Contribute to managing the scene of an
emergency**

Release: 1

Assessment Requirements for HLTAMB013 Contribute to managing the scene of an emergency

Modification History

| Release | Comments |
|-----------|--|
| Release 1 | <p>This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.</p> <p>Supersedes HLTAMBSC503B</p> |

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- contributed to managing 1 emergency scene including:
 - acknowledging and responding to a range of views and clarifying information from persons at the scene
 - establishing and maintaining inter-service communication and liaising and networking with personnel from other services to negotiate solutions of required tasks
 - identifying and managing any hazards at the scene and facilitating information to the public concerning safety
 - managing multiple competing priorities
 - identifying and implementing available resources in accordance with established clinical guidelines and protocols.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant policies and procedures relating to emergency management including:
 - organisation policies and procedures
 - allied service procedures
 - State/Territory policies and procedures

- working knowledge of command, control and coordination responsibilities
- relevant current national standards such as
 - Australian Emergency Management Handbook Series
 - National Emergency Risk Assessment Guidelines
 - Australian/New Zealand Standard AS/NZS ISO 31000:2009 Risk management – Principles and guidelines
 - National Safety and Quality Health Service (NSQHS) Standards
 - Australian Guidelines for the Prevention and Control of Infection in Healthcare 2010
- real and potential hazards and their effects
 - procedures and techniques required to control resistive or combative patients or others in order to secure the scene
- roles and responsibilities of other organisations including services provided by medical and other emergency and allied agencies, and their limitations
- current practices, procedures and equipment used in communicating in the workplace including:
 - organisation confidentiality requirements
 - organisation policy and procedures relating to liaison with other organisations.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, resources and equipment as per local governing body including:
 - emergency vehicles
 - personal protective equipment
 - specialised equipment used in safe removal and egress
 - organisation policies and procedures or established clinical guidelines and protocols on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
