole numbers and routine fractions or percentages.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402041 Apply 5S in an office and MSS402040 Apply 5S procedures.

Links

Companion Volume Implementation Guides are found in VETNet --

Assessment Requirements for MSS402042 Apply 5S procedures

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS402041 Apply 5S in an office and MSS402040 Apply 5S procedures.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- identify, apply and sustain 5S procedures to improve at least one aspect of a work area.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- 5S concepts and procedures including:
 - meaning and application of 5S to own job and work area
 - purpose and steps of 5S
- workplace procedures, instructions or similar for own activities and of others in team or work area
- principles of efficient workplace organisation
- types of muda (waste) including:
 - defects/rework
 - overprocessing
 - overproduction
 - unnecessary motion
 - unnecessary transport
 - excess inventory
 - underutilised resources or talent
- potential muda (waste) within the work area and types of improvements related to location and use of:
 - supplies, equipment, materials, furniture
 - lighting, heating, cooling
 - paperwork, reference materials, files, storage systems
 - safety and personal protective equipment (PPE)
- simple methods to estimate the amount of muda (waste) and the benefits from improvements

- procedures for recommending improvements.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403003 Contribute to improvements in competitive systems and practices

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS403001 Review competitive systems and practices.

Application

This unit describes the skills and knowledge required to review five key performance areas of competitive systems and practices in a team or work area and improve performance and/or integration with the broader competitive systems and practices context.

This unit applies to operational staff, team leaders, technicians, tradespeople or others who have been given responsibility to contribute to the holistic implementation and improvement of competitive systems and practices.

This unit applies to any organisation that is implementing competitive systems and practices.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Contribute to the improvement of the operations system in team or work area	<p>1.1 Identify key performance indicators (KPIs) for health, safety and environment, quality, capability, cost and delivery within area of operations.</p> <p>1.2 Review competitive systems and practices to improve health, safety and environment performance of self and others</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>1.3 Review competitive systems and practices to maximise quality consistency</p> <p>1.4 Review team capability in competitive systems and practices to identify any skills or other development needs</p> <p>1.5 Review competitive systems and practices to maximise customer benefit/cost ratio</p> <p>1.6 Review competitive systems and practices to reduce lead time to delivery, within own scope of authority and responsibility</p> <p>1.7 Work with key stakeholders to resolve conflicts which arise from implementation of competitive systems and practices</p> <p>1.8 Contribute to discussions with stakeholders to evaluate overall costs, benefits and risks of improvement options and select improvements</p> <p>1.9 Model and encourage communications based on respect for people and team expertise</p>
2. Implement improvements	<p>2.1 Work with team and, where relevant, other stakeholders, to plan and implement selected improvements</p> <p>2.2 Check that selected improvements improve the system as a whole and do not result in unintended consequences</p> <p>2.3 Monitor implementation and make adjustments to achieve and sustain improvements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret workplace documentation
- Writing skills to complete workplace documentation
- Oral communication skills to liaise with range of stakeholders
- Numeracy skills to identify and interpret KPIs
- Learning skills to review team capabilities and identify development needs.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS403001 Review competitive systems and practices.

Links

Companion Volume Implementation Guides are found in VETNet --

Assessment Requirements for MSS403003 Contribute to improvements in competitive systems and practices

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS403001 Review competitive systems and practices.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- review key performance indicators (KPIs) for health, safety and environment, quality, capability, cost and delivery relevant to the area of operations on at least one occasion
- identify and implement at least 2 improvements, each targeting improved performance in a different KPI.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- techniques for monitoring health, safety and environment, quality, capability, cost and delivery
- KPIs relevant to health, safety and environment, quality, capability, cost and delivery; and their use and problems
- cost components of processes, products or services related to the area of operations
- types of muda relevant to the processes or products including 'required' muda
- methods of minimising muda
- kaizen (continuous improvement)
- methods for identifying customer benefit/cost ratio
- techniques for identifying and improving employee capability
- underpinning values relevant to competitive systems and practices and their relevance to work area or team including:
 - respect for people
 - respect for process
 - transparency and culture of learning.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions, including:
 - functioning competitive systems and practices environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403012 Facilitate change in a competitive systems and practices environment

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Range of conditions removed. Assessment Requirements changed. Workplace outcome has changed. Supersedes and is not equivalent to MSS403010 Facilitate change in an organisation implementing competitive systems and practices.

Application

This unit describes the skills and knowledge required to assist in planning and implementing changes relating to competitive systems and practices and to identify change implementation issues and take action to have these issues addressed.

This unit applies to senior staff, team leaders, supervisors or those in similar roles who have been given the responsibility to facilitate change processes within a formal or ad hoc team, such as a work area or section of an organisation. Change implementation issues may arise in the implementation of specific competitive systems or practices or in other changes such as the introduction of new products, processes, services or equipment.

This unit does not cover the negotiation of change in a formal industrial relations sense. However these issues may be identified and would be referred to formal consultation and/or dispute settlement procedures.

This unit applies to any organisation that is implementing competitive systems and practices.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine nature and impact of change for designated area and processes	1.1 Confirm with management organisation's aims and objectives for competitive systems and practices techniques related to change process 1.2 Identify opportunities for implementation of change within work area to support desired outcome/s 1.3 Engage with team and relevant personnel to determine potential benefits, challenges and impacts on work practices from change
2. Identify key performance indicators (KPIs)	2.1 Liaise with team, management, technical, compliance and other stakeholders responsible for designing and/or implementing change to determine key performance indicators (KPIs) for own work and that of work area 2.2 Discuss KPIs with team to confirm or amend 2.3 Review data collection and processing with input from team and make or recommend revisions as needed 2.4 Raise and resolve any issues related to KPIs with relevant personnel
3. Identify and act on issues and concerns	3.1 Identify key stakeholders impacted by change 3.2 Discuss change and potential impacts with key stakeholders 3.3 Gain detailed understanding of issues and concerns of each stakeholder and determine appropriate action, with input from others as needed 3.4 Develop response and/or locate information required to address issues and concerns within scope of authority 3.5 Refer issues and concerns outside of scope of authority to relevant personnel
4. Develop a strategy to help implement change	4.1 Identify or develop work plan for implementing change 4.2 Make information available to team members to support change 4.3 Determine skills and/or other development needs of team in relation to change and provide or initiate support 4.4 Gather feedback on draft work plan from team, managers, technical experts and other stakeholders 4.5 Review feedback and reach agreement with stakeholders on changes to work plan, as needed
5. Implement change	5.1 Obtain authorisation to commence change implementation in accordance with organisation procedures

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	5.2 Assist in implementation of change in accordance with work plan and organisational work health and safety (WHS) and consultation procedures 5.3 Provide information, mentoring or other support to team to assist them to contribute to implementation of change
6. Monitor implementation of change	6.1 Discuss progress with team, management, technical, compliance and other stakeholders to identify barriers or challenges to implementation of change 6.2 Take or initiate action to address issues 6.3 Monitor KPIs during implementation 6.4 Encourage and facilitate improvement suggestions of team members 6.5 Review feedback and improvement suggestions to identify areas requiring improvement in change implementation 6.6 Make improvements to implementation according to organisation procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret workplace documentation
- Writing skills to develop and amend work plan, document stakeholder issues and action taken, seek authorisations
- Oral communication skills to liaise with range of stakeholders, assist in implementation
- Numeracy skills to determine and monitor KPIs.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for MSS403012 Facilitate change in a competitive systems and practices environment

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Range of conditions removed. Assessment Requirements changed. Workplace outcome has changed. Supersedes and is not equivalent to MSS403010 Facilitate change in an organisation implementing competitive systems and practices.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- plan for, and assist in, implementation of at least one change related to competitive systems and practices
- identify at least 2 change implementation issues and take action according to scope of authority.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- application of competitive systems and practices to:
 - customer pull and flow
 - customer value
 - continuous improvement
 - muda
 - agile
- features of competitive operational practices being used in own work area
- methods of gathering data against key performance indicators (KPIs)
- work, health and safety (WHS) and environment principles and requirements for area of responsibility
- levels of autonomy and decision-making parameters
- organisation's change implementation procedures
- planning and implementation strategies
- change issues within vs beyond scope of authority and appropriate actions
- underpinning values relevant to competitive systems and practices including:
 - respect for people
 - respect for process
 - transparency and culture of learning

- techniques to encourage input to and engagement with change
- approaches to supporting team members to adapt to change
- possible skills and/or other development needs in relation to competitive operational practices being used in work area and options to address them
- employee assistance mechanisms within organisation.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources,
- modelling of industry operating conditions, including:
 - functioning competitive systems and practices environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403022 Facilitate a Just in Time system

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Workplace outcome has changed. Supersedes and is not equivalent to MSS403021 Facilitate a Just in Time system.

Application

This unit describes the skills and knowledge required to facilitate improvements in a Just in Time (JIT) system in a team or work area.

This unit applies to senior operators, team leaders or others who have been given the authority to lead, facilitate and assist others within a JIT system to monitor its operation and to identify and implement improvements to the system.

This unit applies to any organisation that is implementing competitive systems and practices.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor and sustain the operation of the JIT system	1.1 Regularly review, with input from team, performance against key measures and identify areas of poor performance 1.2 Seek feedback from other stakeholders on operation of JIT system 1.3 Analyse information to identify need for quick fix action 1.4 Take or initiate appropriate quick fix action 1.5 Assist team to understand why quick fix action is appropriate

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Identify improvements to the JIT system	2.1 Regularly communicate with team or work group members regarding operation of JIT system 2.2 Review, with input from team, JIT key performance indicators (KPIs) 2.3 Discuss operation of JIT system with relevant personnel across organisation and seek their feedback 2.4 Analyse information to identify areas for improvement
3. Facilitate team to implement improvements to the JIT system	3.1 Confirm areas for improvement with input from team and relevant personnel 3.2 Identify root cause of JIT-related problems 3.3 Review value of key measures 3.4 Recognise skill and/or other development needs of team and provide or initiate support 3.5 Provide mentoring and/or guidance to assist team members to contribute to JIT improvements 3.6 Facilitate collaboration with team and others develop improvement options to address identified causes and/or issues 3.7 Gain agreement from relevant personnel on improvements to be implemented 3.8 Implement or assist with implementation of agreed improvements within scope of autonomy

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret workplace documentation
- Oral communication skills to facilitate communication with a range of stakeholders in the value stream and to support team participation
- Numeracy skills to identify and interpret key measures.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for MSS403022 Facilitate a Just in Time system

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Workplace outcome has changed. Supersedes and is not equivalent to MSS403021 Facilitate a Just in Time system.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- facilitate, with 2 or more other people, at least 3 improvements to support a JIT system.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- levels of autonomy and decision-making parameters
- JIT methods relevant to own work area
- production data generated by the process and its application to JIT
- methods of gathering data against key performance indicators (KPIs)
- root cause analysis methods
- underpinning values relevant to competitive systems and practices including:
 - respect for people
 - respect for process
 - transparency and culture of learning
- facilitation techniques to encourage input to, and engagement with, improvements
- approaches to supporting team members to contribute and debate ideas
- possible skill and/or other development needs in relation to JIT and how to address them.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions, including:
 - functioning or in development JIT system.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS404056 Apply statistics to operational processes

Modification History

Release 1. Unit code changed. Application changed. Foundation Skills populated. Assessment Requirements changed. Supersedes and is equivalent to MSS404054 Apply statistics to operational processes.

Application

This unit describes the skills and knowledge required to gather and analyse process data to support the control of processes and operations.

This unit applies to team leaders, technical experts, experienced operators or others who are required to interpret data and apply statistical concepts to determine whether monitored processes are in control and to communicate this information to others.

This unit applies to any organisation that is applying statistical process control on processes or operations.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect process data	1.1 Read and interpret sampling scheme 1.2 Obtain measurements in accordance with standard sampling procedures 1.3 Handle data in accordance with procedures
2. Interpret data	2.1 Plot data on control chart 2.2 Identify random and non-random patterns of results 2.3 Identify results outside the control limits 2.4 Identify situations requiring action

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.5 Take action in accordance with procedures 2.6 Calculate cost of non-conformance
3. Calculate control limits	3.1 Consult stakeholders to determine appropriate limits 3.2 Calculate and revise control limits 3.3 Plot limits on control chart and complete all records in accordance with procedures 3.4 Explain impact of limit to stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret process control data
- Writing skills to plot control charts
- Oral communication skills to discuss/explain process control limits with stakeholders
- Numeracy skills to calculate cost factors, interpret data, apply statistical concepts and plot control charts.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS404054 Apply statistics to operational processes.

Links

Assessment Requirements for MSS404056 Apply statistics to operational processes

Modification History

Release 1. Unit code changed. Application changed. Foundation Skills populated. Assessment Requirements changed. Supersedes and is equivalent to MSS404054 Apply statistics to operational processes.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- collect and interpret process data and apply to control of at least 2 operational processes
- calculate control limits and plot control charts for at least 2 operational processes.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose of sampling and measurement
- sampling methods to be used
- methods of calculating mean and standard deviation and their purpose in statistical control
- concept of limits, including 1, 2, 3 and 6 sigma limits
- types of control charts and their applications to different types of process and product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process causes of variation
- stable and unstable processes
- causes of stability and instability in the process
- calculation of control limits and process capability and the applications of different control limits
- standard distribution curve and confidence limits.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions, including:

- functioning statistical process control processes and related procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405055 Manage application of Six Sigma for process control and improvement

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Workplace outcome changed. Supersedes and is not equivalent to MSS405053 Manage application of Six Sigma for process control and improvement.

Application

This unit describes the skills and knowledge required to manage Six Sigma (or similar statistics based approach) for process control and process improvement.

This unit applies to managers, technical specialists or similar roles who are required to identify potential six sigma projects, apply and assist others to participate in the DMAIC approach, and establish and confirm control strategies.

This unit applies to any process or organisation.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

MSS404056 Apply statistics to operational processes

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify Six Sigma projects	<p>1.1 Confirm area of responsibility or study with leadership team and other stakeholders</p> <p>1.2 Review statistical process control (SPC), process capability and other data relevant to area of responsibility or study</p> <p>1.3 Identify shifts in process performance and processes requiring improvement</p> <p>1.4 Quantify shifts in performance which have occurred or which are desired</p> <p>1.5 Determine cost of shift in performance and cost of intervention</p> <p>1.6 Identify improvement priorities and degree of intervention</p>
2. Apply define, measure, analyse, improve, and control and standardise (DMAIC) process to priority areas	<p>2.1 Define improvement project</p> <p>2.2 Provide information and/or guidance to assist employees to participate in DMAIC</p> <p>2.3 Determine metrics and acquire initial data</p> <p>2.4 Analyse data and determine possible causes of performance shifts and process improvements</p> <p>2.5 Develop and trial improvement solutions</p> <p>2.6 Control and standardise improvement</p>
3. Establish or review control strategies	<p>3.1 Determine sampling schedule</p> <p>3.2 Analyse data to determine process capability</p> <p>3.3 Develop process control strategy</p> <p>3.4 Confirm strategy with all stakeholders</p> <p>3.5 Recognise skill needs of employees to implement and monitor process control strategy</p> <p>3.6 Arrange for training or development to address identified needs</p>
4. Review and confirm improvement	<p>4.1 Calculate and document benefits</p> <p>4.2 Make, or initiate action for, updates to procedures and other relevant documentation for improved procedure</p> <p>4.3 Review process data and confirm improvement</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Writing skills to document outcomes and ensure procedures are updated
- Oral communication skills to liaise with a range of stakeholders and provide information and/or guidance
- Numeracy skills to determine metrics, apply statistical control methods.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. No equivalent unit.

Assessment Requirements for MSS405055 Manage application of Six Sigma for process control and improvement

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Workplace outcome changed. Supersedes and is not equivalent to MSS405053 Manage application of Six Sigma for process control and improvement.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- manage application of Six Sigma to control and improve at least one process.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- processes for the identification and definition of Six Sigma (or similar) projects
- sampling, data collection, and analysis methods
- how to determine quantifiable benefits
- DMAIC methodology and application
- statistical principles and analysis, including confidence limits, analysis of variance, frequency distribution tables, histograms, arithmetic mean, median, mode, standard deviation, range, interquartile range, correlation and dependence
- acceptance criteria and confidence levels
- failure mode and effects analysis (FMEA)
- process mapping
- suppliers, inputs, process, outputs, customers (SIPOC) mapping
- types of data (including discrete, continuous and attributes) and their use in Six Sigma
- communication styles, methods and media to suit a range of audiences
- types of skills and information needed to apply DMAIC and process controls
- options to address skills and information needs.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - access to process data

- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS407026 Lead a process to determine and solve root cause for a complex problem

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Assessment Requirements changed. Supersedes and is equivalent to MSS407016 Lead a process to determine and solve root cause for a complex problem.

Application

This unit describes the skills and knowledge required to lead a problem-solving process to solve complex and/or unusual problems within the organisation or in the value stream.

This unit applies to managers, technical experts or similar roles with responsibility and authority to lead others in developing solutions for a complex problem. A complex problem will typically require input from technical experts and may require iterations of problem-solving activity to adequately define the problem. The problem-solving process will typically involve the use of real or nominal groups to determine the root cause and propose the solution.

This unit applies to any organisation that is implementing competitive systems and practices.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Recognise complex problem	1.1 Identify a complex issue which needs to be addressed 1.2 Undertake initial investigation of issue 1.3 Determine initial areas of expertise and data which may be required to analyse problem 1.4 Write initial definition of problem

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Develop problem-solving methodology	2.1 Draft a problem-solving methodology 2.2 Develop required approaches and protocols for obtaining required data and information 2.3 Establish group/s to assist with problem solving 2.4 Allocate tasks, responsibilities and reporting arrangements to group/s 2.5 Develop arrangements for consultation with required people outside of group/s
3. Analyse problem	3.1 Apply methodology in consultation with required people 3.2 Obtain data and information 3.3 Review problem definition 3.4 Review methodology 3.5 Obtain additional data and information
4. Identify root cause	4.1 Map causal links for problem 4.2 Determine indicators of problem or problem precursors 4.3 Identify causes which can be controlled
5. Develop a solution	5.1 Develop solutions for controllable causes 5.2 Determine cost benefit for proposed solutions 5.3 Investigate proposed solutions for efficacy 5.4 Select best available solution 5.5 Obtain support and authorisations for proposed solution
6. Check problem is solved and standardised	6.1 Monitor indicators of problem and problem precursor 6.2 Review problem solution and implementation 6.3 Confirm solution is standardised

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret workplace documentation

- Writing skills to document definition of complex problem, standardise solutions
- Oral communication skills to facilitate engagement and participation
- Numeracy skills to determine data requirements, interpret data.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS407016 Lead a process to determine and solve root cause for a complex problem.

Assessment Requirements for MSS407026 Lead a process to determine and solve root cause for a complex problem

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Assessment Requirements changed. Supersedes and is equivalent to MSS407016 Lead a process to determine and solve root cause for a complex problem.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- lead a process to determine and solve root cause for at least one complex problem.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisational goals, products and/or services and processes
- sources of data (actual and possible) within the organisation and the value stream
- techniques and methodologies of formal problem solving
- data required for problem solving and alternative or proxy data sources
- cost benefit analysis
- strategies for facilitation of real groups (physical and/or face to face) and nominal groups (which never meet and may not know each other).

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS407029 Improve visual management in the workplace

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Workplace outcome changed. Supersedes and is not equivalent to MSS407010 Improve visual management in the workplace.

Application

This unit describes the skills and knowledge required to review and improve visual management in the workplace.

This unit applies to supervisors, managers and others who have been given the responsibility to review the effectiveness of current visual management strategies and tools for an organisation, or a section thereof, and determine, implement and evaluate improvements.

In this unit visual management strategies may be active, such as operator controlled status indicators, or passive, such as information boards or information islands containing production or other data. Typically the visual management strategies will give employees access to production, work health and safety (WHS), equipment availability or other data.

This unit applies to any organisation that is implementing continuous improvement or more formal competitive systems and practices.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine current visual management activities and information needs	1.1 Inspect current visual management activities and information they provide 1.2 Seek input from operational personnel on effectiveness of current activities and additional information needs 1.3 Liaise with stakeholders to identify successes and problems in

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>relation to current visual management activities and determine root cause/s of problems</p> <p>1.4 Review linkage of current activities with organisational approach to continuous improvement and/or competitive systems and practices to identify areas for potential visual management improvements</p> <p>1.5 Review feedback and information gathered to determine priority areas for potential visual management improvements in line with organisational approach to continuous improvement and/or competitive systems and practices</p> <p>1.6 Develop options for visual management activities in priority areas</p> <p>1.7 Select improvements to be made with reference to benefit which would accrue from improvement options and cost of providing information</p>
2. Choose which things to display visually	<p>2.1 Document list of information identified as relevant to visual management improvements</p> <p>2.2 Rank possible information based on benefit/cost or other agreed basis</p> <p>2.3 Liaise with stakeholders to determine critical information and possible information sources to be included in visual management system</p> <p>2.4 Negotiate provision of critical information to level of precision aligned to identified needs</p>
3. Choose display method	<p>3.1 Liaise with stakeholders to determine language, style and communication methods suited to target personnel</p> <p>3.2 Choose most appropriate display method for each item of critical information to meet personnel needs</p> <p>3.3 Determine most appropriate location for visual display of each item of critical information to maximise access for relevant personnel</p> <p>3.4 Determine appropriate source and approving authority for display information</p> <p>3.5 Review chosen information, information source, display method and location and amend as needed to ensure accuracy and effectiveness</p> <p>3.6 Validate data and/or information as required for chosen method</p>
4. Review the results of visual management	4.1 Review actual benefit gained and actual cost of providing information

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>4.2 Validate appropriateness of information provided for delivering intended outcome</p> <p>4.3 Liaise with stakeholders to identify successes and problems in relation to visual management improvements</p> <p>4.4 Identify improvements to address issues identified within visual management system</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret complex workplace information
- Writing skills to document and communicate visual management strategies and improvements
- Oral communication skills to liaise with a range of stakeholders, negotiate agreements
- Numeracy skills to interpret performance data and information for visual management techniques.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. No equivalent unit.

Assessment Requirements for MSS407029 Improve visual management in the workplace

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Workplace outcome changed. Supersedes and is not equivalent to MSS407010 Improve visual management in the workplace.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- review current visual management activities and identify and implement improvements for at least one organisation or section of an organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisational goals, strategies, operations and processes
- purpose of visual management
- alignment of visual management strategies and techniques to continuous improvement strategies and processes and/or competitive systems and practices tools being applied by the organisation
- communication techniques to support a learning culture
- communication methods and media for a range of audiences
- problem recognition and resolution methods.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCM007 Manage contracts

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPPROC414A Manage contracts.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage contracts. It includes undertaking preparations, establishing and maintaining contract management arrangements, monitoring and maintaining contract performance, and completing and reviewing contracts.

This unit applies to those working as public sector employees with responsibilities relating to contract management.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities while performing complex tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Procurement

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to manage a contract	<p>1.1 Confirm and clarify contract requirements, approvals and funding arrangements and identify obligations and limits of authority.</p> <p>1.2 Clarify and assist with contract administration issues by contacting specialists and stakeholders and confirm operational elements of the contract.</p> <p>1.3 Identify and clarify key contract clauses.</p> <p>1.4 Identify and confirm process, timings, and key performance indicators with stakeholders.</p> <p>1.5 Develop or review the risk management plan.</p> <p>1.6 Develop or obtain contract management strategy and enter key details from the contract.</p> <p>1.7 Form contract management team and allocate roles and responsibilities.</p>
2. Implement a contract management strategy	<p>2.1 Confirm and implement start-up or transition arrangements.</p> <p>2.2 Establish information and contractor and stakeholder communication strategies.</p> <p>2.3 Monitor and update risk management plan.</p> <p>2.4 Manage relationship with contractors and stakeholders.</p> <p>2.5 Obtain specialist expertise as necessary for progress meetings and for advice on or resolution of contract issues.</p> <p>2.6 Maintain contract information and documentation.</p>
3. Monitor and maintain performance of a contract	<p>3.1 Ensure obligations to contractor and stakeholders are met.</p> <p>3.2 Use monitoring and control measures and performance indicators to manage performance of contract and ensure that all obligations under the agreement are being met.</p> <p>3.3 Manage contract variations.</p> <p>3.4 Investigate and resolve or refer disputes and complaints.</p> <p>3.5 Manage negotiation of contract issues.</p> <p>3.6 Maintain communication with all stakeholders on the performance of the contract.</p>
4. Complete and review contract	<p>4.1 Confirm client satisfaction with contract deliverables.</p> <p>4.2 Finalise, amend, cancel or terminate contracts.</p> <p>4.3 Manage close-out, and renewal of contract or transition to a new contract.</p> <p>4.4 Review contract management, contractor performance, user</p>

	<p>satisfaction and audit results.</p> <p>4.5 Document and explain variances to measures or outcomes that are not met in full.</p> <p>4.6 Report on contractor performance and review contract management practice and make recommendations for improvement.</p>
--	--

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPROC414A Manage contracts.

Assessment Requirements for PSPPCM007 Manage contracts

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- consulting and negotiating with contractors and stakeholders, involving complex oral and written exchanges of information
- networking, within probity boundaries, with diverse stakeholders and contractors
- interpreting complex documents, including contracts, legislation and guidelines
- applying simple supply chain and supplier issues management techniques

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to contract management, including environmental purchasing and corporate social responsibility guidance
- contract performance management
- privacy and confidentiality issues
- probity principles and issues
- financial and accounting issues relevant to the contract

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUAEQU001 Prepare, maintain and test response equipment

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to inspect, maintain and test a range of equipment. It includes inspecting response equipment, testing response equipment and cleaning, maintaining and restowing equipment

The unit applies to personnel who have either a primary role in the maintenance of equipment or are required to test and maintain equipment as part of an operational role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification

PUAFIR210 Prevent injury

Competency Field

Equipment

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Inspect response equipment | 1.1 Equipment is inspected, in accordance with organisational procedures |
| | 1.2 Missing parts are identified and reported, in accordance with organisational procedures |
| | 1.3 Faulty or damaged equipment is reported and recorded, in accordance with organisational procedures |
| 2 Test response equipment | 2.1 Equipment is tested, in accordance with organisational procedures and standards and is identified as fit for purpose |
| | 2.2 Test results are recorded, in accordance with regulatory requirements and organisational procedures |
| | 2.3 Defective equipment and substandard performance is reported and recorded, in accordance with organisational procedures |
| 3 Clean, maintain and restow equipment | 3.1 Equipment is cleaned, maintained, assembled and stowed, in accordance with organisational procedures |
| | 3.2 Equipment records are updated, in accordance with organisational procedures |
| | 3.3 Equipment is recovered, restowed and made ready for future use |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEQU001B Prepare, maintain and test response equipment.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAEQU001 Prepare, maintain and test response equipment

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and risk mitigation
- cleaning, maintaining and restowing response equipment
- communicating information in accordance with organisational procedures
- complying with safety data sheets
- inspection, testing and servicing of response equipment
- safely using cleaning agents and chemicals

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication techniques
- environmental legislation relating to waste water runoff and pollution
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and risk mitigation
- procedures for using, testing, cleaning and servicing response equipment
- response equipment used by the organisation
- safe working practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR017 Work safely around aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply safe work practices when working around aircraft for organisational operations. It includes working safely in or around aircraft and facilitating safe ground support.

The unit is applicable to the provision of introductory training for personnel providing support services for aerial operations, noting that personnel undertaking specialist functions such as aircraft marshalling, aircraft refuelling, fire suppressant mixing and loading and ground-to-air radio communications will require further training. It also applies to the provision of safety training for operational personnel who may be required to utilise aircraft or work in the vicinity of aircraft in the performance of their work tasks and/or the provision of foundation training for all aviation related roles for fire, land management and emergency management.

Work is performed independently or under limited supervision as a single operator or within a team environment.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Work safely in and around aircraft

- 1.1 Site and job hazards are identified, risks are assessed and control measures are implemented
- 1.2 Personal protective clothing and equipment is worn and used correctly in accordance with organisational procedures
- 1.3 Appropriate clearances and permissions, where required, are obtained and procedures are adhered to whilst operating in aircraft movement areas
- 1.4 Any approach to an operating aircraft is made from an angle visible to the pilot or air crew and with approval of the pilot or air crew
- 1.5 Adequate clearance is maintained from propellers, rotors, engines, exhaust gases and engine intakes
- 1.6 Typical manoeuvring patterns of aircraft are anticipated and a safe distance is maintained
- 1.7 Instructions or signals from pilots or staff controlling aircraft are complied with in accordance with organisational procedures

2 Facilitate safe ground support

- 2.1 Briefing on safety and tasks are received and acknowledged from task supervisor
- 2.2 Appropriate approvals and precautions are observed when positioning vehicles or equipment close to aircraft
- 2.3 Instructions from pilots and/or authorised air crew coordinating aircraft operations are followed
- 2.4 Aircraft loading and other activities relating to the aircraft, where required, are conducted under pilot or authorised air crew supervision
- 2.5 Aircraft hazards and equipment defects are reported to pilot or approved task supervisor
- 2.6 Compliance is maintained around aircraft in accordance with air base regulations

- 2.7 Accidents are identified and reported to pilot and/or task supervisor
- 2.8 Directions from pilot or air crew are followed during an emergency

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR209 Work safely around aircraft.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUAFIR017 Work safely around aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- complying with regulatory requirements and organisational procedures
- ensuring safety and quality procedures are applied
- following directions from pilot or air crew during an emergency
- identifying hazards and risks and acting to minimise, mitigate, control or eliminate
- implementing precautions and aviation emergency procedures, as required
- participating in briefings
- reporting accidents
- using personal protective clothing and equipment
- working safely around aircraft.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- actions to be taken in the event of an emergency
- air base site hazards
- airbase access and security requirements
- airbase layout, facilities and services including working zones and lighting facilities
- aircraft design features including 'no step' places
- aircraft features and movement characteristics
- aircraft operations including loading and refuelling precautions
- content of briefings
- correct selection, fitting and wearing of personal protective clothing and equipment for tasks to be performed
- hazards of working around aircraft
- organisational policies and procedures including safe work practices around aircraft
- risk identification and mitigation processes

- roles and responsibilities of personnel supervising, managing and supporting aircraft operations
- safety equipment including fire extinguisher and first aid kit
- types of aircraft which may include but is not limited to aeroplanes, helicopters, remotely piloted aircraft and their movement characteristics
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAFIR201 Assist with prescribed burning

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to assist with prescribed burning for agricultural, natural resource purposes or hazard mitigation.

Prescribed burning is the process of planning and applying fire to a predetermined area under specific environmental conditions to achieve a desired outcome. It requires the ability to assist with preparations for the burn, support the conduct of the burn and participate in clean up activities.

The unit applies to personnel participating in lighting and conducting prescribed burns under direct supervision.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Assist with preparations for burn

1.1 Ignition devices and fire equipment to be used in the burn are prepared for use, as directed

1.2 Safety equipment including personal protective equipment, is checked and prepared for use

1.3 Location and extent of the burn is discussed and clarified with supervisor

1.4 Strategies and tactics for conducting the burn, including contingency plans are obtained in a briefing and clarification is sought, if required

1.5 Assets requiring protection during the burn are recognised and noted

1.6 Personal role, crew activities and extent of the burn are checked with supervisor

2 Participate in conducting burn

2.1 Assistance with pre-burn checks is provided, as directed by supervisor

2.2 Burn ignition activities are undertaken using ignition devices, as directed

2.3 Ignition patterns suitable for burn objectives are implemented, as directed

2.4 Fire suppression activities are undertaken using suppression equipment, in accordance with organisational procedures

2.5 Problems or concerns during the burn are raised with supervisor

2.6 Communication is maintained with team members and supervisor at all times, in accordance with organisational procedures

2.7 Conditions at the burn are observed and their effect on fire behaviour and development are reported to supervisor

2.8 Safe escape route or refuge is discussed and maintained, in accordance with organisational procedures

- 2.9** Personal protective clothing and equipment is utilised throughout the burn, in accordance with organisational procedures
- 2.10** Burn perimeter is made safe, in accordance with burn plan
- 2.11** Hazards remaining in the burn area are reported to supervisor
- 2.12** Burn debriefing is participated in
- 3 Participate in clean up and burn security**
- 3.1** Clean up and burn security activities are carried out as directed
- 3.2** Personal protective clothing and equipment is cleaned and returned to storage
- 3.3** Equipment used in the burn is cleaned, maintained and returned to storage

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

- ignition devices must include one or more of the following
- drip torch
 - incendiary devices
 - matches
- fire suppression equipment must include one or more of the following
- hand tools
 - hose
 - knapsack
 - other burn preparation equipment
 - small gear pump
 - tanker
- clean up and burn security activities must include one or more of the following
- burn security activities
 - maintenance of ignition equipment
 - maintenance of personal protective clothing and equipment

- maintenance of suppression equipment
- use of vehicles to patrol until the burn is declared safe

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR213 Assist with prescribed burning.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR201 Assist with prescribed burning

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- aiding clean up activities
- assisting with preparations for prescribed burn including undertaking pre-burn checks
- assisting in lighting a burn using the relevant equipment
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with supervisor and team members
- discussing safe escape routes and refuges
- following directions and responding to instructions given during a prescribed burn
- participating in conducting prescribed burn including recognition of assets requiring protection
- participating as a team member using safe work practices
- participating in briefings and debriefings
- using equipment in burn preparation and suppression activities
- undertaking clean up and burn security activities
- working with personal protective clothing and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- assets requiring protection
- clean up activities and burn security activities
- fire hazards
- impact of conditions at prescribed burns on potential fire behaviour including weather, terrain and fuel characteristics
- organisational documentation, policies and procedures
- personal protective clothing and equipment

- types of burn ignition devices and techniques
- types of preparation and burn suppression equipment and techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and working safely around fires

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - burn preparation suppression equipment
 - ignition equipment
 - range of controlled fires or prescribed burns
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR203 Respond to urban fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to an urban fire where offensive and defensive strategies are used. It includes proceeding to a fire, preparing extinguishing media and/or equipment for use, entering a structure, conducting search and rescues and combatting fires.

The unit applies to firefighting personnel who work as a member of a team, under direct supervision. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR207 Operate breathing apparatus open circuit

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1 Proceed to fire	1.1 Information received about the location and type of fire is confirmed
	1.2 Appropriate personal protective clothing and equipment is donned, in accordance with organisational procedures
	1.3 Most effective route to the fire is identified and navigated safely
2 Prepare extinguishing media and/or equipment for use	2.1 Water supplies at the incident to support firefighting are located
	2.2 Equipment to access and supply water to firefighting operations are identified and assembled, in accordance with organisational procedures
	2.3 Nominated extinguishing media and/or equipment is identified, obtained and accessed
	2.4 Extinguishing media and equipment are used, in accordance with manufacturers' specifications and organisational procedures
3 Enter the structure	3.1 Hazards are identified, monitored and controlled, in accordance with organisational procedures
	3.2 Personal protective clothing and equipment selected is appropriate to the hazards
	3.3 Organisational breathing apparatus procedures and safe work practices are followed
	3.4 Structure is entered, in accordance with organisational procedures and safety practices
	3.5 Safe paths of access and egress are identified and maintained throughout the incident
	3.6 Life is protected and damage to property and the environment is minimised, in accordance with organisational procedures
4 Conduct search and rescue	4.1 Systematic primary and secondary searches are conducted
	4.2 Rooms are searched and marked, in accordance with organisational procedures

- 4.3 Casualties are located, assisted and rescued, in accordance with organisational procedures
 - 4.4 Fatalities are located and protected, in accordance with organisational procedures and relevant legislation
 - 4.5 All persons are accounted for and information is reported utilising the organisations chain of command.
- 5 Combat fires**
 - 5.1 Personal safety is maintained, in accordance with organisational procedures and workplace health and safety guidelines
 - 5.2 Organisational firefighting objectives, strategies and tactics are received, confirmed and implemented as directed
 - 5.3 Firefighting considerations are taken into account when implementing firefighting tactics
 - 5.4 Equipment and extinguishing media used to combat the fire are appropriate to the class of fire and support firefighting requirements
 - 5.5 Firefighting equipment is positioned to achieve maximum effect in suppressing the fire, protecting exposures and preserving evidence of fire cause
 - 5.6 Extinguishing media is applied using appropriate application techniques
 - 5.7 Fire suppression techniques are applied to minimise hazards to occupants trapped or lost within the structure
 - 5.8 Communication with team members and the supervisor are maintained throughout the incident
- 6 Observe and react to changes in conditions and fire behaviour**
 - 6.1 Changing conditions at the fire are observed and their effects on fire behaviour are noted and reported
 - 6.2 Evidence of changing conditions at the fire are reported
 - 6.3 Firefighting tactics are adapted to meet changing conditions and fire behaviour
- 7 Participate in ancillary operations**
 - 7.1 Ancillary activities to complement firefighting operations and prevent further damage to the structure and its contents are undertaken

- | | |
|---|---|
| 8 Conclude firefighting operations | <p>7.2 Water runoff from the fire is monitored and conditions are reported</p> <p>7.3 Damage to the environment at the incident is minimised through appropriate firefighting and ancillary activities</p> <p>8.1 Firefighting equipment is collected and stowed at the incident</p> <p>8.2 Incident scene is made safe for the public</p> <p>8.3 Defective or missing equipment is identified and reported</p> <p>8.4 Incident information is record and completed, in accordance with organisational procedures</p> |
|---|---|

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

types of fire must include

- fires involving dangerous goods and/or hazardous substances
- mobile property
- non-structures
- structures

personal protective clothing and equipment must include

- breathing apparatus
- eye protection
- hearing protection
- turnout uniform and gloves

water supplies must include

- open
- reticulated
- static

equipment must include

- and may also include other extinguishing substances
- BA and control equipment
- branches, nozzles and monitors

- extinguishing media must include:
- fire extinguishers
 - forcible entry tools
 - hoses and hose fittings
 - ladders and rope lines
 - portable lights
 - radios
 - salvage gear
 - small gear and ancillary equipment
 - standpipes, hydrants and booster connections
- hazards must include three or more of the following:
- extinguishing powder
 - foam
 - gaseous extinguishing agents
 - water
 - electricity, including photovoltaic generation
 - gas
 - hazardous products and materials
 - industrial (machinery, equipment and products)
 - smoke, darkness and heat
 - structural collapse
 - structural hazards
 - unauthorised personnel
- assisted must include
- first aid
 - handing over to ambulance, medical or other organisational care
 - protecting from the elements
 - providing refreshments
- firefighting objectives must include
- confining the spread of fire
 - extinguishment
 - protecting exposures
 - rescuing occupants
 - salvage and overhaul
 - ventilation
- fire strategies must include
- defensive mode
 - direct attack
 - indirect attack
 - offensive mode
- firefighting tactics must include
- cooling the fuels
 - excluding oxygen
 - interrupting the chemical chain reaction
 - removing fuels

firefighting considerations must include

- ventilation
- available firefighting resources
- extinguishing media
- fire exposures
- indications of extreme fire behaviour
- signs of structural collapse
- size of fire
- stage of fire development
- topography
- type of fire
- weather

firefighting activities must include

- anticipating fire behaviour
- applying extinguishing media
- applying techniques to maximise effect and minimise damage
- ensuring safety
- hose stream techniques
- locating and accessing fire
- protecting and notifying supervisor of evidence of fire cause
- search and rescue

changing conditions at the fire must include

- fire spread
- flame colour and size
- impending structural collapse
- increase in heat
- increase or decrease in fuel available to fire
- increase or decrease in heat of fire
- increase or decrease in oxygen available to fire
- other materials becoming involved in fire
- signs of structural collapse
- smoke colour
- weather conditions

evidence of changing conditions at the fire must include

- fire spread
- flame colour and size
- impending structural collapse
- increase in heat
- smoke colour
- weather conditions

ancillary activities must include

- damming water run off
- guarding against hazards
- making up equipment

recording appropriate incident information must include

- overhaul
- salvage
- securing the area
- attendance records
- completing personal notebooks logs and/or report forms
- equipment used
- objectives set
- obtain relevant details
- owner or occupant details
- problems encountered

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR203B Respond to urban fire.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR203 Respond to urban fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including maintaining the health and safety of self and others
- combating fires through implementing firefighting objectives, strategies and tactics
- concluding firefighting operations
- conducting search and rescue
- controlling fire environment by cooling fire gases
- entering structures affected by fire
- identifying hazardous materials
- instigating actions to avoid risk of injury
- moving in smoke and darkness
- observing and reacting to changes in conditions and fire behaviour
- obtaining water from reticulated or static water supplies
- operating a firefighting branch
- operating fire extinguishers
- participating in ancillary operations
- preparing extinguishing media and equipment for use
- proceeding to a fire
- recording incident information
- selecting and using firefighting equipment
- using extinguishing media on a fire
- using personal protective clothing and equipment
- using structural entry techniques
- utilising breathing apparatus, associated equipment and operational procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- ancillary activities
- basic signs of fire cause and activities for protecting evidence
- behaviour of a building or structure in a fire
- chain of command
- change in conditions at a fire caused by increase or decrease in
 - fuel available to fire
 - increase or decrease of oxygen available to fire
- different construction types and their behaviour in a fire
- equipment and tools used in fire suppression activities extinguishing media
- fire behaviour
- fire ground signals including audible and visual
- fire tetrahedron
- firefighting foams
- firefighting tasks, tactics and techniques
- hazardous materials identification
- hazards and actions to minimise, mitigate, control or eliminate
- identification of various building types including structural elements and materials, causes and signs of structural failure
- methods of heat transfer
- natural ventilation procedures
- navigation and map reading
- organisational documentation, policies and procedures including procedures for working with ladders, ropes, lines and tying knots
- portable fire extinguishers
- principles and methods of extinguishment
- salvage and overhaul
- signs of structural collapse
- water supplies
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety assessments and/or risk mitigation processes, safe work practices and personal protective clothing and equipment

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situation that reflects workplace conditions.

Competency should be assessed on the job and/or in a range of simulated fire environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- a relevant appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - range of controlled or simulated fires, firefighting equipment, extinguishing media and breathing apparatus and associated equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to a wildfire, work as a safe and situationally aware member of a crew to attack and extinguish a fire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to firefighting personnel who work as a member of a team. It includes preparing to respond to fire; proceeding to fire; obtaining and using firefighting equipment and extinguishing media; combating wildfire; observing and reacting to wildfire and weather conditions; participating in mop up and patrol activities; supporting operations and recovering and storing equipment. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

| 7 Recover and store equipment | 7.1 | Equipment and consumables are recovered, as directed |
| | 7.2 | Firefighting equipment is collected and stored at the incident |
| | 7.3 | Cleaning and maintenance are carried out in accordance with organisational procedures |
| | 7.4 | Damaged or lost equipment is identified and reported |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

extinguishing media must include two of the following

- class A foam
- retardants
- soil
- water
- wetting agents

personal protective clothing and equipment must include

- eye and head protection
- turnout uniform and gloves

types of wildfire must include

- surface

types of fuel must include one of the following

- forest
- grass
- scrub

firefighting equipment must include

- hand tools
- hose and small gear
- pump
- tanker

firefighting tactics must include

- control line construction
- mopping up
- patrol
- use of extinguishing media

suppression techniques must include

- dry and wet firefighting

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR204B Respond to wildfire.

Assessment Requirements for PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- combating wildfires
- communicating on the fire ground using a range of tools
- detecting hot spots, hazardous trees, unsecured wildfire perimeter
- maintaining situational awareness
- maintaining health and safety of self and others in work area
- observing and reacting to wildfire and weather conditions
- obtaining and using firefighting equipment and extinguishing media
- participating in mop ups, patrol activities and support operations
- participating in entrapment safety procedures
- preparing to respond to a fire
- proceeding to a fire
- reacting to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- recovering, reinstating and storing equipment
- undertaking dry and wet wildfire attack
- undertaking operational activities safely, in accordance with organisational procedures
- using extinguishing media in wildfire control
- using wildfire control tools and equipment
- working with firefighting equipment
- working as a member of a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication on the fire ground using radio and telephone

- consumables including flagging tape, fuel, rubbish and signs
- extinguishing media, water, foam and suppressants
- escape routes including prepared tracks, roads, trails and waterways
- earth moving equipment such as bulldozers, graders and tractors with blades
- equipment for firefighting including chainsaw, ropes and lines, drip torch and knap sack
- evidence related to fire cause including fresh vehicle tracks, items or objects at scene, nature and behaviour of fire at the scene upon arrival, nature and colour of smoke and number of columns, people and vehicles leaving the scene and whether gates on access routes to the fire were closed, opened or locked
- fire behaviour
- fuel features including arrangement and distribution, moisture content, quantity, size and type
- indicators of fire behaviour including flame height and length, noise, rate of spread, smoke colour and density, spotting and extreme fire behaviour
- organisational documentation, policies and operating procedures
- safety zones including bare ground, burnt areas, clearings, rivers and site of recent wildfire or prescribed burn, static water bodies and defensible space
- support operations including providing and transporting food, water and equipment
- tactics for firefighting including backburning, burning out and patrol
- types of wildfire including crown and ground
- types of fuel including crop, heath, peat, coal, combustible soils and plantation
- strategies for firefighting including defensive, direct and indirect attack, offensive and parallel attack
- variations in topography including aspect, elevation, landscape features and slope
- weather conditions including atmospheric stability, relative humidity, temperature and variations to wind speed and direction
- wildfire control tactics and techniques
- wildfire hazards
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including health and fitness requirements, hygiene and wellbeing, safe work practices, safety assessments and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that

reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR205 Respond to aviation incident (specialist)

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work under supervision as a member of a specialist aviation incident response team while responding to an aviation event. It applies to personnel who are members of specialist aviation incident response teams.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR203 Respond to urban fire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Respond to aircraft incident

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Approach to aircraft incident is based on type of accident or collision, location, terrain, weather, wind

- speed, direction and response time requirements
- 1.2** Hazards and personal injury risks associated with aircraft incidents and/or accidents are identified
 - 1.3** Access to incident is gained through use of airport maps and aircraft diagrams or plans
 - 1.4** Changing incident conditions are anticipated, reported and managed, in accordance with organisational procedures
 - 1.5** Operations are carried out, in accordance with organisational procedures and regulatory requirements
- 2 Use appropriate equipment**
- 2.1** Equipment is selected, in accordance with incident objectives and strategies
 - 2.2** Appropriate rescue and/or firefighting equipment is selected and used, in accordance with organisational procedures
 - 2.3** Appropriate equipment is selected and used to isolate aircraft fuselage from hazards and escape paths are maintained, in accordance with organisational procedures
- 3 Evacuate persons and attend to casualties**
- 3.1** Hazards and injury risks associated with aircraft incidents are identified and reported
 - 3.2** Equipment is selected and located to facilitate evacuation and rescue
 - 3.3** Evacuees are directed to a safe area and casualties are attended to
- 4 Conduct operations**
- 4.1** Operational tactics are implemented based on incident conditions, in accordance with organisational procedures
 - 4.2** Changing incident conditions are evaluated and any alterations to tactics are communicated, in accordance with organisational procedures
 - 4.3** Operations are carried out, in accordance with industry regulatory requirements
 - 4.4** Fuselage protection and escape paths are established and maintained, in accordance with organisational procedures

- 4.5 Assistance to passengers and crew is provided during aircraft evacuation
 - 4.6 Evacuees and or casualties are moved or directed to a safe area, in accordance with organisational procedures and Aerodrome Emergency Plan
 - 4.7 Appropriate rescue techniques are used to release trapped persons from aircraft
- 5 Conclude operations**
- 5.1 Evidence at aircraft incident is preserved and secured, in accordance with organisational procedures
 - 5.2 Any damage to the aircraft caused by forcible entry is recorded and reported, in accordance with organisational procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR205B Respond to aviation incident (specialist).

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR205 Respond to aviation incident (specialist)

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- adhering to airport operating procedures
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including identifying toxic environments
- conducting and concluding operations
- evacuating persons and attending to casualties
- identifying hazards and undertaking risk assessment
- implementing aviation firefighting objectives and tactics and strategies
- meeting legislative and regulatory requirements
- responding to an aviation incident
- selecting and using aviation firefighting equipment, extinguishing media and personal protective clothing and equipment
- using appropriate equipment
- using strategies including controlling and extinguishing fire, isolation of aircraft fuselage from hazard and maintenance of safe paths of egress
- working with aviation firefighting equipment including
 - aircraft rescue and firefighting vehicle
 - ancillary firefighting equipment
 - apparatus to deliver extinguishing medium
 - breathing apparatus
 - equipment for lighting
 - escape safety devices
 - extrication devices
 - fire hose
 - fixative or sealant for composite fibres
 - ladders
 - rescue equipment
 - specialised tools for cabin entry
 - ventilation equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- aircraft construction
- aircraft and airport emergency procedures
- characteristics and limitations of equipment
- incident objectives, strategies and tactics
- organisational documentation, policies and procedures
- potential hazards and risk mitigation
- types of aviation incidents
- types of aviation accidents and incidents including aircraft incidents, equipment, strategies and operational tactics
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - firefighting equipment, aircraft or simulator and fire extinguishing media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR207 Operate breathing apparatus open circuit

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to select, don, operate and maintain breathing apparatus equipment in a hazardous atmosphere. It includes conducting pre-donning checks and tests of breathing apparatus; donning and checking of breathing apparatus; operating breathing apparatus and concluding breathing apparatus operations.

The unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct pre-donning checks and tests on breathing apparatus

1.1 Breathing apparatus is inspected for immediate use, in accordance with the organisational procedures

1.2 Faulty or damaged equipment is reported and recorded, in accordance with the organisational procedures

2 Don and check breathing apparatus

2.1 Breathing apparatus is donned, in accordance with the organisational procedures

2.2 Breathing apparatus is started and checked, in accordance with organisational procedures

2.3 Ancillary equipment required for tasks is selected for use

3 Operate breathing apparatus

3.1 Hazards are identified, monitored and controlled, in accordance with the organisational procedures

3.2 Communication is established and maintained with team members and other appropriate personnel throughout activity

3.3 Response activities are undertaken as a member of a team, demonstrating effective application of breathing apparatus, in accordance with the organisational procedures

3.4 Breathing apparatus control procedures are followed, in accordance with the organisational procedures

3.5 Entrapment procedures are implemented, in accordance with the organisational procedures

3.6 Personal safety is maintained, in accordance with organisational procedures

4 Conclude operations

4.1 Breathing apparatus set is shut down, in accordance with organisational procedures

4.2 Breathing apparatus set is removed, in accordance with organisational procedures

4.3 Cleaning and maintenance of breathing apparatus is

undertaken, in accordance with organisational procedures

4.4 Equipment is made ready for operational use, in accordance with organisational procedures

4.5 Participating in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

type of breathing apparatus must include

- open circuit

breathing apparatus is inspected must include

- ancillary equipment
- cylinder pressure
- integrity of air flow system
- serviceability and integrity of components

breathing apparatus control procedures must include

- entry or exit control officer
- entry or exit control point
- organisational procedures
- principles of breathing apparatus control
- stage one (one entry point) and stage two (multiple entry points)
- timing device

breathing apparatus control equipment must include

- breathing apparatus set tallies
- control boards
- entry control officer identification
- guideline and branch line tallies
- personal lines
- procedures

hazards must include

- disorientation in smoke/darkness or confinement
- entrapment
- exhaustion of air supply (regular gauge monitoring)

communications must include

entrapment procedures must include

- failure to maintain a face seal
- fire
- hazardous atmospheres
- malfunction of equipment
- manual handling
- structural hazards and/or hazardous materials
- distress signal unit
- hand signals
- portable radio
- activating the distress signal unit
- calling for assistance
- ceasing all strenuous activity
- operating breathing apparatus
- relocating to safest available place
- remaining calm

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR207B Operate breathing apparatus open circuit.

Assessment Requirements for PUAFIR207 Operate breathing apparatus open circuit

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- conducting pre-donning checks and tests on breathing apparatus
- donning and checking breathing apparatus
- following organisational policies and procedures including implementing entrapment and breathing apparatus emergency procedures
- inspecting breathing apparatus after its use
- inspecting breathing apparatus and concluding breathing apparatus operations
- moving in conditions of reduced visibility
- operating breathing apparatus
- participating in debriefing sessions
- returning breathing apparatus to operational status
- complying with organisational procedures for breathing apparatus use and maintenance

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- characteristics, component parts, operation of compressed air breathing apparatus
- how breathing apparatus supports personal protection
- industry standards for breathing apparatus
- operation of breathing apparatus
- operational testing, operating procedures and safe work practices when wearing breathing apparatus

- organisational documentation, policies and procedures including entrapment procedures
- performance of breathing apparatus control equipment
- personal protective clothing and equipment
- respiratory system and effects of hazardous atmospheres on the body
- types of hazardous atmospheres including heated, smoke or other suspended particles
- use of personal lines and tallies
- utilisation of distress signal unit
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety assessments and risk mitigation

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - range of controlled or simulated scenarios, breathing apparatus and associated equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to identify and avoid workplace hazards and risks, to maintain personal safety and to report identified issues to supervisors and team members.

It is designed as an introduction to safe work practices and is specifically relevant to a workplace requiring personnel to be involved in incidents, prescribed burns and/or operational aspects of emergency management. It includes identifying, implementing and monitoring effectiveness of workplace hazards and risk control procedures.

The unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Identify workplace hazards and risks, and advise others

- 1.1 Procedures and practices are followed to identify hazards and risks in the workplace
- 1.2 Identified hazards and risks in the work area are communicated to team members and supervisors
- 1.3 Identified risk factors which may create or escalate the immediate risk to life, property or the environment are reported, in accordance with organisational procedures

2 Implement hazard and risk control procedures

- 2.1 Personal protective clothing and equipment is selected and donned, in accordance with organisational procedures
- 2.2 Hazard identification and risks controls are implemented, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines and organisational procedures
- 2.3 Equipment appropriate for dealing with a hazard is selected for use and checked, in accordance with organisational procedures
- 2.4 Personal health and welfare is managed, in accordance with organisational policy

3 Monitor effectiveness of hazard and risk control procedures

- 3.1 Situation awareness is maintained to ensure the continued effectiveness of hazard and risk control procedures
- 3.2 Changes in incident behaviour and conditions are reported immediately through the chain of command, in accordance with organisational procedures
- 3.3 Activities and debriefings regarding hazard and risk control procedures are participated in, as appropriate

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

personal protective clothing and equipment must include

- eye and head protection
- turn out uniform and gloves

controlling risks must include

- dynamic risk assessment
- safe person approach

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR215 Prevent injury.

Assessment Requirements for PUAFIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying safe work practices in accordance with organisational Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) policies and procedures
- identifying hazards and using risk control measures
- identifying workplace hazards and risks and advising others
- implementing hazard and risk control procedures
- monitoring effectiveness of hazard and risk control procedures
- selecting equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- working with organisational procedures including the selection and use of personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- basic principles of a dynamic risk assessment and safe person approach
- hazards, including heat illness, fire, structural, aerial operations, hazardous materials and vehicles
- methods of hazard identification, risk control reporting and debriefing
- organisational documentation, policies and procedures for hazard and risk management
- personal protective clothing and equipment requirements
- risks to life, community, property and the environment
- situational awareness actions that support safety in the work place
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including occupational hazards and risks encountered in the workplace, safety assessments, risk mitigation processes and risk control measures such as eliminate, isolate and substitute

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR220 Respond to isolated structure fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to an isolated structure fire when working as a member of a team under direct supervision. It includes defensive external structural firefighting i.e. how to attack a fire from outside a structure and protect exposures. It does not cover offensive firefighting i.e. internal attack within a structure or how to deal with fires involving dangerous goods and/or hazardous chemicals.

An isolated structure refers to a free standing building or manmade construction, such as a homestead or farm machinery shed. With an isolated structure, the possibility of fire spread between the structure itself and other structures or property not directly involved in the fire is generally low.

The unit applies to personnel working in rural and/or urban interface areas and rural communities who are often required to respond to structure fires and to support asset protection. An individual operating in this context will perform this role under the direct supervision of a crew leader or an officer in charge.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Proceed to fire

2 Prepare extinguishing media and/or equipment for use

3 Combat fires

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Information received about location and type of fire is recorded, in accordance with organisational procedures
- 1.2 Appropriate personal protective clothing and equipment is donned, in accordance with organisational procedures
- 1.3 Most effective route to the fire is identified
- 2.1 Water supplies at the incident to support firefighting are located
- 2.2 Equipment to access and supply water to firefighting operations is identified and assembled, in accordance with organisational procedures
- 2.3 Nominated extinguishing media and/or equipment is identified, obtained and or accessed
- 3.1 Personal safety is maintained, in accordance with organisational procedures and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines, for responding to isolated structure fires
- 3.2 Hazards are identified and reported to supervisors, in accordance with organisational procedures
- 3.3 Firefighting strategies are implemented through the chain of command, in accordance with organisational procedures
- 3.4 Safe escape routes are identified confirmed and maintained in accordance with organisational procedures
- 3.5 Access to location of fire is gained and protecting life and minimising damage to the environment and property is undertaken, in accordance with organisational

- procedures
- 3.6** Extinguishing media and equipment are used, in accordance with manufacturers' specifications and organisational procedures
 - 3.7** Communication with team members and supervisor is maintained throughout the incident, in accordance with organisational procedures
- 4 Observe and report changes in conditions at the fire**
- 4.1** Changing conditions at the fire are observed and effects on fire behaviour are noted and reported through the chain of command
 - 4.2** Firefighting tactics are adapted to meet changing conditions and fire behaviour
- 5 Participate in ancillary operations**
- 5.1** Ancillary activities to complement firefighting operations and to prevent further damage to structure is undertaken
 - 5.2** Assistance is given, if required, to complete and record incident information
- 6 Conclude firefighting operations**
- 6.1** Firefighting equipment is collected, reinstated and stowed, in accordance with organisational procedures
 - 6.2** Incident scene is made safe for the public
 - 6.3** Defective or missing equipment is identified and reported, in accordance with organisational procedures
 - 6.4** Participate in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

personal protective clothing and equipment must include

- head and eye protection
- personal protective clothing

equipment must include

- turnout uniform and gloves
- fire attack equipment
- small gear and ancillary equipment

extinguishing media must include

- foam
- water

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR218 Respond to isolated structure fire.

Assessment Requirements for PUAFIR220 Respond to isolated structure fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- accessing location of fire
- applying defensive firefighting strategies and techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- concluding firefighting operations
- identifying hazards
- identifying signs of structural collapse
- observing and reporting changes in conditions at fire
- obtaining water from reticulated and/or static water supplies
- participating in ancillary operations
- participating in debriefing sessions
- proceeding to isolated structure fire
- selecting and using firefighting equipment
- undertaking ancillary activities including assisting with damming water runoff, making up equipment and securing area
- using personal protective clothing and equipment
- utilising extinguishing media at fires

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- ancillary activities including damming water runoff, making up equipment and securing area
- behaviour of buildings and/or structures in a fire
- causes and signs of structural collapse
- change in conditions including weather

- changes in conditions at the fire
- damage to environment
- extinguishing media
- fire behaviour
- fire ground signals including audible and/or visual
- fire tetrahedron
- firefighting techniques including defensive strategies and tactics
- hazards including electricity, gas, hazardous materials, machinery, equipment, products, smoke, darkness, heat and structural collapse
- organisational documentation, policies and procedures including those for working with ladders, ropes and lines
- personal protective clothing and equipment
- portable fire extinguishers
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safe work practices and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - range of controlled or simulated fires, firefighting equipment and extinguishing media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work as a member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to personnel who work as a member of a crew or team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

outcomes.

demonstrate achievement of the element.

- | | |
|---|--|
| 1 Receive and report details of wildfire | 1.1 Details of the wildfire including location, type, behaviour and developments are received and recorded |
| | 1.2 Fire details are reported, in accordance with organisational requirements |
| 2 Prepare to respond to fire | 2.1 Location of wildfire is confirmed and safest access route is determined |
| | 2.2 Personal protective clothing and equipment, apparel, food and water are obtained before departure, in accordance with organisational requirements |
| | 2.3 Most appropriate appliance or vehicle is selected and used |
| 3 Proceed to fire | 3.1 Location of wildfire is confirmed by observation or from instructions while on approach |
| | 3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or environmentally sensitive areas |
| | 3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of appropriate authorities |
| | 3.4 Navigational aids are used for planning and operational purposes |
| | 3.5 Notification of arrival and appropriate report is provided |
| 4 Protect people and assets | 4.1 As far as conditions allow the number, location and safety of people and assets in the threatened area is determined and assessed |
| | 4.2 Appropriate protective procedures are implemented, under direction, to protect persons in the path of a wildfire |
| | 4.3 Access by the public and personnel to hazardous locations is controlled, as directed, in accordance with organisational procedures |
| | 4.4 Defensibility of property and assets is considered and, if appropriate, assistance is provided to help occupiers |
| | 4.5 Safety of people and assets in the threatened area is |

- monitored
- 4.6** Safety of people and security of assets in the area is checked and reported after the fire
- 5 Combat wildfire**
- 5.1** Briefing is received including area of operations, strategies and tactics to be employed
- 5.2** Escape routes and safety zones are confirmed and communicated to personnel
- 5.3** Firefighting media and equipment are selected and used in accordance with organisational procedures
- 5.4** Fire hazards are identified and action is taken to minimise the risks of injury to the public, personnel and self
- 5.5** Firefighting strategies and tactics are implemented to achieve objectives and to minimise overall damage and impact on assets and the environment
- 5.6** Fuel, weather and topographical factors are observed and potential fire behaviour is anticipated and acted upon to ensure safety
- 5.7** Communication is maintained with supervisor through the chain of command and with other firefighters in the work area
- 5.8** Fire control activities are undertaken to minimise overall damage and impact on assets and the environment
- 5.9** Potential fire behaviour is considered and acted upon to ensure safety and achievement of objectives
- 5.10** Fire reports are provided to supervisor, as required
- 5.11** Area of origin and evidence of fire cause are protected and brought to the attention of supervisor or relevant authority, in accordance with organisational procedures
- 6 Conduct mop up and patrol activities**
- 6.1** Mop up activities are carried out, in accordance with organisational procedures
- 6.2** Patrol of the fire is maintained
- 7 Recover and maintain equipment**
- 7.1** Equipment is made ready for operational use, in accordance with organisational procedures

- 7.2** Damaged or missing equipment is replaced, recorded and/or reported, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUA FIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- anticipating and reacting to changing wildfire behaviour
- applying Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing risk to life, property and the environment
- contributing to the implementation of firefighting strategies
- combating wildfires, performing firefighting tactics, and using firefighting equipment and extinguishing media
- communicating and working with team members
- conducting mop ups and patrol activities
- detecting hot spots and hazardous trees
- implementing and monitoring firefighting strategies and tactics
- interpreting fire weather, fuels and terrain and predicting likely impact on fire behaviour
- maintaining safety and health of self, other workers and people in a wildfire area
- participating in briefings and confirming instructions
- preparing to respond to wildfires, using navigation equipment
- proceeding to wildfires
- receiving, recording and reporting information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- crew protective procedures
- access to wildfires
- recognition of environmentally sensitive areas and actions to minimise damage
- escape routes including prepared tracks, roads, trails and waterways
- fire behaviour and its response to different fuels, topography and weather conditions
- fire cause

- fireground hazards
- fire report requirements
- fuel types and factors that impact fire development
- media and equipment for firefighting
- means of transport to fire ground
- navigational aids including aerial photographs, compass, global positioning systems and maps
- organisational documentation, policies and procedures
- potential fire behaviour including fire development, flame height and intensity, fuel load and arrangement, rate of speed, spotting, change due to terrain, topography, changes due to weather conditions, winds and fire winds.
- protective procedures including alerts and warnings, insitu protection and relocation
- safety zones including bare ground, burnt areas, clearings, rivers, site of recent wildfire or prescribed burns and static water bodies
- strategies for firefighting including offensive strategies including direct attack, indirect attack, parallel attack and combined attack and defensive strategies including community and asset protection
- tactics for firefighting including back burning and burning out, control line construction - hand and machine and direct suppression and extinguishment
- tasks for firefighting including application of firefighting media, control line construction, mopping up and patrol
- topographical factors that affect fire development
- types of fires including crown, ground and surface
- types of assets that require protection
- weather factors that influence fire development
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safety near vehicles and machines

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - access to wildfire or prescribed burns and/or approved field based environment
 - firefighting equipment and extinguishing media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR309 Operate pumps

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to operate a portable pump and/or appliance mounted pump at an incident.

The unit is applicable to personnel who are responsible for operating centrifugal appliance mounted pumps, portable pumps and foam systems at an incident. Typically, this work requires the application of basic principles hydraulics and involves working as a member of a team under limited supervision.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAEQU001 Prepare, maintain and test response equipment

One of the following:

PUAFIR203 Respond to urban fire

PUAFIR220 Respond to isolated structure fire

PUAFIR204 Respond to wildfire

PUAFIR205 Respond to aviation incident

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare pump to deliver water

- 1.1** Type of pump and hose selected is appropriate to the operation and/or incident
- 1.2** Suitability of water supply for operational purposes is determined
- 1.3** Pump is sited and positioned to receive and deliver water supply, in accordance with organisational procedures and requirements
- 1.4** Pump and primer are engaged, in accordance with organisational procedures and manufacturers' guidelines
- 1.5** Appropriate agents and equipment are prepared for production of foam at an incident, as required

2 Operate pump

- 2.1** Pump components and ancillary equipment are utilised to draught water, to boost water from a reticulated supply or to deliver and relay water from an appliance tank, in accordance with organisational procedures and requirements of incident
- 2.2** Pump operation is in accordance with organisational procedures, manufacturers' specifications, and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines
- 2.3** Pump settings are determined, in accordance with organisational procedures and requirements of the incident
- 2.4** Pumps are operated and observed to ensure that pressure and flow of water meets operational requirements and that safety to personnel is maintained
- 2.5** Pump performance is monitored and maintained to ensure maximum efficiency of operation, to detect and correct pumping and safety problems and to take appropriate action, in accordance with organisational procedures
- 2.6** Pump operations are carried out avoiding injury to

personnel and damage to equipment and facilities

2.7 Mechanical malfunctions are reported, in accordance with organisational procedures

3 Conclude pump operations

3.1 Pump operations are concluded, in accordance with organisational procedures

3.2 Ancillary equipment is collected, reinstated and stowed, in accordance with organisational procedures

3.3 Maintenance procedures and checks are undertaken to ensure pump and ancillary equipment is serviceable, in accordance with organisational requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

type of pump must include

- appliance mounted pump
- portable pump

suitability of water supply must include

- capacity
- pressure

foam agents must include

- Class A foams or
- Class B foams

foam equipment must include

- Class A foams or Class B foams and systems

water supply must include

- reticulated supply
- static supply

principles of hydraulics must include three or more of the following

- discharge and flow rates
- friction loss
- head pressure calculations
- jet reaction
- required branch and nozzle pressures

observed must include three or more of the following

- branch operator activities checking water supply levels

- monitoring of gauges and warning lights
- pump operators working on other units when relay pumping
- use of pressure relief valves and transfer valves
- use of pump performance charts or tables illustrating information such as optimum nozzle pressure and friction loss

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR309B Operate pumps.

Assessment Requirements for PUAFIR309 Operate pumps

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- accessing static and reticulated water supplies
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- concluding pump operations
- implementing organisational procedures
- maintaining appropriate levels of pressure
- monitoring levels of water in appliance tank to ensure minimum levels for crew protection
- monitoring supply of foam concentrate
- observing personnel and pumping throughout incident
- operating a pump including using gauges and controls, positioning and priming
- preparing pump to deliver water
- providing and maintaining water supply to branch operators
- pumping without injury to personnel or damage to equipment
- responding to changing circumstances
- supplying or delivering correct proportion of foam and water
- supplying water to a location by use of a relay pump
- using ancillary equipment to support pump operations

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- ancillary equipment used to support delivery of foam and/or water
- determination of water supply capacity and suitability
- discharge and flow rates
- jet reaction
- organisational documentation, policies and procedures
- power train for pump

- principles of hydraulics
- principles of hydraulic flow and pressure, priming and operating pumps, pump components and their operation and pump gauges and/or controls
- pump positioning
- relay pumping including when to use and how it is done
- static and reticulated water supply and their use in pumping operations
- types of primer and their use in pumping operations
- types of foam concentrate, pumps and primers and foam agents and equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR323 Take local weather observations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to take, assess, record and report simple weather observations for a specified area. It includes obtaining weather observations to provide basic interpretations to assist with predictions of future weather conditions and the impact of these conditions on planned field activities or an organisation's ability to respond to a natural disaster.

The unit applies to personnel responsible for taking and recording field weather observations in a specified area.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Gather field based

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Weather instruments that can be used for taking weather

weather observations	observations are identified
	1.2 Area specific information is accessed
	1.3 Weather observations are collected from the field using handheld weather instruments
	1.4 Local topographical influences most likely to affect weather conditions are identified
2 Assess local weather signs to identify likely changes	2.1 Weather signs, that may be used to interpret and predict local conditions, are identified
	2.2 Weather signs for monitoring and interpreting current and future conditions are evaluated
	2.3 Trends in weather recordings are identified
	2.4 Short and long term implications of weather signs are assessed
3 Record and report weather observations	3.1 Weather observations are recorded, in accordance with organisational procedures
	3.2 Weather observations are reported to relevant personnel, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR319 Take local weather observations.

Assessment Requirements for PUA FIR323 Take local weather observations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- gathering reliable field based weather observations
- identifying weather trends
- making basic interpretations of current weather effects in localised areas for an emergency management incident
- observing and assessing influence of topography on local weather conditions
- observing and assessing local weather signs to identify likely changes
- observing topographical influences including altitude, slope and vegetation
- recording and reporting weather observations to relevant personnel
- recognising types of topographical influences including altitude, vegetation, slope and aspect
- taking representative weather observations in two different locations, weather observations using hand held weather instruments and basic visual weather observations
- taking weather observations including air temperature, cloud amount and type, relative humidity, wind direction, speed and gusts and time and location at which observations were made
- undertaking observations of weather signs

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Bureau of Meteorology information related to weather forecasts
- maritime influence on weather and climate
- meteorological terms
- organisational documentation, policies and procedures
- roles and responsibilities of personnel in the field
- safe work procedures
- types of topographical influences on weather

- types of weather signs types of weather observations including air temperature, atmospheric stability, cloud amount and type, dew point, inversions, precipitation, relative humidity, wind direction - speed and gusts, wind changes - cold fronts, sea and land breezes, and thunderstorms and time and location at which observations were made
- variety of weather instruments including hand held weather meter and sling or whirling psychrometer
- weather trends including anticipated changes, deteriorating conditions, improving conditions and no significant change
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR325 Operate heavy plant in fire control operations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to operate heavy plant in fire control operations.

Heavy plant refers to heavy duty equipment and vehicles, specially designed for executing construction tasks, most frequently ones involving earthwork operations. This may include fire control line construction; clearing vehicle turnarounds, passing bays and safety zones; constructing helipads in forest and/or scrub environments and road construction.

The unit applies to personnel who operate heavy plant machinery, who will be directed to undertake a range of tasks to support fire operations and roadwork construction, it does not include tree pushing.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

- outcomes. demonstrate achievement of the element.
- 1 Use and service heavy plant machinery**
 - 1.1** Heavy plant machinery is set up and pre-operational checks are undertaken to ensure safe operation in forest environments that are free of soil, water borne disease and weeds prior to and after use
 - 1.2** Effective communication is established with supervisor, team members and support vehicle operators
 - 1.3** Safe work procedures are employed when using heavy plant machinery for construction
 - 1.4** Heavy plant machinery is parked safely and securely when not in operation
 - 1.5** Personal protective clothing and equipment is worn and used, in accordance with organisational procedures
 - 2 Construct fire control line**
 - 2.1** Obtain briefing and confirm work to be undertaken
 - 2.2** Topographical and vegetation factors are considered when selecting a route for construction of a fire control line
 - 2.3** Environmental, agricultural, cultural and heritage factors are considered when selecting a route for construction of fire control line using heavy plant machinery
 - 2.4** Fire control line is constructed directly on fire edge or away from fire edge, taking into account weather conditions and/or changes in fire behaviour, to meet fire suppression requirements
 - 2.5** Hazards are identified and considered when selecting route and constructing fire control line
 - 2.6** Debris from fire control line construction is appropriately placed to facilitate fire suppression works and to reduce environmental impact
 - 2.7** Fire control line is constructed to suit purposes, including vehicle access, in accordance with organisational procedures
 - 2.8** Helipads, turning areas, passing bays and safety zones are constructed, as directed
 - 3 Mop up and rehabilitate area**
 - 3.1** Mop up work is conducted, in accordance with organisational procedures and in coordination with crew

members

- 3.2** Rehabilitation work is conducted, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

machines must include one or more of the following

- bulldozer
- excavator
- faller buncher
- front end loader
- grader
- harvester
- skidder

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR321 Operate heavy plant in fire control operations.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR325 Operate heavy plant in fire control operations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating through the chain of command
- communicating with personnel in support vehicles
- constructing a fire control line in forest or scrub environments
- constructing a fire control line adjacent to and at a distance from live fire edge
- identifying hazards and risks including exposures
- implementing industry and organisational standards when operating heavy plant machinery
- implementing safe work procedures
- mopping up and rehabilitating an area
- operating machines in a fire and non-fire environment
- participating in briefing sessions
- performing pre-start checks of heavy plant machinery
- performing basic maintenance and ensuring servicing of heavy plant machines in a fire or non-fire environment
- recognising and considering topographical, vegetation, agricultural, environmental, cultural and heritage factors
- selecting routes for fire control line construction
- working with different types of mop up activities

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- assessment of hazards and risks including characteristics of trees, topographical factors, vegetation, environmental factors, cultural and heritage factors and agricultural factors
- capabilities of support vehicles

- hazards and risks including exposures
- heavy plant machine capabilities, limitations, design and safety features
- industry and organisational standards for control line, helipad and roadwork construction and rehabilitation activities
- machine maintenance requirements in a fire ground environment
- organisational documentation, policies and procedures
- pre-start and post work check procedures
- safe work procedures including
 - assistance to vehicles and personnel working with machines
 - communication with fire control line supervisors and support vehicles
 - contact and communication with support vehicles
 - Falling Object Protection (FOPs) and Roll Over Protection (ROPs) are correctly fitted and used
 - fire ground emergencies
 - limits of machine capability
 - personal protective clothing and equipment
 - position in relation to live fire edge and fire intensity
 - safe work practices
 - seatbelts being worn in the cabin
 - survival techniques in burn over situations
- topographical, vegetation, environmental, cultural, heritage and agricultural factors
- types of mop up activities
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed in an organisation or agency approved operational environment or in a field based simulated environment.

Constructing a fire line should be assessed in a forest and/or scrub environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - machinery and communications equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR326 Push trees with machines in forest fire control operations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply machine operation skills to the specific circumstances of fire operations. It includes fire control line construction, pushing trees, clearing vehicle turnarounds and passing bays, constructing helipads at a wildfire on forested land and completing rehabilitation activities. Work at this level will be carried out under direction with limited supervision.

The unit applies to personnel who will be directed to push trees using machinery to support fire operations.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Use and service machine**
 - 1.1** Machinery is set up and preparation checks are undertaken to ensure safe operation in forest environments that are free of soil and water borne disease and weeds prior to and after use
 - 1.2** Effective communication is established with supervisor, team members and support vehicles
 - 1.3** Safe work procedures are employed when using machinery to push tree
 - 1.4** Machinery is parked safely and securely when not in operation
 - 1.5** Personal protective clothing and equipment is worn and used, in accordance with organisational procedures
- 2 Plan to push tree**
 - 2.1** Obtain briefing and confirm work to be undertaken
 - 2.2** Hazardous tree marking system is interpreted and actioned for each tree
 - 2.3** Tree is assessed for suitability for pushing with machinery
 - 2.4** Topographical factors and vegetation are considered when planning to push tree using machinery
 - 2.4** Environmental, cultural and heritage factors are considered in relation to area where trees will be pushed
 - 2.5** Approval is sought and gained for tree to be pushed with machinery
 - 2.6** Hazards and safe clearances are established around trees selected for pushing with machinery
 - 2.7** Escape routes are identified, in accordance with organisational procedures
 - 2.8** Support personnel are warned of tree to be pushed with machinery
- 3 Push tree**
 - 3.1** Communication is maintained with ground crew during tree pushing operations
 - 3.2** Ground is prepared for tree pushing with machinery
 - 3.3** Direction of tree fall is determined

- 3.4 Tree is pushed with machinery applying safe tree pushing practices
- 3.5 Apply fireground emergency procedures
- 4 Undertake mop up and rehabilitation activities
 - 4.1 Trees and debris are cleared for safe access to safety zone escape routes and to allow for mop up work
 - 4.2 Area, where trees have been pushed by machinery, is made safe for organisational personnel to enter
 - 4.3 Rehabilitation activities are conducted, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

machine must include one or more of the following

- bulldozer
- excavator
- faller buncher
- front end loader
- harvester

and must be fitted with

- Falling Object Protection Systems (FOPS)
- Roll Over Protection Systems (ROPS)

Assessment Requirements for PUAFIR326 Push trees with machines in forest fire control operations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing and planning to push trees using machinery
- considering topography, vegetation, environmental, cultural and heritage factors
- communicating within the chain of command
- implementing safe work procedures including
 - communicating with fire control line supervisors and support vehicles
 - ensuring FOPS and ROPS are correctly fitted and used
 - maintenance of contact and communication with support vehicles
 - positioning in relation to live fire edge and fire intensity
 - providing assistance to vehicles and personnel working with machines
 - survival techniques in burn over situations
 - wearing personal protective clothing and equipment
 - wearing seatbelts in cabin
 - working within limits of machine capability
- identifying hazards and risks including exposures
- maintaining communication with support personnel and vehicles
- operating machines in a fire and non-fire environment
- participating in briefing sessions
- performing basic maintenance and ensuring servicing of machinery in fire and non-fire environments
- performing pre-start checks
- preparing ground for tree pushing
- pushing trees in support of fire operations safely
- seeking and gaining permission to complete actions
- undertaking mop up and rehabilitation activities
- using safe tree pushing practices including not rocking trees, avoiding obstacles such as tree roots, stumps and rocks, determining direction of approach relative to proposed direction of

fall, recognising minimum and gradual power application to effect tree fall, being aware of point of contact with machine and using blade and/or tree arm for optimal leverage

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- assessment of hazards and risks including characteristics of trees, cultural and heritage factors, environmental factors, hazards and risks including exposures, topographical factors and vegetation, burn over survival techniques and capabilities of support vehicles
- ground preparation including clearing escape route, clearing vegetation and obstacles such as logs and rocks around trees, creating ramp for pushing and ripping or severing roots of tree to be pushed
- hazards and risks including exposures
- machine capabilities, limitations, design and safety features
- machine maintenance requirements in a fire ground environment
- organisational documentation, policies and procedures including operating machines
- personal protective clothing and equipment
- rehabilitation works
- re-start and post work check procedures
- safe work procedures including
 - assistance to vehicles and personnel working with machines
 - communication with fire control line supervisors and support vehicles
 - ensuring FOPS and ROPS are correctly fitted and used
 - fire ground emergencies
 - maintenance of contact and communication with support vehicles
 - position in relation to live fire edge and fire intensity
 - survival techniques in burn over situations
 - wearing personal protective clothing and equipment
 - wearing seatbelts in cabin
 - working within limits of machine capability
- safe tree pushing practices including
 - avoiding obstacles such as tree roots, stumps and rocks
 - awareness of point of contact with machine
 - considering characteristics of hazardous tree
 - considering rehabilitation activities
 - direction of approach relative to proposed direction of fall
 - minimum and gradual power application to effect tree fall
 - not rocking tree
 - use of blade and/or tree arm for optimal leverage

- wildfire control tactics and techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed in an organisational/agency approved operational environment or in a field based simulated wildfire environment; pushing trees by machinery should be assessed in a forest environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - trees requiring pushing, machinery and communications equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, conduct and evaluate simple prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for preparing, conducting and evaluating a simple prescribed burn on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to burn

- 1.1 Burn operations for a simple prescribed burn are identified and undertaken, in accordance with approved prescribed burn plan, burn plan objectives, organisational procedures and legislative and regulatory requirements
- 1.2 Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
- 1.3 Burn notifications and plans are issued to persons or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
- 1.4 Control lines, including secondary control lines, are specified and prepared, in accordance with organisational procedures
- 1.5 Prescribed burn plan operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works are completed
- 1.6 Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
- 1.7 Fuel conditions are monitored, in accordance with organisational procedures and prescribed burn plan
- 1.8 Resource requirements are confirmed with reference to burn plan

2 Conduct burn

- 2.1 Prescribed burn notifications are issued, in accordance with organisational procedures
- 2.2 Pre-burn checks are conducted, in accordance with organisational procedures
- 2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
- 2.4 Resources are gathered and personnel are briefed, in accordance with prescribed burn plan and contingency

arrangements

- 2.5 Burn ignition strategies, including lighting techniques patterns and sequences are implemented, in accordance with organisational procedures and prescribed burn plan
 - 2.6 Burning is monitored, patrol activities are conducted and operational changes made, as required
 - 2.7 Contingencies are implemented, in accordance with prescribed burn plan, as required
 - 2.8 Burn documentation is kept, in accordance with organisational procedures
 - 2.9 Burn operations are concluded and burn security is implemented, in accordance with organisational procedures
 - 2.10 Crews are debriefed and resources released from the burn
 - 2.11 Incidents are reported and investigated, in accordance with organisational procedures
- 3 Conduct post burn activities**
- 3.1 Outcomes of the burn are assessed against burn objectives, in accordance with organisational procedures
 - 3.2 Variations from the burn plan are reported, in accordance with organisational procedures
 - 3.3 Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
 - 3.4 Prescribed burn records are submitted, in accordance with the organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include

- approval of plan for the conduct of prescribed burning
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

personnel or organisation must include one or more of the following

- personnel or organisations who
 - have an interest in adjacent land to which a burn could spread
 - have an interest in managing the consequences of a burn
 - have an interest in specific assets
 - have an interest in the area to be burned
 - may be concerned by evidence of a burn

resources must include one or more of the following

- contingency resources
- crews for control, suppression and ground ignition
- equipment and supplies
- logistical support
- other vehicles
- tankers

burn ignition strategies and tactics must include

- contingency arrangements
- fire behaviour to be achieved
- ignition methods, lighting patterns, sequencing and timing of ignition

lighting techniques must include one or more of the following

- hand held
- vehicle mounted propelled incendiaries
- wind and waterproof matches

lighting techniques and patterns must include

- contour lighting
- echelon
- grid
- line

- lighting sequence must include one or more of the following
- multi-line
 - spot
 - lighting sequences that considers
 - fuel arrangement
 - fuel moisture
 - slope
 - time of day
 - wind direction
- monitoring burn must include one or more of the following
- fire shape and spread
 - flame height
 - fuel moisture content
 - predictions
 - rate of spread
 - recording
 - safety considerations
 - smoke development
 - weather observation
 - wind speed and direction
- concluding operations and burn security must include one or more of the following
- mitigating hazards for public safety
 - mopping up and black out
 - patrolling burn area
 - reopening roads
 - transfer of responsibility, as per organisational procedures
- outcomes of the burn must include one or more of the following
- achievement of burn objectives
 - escapes
 - external impacts
 - levels of scorch
 - percentage of area burnt
 - reporting and storage of burn documentation

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR412 Conduct simple prescribed burns.

Assessment Requirements for PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazards, risk mitigation and safety of personnel
- checking burn and crew activities
- completing burn notifications
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings, safe burns utilising resources and post burn activities including operations and security
- confirming resources, location, construction and suitability of control lines for prescribed burns
- identifying and implementing restoration and rehabilitation activities
- implementing contingency arrangements
- interpreting and implementing simple prescribed burn plans
- interpreting simple prescribed burn plans and objectives, fire behaviour conditions and existing and forecast weather conditions
- monitoring equipment
- planning for contingencies
- preparing for a simple prescribed burn
- recording actions taken
- using fire prediction tools and resources

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- briefing and debriefing content and processes
- burn notification including verbal and written notification
- characteristics of a simple prescribed burn including completed in one shift, involves

minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area

- conclusion of simple prescribed burns including operations and security
- contingency arrangements including command structure, safety considerations such as escape routes and safety zones, actions to take in the event of unexpected fire behaviour changes, resolution of escapes, special resources and secondary control lines, resource requirements, resolution of resource breakdowns, injury on fire line and burn targets not met
- contingency plans
- fire prediction tools
- ground ignition patterns and techniques
- impact of conditions at simple prescribed burns on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative and organisational authorisations required
- organisational documentation, policies and procedures
- outcomes of simple prescribed burn
- personnel and organisations involved in simple prescribed burn activities
- required permits
- resource requirements
- restoration and rehabilitation
- seasonal restrictions on simple prescribed burns
- simple prescribed burn and securing burn monitoring
- techniques, patterns and sequencing for lighting
- types of property and assets
- types of simple prescribed burns, prescribed burn plans and objectives
- weather conditions including: temperature, relative humidity, weather changes, atmospheric stability, drought index, fire danger index, weather forecasts, actual or anticipated changes in conditions and progress targets not met
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in a range of actual and/or field based workplace environments with evidence collected from undertaking a simple prescribed burn being required.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - fire management and contingency plans
 - lighting and suppression crews
 - lighting and suppression equipment
 - simple prescribed burn plans
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop simple prescribed burn plans for specified burn areas and to prepare the plans to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for the development of simple prescribed burn plans.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify burn areas and burn objectives

1.1 Areas requiring simple prescribed burning are identified, in accordance with organisational procedures

1.2 Burn objectives are identified, in accordance with organisational procedures

1.3 Target groups are identified and consultation process is undertaken, in accordance with organisational procedures

1.4 Legislative and regulatory requirements are identified and complied with throughout planning process

2 Prepare prescribed burn plan for simple burn

2.1 Key features of the burn area are identified including variations in terrain, fuel types and quantities control lines and weather

2.2 Risks from proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environment and ecological risks

2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures

2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined

2.5 Burn ignition strategies and tactics required for fire behaviour, intensity and that are suitable for location are determined, in accordance with organisational procedures

2.6 Lighting techniques and lighting patterns are identified

2.7 Hazard and risk mitigation are determined and asset protection works are identified

2.8 Strategies for mitigating hazards and risks are identified and required preparatory works are identified

2.9 Strategies and tactics for controlling prescribed burn are identified

- 2.10 Type and quantity of resources required are identified
 - 2.11 Prescriptions for implementation of burn plan strategies and tactics are documented, in accordance with organisational procedures
 - 2.12 Contingencies are outlined in the prescribed burn plan
 - 2.13 Prescribed burn plan is prepared, in accordance with organisational procedures
- 3 Gain approval of prescribed burn plan**
- 3.1 Prescribed burn plan is submitted for approval, in accordance with organisational procedures and legislative requirements
 - 3.2 Modifications and amendments to prescribed burn plan are made based on feedback received
 - 3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

simple prescribed burn plan must include

- an approved plan for conduct of simple prescribed burn
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

simple prescribed burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- management of cultural sites and activities
- protection of fire sensitive ecological communities

target consultation groups must include one or more of the following

- vegetation management
- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- groups or individuals that may be adversely affected
- other groups and people within prescribing organisation

lighting techniques must include

- hand held
- wind and/or waterproof matches

lighting patterns include one or more of the following

- contour lighting
- echelon
- grid
- line
- multi-line
- spot

operational hazards must include two or more of the following

- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous material
- high fuel loads
- ignition methods
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following

- impact of smoke on vulnerable communities near burn area
- safety of any people permanently or temporarily in burn area
- safety of people involved with burn implementation
- safety of people on areas adjacent to burn area

property and assets must include two or more of the following that are near the burn area

- camps or recreational areas
- commercial land use such as crops or industry
- cultural sites or historical buildings
- other property and assets
- plantations

environmental and ecological risks must include

- research plots and reference areas
- stock
- urban areas
- utilities - power and telephone lines, water supply structures and communications towers
- impact on
 - native flora and fauna including rare and endangered species
 - smoke
 - soil
 - use of chemical fire suppressants
 - water quality or supply
- crews for ground ignition and suppression
- equipment backup
- ignition and suppression equipment and supplies
- logistical support
- other vehicles
- tankers

resources must include one or more of the following

Assessment Requirements for PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- assessing fuel types and quantities in burn area
- determining actions to minimise impacts of simple prescribed burn
- developing contingency arrangements
- developing pre-burn work schedule
- gaining simple prescribed burn approval
- identifying and working with resources
- identifying burn areas including developing timelines for planning and conduct of simple prescribed burn, simple prescribed burn objectives, strategies and tactics to meet simple prescribed burn objectives, ignition strategies and lighting techniques and patterns for ignition
- identifying resources
- identifying, assessing and mitigating operational hazards and risks
- identifying, assessing and mitigating risks to people, property and assets, ecological and environmental risks
- implementing legislation and regulations
- interpreting map of area and identifying key features
- predicting anticipated fire behaviour and intensity in burn area
- preparing plans and map for simple prescribed burning
- targeting consultation groups are identified, liaised with and consulted

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- accumulated fuels
- characteristics of simple prescribed burns including completed in one shift, involves minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
- contingencies
- effects of fire on vegetation, fauna, people, property, assets, ecology and the environment
- fire behaviour for fuel type being prescribed
- fire prediction tools
- ignition strategies and tactics
- legislative, regulatory, organisational and permit requirements for simple prescribed fires
 - notification requirements
 - organisational documentation, policies and procedures
 - planned burn hazards and risks
 - resource requirements and capabilities
- simple prescribed burn plans
- simple prescribed burning ignition and suppression strategies
- smoke management
- target groups and community
- traffic management plan requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in a range of actual and/or field based workplace environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - area requiring application of fire under prescribed conditions

- existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR407 Interpret and analyse fire weather information

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to assess and interpret weather information in relation to its impact on fire behaviour. It includes collecting, interpreting, analysing and recording weather information.

The unit applies to personnel who are required to provide weather predictions as part of the planning undertaken for a fire.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Collect weather information

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Sources of weather information are identified and accessed

- 1.2 Fire site information is sought from databases or experts
 - 1.3 General data is obtained
 - 1.4 Field observations are obtained and monitored
- 2 Interpret weather information**
 - 2.1 Weather data is interpreted for current weather conditions in an area
 - 2.2 Bureau of Meteorology weather forecasts and warnings are interpreted for future weather conditions in an area
 - 2.3 Field weather observations are assessed
 - 2.4 Local weather influences likely to affect fire weather conditions are identified
 - 2.5 Weather forecasts are validated against field weather observations, as they become available
 - 2.6 Weather forecasts are evaluated for their effect on fire behaviour
- 3 Analyse, record and communicate fire weather information**
 - 3.1 Analysis is conducted using weather data and forecast weather signs, local weather influences and likely impact on fire behaviour
 - 3.2 Quality information is provided within required timeframes for fire control planning
 - 3.3 Weather conditions are monitored and potential changes to fire predictions are assessed and reported
 - 3.4 Analysis and advice are provided to relevant personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR414 Interpret and analyse fire weather information.

Assessment Requirements for PUAFIR407 Interpret and analyse fire weather information

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing, recording and communicating fire weather information and source data
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- collecting weather information by accessing recorded data, maps and web based products
- composing field observations
- interpreting topographic maps to assess effects on weather
- interpreting weather maps
- managing data and maintaining accurate records
- providing organisational personnel accurate analysis and projection of weather affecting an area and likely impact on fire behaviour

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- effect of topography on weather and fire behaviour
- field observations including cloud type and cover, dew point, fire behaviour including rate of spread, flame height and spotting, fuel moisture content, temperature and relative humidity, wind speed, direction and gust and location and time of observation
- fire behaviour factors
- impact of weather on fire behaviour including size, growth and shape
- influences on weather
- observation, analysis and interpretation of weather signs
- organisational documentation, policies and procedures
- sources of data relating to weather and fire behaviour
- sources of weather information
- types of weather influence most likely to affect fire weather conditions including altitude and elevation, bodies of water, distance from coast, dry air subsidence inversion, Foehn winds, katabatic and anabatic winds, sea and land breezes, slope and aspect and wind channelling

- weather analysis including atmospheric stability, Bureau of Meteorology products and tools, Haines index, smoke dispersion, temperature inversions, wind changes
- weather data including air temperature, dewpoint, relative humidity, synoptic charts, wind direction, speed and gusts, drought factor and drought index
- weather forecasts
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR417 Supervise machinery use in wildfire operations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to task and supervise the use of machinery to undertake a range of activities to support fire ground operations. It includes control line construction and rehabilitation, reduction and removal of hazards, improvement of existing tracks and roads, creating access and egress to control lines, constructing helipads and assisting in blacking out.

The unit applies to personnel who supervise machine operators and who provide an essential interface between machine operators and the command structures at fire incidents.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Assess work area

- 1.1** Risk assessment of fire site is undertaken and hazards and assets at risk are identified and inspected
- 1.2** Trees to be pushed are identified, marked for attention, options to avoid pushing trees are examined and permission to remove trees is obtained
- 1.3** Terrain through which tasks must be undertaken to achieve incident objectives is assessed
- 1.4** Route is selected, assessed and marked for construction of control line and removal or avoidance of hazards and to determine the most appropriate path and type of machinery suitable for wildfire operations activity
- 1.5** Consultation and communication with land owners and managers is undertaken prior to machinery entering the property

2 Brief and task machine operators

- 2.1** Personnel are briefed on strategies and tactics to be implemented by machine operators, in accordance with organisational procedures and the incident action plan
- 2.2** Machine operators are tasked and briefed on work standards and safe work practices to be adhered to
- 2.3** Reporting arrangements between machine operators, fire crew and supervisor are outlined
- 2.4** Machine operators are checked to confirm that they are wearing appropriate personal protective clothing and equipment
- 2.5** Appropriate communications equipment is provided and instructions for use is given to machine operators
- 2.6** Machinery is inspected to ensure compliance with safety requirements
- 2.7** Machinery is selected to ensure compliance with work and/or contract requirements
- 2.8** Machinery is checked for compliance with hygiene guidelines in respect to spread of disease and weeds and remedial action is taken, as required
- 2.9** Anchor points, escape routes and safety zones are established and communicated to personnel in the area

- 3 Supervise use of machinery**
 - 3.1 Machinery safety requirements are monitored throughout wildfire operations
 - 3.2 Near misses or accidents are reported, in accordance with organisational procedures
 - 3.3 Communications with machine operators, support crew and the chain of command are maintained, in accordance with organisational procedures and the communication plan
 - 3.4 Location and standard of construction of control line is adapted to changes in fire behaviour and intensity
 - 3.5 Fire spread and location of the control line is monitored, taking into account changes in fuel, weather and topography
 - 3.6 Progress of delegated tasks is monitored and regular reports are provided to appropriate supervisor
 - 3.7 Performance of delegated tasks by machine operators is monitored, in accordance with organisational procedures and code of practice
 - 3.8 Fuel and maintenance requirements are monitored and requests are organised through the chain of command
 - 3.9 Minimisation of machine operations damage to agricultural, environmental, forestry, cultural and other community assets is ensured
 - 3.10 Records of machine and operator work hours are maintained and provided to relevant personnel, in accordance with organisational procedures
- 4 Conduct mop up and support activities**
 - 4.1 Machine operators are tasked and mop up and support activities are carried out, in accordance with organisational procedures
 - 4.2 Threats to security of the perimeter or a sector of the fire are identified and reported on through the chain of command
 - 4.3 Rehabilitation of fire control lines no longer required is undertaken
- 5 Recover and maintain equipment**
 - 5.1 Requests for repairs or maintenance of machinery are communicated through the chain of command

- 5.2 Damaged or missing equipment is recorded and/or reported, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for PUAFIR417 Supervise machinery use in wildfire operations

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying and monitoring safe work practices during fire suppression activities including control line construction and pushing trees
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing work area including hazards and risks
- briefing and tasking machine operators
- communicating with machine operators
- conducting mop up and support activities
- constructing anchor points and safety zones including burnt areas, clearings, rivers, site of a recent wildfire or prescribed burn, static water bodies and area of safety zone suitable for fire size
- cooperating with support vehicle personnel
- ensuring hazardous trees have been marked for attention
- establishing and maintaining work standards of machine operators
- implementing strategies
- maintaining communication
- maintaining health and safety of people in wildfire area
- monitoring and reporting on machinery operations in fire suppression activities
- recovering and maintaining equipment
- reviewing options
- selecting and marking routes for fire control line construction
- supervising personnel and the use of machinery
- wearing personal protective clothing and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes

knowledge of

- asset categories
- Australasian Inter-service Incident Management System (AIIMS)
- communications equipment
- fire control line construction including anchor points and safety zones, asset protection, capabilities of support vehicles, fire control line construction rates and construction standards, using machines to construct control lines, construction guidelines and tandem operations
- isolation of hazards
- mop up and support activities
- options available with control lines
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- potential hazards
- processes for planning for the availability of machines and operators
- protection of environmental, structural, infrastructure, cultural and agricultural assets
- records for time keeping and reporting requirements
- role and responsibilities of machine supervisor
- role of machines in mopping up
- safety including communication, machine requirements, mutual support, operator safety, operating procedures, safe work practices including those for working around trees, survival techniques when threatened by wildfire and personnel welfare
- strategies and tactics for firefighting
- tree marking including hazardous tree and track marking system
- types of control line construction
- types of hazards including burns, disorientation, environmental, fatigue, heat related illness, falling objects, branches and trees, lack of visibility, machines, manual handling, overhead hazards, beehives, powerlines, trees weakened by fire, rot or cracks, rolling objects, smoke inhalation, snake or insect bites, sprains or fractures, terrain and soil types, trips and falls and water bombing operations
- types of machinery, their capabilities and limitations including bobcat - skid steer loader, brompton rat, bulldozer, excavator, front end loader, grader, scrub rollers, tractor with blade or plough and wheeled dozer and log skidder with blade
- use of machines in wildfire operations including
 - arrangements regarding organisational, private and contracted equipment
 - capabilities of supporting fire units
 - general servicing and maintenance requirements of machines
 - machine design and safety features
 - machine set up and capabilities
 - organisational requirements for engagement of machines
 - transport of machines
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including risk mitigation and safe work procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated and assessed over time in a range of field based environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - wildfire or prescribed burn and machinery
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR501 Conduct fire investigation and analysis activities

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to an incident and to undertake a preliminary fire investigation prior to the arrival of a specialist fire investigator.

The unit is applicable to personnel required to conduct a fire investigation at a fire or related incident. It is not intended for personnel operating in the role of specialist fire investigator.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUALAW001 Protect and preserve incident scene

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Plan fire or incident investigation and analysis activities**
 - 1.1 Roles and responsibilities of organisations or agencies and support personnel involved in the fire or incident investigation are confirmed
 - 1.2 Procedures and protocols for the coordination of organisations involved in the fire or incident investigation are identified, agreed and implemented
 - 1.3 Strategies required to conduct fire or incident investigation and analysis are identified and implemented, in accordance with organisational procedures
 - 1.4 Preliminary and background sources of information concerning the context of the fire or incident investigation are identified and used
 - 1.5 Legislative requirements that impact on the collection and recording of evidence are identified
 - 1.6 Evidence and information gathering process at the incident site is planned, in accordance with organisational procedures, environmental conditions and resource availability
 - 1.7 Fire investigation equipment and resources for the incident are identified and assembled
- 2 Collect, collate and preserve evidence**
 - 2.1 Methods and techniques of evidence and information collection for the investigation are applied, in accordance with organisational procedures
 - 2.2 Various types of evidence and information pertinent to the investigation are recorded or collected, in accordance with organisational procedures
 - 2.3 Organisational procedures for continuity and preservation of evidence are followed
 - 2.4 Packaging and identification techniques for transportation of evidence for laboratory testing are followed, in accordance with organisational procedures
- 3 Determine origin and cause of fire at incident**
 - 3.1 Fire investigation procedures to determine the origin and cause of fire are followed
 - 3.2 Liaise with specialist fire investigation personnel to support determination of the cause of fire, in accordance with organisational procedures

- 3.3** Provide assistance to forensic personnel and specialist organisations, in accordance with organisational procedures
 - 3.4** Evidence of origin and cause of fire is identified and examined
 - 3.5** Preliminary findings are documented and validated, in accordance with organisational procedures
 - 3.6** Fire origin and cause determination theories are developed and assessed, using organisationally approved scientific methods
 - 3.7** Findings, methodologies, support data and briefing notes are documented, in accordance with organisational procedures
 - 3.8** Fire origin and cause is determined and reported, in accordance with organisational procedures
- 4 Conduct analysis of incident**
 - 4.1** Information relating to incident is gathered, in accordance with organisational procedures
 - 4.2** Information relating to incident is evaluated, in accordance with organisational procedures
- 5 Record and report information collected**
 - 5.1** Information for a fire incident investigation is recorded, in accordance with organisational procedures and the rules of evidence
 - 5.2** Information collected for a fire incident investigation is prepared and documented, in accordance with organisational procedures
 - 5.3** Report is submitted through the chain of command, in accordance with organisational procedures
- 6 Prepare for proceedings**
 - 6.1** Briefings are participated in with counsel, as required
 - 6.2** Additional information or clarification of fire incident investigation procedures or findings are investigated, if required
 - 6.3** Protocols for giving evidence at coronial, civil or criminal proceedings are implemented
- 7 Review and evaluate fire or incident investigation**
 - 7.1** Outcomes of legal proceedings are identified and distributed to ensure knowledge of investigations and

trends is maintained and is current

7.2 Changes to organisational policies and procedures arising from legal proceedings and decisions are formulated and reported

7.3 Fire or incident cause determination, documentation or recommendations are forwarded to relevant personnel, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR501B Conduct fire investigation and analysis activities.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUA FIR501 Conduct fire investigation and analysis activities

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating using approved methods and tools
- conducting analysis of the incident
- determining origin and cause of fire at incident
- displaying evidence gathering and packaging techniques
- participating in briefings
- planning fire or incident investigation and analysis activities
- recording and reporting information collected
- securing, collecting, collating and preserving evidence
- utilising methods and techniques for evidence and information collection

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- causes of fire including accidental, chemical, deliberate, electrical origin, environmental or natural occurrences, flammable liquids, gas and gas explosions, lightning, matches and lighters, mechanical defects, motor vehicles, smoking and spontaneous combustion
- determination of point of origin through use of evidence
- differences between accidentally, negligently, deliberately or naturally lit fires
- examination of fire scenes
- factors affecting fire behaviour
- fire dynamics such as flash over and back draught
- fire scene and risk investigation hazards
- legal implications of evidence collection
- legal protocols for giving evidence including court practices and procedures, pre-court briefings and rules of evidence
- legislative requirements in relation to fire incident investigation

- organisational documentation including reporting requirements
- organisational policies and procedures including fatality and criminal involvement procedures
- personal protective clothing and equipment
- preservation of evidence including maintaining chain of evidence and log of events
- processes for packaging
- security, contamination and preservation of fire scenes
- techniques for collecting evidence and sources of information
- types of specialist and forensic personnel
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR506 Conduct complex prescribed burns

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare and conduct complex prescribed burns, in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. A burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. A prescribed burn may require several separate ignitions (ground and/or aerial) possibly over several days. It may have several high value assets requiring complex protection actions.

The unit applies to personnel responsible for preparing, conducting and evaluating complex prescribed burns on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to burn

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Complex prescribed burn operations are identified and undertaken, in accordance with approved prescribed burn plan, burn objectives, organisational procedures, and legislative and regulatory requirements
- 1.2** Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
- 1.3** Burn notifications and plans are issued to personnel or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
- 1.4** Control lines, including secondary control lines are specified and prepared, in accordance with organisational procedures
- 1.5** Prescribed burn plan, operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works completed
- 1.6** Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
- 1.7** Fuel conditions are monitored, in accordance with organisational procedures
- 1.8** Resource requirements are confirmed with reference to burn plan and anticipated conditions
- 1.9** Forecast weather conditions are monitored throughout prescribed complex burn

2 Conduct burn

- 2.1** Burn notifications are issued, in accordance with organisational procedures
- 2.2** Pre-burn checks are conducted, in accordance with organisational procedures
- 2.3** Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
- 2.4** Resources are gathered and personnel briefed, in accordance with prescribed burn plan and contingency arrangements
- 2.5** Burn ignition strategies and tactics are implemented, in accordance with prescribed burn plan and organisational procedures including lighting techniques for ground and/or aerial ignition, as relevant to the specific burn, lighting patterns and lighting sequence
- 2.6** Burning is monitored, patrol activities are conducted and operational changes made, as required
- 2.7** Contingencies are implemented, as required, in accordance with prescribed burn plan
- 2.8** Burn documentation is kept, in accordance with organisational procedures
- 2.9** Burn operations are concluded and burn security is implemented in accordance with organisational requirements
- 2.10** Crews are debriefed and resources released from the burn
- 2.11** Incidents are reported and investigated in accordance with organisational procedures

3 Conduct post burn activities

- 3.1** Outcomes of burn are assessed and reported against burn objectives, in accordance with organisational procedures
- 3.2** Variations from burn plan are reported, in accordance with organisational procedures
- 3.3** Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
- 3.4** Complex prescribed burn records are submitted, in

accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include

- an approved plan for conduct of prescribed burning
- map identifying the area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

operational hazards must include one or more of the following

- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- ignition methods
- plant
- road traffic
- vegetation

environmental and ecological risks must include three or more of the following

- impact of smoke
- impact of use of any chemical fire suppressants
- impact on native flora and fauna, including rare and endangered species
- impact on soil
- impact on water quality or supply

contingency arrangements must include

- actions to take in the event of unexpected weather
- command structure
- dealing with escapes
- resource breakdowns
- resource requirements
- safety considerations including escape routes and safety zones
- special resources and/or secondary control lines
- wind changes

personnel or organisations must include one or more of the following

- personnel or organisations who
 - have an interest in managing the consequences of a burn
 - have an interest in preventing health impacts from smoke e.g. nursing homes, health departments
 - have an interest in specific assets
 - have an interest in the area to be burned
 - may be adversely affected by the burn
 - may be concerned by evidence of a burn
 - may have adjacent land to which a burn could spread

resource requirements must include one or more of the following

- contingency resources
- crews for
 - aircraft ground support
 - control and suppression
 - ground ignition

burn ignition strategies and tactics must include:

- equipment and supplies
- logistical support
- tankers and other vehicles
- contingency arrangements
- fire behaviour to be achieved
- ignition methods, lighting patterns, sequencing and timing of ignition

lighting techniques for ground and aerial ignition must include three or more of the following

- hand held drip torch
- aerial drip torch
- aerial incendiaries
- hand held propelled incendiaries
- vehicle mounted propelled incendiaries
- vehicle mounted incendiaries
- wind and/or waterproof matches

lighting patterns must include two or more of the following

- backing fire ignition
- spot or grid ignition
- strip ignition
- flank fire ignition

lighting sequence must include

- fuel arrangement
- fuel moisture
- slope
- time of day
- wind direction

monitoring complex prescribed burn must include four or more of the following

- fire development, shape and spread
- flame height
- fuel moisture content
- predictions
- rate of spread
- safety considerations
- smoke development
- weather observations

conclusion and complex prescribed burn security activities must include

- mitigating hazards for public safety
- mopping up and blacking out
- patrolling burn area
- reopening roads
- transfer of responsibility procedures

outcomes of the complex prescribed burn must include two or more of the following

- achievement of burn objectives
- escapes
- external impacts
- levels of scorch
- percentage of area burnt
- reporting and storage of burn documentation
- all those involved with burn implementation
- any in areas adjacent to burn area
- any permanently or temporarily in burn area
- impact of smoke on vulnerable communities near burn area

safety of people must include

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR511 Conduct complex prescribed burns.

Assessment Requirements for PUA FIR506 Conduct complex prescribed burns

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings
- conducting post burn activities
- conducting safe complex prescribed burn operations by utilising appropriate resources (ground and air)
- confirming location, construction and suitability of control lines for prescribed burns
- confirming resources required
- evaluating outcomes against objectives
- identifying and protecting assets
- implementing contingency arrangements
- interpreting and implementing complex prescribed burn plans
- interpreting existing and forecast weather conditions and fire behaviour conditions
- issuing verbal and written burn notifications
- monitoring burn and patrol activities
- preparing to burn
- recording actions taken
- responding to changing conditions
- restoring and rehabilitating sites
- using fire prediction tools
- using monitoring equipment
- utilising lighting techniques and sequencing
- working with ignition patterns and techniques

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- characteristics of complex prescribed burns including involvement of a variety of fuels and terrain, medium to large areas, moderate to high risk, range of fire intensity and significant potential impact on assets
- contingency plans
- evaluation of burn outcomes against objectives
- fire prediction tools and their use
- fuel sampling techniques
- ground and aerial ignition patterns and techniques
- impact of conditions of a complex prescribed burn on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative, regulatory and organisational authorisations
- organisational documentation, policies and procedures
- permit requirements
- procedures for monitoring, concluding and securing burn
- resource requirements and capabilities
- restoration and rehabilitation activities including site stabilisation and recording and reporting future restoration and rehabilitation requirement
- seasonal restrictions on prescribed complex burns
- smoke modelling and smoke impacts
- techniques, patterns and sequencing for lighting
- traffic management plans
- types of prescribed complex burns
- types of property and assets within or near burn area including urban areas, commercial land use such as crops or industry, any cultural sites or historical buildings, other property and assets, stock, utilities such as power and telephone lines, water supply, structures and communications towers, camps or recreational areas, plantations and research plots and reference areas
- verbal and written burn notifications
- weather conditions including temperature, relative humidity, wind, atmospheric stability, drought index, fire danger index, weather forecasts and actual or anticipated changes in conditions
- weather monitoring techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions. Competency should be demonstrated in an operational environment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - an area for proposed complex prescribed burn
 - authorisation to light burn
 - fire management plans
 - lighting and suppression crews
 - lighting equipment
 - prescribed burn plans including plan for proposed assessment burn
 - suppression equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR509 Implement prevention strategies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to implement public safety risk prevention strategies which can be used to reduce risks to the community. It includes providing advice on prevention strategies, implementing and monitoring prevention strategies and reviewing the implementation of prevention strategies.

The unit is applicable to personnel required to work with individuals and community groups to implement public safety risk prevention strategies within their area of responsibility.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Provide advice on prevention strategies

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Public safety risk prevention strategies are identified from information on hazards and environmental

- conditions
- 1.2 Assessment of public safety risk prevention strategies is conducted using organisational procedures and criteria
 - 1.3 Advice is provided to local forums on public safety risk prevention strategies, in accordance with organisational policies and procedures
 - 1.4 Types of risk, locality, protection of life, property and the environment are assessed in advice provided
- 2 Implement and monitor prevention strategies**
- 2.1 Risk prevention activity is implemented, in accordance with organisational strategies and selected strategies
 - 2.2 Communication and coordination of prevention activities is implemented with relevant authorities and organisations
 - 2.3 Progress reports are provided to stakeholders, in accordance with organisational policies and procedures
- 3 Review implementation of prevention strategies**
- 3.1 Stakeholders are advised of outcome of implementation of prevention strategies, in accordance with organisational policies and procedures
 - 3.2 Recommendations are documented and provided to appropriate personnel, in accordance with organisational procedures, as proposed amendments to prevention strategies

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR509B Implement prevention strategies.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR509 Implement prevention strategies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing needs through advice from stakeholders
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- briefing local forums
- communicating with stakeholders including providing reports
- completing documentation requirements
- ensuring risk prevention strategies are consistent with organisational community safety policies, procedures and criteria
- implementing and monitoring prevention strategies
- implementing organisational policies and procedures
- providing advice on prevention strategies
- reviewing and assessing implementation of prevention strategies
- reviewing strategies and providing feedback

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- assessment of public safety risk prevention strategies
- authorities and other responsible organisations
- communication methods and techniques
- emergency management concepts and principles
- legislation, regulations and codes of practice
- organisational criteria for implementing prevention strategies
- organisational documentation, policies and procedures
- participation and/or briefing in local forums
- risk prevention strategies
- source of risk
- stakeholders including authorities

- techniques for prioritisation and evaluation of public safety risk management systems
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify burn area and burn objectives

2 Prepare prescribed burn plan for a complex burn

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Areas requiring complex prescribed burn plans are identified, in accordance with organisational and permit procedures and legislative and regulatory requirements
- 1.2 Burn objectives are identified and consultation process is undertaken, in accordance with organisational procedures
- 1.3 Target consultation groups are identified, and consultation process is initiated, in accordance with organisational procedures
- 1.4 Legislative and regulatory requirements are identified and complied with throughout planning process
- 2.1 Key features of burn area are identified including variations in terrain, fuel types and quantities, control lines and weather
- 2.2 Risks from the proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environmental and ecological risks
- 2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures
- 2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined
- 2.5 Burn ignition strategies and tactics suited to location that provide required fire behaviour and intensity are determined, in accordance with organisational

procedures

- 2.6 Lighting techniques and patterns for both ground based and/or aerial ignition for specific burn are identified
 - 2.7 Strategies for mitigating hazards and risks are identified and preparatory works are planned
 - 2.8 Strategies and tactics for controlling prescribed burn are identified
 - 2.9 Type and quantity of resources required are identified
 - 2.10 Conditions for implementation of burn ignition strategies and tactics are specified, in accordance with organisational procedures
 - 2.11 Prescribed burn plan is prepared, in accordance with organisational procedures
 - 2.12 Contingencies are outlined in prescribed burn plan
- 3 Gain prescribed burn plan approval**
- 3.1 Prescribed burn plan is submitted for approval, in accordance with legislative and organisational requirements
 - 3.2 Modifications and amendments to prescribed burn plan are made, based on feedback received
 - 3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

complex prescribed burn plans must include

- approved plan for conduct of prescribed burning
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset, biodiversity and community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

target consultation groups must include one or more of the following

- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- other groups and people within the prescribing organisation
- people that may be affected by burn

burn ignition strategies and tactics must include

- contingency planning
- fire behaviour to be achieved
- ignition methods, sequencing and timing of ignition

lighting techniques for ground and aerial ignition must include three or more of the following

- hand held drip torch
- aerial drip torch
- aerial incendiaries
- hand held propelled incendiaries
- vehicle mounted propelled incendiaries
- vehicle mounted incendiaries
- wind and/or water proof matches

lighting patterns must include two or more of the following

- backing fire ignition
- spot or grid ignition
- strip ignition
- flank fire ignition

operational hazards must include two or more of the following

- adjoining land use and proximity to urban areas
- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- high fuel loads
- ignition method
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following

- impact of smoke on vulnerable communities near the burn area
- safety of any people permanently or temporarily in burn area
- safety of people involved with burn implementation
- safety of people on areas adjacent to burn area

property and assets must include two or more of the following

- any of the following that are in or near the burn area
 - camps or recreational areas
 - commercial land use such as crops or industry
 - cultural sites or historical buildings
 - other property and assets
 - plantations
 - research plots and reference areas
 - stock
 - urban areas
 - utilities - power and telephone lines, water supply structures and communications towers

environmental and ecological risks must include

- impact of native flora and fauna including rare and endangered species
- impact of smoke
- impact of soil
- impact of use of chemical fire suppressants
- impact on water quality or supply

resources required must include one or more of the following

- aircraft and crews including incendiary operations supervisors and machine operators for aerial ignition
- aircraft ground support
- control line standards
- crews and supervisors for ground ignition, control and patrol work
- equipment and supplies including fuel and incendiaries
- planning and logistical support
- pre-burn work schedule
- tankers, other ignition and suppression vehicles, equipment and fuel

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR513 Develop complex prescribed burn plans.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUA FIR515 Develop complex prescribed burn plans

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risks mitigation and safe work practices
- assessing characteristics of multiple fuel types, terrain and weather
- developing a pre-burn work schedule
- developing contingency arrangements
- documenting complex prescribed burn plans including objectives
- gaining complex prescribed burn approval
- identifying actions to minimise impacts of complex prescribed burn preparation
- identifying resources
- identifying, assessing and mitigating operational hazards and risks including to people, property, assets, ecology and environment
- identifying, liaising and consulting with target consultation groups
- interpreting maps of area and identifying key features
- predicting fire behaviour and intensity in burn area
- preparing maps for complex burn operational use
- preparing plans for complex prescribed burns including developing lighting techniques and patterns for ground and/or aerial ignition, tactics involving multiple fuel types, ignition strategies, burn objectives, strategies and tactics to meet objectives and timelines for planning and conduct of burn
- recommending actions and communicating them
- responding to feedback and adjusting plans for approval

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- accumulated fuels
- burn feasibility
- characteristics of complex prescribed burn including medium to large areas, moderate to high risk, range of fire intensity, significant potential impact on assets and variety of fuels and terrain
- complex prescribed burning ignition and suppression strategies including ignition patterns and sequences for ground and aerial
- contingency arrangements
- control line suitability
- effects of fire on people, property, assets, ecology and environment
- fire prediction tools
- fuel sampling techniques
- legislative, regulatory, organisational and permit requirements
- organisational documentation, policies and procedures including pre-burn procedures
- planned burn hazards and risks
- resource capabilities
- smoke modelling
- traffic management
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- written and verbal notification requirements

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including

- area requiring application of fire under prescribed conditions
- existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to conduct an initial assessment on receipt of a call, when enroute and/or at the incident and to then take action to maintain public safety, preserve scene and record details and information on arrival at the scene of an accident or incident.

The unit is applicable personnel who are the first to arrive at the scene of an accident or incident. It applies to public safety personnel at an incident who need to understand the importance of maintaining the legal integrity of a scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Secure and preserve scene 1.1 Participation in initial assessment when enroute and at

the incident is undertaken to identify factors which will impact on public safety and scene preservation

- | | |
|--|--|
| 2 Record and report details of incident scene | <p>1.2 Incident and/or accident site is secured to preserve the scene, identify evidence and area of origin and to maintain public safety, in accordance with legislative requirements</p> <p>2.1 Details of the scene are noted, recorded and reported, in accordance with organisational policies and procedures</p> <p>2.2 Witness details and information volunteered is recorded, in accordance with organisational and legislative requirements</p> <p>2.3 Information is communicated to relevant personnel, in line with organisation's procedures</p> |
|--|--|

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

types of incident scene must include one or more of the following

- aircraft
- animal incident
- crime scene
- explosions
- hazardous materials
- incident involving death or injury to person or damage to property
- industrial/mining accident
- marine
- natural disaster
- search for missing persons or evidence
- structure fire
- train
- urban scene
- vehicle accident
- vehicle fire

- wildfire

Unit Mapping Information

This unit replaces and is equivalent to PUALAW001B Protect and preserve incident scene.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying questioning skills to gain accurate information
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information and liaising with all stakeholders
- conducting assessment enroute and at the incident scene
- implementing organisational policies and procedures
- observing scene and surrounding environment
- recording and reporting details of incident scene in accordance with organisational requirements
- securing and preserving scene, evidence and area or origin
- securing scene including removing non-emergency personnel from scene, isolating scene and erecting barriers
- taking notes accurately

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- factors impacting on public safety and scene preservation including those that could impact on safety of investigators, response team, security and/or preservation of actual site, security and preservation of situational evidence and traffic
- factors that may impact security of scene including topography, climatic conditions, human interference, animal interference, preservation of life/property, structural integrity and availability of personnel
- methods of securing scene
- organisational and legislative requirements
- organisational documentation, policies and procedures
- organisational procedures relative to scene preservation, collecting information and taking

witness details

- tactical factors affecting quality of investigation including environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services and boundaries
- types of incident scenes
- witness details including name, contact details and other details are recorded, in accordance with organisational policies, procedures and legislative requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUALAW002 Conduct initial investigation at incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to gather and collate information including obvious and accessible physical evidence from the scene of an incident and identifying potential witnesses. It does not cover the specialist skills required to interpret the evidence gathered or the specialist skills required to gather specific evidence.

The unit applies to non-specialist personnel who have been tasked with the collection of information and evidence that is obvious at an incident scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Conduct initial assessment 1.1 of scene

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

Scene is assessed with regards to Work, Health and Safety (WHS)/Occupational Health and Safety (OHS)

and all actions are undertaken, in accordance with organisation policies, procedures, guidelines and duty of care requirements

- 1.2** Communication is established with the senior investigating officer and liaison is maintained throughout the investigation
 - 1.3** Circumstances surrounding the scene are ascertained from visual assessment and reports from other personnel
 - 1.4** Scene boundary is defined or redefined, as required, to preserve physical evidence for collection
 - 1.5** Obvious and accessible physical evidence is located and, where appropriate, protected from possible contamination
- 2 Control integrity of scene**
- 2.1** Appropriate arrangements for scene access and egress are established and maintained
 - 2.2** Non-essential persons are removed from the scene and details are recorded accurately, in accordance with organisation and regulatory procedures
 - 2.3** Additional resources are identified and accessed to secure incident scene
 - 2.4** Health and safety needs of personnel and public involved in incident are identified and attended to
- 3 Examine scene**
- 3.1** Appropriate search pattern is instigated, in accordance with organisational procedures, and instructions from senior investigating officer to ensure all evidence is located and preserved
 - 3.2** Details of the scene are recorded comprehensively and accurately, in accordance with organisational operating procedures
 - 3.3** Evidence is located, collected, packaged, labelled and stored, in accordance with organisational procedures, to ensure preservation for further post scene examination
 - 3.4** An accurate log of all evidence is maintained, in accordance with organisational procedures
 - 3.5** Scenes are assessed for future investigative requirements and appropriate personnel are notified

4 Identify potential witnesses and initial statements recorded

- 4.1** Bystanders are canvassed to identify potential witnesses
- 4.2** Details of potential witnesses are recorded, in accordance with organisational procedures
- 4.3** Recording practices are used, in accordance with legislative and regulatory requirements and organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

- incident scene must include at least two of the following
- accident or incident involving death or injury to person or damage to property
 - crime scene
 - industrial or mining accidents and incidents
 - natural disaster
 - structural fire
 - vehicle accident
 - vehicle fire
 - wildfire

Unit Mapping Information

This unit replaces and is equivalent to PUALAW002B Conduct initial investigation at incident scene.

Links

Assessment Requirements for PUALAW002 Conduct initial investigation at incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information and liaising with stakeholders
- conducting initial assessment of scene and identifying and mitigating onsite hazards
- controlling integrity of scene and evidence
- examining scene thoroughly
- gathering physical evidence
- identifying potential witnesses and recording initial statements
- implementing legislative requirements and organisational policies and procedures
- implementing methodical and systematic approach
- making arrangements to protect integrity of evidence
- reassuring bystanders including listening and questioning them
- recording and compiling interviews and statements accurately
- recording and reporting details of incident scene in accordance with organisational requirements
- taking notes accurately
- working with a variety of professionals

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- additional resources to support initial investigation
- arrangements for protecting integrity of evidence
- circumstance initiating need for specialised investigations
- circumstances surrounding scene including sequence of events, possible causes, people and property involved, victims, suspects and witnesses, damage, injury, organisational personnel,

- other organisations and agencies, status of investigation and action taken to date
- details that may be relevant to the investigation
- factors impacting incident scene including prevailing weather, additional resources to preserve and protect incident scene, environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services, boundaries and other organisations and/or agencies
- factors impacting security of an incident scene
- features and use of a variety of specialised equipment
- functions and roles of other professionals and experts
- identification, collection and recording of evidence
- incident scene protection and preservation
- indicators of emotional distress
- methods of evidence collection
- methods of packaging
- organisational documentation policies and procedures
- public safety risk factors including factors at incident scene that could impact on safety of investigators and security or preservation of actual site and security and preservation of situational evidence
- scene access and egress
- types of physical evidence including shoe impressions, tyre prints, skid marks, fingerprints, containers, fibres, flammable and combustible liquids, tool marks, bloodstains, identifying numbers, bodily fluids and burn patterns
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and duty of care at incident scene

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed either indoors or outdoors in a rural or urban environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and

equipment used in industry

- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOPE013 Operate communications systems and equipment

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

The unit is applicable to personnel who are required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This may occur either in the field or from a facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Use communications systems and equipment

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Communications equipment and techniques, including verbal transmissions and voice procedures, are selected to best meet the task, context and needs of the situation
- 1.2** Equipment is operated safely to support communications

- consistent with organisational policies and procedures
- 1.3** Communications system is correctly utilised to facilitate transmission and reception
- 2 Transmit and receive communications**
- 2.1** Information is transmitted concisely and clearly to facilitate accurate reception of the message, in accordance with organisational policies and procedures
- 2.2** Contact is acknowledged, communication is confirmed, and action is initiated
- 2.3** Communication faults and deficiencies are reported, in accordance with organisational policies and procedures
- 2.4** Alternative communications strategies are employed, in accordance with organisational procedures, to address identified faults and deficiencies in communication
- 2.5** Communication is processed and recorded, in accordance with organisational policies and procedures
- 3 Maintain communications equipment**
- 3.1** Communications equipment is inspected to ensure operational readiness
- 3.2** Fault finding techniques are applied and basic maintenance is conducted, in accordance with organisational policies and procedures
- 3.3** Faulty equipment is identified and noted for repair and documentation is completed, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

organisation's communications equipment must include

- radio
- telephone

Assessment Requirements for PUAOPE013 Operate communications systems and equipment

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- following organisational protocols, policies and procedures
- maintaining communications equipment
- making verbal transmissions
- operating a range of different communications equipment
- reporting communication faults and deficiencies
- transmitting and receiving communications using the organisation's communications systems and equipment
- using communications systems and equipment under non-operational and operational conditions
- using verbal communication procedures
- using voice techniques

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- organisational documentation, policies and procedures
- range of communications equipment available
- types of and use of communications systems including organisational networks and hardware
- verbal transmission procedures
- voice techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAOPE014 Navigate to an incident

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to navigate to an incident in urban and rural environments.

The unit is applicable to personnel who are required to make decisions about the most appropriate route to an incident. This involves determining the current location of personnel, destination and resources required, planning the route, navigating to the destination and completing any post navigating activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Determine current location, destination and resources

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Incident and task information is obtained, in accordance with organisational procedures
- 1.2** Navigational maps and equipment are gathered and

- checked
- 1.3** Positional information and navigation techniques are applied to plot positions on a map and to determine current location and destination within accepted tolerances
- 2 Plan a safe route**
- 2.1** Navigation plans are prepared, in accordance with organisational procedures and practices
 - 2.2** Maps, navigation techniques, map features, local and environmental conditions are interpreted to plan a safe and timely route to incident
 - 2.3** Potential access restrictions which may limit thoroughfare are identified and arrangements are made to gain access, in accordance with organisational policies, procedures and regulatory requirements
- 3 Navigate to destination**
- 3.1** Navigation plans and aids are used to follow planned route
 - 3.2** Indicated route is communicated and followed, as required
 - 3.3** Current location is regularly verified within accepted tolerances
 - 3.4** Route is modified to address prevailing conditions and, if required, alternate route strategies are initiated
 - 3.5** Unanticipated access difficulties are reported, in accordance with organisational policies and procedures
 - 3.6** En-route and arrival reporting information is communicated, in accordance with organisational policies and procedures
- 4 Complete post navigational activities**
- 4.1** Reporting requirements are completed, in accordance with organisational policies and procedures
 - 4.2** Navigational equipment and aids are recovered, reset, updated, serviced and stored, in accordance with operational procedures and manufacturers' specifications

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for PUAOPE014 Navigate to an incident

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- collecting incident and task information
- demonstrating navigation to an incident in urban and/or rural locations
- determining current location, destination and resources
- following organisational policies and procedures
- identifying natural and cultural features for transport modes
- maintaining and completing organisational documentation
- meeting reporting requirements
- planning a safe route
- reacting to changes in operating environment that requires replanning of route
- recovering and making operationally ready navigational equipment
- reporting using communication systems, methods and techniques
- using maps and navigation aids

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- areas requiring permission and/or authorisation to enter
- communication systems, methods and techniques
- different tasks individual personnel should be given
- environmental conditions that might be encountered whilst navigating
- grid and/or magnetic conversion
- map types and their features
- methods of communicating locations and routes
- methods of determining current location
- navigational equipment characteristics and liabilities

- organisational documentation, policies and procedures including roles and responsibilities
- reporting requirements
- route planning techniques, calculations and accepted tolerances
- types of incidents the organisation responds to
- types of navigation techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAOPE016 Manage a multi-team sector

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage a multi-team response at an incident which may be time critical and/or potentially threatening to life, property or the environment.

An individual performing in this role has the title of Sector or Division Commander and/or Level 1 Operations Officer and is delegated responsibility by either the Incident Controller or Operations Officer. The individual is responsible for managing a sector or division at an incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

One of the following

PUAFIR302 Suppress urban fire

PUAFIR303 Suppress wildfire.

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct assessment of incident

- 1.1 Initial briefing is obtained, in accordance with organisational procedures
- 1.2 Risk assessment of all factors relevant to the sector is conducted
- 1.3 Resources for the incident are identified
- 1.4 Constraints which may impede the response are identified
- 1.5 Initial response options are identified and assessed

2 Take command of sector

- 2.1 Command of all sector personnel is established and maintained, in accordance with organisational policies and procedures
- 2.2 Communications systems are used, in accordance with organisational policies and procedures
- 2.3 Reporting processes are activated, in accordance with organisational policies and procedures, to provide continuous monitoring and evaluation of incident

3 Implement operations portion of IAP

- 3.1 Incident Action Plan (IAP) is communicated to teams, in accordance with organisational procedures
- 3.2 Resources are deployed within area of operations to ensure portion of the IAP is implemented, in accordance with organisational procedures
- 3.3 Operations are conducted and monitored, in accordance with the IAP
- 3.4 Operational reports are issued, in accordance with organisational policies and procedures
- 3.5 Operations are modified, as required, to suit the situation

4 Manage and monitor sector operations

- 4.1 Sector is managed, in accordance with organisational policies and procedures
- 4.2 Safe work practices and health and welfare procedures

and arrangements are implemented and monitored

- 4.3 Strategies are implemented, and tactics are determined, in accordance with the IAP
 - 4.4 Team leaders are briefed on Incident Controller's intent and are tasked, in accordance with the IAP
 - 4.5 Specific tasks are reviewed and modified, as required
 - 4.6 Regular exchange of information is maintained within the chain of command on incident situation, progress, achievement of incident objectives and identified risks
 - 4.7 Unexpected situations that require a quick and decisive response are recognised and responded to in accordance with the Incident Controller's intent
 - 4.8 Situation reports are provided through the chain of command on required modification to the IAP, including additional resources required, surplus resources and hazards present
 - 4.9 Need for logistical support is identified and communicated through the chain of command
 - 4.10 IAP activities are coordinated with adjacent sectors
- 5 Manage post incident operations**
- 5.1 Resources are accounted for and demobilised, in accordance with organisational requirements
 - 5.2 Post operational documentation is completed, in accordance with organisational procedures
 - 5.3 Sector debriefing is conducted, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOPE016A Manage a multi-team sector.

Links

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAOPE016 Manage a multi-team sector

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing information and support the chain of command
- adapting tactics
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing effectiveness of strategies and tactics on sector or division
- briefing and debriefing personnel
- completing documentation
- conducting an assessment of the area of operation
- deploying and managing human and physical resources
- establishing command of sector or division
- following organisational policies and procedures
- identifying and assessing risks
- implementing operations portion of the incident action plan
- leading teams
- maintaining shared situational awareness
- making decisions, negotiating and resolving conflict
- managing and monitoring sector or division operations
- managing post incident operations including demobilisation arrangements
- providing reports through the chain of command
- using communications systems.

Knowledge Evidence

- Australasian Inter-service Incident Management System (AIIMS) structure
- constraints on actions that may limit available options
- equipment and personnel capabilities for incident type

- human and physical resources available for the incident
- incident action plan objectives, strategies and tactics including Incident Controller's intent
- incident site layouts
- initial response options
- organisational command structure
- organisational policies, procedures and documentation for managing operations
- post operational procedures
- processes for implementing, monitoring, amending and reviewing strategies and tactics
- requirements for reporting and recording
- risk assessment
- types of incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work with others whilst making a positive contribution to the effectiveness and efficiency of a team in a work environment, when under direct supervision. Limited responsibility towards others is required.

The unit applies to personnel working in public safety and is particularly pertinent to new staff in assisting with integration into the team culture of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Team work

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Contribute to team activities

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Roles and responsibilities of team members are recognised

1.2 Contribution is made to identifying team goals and objectives

- 1.3 Work activities are completed to required standards and within stated timeframes, in accordance with organisational policies and procedures
- 1.4 Assistance in the completion of tasks is requested from other team members
- 1.5 Team members are assisted to ensure efficient and safe completion of tasks, in accordance with organisational policies and procedures
- 1.6 Participation by team members is encouraged and acknowledged
- 1.7 Changes in allocated roles and responsibilities are implemented, in accordance with organisational procedures
- 1.8 Team meetings are attended regularly, punctually and are contributed to, in accordance with organisational procedures
- 2 **Share knowledge and information**
 - 2.1 Information related to work is communicated with team members to enable efficient completion of tasks, in accordance with the organisational policies and procedures
 - 2.2 Knowledge and skills are shared between team members
- 3 **Give and receive support to or from team members**
 - 3.1 Feedback or assistance is given to other team members in an appropriate and timely manner
 - 3.2 Team members are supported in achieving organisational goals
 - 3.3 Feedback from other team members is acted upon, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUATEA001B Work in a team.

Assessment Requirements for PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attending and working in a variety of team situations
- completing organisational documentation
- contributing to organisational goals and team activities, team meetings and the achievement of tasks consistent with goals
- displaying interpersonal skills and encouraging team members
- following instructions
- following organisational policies and procedures
- giving and receiving support to and from team members
- identifying work conditions and types of activities to be undertaken
- listening and using a variety of communication skills
- providing appropriate suggestions, feedback and information to team members
- reporting information
- requesting assistance from appropriate personnel
- sharing knowledge and information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- composition of teams including roles and responsibilities of members
- nonoperational and operational communication processes
- organisational documentation, policies and procedures
- organisational goals and activities
- potential work task conditions
- techniques for assisting and supporting others
- techniques for giving and receiving feedback in a constructive manner
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUATEA002 Work autonomously

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work as a member of a team, or as an individual for periods of time without direct supervision, and to mentor and coach either in an operational or nonoperational environment.

The unit applies to personnel working in public safety but is particularly pertinent to new staff seeking to understand and apply organisational expectations and limits with regards to decision making.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Assessment Requirements for PUATEA002 Work autonomously

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accepting work task or activity responsibilities
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing the impact of legal requirements on activities
- carrying out team leader responsibilities including coaching and mentoring team members
- communicating performance expectations including providing feedback
- completing a range of organisational documentation
- conducting debriefings
- conveying work activity or task instructions and directions
- encouraging and monitoring team members' performance
- following organisational policies and procedures
- identifying and undertaking work activities
- identifying conditions and working area impacts
- implementing team building activities
- maintaining team performance
- offering informal performance counselling
- performing operational and nonoperational activities
- representing and reporting issues to management
- scoping of allocated tasks
- setting goals, identifying tasks, allocating duties, rosters and responsibilities
- setting performance requirements

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- impact of performance issues
- legal requirements and ramifications of team activities
- methods of setting performance expectations and monitoring performance
- organisational documentation, policies and procedures

- possible work areas and conditions
- requirements for documenting team performance and work activities or tasks
- scope of operational and nonoperational activities
- team dynamics
- team members' duties and responsibilities including team leader responsibilities
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including personal safety, safety of others, duty of care responsibilities and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

PUAWHS002 Maintain safety at an incident scene

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to recognise potential health and safety risks and to then act to eliminate or control those risks at incident scenes and to prevent injury to self, other personnel or members of the public.

The unit is applicable to public safety personnel attending an incident scene and links to the individual's duty of care responsibility to maintain personal safety and to be aware of how actions affect the safety of others including team members, other agency/organisational personnel and the public.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

outcomes.

demonstrate achievement of the element.

1 Determine hazards at incident site

- 1.1 Site hazards affecting the safety of self or other personnel are identified, risks are assessed and are communicated with others at the scene
- 1.2 Operational safety procedures are implemented, in accordance with organisational policies and procedures
- 1.3 Duties are undertaken, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

2 Implement hazard controls at incident scene

- 2.1 Hazards are identified, and mitigation procedures are selected, in accordance with organisational procedures
- 2.2 Control measures are applied, reported and recorded, in accordance with organisational policies and procedures
- 2.3 Changes in incident situation or conditions are reported immediately to designated personnel
- 2.4 Hazard controls are monitored and communicated to relevant personnel to ensure continuing effectiveness
- 2.5 Hazard control and risk mitigation measures are implemented with minimum damage to the environment, whilst maintaining safety of self and others
- 2.6 Incident and/or accident scene is secured to preserve the scene and maintain public safety, in accordance with organisational policies and procedures

3 Maintain personal safety

- 3.1 Personal protective clothing and equipment is selected and checked, in accordance with organisational procedures, to ensure it is operational prior to entry into incident situation
- 3.2 Personal protective clothing and equipment appropriate to dealing with the hazard is worn and used, in accordance with organisational procedures and manufacturers' guidelines
- 3.3 Water and food intake, rest breaks and shelter requirements are maintained
- 3.4 Survival techniques and/or strategies are implemented, in accordance with organisational policies, procedures

and guidelines

- 4 Contribute to maintaining safety of other group members**
- 4.1** Impact of own or others' actions on safety is considered and modified, as required
 - 4.2** Contact is maintained with group members, in accordance with organisational procedures
 - 4.3** Signals are correctly used, interpreted, confirmed and acted upon

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOHS002B Maintain safety at an incident scene.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAWHS002 Maintain safety at an incident scene

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating using non-verbal and verbal techniques
- determining hazards and assessing risks at incident site
- following organisational policies and procedures
- implementing hazard controls at incident scene
- maintaining safety at an incident scene including personal safety and contributing to the safety of other group members
- recording information, updating records and completing documentation
- using communication equipment
- using personal protective clothing and equipment
- working with others in a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- awareness of incident hazards and hazard control equipment
- commonly encountered hazards and safety precautions to prevent injury
- concept of risk
- duty of care responsibilities and obligations
- factors that may affect safety at an incident which must require monitoring
- legislation and regulations
- means of relaying warnings to other personnel
- methods of hazard control
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- requirements for reporting
- roles and responsibilities at an incident scene

- safety procedures and hazard equipment to prevent injury
- survival techniques and strategies at an incident
- work environments including incidents and response situations
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
 - that demonstrate competency in maintaining personal safety and the safety of others
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

RIIHAN308F Load and unload plant

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to load and unload plant.

This unit applies to those working in site-based roles.

Prior to performing this activity, skills and knowledge should be developed for the individual plant. This can be achieved through completing the equivalent operator unit or being assisted by someone who has this knowledge. Refer to the Implementation Guide for further details.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

Unit Sector

Coal mining

Extractive

Drilling

Metalliferous mining

Civil infrastructure

Assessment Requirements for RIIHAN308F Load and unload plant

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loading and unloading plant that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- displaying signage and erecting barriers to isolate work site
- calculating volume and weight of loads
- placing and securing loading and unloading aids
- moving plant onto and off trailer or float, halting at designated position
- securing plant to trailer or float
- slackening securing devices and removing in a safe sequence
- stowing loading aids

In the course of the above work, the candidate must also:

- select, check and use required loading tools and equipment
- select and wear personal protective equipment required for work activities
- apply safe work practices and identify and report potential hazards and environmental issues, and assess risks
- apply fault finding techniques
- locate and apply required documentation, policies and procedures
- meet written and verbal reporting requirements and procedures associated with loading and unloading plant
- apply operational safety
- maintain equipment records

Knowledge Evidence

The candidate must demonstrate knowledge of the following when loading and unloading plant:

Key policies, procedures and relevant standards for loading and unloading plant, including those relating to:

- National Standard for high risk work
- site and equipment safety
- techniques and processes for preparing plant for transportation
- environmental requirements
- work health safety
- chain of responsibility for loading and unloading of equipment

Key site information, including:

- understanding of required hand signals
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet

Key factors affecting work activities described in performance evidence above, including

- basic motion and restraint theory related to heavy plant on floats or trailers
- basic centre of gravity and balance theory related to heavy plant on floats or trailers
- types, operation, uses and limitations of load securing equipment

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - plant to load and unload
 - trailer or float
 - signage and barriers
 - loading aids and securing devices
 - personal protective equipment
- be conducted in a safe environment
- be assessed in context of this sector's work environment
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislation and regulation relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided, and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit) and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed.

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant	

	regulation.
--	-------------

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO315E Conduct tractor operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to operate tractors and use attachments.

This unit applies to those working in site- based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for tractor operations	1.1 Access, interpret and apply tractor operations documentation 1.2 Obtain, interpret, clarify and confirm work instructions 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work activities 1.5 Identify, obtain and implement traffic management signage requirements according to standard operating procedures and safe work practices 1.6 Select required tractor equipment and/or attachments for work activities

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.7 Obtain and interpret emergency procedures for tractors, and be prepared for fires, accidents and emergencies</p> <p>1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity</p>
2. Operate tractor in line with established requirements to complete work activity	<p>2.1 Carry out prestart and start-up checks in line with workplace procedures</p> <p>2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures</p> <p>2.3 Drive and operate tractor using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures</p> <p>2.4 Monitor and manage equipment performance using indicators and alarms</p> <p>2.5 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment</p> <p>2.6 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures</p>
3. Select, remove, fit and use attachments for a tractor	<p>3.1 Select attachment for the task</p> <p>3.2 Fit attachment in line with workplace procedures</p> <p>3.3 Test attachment to ensure correct fitting and operation</p> <p>3.4 Use attachment within design limits and in accordance with workplace procedures</p> <p>3.5 Remove, clean and store attachments in designated location in line with workplace procedures</p>
4. Relocate tractor	<p>4.1 Prepare tractor for relocation</p> <p>4.2 Move tractor safely between worksites, observing relevant codes and traffic management requirement</p>
5. Conduct housekeeping activities	<p>5.1 Clear work area and dispose or recycle materials according to workplace procedures</p> <p>5.2 Manage and/or report hazards to maintain a safe working environment</p> <p>5.3 Complete and file or distribute documentation in a manner that complies with workplace practices</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Numeracy	<ul style="list-style-type: none"> Uses equipment operating capacity schedule to confirm safe weight load limits

Unit Mapping Information

Assessment Requirements for RIIMPO315E Conduct tractor operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of tractor operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to site conditions
- completing a variety of tractor operations during the two occasions, selected from the following:
 - post hole digging
 - spraying of herbicides/fertilisers
 - mowing/slashing
 - lifting
 - sweeping
 - blade based functions
- fitting, using and removing at least two different attachments (i.e. minimum of one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
 - a front blade
 - forklift
 - slasher
 - mower
 - auger
 - drag broom
 - power broom
 - loading platform

- rotary hoe
- concrete mixer
- spraying equipment
- disc plough
- parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply tractor and attachment operating techniques
- clean and store attachments
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for tractor operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- civil construction terminology
- traffic control responsibilities and authorities
- project quality requirements
- apply operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
-

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - a tractor
 - attachments
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO317F Conduct roller operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 3.3.

Application

This unit describes the skills and knowledge required to operate a roller to compact material.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare roller operations	1.1 Access, interpret and apply roller operations documentation 1.2 Obtain, interpret, clarify and confirm work requirements 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	activities 1.5 Identify, obtain and implement traffic management signage requirements according to standard operating procedures and safe work practices 1.6 Select required roller equipment and confirm suitability for work activities 1.7 Obtain and interpret emergency procedures for rollers, and be prepared for fires, accidents and emergencies 1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity
2. Operate roller in line with established requirements to complete work activity	2.1 Carry out prestart and start-up checks in line with workplace procedures 2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures 2.3 Drive and operate roller using techniques suited to equipment capabilities, site and work conditions, and according workplace procedures 2.4 Perform work activity within the operating capacity of the equipment 2.5 Adjust accessories in line with workplace procedures 2.6 Engage and disengage the compacting device 2.7 Identify, remove or manage contaminants in a safe manner incorporating safe work practices 2.8 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment 2.9 Monitor and manage equipment performance using indicators and alarms 2.10 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
3. Prepare to relocate the roller	3.1 Prepare the roller for relocation 3.2 Move the machine safely within and/or between work areas, observing relevant codes and traffic management requirements 3.3 Assist loading and unloading machine from float/trailer as required by workplace procedures

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Conduct housekeeping activities	4.1 Clear work area and dispose or recycle materials according to workplace procedures 4.2 Manage and/or report hazards to maintain a safe working environment 4.3 Complete and file or distribute documentation in a manner that complies with workplace practices

Foundation Skills

Assessment Requirements for RIIMPO317F Conduct roller operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 3.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of roller operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations using at least two different material types and include the mandatory tasks of:
 - compacting materials to pattern and density
 - sealing and finishing
 - adjusting at least two of the following:
 - interchangeable drums
 - spray bars
 - scraper bars
 - wheel/drum brooms
 - drag brooms
 - blades
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures

- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply operating techniques for levelling and compacting
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for roller operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- operational, maintenance and basic diagnostics
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations

- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - roller
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Assessment Requirements for RIIMPO318F Conduct civil construction skid steer loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 5.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types (i.e. one different material per occasion) including:
 - stripping/spreading materials
 - backfilling
 - excavations
 - mixing materials
- selecting, fitting, testing, using and removing attachments on at least two occasions (i.e. one attachment per occasion), the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
 - multipurpose bucket
 - forks
 - dozer blade
 - backhoe
 - auger
 - chain digger
 - power broom
 - profiler

- tiller/mixer
- rotary hoe
- hammer
- asphalt cutter/saw
- concrete cutter/saw
- rake
- assisting with loading and unloading skid steer loader from float/trailer
- safely parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operations, including those relating to:

- isolation requirements for skid steer loader
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment

- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - a skid steer loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment

- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO319E Conduct backhoe/loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	This version was released with RII Resources and Infrastructure Industry Training Package Version 7.1. Editorial amendments to Performance Evidence to clarify task requirements.

Application

This unit describes the skills and knowledge required to operate a backhoe/loader to load, distribute and place materials.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for backhoe/loader operations	1.1 Access, interpret and apply backhoe/loader operations documentation 1.2 Obtain, interpret, clarify and confirm work instructions 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	activities 1.5 Identify, obtain and implement signage traffic management requirements according to standard operating procedures and safe work practices 1.6 Select required backhoe/loader equipment and confirm suitability for work activities 1.7 Obtain and interpret emergency procedures for backhoe/loaders, and be prepared for fires, accidents and emergencies 1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity
2. Operate backhoe/loader in line with established requirements	2.1 Carry out prestart and start-up checks in line with workplace procedures 2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures 2.3 Drive and operate machine using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures 2.4 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment 2.5 Monitor and manage equipment performance using indicators and alarms
3. Load, carry and place materials to complete work activity	3.1 Establish weight of load and ensure it is within safe operational limits of the machine 3.2 Use lifting gear within safe working load requirements and in line with workplace procedures 3.3 Position and locate machinery to ensure stable and effective shift materials according to work requirements 3.4 Shift materials safely and effectively, using hand, audible and communication signal, in line with workplace procedures 3.5 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
4. Select, remove, fit and attachments for a backhoe/loader	4.1 Select attachment for the task and fit attachment in line with workplace procedures 4.2 Test attachment and ensure correct fitting and operation

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.3 Use attachment within design limits and in accordance with workplace procedures 4.4 Remove, clean and store attachments in designated location in line with workplace procedures
5. Relocate the backhoe/ loader	5.1 Prepare backhoe/loader for relocation 5.2 Move backhoe/loader safely between worksites, observing relevant codes and traffic management requirements
6. Conduct housekeeping activities	6.1 Clear work area and dispose of or recycle materials according to workplace procedures 6.2 Manage and/or report hazards to maintain a safe working environment 6.3 Complete and file or distribute documentation in a manner that complies with workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Assessment Requirements for RIIMPO319E Conduct backhoe/loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	This version was released with RII Resources and Infrastructure Industry Training Package Version 7.1. Editorial amendments to Performance Evidence to clarify task requirements.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loader/backhoe operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types (i.e. one different material type per occasion) including:
 - mixing materials
 - stripping/spreading materials
 - trench excavation
 - backfilling
 - lifting and carry materials
 - loading dump trucks, wagons, hoppers or chutes
 - cutting/boxing
- selecting, fitting, testing, using and removing at least two attachments (i.e. one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
 - extending devices
 - tilt bucket
 - buckets

- compaction wheel
- ripper
- plate compactor
- rock breaker
- auger
- broom
- mower/slasher
- forklift
- 4 in 1 bucket and free/rock grab
- parking and securing of equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- work safely around other machines and personnel
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for backhoe/loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities

- project quality requirements
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - backhoe/loader
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided

- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO320F Conduct civil construction excavator operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial corrections to performance evidence.
Release 4	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 5.3.

Application

This unit describes the skills and knowledge required to operate excavator operations to lift carry and place materials.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

Assessment Requirements for RIIMPO320F Conduct civil construction excavator operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial corrections to performance evidence.
Release 4	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 5.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of excavator operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to site conditions
- completing operations to specification using at least two different material types and activities including:
 - loading, cutting/boxing
 - stripping/spreading
 - lifting and carry materials
 - bulk excavation
 - mixing/backfilling
 - trench excavation
 - stockpiling
 - battering
 - benching
 - site clean up

- selecting, fitting, testing, using and removing at least three attachments, the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
 - tilt bucket
 - buckets
 - lifting device
 - vibrating compaction wheel
 - ripper/tyne
 - compaction plate
 - compaction wheel
 - rock breaker
 - auger
 - ground engaging tools
- assisting with loading and unloading plant type from float/trailer
- parking and securing equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- select and use the required tools and equipment
- apply methods of changing machine attachments

- manage changes in the loads centre of gravity during transportation
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for excavator operations, including those relating to:

- isolation requirements

- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - excavator
 - attachments
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being	

	assessed and, where no industry standard is specified, should comply with any relevant regulation.

RIIMPO321F Conduct civil construction wheeled front end loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Application

This unit describes the skills and knowledge required to conduct wheeled front end loader operations.

This unit applies to those working in site- based roles.

Where equipment being assessed requires the fitting and removal of attachments to be demonstrated an integrated tool carrier unit should be used.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

- establish weight of load
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for front end loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - wheeled front end loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO322E Conduct civil construction tracked front end loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Application

This unit describes the skills and knowledge required to operate a tracked front end loader to shift loads.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for tracked front end loader operations	1.1 Access, interpret and apply tracked front end loader operations documentation and ensure the work activity is compliant 1.2 Obtain, interpret, clarify and confirm work instructions

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies</p> <p>1.4 Select and wear personal protective equipment required for work activities</p> <p>1.5 Identify, obtain and implement traffic management signage requirements</p> <p>1.6 Select required tracked front end loader equipment and/or attachments and confirm suitability for work activities</p> <p>1.7 Obtain and interpret emergency procedures for tracked front end loaders, and be prepared for fires, accidents and emergencies</p> <p>1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity</p>
2. Operate front end loader in line with established requirements	<p>2.1 Carry out prestart and start-up checks in line with workplace procedures</p> <p>2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures</p> <p>2.3 Drive and operate front end loader using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures</p> <p>2.4 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment</p> <p>2.5 Monitor and manage equipment performance using indicators and alarms</p>
3. Attach, secure, lift, carry and place	<p>3.1 Establish weight of load and ensure it is within safe operational limits of the machine</p> <p>3.2 Use lifting gear within safe work load requirements and in line with workplace procedures</p> <p>3.3 Position machinery to ensure stable effective shift materials of according to work requirements</p> <p>3.4 Shift load safely and effectively using hand, audible and communication signals, in line with workplace procedures</p> <p>3.5 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures</p>
4. Relocate the front	4.1 Prepare front end loader for relocation

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
end loader	4.2 Move front end loader safely between work sites, observing relevant codes and traffic management requirements 4.3 Assist loading and unloading machine from float/trailer as required by workplace procedures
5. Conduct housekeeping activities	5.1 Clear work area and dispose or recycle materials according to workplace procedures in accordance with project environmental management plan 5.2 Manage and/or report hazards to maintain a safe working environment 5.3 Complete and file or distribute documentation in a manner that complies with workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation, legislation and regulations

Assessment Requirements for RIIMPO322E Conduct civil construction tracked front end loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of tracked front end loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types including:
 - mixing materials
 - stripping/spreading materials
 - loading
 - cutting/boxing
 - backfilling
 - lifting and carry materials
 - site clean-up
- select and wear personal protective equipment required for work activities
- parking and securing of equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- carry out vehicle refuelling requirements and procedures where applicable

- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- apply levelling techniques
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for tracked front end loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - tracked front end loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Assessment Requirements for RIIMPO323E Conduct civil construction dozer operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial corrections to performance evidence.
Release 4	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of dozer operations that safely, effectively and efficiently follows workplace procedures to carry out work activity, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification in at least two different material types on at least three occasions including:
 - stripping/spreading materials
 - cut and fill
 - battering
 - stockpiling
 - bulk excavation
 - cutting drains
 - benching
 - backfilling
 - site clean-up on
- selecting, fitting, testing, using and removing a minimum of two attachments, which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
 - stick rakes

- root rakes
- push blade
- angle blade
- bull blade
- power angle tilt blade
- rippers, winch
- tree pusher
- cable plough
- stump plough
- power control unit
- cable drum
- ground engaging tools
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- select and use the required tools and equipment
- establish weight of load
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for dozer operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies

- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - dozer
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being	

	assessed and where no industry standard is specified should comply with any relevant regulation.

Assessment Requirements for RIIMPO324F Conduct civil construction grader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Minor change to performance evidence.
Release 4	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of grader operations that safely, effectively and efficiently follows workplace procedures to meet carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types including:
 - cutting and maintaining drains
 - forming/upgrading/maintaining roads
 - mixing/ spreading materials
 - scarifying and ripping
 - cutting and trimming of batters
 - trimming of road sub-grades and pavements
 - site clean-up
 - form and carry a windrow
- selecting, fitting, testing, using and removing at least two attachments, the attachment must be certified and approved in line with workplace procedures
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- establish weight of load
- apply levelling techniques
- apply cut and fill techniques
- conduct towing of equipment/plant where required
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for grader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems and laser levelling equipment

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions

- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - unit plant type
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces

- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIPGP201D Conduct pump operations

Modification History

Release	Comment
1	This unit replaces RIIPGP201A Conduct pump operations
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct pump operations in Metalliferous Mining.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Metalliferous mining

Elements and Performance Criteria

1. Plan and prepare for pumping operations	1.1. Access, interpret and apply pumping operations documentation and ensure the work activity is compliant 1.2. Obtain, read, interpret, clarify and confirm work requirements 1.3. Select and wear personal protective equipment appropriate for the activity 1.4. Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency 1.5. Identify and address potential risks, hazards and environmental issues, and implement control measures 1.6. Conduct equipment pre-start checks
--	--

2. Pump material	2.1. Carry out start-up and shutdown procedures 2.2. Operate equipment within recommended speed, engine capability and limitations 2.3. Monitor equipment performance utilising appropriate indicators 2.4. Complete work according to agreed work plan and outcomes 2.5. Constantly monitor pressure and flow of material
3. Carry out operator maintenance	3.1. Conduct visual inspection and fault finding 3.2. Conduct routine operational servicing to ensure peak performance of equipment 3.3. Clean and maintain equipment 3.4. Complete all required records and documentation accurately and promptly

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIPGP201A Conduct pump operations

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIPGP201D Conduct pump operations

Modification History

Release	Comment
1	This unit replaces RIIPGP201A Conduct pump operations
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable legislation, documentation, policies and procedures
- implements requirements, procedures and techniques for safe, effective pump operations including:
 - selecting and using the required hand and power tools
 - identify and handle hazardous goods
 - maintain, clean and operate equipment
 - identifying potential risks and hazards
- works with others to undertake and complete pump operations that meets all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures
 - communicating to confirm work/plans/specifications
- demonstrates completion of pump operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - performing pump start up procedure
 - pumping material and operating equipment for optimum efficiency
 - monitoring equipment and operations
 - performing pump shutdown procedure
 - applying visual inspection and fault finding techniques

- conducting operational servicing

Knowledge Evidence

The candidate must demonstrate knowledge of pump operations through:

- applying legislative, organisation and site requirements and procedures for:
 - risk assessment and management
 - statutory compliance
 - work health and safety
- maintain, clean and operate equipment
- identifying and handling hazardous goods
- maintaining records
- monitoring operations and conducting fault finding
- identifying site and equipment's safety requirements
- identifying communications equipment
- being prepared for emergency/fire and accidents
- complying with environmental principles
- identifying equipment processes, technical capability and limitations
- applying isolation procedures
- applying operational procedures and checks including material under pressure and mine operational system

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing.
- An assessor must demonstrate the skills and knowledge of this unit through five (5) years of current and continuous work in the Industry sector, with the preceding two (2) years in the field of the unit they are assessing.
- This unit must be assessed in the context of this sector's work environment.
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

RIIV304E Conduct tip truck operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to conduct tip truck operations in the resources and infrastructure industries.

It applies to those working in supervisory and technical specialist roles. They generally work under minimal supervision to undertake a broad range of skilled applications in varied work contexts, using some discretion and judgement in selecting equipment, services or contingency measures.

Licensing, legislative and certification requirements may apply to this unit and can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for tip truck operations	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to conduct tip truck operations 1.3 Identify, obtain and implement signage requirements according to the project traffic management plan 1.4 Select vehicle, tools and equipment required for the work activities 1.5 Check tools and equipment for serviceability and rectify or report faults to relevant personnel 1.6 Identify, confirm and apply environmental protection requirements from the project environmental management plan
2. Conduct tip truck pre-operational checks	2.1 Carry out prestart, start-up, park and shutdown according to workplace procedures 2.2 Check tip truck controls and functions, and ensure any faults are

ELEMENT	PERFORMANCE CRITERIA
	rectified or reported to relevant personnel
3. Operate tip truck	<p>3.1 Identify and manage site operating hazards and risks and apply safe operating techniques according to workplace procedures</p> <p>3.2 Manage engine power, ensure efficiency of truck movements, and minimise strain on the engine, drive line and gears according to manufacturer specifications</p> <p>3.3 Coordinate engine power with gear selection, ensure smooth transition and operation within torque range according to manufacturer specifications</p> <p>3.4 Operate tip truck to work instructions according to workplace procedures</p> <p>3.5 Monitor road and traffic conditions, consider road conditions, traffic flow, distance and load, ensure safety of people, property, equipment, loads and facilities</p> <p>3.6 Halt vehicle smoothly, using the engine retarder, gears and brakes according to manufacturer specifications</p>
4. Load, transport and tip materials	<p>4.1 Position tip truck at load and discharge points with a minimum of manoeuvre</p> <p>4.2 Carry out smooth and controlled tip truck movements including the raising and lowering of the tray according to manufacturer specifications</p> <p>4.3 Ensure weight and distribution of load is assessed for type of material and size of vehicle within vehicle capacity according to manufacturer specifications</p> <p>4.4 Maintain safety and security of load, including load cover requirements, from loading site to discharge site according to manufacturer specifications</p> <p>4.5 Discharge load on slope and/or over face at fill site</p> <p>4.6 Dump and spread material evenly according to workplace procedures</p> <p>4.7 Clear, lower and secure tray before resuming travel</p>
5. Carry out operator maintenance	<p>5.1 Ensure tip truck is safely parked and prepared for operator maintenance and shutdown</p> <p>5.2 Conduct visual and physical inspection and fault finding according to workplace procedures</p> <p>5.3 Remove and replace defective parts according to manufacturer specifications</p> <p>5.4 Carry out scheduled maintenance according to workplace procedures</p> <p>5.5 Process written maintenance records according to workplace procedures</p>
6. Clean up	6.1 Clear work area and dispose of materials according to workplace procedures

ELEMENT	PERFORMANCE CRITERIA
	6.2 Clean, check, maintain and store vehicle, tools and equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation and regulations
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities

Unit Mapping Information

Supersedes and is equivalent to RIIVEH304D Conduct tip truck operations.

Links

Companion Volume implementation guides is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIV304E Conduct tip truck operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- conduct tip truck operations on at least two occasions, including:
 - organising work activities to comply with site standards
 - obtaining and applying signage requirements
 - carrying out log-on, prestart, start-up, park-up and shutdown procedures
 - operating, steering, manoeuvring and positioning tip truck
 - raising and lowering tray smoothly
 - applying load cover
 - discharging load on slope and/or over face
 - dumping and spreading materials
 - halting and parking tip truck
 - carrying out inspections and identifying faults
 - processing written records and reports.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for conducting tip truck operations
- work effectively with others to conduct tip truck operations in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to conduct tip truck operations
- key policies, procedures and documentation required to conduct tip truck operations, including:
 - record, report and handover procedures
 - start up and shutdown procedures
 - safety requirements
 - operational, maintenance and basic diagnostic procedures
 - site isolation and traffic control responsibilities and authorities
 - safety data sheet and materials handling methods
 - vehicle manufacturer specifications and limitations
- tip truck types, characteristics, technical capabilities and limitations
- techniques for reporting faults in vehicles and ancillary equipment
- load quantity calculation techniques
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to conducting tip truck operations
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Maintain stock handling and storage

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Maintain cleanliness of stock handling and storage areas.
- 1.2.Ensure correct environmental conditions for storage of

- areas. perishable and other stock to prevent loss or damage as required.
- 1.3. Remove and dispose of waste to minimise safety risks and environmental impacts.
 - 1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.
 - 2.1. Check incoming stock quantities against order documentation.
 - 2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.
 - 2.3. Record stock delivery, and report discrepancies with orders as required.
 - 2.4. Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.
 - 2.5. Store or display stock promptly in designated location.
 3. Replenish stock levels.
 - 3.1. Rotate, replenish and present stock according to organisational requirements for stock levels.
 - 3.2. Record stock waste or shrinkage according to organisational procedures.
 - 3.3. Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - plain English documents that outline organisational policies and procedures for stock control
 - basic order and delivery documentation and stock labels.
- Numeracy skills to:
- calculate stock levels.
- Planning and organising skills to:
- complete stock control activities in a logical and time efficient sequence.
- Technology skills to:
- use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
 - receive and process incoming stock
 - store retail stock
 - maintain retail stock levels
 - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
 - stock quality is poor
 - stock quantity errors
 - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
 - rotation and replenishment
 - product life cycle
- organisational stock control policies and procedures for:
 - receiving stock from suppliers
 - recording incoming stock
 - recording and reporting stock discrepancies and quality issues
 - recording stock waste and shrinkage
 - stock quality standards
 - unpacking, storage and display of stock
 - damaged or missing stock

- key features of retail products that relate to handling and storage:
 - handling techniques to minimise damage
 - general care
 - optimum storage conditions
 - features of damaged or spoiled stock
 - correct disposal methods
- safe manual handling techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
 - delivery dockets
 - orders
 - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment, clear registers, count money, calculate non cash transactions, and reconcile and record takings.

It applies to individuals working in frontline operational roles in a diverse range retail industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Retail Financials

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Balance and secure takings.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1.Perform register or terminal balance at designated times.
1.2.Separate cash float from takings prior to balancing and secure takings.

- 1.3. Supply change to register or terminal and accurately record.
 - 1.4. Obtain and interpret register or terminal reading or print-out.
 - 1.5. Secure cash and non cash documents according to organisational procedures.
2. Reconcile takings.
- 2.1. Count cash accurately.
 - 2.2. Calculate non cash documents accurately.
 - 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
 - 2.4. Investigate or report discrepancies between register or terminal reading and sum of cash and non cash transactions to relevant personnel.
 - 2.5. Record takings and file records according to organisational procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
 - balance a register or terminal on three occasions with complete accuracy
 - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
 - identify and resolve three different types of balancing discrepancies
 - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - balancing
 - clearance of terminal and transference of tender
 - recording takings
 - consumables required by system
 - security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- organisational policies and procedures for non-cash transactions:
 - credit cards
 - EFTPOS

- vouchers
- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
 - cash handling
 - cash float
 - operation of point-of-sale equipment
 - register or terminal balance
 - security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Links

Companion Volume implementation guides are found in VETNet -

SIRWSLS001 Process product and service data

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to use business technology to maintain and process business to business sales, customer service and related product data.

This unit applies to sales and administrative staff who work under supervision and within established administration policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Sales

Unit Sector

Wholesale

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Follow data processing procedures.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Source and report product and service data using features of business technology and systems.
- 1.2.Store, retrieve and relay data according to business technology and information management systems.
- 1.3.Process product and service data according to organisational

- policies and procedures for confidentiality, security and systems access.
2. Monitor customer sales.
 - 2.1. Monitor product mix for each customer and identify potential add-on sales.
 - 2.2. Access and interpret customer sales figures and identify success of current sales and supply targets.
 - 2.3. Obtain and enter information affecting future forecasts into database in an accurate and timely manner.
 - 2.4. Use organisational technologies to gather data from the field to expedite sales and provide real time feedback to customers.
 3. Maintain product database.
 - 3.1. Maintain accurate and current details of products and services in product database.
 - 3.2. Collect and correctly process latest data.
 - 3.3. Follow security procedures for access to database.
 - 3.4. Build and maintain data records.
 - 3.5. Identify and resolve data discrepancies and refer complex issues to relevant personnel.
 - 3.6. Collect product or service information for reporting purposes, using appropriate technology.
 - 3.7. Generate accurate and complete reports in line with business requirements.
 4. Determine customer needs from data.
 - 4.1. Establish volume of products purchased by individual customers and use data to anticipate future requirements and preferences.
 - 4.2. Provide timely and accurate reports to customers that can enhance decision-making on provision of products and services.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRWSLS001 Process product and service data

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- use business technology and systems according to organisational policies and procedures to:
 - establish and report on the sales activity and potential future needs of three different business customers
 - accurately update three different types of information in the business system or product database
 - generate three different types of reports from the business system.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - data processing – input and retrieval
 - data security, storage and privacy
 - databased maintenance
 - sales monitoring
 - system reporting
 - evaluation of product and service performance
 - reporting mechanisms
 - supply and distribution of products or services
 - use and maintenance of customer and sales data
- work health and safety (WHS) requirements for use of office equipment
- different types of product and service data
- different types of customers, and product and services offered
- factors determining customer preferences
- purpose, range and use of sales system reports.

Assessment Conditions

Skills must be demonstrated in a wholesale environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a computerised business sales system and associated documentation, product information and customer records
- organisational policies and procedures for sales system administration.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Develop relationships with customers.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Provide personalised service to customers in a professional manner that promotes repeat business.
- 1.2. Identify repeat business and acknowledge customer return.
- 1.3. Provide tailored recommendations for products and services

- based on known individual customer needs.
2. Generate customer loyalty.
 - 2.1. Convert customers to brand advocates through exemplary customer service.
 - 2.2. Inform customers of benefits associated with promotions and loyalty programs as required.
 - 2.3. Identify trends in customer demands for products and services and communicate with relevant personnel to ensure availability.
 3. Deal with escalated customer complaints.
 - 3.1. Clarify information regarding escalated customer complaints referred from team members.
 - 3.2. Take action to pacify customer maintaining a calm and professional manner.
 - 3.3. Identify source of customer dissatisfaction and seek appropriate solutions in consultation with the customer.
 - 3.4. Ensure the customer is satisfied with solutions and offer compensation in line with level of responsibility.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • interpret plain English documents that outline organisational policies and procedures relevant to customer service.
Initiative and enterprise skills to:	<ul style="list-style-type: none"> • identify and act on opportunities to enhance a customer's experience.

Assessment Requirements for SIRXCEG003 Build customer relationships and loyalty

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information and assistance to four different customers regarding the following to build customer brand loyalty:
 - promotional activities
 - products and services
 - brand or business customer benefits
- identify trends in customer purchasing patterns and make recommendations that enhance customer service and loyalty
- take appropriate action to resolve two escalated customer complaints.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- techniques for:
 - providing personalised extemporaneous customer service
 - anticipating customer preferences, needs and expectations throughout the service experience
 - building customer loyalty
 - resolving escalated customer complaints
 - pacifying dissatisfied customers
- commercial benefits of building customer relationships and loyalty
- industry and organisational:
 - professional service standards
 - attitudes and attributes expected when engaging with customers
 - different customer service needs and expectations
 - types of customer benefits
 - essential features and use of customer databases
- key aspects of Australian consumer and privacy law as relevant to customer interactions.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - industry and organisational:
 - professional service standards
 - attitudes and attributes expected when engaging with customers
 - different customer service needs and expectations
 - types of customer benefits
- current plain English regulatory documents distributed by government regulators for:
 - Australian Consumer Law
 - privacy law
- customers; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Maintain contact with business customers.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Confirm relevant contact personnel for each business or account customer.
- 1.2. Document and maintain currency of contact details.
- 1.3. Participate in, and contribute to, team activities to

- provide services to business customers.
- 1.4. Identify and build external relationships to improve supply chain efficiency.
 - 1.5. Maintain business customer contact according to organisational policies and procedures.
2. Identify business customer needs.
 - 2.1. Confirm the mechanisms to identify business customer needs.
 - 2.2. Consult relevant customer contacts to review their business needs.
 - 2.3. Review current business and promotional activities, and determine future needs for individual customers.
 - 2.4. Outline and confirm trading terms for specific business customers.
 - 2.5. Confirm and apply organisational pricing policies and procedures.
 - 2.6. Process information about business using the latest forecasts of current and future trends.
 3. Improve business customer outcomes and business relationships.
 - 3.1. Report, promote and advocate for the needs of business customers and end consumers within the organisation.
 - 3.2. Identify and use quality assurance and compliance procedures to qualify and quantify business customer needs.
 - 3.3. Identify and discuss ideas about improving sales service and performance with colleagues and customers
 - 3.4. Ensure the standards of quality required to meet business customer service needs and expectations are met.
 - 3.5. Recognise deficiencies in service provided to business customers and rectify to customer satisfaction in line with own level of responsibility.
 - 3.6. Anticipate future needs of business customers and plan and document activities accordingly.
 - 3.7. Provide regular, effective and targeted feedback to business customers regarding services and the value that is provided.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Technology skills to:

- source information about current and future trends.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXCEG005 Maintain business to business relationships

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- build sustainable relationships with two business customers, and for each customer:
 - identify specific needs
 - determine options to meet needs
 - select and use communication strategies suited to the customer
 - confirm trading terms according to organisational policies and procedures.
 - develop and document activities for improved customer outcomes and relationship.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - building relationships with business customers
 - pricing
- factors that impact business to business relationships
- interpersonal communication techniques that facilitate:
 - building sustainable relationships with business customers
 - consultation on needs
 - negotiation
 - presentation
- sources of information on:
 - product and supply arrangements for customers
 - current and future trends
- different types of promotional activities and their features in a business to business context
- factors that impact trading terms:
 - continuous improvement
 - due diligence requirements
 - infrastructure and capital outlay requirements
 - intellectual property and technology rights

- market position
- organisational systems integration and compatibility
- planning cycles and timing
- risk sharing
- supply chain management
- agreed terms and conditions
- key aspects of legislation that impact sales work in a business-to-business context including Australian Consumer Law.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- sources of product information
- organisational policies and procedures for:
 - building relationships with business customers
 - pricing
- forecasts for current and future market trends
- business customers with different requirements; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSL S001 Sell to the retail customer

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Sales

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Establish customer needs.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Connect with the customer within designated response times and establish rapport.
- 1.2. Use questioning and active listening to facilitate effective two-way communication.

- 1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.
- 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.
 - 2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.
 - 2.2. Clearly explain and promote product and service features and benefits where relevant.
 - 2.3. Advise on promotional events where relevant.
 - 2.4. Provide additional information to address customer questions and objections.
 - 2.5. Offer comparisons to competitor product or service range as required.
 - 2.6. Collaborate with the customer to determine product or service option most suited to their needs.
 - 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.
 - 3.1. Select and use appropriate techniques to close sale.
 - 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.
 - 3.3. Farewell customer on leaving, and invite to return.
 - 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - detailed in-house and supplier product information documents
 - plain English documents that outline organisational customer service policy and procedures.
- Numeracy skills to:
- interpret basic fee information from in-house documents and complete basic pricing calculations.
- Problem-solving skills to:
- respond to customer objections and provide appropriate solutions to satisfy customer needs.
- Technology skills to:
- use technologies equipped with search functionality and information systems to source product and service information.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
 - appropriate communication
 - establishment and clarification of customer needs, wants and expectations
 - product and/or service knowledge
 - appropriate sales approach to sell benefits and features of products and/or services
 - overcome objections and close sales
 - upsell and/or cross sell additional products and/or services that complement the sale
 - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
 - cultural diversity
 - special needs
- sales techniques:
 - opening techniques
 - recognising buying signals
 - strategies to focus customer on specific products and services
 - selling add-ons and complementary products
 - overcoming customer objections
 - closing techniques

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
 - professional service standards and protocols for retail industry personnel
 - attitudes and attributes expected by the retail industry to work with customers
 - different customer service needs and expectations
- for the particular retail organisation:
 - product and service knowledge:
 - product and service range offering
 - product specifications, features and benefits
 - designated response times for providing customer service
 - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for:
 - customer service
 - sale of products and services
 - resolving customer complaints
 - collection and storage of customer details
 - organisational product information and price lists
 - supplier brochures, information sheets and price lists
 - promotional activity information
 - current plain English regulatory documents distributed by government regulators for:
 - consumer protection law
 - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes Asks questions in order to clarify understanding, and to provide and seek feedback Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
 - different learning objectives
 - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL311 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL301 Provide work skill instruction.

Application

This unit describes the skills and knowledge required to conduct individual and small group work skill instruction using existing support materials and demonstration of work skills as a training strategy; and assess the success of training and one's own training performance. It focuses on the training being driven by the work process and context.

The unit applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Prepare simple session plan for work skill instruction and demonstration objectives 1.4 Access and review support materials for their suitability and

ELEMENTS	PERFORMANCE CRITERIA
	relevance 1.5 Organise access to physical support material required for instruction and demonstration 1.6 Notify learners of planned work skill instruction
2. Conduct instruction and demonstration	2.1 Interact with learners to establish a safe and comfortable learning environment 2.2 Brief learners on work health and safety (WHS) procedures and requirements prior to, and during, training 2.3 Follow plan for work skill instruction and cover all learning objectives 2.4 Use facilitation techniques to structure, pace and enhance learning, and explain and demonstrate work skills 2.5 Apply coaching techniques to assist learning 2.6 Use communication techniques to provide information, engage and instruct learners and demonstrate work skills 2.7 Monitor professional relationship with learner, and adjust to suit learner needs 2.8 Provide opportunities for learners to practise the work skill
3. Check training performance	3.1 Use observation and questioning to check learner acquisition and use of new skills and knowledge 3.2 Provide feedback on learner performance to support learning 3.3 Monitor learner progress and outcomes in consultation with the learner
4. Review training performance	4.1 Gather feedback from learners on work skill instruction according to organisational procedures 4.2 Reflect on own practice in providing instruction and demonstration, and identify strategies for improvement 4.3 Maintain, store and secure learner records, according to organisational and legal requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Sources and interprets processes and procedures, support materials, and information relevant to providing work instruction

Skill	Description
Writing	<ul style="list-style-type: none"> • Completes required workplace documentation using appropriate language and format
Oral communication	<ul style="list-style-type: none"> • Uses communication techniques to build rapport, monitor progress and provide feedback to learners
Numeracy	<ul style="list-style-type: none"> • Interprets and uses scheduling and sequencing information, and estimates time
Initiative and enterprise	<ul style="list-style-type: none"> • Asks questions to clarify understanding, and to provide and seek feedback • Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches
Planning and organising	<ul style="list-style-type: none"> • Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes
Teamwork	<ul style="list-style-type: none"> • Builds rapport and establishes productive working relationships to achieve learning outcomes

Assessment Requirements for TAEDEL311 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL301 Provide work skill instruction.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- provide at least 3 work skill instruction sessions, with each session being of at least 30 minutes duration and involving:
 - a different work skill for each session
 - delivery of at least 1 session to an individual learner
 - delivery of at least 1 session to a small group of at least 2 learners.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational procedures for gathering feedback from learners on work skill instruction
- learner characteristics and needs
- information included in a plan for work skill instruction:
 - session plan, consisting of:
 - session objectives
 - content to be covered
 - delivery approach to be used
 - task breakdown
 - timing
- sources, availability and content of suitable support materials
- training facilitation and coaching techniques to support adult learning relevant to work skill instruction, and when to use them
- overview of adult learning principles and their application to work skill instruction

- key steps for practising self-reflection on own work skill instruction to identify opportunities for improvement
- sources of assistance relating to contextualising support materials to the workplace
- work health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - WHS policies and procedures, including those relating to:
 - hazard and risk identification
 - safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated vocational education and training environment. Evidence gathered for assessment may include that collected in real time or via a submitted recording.

This includes access to:

- learners requiring work skill instruction
- support materials relating to the work skill instruction sessions described in performance evidence
- access to information about the plan for work skill instruction, including session plan, task breakdown and timing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL411 Facilitate vocational training

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is not equivalent to TAEDEL401 Plan, organise and deliver group-based learning.

Application

This unit describes the skills and knowledge required to plan, prepare for and facilitate the vocational training of both individual learners and groups of learners via a face-to-face, in-person delivery mode. It includes customising and using existing session plans and learning resources, using these plans to facilitate training, and reviewing own practice.

The unit applies to entry-level vocational education and training (VET) teachers and trainers who use training and technical skills to deliver training based on a product that is nationally recognised or aligned with other recognised frameworks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for vocational training	1.1 Identify purpose, target group, learning resources and requirements for training from the training and assessment strategy 1.2 Access nationally recognised units of competency or other

ELEMENTS	PERFORMANCE CRITERIA
	<p>performance benchmarks and identify required standard of performance</p> <p>1.3 Arrange and review delivery plan, session plans and learning resources according to legislative and regulatory requirements</p> <p>1.4 Identify and organise required support for foundation skill and learning needs within scope of own role; and make necessary adjustments and/or access specialist support where required</p> <p>1.5 Identify and assess safety constraints and risks to training in line with work health and safety (WHS) policies and procedures</p>
2. Customise vocational training	<p>2.1 Review information about learner characteristics and needs and their work context to identify customisation needs</p> <p>2.2 Customise session plans and learning resources to suit learners and their context</p> <p>2.3 Record amendments according to organisational procedures</p>
3. Deliver face-to-face vocational training	<p>3.1 Prepare learning environment and check equipment prior to use according to organisational requirements</p> <p>3.2 Facilitate face-to-face training sessions according to session plans</p> <p>3.3 Use training facilitation techniques and activities that support and engage individual learners and groups of learners</p> <p>3.4 Present information to individuals and groups using presentation techniques and aids</p> <p>3.5 Identify and monitor health and safety hazards and risks, and implement and adjust risk controls to address risks during training</p> <p>3.6 Maintain and store training records according to organisational requirements</p>
4. Support individual and group learning	<p>4.1 Monitor and document learner progress according to organisational procedures</p> <p>4.2 Monitor individual and group learning to identify learner difficulties and training challenges</p> <p>4.3 Adapt session plans and adjust training facilitation techniques to respond to diverse learner needs and maintain learner motivation, engagement and commitment</p>
5. Review vocational training practice	<p>5.1 Seek learner feedback according to organisational procedures</p> <p>5.2 Analyse own practice of facilitating training and identify opportunities for improvements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Digital literacy	<ul style="list-style-type: none"> Uses main features and functions of digital tools and electronic applications required in own role to access, organise, analyse, exchange and display information
Reading	<ul style="list-style-type: none"> Accesses, reads and interprets documentation relevant to the learning context, including planning documents, learning materials, policies and procedures relevant to the context
Writing	<ul style="list-style-type: none"> Develops and maintains documentation in response to required needs
Oral communication	<ul style="list-style-type: none"> Uses communication techniques to build rapport and explore requirements Facilitates training in a style appropriate for both individuals and groups
Numeracy	<ul style="list-style-type: none"> Interprets and uses scheduling and sequencing information, and estimates time and risk
Initiative and enterprise	<ul style="list-style-type: none"> Proactively uses strategies to maintain safe, productive and engaging learning environment Is proactive and solutions-focused in responding to learner needs during training delivery
Problem solving	<ul style="list-style-type: none"> Identifies and responds to problems and opportunities for improvement and considers options for different approaches
Self-management	<ul style="list-style-type: none"> Recognises and follows organisational procedures relevant to own role Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes

Unit Mapping Information

Supersedes and is not equivalent to TAEDEL401 Plan, organise and deliver group-based learning.

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>

Assessment Requirements for TAEDEL411 Facilitate vocational training

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is not equivalent to TAEDEL401 Plan, organise and deliver group-based learning.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- facilitate the following face-to-face, in-person, training sessions based on a training product that is nationally recognised or aligned with other recognised frameworks:
 - a series of 3 sequential group training sessions of at least 30 minutes duration each to 1 group of learners, where the group must consist of at least 4 learners
 - 2 different individual training sessions of at least 30 minutes duration each to a learner who is not part of the above group.

In the course of each of the above, the individual must:

- deliver all sessions in their entirety, from start to finish
- facilitate learner acquisition of skills and knowledge and learner independence
- monitor learner engagement and participation
- identify and respond to foundation skill needs.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and vocational education and training (VET) regulatory requirements relating to the facilitation of individual and group-based vocational training based on products that are nationally recognised or aligned with other recognised frameworks
- organisational requirements and procedures for facilitating individual and group-based vocational training, including requirements for:

- using training and assessment strategies
- behaviour management
- record keeping
- risk identification, assessment and control
- learner support
- professional development
- processes for interpreting nationally recognised training products to identify the standard of performance required and:
 - structure, content and application of products relevant to assessing competence, and how they are addressed in assessment tasks and processes
 - requirements of foundation skills: language, literacy, numeracy, digital literacy and employability skills
- dimensions of competency and how they guide training practices
- strategies and processes for identifying and organising foundation skills support for learners, including language, literacy, numeracy, digital literacy and employability skills, including use of current authorised Australian foundation skills frameworks
- learning theories and adult learning principles relevant to the learning cohort, and their application to the facilitation of individual and group-based vocational training
- training practices, methods and techniques for facilitating individual and group-based vocational training and supporting effective learning, including those that are within scope of own role and that:
 - promote learner engagement
 - build safe and inclusive learning environments, including:
 - providing learners with information
 - using appropriate and inclusive language
 - using diverse resources and methods
 - addressing cultural sensitivity, safety and equity
 - reflect learner characteristics, needs and behaviours, including:
 - cultural and social practices
 - mental health and wellness considerations
 - neurodiversity
 - identify and support learners with diverse and additional learning needs, including:
 - behaviours that learners with learner difficulties may exhibit
 - reasons that some learners may require additional support
 - support strategies for different types of difficulty or need
 - provide opportunities to review and reflect on own practice
 - build skills in presenting and in applying presentation aids
- techniques for customising session plans and learning resources to suit learner characteristics and needs
- work health and safety (WHS) responsibilities relating to training, including:
 - common hazards and risks

- risk controls.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated face-to-face vocational education and training environment. Evidence gathered for assessment may include that collected in real time or via a submitted recording that demonstrates both delivery and learner engagement.

This includes access to:

- learners requiring face-to-face, in-person vocational training
- organisational procedures for facilitating individual and group-based vocational training
- training and assessment strategies for the required training
- session plans and learning resources that address the requirements of a training product that is nationally recognised or aligned with other recognised frameworks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL412 Facilitate workplace-based learning

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL402 Plan, organise and facilitate learning in the workplace.

Application

This unit describes the skills and knowledge required to prepare for, plan and facilitate workplace-based learning for learners in the workplace. It includes customising and implementing existing learning plans and resources based on products that are nationally recognised or aligned with other recognised frameworks, and reviewing own practice.

The unit applies to entry-level vocational education and training (VET) teachers and trainers who use facilitation and technical skills to facilitate learning in the workplace based on products that are nationally recognised or aligned with other recognised frameworks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to facilitate workplace-based learning	1.1 Clarify and confirm workplace-based learning objectives and scope 1.2 Analyse position descriptions and work routines to determine that learning objectives can safely be met in the

ELEMENTS	PERFORMANCE CRITERIA
	workplace-based learning 1.3 Establish workplace environment for learning 1.4 Identify personnel to be involved in the workplace-based learning and their job roles and responsibilities.
2. Develop plan for workplace-based learning	2.1 Arrange for integration and monitoring of workplace-based learning activities 2.2 Identify phases and duration for learners' work-based learning 2.3 Identify need for support personnel within work-based learning 2.4 Draft plan for workplace-based learning that meets learning objectives, uses a range of learning opportunities, and outlines required safety arrangements 2.5 Obtain agreement from required personnel to finalise and implement the plan for workplace-based learning
3. Establish the learning relationship	3.1 Conduct initial meeting with learner to commence work-based learning and explain learning objectives and processes 3.2 Discuss and agree planned learning opportunities and activities according to any regulatory requirements 3.3 Select techniques for facilitating learning in the workplace to meet learners' needs and explain intended approach to learners 3.4 Discuss and organise required support for foundation skill and learning needs within scope of own job role; and access specialist support where required 3.5 Monitor supervisory arrangements appropriate to learners' levels of knowledge, skill and experience, provide support and encouragement, and ensure learners' health and safety
4. Implement workplace-based learning	4.1 Prepare learning environment and check equipment prior to use 4.2 Monitor and address work health and safety (WHS) hazards and risks before and during training 4.3 Oversee learning activities in workplace following the sequence of the workplace-based learning plan 4.4 Implement techniques that facilitate learners' application of skills and knowledge to workplace activities
5. Develop the learning relationship	5.1 Observe learner cues and change approaches where necessary to engage learners and maintain momentum 5.2 Encourage learners to take responsibility for learning and to use self-reflection

ELEMENTS	PERFORMANCE CRITERIA
	5.3 Monitor effectiveness of learning relationship through regular interaction
6. Close and evaluate the workplace-based learning	<p>6.1 Use interpersonal and communication techniques to close the learning relationship</p> <p>6.2 Seek feedback from learners and workplace stakeholders on outcomes achieved and value of the learning relationship</p> <p>6.3 Evaluate effectiveness of workplace-based learning against objectives, and the processes and techniques used</p> <p>6.4 Review and reflect on own facilitation of workplace-based learning and identify areas for improvement</p> <p>6.5 Recommend improvements to own workplace-based learning practice based on review process</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Digital literacy	<ul style="list-style-type: none"> • Uses main features and functions of digital tools and electronic applications required in own role to access and exchange information
Reading	<ul style="list-style-type: none"> • Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace
Writing	<ul style="list-style-type: none"> • Maintains documentation relevant to workplace-based learning according to organisational and workplace requirements
Oral communication	<ul style="list-style-type: none"> • Uses oral communication techniques to identify needs, build rapport, agree on learning, facilitate learning and monitor practice • Selects appropriate vocabulary adjusting language, tone and pace to promote effective interactions, and to build learner engagement • Asks questions to clarify understanding, and seeks feedback and further information
Numeracy	<ul style="list-style-type: none"> • Interprets and uses scheduling and sequencing information, and estimates time and risk
Planning and organising	<ul style="list-style-type: none"> • Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes
Problem solving	<ul style="list-style-type: none"> • Identifies and responds to problems and opportunities for improvement, considering options for different approaches

Skill	Description
	<ul style="list-style-type: none"> • Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs
Self-management	<ul style="list-style-type: none"> • Follows organisational protocols, policies and procedures in the management of records • Recognises and responds to contractual and ethical requirements associated with own role
Teamwork	<ul style="list-style-type: none"> • Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm outcomes meet requirements

Unit Mapping Information

Supersedes and is equivalent to TAEDEL402 Plan, organise and facilitate learning in the workplace.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>

Assessment Requirements for TAEDEL412 Facilitate workplace-based learning

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL402 Plan, organise and facilitate learning in the workplace.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop a workplace-based learning plan for at least 3 different learners, with each plan incorporating activities sequenced to ensure safe and effective learning that leads to the required standard of work performance
- facilitate workplace-based learning for at least 1 of the above learners using products that are nationally recognised or aligned with other recognised frameworks on at least 3 different occasions, where each occasion must:
 - be of at least 30 minutes' duration
 - address a different performance outcome from the workplace-based learning plan.

In the course of the above, the individual must:

- demonstrate communication skills to build rapport with the learners
- liaise with required workplace personnel.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- regulatory requirements relating to facilitating learning in the workplace
- organisational procedures relating to facilitating learning in the workplace
- systems for identifying skill development needs in the workplace
- key components of a workplace learning plan, including:
 - learning activities and objectives
 - required safety arrangements

- dimensions of competency and how they guide workplace-based learning practices
- strategies and processes for identifying and organising foundation skills support for learners, including language, literacy, numeracy, digital literacy and employability skills, including use of current authorised Australian foundation skills frameworks
- facilitation techniques appropriate to facilitating learning in the workplace, and strategies for encouraging, including and engaging those who learn in different ways, including:
 - demonstration
 - instruction
 - questioning
 - coaching
 - supervised practice
- strategies and techniques for engaging and liaising with other workplace stakeholders
- types of workplace constraints and distractions and how to manage them
- learning theories and adult learning principles and their application to facilitating learning in the workplace
- strategies and techniques for identifying and supporting workplace-based learners with additional learning needs, including:
 - reasons that some learners may require additional support
 - support strategies for different types of need
- evaluation, review and reflection techniques
- workplace training pathways, including apprenticeships and traineeships
- work health and safety (WHS) responsibilities relating to workplace-based learning, including supervision and support.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated workplace environment. Evidence gathered for assessment may include that collected in real time or via a submitted recording.

This includes access to:

- learners requiring workplace-based learning
- organisational procedures for facilitating workplace-based learning of nationally recognised training products.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL414 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL404 Mentor in the workplace.

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace. It includes the skills and knowledge to plan and prepare for the mentoring, and implement strategies suited to the mentee, the workplace and the mentoring relationship.

The unit applies to workplace supervisors or other work colleagues who work under limited supervision and have responsibility for mentoring individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for mentoring relationship	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Develop and document mentoring plan according to organisational requirements

ELEMENTS	PERFORMANCE CRITERIA
	1.3 Establish ground rules and negotiate realistic expectations with the mentee 1.4 Establish and maintain confidentiality of the mentoring relationship according to legislative requirements and organisational policies and procedures
2. Facilitate mentoring relationship	2.1 Undertake activities intended to develop mentee's confidence and trust in the mentoring relationship 2.2 Share personal experiences and knowledge with mentee according to agreed objectives 2.3 Support mentee to develop and use skills in problem solving and decision making 2.4 Use personal and professional networks to assist the mentee 2.5 Provide information, and guidance to enhance engagement in the workplace 2.6 Use techniques for resolving differences without damaging the mentoring relationship, and obtain assistance according to organisational procedures
3. Monitor mentoring relationship	3.1 Provide planning assistance and guidance as requested by the mentee in a form and style to suit their requirements 3.2 Provide feedback to the mentee on progress towards achieving the expectations and goals of the mentoring process 3.3 Recognise and discuss changes in the mentoring relationship with stakeholders 3.4 Negotiate and manage closure of the mentoring arrangement
4. Review mentoring	4.1 Establish and discuss benefits gained from the mentoring process 4.2 Reflect on and articulate the personal benefits gained from providing mentoring 4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational procedures to improve the mentoring system or program

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
-------	-------------

Skill	Description
Digital literacy	<ul style="list-style-type: none"> • Uses main features and functions of digital tools and electronic applications required in own role to access and exchange information
Reading	<ul style="list-style-type: none"> • Sources and interprets texts relevant to mentoring context, including organisational policies and learner information
Writing	<ul style="list-style-type: none"> • Develops content and documents information relevant to mentoring plan
Oral communication	<ul style="list-style-type: none"> • Uses appropriate communication techniques to: <ul style="list-style-type: none"> • build rapport, trust and engagement • provide guidance and feedback
Problem solving	<ul style="list-style-type: none"> • Identifies and responds to problems, considering options for different approaches
Self-management	<ul style="list-style-type: none"> • Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring
Teamwork	<ul style="list-style-type: none"> • Collaborates with mentee to build rapport and achieve joint outcomes and effective interaction • Provides mentoring and role modelling to achieve agreed outcomes • Cooperates and consults with mentee to clarify understanding and seek feedback

Unit Mapping Information

Supersedes and is equivalent to TAEDEL404 Mentor in the workplace.

Assessment Requirements for TAEDEL414 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL404 Mentor in the workplace.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- negotiate and document an agreed mentoring plan with 1 mentee that sets out clear objectives and a timeframe for the mentoring relationship
- facilitate at least 3 mentoring sessions of at least 30 minutes each with 1 mentee.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures and codes of practice relating to the provision of workplace mentoring, including:
 - equal employment opportunity, equity and diversity responsibilities
 - work health and safety (WHS) responsibilities
- key features of a mentoring plan suited to mentee needs and workplace context
- key methods and strategies for working with a mentee, including:
 - using active listening and open questions to build rapport
 - encouraging self-reflection and confidence
- acceptable behaviour in a mentoring relationship.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated workplace environment. Evidence gathered for assessment may include that collected in real time or via a submitted recording.

This includes access to:

- mentoring plan template
- at least 1 mentee.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES412 Design and develop plans for vocational training

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is not equivalent to TAEDES401 Design and develop learning programs.

Application

This unit describes the skills and knowledge required to design, develop and document plans for vocational training to be delivered by vocational education and training (VET) teachers and trainers. It involves identifying the objectives and intended outcomes of the training and the characteristics of the target learners, selecting nationally recognised training products, developing the plan for training and individual session plans.

The unit applies to individuals who design training for group learning in face-to-face, online and blended vocational training contexts using nationally recognised products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan vocational training	1.1 Identify and collaborate with required stakeholders 1.2 Identify objectives and intended outcomes of the training, intended mode of delivery, and suitable learning environment 1.3 Identify target learners and their characteristics, including

ELEMENTS	PERFORMANCE CRITERIA
	<p>foundation skill and learning needs within scope of own job role</p> <p>1.4 Access specialist support where required according to organisational procedures</p>
2. Design a plan for vocational training	<p>2.1 Access and interpret nationally recognised training products and identify training and assessment requirements</p> <p>2.2 Analyse a unit of competency or skill set, and identify learning components to scaffold</p> <p>2.3 Determine a training sequence for delivery of skills and knowledge to support learner progression</p> <p>2.4 Determine learning activities to support and engage learners in each component</p> <p>2.5 Identify and evaluate suitability of existing learning resources</p> <p>2.6 Estimate duration of training required for each learning component tailored to learner group characteristics</p> <p>2.7 Document overall plan and structure according to legislative and regulatory requirements, organisational procedures and sustainability considerations</p>
3. Develop session plans for vocational training	<p>3.1 Develop session plans that include a range of facilitation techniques to engage learners</p> <p>3.2 Review session plans and ensure required skill and knowledge requirements have been addressed</p> <p>3.3 Document session plans according to organisational policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Digital literacy	<ul style="list-style-type: none"> Uses main features and functions of digital tools and electronic applications required in own role to conduct research, and develop and document session plans
Reading	<ul style="list-style-type: none"> Interprets information, including nationally recognised training products, organisational procedures and learning resources
Writing	<ul style="list-style-type: none"> Uses required format, accurate spelling and grammar, and terminology specific to purpose and audience when documenting session plans

Skill	Description
Initiative and enterprise	<ul style="list-style-type: none">• Designs session plans to support a safe, inclusive and supportive learning experience
Planning and organising	<ul style="list-style-type: none">• Organises work according to specific requirements taking responsibility within scope of own role for decisions regarding design of session plans
Self-management	<ul style="list-style-type: none">• Identifies and responds to different design and development options

Unit Mapping Information

Supersedes and is not equivalent to TAEDES401 Design and develop learning programs.

Assessment Requirements for TAEDES412 Design and develop plans for vocational training

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is not equivalent to TAEDES401 Design and develop learning programs.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design, develop and document plans for group learning that:
 - cover at least 2 entire units of competency from a nationally recognised training package or accredited course
 - detail at least 3 consecutive sessions for each different unit of competency
 - are tailored to target learner group characteristics and identified learner needs, including foundation skills
 - include a range of facilitation techniques and checks for learner understanding, including presentation methods, learning activities, and formative assessment activities.

In the course of the above, the individual must:

- document an overall plan for the group learning for each unit of competency
- document the following in the session plans:
 - learning objectives or outcomes
 - presentation methods
 - learning activities
 - formative assessment activities
 - sequence and timing of activities within a session
 - required resources
 - total duration of sessions

- confirm that requirements of units of competency and their assessment requirements have been fully addressed in the overall plan.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and vocational education and training (VET) regulatory requirements relating to designing and developing plans for vocational training, including:
 - meeting the requirements of nationally recognised training products
 - amount of training to provide to each learner and learner group
 - tailoring the plans to target learner group
- organisational policies and procedures for designing, developing and finalising plans for vocational training, including for consulting with required stakeholders
- purpose and use of National Register of VET (Training.gov.au, or its successor), including to identify changes to nationally recognised training products
- basic instructional design principles relating to designing and developing plans for vocational training
- purposes and key content of plans for vocational training, including logically sequenced learning content that:
 - engages and progresses learners
 - provides a safe and inclusive learning environment
 - covers required skills and knowledge
 - uses resources and that support and engage learners
- key components of training and assessment strategies and how to use them when designing and developing plans for vocational training
- facilitation techniques that support and engage learners and check for learner understanding, including presentation methods, learning activities, and formative assessment activities
- features of different modes of delivery, including face-to-face, online and blended delivery; and how those features are represented in plans for vocational training
- relationship between training and assessment, and implications for designing and developing plans for vocational training
- types of learner characteristics and implications for designing and developing plans for vocational training
- processes for interpreting nationally recognised units of competency to identify the standard of performance required, including for identifying:
 - skill and knowledge requirements in the products, including requirements relating to foundation skills: language, literacy, numeracy, digital literacy and employability skills
 - dimensions of competency and how they guide training practices and planning
- contents of Companion Volume Implementation Guides relating to designing and developing plans for vocational training

- learning theories and adult learning principles relating to designing and developing plans for vocational training
- sustainability matters to consider when designing and developing plans for vocational training.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated vocational education and training environment.

This includes access to:

- nationally recognised training products
- organisational procedures and templates for designing and developing plans for vocational training based on nationally recognised products and described in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA0004 Complete receipt and despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete receipt and despatch documentation in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Analyse order to identify work requirements to fill order

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Order request documentation is interpreted

- 1.2 Ordered goods are noted and workplace locations identified
 - 1.3 Workplace and goods information is used to organise documentation
 - 1.4 Required schedules for order movement are identified and communicated with relevant personnel
 - 1.5 Special aspects of order are identified and information on required documentation procedures and relevant regulatory requirements are identified, accessed and interpreted
- 2 **Follow workplace order documentation processes**
 - 2.1 Workplace procedures for order receipt and despatch documentation are identified
 - 2.2 Complete receipt and despatch documentation in accordance with workplace procedures and regulatory requirements
- 3 **Finalise documentation**
 - 3.1 Order is checked against schedule and order form
 - 3.2 Workplace records are completed and labels and appropriate documentation are attached in accordance with workplace procedures and regulatory requirements
 - 3.3 Special transportation requirements are identified and conveyed to appropriate personnel
 - 3.4 Required documentation for dangerous goods and hazardous materials is completed in accordance with regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3015 Complete receipt/despatch documentation.

Assessment Requirements for TLIA0004 Complete receipt and despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- applying work health and safety (WHS)/occupational health and safety (OHS) procedures
- communicating effectively with others
- completing receipt and despatch documentation
- estimating size, shape and special requirements of goods and loads
- identifying containers and goods coding markings and emergency information panels
- interpreting and following operational instructions, procedures and information
- monitoring work activities in terms of planned schedule
- selecting and using relevant systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation requirements for receiving and despatching goods
- focus of operation of work systems, equipment, management and site operating systems for receiving and despatching goods
- housekeeping standards and procedures
- national and international standards, codes and regulations relevant to completing receipt and despatch documentation including:
 - bond requirements
 - dangerous goods codes
 - legislative requirements
 - quarantine requirements
- receipt and despatch documentation anticipated problems and appropriate actions for resolution
- requirements of loads with special conditions including:
 - controlled substances

- dangerous goods
- hazardous materials
- security requirements
- temperature-controlled goods
- site layout and obstacles
- specifications and standards for checking and inspecting received and despatched goods
- WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for completing receipt and despatch documentation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0015 Organise receival and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise receival and despatch operations in accordance with regulations, codes of practice and workplace requirements in the transport and logistics industry.

It includes planning and organising receival operations, storing received stock, despatching ordered stock and completing documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and organise receival and despatch operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Product characteristics and workplace procedures are applied to stock analysis

1.2 Resources are identified to match product characteristics

- 1.3 Timeframes are scheduled to enable receipt or despatch of stock according to workplace procedures
 - 1.4 Work processes are planned to meet specified timeframes
 - 2 **Organise the storage and despatch of stock**
 - 2.1 Employees, equipment and storage areas are allocated and supervised
 - 2.2 Individuals are informed of work requirements and deadlines
 - 2.3 Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
 - 2.4 Discrepancies in stocks are noted and reported in accordance with workplace procedures
- 3 **Complete documentation**
 - 3.1 Documentation and records regarding receipt and despatch operations are confirmed
 - 3.2 Documentation and records are completed and proofread
 - 3.3 Documentation and records are processed in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIA3018 Organise despatch operations and TLIA3019 Organise receipt operations.

Assessment Requirements for TLIA0015 Organise receipt and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying contingency plans in accordance with workplace procedures
- applying relevant legislation and workplace procedures
- communicating and working with others
- estimating size, shape and special requirements of goods and loads
- identifying relevant stock and goods coding and labelling
- monitoring work activities in terms of specified deadlines
- operating and selecting equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, labels, information and signs
- selecting and using relevant equipment and communications technology
- selecting and using required personal protective equipment (PPE) and conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- discrepancies and appropriate actions to resolve
- documentation and record requirements for receipt and despatch operations
- equipment used for organising receipt and despatch operations including safety precautions and procedures
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for organising receipt and despatch operations
- regulations relevant for organising receipt and despatch operations, or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for organising receipt and despatch operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0019 Despatch stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to despatch stock.

It includes analysing orders to identify work requirements, following workplace processes to prepare goods for despatch, and completing despatch tasks in accordance with workplace procedures and schedules.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Review order to identify work requirements

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|------------|---|
| 1.1 | Order request, pick request and consignment note are reviewed for completion and despatch instruction |
| 1.2 | Required schedules for despatch are identified |

- | | | |
|----------|---|--|
| | 1.3 | Products ordered are located and verified |
| | 1.4 | Despatch schedule, storage location and product knowledge are used to plan sequence of work |
| | 1.5 | Appropriate material handling equipment is selected within required work health and safety (WHS)/occupational health and safety (OHS) regulations and timeframe for the despatch |
| 2 | Follow workplace processes to prepare goods for despatch | |
| | 2.1 | Goods for despatch are selected and checked against labels and other identification systems |
| | 2.2 | Products are sorted, assembled and consolidated |
| | 2.3 | Orders are secured and placed in storage or despatch zones in accordance with schedule |
| 3 | Complete despatch following workplace procedures and schedules | |
| | 3.1 | Records are completed, and labels and appropriate documentation are attached |
| | 3.2 | Load labels and documentation are checked and loading is organised in accordance with workplace procedures and dangerous goods codes as required |
| | 3.3 | Final check of load labels and despatch and transfer documentation is completed in accordance with workplace procedures and statutory requirements |
| | 3.4 | Goods are confirmed as available for despatch and appropriate reporting is undertaken |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2021 Despatch stock.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIA0019 Despatch stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when organising despatch operations
- completing documentation related to organising despatch operations
- completing tasks within work health and safety (WHS)/occupational health and safety (OHS) guidelines and workplace procedures
- modifying activities depending on operational contingencies, risk situations and environments
- interpreting and following instructions, procedures and labels relevant to organising despatch operations
- selecting and using relevant equipment and communications technology when organising despatch operations
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation and recording requirements for despatch operations
- equipment used during despatch operations and the precautions and procedures that should be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for despatching goods
- potential problems and possible solutions relating to despatching goods
- relevant legislation, regulations, codes of practice and industry guidelines for despatching operations
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout, obstacles and specialised zones
- workplace procedures and policies for organising despatch operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0022 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to pick and process orders.

It includes identifying workplace order picking processes, policies and procedures; picking and despatching orders; and recording stock levels.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify workplace order picking processes, policies and procedures

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Workplace procedures for order picking and related workplace documentation are interpreted
- 1.2 Stock allocation and location systems are identified and used
- 1.3 Stock allocation and location systems for dangerous goods are identified and used in accordance with workplace

- procedures
- 2 Pick and despatch an order**
- 2.1** Appropriate manual handling equipment is selected in accordance with work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
- 2.2** Work requirements are planned, and appropriate equipment and documentation are sourced
- 2.3** Storage zones are located, and pick path is established
- 2.4** Hazards are identified and control measures are implemented
- 2.5** Appropriate transport unit for orders is selected
- 2.6** Order is picked and arranged to minimise stock damage and to maximise stability in accordance with workplace procedures
- 2.7** Order picks and transport units are located in designated areas
- 2.8** Products are assembled to meet workplace despatch schedules
- 2.9** Orders are consolidated, secured, arranged and placed in storage zones in accordance with despatch schedules
- 3 Complete documentation**
- 3.1** Pick confirmation is completed in accordance with workplace requirements
- 3.2** Stock discrepancies are identified and reported in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package

Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2012 Pick and process orders.

Assessment Requirements for TLIA0022 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- completing workplace documentation related to picking and processing orders
- estimating the size, shape and special requirements of goods
- identifying and following instructions, procedures, signs and labels relevant to picking and processing orders
- identifying hazards and implementing control measures
- identifying relevant stock and goods coding and labelling, including dangerous goods
- monitoring work activities in terms of planned schedule
- selecting and using appropriate manual handling equipment in accordance with workplace procedures
- selecting and using relevant equipment and communications technology when picking and processing orders
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- documentation and recording requirements when picking and processing an order
- equipment used during picking and processing operations and the precautions and procedures to be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for picking and processing orders
- potential problems and possible solutions when picking and processing an order
- relevant legislation, regulations, codes of practice and industry guidelines for picking and processing orders, including relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- storage zone requirements and obstacles
- transport units including totes, flat racks, cages, pallets, skips, stillages and cartons

- workplace procedures and policies for picking and processing orders.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIA0024 Replenish stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to replenish stock.

It includes applying product knowledge to participate in stock rotation activities, interpreting and filling replenishment requests, and completing all required stock replenishment tasks.

Work is performed under applicable supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Participate in stock rotation activities

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|------------|--|
| 1.1 | Stock levels are counted against appropriate documentation |
| 1.2 | Stock levels are recorded and reported to relevant personnel |
| 1.3 | Stocks are replenished, adjusted or rotated in |

			accordance with workplace procedures
		1.4	Stock reordering processes are activated in accordance with workplace procedures
		1.5	Routine and non-routine problems with products or storage systems are reported in accordance with workplace procedures
2	Interpret and fill replenishment request	2.1	Order request documentation is interpreted
		2.2	Products ordered are noted and storage locations are identified
		2.3	Storage location and product knowledge is used to plan sequence of work
		2.4	Appropriate material handling equipment is selected in accordance with workplace procedures and timeframes, and work health and safety (WHS)/occupational health and safety (OHS) regulations
		2.5	Required schedules for order movement and despatch or storage are identified and followed
3	Complete stock replenishment	3.1	Products are sorted, assembled and consolidated in the appropriate storage areas
		3.2	Work is checked in accordance with workplace procedures
		3.3	Documentation and records are completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2020 Replenish stock.

Assessment Requirements for TLIA0024 Replenish stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with relevant personnel when replenishing stock
- completing and interpreting documentation related to replenishing stock
- interpreting and following instructions, procedures and labels relevant to replenishing stock
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in stock and equipment in accordance with standard operating procedures
- replenishing, adjusting and rotating stock
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment when replenishing stock
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- documentation requirements for replenishing stock
- housekeeping standards and procedures
- material handling procedures
- potential problems and possible solutions relating to replenishing stock
- principles of operation and functions of stock control systems
- relevant legislation, regulations, codes of practice and industry guidelines relating to stock replenishment
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for replenishing stock.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment.

It includes selecting appropriate automated mechanical moving equipment, moving materials in accordance with operational requirements, checking condition of materials and completing required records.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations related to automated mechanical equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Identify task and select automated equipment | 1.1 Automated equipment is selected in accordance with workplace procedures, manufacturer specifications and loads characteristics |
| | 1.2 Pre-operational checks are completed and safe working load is determined in accordance with workplace procedures and manufacturer specifications |
| | 1.3 Automated equipment faults are identified and appropriate action taken in accordance with workplace procedures |
| | 1.4 Dangerous goods (DG) and hazardous materials are identified and handled in accordance with workplace procedures |
| 2 Move materials with automated equipment | 2.1 Planned route is determined and work area deemed safe |
| | 2.2 Hazards are identified, risks are assessed and control measures are implemented |
| | 2.3 Materials are moved using automated equipment in accordance with manufacturer specifications and workplace procedures |
| | 2.4 Materials are monitored in accordance with workplace procedures |
| 3 Complete material move and records | 3.1 Materials are inspected in accordance with workplace procedures |
| | 3.2 Records are updated in accordance with workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID2013 Move materials mechanically using automated equipment.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures when using automated equipment
- following relevant instructions, workplace procedures and signs
- monitoring performance of automated equipment and taking action in accordance with workplace procedures
- reporting automated equipment faults in accordance with workplace procedures
- undertaking operational checks of automated equipment
- using personal protective equipment (PPE) according to workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics, capabilities and limitations of automated equipment
- hazards when using automated equipment and related risk control measures
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- workplace policies and procedures for using automated equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, automated equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0007 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with codes of practice, permits, workplace requirements and relevant regulatory requirements as part of work undertaken in the stevedoring, transport, warehousing and logistics industries.

It includes planning work for current working conditions; using controls and equipment operating systems to manage moving the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare work for current working conditions

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Hazards are identified, risks assessed and control measures implemented

- 1.2 Traffic flow and work area conditions are assessed and adjusted to ensure safe operation
 - 1.3 Load characteristics are taken into account to ensure appropriate attachments/gear are used to move load in accordance with lift plan
 - 1.4 Working load limit (WLL) is calculated
 - 1.5 Occurrences in work area that may impact on safety and efficiency of operations are reported to relevant personnel in accordance with workplace procedures
- 2 Operate specialised loading equipment**
 - 2.1 Equipment is inspected and configured in accordance with manufacturer specifications, prepared and appropriate attachments are fitted
 - 2.2 Gear and operational levers are checked to ensure they are in neutral position prior to inserting ignition key and starting engine
 - 2.3 Engine is started in accordance with manufacturer guidelines to bring engine up to speed
 - 2.4 Instruments and gauges are monitored to ensure operation is within manufacturer specifications and workplace procedures
 - 2.5 Engine power is managed to ensure efficiency of equipment movement and economy of equipment operations
 - 2.6 Equipment operations are conducted in accordance with manufacturer specified torque range
 - 2.7 Faults or damage to equipment are immediately reported to relevant personnel in accordance with workplace procedures
- 3 Locate load and identify load characteristics**
 - 3.1 Load is located and identified in accordance with workplace procedures
 - 3.2 Loading and unloading plans are followed to ensure efficiency and safety of operations
 - 3.3 Load characteristics are taken into account to ensure appropriate loading and unloading workplace procedures are followed

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID2012 Operate specialised load shifting equipment.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLID0007 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of specialised load shifting equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- planning own working, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- selecting and using relevant gear and accessories
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- conveyed material potential for toxicity, reactivity, material grade, type and purpose, including information from relevant safety data sheets (SDS)/material safety data sheets (MSDS) and current Australian Dangerous Goods (ADG) Code documentation
- documentation, record requirements and housekeeping standards, including:
 - relevant permit and licence requirements
 - site layout and obstacles

- operational safety requirements and precautions for specialised load shifting equipment concerned
- operational work systems, equipment, management and site operating systems for operating specialised load shifting equipment
- problems that may occur and appropriate actions that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of specialised load shifting equipment
- relevant regulations for operating specialised load shifting equipment, including current ADG Code and relevant approved storage facilities, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for operating specialised load shifting equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0015 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and/or cargo.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation in accordance with relevant state or territory roads and traffic authority regulations and permit requirements.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Load and unload goods/cargo

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
- 1.2 Job hazards are identified and required actions taken to minimise, control or eliminate identified hazards

- 1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations and permit requirements, as required
 - 1.4 Load is packed and unpacked to make safe and effective use of available spaces
 - 1.5 Goods and/or cargo are loaded and unloaded in accordance with relevant mass and loading regulations and workplace procedures
 - 1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
 - 1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
 - 1.8 Goods requiring special handling and/or documentation are identified, and workplace procedures are followed
 - 1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
- 2 Secure, check and protect load**
 - 2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
 - 2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
 - 2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
 - 2.4 Load is protected in accordance with legal and workplace safety requirements
- 3 Complete documentation**
 - 3.1 Load is inspected and checked for security to travel in accordance with relevant regulations and permit requirements and current ADG Code, as required
 - 3.2 All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2004 Load and unload goods/cargo.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLID0015 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action, as required
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- National Transport Commission (NTC) Load Restraint Guide
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations, including state or territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, NTC Load Restraint Guide, codes of practice, workplace procedures and operation manuals.

TLID0016 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

Operation of a forklift is performed under supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check forklift condition

1.1 Forklift pre-start is documented and completed prior to commencement of work and relevant to equipment

1.2 Forklift is checked for compliance in accordance with relevant legislation, manufacturer specifications and workplace procedures

- 1.3 Correct personal protective equipment (PPE) is selected and worn relevant to workplace procedures
 - 1.4 Equipment attachments are selected, checked against data plate, secured correctly and appropriate to the task and terrain
 - 1.5 Equipment faults and non-compliances are reported to relevant personnel
- 2 Drive forklift**
- 2.1 Route is planned in accordance with traffic management plans for the worksite
 - 2.2 Forklift is accessed correctly, using three points of contact, seatbelt is correctly worn and fastened, and mirrors and seats are adjusted for safe operation by driver
 - 2.3 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations, manufacturer instructions and workplace procedures
 - 2.4 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
 - 2.5 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
 - 2.6 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
- 3 Operate forklift to handle loads**
- 3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and allowed attachments selected
 - 3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and workplace procedures
- 4 Monitor site conditions**
- 4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
 - 4.2 Site conditions are continuously monitored to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
- 5 Monitor and maintain forklift performance**
- 5.1 Performance and efficiency of vehicle operation is monitored during use
 - 5.2 Defective/irregular performance and malfunctions are reported to relevant personnel

5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

6 Perform shutdown

6.1 Forklift is parked, shut down, checklist completed and equipment secured in accordance with manufacturer specifications, regulations and workplace procedures

6.2 Defective/irregular performance, malfunctions or maintenance are recorded and reported to relevant personnel

6.3 PPE is stored correctly in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to TLID2010 Operate a forklift.

Links

Assessment Requirements for TLID0016 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- conducting pre-start and shutdown procedures
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures (SOPs)
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift, including attachments
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of forklift and related equipment, and taking appropriate action, as required
- operating and adapting to differences in equipment in accordance with SOPs
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- correct lifting techniques to prevent excessive wear and tear on equipment
- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high-risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational and shutdown checks carried out on forklift and related actions
- principles of stress management when driving a forklift, including fatigue
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- relevant workplace procedures
- site layout and obstacles.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLID0020 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift materials safely using manual handling methods.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess risks associated with relocating load

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

1.2 Storage locations are determined and potential routes to be

followed are identified

- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
- 1.6 Worksite hazards are identified, and corrective action is taken prior to commencing shifting products, goods or materials
- 1.7 Risks in potential routes are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of products, goods or materials
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered when moving loads
- 1.11 Appropriate personal protective equipment (PPE) is identified and used
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned consistent with the code of practice for manual handling and in accordance with the risk assessment
- 2.2 Process for relocating load is proposed, including predicting and planning for potential difficulties
- 2.3 Proposed process is checked for compliance with codes of practice and workplace procedures

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
- 3.2 Team lifting tasks are coordinated
- 3.3 Planned process and route are followed
- 3.4 Relocated products, goods or materials are set down without

damage to goods, personnel or equipment and are checked for stability

- 3.5 Relocation is checked to ensure it meets work requirements and variances are reported to relevant personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001 Shift materials safely using manual handling methods.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0020 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying and following relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling products, goods or materials
- communicating effectively with others when manually lifting and handling products, goods or materials
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and products, goods or materials in accordance with workplace procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of products, goods or materials
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling products, goods or materials
- working systematically with required attention to detail without injury to self or others, or damage to products, goods, materials, or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- relevant WHS/OHS workplace procedures, codes of practice and industry guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling products, goods or materials and related precautions to control the risk, including:
 - controlled actions on a movement during lifting
 - distance over which load is to be shifted
 - frequency of shifting operations
 - load on the spine during lifting
 - postures and positions during lifting
 - rotation and side movement of the spine during lifting
 - time allowed for shifting the load
 - type, weight and position of the load, including loose, liquid, dangerous or hazardous products, goods or materials
- site layout and obstacles
- work layout.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess risks associated with

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

relocating load

- 1.2 Storage locations are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
- 1.6 Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
- 1.7 Risks in potential routes are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered when moving loads
- 1.11 Appropriate personal protective equipment is determined
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
 - controlled actions on a movement during lifting
 - distance over which load is to be shifted
 - frequency of shifting operations
 - load on the spine during lifting
 - postures and positions during lifting
 - rotation and side movement of the spine during lifting
 - time allowed for shifting the load
 - type, weight and position of the load
 - work layout
 - site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

and operation manuals.

TLID2022 Conduct weighbridge operations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct weighbridge operations.

It includes setting up for weighbridge operations, weighing loaded and unloaded vehicles, finalising weighbridge operations, and completing required records and documentation in accordance with workplace procedures and regulatory requirements.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Set up for weighbridge operations

- 1.1 Weighbridge systems, including equipment, computer and recording arrangements, are checked for operational status
- 1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturer instructions and relevant legislation
- 1.3 Accurate reporting of results of inspection and testing is kept in accordance with statutory requirements, workplace procedures and industry guidelines
- 1.4 Hazards are identified, risks are assessed, and control measures are implemented
- 1.5 Faults and discrepancies in weighbridge operation are identified and appropriate action is undertaken in accordance with workplace procedures

2 Weigh loaded vehicles

- 2.1 Vehicles are directed onto platform to obtain accurate weight
- 2.2 Weight of loaded stationary vehicle is registered against vehicle and load identification
- 2.3 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement
- 2.4 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

3 Weigh unloaded vehicles

- 3.1 Vehicles are directed onto platform to obtain accurate weight
- 3.2 Weight of unloaded stationary vehicle is registered against vehicle
- 3.3 Proposed load weight is assessed for conformance to statutory requirements
- 3.4 Loading operations are commenced in accordance with legal loading weight, customer requirements and workplace procedures, and vehicle is re-weighed to establish final load weight, as required
- 3.5 Vehicle and load information are entered into workplace recording system and invoice is issued to driver, as required
- 3.6 Weighbridge documents, invoices or receipts are obtained in

accordance with statutory and workplace requirements

3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

4 Complete weighbridge operations

4.1 Weighbridge systems, including equipment, computer and recording arrangements, are secured or made ready for next shift

4.2 Record of operations is maintained and filed in accordance with workplace procedures and statutory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2022A Conduct weighbridge operations.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2022 Conduct weighbridge operations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- identifying, selecting and efficiently and effectively using weighbridge equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of weighbridge equipment
- operating and adapting to differences in equipment in accordance with workplace procedures
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems, errors or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- setting up and maintaining weighbridge equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- calculation method and approaches for metric and imperial systems
- classification procedures
- correct weighing procedures, including statutory and workplace requirements
- emergency response procedures
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- problems that may occur when conducting weighbridge operations and appropriate actions that can be taken to resolve these problems
- records and documentation requirements for weighbridge operations
- relevant regulations for conducting weighbridge operations, including relevant dangerous goods systems and dangerous goods regulation requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout
- weights and measures regulations
- workplace procedures for conducting weighbridge operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, National Transport Commission (NTC) Load Restraint Guide, relevant dangerous goods systems and dangerous goods regulation requirements, codes of practice, workplace procedures and operation manuals.

TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, in accordance with relevant state/territory high risk work licence requirements and regulations, in a variety of operational contexts.

It includes checking attachments and worksite for suitability, selecting type of forklift and accessories for required workplace task, shifting load and completing work in accordance with operational requirements.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift

A person who operates a forklift must hold a high risk work licence.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|--|
| 1 Check attachments and worksite for suitability | <p>1.1 Suitable work area is selected for operations</p> <p>1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards</p> <p>1.3 Work area is checked for overhead obstructions and proximity to service delivery lines</p> <p>1.4 Barriers or warning signs are erected in areas subject to passing traffic</p> <p>1.5 Attachments and platforms are securely fixed to carriage or tines</p> <p>1.6 Personnel support platforms are inspected to ensure accordance with relevant Australian Standard/s</p> |
| 2 Select type of forklift and accessories for required workplace task | <p>2.1 Special equipment, accessories or attachments are identified to match load characteristics and work requirements</p> <p>2.2 Appropriate specialised equipment is selected</p> <p>2.3 Existing attachments are removed and stored in accordance with workplace procedures</p> <p>2.4 Specialised equipment is fitted in accordance with manufacturer instructions and workplace procedures</p> <p>2.5 Designated staff are notified about specialist operations</p> |
| 3 Shift load and complete work | <p>3.1 Equipment is operated within safe working limits and to maximise efficiency of operations</p> <p>3.2 Load is lifted, carried and set down in accordance with workplace and manufacturer procedures, and regulatory requirements</p> <p>3.3 Documentation is completed damage or faults to goods or equipment are reported to appropriate personnel</p> <p>3.4 Specialist equipment and forklift are returned to appropriate storage/parking area</p> |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3011A Conduct specialised forklift operations.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID3011 Conduct specialised forklift operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes during work activities
- checking forklift compliance plate for safe weight limits
- communicating effectively with others
- completing relevant documentation
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- handling procedures for forklifts involved in specialised operations
- high risk work licence workplace requirements
- operating hazards, and related defensive driving and hazard control techniques
- pre-operational checks carried out on forklift and accessories, and related action
- procedures to be followed in an operational emergency
- relevant duty of care requirements for specialised operation of a forklift
- relevant WHS/OHS and environmental procedures and regulations
- safe weight limits
- site layout and obstacles
- types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to ensure the safety of transport activities.

It includes identifying features and applying chain of responsibility obligation in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations. It also includes identifying and reporting chain of responsibility risks.

Transport activities as defined by the HVNL or applicable state/territory law and regulations.

Work is performed under close direction, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify chain of responsibility features in the HVNL or applicable

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Transport activities and parties in the chain of responsibility are identified

state/territory law and regulations

- 1.2** Principle of shared responsibility obligations within chain of responsibility in the HVNL or applicable state/territory law and regulations are identified
 - 1.3** Primary duty of each party in the chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
 - 1.4** So far as reasonably practicable or reasonable steps, compliance with chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
 - 1.5** Breaches and penalties for failure to comply with chain of responsibility as identified in the HVNL or applicable state/territory law and regulations are explained
- 2 Apply chain of responsibility obligations in the HVNL or applicable state/territory law and regulations**
- 2.1** Workplace policies, procedures and other documents relevant to transport activities as they apply to own job function are identified and explained
 - 2.2** Methods and requirements to facilitate and ensure management of speed and fatigue are explained in accordance with job function and workplace procedures
 - 2.3** Methods to assess vehicle dimension and mass limits are explained in accordance with job function
 - 2.4** Methods to ensure loads are secured are explained in accordance with workplace procedures
 - 2.5** Heavy vehicles safety standards are identified in accordance with job function and workplace procedures
 - 2.6** Transport activities risks are identified, assessed and risk control measures implemented in accordance with workplace procedures
 - 2.7** Workplace procedures and industry practices for reporting transport activities risks are identified and followed
 - 2.8** Workplace documents relating to chain of responsibility are completed and processed to workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIF0001 Apply chain of responsibility legislation, regulations and workplace procedures.

Assessment Requirements for TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- applying applicable state/territory law and regulations
- assessing the likelihood and consequences of harm relating to own job function on a minimum of three occasions
- completing safety documentation of identified transport activities of a heavy vehicle risk on a minimum of three occasions, each about a different type of risk
- identifying risks associated with transport activities of a heavy vehicle of own job function and at least two other job functions directly related to own job function
- implementing relevant risk control measures and report actions taken to relevant person in accordance with workplace procedures on a minimum of three occasions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action required when possible risks of the transport activities are identified
- consideration of external factors in managing speed and fatigue
- function of driver and how they relate to transport activities, including level of influence and control
- methods, industry standards and requirements to ensure management of fatigue, speed, load restraint, mass, dimension and heavy vehicle maintenance and how they relate to transport activities job functions
- parties in the chain of responsibility and the concept of level of influence and control
- potential consequences of non-compliance with the applicable heavy vehicle state/territory law and regulations
- principle of shared responsibility
- transport activities as defined by the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations
- what constitutes an unreasonable request
- where to locate current information relating to heavy vehicle transport activities including:
 - codes of practices

- heavy vehicle standards
- securing loads, load placement and load restraint
- vehicle dimension and mass limits
- workplace policies and procedures for own job function.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIF0014 Monitor the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor the safety of transport activities.

It includes determining and monitoring chain of responsibility features in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations. It also involves administering and monitoring chain of responsibility workplace policies and procedures, and identifying and reporting chain of responsibility risks.

Work is performed under general direction.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

- 1 Determine chain of responsibility features in the HVNL or applicable state/territory law and**

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Transport activities and parties in the chain of responsibility are determined

regulations

- 1.2 Principle of shared responsibility obligations within chain of responsibility in the HVNL or applicable state/territory law and regulations are determined
- 1.3 Primary duty of each party in the chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
- 1.4 So far as reasonably practicable or reasonable steps compliance with chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
- 1.5 Breaches and penalties for failure to comply with chain of responsibility as identified in the HVNL or applicable state/territory law and regulations are explained
- 2 **Monitor chain of responsibility obligations in the HVNL or applicable state/ territory law and regulations**
 - 2.1 Workplace policies, procedures and other safety documents relevant to transport activities as they apply to job function are identified and monitored
 - 2.2 Methods and requirements to facilitate and ensure management of speed and fatigue are monitored in accordance with job function and workplace procedures
 - 2.3 Methods to calculate and assess vehicle dimension and mass limits are monitored in accordance with job function
 - 2.4 Methods to ensure loads are secured are monitored in accordance with workplace procedures
 - 2.5 Heavy vehicles safety standards are identified and monitored in accordance with workplace procedures
 - 2.6 Transport activity risks are identified, assessed and risk control measures implemented and monitored in accordance with workplace procedures
 - 2.7 Workplace records relating to transport activities are monitored and reviewed in accordance with workplace requirements and industry practice
- 3 **Administer and monitor chain of responsibility workplace policies and**
 - 3.1 Workplace procedures and industry practices for reporting transport activities risks are identified and

procedures	implemented
	<p>3.2 Workplace policies and procedures relating to chain of responsibility and associated changes are communicated to all staff</p> <p>3.3 Application of workplace policies and procedures relating to chain of responsibility is monitored to ensure compliance with transport activity obligations</p> <p>3.4 Appropriate action is taken when non-compliances with chain of responsibility requirements are identified</p>
4 Undertake due diligence activities	<p>4.1 Transport activities risks and safety duties are identified in accordance with job function and workplace procedures</p> <p>4.2 Current hazards and risk information is analysed in a timely manner and appropriate mitigation actions considered in accordance with job function and workplace procedures</p> <p>4.3 Resources are allocated in accordance with job function and workplace procedures</p> <p>4.4 Risk control measures are implemented and mitigation processes verified in accordance with workplace procedures</p>

Foundation Skills

Foundation skills essential to performance are explicit at a broad level in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIF0002 Administer chain of responsibility policies and procedures.

Assessment Requirements for TLIF0014 Monitor the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- applying and monitoring workplace policies and procedures relating to safety of transport activities (chain of responsibility) in a supervisory function reflecting a minimum of four weeks
- applying applicable state/territory law and regulations
- applying chain of responsibility obligations relating to own job function on a minimum of three occasions
- assessing the likelihood and consequences of harm relating to own job function on a minimum of three occasions
- completing safety documentation of identified transport activities of a heavy vehicle risks on a minimum of three occasions, each about a different type of risk
- identifying heavy vehicle transport activities risks
- implementing relevant risk control measures and reporting actions taken to relevant person in accordance with workplace procedures on a minimum of three occasions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- actions required when possible risks of the transport activity of a heavy vehicle are identified
- consideration of external factors in managing speed and fatigue
- due diligence including taking reasonable steps to:
 - acquire and keep up to date on knowledge about the safe conduct of transport activities
 - identify the nature of the legal entity's transport activities and the hazards and risks associated with those activities
 - ensure that appropriate resources are allocated and used to eliminate or minimise those hazards and risks
 - verify the control measures implemented are effective
- function of driver and how they relate to transport activities including level of influence and control

- functions including:
 - duties within the individual's own function
 - duties performed by others under the individual's supervision
 - duties that influence or direct other parties in the chain of responsibility
- methods, industry standards and requirements to ensure management of fatigue, speed, load restraint, mass, dimension and heavy vehicle maintenance and how they relate to transport activity job functions
- parties in the chain of responsibility and the concept of level of influence and control
- potential consequences of non-compliance with the applicable heavy vehicle state/territory law and regulations
- principal obligations relating to chain of responsibility in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations including:
 - consideration of traffic conditions in managing speed and fatigue
 - fatigue, work and rest times
 - securing loads
 - vehicle dimension and load limits
- transport activities as defined by the HVNL or applicable state/territory law and regulations
- what constitutes a shared duty, a reasonable practicable, a risk and heavy vehicle transport activity as they apply to a range of job functions
- what constitutes an unreasonable request
- where to locate current information relating to heavy vehicle transport activities including:
 - codes of practices
 - heavy vehicle standards
 - securing loads, load placement and load restraint
 - vehicle dimension and mass limits
- workplace policies and procedures for own job function and the range of job functions for which own job function is responsible.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIF0022 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct housekeeping activities.

It includes identifying housekeeping requirements, procedures and resources of different areas of the workplace; monitoring and maintaining cleanliness and tidiness; and completing assigned housekeeping tasks.

Work is performed under some supervision generally in a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F - Safety Management.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Determine housekeeping requirements for different workplace areas

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Workplace housekeeping procedures are identified and followed

1.2 Equipment and consumables are selected in accordance with work area requirements

- 1.3 Specific procedures and resources for housekeeping activities in different parts of the work area are identified and followed
 - 1.4 Worksite hazards are identified and corrective actions taken prior to commencing housekeeping activities
 - 1.5 Appropriate personal protective equipment (PPE) is identified and used
- 2 Monitor and maintain cleanliness and tidiness in the workplace**
 - 2.1 Worksite cleanliness and tidiness are continuously monitored
 - 2.2 Housekeeping issues are raised with appropriate personnel in accordance with workplace procedures
 - 2.3 Housekeeping equipment is operated in accordance with manufacturer instructions and workplace procedures
 - 2.4 Housekeeping equipment and supplies are maintained and stored
- 3 Complete assigned housekeeping duties**
 - 3.1 Housekeeping duties are conducted in accordance with workplace procedures and ensuring waste is removed
 - 3.2 Maintenance requirements of any damaged items are notified to appropriate personnel
 - 3.3 Schedules and records for housekeeping duties are maintained and followed
 - 3.4 Work areas are checked and required workplace standards are met
 - 3.5 Work is carried out following housekeeping practices and safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF1002 Conduct housekeeping activities.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIF0022 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with workplace procedures
- applying precautions and required actions to minimise, control or eliminate hazards that may exist during housekeeping activities
- communicating and working effectively with others when carrying out housekeeping activities
- identifying workplace housekeeping requirements and undertaking housekeeping in the workplace
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring condition and performance of housekeeping tools and equipment in accordance with maintenance schedule and workplace procedures
- removing waste in accordance with workplace procedures
- reporting and rectifying within limits of own role, problems, faults and malfunctions identified when carrying out housekeeping activities in accordance with regulatory requirements and workplace procedures
- using appropriate personal protective equipment (PPE)
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards
- purpose of housekeeping within the workplace
- relevant workplace practices and safeworking procedures for own job role
- risks when carrying out housekeeping tasks and related precautions to control them

- servicing procedures for housekeeping equipment
- site layout and obstacles
- workplace procedures and policies for carrying out housekeeping activities in the workplace.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIF2010 Apply fatigue management strategies

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS PERFORMANCE CRITERIA

Elements describe the Performance criteria describe the performance needed to demonstrate

essential outcomes. achievement of the element.

- | | |
|---|---|
| 1 Identify and act on signs of fatigue | <p>1.1 Potential causes of fatigue are identified and actions taken to minimise their effects in accordance with workplace procedures</p> <p>1.2 Personal warning signs of fatigue are recognised, and necessary steps are taken in accordance with workplace procedures, to ensure that effective work capability and alertness are maintained</p> |
| 2 Implement strategies to minimise fatigue | <p>2.1 Workplace procedures are assessed to minimise fatigue</p> <p>2.2 Factors that increase the risk of fatigue-related accidents and incidents are minimised</p> <p>2.3 Fatigue management strategies are implemented in accordance with workplace policy and procedures</p> <p>2.4 Lifestyle choices are made that promote the effective long-term management of fatigue</p> <p>2.5 Effective practices in combating fatigue are adopted and applied</p> <p>2.6 Personal fatigue management strategies are communicated to relevant people</p> <p>2.7 Appropriate counter measures are planned to combat fatigue</p> |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2010A Apply fatigue management strategies.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIF2010 Apply fatigue management strategies

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures (SOPs) as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required actions to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate actions in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance

- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective (PPE) equipment currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIF4064 Manage fatigue management policy and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage organisational fatigue management policy and procedures in accordance with relevant legislation and regulations.

It includes identifying legal requirements, liabilities and responsibilities for establishing and/or improving fatigue management implementation plans, policies and procedures. It also includes acting appropriately on reports and identified breaches of fatigue management regulations.

It also includes ensuring operational systems are compliant with fatigue management regulations and policy; planning and organising adequate resources and operational systems; and facilitating the training and assessment of staff on their responsibilities and fatigue management techniques.

Work is performed under minimum supervision generally as a manager.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Identify or confirm fatigue management legal requirements and responsibilities

1.1 Current legal requirements, liabilities and responsibilities for effective fatigue management within the organisation are identified and interpreted

1.2 Existing fatigue management plans, policies and procedures are obtained and reviewed

1.3 Internal risks concerning the potential effects of fatigue are identified or confirmed and reviewed

1.4 External risks within the organisational services and/or products supply chain concerning the potential effects of fatigue are identified or confirmed and reviewed in accordance with fatigue management regulations and the related chain of responsibility

2 Establish and improve fatigue management policy and procedures

2.1 Organisational fatigue risk management system implementation plan is developed or reviewed and improved

2.2 Organisational fatigue risk management policy and procedures are developed or reviewed and improved in conjunction with relevant personnel

2.3 Feedback is obtained on the implementation plan and related policies and procedures from key stakeholders internal and external to the organisation

2.4 Appropriate adjustments are made to the plan, policies and procedures based on the feedback received

2.5 Managerial approval for the fatigue risk management system implementation plan and related policies and procedures is obtained in accordance with organisational procedures

2.6 Fatigue risk management system implementation plan and the related policies and procedures are distributed and presented to relevant organisational personnel for implementation

3 Act upon reports on the implementation of fatigue management policy

3.1 Reports from designated personnel on the implementation of the organisational fatigue risk management system implementation plan and related policies and procedures are received and interpreted

3.2 Accidents and safety incidents are reviewed and/or investigated and analysed to identify the extent to which

fatigue might have been a contributing factor

3.3 Information provided in the reports indicating that fatigue management policy and procedures are not being correctly implemented is analysed and an appropriate managerial response and related action is initiated

3.4 Opportunities for improvements to the organisational fatigue risk management system implementation plan and related policies and procedures are identified and appropriate action is taken to make the necessary adjustments

4 Act upon identified fatigue management regulations breaches

4.1 Identified or reported fatigue management policy breaches are investigated in accordance with organisational procedures and regulatory requirements

4.2 Action is taken to ensure internal and/or external personnel who may have contributed to any breach of fatigue management policy are provided with appropriate feedback and information to avoid recurrence of the breakdown in planned fatigue management processes

4.3 Where organisational procedures or culture is found to have contributed to a breach in fatigue management policy, appropriate action is taken to improve procedures or to address the culture in ways that aim to avoid a recurrence of the breakdown in planned fatigue management processes

4.4 Report on breaches of fatigue management policy is prepared and submitted to designated personnel with details of action taken to prevent a recurrence, in accordance with organisational procedures

5 Ensure that operations systems are compliant with fatigue management regulations and policy

5.1 All operations systems and standard operating procedures are reviewed in terms of their compliance with the organisational fatigue management regulations and policy

5.2 Where necessary, changes are made to operations systems and standard operating procedures to ensure that they are compliant

5.3 In accordance with the chain of responsibility principles, appropriate discussions are held with relevant personnel in supplier or subcontractor companies in the organisational supply chain to ensure their operational systems and standard operating procedures are compliant with the fatigue management regulations and policy

- 6 Plan and organise adequate resources and operational systems**
- 6.1 Organisational budgets and resource allocation strategies are planned to provide adequate resources for the implementation of the organisational fatigue risk management system
 - 6.2 Periodic reviews are undertaken of budgetary and resource allocation arrangements as they relate to implementing the organisational fatigue risk management systems and appropriate improvements are made as required
- 7 Facilitate the training and assessment of staff on fatigue management policy and procedures**
- 7.1 Organisational training systems are planned to provide competency-based on-the-job and off-the-job training and assessment opportunities as detailed in the organisational strategic plan
 - 7.2 Team leaders, supervisory and training staff are provided with adequate opportunities to develop the required expertise to contribute to the organisational fatigue management training and assessment activities
 - 7.3 Periodic reviews are undertaken of fatigue management training systems and appropriate improvements are made as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF4064A Manage fatigue management policy and procedures.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIF4064 Manage fatigue management policy and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in legislation and regulations as they relate to fatigue management
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when implementing the organisational fatigue risk management system
- facilitating systems that assist employees to identify their own learning needs about fatigue management
- modifying activities and taking appropriate initiative to manage the implementation of an organisational fatigue risk management system depending on differing contexts, risk situations and environments
- organising audits and reviews of an organisation's fatigue risk management system
- planning and organising budgetary requirements and resource allocation for implementing an organisational fatigue risk management system
- reading and interpreting documentation on fatigue management legislation and the organisational fatigue risk management system and applying them to management activities
- recognising breaches of fatigue management strategies and regulations and taking appropriate action in accordance with the organisational fatigue risk management system.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- budgetary and resource requirements for implementing an organisational fatigue risk management system
- causes and effects of fatigue on employees
- components of a fatigue risk management system, and policies and procedures related to fatigue management, and the control of factors that can contribute to fatigue and

fatigue-related accidents

- factors that increase fatigue-related errors and accidents
- fatigue reduction and proofing strategies available to an organisation that can minimise the risk of errors and safety incidents due to fatigue such as assigning low risk tasks to periods when fatigue risk is higher
- how fatigue affects workplace performance
- how fatigue contributes to workplace accidents
- lifestyles that promote the effective long-term management of fatigue
- options and resources for providing training and learning opportunities for employees about fatigue management and implementing an organisational fatigue risk management system, including initial induction training, in-depth training on fatigue and fatigue management techniques, remedial training where existing competence is assessed as being insufficient, and refresher training on fatigue management
- procedures for auditing and reviewing an organisational fatigue risk management system and related policies and procedures, and for reporting audit outcomes
- processes and resources for assessing employee fatigue management competence
- relevant legislation, regulations, permit and licence requirements related to fatigue management
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- responsibilities of an organisation and individual employees for implementing fatigue management regulations and policies, including requirements agreed with suppliers and sub-contractors in the supply chain about organisational services and products
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways to manage fatigue
- strategies for ensuring that the investigation and analysis of errors, safety incidents and accidents identify the extent to which fatigue is a contributing factor
- systems for auditing the effectiveness and efficacy of organisational fatigue risk management strategies, policies and procedures
- ways of recognising fatigue.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIH0005 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to interpret road maps and navigate pre-determined routes as part of transport operations.

It includes identifying and determining the most appropriate route and completing required route documentation in accordance with operational requirements.

It involves the application of map reading principles and procedures when interpreting street maps which includes either a road map, directory or global positioning system (GPS) device; and following pre-determined routes.

Work is performed under general or limited supervision.

Work must be carried out in accordance with relevant state or territory roads and/or traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate

essential outcomes.

achievement of the element.

1 Identify and complete pre-planned route

- 1.1 Pre-determined route documentation is accessed and interpreted
- 1.2 Relevant street maps are identified and accessed for pre-planned route
- 1.3 Street map symbols for pre-planned route are recognised and interpreted
- 1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate street map
- 1.5 Pre-determined route directions are interpreted, and route is traced using street map
- 1.6 Key intersections and other landmarks along route are identified for use in following planned route
- 1.7 Alternative contingency routes are identified for emergencies or traffic delays
- 1.8 Pre-determined route is correctly followed

2 Complete necessary documentation

- 2.1 Required route documentation is completed in accordance with workplace procedures, as required
- 2.2 Required route documentation is filed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH2001 Interpret road maps and navigate pre-determined routes.

Links

Companion Volume Implementation Guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIH0005 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- completing documentation related to route navigation, as required
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job task
- reading and interpreting relevant instructions, procedures, information and signs
- using street maps and other route documentation to complete and navigate pre-determined routes, as required, and in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- current route information about accidents or emergencies that might close or restrict traffic
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations and rest stops as required
- operational procedures for interpreting road maps, using global positioning system (GPS) devices and navigating routes
- relevant state or territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- traffic conditions at various times of the day and night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate actions that should be taken

- workplace requirements for recording and documenting route information, as required.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry to navigate routes
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIJ0003 Apply quality systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply quality systems.

It includes working within a quality system; using quality systems, tools and techniques; and contributing to quality system continuous improvement processes.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

J – Quality.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Work within a quality system

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Appropriate quality systems for job role and work area are identified
- 1.2 Quality system is applied and clarification is sought from appropriate personnel, as required
- 1.3 Duties are performed either individually or as a member of a

work team within a quality system

- 2 Use quality systems, tools and techniques**
 - 1.4** Work is completed in accordance with workplace policies and procedures
 - 2.1** Variations from required standards in the quality of services and/or products are detected and reported in accordance with workplace policies and procedures
 - 2.2** Quality of operations and services is monitored in accordance with workplace policies and procedures
 - 2.3** Quality improvement tools and techniques are used systematically to improve the quality of work, services and/or products
- 3 Contribute to quality system continuous improvement processes**
 - 3.1** Continuous improvement processes of the quality system are participated in according to work procedures
 - 3.2** Continuous improvement issues are documented for consideration by appropriate personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIJ3002 Apply quality systems.

This unit replaces and is not equivalent to TLIJ4008 Implement and monitor inbound quality assurance systems.

Links

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIJ0003 Apply quality systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant instructions, procedures and information
- applying relevant legislation and workplace policies and procedures
- communicating effectively with relevant personnel
- completing relevant documentation
- detecting and reporting identified problems in accordance with legislative requirements and workplace policies and procedures
- identifying and reporting variations to appropriate personnel
- monitoring work activities in relation to quality system standards and processes
- participating and documenting continuous improvement opportunities
- selecting and using quality improvement tools and methods
- working collaboratively with others when applying and implementing quality systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- operational work systems, equipment, site and organisational operating procedures relevant to job role and quality systems
- quality improvement tools and methods
- teamwork and communication principles and protocols
- typical quality-related problems that may arise and related options for action and solutions
- workplace quality assurance and continuous improvement principles and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Pre-requisite Unit

Not applicable

Competency Field

LIC - Licencing Units

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work/task

- 1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and site inspection is conducted in accordance with workplace procedures
- 1.2 Work area operating surface is assessed to determine suitability for operational use of forklift truck in accordance with workplace procedures
- 1.3 Suitability of forklift truck and attachment working load limit (WLL) is determined for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
- 1.4 Working area is inspected and appropriate paths for operating the forklift truck and moving and placing load/s in work area are assessed and managed in accordance with workplace procedures
- 1.5 Hazard and risk control measures are identified and reported to relevant person/s in accordance with workplace procedures
- 1.6 Traffic management plan implementation is confirmed in accordance with workplace procedures
- 1.7 Appropriate communication procedures are identified with relevant people in accordance with workplace procedures
- 1.8 All work is confirmed to ensure coverage of work/task requirements for the relevant work area is in accordance with workplace procedures

- 2 Prepare for work/task**
- 2.1** Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures
 - 2.2** Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures
 - 2.3** Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures
 - 2.4** Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures
 - 2.5** Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures
 - 2.6** Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements
 - 2.7** Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures
 - 2.8** Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures
 - 2.9** Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures
- 3 Perform work/task**
- 3.1** Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures

- 3.2 Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures
 - 3.3 Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures
 - 3.4 Unplanned and unsafe situations are responded to in accordance with safe work procedures
 - 3.5 Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures
 - 3.6 Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures
- 4 Pack Up**
- 4.1 Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures
 - 4.2 Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2001 Licence to operate a forklift truck

Links

Companion Volume Implementation Guide -

Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
 - maintaining safe operating speed
 - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
 - battery charge as required by manufacturer requirements
 - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
 - checking for signs of paint separation and stressed welds indicating potential structural weakness
 - document evidence of damage
 - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
 - ensuring availability of correct forklift truck logbook and updating records as required
 - ensuring forklift truck tyres or other attachment/s are securely fitted
 - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
 - fluid leaks
 - lights are working effectively
 - safety equipment checks
 - signage and labels to ensure they are visible and legible
 - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
 - insufficient lighting
 - other specific hazards including dangerous goods
 - overhead hazards and fixed structures, roof beams and doorways
 - restricted and poorly ventilated areas

- surface suitability based on forklift truck and task requirements
- the risk of collision with people, moving plant and fixed structures
- weather conditions
- complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
- conducting operational checks, which must ensure:
 - all controls are located, identified and tested for functionality
 - all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
 - hazard warning systems (e.g. reversing beepers, lights and horns) are functional
 - recording and maintaining accurate information relating to forklift truck operations
 - safety devices as fitted
 - start-up is in accordance with manufacturer requirements
 - steering, transmission and brake functions comply with operating requirements
 - there are no unusual noises
- confirming and following traffic management plan procedures relevant to their role in the work area
- conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
- determining relevant lifting attachment to perform work/task
- determining lift requirements including:
 - positioning of unusually balanced/shaped loads
 - centre of gravity
 - dynamic nature of load
 - tyre/attachment positioning
 - weight
- ensuring risk control measures within the work area are effective as per workplace procedures
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various environmental conditions
- maintaining communication with other workplace personnel through using worksite procedures including:
 - audible and visual warning devices
 - signage
 - two-way radio
 - verbal instructions
 - written instructions
- maintaining three points of contact whilst accessing and egressing forklift truck and ensuring

- rungs / steps are free of hazards
- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
 - aligning tynes/attachment to load
 - carrying out a lift to 75% of the maximum height
 - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
 - correctly using horns and mirrors in workplace
 - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
 - driving applicable to conditions and moving loads safely
 - driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
 - an 'S' bend with a minimum 90 degrees left and right turn
 - ensuring load/s remains stable through pick up, transport and placement
 - forklift truck speed is appropriate to load and surroundings
 - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
 - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
 - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
 - tilting mast (or forks if applicable) to ensure balance of load
 - using gluts/dunnage appropriately and lowering load safely
 - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
 - reporting to relevant person/s on site risk control measures that are not in place or are deficient
 - setting up an exclusion zone
 - securely parking forklift truck and isolating in appropriate position including:
 - minimising possible access by unauthorised person/s
 - tynes/attachment lowered to required position in accordance with manufacturer requirements
 - park brake applied
 - switching off, isolating fuel/power source and removing key according to workplace procedures
 - shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
- communication procedures including:
 - audible and visual warning devices
 - hand signals
 - questioning techniques
 - signage
 - traffic warning systems
 - two-way radio
 - written instructions
- forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
- impact of the following on the operation of the forklift truck including:
 - failure/loss of control including brakes and steering
 - failure of equipment during forklift truck operations
 - forklift truck instability causes including:
 - deterioration of ground condition
 - overloading
 - pick up and placement of load
 - irregular loads
 - operating on ramps and uneven surfaces and in restricted spaces
 - use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
 - labels on the actual load
 - markings on the actual load
 - paperwork such as consignment notes, running sheets and weighbridge dockets
 - weighing a carton and calculating load
- manufacturer requirements, instructions and operator's manual
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
 - wind
 - lightning
 - water/ice impacted surface/ground
 - rain
 - extreme heat
 - Ultra violet (UV) exposure
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
 - lock out and tag out procedures
- relevant procedures for refuelling and recharging forklift truck using appropriate PPE

including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling
- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
 - bale clamps
 - carpet spike for carpet rolls
 - drum carrier
 - jib attachment
 - paper roll clamps
 - personnel work platforms
 - rotators
 - slippers/fork extensions on tynes
- suitability and lifting capability of the attachment to be used
- shut down procedures for a forklift truck in accordance with manufacturer requirements
- traffic management plan procedures and requirements
- typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
- workplace procedures including work plan which may be verbal, documented/written, or electronically generated
- work area operating surface suitability including issues with:
 - backfilled ground
 - bitumen (damaged, cracked)
 - concrete (damaged, cracked)
 - hard compacted soil
 - potholes
 - railway tracks
 - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
 - soft soils
 - trench covers
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety

and Health (OSH) requirements, safe work and workplace procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
 - approved codes of practice and relevant guidance material
 - relevant Australian technical standards
 - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

TLILIC0024 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to safely operate a vehicle loading crane with a Maximum Rated Capacity (MRC) of 10 metre tonnes or more. Competence in this unit, does not in itself result in a High-Risk Work Licence (HRWL) to operate this plant.

Vehicle loading crane means a crane mounted on a vehicle for loading and unloading the vehicle.

A person performing this work is required to hold a vehicle loading crane HRWL.

This unit requires a person operating a slewing vehicle loading crane with a MRC of 10 metre tonnes or more to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) regulations and meets Commonwealth, state and territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Pre-requisite Unit

Not applicable.

Competency Field

LIC - Licencing Units.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work/task

- 1.1 Task requirements are identified from work orders or equivalent, a lift plan is confirmed with associated personnel and a site inspection is conducted in accordance with workplace procedures
- 1.2 Work area operating surface is confirmed to determine the quality of ground suitability for operational use of vehicle loading crane in accordance with workplace procedures
- 1.3 Vehicle loading crane Rated Capacity (RC) and the lifting gear Working Load Limit (WLL) are established for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
- 1.4 Appropriate paths for operating the vehicle loading crane and moving and placing load/s in work area are assessed and determined in accordance with workplace procedures
- 1.5 Relevant hazard identification and risk elimination/control measures are applied and advised to relevant personnel in accordance with workplace procedures
- 1.6 Traffic management plan implementation is confirmed and followed in accordance with workplace procedures
- 1.7 Appropriate communication procedures are identified and tested with associated personnel in accordance with workplace procedures
- 1.8 All tasks are confirmed to ensure requirements for the relevant work area in accordance with workplace procedures

- 2**
- Prepare for work/task**
- 1.9** Information required to ensure that lifting equipment and gear inspection, use, maintenance and storage complies with manufacturer requirements is obtained and interpreted
 - 2.1** Consultation with workplace personnel is established and maintained to ensure all crane and lifting operations are clear and consistent with site requirements in accordance with a lift plan and workplace procedures
 - 2.2** Risk control measures for hazards identified are checked for implementation in accordance with the lift plan and safe work procedures
 - 2.3** Vehicle loading crane controls are accessed safely in accordance with manufacturer requirements and safe work procedures
 - 2.4** Pre-start vehicle loading crane checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements
 - 2.5** Vehicle loading crane is set up correctly with any lifting gear as per the lift plan and in accordance with relevant manufacturer requirements, including load chart/s and safe work procedures
 - 2.6** Boom/jib and lifting gear are set up, as required, in accordance with specific manufacturer requirements and safe work procedures
 - 2.7** Vehicle loading crane is stabilised appropriately in accordance with the lift plan, relevant manufacturer requirements and safe work procedures
 - 2.8** Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures
 - 2.9** Vehicle loading crane logbook is inspected and is correct for the crane type, is completed and signed, and required rectifications have been signed off in accordance with manufacturer requirements and safe work procedures
 - 2.10** Weather and work environment conditions are assessed to determine any impact on vehicle loading crane operations in accordance with manufacturer requirements and safe work procedures

- 2.11 Weight of load is identified, calculated or estimated
- 2.12 Derated WLL of lifting equipment resulting from selected slinging techniques is calculated
- 2.13 Suitable lifting points and slinging techniques are identified
- 2.14 Lifting equipment and gear is prepared for safe use
- 2.15 Load destination is confirmed for stability ensuring it is able to bear the load and is prepared for safe access and landing

3
Perform work/task

- 3.1 Lifts are determined within the RC of the vehicle loading crane in accordance with the load chart/s and lift plan
- 3.2 Boom/jib and hook block are safely positioned over the load following directions from associated personnel where applicable and in accordance with the lift plan and safe work procedures
- 3.3 Lifting equipment and gear are connected to the load and used safely in accordance with the lift plan, safe work procedures and manufacturer requirements
- 3.4 Test lift is carried out in accordance with safe work procedures
- 3.5 Loads are transferred using relevant crane movements and tag lines, as required, in accordance with lift plan and safe work procedures
- 3.6 Load and crane movement is monitored constantly and crane is operated safely in accordance with lift plan and safe work procedures
- 3.7 All required communication signals are correctly interpreted and followed whilst crane is operated in accordance with the lift plan and safe work procedures

3.8 Load is lowered and landed safely in accordance with lift plan and safe work procedures

3.9 Lifting gear is disconnected from load and crane is positioned safely and efficiently for next task in accordance with lift plan and safe work procedures

3.10 Lifting equipment and gear are inspected for defects, and defective items are isolated, tagged and reported

4 Pack up

4.1 Crane boom/jib, lifting gear and associated equipment are stowed and secured as required in accordance with manufacturer requirements and safe work procedures

4.2 Relevant motion locks and brakes are applied as required in accordance with manufacturer requirements and safe work procedures

4.3 Stabilisers are stowed and secured in accordance with manufacturer requirements and safe work procedures

4.4 Crane is shut down and secured to prevent unauthorised access/use in accordance with safe work procedures

4.5 Plates or packing are stowed and secured in accordance with safe work procedures

4.6 Shutdown crane checks are carried out in accordance with safe work procedures and manufacturer requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the TLI Transport and Logistics Training Package

Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC0002 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above).

Links

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLILIC0024 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant communication signals from associated personnel
- applying relevant crane movements, including:
 - boom/jib up and down (luffing)
 - catching load swing appropriately
 - positioning and using main hook and lifting gear to connect to load safely
 - raise and lower hoist
 - slew boom/jib
 - telescope in and out
- applying relevant mathematical calculations in conjunction with lift plan and load chart to determine radius requirements and relevant lifting gear to perform work/task to enable crane to be configured for load, including:
 - boom
 - stabiliser positioning
 - type of hook
- carrying out operational checks ensuring:
 - all controls are located, identified and tested for functionality
 - all hydraulic functions are operational
 - lifting gear movements and control functions are smooth and comply with lift plan
 - hazard warning systems, safety, audible and visual warning devices are checked to ensure they are functional, including:
 - reversing beepers
 - lights
 - horns
 - start-up is in accordance with manufacturer requirements and safe work procedures
 - there are no unusual noises
 - crane control functions comply with operating requirements
- communicating with other associated personnel through using appropriate worksite procedures, including:

- two-way radio
- active listening
- demonstrating and interpreting hand signals
- questioning to confirm understanding
- signage
- whistles
- written instructions
- completing pre-start checks, including:
 - engine/mechanical fluid level checks as required by manufacturer requirements
 - presence of correct logbook
 - evidence of damage
 - fluid leaks
 - lights work effectively
 - locating, identifying and confirming all controls
 - fire extinguisher
 - safety equipment checks
 - signage and labels to ensure they are visible and legible
 - checking for signs of paint separation and stressed welds indicating potential structural weakness
 - tyres and wheels for damage/wear and correct inflation
 - updating records as required
 - visual damage or equipment faults
- complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation
- conducting and applying risk and hazard assessment strategies, including:
 - confirming work area operating surface suitability based on crane and task requirements
 - dynamic loads
 - ground conditions, including condition of surface and slopes
 - load swing
 - overloading
 - lifting and placing load
 - tyre pressures and tyre condition
 - asymmetric loads
 - overhead hazards, including electric lines and service pipes
 - restricted and poorly ventilated areas
 - risk of collision with people, moving plant and fixed structures
 - adequate lighting
 - traffic, including pedestrians, vehicles and other plant
 - weather conditions
- confirming and following traffic management plan procedure relevant to their role in the

work area

- identifying hazards and using appropriate risk controls and safety measures and equipment relevant to slinging loads
- selecting and inspecting appropriate lifting gear and applying slinging techniques appropriate to the type of load, its mass and centre of gravity
- identifying the Working Load Limit (WLL) tags of the lifting equipment and gear and calculating the deration of the WLL resulting from the slinging techniques applied
- using lifting gear, including flexible steel wire rope (FSWR) sling, synthetic sling, chain sling (including shortener), spreader bar or lifting beam, tag line, shackles and eyebolts, and using bends and hitches when slinging, including:
 - single sheet bend
 - clove hitch
 - bowline
- determining any defects or faults with operation of crane and reporting to relevant person/s
- ensuring risk control measures within the work area are effective in accordance with workplace procedures
- identifying, isolating and tagging out defective lifting equipment, and reporting to authorised person/s
- interpreting and confirming relevant documentation for the work task and relevant area
- maintaining three points of contact whilst accessing load surface area of vehicle loading crane and ensure rungs/steps are free of hazards
- monitoring load disconnection from hook is safe and ensuring no movement of controls or the load
- operating a vehicle loading crane configured to its Rated Capacity (RC) of 10 metre tonnes or more to lift and move four different loads using the main hook through an obstacle course using all crane operational controls while the load is in full view of the crane operator. Loads must consist of:
 - a load of >50% of the RC of the crane with a boom length of >75%, and
 - a round load with a minimum length of 3 metres and minimum weight of at least 200 kg, and
 - an asymmetrical load, and
 - stillage or cage containing loose items with a minimum weight of at least 200 kg
- positioning the vehicle loading crane for safe operation for:
 - application of the task
 - manoeuvring in the workplace
 - stability of the vehicle loading crane and the load
- positioning vehicle loading crane in relevant area for next task
- recording and maintaining accurate information relating to crane operations
- reporting to relevant person/s on site risk control measures that are not in place or deficient
- setting up and validating an exclusion zone
- shutting down a vehicle loading crane in accordance with manufacturer requirements and safe work procedures
- stabilising a vehicle loading crane for operation by:

- correctly positioning plates or packing
- deploying stabilisers
- establishing correct size plates or packing in accordance with lift plan
- levels are checked
- test-lifting load just clear of lifting plane to allow for checks to be safely made to ensure:
 - slinging is correct
 - all crane equipment is functioning properly
 - load centre of gravity is correct
 - loads of unusual shape or weight distribution are correctly slung
- using communications signals, including:
 - hoist down - hand and whistle and radio
 - hoist up - hand and whistle and radio
 - luff boom down - hand and whistle and radio
 - luff boom up - hand and whistle and radio
 - slew left - hand and whistle and radio
 - slew right - hand and whistle and radio
 - stop - hand and whistle and radio
 - telescope in - hand and whistle and two-way radio (where manufacturer requirements allow)
 - telescope out - hand and whistle and two-way radio (where manufacturer requirements allow).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate worksite communication procedures, including:
 - listening
 - hand signals
 - questioning techniques
 - signage
 - two-way radios
 - written instructions
 - whistles
- characteristics and impact of factors affecting vehicle loading crane stability whilst moving loads, including:
 - overloading
 - poor load placement
 - asymmetric loads
 - tyre deflation/condition

- crane, lifting gear load chart/s and manufacturer requirements
- hazards, including:
 - pack up and crane stability, crane tipping and demolition sites
 - ground stability, including ground condition, recently filled trenches and slopes
 - insufficient lighting
 - obstacles or obstruction
 - other specific hazards and dangerous materials
 - overhead hazards, including:
 - electric lines
 - service pipes
 - fixed structures
 - vegetation (trees)
 - traffic, including pedestrians, vehicles and other plant
 - operations on unusual, uneven or difficult terrains
- lift impacting factors, including:
 - centre of gravity
 - dynamic nature of load
 - flex/deflexion of load
 - length
 - radius of lift
 - weight
- manufacturer requirements on stabiliser procedures
- manufacturer requirements and instructions on shutting down and packing up crane
- mathematical calculations to:
 - estimate loads
 - establish radius requirements
 - determine relevant lifting gear to perform work/task
- pre-start and operational checks required for a vehicle loading crane
- problems and appropriate response procedures to unplanned and/or unsafe situations and environmental conditions
- relevant documentation requirements and procedures for recording, reporting and maintaining workplace records and information
- relevant workplace instructions, safety information and emergency procedures
- risk assessment management and mitigation strategies, including hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)

- roles and responsibilities of duty holders in accordance with legislative obligations of WHS/OHS requirements and safe work/workplace procedures
- hazards commonly encountered while slinging:
 - instability of landing surfaces
 - overhead and underground hazards
 - insufficient lighting
 - traffic
 - weather
 - pedestrian traffic
 - work at heights
- selection, inspection, care, handling, application, limitations and storage of lifting equipment and gear:
 - Flexible Steel Wire Rope (FSWR) sling
 - synthetic sling
 - chain sling (including shortener)
 - spreader bar or lifting beam
 - tag line
 - shackles
 - eyebolts
- methods of making temporary connections to loads using fibre and/or synthetic ropes:
 - single sheet bend
 - clove hitch
 - bowline
- stability of load and avoidance of hazards, including:
 - allowing for boom deflection
 - boom/jib as low as possible
 - crane stability
 - gently accelerating and braking on slew/boom to minimise load swing
 - lowering load safely onto appropriate dunnage taking into consideration swing and restrictions of area
 - minimum boom/jib length
 - minimum speed
 - using handheld tag lines as required
 - identification of incorrect sling of load
- starting procedure of crane in accordance with manufacturer requirements
- set-up of:
 - jib
 - fly jib (where fitted)
- vehicle loading crane characteristics and capabilities to allow crane configuration to suit a range of loads
- weather bureau forecasts and environmental conditions that could impact operation,

including:

- lightning
- wind
- water impacted ground
- ultraviolet (UV) exposure
- work area suitability based on relevant ground reports, including:
 - backfilled ground
 - bitumen
 - concrete
 - hard compacted soil
 - pre-contaminated soils
 - rock
 - rough, uneven ground
 - soft soils
- workplace standards, requirements, policies and procedures for conducting operations for the vehicle loading crane.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- vehicle loading crane with a RC of 10 metre tonnes or more in safe/serviceable working order in accordance with manufacturer specifications
- appropriate loads as outlined in the Performance Evidence requirements
- communication equipment, including:
 - two-way radios
 - whistles
- relevant personal protective equipment (PPE)
- relevant documentation for operating a vehicle loading crane with an RC of 10 metre tonnes or more, including:

- approved codes of practice and relevant guidance material
- relevant Australian technical standards
- manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable).

TLILIC2014 Licence to drive a light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to obtain a licence to drive a light rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of light rigid vehicles include:

- a rigid truck above 4.5 tonnes GVM but less than or equal to 8 tonnes GVM or
- a rigid bus with less than or equal to 8 tonnes GVM or seats more than 12 adults, including the driver.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

This unit applies to driving that is carried out in accordance with relevant state/territory driver licensing authority licence requirements and regulations for light rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and to operate a light rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Light Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Light Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm other eligibility requirements before undertaking training and/or assessment.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Drive a light rigid vehicle

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations, manufacturer instructions and relevant vehicle handling procedures
 - 1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage
 - 1.3 Braking system of light rigid vehicle is managed and operated efficiently to ensure effective control of vehicle under all conditions
 - 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
 - 1.5 Light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
 - 1.6 Light rigid vehicle is parked, shutdown and safely secured in accordance with traffic regulations
 - 1.7 Load is safely and effectively restrained
- 2 Monitor traffic and road conditions
 - 2.1 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
 - 2.2 Interaction with other road users is conducted courteously in accordance with road rules to ensure safe and efficient traffic flow
 - 3 Monitor and
 - 3.1 Vehicle performance is maintained through pre-operational

maintain vehicle performance

inspections and vehicle checks

- 3.2 Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2014B Licence to drive a light rigid vehicle.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLILIC2014 Licence to drive a light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- anticipating and monitoring traffic hazards and taking appropriate action
- applying precautions and required action to eliminate, minimise or control identified hazards
- applying relevant procedures that reflect legislative requirements
- carrying out pre-operational vehicle checks including:
 - checking and topping up fluid levels
 - checking:
 - brakes
 - operation of vehicle lights and indicators
 - tyre pressures
 - visually checking vehicle
- communicating effectively with others
- handling vehicle including:
 - accelerating and braking
 - managing engine performance
 - operating vehicle controls, instruments and indicators
 - positioning and stopping a vehicle
 - reversing a vehicle
 - starting a vehicle
 - steering and manoeuvring a vehicle
 - using defensive driving techniques
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
- reading and interpreting relevant instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- light rigid vehicle controls, instruments and indicators, and their use
- light rigid vehicle handling procedures
- pre-operational checks carried out on vehicle and related action
- relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit, in accordance with licensing authority requirements

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Assessment must occur in the following traffic and road conditions:

- on open and/or private roads with moderate inclines and declines
- typical weather conditions.

and may also include traffic and road conditions at a depot, base or warehouse.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- appropriate range of relevant on-road operational or workplace situations
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLILIC2015 Licence to drive a medium rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to obtain a licence to drive a medium rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of medium rigid vehicles include:

- two axle rigid trucks, not being a prime mover, above 8 tonnes GVM or
- a two axle bus above 8 tonnes GVM.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

This unit applies to driving that is carried out in accordance with relevant state/territory driver licensing authority licence requirements and regulations for medium rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and to operate a medium rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Medium Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Medium Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm other eligibility requirements before undertaking training and/or assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit, in accordance with licensing authority requirements.

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Assessment must occur in the following traffic and road conditions:

- on open and/or private roads with moderate inclines and declines
- typical weather conditions.

and may also include traffic and road conditions at a depot, base or warehouse.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- appropriate range of relevant on-road operational or workplace situations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes to PC 2.2, 2.4 and 2.7
- Minor statement changes from Performance Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Analyse supply requirements

2 Evaluate potential contractors

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Purpose and specifications of required goods/services are identified
- 1.2 Criteria to evaluate potential or existing contractor performance is established
- 1.3 Quantities of required goods/services are determined
- 1.4 Frequency of ordering/requesting of goods/services is identified
- 2.1 Contractors of requested goods/materials/services are identified
- 2.2 Comparative costings for goods/materials/services are obtained in accordance with regulatory and organisational policies and procedures
- 2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed
- 2.4 Contractors are evaluated in relation to established criteria and in accordance with regulatory and organisational policies and procedures
- 2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service
- 2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors
- 2.7 Information and data generated during selection process is filed and maintained in accordance with organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4002A Source goods/services and evaluate contractors.

Links

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes to PC 2.2, 2.4 and 2.7
- Minor statement changes from Performance Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace policies and procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors,

and related appropriate action that can be taken

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services and evaluating potential supply contractors.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to administer inventory systems. It includes identifying inventory systems, tracking inventory, planning and administering inventory systems and completing inventory audits and reports.

Inventory is defined as the quantity of goods owned and stored by an organisation that is intended either for resale or is raw materials and components used in producing goods that are then sold.

Inventory systems provide visibility and integration in the supply chain and they are used to record transactions associated with receiving, reducing or writing inventory off. An inventory system can include desktop software, barcode scanners, barcode labels, mobile devices and applications.

The unit is applicable to those with responsibilities for inventory systems within a supply chain. No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X - Logistics

Unit Sector

Cross sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Identify inventory systems**
 - 1.1** Software, applications and devices used in the inventory system are identified
 - 1.2** Third party inventory control operations are verified
 - 1.3** Demand forecasting methods and tools are determined
 - 1.4** Inventory system policies, procedures and processes are confirmed
- 2 Plan and administer inventory**
 - 2.1** Inventory characteristics are ascertained
 - 2.2** Stock specifications, locations, labels and reference numbers are validated using the inventory system
 - 2.3** Receipt and despatch stock is securely stored in designated locations and the inventory system is updated, as required
 - 2.4** Stock is monitored and reordered to meet optimum replenishment requirements, in accordance with organisational inventory procedures
 - 2.5** Stock is requisitioned and documentation is updated on the inventory system, as required
 - 2.6** Stock sorting, recycling and disposal is undertaken, in accordance with organisational inventory procedures
 - 2.7** Stock damage and losses against forecasts are assessed and investigations are completed into unacceptable cases
 - 2.8** Stock security is maintained, in accordance with organisational inventory procedures
- 3 Track inventory**
 - 3.1** Inventory is monitored and tracked using the inventory system
 - 3.2** Buyers are kept informed of stock levels, in accordance with organisational inventory procedures
 - 3.3** Inventory transactions are monitored, in accordance with organisational inventory procedures
 - 3.4** Reorder cycles are adjusted to maintain consistent

supply, as required

- 3.5 Discrepancies, out of specification and redirection opportunities are managed and reported using the inventory system
 - 3.6 Inventory reports are analysed and corrective action is taken, as required
 - 3.7 Vendor Managed Inventory (VMI) systems are used to manage inventory, as required
- 4 Complete inventory audits and reports**
- 4.1 Inventory audits and cycle counts are performed, in accordance with organisational inventory procedures
 - 4.2 Report on inventory system management is produced, in accordance with organisational inventory procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to TLIA3016 Use inventory systems to organise stock control.

Assessment Requirements for TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing and managing stock quality including analysing discrepancies, out of specification and redirection opportunities
- categorising and labelling stock
- checking inventory specifications
- ensuring handling, sorting, disposal and recycling of stock is performed
- following organisational inventory policies and procedures
- identifying inventory characteristics
- maintaining and managing optimum stock levels
- meeting inventory system documentation requirements
- monitoring stock security
- reading and interpreting information and data related to inventory systems
- recording and maintaining inventory information
- undertaking quality control
- using the inventory system including inventory software and applications
- utilising Vendor Managed Inventory (VMI) systems
- validating third party inventory control operations.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- features of inventory systems
- financial implications of inventory management
- inventory documentation and reporting requirements including those for discrepancies, out of specification and redirection opportunities
- inventory loss and damage control
- inventory policies and procedures
- inventory tracking and security
- layout of inventory storage areas

- maintenance and monitoring of stock quality and levels
- methods for categorising and labelling inventory
- principles of inventory management
- principles of quality control
- reorder cycles
- storage conditions for the maintenance of inventory including product life cycles, maximising use, rotation and replenishment requirements
- third party inventory control operations
- types of inventory systems
- valuation methods for different inventory items
- Vendor Managed Inventory (VMI) systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
 - inventory systems and stock control equipment and tools
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to maintain stock control and receivals. It includes establishing supply arrangements, monitoring and maintaining stock, processing receivals and storing stock, determining stock wastage and discrepancies and performing stock audits and reporting.

Stock control involves the monitoring and managing of an organisation's stock. It applies to all stock at every stage of the production process from purchasing and delivery to using and reordering stock.

Receivals is the function of checking items delivered as new stock or supplies. It requires the inspection of goods and materials for quality, condition and quantity and the allocating of space in the storage facility or warehouse.

The unit is applicable to those with responsibilities for stock control and/or receivals within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X - Logistics

Unit Sector

Cross sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Establish supply arrangements

- 1.1 Approved business data, forecasting methods and measures to calculate stock levels for standard business periods, peak seasons and special events are established
- 1.2 Optimum supply arrangements are sourced and negotiated using approved purchasing specifications
- 1.3 Stock quantities and cost effective terms of purchase are established
- 1.4 Agreements are recorded, in accordance with stock control and receipt procedures

2 Monitor and maintain stock

- 2.1 Stock control systems and equipment to administer and monitor ordering processes and procedures, including real time tracking information from stock handling and data collection technologies, are used
- 2.2 Stock levels and reorder cycles are monitored and maintained using approved forecasting methods and tools
- 2.3 Evaluation of stock against specifications, including adjusting sources of supply, is undertaken, as required
- 2.4 Optimal safety stock placement and service level optimisation is monitored, in accordance with the continuity plan and stock control and receipt procedures
- 2.5 Stock levels are recorded and reported, in accordance with stock control and receipt procedures

3 Process receivals and store stock

- 3.1 Orders for stock are processed and documented, including checking and recording receivals, against purchase and supply agreements
- 3.2 Stock is distributed, transported and stored in an approved storage area using safe manual handling techniques
- 3.3 Stock is inspected for quality, use by dates and damage
- 3.4 Stock is labelled and any excess is reported, in accordance with stock control and receipt

procedures

- | | | |
|--|------------|--|
| 4 Determine stock wastage and discrepancies | 4.1 | Control system and procedures for stock with high wastage or loss is implemented |
| | 4.2 | Stock is rotated for maximum use and minimum wastage, as required |
| | 4.3 | Excess or spoilt stock, including hazardous substances, is disposed of safely, in accordance with stock control and receipt procedures |
| | 4.4 | Stock losses and discrepancies are recorded, in accordance with stock control and receipt procedures, and security measures are reviewed |
| 5 Perform stock audits and report | 5.1 | Stock audits are performed and reports are produced within designated timeframes |
| | 5.2 | Audit findings and discrepancies in stock and receivals are reported to approved personnel |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to TLIA3038 Control and order stock and TLIA3039 Receive and store stock.

Assessment Requirements for TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing stock loss, wastage, excesses and discrepancies
- completing stock orders and receivals within established timelines
- disposing of stock safely including hazardous substances
- forecasting stock and receivals using approved methods and tools
- identifying supply sources for different types of products
- identifying third party inventory control operations
- implementing cost effective stock purchasing and control systems
- maintaining stock and receival data and records
- monitoring optimal safety stock placement and service level optimisation
- monitoring stock control systems, stock quality and cost effectiveness of supplies
- performing stock audits
- producing stock control reports
- receiving, storing, monitoring and maintaining stock levels over life cycle periods
- undertaking supplier and customer relationship management
- utilising stock handling, receivals and data collection technologies
- working with continuity plan and stock control and receival policies and procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- continuity plans
- contractual and preferred supplier arrangements
- disposal methods for stock and waste including hazardous substances
- stock control and receivals policies and procedures
- principles of stock control including:
 - approaches to calculating stock levels and replenishment requirements
 - factors that may influence purchase specifications

- forecasting methods for calculating inventory consumption
- methods and tools for calculating cost effective stock quantities including
 - methods of stock control including FIFO (First In, First Out) and LIFO (Last In, First Out)
 - standard measures and formulas for yield testing
 - stock control systems including bin card system, imprest system, integrated point of sale system and ledger systems
- product life and storage requirements for specific stock
- real time information using stock data technologies
- report requirements on stock loss, wastage, excesses and discrepancies
- safe manual handling techniques
- safe stock placement and service level optimisation
- security measures for stock including storage and tracking
- stock control audits
- stock ordering and delivery processes
- stock quality control
- stock reorder cycles for standard business periods, peak seasons and special events
- supplier and customer relationship management
- supply sources for different types of products
- types of computerised stock control systems, their functions and features.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
 - access to suppliers with whom the learner can interact, commercial purchase specifications, stock control procedures and reports and costs and contractual documentation used for the purchase of stock
 - stock control software systems and applications
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

FWPSS00039 Skill Set for Hydraulic Maintenance of Saw Technology

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 5.0.

Description

This skill set reflects the roles of Saw Technicians to inspect, test, maintain and troubleshoot advanced hydraulic systems and components on sawing machine centres.

Pathways Information

These units of competency may provide credit towards FWP31019 Certificate III in Saw Technology. They may also provide pathways to higher level technical qualifications or opportunities to transition into related manufacturing and engineering areas.

Licensing/Regulatory Information

No licensing or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details. All prerequisite units are included in the skill set.

- MEM09002* Interpret technical drawing
- MEM11011* Undertake manual handling
- MEM12023* Perform engineering measurements
- MEM12024* Perform computations
- MEM13003* Work safely with industrial chemicals and materials
- MEM13015 Work safely and effectively in manufacturing and engineering
- MEM14006* Plan work activities
- MEM16006* Organise and communicate information
- MEM18001* Use hand tools
- MEM18002* Use power tools/hand held operations

- MEM18003* Use tools for precision work
- MEM18006* Perform precision fitting of engineering components
- MEM18020* Maintain hydraulic system components
- MEM18021* Maintain hydraulic systems
- MEM18055* Dismantle, replace and assemble engineering components
- MEM18071* Connect and disconnect fluid conveying system components

Prerequisite requirements

Unit of competency	Prerequisite requirement
MEM09002 Interpret technical drawing	MEM12023 Perform engineering measurements MEM12024 Perform computations MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM11011 Undertake manual handling	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM12023 Perform engineering measurements	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM12024 Perform computations	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM13003 Work safely with industrial chemicals and materials	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM14006 Plan work activities	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information

This skill set reflects the roles of Saw Technicians to inspect, test, maintain and troubleshoot advanced pneumatic systems and components on sawing machine centres.

Pathways Information

These units of competency may provide credit towards FWP31019 Certificate III in Saw Technology. They may also provide pathways to higher level technical qualifications or opportunities to transition into related manufacturing and engineering areas.

Licensing/Regulatory Information

No licensing or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details. All prerequisite units are included in the skill set.

- MEM09002* Interpret technical drawing
- MEM11011* Undertake manual handling
- MEM12023* Perform engineering measurements
- MEM12024* Perform computations
- MEM13015 Work safely and effectively in manufacturing and engineering
- MEM14006* Plan work activities
- MEM16006* Organise and communicate information
- MEM18001* Use hand tools
- MEM18002* Use power tools/hand held operations
- MEM18003* Use tools for precision work

- MEM18006* Perform precision fitting of engineering components
- MEM18018* Maintain pneumatic system components
- MEM18019* Maintain pneumatic systems
- MEM18055* Dismantle, replace and assemble engineering components

Prerequisite requirements

Unit of competency	Prerequisite requirement
MEM09002 Interpret technical drawing	MEM12023 Perform engineering measurements MEM12024 Perform computations MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM11011 Undertake manual handling	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM12023 Perform engineering measurements	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM12024 Perform computations	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM14006 Plan work activities	MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM16006 Organise and communicate information	MEM13015 Work safely and effectively in manufacturing and engineering
MEM18001 Use hand tools	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM18002 Use power tools/hand held operations	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering

	MEM16006 Organise and communicate information
MEM18003 Use tools for precision work	MEM11011 Undertake manual handling MEM12023 Perform engineering measurements MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information MEM18001 Use hand tools MEM18002 Use power tools/hand held operations
MEM18006 Perform precision fitting of engineering components	MEM09002 Interpret technical drawing MEM11011 Undertake manual handling MEM12023 Perform engineering measurements MEM12024 Perform computations MEM13015 Work safely and effectively in manufacturing and engineering MEM14006 Plan work activities MEM16006 Organise and communicate information MEM18001 Use hand tools MEM18002 Use power tools/hand held operations MEM18003 Use tools for precision work MEM18055 Dismantle, replace and assemble engineering components
MEM18018 Maintain pneumatic system components	MEM09002 Interpret technical drawing MEM11011 Undertake manual handling MEM12023 Perform engineering measurements MEM12024 Perform computations MEM13015 Work safely and effectively in manufacturing and engineering MEM14006 Plan work activities MEM16006 Organise and communicate information MEM18001 Use hand tools MEM18002 Use power tools/hand held operations MEM18003 Use tools for precision work MEM18006 Perform precision fitting of engineering components

	MEM18055 Dismantle, replace and assemble engineering components
MEM18019 Maintain pneumatic systems	MEM09002 Interpret technical drawing MEM11011 Undertake manual handling MEM12023 Perform engineering measurements MEM12024 Perform computations MEM13015 Work safely and effectively in manufacturing and engineering MEM14006 Plan work activities MEM16006 Organise and communicate information MEM18001 Use hand tools MEM18002 Use power tools/hand held operations MEM18003 Use tools for precision work MEM18006 Perform precision fitting of engineering components MEM18018 Maintain pneumatic system components MEM18055 Dismantle, replace and assemble engineering components
MEM18055 Dismantle, replace and assemble engineering components	MEM09002 Interpret technical drawing MEM11011 Undertake manual handling MEM12023 Perform engineering measurements MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information MEM18001 Use hand tools MEM18002 Use power tools/hand held operations

Target Group

This skill set is for Saw Technicians who inspect, test, maintain and troubleshoot pneumatic systems and components on sawing machine centres to achieve sawing production rates and product tolerances.

Suggested words for Statement of Attainment

These competencies from the *MEM Training Package* meet the industry requirements to conduct pneumatic maintenance of sawing machine centres.

FWPSS00041 Cutting Timber to Length and Angle Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to cut timber to specified lengths and angles for use in the fabrication of timber wall frames and/or floor or roof trusses. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT3226 Assess timber for manufacturing potential
- FWPCOT3234 Cut material using CNC sizing machines
- FWPTMM2205 Cut material to length and angles
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for entry level fabricators working in the timber frame and truss manufacturing industry.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package* and the *TLI Transport and Logistics Training Package* meet the industry requirements for cutting timber for the fabrication of timber frames and trusses.

FWPSS00042 Timber Wall Frame Manufacture Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to assemble timber wall frames. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment, assess timber and apply information from fabrication plans to the assembly of timber wall frames.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- CPCCOM1015 Carry out measurements and calculations
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2257 Use hand-held tools
- FWPCOT3226 Assess timber for manufacturing potential
- FWPCOT3308 Assemble timber wall frames
- FWPTMM3213 Read and interpret timber truss or wall frame fabrication plans
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who assemble timber wall frames.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package*, *TLI Transport and Logistics Training Package* **and** the *CPC Construction, Plumbing and Services Training Package* meet the industry requirements for assembling timber wall frames.

FWPSS00043 Timber Roof Truss Manufacture Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to assemble timber roof trusses. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment, assess timber and apply information from fabrication plans to the assembly of timber roof trusses.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- CPCCOM1015 Carry out measurements and calculations
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2257 Use hand-held tools
- FWPCOT3226 Assess timber for manufacturing potential
- FWPCOT3309 Assemble timber roof trusses
- FWPTMM3213 Read and interpret timber truss or wall frame fabrication plans
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who assemble timber roof trusses.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package*, *TLI Transport and Logistics Training Package* and the *CPC Construction, Plumbing and Services Training Package* meet the industry requirements for assembling timber roof trusses.

FWPSS00044 Timber Floor Truss Manufacture Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to assemble timber floor trusses. It includes applying knowledge and skills to work and handle materials safely in a manufacturing environment, assess timber and apply information from fabrication plans to the assembly of timber floor trusses.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Truss or Frame Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- CPCCOM1015 Carry out measurements and calculations
- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2257 Use hand-held tools
- FWPCOT3226 Assess timber for manufacturing potential
- FWPTMM3213 Read and interpret timber truss or wall frame fabrication plans
- FWPTMM3214 Assemble timber floor trusses
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who assemble timber floor trusses.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package*, *TLI Transport and Logistics Training Package* and the *CPC Construction, Plumbing and Services Training Package* meet the industry requirements for assembling timber floor trusses.

FWPSS00045 Stacking and Storing Timber Frames and Trusses Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to stack and store assembled timber wall frames and/or roof or floor trusses. It also includes applying knowledge and skills to work and handle materials safely in a manufacturing environment.

Pathways Information

These units of competency provide credit towards FWP30920 Certificate III in Timber Frame or Truss Manufacture from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2205 Follow WHS policies and procedures
- FWPCOT2206 Stack and bind material
- FWPCOT2255 Store materials
- TLID1001 Shift materials safely using manual handling methods

Target Group

This skill set is for fabricators working in the timber frame and truss manufacturing industry who stack and store assembled frames and trusses for dispatch.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package* and *TLI Transport and Logistics Training Package* meet the industry requirements for stacking and storing timber frames and trusses.

FWPSS00046 Infield Wood Chipping Machine Operator Skill Set (Flail and Wood Chipper with Crane)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.2. This skill set supersedes and is not equivalent to FWPSS00014 Skill set for a heavy production mobile chipper operator.

Description

This skill set provides skills and knowledge to operate an integrated or split flail and wood chipper with crane while following workplace safety, health and environmental procedures in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Pathways Information

These units provide credit towards a range of qualifications from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWPHAR3203 Operate integrated or split flail and wood chipper with crane
- HLTAID011 Provide First Aid

Target Group

This skill set is for people wishing to work as infield mobile chipper operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for Infield Wood Chipping Machine Operator (Flail and Wood Chipper with Crane).

FWPSS00047 Infield Wood Chipping Machine Operator Skill Set (Flail and Wood Chipper Fed by a Mobile Machine)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.2. This skill set supersedes and is not equivalent to FWPSS00014 Skill set for a heavy production mobile chipper operator.

Description

This skill set provides skills and knowledge to operate a split flail and wood chipper fed by mobile machine while following workplace safety, health and environmental procedures in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Pathways Information

These units provide credit towards a range of qualifications from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2203 Follow environmental care procedures
- FWPCOR2205 Follow WHS policies and procedures
- FWP HAR3204 Operate split flail and wood chipper fed by mobile machine
- HLTAID011 Provide First Aid

Target Group

This skill set is for people wishing to work as infield mobile chipper operator in a commercial forest operation in the harvesting and haulage sector of the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for Infield Wood Chipping Machine Operator (Flail and Wood Chipper Fed by a Mobile Machine).

FWPSS00048 Mechanical Processor Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00016 Skill set for a mechanical processor operator.

Description

This skill set provides the skills and knowledge required to operate a mechanical processor in a commercial forest harvesting environment while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3234 Conduct mechanical processor operations

Target Group

This skill set is for people wishing to work as a mechanical processor operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a mechanical processor in a commercial forest harvesting environment.

FWPSS00049 Native Forest Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. This skill set supersedes and is equivalent to FWPSS00017 Skill set for a native forest operator.

Description

This skill set provides the skills and knowledge required to comply with soil, water, biodiversity and cultural heritage protection requirements and apply silviculture methods in a commercial native forest operation. It also provides the skills and knowledge to follow workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPCOT3313 Apply biodiversity protection principles
- FWPCOT3314 Comply with soil and water protection
- FWPCOT3324 Apply cultural heritage protection requirements in forest operations
- FWPSIL3001 Apply sustainable silviculture treatments

Target Group

This skill set is for people wishing to work as a forestry or harvesting technical officer in commercial native forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for native forest operators.

FWPSS00050 Plantation Forest Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. This skill set supersedes and is equivalent to FWPSS00018 Skill set for a plantation forest operator.

Description

This skill set provides that skills and knowledge required to comply with soil, water and cultural heritage protection requirements in a commercial plantation forest operation. It also provides the skills and knowledge to follow workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPCOT3314 Comply with soil and water protection
- FWPCOT3324 Apply cultural heritage protection requirements in forest operations

Target Group

This skill set is for people wishing to work as a forestry or harvesting technical officer in a commercial plantation forest operation.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for plantation forest operators.

FWPSS00051 Fire Salvage Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. This skill set supersedes and is equivalent to FWPSS00022 Skill set for fire salvage operations.

Description

This skill set provides the skills and knowledge to undertake fire salvage operations while applying workplace safety and environmental requirements.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPCOT3311 Use environmental care procedures to undertake fire salvage operations

Target Group

This skill set is for people wishing to work as a forestry or harvesting technical officer in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for fire salvage operations.

FWPSS00052 Off Road Four Wheel Drive Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00023 Skill set for off road four wheel drive operations.

Description

This skill set provides the skills and knowledge required to safely operate a four wheel drive vehicle on unsealed terrain types within the forest industry.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

Licensing requirements apply to this skill set at the time of publication. Users are advised to check with the relevant regulatory authority.

Skill Set Requirements

- FWPCOT2265 Navigate in forest areas
- FWPCOT3325 Operate four wheel drive vehicle on unsealed roads
- FWPCOT3326 Recover four wheel drive vehicle
- FWPCOT3328 Operate four wheel drive vehicle in a towing situation
- FWPCOT3329 Perform complex four wheel drive operations

Target Group

This skill set is for people wishing to operate a four wheel drive vehicle on unsealed terrain within the forest industry.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a four wheel drive vehicle on unsealed terrain.

FWPSS00053 Soil and Water Protection (Roading) Skill Set

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 7.0. This skill set supersedes and is equivalent to FWPSS00024 Skill set for soil and water protection (roading).

Description

This skill set provides the skills and knowledge required to implement soil and water protection procedures in a forest roading operation while applying workplace health and safety procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCSAW304 Implement erosion and sediment control measures
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPCOT3314 Comply with soil and water protection

Target Group

This skill set is for forestry workers and people wishing to work in a forest soil and water protection role within a forestry environment.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management and FWP Forest and Wood Products Training Packages meet the industry requirements for soil and water protection in a forest roading operation.

FWPSS00054 Log Truck Driver Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. This skill set supersedes and is equivalent to FWPSS00026 Skill set for a forestry log truck driver.

Description

This skill set provides the skills and knowledge required to transport forestry logs using trucks while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

Licensing requirements apply to this skill set at the time of publication. Users are advised to check with the relevant regulatory authority.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPCOT3315 Transport forestry logs using trucks

Target Group

This skill set is for people wishing to work as a log truck driver in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for transporting forestry logs by truck.

FWPSS00055 Forestry Produce Truck Driver Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. This skill set supersedes and is equivalent to FWPSS00027 Skill set for a forestry produce truck driver.

Description

This skill set provides the skills and knowledge required to transport forestry produce using trucks while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

Licensing requirements apply to this skill set. Users are advised to check with the relevant regulatory authority.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPCOT3316 Transport forestry produce using trucks

Target Group

This skill set is for people wishing to work as a truck driver transporting forestry produce (apart from forestry logs) in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for transporting forestry produce by truck.

FWPSS00056 Crawler Tractor Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00032 Skill set for a crawler tractor operator.

Description

This skill set provides the skills and knowledge required to operate a crawler tractor in a commercial forest harvesting environment while applying workplace safe, health and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3224 Operate crawler tractor

Target Group

This skill set is for people wishing to work as a crawler tractor operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a crawler tractor in a commercial forest harvesting environment.

FWPSS00057 Feller Buncher Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00033 Skill set for a feller buncher operator.

Description

This skill set provides the skills and knowledge required to operate a feller buncher in a commercial forest harvesting environment while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3226 Operate feller buncher

Target Group

This skill set is for people wishing to work as a feller buncher operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a feller buncher in a commercial forest harvesting environment.

FWPSS00058 Forwarder Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00034 Skill set for a forwarder operator.

Description

This skill set provides the skills and knowledge required to operate a forwarder in a commercial forest harvesting environment while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3227 Operate forwarder

Target Group

This skill set is for people wishing to work as a forwarder operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a forwarder in a commercial forest harvesting environment.

FWPSS00059 Loader Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00035 Skill set for a loader operator.

Description

This skill set provides the skills and knowledge required to operate a loader in a commercial forest harvesting environment while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3228 Operate loader

Target Group

This skill set is for people wishing to work as a loader operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a loader in a commercial forest harvesting environment.

FWPSS00060 Single Grip Harvester Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00036 Skill set for a single grip harvester operator.

Description

This skill set provides the skills and knowledge required to operate a single grip harvester in a commercial forest harvesting environment while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3229 Operate single grip harvester

Target Group

This skill set is for people wishing to work as a single grip harvester operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a single grip harvester in a commercial forest harvesting environment.

FWPSS00061 Skidder Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00037 Skill set for a single grip harvester operator.

Description

This skill set provides the skills and knowledge required to operate a skidder in a commercial forest harvesting environment while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3230 Operate skidder

Target Group

This skill set is for people wishing to work as a skidder operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating a skidder in a commercial forest harvesting environment.

FWPSS00062 Excavator with Log Grapple Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0. It supersedes and is equivalent to FWPSS00038 Skill set for a single grip harvester operator.

Description

This skill set provides the skills and knowledge required to operate an excavator with log grapple in a commercial forest harvesting environment while applying workplace safety and environmental procedures.

Pathways Information

These units of competency provide credit towards *FWP30121 Certificate III in Forest Operations* from the FWP Forest and Wood Products Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- FWPCOR2209 Follow environmental protection procedures in forest and wood products operations
- FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations
- FWPHAR3225 Operate excavator with log grapple

Target Group

This skill set is for people wishing to work as an excavator with log grapple operator in commercial forest operations.

Suggested words for Statement of Attainment

These competencies from the FWP Forest and Wood Products Training Package meet the industry requirements for operating an excavator with log grapple in a commercial forest harvesting environment.
