**Assessment Requirements for HLTPOP018
Develop a plan of action to address land
care issues in the community**

Release: 1

Assessment Requirements for HLTPOP018 Develop a plan of action to address land care issues in the community

Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Merged HLTPOP311C/HLTPOP412C.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified at least 2 potential land care issues in the community and developed and implemented a plan of action that includes strategies to deal with each issue, including identifying and communicating with stakeholders through the process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to land care issues, including:
 - organisation standards, policies and procedures, including:
 - manual handling
 - personal protective equipment
 - use of tools and equipment
 - scope of own role and responsibilities
 - approvals required and process of obtaining approvals
 - referral agencies and procedures
- environmental health strategies and priorities

- the relationship between land care issues and health
- land care issues and strategies to target the issues that relate, either directly or indirectly, to the possibility of disease transmission and/or health related complaints
- strategies to address specific land care issues, including:
 - necessary requirements to be adhered to when planting tall growing trees close to any power lines
 - ensuring that excessive vegetation growth around sewerage lagoons and in other areas of the community is controlled and maintained
 - planting and maintaining fruit and shade trees in the house yard and community and fruit and shade trees appropriate for the region
 - erecting shelters for shade in places where groups of people tend to gather for meetings or ceremonies
 - obtaining, planting and maintaining bush medicine in the community
 - planting and maintaining trees and shrubs to act as wind breaks against dust in the house yard, general community and outlying areas
 - developing the yard area to reduce the impact of overcrowding and problems with wind-blown dust
 - planting and maintaining appropriate trees around septic tanks to prevent cars from driving over them and collapsing drains or breaking lids.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
