**Assessment Requirements for HLTDEN005
Assist in oral health care procedures during
general anaesthesia**

Release: 1

Assessment Requirements for HLTDEN005 Assist in oral health care procedures during general anaesthesia

Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.</p> <p>Removal of pre-requisites</p> <p>Supersedes HLTDA408D</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared equipment and assisted the operator with oral health care procedures for 3 different patients under general anaesthesia, including:
 - assisting in aseptically handling and correctly positioning the equipment during the procedure
 - following procedures to ensure patient safety during general anaesthesia
 - correctly maintained and stored instruments, equipment, materials and medicaments
- supported the dental team in the discharge care of 1 patient recovering from an oral care procedure following general anaesthesia.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- national and State/Territory legal and ethical requirements and considerations for dental assisting work including:
 - codes of practice
 - discrimination
 - duty of care
 - informed consent and statutory requirements of consent

- practice standards – Dental Board of Australia guidelines on infection control
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety
- practitioners who are authorised to administer general anaesthesia to a patient, and the assessment process required before oral health procedure is carried out
- levels of consciousness
- equipment used to administer a general anaesthetic and equipment used in monitoring patient pre- and post-operatively
- risks associated with general anaesthesia including risks of:
 - chest infection
 - cross-infection from instruments and handpieces
 - deep venous thrombosis (DVT)
 - anaphylaxis – from a reaction to anaesthetic
 - lowered patient’s body temperature – they may need extra blankets or warming devices to protect against hypothermia
 - compromised patient comfort – ensure pressure points on skin are monitored
- reasons for keeping accurate records of oral conditions and treatments
- reasons why patients need to follow pre- and post-operative instructions, and the importance of this
- medical emergencies and complications which may arise during and after general anaesthesia and appropriate medical responses and treatment to be given by the dental team.

Assessment Conditions

Skills must have been demonstrated in the dental workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace.

The requirement under performance evidence for the candidate to prepare equipment and assist the operator with oral health care procedures for 3 different patients under general anaesthesia must have been demonstrated using simulation prior to demonstration in the workplace and with members of the general public.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
 - sterile dental equipment and instruments
 - surgical personal protective equipment for aseptic technique procedures
 - operating trolley
 - suctioning equipment
 - access to defibrillator

- waste disposal equipment
- Dental Board of Australia guidelines on infection control
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessment must involve demonstration of tasks under the direction of the dental practitioner.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.
