

# Assessment Requirements for HLTAHPR007 Promote lifestyle change

Release: 1

## Assessment Requirements for HLTAHPR007 Promote lifestyle change

#### **Modification History**

Not applicable.

#### **Performance Evidence**

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide information about lifestyle disease and making lifestyle changes to Aboriginal and/or Torres Strait Islander clients including:
  - two individual clients
  - one group of a minimum of three people
- on each occasion:
  - provide information covering:
    - the incidence of lifestyle disease in Aboriginal and/or Torres Strait Islander communities
    - lifestyle risk factors, particularly those relevant to the client/s, and their potential short and long term impacts on health
    - recommendations for healthy eating and healthy ways to prepare and cook food using the Australian national dietary guidelines
    - recommendations for physical activity based on the Australian national physical activity guidelines
    - common barriers to initiation of lifestyle change, particularly those relevant to the client, and how these might be overcome
    - techniques for making lifestyle change including ways to set goals and monitor progress towards achievement
  - seek and evaluate feedback from clients and provide to relevant people within the health service
- discuss lifestyle concerns with two clients and respond by providing referrals to relevant health professionals or support services.

### **Knowledge Evidence**

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- · organisational procedures for referral
- role and limitations of Aboriginal and/or Torres Strait Islander health care workers and practitioners in providing healthy lifestyle education to clients and types of situations when referral is indicated

Approved Page 2 of 6

- roles of medical, allied health professionals and others in providing healthy lifestyle advice and change practices, and their expertise in addressing different needs:
  - medical practitioners and registered nurses
  - · accredited practising dietitians
  - exercise physiologists
  - alcohol and other drug counsellors
- nutritional, physical activity and drug and alcohol support services available in the community, state or territory
- physical activity groups operating in the local community
- how to access current and credible:
  - consumer based education resources about lifestyle risk factors and healthy lifestyle practices
  - statistics for lifestyle disease in Aboriginal and/or Torres Strait Islander and other Australian populations
  - · visual aids for lifestyle education
- meaning of lifestyle disease and modifiable behavioural risk factors
- types of lifestyle disease and their prevalence and statistical incidence in Aboriginal and/or Torres Strait Islander populations compared to non-Aboriginal and/or Torres Strait Islander populations:
  - cardiovascular disease
  - diabetes
  - obesity
  - chronic respiratory disease
  - alcoholic liver disease and cirrhosis
  - drug related infectious disease
- lifestyle risk factors and their short and long term impacts on health:
  - smoking
  - physical inactivity
  - unhealthy nutrition and body weight
  - consumption of alcohol at unsafe levels
  - use of illicit drugs
- key recommendations and healthy eating guidance contained in current Australian national dietary guidelines and associated resources:
  - the principal recommendations and guidelines
  - characteristics of the five food groups and the nutrients they contribute to the diet
  - daily patterns of healthy eating and recommended proportions of the five food groups
  - types of discretionary foods to be limited and why
  - · recommended daily intake of alcohol
  - nutritional needs of people at different stages in the lifecycle
- daily living skills, informed by national dietary guidelines, that support clients with healthy eating:

Approved Page 3 of 6

- how to interpret food labels, including health star rating labelling systems to support healthier food choices
- healthy ways to prepare and cook food
- · safe food preparation and storage
- key contents of current Australian national physical activity guidelines including guidelines for frequency, intensity and types of exercises:
  - movement guidelines for the early years, children and young people
  - physical activity guidelines for adults
  - physical activity guidelines for older people
- the benefits to health and emotional wellbeing of combining healthy eating and physical activity
- the role of sleep and rest as part of a healthy lifestyle
- common barriers to initiation of lifestyle change and how these can be overcome:
  - dietary:
    - perceived or actual cost of healthy foods
    - easy access to unhealthy foods
    - time to prepare and cook healthy meals and motivation
    - shortage of healthy food options in the local area
  - physical activity:
    - low importance placed on exercise
    - lack of time
    - access to appropriate facilities and costs
    - initial low fitness levels and low confidence
  - alcohol and drug use:
    - · fear of withdrawal
    - · access to support services
    - influences including environmental triggers and other people
- stages in the behaviour change process and how these apply to lifestyle change:
  - pre-contemplation
  - contemplation
  - preparation
  - action
  - maintenance
  - relapse, and how it can be managed
- approaches to goal setting and achievement:
  - setting short, medium and long term goals
  - importance of goals that are specific, measurable, achievable, realistic and time based (SMART):
  - different types of goals:
    - outcome

Approved Page 4 of 6

- process
- performance
- · recording goals and monitoring progress, and types of technology that can assist
- methods used to evaluate health education activities:
  - client evaluation questionnaires
  - informal conversations with clients
  - self-reflection on client responses to information including any difficulties in understanding
- ways that Aboriginal and/or Torres Strait Islander health workers and practitioners can:
  - provide feedback on healthy lifestyle education activities
  - contribute to the evaluation and planning of overall education and prevention programs.

#### **Assessment Conditions**

Skills can be demonstrated through:

- work activities completed within an Aboriginal and/or Torres Strait Islander health service, or
- simulations and case studies completed within a training organisation, based on comprehensive information about client needs.

Assessment must ensure the use of:

- interaction with Aboriginal and/or Torres Strait Islander clients either through actual work activities or simulations
- current consumer-based education resources from credible sources about lifestyle risk factors and healthy practices
- current Australian national dietary guidelines and associated resources:
  - full guideline and summary documents
  - consumer brochures
  - teaching tools
- current Australian national physical activity guidelines:
  - movement guidelines for the early years, children and young people
  - physical activity guidelines for adults
  - physical activity guidelines for older people
- visual aids for lifestyle education
- organisational procedures for referral.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

 be an Aboriginal and/or Torres Strait Islander person who has applied the skills and knowledge covered in this unit of competency through experience working as an Aboriginal and/or Torres Strait Islander health worker or practitioner, or

Approved Page 5 of 6

• be a registered health practitioner or a health educator with experience relevant to this unit of competency and be accompanied by, or have assessments validated by, an Aboriginal and/or Torres Strait Islander person.
