## Assessment Requirements for HLTENN015 Apply nursing practice in the primary health care setting

### Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.</p> <p>Supersedes HLTEN608B</p>

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and the clinical presentation of 1 person in the workplace to reach a substantiated conclusion about possible nursing interventions related to their primary health care needs, in consultation with a registered nurse
- reviewed and updated a plan of care for 1 person to address their specific primary health care needs.

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- health challenges facing Australian communities
- environmental health issues facing Australian communities
- philosophy underpinning primary health care
- care of a confused person
- care of a person with dementia
- emergency and first aid management of conditions and injuries
- age specific health issues for infants, children, adolescents, adults and older people

- community and in-hospital resources and services available for medical conditions
- critical thinking and problem-solving strategies
- evidence-based practice
- health, including the illness continuum
- literature and professional bodies associated with primary health care management
- variety of forms of service delivery models including preventative, curative and rehabilitative.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - clinic room for the purpose of assessment
  - progressive notes of a person's medical history, de-identified for simulation
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.
