**Assessment Requirements for HLTENN054
Contribute to the registration eligibility and
assessment of donors**

Release: 2

Assessment Requirements for HLTENN054 Contribute to the registration eligibility and assessment of donors

Modification History

Release	Comments
Release 2	Release 2 HLTENN054 Contribute to the registration eligibility and assessment of donors supersedes and is equivalent to Release 1 HLTENN054 Contribute to the registration eligibility and assessment of donors. Updated: Mapping details and minor corrections.
Release 1	HLTENN054 Contribute to the registration eligibility and assessment of donors supersedes and is equivalent to HLTENN022 Contribute to the registration eligibility and assessment of donors.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- register and assess three people as donors for blood or blood products

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- apheresis
- organisational policies and procedures relevant to blood donors
- documentation and components of donor declaration form
- importance and potential impact of the quality of the donation, and the reasons for careful selection of donors of blood and blood components:
 - infectious diseases and incubation periods
 - age, height and weight
 - health of donor including recent surgery, invasive procedures, immunisations, injury and illness

- family health history
- frequency of donation
- geographical locations prior to donation which require special consideration
- lifestyle
- medications
- occupational activities that are considered hazardous
- recreational activities that are considered hazardous
- workers compensation
- safety of blood supply
- safety of recipients
- safety of service provided to customers
- safety of staff
- production of a quality product
- types of donations:
 - plasma
 - platelet
 - red blood cell plasma
- purpose and use of apheresis donations including timeframe requirements
- purpose and use of blood and blood products, including types and functions of infusion and transfusion
- safe disposal, and minimisation of waste of resources resulting from collection of unsuitable donations
- World Health Organization (WHO) guidelines:
 - selection of blood donors
 - international travel and health vaccination requirements
- Australian Code of Good Manufacturing Practice (GMP) for Blood and Blood Components, Human Tissues and Human Cellular Therapy Products
- Australian Red Cross service for blood and blood products donations
- Monthly Index of Medical Specialities (MIMS)
- National Blood Transfusion Committee (NBTC).

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).
