Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- worked with at least three Aboriginal and/or Torres Strait Islander clients in the primary health care context by:
- interacting and communicating in a culturally safe manner with and on behalf of Aboriginal and/or Torres Strait Islander clients in line with identified community needs and workplace requirements-
- working within the scope of their job role to apply the principles of primary health care in the delivery of health care services to each client, considering their individual needs
Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- Aboriginal and/or Torres Strait Islander history, including:
  - social structures, beliefs and values of traditional and contemporary Aboriginal and/or Torres Strait Islander communities in Australia
  - impact of colonisation as experienced by Aboriginal and/or Torres Strait Islander people
  - historical dilemmas faced by Aboriginal and/or Torres Strait Islander people (e.g. to acknowledge or deny Aboriginality)
  - impact of government policies and legislation on Aboriginal and/or Torres Strait Islander communities, families and individuals

- specific health concerns and issues for Aboriginal and/or Torres Strait Islander clients and community, including:
  - community perceptions of major health issues affecting them and underlying causes
  - key health statistics (national, state and/or local) for Aboriginal and/or Torres Strait Islander people compared to those of non-Aboriginal and/or Torres Strait Islander population (such as life expectancy at birth, infant mortality rate and age-standardised mortality ratios for selected health conditions)
  - chronic illnesses impacting on the Aboriginal and/or Torres Strait Islander community, including cardiovascular disease, kidney disease, respiratory disease, diabetes, cancer, obesity and asthma

- social, cultural and environmental factors impacting on Aboriginal and/or Torres Strait Islander health status, including:
  - traditional Aboriginal and/or Torres Strait Islander cultural practices and lifestyle
  - importance of land, tradition and cultural practices to Aboriginal and/or Torres Strait Islander people’s health
  - socio-economic and political factors
  - perpetuation of disadvantage
  - importance of personal achievement, education and supportive family/social networks
- strategies for Aboriginal and/or Torres Strait Islander families to maintain strong culture and supportive social networks, and maximise educational, employment and social opportunities for their children
- environmental factors such as overcrowding and housing and infrastructure conditions
- relevant definitions of ‘health’ (including those of the World Health Organisation and the National Aboriginal Community Controlled Health Organisation)
- principles of primary health care, including health promotion, illness prevention, treatment of chronic diseases, care of the sick, advocacy and community development
- relevant aspects of health care system, including:
  - relevant agencies such as Medicare, Centrelink, and Aboriginal and/or Torres Strait Islander health organisations
  - access to various benefits, including Medicare, pharmaceutical and related social benefits
  - federal and state legislation and regulations impacting on delivery of primary health care
- principles and organisation procedures and policies relating to confidentiality and privacy.

**Assessment Conditions**

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker
or:
- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.
